

State Street Drainage Improvement Project

April 2020

In April 2020, the City of Carlsbad will begin work to improve storm water drainage along State Street between Carlsbad Village Drive and Grand Avenue (see map below). The State Street Drainage Improvement Project will improve drainage by installing new storm drain pipe and five catch basins and replacing the existing curb and gutter to improve surface flows. State Street will be resurfaced and restriped once the new drainage is installed. These improvements will enhance street drainage, pedestrian and vehicular mobility, and overall safety during storms.

Work Hours

Construction is anticipated to occur Monday through Friday between the hours of 6 a.m. and 6 p.m. Saturday work is currently planned for April 4 and April 11 between the hours of 8 a.m. and 4 p.m. Work is expected to last approximately four weeks.

Given the current situation regarding COVID-19, the project start date and work schedule are subject to change. The city is striving to complete the work as soon as possible and to minimize impacts. For the most current city updates and information related to COVID-19 please visit carlsbadca.gov

What to Expect During Construction

- Crews, materials, and some work-related noise can be expected. Please pay attention to all signs in the area.
- Work will not take place in the entire work area at once. Work will be completed in segments.
- Security fencing and privacy screening will enclose materials and equipment.
- The weekly State Street Farmers' Market is currently closed due to COVID-19. It would be temporarily relocated to the parking lot on Roosevelt Street between Grand Avenue and Carlsbad Village Drive during this work. For information on the Farmers' Market please visit carlsbad-village.com.
- Weekend events are expected to occur without disruption due to this work. Please visit carlsbadca.gov for information on local events in light of COVID-19.
- No scheduled water disruptions.
- Onsite construction manager.

Project Details

- **Staging** – At the end of each work day, all materials will be enclosed in privacy fencing within a portion of the current work segment. Materials will be enclosed in privacy fencing and stored on-site over the weekend, in a portion of the work area.
- **Vehicle Access** – There will be one-way traffic within the work area along State Street during work hours. One traffic lane and the adjacent parking stalls will remain open at all times during work hours. All traffic lanes will be restored outside of work hours. Parking will be restored as much as possible outside of work hours and throughout the weekend.
- **Pedestrian Access** – Sidewalk access to adjacent businesses will be maintained throughout construction. Sidewalks must remain clear during work hours. Crosswalk will remain open during majority of work.
- **Paving** – A single day road closure will be required to pave the work area following construction. Paving is currently expected to occur in late April and will be noticed in advance. Please pay attention to all signs.

Thank you for your patience during construction.
