At the very heart of these comments is: There is finite vacant land in Carlsbad and an even smaller fragment of Vacant Coastal Land in Carlsbad. This small amount of is getting smaller due to documented coastal erosion and sea level rise. Over 32 acres of high-priority Coastal Open Space < Lance Use will be lost at Ponto/South Carlsbad. This very small finite vacant Coastal land is all we have to provide for the "infinite" demands for high-priority Coastal Recreation and Low-cost access to the Coast land uses from this "infinite" amount of future generations of Carlsbad and inland cities residents; and of outside Visitors to Carlsbad's Coast. How Carlsbad, and the CA Coastal Commission and HCD, uses those precious finite fragments of vacant Coastal Land is the vital question. Since 2017 Carlsbad citizens have been asking the Council for a true, honest, open and comprehensive consideration of these issues at Ponto. Over 4,500 emails have been sent to the Council, many City Budget Workshop requests, Hours of public testimony, and hundreds of pages of documents facts gained via official Carlsbad Public Records Requests.

The proposed land use changes to high density R-23 for the 8 properties of Site 18, seem to be being operating in a 'incomplete policy silo' that only looks at affordable housing and is not considering needed City Park and wider Coastal Land Use issues at Ponto. This 'policy silo process' seems to be counter to the wise consideration and use of the last remaining vacant and redevelopable Coastal land – particularly at Ponto/South Carlsbad.

Having managed creation of a Coastal City General Plan and several Housing Elements I understand and sympathize with the challenges City Staff and Council face in trying to provide for unlimited high-density residential development growth, but we need to look at preserving vacant land to provide needed City Parks to balance these high-density developments and provide needed Parks for these homes that have no/little yards. But it seems, as citizens have asked since 2017, there is better way to address those challenges.

The 9/13/21 City email states:

- "The city needs to identify locations for about 2,600 new homes to fulfill the state's requirement that all cities in the region provide enough housing to meet anticipated needs. Most of these homes **need to be affordable for people with moderate to low incomes, according to state formulas for household income levels.**"

Input: Per pages 33-34 of 3/23/21 2020 Housing Element Annual Progress Report to the Carlsbad City Council stated that:

"Prices of Affordable Housing – Generally, the federal and state rule is that housing is affordable to a given family if the family pays no more than 30% of its monthly income for housing expenses that include the rent or mortgage payment, property taxes, insurance, utilities, and the like."

The staff report then documents that a home in Carlsbad to be affordable to Low and Moderate Incomes, requires the following home sale or rental prices:

“Table 3: CY 2020 qualifying rent and utility expenses by number of bedrooms

Income Group	Number of bedrooms			
	1 bedroom	2 bedrooms	3 bedrooms	4 bedrooms
Very Low	\$1,155	\$1,444	\$1,675	\$1,906
Low	\$1,849	\$2,310	\$2,680	\$3,050
<b>Moderate</b>	<b>\$2,225</b>	<b>\$2,781</b>	<b>\$3,226</b>	<b>\$3,671</b>
Above Moderate	> \$2,225	> \$ 2,781	> \$ 3,226	> \$ 3,671

Source: "Household Income Limits 2020", City of Carlsbad (effective April 30, 2020)"

And the “for Sale Prices that are Affordable” for each income group:

Area Median Income	2020 Annual Income	Affordable Purchase Price
Very Low (30% to 50%)	\$34,651 to \$57,750	\$82,001 to \$186,000
Low (50% to 80%)	\$57,751 to \$92,400	\$186,001 to \$342,000
<b>Moderate (80% to 120%)</b>	<b>\$92,401 to \$111,250</b>	<b>\$342,001 to \$510,000</b>
Above Moderate	\$111,251 or above	\$510,001 and above”

However, Carlsbad developers seeking to justify increase residential density site in the name of ‘Affordability’ to Low or Moderate incomes are not providing homes that meet these affordable rents or purchase prices. Carlsbad’s land use regulations that promote larger unit sizes and building height and bulk work in the opposite direction and instead promote Above Moderate housing as clearly evidenced in Carlsbad’s Village where housing developed at 28-35 dwelling units per acre (that should be affordable to Low Incomes – i.e. 1-4 bedroom rent at \$1,849 - \$3,050, and at sales or purchase prices from \$186,001 to \$342,000) are instead being sold for \$1.8 to \$3 million as seen in the following:

RECENT SALES

2687 State Street

2 Bed | 2.5 Bath | 2,022 Sq. Ft.  
SOLD \$1,846,500

2683 State Street

3 Bed + Bonus Room | 2 Bath | 2,143 Sq. Ft.  
SOLD \$1,800,000

2677 State Street, 301

2 Bed + Office Space | 2.5 Bath | 2,150 Sq. Ft.  
SOLD \$2,250,000

2677 State Street, 302

3 Bed | 3.5 Bath | 2,717 Sq. Ft.  
SOLD \$3,000,000

This data is not a criticism of expensive housing or developers seeking to maximize their profits.

It simply shows that Carlsbad's land use regulations and 'Affordability quid-pro-quo for increasing land use density' are not functioning as intended to promote Affordability. Carlsbad's land use approach is simply increasing developer profit that serves to drive up land costs (land is a residual cost in land use development pro formas) and thus works to instead reduce Affordability. Simply changing land use to increase dwelling unit density to R23 or R-28-35 to provide "Affordable Housing is not really true.

It is suggested that with a change in land use to increase density should be a commitment recorded on the land to actually provide the number of Affordable units being cited as the rationale for increasing the density. This is an honest and accurate 'Affordable quid pro quo'. This commitment, along with land use regulation reform, will help reduce speculative land costs that discourage Affordability.

Citizens are being inaccurately told that density increases are needed to provide Affordability yet developers do not create, nor are not required to create, those Affordable units.

Unaccountable density increases do however create more speculative developer profits, and increase land costs. Density increases also increases the need for City Parks (high density by its nature depends on City Parks and Open Space for livability) along with other City services and infrastructure. Yet unaccountable density increases not does not provide actual Affordable housing. So at the next City Housing Element even more Affordable Housing will be required since the prior unaccountable density increases did not create it. During this unaccountable process vacant land disappears. That vacant land is vitally needed to provide City Parks to balance and provide useable park space for residents in high density apartments/condos.

The City Staff's documents that one of the Site 18 land owners/developers are requesting an increase in land use density to R-23 that is to provide housing Affordable to Moderate Incomes. Yet there is no developer commitment or City requirement to create the numbers of Moderate Income housing identified in City Staff's Site 18 documentation.

There is no accessible City Park in the area to provide the needed City Park and open space needed for higher density development – the 'Veterans Park solution is 6-miles away and is effectively unusable for citizens at Ponto.

- "We'd like your input on 18 proposed locations for future housing chosen based on public input gathered last year."

Input: Site 18, was not a site 'chosen based on public input gathered last year', but was just recently chosen by a speculative developers of Site 18. As staff documents: "Staff has received a letter from one property owner expressing support for higher density." Site 18 consists of 8 properties, so it is unclear if all 8 properties are requesting higher density. Site 18 is being proposed as a "Moderate Income housing site" (i.e. a site that will provide 90 dwelling units [DU] affordable to Moderate Incomes as noted in the City Staff's analysis:

"Potential Housing: Site 18

Site Description: Vacant

Property Name: North Ponto Parcels

Site Group Acres: 5.9

Potential units site can accommodate (all parcels): 90

Income Category: Moderate (based on proposed minimum density)”

There is no copy of the ‘letter’ showing an accountable Affordable rental or developer commitment, or a requirement by the City that Site 18 will be developed and rented or sold to provide the 90 dwellings Affordable to Moderate Income as noted above. If the Site 18 developers would commit to recording providing that affordability it would be a responsible and accountable Affordability quid pro quo for consideration.

- The City Staff report also does not discuss the various land uses changes to increase density in a properly holistic or fully comprehensive planning way. All sites should be compared on all the key metrics for suitability. For high density housing, the most fundamental metric is walkability to a meaningful City Park for outdoor recreation and breathing room. This is fundamental in that high density housing, by definition has little/no park and recreational open space - high density means many people living on a small area of land. High density without significant large and usable City Parks within walking distance simply creates dense urban environments that over time will not sustain quality of life.

In addition for Site 18 and other at the Coast locations there are other land use demands of large inland populations or families and visitors come to the Coast and increase even more demands for City Parks. A comprehensively considered Coastal Land Use Plan needs to assure vacant and redevelopable lands along the Coast provide sufficient Park land acreage for local Park needs (i.e. high density development requires more Park acreage), but also to provide extra Park acreage to address the Park needs of hundreds of thousands of inland residents and visitors to the Coast. Densifying the Coast with high density residential development runs counter to this need for Coastal Parks.

The following email and attached images were submitted on 9/8/21 that illustrate the City Parks needs generated by R-23 higher density and why it is important to provide meaningful City Parks within walking distance to higher density development.

Thank you for your consideration. You say it is Our Home Our Future. We hope you do the right thing for present and future generations of Carlsbad and CA citizens and visitors. Please do not let short-term and short sighted silo thinking lead to a bad decisions on the use of the last bit of vacant coastal land.

Respectfully,  
Lance Schulte

**Subject:** Why a park is needed within walking distance to multifamily housing & why a meaningful Coastal Park is needed for Ponto/South Carlsbad - public input to DLCPA, Housing and Park planning

Dear Carlsbad City Council, Planning Commission, Parks Commission and Housing Commission; and CA Coastal Commission:

I request this email and attachments be provided as official public input to the Carlsbad's Draft Local Coastal Program Amendment, Housing Element land use changes, Parks Master Plan Amendment, and land use activities at Ponto and Coastal South Carlsbad.

For many years Carlsbad and People for Ponto Citizens have been trying to communicate the need for a meaningful Coastal Park for South Carlsbad. There is NO City Coastal Park west of I-5/rail corridor in South Carlsbad (yet there are 10 such City Parks totaling over 35 acres in North Carlsbad). The Citizens and visitors to South Carlsbad have No Coastal Park, and Ponto is the last vacant unplanned Coastal land left to provide this needed Coastal Park.

The attached images of high-density housing (R-23) in Carlsbad clearly illustrate why City Parks are needed within walking distance to multifamily housing. It also illustrates why meaningful Coastal Parks are needed to provide Coastal Recreation for a unlimited growing population that will primarily be housed by high-density housing that minimizes outdoor recreation space.

High-density housing, by definition, provides minimal outdoor recreation space per dwelling unit. So City Parks are the only meaningful sized areas where high-density housing occupants (particularly Children) can have room to play. This is particularly critical in regards to Coastal Parks, as Coastal Parks absorb the Coastal Park demands/needs from significant large inland and visitor populations. This critical need is made all the more serious given sea level rise and coastal erosion impacts to Coastal Open Space.

The State of California is advancing dense high-density housing to promote affordability, yet most of the benefits of simply increasing density tend to result in increasing developer profit margins and thus increase residual land costs as Carlsbad has seen in Carlsbad Village. The State of California Housing Law currently does not address the logical and concurrent need to both increase City Park acreage and equitably distribute that City Park acreage within walking distance to housing – particularly high-density housing.

Having a City Park within a 10-minute walk from high-density housing is vital for the long-term viability, livability, and quality of life for high-density housing and the citizens and families that live in this housing. Hopefully the City of Carlsbad can advance the concurrent increase in City Park acreage and 10-minute walk accessibility in its Coastal land use, land use, housing, and parks plans.

As a former city, coastal and urban planner having worked in high-density situations I have several planning policy ideas that maybe helpful if the City Council would like to discuss them.

Thank you for your consideration.

Lance Schulte

**Subject:** Give input on locations for future housing

# OUR HOME OUR FUTURE

## Give input on locations for future housing

The City of Carlsbad is seeking input on where new housing units could be built in Carlsbad to satisfy a state requirement that cities accommodate their fair share of the region's housing needs, including homes for people of all income levels and stages of life. Eighteen proposed locations were chosen based on public input gathered last year, input from a citizens advisory committee and direction from the City Council.

Of the 3,900 new housing units that make up Carlsbad's fair share, about 2,100 need to be affordable for people with very low to moderate incomes. The city had already identified vacant residential locations and planned housing projects to help meet the state's housing requirement, but it wasn't enough to meet the need for 3,900 units.

[Review sites on an online map.](#)

Community members have three ways to provide feedback:

### Survey

An [online survey](#) will be available through Oct. 1.

### Virtual public workshops (held via Zoom)

Wednesday, Sept. 15, 5:30 to 7 p.m. | [Register here](#)

Wednesday, Sept. 22, 5:30 to 7 p.m. | [Register here](#)

City staff will provide an overview of the city's housing plan update process and how the potential housing sites were selected. Participants will then break into smaller groups to ask questions and provide input on the potential locations.

\*Persons with a disability may request meeting materials in appropriate alternative formats as required by the Americans with Disabilities Act of 1990. Reasonable accommodations and auxiliary aids will be provided to effectively allow participation in the meeting(s). Please contact Sue Armstrong at 760-434-5352 (voice), 711 (free relay service for TTY users) or

[sue.armstrong@carlsbadca.gov](mailto:sue.armstrong@carlsbadca.gov) at least 48 hours prior to the meeting to discuss accessibility needs.

### **Comments via mail or email by Oct. 22**

Scott Donnell, Senior Planner, Community Development  
1635 Faraday Ave., Carlsbad, CA 92008  
[scott.donnell@carlsbadca.gov](mailto:scott.donnell@carlsbadca.gov)

The city is seeking input on proposed sites that would need to be rezoned, either to allow housing where it's not allowed today or increase the number of units allowed on sites already zoned for housing. Owners and people living within 600 feet of all the potentially affected properties have been notified by mail of the potential rezoning.

The city would not build housing on these sites. Instead, the city's obligation is to identify space for housing and create policies that would facilitate new housing to be built based on different income levels and stages of life.

### **Next steps**

City staff will update the map of proposed sites based on community input and then share it with the City Council in early 2022 for approval to move forward with the environmental review of those sites.

- Sept. 2 - Oct. 22, 2021: Public input on potential sites for future housing
- Early 2022: City Council public meeting to receive input and consider endorsing final map(s) for environmental review
- Spring 2022 - Winter 2022/2023: Environmental review of housing sites and public input on environmental analysis document

### **Background**

The City of Carlsbad has updated its housing plan, something required by state law to ensure the city is meeting the housing needs of all members of the community. The new plan includes policies designed to encourage the number and types of housing the state requires. It also identifies locations where new housing could be built. In all, the City of Carlsbad needs to show how about 3,900 housing units could be built over the next eight years to meet state requirements.

**Subject:** RE: Carlsbad Citizen Questions and request to Carlsbad City Council-Planning-Parks-Housing Commissions for Carlsbad Staff proposed Draft LCP-LUPA-Housing Element & Parks Master Plan Updates - 11-30-2020

Dear Carlsbad City Council, Planning Commission, Housing Commission, Parks Commission, Housing Element Advisory Committee, CA Coastal Commission & HCD:

Attached is 2020 Nov 30 public input on the Draft Housing Element Update, and Draft Local Coastal Program Land Use Plan Amendment and Parks Master Plan Amendment. Because the Draft Housing Element Update refers and relates to and is thus connected with these other processes, particularly the Draft Local Coastal Program Land Use Plan Amendment process, the comments are sent to all.

Thank you.

Sincerely,  
Lance Schulte

Submitted: May 28, 2020

Dear Carlsbad City Council, Carlsbad Planning and Parks Commissions, and Coastal Commission:

The City Budget should address both short-term Covid-19 impacts, and near/longer-term investments needed for Economic Recovery and Revitalization.

The quality of our Carlsbad coastline, Coastal Parks and open spaces are continually rated by Carlsbad citizens and businesses as the critical foundation of our quality of life, economic strength, and tourism industry. Ponto Coastal Park is a critically needed investment, and the last opportunity for the City to make an investment for Carlsbad's long-term sustainability. South Carlsbad Citizens, visitors, and the Visitor Industry have no Southern Coastal Park. Ponto is the only place to provide that needed investment for residents and visitors, and advance Economic Recovery and Revitalization of South Carlsbad's significant Visitor Industry. Coastal Recreation is the major attraction for visitors.

With these understandings we submit the following testimony and data from the City's FY 2019-20 Budget Public Input Report that highlights the documented significant number of citizens asking for a Ponto Coastal Park. We also note concerns about the Report's dilution of specific citizen input provided at both the March 4, 2019 and 2020 Citizen Workshops.

Citizen input on the need for a Ponto Coastal Park was the most numerous specific place need/desire citizens mentioned in the City's:

- Budget Public Input process,
- Draft Local Coastal Program Amendment process, and
- Parks Master Plan Update process.

The Budget Public Input process documented 85 specific, verbatim citizen comments on Ponto area park needs and over 90% of citizen requests that Council budget to address this need. These 85 Verbatim Citizen comments (listed at the end of this testimony and data) specifically address how they would like their (Park) tax dollars budgeted. Additionally, 2,500 similar public input email/petitions were submitted as public comments on Carlsbad's Draft Local Coastal Program Amendment and Park Master Plan Update processes spoke to the need for a Ponto Coastal Park.

As you know, the 11-acre Ponto Planning Area F site is for sale. This site is similar in size/shape as Holiday Park, providing a Coastal site for similar multipurpose community functions.

Carlsbad's Local Coastal Program (and thus General Plan and Zoning Code) requires the City to first consider and document the need for a "Public Park" before any land use can be planned for the Planning Area F site.

The City's Park Master Plan already documents the need for a Ponto "Public Park", showing the area as "unserved" by City Parks and an area of Park "inequity" correlating well with Citizen input.

The City also received offers of potential donations, or cost-saving collaborations from Carlsbad Citizens and non-profits to advance the much needed Ponto Coastal Park. The City disappointingly has not replied to these special opportunities.

**Therefore, it is requested the City budget for a Ponto Coastal Park and contact the Planning Area F landowner regarding site purchase.**

Consistent with Budget Public Input Report page 3 it is requested that this this testimony and data be provided to the Planning and Parks Commissions; and Coastal Commission as public input on the City Staff's proposed 1) City Budget, 2) Draft Local Coastal Program Amendment, and 3) Parks Master Plan Update.

Thank you.  
People for Ponto

The following data is from the Carlsbad FY 2019-20 Budget Public Input Report:  
<https://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=38546>

In reading the data different text treatment is used to differentiate between actual page number and text in the Report, Important Report text, and public comments and analysis of Report text. Following is a legend to those text treatments:

- (p.X) is the Report page number where the information is found, and normal text is the actual Report text.
- Text in **Bold Face** is particularly important Report text.
- **Arrow bullets and Text in Bold Italic Text** are analysis and comments on the Report's information.

Introduction (p. 3):

---

- **Members of the public have a right to be involved in decisions affecting their lives.**
- **It is the city's responsibility to seek out and facilitate the involvement of those interested in or affected by a decision. The city errs on the side of reaching out to people who might not be interested, rather than potentially missing people who are.**
- **City staff provide balanced and factual information to the public and do not engage in advocacy.**
- **Public dialogue strives for a focus on values over interests and positions.**
- **Public involvement planning is coordinated across all city departments to ensure consistency and avoid process fatigue.**

On (p. 5) specific Verbatim Public Input was generalized by City Staff as follows:

---

Main Themes: The following themes were a high priority overall:

- **Neighborhood quality of life**
- **Access to nature, trails and open space**
- Environmental sustainability
- Traffic and mobility

Most Important Services: City services in the following areas were identified as the most important:

- **Neighborhood quality of life**
- **Parks and recreation**
- Law enforcement
- Fire and paramedic service

- Environmental sustainability

Specific Areas for Budget Enhancement: When asked which services they would like to see enhanced in next year's budget, the top five responses were:

- **Neighborhood quality of life**
- **Parks and recreation**
- **Environmental sustainability**
- **Mobility/transportation**
- Arts and culture

- *The lack of a Coastal Park at Ponto impacts all South Carlsbad neighborhoods' quality of life. Carlsbad's Park Master Plan documents that Ponto and Coastal South Carlsbad are "not served" by parks and Ponto and Coastal South Carlsbad is an area of park "inequity"*
- *The City and CA Coastal Commission are required to consider and document the need for a "Public Park" before any planning to allow any land use on Ponto Planning Area F. For over 10-years the City failed to disclose and follow this requirement – making multiple "Ponto planning mistakes". The City will now have to correct its multiple "Ponto planning mistakes" as part of the Draft Local Coastal Program Amendment*
- *The lack of a Park at Ponto also impacts both Environmental Sustainability and Mobility/Transportation:*
  - *Prevents parks within walking distance, forces driving (and the need for more parking in our Park) to access parks.*
  - *Forces South Carlsbad Neighborhoods to drive long distances to North Carlsbad and/or Encinitas to access a Coastal Park*
  - *Congests North Carlsbad and/or Encinitas Coastal Parks with South Carlsbad Coastal Park demands*
  - *Congests North Carlsbad and/or Encinitas roadways and parking facilities with South Carlsbad Coastal Park demands.*
  - *Importantly, it would forever negatively impact the economic sustainability of Carlsbad's Visitor industry. There are thousands of inland South Carlsbad resort/hotel rooms that have no access to a Coastal Park. This will ultimately undermine the attractiveness and competitiveness of South Carlsbad's Visitor industry and the tax revenue the City receives from that industry.*

#### Word Maps (pp 6-8)

Staff provided 3 'word maps' saying the show the words mentioned at the March 4<sup>th</sup> 2020 workshop attend by 38 citizens.

- *There is citizen concern about the accuracy of these word maps and what is conveyed on pages 6-8 of the Report.*
- *Several of those 38 citizens, provided specific written (individual index cards) and verbal (round table flip chart notes) Pubic Input several stating the need for a "Ponto Coastal Park", another mentioned a "liner Park", and several mentioned the "Senior Center", all these written/verbal comments were not accurately documented or reported on pages 6-8. It appears the City Staff interrupted and translated/transformed the actual citizen comments (as documented in the index cards and flip chart notes) when creating the word maps. There is a concern that specific citizen input provided at the actual workshop was not accurately*

reported in the Public Input Report to the City Council. As citizens we are concerned that our input is accurately reported and conveyed to the City Council.

- Surprisingly no word map was provided in the Report for the much larger (1,330 to 1,710 person) March 5-22, 2019 Public Input process. Following is the actual word map the city showed participants at the March 4, 2019 Public Input Workshop. The image of the word map was taken with a participant's cell phone. It summarized the magnitude of citizen needs/desires expressed at this larger Budget workshop.

The word map graphic above from the March 4, 2019 Workshop although not summarized by Staff in the Report is clearly documented in the Verbatim Comments (Public Input) that was included in pages 24-91 of the Report and accounted for below.

Verbatim Comments (pp 24-91): **Number of times a specific Place Name was mentioned:**

- **Ponto, Zone 9, and Southwest Carlsbad: 85 times** (see below for list of Verbatim Public Input)
- Village: 23 times, this is 27% as much as Ponto area
- Carlsbad Senior Center: 7 times, this is 8% as much as Ponto area
- Agua Hedionda Lagoon: 3 times, this is 4% as much as Ponto area
- New Village Arts: 3 times, this is 4% as much as Ponto area
- Barrio: 2 times, this is 2% as much as Ponto area
- Calaveras: 2 times, this is 2% as much as Ponto area
- Alga Norte Park: 2 times, this is 2% as much as Ponto area

- Poinsettia Park: 2 times, this is 2% as much as Ponto area
- Veterans Park: 2 times, this is 2% as much as Ponto area
- Rancho Carrillo: 1 time, this is 1% as much as Ponto area
- Hub Park: 1 time, this is 1% as much as Ponto area
- Crossings Golf Course: 1 time, this is 1% as much as Ponto area
- Robertson Ranch: 1 time, this is 1% as much as Ponto area
- Palomar Airport: 1 time, this is 1% as much as Ponto area

➤ ***As the Budget Public Input Report suggests, reading of each of the Verbatim Comments of actual public input should be done. The place names area specific list above does not include broad places such as “beaches” the names of specific roads, and other names that appeared vague. It is clear in reading through and counting the place name references that the Ponto area expressed as Ponto, Zone 9 (i.e. Local Facilities Management Plan Zone 9), and the coastal park references to Southwest Carlsbad and South Carlsbad was by far the greatest area of public input. This makes perfect sense in that for half of the City Ponto is the last significant vacant Coastal land available to address two of Carlsbad Citizens’ most important budget concerns ‘Neighborhood quality of life’ and ‘Parks and recreation’ that relate to core community values around Carlsbad’s “Beach”, “small beach town character”, and “valued open space”.***

***Following is the listing of the Verbatim Public Input (Appendix A in Public Input Report, pp 24-91) that specifically referenced Ponto or a clear reference to Ponto such as Zone 9 or Coastal Park needs in Southwest Carlsbad. There are many more comments such as “The purchase of remaining open space for preservation of the last remaining coastal areas.” that logically and clearly refers to the Ponto situation. However these many additional comments were excluded from the list below since they did not specifically mention Ponto, Zone 9, or SW Carlsbad place names.***

***Of the 85 citizen comments below specifically referencing Ponto, 77 or 90.6% were asking the City to budget for a Ponto Coastal Park. Only 8, or 9.4% of those citizen comments were not asking for a Ponto Coastal Park. We are not sure if the 8 commenters knew about the City’s now acknowledged “Ponto planning mistakes” dating back over the past 10-years, as the City only first briefly acknowledged this recently on 1/28/20. We have found once citizens are truly aware of the facts and prior “Ponto planning mistakes” there is almost uniform desire for a Ponto Coastal Park. There is citizen concern that these “Ponto planning mistakes” are not being fully, openly and accurately being disclosed to Citizens during the various Public Input processes, thus tainting those Public Input processes.***

Verbatim Ponto City Budget Public Input from pages 24-91 of FY 2019-20 Budget Public Input Report:

1. My biggest disappointment is the lack of park facilities in my section of the city, near South Ponto Beach. Lots of open land but no park within at least 2 miles. This should be a city priority
2. It used to be the beach but now Ponto & South Carlsbad are more like rocky shores. I’d like to see the rocks cleared up and more sand added to these beaches
3. COMMENT TRAFFIC IS BEING SPAMMED HERE TO PUSH THIS PONTO PARK PLOY (PPP) Develop Ponto and have the hotel maintain our beach! It’s all rocks currently!
4. Ponto Beach. We do NOT need a commercial development or hotel there. That needs to be a park and/or open space for future generations.

5. Ponto beach.
6. Don't ruin South Ponto Beach with condos and/or hotel, need to restore the sand on the beach.
7. Like most residents and visitors I treasure the beach. I feel the highest priority should be open space and parks that serve the beach region. Particularly important is the open space still available in the Ponto region. There is ample space here for an extraordinary area of open space and even a park. There is not one of either of these in the southwest quadrant near the beach. Children cannot walk safely to a park from that area. Open space and a park in the Ponto area would serve all residents, visitors, and the business community.
8. Beaches, parks, safe neighborhoods, OPEN SPACE! Need Beach parks like Del Mar Powerhouse/Sea Grove Park & Encinitas Community Park. Ponto Beach needs some attention.
9. I love the beach and the parks and fields and open space and hiking trails in Carlsbad. I wish we had more!! We have had 3 kids in sports in Carlsbad. Currently, field/park space is very limited and often over committed. Currently, there aren't enough fields to meet the need of the community. Adding more parks and fields would create a better community in the following ways.... The sports played on these fields help keep our kids fit and healthy; It keeps kids busy and out of trouble; It fosters friendships and community; it teaches team work and fosters dedication and teaches a willingness to help others succeed; it brings in community \$\$ from other teams who come to play on Carlsbad fields; It's a wonderful way to showcase our city to others who will want to return thus helping grow tourism. Additional Parks would offer the same benefits. We do not need more high density building. And, Please do NOT ruin Ponto with more building!!!!!!
10. We love the beach and the small-town feel Carlsbad has. We love the scattered open spaces and trails. Carlsbad is a great place to live and spend time outdoors, like the Ponto area. Let's keep it that way by not developing every last square foot into a condo complex, hotel or shopping mall, if that's what you want please move to Oceanside.
11. Let us protect the valuable open space that is left and not develop every square inch. Especially at the beach, let us save the land across the coast highway from Ponto Beach and make a beautiful park, not more condos and hotels. Carlsbad is in great financial shape and does not need to go after every development and tax dollar it can get. Some things are more important, like quality of life, than a fat wallet. I know that this will fall upon deaf ears amongst the two older members of the City Council, but maybe some rearranging of priorities is in order.
12. Would love to see the last areas of open land to stay that way. I have lived here for 25 years and have seen a tremendous amount of development eating away at the open beauty of the area. We have enough shopping centers and homes. Please leave the area at Ponto open and do not approve the Ponto development.
13. Keep Ponto Beach development free!
14. Preserving Open Space and Building Ponto Park in the South West Quadrant!
15. I second Tisha Klingensmith's comment and all the others regarding Ponto Beach development.
16. Preserving open space and maintaining high quality Parks and Rec with park location emphasis on geographical location. It's time to build a park in the SW quadrant near the beach for locals and visitors alike. Veterans Park is not a solution for each quadrant's deficiency, particularly in the south.
17. We need more parks, especially in southwest Carlsbad!
18. I agree, we need more parks and open space. I live in Zone 9 and don't have a park anywhere within walking distance.
19. We need to continue to preserve open space and NOT develop Ponto into an awful condo complex. We would love a park!

20. We need a park in the Ponto area and not a development. It is the last open space next to the beach left
21. I agree with the need to preserve open space throughout Carlsbad and NOT develop Ponto into awful condo complex.
22. We need to preserve our open space --it's what keeps the city feeling like a small town. We need more parks -esp one at Ponto in the SW quad!
23. Preserve the open space and build a park in SW quadrant at Ponto. We do not need or want any more huge developments, especially right by the beach in one of the last remaining open spaces. Once it's built, you can't un-build it. Build Ponto Park in SW quadrant. Do the right thing. Especially for our children and grandchildren. They won't thank us for building outrageously tall high density condos, hotels and unnecessary shops right by our gorgeous beaches. The only people this benefits are some wealthy developers, not the people of Carlsbad. Think long term, not short term. We have a beautiful city and community-preserve it now or it's gone forever!
24. We really need a park in the southwest quad by the beach. This could be an amazing asset (on SO many levels) for the community and visitors alike. The revenue stream would return the city investment in spades!
25. Parks. Needed in Ponto area our children in this area don't have a close park. And the house lots in our area are small.
26. I agree that we should be very mindful that the citizens of Carlsbad voted out the retail space plan at the power plant site a few years ago. The new Ponto project should not replace that. Citizens should be part of the decision to build out that area
27. We need to preserve our open space and we need a park at Ponto!
28. We need a park in the Southwest quadrant of our community. Safety in the community is what we like best in this area
29. Carlsbad's small town feel, friendly atmosphere and location has made it our ideal place to live for the past 20 years, We live across from South Ponto Beach and DESPERATELY need a park for our area residents. It would be sad to see the area overbuilt with high density projects and not retain some of the open space at this southern entrance to our "Village by the Sea". PLEASE help preserve some of its appeal before it is too late.
30. I love the quaintness of the Village, the open land areas, trails, small businesses and the arts. A huge NO to PONTO. Please stop the excessive building and development of the open areas of our beautiful and unique city. We have lived here for over 30 years and are sad to see so much over development. Keep our special village a village, and please don't turn it into another ordinary city.
31. Favorite is small town feel and the beach --the beach provides us with all the open space we need. The city has enough open space with all the lagoons, etc. --we don't need any more parks --especially at PONTO --I am thrilled to see and drive by every day the new resort at La Costa which is in Encinitas and that is what we need here at the South end of Carlsbad --more residential --NO more open space
32. What I love about Carlsbad is that it has a small village feel but it also has the beach and some restaurants and then little town. I really would like more to walk to around the Ponto area. Specifically I think it should be more of a beat centered area with places to grab ice cream or grab some food or a coffee and walk to the beach.
33. I love that our village that is not a strip of 101. The quaint cottages helped Carlsbad have a downtown feel. It has several streets with unique interest. I love the Trees on Grand! The landscape of the trees setting the height of the town. Unfortunately the taller buildings are killing that. Vertical dwellings are taking over.. think of the reason you travel to Europe. It's not

for Developers Generica. We also want the NRG power plant space into a Park... and... I would LOVE for the city to finish the rail trail to Ponto. Imagine taking a trail to Ponto? It would be a dream!

34. Our San Pacifico Community and the surrounding neighborhoods need a local park. So far Carlsbad has no real performing arts venue of any size to meet the needs of a city of more than 100,000. This should be a serious consideration when the new civic center is being designed.
35. We need more coastal parks and open space. Especially in zone 9
36. protect more open space, including Ponto
37. We need Veterans Park completed and Ponto park developed. Everyone in Carlsbad is engaged and we have been talking about the park deficits for a while now. Veterans park is over-due!!!
38. Our libraries are the best in the region! But I have to put them 4th to our Neighborhood quality of life, which is being impacted by huge developments destroying our property values, our piece of mind and privacy. We do need to insure that our environment is cared for, since all of these housing projects are going in. I do love our parks but we need to insure that the SW quadrant has their share of parks (think-Ponto).
39. Zone 9 (in southwest Carlsbad) does not have a park within walking distance! I hope the City can remedy this.
40. Ponto needs a park not a hotel or more condos. Please stop building on every last piece of land
41. See previous comment concerning the lack of a local, beach oriented park in the South Ponto area. Ditto a performing arts venue.
42. PLS get the Ponto Proyect development going....., that area of Carlsbad needs it asap
43. I support Ponto Development. PLs get it going...
44. Ponto has 2 miles of unobstructed beach access and a lagoon that already act as a "park within walking distance". The Ponto project was approved long ago and is part of the citizen approved master plan. Please get it done.
45. Strengthen and protect the financial stability of the City. Businesses pay a significant amount of taxes, property, sales and income and those employed spend and live here. Encourage affordable housing opportunities for everyone, think outside the box and find some unique solutions. Complete build out in areas available, Ponto Beach is a great opportunity and the project is well thought out, get it built. And please don't become a 'Nanny City' and waste time to pass frivolous laws restricting straws, plastic bags, soda consumption, etc.
46. Development of open space and parking space in the Ponto region
47. Specifically, I want the city to remedy the lack of equal access to parks and trails evident in the southwest quadrant of the city. I support a park project at Ponto: in the long run, the south coastal gateway to Carlsbad needs a welcoming park with beach access and supporting facilities. Though less extensive than Village beach areas, good design would merge a Ponto park with access to beach and access to the 'memorial area on the bluff at city border with the ecology of the Batiquitos Lagoon adjacent to make a marvelous creek to beach environment accessible for all and ever.
48. There are two miles of unobstructed beach plus the lagoon within "walking distance" of the neighborhoods near Ponto. The project was approved long ago and is part of the Master Plan approved by the citizens of Carlsbad. Zoning changes and project vote downs are often just another way to steal private property.
49. Local park deficits continue to be a problem. Let's please support Ponto Park development. We as a city are losing an unobstructed landmark in our community. Please share some of that with local residents. And, did I mention parking??
50. The extreme southwestern (Ponto) area of Carlsbad does not have a park within walking distance -this is my top priority to fix.

51. We have wonderful neighborhood parks, but not in Ponto and it's on the beach; Veteran's Park is more of a hiker/nature lover's place to enjoy nature.
52. We need a park at Ponto - to serve not only residents, but visitors and tourists.
53. A park is much needed in SW Quadrant of the city
54. Ponto Park. So much has been done for businesses, tourism, etc. This is the last bit of Carlsbad coast line left. And the residents could use more park space in the south part of the City. I don't want to see this area developed. Carlsbad has become overdeveloped.
55. I want to see a park for the Ponto road area. I feel that that area should not be used for condo - residential development. It is so important to showcase that wonderful piece of property, which is so rare to find all up the coast of Calif. and would be a welcomed park for all as you drive north into Carlsbad. ALSO I am very concerned that the Palomar Airport and the larger airplanes the new plan will bring and ask that the city stay involved to support our concerns, thank you for help I appreciate all off the councils work.
56. Ponto area open space and park development
57. Take control of our coastline, bring fire rings to Ponto beach, every family should have the experience of gathering around a roaring fire on evening.
58. Cancel the Ponto development tragedy. Build a free park and keep the free beach parking there.
59. Buy the land for open space on Ponto Drive and build a park in Zone 9 that has no park even though developers paid into the park fees for 20 + years.
60. support Ponto development
61. Now that we have removed the jetty and allowed Warm Waters to wash away, and now we are planning to build on Ponto, where will locals access the beach? If 50% of responders stated the beach is the best part of Carlsbad living, why are continually squandering this gift? I know the council would live to sell Agua Hedionda to a developer too. When will there be decisions made to maintain our quality of life? Furthermore, I selected transportation because my commute time has DOUBLED in the past 5 years. The 55mph speed limit on El Camino is a joke. It takes me 2 light cycles just to cross each intersection now due to this unmitigated growth with no regard for how people will get around. I'm continually dismayed by this city.
62. Preserve the open space at Ponto. Keep traffic under control.
63. Preserve open space in zone 9
64. Money for persevering open space in zone 9 and building parks in the SW quadrant!
65. More parks and open space in Southwest Carlsbad!
66. Why another proposed hotel at Ponto? There are an abundance of hotels & stores already available ---even more than necessary. Preserving nature & some green space is more important than more concrete & businesses with "lease available" signs everywhere!
67. Prop to aid Ponto to keep it natural, as park area & natural habitat.
68. Put budget money towards Parks and Recreation, specifically Preserving Open Space in Zone 9 and Building #PontoPark in the SW Quadrant (p 84)
69. Please put budget money towards Parks and Recreation, specifically Preserving Open Space in Zone 9 and Building #PontoPark in the SW Quadrant (p 85)
70. need a park in the southwest Carlsbad post development
71. Parks in southwest Carlsbad!
72. Zone 9's lack of park and open space is sad. The SW quadrant needs more places to take kids to play, seniors to walk and get outside, and for the community to gather. A park at Ponto would be an ideal place for that and would make for a beautiful and welcoming entry into Carlsbad for locals and tourists.
73. We need a park site near Ponto Beach on the property now slated for a 5 star hotel which has not been built despite attempts by several developers over the last ten plus years.

74. Please spend more on Parks and Recreation. We need to Preserve Open Space in Zone 9 and Build Ponto Park in the SW Quadrant. We do not need more homes congesting the already packed Coast Hwy. Adding sand to Ponto Beach would be nice too -too rocky!
75. I'm asking the City to put budget money towards Parks and Recreation, specifically Preserving Open Space in Zone 9 and Building #PontoPark in the SW Quadrant -this will enhance the quality of life in Carlsbad, contribute to the highest and best use, meet the requirement to have a park in this area, and make the area so desirable that it will allow raising of local tax rates (I don't believe I'm saying this). Best Regards, David Johnson
76. Put some park and playgrounds in SW Carlsbad. There are none near Ponto, yet there are open spaces, near Avenida Encinas and 101. Nothing to walk to. Thank you
77. We could really use a park in southwest Carlsbad especially the San Pacifico area. Thank you
78. Work toward filling the deficit in parks and open space in the Southwest part of Carlsbad, especially Ponto.
79. Would truly love the Ponto Beach Park! As a resident of South Carlsbad we need this!!!
80. There are no Parks in South Carlsbad. We are neglected here yet I pay very high taxes.
81. Build a Park at Ponto! Keep the open space!
82. I would like to see the city buy the Ponto property and develop it into a park.
83. Build a park at ponto
84. Appropriate development of open space and park space in the Ponto region. We are currently at huge deficit of both of these in the Ponto region
85. We are very quickly running out of open space. This is probably one of the most beautiful areas in the country, we need to preserve that beauty and maintain some open space. The open land near South Ponto beach must be preserved. There are no parks in the area, developing that area would not only add to the pollution but it would sacrifice one of the most beautiful parts of Carlsbad. Towns and Cities across the country are prioritizing open space that is so important, it is time we did that in Carlsbad. We need open space near Ponto Beach.

**A few of the many Citizens asking the City Council to budget for a much needed Ponto Coastal Park**

Subject: City Park Standard in Southwest and South Carlsbad

Dear Carlsbad City Council:

The San Pacifico Community Association (SPCA) represents over 450 homes (around 1,000 Citizens) in the Southwest Quadrant/Park District of Carlsbad, and is the primary component and stakeholder of the Poinsettia Shores Planned Community (Poinsettia Shores Master Plan and Local Coastal Program). SPCA supported the residents in creating the Ponto Beachfront Development Review Committee (PBDRC) to:

- Provide information to all San Pacifico residents (and surrounding neighborhoods) on the developments. (See [www.PontoLocals.com](http://www.PontoLocals.com))
- Obtain and consolidate constructive feedback from the residents. Give this feedback to the residents, developers and City so that we can have productive/timely input into the projects and their designs.
- Act as a strong, unified voice and with the support of our residents in upcoming Planning, Council and Coastal Commission meetings.

Since PBDRC has been formed there has been a growing participation and concurrence from other Carlsbad areas and groups on the consensus PBDRC has consolidated.

PBDRC and the SPCA are pleased that the City has taken action to fix a timeline defect in the Growth Management Program related to meeting a City Park standard. However there is another truly once in a lifetime opportunity to improve how the City Park standard is proposed to be met in Ponto and coastal South Carlsbad that we would like to request of the City Council. This opportunity stems from the fact that Ponto is the only vacant coastal land in South Carlsbad and is currently being evaluated for low-priority housing and other types of development. Should it be developed in this way, there will never be another opportunity to have a meaningful park in coastal Southwest Carlsbad west of Interstate 5. The request is to work with Pontolocals to provide a comprehensive and open process for citizens of the City [primarily Southwest and Southeast Carlsbad Citizens] to discuss and define possible better approaches to implement a coastal park in Southwest that can serve all of South Carlsbad. We recently had a community meeting attended by approximately 200 people and this letter reflects some of the near unanimous (90%+) concerns from that meeting. We believe these concerns are also likely to be reflective of many others living in South Carlsbad, and also in North Carlsbad.

The City Park Standard is “3.0 acres of Community Park or Special Use Area per 1,000 population **within the Park District**”. So for every 1,000 Citizens in a Park District, such as the coastal Southwest Quadrant Park District, there is to be 3 acres of City Park to meet the standard. The rationale for such a location specific standard is that parks should be distributed so as to be reasonably accessible by all citizens. It is also important to have reasonable and safe park access via walking and biking, not just by motor vehicles. The staff report on correcting the timeline defect in the Park Standard stated that correcting the timeline to correct the park quadrant deficits is “... specifically relevant to the southwest and southeast quadrants. As stated in the report a need for more park acreage in those two quadrants was identified four years ago (during FY 2012-13).” A 6.6 acre park deficit within the Southwest quadrant was identified in the Growth Management Monitoring Report for FY 2014-15. However the report indicates that “Based on the Fiscal Year 2015-16 Capital Improvement Program list of projects, Veteran’s Memorial Park (91.5 acres, with 22.9 acres applied to each quadrant) is proposed to be constructed prior to buildout.” Under this proposal the future Veteran’s Park, that is located in the Northwest Park District and located many miles away from the coastal Southwest and Southeast Quadrants and Park Districts, would be used to meet the population and citizen demand for Parks for citizens within the coastal Southwest and Southeast Quadrant’s Park Districts. We know there is an outstanding opportunity for the City to do a great thing for the community and to add tremendous value to the quality of life by augmenting, enhancing, and/or adjusting planned park supply to better serve citizens and the City; and be more consistent with the General Plan and core values of the Growth Management Plan.

The fundamental intent of creating four Park Districts (one for each quadrant) and managing and matching demand and supply of City Parks into smaller geographical areas (quadrant park districts) is to make the supply of City Parks reasonably accessible to their demand and more equitably distributed for citizens. Equitable distribution of City Park facilities is the right thing to do and has many citizen and city benefits:

- Children and elderly can more easily walk and bike to City Parks when they are close by and within a safe walking and bicycling distance with properly designed access pathways;
- Park supply created so far away from park demand creates the need to drive in a car to access the park, thus increasing vehicle miles traveled (VMT). Depending on locations this also limits park access for citizens without cars or unable to drive;
- When city parks are accessible to their demand by walking/bicycling then less city park land is needed to park cars. Citizens get more actual useable park space for each acre of park land;
- When city parks are close to their demand busy families can quickly get to them after their workday which allows more park time for families during busy weekends;
- Nearby city parks create a stronger sense of stewardship for the “neighborhoods” park and city parks in general. Citizens watch out and care for their nearby park;
- Nearby city parks that are equitably distributed and based on surrounding neighborhood demand serve to strengthen neighborhood quality and property values by providing park amenities close by. It is both a good neighborhood and economic development strategy to assure park demand and supply are locationally matched; and
- Fundamentally it is the right thing to do to place park demand and supply in close proximity to each other and promote and equitable distribution public facility demand and supply.

In coastal Southwest Carlsbad and South Carlsbad we have some glaring gaps in demand and supply of city parks. For instance:

The Carlsbad General Plan Open Space, Conservation and Recreation Element, Figure 4-3 Parks: Shows no existing or planned coastal parks or special use areas west of Interstate 5 for all of South Carlsbad. In North Carlsbad there are 10, parks and special use areas west of Interstate 5 and on or close to the beach (9 of these are existing parks and 1 is a future park). This seems a clear and inherently unfair distribution of coastal park facilities. This unfair distribution severely reduces critical access to coastal park open space near the beach for South Carlsbad Citizens (half the City and over 26,000 homes, and over 64,000 citizens).

This unserved demand for city park space in coastal South Carlsbad is evidenced by the dangerous use of the Carlsbad Boulevard [old highway 101] road shoulder and bike lanes and campground road for recreational purposes, parking demand and the frequent unauthorized recreational use of Ponto vacant land. People are using whatever land they can for needed recreational use. South Carlsbad Citizens in Aviara, La Costa, Rancho Carrillo, Bressi Ranch, La Costa Valley and all the other South Carlsbad inland neighborhoods have no coastal South Carlsbad City Beach Park areas to access the coast. Their only option is to drive significant distances (with increase VMT and greenhouse gas emissions) crosstown to access city beach parks in the North, or travel to Encinitas. This forces increased VMT and greenhouse gas emissions which is counter to both State and General Plan goals. Citizens in South Carlsbad only have a State Beach pay parking lot and a retreating primarily steep cobble beach as their "local" beach. The non-beach portion of the South Carlsbad State Beach campground is a road and lodging facility for primarily out-of-town visitors that are near this beach. It is not a city park. The Campground is not designed to serve the park needs of Carlsbad citizens, but is a great place primarily for visitors to affordably pay to spend nights camping near the beach. The lack of any park facilities at the campground is evidenced by the frequent use of the campground driveway (a significant area of the campground) by children and adults as a play area.

There is an added benefit in that adding a coastal South Carlsbad Ponto Beach Park would help alleviate growing overcrowding, and increased traffic and parking congestion at North Carlsbad's coastal parks.

Citizens west of Interstate 5 in South Carlsbad have very limited access to a city park. Depending on the neighborhood one lives in, access our nearest park [Poinsettia Park] is between a 2 to 4 mile trip. Residents must cross Interstate 5 using one of only two crossings in the space of over 3 miles. These crossings are on major multi-lane, higher speed roadways (Poinsettia Lane or Palomar Airport Road). The route is not the most safe or direct, and it forces one to drive in a vehicle to access a park which increases VMT. Park access for children, the elderly, and those walking dogs west of Interstate 5 in South Carlsbad is severely restricted or effectively eliminated.

Coastal Southwest and all of South Carlsbad have not met their quadrant's Park area standard since 2012 (per the City's Growth Management Program). A specific comprehensive and open discussion with the Southwest and all if South Carlsbad citizens on how that deficient should be resolved should occur. The current City solution to meet local park needs of coastal Southwest and South Carlsbad with a paper allocation of park acreage in the Northwest part of the City that is many miles away does not seem right. It seems inconsistent with the core values and Vision of our City.

From Carlsbad General Plan Community Vision:

"...the Carlsbad Community Vision, which is the foundation for this plan." This is the foundation for the General Plan.

“...In the future, ... social connections will be enhanced through ... more public gathering places, family-friendly activities, and open spaces within walking distance of people’s homes ...”

“The community is proud of the exceptional amount of open space in the city, and envisions a future of continued City commitment to open space protection and strategic acquisitions to further the city’s open space system.”

“Parks, Fields, and Facilities for All Ages: The network of parks and recreation facilities will be improved to meet the community’s active lifestyle needs. Such improvements may include the strategic addition of more parks, ... New facilities will be located to maximize use and access by all neighborhoods, tailored to the needs of local populations, and designed with all ages in mind.”

“Beach Uses and Improvements: The beach is an important outdoor recreational resource, and protecting and enhancing access to the beach and the quality of the beach experience is a top community priority.”

“ ... Access to the beach and the quality of the beach experience will be improved through new compatible and supportive uses on or in close proximity to the beach, which may include ... a park ...”

“Tailored Tourism Strategy: Tourism is an important component of the city’s economy today, and it remains an attractive economic sector for the future since it emphasizes the very resources that make the city attractive to existing residents—the ocean and beach ...”

“Easy and convenient pedestrian connections will be available from every neighborhood to help children get safely to schools and parks.”

From General Plan Land Use Element:

“Beach Access and Activity: ...the community expressed an overwhelming preference for an active waterfront development strategy, which provides opportunities for activities and uses to be more integrated with the ocean. ... Access to the beach will be enhanced through ... open space, parking, and amenities ...”

General Plan Land Use Policy: “2-G.20 Develop an active ocean waterfront, with new growth accommodated west of Interstate 5, to enable residents and visitors to enjoy more opportunities for ... recreating along the coastline. Develop public gathering places and recreational opportunities along the coastal corridor.”

The City’s Park and Recreation Master Plan includes many areas of direction that strongly support a coastal park west of interstate 5 in South Carlsbad. Many of the most important park facilities and program needs identified in the City’s Park and Recreation Master Plan could be most efficiently addressed with a coastal park in the Ponto area. There are also significant and unique opportunities to create both public/private and public/public partnerships that would not only help reduce City recreation costs but also expand and create unique and special recreational program opportunities currently identified in the City’s Park and Recreation Master Plan.

A Ponto city coastal park also implements a major General Plan policy which calls for an active waterfront and creates solutions to long standing Local Coastal Program policy and State Parks Campground issues. There are very unique and special land use compatibility opportunities and synergy from a coastal city park in south Carlsbad and Ponto area that are inline and implement high priorities identified in the City's Park and Recreation Master Plan.

In summary, Carlsbad has a once in a generation opportunity to create very special coastal South Carlsbad Ponto Beach Park in South Carlsbad. This opportunity will be true to our Carlsbad Community Vision and General Plan and the heart and soul of our Growth Management Plan's standard of matching park demand with park supply within a particular park district. We believe this request benefits not only coastal Southwest Carlsbad and South Carlsbad but all of Carlsbad and is more consistent with the City General Plan, Growth Management Program, and Parks Master Plan and will result in a better, more valued and more sustainable City.

We are a key Stakeholder in Ponto and the Poinsettia Shores Maser Plan and Local Coastal Program. We have been hearing similar concerns from other Carlsbad citizens about coastal beach park access and request that the City Council seize this opportunity to work with us to establish a comprehensive and open community discussion about the strategic acquisition of a coastal South Carlsbad Ponto Beach Park for South Carlsbad citizens and businesses. We also request before a solution to the 2012 Southwest quadrant park standard deficit is created we have an open citizen discussion with the Citizens of coastal Southwest Carlsbad on how that solution can better address the park demand created in the Southwest Park District with a better park supply created within that District. Like our City Park Standard says: "3.0 acres of Community Park or Special Use Area per 1,000 population **within the Park District**". We request that a coastal City Park West of Interstate 5 be developed in South Carlsbad to be fair and equitable and to meet the needs of South Carlsbad for a coastal City Park to serve all the Citizens of South Carlsbad. This can take advantage of special land use synergies to help promote public/private collaboration, create added property and transit occupancy tax revenues for the City by creating a valuable and synergistic amenity [where none now exists] for over half the City and over 26,000 homes, along with providing support to our City's visitor serving businesses and activities. It is the right and smart thing to do.

The San Pacifico Community Association and PBDRC as key Stakeholders in Ponto wish to be a key participant any proposed City or CCC actions regarding these subjects, and would like to meet with you to see how we can discuss and advance this for the benefit of South Carlsbad Citizens. As we are citizen volunteers we sincerely appreciate advance notification to allow for preparation and coordination with our work lives and to communicate back to our members and other South Carlsbad Citizens. We wish to be notified in advance of any proposed actions related to the issues in thus letter. The San Pacifico Community Association contact information is:

# Carlsbad Citizens' questions for the City Council, Planning, Housing and Parks Commissions, & Housing Element Advisory Committee on South Carlsbad Coastal Park needs & Ponto Planning Area F relative to Carlsbad's proposed Draft LCP-LUPA, Housing Element Update, & Parks Master Plan Update

Submitted 2020 Nov 30

For some time all four (4) of the current City Council members have on multiple occasions publicly stated they think Carlsbad's current General Plan and Growth Management Plan need comprehensive updating. As one of our current Council members recently said about Ponto:

"I believe that our best strategy is to support a new Growth Management Plan and General Plan that will reflect the desires of today's residents. Our old plan has served us well but has become outdated. A revised plan could address a variety of services and infrastructure, including parks. I support an updated plan that is built on the desires of our current residents."

So the City Council considering a General Plan and Growth Management Plan change as part of Staff's proposed Draft LCP-LUPA and Housing Element relative to Ponto Planning Area F is not out of the question. There appears unanimous City Council support to consider changes to the 2015 General Plan that are 'built on the desires of our current residents.' – "including parks."

Also in showing the 2015 General Plan is not 'locked in stone' the City Council and Staff have advanced some piecemeal updates to the General Plan and Growth Management Plan. City Staff's proposed Draft Housing Element Update alone includes 13 General Plan Land Use Designation changes. But it appears the City Council has not yet provided direction to City Commissions and City Staff to start a Ponto General Plan and Growth Management Plan Update process, even though a consistent major request by significant numbers of Carlsbad Citizens since 2017.

The City Council recently split 2-2 several times on providing more substantive direction to City Staff on Ponto Park land use issues, other than unanimous agreement that the 2015 General Plan Update does not seem to be working very well in some areas like Ponto. Now with a 5<sup>th</sup> Councilmember, who represents Ponto and much of South Carlsbad, this 2-2 split will be resolved. **So, People for Ponto Carlsbad Citizens are asking - and it seems very logical - that the Planning Commission, Housing Commission and Housing Element Advisory Committee, hold off on making any decisions on Ponto Planning Area F until the new full City Council has the opportunity to meet, consider, publicly discuss, and provide direction to City Staff on the City Council consensus on the 2015 General Plan Update Land Use Map that all the City Council say needs some changes – most likely at Ponto.**

Following are some data on South Carlsbad's Coastal Park needs & Ponto Planning Area F, and important policy questions to your Individual and collective decisions on Carlsbad's staff proposed Draft LCP-LUPA, Housing Element Update, & Parks Master Plan Update. The data and citizen to fellow citizen policy questions are important and hope you sincerely consider them.

1. People for Ponto Carlsbad citizens have since 2017 1) documented to the City Council & CA Coastal Commission the public's consensus need for the Planning Area F Ponto Coastal Park, 2) request the City fund Ponto Coastal Park, and 3) City fully acknowledge and fix past City Ponto planning errors

that failed to disclose to citizens the since 1996 Ponto (Poinsettia Shores [aka San Pacifico Community Association] Master Plan and Local Coastal Program (LCP) Planning Area F requirement to “prior to any planning activity” study/document the need for a “Public Park” at Ponto and involve citizens, particularly District 4 San Pacifico citizens, in that study. Over 2,500 emails and over 200 pages of public testimony have been submitted to Carlsbad City Council and CA Coastal Commission in support for a park in Ponto at Planning Area F. At City Council meetings on 1/28, 6/2, and 6/24/20 Carlsbad’s City Council was deadlocked in 2 to 2 ties on Ponto Park needs issues and thus rejected responding to citizen communications expressing the need and desires for Planning Area F Ponto Coastal Park. Data Slide #1 below shows the current LCP for San Pacifico’s Planning Area F.

- a. Will you consider and respect massive citizen input since 2017 that clearly documents the need and desire for Ponto Coastal Park and supports creation of Ponto Coastal Park at Planning Area F in your respective and interrelated and interconnected analysis and decisions?
  - b. Will you acknowledge significant citizens’ input that documents the need and desire for Ponto Coastal Park and supports creation of Ponto Coastal Park at Planning Area F?
  - c. Will you direct City staff to work as a partner with People for Ponto and Carlsbad Citizens in advancing Ponto Coastal Park at Planning Area F?
2. During the Jan 28, 2020 City Council Meeting (item #14), Carlsbad City staff for the first time as a side-bar comment admitted the City made some ‘Ponto planning errors’ going back over 15 years. Those City planning errors where first called out when the CA Coastal Commission (CCC) denied Carlsbad’s Ponto Beachfront Village Vision Plan (the referenced foundation for Carlsbad’s 2015 General Plan Update) in 2010 in part due to the City’s mistake. The CCC’s denial conflicts with the City Staff’s interruption of the City Ponto planning process. The CCC in denying in 2010 the Ponto Vision Plan (the foundation for Carlsbad’s 2015 General Plan Update at Ponto) specifically said with direct reference to Ponto Planning Area F:

“Currently, this area [*Planning Area F*] has an Unplanned Area land use designation. In order to facilitate **any type of development in this portion of the Ponto area, an LCP amendment modifying the land use will have to be brought forward to the Commission for review and approval.**”

“... the Commission would reject such proposed uses because there has been no evidence presented that would support the elimination of these [*Planning Area F*] areas for some lower cost overnight accommodations or public recreational amenities in the future. The Commission's past action of **the Poinsettia Shores Master Plan specifically called for such an assessment, and none has been submitted to date.** The concerns related to the lack of lower cost overnight accommodations in Area F (ref. Exhibit #7) are further discussed in the findings later.”

“City is inadvertently sending a message to potential developers that 1) the identified development (townhouses) is the primary type of use the City will support, or 2) that development type is consistent with the current land use and zoning designations. Neither of those assumptions is correct. As the previously certified **Poinsettia Shores Master Plan states, any type of development at this location would first require an LCP amendment to establish the land use and zoning, which would have to be certified by both the City and the Coastal Commission. Additionally, the Master Plan further states that some component of the**

**development at this location must consider the need for the provision of lower cost accommodations or recreational facilities.”**

**“While residential use is one of the land uses listed for this area in the Poinsettia Shores Specific Plan, it may not be the most appropriate designation. As previously stated, the project will at least need to consider the incorporation of some kind of lower cost accommodations, and any proposed zoning designation for the site will have to be found consistent with the policies contained in the Poinsettia Shores Master Plan. Furthermore, the standard of review for any change to the current land use designation is the Coastal Act, and thus will also have to be found consistent with all its applicable policies.**

**Recently, the Commission has become concerned with the lack of lower-cost accommodations statewide. Thus, the establishment of a residential land use at this location may not be what is ultimately determined to be certified as consistent with the Poinsettia Shores Master Plan, or the Coastal Act.”**

**“B. High-Priority Uses - Lower Cost Visitor Accommodations in ‘Area F’:**

**The Coastal Act has numerous policies promoting public access to the beach and state:**

Section 30210 - In carrying out the requirement of Section 4 of Article X of the California Constitution, maximum access, which shall be conspicuously posted, and **recreational opportunities shall be provided for all the people** consistent with public safety needs and the need to protect public rights, rights of private property owners, and natural resource areas from overuse.

Section 30213 - Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. **Developments providing public recreational opportunities are preferred.** The commission shall not: (1) require that overnight room rentals be fixed at an amount certain for any privately owned and operated hotel, motel, or other similar visitor-serving facility located on either public or private lands; or (2) establish or approve any method for the identification of low or moderate income persons for the purpose of determining eligibility for overnight room rentals in any such facilities.

Section 30221 **Oceanfront land suitable for recreational use shall be protected for recreational use and development unless present and foreseeable future demand for public or commercial recreational activities that could be accommodated on the property is already adequately provided for in the area.**

Section 30222 - **The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development, but not over agriculture or coastal-dependent industry.”**

**“... in 1996, the Poinsettia Shores Master Plan was certified as part of the City's LCP, and replaced the [Visitor serving] land use designation as an "Unplanned Area." In an attempt to maintain a lower-cost visitor-serving component at this location, the Commission, through a suggested modification, required language within the Master Plan that would serve to protect this type of use. The language in the Poinsettia Shores Master Plan, for this location, "Area F," included: As part of any future planning effort, the City and Developer must consider and**

**document the need for the provision of lower cost accommodations or recreational facilities (i.e. public park) on the west side of the railroad.”**

**“The Ponto Beachfront area is an area that could be considered as a high-priority location for lower cost overnight accommodations. While located across the street from a State Park (South Carlsbad State Park) containing camping facilities, during peak summer months, the campground is consistently at capacity. ... If at any time in the future, this State Beach campground is converted to day use sites, the market and the need for low cost overnight accommodations will be significantly amplified. Thus the Vision Plan, as proposed by the City, cannot be found consistent with the Coastal Act.”**

**“H. Conclusions: ... concerns regarding the determination of preferred land uses in an ‘unplanned’ area, the lack of provision of lower-cost accommodations and recreational uses, ... remain. All of these oversights could result in impacts to public access and recreation and other coastal resources and, therefore, the Vision Plan, as submitted, is therefore inconsistent with the Coastal Act, and therefore, shall be denied as submitted.”**

The City’s past and present Ponto planning errors were not, and are still not being, fully and honestly disclosed to citizens the City’s CCC requirement on Ponto Planning Area F to “prior to ANY planning activity” (like before the Ponto Vision Plan and General Plan Update) to study Ponto’s need for a “Public Park”. The City’s past failure to accurately disclose the CCC requirements fundamentally flawed the Public Participation process by not allowing proper citizen input on the Ponto Park need. The City’s Public Participation flaws thus flawed the prior City planning efforts at Ponto. The extensive Citizen input now is a clear and obvious result of the City’s prior flawed Ponto planning process. People for Ponto Citizens had to submit and research over 40 official Carlsbad Public Records Requests to find the truth about the City’s prior flawed processes and errors at Planning Area F. The City didn’t clearly, publicly and honestly communicate to Citizens and then conduct the required Ponto Park needs before both the 2010 Ponto Vision Plan and 2015 General Plan Update as documented in Official Carlsbad Public Records Requests.

In 2010 and again in 2017, the CA Coastal Commission told the City that the City is required to correct the past planning errors at Ponto Planning Area F. Please see Data Slide #2 on page 11 for the 2017 CA Coastal Commission communication.

A critical part of the City’s past planning errors at Ponto were failures to ask Ponto and South Carlsbad Citizens for their input (Public Participation) on their Ponto Park needs as part of the City’s required ‘documented need’ study for Ponto, and if a park is needed, Ponto Planning Area F should be considered for the Park site. Citizens, now that they and been informed by Official Carlsbad Public Records Requests have now provided an overwhelmingly clear and Documented Need for Ponto Coastal Park. This LCP requirement is to be done “prior to any planning activity”. The City failed to do that in 2010, 2015, but now should do it and fully consider the overwhelming and documented Citizen need and desires for Ponto Park at Planning Area F. See Data Slides #2 & #3. The City has still not fully and broadly communicated to all Carlsbad Citizens these “Ponto planning mistakes”, nor yet disclosed and presented to Carlsbad Citizens and the Parks-Planning-Housing Commissions for their recommendations the Park needs studies for Ponto Planning Area F.

In addition the City is also required to conduct a Citywide Coastal Recreation buildout needs-supply-demand Study as required by the CA Coastal Commission in 2016. The City has yet to disclose and

present to Carlsbad citizens and the Parks-Planning-Housing Commissions for their recommendations on this Citywide Coastal Recreation buildout needs-supply-demand Study.

The City has already Documented the Park need at Ponto in its Park Master Plan - pages 86-88 shows that Ponto is both “Unserved” by City Parks, and an area of “Park Inequity”.

- a. Do you think it is important for citizens to fully and honestly know the City made “Ponto planning mistakes” going back before 2010 that have impacted prior Coastal land use planning and the City’s General Plan, city housing planning and City parks planning at Ponto? Given the long-term compounded nature of these City Ponto planning mistakes should the City provide a means to work with citizens, particularly the San Pacifico, Ponto and South Carlsbad Citizens most impacted by the City’s prior Ponto planning mistake?
  - b. Due to past mistakes, will you recommend or direct staff to retain or revert to Planning Area F’s ‘existing Non-residential Reserve’ Coastal land use designation in the Existing Local Coastal Program (i.e. Defer Certification) and amend the General Plan to reflect that retention/reversion until a new citizen-based Ponto planning process is completed?
  - c. Will you recommend or direct City Staff to require the citizen-based planning process to substantially and directly involve San Pacifico Community, District 4, and District 3 citizens most impacted by the lack of any City Park at Ponto, and coastal (west of I-5) South Carlsbad?
  - d. During this citizen-based Ponto planning process, will you recommend or direct City Staff to, be consistent with City and State permit streaming laws, and deny “Shopoff’s” Planning Area F land use change and development application due to applicant withdrawal (by recorded Quit Claim) and inaction since 2019?
  - e. During the citizen-based Ponto planning process, will you recommend or direct City Staff to be consistent with the existing LCP and suspend all City Staff proposed land use changes on Planning Area F and retain the existing LCP ‘Non-Residential Reserve’ land use designation on Planning Area F?
  - f. Do you feel it is appropriate that the City is using tax-payer dollars, to change Planning Area F’s land use from the existing Non-residential Reserve” to high-density residential on behalf of and to benefit the Shopoff developers, particularly while the City’s Ponto planning mistakes dating back to before 2010 are not being publicly disclosed and discussed, and properly considered by City Commissions and citizens?
3. Before the above mentioned Ponto (San Pacifico’s) Planning Area F Ponto Park study requirement is even presented to Citizens, the Planning, Housing and Parks Commissions, Housing Element Advisory Committee, and City Council for review and consideration, the City Staff has already proposed land use changes on Ponto/San Pacifico’s Planning Area F. The City Staff’s proposed land use change would allow building development with 486% more intensity and heights 33% taller than San Pacifico. The City never in the past 15+ years directly asked the San Pacifico Community Association for its input, nor directly invited/engaged San Pacifico Community Association involvement in the City’s proposed land use change to San Pacifico’s Planning Area F land use from its existing “Non-residential Reserve” land use. The City’s proposed changes to San Pacifico’s Planning Area F will fundamentally change the Character of the San Pacifico Community and neighborhood. Data Slide #4 documents both existing and City-proposed land use intensity at San Pacifico and Planning Area F.

- a. Do you think changing land use to increase density by 486% and increase building heights by 33% within an established 'planned community' like San Pacifico is appropriate?
  - b. Do you think the City should directly and fully inform, invite and encourage Planned Communities, communities and neighborhoods to participate in City proposed land use changes to Planning Areas in their Community or neighborhood?
  - c. Will you recommend or require the City planning staff to directly inform and involve the Planned Communities, communities and neighborhoods impacted by City proposed changes to their Planned (and/or unplanned) Community or neighborhoods?
4. Ponto (LFMP Zone 9) does not meet the City's Growth Management Open Space Standard, which states that when land is developed, 15% of the 'unconstrained and developable land' needs to be set aside as Open Space. Carlsbad has had this standard since 1987. Per the City's Citywide Facilities Management Plan if by 1987 Ponto had already been developed or if Ponto already had 15% of its unconstrained and developable land reserved as Open Space, the City's 1987 15% unconstrained Open Space Standard would not apply. However, City data/documentation show that neither of these 2 conditions was/is applicable, and that Ponto developers' switched land use plans that removed Growth Management Standard Open Space and thus falsely allowed a completely different land use plan to not provide the required 15% of unconstrained land as Open Space. City data very clearly show in fact that Ponto was not developed in 1987, and City GIS mapping data also clearly shows Ponto (LFMP Zone 9) is actually missing 30 acres of unconstrained Open Space as per the Growth Management Open Space Standard.

