

Keep Carlsbad Beautiful

We would like to welcome you and your business to the City of Carlsbad. The city is home to over 7 miles of coastline, 3 lagoons, and 6,200 acres of protected habitat. The city's Environmental Sustainability Department works to protect water quality, promote waste reduction and recycling, reduce greenhouse gas emissions and preserve natural land for native plants and animals.

We invite you to join us in keeping Carlsbad beautiful. Your business can help protect these natural resources with a few simple measures.

Watershed Protection

Only rain in the storm drain! Storm drains flow directly into our creeks, lagoons and ocean.

Rain water and urban runoff can transport pollutants such as trash, oil, pet waste and fertilizers downstream.

Do not dump or wash anything to any outdoor drain.

Check your facility before forecasted rain and clean up as needed. Keep trash in its place, with clean trash enclosures and closed lids.

Cover or move materials and equipment to prevent contact with rain water.

Prevent runoff from sprinklers by regularly checking irrigation systems.

Reduce, Reuse and Recycle

Carlsbad businesses can "Reduce, Reuse and Recycle" and keep Carlsbad beautiful by protecting the environment. The City of Carlsbad Sustainable Materials Management Division partners with Republic Services, the city's waste hauler, to offer solid waste services, educational materials and on-site technical assistance to help your business implement waste reduction and diversion programs.

Habitat Management

Help us protect the spaces set aside for our native plants and animals.

Stay on trails and out of natural lands.

Contact the city before trimming or pruning any vegetation in natural lands for any reason, including fire prevention.

Climate Action Plan

The City of Carlsbad has adopted a Climate Action Plan to meet goals for reducing greenhouse gas emissions and promoting

a sustainable environment. Your business can help by joining the Carlsbad Green Business Program. Get started on your money-saving, sustainable practices today! Certification is free!

If you would like more information on any of our programs in Environmental Sustainability, please visit the city's website at www.carlsbadca.gov/environment.
