## FACILITY AVAILABILITY (COMPLETED BY CFD)

The information below is based on a cursory review of the information provided on this form (pre-filing of a formal land use development application). Changes or modification in use, construction type or site design may impact fire requirements. The applicant is encouraged to process an updated form if the project changes. A more detailed review will be completed once a formal permit application has been filed with the Community Development Department, which will include reviewing existing and proposed public streets, private streets, and fire lanes for adequate width, turn-a-rounds, parking restrictions, overhead clearances, load capacity, turning radii, etc. to ensure that response times are not unnecessarily delayed.

- Closest serving fire station: \_\_\_\_\_
- Project is located within following Fire Severity Zone:  Very High  High  Moderate  N/A (Not in Fire Zone)
- Fuel modification requirements: \_\_\_\_\_ feet from structures.
- Project design features will need to be incorporated into building or site design:  Yes  No
- No conditions required  
 Draft CFD conditions for the proposed project as described above provided. No. pages attached: \_\_\_\_\_  
 CFD will submit conditions after the project has been submitted and deemed complete by the Planning Division  
 **If checked, the Planning Division is instructed to route submitted application/plans to district for further review**
- Fire flow requirements: \_\_\_\_\_ GPM @ 20 PSI for \_\_\_\_\_ hour(s).
- Fire sprinklers will be required:  Yes  No

*This Project Facility Availability Form is valid until final discretionary action is taken pursuant to the application for the proposed project unless a shorter expiration date is otherwise noted. **This document is not a commitment of service or facilities of CFD.** The completed form is to be submitted to the Community Development Department (1635 Faraday Avenue) as part of the discretionary permit application.*