Yet, even with this City documented Open Space Standard shortfall, the City has been allowing, and continues to allow, developers to over-develop Ponto by not requiring the missing 30-acres of unconstrained Growth Management Standard Open Space be provided at Ponto. The LFMP for Zone 9 must be formally amended to account for the new added public facility impacts for the proposed change in Planning Area F land use from the existing 'Non-residential Reserve' land use to the City staff's proposed R-23 high-density residential and General Commercial land uses that were never planned for by the adopted LFMP Zone. See Data Slides #5, #6 and #7 showing actual City data on how the City's Growth Management Program Open Space Performance Standard is not being met at Ponto (LFMP Zone 9), and the City's Open Space Performance Standard and Sections 21.90.130 and 180 of the City's Growth Management Ordinance. The City's Growth Management Ordinance (Carlsbad Code 21.90.130 & 180) require the City Manager and City Council to address any situation where a Growth Management Standard is not being met – exactly like Ponto's missing 30-acres of Growth Management Standard Open Space as documented in City data on Data Slides #5 & 6. To illustrate how out of compliance with the Open Space Standard LFMP Zone 9 is City and Developers are counting a Sewage pumping station (parcel 2165606400) that pumps raw sewage as Open Space. If the City's GIS map with corresponding documentation of each Open Space parcel is desired, People for Ponto can provide and discuss that data. The City has/is being sued by others due to the City's failure to follow the 15% unconstrained Growth Management Open Space Standard. A Ponto Park at Planning Area F would help mitigate the missing Open Space. In your recommendations or decisions for land use, housing, and parks planning do you think:

- a. the Growth Management Standard Open Space is important?

- b. the City should follow its Growth Management Ordinance, particularly, 21.90.130 & 180 and address the 30-acres of missing Growth Management Standard Open Space at Ponto?
  - c. the City should directly invite and involve Ponto Citizens in addressing and resolving Ponto's missing 30-acres of Growth Management Standard Open Space?
  - d. the City should follow the Growth Management Ordinance and suspend all development and City proposed Draft Local Coastal Program Land Use Plan changes at Ponto until Ponto's Open Space Performance Standard deficit and issues are resolved?
  - e. the City should temporally suspend all City proposed Draft Local Coastal Program Land Use Plan changes at Ponto until the lawsuit against the City is resolved?
5. As of 2020 there are 1,025 homes at Ponto and over 2,660 adults and children living in those homes. These homeowners already paid City taxes and Park-in-Lieu fees. The in-lieu fees and tax base is sufficient for the City to buy and build 8 acres of City Park. 8-acres of parkland would meet the minimum City park needs of Ponto's 3-acre/1,000 population City Park standard. Carlsbad's Park Standard is relatively low compared with the Cities of Encinitas and Oceanside. **Carlsbad allows developers to provide 40% less Parkland and collects 40% less money for parks than both Oceanside and Encinitas.** The City so far has not required Ponto developers to build these 8 acres of required park at Ponto, but instead took park-in-lieu fees to spend the money elsewhere. This is one reason why Ponto Planning Area F, was in 1996 Coastal land use zoned "Non-Residential Reserve" that requires before 'any planning activity' that proposes changing this Coastal land use zoning, that the City/Developer must consider and document the need for high-priority "Coastal Recreation (i.e. Public Park)" at Ponto and if needed Planning Area F could provide that "Coastal Recreation (i.e. Public Park)".
- a. In your recommendations or decisions for land use, housing, and parks planning do you think it is appropriate to charge Carlsbad homeowners City park-in-lieu fees and then spend the money in areas where those same homeowners cannot effectively access the parks created by those fees?
  - b. In your recommendations or decisions for land use, housing, and parks planning do you think Ponto homeowners deserve from the City an 8 acre park in Ponto that they already paid the City fees for, that the City's Parks Master Plan identifies as an area unserved by City Parks and park inequity, and where an overwhelming amount of Carlsbad citizens have documented their need and desire for a Ponto Park?
  - c. In your recommendations or decisions for land use, housing, and parks planning do you think Carlsbad should have the lowest park standard relative to our adjoin Coastal cities?
  - d. In your recommendations or decisions for land use, housing, and parks planning do you think Carlsbad developers should provide 40% less parkland than Encinitas and Oceanside developers?
6. The City's proposed Veterans Park in NW Carlsbad is being funded by fees paid by homeowners in new homes built after 1991. Since most all the homes built in Carlsbad after 1991 are in the SW, SE, and NE quadrants, most of the funding for Veterans Park is from SW, SE and NE Quadrant Homeowners. These SW, SE and NE homeowners are in Quadrants where there are current City Park acreage deficits per the City's Growth Management Parks Standard. Many of these SW, SE, and NE neighborhoods have no City Park within 10-minute walking distance from their homes. Proposed Veterans Park is from 1 - 5 miles away (as the crow fly's) and from 1.4 - 11.1 miles away (via City Streets) from the SW, SE, and NE Quadrant homeowners that paid for almost all of the proposed

Veterans Park. These distances make the proposed Veterans Park effectively unusable for children and most homeowners in SW, SE and NE quadrants.

Along with Veterans Park, there are many other areas of the City where Carlsbad homeowners pay the City park-in-lieu fees to address the local park demands created by the new development, but no local park is created by the City. The Cities of Encinitas and Oceanside both have strong Park planning policies that direct the City to provide Parks within a 10-minute walk for all homeowners. Carlsbad has no such requirement, but only documents in its Park Master Plan areas “Unserviced” by Parks and areas of “Park Inequity”.

- a. In your recommendations or decisions for land use, housing, and parks planning do you think City Staff should come up with some options for a more fair and equitable use of the Veterans Park funding paid by SW, SE, and NE homeowners so that funding actually provides Parks needed in the SW, SE, and NE and that are accessible for their children?
  - b. Both Encinitas and Oceanside have Park accessibility policies and plans to provide a City Park within a 10-minute walk from every home. In your recommendations or decisions for land use, housing, and parks planning do you think Carlsbad should have a similar park accessibility requirement so Carlsbad children and citizens have a park within walking distance from their homes?
  - c. In your recommendations or decisions for land use, housing, and parks planning do you think City Staff should be directed to start working with Carlsbad Citizens to create a Park Master Plan that address fixing the city’s documented “Park Inequities” in various Carlsbad neighborhoods the City documents as “Unserviced” by City Parks?
7. San Pacifico’s Planning Area F in Ponto is currently for sale and can be purchased for a Park. The cost would be considerably less than the City’s proposed South Carlsbad Boulevard “promenade” using the existing median of Carlsbad Blvd. The Carlsbad Blvd roadway median although wider than most roadway medians, is still relatively narrow and does not allow many open space uses other than linear walk/pathways that can be most cost effectively provided in the existing right-of-way.

Mayor Matt Hall has publicly said that Ponto Park at Planning Area F would cost \$20-22 million and the City’s narrow promenade would cost \$75 million. If the city purchases Planning Area F, it would add 11 new acres to city-owned property, whereas the promenade (which is basically adding a walkway and parking spaces) adds 0 (zero) acres to city-owned property (the City already owns the roadway median).

There is a smarter and better way. The Promenade walkway and parking can basically be provided for as little as 4%-10% of the City’s proposed \$75 million Promenade cost. This is done by retaining South Carlsbad Boulevard (Historic Coast Highway 101) in its current historic configuration with natural median, and not relocating the south bound pavement to create a wide urban roadway. South Carlsbad Boulevard is one of the last substantially unaltered stretches of San Diego County’s Historic 101 dating back to the 1920’s. Data show it is not threatened by Sea Level Rise so does not need to be relocated. It seems appropriate to retain this historic street and landscape. South Carlsbad Boulevard only needs to add pedestrian paths or sidewalks to be Complete. This can cost effectively be designed and done while preserving the historic features of Historic Coast Highway 101, and creatively reusing old 101 pavement at the Campground entrance to also cost-effectively provide parking.

Based on City data an 8 foot wide concrete walkway within the wide right-of-way could be provided on both sides of South Carlsbad Boulevard for about \$3 million. Parking already exists along some sections of South Carlsbad Boulevard and additional parking can be cost-effectively provided on the old South Carlsbad Boulevard roadway pavement near the Campground entry. In addition if it is possible and desirable to reduce vehicle roadway capacity by over 50% and increase vehicle traffic congestion on South Carlsbad Boulevard the existing outside 2-lanes in each direction could be very cost effectively converted to on-street parking. This would provide around 6-miles of on-street parking or about 12,000 parking spaces.

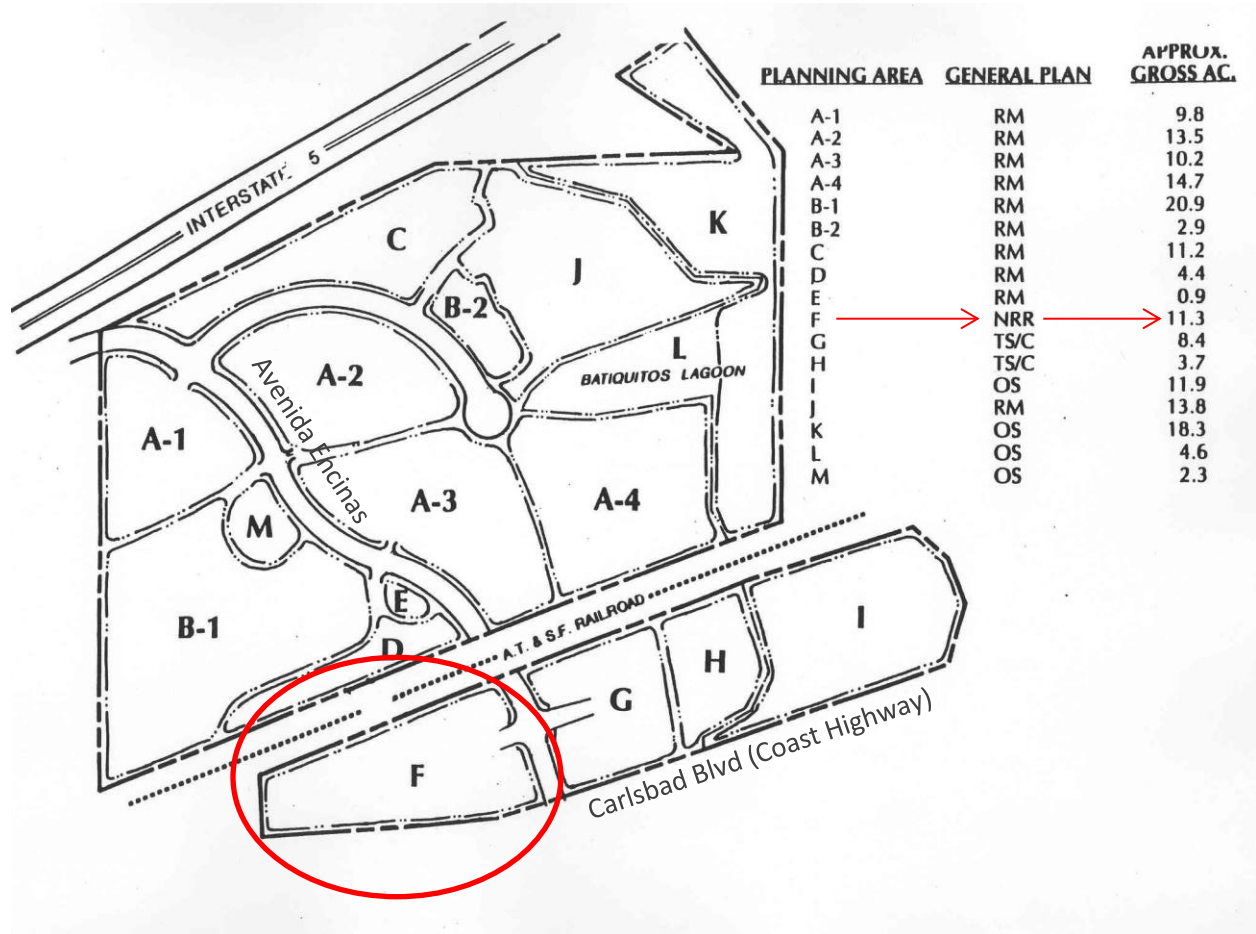

\$72-67.5 million of tax-payer money savings can be achieved by rethinking the City's \$75 million South Carlsbad Boulevard Promenade concept while still providing the needed pedestrian path and parking. This \$72-67.5 million can be used to fund the more practical, functional, beneficial and tax-payer desired Ponto Park at Planning Area F, and have about \$50 million left over to fund many more Coastal Park and open space improvements in Carlsbad.

Planning Area F would create a park similar in shape to Holiday Park, but more than 1.8 times larger than Holiday Park. Ponto Park at Planning Area F would create Carlsbad's Crown Jewell Coastal Park; with ocean and sunset views, direct pedestrian access to the beach and Batiquitos Lagoon trails, and the size and shape to host Carlsbad community events. Ponto Park at Planning Area F would create a Coastal Crown Jewell Park for both Carlsbad Citizens and visitors that will last for generations. As of 2020 over 64,000 South Carlsbad Citizens and hundreds of thousands of visitors in South Carlsbad's resort hotels have no Coastal Park. This inequity damages Carlsbad's current and long-term attractiveness and sustainability of our residential quality of life and visitor experience.

Like Del Mar's Powerhouse Park, Solana Beach's Fletcher Cove Park, Encinitas's Moonlight Beach Park, La Jolla's Scripps Cove Park and La Jolla Shores Park, Coronado's Tideland Park and Coronado Cays Park; Ponto Park can provide Carlsbad a much needed iconic Coastal Park and community place. Ponto is also at the center of a 6-mile Regional Coastal Park gap – there is no Coastal park between Encinitas's Moonlight Beach and Carlsbad's small Cannon Park. Based on the data Ponto Park is a much better park space and appears to be a far better and wiser use of tax payer money.

- a. In your recommendations or decisions for land use, housing, and parks planning will you direct City Staff to contact the Planning Area F landowner to discuss the City being a purchaser of the site?
- b. In your recommendations or decisions for land use, housing, and parks planning did you know that the 400-acre Carlsbad Municipal Golf Course cost Carlsbad Taxpayers \$70 million?
- c. In your recommendations or decisions for land use, housing, and parks planning do you think spending \$75 million to add a sidewalk and some parking (aka Promenade) on narrow land the City already owns and that could alternatively be provided with a little over \$3 million is a wise use in taxpayer dollars?
- d. In your recommendations or decisions for land use, housing, and parks planning do you think spending \$20-22 million to actually buy 11-aces of new City parkland is a better use of Carlsbad's taxpayer dollars compared to spending \$75 million and NOT adding one single acre of new City land?
- e. In your recommendations or decisions for land use, housing, and parks planning do you think a City Park that is 1.8 times larger than Holiday Park, and with coastal views and pedestrian access to the beach and Batiquitos Lagoon would be a great benefit to the City in hosting community events like Holiday Park currently does?

**Data Slide #1:** San Pacifico Community – Planning Area, Coastal General Plan Land Use, & Acreage Map. Planning Area F is unplanned and zoned NRR (non-residential reserve) and will remain so until a “Park Need” Study is completed and both the City and CA Coastal Commission determine no Park is needed. Only if both the City and CA Coastal Commission determine Ponto’s park needs are met, can Planning Area F be planned and developed for something else.

Source: page 20 of exiting Poinsettia Shores Master Plan/Local Coastal Program

**Data Slide #2: One of Carlsbad's "Ponto Planning Area F planning mistakes" and CA Coastal Commission (CCC) direction to Carlsbad**

---

At the 1/28/20 (item #14) Carlsbad City Council meeting City Staff for the 1<sup>st</sup> time admitted 15+ years f some Ponto 'planning mistakes' on Ponto Planning Area F. This was over 10-years after the City knew of these 'Ponto planning mistakes' by the 2010 CA Coastal Commission (CCC) denial of the Ponto Beachfront Village Vision Plan for those mistakes and some other flaws.

Following is from a 7/3/17 CCC letter to City Staff on the City's proposed land use changes at Planning Area F. City Staff for the 1<sup>st</sup> time provided this to City Council on 1/28/20:

**"The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto/Southern Waterfront area. For example, Planning Area F requires the city and developer to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad. This is an issue that the San Pacifico HOA community group is raising in regards to the Shopoff/Ponto development proposal, and this study should be undertaken as a part of the visitor serving use inventory analysis described above. If this analysis determines that there is a deficit of low cost visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed."**

In 2017 after citizens received the City's reply to Public Records Request 2017-260, citizens meet with CCC staff to reconfirm the City failed since before 2010 to publicly disclose and comply with Planning Area F's LCP requirements. CCC Staff acknowledged the City has not yet complied with the LCP and in an 8/16/2017 email said:

**"The City is currently undertaking a comprehensive update to their LCP funded in part through a CCC grant. As a part of this process the City will be consolidating all previous LCP segments into a single, unified LCP. The City has received direction from both the Commission (May 2016 CCC hearing) and Commission staff, that as a part of this update the City shall undertake an inventory of visitor serving uses currently provided within the City's Coastal Zone which will then serve to inform updates to the City's land use and zoning maps as necessary. This inventory could have future implications for the appropriate land use and zoning associated with the Ponto area."**

In 2016, the CCC told City that Carlsbad's proposed 2015 General Plan land use map could change based on the outcomes of both a Citywide Coastal Recreation needs Study, and also the specific Planning Area F LCP requirement to study Park needs at Ponto. The City is apparently failing to fully disclose to Citizens these facts and the City's prior "Ponto Planning Area F planning mistakes".

**Data Slide #3:** from Carlsbad's adopted Park Master Plan (see pages 86-88). Blue dots = Parks, and blue circles = areas served by Parks. City's adopted Park service map clearly shows Park need at Ponto.

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

Special Use Areas Map  
Revised/Updated December of 2011. Areas per 1.000 Population

Carlsbad, California  
Parks and Recreation Service  
According to Park Master Plan

There is no Coastal Park to serve South Carlsbad Citizens-Visitors-Businesses. There are 10 Coastal Parks in North Carlsbad. The lack of Coastal Parks in South Carlsbad seems both unfair to South Carlsbad Citizens-Visitors-Businesses; and is unfair to North Carlsbad by forcing congestion into North Carlsbad & Encinitas/Solana Beach where there are Coastal Parks.

Highway  
Coastal Boundary

Scale: 1 in = 1 mile

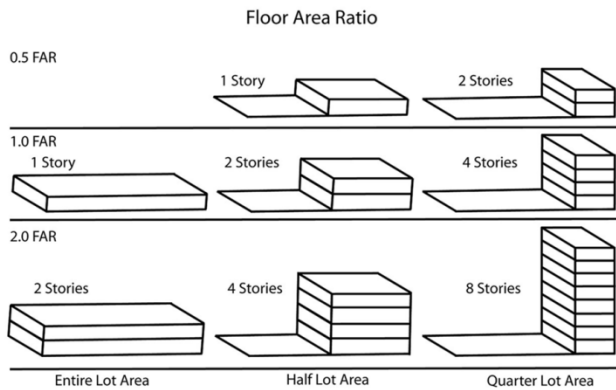

**Data Slide #4:** Existing and City’s Planning Area F proposed development intensity (FAR) comparisons

FAR (floor area ratio) is a well-established planning method to compare land use intensity (lower FARs reflect lower intensity and higher FARs reflect higher intensity). City Staff is proposing at San Pacifico’s Planning Area F an extremely high FAR land use intensity that will radically change the established character of our San Pacifico Community. The CA Coastal Commission has State Law Polices to protect the character of Coastal communities and a requirement that new development be "visually compatible with the character of the surrounding area." It does not appear that the City’s proposed 486% increase in development intensity for San Pacifico’s Planning Area F is visually compatible with the character of San Pacifico.

**Comparison of FAR Data:**

	<u>FAR</u>	<u>% more intense than San Pacifico</u>	<u>Building Height</u>
San Pacifico Community - existing	.31	0%	30 feet
San Pacifico’s Planning Area F - City proposed change	1.79	486%	40 feet
Cape Rey Resort - existing	.52	70%	35 feet
Encinitas Beach Hotel - in construction	1.21	295%	unknown
Kam Sang Resort - developer application w/ City	.72	136%	35 feet

Floor Area Ratio (FAR) diagram of examples of 0.5, 1.0 and 2.0 FAR

Below is what the City’s proposed 1.79 FAR at Planning Area F looks like. A 40 foot tall and 1,000 feet long wall of buildings. View is looking NE from corner of Avenida Encinas/Ponto Dr.

## Ponto Planning Facts – development standards not being met

City's GIS data of Growth Management Standard Open Space at Ponto

472 Acres	Total land in LFMP Zone 9 [Ponto]
<u>(197 Acres)</u>	Constrained land excluded from GMP Open Space
275 Acres	Unconstrained land in LFMP Zone 9 [Ponto]
<u>X 15%</u>	GMP Minimum Unconstrained Open Space requirement
41 Acres	GMP Minimum Unconstrained Open Space required
<u>(11 Acres)</u>	GMP Open Space provided & mapped per City GIS data
<b>30 Acres</b>	<b>Missing Unconstrained Open Space needed in LFMP Zone 9 [Ponto] to meet the City's minimum GMP Open Space Standard per City's GIS data</b>

**73% of the City's minimum required Open Space Standard is missing due to over development of Ponto**

**Data Slide #6:** City GIS map – Light Green is ‘Unconstrained land’ and can be used to meet City’s Growth Management Open Space Standard. The Pink and Purple areas are ‘Constrained land and water’, respectively, and cannot be used to meet the Standard.

## Ponto Planning Facts – development standards not being met cont.

- City’s GIS map of Ponto’s (LFMP Zone 9) Growth Management Standard Open Space:
  - Only light green areas on map meet City’s 15% unconstrained GMP Open Space Standard
  - Most Ponto Open Space (pink & purple areas on map) is constrained and does not meet the Standard
  - City required Avira east of Ponto to provide the 15% Standard Open Space. Why not Ponto?

## Data Slide #7: City's Growth Management Open Space Standard

---

The City's website says: **"The Growth Management Program standard for Open Space requires that "15 percent of the total land area in the Local Facilities Master Plan Zone, exclusive of environmentally constrained non-developable land, must be set aside for permanent open space and must be available concurrent with development."** <https://www.carlsbadca.gov/cityhall/clerk/summaries/space.asp>

The City's Growth Management Ordinance (Carlsbad Municipal Code 21.90) states:

"21.90.130 Implementation of facilities and improvements requirements: ... (b) The city-wide facilities and improvement plan and the local facility management plan process is part of the city's ongoing planning effort. It is anticipated that amendments to the plans may be necessary. Adoption of a facilities management plan does not establish any entitlement or right to any particular general plan or zoning designation or any particular development proposal. **The city-wide facilities and improvements plan and the local facilities management plans are guides to ensure that no development occurs unless adequate facilities or improvements will be available to meet demands created by development. The city council may initiate an amendment to any of the plans at any time if in its discretion it determines that an amendment is necessary to ensure adequate facilities and improvements.**

(c) **If at any time it appears to the satisfaction of the city manager that facilities or improvements within a facilities management zone or zones are inadequate to accommodate any further development within that zone or that the performance standards adopted pursuant to Section 21.90.100 are not being met he or she shall immediately report the deficiency to the council. If the council determines that a deficiency exists then no further building or development permits shall be issued within the affected zone or zones and development shall cease until an amendment to the city-wide facilities and improvements plan or applicable local facilities management plan which addresses the deficiency is approved by the city council and the performance standard is met.**

(d) The city planner shall monitor the development activity for each local facilities management zone and shall prepare an annual report to the city council consisting of maps, graphs, charts, tables and text and which includes a developmental activity analysis, a facilities and improvements adequacy analysis, a facility revenue/expenditure analysis and recommendation for any amendments to the facilities management plan. **The content of the annual report shall be established by the city council.**

(e) **The city council shall annually review the city-wide facilities and improvements plan at the time it considers the city's capital improvement budget. (Ord. 9808 § 1, 1986"**

&

"21.90.180 Public facility reductions: Notwithstanding any previous sections of this chapter, **the city council shall not materially reduce or delete any public facilities or improvements without making a corresponding reduction in residential density unless such a reduction or deletion of public facilities is ratified by a vote of the citizens of Carlsbad. (Ord. 9829 § 4, 1987)"**

People for Ponto apologize for this late and hastily, review and comments. We just found out about the meeting this morning. We citizens know we can together achieve grate things if you allow us to work with you.

Staff  
Report

Page clarification/correction:

1 The LCP Land Use Plan Update is in fact an Amendment to an Existing LCP Land Use Plan. The Existing LCP Land Use Plan is already certified by the CA Coastal Commission as being consistent with the CA Coastal Act, except for some Amendments needed to address Sea Level Rise impacts and some other issues.

The LCP Amendment proposes to change the Existing CA Coastal Commission certified LCP Land Use Plan's "Non-residential Reserve" Land Use and Policy on Planning Area F to consider and document the need for "i.e. Public Park" at Ponto .

- 1 Staff summarizes the CA Coastal Act objectives to "ensure maximum public access to the coast and public recreation areas."
  - Carlsbad's Adopted Park Service Area/Equity Mapping shows there is no Park Service for the Ponto Area and Ponto Citizens, and no Park Service for the Coastal South Carlsbad area west of Interstate-5 and the rail corridor.
  - The City's mapping of land that meets the developer required Growth Management Open Space Standard of 15% Unconstrained land shows about 30-acres of this Open Space is missing at Ponto. This missing Open Space could have provided needed Park facilities that are missing at Ponto.
  - Citizens in over 2,500 emails to the City Council have cited the need for a Public Park at Ponto as part of the Existing LCP Land Use Plan Amendment proposed at Ponto. These requests area consistent with the CA Coastal Act.
- 3 2<sup>nd</sup> bullet: says city staff proposes to replace, amend, or retain various Existing LCP policies, so the Staff has a documented understanding how each Existing LCP policy and how each Existing policy is being treated in the proposed Amendment. Citizens asked in Oct 20, 2019 for this 'redline' version of the Existing LCP Policies and Land Use Maps so citizens can understand what the Amendments are so we as citizens could then provide informed public comment. This 'redline' version is also important for the City Council and Planning and other Commissions so they know what Amendments to Existing City LCP Land Use policy are being proposed. Citizens again request this 'redline' version that it appears the staff already has as they know what Existing LCP Land Use policies are being replaced, amended, or retained.
- 4 V is incomplete: the community asked on Oct 20, 2019 for 3 things: 1) a 'redline' version as noted above, 2) true Public Workshops to help inform and resolve community concerns about the proposed LCP land Use Plan Amendments, and 3) more public review time to provide for the above two other requests. All 3 requests should be acknowledge in the staff report. All 3 requests are rational and reasonable considering the proposed Draft LCP Land Use Plan

Amendment is the “buildout” plan for Carlsbad’s Coastal Zone and there were multiple documented fundamental “planning mistakes” regarding past City public information and participation in the Coastal Land Use planning. Providing such a process would help to correct these documented ‘planning mistakes’ that have gone on for many years. It is the right thing to do and most productive approach for all concerned.

7 Staff should accurately disclose that in 2010 the CA Coastal Commission in fact rejected the City’s proposed Ponto Beachfront Village Vision Plan for failing to disclose and comply with the then and current LCP Land Use Plan policy for Planning Area F at Ponto. Carlsbad Public Record Requests confirmed the staff did not disclose to citizens the existence LCP Land Use Plan policy for Planning Area F at Ponto, so citizens had no idea a Public Park at Planning Area F at Ponto needed to be considered. How can citizens, provide input if they don’t have complete and accurate to review and comment on?

8 Staff should correctly disclose that the 2015 application at Planning Area F at Ponto is first for a Local Coastal Program Amendment and Master Plan Amendment. These are both applications to change City Land Use Plan Policy and Zoning regulations. The actual applications for ‘development’ permits can in fact not even be considered by the City the Local Coastal Program Land Use of “Non-residential Reserve” is changed and Master Plan rezoning is approved. Then the ‘development’ permit application can applied for. The developer abandoned their application to change the LCP and Master Plan and then apply for developer permit review about a year ago. However, the city staff is keeping the application ‘alive’ even though there has been no progress on the application for over a year. It is unclear if the staff has authority to do this, or if the City Council has authority to withdrawal the application due to non-activity. The City has permit standards that withdraw applications if applicants make no progress on the applications after 6-months. What is troubling is that it appears the city staff proposal is to process the developer’s application to change the Existing LCP Land Use Plan for the developer.

Staff notes that the Planning Area F sites now designated as Residential R-23 and General Commercial by the Carlsbad General Plan Update. However, staff fails to disclose that until the Existing LCP Land Use Plan Amended is in fact approved by the CA Coastal Commission the Existing LCP Land Use Plan for Planning Area F supersedes the City’s General Plan Update. **Carlsbad’s General Plan Land Use Element clearly states this on page 2-26 “The city’s LCP Land Use Plan will be updated consistent with this General Plan. However, to take effect, the LCP must be certified by the Coastal Commission as well as adopted by the city. Until such time that this occurs, the existing (as of 2013) LCP must be adhered to.”** So until the City Council adopts the staff’s proposed Draft LCP Land Use Plan Amendment, AND the CA Coastal Commission “certifies” that LCP LUP Amendment; the City’s General Plan Update Land Use change cannot take effect. The General Plan Land Use at Ponto Planning Area F has in fact not been changed by the General Plan Update, but can only change with staff’s proposed Draft LCP Land Use Plan Amendment that the City Council can choose to approve or disapprove. Also official Public Records Requests have documented that the City’s General Plan Update planning process was fundamentally flawed at Ponto. Again, like during Ponto Beachfront Village Vision Plan planning process a few years earlier the city failed to comply with the then and current LCP Land Use Plan policy for Planning Area F at Ponto. The flawed General Plan Update process at Ponto prevented Citizens from knowing the facts so they could properly participate and provide review and comment during the General Plan Update. The significant citizen comments to the City Council asking for a Ponto Coastal Park is reflective of the fundamental public disclosure

and processing flaws that the city is only now acknowledging as one of the repeated 'planning mistakes' at Ponto. This is why citizens are asking for full disclosure of the facts and a complete planning process re-boot at Ponto. It also should be noted that the Existing LCP Land Use Policy for Planning Area F states that **"as part of any future planning effort ... consideration of a "Public Park" is required.** CA Coastal Commission Staff has indicated the City's proposed land use planning changes at Ponto as part of the General Plan Update are subject to change.

At the bottom of the page regarding SB 330, as noted above the "residential land use designation on the site" is not in effect until the currently proposed LCP Land Use Plan Amendment is both approved by the City Council AND also certified by the CA Coastal Commission, so SB 330 does not apply. Also SB 330 has specific language that exempts land use in the Coastal Zone. SB 330 (Skinner) Section 13 states: **"(2) Nothing in this section supersedes, limits, or otherwise modifies the requirements of the California Coastal Act of 1976** (Division 20 (commencing with Section 30000) of the Public Resources Code). **For a housing development project proposed within the coastal zone, nothing in this section shall be construed to prohibit an affected county or an affected city from enacting a development policy, standard, or condition necessary to implement or amend a certified local coastal program consistent with the California Coastal Act of 1976** (Division 20 (commencing with Section 30000) of the Public Resources Code)." This language is consistent with CA case law, and other housing laws that recognize the obvious – there is very limited amount of Coastal land v. significant land area inland. Limited Coastal Land per the CA Coastal Act is needed for "High-Priority" Coastal Land Uses" - i.e. Coastal Recreation and Low-cost visitor accommodations. The CA Coastal Act identifies both residential and general commercial land uses as "low-priority". So although affordable housing is important there are other more appropriate locations, than on the last remaining vacant Coastal land in Carlsbad will be needed to address the "High-Priority" Coastal Land Uses to serve Carlsbad and California's 'buildout' needs. CA case law recognizes the supremacy of the CA Coastal Act over CA Housing Laws as noted in "Kalnel Gardens, LLC v. City of Los Angeles". This case law data has already been provided to the City Council as part of Staff's housing discussions over the past few years. The staff report should have disclosed the above information, as it appears SB 330 is not a factor at Ponto.

- 13 2005-2010 Housing Element: As noted above the General Plan Land Use Element states the General Plan Land Use Plan is not effective until the proposed Draft LCP Land Use Plan Amendment is both approved by the City Council AND certified by the CA Coastal Commission. So, the Housing Element cannot recognize the proposed residential use change at Ponto until then. Also as noted before there were multiple documented fundamental 'planning mistakes' in public disclosure, participation and process that flawed the Housing Element. It should be noted that these flaws occurred during the time the CA Coastal Commission specifically rejected the Ponto Beachfront Village Vision Plan due to those flaws. The now City acknowledged 'planning mistakes' at Ponto prevented Carlsbad citizens from providing informed participation during the Housing Element.

Also, it is unclear why the staff misrepresented the amount of housing proposed in the Housing Element on the Ponto Planning Area F site as "the Ponto site for high density residential use at a minimum density of 20 dwellings per acre (128 units minimum)"; as this is not true. The City's General Plan promises only the minimum 15 dwelling units/acre for the R-23 Land Use designation. See the "Ponto" unit capacity table below from the City of Carlsbad General Plan Housing Element Table B-1 on page B-2 that lists 98 dwellings for the site on the east side of

Ponto Road and 11 **optional dwellings** on the west side of Ponto Road for 109 total units for both sites, v. the 128 units mentioned by staff. Not sure why staff misrepresented the density by 17 to 30%.

**Table B-1: Vacant Sites for Lower and Moderate Income Housing**

APN	General Plan Designation <sup>1</sup>	Zoning District	Site Size (Acres)	Unit Capacity, by Household Income		
				Very Low	Low	Moderate
2090901100 (Sunny Creek)	R15 (12 du/ac)	RD-M	9.6	-	-	115
2161404300 (Ponto)	R23	P-C	6.5	-	-	98
	GC (Mixed Use) <sup>3</sup>	P-C	3	-	-	11

2007 Ponto Beachfront Village Vision Plan: As noted several times above there were fundamental public disclosure and participation flaws with this plan. It was rejected by the CA Coastal Commission in 2010 part for those reasons. These flaws are confirmed by the City’s own data as a result of multiple Official Carlsbad Public Records Requests. This should be disclosed to the City Council and citizens.

- 14 2015 General Plan Update: As noted several times above there were fundamental public disclosure and participation flaws with this Update with regards to Ponto. These flaws are confirmed by the City’s own data as a result of multiple Official Carlsbad Public Records Requests. This should be disclosed to the City Council and citizens.

Citizens are asking the City Staff and City Council:

- for honesty, to fully and publicly recognize and disclose the past “planning mistakes” at Ponto, and fundamental flaws from the from those mistakes that prevented citizens from knowing about and participating in the planning process for Ponto.
- To keep the Existing LCP Land Use Plan at Ponto until a new open-honest and inclusive Community-based planning process can be achieved at Ponto.
- To be honest with respect to Park Serve Area and Equity issues at Ponto and Coastal South Carlsbad west of I-5 and the rail corridor.
- Consider the needs for inland South Carlsbad citizens, visitors and business to have their ONLY Coastal Park.
- Consider the larger regional Coastal Park need, and the forever ‘buildout’ Coastal Recreation needs for future generations.
- To be true and honest in translating and implementing our Community Vision

**Coastal Recreation:**

1. Request that the City as part of its Draft LCP Public Review process broadly-publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCPA processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park: This disclosure is needed to correct about 20 years of City misrepresentation to the public on the since 1996 and currently Existing LCP requirements at Ponto, and the City's prior planning mistakes at Ponto. Citizens have been falsely told by the City that all the Coastal planning at Ponto was done already and that the City followed its Existing LCP regarding the need for a park at Ponto, and that this is already decided and could not be reversed. This misinformation has fundamentally stifled public review and public participation regarding the Coastal Zone. City failure to provide such a broad-public disclosure on the documented prior, and apparently current proposed, "planning mistakes" would appear to violate the principles of Ca Coastal Act Section 30006. A broad-public disclosure would for the first time allow citizens to be accurately informed on the Existing LCP requirements at Ponto so they can provide informed public review and comment regarding the need for a Coastal Park in in this last vacant 'unplanned' area. The requested broad-public disclosure by the City of the City past mistakes and the Existing LCP requirements at Ponto is consistent with CA Coastal Act (CCA) "Section 30006 Legislative findings and declarations; public participation - The Legislature further finds and declares that **the public has a right to fully participate in decisions affecting coastal planning**, conservation and development; that achievement of **sound coastal conservation and development is dependent upon public understanding and support**; and that the continuing planning and implementation of **programs for coastal conservation and development should include the widest opportunity for public participation.**" The public cannot participate as outlined in CCA Section 30006 if past City 'mistakes' and misrepresentations on Coastal planning at Ponto go undisclosed to the public. If the public isn't fully informed about the 20-years of LCP planning mistakes at Ponto how could the public in the past (and now in the present) participate in the proposed LCP Amendment – **Public Participation as noted in Section 30006 above is the means to sound coastal conservation and development and is "... dependent upon public understanding ..."**. The City's past mistakes at Ponto need to be corrected by slightly different a Draft LCP Amendment process than currently outlined by the City; a new process is needed that clearly, opening and honestly informs and engages the public on the Existing LCP Ponto issues. The City's current Draft LCP Amendment process fails to follow CCA Section 30006 in that most all the citizens we encounter are as yet unaware of the City's Ponto mistakes and how they can participate in in the DLCPA process without that information. We see this daily in conversations we have with our fellow citizens. We even saw at the Oct 20, 2019 Carlsbad Planning Commission meeting that the Planning Commission was unaware of the planning mistakes at Ponto. How can a decision body of the City make a decision without knowing about these prior 'planning mistakes' facts that surround what they are being asked to decide on? Repeatedly since 2017 Carlsbad citizens and People for Ponto have asked the City to fully acknowledge the City's prior flawed planning at Ponto, and to correct that with ether maintaining the Existing LCP Non-residential Reserve Land Use or restarting the Coastal Planning at Ponto with a true and accurately informed Community-based Coastal Planning process consistent with Section 30006.

We request the City during the DLCPA Public Review period broadly and publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCP and other "planning efforts" public participation processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park, and 1) provide a truly honest public participation process on that disclosure consistent with CCA Section 30006 as part of the Draft LCP Amendment process or 2) retain the Existing LCP Non-residential Reserve Land Use and require a comprehensive and honest community-based redo of Coastal Resource planning at Ponto.

2. City fully and publicly reply to and the City Council consider the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process: Lance Schulte on 1/23/20 received an email reply by the City to his follow-up email regarding the status of the 11/20/19 citizen concerns/requests public comments and letters presented to the Planning Commission. This is appreciated, however it is request that the City fully publicly reply to the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process and present the to the City Council 11/20/19 citizen concerns/requests so the City Council can consider them and provide any direction to City Staff. City Staff first presented a summary presentation of the proposed Draft LCP Amendment to the Carlsbad Planning Commission on November 20, 2019, and indicated the public comment period would close on November in less than 2-weeks. Citizens and citizen groups provided public testimony to the Planning Commission, both verbally and in two written letters. The CCC was copied on those letters. The testimony and letters noted significant concerns about the City's proposed LCP Amendment process and made three requests:
  - a. Disclose and provide a publically accessible 'Redline Version' of the Existing 2016/Proposed LCP land use Plan and Policies so everyone can see the proposed changes to the Existing LCP.
  - b. Provide true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern or objections. Citizen Workshops, when done right, are valuable means to openly educate, discuss and work to consensus options. These areas, including Ponto, were/are subject to multiple lawsuits, so true open and honest public workshops would provide an opportunity to openly and honestly discuss the issues and hopefully build public consensus/support for solutions. This approach seems consistent with CCA Section 30006, and common sense.
  - c. Extend the public comment period 6-months to allow Citizen Review of the Redline Version of the LCPA and allow time for Citizen Workshops.

The City did extend the Public Review period 2-months over the holidays to January 31, 2020. This is appreciated although many think this is inadequate given the significance of the Proposed Land Use Plan Amendments, and lack of Redline Version to compare. The City and their consultants required several extra years beyond schedule prepare the proposed LCP Amendments. The extra years of City Staff work reflects on the volume of the over 500-pages in the documents and the time needed to understand the Existing LCP and then create an Amended LCP. Citizens need sufficient time, proper comparative tools (redline) and a process (workshops) to understand the proposed LCP Amendments that is reflective of extensive extra time needed by City Staff and consultants needed. Truncation of lay public review to a few months for an Amendment that took paid professionals many years to produce seems a more than a bit inappropriate. The City appears to be rejecting citizens' request to be provided a 'Redline Version' of the Existing 2016/Proposed LCP land use Plan. So public review comments will tainted or will miss many issues due having to manually cross-reference a 150-page Existing LCP LUP with a Proposed 350-page Proposed LCP LUP. There will be unknown and unconsidered changes in the Draft LCP Amendment that the public and city and CCC decision makers will not know about due to the lack of 'Redline Version'.

The City also appears to reject citizen requests for true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern – such as Ponto. Like Coastal Recreation issue #1 above the following citizen requests appear consistent with CA Coastal Act (CCA) Section 30006, and the City's rejection of that requests seem counter to the CA Coastal Act.

We again request of the City to provide: 1) a 'Redline Version' to the public and decision makers, along with sufficient time to review and comment on the 'Redline Version'; and 2) true Citizen Workshops for Ponto and the

other last remaining significant vacant Coastal lands in Carlsbad as part of the Draft LCP Amendment process, or as part of deferred LCP Amendment process for those areas.

3. Coastal Zoned land is precious: the very small amount of remaining vacant Coastal land should be reserved for “High-Priority” Coastal Recreation Land Uses under the CA Coastal Act to provide for the growing and forever ‘Buildout’ needs of Carlsbad and CA Citizens, and our visitors.
  - a. Less than 1.8% (76 square miles) of San Diego County’s 4,207 square miles is in Coastal Zone. This small area needs to provide for all the forever Coastal needs of the County, State of CA, and Visitors. Upland Coastal Recreation (Coastal Park) land use is needed to provide land to migrate the projected/planned loss of “High-Priority” Coastal Recreation land uses due to Sea Level Rise impacts. There is only 76 miles of total coastline in San Diego County; a significant amount is publicly inaccessible military/industrial land. So how the last few portions of Coastal Land within Carlsbad (which is about 8% of San Diego County’s Coastline) is planned for the forever needs for High-Coastal-Priority Recreation Land Use is critical for Carlsbad, San Diego, and California Statewide needs into the future.
  - b. Most all the developable Coastal land in Carlsbad is already developed with Low-Coastal-Priority residential uses. Only a very small percentage of Carlsbad’s developable Coastal land, maybe 1-2%, is still vacant. This last tiny portion of fragment of vacant developable Coastal Land should be documented in the Draft LCP and reserved for “High-Priority” Coastal Land uses – most critically Coastal Recreation – to address the growing Coastal Recreation needs from a growing population and visitors. These growing needs are all the more critical in that existing Coastal Recreation lands will be decreasing due to inundation and erosion due to DLCPA planned Sea Level Rise.
  - c. This image of the western half of San Diego County graphically shows (in the blue line) the very small Coastal Zone Area that needs to provide the Carlsbad’s and California’s Coastal Recreational needs for all San Diego County residents and Visitors:

We request that 1) the amount and location of remaining vacant Coastal land in Carlsbad be documented and mapped and be reserved for high-priority Coastal Land Uses consistent with CCA Goals in Section 30001.5 "... (c) ... **maximize public recreational opportunities in the coastal zone** consistent with sound resources conservation principles and constitutionally protected rights of private property owners. (d) **Assure priority for coastal-dependent and coastal-related development over other development on the coast.** ... "; 2). This data should be used in the City's analysis and the public's review and discussion about the City's proposed Draft 'Buildout' Land Use Plan. The City's proposed Draft 'Buildout' Land Use Plan will forever lock in the amount "maximum public recreational opportunities in the coastal zone" and will be the final Coastal Land Use Plan that is supposed to "assure priority for coastal-dependent and coastal-related development over other development on the coast". Most of Carlsbad's Coastal Zone is already developed or committed to low-priority land uses contrary to these CCA Goals, so how we finally and forever plan to use of the last small remaining vacant Coastal Land is very important.

4. The proposed Draft LCP Amendment in Chapter 3 makes unfounded statements regarding the proposed Amendment to the LCP Land Use Plan provision of "High-Priority" Coastal Recreation land use: On page 3-3, at the beginning of the Chapter 3 – Recreation and Visitor Serving Uses the City correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation uses, and cites multiple CCA Sections to that effect. The City's proposed Coastal Land Use Plan then states on page 3-5 that a high proportion of land in the City is dedicated open

space available for passive and active use, yet provides no justification or accurate metric to support this statement. This is a critical unsubstantiated and speculative statement that is not supported by any comparative data (justifying the “high proportion” statement). The City later in Chapter 3 compared the adjoining cities of Oceanside and Encinitas to try to show how the proposed Draft LCP LUP Amendment provides higher levels of Visitor Serving Accommodations. That ‘non-common denominator’ comparison was fundamentally flawed, as noted in a prior separate Draft LCPA public review comment from People for Ponto regarding another high-priority Coastal land use (visitor accommodations) planned for in Chapter 3, but at least it was an attempt to compare. However, for the Coastal Recreation portion of Chapter 3, the City does not even attempt to provide any comparative data to support (or justify) the proposed Coastal Recreation Land Use Plan and statements. The Coastal Recreation Chapter also fails to disclose Carlsbad’s adopted City Park Master Plan (Park Service Area and Equity map) data that shows a clear conflict between the CA Coastal Act Policy Sections noted at the beginning of Chapter 3 and Chapter 3’s proposed Draft Coastal Recreation Land Use Plan.

Comparative Coastal Recreation: Comparing the Land Use Plan and policies of Oceanside, Carlsbad and Encinitas, one finds Carlsbad’s proposed Coastal Recreational Plan and Policies are not “high”, but very low compared with Oceanside and Encinitas. Carlsbad has a General Plan Park Standard of 3 acres of City Park per 1,000 Population. Oceanside has a 5 acres of City Park Standard per 1,000 population, and Encinitas has a 15 acres per 1,000 population standard, and an in-lieu park fee requirement of 5 acres per 1,000 population. Carlsbad’s proposed Coastal Recreation Land Use Plan is in fact not ‘high’ but is in fact the lowest of the three cities, with Carlsbad providing only 40% of Oceanside’s park standard, and only 20% of Encinitas’s Park Standard. Citywide Carlsbad currently has 2.47 acres of developed park per 1,000 population, Oceanside currently has 3.6 acres of developed park per 1,000 population, and Encinitas currently has 5.5 acres of developed park per 1,000 population. Although this data is citywide, it shows Carlsbad’s current amount of developed parkland is less than 70% of what Oceanside currently provides, and less than 45% of what Encinitas currently provides. Carlsbad is not currently providing, nor proposing a Coastal Land Use Plan to provide, a ‘high’ proportion of Coastal Recreation Land Use compared to Oceanside and Encinitas.

On page 3-5 Carlsbad may be misrepresenting city open space that is needed and used for the preservation of federally endangered species habitats and lagoon water bodies. This open space Land cannot be Used for Coastal Recreation purposes; and in fact Land Use regulations prohibit public access and Recreational Use on these Lands and water bodies to protect those endangered land and water habitats. 78% of Carlsbad’s open space is “open space for the preservation of natural resources” and cannot be used for Coastal Parks and Recreational use. Although “open space for the preservation of natural resources” does provide scenic or visual amenity, and this amenity is addressed as a different coastal resource. Visual open space is not Coastal Recreation Land Use. It appears Carlsbad is proposing in the Draft LCP Amendment to continue to, providing a ‘low’ percentage of Coastal Park Land Use and Coastal Recreation Land Use compared to adjoining cities.

In addition to the comparatively low amount of Coastal Park land Carlsbad plans for, Carlsbad scores very poorly regarding the equitable and fair distribution and accessibility of Coastal Parks and Coastal Recreation Land Uses. Both the City of Oceanside and Encinitas have very robust and detailed Park and Land Use plans to promote an equitable distribution of, and good non-vehicular accessibility, to their Coastal Parks. By comparison, Carlsbad’s park land use plan scores poorly, as exemplified in Ponto and South Carlsbad. Ponto’s existing population requires about 6.6 acres of City Parkland per Carlsbad’s low 3 acres per 1,000 population standard. Yet the nearest City Park is several miles away and takes over 50 minutes to walk along major arterial roadways and across Interstate 5 to access. As such this nearest park is not an accessible park for Ponto children, and thus Ponto children have to play in

however it more accurately illustrated in the following data/image from the adopted Carlsbad Park Master Plan's "Service Area Maps (Equity Maps)". The image below titled 'No Coastal Park in South Carlsbad' shows Carlsbad's adopted "Park Service Area Maps (Equity Maps)" from the City's Park Master Plan that says it maps "the population being served by that park type/facility." The added text to the image is data regarding park inequity and disparity in South Carlsbad. The image compiles Carlsbad's adopted Park "Park Service Area Maps (Equity Maps)" for Community Parks and Special Use Area Parks that are the City's two park acreage types produced by the City's comparatively low standard of 3 acre of City Park per 1,000 population. The City's Park Service Area Maps (Equity Maps) shows areas and populations served by parks within the blue and red circles. City data clearly shows large areas of overlapping Park Service (areas/populations served by multiple parks) in North Carlsbad and also shows large areas in South Carlsbad with No Park Service (areas/populations unserved by any parks) and Park Inequity in South Carlsbad. It clearly shows the City's Documented Park Need and Park inequity at Ponto. The Existing LCP LUP for Ponto's Planning Area F in is required to "consider" and "document" the need for a "Public Park". The City's adopted Park Service Area Maps (Equity Maps) clearly shows the inequity of Coastal City Park between North and South Carlsbad, and the need for Coastal Parks in South Carlsbad – particularly at Ponto. The City's proposed Draft 'Buildout' Coastal Recreation Land Use Plan instead proposes to lock-in documented City Public Coastal Park inequity and unserved Coastal Park demand at Ponto and South Carlsbad forever. It does so by proposing the last vacant undeveloped/unplanned Coastal land – Ponto Planning Area F - in the unserved Ponto and South Carlsbad coastline areas instead of being planned for much needed City Park and Coastal Recreation use be converted to even more low-priority residential and general commercial land uses. These 'low-priority' residential uses, by the way, further increase City Park and Coastal Recreation demand and inequity in Coastal South Carlsbad. This is wrong, and a proposed 'forever-buildout' wrong at the most basic and fundamental levels. The proposed Draft Coastal Recreation Land Use Plan by NOT providing documented needed City parks for vast areas of Coastal South Carlsbad is inconsistent with the CA Coastal Act policies and Existing LCP LUP requirements for Ponto Planning Area F; and also inconsistent with fair/equitable/commonsense land use and park planning principles, inconsistent with CA Coastal Commission social justice goals, inconsistent with social equity, inconsistent with VMT reduction requirements, and inconsistent with common fairness. A different Coastal Recreation Land Use Plan should be provided that provides for a socially equitable distribution of Coastal Park resources so as to would allow children, the elderly and those without cars to access Coastal Parks. The proposed Draft 'Buildout' Coastal Recreation Land Use Plan forever locking in the unfair distribution of City Parks appears a violation of the not only CCA Sections 30213, 30222, 30223, and 30252(6) but also the fundamental values and principles of the CA Coastal Act. The Draft also appears a violation of Carlsbad's Community Vision.

# No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

A different Coastal Recreation Land Use Plan is required to provide a more equitable distribution of City Parks with non-vehicular accessibility. Such a different plan would advance State and City requirements to reduce vehicle Miles Traveled (VMT) and greenhouse gas emissions that contribute to climate change and sea level rise impacts. Please note that the data for the above basic comparison comes from City of Carlsbad, Oceanside and Encinitas General Plan and Park Master Plan documents.

Data shows the proposed Coastal Recreation Plan conflicts with the CA Coastal Act policy Sections. As mentioned page 3-3 correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation Land Uses, and pages 3-5 list multiple CA Coastal Act (CCA) policy Sections that confirm this. However, given the significant statewide importance of Coastal Recreation Land Use, the City proposed 'Buildout' Coastal Recreation Land Use Plan does not appear to adequately address and implement these CCA Policies, and most noticeably in the Ponto area of South Carlsbad. Coastal Recreation is a significant Statewide High-Priority Land Use under the CCA. For a substantially developed non-coastal-industry city like Carlsbad Coastal Recreation is likely the biggest land use issue. This issue is even more elevated due to the fact that there are only a few small areas left of undeveloped Coastal land on which to provide Coastal Recreation, and Carlsbad is proposing a Coastal 'Buildout' Land Use Plan on those areas. The use of the last few remaining vacant portions of Coastal land for Coastal Recreation Land Use is the most important land use consideration in the proposed Draft LCP Land Use Plan Amendment as population and visitor growth will increase demands for Coastal Recreation. It is thus very surprising, and disturbing that the proposed Coastal Recreation Land Use Plan is so short, lacks any comparative and demand projection data, lacks any resource demand/distribution and social equity data, and lacks any rational and clear connection with CCA Policy and the proposed 'Buildout' Coastal Land Use plan. This is all the more troubling given that:

- The Ponto area represents the last significant vacant undeveloped/unplanned land near the coast in South Carlsbad that can provide a meaningful Coastal Park.
- The fact that the City's Existing LCP requires the city consider and document the need for a "i.e. Public Park" on Ponto's Planning Area F prior to the City proposing a change of Planning Area F's "Non-residential

Reserve” land use designation. The City has repeatedly failed to comply with this LCP LUP requirement, and worse has repeatedly failed to honestly inform citizens of this LCP LUP requirement at Planning Area F before it granted any land use. The City, apparently implementing speculative developer wishes, has repeatedly proposed changing Planning Area F’s Coastal Land Use designation to “low-priority” residential and general commercial land uses without publically disclosing and following the Existing LCP LUP.

- The City’s currently developed parks in the southern portion of the City do not meet the city’s comparatively low public park standard of only 3 acres per 1,000 population. Since 2012 there has been City park acreage shortfall in both SW and SE Carlsbad.
- The Existing population of Ponto (west of I-5 and south of Poinsettia Lane) requires about 6.6 acres of Public Park based on the City’s comparatively low public park standard of 3 acres per 1,000 population. There is no Public Park in Ponto. Adding more population at Ponto will increase this current park demand/supply disparity.
- Carlsbad and other citizens have since 2017 expressed to the City the strong need for a Coastal Park at Ponto, and requested the City to provide a true citizen-based planning process to consider the Public Park need at Ponto. The Citizens’ requested process is fully in-line with CCA Goals, Public Participation Policy, Land Use Policies, and the Existing LCP Land Use Plan/requirements for Planning Area F and is the most appropriate means to consider and document the need for a Public Park at Ponto as required by the Existing LCP Land Use Plan.
- Planning Area F is for sale, and a non-profit citizens group has made an offer to purchase Planning Area F for a much needed Coastal Park for both Ponto and inland South Carlsbad residents and visitors. How should these facts be considered by the City and CCC?
- Carlsbad has no Coastal Parks west of I-5 and the railroad corridor for the entire southern half of Carlsbad’s 7-mile coastline.
- The southern half of Carlsbad’s coastline is 5.7% of the entire San Diego County coastline and represents a significant portion of regional coastline without a meaningful Coastal Park west of I-5 and the Railroad corridor.
- The City’s proposed Coastal Recreation Land Use Plan provides No Documentation, No Rational, and No Supporting or Comparative Data to show the proposed Coastal Recreation Land Use Plan in fact complies with the CA Coastal Act.

5. There is no Coastal Recreation/Park west of interstate 5 for all South Carlsbad, or half of the entire City. This is obviously an unfair and inequitable distribution of Coastal Recreation/Park resources that should be corrected by changes to the Draft LCP Land Use Amendment: The following image (which was sent to the City and CCC on several prior communications) was first requested by former Carlsbad Councilman Michael Schumacher during a People for Ponto presentation/request at the Oct 23, 2018 City Council meeting. The data compiled in the image shows how the South Coastal Carlsbad (Ponto) is not served by a Park per the City’s adopted Parks Master Plan. The blue dots on the map are park locations and blue circle(s) show the City’s Park Master Plan adopted Park Service Areas and Park Equity. This data, from pages 87-88 of the City of Carlsbad Parks Master Plan, shows all City Parks (both Community Parks and Special Use Areas in Coastal Carlsbad (except Aviara Park east of Poinsettia Park and west of Alga Norte Park). The text on the left margin identifies the South Carlsbad Coastal Park (west of I-5) gap along with the number of South Carlsbad Citizens (over half the City’s population) without a Coastal Park. The left margin also identifies more local issues for the over 2,000 Ponto area adults and children. For Ponto residents the nearest Public Park and City proposed ‘solution’ to the South Carlsbad and Ponto Public Park deficit are miles away over high-speed/traffic roadways and thus somewhat hazardous to access and effectively unusable by children/the elderly or

those without cars. Having been a 20-year resident of Ponto I regularly see our children have to play in the street as there are no Public Park with large open fields to play at within a safe and under 1-hour walk away. Ponto citizens have submitted public comments regarding this condition and the lack of a Park at Ponto

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

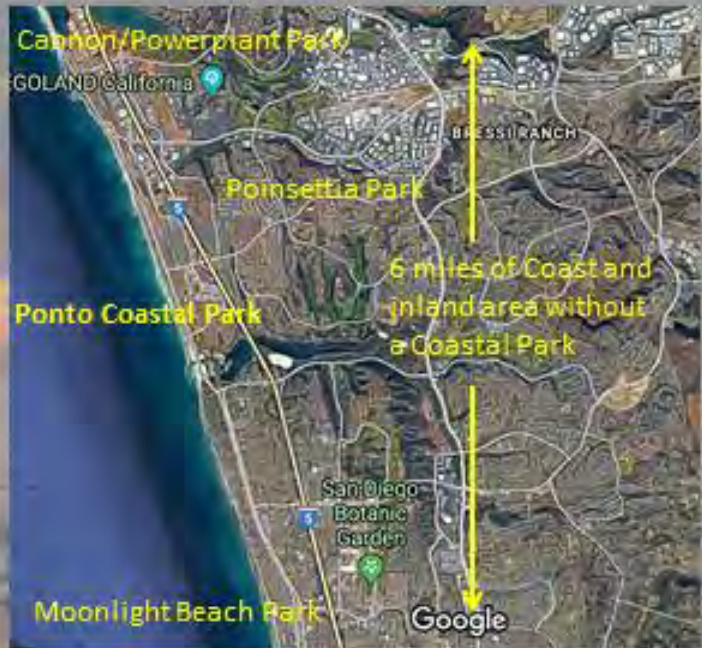

Ponto is at the center of regional 6-mile Coastal Park Gap. A Coastal Park in this instance being a Public Park with practical green play space and a reasonable connection with the Coast (i.e. located west of the regional rail and Interstate-5 corridors). The following image shows this larger regional Coastal Park Gap centered on the Ponto Area, and the nearest Coastal Parks – Cannon Park to the north, and Moonlight Park to the south.

Regionally this image shows Ponto is the last remaining significant vacant Coastal land that could accommodate a Coastal Park to serve the Coastal Park current needs of over existing 2,000 Ponto residents, 64,000 existing South Carlsbad residents, and a larger regional population. It is also the only area to serve the Coastal Park needs for the thousands of hotel rooms in Upland Visitor Accommodations in South Carlsbad.

# How Ponto Serves Region

- Ponto is in the middle of the regional Coastal Park Gap
- A Ponto Coastal Park fills a critical 6 mile gap of coastline without a Coastal Park - 8.6% of SD County coastline
- A Ponto Coastal Park Serves over 26,000 homes & 64,000 citizens just in South Carlsbad without a Coastal Park
- Serves many more people outside Carlsbad

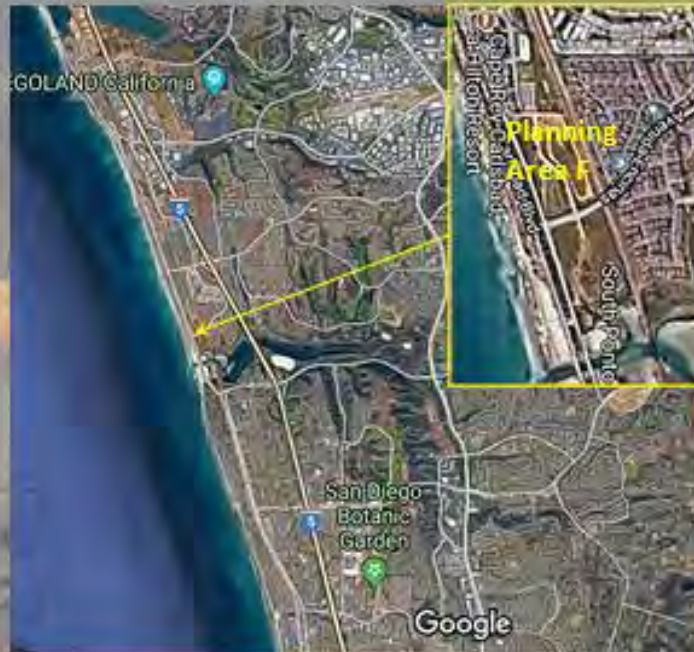

As People for Ponto first uncovered and then communicated in 2017 to the City and CCC; Carlsbad's Existing (since 1994) Local Coastal Program LUP currently states (on page 101) that Ponto's Planning Area F: carries a Non-Residential Reserve (NRR) General Plan designation. Carlsbad's Existing Local Coastal Program Land Use Plan states: "Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an "unplanned" area ..." and requires that: "... **As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.**" CA Coastal Commission actions, Carlsbad Public Records Requests 2017-260, 261, and 262, and 11/20/19 City Planner statements confirm the City never fully communicated to Carlsbad Citizens the existence of this LCP requirement nor did the City comply with the requirements. Of deep concern is that the City is now (as several times in the past) still not honestly disclosing to citizens and implementing this Existing LCP requirement as a true and authentic 'planning effort'. The lack of open public disclosure and apparent fear of true public workshops and Public Comment about the Existing Planning Area F LCP requirements are troubling. The point of a 'planning effort' is to openly and publically present data, publically discuss and explore possibilities/opportunities, and help build consensus on the best planning options. Citizens are concerned the city has already made up its mind and there is no real "planning effort" in the proposed Draft LCP Amendment process, just a brief Staff Report and at the end provide citizens 3-minutes to comment on the proposal. This is not the proper way to treat the last remaining significant vacant land in South Carlsbad that will forever determine the Coastal Recreation environment for generations of Carlsbad and California citizens and visitors to come.

The following data/images show how Ponto is in the center of the 6-mile (west of I-5 and Railroad corridor) regional Coastal Park gap. Ponto is the last remaining vacant and currently "unplanned" Coastal land that is available to address this regional Coastal Park Gap.

## How Ponto Serves Region cont.

- **Relieves Coastal Park congestion** in North Carlsbad, Encinitas and Solana Beach
- Area currently needs Coastal Park as seen by:
  - Ponto Beach parking congestion
  - current trespass use of Planning Area F as a Park
- **6.6 acre portion of Planning Area F** addresses SW Quad City Park deficit

## How Ponto Serves Region cont.

- A Ponto Park helps address 2050 and beyond Regional Population and Visitor Growth demands for Coastal Parks
- A Ponto Park provides the lowest-cost coastal access and recreation opportunities for CA citizens and visitors

## How Ponto Serves Region cont.

- Vital park and open space amenity for Visitor serving businesses and accommodations
- 6.6 acre unique City Coastal Park venue to stage special events: Runs, bike rides, triathlons, sports, coastal festivals, etc.

## How Ponto Serves Region cont.

- Critical Park space for So. Carlsbad State Beach Campground
- Provides a big training and staging space for Junior lifeguards
- Dog walk trail

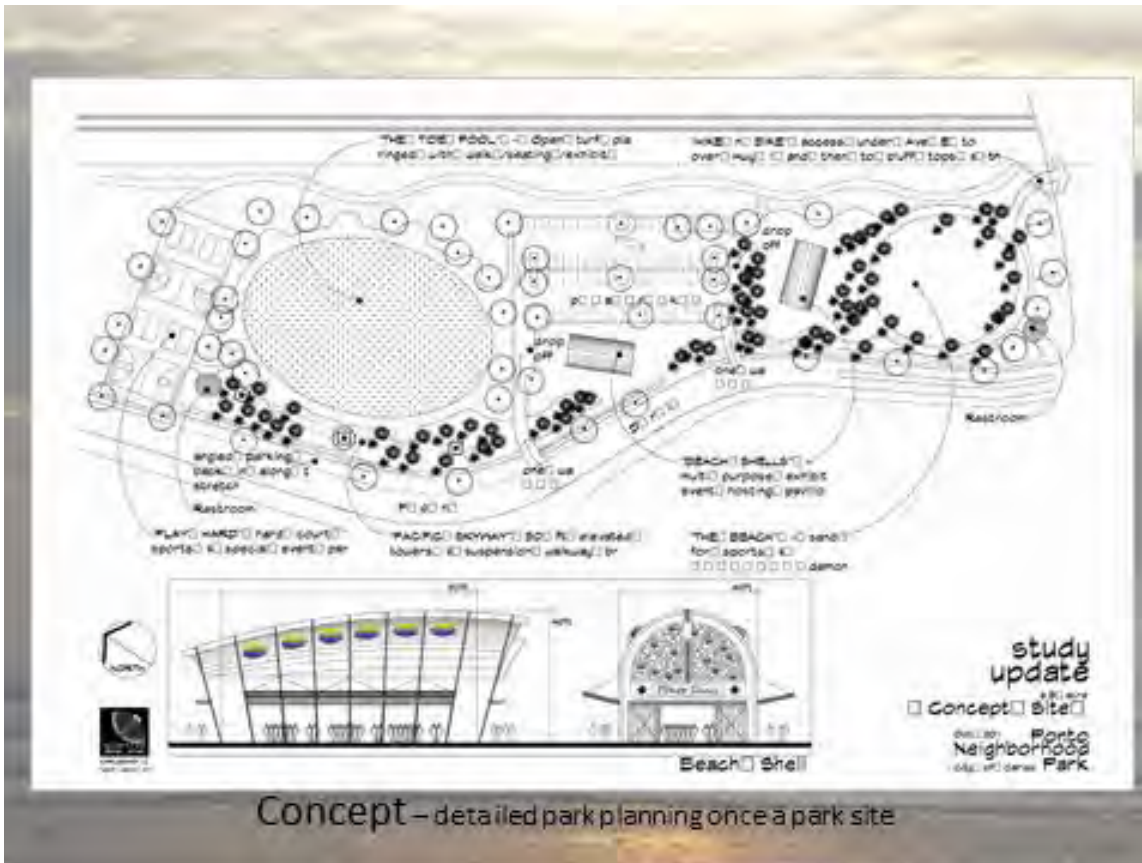

# Ponto Coastal Park Concept

- A concept – but shows potential recreational opportunities
- Provides **vital parkland support for beach & open play fields**
- Concept plan a gift from San Pacifico Community Association

One possible Concept image of a potential Ponto Coastal Park at Planning Area F is illustrated below. The potential for a Ponto Coastal Park is real. The speculative land investment fund (Lone Star Fund #5 USA L.P. and Bermuda L.P.) that currently owns Planning Area F is selling the property, and is available for the City of Carlsbad to acquire to address the documented demand/need for a City Park and City Park inequity at Ponto and in Coastal South Carlsbad. A Ponto Beachfront Park 501c3 is working to acquire donations to help purchase the site for a Park. These situations and opportunities should be publicly discussed as part of the City Staff's proposed Local Coastal Program Land Use Plan Amendment.

Concept – detailed park planning once a park site

6. Projected increases in California, San Diego County and Carlsbad population and visitor growth increases the demand for High-Priority-Coastal Recreation land use:
  - a. Increasing Citizen demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

San Diego County Citizen Population - Source: SANDAG Preliminary 2050 Regional Growth Forecast

1980	1,861,846
1990	2,498,016
2000	2,813,833
2010	3,095,313
2020	3,535,000 = 46,500 Citizens per mile of San Diego County coastline
2030	3,870,000
2040	4,163,688
2050	4,384,867 = 57,700 Citizens per mile of San Diego County coastline

2020 to 2050 = 24% increase in San Diego County population.

Citizen Population will continue beyond 2050. Carlsbad may plan for 'Buildout' in 2050, but what is San Diego County's 'Buildout'? There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for this growing population. If we do not increase our supply of Coastal Recreational Resources for these increased demands our Coastal Recreation Resources will become more overcrowded, deteriorated and ultimately diminish the Coastal Recreation quality of life for Citizens of Carlsbad and California. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5) and there is No Coastal Park in all of South Carlsbad to address the Coastal Recreation needs of the 64,000 South Carlsbad Citizens.

- b. Increasing Visitor demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

Yearly Visitors to San Diego County – source: *San Diego Tourism Authority; San Diego Travel Forecast, Dec, 2017*

2016	34,900,000
2017	34,900,000
2018	35,300,000
2019	35,900,000
2020	36,500,000 = average 100,000 visitors per day, or 2.83% of County’s Population per day, or 1,316 Visitors/coastal mile/day in 2020
2021	37,100,000
2022	37,700,000

This is growth at about a 1.6% per year increase in visitors. Projecting this Visitor growth rate from 2020 to 2050 results in a 61% or 22,265,000 increase in Visitors in 2050 to:

2050	58,765,000 = average 161,000 visitors per day, or 3.67% of the County’s projected 2050 Population per day, or 2,120 Visitors/coastal mile/day in 2050.
------	--

The number of Visitors is likely to increase beyond the year 2050. There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for these projected 2050 61% increase, and beyond 2050, increases in Visitor demand for Coastal Recreational Resources. Increasing Coastal Recreation land is a vital and critically supporting Land Use and vital amenity for California’s, the San Diego Region’s and Carlsbad’s Visitor Serving Industry. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5). There are thousands of hotel rooms in South Carlsbad that have NO Coastal Park to go to in South Carlsbad. This needs correcting as both a Coastal Act and also a City economic sustainability imperative.

- c. We request that the as part of the public’s review, the City Staff proposed Draft LCP Amendment to the Land Use Plan clearly document if and/or how future forever ‘Buildout’ City, Regional and Statewide population and visitor population demand for Coastal Recreation and City Coastal Parks are adequately provided for both in amount and locational distribution in the Carlsbad proposed Amendment of the LCP Land Use Plan.

- 7. Carlsbad’s Draft Local Coastal Program Land Use Plan Amendment says it plans to a year 2050 buildout of the Coastal Zone. The Draft Local Coastal Program Land Use Plan Amendment then is the last opportunity to create a Coastal Land Use Plan to provide “High-Priority” Coastal Recreation Land Use, and will forever impact future generations of California, San Diego County, and Carlsbad Citizens and Visitors:

- a. The Draft LCPA indicates in 2008 only 9% of All Carlsbad was vacant land. Less is vacant now in 2019. Carlsbad’s Coastal Zone is 37% of the City, so vacant unconstrained land suitable for providing Coastal Recreation is likely only 3-4%. The prior request for a full documentation of the remaining vacant Coastal lands will provide a better understanding needed to begin to make the final ‘buildout’ Coastal Land Use Plan for Carlsbad. The Draft LCPA does not indicate the amount and locations of currently vacant unconstrained Coastal Land in Carlsbad. This final limited vacant land resource should be clearly documented and mapped in the DLCPA as it represents the real focus of the DLCPA – the Coastal Plan for these remaining

undeveloped lands. These last remaining vacant lands should be primarily used to provide for and equitably distribute “High-Priority” Coastal Recreation Land Uses consistent with CCA Sections:

- i. Section 30212.5 “... Wherever appropriate and feasible, public facilities, including parking areas or facilities, **shall be distributed throughout an area so as to mitigate against the impacts, social and otherwise, of overcrowding or overuse by the public of any single area.**”;
- ii. Section 30213 “... **Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...**”;
- iii. Section 30222 “**The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development,** but not over agriculture or coastal-dependent industry.”
- iv. Section 30223 “**Upland areas necessary to support coastal recreational uses shall be reserved for such uses, where feasible**” ,
- v. Section 30251 ... The location and amount of new development should maintain and enhance public access to the coast by ... 6) assuring that the recreational needs of new residents will not overload nearby coastal recreation areas by **correlating the amount of development with local park acquisition** and development plans with the provision of onsite recreational facilities to serve the new development”

Adopted City Park Service Area and Park Equity maps discussed earlier document the proposed Draft LCP Amendment’s inconstancy with the above CCA Policy Sections. The locations and small amounts remaining vacant Coastal lands provide the last opportunities to correct the inconsistencies of City proposed Draft “buildout” LCP Land Use Plan Amendment with these Coastal Act Policies.

Currently and since 1996 there has been LCP LUP Policy/regulations for Ponto Planning Area F that require consideration of a “Public Park” prior to changing the existing “unplanned Non-residential Reserve” Land Use designation. A map and data base of vacant developable Coastal land should be provided as part of the Draft LCPA and the Draft LCPA. This map and data base should document the projected/planned loss of Coastal land use due to Sea Level Rise. Draft LCPA projects Sea Level Rise will eliminate several beaches and High-Priority Coastal Land Uses like Coastal Lagoon Trails and the Campground.

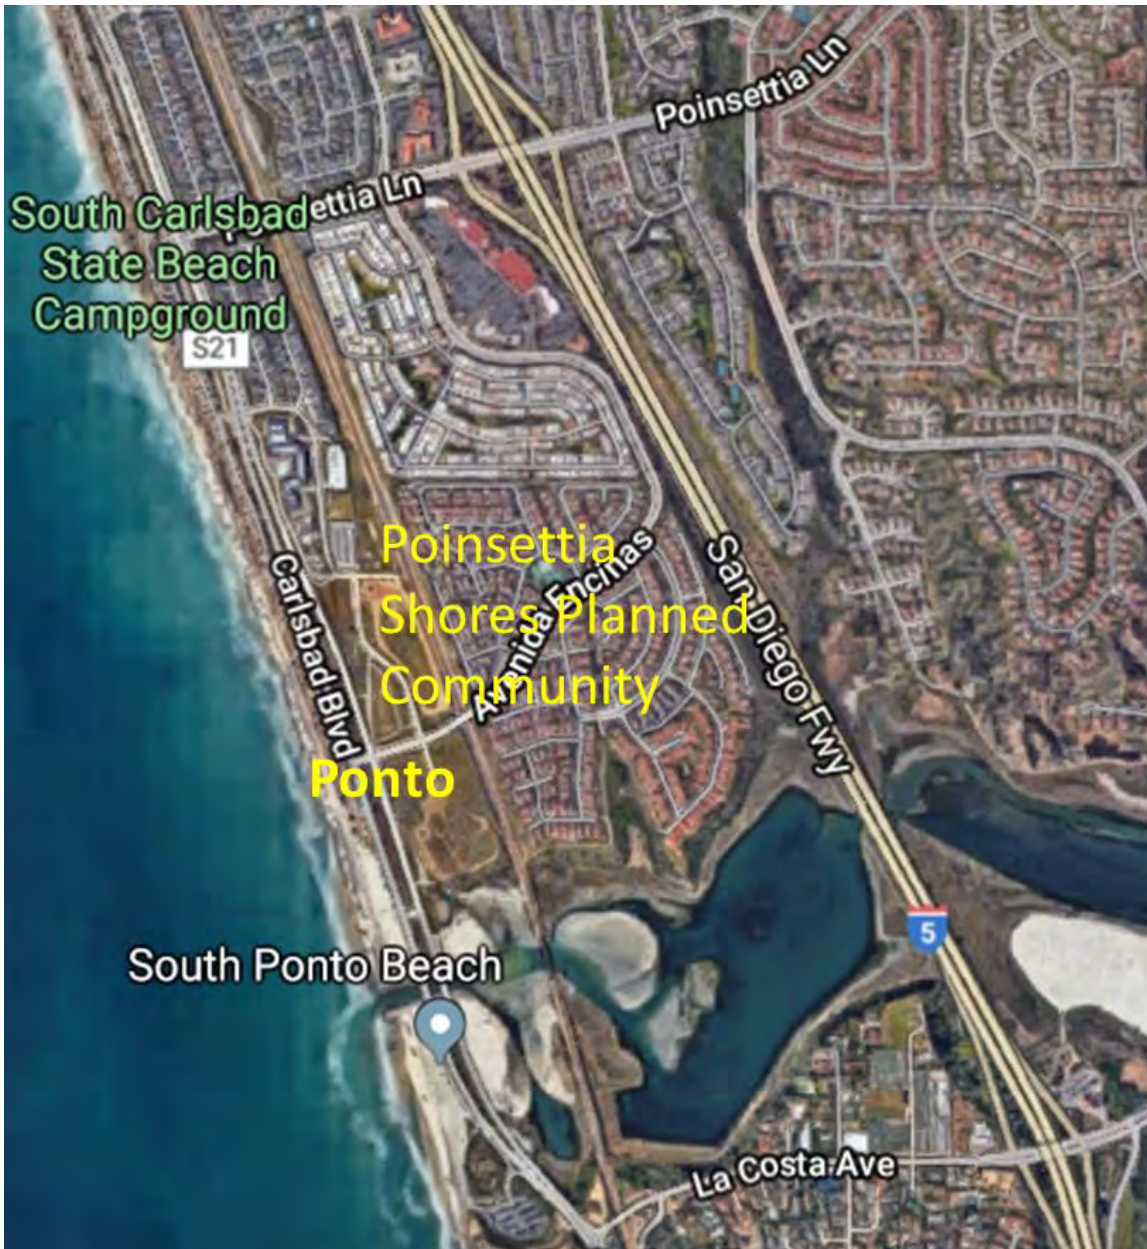

- b. The LCP Land Use Plan should plan and reserve the very limited vacant developable Coastal land for the long-term ‘Buildout’ needs of “High-Priority” Coastal Recreation Land Use. Vacant developable Coastal land is too scarce to be squandered for “low-priority” uses. Sea Level Rise will reduce “High-Priority” Coastal Uses. So how vacant developable Upland area should be preserved for “High-Priority” Coastal Uses is a key requirement to be fully documented and discussed in the Draft LCPA. If not one of two things will eventually happen 1) any new Coastal Park land will require very expensive purchase and demolition of buildings or public facilities to create any new Coastal Park land to meet existing and growing demand; or 2) Coastal Recreation will be hemmed-in by “low-priority” uses and thus force Coastal Recreation to decrease and become increasingly concentrated and overcrowded in its current locations; and thus will promote the eventual deterioration of our current Coastal Recreation resources. A plan that fails to fix Coastal Park deficits and then increase Coastal Parks in pace with increased population/visitor demand is a plan that can only result in degradation. How the Draft LCPA documents and addresses the land use planning of the last small portions of vacant developable Coastal land is critical for the future and future generations.

8. Citizens of South Carlsbad are concerned about the City's multiple prior flawed Ponto planning processes or 'mistakes' the City has made yet is basing the City Staff's proposed Draft LCP LUP. The concerns being the City is not openly and honestly communicating information to citizens and the public, and not allowing a reasonable and appropriate community-based planning process to address the documented Park, Coastal Recreation and unconstrained open space needs in South Carlsbad. One of these groups of citizens has created a [www.peopleforponto.com](http://www.peopleforponto.com) website to try to research and compile information and hopefully provide a better means for citizens to understand facts and then express their concerns/desires to the City of Carlsbad (City) and CA Coastal Commission (CCC). Over 2,000 emails have sent to the City and CCC regarding Coastal Land Use Planning Issues at Ponto. The San Pacifico Planned Community (i.e. San Pacifico Community Association) has also, since 2015, sent numerous emailed letters to the City and CCC noting the significant concerns about changes in Coastal planning the City is proposing for our Planned Community.

Repeatedly over 90% of surveyed citizens (results emailed prior to both the City and CCC) have expressed the vital need and desire for a Coastal Park at Ponto to serve the current and future Coastal Recreation needs for all both Ponto and South Carlsbad and for larger regional and State Coastal Recreational needs. This desire is supported by data, CA Coastal Act Policy, and also Carlsbad's Community Vision – the foundation for the City's General Plan. Ponto is the last remaining vacant Coastal area available to provide for those needs in South Carlsbad and for a regional 6-mile stretch of coastline. Citizens have expressed deep concern about the City's flawed prior Coastal planning efforts for Coastal Recreation at Ponto, including two repeated LCP Amendment "mistakes" (Ponto Beachfront Village Vision Plan in 2010 and General Plan Update in 2015) when the City twice failed to publicly disclose/discuss and then follow the Existing LCP requirements at Ponto – specifically for Planning Area F. People for Ponto had to use multiple Carlsbad Public Records Requests in 2017 to find these "mistakes". CCC Staff was helpful in both confirming the City "mistakes" and communicating back to the City. As citizens we are still unclear as to how/why these two repeated "mistakes" happened. There is citizen concern that the City is again repeating these two prior "mistakes" by not at the beginning of the Public Comment Period clearly and publicly disclosing the Planning Area F LCP requirements to citizens as part of the current LCP Amendment process, and also by not implementing the existing LCP requirement PRIOR to proposing an Amended Coastal Land Use Plan for Ponto. The City in its proposed LCP Amendment process is putting-the-cart-before-the-horse with respect to honest and open consideration, documentation and public discussion of the need for high-priority Coastal Recreation land use required of Planning Area F at Ponto. The City is also not clearly letting all Carlsbad citizens know about the Existing LCP requirements for Ponto's Planning Area F so they can be informed to reasonably participate in public review and comment regarding amending that LCP requirement, and the need for Coastal Recreation land uses in South Carlsbad. Since 2017 there has been repeated citizen requests to the City (copies were provided to the CCC) to fix these multiple fundamental/foundational flaws by in the City's prior Coastal Recreation and Public Parks and Open Space at planning, and the currently Proposed Draft LCP Land Use Plan Amendment. Since 2017 there have also been repeated citizen requests to the City to provide a truly open, honest, inclusive community-based planning process and workshops with the accurate and honest information, prior to forming a proposed Draft LCP Land Use Plan Amendment. As citizens we believe we can constructively work with the City and CCC towards a consensus or viable options on these important Coastal Recreation issues if the City allows and encourages such an open, honest and inclusive process. We request the City respond to the requests submitted to the City since 2017, and again request such a process from the City before any LCP Amendment is first considered by the Planning Commission and City Council. Such a requested process benefits all.

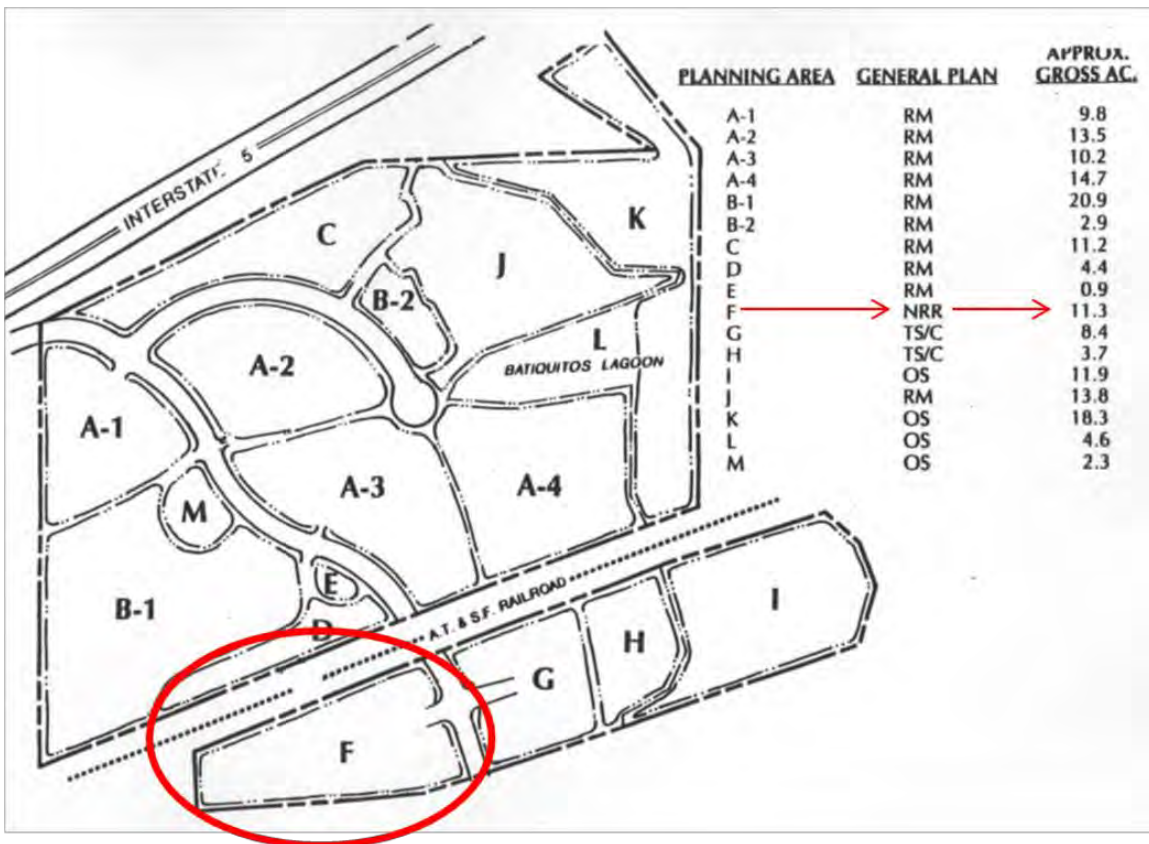

9. Why the Draft LCPA Land Use Plan for Ponto should provide for the current and future Coastal Park and Recreation needs for South Carlsbad, the San Diego Region and California.
- Ponto, is one of last remaining vacant and undeveloped Coastal lands in North County
  - Ponto is the last remaining undeveloped Coastal land in South Carlsbad
  - Ponto has the last unplanned Planning Area of the Existing Poinsettia Shores Planned Community & Local Coastal Program that can be planned for high-priority Coastal Recreation land use. This Existing LCP requires Planning Area F be considered for a “Public Park”.
  - Following is a map of the Ponto area in South Carlsbad:

Following is the LCP Land Use map from the Existing Poinsettia Shores Master Plan & Local Coastal Program adopted in 1996. This is the Land Use map that the City is proposing to change in the proposed LCP Amendment to the Land Use Plan. As the Existing LCP Land Use map shows most all the land is ‘low-priority’ residential use at an RM Residential medium density, a small portion is ‘high-priority’ Visitor Serving TC/C Tourist Commercial. Most all the Open Space is constrained and undevelopable land (the steep CSS habitat bluffs above Batiquitos Lagoon) or water

(the lagoon water). This land/water is owned by the State of California, like the inner lagoon east of I-5. Only Planning Area M at 2.3 acres is unconstrained Open Space and it provides a small private internal recreation facility for the approximately 450 homes and 1,000 people in the Planned Community. This small recreation area is a City requirement for ‘planned developments’ to off-set loss open space from planned development impacts on housing quality. Planned developments can propose designs that reduce normal setback and open space areas – they bunch together buildings to increase development – such as the smaller lot sizes, and extensive use of “zero-setbacks” to reduce typical lot sizes that occurs at Poinsettia Shores. A private recreation facility in any of the City’s planned developments is never considered a replacement for required City Parks. Planned Developments, like unplanned developments, are required to dedicate Park land to the City, or pay a Park In-Lieu fee to the City so the City provide the developer’s obligation to provide City Park acreage to address the population increase of their proposed planned development. For Poinsettia Shores’ population the City’s minimum City Park Standard would require developers set aside 3 acres of City Park land for local park needs. For the larger Ponto area population about 6.6 acres of City Park Land is required. The Existing LCP reserves Planning Area F as an unplanned “Non-residential Reserve” Land Use until the Public Park needs for Ponto are considered and documented. Only then can the NRR land use be changed.

10. Developers have overbuilt in the Ponto area of the Coastal Zone. The City of Carlsbad has under questionable circumstances is currently choosing to ‘exempted’ Ponto developers from providing the minimum amount of unconstrained Open Space according to the City’s developer required Open Space Public Facilities Standard. The legality of these confusing circumstances is subject to a lawsuit against the City. However the City’s computerize mapping system has documented that the Ponto area of the Coastal Zone is missing about 30-acres of Unconstrained Open Space that can be used to fulfill the City’s Open Space Performance Standard that states that 15% of unconstrained and developable land must be preserved by developers as Open Space. Following is a

summary of data from the City data regarding the missing Open Space at Ponto (Local Facility Management Plan Zone 9, LFMP Zone 9) in the Coastal Zone pursuant to the City's Open Space Performance Standard. If it is desirable People for Ponto can provide the City GIS map and parcel-by-parcel data base on which the following summary is based:

City of Carlsbad GIS data calculations of Open Space at Ponto area of Coastal Zone:

472 Acres = Total land in LFMP Zone 9 [Ponto area] per City of Carlsbad GIS data

(197 Acres) = Constrained land/water/infrastructure that is excluded from the City's Open Space Standard

275 Acres = Unconstrained land in LFMP Zone 9 (Ponto) subject to the City's Open Space Standard

X 15% = Minimum unconstrained Open Space requirement per the City Open Space Standard

41 Acres = Minimum unconstrained Open Space required in LFMP Zone 9

(11 Acres) = Actual unconstrained Open Space provided & mapped by City in LFMP Zone 9

**30 Acres = Missing unconstrained Open Space needed in LFMP Zone 9 [Ponto area of Coastal Zone] to meet the City's minimum GMP Open Space Standard. 73% of the required Open Space Standard is missing.**

Thus the Ponto area of the Coastal Zone appears overdeveloped with 30 additional acres of "low-priority" residential land uses due to developers' non-compliance to the City's Open Space Public Facility Performance Standard's Minimum developer required Open Space requirement. As noted a citizens group has a pending lawsuit with the City over the City's current 'exempting' Ponto and future developers from meeting the Open Space Standard.

11. The prior pre-1996 LCP for Ponto – the Batiqitos Lagoon Educational Park Master Plan & LCP (BLEP MP/LCP) had significant Open Space and recreational areas. These significant Open Space and Recreational areas were removed with BLEP MP/LCP's replacement in 1996 by the currently existing Poinsettia Shores Master & LCP (PSMP/LCP) and its City Zoning and LCP LUP requirements that reserved Planning Area F with the current "Non-residential Reserve" Land Use designation. Since the BLEP MP/LCP it appears developers and the City of Carlsbad have worked to remove "High-Priority" Coastal land uses (i.e. Coastal Recreation and Park uses) out of the Ponto area and replaced them with more "low-priority" residential and general commercial land uses. For example:
  - a. Planning Area F used to be designated "Visitor Serving Commercial" as part of the original 1980's BLEP MP/LCP for Ponto.
  - b. In 1996 the BLEP MP LCP was changed by developer application to the now current PSMP LCP, and the LCP LUP designation changed from "Visitor Serving Commercial" to "Non-Residential Reserve" with the requirement to study and document the need for "High-Priority" Coastal Recreation (i.e. Public Park) and/or Low-cost visitor accommodations prior to any change to Planning Area F's "Non-residential Reserve" LCP land use.
  - c. In 2005 the City started to try to change Planning Area F to low-priority residential and general commercial land use in the City's Ponto Beachfront Village Vision Plan (PBVVP). At this time the City made its first documented Coastal 'planning mistake' by not disclosing to the public the existence of Planning Area F's LCP requirements and then also not following those LCP requirements. The City's planning process seemed focused on addressing developer's land use desires, and increasing land use intensity to boost "Tax-increment financing" as the City had established a Redevelopment Project Area at Ponto. A short time after the State of CA dissolved Redevelopment Agencies due in part to such abuses by cities. The CCC formally rejected the PBVVP in 2010, citing the City's failure to follow the LCP requirements for Planning Area F.
  - d. Five years later in 2015 the City again adopted a proposed General Plan Update to again change Planning Area F to low-priority residential and general commercial land use. The General Plan Update cited the City's PBVVP that was in fact rejected by the CCC only a few years before. The City again repeated their PBVVP's

Coastal land use ‘planning mistake’ by again not disclosing to the public the existence of Planning Area F’s LCP requirements and then not following those LCP requirements. It is unclear why the City did this only 5-years after the CCC specifically rejected the Ponto Beachfront Village Vision Plan for those same reasons.

- e. In 2017 citizens found and then confirmed these Ponto Coastal ‘planning mistakes’ by the City through multiple official Carlsbad Public Records Requests and CCC Staff confirmation. The CCC readily identified the mistakes, but the City’s 2019 proposed Draft LCP Land Use Plan and planning process still has yet fully disclose these prior Coastal ‘planning mistakes’ to ALL citizens of Carlsbad - the failure to disclose and follow the Planning Area F LCP LUP and City Zoning requirements. Full City disclosure is needed now to try to correct many years of City misrepresentation to citizens on LCP required Coastal land Use planning at Ponto. It is needed now so the public is aware at the start of the Public Comment Period. In 2017 citizens began asking the City fix the City’s over 12-years of misinformation and planning mistakes by ‘restarting’ Coastal land use planning at Ponto with an open and honest community-based Coastal planning process. These citizens’ requests have been rejected.
- f. In 2019 the City Staff proposed citywide Draft LCP land Use Plan Amendment that again proposed to change Planning Area F to “low-priority” residential and general commercial land use, without first disclosing the Planning Area F LCP requirements with corresponding analysis of the Need for Coastal Recreation (i.e. Public Park) and/or low-cost visitor accommodations at Planning Area F and providing that Documented analysis for public review/Consideration/comment. This seems like another 3<sup>rd</sup> repeat of the prior two Coastal planning mistakes by the City. In 2019, again citizens asked for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again the City rejected citizens’ requests.
- g. In 2020 thousands of public requests again asked, and are currently asking, for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again these requests are being rejected. Based on the significant citizen concern and the documented prior ‘planning mistakes’ at Ponto it appears reasonable and responsible for Ponto’s Planning Area F to either:
  - i. Retain its current Existing LCP LUP land Use of “Non-Residential Reserve” until such time as the City’s past Ponto Beachfront Village Vision Plan and General Plan Update planning mistakes and other issues subject to current planning lawsuits against the City are resolved with a true, honest and open community-based Coastal planning process asked for by citizens since 2017. Or
  - ii. Propose in the Draft LCP Land Use Plan Amendment to re-designated Planning Area F back to a Visitor Serving Commercial and Open Space (“i.e. Public Park”) to provide both “High-Priority” coastal uses v. low-priority residential/general commercial uses due to the documented Coastal Recreation and Low-cost visitor accommodation needs for both citizens and visitors at Ponto and South Carlsbad.

12. Questionable logic and inconsistency in proposed Draft land use map and policies: Chapter 2 Figure 2-2B & C on pages 2-19 & 20 proposes to Amend the existing LCP Land Use Plan Map, and policies LCP-2-P.19 and 20 on pages 2-27 to 2-29 propose Amendments to existing LCP policy and create a new added layer of policy referencing a Ponto/Southern Waterfront. The proposed Land Use Map and Policies serve to firmly plan for “low-priority” residential and general commercial land uses at Ponto with a clear regulatory Land Use Plan Map showing these land uses and by specific regulatory policy (LCP-2-20) that clearly requires (by using the words “shall”) these “low priority” uses. In contrast the “High-Priority” Coastal Recreation and Coastal Park land uses that would be designated as Open Space are not mapped at all in Figure 2-2B & C; and the proposed policy LCP-2-P.19 is both misleading and specifically does Not Require any “High-Priority” Coastal Recreation and Coastal Park land Use at Ponto and South Carlsbad. In fact page 2-22 specifically indicates two “may” criteria that would first need to occur

in the positive before any potential Coastal Recreation and Coastal Park Land could then theoretically even be possible. It is highly probable that it is already known by the City that the proposed relocation of Carlsbad Boulevard (Coast Highway) is not very feasible and not cost effective, and will not yield (due to environmental habitat constraints, narrowness of the roadway median, and other design constraints) any significant dimensions of land that could potentially be designated Open Space and realistically be used as a Park.

The blank outline map (Figure 2-2B & C) provides no mapped Open Space Land Use designation, other than for the currently existing State Campgrounds' low-cost visitor accommodations, so the proposed Land Use Plan Map is Not providing/mapping any new Open Space land use to address Coastal Recreation and Coastal Park needs. The Draft LCP Land Use Plan Amendment's proposed/projected/planned Sea Level Rise and associated coastal erosion appears to indicate that this "High-Priority" low-cost visitor accommodation (Campground) land use designated as Open Space will be reduced in the 'Buildout' condition due to coastal erosion. **So the Draft LCP Land Use Plan is actually planning for a Reduction in Open Space Land Use in South Carlsbad and Ponto.** Both the blank outline map and the proposed Land Use Map Figure 2-1 DO NOT clearly map and designate both South Carlsbad's Draft LCP Planned Loss of the Open Space Land Use and also any New or replacement unconstrained land as Open Space land use for Coastal Recreation and Coastal Park. This is an internal inconsistency in Land Use Mapping that should be corrected in two ways:

- 1) Showing on all the Land Use (Figure 2-1), Special Planning Area (Figure 2-2B & C), and other Draft LCP Maps the Draft LCP's planned loss of land area in those maps due to the Draft LCP's planned loss of land due to Sea Level Rise and Coastal Land Erosion. This is required to show how land use boundaries and Coastal Recourses are planned to change over time. or
- 2) Provide detailed Land Use Constraint Maps for the current Carlsbad Boulevard right-of-way that the City "may" or 'may not' choose (per the proposed "may" LCP-2-P.19 policy) use to explore to address the City's (Park Master Plan) documented Coastal Recreation and Coastal Park land use shortages in Coastal South Carlsbad and Ponto. Clearly showing the potential residual Unconstrained Land within a Carlsbad Boulevard relocation that have any potential possibility to add new Open Space Land Use Designations (for Coastal Recreation) is needed now to judge if the policy is even rational, or is it just a Trojan horse.

The proposed internal inconsistency in mapping and policy appears like a plan/policy 'shell game'. The proposed Land Use Plan Maps and Policies should be consistent and equality committed (mapped-shall v. unmapped-may) to be a feasible and actual Plan. If not then there is No real Plan.

There is no Regulatory Policy requirement in LCP-2-P.19 to even require the City to work on the two "may" criteria. The City could choose to bury the entire Carlsbad Boulevard relocation concept and be totally consistent with Policy LCP-2-P.19 and the LCP. As such the language on 2-22, Figure 2-2C (and the proposed Land Use Map), and policy LCP-2-P.19 and 20 appear conspire to create a shell game or bait-and-switch game in that only "low-priority" residential and general commercial uses are guaranteed (by "shall" policy) winners, and "high-priority" Coastal Recreation and Coastal Park Land Uses are at best a non-committal 'long-shot' ("may" policy) that the city is specifically not providing a way to ever define, or commit to implement. The proposed Draft LCP Land Use Plan Coastal Recreation and Coastal Park statements for Ponto are just words on paper that are designed to have no force, no commitment, no defined outcome, and no defined requirement to even have an outcome regarding the documented "High-Priority" Coastal Recreation and Coastal Park needs at Ponto, Coastal South Carlsbad and the regional 6-mile Coastal Park gap centered around Ponto.

Policy LCP-2-P.19 falsely says it “promotes development of recreational use” but does not in fact do that. How is development of ‘recreational use promoted’ when the Use is both unmapped and no regulatory policy requirement and commitment (no “shall” statement) to ‘promote’ that Use is provided? Policy LCP-2-19.19 appears a misleading sham that does not ‘promote’ or require in any way “High-Priority” Coastal Recreation and Park Land Use at Ponto. There should be open and honest public workshops before the Draft LCP Amendment goes to its first public hearing to clearly define the major environmental constraints and cost estimates involving possible relocation of Carlsbad Boulevard and constructing needed beach access parking, and sufficient and safe sidewalks and bike paths along Carlsbad Boulevard; and then map the amount and dimensions of potential ‘excess land’ that maybe available for possible designation as Open Space in the City General Plan and Local Coastal Program. The City should not repeat the mistakes at the Carlsbad Municipal Golf Course (resulting in the most expensive to construct municipal course in the USA) by not defining and vetting the concept first. A preliminary review of City GIS data appears the amount, dimensions and locations of any potential ‘excess’ land maybe modest at best. However before the City proposes a ‘Buildout’ Coastal Land Use Plan this critical information should be clearly provided and considered. It is likely the City’s Carlsbad Boulevard relocation concept is unfeasible, inefficient, too costly, and yields too little actual useable ‘excess land’ to ever approach the Coastal Recreation and Coastal Park needs for South Carlsbad. This may already be known by the City, but it surely should be publicly disclosed and discussed in the DLPCA.

The proposed Coastal Land Use Plan to address Carlsbad’s, San Diego County’s and California’s High-Priority Coastal Recreation Land Use and Coastal Park needs should NOT be vague “may” policy that appears to be purposely designed/worded to not commit to actually providing any “High-Priority” Coastal Recreation and Coastal Park land uses on the map or in policy commitments. The Land Use Plan and Policy for High-Priority Coastal Recreation and Coastal Park Land Use should be definitive with triggered “shall” policy statements requiring and assuring that the ‘Forever’ “High-Priority” Coastal Recreation and Coastal Park needs are properly and timely addressed in the City’s proposed ‘Buildout’ Coastal Land Use Plan. This “shall” policy commitment should be clearly and consistently mapped to show the basic feasibility of the planned outcomes and the resulting actual Land that could feasibly implement the planned outcome.

Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard: Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard are Coastal Access and Completes Streets issues. South Carlsbad Boulevard now and has for decades been a highly used Incomplete Street that is out of compliance with the City’s minimum Street Standards for pedestrian and bike access and safety. The Coastal Access portion of the Draft Land Use Plan should strongly address the Complete Street requirements for South Carlsbad Boulevard. Those policy commitments should be reference in Policy LCP-2-P.19 and 20 as Carlsbad Boulevard in **South Carlsbad is the most Complete Street deficient portion of Carlsbad Boulevard**. Forever Coastal Access parking demand and the proposed LCP Amendment’s Land Use Plan to supply parking for those demands should also be addressed as part of the Coastal Access and Complete Streets issues for South Carlsbad Boulevard. If much needed Coastal Access Parking is provided on South Carlsbad Boulevard as part of a “maybe” implemented realignment, most of the “maybe” realignment land left after constraints are accommodated for and buffered will likely be consumed with these parking spaces and parking drive aisles/buffer area needed to separate high-speed vehicular traffic from parking, a buffered bike path, and a sufficiently wide pedestrian sidewalk or Coastal Path. After accommodating these much needed Complete Street facilitates there will likely be little if any sufficiently dimensioned land available for a Coastal Recreation and a Coastal Park. The needed Coastal Access and Complete Street facilities on South Carlsbad Boulevard are very much needed, but they are NOT a Coastal Park.

As mentioned the proposed Draft Coastal Land Use Plan's Maps and Policies are very specific in providing for the City's proposed LCP Land Use changes to 'low-priority' Residential and General Commercial' on Planning Area F (proposed to be renamed to Area 1 and 2). It is curious as to why the proposed Draft LCP Land Use Plan Amendment has no Land Use Map and minor vague unaccountable Land Use Policy concerning 'High-priority Coastal Recreation Land Use' at Ponto, while the very same time proposing very clear Land Use Mapping and detailed unambiguous "shall" land use policy requirements for 'low-priority' Residential and General Commercial land use at Ponto. Why is the City Not committing and requiring (in a Land Use Map and Land Use Policy) to much needed 'High-priority' Coastal Recreation and Coastal Park Land Use' needs at Ponto the same detail and commitment as the City is providing for "low-priority" uses? This is backwards and inappropriate. It is all the more inappropriate given the 'Buildout' Coastal Land Use Plan the City is proposing at Ponto. These issues and plan/policy commitments and non-commitments will be 'forever' and should be fully and publicly evaluated as previously requested, or the Existing LCP Land Use Plan of "Non-residential Reserve" for Planning Area F should remain unchanged and until the forever-buildout Coastal Recreation and Coastal Park issues can be clearly, honestly and properly considered and accountably planned for. This is vitally important and seems to speak to the very heart of the CA Coastal Act, its founding and enduring principles, and its policies to maximize Coastal Recreation. People for Ponto and we believe many others, when they are aware of the issues, think the City and CA Coastal Commission should be taking a long-term perspective and be more careful, thorough, thoughtful, inclusive, and in the considerations of the City's proposal/request to permanently convert the last vacant unplanned (Non-residential Reserve) Coastal land at Ponto to "low-priority" land uses and forever eliminate any Coastal Recreation and Coastal Park opportunities.

13. Public Coastal View protection: Avenida Encinas is the only inland public access road and pedestrian sidewalk to access the Coast at Ponto for one mile in each direction north and south. It is also hosts the regional Coastal Rail Trail in 3' wide bike lanes. There exist now phenomenal coastal ocean views for the public along Avenida Encinas from the rail corridor bridge to Carlsbad Boulevard. It is assumed these existing expansive public views to the ocean will be mostly eliminated with any building development seaward or the Rail corridor. This is understandable, but an accountable ('shall') Land Use Plan/Policy addition to proposed Policy LCP-2-P.20 should be provided for a reasonable Public Coastal View corridor along both sides of Avenida Encinas and at the intersection with Carlsbad Boulevard. Public Coastal view analysis, building height-setback standards along Avenida Encinas, and building placement and site design and landscaping criteria in policy LCP-2-P.20 could also considered to reasonably provide for some residual public coastal view preservation.
14. Illogical landscape setback reductions proposed along Carlsbad Boulevard, and Undefined landscape setback along the Lagoon Bluff Top and rail corridor in Policy LCP-2-P.20: Logically setbacks are used in planning to provide a buffering separation of incompatible land uses/activities/habitats. The intent of the setback separation being to protect adjacent uses/activities/habitats from incompatibility, nuisance or harassment by providing a sufficient distance/area (i.e. setback) between uses/activities/habitats and for required urban design aesthetics – almost always a buffering landscaping. Policy LCP-2-P.20. A.4 and C.3 says the required 40' landscape setback along Carlsbad Boulevard "maybe reduced due to site constraints or protection of environmental resources." The ability to reduce the setback is illogical in that setbacks are intended to protect environmental resources and provide a buffer for constraints. In the Carlsbad Boulevard right-of-way there is documented sensitive environmental habitat, along with being a busy roadway. How could reducing the protective 40' setback in anyway better protect that habitat or provide a better landscaped compatibility or visual aesthesis buffer along Carlsbad Boulevard? It is illogical. If anything the minimum 40' landscaped setback should likely be expanded near "environmental resources". Regarding reducing the minimum 40' landscape setback for "site constraints" there is no definition of what a "site constraint" is or why it (whatever it may be) justifies a reduction of the minimum landscaped setback.

Is endangered species habitat, or a hazardous geologic feature, or a slope, or on-site infrastructure considered a “site constraint”? There should be some explanation of what a “site constraint” is and is not, and once defined if it warrants a landscape setback reduction to enhance the buffering purpose of a landscape setback. Or will a reduction only allow bringing the defined constraint closer to the adjacent uses/activities/habitats that the landscape setback is designed to buffer. It is good planning practice to not only be clear in the use of terms; but also, if a proposed reduction in a minimum standard is allowed, to define reasonably clear criteria for that reduction/modification and provide appropriate defined mitigation to assume the intended performance objectives of the minimum landscape setback are achieved.

Policy LCP-2-P.20.C.4 is missing a critical Bluff-Top landscape setback. It seems impossible that the DLCPA is proposing no Bluff-Top setback from the lagoon bluffs and sensitive habitat. The Batiqitos Lagoon’s adjoining steep sensitive habitat slopes directly connect along the Bluff-top. Batiqitos Lagoon’s and adjoining steep sensitive habitat is a sensitive habitat that requires significant setbacks as a buffer from development impacts. Setbacks similar to those required for the San Pacifico area inland of the rail corridor, should be provided unless updated information about habitat sensitivity or community aesthetics requires different setback requirements.

Policy LCP-2-P.20 does not include a landscape setback standard adjacent to the rail corridor. This is a significant national transportation corridor, part of the 2<sup>nd</sup> busiest rail corridor in the USA. Train travel along this corridor is planned to increase greatly in the years to come. Now there is significant noise, Diesel engine pollution, and extensive ground vibration due to train travel along the rail corridor. Long freight trains which currently run mostly at night and weekends are particularly noisy and heavy, and create significant ground vibration (underground noise). These issues are best mitigated by landscape setbacks and other buffers/barriers. A minimum setback standard for sufficient landscaping for a visual buffer and also factoring appropriate noise and ground vibration standards for a buildout situation should be used to establish an appropriate landscape setback that should be provided along the rail corridor. Carlsbad’s landscape aesthetics along the rail corridor should be factored into how wide the setback should be and how landscaping should be provided. An example for the landscape aesthetic portion of the setback standard could be landscape design dimensions of the San Pacifico community on the inland side of the rail corridor. However, noise and vibrational impacts at San Pacifico are felt much further inland and appear to justify increased setbacks for those impacts.

**Low Cost Visitor Accommodations:**

1. P. 3-3 cites CA Coast Act (CCA) Policies. But the City's proposed Local Coastal Program (LCP) Land Use Plan (LUP) in the Ponto Area, particularly for Planning Area F, appears inconsistent with these CCA policies:
  - a. Section 30213 – protect, encourage and provide Lower-Cost Visitor & Recreation Facilities.
  - b. Section 30221 – Visitor serving & Recreation uses have priority over Residential & General Commercial uses.
  - c. Section 30223 – Upland areas reserved to support coastal Recreation uses
  - d. Section 30252(6) – correlate development with Local Park acquisition & on-site recreation
  
2. Planning Area F used to be designated "Visitor Serving Commercial" as part of the original 1980's LUP and LCP Samis Master Plan for Ponto. In the 1996 this LUP was changed to the now current LCP and LUP designation of "Non-Residential Reserve" with a specific LCP requirement to reconsider a high-priority recreation or visitor serving Coastal land use while other Ponto land uses were changed to low-priority residential uses (see Poinsettia Shores Master Plan/LCP). It seems appropriated that the LUP should re-designated Planning Area F back to a Visitor Serving Commercial and Open Space ("i.e. Public Park" in the existing LCP) to provide high-priority coastal uses v. low-priority residential/general commercial uses: in part for the following reasons:
  - a. Planning Area F's existing LCP requirement requires this consideration, but the City has never disclosed this requirement to Citizens nor follow this requirement during the Cities two prior 'planning efforts' in 2010 and 2015 as documented by official Carlsbad Public Records Requests 2017-260, 261, 262.
  - b. Ponto developers (both Samis and Kaisza) were both allowed to overdevelop Ponto, by not providing the minimum Open Space required by Carlsbad's and Citizen approved Growth Management Open Space Standard. Over 30-acres of land that should have been dedicated to Growth Management Open Space (a high-priority land use) was instead allowed to be developed with low-priority residential development. If the City's Growth Management Open Space Standard was properly applied at Ponto there would be 30-acres more open space at Ponto then there is now. This is a significant impact to CCA policies that can be corrected by changes in the Ponto LUP to properly implement City Open Space Standards and CCA policies.
  - c. The LCPA acknowledges that past (2005-17) and near-term (2019-23) growth in Carlsbad visitor demand for coastal recreation and accommodations, and indicate high past hotel occupancy rates that implies current hotel supply is just meeting current demand. Although the LCPA does not discuss the high occupancy rates at the Low-Cost campground facilities, It is assumed the campground occupancy rate and demand is higher than that of hotels. This should be defined. Based on current and near term demand for visitor accommodations the LCPA states on page 3-12 "... the City should identify and designate land where new hotels and other visitor-serving uses can be developed." It is clear where he 'City should identify and designate [this] land'? What new land(s) should be so identified and designated? However, the LCPA does not disclose longer-term visitor accommodation needs beyond 2023, nor provide a long-term plan for meeting this long-term need. The LCPA should publicly disclose, analyze and provide for the longer-term (beyond present and to beyond 2023) needs for visitor Coastal accommodations, particularly Low-Cost Accommodations and Recreation needs because the LCPA's LUP is a long-term plan for Carlsbad's buildout estimated to extend beyond 2035. Also, given the fact that there are very few vacant Coastal Sites (like Ponto) that are still available to address these long-term high priority Coastal land uses – recreation and visitor serving – reserving these vacant lands for high priority coastal land uses is consistent with the CCA Policies. Following are some longer-term projections of resident demand for Coastal park and recreation needs. It seems logical that long-term visitor will increase at a similar rate as the general population increase

rate, unless our coast becomes too overcrowded and unattractive vis-à-vis other visitor destinations. A long-term visitor demand (to go with the below long-term resident demand long-term Sea Level Rise impacts) for Coastal recreation resources should be a part of the proposed LCPA and part of the long-term LUP to provide resources for those long-term needs and to mitigate for those long-term Sea Level Rise impacts.

## Increasing demand for Coastal recreational land

### Yearly Visitors to San Diego County

2016	34,900,000	
2017	34,900,000	
2018	35,300,000	
2019	35,900,000	
2020	36,500,000	= average 100,000 visitors per day
2021	37,100,000	or 2.83% of Population per day
2022	37,700,000	or 1,316 Visitors/coastal mile/day

Typically around 1.6% annual increase in visitors

San Diego Tourism Authority, San Diego Travel Forecast, December 2017

- d. City in the LCPA inaccurately analyzes and misrepresents how much Visitor Serving Accommodations, particularly Low-Cost Accommodations, Carlsbad currently provides on a relative or comparative basis. The LCPA's inaccurate and simplistic analysis does not adjust for the different sizes of the Coastal Zone in the 3 cities (Carlsbad, Oceanside and Encinitas) used in the analysis. Carlsbad's Coastal Zone is significantly larger than both the other cities, so it has more land and accommodations, just like San Diego's Coastal Zone is larger than Carlsbad's and San Diego is larger than its smaller neighbors Del Mar and National City. A simplistic how many accommodations are in your adjacent cities is an inappropriate analytical method for Carlsbad-Oceanside-Encinitas; just as it is inappropriate to compare the number of San Diego's hotels with the number hotels in San Diego's smaller neighbors Del Mar and National City. The accurate method to do a comparative analysis is based on a common denominator, such as the amount of accommodations per 1,000 acres of Coastal Zone land along with comparing each city's relative percentages. This is a more accurate and appropriate analysis that the LCPA should provide, and not that provided on page 3-13. The LCPA analysis also does not fully discuss and compare "Low-Cost" accommodations that are part of the CCA policies; nor provide a mitigation approach for "Low-Cost" accommodations lost, just 'Economy hotel rooms'. Below is data from the LCPA and other LCPs that shows the proper and more accurate comparison of existing Visitor Serving Accommodations in Carlsbad-Oceanside-Encinitas and includes Low-Cost Accommodation numbers/comparisons that are totally missing in the LCPA analysis. As the data shows, Carlsbad does not perform as well in Visitor Accommodations, and most particularly in "Low-Cost Visitor Accommodations", as the LCPA states and proposes in the LUP relative to Oceanside and Encinitas. An honest analysis like below should be provided in the LCPA LUP, particularly given the very limited amount of vacant Coastal land left to provide for high-priority Coastal Uses. Ponto is one of the last remaining vacant Coastal areas.

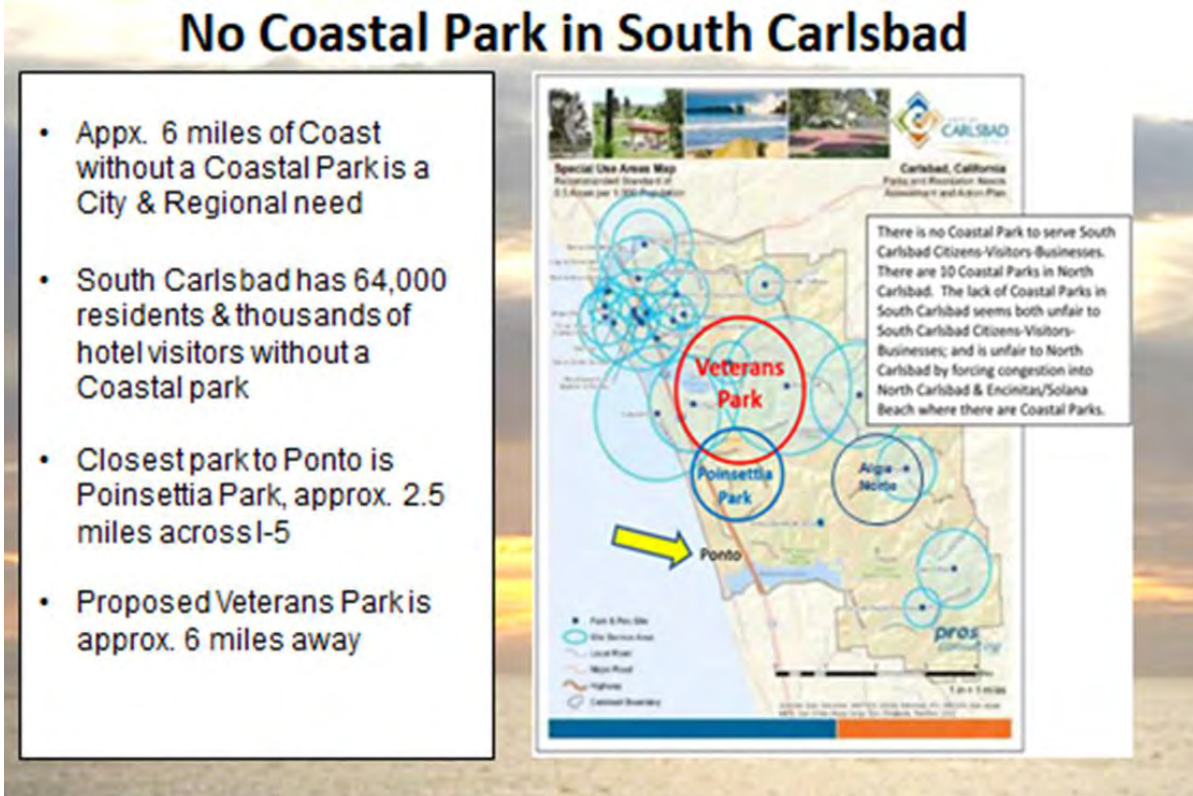

Carlsbad's proposed 2019 LCPA uses comparative 3-city data to address how Carlsbad's 2019 LCPA addresses Visitor Serving Accommodation needs. "Low-Cost" Accommodations are an important CA Coastal Act issue

<u>Visitor Serving Accommodations (VSA) data</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>		<u>Data source</u>
Coastal Acres (i.e. in Coastal Zone)	9,216	1,460	7,845		Carlsbad Draft LCPA 2019 & Oceanside & Encinitas LCPs

VSA rooms: Economy	589	346	346		Carlsbad Draft LCPA 2019, pp 3-12 - 15
VSA rooms: Low-Cost (campsites)	220	272	171		Carlsbad Draft LCPA 2019, State Parks, Oceanside & Paradise-by-the-sea data Carlsbad Draft LCPA 2019 does not evaluate other City's Low-Cost Accommodations
<u>Data analysis</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>	<u>3-city Average</u>	<u>Key Findings</u>
<b>VSA rooms/1,000 Coastal acres</b>	<b>348</b>	<b>668</b>	<b>81</b>	<b>366</b>	<b>Carlsbad provides overall Visitor Accommodations at slightly below the 3-city average</b>
<b>% of VSA rooms that are Economy</b>	<b>18%</b>	<b>35%</b>	<b>55%</b>	<b>36%</b>	<b>Carlsbad provides a percentage of Economy Accommodations about 50% below the 3-city average</b>
<b>Economy VSA rooms/1,000 Coastal acres</b>	<b>64</b>	<b>237</b>	<b>44</b>	<b>115</b>	<b>Carlsbad provides Economy Accommodations about 50% below the 3-city average</b>
<b>% VSA rooms that are Low-Cost</b>	<b>7%</b>	<b>28%</b>	<b>27%</b>	<b>21%</b>	<b>Carlsbad provides a percentage of Low-Cost Accommodations about 66% below the 3-city average</b> Carlsbad LCPA also does not provide protection for loss of "Low-Cost" campground rooms, only "Economy hotel rooms"
<b>Low-Cost VSA rooms/1,000 Coastal acres</b>	<b>24</b>	<b>186</b>	<b>22</b>	<b>77</b>	<b>Carlsbad provides Low-Cost Accommodations about 70% below the 3-city average</b>

- e. The LCPA is not providing for any new "Low Cost Visitor Accommodation" land uses in the proposed LUP for current/long-range needs, even though page 3-12 points out the current demand for accommodations, and the current Existing LCP has polices to increase "Low Cost Visitor Accommodation" land uses. We

understand that “Low-cost Visitor Accommodation” occupancy rates at CA State Campground at near 90%. This occupancy rate is much higher [signifying higher demand] than the occupancy rates of both the hotels, and “Economy Visitor Accommodations” which the LCPA seeks to protect. The Proposed LCPA LUP should provide historic and current “Low-cost Visitor Accommodation” occupancy rate data at CA State Campground and compare to occupancy demand for other accommodations to determine the highest occupancy demands and therefore needs. Why is the Proposed LCPA LUP not protecting AND EXPANDING (for future growth and visitor demand) the supply of this higher demand for “Low-cost Visitor Accommodations” at the State Campground, particularly given the Current Existing Carlsbad LCP policies on this issue, long history of this issue documented in the Current Existing Carlsbad LCP Mello II Segment, and the fact that “Low-cost Visitor Accommodations” are a Statewide ‘high-Coastal-priority’ land use in CA Coastal Act Goals and Policies? Why is the proposed LUP not recognizing and incorporating these issues? The Current Existing Carlsbad LCP policies [see Existing Carlsbad LCP Mello II Segment polies 2.3, 4.1, 6.1, 6.4, 6.5, 6.9, 6.10, 7.5, and 7.15 for example] are not referenced and discussed in the Proposed LUP nor is a comprehensive long-term analysis of the impact of the proposed LUP’s elimination of theses Current Existing Carlsbad LCP policies vis-à-vis the CA Coastal Act Goals and Policies? How and why is the City proposing changes to these Existing Carlsbad LCP policies in the Mellow II Segment, particularly given the improved knowledge about Sea Level Rise, and Sea Level Rise and Coastal Bluff erosion impacts on the State Campground’s “Low-cost Visitor Accommodations” - High-Coastal-Priority land use under the CA Coastal Act?

- f. At Ponto there is no low-cost/no-cost Recreational use as shown by the City of Carlsbad’s adopted Parks Master Plan (pp 87-89) that show the City’s adopted Park Service Areas in the following image. The image’s blue dots are park locations and blue circle(s) show the City’s adopted service areas:

Per the current Existing LCP requirements for Planning Area F at Ponto an “(i.e. Public Park)” must be considered. How is the Proposed LCPA LUP not reserving Upland Areas at Ponto for recreational uses given

Sea Level Rise and Coastal Bluff erosion impacts as shown in Proposed LCPA LUP Attachment B, and Exhibits B6 and B7? There is very limited amount of vacant Upland Coastal land at Ponto and South Coastal Carlsbad to accommodate low-cost/no-cost Recreational use "(i.e. Public Park)", so why is this last remaining vacant Coastal land at Ponto not being reserved for "high-Coastal Priority Land Uses"? Why is the Proposed LCPA LUP proposing this last remaining vacant Coastal land at Ponto be converted from "Non-residential Reserve" to 'low-coastal-priority residential and general commercial land uses'?

3. The proposed LCPA approach to protect existing 'economy hotels' but not 'Low-cost Visitor Accommodations' appears inappropriate. Existing hotel owners providing 'Economy' rooms are penalized while all other more expensive 'non-economy hotel' owners are not required to mitigate for their not providing more affordable accommodations. It seems like a fairer and rational approach is to use the same framework as the City's inclusionary affordable housing requirements and have the requirement and burden of providing affordable accommodations required by all visitor accommodation providers, including short-term rentals of residential homes. Use of any per accommodation "in-lieu fee" should be SUFFICIENT TO FULLY MITIGATE for not providing a required affordable accommodation by being sufficient to fully fund a new 'affordable accommodation' on a one-for one basis. City Transit Occupancy Tax revenues could also potentially be used to provide a catch-up method for existing "non-low-cost and/or non-economy accommodation providers" to address what would nominally be their inclusionary contribution. It seems like the LCPA approach needs significant rethinking to provide a rational program to include reasonable long-term and sustainable affordability in visitor accommodation's, particularly give the Sea Level Rise and Coastal Bluff Erosion impacts on Carlsbad's Only "Low-cost Visitor Accommodations" and the State Campground and beaches and Carlsbad's Coastal access roadways.
4. The Proposed LCPA LUP does not provide a means for citizens to understand the proposed changes to the current Existing LCP goals and policies. There are numerous current Existing LCP goals and policies regarding "Low-cost Visitor Accommodations". These all should be listed in the Proposed LCPA LUP along with a description on how and why these current Existing LCP Goals and policies are being modified or removed in the Proposed LCPA LUP.

**Subject:** Citizen public input for Housing ElemLance Schulte <meyers-schulte@sbcglobal.net>ent & Parks Master Plan Updates, & Draft Local Coastal Program Land Use Plan Amendment

Dear Carlsbad City Council, Housing-Parks-Planning Commissions & Housing Element Advisory Committee; & State of CA Coastal Commission, Parks, Housing & Community Development Department:

As one of the many People for Ponto ([www.peopleforponto.com](http://www.peopleforponto.com)), we wanted to make sure this email and attachments have been provided to you and that the issues/data in this email be publicly presented/discussed during both the City's and State's consideration of the above planning and any other related activities.

1. Legality of 'Buildout' and quality of life standards in both California and a City within California; and if planning for "buildout" is illegal, can we California Citizens be provide the specific citation in CA State Law that forbids the State and/or Cities within California from land use and public infrastructure planning to cap to a finite or "buildout" population/development condition. As California and Carlsbad citizens it important to know the State's legal policy on "buildout"; and State policy laws on how are an infinite amount of Coastal Recreation and other high-priority Coastal land uses can be correspondently provided for infinite population growth within a largely developed and finite (and shrinking due to sea level rise) Coastal Zone?

The following public testimony and questions were presented the 6/23/20 Carlsbad Budget meeting. Coordinated answers from the State of CA and City of Carlsbad on how State Coastal and Housing planning priorities are ordered and reconciled is important. Carlsbad has a very small fragment of remaining vacant coastal land and once it is developed it essentially lost forever. This is being planned now with the above mentioned planning efforts. Most all of Carlsbad's Coastal lands are already developed with Low-Coastal-Priority residential land use, or off-limits due to endangered habitat preservation. Coastal Parks or Campgrounds can only be provided along the Coast and they are currently very crowded, and will continue to get more crowed and eventually degrade over time by increased population demands if new Coastal Parks and campgrounds are not created by coordinated Coastal Land Use planning by the State and City. How is the State of CA and City of Carlsbad to address maintaining our coastal quality of life (coastal recreation) with infinite population growth and rapidly shrinking coast land resources?

Citizens need a coordinated State of CA and City response to: *"6-23-20 City Council Budget meeting – pubic testimony by Lance Schulte: People for Ponto submitted 130-pages of public testimony on 6/2/20, would like to submit the following public input to both the 6/23/20 City Budget Meeting and the City proposed Draft Local Coastal Program Amendment – and with reference to a proposed*

*change the land use of Planning Area F from its Existing Non-Residential Reserve land use to City proposed low-coastal priority high-density residential and general commercial land uses. Contrary to what was said by 2 Council members the City's LCP policy covering Planning Area F is not a Citywide LCP policy, but is specific to the Sammis/Poinsettia Shores LCP area, and the policy's scope and regulatory authority is limited by the boundaries of the Sammis/Poinsettia Shores LCP area.*

*The Planning Area F Ponto Coastal Park is critical to the long-term economic vitality and sustainability of South Carlsbad's neighborhoods and extensive Visitor Industry; and Carlsbad's 1st and 3rd highest revenue sources.*

*Beyond Ponto there is an additional and separate Citywide Coastal Recreation requirement related to CA Coastal Commission concerns about Carlsbad's proposed LUP land use changes and proposed Local Coastal Program Amendment (LCPA) adequately providing for a Citywide 'buildout' need for Coastal Recreation land.*

*It is not clear if 'buildout' is a set and final amount of City and State population and development or if 'buildout' represents accommodating an endless amount of future population and development in Carlsbad and the State of California. If 'Buildout' is an endless future amount of population growth and development, then how is the City planning to provide a commensurate endless amount of City Parks and Open Space? How is an endless amount of Coastal Recreation provided to accommodate endless amount of City and Statewide growth?*

*Until these questions can be authoritatively answered by the City and State of California the preservation and acquisition of vacant Coastal land should be a City priority. Because once land is developed it will never be available for Park and Coastal Recreation use. Continual population and development growth without corresponding Park and Open Space growth will lead to a gradual but eventual undermining of the quality of life for Carlsbad and California, and our Carlsbad economy. It is for these and other important reasons People for Ponto ask the City to budget for the purchase of Planning Area F for Coastal Recreation and City Park needs – needs that City has documented exist now, and needs that will only grow more critical and important in the future. Thank you, People for Ponto love Carlsbad and our California Coast. We hope you love Carlsbad also and you take responsibility as a steward of our California Coast."*

2. Attached is an email regarding clarification of apparent City errors/misrepresentations on 1/28/20 regarding a) the CA Coastal Act's relationship with CA Housing laws regarding CA land use priorities and requirements within the CA Coastal Zone, and b) City planning documents and City planning and public disclosure mistakes regarding Ponto. The clarification of the issues noted on 1/28/20 should be comprehensive, and holistically and consistently disclosed/discussed in each of the City's and State's Coastal-Land Use Planning-Parks-Housing planning efforts showing the principles and legal requirements for how potential conflicts within State/City Policies are to be resolved.
3. Similar to #2 above, People for Ponto has provided public testimony/input of over 200-pages of documented data on the need for a "Public Park" and over 2,500 Citizens' requests for that Park. Those 200+ pages and the email requests from 2,500 citizens, and the CA Coastal Commission direction to the City as noted below should also be shared with the Carlsbad's Planning-Parks-Housing Commissions, and the City's Housing Element as part of the respective land use-parks-housing discussions.

The CA Coastal Commission has also provided direction to the City regarding some of the City's planning mistakes at Ponto, and those directions should also be shared with the City's Planning-Parks-Housing Commissions and Housing Element Advisory Committee regarding Coastal Land Use planning at Ponto Planning Area F. CA Coastal Commission has provided the following direction to the Carlsbad:

- a. Following is from a 7/3/17 CCC letter to City Staff on the City's proposed land use changes at Planning Area F. City Staff provided this to City Council on 1/28/20: "The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto/Southern Waterfront area. **For example, Planning Area F requires the city and developer to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e., public park) on the west side of the railroad.** This is an issue that the San Pacifico HOA community group is raising in regards to the Shopoff/Ponto development proposal, and this study should be undertaken as a part of the visitor serving use inventory analysis described above. **If this analysis determines that there is a deficit of low cost visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed."**
- b. In 2017 after citizens received the City's reply to Public Records Request 2017-260, citizens meet with CCC staff to reconfirm the City failed since before 2010 to publicly disclose and comply with Planning Area F's LCP requirements. CCC Staff acknowledged the City has not yet complied with the LCP and in an 8/16/2017 email said: "The City is currently undertaking a comprehensive update to their LCP funded in part through a CCC grant. As a part of this process the City will be consolidating all previous LCP segments into a single, unified LCP. **The City has received direction from both the Commission (May 2016 CCC hearing) and Commission staff, that as a part of this update the City shall undertake an inventory of visitor serving uses currently provided within the City's Coastal Zone which will then serve to inform updates to the City's land use and zoning maps as necessary. This inventory could have future implications for the appropriate land use and zoning associated with the Ponto area."**

Please do not misinterpret these comments as anti-housing or anti-development, it is the exact opposite, they are in support of existing and future development. It is a logical recognition of what is the best use of very limited (and shrinking) vacant Coastal Land resources. It is prudent and sustainable State and City Coastal Land Use planning to best serve all CA residents – now and in the future. Housing can be developed in many large inland areas that are better connected with job centers and transit. New Coastal Parks can only be located on the last few remaining vacant parcels within a short distance to the coast. This very small area (vis-a-vis) large inland areas must serve all the coastal Park and recreation needs of California's almost 40 million residents and the additional millions of annual visitors to California's coast. This very small amount of Coastal land drives a lot what makes CA desirable and successful, but it is getting very overcrowded due to population/visitor growth while at the same time shrinking due to coastal erosion and sea level rise. Squandering the few remaining Coastal vacant land resources, and not reserving (planning) these lands for more high-priority Coastal Recreation Land Uses will ultimately undermine CA both socially and economically. The attached 'Carlsbad 2019 proposed Draft LCP Amendment' file should be provided to and reviewed by Carlsbad's Planning-Parks-Housing Commissions and the Housing Element Advisory committee in their consideration of Carlsbad's proposed Housing Element update and proposed Draft LCP Land Use Plan Amendment, and also jointly by CA HCD and CCC in providing Carlsbad direction on CA Coastal Land Use priorities in the Coastal Zone relative to those two (2) City proposals.

Thank you all for your consideration and comprehensive inclusion of the various issues in both the City and States upcoming evaluation of proposed Coastal land use plan, Housing Element and Parks Master Plan updates. There is precious little vacant Coastal land left and how it is planned to be used and developed is critical and needs full public disclosure/involvement and a comprehensive and coordinated approach.

Sincerely,  
Lance Schulte  
[www.peopleforponto.com](http://www.peopleforponto.com)

Following are the 2 attachments to the above 9/14/20 email:

1. 4/21/20 email of Public input to Carlsbad City Council-Planning-Parks-Housing Commissions and CA Coastal Commission on DLCPA-PMU-HEU processes: Dear Carlsbad City Council, and Planning, Parks and Housing Commissions; and CA Coastal Commission: People for Ponto submits this email, and the attachment that was provided to the Carlsbad City Council for Item#14 at the 1/28/20 meeting. The attachment provided at the 1/28/20 City Council meeting has not been recorded on the Carlsbad City website that documents public input provided at that 1/28/20 meeting. Consequently we request this email and attachment be provided to the Carlsbad City Council, and Planning, Parks and Housing Commissions; and CA Coastal Commission as public input on the City Staff proposed 1) Draft Local Coastal Program Amendment, 2) Parks Master Plan Update, and 3) Housing Element Update processes. The attachment documents apparent errors, omissions, and/or misrepresentations in the 1/28/20 Item #14 Staff Report/Presentation to the City Council. We wish this email and the attached public comments be provided to the Council and Commissions addressed to in this email and be included as public comments to be addressed in the 3 planning processes listed. Thank you. Email confirmation of receipt and delivery of this email/attachment is requested. Thank you. Sincerely, Lance Schulte People for Ponto
  - a. Attachment: Carlsbad City Council meeting of 1-28-20 agenda item #14 [typo corrected on 2-4-20]: People for Ponto apologize for this late and hastily, review and comments. We just found out about the meeting this morning. We citizens know we can together achieve great things if you allow us to work with you.

Staff  
Report

Page      clarification/correction:

1      The LCP Land Use Plan Update is in fact an Amendment to an Existing LCP Land Use Plan. The Existing LCP Land Use Plan is already certified by the CA Coastal Commission as being consistent with the CA Coastal Act, except for some Amendments needed to address Sea Level Rise impacts and some other issues. The LCP Amendment proposes to change the Existing CA Coastal Commission certified LCP Land Use Plan's "Non-residential Reserve" Land Use and Policy on Planning Area F to consider and document the need for "i.e. Public Park" at Ponto .

1      Staff summarizes the CA Coastal Act objectives to "ensure maximum public access to the coast and public recreation areas." Carlsbad's Adopted Park Service Area/Equity Mapping shows there is no Park Service for the Ponto Area

and Ponto Citizens, and no Park Service for the Coastal South Carlsbad area west of Interstate-5 and the rail corridor. The City's mapping of land that meets the developer required Growth Management Open Space Standard of 15% Unconstrained land shows about 30-acres of this Open Space is missing at Ponto. This missing Open Space could have provided needed Park facilities that are missing at Ponto. Citizens in over 2,500 emails to the City Council have cited the need for a Public Park at Ponto as part of the Existing LCP Land Use Plan Amendment proposed at Ponto. These requests are consistent with the CA Coastal Act.

- 3 2nd bullet: says city staff proposes to replace, amend, or retain various Existing LCP policies, so the Staff has a documented understanding how each Existing LCP policy is being treated in the proposed Amendment. Citizens asked in Oct 20, 2019 for this 'redline' version of the Existing LCP Policies and Land Use Maps so citizens can understand what the Amendments are so we as citizens could then provide informed public comment. This 'redline' version is also important for the City Council and Planning and other Commissions so they know what Amendments to Existing City LCP Land Use policy are being proposed. Citizens again request this 'redline' version that it appears the staff already has; as they know what Existing LCP Land Use policies are being replaced, amended, or retained.
- 4 V is incomplete: the community asked on Oct 20, 2019 for 3 things: 1) a 'redline' version as noted above, 2) true Public Workshops to help inform and resolve community concerns about the proposed LCP land Use Plan Amendments, and 3) more public review time to provide for the above two other requests. All 3 requests should be acknowledged in the staff report. All 3 requests are rational and reasonable considering the proposed Draft LCP Land Use Plan Amendment is the "buildout" plan for Carlsbad's Coastal Zone, and there were multiple documented fundamental "planning mistakes" regarding past City public information and participation in the Coastal Land Use planning. Providing such a process as outlined by the 3 requests would help to correct these documented public disclosure/participation and 'planning mistakes' that have gone on for many years. It is the right thing to do and most productive approach for all concerned.
- 7 Staff should accurately disclose that in 2010 the CA Coastal Commission in fact rejected the City's proposed Ponto Beachfront Village Vision Plan for failing to disclose and comply with the then and current LCP Land Use Plan policy for Planning Area F at Ponto. Carlsbad Public Record Requests confirmed the staff did not disclose to citizens the existence LCP Land Use Plan policy for Planning Area F at Ponto, so citizens had no idea a Public Park at Planning Area F at Ponto needed to be considered. How can citizens, provide input if citizens don't have complete and accurate information to review and comment on?
- 8 Staff should correctly disclose that the 2015 application at Planning Area F at Ponto is first for a Local Coastal Program Amendment and Master Plan Amendment. These are both applications to change City Land Use Plan Policy and Zoning regulations. The actual applications for 'development' permits can

in fact not even be considered by the City until the Local Coastal Program Land Use of “Non-residential Reserve” is changed and Master Plan rezoning is approved. Only then can the ‘development’ permit application can applied for. The developer abandoned their application to change the LCP and Master Plan and then apply for developer permit review about a year ago. However, the city staff is keeping the application ‘alive’ even though there has been no progress on the application for over a year. It is unclear if the staff has authority to do this, or if the City Council has authority to withdrawal the application due to non-activity. The City has permit standards that withdraw applications if applicants make no progress on the applications after 6-months. What is troubling is that it appears the city staff proposal is to process the developer’s application to change the Existing LCP Land Use Plan for the developer.

Staff notes that the Planning Area F sites now designated as Residential R-23 and General Commercial by the Carlsbad General Plan Update. However, staff fails to disclose that until the Existing LCP Land Use Plan Amendment (as proposed by City Staff) is in fact approved by both the City and the CA Coastal Commission the Existing LCP Land Use Plan for Planning Area F supersedes the City’s General Plan Update. Carlsbad’s General Plan Land Use Element clearly states this on page 2-26 stating: “The city’s LCP Land Use Plan will be updated consistent with this General Plan. However, to take effect, the LCP must be certified by the Coastal Commission as well as adopted by the city. Until such time that this occurs, the existing (as of 2013) LCP must be adhered to.” So until the City Council adopts the staff’s proposed Draft LCP Land Use Plan Amendment, AND the CA Coastal Commission “certifies” that LCP LUP Amendment; the City’s General Plan Update Land Use change cannot take effect. The General Plan Land Use at Ponto Planning Area F has in fact not been changed by the General Plan Update, but can only change with staff’s proposed Draft LCP Land Use Plan Amendment that the City Council can choose to approve or disapprove. Also official Public Records Requests have documented that the City’s General Plan Update planning process was also fundamentally flawed at Ponto. Again, like during Ponto Beachfront Village Vision Plan planning process a few years earlier the city failed to comply with the then and current LCP Land Use Plan policy for Planning Area F at Ponto. The flawed General Plan Update process at Ponto prevented Citizens from knowing the facts so they could properly participate and provide review and comment during the General Plan Update. The significant citizen comments to the City Council asking for a Ponto Coastal Park is reflective of the fundamental public disclosure and processing flaws that the city is only now acknowledging as one of the repeated ‘planning mistakes’ at Ponto. This is why citizens are asking for full disclosure of the facts and a complete planning process re-boot at Ponto. It also should be noted that the Existing LCP Land Use Policy for Planning Area F states that “as part of any future planning effort ... consideration of a “Public Park” is required. CA Coastal Commission Staff has indicated the City’s proposed land use planning changes at Ponto as part of the General Plan Update are subject to change.

At the bottom of the page regarding SB 330, as noted above the “residential land use designation on the site” is not in effect until the currently proposed LCP Land Use Plan Amendment is both approved the City Council AND also certified by the CA Coastal Commission, so SB 330 does not apply. Also SB 330 has specific language that exempts land use in the Coastal Zone. SB 330 (Skinner) Section 13 states: “(2) Nothing in this section supersedes, limits, or otherwise modifies the requirements of the California Coastal Act of 1976 (Division 20 (commencing with Section 30000) of the Public Resources Code). For a housing development project proposed within the coastal zone, nothing in this section shall be construed to prohibit an affected county or an affected city from enacting a development policy, standard, or condition necessary to implement or amend a certified local coastal program consistent with the California Coastal Act of 1976 (Division 20 (commencing with Section 30000) of the Public Resources Code).” This language is consistent with CA case law, and other housing laws that recognize the obvious – there is very limited amount of Coastal land v. significant land area inland. Limited Coastal Land per the CA Coastal Act is needed for “High-Priority” Coastal Land Uses” - i.e. Coastal Recreation and Low-cost visitor accommodations primarily in a city such as Carlsbad. The CA Coastal Act identifies both residential and general commercial land uses as “low-priority”. So although affordable housing is important there are other more appropriate locations, than on the last remaining vacant Coastal land in Carlsbad that will be needed to address the “High-Priority” Coastal Land Uses to serve Carlsbad and California’s ‘buildout’ needs. CA case law recognizes the supremacy of the CA Coastal Act over CA Housing Laws as noted in “Kalnel Gardens, LLC v. City of Los Angeles”. This case law data has already been provided to the City Council as part of Staff’s housing discussions over the past few years. The staff report should have disclosed the above information, as it appears SB 330 is not a factor at Ponto.

- 13      2005-2010 Housing Element: As noted above the General Plan Land Use Element states the General Plan Land Use Plan is not effective until the proposed Draft LCP Land Use Plan Amendment is both approved by the City Council AND certified by the CA Coastal Commission. So, the Housing Element Cannot recognizes the proposed residential use change at Ponto until then. Also as noted before there were multiple documented fundamental ‘planning mistakes’ in public disclosure, participation and process that flawed the Housing Element. It should be noted that these flaws occurred during the time the CA Coastal Commission specifically rejected the Ponto Beachfront Village Vision Plan due to those flaws. The now City acknowledged ‘planning mistakes’ at Ponto prevented Carlsbad citizens from providing informed participation during the Housing Element.

Also, it is unclear why the staff misrepresented the amount of housing proposed in the Housing Element on the Ponto Planning Area F site as “the Ponto site for high density residential use at a minimum density of 20 dwellings per acre (128 units minimum)”; as this is not true. The City’s General Plan promises only the minimum 15 dwelling units/acre for the R-23 Land Use designation. See the “Ponto” unit capacity table below from the City of Carlsbad General Plan

Housing Element Table B-1 on page B-2 that lists 98 dwellings for the site on the east side of Ponto Road and 11 optional dwellings on the west side of Ponto Road for 109 total units for both sites, v. the 128 units mentioned by staff. Not sure why staff misrepresented the density by 17 to 30%.

2007 Ponto Beachfront Village Vision Plan: As noted several times above there were fundamental public disclosure and participation flaws with this plan. It was rejected by the CA Coastal Commission in 2010 in part for those reasons. These flaws are confirmed by the City's own data as a result of multiple Official Carlsbad Public Records Requests. This should be disclosed to the City Council and citizens.

- 14      2015 General Plan Update: As noted several times above there were also fundamental public disclosure and participation flaws with this General Plan Update with regards to Ponto. These flaws are confirmed by the City's own data as a result of multiple Official Carlsbad Public Records Requests. This should be disclosed to the City Council and citizens.

Citizens are asking the City Staff and City Council:

- for honesty; to fully and publicly recognize and disclose the past “planning mistakes” at Ponto, and fundamental flaws from the from those mistakes that prevented citizens from knowing about and participating in the planning process for Ponto.
  - To keep the Existing LCP Land Use Plan at Ponto until a new open-honest and inclusive Community-based planning process can be achieved at Ponto.
  - To be honest with respect to Park Serve Area and Equity issues at Ponto and Coastal South Carlsbad west of I-5 and the rail corridor.
  - Consider the needs for inland South Carlsbad citizens, visitors and business to have their ONLY Coastal Park.
  - Consider the larger regional Coastal Park need, and the forever ‘buildout’ Coastal Recreation needs for future generations.
  - To be true and honest in translating and implementing our Community Vision
2. The 2<sup>nd</sup> attachment to the 9/14/20 email to Carlsbad City Council, Housing-Parks-Planning Commissions & Housing Element Advisory Committee; & State of CA Coastal Commission, Parks, Housing & Community Development Department: Carlsbad City Council, Housing-Parks-Planning Commissions & Housing Element Advisory Committee; & State of CA Coastal Commission, Parks, Housing & Community Development Department was a 26-page document with a Subject line and submitted as official Citizen public input for the Housing Element & Parks Master Plan Updates, & Draft Local Coastal Program Land Use Plan Amendment regarding ‘Coastal Recreation’ facts, needs, issues for Ponto Planning Area F and citywide. Due to the size of the document it is being included as a separate PDF file.

Nov 30, 2020

People for Ponto citizen public input on:

Carlsbad's Draft Housing Element Update

Carlsbad Planning Commission for the Draft Local Coastal Program Land Use Plan Amendment;

Carlsbad Park Commission for the Draft Parks Master Plan Update; and

City Council and CA Coastal Commission for all the above Draft updates and amendments

Page# Citizen concern & public input

Overall Since 2017 there has been extensive Carlsbad Citizen input provided to the City Staff and City Council concerning the documented past/present 'City Coastal land use planning mistakes' at Planning Area F at Ponto (a site the City Staff is including in the housing inventory), and Citizens documenting and expressing the need for Ponto Park on Planning Area F and desire for the City Council to acquire it for a much needed (and only) Coastal Park for South Carlsbad.

The extensive Carlsbad Citizen input to the City gathered by People for Ponto Carlsbad Citizens (as of Nov 2020) includes over 2,700 emailed requests for the Ponto Park, over 200-pages of public testimony and data documentation showing the Carlsbad Citizen need for Ponto Park, and numerous presentations to the City Council showing Ponto Park needs and Citizen's requests for Ponto Park. Ponto Park was also by far the most cited Citizen need and request for City Council funding during both the 2019 and 2020 Budget processes. Over 90% of Citizen requests during both those City budget processes asked or Ponto Park [see attachment 1 & go to the 6/2 & 6/24/20 City Budget at <https://carlsbadca.swagit.com/play/06022020-906> & <https://carlsbadca.swagit.com/play/06232020-1181> and listen to and read the public testimony as the files are too big to email]. Due to the 4-person City Council and 2-2 City Council split these extensive Citizens needs and requests were not acted on. With the recent election, there is now a 5<sup>th</sup> Council person (from District 4 that includes Ponto) to provide a City Council decision on Citizen needs and desire for Ponto Park. People for Ponto citizens have asked the City Staff circulate and provide the extensive Carlsbad Citizen input, need and request for Ponto Park to Carlsbad's Planning, Parks and Housing Commissions, and the Housing Element Advisory Committee (HEAC), so the primary CA Coastal Land Use planning issues area coordinated between the City Staff's proposed Draft Local Coastal Program Land Use Plan Amendment, Housing Element Update, and Parks Master Plan Update processes. Unfortunately, City Staff communication, coordination and inviting People for Ponto Carlsbad Citizens to be involved when the Ponto Planning Area F land use issues are being considered by the Planning, Parks and Housing Commissions, and the Housing Element Advisory Committee does not seem to be happening.

On 2017 what is now a much larger People for Ponto group of Carlsbad Citizens asked the City Council and City Staff for a better Ponto Planning Process, and documented why Ponto Park is more consistent with Carlsbad's Community Vision (the foundation for Carlsbad's General Plan, and land use plan) [see attachment #2]

In 2017 People for Ponto filed official Carlsbad Public Records Requests, and found the City make multiple 'planning mistakes' at Ponto, and particularly at Planning Area F with regard to non-compliance with Carlsbad exiting Local Coastal Program and also overall Growth Management Standard Open Space acreage requirements at Ponto. These have been

documented to the City on several occasions and are highlighted on pages 2-5, 6-7, 11-12, and 14-16 in Attachment #3.

As summarized on page 11 in Attachment #3, in 2017 the CA Coastal Commission informed the City how the City's proposed Ponto Planning Area F General Plan Land Use designation change from the existing "Non-residential Reserve" to R-23 & General Commercial could change if 'higher-priority' Coastal Recreation or Low-cost Visitor Accommodations area needed at Ponto. City Staff first and only provided that information to the City Council (and one assumes also the Carlsbad Planning, Parks and Housing Commissions) on 1/28/20. On 1/28/20 City Staff introduced the Draft Local Coastal Program Land Use Plan Amendment process to the City Council. We are not sure if City Staff provided the CA Coastal Commissions' direction to the City on Ponto Planning Area F to the Planning, Park, and Housing Commissions and HEAC? The CA Coastal Commission is the final land use authority at Ponto since Ponto is in the CA Coastal Zone and is governed by the CA Coastal Act, which supersedes Carlsbad's General Plan. Land use in the CA Coastal Zone and the State law that governs land use in the CA Coastal Zone, the CA Coastal Act is not constrained by many CA Housing laws. This is logical as the Coast is a very limited State resource and many critical Coastal land uses can only be provided in the Coast, whereas housing can be provided over a much larger land area and based on beneficial surrounding land use adjacencies is better located in inland locations.

At the above mentioned 1/28/20 City Council meeting there were numerous apparent errors, omissions or misrepresentations in the Staff Report. These errors/omissions/misrepresentations had critical reference and relevance to the Draft Housing Element and how CA Coastal Act and state housing laws interact. People for Ponto submitted written and verbal testimony at the 1/28/20 meeting on these errors/omissions/misrepresentations [see attachment #4]. The Housing Commission and HEAC, Planning Commission and Parks Commission should review and consider Attachment #4 in evaluating the Draft Housing Element Update, Draft LCP-LUPA and Draft Parks Master Plan Update.

As documented in Attachment #5 Carlsbad's 2015 General Plan clearly recognizes that Carlsbad's General Plan land use changes to Carlsbad's Coastal Zone from the 2015 General Plan Update are not valid until the CA Coastal Commission fully "Certifies" a Local Coastal Program Land Use Plan Amendment (LCP-LUPA). This has not yet occurred. The CA Coastal Commission will likely consider Carlsbad's Draft LCP-LUPA in 2021-2022. As noted in Attachment #3, based on the 2010 and two 2017 communications from the CA Coastal Commission, the CA Coastal Commission may or may not "Certify" the City's proposed, Coastal land use change at Ponto Planning Area F from its current "Non-residential Reserve" land use to R-23 Residential and General Commercial. People for Ponto Citizen data provided to both the City and CA Coastal Commission show Carlsbad appears to both significantly lag behind other Coastal cities in providing both Coastal Recreation (i.e. Public Park) and Low-cost Visitor Accommodation that at high-priority Coastal land uses at Ponto [see Attachments #5 & #6]. Thus the CA Coastal Commission may direct Carlsbad to change its General Plan at both Ponto Planning Area F and maybe at other areas to provide these 'higher-priority' Coastal land uses consistent with the CA Coastal Act, and Carlsbad's existing LCP requirements for Ponto Planning Area F. The Housing Commission and HEAC, Planning Commission and Parks Commission should review and consider Attachments #5 & #6 in evaluating the Draft Housing Element Update, Draft LCP-LUPA and Draft Parks Master Plan Update.

Ponto Planning Area F is only 11-acres in size, and is the last remaining vacant and unplanned Coastal land in South Carlsbad to provide for the 'forever supply' of Coastal Recreation to accommodate the 'forever increasing population and visitor demands' of 'High-Priority Coastal Recreation and Low-cost Visitor Accommodations'. This issue of Coastal 'buildout' of 'High-priority Coastal land uses v. a forever increasing Carlsbad and CA residential population and visitor demand for those 'High-Priority Coastal land uses was presented to and asked of Carlsbad's City Council; Planning, Housing and Parks Commissions, HEAC, CA Coastal Commission and CA Housing and Community Development on 9/14/20 by People for Ponto Citizens [see attachment #7 on page XX below]. As yet there has been no City/State reply and City opportunity to fully discuss the issues in the 9/14/20 email. Ponto Planning Area F is the last critical and most economical area for those high-priority uses in South Carlsbad. Conversely, Planning Area F has a negligible impact on Carlsbad's affordable housing supply as documented in the Draft Housing Element. The Draft Housing Element documents a significant oversupply of housing and most critically affordable housing opportunities without even including the potential (only if both the City ultimately proposes and CA Coastal Commission actually 'Certifies' a change to Ponto Area F Coastal land use to residential) for Ponto Planning Area F's residential use. As noted on the comments below relative to Draft Housing Element page 10-92 and Table 10-29, the City's proposed Planning Area F's R-23 residential and General Commercial use would yield a potential 108-161 min-max range of dwellings. Of these 20% would be required to be affordable at the "Lower" income category since the City would have to transfer "excess Dwelling Units" to Planning Area F's "Non-residential Reserve" Coastal Land Use. This 20% is a relatively small 22-32 "Low" income units. 22-32 "Low" income units is only .40% to .59% of all the "Lower" income housing units provided by Carlsbad in the Draft Housing Element; and is only .66% to .96% of the amount of the "Excess" (beyond the RHNA requirement) Lower Income housing units" provided by Carlsbad's Draft Housing Element. So Ponto Planning Area F has no impact on Carlsbad meeting its RNHA allocation, and has a negligible 0.66% to 0.96% impact on the amount of "Excess" (beyond the RHNA requirement) Lower Income housing units" provided by Carlsbad's Draft Housing Element. Yet Ponto Planning Area F has a profound, critical and truly forever impact on Carlsbad's and the State of California's Coastal Land Use Priorities for Coastal Recreation for the 64,000 current and growing numbers of South Carlsbad residents who want and need a Coastal Park. Ponto Planning Area F is the last meaningful vacant and unplanned Coastal land in South Carlsbad to provide Coastal Park, and the most affordable and tax-payer efficient Park Carlsbad could provide. Forever squandering this last bit of precious Coastal Land for residential use so a few (86-129) can buy \$ 1+ million homes, and a few 'lucky' (22-32) subsidized affordable homeowners have a coastal location; while forever denying a far greater 64,000 (and growing) South Carlsbad residents-children their only South Carlsbad Coastal Recreation (i.e. Public Ponto Park) opportunity does not make sense for either the City or State of California. Forever squandering Ponto Planning Area F for a few years of "Excess" residential land for some very expensive luxury homes does not seem to make sense.

**So, the Housing Commission and HEAC should at this time remove Ponto Planning Area F from the Housing Element at this time. The City should only consider including it in the Housing Element as 'vacant housing site' if and after the CA Coastal Commission 'Certifies' the City's proposed Coastal Land Use change from the existing LCP-LUPA "Non-residential Reserve" land use to a 'lower-Coastal-priority' residential land.**

Additional Data in support of the above Citizen request, & Draft Housing Element Comments:

- 10-63 States: "Coastal Zone: Although sites located within the Coastal Zone, as defined in the 2019 Local Coastal Program (LCP) Land Use Plan, are not excluded, areas within the Coastal Zone have been carefully considered, as any necessary redesignations in this zone would require additional processes and time, which can be a constraint to housing development." It is unclear what this means?

Also, this section fails to disclose some very critical Coastal Zone, that are governed by the CA Coastal Act, issues relative to the CA Coastal Act's superiority over CA Housing Laws if there is competing land use priorities or conflicts. This is logical and also written into State Law such as SB 330 (Skinner) Section 13 that states: "(2) **Nothing in this section supersedes, limits, or otherwise modifies the requirements of the California Coastal Act of 1976** (Division 20 (commencing with Section 30000) of the Public Resources Code). **For a housing development project proposed within the coastal zone, nothing in this section shall be construed to prohibit an affected county or an affected city from enacting a development policy, standard, or condition necessary to implement or amend a certified local coastal program consistent with the California Coastal Act of 1976** (Division 20 (commencing with Section 30000) of the Public Resources Code)." This language is consistent with CA case law, and other housing laws that recognize the obvious – there is very limited amount of Coastal land v. significant land area inland. Limited Coastal Land per the CA Coastal Act is needed for CA "High-Priority" Coastal Land Uses" - i.e. Coastal Recreation and Low-cost visitor accommodations primarily in a city such as Carlsbad. The CA Coastal Act identifies both residential and general commercial land uses as "low-priority" as these can be well provided in non-Coastal Zone areas. So although affordable housing is important there are other more appropriate locations, than on the last remaining vacant Coastal land in South Carlsbad that will be needed to address the "High-Priority" Coastal Land Uses to serve Carlsbad and California's 'buildout' needs. CA case law recognizes the supremacy of the CA Coastal Act over CA Housing Laws as noted in "Kalnel Gardens, LLC v. City of Los Angeles" et. al.

The Coastal Zone section on 10-63 should be clarified and acknowledge the CA Coastal Act Policies that concern California's Coastal Land Use priorities. Given future increases in Carlsbad and CA populations (and visitors) and those populations needing increases in Coastal Land for Coastal Recreation, it is prudent for the City of Carlsbad to plan and reserve the last remaining fragments of Coastal Land for Coastal Recreation land use to address these population increases [see Attachment 7].

- 10-92 Table 10-29: This table shows that Carlsbad has more than sufficient housing sites to address all its RHNA numbers in this cycle. Carlsbad and the State of California both have higher priority Coastal Land Use needs at Ponto Planning Area F then for housing. This is all the more relevant in that the housing proposed at the 11-acre Ponto Planning Area F is:
- relatively small and has negligible impact on overall city housing goals,
  - would not really further Carlsbad's nor the State of California's affordable goals, in that housing being designed-marketed and that housing market will price and sell homes for well over \$1 million per unit; and even if you build 3-5-10 stories high the market sell price would be the same or very similar, due to its Coastal location, will likely not even be exclusively used for housing, but market forces will promote more profitable short-term or medium term visitor rental use, and

- if for some reason the City will still be requiring the Ponto Planning Area speculative land owner to actually provide 20% of Planning Area F's potential 108-161 min-max range of dwellings as affordable at the "Lower" income category as is currently required, this is a relatively small 22-32 "Low" income units. 22-32 "Low" income units is only .40% to .59% of all the "Lower" income housing units provided by Carlsbad and is only .66% to .96% of the amount of "Excess" Lower Income housing units" provided by Carlsbad's land use plan. The landowner already has tried to offload their 20% Lower income requirement to an inland location around the airport but could not do so for several reasons, but likely will try again. So Ponto Planning Area F is well below 1% influence on Carlsbad housing; yet has a significant impact on Carlsbad's and the State of California's Coastal Land Use Priorities for Coastal Recreation.
- In reference to the above bullet, The current Coastal Land Use for Ponto Planning Area F is "Non-Residential Reserve" and has no residential land use associated with it under Carlsbad's General Plan as currently Certified by the CA Coastal Commission. So the City of Carlsbad currently requires under its Growth Management Plan to transfer some excess SW Quadrant dwelling units from the City's housing unit bank to the Ponto Planning Area F site change the Area F's land use for residential use. For this dwelling unit transfer the City requires a developer/land owner to provide 20% of the dwelling as affordable to "Low" incomes. The City has a formal agreement with the Ponto Planning Area F land owner requiring this 20% "Low" income housing on-site in exchange for City's 'transfer of Excess Dwelling Units' specifically to an existing "Non-residential Reserve" Coastal land use site in Carlsbad's current LCP. Draft Housing Element pages 10-117 to 119 documents the City's 'Excess Dwelling Units' program.

10-110 Construction and Labor Costs: The Draft Housing Element states that the total cost to build housing is composed of the following cost components - 63% are construction building materials and labor, 19% are administrative legal, professional, insurance, and development fee costs, 10% are conversion (title fees, operating deficit reserve) cost, and 8% are acquisition costs (land and closing costs). Developer profit is then added on top of these costs and sets the 'minimum price' a developer can offer to sell/rent a housing unit. Typical minimum estimated developer profit to determine if a project is feasible is around 10%. So land cost at 8% is the lowest cost component in housing development. Developer profit can increase beyond this in a hotter housing and can reduce in a cooler market than the Developer projects in their project pro-forma. A market housing builder, understandably, looks to maximize their profit and if possible reduce risk.

So should the Draft Housing Element focus on the major housing cost factors (construction costs) and possibly reduce developer risk by providing more robust policies to provide direct subsidies to market developers to pay for their developer's 10% profit and some of the major construction costs for in exchange for permanent affordability on the dwellings so subsidized? It may be a non-typical idea, but would kind of be like developer profit insurance, and maybe worth exploring. If a market developer is guaranteed their 10% profit on their dwelling unit costs then this would seem good for them – they are guaranteed to make their 10% profit. The challenge would be how to fund the City's, or State HCD's developer profit insurance pool to fund such an affordability program.

10-115 Growth Management Plan Constraints Findings: This section starts out with the following statement: *"With the passage of SB 330 in 2019, a "city shall not enact a development policy,*

*standard, or condition that would...[act] as a cap on the number of housing units that can be approved or constructed either annually or for some other time period.*" This opening statement is very incomplete and misleading on four (4) major points:

1. For clarity the statement should document that SB 330 applies to Charter Cities like Carlsbad. Carlsbad Charter has specific language relative to the Growth Management Program, and this should be explained.
2. SB 330 is clearly short-term 6-year housing crisis legislation, that is set to will expire on 1/1/2025 – 5-years from now.
  - a. This short-term 6-year applicability of SB 330 should be clearly disclosed up-front particularly if a short-term law is being used to overturn Carlsbad's City Charter and change decades of Carlsbad infrastructure planning. It will likely take Carlsbad 5-years to create and get adopted by the City and CA Coastal Commission (for Carlsbad's Coastal Zone) to comply with SB 330 only to have SB 330 expire.
  - b. Also, as is logical in a short-term law that will expire in 5-years, SB 330 is only applicable to a City "enacting" such policy within the time SB 330 is law (i.e. until 1/1/2025). SB 330 language is "enact" and that word reflects future action not a past City action. SB 330 being short-term 6-year legislation uses the word 'enact' that refers to a future action To be apical to a past action the language would have to be 'have enacted' but should have clearly indicated all such past laws are now invalid until 1/1/2025. It is illogical to have a short-term crises legislation that expires in 1/1/2025 overturn over 30-years of pre-SB 330 development policies in Carlsbad and possibly other cities, particularly when the actual language of SB 330 does not clearly state so.
3. Carlsbad's Draft Housing Element will be valid from 2021-2029 or 4-years beyond the expiration of SB 330. If the Draft Housing Element is meeting its RHNA numbers for the years 2021-2029 and not creating "a cap on the number of housing units that can be approved or constructed" during the 6-year period when SB 330 is the law (only until 1/1/2025) then there seems no Growth Management Program "Constraint" on the 2021-2029 RHNA numbers and SB 330 set to expire on 1/1/2025.
4. As noted above for page 10-63, SB 330 (Skinner) Section 13 states that: **"(2) Nothing in this section supersedes, limits, or otherwise modifies the requirements of the California Coastal Act of 1976** (Division 20 (commencing with Section 30000) of the Public Resources Code). **For a housing development project proposed within the coastal zone, nothing in this section shall be construed to prohibit an affected county or an affected city from enacting a development policy, standard, or condition necessary to implement or amend a certified local coastal program consistent with the California Coastal Act of 1976** (Division 20 (commencing with Section 30000) of the Public Resources Code)." This should be clearly stated.

This section of the Draft Housing Element needs more research and full disclosure of the four (4) above SB 330 issues.

Also the Section should address the 3 foundational issues emailed on 9/14/20 'Citizen public input for Housing Element & Parks Master Plan Updates, & Draft Local Coastal Program Land Use Plan Amendment' to the 'Carlsbad City Council, Housing-Parks-Planning Commissions & Housing Element Advisory Committee; & State of CA Coastal Commission, Parks, Housing & Community Development Department' [Attachment7].

- 10-119 Mitigating Opportunities, 2<sup>nd</sup> paragraph: the 3 foundational issues emailed on 9/14/20 'Citizen public input for Housing Element & Parks Master Plan Updates, & Draft Local Coastal Program Land Use Plan Amendment' to the 'Carlsbad City Council, Housing-Parks-Planning Commissions & Housing Element Advisory Committee; & State of CA Coastal Commission, Parks, Housing & Community Development Department' should be address here also. **How can Carlsbad or any California City plan to assure their land use plans' "primary tenant that public facilities keep pace with growth" occur if population growth is unlimited and will increase each RHNA cycle while at the exact same time a City's vacant land, and critical vacant Coastal Zone land, is getting smaller and will eventually effectively be gone?**

Without new vacant land and critical new vacant Coastal Zone Land to provide new City Parks and new Costal Recreation to 'keep pace with growth' in population and visitors how can Carlsbad's and California's quality of life be maintained or enhanced?

Are City Park Standards of 3-5 acres of Parkland per 1,000 populations to become void when there is no more vacant land to provide New Parks needed for an unlimited growth in population? Will California's Coastal Recreation resources not be allowed to concurrently grow in land area and be appropriately distributed with population and visitor growth? Will California's beloved and economically important Coastal Recreation resources then become 'loved to death' by more overcrowding from unlimited population and visitor growth? Without providing concurrent, equivalent, and unlimited growth in new Coastal Recreation land for the growth of those two populations a slow, but eventual deterioration will occur. These are fundamental issues of CA State priorities, particularly between the CA Coastal Act and CA Planning and Zoning and housing laws.

- 10-123 California Government Code Section 65863: The California Government Code Section 65863 exceptions should all be listed, and if section 65863 supersedes the CA Coastal Act and how the CA Coastal Commission may finally decide to finally Certify Coastal land use at Ponto in he next year or so. As per Carlsbad's General Plan the General Plan at Ponto is not adopted until the CA Coastal Commission fully Certifies or Certifies with Modifications Carlsbad's Draft Local Coastal Program Land Use Plan Amendment. Carlsbad's Draft Housing Element already shows "Excess" housing capacity to meet RHNA numbers limits without the need for Ponto Planning Area F.

- 10-149 California Coastal Commission: This section is incomplete. It is missing some key fundamental and common-sense land use principles regarding the CA Coastal Commission; CA Coastal Act; State 'Coastal Land Use Priorities' under the CA Coastal Act that Carlsbad needs to follow; and that CA housing law does not 'supersede, limit, or otherwise modify the requirements of the California Coastal Act of 1976'.

The fundamental and common sense land use principles are that the Coastline and Coastal Land near the Coast area a very small areas that need to provide high-priority Coastal land use to serve a magnitudes larger inland area and visitors to the coast. This very small Coastal Land needs to "forever" provide for All the Future Coastal Recreation needs for Carlsbad, Cities inland of Carlsbad, CA Citizens such as those coming from LA Metro region, and for all the out-of-state Visitors that visit Carlsbad. This is a huge amount of both Present and Future Coastal Recreation demand focused on a very small land area. Attachment #5 data documents the projection of both population and visitor growth that will increase demands for Coastal Recreation.

Most all of Carlsbad's Coastal Zone is already developed and not available to address those needs. In 2008 only 9% of Carlsbad was vacant, and maybe only ½ or less of that 9%, say only 4.5% was vacant land in the Coastal Zone. This 4.5% of vacant land is likely even a smaller percentage in 2020, and will be an even smaller in 2029 at the end of the Housing Element's planning horizon. The Draft Housing Element does not indicate amount of Vacant Coastal Land in Carlsbad in 2020. This small remaining less than 4.5% of Carlsbad must forever provide for All the future Coastal Priority Land Use needs such as critical Coastal Recreation (i.e. Public Park) that is the lowest cost method to access and enjoy the coast. Ponto Planning Area F is the last remaining vacant land to provide for "High-Priority Coastal Recreation Land Uses" in an area in need of a Coastal Park consistent with CA Coastal Act.

Housing however can be, and is better located in more inland areas where there is more land, more vacant land, more affordable land, and where there is 360 degrees of surrounding land that supports housing, such the bulk of employment and commercial centers and public services such as schools. The common-sense logic that very limited and finite Coastal Land should be used primarily for only those land uses that can only be provided by a Coastal location finally came to forefront in the 1970's after years of sometimes poor Coastal land use decisions by Cities.

In the 1970's CA citizens and then the CA State government addressed how California's limited Coastal Land area should be 'Prioritized' for use with the CA Coastal Act. In that regard the CA Coastal Act (CA PRC Section 30001.5) has the following goals:

(c) **Maximize public access to and along the coast and maximize public recreational opportunities in the coastal zone** consistent with sound resources conservation principles and constitutionally protected rights of private property owners.

(d) **Assure priority for coastal -dependent and coastal-related development over other development** on the coast.

In support of these Goals there are numerous regulatory policies that prioritize and guide how Coastal Land should be used such as:

- Section 30212.5 ... **Wherever appropriate and feasible, public facilities**, including parking areas or facilities, **shall be distributed throughout an area so as to mitigate against the impacts, social and otherwise, of overcrowding or overuse by the public of any single area.**
- Section 30213 ... **Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...**
- Section 30221 **Oceanfront land suitable for recreational use shall be protected for recreational use and development unless present and foreseeable future demand for public or commercial recreational activities that could be accommodated on the property is already adequately provided for in the area.**
- Section 30222 The use of **private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation**

**shall have priority over private residential, general industrial, or general commercial development**, but not over agriculture or coastal-dependent industry.

- Section 30223 **Upland areas necessary to support coastal recreational uses shall be reserved for such uses, where feasible.**
- Section 30251 ... **The location and amount of new development should maintain and enhance public access to the coast by ... 6) assuring that the recreational needs of new residents will not overload nearby coastal recreation areas by correlating the amount of development with local park acquisition** and development plans with the provision of onsite recreational facilities to serve the new development
- Section 30255 **Coastal-dependent developments shall have priority over other developments on or near the shoreline**

The CA Coastal Commission (CCC) uses the CA Coastal Act Goals and Polices in reviewing the Coastal Zone areas of Carlsbad's General Plan and thus Coastal Zone area of the Housing Element to determine if the CCC can certify the Coastal Zone of Carlsbad's General Plan as being in compliance with the CA Coastal Act. Carlsbad's General Plan Land Use Element clearly states on page 2-26 that "The city's LCP Land Use Plan will be updated consistent with this General Plan. **However, to take effect, the LCP must be certified by the Coastal Commission as well as adopted by the city. Until such time that this occurs, the existing (as of 2013) LCP must be adhered to.**"

For one small 11-acre vacant site – Ponto Planning Area F – Carlsbad's existing Local Coastal Program land use plan and regulations are:

"Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. **Planning Area F is an "unplanned" area, for which land uses will be determined at a later date when more specific planning is carried out for areas west of the railroad right-of-way.** A future Major [*Poinsettia Shores. aka San Pacifico Community Association*] Master Plan Amendment will be required prior to further development approvals for Planning Area F, and shall include an LCP Amendment with associated environmental review, if determined necessary. ... **As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.**"

Although the City has twice tried to change the General Plan land use designation on Ponto's Planning Area F to R-23 Residential and General Commercial the City has:

1. Never complied with this Coastal regulatory requirement as has been documented by official Carlsbad Public Records Requests 2017-260, 2017-262, R000930-072419, R001280-021720, & R001281-02170.
2. Never clearly and publicly disclosed and engaged Carlsbad citizens, and particularly to the San Pacifico Community Association in which Planning Area F belongs to, in "any future planning effort" and in in our Community, South Carlsbad, and Citywide "need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.",

3. Never conducted a “Major Master Plan Amendment”, and never invited nor engaged the San Pacifico Community Association that composes over 70% of the Master Plan area to be consulted on possible changes to the Community’s Master Plan, and
4. Had the City’s/Developer’s proposed land use change from Non-residential Reserve to R-23 & General Commercial denied by the CA Coastal Commission in 2010,
5. Not yet had the CA Coastal Commission yet consider/rule on Certification of Carlsbad’s proposed Draft Local Coastal Program - Land Use Plan Amendment to change Planning Area F’s existing ‘Non-residential Reserve’ Coastal land use. The City maybe submit the City’s proposal in 2021-2,
6. Received specific direction in 2016 and 2017 from the CA Coastal Commission regarding the City’s proposed land use change for Ponto Planning Area F. Specifically:
  - a. CCC Staff acknowledged the City has not yet complied with the LCP and in an 8/16/2017 email said: **“The City is currently undertaking a comprehensive update to their LCP funded in part through a CCC grant. As a part of this process the City will be consolidating all previous LCP segments into a single, unified LCP. The City has received direction from both the Commission (May 2016 CCC hearing) and Commission staff, that as a part of this update the City shall undertake an inventory of visitor serving uses currently provided within the City’s Coastal Zone which will then serve to inform updates to the City’s land use and zoning maps as necessary. This inventory could have future implications for the appropriate land use and zoning associated with the Ponto area.”**
  - b. CCC Staff sent Carlsbad City Staff on 7/3/17. City Staff provided this to City Council on 1/28/20: **“The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto/Southern Waterfront area. For example, Planning Area F requires the city and developer to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e., public park) on the west side of the railroad.** This is an issue that the San Pacifico HOA community group is raising in regards to the Shopoff/Ponto development proposal, and **this study should be undertaken as a part of the visitor serving use inventory analysis described above. If this analysis determines that there is a deficit of low cost visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed.”**

Carlsbad’s Draft LCP-LUPA, Draft Housing Element Update and Parks Master Plan Update should ALL land use plan and reserve Ponto Planning Area F and the other last few remaining vacant Coastal Lands to address the ‘forever’ or ‘Buildout’ High-Priority Coastal Recreation and Visitor serving Land Use needs for Carlsbad, North San Diego County, and California.

10-169 Draft Policy 10-P.7 says “Encourage distribution of development of affordable housing throughout the city to avoid over concentration in a particular area, excluding areas lacking necessary infrastructure or services.” Carlsbad’s Park Master Plan identifies Ponto as an area lacking park services, stating and showing on maps Ponto as ‘unserved’ by City Parks, and an area of ‘Park Inequity’. Ponto currently has 1,025 homes that creates an 8-acre City Park demand (based on the City minimal 3-acres/1,000 population Park Standard) yet is ‘Unserved’

by City Parks per the City's Park Master Plan. Ponto development and homeowners paid City park-in-lieu-fees sufficient for 8-acres of City Park.

Of Ponto's 1,025 current homes, 202 in the San Pacifico Community Association were built to be affordable condominium homes with very small 'exclusive use' lots, zero-side yards/building setbacks and only 10-15' wide 'back yards'; and 384 Lakeshore Gardens homes are affordable age-restricted manufactured homes. So 586 of Ponto's 1,025 current homes or 57% of Ponto's housing were planned and built to be affordable. At 57% Ponto has and was developed with a consideration of affordable housing, but also was denied needed City Park facilities of at least 8-acres to meet minimum City Park Standards.

Consistent with Policy 10-P.7 Ponto Planning Area F should be used to address Ponto's 'Park Inequity' being 'unserved', and not used to increase the "over concentration" of affordable housing that was already planned and built at Ponto.

10-171 Figure 10-13: Sites Requiring No Zone Change: Ponto Planning Area F needs to be removed from Figure 10-13. As has been previously documented Planning Area F is currently Certified in the Existing Carlsbad Local Coastal Program as "Non-residential Reserve". Both the City's General Plan Land Use Element and Zoning Code clearly state the City needs to receive CA Coastal Commission 'Certification' of Carlsbad's Proposed Draft Local Coastal Program Land Use Plan Amendment (sometime in 2021-22) to change that existing Certification before Ponto Planning Area F's Coastal Land Use and Zoning is fully changed to R-23 Residential and General Commercial. Based on Ponto Planning Area F's existing Certified LCP regulations and well documented need for high-priority Coastal land uses at Ponto, it is likely Planning Area F's ultimate land use approved by the CA Coastal Commission could change.

10-191 Program 2.1: Inclusionary Housing Ordinance: this section states that "For all residential projects of fewer than seven units, payment of a fee in lieu of inclusionary units is permitted. The fee is based on a detailed study that calculated the difference in cost to produce a market rate rental unit versus a lower-income affordable unit. As of 2020, the in-lieu fee per market-rate dwelling unit was \$4,515." The City's in-lieu-affordable-housing fees seems very inadequate, as other cities like the City of Laguna Beach's (I recall) \$160,000 per unit in-lieu affordable housing inclusionary housing fee that actually reflects the in-lieu cost. This cost and fee should be similar to Carlsbad's situation. If in fact the Carlsbad's in-lieu affordable inclusionary housing cost to provide an affordable housing unit is only \$4,515 per dwelling, then the City appears have sufficient resources in the as I understand \$19 million Affordable Housing Inclusionary Fee accounts to provide the gap funding to 'buy' over 4,200 affordable dwellings. Since an in-lieu fee is to cover the costs of actually providing the affordable dwelling the fees should then be able to purchase that affordable dwelling someplace else in the housing market. There is a critical need to explain in much more detail why the in-lieu fee is what it is, if it is truly adequate in funding affordable housing "in-lieu" of a developer providing the affordable housing? If the in-lieu fee is the total cost difference between affordable and market construction then is the difference in affordable and market dwelling sales/rental price the market housing developers' Profit? If so then developer profit is the major barrier to affordable housing, as total costs are not that much different. If so then it seems logical to address this major barrier to affordable housing.

10-192 Program2.2: Replace or Modify Growth Management Plan (GMP): As mentioned before is seems imprudent to overturn the GMP for a temporary crisis housing law (SB 330) set to expire on 1/25/20. Also, it should be clearly stated in the this section that SB 330 has limited applicability or enforceability in the CA Coastal Zone if the City is pursuing compliance with the CA Coastal Act as documented in Attachment #4.

SB 330 reflects a very unusual time when national and international economic market distortion by central banks has created, historically low interest rates and resulting in historic Housing (and other) Asset (stocks and bonds) values. This manufactured temporary inflationary market stimulus is to be temporary, not long-term, and will be a temporary market distortion that will likely see asset prices 'revert to mean' once the cost of capital is properly priced. If SB 330 legally overrides Carlsbad's GMP until 2025 then that is what the State is mandating Carlsbad do. However, it is very imprudent and inappropriate to use SB 330's temporary crises language as rational for long-term changes to critical foundations of GMP. Once the temporary crises that SB 330 is designed to address is over is the time to methodically approach wise long-term and sustainable land use policy.

**Subject:** Citizen public input for Housing Elem & Parks Master Plan Updates, & Draft Local Coastal Program Land Use Plan Amendment

Dear Carlsbad City Council, Housing-Parks-Planning Commissions & Housing Element Advisory Committee; & State of CA Coastal Commission, Parks, Housing & Community Development Department:

As one of the many People for Ponto ([www.peopleforponto.com](http://www.peopleforponto.com)), we wanted to make sure this email and attachments have been provided to you and that the issues/data in this email be publicly presented/discussed during both the City's and State's consideration of the above planning and any other related activities.

1. Legality of 'Buildout' and quality of life standards in both California and a City within California; and if planning for "buildout" is illegal, can we California Citizens be provide the specific citation in CA State Law that forbids the State and/or Cities within California from land use and public infrastructure planning to cap to a finite or "buildout" population/development condition. As California and Carlsbad citizens it important to know the State's legal policy on "buildout"; and State policy laws on how are an infinite amount of Coastal Recreation and other high-priority Coastal land

uses can be correspondently provided for infinite population growth within a largely developed and finite (and shrinking due to sea level rise) Coastal Zone?

The following public testimony and questions were presented the 6/23/20 Carlsbad Budget meeting. Coordinated answers from the State of CA and City of Carlsbad on how State Coastal and Housing planning priorities are ordered and reconciled is important. Carlsbad has a very small fragment of remaining vacant coastal land and once it is developed it essentially lost forever. This is being planned now with the above mentioned planning efforts. Most all of Carlsbad's Coastal lands are already developed with Low-Coastal-Priority residential land use, or off-limits due to endangered habitat preservation. Coastal Parks or Campgrounds can only be provided along the Coast and they are currently very crowded, and will continue to get more crowded and eventually degrade over time by increased population demands if new Coastal Parks and campgrounds are not created by coordinated Coastal Land Use planning by the State and City. How is the State of CA and City of Carlsbad to address maintaining our coastal quality of life (coastal recreation) with infinite population growth and rapidly shrinking coast land resources?

Citizens need a coordinated State of CA and City response to: *"6-23-20 City Council Budget meeting – pubic testimony by Lance Schulte: People for Ponto submitted 130-pages of public testimony on 6/2/20, would like to submit the following public input to both the 6/23/20 City Budget Meeting and the City proposed Draft Local Coastal Program Amendment – and with reference to a proposed change the land use of Planning Area F from its Existing Non-Residential Reserve land use to City proposed low-coastal priority high-density residential and general commercial land uses. Contrary to what was said by 2 Council members the City's LCP policy covering Planning Area F is not a Citywide LCP policy, but is specific to the Sammis/Poinsettia Shores LCP area, and the policy's scope and regulatory authority is limited by the boundaries of the Sammis/Poinsettia Shores LCP area.*

*The Planning Area F Ponto Coastal Park is critical to the long-term economic vitality and sustainability of South Carlsbad's neighborhoods and extensive Visitor Industry; and Carlsbad's 1st and 3rd highest revenue sources.*

*Beyond Ponto there is an additional and separate Citywide Coastal Recreation requirement related to CA Coastal Commission concerns about Carlsbad's proposed LUP land use changes and proposed Local Coastal Program Amendment (LCPA) adequately providing for a Citywide 'buildout' need for Coastal Recreation land.*

*It is not clear if 'buildout' is a set and final amount of City and State population and development or if 'buildout' represents accommodating an endless amount of future population and development in Carlsbad and the State of California. If 'Buildout' is an endless future amount of population growth and development, then how is the City planning to provide a commensurate endless amount of City Parks and Open Space? How is an endless amount of Coastal Recreation provided to accommodate endless amount of City and Statewide growth?*

*Until these questions can be authoritatively answered by the City and State of California the preservation and acquisition of vacant Coastal land should be a City priority. Because once land is developed it will never be available for Park and Coastal Recreation use. Continual population and development growth without corresponding Park and Open Space growth will lead to a gradual but eventual undermining of the quality of life for Carlsbad and California, and our Carlsbad economy. It is for these and other important reasons People for Ponto ask the City to budget for the purchase of*

*Planning Area F for Coastal Recreation and City Park needs – needs that City has documented exist now, and needs that will only grow more critical and important in the future.*

*Thank you, People for Ponto love Carlsbad and our California Coast. We hope you love Carlsbad also and you take responsibility as a steward of our California Coast.”*

2. Attached is an email regarding clarification of apparent City errors/misrepresentations on 1/28/20 regarding a) the CA Coastal Act’s relationship with CA Housing laws regarding CA land use priorities and requirements within the CA Coastal Zone, and b) City planning documents and City planning and public disclosure mistakes regarding Ponto. The clarification of the issues noted on 1/28/20 should be comprehensive, and holistically and consistently disclosed/discussed in each of the City’s and State’s Coastal-Land Use Planning-Parks-Housing planning efforts showing the principles and legal requirements for how potential conflicts within State/City Policies are to be resolved.
3. Similar to #2 above, People for Ponto has provided public testimony/input of over 200-pages of documented data on the need for a “Public Park” and over 2,500 Citizens’ requests for that Park. Those 200+ pages and the email requests from 2,500 citizens, and the CA Coastal Commission direction to the City as noted below should also be shared with the Carlsbad’s Planning-Parks-Housing Commissions and the City’s Housing Element as part of the respective land use-parks-housing discussions.

The CA Coastal Commission has also provided direction to the City regarding some of the City’s planning mistakes at Ponto, and those directions should also be shared with the City’s Planning-Parks-Housing Commissions and Housing Element Advisory Committee regarding Coastal Land Use planning at Ponto Planning Area F. CA Coastal Commission has provided the following direction to the Carlsbad:

- a. Following is from a 7/3/17 CCC letter to City Staff on the City’s proposed land use changes at Planning Area F. City Staff provided this to City Council on 1/28/20: “The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto/Southern Waterfront area. **For example, Planning Area F requires the city and developer to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e., public park) on the west side of the railroad.** This is an issue that the San Pacifico HOA community group is raising in regards to the Shopoff/Ponto development proposal, and this study should be undertaken as a part of the visitor serving use inventory analysis described above. **If this analysis determines that there is a deficit of low cost visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed.”**
- b. In 2017 after citizens received the City’s reply to Public Records Request 2017-260, citizens meet with CCC staff to reconfirm the City failed since before 2010 to publicly disclose and comply with Planning Area F’s LCP requirements. CCC Staff acknowledged the City has not yet complied with the LCP and in an 8/16/2017 email said: “The City is currently undertaking a comprehensive update to their LCP funded in part through a CCC grant. As a part of this process the City will be consolidating all previous LCP segments into a single, unified LCP. **The City has received direction from both the Commission (May 2016 CCC hearing) and Commission staff, that as a part of this update the City shall undertake an inventory of visitor serving uses currently provided within the City’s Coastal Zone which will then serve to inform updates to the City’s land use and zoning maps as necessary. This inventory could have future implications for the appropriate land use and zoning associated with the Ponto area.”**

Please do not misinterpret these comments as anti-housing or anti-development, it is the exact opposite, they are in support of existing and future development. It is a logical recognition of what is the best use of very limited (and shrinking) vacant Coastal Land resources. It is prudent and sustainable State and City Coastal Land Use planning to best serve all CA residents – now and in the future. Housing can be developed in many large inland areas that are better connected with job centers and transit. New Coastal Parks can only be located on the last few remaining vacant parcels within a short distance to the coast. This very small area (vis-a-vis) large inland areas must serve all the coastal Park and recreation needs of California’s almost 40 million residents and the additional millions of annual visitors to California’s coast. This very small amount of Coastal land drives a lot what makes CA desirable and successful, but it is getting very overcrowded due to population/visitor growth while at the same time shrinking due to coastal erosion and sea level rise. Squandering the few remaining Coastal vacant land resources, and not reserving (planning) these lands for more high-priority Coastal Recreation Land Uses will ultimately undermine CA both socially and economically. The attached ‘Carlsbad 2019 proposed Draft LCP Amendment’ file should be provided to and reviewed by Carlsbad’s Planning-Parks-Housing Commissions and the Housing Element Advisory committee in their consideration of Carlsbad’s proposed Housing Element update and proposed Draft LCP Land Use Plan Amendment, and also jointly by CA HCD and CCC in providing Carlsbad direction on CA Coastal Land Use priorities in the Coastal Zone relative to those two (2) City proposals.

Thank you all for your consideration and comprehensive inclusion of the various issues in both the City and States upcoming evaluation of proposed Coastal land use plan, Housing Element and Parks Master Plan updates. There is precious little vacant Coastal land left and how it is planned to be used and developed is critical and needs full public disclosure/involvement and a comprehensive and coordinated approach.

Sincerely,  
Lance Schulte  
[www.peopleforponto.com](http://www.peopleforponto.com)

Following are the 2 attachments to the above 9/14/20 email:

1. 4/21/20 email of Public input to Carlsbad City Council-Planning-Parks-Housing Commissions and CA Coastal Commission on DLCPA-PMU-HEU processes: Dear Carlsbad City Council, and Planning, Parks and Housing Commissions; and CA Coastal Commission: People for Ponto submits this email, and the attachment that was provided to the Carlsbad City Council for Item#14 at the 1/28/20 meeting. The attachment provided at the 1/28/20 City Council meeting has not been recorded on the Carlsbad City website that documents public input provided at that 1/28/20 meeting. Consequently we request this email and attachment be provided to the Carlsbad City Council, and Planning, Parks and Housing Commissions; and CA Coastal Commission as public input on the City Staff proposed 1) Draft Local Coastal Program Amendment, 2) Parks Master Plan Update, and 3) Housing Element Update processes. The attachment documents apparent errors, omissions, and/or misrepresentations in the 1/28/20 Item #14 Staff Report/Presentation to the City Council. We wish this email and the attached public comments be provided to the Council and Commissions addressed to in this email and be included as public comments to be addressed in the 3 planning processes listed. Thank you. Email confirmation of receipt and delivery of this email/attachment is requested. Thank you. Sincerely, Lance Schulte People for Ponto

- a. Attachment: Carlsbad City Council meeting of 1-28-20 agenda item #14 [typo corrected on 2-4-20]: People for Ponto apologize for this late and hastily, review and comments. We just found out about the meeting this morning. We citizens know we can together achieve great things if you allow us to work with you.

Staff  
Report

Page

clarification/correction:

- 1 The LCP Land Use Plan Update is in fact an Amendment to an Existing LCP Land Use Plan. The Existing LCP Land Use Plan is already certified by the CA Coastal Commission as being consistent with the CA Coastal Act, except for some Amendments needed to address Sea Level Rise impacts and some other issues. The LCP Amendment proposes to change the Existing CA Coastal Commission certified LCP Land Use Plan's "Non-residential Reserve" Land Use and Policy on Planning Area F to consider and document the need for "i.e. Public Park" at Ponto .
- 1 Staff summarizes the CA Coastal Act objectives to "ensure maximum public access to the coast and public recreation areas." Carlsbad's Adopted Park Service Area/Equity Mapping shows there is no Park Service for the Ponto Area and Ponto Citizens, and no Park Service for the Coastal South Carlsbad area west of Interstate-5 and the rail corridor. The City's mapping of land that meets the developer required Growth Management Open Space Standard of 15% Unconstrained land shows about 30-acres of this Open Space is missing at Ponto. This missing Open Space could have provided needed Park facilities that are missing at Ponto. Citizens in over 2,500 emails to the City Council have cited the need for a Public Park at Ponto as part of the Existing LCP Land Use Plan Amendment proposed at Ponto. These requests are consistent with the CA Coastal Act.
- 3 2nd bullet: says city staff proposes to replace, amend, or retain various Existing LCP policies, so the Staff has a documented understanding how each Existing LCP policy is being treated in the proposed Amendment. Citizens asked in Oct 20, 2019 for this 'redline' version of the Existing LCP Policies and Land Use Maps so citizens can understand what the Amendments are so we as citizens could then provide informed public comment. This 'redline' version is also important for the City Council and Planning and other Commissions so they know what Amendments to Existing City LCP Land Use policy are being proposed. Citizens again request this 'redline' version that it appears the staff already has; as they know what Existing LCP Land Use policies are being replaced, amended, or retained.
- 4 V is incomplete: the community asked on Oct 20, 2019 for 3 things: 1) a 'redline' version as noted above, 2) true Public Workshops to help inform and resolve community concerns about the proposed LCP land Use Plan Amendments, and 3) more public review time to provide for the above two other requests. All 3 requests should be acknowledged in the staff report. All 3 requests are rational and reasonable considering the proposed Draft LCP Land Use Plan Amendment is the "buildout" plan for Carlsbad's Coastal Zone, and there were multiple

documented fundamental “planning mistakes” regarding past City public information and participation in the Coastal Land Use planning. Providing such a process as outlined by the 3 requests would help to correct these documented public disclosure/participation and ‘planning mistakes’ that have gone on for many years. It is the right thing to do and most productive approach for all concerned.

7 Staff should accurately disclose that in 2010 the CA Coastal Commission in fact rejected the City’s proposed Ponto Beachfront Village Vision Plan for failing to disclose and comply with the then and current LCP Land Use Plan policy for Planning Area F at Ponto. Carlsbad Public Record Requests confirmed the staff did not disclose to citizens the existence LCP Land Use Plan policy for Planning Area F at Ponto, so citizens had no idea a Public Park at Planning Area F at Ponto needed to be considered. How can citizens, provide input if citizens don’t have complete and accurate information to review and comment on?

8 Staff should correctly disclose that the 2015 application at Planning Area F at Ponto is first for a Local Coastal Program Amendment and Master Plan Amendment. These are both applications to change City Land Use Plan Policy and Zoning regulations. The actual applications for ‘development’ permits can in fact not even be considered by the City until the Local Coastal Program Land Use of “Non-residential Reserve” is changed and Master Plan rezoning is approved. Only then can the ‘development’ permit application can applied for. The developer abandoned their application to change the LCP and Master Plan and then apply for developer permit review about a year ago. However, the city staff is keeping the application ‘alive’ even though there has been no progress on the application for over a year. It is unclear if the staff has authority to do this, or if the City Council has authority to withdrawal the application due to non-activity. The City has permit standards that withdraw applications if applicants make no progress on the applications after 6-months. What is troubling is that it appears the city staff proposal is to process the developer’s application to change the Existing LCP Land Use Plan for the developer.

Staff notes that the Planning Area F sites now designated as Residential R-23 and General Commercial by the Carlsbad General Plan Update. However, staff fails to disclose that until the Existing LCP Land Use Plan Amendment (as proposed by City Staff) is in fact approved by both the City and the CA Coastal Commission the Existing LCP Land Use Plan for Planning Area F supersedes the City’s General Plan Update. Carlsbad’s General Plan Land Use Element clearly states this on page 2-26 stating: “The city’s LCP Land Use Plan will be updated consistent with this General Plan. However, to take effect, the LCP must be certified by the Coastal Commission as well as adopted by the city. Until such time that this occurs, the existing (as of 2013) LCP must be adhered to.” So until the City Council adopts the staff’s proposed Draft LCP Land Use Plan Amendment, AND the CA Coastal Commission “certifies” that LCP LUP Amendment; the City’s General Plan Update Land Use change cannot take effect. The General Plan Land Use at Ponto Planning Area F has in fact not been changed by the General Plan Update, but can only change with staff’s proposed

Draft LCP Land Use Plan Amendment that the City Council can choose to approve or disapprove. Also official Public Records Requests have documented that the City's General Plan Update planning process was also fundamentally flawed at Ponto. Again, like during Ponto Beachfront Village Vision Plan planning process a few years earlier the city failed to comply with the then and current LCP Land Use Plan policy for Planning Area F at Ponto. The flawed General Plan Update process at Ponto prevented Citizens from knowing the facts so they could properly participate and provide review and comment during the General Plan Update. The significant citizen comments to the City Council asking for a Ponto Coastal Park is reflective of the fundamental public disclosure and processing flaws that the city is only now acknowledging as one of the repeated 'planning mistakes' at Ponto. This is why citizens are asking for full disclosure of the facts and a complete planning process re-boot at Ponto. It also should be noted that the Existing LCP Land Use Policy for Planning Area F states that "as part of any future planning effort ... consideration of a "Public Park" is required. CA Coastal Commission Staff has indicated the City's proposed land use planning changes at Ponto as part of the General Plan Update are subject to change.

At the bottom of the page regarding SB 330, as noted above the "residential land use designation on the site" is not in effect until the currently proposed LCP Land Use Plan Amendment is both approved the City Council AND also certified by the CA Coastal Commission, so SB 330 does not apply. Also SB 330 has specific language that exempts land use in the Coastal Zone. SB 330 (Skinner) Section 13 states: "(2) Nothing in this section supersedes, limits, or otherwise modifies the requirements of the California Coastal Act of 1976 (Division 20 (commencing with Section 30000) of the Public Resources Code). For a housing development project proposed within the coastal zone, nothing in this section shall be construed to prohibit an affected county or an affected city from enacting a development policy, standard, or condition necessary to implement or amend a certified local coastal program consistent with the California Coastal Act of 1976 (Division 20 (commencing with Section 30000) of the Public Resources Code)." This language is consistent with CA case law, and other housing laws that recognize the obvious – there is very limited amount of Coastal land v. significant land area inland. Limited Coastal Land per the CA Coastal Act is needed for "High-Priority" Coastal Land Uses" - i.e. Coastal Recreation and Low-cost visitor accommodations primarily in a city such as Carlsbad. The CA Coastal Act identifies both residential and general commercial land uses as "low-priority". So although affordable housing is important there are other more appropriate locations, than on the last remaining vacant Coastal land in Carlsbad that will be needed to address the "High-Priority" Coastal Land Uses to serve Carlsbad and California's 'buildout' needs. CA case law recognizes the supremacy of the CA Coastal Act over CA Housing Laws as noted in "Kalnel Gardens, LLC v. City of Los Angeles". This case law data has already been provided to the City Council as part of Staff's housing discussions over the past few years. The staff report should have disclosed the above information, as it appears SB 330 is not a factor at Ponto.

13           2005-2010 Housing Element: As noted above the General Plan Land Use Element states the General Plan Land Use Plan is not effective until the proposed Draft LCP Land Use Plan Amendment is both approved by the City Council AND certified by the CA Coastal Commission. So, the Housing Element Cannot recognizes the proposed residential use change at Ponto until then. Also as noted before there were multiple documented fundamental ‘planning mistakes’ in public disclosure, participation and process that flawed the Housing Element. It should be noted that these flaws occurred during the time the CA Coastal Commission specifically rejected the Ponto Beachfront Village Vision Plan due to those flaws. The now City acknowledged ‘planning mistakes’ at Ponto prevented Carlsbad citizens from providing informed participation during the Housing Element.

Also, it is unclear why the staff misrepresented the amount of housing proposed in the Housing Element on the Ponto Planning Area F site as “the Ponto site for high density residential use at a minimum density of 20 dwellings per acre (128 units minimum)”; as this is not true. The City’s General Plan promises only the minimum 15 dwelling units/acre for the R-23 Land Use designation. See the “Ponto” unit capacity table below from the City of Carlsbad General Plan Housing Element Table B-1 on page B-2 that lists 98 dwellings for the site on the east side of Ponto Road and 11 optional dwellings on the west side of Ponto Road for 109 total units for both sites, v. the 128 units mentioned by staff. Not sure why staff misrepresented the density by 17 to 30%.

2007 Ponto Beachfront Village Vision Plan: As noted several times above there were fundamental public disclosure and participation flaws with this plan. It was rejected by the CA Coastal Commission in 2010 in part for those reasons. These flaws are confirmed by the City’s own data as a result of multiple Official Carlsbad Public Records Requests. This should be disclosed to the City Council and citizens.

14           2015 General Plan Update: As noted several times above there were also fundamental public disclosure and participation flaws with this General Plan Update with regards to Ponto. These flaws are confirmed by the City’s own data as a result of multiple Official Carlsbad Public Records Requests. This should be disclosed to the City Council and citizens.

Citizens are asking the City Staff and City Council:

- for honesty; to fully and publicly recognize and disclose the past “planning mistakes” at Ponto, and fundamental flaws from the from those mistakes that prevented citizens from knowing about and participating in the planning process for Ponto.
- To keep the Existing LCP Land Use Plan at Ponto until a new open-honest and inclusive Community-based planning process can be achieved at Ponto.
- To be honest with respect to Park Serve Area and Equity issues at Ponto and Coastal South Carlsbad west of I-5 and the rail corridor.
- Consider the needs for inland South Carlsbad citizens, visitors and business to have their ONLY Coastal Park.

- Consider the larger regional Coastal Park need, and the forever 'buildout' Coastal Recreation needs for future generations.
  - To be true and honest in translating and implementing our Community Vision
2. The 2<sup>nd</sup> attachment to the 9/14/20 email to Carlsbad City Council, Housing-Parks-Planning Commissions & Housing Element Advisory Committee; & State of CA Coastal Commission, Parks, Housing & Community Development Department: Carlsbad City Council, Housing-Parks-Planning Commissions & Housing Element Advisory Committee; & State of CA Coastal Commission, Parks, Housing & Community Development Department was a 26-page document with a Subject line and submitted as official Citizen public input for the Housing Element & Parks Master Plan Updates, & Draft Local Coastal Program Land Use Plan Amendment regarding 'Coastal Recreation' facts, needs, issues for Ponto Planning Area F and citywide. This document has been provided as Attachment #5.

**Subject:** Public input to Carlsbad Tomorrow Growth Management Committee Sep 22 2022 meeting; and for LCPA, Parks Master Plan Update - Parks & Open Space at Ponto-Coastal South Carlsbad

**Importance:** High

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks, Beach Preservation and Planning Commissions, , CA Coastal Commission and CA State Parks:

I was out this weekend so just had time to do a quick scan and noticed some obvious missing information and 'spin' in the staff 'report'. I hope the CTGMC can see this and the data 'cherry picking' and diversions to change subjects to "recreation land" and falsely try to count or hide Park shortfalls by trying to use other 'recreation' lands areas' as "Parks. Here is what I was able to quickly scan and note:

Citizen response and Input regarding 'Fact Sheet – Community Interest in Ponto Park'

Page

1 City falsely says "City can only acquire property from a willing seller" - this is false. The City can use legal powers emanate domain and condemnation to buy property for public purpose (Parks) unless the USA & California Constitutions have been amended to only allow acquisitions from 'willing sellers'. The Carlsbad City Council may have CHOSEEN to adopt a formal Policy/Law (or undisclosed and hidden vote) that is constraining their authority. However that City Council CHOICE does not mean the Council can CHOOSE otherwise and use legal powers emanate domain and condemnation to buy property for public purposes.

Ironically the City Council has in fact used these emanate domain and condemnation powers on behalf of the Aviara Master Plan Developer to force an "unwilling seller" to sell a sewer line easement to the City for the Aviara Master Plan Developer.

1 'Park funding only comes from the City's General Fund' - this is false. Recently the Federal government provided the City of Carlsbad \$ 3million to help fund Veterans Park. There are both Federal and State Grants and funding for Park acquisition. The City cites many other funding sources in its CIP, and like those other funding sources for Park acquisition, the City just does not list them. Also, the City has an Park land dedication Ordinance CMC 20.44 (per CA Quimby Act) that pre-dates growth management and requires developers to give the City Free land for use as a Park to meet the Park needs for that development. In fact 20.44 is where the 3 acre per 1,000 population Park Standard came from.

- 1 City fails to mention we have a 'willing seller' for 14.3 acres of vacant land at Ponto. The City cites \$35 million as the price of that land. The 2-part tax-payer Cost-benefit Analysis data files sent to you should be looked at as simply buying these 14.3 acres saves tax-payers millions and is a Better Park option. P4P can show the City and you how the City could buy this property with minimal added City tax-payer cost. There are Federal and State funding (like note above) for Park acquisition. Also ALL Developers are required to give parkland for free to the City under its Park land Dedication Ordinance 20.44 and about 1.76 acres of Ponto land would be given to the City for free to be used as a Park, or the developers would have to give the City money (pay a park-in-lieu-fee) that should be sufficient to buy 1.76 acres of Park land at Ponto.
- 1 City Budget funding is a yearly process, and future Budgets, and even most recent Council actions, will/have changed what was in prior Budgets. Buying Ponto Park actually saves tax-payer dollars as noted in the following bullets and in the 2 files sent to the CTGMC – “2022 General Comparative cost-benefits of Completing PCH-PCH Modification-Ponto Park part 1 of 2” & “City’s PCH area map w numbered notes of constraints – 2 of 2” data files. The data in these data files is from the City. As tax-payers the CTGMC should read these data files.
- 1 City wide approvals will also be needed for the "South Carlsbad Coastal Project (SCCP)" mentioned in the report. The SCCP is a \$135 million to \$150 million improvement to existing City Land and will require a City wide vote. Based on the known tax-payer Cost-Benefits of SCCP, it is not clear if votes will support this expenditure – particularly given the Citizen input the City obtained in the \$50,000 survey it conducted on the SCCP, and the Council deferring the SCCP for another year.
- 1 The staff report incompletely says 136 dwelling units are planned for one of the sites. But the report critically failed to disclose to you that Carlsbad’s General Plan Land Use Element page 2- specifically states Carlsbad’s General Plan is not adopted UNTIL the CA COASTAL COMMISIOSN (CCC) fully CERTIFIES the current City Proposed comprehensive Local Coastal Program Amendment (LCPA). The CCC will decide if to approve-deny-approve with modification the City Proposed LCPA in 2023. As provide the CTGMC the CCC has told the City ion 2016 & 2017 that based on the Need for Coastal Recreation (i.e. Public Park) and/or Low-cost Visitor Accommodations the General Plan Land Use at Ponto may change. See the “Updated 2020 Dec 2 Planning Area F existing LCP-LUP & CCC direction to City” data file sent to the CTGMC. Read the CCC’s reasons for 2010 rejection of the Ponto Vision Plan that is the basis for the 2015 General Plan.
- 1 The 2017 Sea Level Rise Impact analysis did specifically cite both acres of land impacted and the type of land use that was impacted. I can send you the report if you want. I copied key acreage and land use from the SLR Analysis in the “Sea level rise and DUPA LUPA planned loss of Open Space at Ponto data file”. This data file also shows how the City falsely exempted Ponto developers from complying with the growth management 15% Useable Open Space Standard.
- 1 City says "South Carlsbad Coastal Project (SCCP) will Create 60 acres of available space" - this is false. The 60-acres of Space already exists. The City already owns this land. The SCCP is a \$70 million (for 1-mile Manzano to Island Way segment) + \$65 to \$80 million (for 2.3 mile Island Way to La Costa Ave segment) for a total \$135 million to \$150 million project that does not buy one single square foot of new City land. Much of the City's 60-acres is already environmentally constrained by protected Habitat so will not change anything and will continue to be unusable for people use as a Park. Parks are people and Not habitat and Projected Habitat is for plants and animal and Not people. The City knows that most of these existing City owned 60-acres is not useable for people and is too narrow to be a Park. The largest part of the 60-acres is at 'the dip' in the 1-mile Manzano to Island Way segment. We ask the CTGMC to ask staff to show you a map and acreage count of that Segment, and how much acreage is planned for 1) roadway-bikeway-sidewalk, 2) Habitat, 3) useable land for people; and 4) the area that will be lost due to Sea Level Rise for each of these 3. What land uses are lost from SLR? Ask to see the same data for the existing configuration for the segment. Compare the data. Compare the total segment acres with the total 60-acres. There is no secured funding for the \$135 to \$150 million SCCP. The City could buy

3+ Ponto Parks for the cost of rearranging exiting features and adding a sidewalk on existing City land. The only missing feature to Complete" PCH in the two segments (total 3.3 miles) are some missing sidewalks/ped paths.

Enhancements to make PCH better and safer for bikes is a very good idea, but seems like can be done within the existing PCH configuration at a fraction of the cost. See the tax-payer cost-benefit Part 1 of 2 and Part 2 of 2 SCCP/PCH Relocation data files. SCCP will also require a citizen vote to approve funds, I am also hearing that Carlsbad citizens are not that supportive of SCCP. So is the SCCP are secured funded and 'countable solution' to the documented Park deficit at Ponto & Coastal South Carlsbad?

- 2 City says 2,074-acres or 8% of Carlsbad is Park and recreation land (page 2-7 of General Plan). This should be itemized and mapped as the numbers likely include golf courses (mostly private) and maybe Lago land and some Lagoon waters. The City is trying to inaccurately try to use private Recreation land as a public Park. The CTGMC is supposed to compare Park Standard to Park Standards. The City's Park Standard is fairly poor relative to Encinitas and Oceanside and many other cities, so you are being diverted from that fact.
- 2 432.4-acres of exiting Park & 519.7-acres of final Park based on 7/26/22 CC vote. This data should closely match the City's General Plan Land Use data that is the data base used in the "2022 Coastal Recreation data file" sent to you. Of critical importance to the CTGMC is to note the City is apparently saying that they will only provide a final 519.7-acres of Park in City. Yet as the CTGMC knows the City CANNOT plan for Buildout or a final population. So as population continues to grow there will be less and less parkland per 1,000 population. See the "CTGMC key issues and suggestions 2022-8-8" data/suggestion file sent to you.
- 2 in Table 2 the City did not provide the Park Acres per 1,000 for the same City selected data set. Compare Park acres to Park acres. We provided the NRPA data in the "2022 Coastal Recreation data file" we provided the CTGMC. We also provided the even more comprehensive Trust for Public Land ParkScore data that also shows Carlsbad is below average. That more comprehensive data should be considered. See also Ponto park support letter from Trust for Public Land.

CTGMC, you have a heavy burden to set Carlsbad's Growth Management Program on a fair and sustainable course to accommodate unlimited future growth as required by the State of CA. This involves fixing past errors and fixing what was unfair and setting Standard that are continually adding more parks and Open Space as Carlsbad is forced to grow.

We provided you a "CTGMC key issues and suggestions 2022-8-8" data/suggestion file that I think could help you in looking at how to set new Standards for unlimited future growth.

Thank you and Aloha Aina,  
Lance

**Subject:** Public input to Carlsbad Tomorrow Growth Management Committee Sep 22 2022 meeting; and for LCPA, Parks Master Plan Update - Parks & Open Space at Ponto-Coastal South Carlsbad

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks, Beach Preservation and Planning Commissions, , CA Coastal Commission and CA State Parks:

We ask you to please consider this email and attachments in the Sept 22<sup>nd</sup> CTGMC and subsequent Land Use, Parks and Open Space discussions by the CTGMC, LCP Amendment, PCH Relocation project, Park Master Plan Update, and development proposals at Ponto.

As always, and as we have repeatedly asked for since our initial 2017 letter to the City Council, People for Ponto Carlsbad Citizens asks for and are willing able to work with you to find the solutions for:

- the documented Park Inequity at Ponto & Coastal South Carlsbad,
- the documented missing Unconstrained Open Space at Ponto,
- the future loss of 32+ acres of Coastal Open Space (State beach and Campground) due to sea level rise,
- the needed upgrades to Carlsbad's Growth Management Program and Standards (and developer required land dedications and mitigations) to account for an Unlimited population and the need for Unlimited increases in Carlsbad Parks and Open Space to address those Unlimited populations so as to assure we maintain our quality of life,
- beneficial collaborations and donations, and
- the wiser use of tax-payer dollars to address tax-payer needs

The CTGMC and City Commission have an opportunity to do the right thing and correct the clear and obvious Park Inequity and Coastal land use Imbalance at Ponto & Coastal South Carlsbad. Please don't kick-the-can-down-the-road and fail to consider that data and your fellow Citizen desires for a better Carlsbad. P4P Carlsbad Citizens are here to help assure we sustain and enhance our quality of life for future generations. People for Ponto love deeply Carlsbad and want to assure we leave a better Carlsbad to future generations.

Sincerely and with Aloha Aina,  
Lance Schulte

**Importance:** High

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks, Beach Preservation and Planning Commissions, , CA Coastal Commission and CA State Parks:

I was out this weekend so just had time to do a quick scan and noticed some obvious missing information and 'spin' in the staff 'report'. I hope the CTGMC can see this and the data 'cherry picking' and diversions to change subjects to "recreation land" and falsely try to count or hide Park shortfalls by trying to use other 'recreation' lands areas' as "Parks. Here is what I was able to quickly scan and note:

Citizen response and Input regarding 'Fact Sheet – Community Interest in Ponto Park'

Page

1 City falsely says "City can only acquire property from a willing seller" - this is false. The City can use legal powers emanate domain and condemnation to buy property for public purpose (Parks) unless the USA & California Constitutions have been amended to only allow acquisitions from 'willing sellers'. The Carlsbad City Council may have CHOSEEN to adopt a formal Policy/Law (or undisclosed and hidden vote) that is constraining their authority. However that City Council CHOICE does not mean the Council can CHOOSE otherwise and use legal powers emanate domain and condemnation to buy property for public purposes.

Ironically the City Council has in fact used these emanate domain and condemnation powers on behalf of the Aviara Master Plan Developer to force an "unwilling seller" to sell a sewer line easement to the City for the Aviara Master Plan Developer.

1 'Park funding only comes from the City's General Fund' - this is false. Recently the Federal government provided the City of Carlsbad \$ 3million to help fund Veterans Park. There are both Federal and State Grants and funding for Park acquisition. The City cites many other funding sources in its CIP, and like those other funding sources for Park acquisition, the City just does not list them. Also, the City has an Park land dedication Ordinance CMC 20.44 (per CA Quimby Act) that pre-dates growth management and requires developers to give the City Free land for use as a Park to meet the Park needs for that development. In fact 20.44 is where the 3 acre per 1,000 population Park Standard came from.

- 1 City fails to mention we have a 'willing seller' for 14.3 acres of vacant land at Ponto. The City cites \$35 million as the price of that land. The 2-part tax-payer Cost-benefit Analysis data files sent to you should be looked at as simply buying these 14.3 acres saves tax-payers millions and is a Better Park option. P4P can show the City and you how the City could buy this property with minimal added City tax-payer cost. There are Federal and State funding (like note above) for Park acquisition. Also ALL Developers are required to give parkland for free to the City under its Park land Dedication Ordinance 20.44 and about 1.76 acres of Ponto land would be given to the City for free to be used as a Park, or the developers would have to give the City money (pay a park-in-lieu-fee) that should be sufficient to buy 1.76 acres of Park land at Ponto.
- 1 City Budget funding is a yearly process, and future Budgets, and even most recent Council actions, will/have changed what was in prior Budgets. Buying Ponto Park actually saves tax-payer dollars as noted in the following bullets and in the 2 files sent to the CTGMC – “2022 General Comparative cost-benefits of Completing PCH-PCH Modification-Ponto Park part 1 of 2” & “City’s PCH area map w numbered notes of constraints – 2 of 2” data files. The data in these data files is from the City. As tax-payers the CTGMC should read these data files.
- 1 City wide approvals will also be needed for the "South Carlsbad Coastal Project (SCCP)" mentioned in the report. The SCCP is a \$135 million to \$150 million improvement to existing City Land and will require a City wide vote. Based on the known tax-payer Cost-Benefits of SCCP, it is not clear if votes will support this expenditure – particularly given the Citizen input the City obtained in the \$50,000 survey it conducted on the SCCP, and the Council deferring the SCCP for another year.
- 1 The staff report incompletely says 136 dwelling units are planned for one of the sites. But the report critically failed to disclose to you that Carlsbad’s General Plan Land Use Element page 2- specifically states Carlsbad’s General Plan is not adopted UNTIL the CA COASTAL COMMISIOSN (CCC) fully CERTIFIES the current City Proposed comprehensive Local Coastal Program Amendment (LCPA). The CCC will decide if to approve-deny-approve with modification the City Proposed LCPA in 2023. As provide the CTGMC the CCC has told the City ion 2016 & 2017 that based on the Need for Coastal Recreation (i.e. Public Park) and/or Low-cost Visitor Accommodations the General Plan Land Use at Ponto may change. See the “Updated 2020 Dec 2 Planning Area F existing LCP-LUP & CCC direction to City” data file sent to the CTGMC. Read the CCC’s reasons for 2010 rejection of the Ponto Vision Plan that is the basis for the 2015 General Plan.
- 1 The 2017 Sea Level Rise Impact analysis did specifically cite both acres of land impacted and the type of land use that was impacted. I can send you the report if you want. I copied key acreage and land use from the SLR Analysis in the “Sea level rise and DUPA LUPA planned loss of Open Space at Ponto data file”. This data file also shows how the City falsely exempted Ponto developers from complying with the growth management 15% Useable Open Space Standard.
- 1 City says "South Carlsbad Coastal Project (SCCP) will Create 60 acres of available space" - this is false. The 60-acres of Space already exists. The City already owns this land. The SCCP is a \$70 million (for 1-mile Manzano to Island Way segment) + \$65 to \$80 million (for 2.3 mile Island Way to La Costa Ave segment) for a total \$135 million to \$150 million project that does not buy one single square foot of new City land. Much of the City's 60-acres is already environmentally constrained by protected Habitat so will not change anything and will continue to be unusable for people use as a Park. Parks are people and Not habitat and Projected Habitat is for plants and animal and Not people. The City knows that most of these existing City owned 60-acres is not useable for people and is too narrow to be a Park. The largest part of the 60-acres is at 'the dip' in the 1-mile Manzano to Island Way segment. We ask the CTGMC to ask staff to show you a map and acreage count of that Segment, and how much acreage is planned for 1) roadway-bikeway-sidewalk, 2) Habitat, 3) useable land for people; and 4) the area that will be lost due to Sea Level Rise for each of these 3. What land uses are lost from SLR? Ask to see the same data for the existing configuration for the segment. Compare the data. Compare the total segment acres with the total 60-acres. There is no secured funding for the \$135 to \$150 million SCCP. The City could buy

3+ Ponto Parks for the cost of rearranging exiting features and adding a sidewalk on existing City land. The only missing feature to Complete" PCH in the two segments (total 3.3 miles) are some missing sidewalks/ped paths.

Enhancements to make PCH better and safer for bikes is a very good idea, but seems like can be done within the existing PCH configuration at a fraction of the cost. See the tax-payer cost-benefit Part 1 of 2 and Part 2 of 2 SCCP/PCH Relocation data files. SCCP will also require a citizen vote to approve funds, I am also hearing that Carlsbad citizens are not that supportive of SCCP. So is the SCCP are secured funded and 'countable solution' to the documented Park deficit at Ponto & Coastal South Carlsbad?

2 City says 2,074-acres or 8% of Carlsbad is Park and recreation land (page 2-7 of General Plan). This should be itemized and mapped as the numbers likely include golf courses (mostly private) and maybe Lago land and some Lagoon waters. The City is trying to inaccurately try to use private Recreation land as a public Park. The CTGMC is supposed to compare Park Standard to Park Standards. The City's Park Standard is fairly poor relative to Encinitas and Oceanside and many other cities, so you are being diverted from that fact.

2 432.4-acres of exiting Park & 519.7-acres of final Park based on 7/26/22 CC vote. This data should closely match the City's General Plan Land Use data that is the data base used in the "2022 Coastal Recreation data file" sent to you. Of critical importance to the CTGMC is to note the City is apparently saying that they will only provide a final 519.7-acres of Park in City. Yet as the CTGMC knows the City CANNOT plan for Buildout or a final population. So as population continues to grow there will be less and less parkland per 1,000 population. See the "CTGMC key issues and suggestions 2022-8-8" data/suggestion file sent to you.

2 in Table 2 the City did not provide the Park Acres per 1,000 for the same City selected data set. Compare Park acres to Park acres. We provided the NRPA data in the "2022 Coastal Recreation data file" we provided the CTGMC. We also provided the even more comprehensive Trust for Public Land ParkScore data that also shows Carlsbad is below average. That more comprehensive data should be considered. See also Ponto park support letter from Trust for Public Land.

CTGMC, you have a heavy burden to set Carlsbad's Growth Management Program on a fair and sustainable course to accommodate unlimited future growth as required by the State of CA. This involves fixing past errors and fixing what was unfair and setting Standard that are continually adding more parks and Open Space as Carlsbad is forced to grow.

We provided you a "CTGMC key issues and suggestions 2022-8-8" data/suggestion file that I think could help you in looking at how to set new Standards for unlimited future growth.

Thank you and Aloha Aina,  
Lance

**Subject:** Public Input for 2022-Oct CTGMC regarding the 9/22/22 meeting & to be provided to the Carlsbad City Council and Parks, Planning and Beach Preservation Commissions as citizen communications

**Importance:** High

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks, Planning and Beach Preservation Commissions, and CA Coastal Commission and CA State Parks:

I apologize for the directness of this email; but standing up for truth and facts can only be done with directness. It is also important that the CA Coastal Commission knows if CA Coastal Act and Coastal Land Use issues are not being truthfully communicated by the City to Carlsbad Citizens.

The CTGMC is creating Council recommendations for new land use plans regarding Park and Open Space in CA Coastal Zone in Carlsbad.

Coastal Recreation (i.e. Public Parks), protection of Coastal Habitats, and providing State Park Coastal Camping access are high-priorities of the CA Coastal Act; and are considered High-Priority land uses that need to forever adequately provided Carlsbad's Proposed Local Coastal Program Amendment & in CTGMC's in creating new Park & Open Space Standards in Carlsbad's Coastal Zone.

I was deeply troubled that on 9/22/22 Jeff Graham, Carlsbad Community Development Director said what appears to be a misstatement of facts to the CTGMC regarding the current Local Coastal Program (LCP) and City Proposed Local Coastal Program Amendment AND Jeff's failure to disclose the CA Coastal Commission's (CCC) very clear communication to the City on 2016-2017 on what is the current and possible land use plan for Ponto. Carlsbad's Ponto Vision Plan-General Plan-Master Plans-Zoning Codes are not valid/approved until the CA Coastal Commission Certifies them as being consistent with the CA Coastal Act and Policies. CA Coastal Act status is a primary land use fact and Carlsbad's General Plan clearly states this on page 2-7. Please Read the paragraph on General Plan page 2-7.

Jeff, as I heard it, made a false statement to the CTGMC that ALL the land use planning at Ponto Planning Area F was already completely done and no changes to can/need to be made. This is clearly false as the City is currently proposing an LCP Amendment to the CCC that includes significant changes to Ponto Planning Area F land use policy and zoning standards. Jeff is misrepresenting facts to Citizens, like what was done during the developers/City Ponto Vision Plan and General Plan Update. City staff misrepresentation of the facts to Citizens corrupts the Public Input Process, and in itself

is a violation of the CA Coastal Act. This misrepresentation of facts is why decision making at Ponto has been so messed up. The City by withholding key Ponto facts from Citizens seems to be trying to mislead Citizens so developer proposed land use changes can be pushed through. Over 50 Official Carlsbad Public Records Requests and the data/lack of data the City provided seem to support this concern about honesty.

PLEASE READ the 2 Attached Data Files!

To refute Jeff's apparent inaccurate statement to the CTGMC on 9/22/22, The CA Coastal Commission has provided very clear communication to the City on the future potential Coastal land use plan at Ponto:

7/3/17 CCC letter to City of Carlsbad Staff on the City's proposed land use changes at Planning Area F. City Staff only for the 1st time provided this to City Council on 1/28/20:

***"The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto/Southern Waterfront area. For example, Planning Area F requires the city and developer to consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad. This is an issue that the San Pacifico HOA community group is raising in regards to the Shopoff/Ponto development proposal, and this study should be undertaken as a part of the visitor serving use inventory analysis described above. If this analysis determines that there is a deficit of low cost visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed."***

8/16/2017 CCC email to Carlsbad Citizens said:

***"The City is currently undertaking a comprehensive update to their LCP funded in part through a CCC grant. As a part of this process the City will be consolidating all previous LCP segments into a single, unified LCP. The City has received direction from both the Commission (May 2016 CCC hearing) and Commission staff, that as a part of this update the City shall undertake an inventory of visitor serving uses currently provided within the City's Coastal Zone which will then serve to inform updates to the City's land use and zoning maps as necessary. This inventory could have future implications for the appropriate land use and zoning associated with the Ponto area."***

The CTGMC should not use false statements (9/22/22), excuses and dubious work-arounds to try to wiggle out of the responsibility to properly address the clear and obvious current higher-residential densities, and significant Park and Open Space shortfalls at Ponto/Coastal South Carlsbad. The CTGMC, Carlsbad City Council and Parks, Planning & Beach Preservation Committees it seems have an ethical, moral and generational responsibility to correct the well documented Park & Open Space shortfalls (City's past land use planning & Growth Management Plan Standard mistakes) at Ponto, and Coastal land use plan for more loss of these land uses due to sea level rise.

Thank you,  
Lance Schulte

## **Sea Level Rise and Carlsbad's DLCP-LUPA's projected/planned Loss of Open Space at Ponto**

### **Introduction:**

Carlsbad first documented Sea Level Rise (SLR) and associated increases in coastal erosion in a December 2017 Sea Level Rise Vulnerability Assessment (2017 SLR Assessment). Prior planning activities (2010 Ponto Vision Plan – rejected by CA Coastal Commission, and 2015 General Plan Update) did not consider SLR and how SLR would impact Coastal Open Space Land Use & CA Coastal Act 'High-Priority' Coastal Open Space Land Uses at Ponto. The 2017 SLR Assessment shows Open Space land and Open Space Land Uses are almost exclusively impacted by SLR at Ponto & South Coastal Carlsbad. The 2017 SLF Assessment also shows significant LOSS of Open Space land acreage and Land Uses. Most all impacted Open Space Land Uses are CA Coastal Act "High-Priority Coastal Land Uses" – Coastal Recreation (i.e. Public Park) and Low-Cost Visitor Accommodations. Existing Ponto Open Space Land Uses are already very congested (non-existent/narrow beach) and have very high, almost exclusionary, occupancy rates (Campground) due to existing population/visitor demands. Future population/visitor increases will make this demand situation worst. The significant permanent LOSS of existing Coastal Open Space land and Coastal Open Space Land Use (and land) due to SLR reduces existing supply and compounds Open Space congestion elsewhere. Prior Ponto planning did not consider, nor plan, for significant SLR and current/future "High-Priority" Coastal Open Space Land Use demands.

### **Open Space and City Park demand at Ponto:**

Open Space at Ponto is primarily 'Constrained' as defined by the City's Growth Management Program (GMP), and cannot be counted in meeting the City's minimal 15% 'Unconstrained' GMP Open Space Standard. Per the GMP Open Space Standard, the developers of Ponto should have provided in their developments at least 30-acres of additional 'Unconstrained' GMP Open Space at Ponto. City GIS mapping data confirm 30-acres of GMP Standard Open Space is missing at Ponto (Local Facilities Management Plan Zone 9).

The City of Carlsbad GIS Map on page 2 shows locations of Open Spaces at Ponto. This map and its corresponding tax parcel-based data file document Ponto's non-compliance with the GMP Open Space Standard. A summary of that City GIS data file is also on page 2. The City said Ponto's non-compliance with the GMP Open Space Standard was 'justified' by the City 'exempting' compliance with the Standard. The City 'justified' this 'exemption' for reasons that do not appear correct based on the City's GIS map and data on page 2, and by a review of 1986 aerial photography that shows most of Ponto as vacant land. The City in the Citywide Facilities Improvement Plan (CFIP) said 1) Ponto was already developed in 1986, or 2) Ponto in 1986 already provided 15% of the 'Unconstrained' land as GMP Standard Open Space. Both these 'justifications' for Ponto 'exemption' in the CFIP were not correct. The legality of the City 'exempting' Ponto developers from the GMP Open Space Standard is subject to current litigation.

The City proposes to continue to exempt future Ponto developers from providing the missing 30-acres of minimally required GMP Open Space, even though a change in Ponto Planning Area F land use from the current 'Non-Residential Reserve' Land Use requires comprehensive Amendment of the Local Facilities Management Plan Zone 9 to account for a land use change. City exemption is subject of litigation.

Ponto (west of I-5 and South of Poinsettia Lane) currently has 1,025 homes that per Carlsbad's minimal Park Standard demand an 8-acre City Park. There is no City Park at Ponto. Coastal Southwest Carlsbad has an over 6.5 acre Park deficit that is being met 6-miles away in NW Carlsbad. Ponto is in the middle of 6-miles of Coastline without a City Coastal Park west of the rail corridor.

### City GIS map of Ponto's (LFMP Zone 9) Open Space:

- Light green areas meet the City's 15% unconstrained Growth Management Program Open Space Standard
- Most Ponto Open Space (pink hatch & blue [water] on map) is "Constrained" and does not meet the Standard
- **Aviara - Zone 19, Ponto - Zone 9 and Hanover/Poinsettia Shores – Zone 22 all developed around the same time and had similar vacant lands.**
- **City required Aviara - Zone 19 east of Ponto to provide the 15% Standard Open Space. Why not Ponto? Aviara had the same lagoon waters.**
- **City required Hanover & Poinsettia Shores area Zone 22 just north of Ponto to provide the 15% Standard Open Space. Why not Ponto?**
- Why Ponto developers were never required to comply with the 15% Standard Open Space is subject to current litigation
- Below is City GIS data from this map

### City GIS map data summary of the 15% Growth Management Standard Open Space at Ponto

472 Acres  
(197 Acres)  
 275 Acres  
X 15%  
 41 Acres  
(11 Acres)  
**30 Acres**

Total land in LFMP Zone 9 [Ponto]  
 Constrained land excluded from GMP Open Space  
 Unconstrained land in LFMP Zone 9 [Ponto]  
 GMP Minimum Unconstrained Open Space requirement  
 GMP Minimum Unconstrained Open Space required  
 GMP Open Space provided & mapped per City GIS data  
**Missing Unconstrained Open Space needed in LFMP Zone 9 [Ponto] to meet the City's minimum GMP Open Space Standard per City's GIS map & data**

**73% of the City's minimum 15% required Open Space Standard is missing due to over development of LFMP Zone 9 [Ponto]**

### **Sea Level Rise impacts on Open Space and Open Space Land Use Planning at Ponto:**

The City's 2015 General Plan Update did not factor in the impacts of Sea Level Rise (SLR) on Ponto's Open Space land. In December 2017 the City conducted the first Sea Level Rise Vulnerability Assessment <https://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=33958>. The 2017 SLR Assessment is an initial baseline analysis, but it shows significant SLR impacts on Ponto Open Space. More follow-up analysis is being conducted to incorporate newer knowledge on SLR projections and coastal land erosion accelerated by SLR. Follow-up analysis may likely show SLR impacts occurring sooner and more extreme.

Troublingly the 2017 SLR Assessment shows SLR actually significantly reducing or eliminating Open Space land at Ponto. SLR is projected to only impact and eliminate Open Space lands and Open Space Land Use at Ponto. The loss of Ponto Open Space land and Land Use being at the State Campground, Beaches, and Batiquitos Lagoon shoreline. The losses of these Open Space lands and land uses would progress over time, and be a permanent loss. The 2017 SLR Assessment provides two time frames near-term 2050 that match with the Carlsbad General Plan, and the longer-term 'the next General Plan Update' time frame of 2100. One can think of these timeframes as the lifetimes of our children and their children (2050), and the lifetimes of our Grandchildren and their children (2100). SLR impact on Coastal Land Use and Coastal Land Use planning is a perpetual (permanent) impact that carries over from one Local Coastal Program (LCP) and City General Plan (GP) to the next Updated LCP and GP.

Following (within quotation marks) are excerpts from Carlsbad's 2017 Sea Level Rise Vulnerability Assessment:

*[Italicized text within brackets]* is added data based on review of aerial photo maps in the Assessment.

"Planning Zone 3 consists of the Southern Shoreline Planning Area and the Batiquitos Lagoon. Assets within this zone are vulnerable to inundation, coastal flooding and bluff erosion in both planning horizons (2050 and 2100). A summary of the vulnerability assessment rating is provided in Table 5. A discussion of the vulnerability and risk assessment is also provided for each asset category.

#### 5.3.1. Beaches

Approximately 14 acres of beach area is projected to be impacted by inundation/erosion in 2050. ... Beaches in this planning area are backed by unarmored coastal bluffs. Sand derived from the natural erosion of the bluff as sea levels rise may be adequate to sustain beach widths, thus, beaches in this reach were assumed to have a moderate adaptive capacity. The overall vulnerability rating for beaches is moderate for 2050.

Vulnerability is rated moderate for the 2100 horizon due to the significant amount of erosion expected as the beaches are squeezed between rising sea levels and bluffs. Assuming the bluffs are unarmored in the future, sand derived from bluff erosion may sustain some level of beaches in this planning area. A complete loss of beaches poses a high risk to the city as the natural barrier from storm waves is lost as well as a reduction in beach access, recreation and the economic benefits the beaches provide.

#### 5.3.3. State Parks

A majority of the South Carlsbad State Beach day-use facilities and campgrounds (separated into four parcels) were determined to be exposed to bluff erosion by the 2050 sea level rise scenario (moderate exposure). This resource is considered to have a high sensitivity since bluff erosion could significantly impair usage of the facilities. Though economic impacts to the physical structures within South Carlsbad State Beach would be relatively low, the loss of this park would be significant

since adequate space for the park to move inland is not available (low adaptive capacity). State parks was assigned a high vulnerability in the 2050 planning horizon. State park facilities are recognized as important assets to the city in terms of economic and recreation value as well as providing low-cost visitor serving amenities. This vulnerability poses a high risk to coastal access, recreation, and tourism opportunities in this planning area.

In 2100, bluff erosion of South Carlsbad State Beach day-use facilities and campgrounds become more severe and the South Ponto State Beach day-use area becomes exposed to coastal flooding during extreme events. The sensitivity of the South Ponto day-use area is low because impacts to usage will be temporary and no major damage to facilities would be anticipated. Vulnerability and risk to State Parks remains high by 2100 due to the impacts to South Carlsbad State Beach in combination with flooding impacts to South Ponto.

Table 5: Planning Zone 3 Vulnerability Assessment Summary [condensed & notated]:

<u>Asset Category</u>	<u>Horizon [time]</u>	<u>Hazard Type</u>	<u>Impacted Assets</u>	<u>Vulnerability Rating</u>
Beaches	2050	Inundation/Erosion, Flooding	<b>14 acres</b> (erosion)	Moderate
	2100	Inundation/Erosion, Flooding	<b>54 acres</b> (erosion)	Moderate
Public Access	2050	Inundation, Flooding	6 access points <b>4,791 feet of trails</b>	Moderate
	2100	Inundation, Flooding	10 access points <b>14,049 feet of trails</b>	Moderate
State Parks <i>[Campground - Low-cost Visitor Accommodations]</i>	2050	Flooding, Bluff Erosion	4 parcels [ <b>&lt;18 Acres</b> ]	High
	2100	Flooding, Bluff Erosion	4 parcels [ <b>&gt;18 Acres</b> ] <i>[loss of over 50% of the campground &amp; its Low-cost Visitor Accommodations, See Figure 5.]</i>	High
Transportation (Road, Bike, Pedestrian)	2050	Bluff Erosion	<b>1,383 linear feet</b>	Moderate
	2100	Flooding, Bluff Erosion	<b>11,280 linear feet</b>	High
Environmentally Sensitive Lands	2050	Inundation, Flooding	<b>572 acres</b>	Moderate
	2100	Inundation, Flooding	<b>606 acres</b>	High

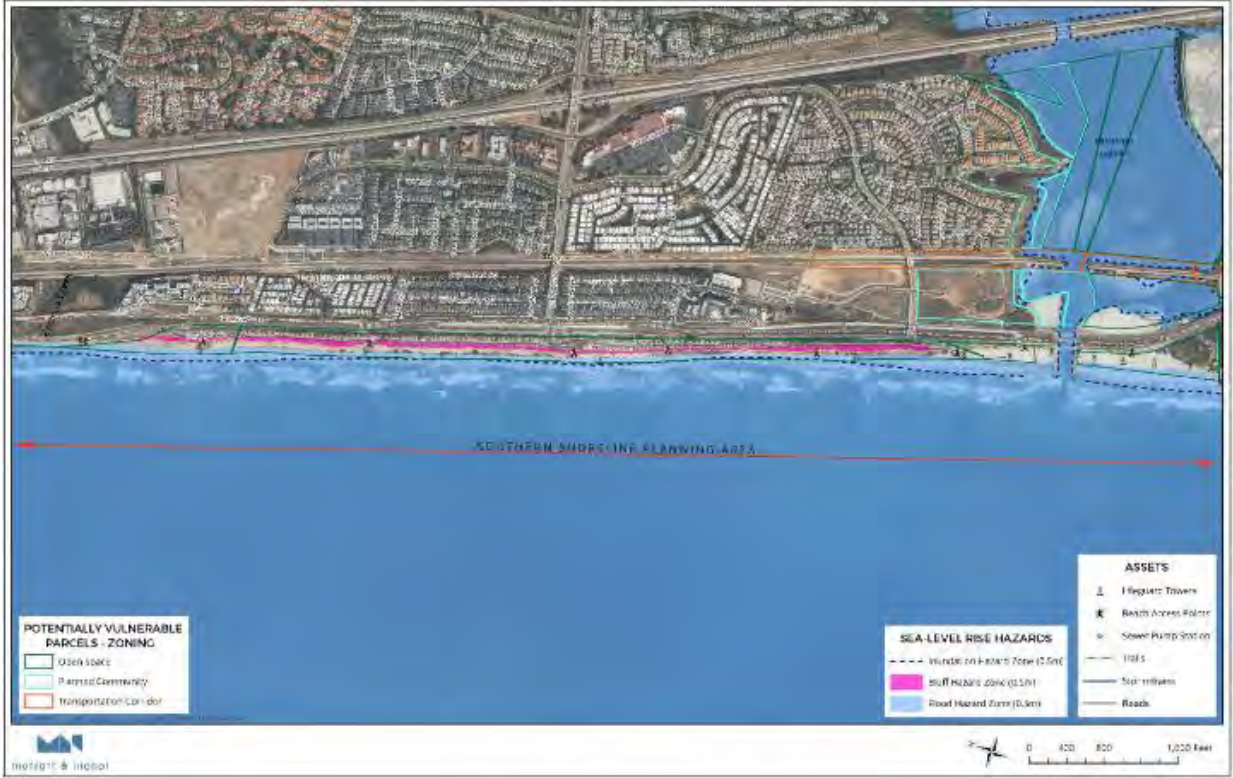

Figure 7: Southern Shoreline Planning Area – Year 2050

Figure 5: CoSMoS Bluff Erosion Projections by 2100  
(CoSMoS-COAST 2015)

[Figure 5 show the loss of over 50% of the campground and campground sites with a minimal .2 meter Sea Level Rise (SLR), and potentially the entire campground (due to loss of access road) in 2 meter SLF.]”

**Directions to analyze and correct current and future LOSS of Coastal Open Space Land Use at Ponto**

On July 3, 2017 the CA Coastal Commission provided direction to Carlsbad stating:

“The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto ... area. For example, Planning Area F requires the city and developer to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e., public park) on the west side of the railroad. ... this study should be undertaken as a part of the visitor serving use inventory analysis described above. If this analysis determines that there is a deficit of low cost visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed.”

Official Carlsbad Public Records Requests (PRR 2017-260, et. al.) confirmed Carlsbad’s Existing LCP and its Ponto specific existing LUP polices and Zoning regulations were never followed in the City’s prior Ponto planning activities (i.e. 2010 Ponto Vision Plan & 2015 General Plan Update). The projected SLR loss of recreation (beach) and low-cost visitor accommodations (campground) at Ponto should factor in this Existing LCP required analysis, and a LCP-LUP for Ponto and Ponto Planning Area F.

In a February 11, 2020 City Council Staff Report City Staff stated:

“On March 14, 2017, the City Council approved the General Plan Lawsuit Settlement Agreement (Agreement) between City of Carlsbad and North County Advocates (NCA). Section 4.3.15 of the Agreement requires the city to continue to consider and evaluate properties for potential acquisition of open space and use good faith efforts to acquire those properties.”

In 2020 NCA recommended the City acquire Ponto Planning Area F as Open Space. The status of City processing that recommendation is unclear. However the Lawsuit Settlement Agreement and NCA's recommendation to the City should also be considered in the required Existing LCP analysis.

**Summary:**

Tragically Carlsbad's Draft Local Coastal Program – Land Use Plan Amendment (DLCP-LUPA) is actually planning to both SIGNIFICANTLY REDUCE Coastal Open Space acreage, and to eliminate 'High-Priority Coastal Open Space Land Uses at Ponto due to SLR.

The Existing LCP requirements for Ponto Planning Area F to analyze the deficit of Coastal Open Space Land Use should factor in the currently planned LOSS of both Coastal Open Space acreage and Coastal Open Space Land Uses at Ponto due to SLR. As a long-range Coastal Land Use Plan this required LCP analysis needs to also consider the concurrent future increases in both population and visitor demand for those LOST Coastal Open Space acres and Coastal Open Space Land Uses.

It is very troubling that demand for these CA Coastal Act 'High-Priority' Coastal Open Space Land Uses is increasing at the same time the current (near/at capacity) supply of these CA Coastal Act 'High-Priority' Coastal Open Space Land Uses is significantly decreasing due to SLR. Instead of planning for long-term sustainability of these CA Coastal Act 'High-Priority' Coastal Open Space Land Uses for future generations there appears to be a plan to use SLR and inappropriate (lower-priority residential) Coastal Land Use planning to forever remove those CA Coastal Act 'High-Priority' Coastal Open Space Land Uses from Ponto. CA Coastal Act Policies to address these issues should be thoroughly considered.

2021-2 proposed Draft Local Coastal Program – Land Use Plan Amendment (DLCP-LUPA) will likely result in City and CA Coastal Commission making updates to the 2015 General Plan, based on the existing Ponto Planning Area F LCP – LUP Policy requirements, Ponto Open Space issues, high-priority Coastal Land Use needs, and SLR issues not addressed in the 2015 General Plan.

City Staff's comparison of Ponto Planning Area F's existing v. Carlsbad proposed LCP LUP Policy below is not fully correct. The table below is from City of Carlsbad. The last paragraph of the Existing LCP notes "prior to any planning activity". **This "prior to any planning activity" was newer done as documented by official Carlsbad Public Records Requests 2017-260, 2017-262, R000930-072419, R001280-021720, and R001281-02170.** So the City's "General Plan update" (of just the land use map) was done in violation of the Existing LCP LUP Policy – one of the City's Ponto planning mistakes. Citizens repeatedly asked in the above official Public Records Request to see the City's evidence of City compliance with Planning Area F's Existing LCP LUP Policy. The City responded with: "... you are asking the City to answer questions about information not found in the documents of existence provided. The City is unable to assist you in this manner. ... " There is no evidence that the City during both the Ponto Vision Plan and General Pan Update planning efforts informed Citizens of Planning Area F's Existing LCP LUP Policy. Hiding information prevented Citizens knowing about the policy and providing informed input. No evidence shows the City ever complied with the requirements of the Policy. The Ponto Vision Plan and General Plan Update planning efforts were thus flawed, and counter to the LCP and CA Coastal Act.

As noted in 1-5 below, the CCC has noted these mistakes dating back to 2010 with the "Ponto Beachfront Village Vision Plan" and 2015 General Plan map, and is seeking to correct them in the 2016 and 2017 communications to the City. Also some of the City's own documents verify these facts.

HOW THE EXISTING CITY OF CARLSBAD LOCAL COASTAL PROGRAM (LCP) POLICIES ARE ADDRESSED IN THE DRAFT LOCAL COASTAL PROGRAM UPDATE

Row	EXISTING LCP POLICIES	HOW DRAFT LCP ADDRESSES EXISTING LCP POLICIES
	<b>WEST BATIQUITOS LAGOON/SAMMIS PROPERTIES SEGMENT</b>	
282	<p>10. Planning Area F</p> <p>Planning Area F is located at the far northwest corner of the Master Plan area west of the AT&amp;SF Railway right-of-way. This Planning Area has a gross area of 11 acres and a net developable area of 10.7 acres.</p> <p>Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an "unplanned" area, for which land uses will be determined at a later date when more specific planning is carried out for areas west of the railroad right-of-way. A future Major Master Plan Amendment will be required prior to further development approvals for Planning Area F, and shall include an LCP Amendment with associated environmental review, if determined necessary.</p> <p>The intent of the NRR designation is not to limit the range of potential future uses entirely to non-residential, however, since the City's current general plan does not contain an "unplanned" designation, NRR was determined to be appropriate at this time. In the future, if the Local Coastal Program Amendment has not been processed, and the City develops an "unplanned" General Plan designation, then this site would likely be redesignated as "unplanned." Future uses could include, but are not limited to: commercial, residential, office, and other uses, subject to future review and approval.</p> <p>As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.</p>	<p>As part of the General Plan update, the Coastal Commission approved residential and general commercial land use designations on the LCP land use map.</p> <p>This policy is updated to be consistent with the land use map designations and the Ponto Beachfront Village Vision Plan. See draft LCP policy LCP-2-P.20.A and B.</p> <p>Regarding the need for lower cost visitor accommodations or recreational facilities west of the railroad, analysis and documentation will be provided in the staff report to the Planning Commission.</p>

CCC direction on why Draft LCP description is not accurate:

During the Jan 28, 2020 City Council Meeting (item #14), Carlsbad City staff for the first time as a side-bar comment admitted the City made some 'Ponto planning errors' going back over 15 years. Those City planning errors were first called out when the CA Coastal Commission (CCC) denied Carlsbad's Ponto Beachfront Village Vision Plan (the referenced foundation for Carlsbad's 2015 General Plan Update) in

2010 in part due to the City's mistake. Following are 4 documents that conflict with the above City Staff interpretation of how the Draft LCP addresses Existing LCP Polies.

- 1) The CCC in denying in 2010 the Ponto Vision Plan (the foundation for Carlsbad's 2015 General Plan Update at Ponto) specifically said with direct reference to Ponto Planning Area F:

**"Currently, this area [Planning Area F] has an Unplanned Area land use designation. In order to facilitate any type of development in this portion of the Ponto area, an LCP amendment modifying the land use will have to be brought forward to the Commission for review and approval."**

**"... the Commission would reject such proposed uses because there has been no evidence presented that would support the elimination of these [Planning Area F] areas for some lower cost overnight accommodations or public recreational amenities in the future. The Commission's past action of the Poinsettia Shores Master Plan specifically called for such an assessment, and none has been submitted to date. The concerns related to the lack of lower cost overnight accommodations in Area F (ref. Exhibit #7) are further discussed in the findings later."**

**"City is inadvertently sending a message to potential developers that 1) the identified development (townhouses) is the primary type of use the City will support, or 2) that development type is consistent with the current land use and zoning designations. Neither of those assumptions is correct. As the previously certified Poinsettia Shores Master Plan states, any type of development at this location would first require an LCP amendment to establish the land use and zoning, which would have to be certified by both the City and the Coastal Commission. Additionally, the Master Plan further states that some component of the development at this location must consider the need for the provision of lower cost accommodations or recreational facilities."**

**"While residential use is one of the land uses listed for this area in the Poinsettia Shores Specific Plan, it may not be the most appropriate designation. As previously stated, the project will at least need to consider the incorporation of some kind of lower cost accommodations, and any proposed zoning designation for the site will have to be found consistent with the policies contained in the Poinsettia Shores Master Plan. Furthermore, the standard of review for any change to the current land use designation is the Coastal Act, and thus will also have to be found consistent with all its applicable policies."**

**Recently, the Commission has become concerned with the lack of lower-cost accommodations statewide. Thus, the establishment of a residential land use at this location may not be what is ultimately determined to be certified as consistent with the Poinsettia Shores Master Plan, or the Coastal Act."**

**B. High-Priority Uses - Lower Cost Visitor Accommodations in 'Area F': The Coastal Act has numerous policies promoting public access to the beach and state:**

Section 30210 - In carrying out the requirement of Section 4 of Article X of the California Constitution, maximum access, which shall be conspicuously posted, and **recreational opportunities**

**shall be provided for all the people** consistent with public safety needs and the need to protect public rights, rights of private property owners, and natural resource areas from overuse.

Section 30213 - Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. **Developments providing public recreational opportunities are preferred.** The commission shall not: (1) require that overnight room rentals be fixed at an amount certain for any privately owned and operated hotel, motel, or other similar visitor-serving facility located on either public or private lands; or (2) establish or approve any method for the identification of low or moderate income persons for the purpose of determining eligibility for overnight room rentals in any such facilities.

Section 30221 **Oceanfront land suitable for recreational use shall be protected for recreational use and development unless present and foreseeable future demand for public or commercial recreational activities that could be accommodated on the property is already adequately provided for in the area.**

Section 30222 - **The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development, but not over agriculture or coastal-dependent industry."**

"... in 1996, the Poinsettia Shores Master Plan was certified as part of the City's LCP, and replaced the [Visitor serving] land use designation as an "Unplanned Area." **In an attempt to maintain a lower-cost visitor-serving component at this location, the Commission, through a suggested modification, required language within the Master Plan that would serve to protect this type of use.** The language in the Poinsettia Shores Master Plan, for this location, "Area F," included: **As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost accommodations or recreational facilities (i.e. public park) on the west side of the railroad."**

"**The Ponto Beachfront area is an area that could be considered as a high-priority location for lower cost overnight accommodations.** While located across the street from a State Park (South Carlsbad State Park) containing camping facilities, **during peak summer months, the campground is consistently at capacity. ... If at any time in the future, this State Beach campground is converted to day use sites, the market and the need for low cost overnight accommodations will be significantly amplified. Thus the Vision Plan, as proposed by the City, cannot be found consistent with the Coastal Act."**

"H. Conclusions: ... **concerns regarding the determination of preferred land uses in an 'unplanned' area, the lack of provision of lower-cost accommodations and recreational uses, ... remain. All of these oversights could result in impacts to public access and recreation and other coastal resources and, therefore, the Vision Plan, as submitted, is therefore inconsistent with the Coastal Act, and therefore, shall be denied as submitted."**

- 2) Following is from a 7/3/17 CCC letter to City Staff on the City's proposed land use changes at Planning Area F. City Staff for the 1<sup>st</sup> time provided this to City Council on 1/28/20:

**“The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto/Southern Waterfront area. For example, Planning Area F requires the city and developer to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad. This is an issue that the San Pacifico HOA community group is raising in regards to the Shopoff/Ponto development proposal, and this study should be undertaken as a part of the visitor serving use inventory analysis described above. If this analysis determines that there is a deficit of low cost visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed.”**

- 3) In 2017 after citizens received the City's reply to Public Records Request 2017-260, citizens meet with CCC staff to reconfirm the City failed since before 2010 to publicly disclose and comply with Planning Area F's LCP requirements. CCC Staff acknowledged the City has not yet complied with the LCP and in an 8/16/2017 email said:

**“The City is currently undertaking a comprehensive update to their LCP funded in part through a CCC grant. As a part of this process the City will be consolidating all previous LCP segments into a single, unified LCP. The City has received direction from both the Commission (May 2016 CCC hearing) and Commission staff, that as a part of this update the City shall undertake an inventory of visitor serving uses currently provided within the City's Coastal Zone which will then serve to inform updates to the City's land use and zoning maps as necessary. This inventory could have future implications for the appropriate land use and zoning associated with the Ponto area.”**

- 4) In 2016, the CCC told City that Carlsbad's proposed 2015 General Plan land use map could change based on the outcomes of both a Citywide Coastal Recreation needs Study, and also the specific Planning Area F LCP requirement to study Park needs at Ponto.
- 5) Currently and since 2016 the City acknowledged that the existing LCP, City and LCP Master Plan Zoning of “Non-Residential Reserve” land use needs to be changed by BOTH the City and CA Coastal Commission to only then allow any proposed development on Ponto Planning Area F. Also, since 1996 the Local Facilities Management Plan for Zone 9 (Ponto) has the planned land use and zoning of Ponto Planning Area F as “Non-Residential Reserve” that has no land use. The LFMP-Zone 9 must be amended to account for any City and CA Coastal Commission change from “Non-Residential Reserve” and address the land use impacts on all the Growth Management Program Facility

Standards in Zone9 such as the current Park deficit, and also the recently discovered false exemption of the Open Space Standard in Zone 9. The false exemption being that Zone 9 was not developed in 1986 nor have the land use changes since 1986 complied with the 15% 'unconstrained' Open Space Standard.

The City currently and since 2016 acknowledges the existing LCP, City and LCP Master Plan Zoning of "Non-Residential Reserve" land use of Ponto Planning Area F needs to be changed by BOTH the City and CA Coastal Commission as evidenced on page 14-15 of City's Planning Pending Applications as of November 2020 at <https://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=46332> as it shows:

"PONTO BEACHFRONT 12/20/2016

<u>Legislative application</u>	<u>applied on</u>	<u>description</u>
AMEND2017-0001 [LU Change]	1/19/17	LFMP AMENDMENT FOR ZONE 9
LCPA2016-0002 [LCP Change]	12/20/16	USES PROPOSED FOR PLANNING AREA F
MP2016-0001 [Zone Change]	12/20/16	USES PROPOSED FOR PLANNING AREA F

– Carlsbad City Planner = Goff"

The City is apparently failing to fully disclose to Citizens these facts and the City's prior "Ponto Planning Area F planning mistakes dating back over 10-years when the land was purchased by speculative investors.

For the City's and CA Coastal Commission's Public Participation process to function Carlsbad Citizens need to have these facts, so they are properly informed.

The overwhelming Citizen input on the need for and request the City provide Ponto Coastal Park comes from Citizens slowly in 2017 becoming aware of the City's prior Ponto Planning Area F planning mistakes and asking the City to acknowledge and correct those mistakes.

**Subject:** CTGMC 2022-10-12 meeting Public Input follow-up & Public input to Carlsbad LCPA, Parks Master Plan Update, & Growth Management Program Update — 10 minute Park standard & images of Park need at Ponto

**Importance:** High

Dear Carlsbad Council, Carlsbad Parks and Planning Commission, Carlsbad Tomorrow Growth Management Committee, and CA Coastal Commission and CA State Parks:

Please include this email/attached images as public input to the Council and Citizen Committees/Commissions regarding the 10/12/22 CTGMC meeting, the City's proposed Park Master Plan Update, City's proposed Housing Element Land Use changes at Ponto – Ponto Site 18, and City's and CA Coastal Commission's consideration of the City's proposed Local Coastal Program Land Use Plan Amendment.

Yesterday I made verbal public testimony on the fact that Carlsbad's children and their parents/grandparents at Ponto are forced to use the LOSAN Rail Corridor right-of-way and City and private streets as their playground and Park. Attached is the updated file of more images showing that condition including the family having to play ball in a Carlsbad City Street because there is no Ponto Park and Ponto developers were falsely exempted from providing 15% Useable Open Space as required by the Growth Management Open Space Standard and Ordinance.

**The City of Carlsbad has declared a Public Emergency regarding pedestrian/bike/vehicle safety on Carlsbad roadways. Yet here are examples of Carlsbad's Ponto children/families forced to play in City Streets or along high-speed rail corridors because the City failed to provide both Required 15% Useable Open Space and a Park at Ponto. What is the CTGMC and City of Carlsbad doing regarding this situation? Will it take a Ponto child to hit (killed) by a car or train to open your eyes, open your minds, and open your hearts, to what the City needs to provide – Ponto Park and LFMP Zone 9 compliance with the Growth Management Open Space Standard?**

**The City of Carlsbad created the problem BECAUSE the City falsely exempted Ponto developers (LFMP Zone 9) from providing the 15% Useable Open Space required by Growth Management Standards, and the City choose to abandon common sense Park planning principles to say that Ponto's Park needs will be met over 6-miles away at Veterans Park.** The City has now acknowledged (in their traffic/visitor estimates) that Veterans Park 'in fact' will not provide Park resources to children and families at Ponto and most other areas of the City. This relates to issues and 1<sup>st</sup> set of images sent to you in the June 27<sup>th</sup> email below.

City Council, Planning-Parks-Housing Commissions and CA Coastal Commission we hope the images give you a visual reference/understanding of some of the Park and Useable Open Space needs that have been communicated to you by over 5,000 citizen/visitor petitions, many hours verbal public input and many pages of documented data/facts. **Will it take a child getting killed by having to play in railroad corridors and streets to get your attention and get you to act for our future – our children and their children?**

Sincerely,  
Lance Schulte

**Subject:** Public input to Carlsbad LCPA, Parks Master Plan Update, & Growth Management Program Update — 10 minute Park standard & images of Park need at Ponto

Dear Carlsbad Council, Carlsbad Parks and Planning Commission, Carlsbad Tomorrow Growth Management Committee, and CA Coastal Commission and CA State Parks:

We ask you to please consider this email, news article, images, and files and request this be distributed/documented as public input to the Carlsbad LCP Amendment, Park Master Plan Update, and Growth Management Program Update.

Please take a look at Coast News Article <https://thecoastnews.com/olympus-park-brings-encinitas->

[closer-to-ensuring-all-residents-live-within-a-10-minute-walk-to-a-park/](#) . The 10-minute walk to Park issue can be clearly seen in the attached images as Ponto citizens are forced to use narrow Railroad right-of-way or play in local streets as recreational space. Because Ponto is the last meaningful sized vacant Coastal land in South Carlsbad an informal Ponto Park has been created by citizens. Every day about 50-100 inland Carlsbad Citizens use now vacant Ponto land for dog walking and playing, and before the fences beach parking.

P4P has been documenting and communicating to the City that Carlsbad does not have a Park policy for 10-minute walk access to Parks like BOTH Encinitas & Oceanside; that Carlsbad's Park Acreage standard (3 parks acres per 1,000 population) is also 40% below the 5 park acres per 1,000 population BOTH Encinitas and Oceanside require of development and provide their Citizens; that Carlsbad's Park Master Plan maps Ponto as an area Unserved by City parks and an area the City should look at to provide City Parks sufficient in size for the population Unserved, and that Ponto is at the center of a 6-mile long gap with no Coastal Park (between Moonlight & Cannon parks).

The Trust for Public Land cited in the article has already sent the City & CCC a letter of support for Ponto Park. People for Ponto Carlsbad Citizens also sent you comparison Park research using the National Recreation & Park Association data base, and a Coastal Recreation data file with important comparative Coastal Park data – such as that many of Carlsbad's Park acres are unusable as Parks – the acres inaccurately counted as Parks are in fact protected habitat that cannot be used by people, or are covered in parking lots. This makes Carlsbad's Actual Useable Park Acreage well below what the City accounts for as Park. We encourage the Citizens Carlsbad Tomorrow Growth Management Committee, Carlsbad Council, Carlsbad Parks and Planning Commission, and CCC read and consider the Citizen input and data provided.

Lance

**Subject:** Pickelball courts

---

**From:** Dan Traxler <[dkt0005\\_98@yahoo.com](mailto:dkt0005_98@yahoo.com)>  
**Sent:** Wednesday, November 9, 2022 3:00 PM  
**To:** Parks and Recreation <[parksandrec@CarlsbadCA.gov](mailto:parksandrec@CarlsbadCA.gov)>  
**Subject:** Pickelball courts

I would really like to recommend additional Pickleball courts at poinsettia park. Every single day the social group and the challenge court group has continuous lines of people to play starting from 8 AM to 10 PM every day. The tennis courts seem to always be available for play. The amount of participation in Pickelball is significantly more than the tennis. I would recommend to change one more court from the tennis court that's closest to the pickle ball courts. Make that court into 4 courts and make them the challenge courts and then the existing ones, all six be the social courts. Attached are pictures at 2 PM for example today.

Dan

**Subject:** Pickleball courts

What seems to be the problem with your department?

Despite hundreds of people emailing you for MORE courts in the city for THE FASTEST growing sport in America, it seems to fall on deaf ears.

So many UNUSED tennis courts and over packed pickleball courts continues to be ignored.

What's it going to take to get you guys involved?

I for one, ( and trust me I am NOT the only one) think maybe you need to resign so we can hire people who actually listen to the TAXPAYER as to what we would like to see happen, for the good of all of Carlsbad.

Terri Acker

**Subject:** Additional pickleball courts in Carlsbad

**Importance:** High

Good afternoon Mick,

We are writing to place a request for additional public pickleball courts in Carlsbad. We frequent the "social courts" at Poinsettia and our pickleball time there is some of our favorite together time of the week. The games are fun and competitive (but not overly) and most of the people are really nice. In just a few weeks we have made lots of acquaintances.

That said, the word is out. Due to the limited options and the popularity of Poinsettia, it's quickly getting more and more crowded. Whenever I use the restrooms I check out the tennis courts. Not only are there always some courts available, but sometimes they are all open. At the same time the pickleball line might be 20+ paddles deep.

I don't want to remove tennis courts that are used consistently but it seems reasonable to balance the # of courts based on popularity.

Although I prefer the idea of permanent pball courts and have little doubt they'll be used around the clock, in the interest of time and \$, one option might be to add some portable nets (like at cottonwood in Encinitas). That way there's a potential overflow that could be set up quickly and inexpensively.

Thanks for your help!

Andy Weaver

**Subject:** Public input to 12-13-22 Carlsbad Park Commission & Draft Local Coastal Program Update on Parks and recreation priorities to be discussed

Mick, Carlsbad Park Commission:

Thank you the Friday notice on the Monday meeting at the end of this email.

As noted in Kyle's February 13, 2020 email below the over public 5,000 petitions citing the need and citizen desire for Ponto Park was to be factored into the Park Master Plan Update. We wanted to confirm staff has incorporated that need and input into the staff suggested Draft Parks Master Plan Update? People for Ponto Citizens had hoped the Parks Department would have provided some more (than 3-day) advance notice to citizens on the extensive citizen input on Ponto Park, and more opportunity to review and provide comments. Particularly given the holidays.

The Current Park Master Plan already documents that Ponto is "Unserved by City Parks" and an area that the City should provide City Parks. City Local Coastal Land Use Policies for Ponto (Planning Area F) and Mello II Policies also require consideration of City Park facilities at Ponto.

We wanted to confirm with you that all the Carlsbad Citizen input on the need for and desire for a meaningful Ponto Park has been incorporated into the proposed Draft Park Master Plan, and that the Park Master Plan provides for correction for unfair distribution of Coastal Parks in Carlsbad consistent with good Park planning and City planning practices, the CA Coastal Act regarding distribution and allocation of Coastal Recreation (i.e. Public Park) resources.

A confirmation from you regarding how staff incorporated and addressed the extensive citizen input on Ponto Park would be greatly appreciated, along with dates for other opportunities to comment, as many citizens will not be able to respond in the short time provided to review, particularly given the holidays.

Thank you,  
Lance Schulte

**Subject:** RE: Develop Ponto Right - prior Ponto Coastal Park Support Letters and public comments to be included in Parks Master Plan public Comments

Lance-

I've consulted with the city attorney's representative on this matter. **She determined that the prior public input on the desire for a park at Ponto does not need to be resubmitted in order to be included in the public input process for the Parks & Recreation Department Master Plan Update. Rather, your email message below will serve as a cover sheet request for that prior public input to also be included as public input for the Parks & Recreation Department Master Plan Update.**

Thank you.

-Kyle

**Subject:** RE: Develop Ponto Right - prior Ponto Coastal Park Support Letters and public comments to be included in Parks Master Plan public Comments

**Importance:** High

Dear City Council, Kyle Lancaster, Mike Pacheco, and Mick Calarco:

We would like to receive confirmation that all the People for Ponto and other public comments as part of the public comments submitted on the:

1. Shopoff developer proposed application to change the Local Coastal Program Land Use on Planning Area F at Ponto,
2. the City Staff's proposed Draft Local Coastal Program Land Use Plan Amendment to change the Land Use on Planning Area F for the developer

be included in the City's Park Master Plan Update. Can you please confirm all this prior citizen input is also included in the Parks Master Plan Update?

These prior public comments and requests to the City Council and Kyle Lancaster, parks Director directly relate to Park needs at Ponto and Coastal South Carlsbad, and the City's Planning Area F LCP LUP Requirements to consider a Public Park at the site. The public input is from over 2,500 citizen and public communications already sent to the City Council and City Staff (as noted in the above To address list). In addition to those 2,500 citizen and public communications over 90-pages of extensive public comments and data showing among other things the City's Park Master Plan's Park Service Area deficit (Park Service inequity) at Ponto and Coastal South Carlsbad, Park Acreage Deficit in South Carlsbad, the lack of any City Park West of I-5 and rail corridor in all South Carlsbad, CA Coastal Act policies and Coastal Recreation data/issues, along with other City policy and regulation supporting a Park at Ponto. All this prior public input should be included in the Parks Master Plan Update. Can you please confirm that that is the case? Or do we have to re-email all these prior public comments?

Thanks,  
Lance  
People for Ponto

**One example of prior public comments submitted about Park deficits at Ponto and Coastal South Carlsbad and request for a City Park at Ponto:**

**Subject:** Develop Ponto Right - Support Letter

Dear Mayor Hall, Carlsbad City Council, and California Coastal Commission:

I am informed that

1. Carlsbad must consider on Planning Area F at Ponto the need for a public park at Ponto as part of the Draft Local Coastal Program Amendment.
2. There is no public park at Ponto even though City Park Standards requires a minimum of 6.5 acres of parkland for Ponto.
3. There is a current 6.6 acre park deficit in Coastal Southwest quadrant of Carlsbad, (south of Palomar Airport Road and west of El Camino Real).
4. There are no Coastal Parks in all of South Carlsbad. 64,000 South Carlsbad citizens have no Coastal Park.
5. Ponto is at the center of a larger 6-mile stretch of coastline in that has no Coastal Parks.
6. Ponto has a city documented 30 acre open-space standard deficit that a Coastal Park would help resolves.
7. And most importantly, I am informed that the City is currently ignoring these issues and in the Draft Local Coastal Program Amendment is proposing to eliminate the last opportunity to create a much needed Coastal Park at Ponto

Accordingly, I am requesting and making my position known that:

- I want the Draft Local Coastal Program Amendment to provide for a Coastal Park at Ponto.
- I want the City to provide a true Citizen-based Park Planning process for Ponto.
- I want the City of Carlsbad to budget money in their capital improvement program to purchase Planning Area F and build a park at Ponto to serve residents and visitors alike.

- I want to preserve what little Coastal Open Space Carlsbad has remaining for future generations and our visitor industry.

I am not in favor of future residential development at Ponto, but think this last small amount of vacant Coastal land should be reserved for Coastal Recreation.

One of the reasons that this lovely community continues to attract residents and tourists is the beauty of our natural surroundings, including coastline , parks and open spaces. Residential development is highly desired.. but INLAND, please! Protect our Coastal open spaces, for our good, and our visitors, for now AND the future. Once we squander it, it cannot easily be reclaimed...

Thank you  
Barbara M Kesten

**Subject:** 🖱 Parks and recreation priorities to be discussed 12/12

[View as Webpage](#)

On Monday city staff will provide an update on work completed to date on the new Parks & Recreation Master Plan with the Senior Commission and Parks & Recreation Commission. Information will include:

- A preview of the results of a citywide survey conducted by a third-party research company
- Assessments of the city's current recreation programs

This information builds on feedback gathered from the community about parks and recreation priorities and investments.

Monday, Dec. 12

City Council chamber

3 p.m. – [Senior Commission](#)

5:30 p.m. – [Parks & Recreation Commission](#)

You can watch the meetings live on the [City TV cable channel](#).

The [Parks & Recreation Master Plan](#) is a blueprint that will help guide priorities and investments in parks and recreation facilities and services for the next seven years. The city's existing Parks & Recreation Master Plan was completed in 2015, and the major projects have been completed. The updated plan will cover:

- Assessment of current parks, facilities and recreational programs
- Demographic and industry trends
- Community needs and priorities
- Funding needs and revenue opportunities
- A seven-year strategic action plan

This project started right before the COVID-19 pandemic, so it's taken longer than expected. For one thing, staff wanted to add another round of public input to see if anything major had changed as a result of the pandemic experience, once facilities were allowed to reopen. City staff are on track to present the draft master plan update to the City Council in early 2023.

### **Next steps**

January/February 2023: Draft updated master plan presented to Senior and Parks & Recreation commissions and City Council

March/April 2023: Final updated master plan presented to the City Council for adoption

### **More information**

**Subject:** Public input to the next upcoming meetings of Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council and Parks and Planning Commissions - LCPA and Growth Management-Parks Master Plan Updates - Parks & Open Space

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks and Planning Commissions, , CA Coastal Commission and CA State Parks:

As the City has requested specific reference regarding public input, I ask you to please deliver to the those address this email and attachment as public input for:

1. the CTGMC's 12/15/22 meeting,
2. the next Carlsbad Council meeting,
3. the next Carlsbad Planning and Parks Commission meetings on the Parks Master Plan and Growth Management Program Updates, Ponto Planning Area F and Site 18 land use changes, and Local Coastal Program Amendments, and
4. as public input to the CCC on Carlsbad proposed Local Coastal Program, and
5. as public input to Carlsbad's proposed Local Coastal Program Amendment.

The initial version of attached file was sent to you 8/8/22. The attached updated file should replace that older file as there is new data on significant tax-payer cost savings from Pronto Park relative to PCH Relocation, and updated examples of how Coastal Open Space can be cost-effectively persevered and increased. Both Coastal Parks and Open Space are important Carlsbad and State of CA issues.

- Parks: Updated data shows that a 11.1 acre Ponto Park would now cost less \$20 million to buy and build. This is less than a City Pool Renovation. Carlsbad's Old City Council planned to spend \$65 to \$80 million in Carlsbad tax-payer dollars to address the Citywide need for a significant Coastal Park in South Carlsbad with a 2.3 mile PCH Relocation. The City identified in 2001 other pay-payer funds were highly unlikely. \$65 to \$80 million would only 'free-up' 15.8 acres of narrow PCH Median (City documented "Surplus Land Area #4 & #5"). As People for Ponto Citizens have been saying for years that Ponto Park is the better Park solution to the documented Coastal South Carlsbad Park needs – a citywide need. The CTGMC should include that citywide Park need and the logical, better and tax-payer responsible Ponto Park solution to that citywide Park need in your CTGMC recommendations to City Council.

- Open Space: Updated data shows how documented GM Open Space shortfalls can be properly and responsibly address in a collaborative citizen-based “Local Facilities Zone Useable Open Space Correction Plan” approached. Also the need to maintain the 15% GM (Useable) Open Space Standard will be critical in the future to maintain Open Space and prevent future conversion of Open Space to residential land use as part of Housing Plan updates.

For the CTGMC; Parks and Open Space are the 2 most critical/special of 6 Key Growth Management Program Update Issues and Suggestions the CTGMC should take to properly address these 6 key Growth Management Issues.

- Please read the Updated data and Suggestions.
- Please responsibly address the Growth Management issues of a citywide Park need for Coastal South Carlsbad as listed in the attached Suggestions. Include a South Carlsbad Coastal Park in your recommendations to the City Council. Acknowledge Ponto Park as the best and most tax-payer efficient solution to address that documented citywide park need.
- Please in your recommendations to City Council retain and enforce the Open Space Standard, and fix past errors made in falsely exempting certain developers in certain areas in the City from complying with the Growth Management Open Space Standard that other developers in other areas are required to provide.

Please consider this email and attachments, and know P4P Carlsbad Citizens are here to help assure we sustain and enhance our quality of life for future generations. People for Ponto love deeply Carlsbad and want to assure we leave a better Carlsbad to future generations.

Happy holidays and with Aloha Aina,  
Lance Schulte

**CAUTION:** Do not open attachments or click on links unless you recognize the sender and know the content is safe.

Following are 6 key major Growth Management Standards issues of citywide relevance that the Carlsbad Tomorrow Growth Management Committee (CTGMC) needs to act on, and citizen “Suggestions to CTGMC” on how to honestly and responsibly act on these 6 key issues in the CTGMC’s recommendations to the New City Council. This Update includes new information (pp 5-6) on the improved affordability of Ponto Park, and on how GM Open Space shortfall can be repaired. We hope the CTGMC will act honestly to make recommendations that truly and responsibly address known documented shortfalls in both Parks and GM Open Space. Responsible recommendations by the CTGMC can provide a sustainable Quality of Life to future Carlsbad generations and visitors. Only you own your recommendations.

1. The State of CA is forcing Carlsbad and all cities/counties in CA to provide for unlimited or Infinite Population and Visitor growth. So there will be an Infinite population & visitor demands for Parks, Open Space, water, and demands on our roads/transportation systems, and other Growth Management (GM) Quality of Life facilities. These infinite increases in population and visitor demand will come from high density development that requires more public Parks and Open Space to balance the high-densities. **Carlsbad’s new GM Standards will have to provide for a system of Infinite proportional increases in the supply of Parklands, Open Spaces, water, transportation facility capacity, etc. or our Quality of Life will diminish.**
  - a. Suggestions to CTGMC:
    - i. Completely restructure the General Plan, Local Coastal Program and GM Program to clearly recognize these facts and State requirements to proportionately provide public facilities to maintain/improve Carlsbad GM Quality of Life Standards for this Infinite growth of Population and Visitor demands.
    - ii. **Being a Coastal city Carlsbad has an added responsibility to proportionately maintain/improve providing High-Priority Coastal land uses (Coastal Recreation {i.e. Public Parks} and Low-cost Visitor Accommodations) needed at a regional and statewide level to address visitor needs for Coastal Recreation, access, and affordable accommodations.** Carlsbad needs to work with the State of CA Coastal Commission to completely restructure Carlsbad’s Coastal Land Use Plan to addresses the State’s requirement to provide an Infinite amount high-priority Coastal land uses for those Infinite Population and Visitor demands.
    - iii. **Trying to ignore these Infinite demands for Carlsbad’s Quality of Life facilities – like Parks and Open Spaces is a path to disaster and the ultimate degradation of Carlsbad’s Quality of Life.**
2. **Carlsbad has a huge Jobs v. Housing supply imbalance – far too many jobs around the airport for our amount of housing. This creates negative and costly land use and transportation planning distortions that radiate from the Airport Central Jobs through Carlsbad in all directions.** CA Housing law penalizes unbalanced cities like Carlsbad by requiring more housing in Carlsbad to bring jobs/housing ratio into balance. Carlsbad can correct this imbalance by 1 of 2 ways: 1) greatly increase housing supply (and thus increase the need and City expense for more GM Quality of Life facilities), or 2) more logically and cost effectively greatly decrease the amount of Jobs land use, so Carlsbad’s housing supply is in balance with jobs. These jobs will move to surrounding Cities that have more housing than jobs. **Rebalancing by reducing jobs land use creates added benefits for Carlsbad and our region by reducing Carlsbad’s peak-hour job commute traffic volumes and**

vehicle miles traveled (VMT), and by reducing the costs Carlsbad (and other cities and the region) have to pay to accommodate inter-city commute traffic. If Carlsbad reduces jobs land use will also reduce the amount of housing the State of California and SANDAG requires Carlsbad provide in its Housing Element thus reducing forcing incompatible high-density development into established neighborhoods and pressure to convert useable GM Open Space lands to housing land use.

a. Suggestions to CTGMC:

- i. **Carlsbad can logically and cost effectively balance Jobs/housing supply by updating Growth Management Policy to reduce jobs to be in balance with housing by changing some of Carlsbad's General Plan land use around the airport into several high-density residential mixed-use Villages.** The City has started some of this, but can expand this effort but has not planned creating mixed-use village environments. These high-density villages will reduce jobs and provide both high-quality and high-density (affordable) housing within walking/biking distance to the major job center and new neighborhood commercial and Park uses in the Villages.
- ii. Prioritize transportation investments in safe bike paths, walking paths between Carlsbad's Central Jobs Core around the airport and Carlsbad's housing, particularly strongly connecting these new high-density mixed-use villages with the Central Jobs Core.
- iii. Update General Plan land use and housing policy to reduce concentrations of higher-density housing except around the airport jobs core.
- iv. Recognize the central Airport jobs core is 'Carlsbad's New Urban Downtown and "Transect Plan" accordingly toward lower densities on the City periphery.

3. Although some very critical areas (such as the Coastal lands at Ponto) are still vacant and can be wisely used for critical GM Quality of Life needs, much of Carlsbad is largely developed.

**Redevelopment of developed land will require creating increased supplies of Parkland, Open Spaces, transportation capacity, and other Quality of Life facilities.**

a. Suggestions to CTGMC:

- i. **Completely rethink all City planning on existing vacant lands to assure that remaining vacant land is planned and being used wisely and fairly distributed to address critical Quality of Life needs in those areas, and not squandered on redundant land use.** The location of vacant land to address critical Park & Open Space needs should be preserved with land use planning.
- ii. Work with the State and CA Coastal Commission to preserve our Finite vacant Coastal lands for High-Priority Coastal Land Uses (Coastal Recreation {i.e. Public Parks} and Low-cost Visitor Accommodations and services) for the Infinite population and visitor demands both internal and external to Carlsbad that are/will be placed on them.
- iii. Fully and at the very beginning of any Carlsbad General Plan, Local Coastal Program and Growth Management Program actions going forward fully disclose, map and require consideration of the impact of future sea level rise and coastal erosion on Coastal land acres and land uses. Carlsbad has lost and will accelerate losing acres of Coastal land and High-priority Coastal Land Uses. Carlsbad must know, see, and discuss these losses BEFORE making any land use decisions in Carlsbad's Coastal Zone and any vacant Coastal Land.

4. **Carlsbad General Plan & Growth Management Plan do not provide a fair distribution of adequately sized City Parks for all Carlsbad families.** Veterans Park is a classic example. What will

be the City's largest park is only about 1-mile away from three other major City Parks (Zone 5, and the future Robinson Ranch and Hub Parks). This is a poor and unfair distribution and a misallocation City Park land resources. Saying Veterans Park is 'the park to serve SW, SE, and NE Carlsbad families' (the overwhelming major/majority funders of veterans Park) when those families are upwards of 6-miles away on major commercial arterials that kids can't logically/safely use is false and unfair. Most all the funding (developer fees) to build Veterans Park come from the SW, SE and NW Carlsbad but those areas are denied the Park the paid for. Veterans Park is inaccessible by almost all its intended users except by driving their cars and then storing their cars in parking lots on Parkland thus making less park land available for actual park use – this makes little common sense and is a great waste of tax-payer funds. This is dysfunctional along with being very unfair to families in SW, SE and NE Quadrats that are denied park acres near their homes which they funded. **Carlsbad's Park Master Plan maps 'Park Service' areas of existing known Park Inequity or Unfairness (dysfunction), to show where new City Park investments should be made (See City map image with notes below).**

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

The Trust for Public Land provides a Park-Score to compare both a City's amount of park acres and the 'fairness' of access (within a 10-minute walk) to parks. **Carlsbad is below national averages in both park acres and fair access to parks. Carlsbad is also well below what our adjacent Coastal cities of Encinitas and Oceanside provide. Carlsbad only requires 3 acres of Park land per 1,000 population, while Encinitas and Oceans require 5 acres - 67% more than Carlsbad – of parkland. Also, Encinitas and Oceanside require parks to be within a 10-minute walk to their citizens and families. Carlsbad has no such requirement.**

a. Suggestions to CTGMC:

**Carlsbad should change its General Plan, Parks and Growth Management Standards and CMC 20.44 to:**

- i. **Be Above Average Nationally in both providing park acreage and in locating adequate park acreage to be within a 10-minute walk to all neighborhoods.**
  - ii. **Raise its minimum park acreage standard to 5 acres per 1,000 population, versus the current low 3 acres per 1,000. Carlsbad should be at least as good as Encinitas and Oceanside in requiring 5 acres, not 40% below what our adjacent Cities require/provide.**
  - iii. **Raise its park location standard to require an adequately sized park be provided to serve the neighborhood population within a 10-minute walk for all neighborhoods.**
  - iv. **Prioritize City Policy and Park Budgets and investments to achieve park fairness in 'Park Unserved areas' identified by Carlsbad's Park Master Plan.**
  - v. **Per Carlsbad's Municipal Code Chapter 20.44- DEDICATION OF LAND FOR RECREATIONAL FACILITIES to require developers in 'Park Unserved areas' and in areas that do not have an adequately sized (5 acres per 1,000 population) park within a 10-minute walk to provide their developments required Park land acre dedication in actual Park land within a 10-minute walk to their development.**
  - vi. **Update the City's Park-in-lieu fee to assure the fee is adequate to actually buy the amount of park land a developer is to provide within a 10-minute walk of their development. The City's current 'Park-in-lieu-fee' is far too low and inadequate to actually buy land in area surrounding the proposed development.**
  - vii. **Only allow developers to pay a Park-in-lieu-fee where there is an adequately sized park (provide 5 acres per 1,000 population) within a 10-minute walk of their development, and growth management planned future development in that area will not require more park land to provide 5 acres per 1,000 population) within a 10-minute walk.**
  - viii. Consider updating Park policy to provide more multi-use flexibility in park land acres and development on Parks. Many Carlsbad Park acres are developed/dedicated to a single-purpose use, and unavailable for other park uses.
  - ix. Consider eliminating car parking lots from land that can be counted as parkland; or by significantly limiting park land used for parking to around 5%.
  - x. **Eliminate the counting of 'GM Constrained and Unusable land' and Protected Endangered Species Habitat land as Park land. GM Constrained/Unusable lands are undevelopable. Protected Habitat lands are by definition not useable for development by people. Habitat is dedicated for plants and animals. Parks are open spaces dedicated intended for people. Parkland calculations should exclude Unusable lands and Protected Habitat lands and only count 100% people Useable land as Park land. Where Park land abuts Habitat land a sufficient buffer space shall be provided to prevent people mixing with animals (ex. Rattlesnakes, etc.) and animals from people (habitat disturbance or destruction). This buffer area should not be counted as Park or Habitat acres, but as natural/developed buffer open space acres, and can be counted as part of the City's 15% Growth Management 'Aesthetic open Space'.**
5. Carlsbad's Coast is the most, if not the most, important feature of Carlsbad; and is consistently identified by citizens and businesses and our Community Vision. **Carlsbad's Coastal Parks (west of the I-5 corridor) are grossly unfairly distributed. Carlsbad's Coastal Parks do not fairly match the**

**locational needs of the population. North Carlsbad that is 38% of Carlsbad's population and has 10 Coastal Parks totaling 37+ acres in size. South Carlsbad that is 62% of Carlsbad's population has 0 [ZERO] Coastal Parks totaling 0 [ZERO] acres.** Again, Carlsbad's Park Master Plan maps this citywide unfairness (dots show park locations and circles show the area served by each park) and says that the City should look at buying and building New Parks in these areas that are unserved by City Parks (are not covered by a circle). The GM Update should correct this citywide unfair distribution of City Parks by making plans for new Park purchases to create City Parks in these unserved areas of Park Inequity.

To address citywide Coastal Park unfairness the current City Council wants to spend \$60-85 million in Carlsbad tax-payer funds to Relocate 2.3 miles of constrained Pacific Coast Highway median to try to make some of the narrow PCH median 'useable' by people. 2001 and 2013 City PCH Relocation studies identified only a small amount of 'people-useable acres' would be created next to PCH. The \$60-85 million tax-payer cost (\$26-37 million per mile) does NOT add one single square foot of new City land, it only inefficiently rearranges a small amount PCH median. The City can most tax-payer cost effectively provide needed sidewalks and bike improvements along the outside edges of PCH without PCH Relocation. The City's 2001 PCH Relocation Financial Study and 2013 PCH Relocation Design both indicated minimal useable land could be achieved by Relocation, and that the very high tax-payer cost to do so would be very difficult to fund. The City has known for well over 20-years that PCH Relocation is a high-cost and a poor solution to address the Citywide Coastal Park unfairness in South Carlsbad.

However, a **better and far less costly solution to correct Citywide Coastal Park unfairness and provide a much needed South Carlsbad Coastal Park is to simply buy currently vacant land that is for sale.** The City did this (although the City actually bought existing homes) when it expanded Pine Park. **Carlsbad tax-payers have used the City's own data to compare the tax-payer Cost/Benefits of simply purchasing vacant land v. trying to rearrange existing City owned land at PCH. Simply buying vacant land saves tax-payers saves tax-payers over \$32.7 to \$7.7 million.** Please read the following data files:

- 2022-June General Comparative tax-payer Costs/Benefits of Completing PCH, 2.3 miles of PCH Modification (Island Way to La Costa Ave.), and 14.3 acre Ponto Park (Kam Sang) to address planned loss of 30+ acres of Coastal Open Space Land Use at Ponto in South Carlsbad: Part 1 of 2.
- City's PCH Modification Proposal Area Map with notes on usability Constraints and Issues: P4P Input: Part 2 of 2
- The most recent (9/19/22) land sale of 11.1 acre Ponto Planning Area F was less than \$8 million (less than \$706,000 per acre).
- **Buying and developing this 11.1 acre Ponto Park would cost less than \$20 million assuming a 10% profit to the new land-owner, and \$1 million per acre park construction cost like our newest Buena Vista Reservoir Park.** The cost to help correct a Citywide Coastal Park unfairness by simply buying & building a much needed **11.1 acre Ponto Coastal Park would cost tax-payers less than the recently approved Measure J City Monroe Street Pool Renovation.** Investing less than \$20 million (\$1.8 million per acre) to buy and build an 11.1 acre Ponto Coastal Park is a great tax-payer value v. \$65-80 million in tax-payer funds to rearrange 15.8 acres of narrow strips of constrained PCH median (City documented "Surplus Land Area #4 &5") for some minimal people use at a tax-payer cost of \$4-5 million per acre. **The overall and per acre costs of buying/building Ponto Park are over 2 to 3 times better value for tax-payers than PCH Relocation/rearrangement.**

- The City Council could/can buy land for Open Space (Parks are the most useable of the City's 4 Open Space categories) under voter approved Prop C Open Space land acquisition authority. **The City has been advised to buy Ponto Park under Prop C per the City's settlement of a Growth Management law suit.**

**The Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad is clearly a citywide issue. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad as it is unfair to the vast majority of Carlsbad citizens and their families as 62% of Carlsbad is in South Carlsbad. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad is unfair to our major Visitor serving industries (and tax generators) in South Carlsbad. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad are clearly inconsistent with the CA Coastal Act, Carlsbad's Community Vision, and common sense.** The Coastal South Carlsbad Park Inequity is also unfair to North Carlsbad because South Carlsbad's Coastal Park demand is being forced into Coastal North Carlsbad and congesting those parks, and adding to Coastal North Carlsbad traffic and parking impacts. It also increases greenhouse gases and VMT as it forces longer vehicle trips.

a. Suggestions to CTGMC:

- i. 11.1 acre Ponto Planning Area F has a specific Local Coastal Program Land Use Policy that says The City of Carlsbad must for the Ponto Area LCP 'Consider and Document the need for Coastal Recreation (i.e. Public Park) and or Low-Cost Visitor Accommodations west of the railroad tracks (at Ponto) prior to any Land Use change. **The discussion of Parks by the CTGMC is such a situation that requires the CTGMC to consider this adopted LCP Land Use Policies. Official public records requests have shown the City never followed this LCP Land Use Policy Requirement during the 2005 Ponto Vision Plan and 2015 General Plan Update, and in 2010 the CA Coastal Commission rejected the Ponto Vision Plan and told the City in 2017 that that land uses at Ponto could change based on the need for Coastal Recreation and/or Low Cost Visitor Accommodations.** The Mello II LCP that covers most of Carlsbad's Coastal Zone also has Land Use Policy 6.2 for the City to consider a major park in the Batiquitos (Ponto/South Carlsbad) area. The City has only implemented 1/6 to 1/3 of this policy. **The CTGMC should fully evaluate the citywide/South Carlsbad and local Ponto need for Coastal Parks as required by the City's adopted LCPs and CA Coastal Act.**
- ii. Carlsbad's 2015 General Plan Update and Growth Management Plan (GMP) did not, and was not updated to, consider the 2017 Sea Level Rise (SLR) Impact report showing the loss/impact on 32+ acres of Carlsbad's Coastal Land Use acreage in South Carlsbad – primarily Open Space Land Use (beach and Campground). **Both the General Plan (and Local Coastal Program Land Use Plan) and GMP should be updated to account for the loss and replacement of these 32+ acres of high-priority Coastal Open Space Land Use due to SLR.** The updates and the CTGMC should use the newest CA Coastal Commission SLR Guidelines/science, not the old guidelines used in 2017. Carlsbad's LCP and CA Coastal Act Land Use Polies call for 'upland relocation' to replace the SLR loss of high-priority Coastal Land Uses.
- iii. **The availability over the past several years of the last two sufficiently sized vacant lands suitable for a Ponto/South Carlsbad Coastal Park is a citywide issue. If these last two vacant lands are lost to development forever future generations will have lost the last opportunity for the needed South Carlsbad Coastal Park.** The 5/3/22 Citizen requests for the City to jointly study acquisition of one or both these last vacant lands for a needed (and only possible) true and meaningful Coastal Park for

South Carlsbad should be recommended by the CTGMC. **The CTGMC should recommend Carlsbad’s GMP be updated to incorporate Parkland acquisition of these last opportunities to provide the needed Coastal Park for South Carlsbad.**

6. Carlsbad Growth Management Open Space Standard is that 15% of all the Useable (unconstrained and fully buildable) areas is to be preserved as Useable Open Space, and that all the 25 Local Facility Management Plans (LFMP) show how that 15% is provided. The City says:

---

---

**OPEN SPACE**

---

---

**A. Performance Standard**

Fifteen percent of the total land area in the Local Facility Management Zone (LFMZ) exclusive of environmentally constrained non-developable land must be set aside for permanent open space and must be available concurrent with development.

Yet the City has mapped and documented that this 15% Useable Open Space Performance Standard was not complied with. The City also acknowledges that without changes to current City planning the 15% Useable Open Space Performance Standard will never be complied with. The City acknowledges that only 13% has/will under current plans ever be provided. This missing 2% equals 501 acers of lost GM Open Space the GMP promised citizens. **Carlsbad law the Growth Management Ordinance 21.90, and section ‘21.90.130 Implementation of facilities and improvements requirements’; provide guidance on how non-compliance with a Performance Standards is to be handled.**

a. Suggestions to CTGMC:

- i. Retain the GM Open Space Standard of 15% of all unconstrained and developable land is maintained as Open Space. If the City removes the Open Space Standard, it will allow and encourage land use changes to remove GM Open Space and replace with development.
- ii. **The CTGMC should make a recommendation that an inventory of all 25 LFMP Zones be conducted and an inventory of each LFMP Zones provision of at least 15% Useable Open Space shall be compiled. No LFMP Zone shall be allowed to be “exempt” from this inventory.** The City’s computerized GIS mapping system makes it easy and clear as shown in the following City GIS map for LFMP Zone 9 (aka Ponto).

**City GIS map of Ponto's (LFMP Zone 9) Open Space:**

- Light green areas meet the City's 15% unconstrained Growth Management Program Open Space Standard
- Most Ponto Open Space (pink hatch & blue [water] on map) is "Constrained" and does not meet the Standard
- **Aviara - Zone 19, Ponto - Zone 9 and Hanover/Poinsettia Shores – Zone 22 all developed around the same time and had similar vacant lands.**
- **City required Aviara - Zone 19 east of Ponto to provide the 15% Standard Open Space. Why not Ponto? Aviara includes the same lagoon.**
- **City required Hanover & Poinsettia Shores area Zone 22 just north of Ponto to provide the 15% Standard Open Space. Why not Ponto?**
- Why Ponto developers were not required to comply with the 15% Useable Open Space Standard is subject to current litigation
- Below is City GIS data from this map

**City GIS map data summary of the Growth Management Standard of 15% Useable Open Space at Ponto**

472 Acres	Total land in LFMP Zone 9 [Ponto]
<u>(197 Acres)</u>	Constrained land excluded from Growth Management (GMP) Open Space
275 Acres	Unconstrained land in LFMP Zone 9 [Ponto]
<u>X 15%</u>	GMP Minimum Unconstrained Open Space requirement
41 Acres	GMP Minimum Unconstrained Open Space required
<u>(11 Acres)</u>	GMP Open Space provided & mapped per City GIS data
<b>30 Acres</b>	<b>Missing Unconstrained Open Space needed in LFMP Zone 9 [Ponto] to meet the City's minimum GMP Open Space Standard per City's GIS map &amp; data</b>

**73% of the City's minimum 15% required Open Space Standard is missing due to over development of LFMP Zone 9 [Ponto]**

- iii. In instances like LFMP Zone 9 (above image) that clearly did not provide at least 15% Useable Open Space and/or were falsely “exempted” the CTGMC should recommend that a **Local Facilities Zone Useable Open Space Correction Plan** shall be developed that explores the GM Open Space use/reuse of City land, land use planning requirements, and/or possible acquisitions of remaining vacant land acres to make up for any shortfall in meeting the 15% Useable Open Space in that a Zone. An example of this in LFMP Zone 9 is that the City’s regional Rail Trail will convert 2-lanes of almost all of Avenida Encinas to wider buffered bike lanes and an adequate portion of the converted 2 vehicle lanes can be landscaped (v. just painting strips as a buffer) to provide a safer/better bike lane buffer within a GM compliant Open Space. 2 vehicle lanes in Windrose Circle could also be similarly landscaped and converted to GM complaint Open Space. This is just one example of a cost-effective means to add GM Open Space that developers were falsely allowed to remove.
- iv. A **Local Facilities Zone Useable Open Space Correction Plan** should involve a Citizens Advisory Committee composed of citizens within the impacted Zone and appointed by the Council Members representing the Zone, and a representative of each vacant land owner over of over 1-acre in size.
- v. Consistent with the Growth Management Ordinance land use changes and development applications within a **Local Facilities Zone Useable Open Space Correction Plan** Zone shall be deferred until the applications can considered with (or after adoption of) a **Local Facilities Zone Useable Open Space Correction Plan**.

**Subject:** Public input to the next and 12-13-22 Carlsbad Park Commission & Draft Local Coastal Program Update on

📍 Parks and recreation priorities to be discussed

Mick & Carlsbad Park Commission:

Happy Holidays and New Year.

Again thank you however in my email I asked – but did get a reply as to if City Staff will fully incorporate the extensive citizen input regarding Park Priorities and the demonstrated need for Ponto Park, and documented tax-payer cost efficiency (and far greater public benefits) of Ponto Park:

*“As noted in Kyle’s February 13, 2020 email below the over public 5,000 petitions citing the need and citizen desire for Ponto Park was to be factored into the Park Master Plan Update. We wanted to confirm staff has incorporated that need and input into the staff suggested Draft Parks Master Plan Update? People for Ponto Citizens had hoped the Parks Department would have provided some more (than 3-day) advance notice to citizens on the extensive citizen input on Ponto Park, and more opportunity to review and provide comments. Particularly given the holidays.*

*The Current Park Master Plan already documents that Ponto is “Unserved by City Parks” and an area that the City should provide City Parks. City Local Coastal Land Use Policies for Ponto (Planning Area F) and Mello II Policies also require consideration of City Park facilities at Ponto.*

*We wanted to confirm with you that all the Carlsbad Citizen input on the need for and desire for a meaningful Ponto Park has been incorporated into the proposed Draft Park Master Plan, and that the Park Master Plan provides for correction for unfair distribution of Coastal Parks in Carlsbad consistent with good Park planning and City planning practices, the CA Coastal Act regarding distribution and allocation of Coastal Recreation (i.e. Public Park) resources.*

*A confirmation from you regarding how staff incorporated and addressed the extensive citizen input on Ponto Park would be greatly appreciated, along with dates for other opportunities to comment, as many citizens will not be able to respond in the short time provided to review, particularly given the holidays”*

Citizens want to make sure the City staff, City Commissions and City Council, and CA Coastal Commission are properly disclosing and considering public input on Park Priorities/Needs for Ponto Park (and documented tax-payer cost effectiveness) as evidenced in well over 5,000 petitions, many spoken comments and written data/public input submitted at Council, Budget, Growth Management Plan Update meetings that relate to Carlsbad Parks, and Coastal land use and budgets.

Citizen concern about the City accurately accounting for and considering public input (priorities) is documented in multiple official Carlsbad Public Records Requests that showed the City did NOT communicate to citizens fully and accurately the Coastal Park, Coastal Open Space, and sea level rise impacts on high-priority Coastal Park and Open Space issues; and also did NOT implement the Local Coastal Program Land Use (Coastal Recreation i.e. Public Park) Policy requirements (both PSMP/LCP and Mello II LCP Policies) during both the 2010 CCC rejected Ponto Beachfront Village Vision Plan and the 2015 General Plan Update (that is not certified by the CCC as compliant with the CA Coastal Act).

The CCC also documented concerns to the City in 2010 rejecting the City's PBVVP in 2010 and in 2017 letters to the City.

Citizens are concerned the City's proposed Parks Master Plan Update process is failing to fully and accurately account for all the extensive citizen data and public input the City has received to date since 2017.

Can you please provide a clear reply as to if/how the City will be disclose, document, incorporate and consider the Ponto Park issues as noted in Kyle Lancaster's 2/13/20 email in the Park Master Plan considerations by Staff, Commissions and Council?

Please know People for Ponto citizens are concerned because they love Carlsbad and our CA Coast. They know high-priority Coastal Parks and Coastal Open Space are vital to Carlsbad's and California's future, particularly given increased population/visitor demand for these uses and the planned loss of these uses due to sea level rise and Coastal erosion.

Thank you.

Sincerely,  
Lance Schulte

**Subject:** RE: Public input to 12-13-22 Carlsbad Park Commission & Draft Local Coastal Program Update on 🙌 Parks and recreation priorities to be discussed

Hello, Mr. Schulte:

The purpose of the Dec. 12 special meetings of the Senior and Parks & Recreation Commissions, is to provide an opportunity for city staff and our consultant to share a preview of the public input the city received from the statistically reliable survey (only, at this time) and introduce program classifications and lifecycles that staff identified during a portion of the recreation and adults 50+ program assessments.

The data presented will include the City of Carlsbad's demographics and recreation trends – as compared to nationwide trends; a preview of the results of the master plan's statistically reliable survey - distributed randomly to Carlsbad households; and the outcome of the general recreation program assessment, as well as the adults 50+ recreation program assessment.

The presentation will conclude with an outline of the next steps to completion of the master plan update. Staff and the lead consultant plan to return to the Senior Commission with a draft of the master plan update for review in early 2023 (an additional opportunity for public comment – per your email, below).

Staff's recommended commission action is, "Receive an informational report on a portion of the data compiled in preparation for the Parks & Recreation Department's Master Plan Update."

I hope this information is helpful. We look forward to perhaps seeing you on Monday.

Sincerely,

Mick

**Subject:** Public input to 12-13-22 Carlsbad Park Commission & Draft Local Coastal Program Update on 🖱 Parks and recreation priorities to be discussed

Mick, Carlsbad Park Commission:

Thank you the Friday notice on the Monday meeting at the end of this email.

As noted in Kyle's February 13, 2020 email below the over public 5,000 petitions citing the need and citizen desire for Ponto Park was to be factored into the Park Master Plan Update. We wanted to confirm staff has incorporated that need and input into the staff suggested Draft Parks Master Plan Update? People for Ponto Citizens had hoped the Parks Department would have provided some more (than 3-day) advance notice to citizens on the extensive citizen input on Ponto Park, and more opportunity to review and provide comments. Particularly given the holidays.

The Current Park Master Plan already documents that Ponto is "Unserved by City Parks" and an area that the City should provide City Parks. City Local Coastal Land Use Policies for Ponto (Planning Area F) and Mello II Policies also require consideration of City Park facilities at Ponto.

We wanted to confirm with you that all the Carlsbad Citizen input on the need for and desire for a meaningful Ponto Park has been incorporated into the proposed Draft Park Master Plan, and that the Park Master Plan provides for correction for unfair distribution of Coastal Parks in Carlsbad consistent with good Park planning and City planning practices, the CA Coastal Act regarding distribution and allocation of Coastal Recreation (i.e. Public Park) resources.

A confirmation from you regarding how staff incorporated and addressed the extensive citizen input on Ponto Park would be greatly appreciated, along with dates for other opportunities to comment, as many citizens will not be able to respond in the short time provided to review, particularly given the holidays.

Thank you,  
Lance Schulte

**Subject:** RE: Develop Ponto Right - prior Ponto Coastal Park Support Letters and public comments to be included in Parks Master Plan public Comments

Lance-

I've consulted with the city attorney's representative on this matter. **She determined that the prior public input on the desire for a park at Ponto does not need to be resubmitted in order to be included in the public input process for the Parks & Recreation Department Master Plan Update. Rather, your email message below will serve as a cover sheet request for that prior public input to also be included as public input for the Parks & Recreation Department Master Plan Update.**

Thank you.

-Kyle

**Subject:** RE: Develop Ponto Right - prior Ponto Coastal Park Support Letters and public comments to be included in Parks Master Plan public Comments

**Importance:** High

Dear City Council, Kyle Lancaster, Mike Pacheco, and Mick Calarco:

We would like to receive confirmation that all the People for Ponto and other public comments as part of the public comments submitted on the:

1. Shopoff developer proposed application to change the Local Coastal Program Land Use on Planning Area F at Ponto,
2. the City Staff's proposed Draft Local Coastal Program Land Use Plan Amendment to change the Land Use on Planning Area F for the developer

be included in the City's Park Master Plan Update. Can you please confirm all this prior citizen input is also included in the Parks Master Plan Update?

These prior public comments and requests to the City Council and Kyle Lancaster, parks Director directly relate to Park needs at Ponto and Coastal South Carlsbad, and the City's Planning Area F LCP LUP Requirements to consider a Public Park at the site. The public input is from over 2,500 citizen and public communications already sent to the City Council and City Staff (as noted in the above To address list). In addition to those 2,500 citizen and public communications over 90-pages of extensive public comments and data showing among other things the City's Park Master Plan's Park Service Area deficit (Park Service inequity) at Ponto and Coastal South Carlsbad, Park Acreage Deficit in South Carlsbad, the lack of any City Park West of I-5 and rail corridor in all South Carlsbad, CA Coastal Act policies and Coastal Recreation data/issues, along with other City policy and regulation supporting a Park at Ponto. All this prior public input should be included in the Parks Master Plan Update. Can you please confirm that that is the case? Or do we have to re-email all these prior public comments?

Thanks,  
Lance  
People for Ponto

**One example of prior public comments submitted about Park deficits at Ponto and Coastal South Carlsbad and request for a City Park at Ponto:**

**Subject:** Develop Ponto Right - Support Letter

Dear Mayor Hall, Carlsbad City Council, and California Coastal Commission:

I am informed that

1. Carlsbad must consider on Planning Area F at Ponto the need for a public park at Ponto as part of the Draft Local Coastal Program Amendment.
2. There is no public park at Ponto even though City Park Standards requires a minimum of 6.5 acres of parkland for Ponto.
3. There is a current 6.6 acre park deficit in Coastal Southwest quadrant of Carlsbad, (south of Palomar Airport Road and west of El Camino Real).
4. There are no Coastal Parks in all of South Carlsbad. 64,000 South Carlsbad citizens have no Coastal Park.
5. Ponto is at the center of a larger 6-mile stretch of coastline in that has no Coastal Parks.
6. Ponto has a city documented 30 acre open-space standard deficit that a Coastal Park would help resolves.
7. And most importantly, I am informed that the City is currently ignoring these issues and in the Draft Local Coastal Program Amendment is proposing to eliminate the last opportunity to create a much needed Coastal Park at Ponto

Accordingly, I am requesting and making my position known that:

- I want the Draft Local Coastal Program Amendment to provide for a Coastal Park at Ponto.
- I want the City to provide a true Citizen-based Park Planning process for Ponto.
- I want the City of Carlsbad to budget money in their capital improvement program to purchase Planning Area F and build a park at Ponto to serve residents and visitors alike.
- I want to preserve what little Coastal Open Space Carlsbad has remaining for future generations and our visitor industry.

I am not in favor of future residential development at Ponto, but think this last small amount of vacant Coastal land should be reserved for Coastal Recreation.

One of the reasons that this lovely community continues to attract residents and tourists is the beauty of our natural surroundings, including coastline , parks and open spaces. Residential development is highly desired.. but INLAND, please! Protect our Coastal open spaces, for our good, and our visitors, for now AND the future. Once we squander it, it cannot easily be reclaimed...

Thank you  
Barbara M Kesten

**Subject:** 🙌 Parks and recreation priorities to be discussed 12/12

[View as Webpage](#)

On Monday city staff will provide an update on work completed to date on the new Parks & Recreation Master Plan with the Senior Commission and Parks & Recreation Commission. Information will include:

- A preview of the results of a citywide survey conducted by a third-party research company
- Assessments of the city's current recreation programs

This information builds on feedback gathered from the community about parks and recreation priorities and investments.

Monday, Dec. 12

City Council chamber

3 p.m. – [Senior Commission](#)

5:30 p.m. – [Parks & Recreation Commission](#)

You can watch the meetings live on the [City TV cable channel](#).

The [Parks & Recreation Master Plan](#) is a blueprint that will help guide priorities and investments in parks and recreation facilities and services for the next seven years. The city's existing Parks & Recreation Master Plan was completed in 2015, and the major projects have been completed. The updated plan will cover:

- Assessment of current parks, facilities and recreational programs
- Demographic and industry trends
- Community needs and priorities
- Funding needs and revenue opportunities
- A seven-year strategic action plan

This project started right before the COVID-19 pandemic, so it's taken longer than expected. For one thing, staff wanted to add another round of public input to see if anything major had changed as a result of the pandemic experience, once facilities were allowed to reopen. City staff are on track to present the draft master plan update to the City Council in early 2023.

### **Next steps**

January/February 2023: Draft updated master plan presented to Senior and Parks & Recreation commissions and City Council

March/April 2023: Final updated master plan presented to the City Council for adoption

**Subject:** Public input to the 1-16-22 Carlsbad Tomorrow Growth Management Committee, and upcoming Carlsbad City Council and Parks and Planning Commissions - LCPA and Growth Management-Parks Master Plan Updates - Parks & Open Space

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks and Planning Commissions, , CA Coastal Commission and CA State Parks:

As the City has requested specific reference regarding public input, I ask you to please deliver to the those address this email and attachment as public input for:

1. the CTGMC's 1/26/22 meeting,
2. the next Carlsbad Council meeting,
3. the next Carlsbad Planning and Parks Commission meetings on the Parks Master Plan and Growth Management Program Updates, Ponto Planning Area F and Site 18 land use changes, and Local Coastal Program Amendments, and
4. as public input to the CCC on Carlsbad proposed Local Coastal Program, and
5. as public input to Carlsbad's proposed Local Coastal Program Amendment.

At the 1-11-22 CTGMC meeting questions logically arouse about how Ponto/LFMP-9 was falsely exempted from the Growth Management Open Space Standards in 1986 when the two adopted reasons for that exemption were not true per the City's Open Space map/data base, air-photos and development records, and the requirements of the Growth Management Ordinance and Open Space Standard. People for Ponto Carlsbad Citizens have been bringing this up to the City since 2017 when we first had City data that showed the GM Open Space Standard exemption was incorrect. Attached is some more detailed data that provides a History of Open Space at Ponto – 2022-1-26. There are more details and interesting bits of information, but the attached provides the basics on the History and also offers some critical historical context for the CTGMC, Carlsbad Commissions, City Council and Carlsbad Citizens to consider. I hope this is helpful.

The History of Ponto Open Space and historical context fits into the 'CTGMP Key Issues and Suggestions – 2022-12-6' file and email to you on 8/8/22 and 12/13/22 that provides a time-tested, logical, legal, tax-payer saving approach to dealing with the missing Ponto Open Space and need for a significant Coastal Park at Ponto to serve Ponto and South Carlsbad and relieve Coastal Park pressures on North Carlsbad.

Please know People for Ponto Carlsbad Citizens deeply care and love Carlsbad. We bring the data and requests to you because we care. You have received well over 5,000 People for Ponto petitions regarding Ponto Park and Open Space. During the CTGMC meetings many have spoken and submitted in favor of the issues identified in the People for Ponto petitions. I may have missed it but do not recall any Carlsbad citizen speak/submit to the CTGMC in opposition to what People for Ponto Carlsbad Citizens have provided you. As representative of the Citizens of Carlsbad we ask you honestly represent the Carlsbad Citizen desires so overwhelming expressed to you.

Thank you, and with Aloha Aina for Carlsbad,  
Lance

## **History of the false exemption of the Growth Management Open Space Standard provided Ponto developers in Local Facility Management Plan Zone 9 (LFMP-9):**

---

The history of how required Growth Management Open Space (i.e. unconstrained/developable land) that should have been dedicated Open Space was, and is now being proposed to be, inappropriately converted to Residential land use by a Perpetuating a False Exemption of the Open Space Standard provided Ponto Developers. This False Exemption needs correction and restitution. Ponto's False Exemption of the Open Space Standard and the 'amendment shell-game' GM Open Space history is a critical warning sign to the **Carlsbad Tomorrow** Growth Management Committee, Planning Commission and City Council. Ponto is a critical warning that a strong, accountable and accurate Open Space Standard needs to be established for **Carlsbad Tomorrow**, AND a Growth Management Open Space restitution plan needs to be established and funded that corrects the False Exemption for Ponto Developers. If Ponto Developers were required like other similar developers at the time (Aviara and Poinsettia Shores, "urbanizing La Costa Zones 11 & 12, etc.) to provide the required Growth Management Open Space some of the critical Coastal Recreation and Coastal Park issues and extensive Carlsbad Citizen needs/demands/desires at Ponto could likely have already been addressed.

### How citizens found out about the False Exemption provided Ponto Developers:

In 2017 for the 1<sup>st</sup> time the city provided the GIS maps/data base accounting of Open Space in the City. The City did this a part of settlement to a North County Advocates citizens' lawsuit. The City Open Space maps/data base allowed Carlsbad Citizens for the 1<sup>st</sup> time the ability to see and confirm what Open Space was produced by Growth Management (GM). The City's Open Space map/data based for Ponto (LFMP-9) documented that about 30-acres of GM Open Space was missing (see; Carlsbad Official Public Records Request - PRR 2017-164). As required by GM, and as Staff has said, to count as GM Open Space it must be dedicated and 'unconstrained/developable land' to meet the GM Open Space Standard. Being able to see for the 1<sup>st</sup> time the missing GM Open Space was one of the key awakenings that started People for Ponto Carlsbad Citizens. Below is the City's Open Space Map for LFMP-9, with notes. We have the City's parcel-based Open Space data base that confirms all the numerical data in the notes.

**City GIS map of Ponto's (LFMP Zone 9) Open Space:**

- Light green areas meet the City's 15% unconstrained Growth Management Program Open Space Standard
- Most Ponto Open Space (pink hatch & blue [water] on map) is "Constrained" and does not meet the Standard
- **Aviara - Zone 19, Ponto - Zone 9 and Hanover/Poinsettia Shores – Zone 22 all developed around the same time and had similar vacant lands.**
- **City required Aviara - Zone 19 east of Ponto to provide the 15% Standard Open Space. Why not Ponto? Aviara had the same lagoon waters.**
- **City required Hanover & Poinsettia Shores area Zone 22 just north of Ponto to provide the 15% Standard Open Space. Why not Ponto?**
- Why Ponto developers were never required to comply with the 15% Standard Open Space is subject to current litigation
- Below is City GIS data from this map

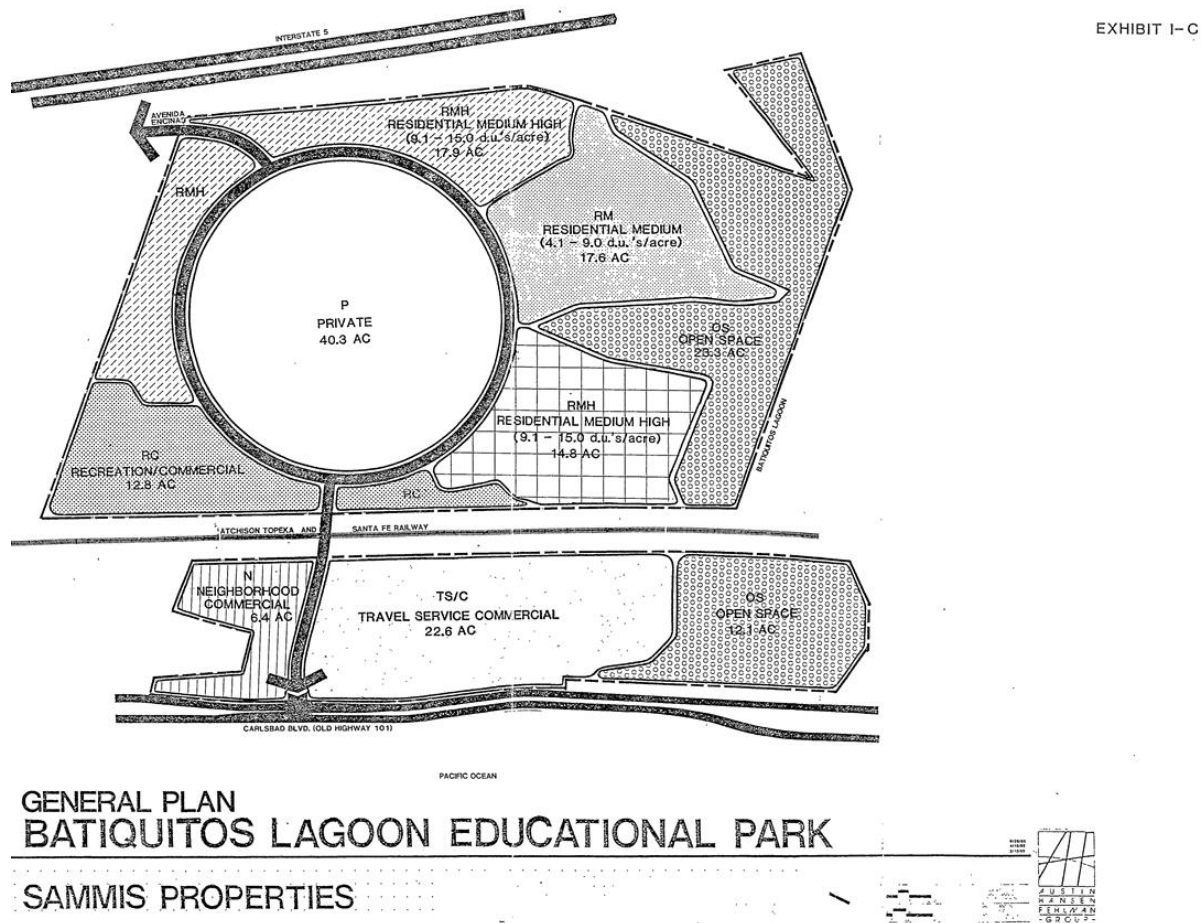

**City GIS map data summary of the 15% Growth Management Standard Open Space at Ponto**

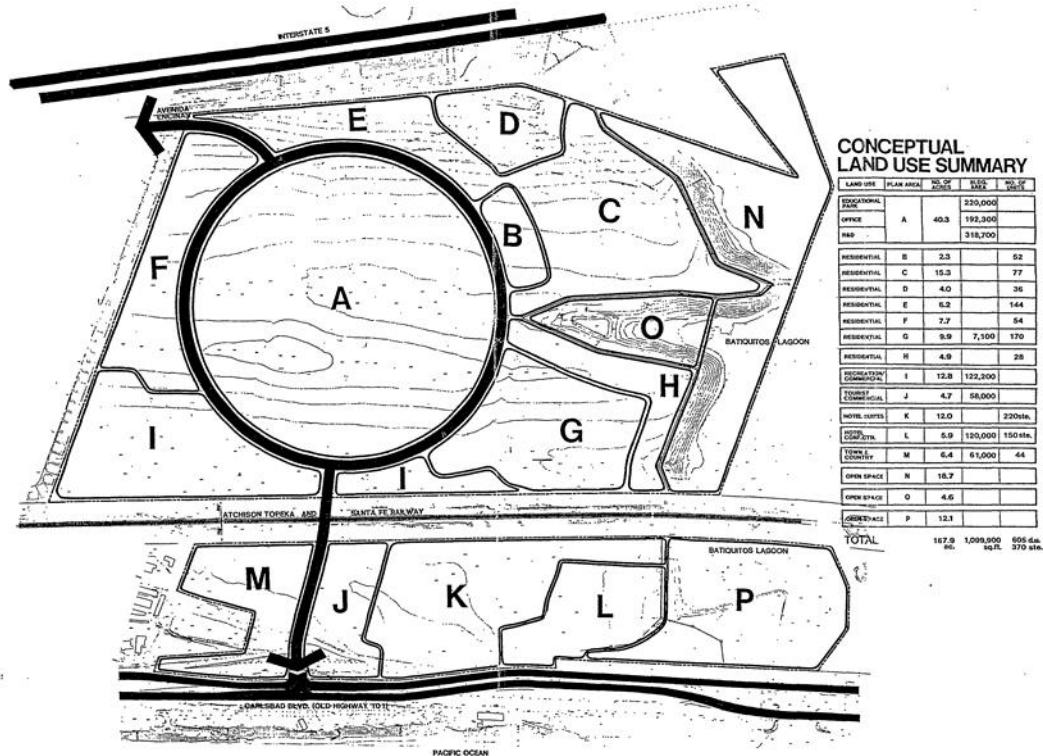

472 Acres	Total land in LFMP Zone 9 [Ponto]
<u>(197 Acres)</u>	Constrained land excluded from GMP Open Space
275 Acres	Unconstrained land in LFMP Zone 9 [Ponto]
<u>X 15%</u>	GMP Minimum Unconstrained Open Space requirement
41 Acres	GMP Minimum Unconstrained Open Space required
<u>(11 Acres)</u>	GMP Open Space provided & mapped per City GIS data
<b>30 Acres</b>	<b>Missing Unconstrained Open Space needed in LFMP Zone 9 [Ponto] to meet the City's minimum GMP Open Space Standard per City's GIS map &amp; data</b>
	<b>73% of the City's minimum 15% required Open Space Standard is missing due to over development of LFMP Zone 9 [Ponto]</b>

So were did the missing GM Open Space go?

In early 1985 prior to the Ponto's developer (SAMMIS) annexing Ponto into the City of Carlsbad, San Diego County's LAFCO (local agency formation commission) General Planned and pre-zoned, Ponto's Batiqitos Lagoon waters and the lagoon bluff slopes as Open Space. This Open Space was "Constrained Open Space" – State jurisdictional waters, and steep slopes with Coastal Sage Scrub (CSS) habitat. These already pre-zoned constrained/non-developable Open Spaces were accounted for as part of the City's 25% pre-Growth Management Plan Open Space, and per Growth Management can't be counted in meeting the 15% Growth Management Open Space Standard. The pre-zoned Open Space is shown in the City's Open Space map and properly marked as "Preservation of Natural Resources" Open Space land. This already pre-zoned Constrained (non-developable, aka 'Preservation of Natural Resources') Open Space land at Ponto was documented in the proposed SAMMIS Batiqitos Lagoon Educational Park (BLEP) Master Plan MP-175 as Areas N, O, and P in the Land Use Summary below.

On Oct, 1 1985 Carlsbad approved SAMIS's Master Plan and EIR to develop Ponto. SAMIS's BLEP Master Plan MP-175. Following are BLEP MP-175's General Plan & Land Use Summary maps:

**CONCEPTUAL LAND USE PLAN  
BATIQUITOS LAGOON EDUCATIONAL PARK**  
**SAMMIS PROPERTIES**

The BLEP MP-175 did include a variety of GM compliant Open Space.

- 12.8 acre Recreation Commercial land use that was playfields and Coastal Recreation site for MP-175 and South Carlsbad. This is a Critical GM Open Space that was never dedicated.
- A minimum 30' wide landscaped Open Space on both sides of Windrose Circle that circled the Area P. Windrose Circle was bordered on each side by 30' of landscaped Open Space.
- Additional minimum 30' wide landscaped setbacks between buildings in Area A
- 2.8 acres of private recreation open space for the maximum amount of residential units
- 45' to 50' landscaped setbacks from the Batiquitos Lagoon Bluff edge (this was later developed with Residential land use in some areas of Ponto).
- 75' landscaped separation between Areas C and D
- 70' landscaped separation between Areas D and E
- 25' landscaped setback along Avenida Encinas for Area E
- 30' to 80' landscape setback between Lakeshore Gardens and Area F
- 25' landscaped setback along Avenida Encinas for Area F
- 50' landscaped setback between Areas F and I
- 75' landscaped separation between Areas G and H
- 50' to 80' landscape setback for Area I between Lakeshore Gardens and between Area F

So, prior to Ponto being annexed into the City of Carlsbad in the mid-1980's and prior to Growth Management the Batiquitos Lagoon and lagoons bluff slopes (constrained and unusable due to habitat and slope constraints) were already pre-zoned Open Space and General Planned as Constrained Habitat Open Space. This constrained Open Space did not and cannot meet the 15% GM Open Space Standard.

In 1986 Citizens voted for the City's version of Growth Management that included a New Standard for Useable Open Space. The new standard was that 15% of all unconstrained useable/developable land within a Local Facility Management Zone was to be dedicated as Open Space. Once the vote was in the City adopted the Growth Management Ordinance 21.90 of Carlsbad's Municipal Code (City Council Ordinance No. 9791. (Ord. 9829 § 1, 1987; Ord. 9808 § 1, 1986)).

In adopting the Growth Management Ordinance 21.90.010 the Council Clearly stated:

(b) The city council of the city has determined **despite previous city council actions**, including but not limited to, amendments to the land use, housing, and parks and recreation elements of the general plan, amendments to city council Policy No. 17, adoption of traffic impact fees, and modification of park dedication and improvement requirements, that the demand for facilities and improvements has outpaced the supply resulting in shortages in public facilities and improvements, including, but not limited to, streets, **parks, open space**, schools, libraries, drainage facilities and general governmental facilities. **The city council has further determined that these shortages are detrimental to the public health, safety and welfare of the citizens of Carlsbad.**

(c) This chapter is adopted to ensure the implementation of the policies stated in subsection (a), to eliminate the shortages identified in subsection (b), **to ensure that no development occurs without providing for adequate facilities and improvements, ..."**

The Citizens and Council recognized that prior City plans were not adequate to address the current (and future) needs for facilities. Upon adoption of the New Growth Management Standards certain facilities were already below-Standard simply based on the existing development and population. Growth Management required additional facilities simply to bring the then current development/population up to the New Minimum Standards. I am personally familiar with 3 GM Standards in LFMP-6 (old La Costa) that I worked on – Library, Fire, and Park where already below-Standard i.e. existing development/population in Old La Costa required more facilities to meet the new Growth Management Standards. We worked to provide these new facilities for the existing development/population (i.e. fix the Standard deficits) and then to also plan even more additional facilities at a ratio that met the New Standards for the additional future development in Old La Costa. I can provide you some interesting stories on that.

I also recall working on the surrounding La Costa LRMP Zones 11 & 12 that Like Ponto/FMP-9 were considered "Cat II: Urbanizing" yet Unlike Ponto/LFMP-9 LFMP Zone 11 & 12 were not falsely exempted

for the GMP Open Space Standard and had to provide the GM Open Space Standard of 15% of the unconstrained/developable lands as dedicated Useable Open Space.

The Citizens vote on Proposition E and the subsequent Growth Management Ordinance 21.90 are the rules on which the Growth Management Plans (both Citywide and 25 Local Facility Plans) are required to follow.

To create the Citywide and the Local plans (Zones 1-6) for the largely developed areas the City needed to temporarily pause development activity to allow time for city staff to Draft the Growth Management Plan (my work as a city planner at the time was re-directed to draft growth management plans). So the Growth Management Ordinance 21.90.030, established a Temporary Development Moratorium to pause development processing activity while the Growth Management Plan was being Drafted. Following is that language of 21.90.030. Notes are shown as italicized text within *[example]*:

“21.90.030 General prohibition—Exceptions.

(a) Unless exempted by the provisions of this chapter, **no application for any building permit or development permit shall be accepted, processed or approved until a city-wide facilities and improvements plan has been adopted and a local facilities management plan for the applicable local facilities management zone has been submitted and approved according to this chapter.** *[Clearly indicates the exemptions in 21.90.030 are only from the temporary development moratorium created by 21.90.]*

(b) No zone change, general plan amendment, master plan amendment or specific plan amendment which would increase the residential density or development intensity established by the general plan in effect on the effective date of this chapter shall be approved unless an amendment to the citywide facilities management plan and the applicable local facilities management plan has first been approved. *[FYI, this provision of 21.90.030 has direct implications with respect of currently City/developer proposed General Plan/Zoning code/Local Coastal Program Amendments now being pursued by the City at Ponto Planning Area F and Ponto Site 18. The City did not and has not yet amended the CFMP and LFMP-9 to increase the City/developer proposed residential density or development intensity at Ponto]*

(c) The classes of projects or permits listed in this subsection shall be exempt from the provisions of subsection (a). Development permits and building permits for these projects shall be subject to any fees established pursuant to the city-wide facilities and improvement plan and any applicable local facilities management plan. *[Then lists various exemptions from the temporary development processing/building permit moratorium in 21.90. The BLEP MP's exemption from the temporary moratorium is (g)]*

(g) The city council may authorize the processing of and decision making on building permits and development permits for a project with a master plan approved before July 20, 1986, subject to the following restrictions *[this only applies to the “approved before July 20, 1986” BLEP MP, and NOT to any subsequent Master Plan Amendment]:*

- (1) The city council finds that the **facilities and improvements required by the master plan are sufficient to meet the needs created by the project and that the master plan developer has agreed to install those facilities and improvements to the satisfaction of the city council.** *[The Ponto developer needed to provide the 12.8 acre Recreation Commercial land use and install the GM compliant Open Space required in the 1986 MP175 but did not]*
- (2) The master plan developer shall agree in writing that all facilities and improvement requirements, including, but not limited to, the payment of fees established by the city-wide facilities and management plan and the applicable local facilities management plan shall be applicable to development within the master plan area and that the master plan developer shall comply with those plans. *[this required the LFMP-9/BLEP MP to have 1) already been fully developed or 2) have already have dedicated 15% of the LFMP-9 as Growth Management compliant Open Space (i.e. Unconstrained and developable) to qualify for the Open Space exemption later falsely noted in the city-wide facilities and management plan. As clearly documented the BLEP MP did not meet the requirements to qualify for Open Space Standard Exemption in the city-wide facilities and management plan. The section also requires “all facilities” (including Open Space) requirements in the Citywide Growth Management Standard to apply to BLEP MP, not provide a means for a false exemption of the Open Space Standard]*
- (3) The master plan establishes an educational park and **all uses within the park comprise an integral part of the educational facility.** *[“all uses” including the 12.8 acre Recreation Commercial land use and all the other GM compliant Open Spaces are an integral part. However the 12.8 acre open space land use was never built and the BLEP MP GM compliant Open Space never dedicated.]*
- (4) **Building permits for the one hundred twenty-nine [129] unit residential portion of Phase I of the project may be approved provided the applicant has provided written evidence that an educational entity will occupy Phase I of the project** which the city council finds is satisfactory and consistent with the goals and intent of the approved master plan. *[Clearly indicates the 21.90.030 exemption is only for building permits for Phase I of the BLEP MP. Of the 129 units only the 75 unit Rosalena development applied for and received building permits under this exemption. There are some very interesting issues related to this Rosalena Phase I development relative to GM complaint Open Space along the bluff edge that can be expanded on later if the CTGMC has questions.]*
- (5) Prior to the approval of the final map for Phase I the master plan developer shall have agreed to participate in the restoration of a significant lagoon and wetland resource area and made any dedications of property necessary to accomplish the restoration. *[Again clearly notes the exemption only allows a final map for Phase I to be processed. The “lagoon and wetland resource area” are part of the same constrained/undevelopable lands already pre-zoned prior to the BLEP MP being incorporated into the City of Carlsbad]*

The Aviara Master Plan (directly adjacent and east of Ponto) and was also being developed at the same time as Ponto/BLEP MP. 21.90.030 also provided the Aviara Master Plan a similar exemption (h) and similar lagoon related quid-pro-quo for that exemption. But Aviara did not receive a GM Open Space Standard Exemption. :

“(iv) Prior to any processing on the [Aviara] master plan the applicant shall grant an easement over the property necessary for the lagoon restoration and the right-of-way necessary for the widening of La Costa Avenue and its intersection with El Camino Real. (Ord. NS-63 § 1, 1989; Ord. 9837 § 1, 1987; Ord. 9808 § 1, 1986)”

Some City staff have incorrectly stated to the City Council that they believe 21.90.030 exempts Ponto/LFMP-9 from the Growth Management Ordinance/Program or Growth Management Open Space Standard. RESOLUTION NO. 8666- A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF CARLSBAD, CALIFORNIA APPROVING TWO AGREEMENTS FOR BATIQUITOS LAGOON EDUCATIONAL PARK also shows the 21.90.030 exemption was only for development permits during the temporary building moratorium.

In 1986 the City falsely exempted in the Citywide Facilities Plan all Ponto developers from providing 15% of their useable/developable land as GM required Open Space. The City’s documented/adopted rationale in the Citywide Plan was that Ponto/LFMP-9 was 1) in 1986 already developed, or 2) in 1986 the developer had already met the GM Open Space Standard by having already dedicated 15% of the useable land as Open Space. Both situations were/are false. Any air photo map or even the 1986 LFMP-9 clearly states Ponto was NOT developed in 1986, as only the Lakeshore Gardens existed and the Ralphs Center was just starting construction. Also the City’s GIS Open Space mapping (see above) shows that SAMMIS the Ponto developer (BLEP Master Plan MP-175) in 1986 had Not dedicated as Open Space 15% of the useable land as Growth Management compliant Open Space as shown/described in the BLEP MP (i.e. the 12.8 Acre Recreation Commercial site and all the landscaped open space setbacks required in the BLEP MP-175. If that 15% was dedicated in 1986 it would show-up on the City’s inventory of Dedicated Open Space now. So how did this occur?

How Ponto’s planned GM Open Space was eliminated and replaced with Residential land use:

In late 1980’s SAMMIS the BLEP MP-175 developer started building the 75-home Rosalena Development as the first part of Phase I of the BLEP MP. The City (based on my recollection was very desirous to develop the BLEP MP) and required special time limits on the BLEP MP to actually advance building the ‘Educational Park’ with all the “initiated” land uses (including GM compliant Open Space) within a certain period of time. SAMIS was having financial issues and difficulty delivering the BLEP MP land uses. Amendments (A, B, and C) to BLEP MP reflected on these difficulties:

- MP 175(A) to allow minor accessory structures within the rear yards of all Phase I single family lots located in Planning Area “C”. *[This is the Rosalena development that was part of Phase I for BLEP MP. This amendment has implications on the landscaped Open Space setback along the Batiquitos Lagoon bluff top, and the required Coastal access trail required by the Coastal*

*Development Permit for Rosalena. This is an interesting history that can be explained later if the CTGMC would like.]*

- MP 175(B) to realign Carlsbad Blvd., between North Batiquitos Lagoon and west of I-5 to accommodate the Sammis Development was WITHDRAWN January 12, 1990, and
- MP 175(C) a request for 5-year extension of time for Master Plan approval related to educational uses on this project was Approved Planning Commission Resolution No. 2841, April 19, 1989 and approved City Council Ordinance No. NS-83, September 5, 1990.

SAMMIS went bankrupt around 1990 and Kaiza Development purchased the BLEP MP. Kaiza completed the Rosalena development started by SAMMIS. Kaiza then sought to completely change the planned land uses on all the remaining unconstrained/developable land in the BLEP MP.

General Plan and Master Plan Amendments eliminated/reduced BLEP's Growth Management compliant Open Space and replace with Residential uses in the "amended" Poinsettia Shores Master Plan:

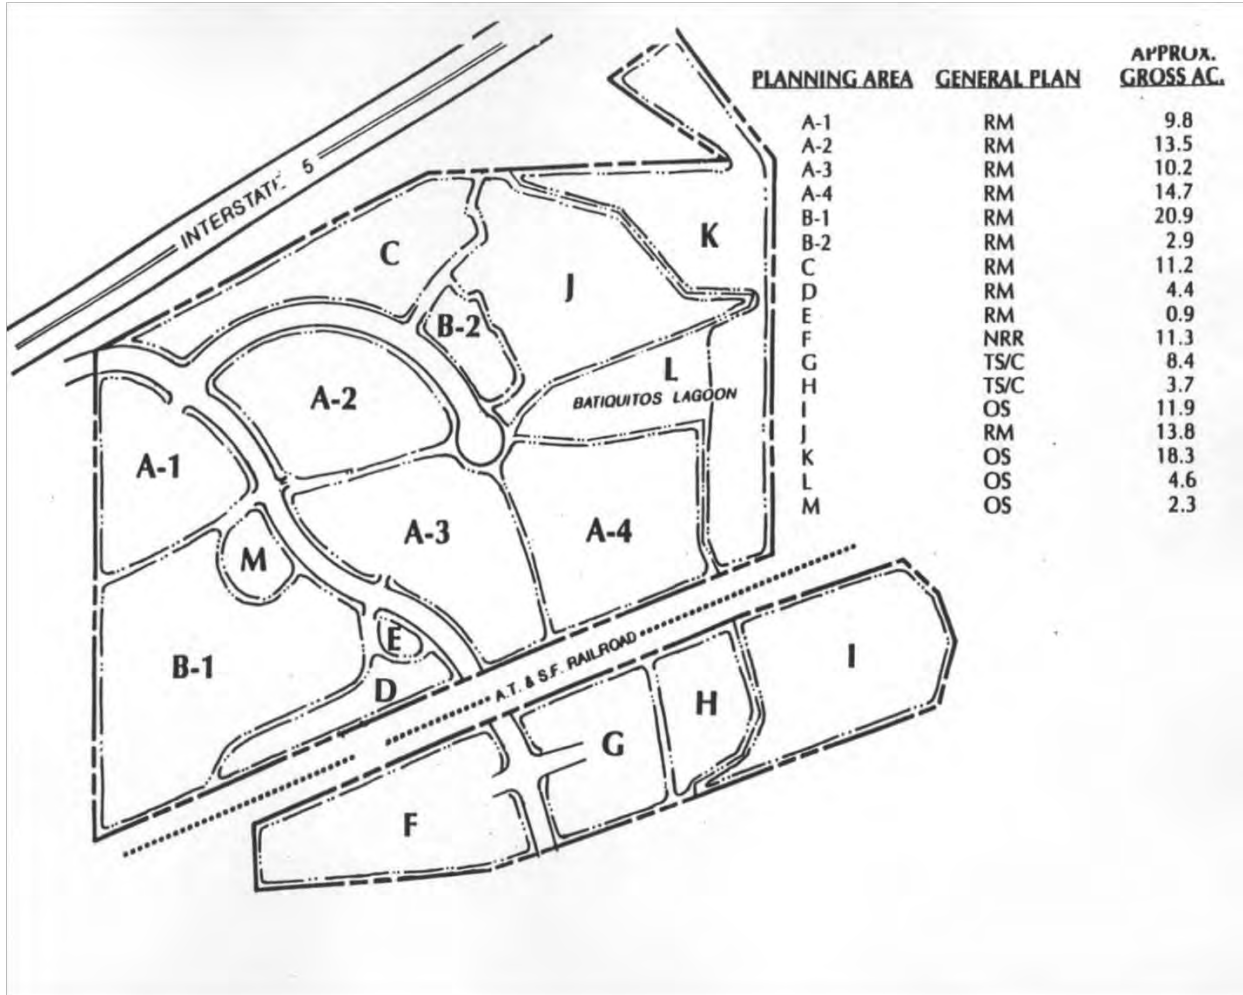

When Kaiza acquired the BLEP MP-175 and its vacant land only the State Campground, Lakeshore Gardens, Ralphs Center, and now Rosalena were approved/existing developments at Ponto. Kaiza proposed a Master Plan Amendment to delete the BLEP MP-175 and all its developable land uses, except for the only portion of Phase I developed – the 75 unit Rosalena subdivision. The pre-BLEP MP pre-zoned (and General Planned) constrained/undevelopable Lagoon waters and lagoon bluff Open Spaces and the CA Coastal Act (LCP) required bluff top setbacks were the only Open Spaces retained in Kaiza's proposed General Plan land use and Master Plan Amendments.

Most all of the BLEP MP-175 (and Ponto/LFMP-9) land area was still undeveloped at the time Kaiza proposed changing all the General Plan land uses at Ponto and eliminating the usable Open Space in BLEP MP.

Kaiza's General Plan land use and Master Plan 'Amendments' made radical land use changes that converted some critical Useable GM Open Space to residential land use and also reduced some GM Open Space provided in BLEP MP. Following is Kaiza's Amended General Plan land use map and bullet summary of the major Open Space changes without getting into a very detailed forensic analysis:

- Eliminated the 12.8 acre Recreation Commercial land use.
- Eliminated the minimum 30' wide landscaped Open Space on both sides of Windrose Circle for the large unbuilt portions of Windrose Circle
- Reduced by 10' the landscaped Open Space on the smaller built portion of Windrose Circle
- Eliminated on 40.3 acres the additional minimum 30' wide landscaped setbacks between buildings
- Reduced BLEP's 2.8 acres of private recreation open space to 2.3 acres
- Except for the Rosalena (BLEP Area C) and (PSMP Area J), maintained the 45' to 50' landscaped setbacks from the Batiquitos Lagoon Bluff edge
- Eliminated the 75' landscaped separation between BLEP MP Areas C and D

- Eliminated the 70' landscaped separation between BLEP MP Areas D and E
- Maintained the 25' landscaped setback along Avenida Encinas. [However new Master Plan Amendments MP-175L propose reducing the setback to 10' on the undeveloped frontage of Avenida between PCH and the railroad tracks]
- Placed a road in most of the 80' landscape setback between Lakeshore Gardens
- Eliminated the 50' landscaped setback between BLEP MP Areas F and I
- Eliminated the 75' landscaped separation between BLEP MP Areas G and H
- Added a 20' wide by 1,000' long landscaped strip for an HOA trail

Kaiza's Master Plan Amendment MP 175 (D) eliminated the 12.8 acre Open Space land use (with an associated General Plan Amendment to add more residential land use) and reduced the other useable Open Spaces required in the BLEP MP. When the 1994 Kaiza MP 175 (D) General Plan Amendments were proposed, it seemed they voided the '1986 GM Open Space exemption' that was clearly specific only to the 1986 BLEP MP land uses and regulation. Although this was a false exemption, the exemption only applied to the complete/integrated land use and open space provided in the 1986 BLEP MP. The 1986 exemption specific to BLEP MP could not apply to a different and later 1994 General Plan land use plan that eliminated the 12.8 acre Recreation Commercial (Open Space) site to add residential land use

and that also reduced the GM compliant Open Space provided in the 1986 BLEP MP. 21.90.030(b) notes that:

**“(b) No zone change, general plan amendment, master plan amendment or specific plan amendment which would increase the residential density or development intensity established by the general plan in effect on the effective date of this chapter shall be approved unless an amendment to the citywide facilities management plan and the applicable local facilities management plan has first been approved.”**

The 1994 Kaiza General Plan land use and Master Plan (MP 175(D)) Amendments removed 12.8 acres of Recreation Commercial (GM compliant Open Space) to add residential land use. This violated 21.90.030(b) by doing so without a first providing a Citywide Facilities Plan Amendment that analyzed the actual amount of GM compliant Open Space being proposed in the 1994 Kaiza MP 175(D) relative to the 1986 BLEP MP on which the 1986 GM Open Space exemption for LFMP-9 was based. MP 175(D) is noted in the MP as follows:

- “MP 175 (D) Kaiza Poinsettia Master Plan To **replace educational uses with residential land uses** And rename to Poinsettia Shores Master Plan (was) Approved Planning Commission Resolution No. 3552, November 3, 1993, Approved City Council Ordinance No. NS-266, January 18, 1994.”

Kaiza’s MP 175(D) inaccurately and bizarrely claimed BLEP MP’s prior false exemption from the GM Open Space Standard as the justification that Kaiza’s new 1994 Open Space land use changes that seem to reduce the amount of GM complaint Open Space in the 1986 BLEP MP are also exempt from the GM Open Space Standard. **Kaiza’s MP 175(D) claims the pre-Growth Management and pre-BLEP MP Constrained/Undevelopable lagoon waters and bluff habitat that per the 15% Growth Management Open Space Standard CAN NOT be counted as meeting the 15% GM Open Space Standard can be magically counted as meeting the 15% GM Open Space Standard. The GM Open Space Standard specifically states that only Unconstrained/Developable lands CAN BE counted as meeting the GM Open Space Standard.** The stated principles of Growth Management, the Growth Management Ordinance 21.90 and the Growth Management Open Space Standard DO NOT allow a developer or the City to count already documented Constrained and unbuildable habitat (and water) as Unconstrained and developable land. You can’t just turn ‘an apple into a banana by saying it’, or turn ‘Constrained/Undevelopable land into Unconstrained/Developable land by just saying it.

Compliance with the law in this Open Space issue is a part of a current lawsuit by North County Advocates a group of Citizens watchdogs. The City has unsuccessfully tried to diminish this lawsuit. A judge/jury will determine the outcome.

Additional MP 175 Amendments have been proposed by and approved to further modify land use and regulatory limitations at Ponto. These include:

- MP 175(E) Poinsettia Shores Master Plan, Redefinition of minor amendment to provide a flexible regulatory procedure to encourage creative and imaginative planning of coordinated communities, WITHDRAWN November 1, 1994

- MP 175(F) Poinsettia Shores Master Plan minor amendment to actualize off-site option for provision of 90 affordable housing dwelling units, Approved Planning Commission Resolution No. 3774, April 19, 1995
- MP 175(G) Poinsettia Shores Master Plan minor amendment to adopt Coastal Commission Suggested modifications, Approved Planning Commission Resolution No. 3922, June 5, 1996 Approved City Council July 16, 1996, NS-367
- MP 175(H) Poinsettia Shores Master Plan - major amendment FOR HOTEL AND TIMESHARE USES, WITHDRAWN January 16, 2003
- MP 175(I) Poinsettia Shores Master Plan – Rosalena Trail Amendment, WITHDRAWN January 8, 2002
- MP 175(J) Poinsettia Shores Master Plan – major amendment for Carlsbad Coast Residential project to allow RM land use on Poinsettia Shores, WITHDRAWN January 8, 2002
- MP 175 (K) Poinsettia Shores Master Plan – Ponto Area Specific Plan Mixed use consisting of residential, commercial and retail uses, WITHDRAWN August 19, 2004
- MP 175(L) Poinsettia Shores Master Plan – Major amendment for commercial and residential development on Planning Area F, Still being proposed by developers and being processed by the City.

**The false exemption for the BLEP MP based LFMP-9 should never have occurred. However, completely eliminating BLEP MP’s OpenSpace land use (12.8 acre Recreation Commercial) and reducing BLEP MP’s required Open Space while at the same time claiming the false BLEP MP Open Space Exemption is a violation of common sense, 21.90, and the very founding principles Growth Management.**

The CA Coastal Commission in MP 175 (G) in part recognized the elimination of the 12.8 acre Recreation Commercial land use and maybe some of the Open Space land use changes and added the following land use regulations for 11.1 acre Planning Area F in the Carlsbad’s Local Coastal Program LCP). The LCP as per State Law and referenced in Carlsbad’s General Plan is the controlling land use regulation over the General Plan, Poinsettia Shores Master Plan and in the Coastal Zone:

“PLANNING AREA F: Planning Area F is located at the far northwest corner of the Master Plan area west of the AT&SF Railway right-of-way. This Planning Area has a gross area of 11 acres and a net developable area of 10.7 acres. Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an “unplanned” area, for which land uses will be determined at a later date when more specific planning is carried out for areas west of the railroad right-of-way. A future Major Master Plan Amendment will be required prior to further development approvals for Planning Area F, and shall include an LCP Amendment with associated environmental review, if determined necessary.

The intent of the NRR designation is not to limit the range of potential future uses entirely to nonresidential, however, since the City's current general plan does not contain an “unplanned” designation, NRR was determined to be appropriate at this time. In the future, if the Local Coastal Program Amendment has not been processed, and the City develops an “unplanned”

General Plan designation, then this site would likely be redesignated as “unplanned.” Future uses could include, but are not limited to: commercial, residential, office, and other uses, subject to future review and approval.

**As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.”**

In 2010 the CA Coastal Commission in 2010 rejected the Ponto Beachfront Village Vision Plan on which MP 175(K) was based. MP 175(K) was withdrawn.

On July 3, 2017 the CA Coastal Commission provided direction to the City of Carlsbad regarding MP 175(G), Carlsbad’s 2015 General Plan Update, Carlsbad proposed Local Coastal Program Amendment Land Use Plan (LUP) . CA Coastal Commission wrote to the City the following. Notes on the context of communication are in bracketed italics *[example]*:

“The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto ... area. For example, **Planning Area F requires the city and developer to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e., public park) on the west side of the railroad. ...** this study should be undertaken as a part of the visitor serving use inventory analysis described above. *[the discussion of the need for the City to conduct a citywide analysis of the location and amount of these uses in the Coastal Zone to assure the City General Plan within the Coastal Zone is providing the adequate amounts and locations of these land uses to fulfill the long-term population/visitor needs for these uses according to the CA Coastal Act]* **If this analysis determines that there is a deficit of low cost visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed.”**

In 2017 the City conducted the first Sea Level Rise (SLR) Vulnerability Assessment <https://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=33958> . That first initial analysis, shows significant SLR impacts that will reduce existing Ponto Open Space - the State beach and Campground and along the Batiquitos Lagoon. The City identified SLR impacts on Ponto Open Space are summarized in the next section of this history.

In 2023 the CA Coastal Commission will consider the data and public input and decide the appropriate land use for 11.1 acre Planning Area F based the CA Coastal Act and Coastal Act land use policies.

You can determine the Open Space and Park Quality of Life Standards that will be applied to this and other future land uses.

[City assessment of Sea Level Rise impacts on reducing Ponto Open Space](#)

The City's 2017 SLR assessment shows SLR will significantly reduce or eliminate only existing Open Space land at Ponto. The City's assessment quantifies the sporadic/episodic loss of Ponto/Coastal South Carlsbad Open Space land and land uses being at the State Campground, Beaches, and Batiquitos Lagoon shoreline – about 32 acres by the year 2100, this would be an average loss of 17,000 square feet of Open Space per year. Following (within quotation marks) is a description, quantification and images of the City's projected loss of Ponto/Coastal South Carlsbad Open Space land and land use due to SLR. *[Italicized text within brackets]* is added data based on review of aerial photo maps in the Assessment.

“Planning Zone 3 consists of the Southern Shoreline Planning Area and the Batiquitos Lagoon. Assets within this zone are vulnerable to inundation, coastal flooding and bluff erosion in both planning horizons (2050 and 2100). A summary of the vulnerability assessment rating is provided in Table 5. A discussion of the vulnerability and risk assessment is also provided for each asset category.

#### 5.3.1. Beaches

Approximately 14 acres of beach area is projected to be impacted by inundation/erosion in 2050. ... Beaches in this planning area are backed by unarmored coastal bluffs. Sand derived from the natural erosion of the bluff as sea levels rise may be adequate to sustain beach widths, thus, beaches in this reach were assumed to have a moderate adaptive capacity. The overall vulnerability rating for beaches is moderate for 2050.

Vulnerability is rated moderate for the 2100 horizon due to the significant amount of erosion expected as the beaches are squeezed between rising sea levels and bluffs. Assuming the bluffs are unarmored in the future, sand derived from bluff erosion may sustain some level of beaches in this planning area. A complete loss of beaches poses a high risk to the city as the natural barrier from storm waves is lost as well as a reduction in beach access, recreation and the economic benefits the beaches provide.

#### 5.3.3. State Parks

A majority of the South Carlsbad State Beach day-use facilities and campgrounds (separated into four parcels) were determined to be exposed to bluff erosion by the 2050 sea level rise scenario (moderate exposure). This resource is considered to have a high sensitivity since bluff erosion could significantly impair usage of the facilities. Though economic impacts to the physical structures within South Carlsbad State Beach would be relatively low, the loss of this park would be significant since adequate space for the park to move inland is not available (low adaptive capacity). State parks was assigned a high vulnerability in the 2050 planning horizon. State park facilities are recognized as important assets to the city in terms of economic and recreation value as well as providing low-cost visitor serving amenities. This vulnerability poses a high risk to coastal access, recreation, and tourism opportunities in this planning area.

In 2100, bluff erosion of South Carlsbad State Beach day-use facilities and campgrounds become more severe and the South Ponto State Beach day-use area becomes exposed to coastal flooding during extreme events. The sensitivity of the South Ponto day-use area is low because impacts to usage will be temporary and no major damage to facilities would be anticipated. Vulnerability and risk to State

Parks remains high by 2100 due to the impacts to South Carlsbad State Beach in combination with flooding impacts to South Ponto.

Table 5: Planning Zone 3 Vulnerability Assessment Summary [condensed & notated]:

Asset	Horizon			Vulnerability
<u>Category</u>	<u>[time]</u>	<u>Hazard Type</u>	<u>Impacted Assets</u>	<u>Rating</u>
Beaches	2050	Inundation/Erosion, Flooding	<b>14 acres</b> (erosion)	Moderate
	2100	Inundation/Erosion, Flooding	<b>54 acres</b> (erosion)	Moderate
Public Access	2050	Inundation, Flooding	6 access points <b>4,791 feet of trails</b>	Moderate
	2100	Inundation, Flooding	10 access points <b>14,049 feet of trails</b>	Moderate
State Parks <i>[Campground - Low-cost Visitor Accommodations]</i>	2050	Flooding, Bluff Erosion	4 parcels [ <b>&lt;18 Acres</b> ]	High
	2100	Flooding, Bluff Erosion	4 parcels [ <b>&gt;18 Acres</b> ] <i>[loss of <b>over 50% of the campground &amp; its Low-cost Visitor Accommodations,</b></i>	High
<i>See Figure 5.]</i>				
Transportation (Road, Bike, Pedestrian)	2050	Bluff Erosion	<b>1,383 linear feet</b>	Moderate
	2100	Flooding, Bluff Erosion	<b>11,280 linear feet</b>	High

Environmentally Sensitive Lands	2050	Inundation, Flooding	572 acres	Moderate
	2100	Inundation, Flooding	606 acres	High

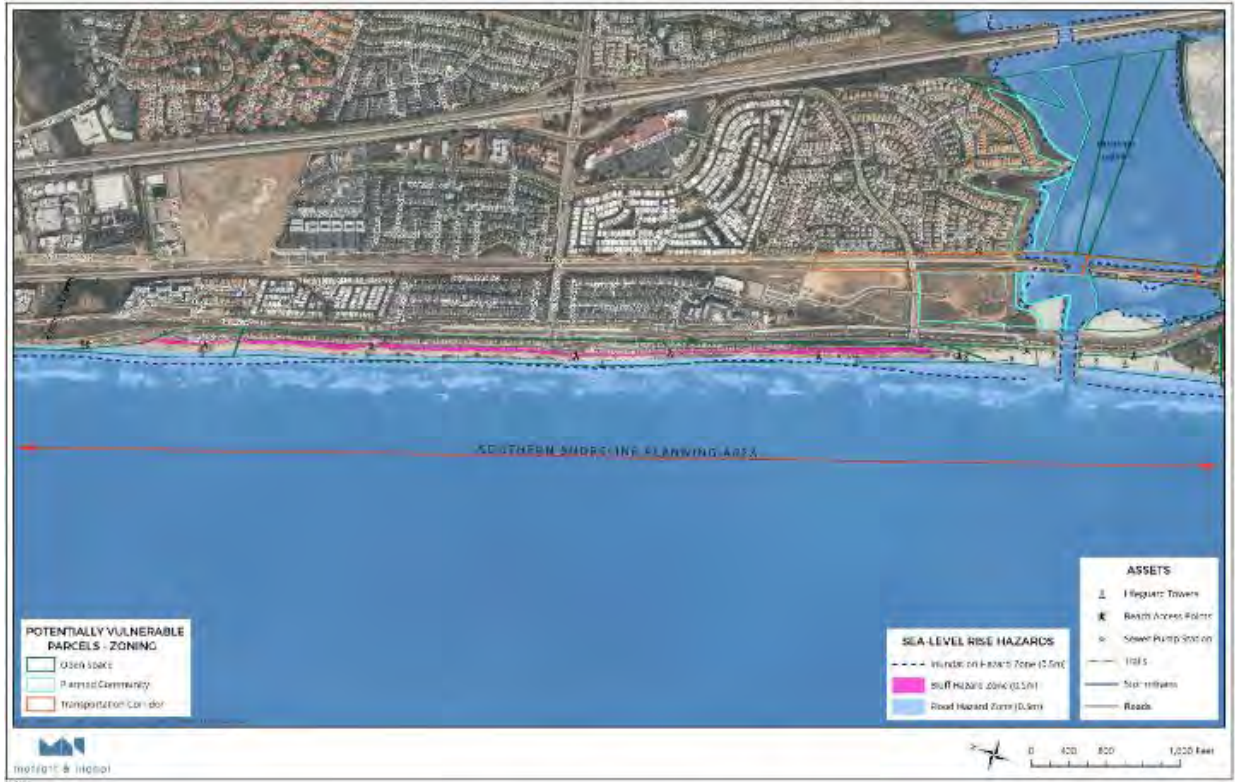

Figure 7: Southern Shoreline Planning Area – Year 2050

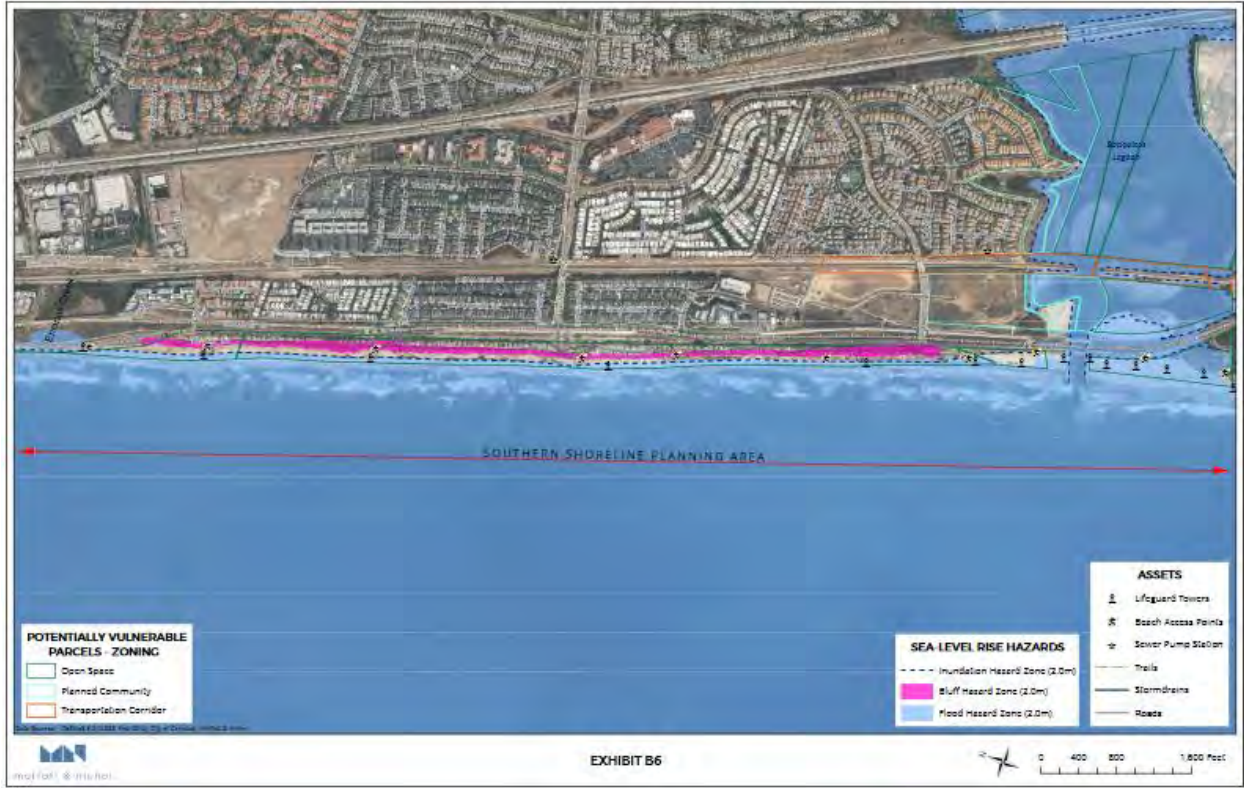

Figure 5: CoSMoS Bluff Erosion Projections by 2100  
(CoSMoS-COAST 2015)

[Figure 5 show the loss of over 50% of the campground and campground sites with a minimal .2 meter Sea Level Rise (SLR), and potentially the entire campground (due to loss of access road) in 2 meter SLF.]”

This 2017 SLR data and quantified losses of Ponto/Coastal South Carlsbad Open Space land and land uses was not considered in the City’s rejected (by CCC) Ponto Beachfront Village Vision Plan. The Ponto Vision Plan is the basis for the City’s 2015 General Plan Update that is now being proposed in the City’s Local Coastal Program Amendment now before the CA Coastal Commission.

#### Summary:

LFPM-9 was clearly not developed in 1986, and did not then or now dedicate 15% of the unconstrained/developable land as Open Space as required by the Growth Management Open Space Standard. These two reasons for the City to “exempt” LFMP-9 from Open Space Standard were/are False. Saying Constrained/undevelopable land can be counted as Unconstrained/developable land is also false and clearly not allowed according to the Growth Management Ordinance, Standards, principles, and common-sense honesty to Carlsbad Citizens. LFMP-9, as the City’s own maps/data base show is clearly missing 30-acres of GM Open Space. In addition in 2017 we learned that Ponto/Coastal South Carlsbad will lose about 32 acres of existing Open Space due to SLF.

#### Closing thoughts:

Growth Management is based on the type/amount/location of General Plan land use designations, the development potential of those land use designations in creating the demand for the type/amount/location of facilities, and supply of the type/amount/distribution of facilities – like Open Space and Parks. If the type/amount/location of supply of facilities does not meet the demand for those facilities then growth management fails and Quality of Life is reduced.

Quality of Life Standards are used to assure supply and demand for facilities is properly balanced with respect to type/amount/location.

Ponto is clearly unbalanced. The Ponto Census Tract is at a 40% higher population density than the rest of Carlsbad, yet is Ponto is NOT meeting the Open Space Standard and has NO Park (see City Open Space maps and Park Master Plan). Ponto and all South Carlsbad have higher population demand for Parks and Open Space facilities yet Ponto (that is the only place to provide Coastal Park and Open Space needs for South Carlsbad) has lower or none of those two most critical GM Facilities needed to balance and mitigate the 40% higher population density at Ponto and also the higher residential density in South Carlsbad.

Ponto and Coastal South Carlsbad also have additional State and regional responsibilities to provide Coastal Recreation and Open Space for populations of people and visitors from outside of Ponto and Carlsbad.

This failure to honestly and adequately balance the type/amount/location higher population density by providing higher levels of Parks and Open Space in those areas will lead to a slow and but eventual reduction of the Quality of Life for those areas.

Common sense and the Carlsbad's Growth Management law say if you change the land use (like what was done and is still being proposed at Ponto) you change the type/amount/location of potential development and population and the Growth Management impacts. Land use changes require and honest/accurate/balanced update to Citywide and Local Growth Management Plans to accurately reflect those changes and provide an updated plan to provide facilities that meet the Standards for those land use changes. This is the fundamental heart of any Growth Management.

The Carlsbad Tomorrow Growth Management Committee, and City Commissions and Council are all now facing the same issues and responsibility that we faced in the 1980's at the beginning of Growth Management. We established New Quality of Life Standards – for Open Space and Parks – that required New investments in Parks and Open Space by both the City and developers.

Open Space and Parks have always been identified as most critical for Carlsbad's quality of life. The Carlsbad Tomorrow Growth Management Committee, and City Commissions and Council, and Carlsbad Citizens are all at a critical crossroad.

- Do we, or don't we, enforce and set new standards that achieve the quality of life we desire?
- Do we or don't we, fix existing past errors and below desired standard situations?
- Do we or don't we, roll-up our sleeves a work together to a better Quality of Life?

As a long-time Carlsbad Citizen I am extremely disappointed by some who say we can't fulfill our Community Vision, we can't fix things, can't make things better, and can't add more Parks and Useable Open Space. This can't attitude is not out Community Vision. We can and we did before, and we can do it again and better.

Great cities for hundreds of years have Upgraded their Quality of Life Facility Standards, made and implemented/funded facilities to fix things up to those Standards. A City is just like a business or person - If you don't improve you decline. Examples of Upgrading and funding to New Parks and Open Space are many but include – Carlsbad's Buena Vista Reservoir Park, additions to Pine Park, Village H Park, and Aura Circle Open Space acquisition; and SDSU's major new Park at the redeveloped Qualcomm Stadium site.

Now like at the beginning of Carlsbad Growth Management the City can “despite previous city council actions” make improvements to its Growth Management and Quality of Life Standards to address past and future needs. Following illustrates existing R-23 (up to 23 dwellings per acre) development in Carlsbad – most of our future residential development will be required to be like this or more dense.

High-density housing can be great, but it requires MORE Parks and MORE useable Open Space within walking distance to balance the density and provide large places for families and kids to really play. In Carlsbad's high-density residential future with no backyards and stacked flat multi-family homes the need for both more Parks and Useable Open Space is much greater than in 1980's.

The time to fix the Parks and Useable Open Space problems at Ponto (LFMP-9) is now. Already Ponto is developed at a density that is 40% great than the rest of Carlsbad. New proposed and even higher-density developments (developer driven Amendments) propose to make Ponto even more dense, yet there are not Parks at Ponto and Ponto is missing 30-acres of Useable Open Space past developers should have provided.

A doable, time-tested, accountable, tax-payer saving, strongly citizen desired, accountable, and honest way to fix this was presented to you in 8/8/22 and 12/27/22 emails with attached "CTGMP Key Issues and Suggestions – 2022-12-6". Over 5,000 petitions expressing the need to fix the Park and Open Space problems at Ponto have been sent to the City and the City should have provided these to you in considering Park and Open Space issues.

Ponto Park and Open Space needs your help fixing NOW. If not Carlsbad Tomorrow will be less than it is today, and tragically will have failed our Community Vision.

**Subject:** 1-26-23 CTGMC mtg - CA State law on Park land dedication and fees - 5 acre per 1,000 population

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks and Planning Commissions, , CA Coastal Commission and CA State Parks:

As the City has requested specific reference regarding public input, I ask you to please deliver to the those address this email and attachment as public input for:

1. the CTGMC's 1/26/22 meeting,
2. the next Carlsbad Council meeting,
3. the next Carlsbad Planning and Parks Commission meetings on the Parks Master Plan and Growth Management Program Updates, Ponto Planning Area F and Site 18 land use changes, and Local Coastal Program Amendments, and
4. as public input to the CCC on Carlsbad proposed Local Coastal Program, and
5. as public input to Carlsbad's proposed Local Coastal Program Amendment.

At the 1-11-22 CTGMC meeting comments are what is the State Park Land Dedication Standard. This Standard (the Qumby Act) defines under that Ca Subdivision code how much land a city in the State of CA can require or developers to provide a city for park land. I recall the It was apparently incorrectly mentioned as 3 acres of Park land per 1,000 population was the State Standard, where as it is up to 5 acres per 1,000 population. Following is a link to the CA Qumby Act and the citation that 5 acres per 1,000 population can be required of new development.

[https://codelibrary.amlegal.com/codes/taftca/latest/taft\\_ca/0-0-0-12312](https://codelibrary.amlegal.com/codes/taftca/latest/taft_ca/0-0-0-12312)

"10-11-6: LAND DEDICATION AND FEE DETERMINATIONS: .... (C) The amount of land to be dedicated shall be based on the number of units in the subdivision multiplied by the number of persons per dwelling (as determined pursuant to subsection (B) of this section) **multiplied by five (5) acres per one thousand (1,000) city inhabitants (section 66477 of the subdivision map act)**"

I hope this data clears up confusion on how many acres of Park land Carlsbad can require of new development. It seems prudent to require developers provide the maximum amount of Park land per State law and not less, and most particularly in areas of Carlsbad that have no accessible Park within a 10-minute walk.

Thank you, and with Aloha Aina for Carlsbad,  
Lance

**Subject:** 1-26-23 CTGMC mtg - public input on Carlsbad Parkland Dedication Ordinance and City losses

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks, Housing and Planning Commissions, , CA Coastal Commission and CA State Parks:

Please again consider this email and attachment on 1/26/23.

This may clear up some what appeared to be a miscommunication by staff on 1/11/23 that appeared to say that the developer can decide how to comply with the Park Dedication Ordinance (Dedicate land or pay an in-lieu-of-dedication fee). This is not correct. Per 21.44 a develop may propose, but it is the City that decides how and where the Park land required is to be provided. Per 21.44.040 & 21.44.050 of the City's Park Dedication Ordinance Clearly states it is the City "decision making body" for the development proposal, i.e. Planning Commission or City Council, that decides is Park land is required or a commensurate Park in lieu fee will be required from the developer. In almost all instances Park land in the area (aka 10-minutewalk) of the development is better as that is where the development's Park land demand is created and where additional Park land supply should be created.

I hope this email and data helps the CTGMC in address the critical Park Land needs in various areas of Carlsbad, and this Ponto Site 18 example provides actual data using a currently proposed project in an area Carlsbad's Park Master Plan (current but soon to be changed) indicates is 'unserved by parks' and should be an area where new parks should be provided.

Please note in this Ponto Site 18 example there IS vacant land (about 1 acre) left-over after the development that the developer could dedicate to the City for the developer's Park Land dedication requirement. The CTGMC would be thoughtful to include in your Standard recommendations to include strong policy requirements to get Park land v. fees in areas needing Parks.

Thank you,  
Lance

**Subject:** public input on Carlsbad Parkland Dedication Ordinance and City losses

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks, Housing and Planning Commissions, , CA Coastal Commission and CA State Parks:

Please consider this data file and public input email/attachment in the CTGMC, Housing Element and Parks Master Plan Updates, Proposed Local Coastal Program Amendment, and the Ponto Site 18 proposed land use changes and development application.

'Example of Carlsbad's Park-in-lieu Fee failing to actually provide the required Parkland or improvements

---

The example is for Ponto Site 18 one of the City's proposed General Plan & Local Coastal Program land use changes to provide RHNA required housing sites for the years 2021-2029. Ponto Site 18 is the Ponto Storage site and surrounding lots. Ponto Site 18's map and City description is provided on pages 4-5 below.

**The example shows Carlsbad loses significant amounts of money, and more critically loses precious and irreplaceable Parkland that developers are required to provide for free. These City losses are absorbed by current and future Carlsbad tax-payers. For the relatively small 5 acre and 86 dwelling unit Ponto Site 18 proposal the loss to Carlsbad is \$ 1.084 million in lost parkland value. Below is the spreadsheet calculation of that loss.**

Beyond showing a typical over \$ 1 million loss per 86 dwellings, there is added concern for the CTGMC in that this example is a proposed Carlsbad General Plan & Local Coastal Program Land Use Change to try to accommodate the years 2021-2029 the RHNA requirement to add/increase Residential use. Every 8 years we are/will be changing our General Plan land use to add more high-density housing and increasing City Park demand particularly for areas developed more densely.

If these higher-density projects do not dedicate actual City Park within walking distance not only is Carlsbad loosing over \$1 million per 86 dwellings, we are losing free and easy opportunities to get City Parkland dedicated for free per CMC 20.44, and will slowly be degrading our Quality of Life in these areas and also Citywide.

Calculation of Ponto Site 18 Parkland dedication requirement and City losses from the Park-in-lieu Fee:

**Ponto Site 18 - Fenton proposed development's Park land dedication requirement**

Park land dedication requirement per CMC 20.44 [https://library.qcode.us/lib/carlsbad\\_ca/pub/municipal\\_code/item/title\\_20-chapter\\_20\\_44](https://library.qcode.us/lib/carlsbad_ca/pub/municipal_code/item/title_20-chapter_20_44)  
 US Census data <https://www.census.gov/quickfacts/fact/table/carlsbadcitycalifornia/POP060210#POP060210>

Carlsbad Park Dedication Requirement is 3 acres of land per 1,000 population of the proposed development.  
 Population of proposed development is based on population per household based on latest US Census data  
 2020 US Census data is 2.64 people per household

FYI, Carlsbad 3 acres /1,000 is comparatively very low both locally and nationally. And there is no 'walkably requirement'.  
 5 acres /1,000 population is what Encinitas and Oceanside require along with a 10-minute walk location requirement.

Fenton owns almost 6 acres of land in Site 18, 4.64 acres of which they want to develop now, and the other 1+ acre part they want to develop later.  
 on the 4.64 acre site change VC-Visitor Commercial/R-15 (15 dwellings per acre) General Plan land use and Zoning to 100% residential and develop at 19.125 dwellings per acre on 4.64 acres.

On the 1+ acre site, instead of providing their required Park land dedication, Fenton is proposing to develop the remaining 1 acre area (between PCH & Ponto Drive) as General Commercial.

Instead of providing the required Park land dedication, Fenton is proposing to develop the remaining 1 acre area (between Pecha and Ponto Drive) as General Commercial.

Site 18 (Fenton) development proposal for the 4.64 acre portion is development of 86 household units (over 19 dwelling units per acre in higher occupancy units than typical) consisting of:

8	2-bedroom homes =	9%	of total units proposed
40	3-bedroom homes =	47%	of total units proposed
38	4-bedroom homes =	44%	of total units proposed
86		100%	

**Fenton is proposing 91% of the project with 3 or 4 bedrooms so the project will have higher occupancy, and likely more children, per housing unit than the Citywide average of 2.64 people per housing unit**

Fenton Park land dedication requirement per CMC 20.44

calculation	86 DU of Fenton proposed development
X	2.64 average population per DU per 2020 US Census
=	227 estimated population of Fenton project
/	1,000 population that needs 3 acres of Park land per CMC 20.44
=	0.22704 percentage of 3 acres of Park land required for 227 people
X	3 acres of Park land required per 1,000 people
=	0.68112 acres of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU
X	43,560 square feet per acre
=	29,670 square feet of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU

	1 acre of Fenton's unused vacant 'ice plant lots' between PCH & Ponto Drive that can provide Fenton's Park land requirement
\$	398,696 per City Master Fee Schedule. Consistent with what Fenton said was would be the 'Park-in-lieu Fee for their 86 DU project
\$	50 Estimated SF cost Fenton paid for Ponto Site 18 or S 2.18 million per acre
\$	1,483,479 cost of 29,670 SF of Ponto Site 18 land to satisfy Fenton's Park land requirement

for the Ponto Site 18 5-acre 86 dwelling unit land use change and development proposal:

**\$ (1,084,783) Dollars the City is losing in Park land value and not receiving in its Park-In-lieu Fee, so this is a gift to the developer**  
 -73% % of lost Park land value City is losing and not receiving in its PIL Fee, so this is a City gift to the developer

\$	1,000,000 per acre cost to develop a Park like Buena Vista Reservoir Park
	43,560 square feet per acre
\$	22.96 Cost per sq. ft.
	29,670 square feet of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU
\$	681,120 Cost to develop Fenton's 29,670sq. ft. of Park Land Dedication as a Park

**\$ (282,424) Dollars City loses from Park-In-lieu Fees not even being adequate to cover Actual Minimal Park Development Costs**

Following this calculation:

- on page 3-4 are the relevant excerpts of Carlsbad's Dedication of Land for Recreational Purposes Ordinance 20.44, and
- on page 5-6 is the City's map and description of the proposed Ponto Site 18 land use change

## 20.44 Dedication of Land for Recreational Facilities

### 20.44.010 Purpose.

This chapter is enacted pursuant to the authority granted by Section 66477 of the Government Code of the State of California. The park and recreational facilities for which dedication of land and/or payment of a fee is required by this chapter are in accordance with the recreational element of the general plan of the City of Carlsbad. (Ord. 9614 § 1, 1982; Ord. 9190 § 2)

### 20.44.040 Standards and formula for dedication of land.

If the decision-making authority for the tentative map or tentative parcel map determines that a park or recreational facility is to be located in whole or in part within the proposed subdivision to serve the immediate and future needs of the residents of the subdivision, the subdivider shall, at the time of the filing of the final or parcel map, dedicate land for such facility pursuant to the following standards and formula:

The formula for determining acreage to be dedicated shall be as follows:

Average no. of persons per dwelling unit (based on most recent federal census)

x

3 park acres per 1,000 population

x

Total number of dwelling units

The total number of dwelling units shall be the number permitted by the city on the property in the subdivision at the time the final map or parcel map is filed for approval, less any existing residential units in single-family detached or duplex dwellings. The park land dedication requirement will be reviewed annually effective July 1, and adjusted as necessary by resolution of the city council to reflect the latest federal census data. (Ord. CS-192 § 49, 2012; Ord. CS-162 § 1, 2011; Ord. NS-757 § 1, 2005; Ord. NS-588 § 1, 2001; Ord. 9831 § 1, 1987; Ord. 9770 § 1, 1985; Ord. 9724 § 1, 1984; Ord. 9644 § 1, 1982; Ord.

### 20.44.050 Standards for fees in lieu of land dedication.

A. If the decision-making authority for the tentative map or tentative parcel map determines that there is no park or recreational facility to be located in whole or in part within the proposed subdivision, the subdivider shall, in lieu of dedicating land, pay a fee equal to the value of the land prescribed for dedication in Section 20.44.040 and in an amount determined in accordance with the provisions of Section 20.44.080.

B. If the proposed subdivision contains 50 parcels or less, only the payment of fees shall be required except that when a condominium project, stock cooperative, or community apartment project exceeds 50 dwelling units, dedication of land may be required notwithstanding that the number of parcels may be less than 50.

### 20.44.060 Determination of land or fee.

A. Whether the decision-making authority for the tentative map or tentative parcel map requires land dedication or elects to accept payment of a fee in lieu thereof, or a combination of both, shall be determined by the decision-making authority at the time of approval of the tentative map or tentative parcel map. In making that determination, the decision-making authority shall consider the following:

- 1 Park and recreation element of the general plan;
- 2 Topography, geology, access and location of land in the subdivision available for dedication;
- 3 Size and shape of the subdivision and land available for dedication;
- 4 The feasibility of dedication;
- 5 Availability of previously acquired park property.

B. The determination of the city council as to whether land shall be dedicated, or whether a

## POTENTIAL HOUSING SITES

Site Number: 18 – North Ponto Parcels

### SITE DESCRIPTION

The site is a group of eight vacant and underutilized properties in the Ponto area, located south of the Cape Rey Carlsbad Beach hotel and east of Carlsbad Boulevard. The site is bisected by Ponto Drive. North of Ponto Drive are three underutilized parcels containing a mini storage, miscellaneous buildings and other storage uses on nearly five acres. To the south, across Ponto Drive, is a cluster of five small vacant properties total just over an acre.

Site topography is generally flat. Some of the parcels may be constrained due to environmentally sensitive habitat. One parcel is alongside the railroad corridor. All the parcels are located outside the McClellan-Palomar Airport flight path.

The site does not include a vacant 11-acre parcel along either side of Ponto Drive and fronting Avenida Encinas. The parcel is commonly referred to as "Planning Area F."

### SITE FEATURES

- Vacant/underutilized
- Utilities accessible
- In the Coastal Zone
- Site constraints

### SITE OPPORTUNITY

The site consists of a mix of residential and non-residential land use designations. Two of the eight parcels have a split land use designation of VC (Visitor Commercial) and R-15 (11.5 to 15 dwelling units per acre, or du/ac). The one parcel alongside the railroad corridor is designated R-15. The R-15 designation often applies to small lot single family or detached or attached condominium development. The cluster of five vacant parcels south of Ponto Drive is designated GC (General Commercial). General Commercial permits a broad range of commercial uses. It also permits properties to be developed in a mixed-use format, with limited residential above first floor commercial.

Staff has received a letter from one property owner expressing support for higher density.

Except for the VC-designated portion of the two parcels, which is not anticipated to change, the redesignation of all parcels to R-23 is contemplated. R-23 is a residential designation the state identifies as suitable for moderate income households. The R-23 designation would permit a density range of 19 to 23 dwelling units per acre (du/ac). This density is typical of two- and three-story apartment and condominium developments.

To change any designation, amendments to the General Plan, Local Coastal Program, zoning, Poinsettia Shores Master Plan, and the Ponto Beachfront Village Vision Plan would be required. These amendments would require City Council and California Coastal Commission approval.

Upper area proposed for land use change & higher density

Part of Lower area can (should) be dedicated to provided needed parkland

**Subject:** 1-26-23 CTGMC mtg - public input on Carlsbad Parkland Dedication Ordinance and City losses

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks, Housing and Planning Commissions, , CA Coastal Commission and CA State Parks:

Please again consider this email and attachment on 1/26/23.

This may clear up some what appeared to be a miscommunication by staff on 1/11/23 that appeared to say that the developer can decide how to comply with the Park Dedication Ordinance (Dedicate land or pay an in-lieu-of-dedication fee). This is not correct. Per 21.44 a developer may propose, but it is the City that decides how and where the Park land required is to be provided. Per 21.44.040 & 21.44.050 of the City's Park Dedication Ordinance Clearly states it is the City "decision making body" for the development proposal, i.e. Planning Commission or City Council, that decides if Park land is required or a commensurate Park in lieu fee will be required from the developer. In almost all instances Park land in the area (aka 10-minutewalk) of the development is better as that is where the development's Park land demand is created and where additional Park land supply should be created.

I hope this email and data helps the CTGMC in address the critical Park Land needs in various areas of Carlsbad, and this Ponto Site 18 example provides actual data using a currently proposed project in an area Carlsbad's Park Master Plan (current but soon to be changed) indicates is 'unserved by parks' and should be an area where new parks should be provided.

Please note in this Ponto Site 18 example there IS vacant land (about 1 acre) left-over after the development that the developer could dedicate to the City for the developer's Park Land dedication requirement. The CTGMC would be thoughtful to include in your Standard recommendations to include strong policy requirements to get Park land v. fees in areas needing Parks.

Thank you,  
Lance

**Subject:** public input on Carlsbad Parkland Dedication Ordinance and City losses

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks, Housing and Planning Commissions, , CA Coastal Commission and CA State Parks:

Please consider this data file and public input email/attachment in the CTGMC, Housing Element and Parks Master Plan Updates, Proposed Local Coastal Program Amendment, and the Ponto Site 18 proposed land use changes and development application.

'Example of Carlsbad's Park-in-lieu Fee failing to actually provide the required Parkland or improvements

---

The example is for Ponto Site 18 one of the City's proposed General Plan & Local Coastal Program land use changes to provide RHNA required housing sites for the years 2021-2029. Ponto Site 18 is the Ponto Storage site and surrounding lots. Ponto Site 18's map and City description is provided on pages 4-5 below.

**The example shows Carlsbad loses significant amounts of money, and more critically loses precious and irreplaceable Parkland that developers are required to provide for free. These City losses are absorbed by current and future Carlsbad tax-payers. For the relatively small 5 acre and 86 dwelling unit Ponto Site 18 proposal the loss to Carlsbad is \$ 1.084 million in lost parkland value. Below is the spreadsheet calculation of that loss.**

Beyond showing a typical over \$ 1 million loss per 86 dwellings, there is added concern for the CTGMC in that this example is a proposed Carlsbad General Plan & Local Coastal Program Land Use Change to try to accommodate the years 2021-2029 the RHNA requirement to add/increase Residential use. Every 8 years we are/will be changing our General Plan land use to add more high-density housing and increasing City Park demand particularly for areas developed more densely.

If these higher-density projects do not dedicate actual City Park within walking distance not only is Carlsbad losing over \$1 million per 86 dwellings, we are losing free and easy opportunities to get City Parkland dedicated for free per CMC 20.44, and will slowly be degrading our Quality of Life in these areas and also Citywide.

Calculation of Ponto Site 18 Parkland dedication requirement and City losses from the Park-in-lieu Fee:

Ponto Site 18 - Fenton proposed development's Park land dedication requirement	
Park land dedication requirement per CMC 20.44	<a href="https://library.qcode.us/lib/carlsbad_ca/pub/municipal_code/item/title_20-chapter_20_44">https://library.qcode.us/lib/carlsbad_ca/pub/municipal_code/item/title_20-chapter_20_44</a>
US Census data	<a href="https://www.census.gov/quickfacts/fact/table/carlsbadcitycalifornia/POP060210#POP060210">https://www.census.gov/quickfacts/fact/table/carlsbadcitycalifornia/POP060210#POP060210</a>
Carlsbad Park Dedication Requirement is 3 acres of land per 1,000 population of the proposed development. Population of proposed development is based on population per household based on latest US Census data 2020 US Census data is 2.64 people per household	
FYI, Carlsbad 3 acres /1,000 is comparatively very low both locally and nationally. And there is no 'walkably requirement'. 5 acres /1,000 population is what Encinitas and Oceanside require along with a 10-minute walk location requirement.	
Fenton owns almost 6 acres of land in Site 18, 4.64 acres of which they want to develop now, and the other 1+ acre part they want to develop later. on the 4.64 acre site change VC-Visitor Commercial/R-15 (15 dwellings per acre) General Plan land use and Zoning to 100% residential and develop at 19.125 dwellings per acre on 4.64 acres. On the 1+ acre site, instead of providing their required Park land dedication, Fenton is proposing to develop the remaining 1 acre area (between PCH & Ponto Drive) as General Commercial. Instead of providing the required Park land dedication, Fenton is proposing to develop the remaining 1 acre area (between Pecha and Ponto Drive) as General Commercial.	
Site 18 (Fenton) development proposal for the 4.64 acre portion is development of 86 household units (over 19 dwelling units per acre in higher occupancy units than typical) consisting of:	
8	2-bedroom homes = 9% of total units proposed
40	3-bedroom homes = 47% of total units proposed
38	4-bedroom homes = 44% of total units proposed
86	100%
Fenton is proposing 91% of the project with 3 or 4 bedrooms so the project will have higher occupancy, and likely more children, per housing unit than the Citywide average of 2.64 people per housing unit	
Fenton Park land dedication requirement per CMC 20.44	
calculation	86 DU of Fenton proposed development
X	2.64 average population per DU per 2020 US Census
-	227 estimated population of Fenton project
/	1,000 population that needs 3 acres of Park land per CMC 20.44
-	0.22704 percentage of 3 acres of Park land required for 227 people
X	3 acres of Park land required per 1,000 people
-	0.68112 acres of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU
X	43,560 square feet per acre
-	29,670 square feet of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU
	1 acre of Fenton's unused vacant 'ice plant lots' between PCH & Ponto Drive that can provide Fenton's Park land requirement
\$	398,696 per City Master Fee Schedule. Consistent with what Fenton said was would be the 'Park-in-lieu Fee for their 86 DU project
\$	50 Estimated SF cost Fenton paid for Ponto Site 18 or S 2.18 million per acre
\$	1,483,479 cost of 29,670 SF of Ponto Site 18 land to satisfy Fenton's Park land requirement
for the Ponto Site 18 5-acre 86 dwelling unit land use change and development proposal:	
\$	(1,064,783) Dollars the City is losing in Park land value and not receiving in its Park-In-lieu Fee, so this is a gift to the developer
	-73% % of lost Park land value City is losing and not receiving in its PIL Fee, so this is a City gift to the developer
\$	1,000,000 per acre cost to develop a Park like Buena Vista Reservoir Park
	43,560 square feet per acre
\$	22.96 Cost per sq. ft.
	29,670 square feet of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU
\$	681,120 Cost to develop Fenton's 29,670 sq. ft. of Park Land Dedication as a Park
\$	(282,424) Dollars City loses from Park-In-lieu Fees not even being adequate to cover Actual Minimal Park Development Costs

Following this calculation:

- on page 3-4 are the relevant excerpts of Carlsbad's Dedication of Land for Recreational Purposes Ordinance 20.44, and
- on page 5-6 is the City's map and description of the proposed Ponto Site 18 land use change

## 20.44 Dedication of Land for Recreational Facilities

### 20.44.010 Purpose.

This chapter is enacted pursuant to the authority granted by Section 66477 of the Government Code of the State of California. The park and recreational facilities for which dedication of land and/or payment of a fee is required by this chapter are in accordance with the recreational element of the general plan of the City of Carlsbad. (Ord. 9614 § 1, 1982; Ord. 9190 § 2)

### 20.44.040 Standards and formula for dedication of land.

If the decision-making authority for the tentative map or tentative parcel map determines that a park or recreational facility is to be located in whole or in part within the proposed subdivision to serve the immediate and future needs of the residents of the subdivision, the subdivider shall, at the time of the filing of the final or parcel map, dedicate land for such facility pursuant to the following standards and formula:

The formula for determining acreage to be dedicated shall be as follows:

Average no. of persons per dwelling unit (based on most recent federal census)

x

3 park acres per 1,000 population

x

Total number of dwelling units

The total number of dwelling units shall be the number permitted by the city on the property in the subdivision at the time the final map or parcel map is filed for approval, less any existing residential units in single-family detached or duplex dwellings. The park land dedication requirement will be reviewed annually effective July 1, and adjusted as necessary by resolution of the city council to reflect the latest federal census data. (Ord. CS-192 § 49, 2012; Ord. CS-162 § 1, 2011; Ord. NS-757 § 1, 2005; Ord. NS-588 § 1, 2001; Ord. 9831 § 1, 1987; Ord. 9770 § 1, 1985; Ord. 9724 § 1, 1984; Ord. 9644 § 1, 1982; Ord.

### 20.44.050 Standards for fees in lieu of land dedication.

A. If the decision-making authority for the tentative map or tentative parcel map determines that there is no park or recreational facility to be located in whole or in part within the proposed subdivision, the subdivider shall, in lieu of dedicating land, pay a fee equal to the value of the land prescribed for dedication in Section 20.44.040 and in an amount determined in accordance with the provisions of Section 20.44.080.

B. If the proposed subdivision contains 50 parcels or less, only the payment of fees shall be required except that when a condominium project, stock cooperative, or community apartment project exceeds 50 dwelling units, dedication of land may be required notwithstanding that the number of parcels may be less than 50.

### 20.44.060 Determination of land or fee.

A. Whether the decision-making authority for the tentative map or tentative parcel map requires land dedication or elects to accept payment of a fee in lieu thereof, or a combination of both, shall be determined by the decision-making authority at the time of approval of the tentative map or tentative parcel map. In making that determination, the decision-making authority shall consider the following:

- 1 Park and recreation element of the general plan;
- 2 Topography, geology, access and location of land in the subdivision available for dedication;
- 3 Size and shape of the subdivision and land available for dedication;
- 4 The feasibility of dedication;
- 5 Availability of previously acquired park property.

B. The determination of the city council as to whether land shall be dedicated, or whether a

## POTENTIAL HOUSING SITES

Site Number: 18 – North Ponto Parcels

### SITE DESCRIPTION

The site is a group of eight vacant and underutilized properties in the Ponto area, located south of the Cape Rey Carlsbad Beach hotel and east of Carlsbad Boulevard. The site is bisected by Ponto Drive. North of Ponto Drive are three underutilized parcels containing a mini storage, miscellaneous buildings and other storage uses on nearly five acres. To the south, across Ponto Drive, is a cluster of five small vacant properties total just over an acre.

Site topography is generally flat. Some of the parcels may be constrained due to environmentally sensitive habitat. One parcel is alongside the railroad corridor. All the parcels are located outside the McClellan-Palomar Airport flight path.

The site does not include a vacant 11-acre parcel along either side of Ponto Drive and fronting Avenida Encinas. The parcel is commonly referred to as "Planning Area F."

### SITE FEATURES

- Vacant/underutilized
- Utilities accessible
- In the Coastal Zone
- Site constraints

### SITE OPPORTUNITY

The site consists of a mix of residential and non-residential land use designations. Two of the eight parcels have a split land use designation of VC (Visitor Commercial) and R-15 (11.5 to 15 dwelling units per acre, or du/ac). The one parcel alongside the railroad corridor is designated R-15. The R-15 designation often applies to small lot single family or detached or attached condominium development. The cluster of five vacant parcels south of Ponto Drive is designated GC (General Commercial). General Commercial permits a broad range of commercial uses. It also permits properties to be developed in a mixed-use format, with limited residential above first floor commercial.

Staff has received a letter from one property owner expressing support for higher density.

Upper area proposed for land use change & higher density

Part of Lower area can (should) be dedicated to provided needed parkland

Except for the VC-designated portion of the two parcels, which is not anticipated to change, the redesignation of all parcels to R-23 is contemplated. R-23 is a residential designation the state identifies as suitable for moderate income households. The R-23 designation would permit a density range of 19 to 23 dwelling units per acre (du/ac). This density is typical of two- and three-story apartment and condominium developments.

To change any designation, amendments to the General Plan, Local Coastal Program, zoning, Poinsettia Shores Master Plan, and the Ponto Beachfront Village Vision Plan would be required. These amendments would require City Council and California Coastal Commission approval.

## Example of Carlsbad's Park-in-lieu Fee failing to actually provide the required Parkland or improvements

The example is for Ponto Site 18 one of the City's proposed General Plan & Local Coastal Program land use changes to provide RHNA required housing sites for the years 2021-2029. Ponto Site 18 is the Ponto Storage site and surrounding lots. Ponto Site 18's map and City description is provided on pages 4-5 below.

**The example shows Carlsbad loses significant amounts of money, and more critically loses precious and irreplaceable Parkland that developers are required to provide for free. These City losses are absorbed by current and future Carlsbad tax-payers. For the relatively small 5 acre and 86 dwelling unit Ponto Site 18 proposal the loss to Carlsbad is \$ 1.084 million in lost parkland value. Below is the spreadsheet calculation of that loss.**

Beyond showing a typical over \$ 1 million loss per 86 dwellings, there is added concern for the CTGMC in that this example is a proposed Carlsbad General Plan & Local Coastal Program Land Use Change to try to accommodate the years 2021-2029 the RHNA requirement to add/increase Residential use. Every 8 years we are/will be changing our General Plan land use to add more high-density housing and increasing City Park demand particularly for areas developed more densely.

If these higher-density projects do not dedicate actual City Park within walking distance not only is Carlsbad losing over \$1 million per 86 dwellings, we are losing free and easy opportunities to get City Parkland dedicated for free per CMC 20.44, and will slowly be degrading our Quality of Life in these areas and also Citywide.

## Calculation of Ponto Site 18 Parkland dedication requirement and City losses from the Park-in-lieu Fee:

Ponto Site 18 - Fenton proposed development's Park land dedication requirement	
Park land dedication requirement per CMC 20.44	<a href="https://library.qcode.us/lib/carlsbad_ca/pub/municipal_code/item/title_20-chapter_20_44">https://library.qcode.us/lib/carlsbad_ca/pub/municipal_code/item/title_20-chapter_20_44</a>
US Census data	<a href="https://www.census.gov/quickfacts/fact/table/carlsbadcitycalifornia/POP060210#POP060210">https://www.census.gov/quickfacts/fact/table/carlsbadcitycalifornia/POP060210#POP060210</a>
Carlsbad Park Dedication Requirement is 3 acres of land per 1,000 population of the proposed development.	
Population of proposed development is based on population per household based on latest US Census data	
2020 US Census data is 2.64 people per household	
FYI, Carlsbad 3 acres /1,000 is comparatively very low both locally and nationally. And there is no 'walkably requirement'.	
5 acres /1,000 population is what Encinitas and Oceanside require along with a 10-minute walk location requirement.	
Fenton owns almost 6 acres of land in Site 18, 4.64 acres of which they want to develop now, and the other 1+ acre part they want to develop later.	
on the 4.64 acre site change VC-Visitor Commercial/R-15 (15 dwellings per acre) General Plan land use and Zoning to 100% residential and develop at 19.125 dwellings per acre on 4.64 acres.	
On the 1+ acre site, instead of providing their required Park land dedication, Fenton is proposing to develop the remaining 1 acre area (between PCH & Ponto Drive) as General Commercial.	
Instead of providing the required Park Land dedication, Fenton is proposing to develop the remaining 1 acre area (between Pecha and Ponto Drive) as General Commercial.	
Site 18 (Fenton) development proposal for the 4.64 acre portion is development of 86 household units (over 19 dwelling units per acre in in higher occupancy units than typical) consisting of:	
8	2-bedroom homes = 9% of total units proposed
40	3-bedroom homes = 47% of total units proposed
38	4-bedroom homes = 44% of total units proposed
86	100%
<b>Fenton is proposing 91% of the project with 3 or 4 bedrooms so the project will have higher occupancy, and likely more children, per housing unit than the Citywide average of 2.64 people per housing unit</b>	
<u>Fenton Park land dedication requirement per CMC 20.44</u>	
<u>calculation</u>	86 DU of Fenton proposed development
X	2.64 average population per DU per 2020 US Census
=	227 estimated population of Fenton project
/	1,000 population that needs 3 acres of Park land per CMC 20.44
=	0.22704 percentage of 3 acres of Park land required for 227 people
X	3 acres of Park land required per 1,000 people
=	<b>0.68112 acres of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU</b>
X	43,560 square feet per acre
=	<b>29,670 square feet of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU</b>
<b>1 acre of Fenton's unused vacant 'ice plant lots' between PCH &amp; Ponto Drive that can provide Fenton's Park land requirement</b>	
\$ 398,696	per City Master Fee Schedule. Consistent with what Fenton said was would be the 'Park-in-lieu Fee for their 86 DU project
\$ 50	Estimated SF cost Fenton paid for Ponto Site 18 or \$ 2.18 million per acre
\$ 1,483,479	cost of 29,670 SF of Ponto Site 18 land to satisfy Fenton's Park land requirement
for the Ponto Site 18 5-acre 86 dwelling unit land use change and development proposal:	
<b>\$ (1,084,783) Dollars the City is loosing in Park land value and not receiving in its Park-in-lieu Fee, so this is a gift to the developer</b>	
<b>-73% % of lost Park land value City is loosing and not receiving in its PIL Fee, so this is a City gift to the developer</b>	
\$ 1,000,000	per acre cost to develop a Park like Buena Vista Reservoir Park
43,560	square feet per acre
\$ 22.96	Cost per sq. ft.
29,670	square feet of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU
\$ 681,120	<b>Cost to develop Fenton's 29,670 sq. ft. of Park Land Dedication as a Park</b>
<b>\$ (282,424) Dollars City looses from Park-in-lieu Fees not even being adequate to cover Actual Minimal Park Development Costs</b>	

Following this calculation:

- on page 3-4 are the relevant excerpts of Carlsbad's Dedication of Land for Recreational Purposes Ordinance 20.44, and
- on page 5-6 is the City's map and description of the proposed Ponto Site 18 land use change

**20.44 Dedication of Land for Recreational Facilities**

20.44.010 Purpose.

This chapter is enacted pursuant to the authority granted by Section 66477 of the Government Code of the State of California. The park and recreational facilities for which dedication of land and/or payment of a fee is required by this chapter are in accordance with the recreational element of the general plan of the City of Carlsbad. (Ord. 9614 § 1, 1982; Ord. 9190 § 2)

20.44.040 Standards and formula for dedication of land.

If the decision-making authority for the tentative map or tentative parcel map determines that a park or recreational facility is to be located in whole or in part within the proposed subdivision to serve the immediate and future needs of the residents of the subdivision, the subdivider shall, at the time of the filing of the final or parcel map, dedicate land for such facility pursuant to the following standards and formula:

The formula for determining acreage to be dedicated shall be as follows:

Average no. of persons per dwelling unit (based on most recent federal census)

x

3 park acres per 1,000 population

x

Total number of dwelling units

The total number of dwelling units shall be the number permitted by the city on the property in the subdivision at the time the final map or parcel map is filed for approval, less any existing residential units in single-family detached or duplex dwellings. The park land dedication requirement will be reviewed annually effective July 1, and adjusted as necessary by resolution of the city council to reflect the latest federal census data. (Ord. CS-192 § 49, 2012; Ord. CS-162 § 1, 2011; Ord. NS-757 § 1, 2005; Ord. NS-588 § 1, 2001; Ord. 9831 § 1, 1987; Ord. 9770 § 1, 1985; Ord. 9724 § 1, 1984; Ord. 9644 § 1, 1982; Ord.

20.44.050 Standards for fees in lieu of land dedication.

A. If the decision-making authority for the tentative map or tentative parcel map determines that there is no park or recreational facility to be located in whole or in part within the proposed subdivision, the subdivider shall, in lieu of dedicating land, pay a fee equal to the value of the land prescribed for dedication in Section 20.44.040 and in an amount determined in accordance with the provisions of Section 20.44.080.

B. If the proposed subdivision contains 50 parcels or less, only the payment of fees shall be required except that when a condominium project, stock cooperative, or community apartment project exceeds 50 dwelling units, dedication of land may be required notwithstanding that the number of parcels may be less than 50.

20.44.060 Determination of land or fee.

A. Whether the decision-making authority for the tentative map or tentative parcel map requires land dedication or elects to accept payment of a fee in lieu thereof, or a combination of both, shall be determined by the decision-making authority at the time of approval of the tentative map or tentative parcel map. In making that determination, the decision-making authority shall consider the following:

1 Park and recreation element of the general plan;

2 Topography, geology, access and location of land in the subdivision available for dedication;

3 Size and shape of the subdivision and land available for dedication;

4 The feasibility of dedication;

**Sent:** Wednesday, January 25, 2023 11:34 AM  
**To:** Mick Calarco  
**Subject:** Doug Gore Thoughts for Pickleball Courts  
**Attachments:** Tennis Courts Converted to Pickleball Courts.pdf

Hi Mick,

Would you please give me a call when you get a chance as I would like to talk with you about things I have been hearing about the pickleball courts.

I really hope that you and or Parks and Recreation will talk/meet with me or other pickleball players before making a final decision on court design and conversion?

I have attached a PowerPoint with my thoughts about converting two Poinsettia tennis courts into 8 pickleball courts.

Look forward to hearing from you soon.

Cheers~  
Doug  
760-717-2286

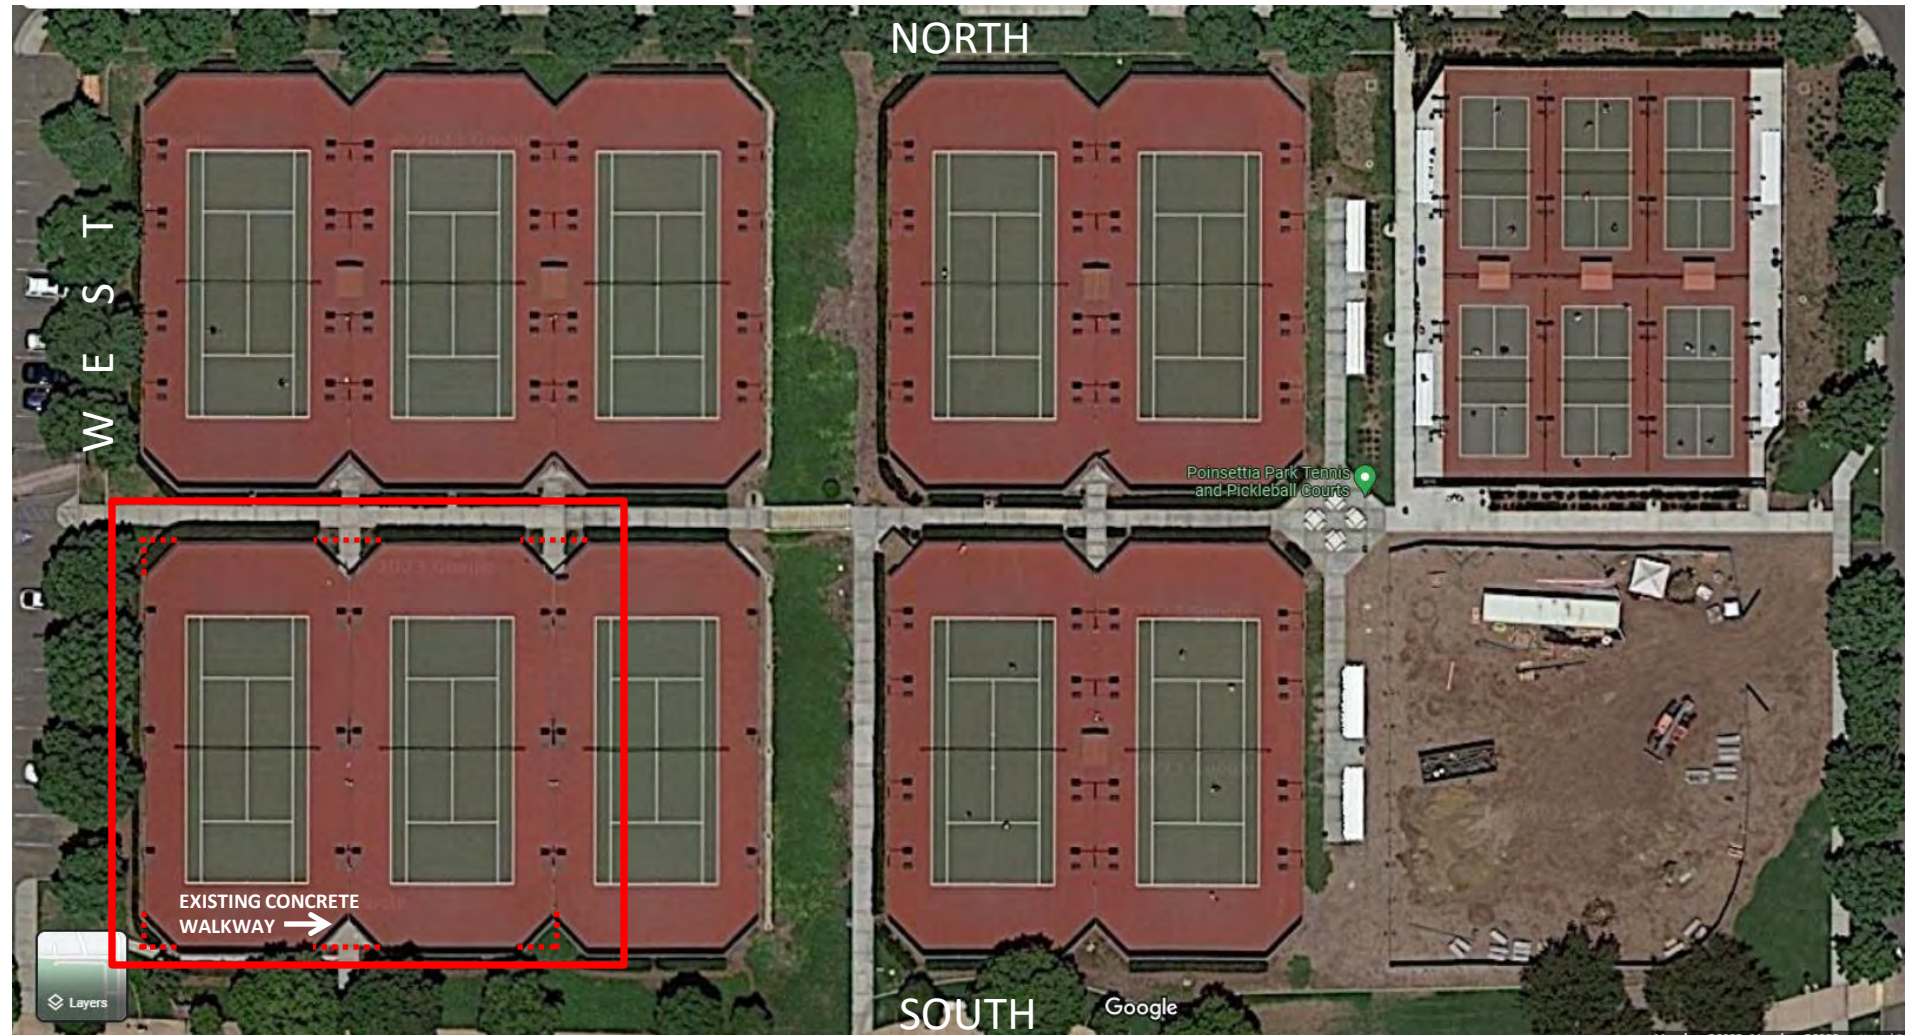

**CAUTION:** Do not open attachments or click on links unless you recognize the sender and know the content is safe.

# Aerial View of Poinsettia Park Tennis and Pickleball Courts

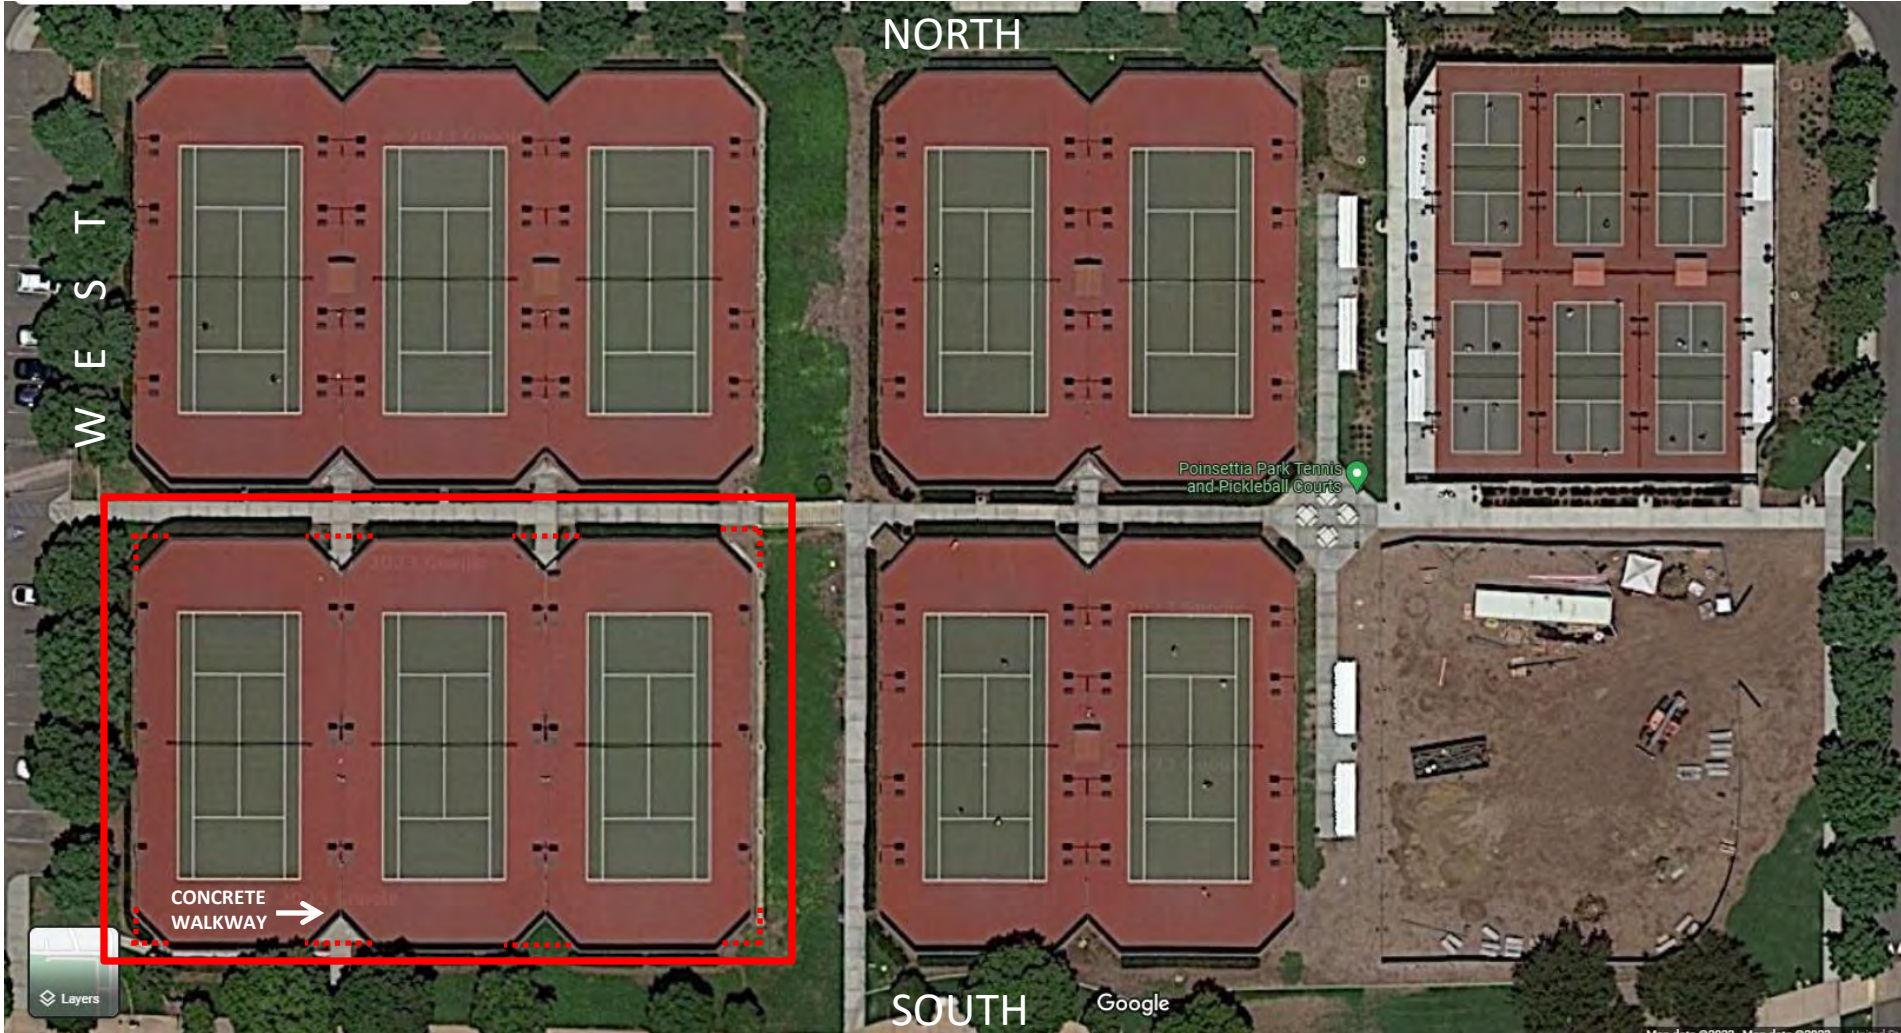

The two Southwest tennis courts would be the most logical choice for converting two tennis courts into eight pickleballs courts.

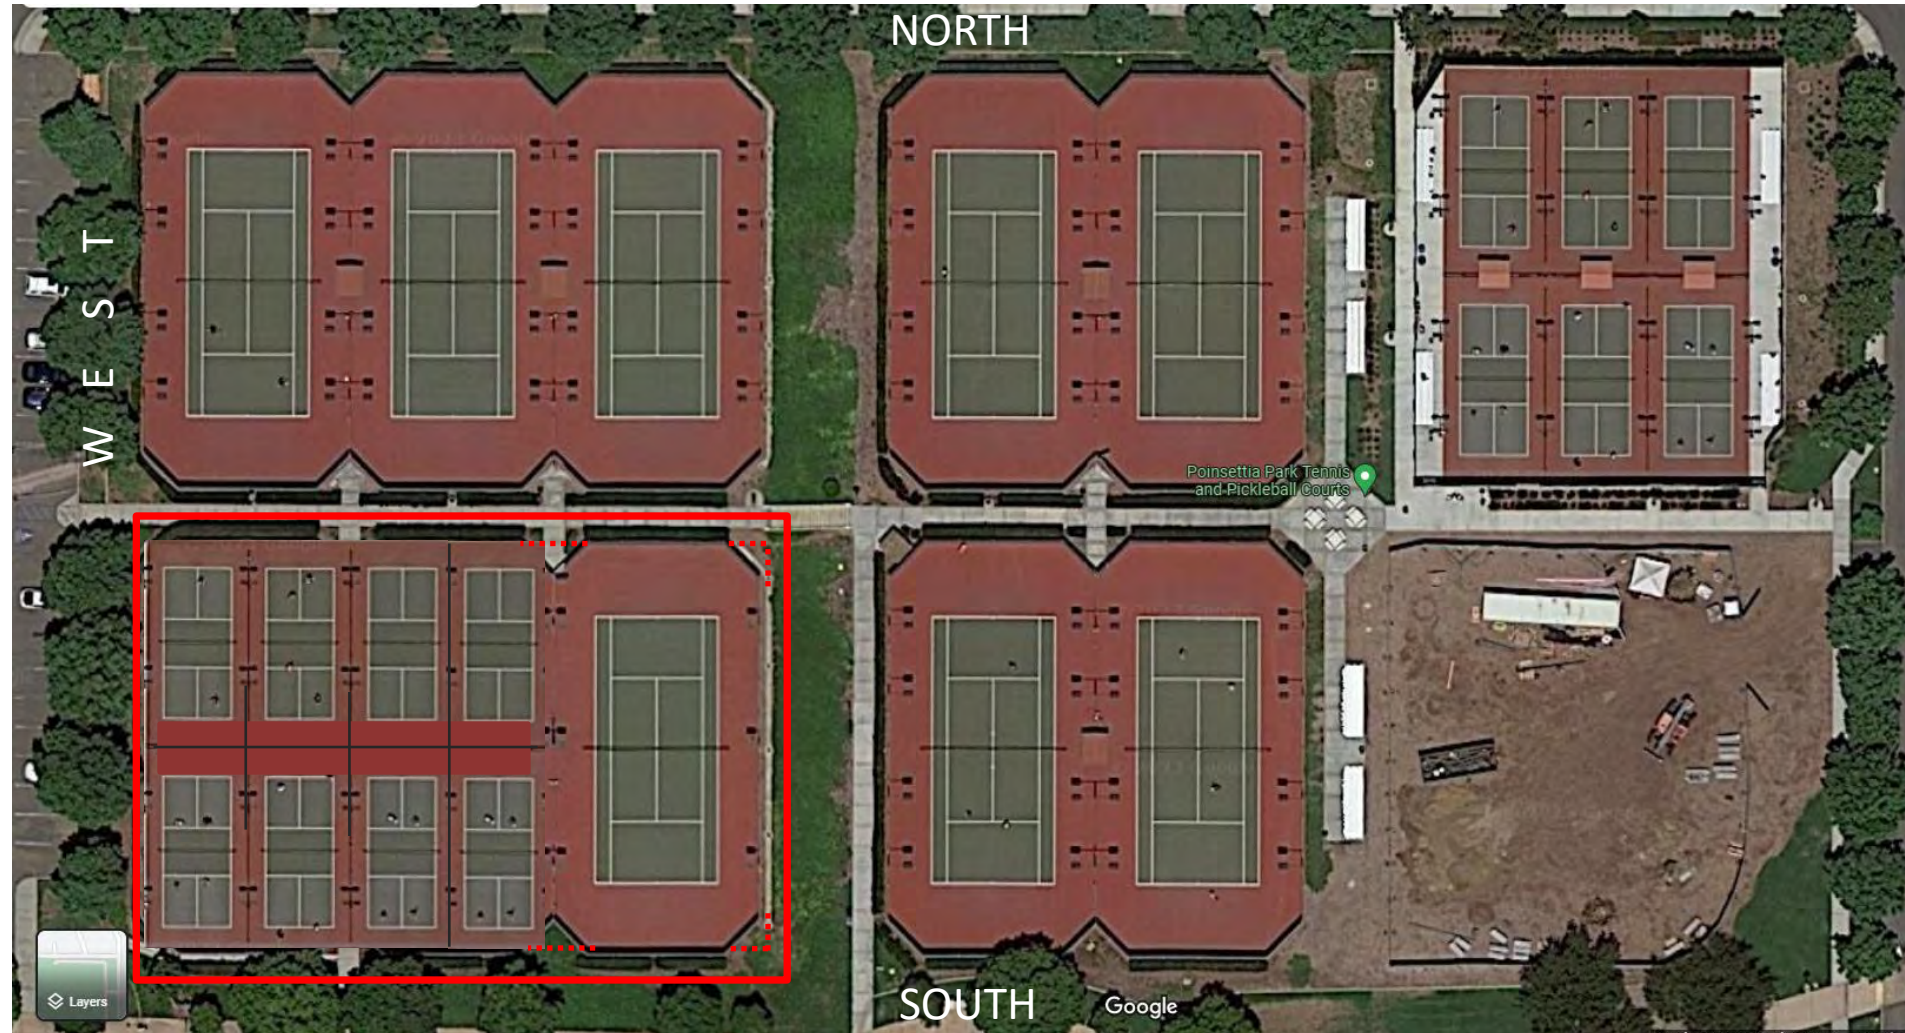

These two tennis courts have flat land on the North, West and South sides, and an existing concrete walkway on the South side; all the other tennis courts have slope issues. These courts are further away from residential homes, which will help minimize noise. It will be very easy to square the corners and put in access gates for each court, which will minimize interruptions when coming and going through the pickleball courts.

**It would be more cost effective to change out all 4 corners and the 4 middle indentations/angles at the same time.**

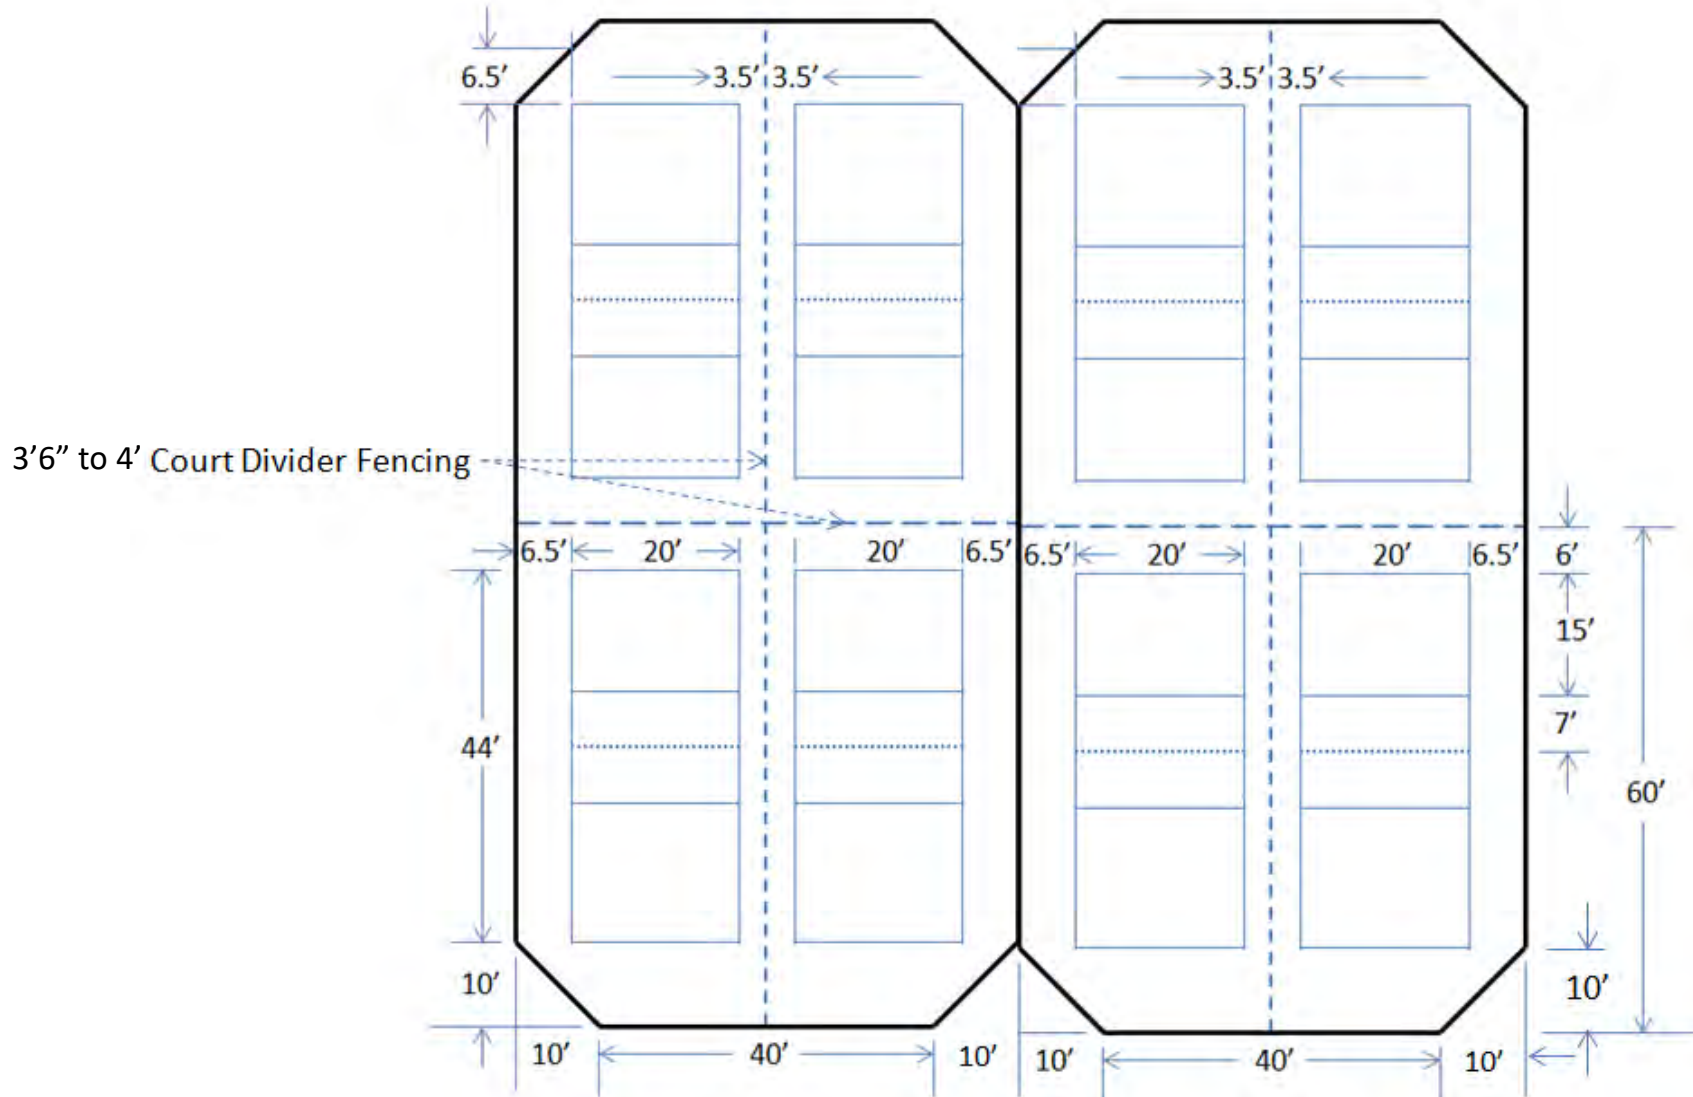

## Two Tennis Courts Converted Into Eight Pickleball Courts

All the angles on the three tennis courts have been removed and straightened, creating a rectangle perimeter. The dimensions for each pickleball court are exactly the same size as the existing Poinsettia pickleball courts, minus the seating areas found on the West and East sides of the existing courts; there is no room for seating. No seating is needed if these courts are reservation only. People will arrive when it is their reservation time to play and leave when their time expires; no interruption of play.

## Poinsettia tennis courts with angled corners converted to 4 pickleball courts

The existing tennis courts have angled corners, which reduces the overall pickleball playing area/footprint between the courts and at the baselines. The longitudinal dividing fence between the two courts leaves a very narrow distance of 3.5' between the court and fence; could be dangerous. Without court dividing fences, balls will constantly be going onto other courts, disrupting the games and possibly causing injury if someone was to step on a ball. Square corners will increase the overall footprint and pickleball playing area, which creates a safer playing area; see next slide.

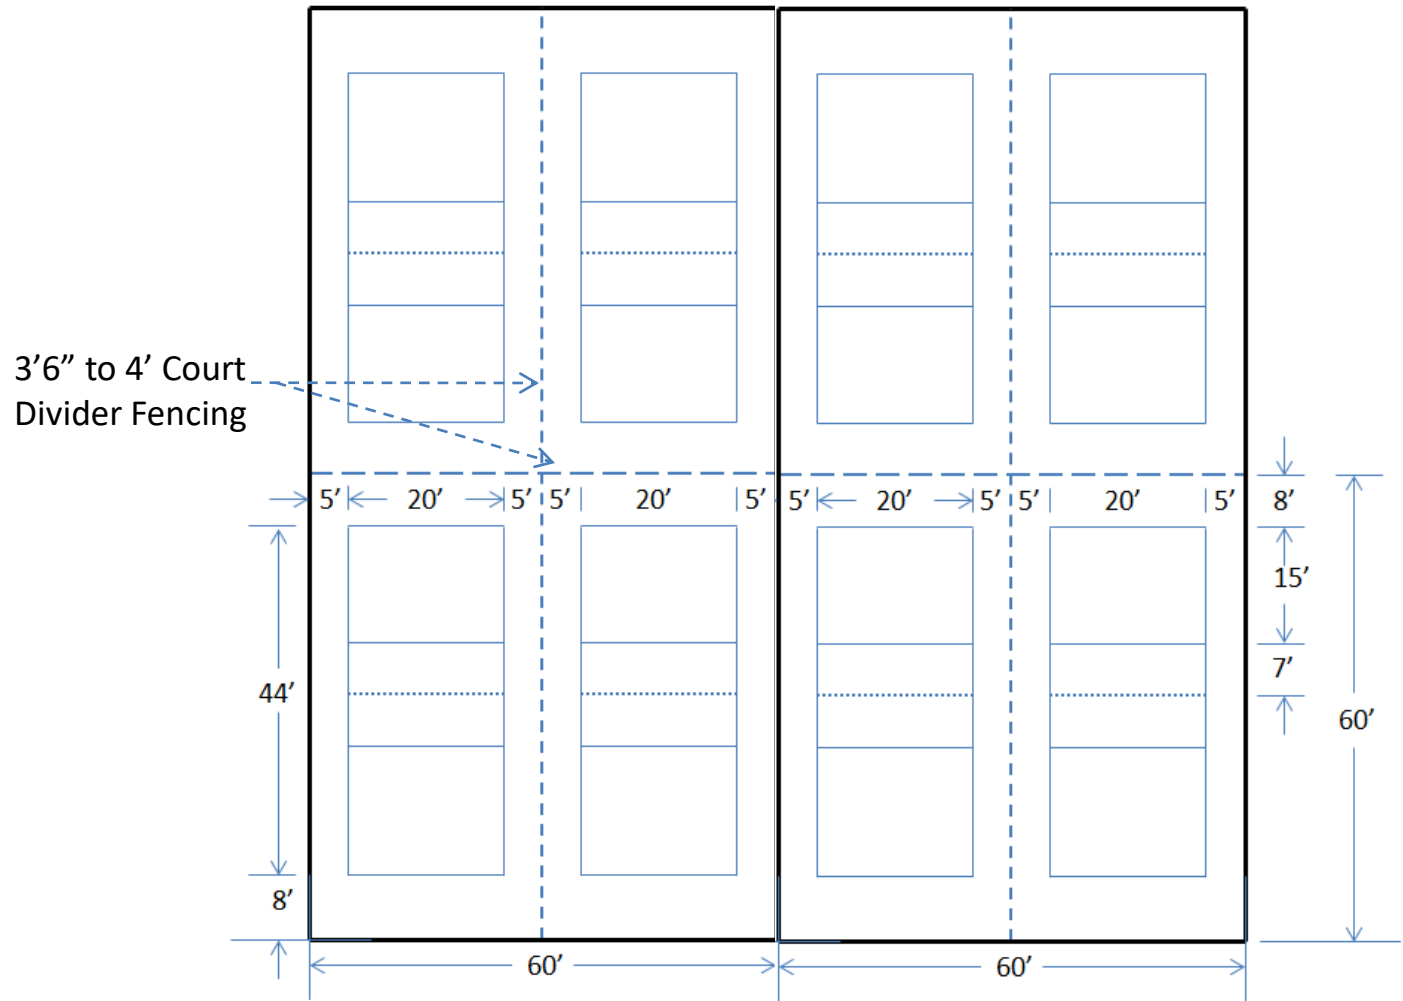

**Angle removed from existing tennis court.**

**Move the existing fence to square the corners, creates more distance at both baselines and increases the playable width on both sides of the courts.**

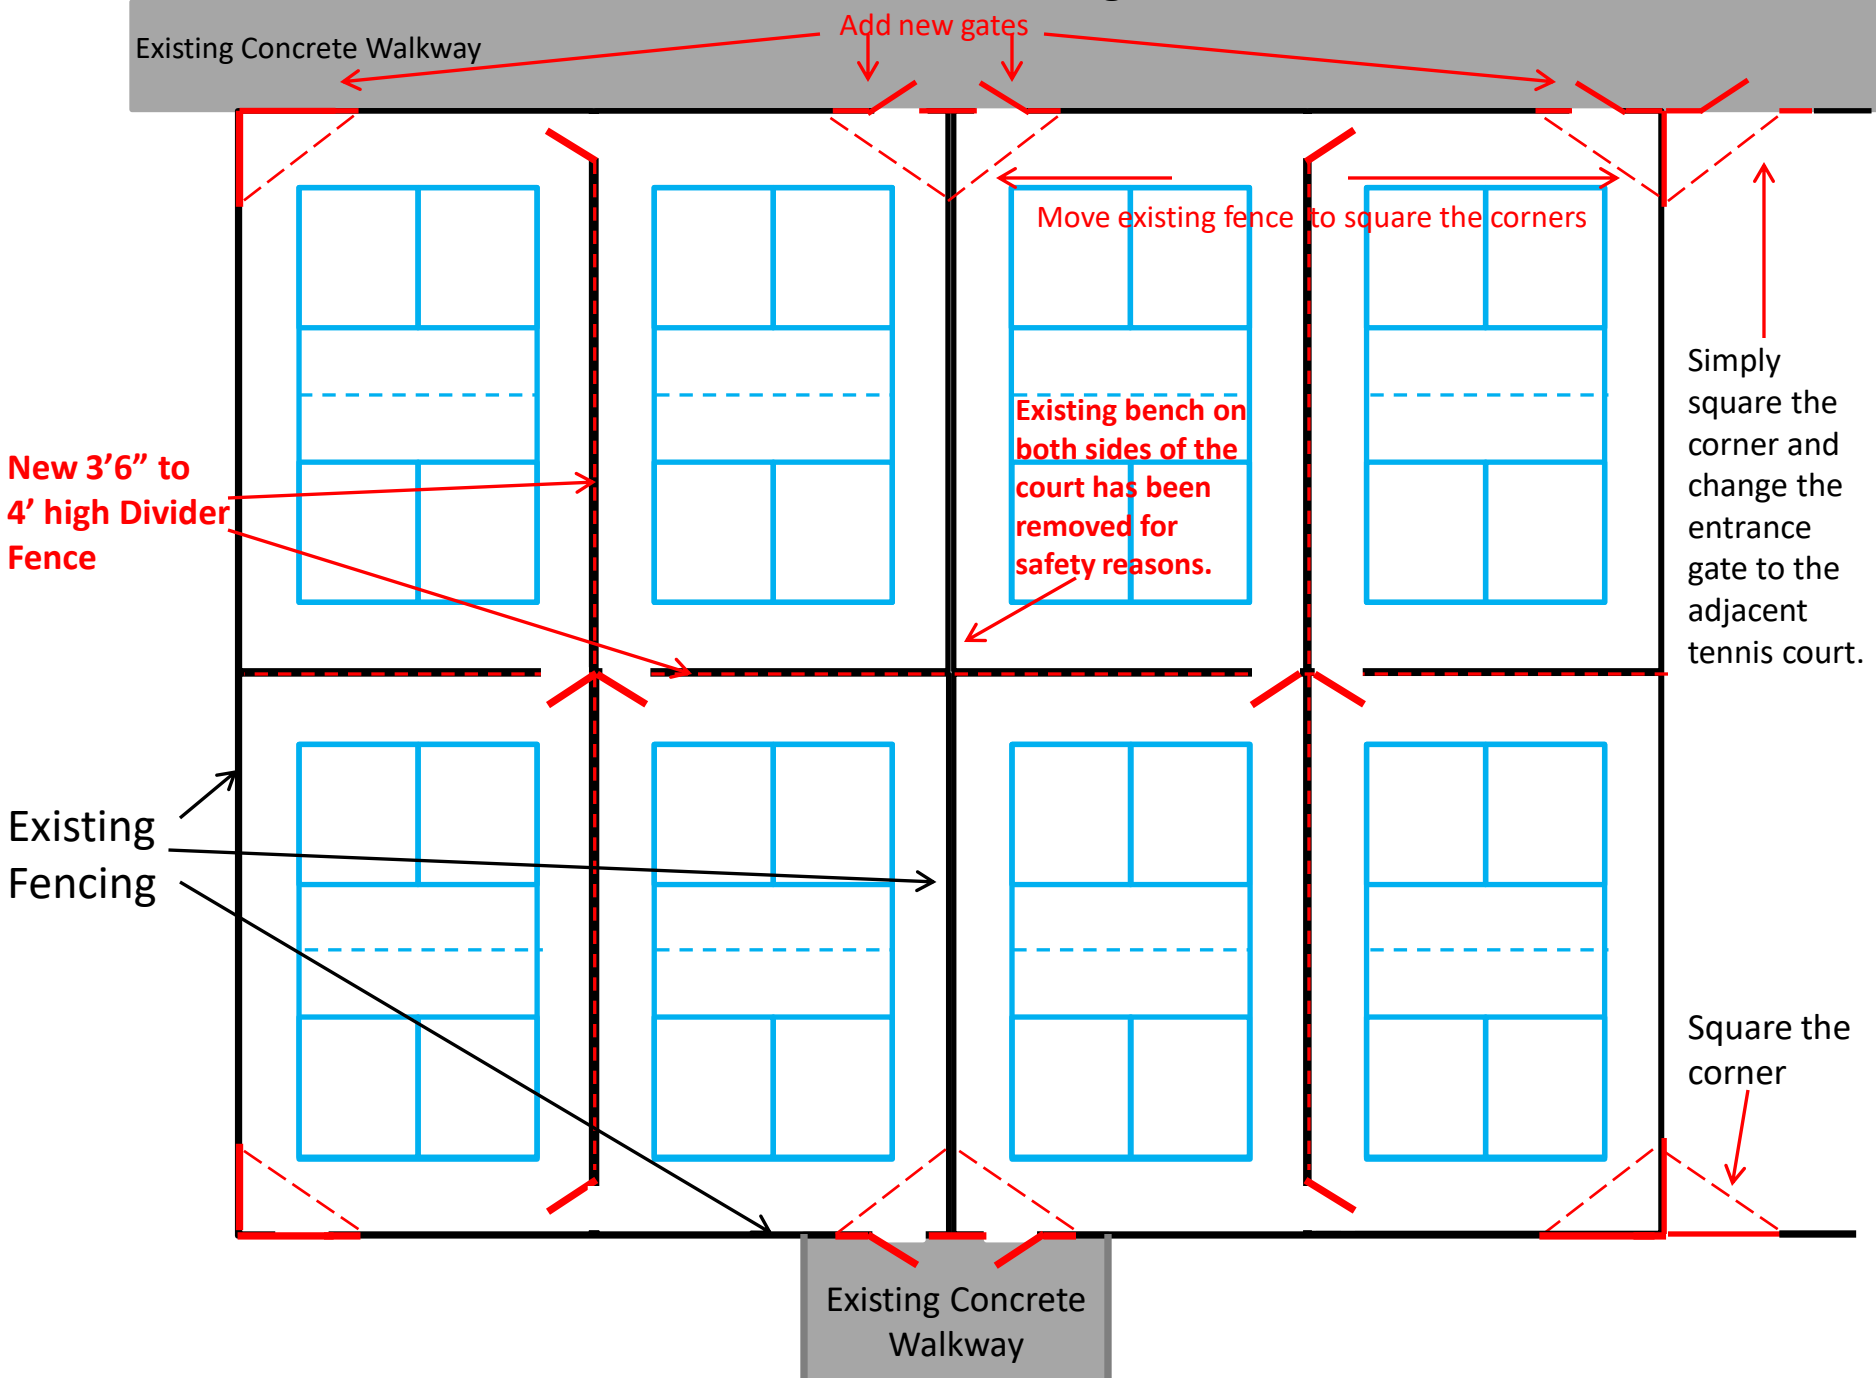

## 2 Poinsettia tennis courts without angles, rectangle footprint maximizes useable playable space, 4 pickleball courts on 1 tennis court

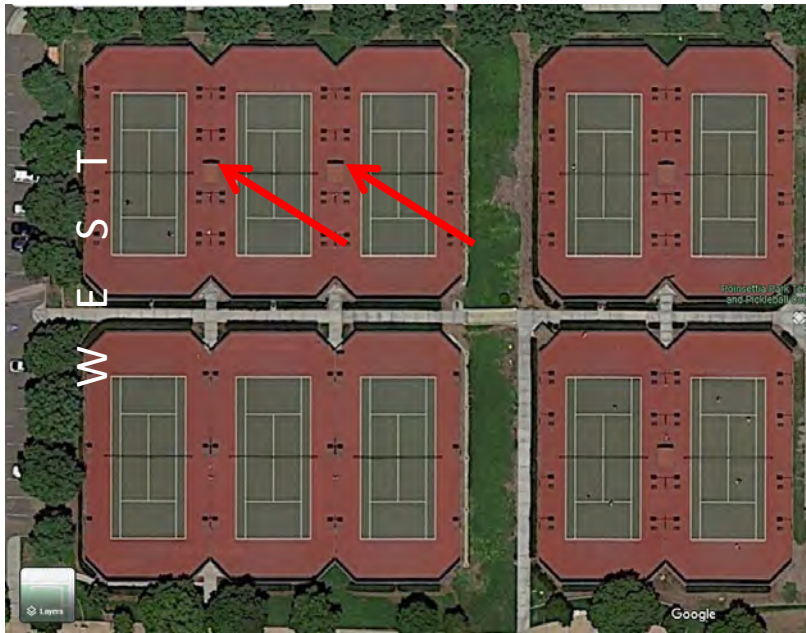

Having a rectangle footprint without angles, will create the exact same footprint as the existing Poinsettia pickleball courts minus the seating areas on the West and East side of the courts; there is no room for seating next to the courts. Having square corners maximizes the playing area and allows for fencing between the courts; a safer playing experience.

# Two Tennis Courts Converted Into Eight Pickleball Courts

## Aerial View of Poinsettia Park Tennis and Pickleball Courts

Shade structure and benches are located between the courts. In order to place 4 pickleball courts on 1 tennis court, the bench seat and bench back will have to be removed on both sides to prevent injury as this would be located within the active playing area. Trash cans should be removed. For safety reasons, the fence should be extended through this area to prevent balls from going onto adjacent pickleball courts.

**Heavy duty pickleball nets can be installed without having to drill into the existing concrete tennis floor; fast and easy installation.**

**THESE NETS ARE USED ON ALL THE PICKLEBALL COURTS AT BOBBY RIGGS  
PROFESSIONAL STANDARDS**

***MEETS THE USAPA & IFP PICKLEBALL NET SPECIFICATIONS***

**<https://bestpickleballnets.com>**

## Thoughts and Benefits for Additional Pickleball Courts at Poinsettia Park

- The city can leave the existing 6 Poinsettia pickleball courts open to the public; make 3 challenge and 3 social.
- Alga Norte charges a fee to swim and Leo Carrillo charges a fee for weddings.
- These new pickleball courts could be reservation only with an hourly fee.
- There are many benefits of reservations only:
  - Generates additional revenue for the city.
  - Carlsbad residents get a discount rate.
  - Angles removed from tennis courts, maximizes the useable footprint, 4 pickleball courts per tennis court. The pickleball courts will have the exact same dimensions as the existing pickleball courts, minus seating areas found on the West and South sides of the existing pickleball courts because there is no room for seating.
  - There is no need for seating areas (bleachers/benches) as people will just show-up when it is their reservation time to play.
  - Families and beginners want to play pickleball, they feel intimidated to play pickleball at Poinsettia Park. Players, beginners, and families, will pay to play, so they can play with players of their same skill level.
  - With most sports, teams/players practice 90% of the time and play 10% of the time. There are not enough pickleball courts, so people play pickleball 90% of the time and practice 10% of the time. Reservations will allow players a place to practice.
  - People don't want to stop playing after one game and wait 30-45 minutes to play again. People will pay to play, proven and supported by Bobby Riggs being sold out almost everyday from 8am until 9pm. Bobby Riggs converted *all* of their tennis courts into 22 pickleball courts. Saint Michaels is reservation only and it is completely booked everyday.
  - Reservations will be automated through a website/app, and managed by an outside entity, which will also setup and manage tournaments and league play. The city will not have to do anything except receive a deposit into the city's account.
  - Weekly Women and Men League play for different ages and skill levels can be held on these courts. Local tournaments, women's doubles, men's doubles, and mixed doubles can be held on these courts as well. These events will bring people into the city of Carlsbad and generate additional revenue. Melba Bishop in Oceanside has been doing this for years; generated enough money to build 3 new pickleball courts at no cost to the city.
  - Coaching and lessons can be held on specific day(s) and times; similar to the tennis courts.

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks and Planning Commissions, CA Coastal Commission and CA State Parks:

As the City has requested specific reference regarding public input, I am delivering to the above addresses this email and attachment as public input for:

1. CTGMC's 1/26/23 meeting
2. The next Carlsbad Council meeting
3. The next Carlsbad Planning and Parks Commission meetings on the Parks Master Plan and Growth Management Program Updates, Ponto Planning Area F and Site 18 land use changes, and Local Coastal Program Amendments
4. Public input to the CCC on Carlsbad proposed Local Coastal Program
5. Public input to Carlsbad's proposed Local Coastal Program Amendment.

*Having just done a photo survey of the latest King Tides in Carlsbad--which is a preview of what our coast will look like as sea level rises in the near future--we won't have any beaches. This means that ANY coastal public open space will be crucial in maintaining Carlsbad's reputation as a great place to live, and as a destination for visitors. Ponto Park will be one of the last open spaces left in our 7-mile coastline where the public can enjoy seaside activities.*

*Our next generations will thank you for planning wisely for the future,*

*J Cannon*

**Subject:** Public input for Carlsbad LCPA-Parks Master Plan & Growth Management Plan Updates - Carlsbad below national average and lowest So CA Coastal city in providing Parks within 10-minute walk

Dear Carlsbad City Council, Carlsbad Tomorrow Growth Management Committee, Parks and Planning Commissions, and CA Coastal Commission and CA State Parks:

As the City has requested specific reference regarding public input, I ask you to please deliver to the those address this email and attachment as public input for:

1. the CTGMC's February 2023 meeting,
2. the next Carlsbad Council meeting,
3. the next Carlsbad Planning and Parks Commission meetings on the Parks Master Plan and Growth Management Program Updates, and Carlsbad's Ponto Planning Area F and Site 18 planning and development applications, and
4. as public input to the CA Coastal Commission on Carlsbad's proposed Local Coastal Program Amendment.

For years Carlsbad Citizens have told the City that there is a need for a Park at Ponto:

- to provide for documented Coastal Recreation (i.e. Public Park) land use at Ponto,
- to correct for the conversion of a 12.8 acre Recreation Commercial land use to Residential use and the elimination of planned Coastal Open Space at Ponto,
- to correct the Carlsbad's Park Master Plan documented lack of Park Service at Ponto,
- to provide South Carlsbad (62% of Carlsbad's total population and the City's major Coastal visitor and transit occupancy tax generator) with their ONLY Coastal Park west of I-5. The City unfairly, and contrary to CA Coastal Act Policy disproportionately provides 10 parks totaling 37 acres west of I-5 in Coastal North Carlsbad for 38% of the population but 0 (zero) Coastal Parks and 0 (zero) Coastal park acres west of I-5 in Coastal South Carlsbad for 62% of the population,
- to provide for an existing 6.5 acre local Neighborhood (i.e. Special use area) Park need at Ponto, and
- to provide a City Park within a 10-minute walk for Ponto residents.

Failure to correct this documented City Park unfairness is very damaging to the citizens, City finances, South Carlsbad's and California's visitor industry. The Coastal Recreation data file sent to you earlier documents some of the key facts.

However, we conducted some additional Trust for Public Land 10-minute walk data collection that the City Council, CTGMC, Parks and Planning Commissions and CA Coastal Commission need to also consider. That data is below and in the attached file, and again with last year's Trust for Public Land Ponto Park support letter (again attached) that reflects

on Carlsbad poor performance relative to the 24 So Cal Coastal Cities (165 miles of coastline) from Malibu to the Mexican border in providing Parks within a 10-minute walk. The data and links to the data source is:

## **Carlsbad is 10% below the national average for cities & the worst of 24 Coastal So California cities - 165 miles of coastline - in providing Parks within a 10-minute walk to residents**

The Trust for Public Land documents a city's 10-minute walk to Park at <https://www.tpl.org/parkserve>. The Average USA City provides Parks within 10-minute walk to 55% of residents [10% above Carlsbad]. **Carlsbad provides Parks within 10-minute walk to 49.9% of residents [10% below National Average].** New York City provides Parks within 10-minute walk to 99% of residents.

### **The Trust of Public Land submitted a letter to the City of Carlsbad, CA Coastal Commission, and CA State Park supporting Ponto Park**

#### **Carlsbad is the worst of 24 Southern CA Coastal cities (from Malibu south to Imperial Beach along 165 miles of coastline) in providing Parks within 10-minute walk to residents:**

1. Palos Verdes Estates provides Parks within 10-minute walk to 100% of residents
2. El Segundo provides Parks within 10-minute walk to 100% of residents
3. Hermosa Beach provides Parks within 10-minute walk to 100% of residents
4. Redondo Beach provides Parks within 10-minute walk to 98% of residents
5. Manhattan Beach provides Parks within 10-minute walk to 95% of residents
6. Del Mar provides Parks within 10-minute walk to 93% of residents
7. Dana Point provides Parks within 10-minute walk to 89% of residents
8. Huntington Beach provides Parks within 10-minute walk to 85% of residents
9. Long Beach provides Parks within 10-minute walk to 84% of residents
10. Laguna Beach provides Parks within 10-minute walk to 82% of residents
11. Santa Monica provides Parks within 10-minute walk to 82% of residents
12. San Diego provides Parks within 10-minute walk to 81% of residents
13. Coronado provides Parks within 10-minute walk to 76% of residents
14. Newport Beach provides Parks within 10-minute walk to 76% of residents
15. Imperial Beach provides Parks within 10-minute walk to 74% of residents
16. Encinitas provides Parks within 10-minute walk to 68% of residents
17. Los Angeles provides Parks within 10-minute walk to 63% of residents
18. Solana Beach provides Parks within 10-minute walk to 63% of residents
19. Oceanside provides Parks within 10-minute walk to 58% of residents
20. Seal Beach provides Parks within 10-minute walk to 57% of residents
21. Malibu provides Parks within 10-minute walk to 53% of residents
22. San Clemente provides Parks within 10-minute walk to 52% of residents
23. Rancho Palos Verdes provides Parks within 10-minute walk to 50% of residents
24. **Carlsbad provides Parks within 10-minute walk to 49.9% of residents.**

**Carlsbad is the lowest & most unfair to citizens of the 24 Southern California Coastal cities along 165 miles of coast from Malibu to Imperial Beach.**

*Source of data: Trust for Public land parkscores*

Trust for Public Land's 10-minute walk to Park Maps/data:

Carlsbad = <https://parkserve.tpl.org/mapping/index.html?CityID=0611194#reportTop>

Encinitas = <https://parkserve.tpl.org/mapping/index.html?CityID=0622678>  
Irvine = <https://parkserve.tpl.org/mapping/index.html?CityID=0636770>

Please, Please, please, consider and discuss this data, and

1. Create a 10-minute walk to City Park Standard in the
    - a. Parks Master Plan,
    - b. Growth Management Plan Update, and
    - c. Local Coastal Program Update.
  2. Create a Park Policy that requires developers to dedicate Park Land (not pay Park-in-lieu-fees) in areas that do not a minimum of 3 acres of City Park for each in 1,000 population within a 10-minute walk of the developer's proposed development (see attached CTGMC Key Issues & Suggestions file for details and Open Space suggestions)
  3. Fix Coastal South Carlsbad's documented City Park inequity/unfairness with a significant and real Ponto Park
  4. Save tax-payers tens of millions in dollars by cost effectively purchasing vacant land at Ponto for a Park, v. trying to maybe make a few bits of narrow PCH roadway median as a pseudo-park
- Do you want Carlsbad to be the worst city in Coastal Southern California in providing accessible Parks within a 10-minute walk to residents?
  - Do you want Carlsbad to fail to upgrade its park standards while other cities updated their park Standards and make their cities more desirable?
  - Do you want to undermine the quality of life for Carlsbad citizens and their children by not providing a park within a 10-minute walk to their home?
  - Do you want to force Carlsbad families to have to drive to park?
  - Do you want to slowly undermine a key visitor serving industry in South Carlsbad by not providing a significant and true and meaningful Coastal Park in South Carlsbad?
  - Do you want tax-payers to pay tens of millions more to try to maybe try to make a few narrow portions of PCH median useable to people?

Please take responsibility and full ownership of your decisions on these important issues and questions. The individual decisions you make will likely be the last ones made. Once vacant land like at Ponto is developed it will be forever lost to address the critical, well documented Park and Coastal Park needs at Ponto as overwhelmingly communicated by Carlsbad Citizens and visitor businesses, and other citizens.

Please be wise and think about the future your decisions will bring.

Thank you,  
Lance Schulte

PS: The initial version of the "CTGMC key issues and Suggestions 2022-12-6" file (attached) sent to you 8/8/22. The attached updated file should replace that older file as there is new data on significant tax-payer cost savings from Pronto Park relative to PCH Relocation, and updated examples of how Coastal Open Space can be cost-effectively persevered and increased. Both Coastal Parks and Open Space are important Carlsbad and State of CA issues.

- Parks: Updated data shows that a 11.1 acre Ponto Park would now cost less \$20 million to buy and build. This is less than a City Pool Renovation. Carlsbad's Old City Council planned to spend \$65 to \$80 million in Carlsbad tax-payer dollars to address the Citywide need for a significant Coastal Park in South Carlsbad with a 2.3 mile PCH Relocation. The City identified in 2001 other pay-payer funds were highly unlikely. \$65 to \$80 million would only 'free-up' 15.8 acres of narrow PCH Median (City documented "Surplus Land Area #4 & #5"). As People for Ponto Citizens have been saying for years that Ponto Park is the better Park solution to the

documented Coastal South Carlsbad Park needs – a citywide need. The CTGMC should include that citywide Park need and the logical, better and tax-payer responsible Ponto Park solution to that citywide Park need in your CTGMC recommendations to City Council.

- Open Space: Updated data shows how documented GM Open Space shortfalls can be properly and responsibly address in a collaborative citizen-based “Local Facilities Zone Useable Open Space Correction Plan” approached. Also the need to maintain the 15% GM (Useable) Open Space Standard will be critical in the future to maintain Open Space and prevent future conversion of Open Space to residential land use as part of Housing Plan updates.

For the CTGMC; Parks and Open Space are the 2 most critical/special of 6 Key Growth Management Program Update Issues and Suggestions the CTGMC should take to properly address these 6 key Growth Management Issues.

- Please read the Updated data and Suggestions.
- Please responsibly address the Growth Management issues of a citywide Park need for Coastal South Carlsbad as listed in the attached Suggestions. Include a South Carlsbad Coastal Park in your recommendations to the City Council. Acknowledge Ponto Park as the best and most tax-payer efficient solution to address that documented citywide park need.
- Please in your recommendations to City Council retain and enforce the Open Space Standard, and fix past errors made in falsely exempting certain developers in certain areas in the City from complying with the Growth Management Open Space Standard that other developers in other areas are required to provide.

Please consider this email and attachments, and know P4P Carlsbad Citizens are here to help assure we sustain and enhance our quality of life for future generations. People for Ponto love deeply Carlsbad and want to assure we leave a better Carlsbad to future generations.

Happy holidays and with Aloha Aina,  
Lance Schulte

Irvine = <https://parkserve.tpl.org/mapping/index.html?CityID=0636770>

Following are 6 key major Growth Management Standards issues of citywide relevance that the Carlsbad Tomorrow Growth Management Committee (CTGMC) needs to act on, and citizen “Suggestions to CTGMC” on how to honestly and responsibly act on these 6 key issues in the CTGMC’s recommendations to the New City Council. This Update includes new information (pp 5-6) on the improved affordability of Ponto Park, and on how GM Open Space shortfall can be repaired. We hope the CTGMC will act honestly to make recommendations that truly and responsibly address known documented shortfalls in both Parks and GM Open Space. Responsible recommendations by the CTGMC can provide a sustainable Quality of Life to future Carlsbad generations and visitors. Only you own your recommendations.

1. The State of CA is forcing Carlsbad and all cities/counties in CA to provide for unlimited or Infinite Population and Visitor growth. So there will be an Infinite population & visitor demands for Parks, Open Space, water, and demands on our roads/transportation systems, and other Growth Management (GM) Quality of Life facilities. These infinite increases in population and visitor demand will come from high density development that requires more public Parks and Open Space to balance the high-densities. **Carlsbad’s new GM Standards will have to provide for a system of Infinite proportional increases in the supply of Parklands, Open Spaces, water, transportation facility capacity, etc. or our Quality of Life will diminish.**
  - a. Suggestions to CTGMC:
    - i. Completely restructure the General Plan, Local Coastal Program and GM Program to clearly recognize these facts and State requirements to proportionately provide public facilities to maintain/improve Carlsbad GM Quality of Life Standards for this Infinite growth of Population and Visitor demands.
    - ii. **Being a Coastal city Carlsbad has an added responsibility to proportionately maintain/improve providing High-Priority Coastal land uses (Coastal Recreation {i.e. Public Parks} and Low-cost Visitor Accommodations) needed at a regional and statewide level to address visitor needs for Coastal Recreation, access, and affordable accommodations.** Carlsbad needs to work with the State of CA Coastal Commission to completely restructure Carlsbad’s Coastal Land Use Plan to addresses the State’s requirement to provide an Infinite amount high-priority Coastal land uses for those Infinite Population and Visitor demands.
    - iii. **Trying to ignore these Infinite demands for Carlsbad’s Quality of Life facilities – like Parks and Open Spaces is a path to disaster and the ultimate degradation of Carlsbad’s Quality of Life.**
2. **Carlsbad has a huge Jobs v. Housing supply imbalance – far too many jobs around the airport for our amount of housing. This creates negative and costly land use and transportation planning distortions that radiate from the Airport Central Jobs through Carlsbad in all directions.** CA Housing law penalizes unbalanced cities like Carlsbad by requiring more housing in Carlsbad to bring jobs/housing ratio into balance. Carlsbad can correct this imbalance by 1 of 2 ways: 1) greatly increase housing supply (and thus increase the need and City expense for more GM Quality of Life facilities), or 2) more logically and cost effectively greatly decrease the amount of Jobs land use, so Carlsbad’s housing supply is in balance with jobs. These jobs will move to surrounding Cities that have more housing than jobs. **Rebalancing by reducing jobs land use creates added benefits for Carlsbad and our region by reducing Carlsbad’s peak-hour job commute traffic volumes and**

vehicle miles traveled (VMT), and by reducing the costs Carlsbad (and other cities and the region) have to pay to accommodate inter-city commute traffic. If Carlsbad reduces jobs land use will also reduce the amount of housing the State of California and SANDAG requires Carlsbad provide in its Housing Element thus reducing forcing incompatible high-density development into established neighborhoods and pressure to convert useable GM Open Space lands to housing land use.

a. Suggestions to CTGMC:

- i. **Carlsbad can logically and cost effectively balance Jobs/housing supply by updating Growth Management Policy to reduce jobs to be in balance with housing by changing some of Carlsbad's General Plan land use around the airport into several high-density residential mixed-use Villages.** The City has started some of this, but can expand this effort but has not planned creating mixed-use village environments. These high-density villages will reduce jobs and provide both high-quality and high-density (affordable) housing within walking/biking distance to the major job center and new neighborhood commercial and Park uses in the Villages.
- ii. Prioritize transportation investments in safe bike paths, walking paths between Carlsbad's Central Jobs Core around the airport and Carlsbad's housing, particularly strongly connecting these new high-density mixed-use villages with the Central Jobs Core.
- iii. Update General Plan land use and housing policy to reduce concentrations of higher-density housing except around the airport jobs core.
- iv. Recognize the central Airport jobs core is 'Carlsbad's New Urban Downtown and "Transect Plan" accordingly toward lower densities on the City periphery.

3. Although some very critical areas (such as the Coastal lands at Ponto) are still vacant and can be wisely used for critical GM Quality of Life needs, much of Carlsbad is largely developed.

**Redevelopment of developed land will require creating increased supplies of Parkland, Open Spaces, transportation capacity, and other Quality of Life facilities.**

a. Suggestions to CTGMC:

- i. **Completely rethink all City planning on existing vacant lands to assure that remaining vacant land is planned and being used wisely and fairly distributed to address critical Quality of Life needs in those areas, and not squandered on redundant land use.** The location of vacant land to address critical Park & Open Space needs should be preserved with land use planning.
- ii. Work with the State and CA Coastal Commission to preserve our Finite vacant Coastal lands for High-Priority Coastal Land Uses (Coastal Recreation {i.e. Public Parks} and Low-cost Visitor Accommodations and services) for the Infinite population and visitor demands both internal and external to Carlsbad that are/will be placed on them.
- iii. Fully and at the very beginning of any Carlsbad General Plan, Local Coastal Program and Growth Management Program actions going forward fully disclose, map and require consideration of the impact of future sea level rise and coastal erosion on Coastal land acres and land uses. Carlsbad has lost and will accelerate losing acres of Coastal land and High-priority Coastal Land Uses. Carlsbad must know, see, and discuss these losses BEFORE making any land use decisions in Carlsbad's Coastal Zone and any vacant Coastal Land.

4. **Carlsbad General Plan & Growth Management Plan do not provide a fair distribution of adequately sized City Parks for all Carlsbad families.** Veterans Park is a classic example. What will

be the City's largest park is only about 1-mile away from three other major City Parks (Zone 5, and the future Robinson Ranch and Hub Parks). This is a poor and unfair distribution and a misallocation City Park land resources. Saying Veterans Park is 'the park to serve SW, SE, and NE Carlsbad families' (the overwhelming major/majority funders of veterans Park) when those families are upwards of 6-miles away on major commercial arterials that kids can't logically/safely use is false and unfair. Most all the funding (developer fees) to build Veterans Park come from the SW, SE and NW Carlsbad but those areas are denied the Park the paid for. Veterans Park is inaccessible by almost all its intended users except by driving their cars and then storing their cars in parking lots on Parkland thus making less park land available for actual park use – this makes little common sense and is a great waste of tax-payer funds. This is dysfunctional along with being very unfair to families in SW, SE and NE Quadrats that are denied park acres near their homes which they funded. **Carlsbad's Park Master Plan maps 'Park Service' areas of existing known Park Inequity or Unfairness (dysfunction), to show where new City Park investments should be made (See City map image with notes below).**

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

The Trust for Public Land provides a Park-Score to compare both a City's amount of park acres and the 'fairness' of access (within a 10-minute walk) to parks. **Carlsbad is below national averages in both park acres and fair access to parks. Carlsbad is also well below what our adjacent Coastal cities of Encinitas and Oceanside provide. Carlsbad only requires 3 acres of Park land per 1,000 population, while Encinitas and Oceans require 5 acres - 67% more than Carlsbad – of parkland. Also, Encinitas and Oceanside require parks to be within a 10-minute walk to their citizens and families. Carlsbad has no such requirement.**

a. Suggestions to CTGMC:

Carlsbad should change its General Plan, Parks and Growth Management Standards and CMC 20.44 to:

- i. **Be Above Average Nationally in both providing park acreage and in locating adequate park acreage to be within a 10-minute walk to all neighborhoods.**
  - ii. **Raise its minimum park acreage standard to 5 acres per 1,000 population, versus the current low 3 acres per 1,000. Carlsbad should be at least as good as Encinitas and Oceanside in requiring 5 acres, not 40% below what our adjacent Cities require/provide.**
  - iii. **Raise its park location standard to require an adequately sized park be provided to serve the neighborhood population within a 10-minute walk for all neighborhoods.**
  - iv. **Prioritize City Policy and Park Budgets and investments to achieve park fairness in 'Park Unserved areas' identified by Carlsbad's Park Master Plan.**
  - v. **Per Carlsbad's Municipal Code Chapter 20.44- DEDICATION OF LAND FOR RECREATIONAL FACILITIES to require developers in 'Park Unserved areas' and in areas that do not have an adequately sized (5 acres per 1,000 population) park within a 10-minute walk to provide their developments required Park land acre dedication in actual Park land within a 10-minute walk to their development.**
  - vi. **Update the City's Park-in-lieu fee to assure the fee is adequate to actually buy the amount of park land a developer is to provide within a 10-minute walk of their development. The City's current 'Park-in-lieu-fee' is far too low and inadequate to actually buy land in area surrounding the proposed development.**
  - vii. **Only allow developers to pay a Park-in-lieu-fee where there is an adequately sized park (provide 5 acres per 1,000 population) within a 10-minute walk of their development, and growth management planned future development in that area will not require more park land to provide 5 acres per 1,000 population) within a 10-minute walk.**
  - viii. Consider updating Park policy to provide more multi-use flexibility in park land acres and development on Parks. Many Carlsbad Park acres are developed/dedicated to a single-purpose use, and unavailable for other park uses.
  - ix. Consider eliminating car parking lots from land that can be counted as parkland; or by significantly limiting park land used for parking to around 5%.
  - x. **Eliminate the counting of 'GM Constrained and Unusable land' and Protected Endangered Species Habitat land as Park land. GM Constrained/Unusable lands are undevelopable. Protected Habitat lands are by definition not useable for development by people. Habitat is dedicated for plants and animals. Parks are open spaces dedicated intended for people. Parkland calculations should exclude Unusable lands and Protected Habitat lands and only count 100% people Useable land as Park land. Where Park land abuts Habitat land a sufficient buffer space shall be provided to prevent people mixing with animals (ex. Rattlesnakes, etc.) and animals from people (habitat disturbance or destruction). This buffer area should not be counted as Park or Habitat acres, but as natural/developed buffer open space acres, and can be counted as part of the City's 15% Growth Management 'Aesthetic open Space'.**
5. Carlsbad's Coast is the most, if not the most, important feature of Carlsbad; and is consistently identified by citizens and businesses and our Community Vision. **Carlsbad's Coastal Parks (west of the I-5 corridor) are grossly unfairly distributed. Carlsbad's Coastal Parks do not fairly match the**

**locational needs of the population. North Carlsbad that is 38% of Carlsbad's population and has 10 Coastal Parks totaling 37+ acres in size. South Carlsbad that is 62% of Carlsbad's population has 0 [ZERO] Coastal Parks totaling 0 [ZERO] acres.** Again, Carlsbad's Park Master Plan maps this citywide unfairness (dots show park locations and circles show the area served by each park) and says that the City should look at buying and building New Parks in these areas that are unserved by City Parks (are not covered by a circle). The GM Update should correct this citywide unfair distribution of City Parks by making plans for new Park purchases to create City Parks in these unserved areas of Park Inequity.

To address citywide Coastal Park unfairness the current City Council wants to spend \$60-85 million in Carlsbad tax-payer funds to Relocate 2.3 miles of constrained Pacific Coast Highway median to try to make some of the narrow PCH median 'useable' by people. 2001 and 2013 City PCH Relocation studies identified only a small amount of 'people-useable acres' would be created next to PCH. The \$60-85 million tax-payer cost (\$26-37 million per mile) does NOT add one single square foot of new City land, it only inefficiently rearranges a small amount PCH median. The City can most tax-payer cost effectively provide needed sidewalks and bike improvements along the outside edges of PCH without PCH Relocation. The City's 2001 PCH Relocation Financial Study and 2013 PCH Relocation Design both indicated minimal useable land could be achieved by Relocation, and that the very high tax-payer cost to do so would be very difficult to fund. The City has known for well over 20-years that PCH Relocation is a high-cost and a poor solution to address the Citywide Coastal Park unfairness in South Carlsbad.

However, a **better and far less costly solution to correct Citywide Coastal Park unfairness and provide a much needed South Carlsbad Coastal Park is to simply buy currently vacant land that is for sale.** The City did this (although the City actually bought existing homes) when it expanded Pine Park. **Carlsbad tax-payers have used the City's own data to compare the tax-payer Cost/Benefits of simply purchasing vacant land v. trying to rearrange existing City owned land at PCH. Simply buying vacant land saves tax-payers saves tax-payers over \$32.7 to \$7.7 million.** Please read the following data files:

- 2022-June General Comparative tax-payer Costs/Benefits of Completing PCH, 2.3 miles of PCH Modification (Island Way to La Costa Ave.), and 14.3 acre Ponto Park (Kam Sang) to address planned loss of 30+ acres of Coastal Open Space Land Use at Ponto in South Carlsbad: Part 1 of 2.
- City's PCH Modification Proposal Area Map with notes on usability Constraints and Issues: P4P Input: Part 2 of 2
- The most recent (9/19/22) land sale of 11.1 acre Ponto Planning Area F was less than \$8 million (less than \$706,000 per acre).
- **Buying and developing this 11.1 acre Ponto Park would cost less than \$20 million assuming a 10% profit to the new land-owner, and \$1 million per acre park construction cost like our newest Buena Vista Reservoir Park.** The cost to help correct a Citywide Coastal Park unfairness by simply buying & building a much needed **11.1 acre Ponto Coastal Park would cost tax-payers less than the recently approved Measure J City Monroe Street Pool Renovation.** Investing less than \$20 million (\$1.8 million per acre) to buy and build an 11.1 acre Ponto Coastal Park is a great tax-payer value v. \$65-80 million in tax-payer funds to rearrange 15.8 acres of narrow strips of constrained PCH median (City documented "Surplus Land Area #4 &5") for some minimal people use at a tax-payer cost of \$4-5 million per acre. **The overall and per acre costs of buying/building Ponto Park are over 2 to 3 times better value for tax-payers than PCH Relocation/rearrangement.**

- The City Council could/can buy land for Open Space (Parks are the most useable of the City's 4 Open Space categories) under voter approved Prop C Open Space land acquisition authority. **The City has been advised to buy Ponto Park under Prop C per the City's settlement of a Growth Management law suit.**

**The Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad is clearly a citywide issue. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad as it is unfair to the vast majority of Carlsbad citizens and their families as 62% of Carlsbad is in South Carlsbad. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad is unfair to our major Visitor serving industries (and tax generators) in South Carlsbad. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad are clearly inconsistent with the CA Coastal Act, Carlsbad's Community Vision, and common sense.** The Coastal South Carlsbad Park Inequity is also unfair to North Carlsbad because South Carlsbad's Coastal Park demand is being forced into Coastal North Carlsbad and congesting those parks, and adding to Coastal North Carlsbad traffic and parking impacts. It also increases greenhouse gases and VMT as it forces longer vehicle trips.

a. Suggestions to CTGMC:

- i. 11.1 acre Ponto Planning Area F has a specific Local Coastal Program Land Use Policy that says The City of Carlsbad must for the Ponto Area LCP 'Consider and Document the need for Coastal Recreation (i.e. Public Park) and or Low-Cost Visitor Accommodations west of the railroad tracks (at Ponto) prior to any Land Use change. **The discussion of Parks by the CTGMC is such a situation that requires the CTGMC to consider this adopted LCP Land Use Policies. Official public records requests have shown the City never followed this LCP Land Use Policy Requirement during the 2005 Ponto Vision Plan and 2015 General Plan Update, and in 2010 the CA Coastal Commission rejected the Ponto Vision Plan and told the City in 2017 that that land uses at Ponto could change based on the need for Coastal Recreation and/or Low Cost Visitor Accommodations.** The Mello II LCP that covers most of Carlsbad's Coastal Zone also has Land Use Policy 6.2 for the City to consider a major park in the Batiquitos (Ponto/South Carlsbad) area. The City has only implemented 1/6 to 1/3 of this policy. **The CTGMC should fully evaluate the citywide/South Carlsbad and local Ponto need for Coastal Parks as required by the City's adopted LCPs and CA Coastal Act.**
- ii. Carlsbad's 2015 General Plan Update and Growth Management Plan (GMP) did not, and was not updated to, consider the 2017 Sea Level Rise (SLR) Impact report showing the loss/impact on 32+ acres of Carlsbad's Coastal Land Use acreage in South Carlsbad – primarily Open Space Land Use (beach and Campground). **Both the General Plan (and Local Coastal Program Land Use Plan) and GMP should be updated to account for the loss and replacement of these 32+ acres of high-priority Coastal Open Space Land Use due to SLR.** The updates and the CTGMC should use the newest CA Coastal Commission SLR Guidelines/science, not the old guidelines used in 2017. Carlsbad's LCP and CA Coastal Act Land Use Polies call for 'upland relocation' to replace the SLR loss of high-priority Coastal Land Uses.
- iii. **The availability over the past several years of the last two sufficiently sized vacant lands suitable for a Ponto/South Carlsbad Coastal Park is a citywide issue. If these last two vacant lands are lost to development forever future generations will have lost the last opportunity for the needed South Carlsbad Coastal Park.** The 5/3/22 Citizen requests for the City to jointly study acquisition of one or both these last vacant lands for a needed (and only possible) true and meaningful Coastal Park for

South Carlsbad should be recommended by the CTGMC. **The CTGMC should recommend Carlsbad’s GMP be updated to incorporate Parkland acquisition of these last opportunities to provide the needed Coastal Park for South Carlsbad.**

6. Carlsbad Growth Management Open Space Standard is that 15% of all the Useable (unconstrained and fully buildable) areas is to be preserved as Useable Open Space, and that all the 25 Local Facility Management Plans (LFMP) show how that 15% is provided. The City says:

---

---

**OPEN SPACE**

---

---

**A. Performance Standard**

Fifteen percent of the total land area in the Local Facility Management Zone (LFMZ) exclusive of environmentally constrained non-developable land must be set aside for permanent open space and must be available concurrent with development.

Yet the City has mapped and documented that this 15% Useable Open Space Performance Standard was not complied with. The City also acknowledges that without changes to current City planning the 15% Useable Open Space Performance Standard will never be complied with. The City acknowledges that only 13% has/will under current plans ever be provided. This missing 2% equals 501 acers of lost GM Open Space the GMP promised citizens. **Carlsbad law the Growth Management Ordinance 21.90, and section ‘21.90.130 Implementation of facilities and improvements requirements’; provide guidance on how non-compliance with a Performance Standards is to be handled.**

a. Suggestions to CTGMC:

- i. Retain the GM Open Space Standard of 15% of all unconstrained and developable land is maintained as Open Space. If the City removes the Open Space Standard, it will allow and encourage land use changes to remove GM Open Space and replace with development.
- ii. **The CTGMC should make a recommendation that an inventory of all 25 LFMP Zones be conducted and an inventory of each LFMP Zones provision of at least 15% Useable Open Space shall be compiled. No LFMP Zone shall be allowed to be “exempt” from this inventory.** The City’s computerized GIS mapping system makes it easy and clear as shown in the following City GIS map for LFMP Zone 9 (aka Ponto).

**City GIS map of Ponto's (LFMP Zone 9) Open Space:**

- Light green areas meet the City's 15% unconstrained Growth Management Program Open Space Standard
- Most Ponto Open Space (pink hatch & blue [water] on map) is "Constrained" and does not meet the Standard
- **Aviara - Zone 19, Ponto - Zone 9 and Hanover/Poinsettia Shores – Zone 22 all developed around the same time and had similar vacant lands.**
- **City required Aviara - Zone 19 east of Ponto to provide the 15% Standard Open Space. Why not Ponto? Aviara includes the same lagoon.**
- **City required Hanover & Poinsettia Shores area Zone 22 just north of Ponto to provide the 15% Standard Open Space. Why not Ponto?**
- Why Ponto developers were not required to comply with the 15% Useable Open Space Standard is subject to current litigation
- Below is City GIS data from this map

**City GIS map data summary of the Growth Management Standard of 15% Useable Open Space at Ponto**

472 Acres	Total land in LFMP Zone 9 [Ponto]
<u>(197 Acres)</u>	Constrained land excluded from Growth Management (GMP) Open Space
275 Acres	Unconstrained land in LFMP Zone 9 [Ponto]
X 15%	GMP Minimum Unconstrained Open Space requirement
41 Acres	GMP Minimum Unconstrained Open Space required
<u>(11 Acres)</u>	GMP Open Space provided & mapped per City GIS data
<b>30 Acres</b>	<b>Missing Unconstrained Open Space needed in LFMP Zone 9 [Ponto] to meet the City's minimum GMP Open Space Standard per City's GIS map &amp; data</b>

**73% of the City's minimum 15% required Open Space Standard is missing due to over development of LFMP Zone 9 [Ponto]**

- iii. In instances like LFMP Zone 9 (above image) that clearly did not provide at least 15% Useable Open Space and/or were falsely “exempted” the CTGMC should recommend that a **Local Facilities Zone Useable Open Space Correction Plan** shall be developed that explores the GM Open Space use/reuse of City land, land use planning requirements, and/or possible acquisitions of remaining vacant land acres to make up for any shortfall in meeting the 15% Useable Open Space in that a Zone. An example of this in LFMP Zone 9 is that the City’s regional Rail Trail will convert 2-lanes of almost all of Avenida Encinas to wider buffered bike lanes and an adequate portion of the converted 2 vehicle lanes can be landscaped (v. just painting strips as a buffer) to provide a safer/better bike lane buffer within a GM compliant Open Space. 2 vehicle lanes in Windrose Circle could also be similarly landscaped and converted to GM complaint Open Space. This is just one example of a cost-effective means to add GM Open Space that developers were falsely allowed to remove.
- iv. A **Local Facilities Zone Useable Open Space Correction Plan** should involve a Citizens Advisory Committee composed of citizens within the impacted Zone and appointed by the Council Members representing the Zone, and a representative of each vacant land owner over of over 1-acre in size.
- v. Consistent with the Growth Management Ordinance land use changes and development applications within a **Local Facilities Zone Useable Open Space Correction Plan** Zone shall be deferred until the applications can considered with (or after adoption of) a **Local Facilities Zone Useable Open Space Correction Plan**.

March 11<sup>th</sup>, 2022

Carlsbad, CA 92008

**Re: Support creation of Ponto Park – a needed park for South Carlsbad**

Dear Mayor Hall,

The Trust for Public Land (TPL) is strongly supporting the efforts of ‘People for Ponto’ and thousands of Carlsbad residents to build Ponto Park in the 11-acre coastal parcel known as ‘Planning Area F’ in South Carlsbad. For over 40-years TPL has been designing and building parks in California and although we have world-class parks and beaches, the fact remains 3.2 million Californians don’t have access to a park, and some of those Californians are residents of South Carlsbad. While the National Recreation and Park Association calls for 10-acres of park lands per 1000 residents as standard metric for healthy and vibrant cities, Carlsbad has a comparatively and relatively low park standard of only 3-acres/1,000 population and no requirement to provide accessible parks within walking distance.

And according to our own Trust for Public Land 2020-21 ‘City Parkscore’, Carlsbad is also below national averages both providing park land acreage and in providing residents a park within a 10-minute walk.

The City of Carlsbad’s Park Master Plan on pages 86-89 documents park service and park equity/inequity. Carlsbad’s Park Master Plan documents that Ponto area has no park and all of South Carlsbad (over 61% of the entire city population) has no Coastal Park while . Carlsbad provides 10 City Coastal Parks (totaling over 35-acres) in North Carlsbad, while South Carlsbad has no coastal parks to serve the 64,000 residents, many of which are children. Ponto Park at 11-acre Planning Area F is the last remaining reasonable bit of vacant and currently unplanned Coastal land to provide a Coastal Park for South Carlsbad. Ponto Park would also be in the middle of a 6-mile long section of North San Diego County coastline without Coastal Park, and would help address a regional need for a Coastal Park for these 6-miles of coastline.

The CA Coastal Act has numerous policies that support the creation of Ponto Park and Coastal Recreation land use. The City of Carlsbad’s history of following these CA Coastal Act polies now and over the past 40-years in its Local Coastal Program should be considered now in the City’s proposed Local Coastal Program Amendment. Over the past 40-years Carlsbad and California residents have forever

lost numerous opportunities to create vital Coastal Parks and Coastal Recreation for our growing population.

In addition to the clear need for coastal parks in South Carlsbad, the citizens are overwhelmingly supporting the creation of Ponto Park in Planning area F. As you know during the past 2-years during the City Budget and Local Coastal Program Amendment processes, residents strongly demonstrated their desire that the City Council purchase and build Ponto Park. In 2019, 2020 and 2021 over 90% of citizen input expressed need was for Ponto Park, along with extensive verbal and written citizen testimony.

As COVID-19 vividly pointed out, parks are not an amenity, but a key component to human physical and mental health. Parks also provide environmental benefits and contribute to cleaner air and water, climate adaptation and social cohesion. TPL think you have a great opportunity to address equity and access to park space and improving the lives of thousands of Carlsbad residents and strongly urge you to support the building of Ponto Park for families and community.

Sincerely,

Rico Mastrodonato  
Government Relations Director

Lance-

I've consulted with the city attorney's representative on this matter. She determined that the prior public input on the desire for a park at Ponto does not need to be resubmitted in order to be included in the public input process for the Parks & Recreation Department Master Plan Update. Rather, your email message below will serve as a cover sheet request for that prior public input to also be included as public input for the Parks & Recreation Department Master Plan Update.

Thank you.

-Kyle

**Subject:** RE: Develop Ponto Right - prior Ponto Coastal Park Support Letters and public comments to be included in Parks Master Plan public Comments

**Importance:** High

Dear City Council, Kyle Lancaster, Mike Pacheco, and Mick Calarco:

We would like to receive confirmation that all the People for Ponto and other public comments as part of the public comments submitted on the:

1. Shopoff developer proposed application to change the Local Coastal Program Land Use on Planning Area F at Ponto,
2. the City Staff's proposed Draft Local Coastal Program Land Use Plan Amendment to change the Land Use on Planning Area F for the developer

be included in the City's Park Master Plan Update. Can you please confirm all this prior citizen input is also included in the Parks Master Plan Update?

These prior public comments and requests to the City Council and Kyle Lancaster, parks Director directly relate to Park needs at Ponto and Coastal South Carlsbad, and the City's Planning Area F LCP LUP Requirements to consider a Public Park at the site. The public input is from over 2,500 citizen and public communications already sent to the City Council and City Staff (as noted in the above To address list). In addition to those 2,500 citizen and public communications over 90-pages of extensive public comments and data showing among other things the City's Park Master Plan's Park Service Area deficit (Park Service inequity) at Ponto and Coastal South Carlsbad, Park Acreage Deficit in South Carlsbad, the lack of any City Park West of I-5 and rail corridor in all South Carlsbad, CA Coastal Act policies and Coastal Recreation data/issues, along with other City policy and regulation supporting a Park at Ponto. All this prior public input should be included in the Parks Master Plan Update. Can you please confirm that that is the case? Or do we have to re-email all these prior public comments?

Thanks,  
Lance  
People for Ponto

**Subject:** Develop Ponto Right - Support Letter

Dear Mayor Hall, Carlsbad City Council, and California Coastal Commission:

I am informed that

1. Carlsbad must consider on Planning Area F at Ponto the need for a public park at Ponto as part of the Draft Local Coastal Program Amendment.
2. There is no public park at Ponto even though City Park Standards requires a minimum of 6.5 acres of parkland for Ponto.

3. There is a current 6.6 acre park deficit in Coastal Southwest quadrant of Carlsbad, (south of Palomar Airport Road and west of El Camino Real).
4. There are no Coastal Parks in all of South Carlsbad. 64,000 South Carlsbad citizens have no Coastal Park.
5. Ponto is at the center of a larger 6-mile stretch of coastline in that has no Coastal Parks.
6. Ponto has a city documented 30 acre open-space standard deficit that a Coastal Park would help resolves.
7. And most importantly, I am informed that the City is currently ignoring these issues and in the Draft Local Coastal Program Amendment is proposing to eliminate the last opportunity to create a much needed Coastal Park at Ponto

Accordingly, I am requesting and making my position known that:

- I want the Draft Local Coastal Program Amendment to provide for a Coastal Park at Ponto.
- I want the City to provide a true Citizen-based Park Planning process for Ponto.
- I want the City of Carlsbad to budget money in their capital improvement program to purchase Planning Area F and build a park at Ponto to serve residents and visitors alike.
- I want to preserve what little Coastal Open Space Carlsbad has remaining for future generations and our visitor industry.
- I am not in favor of future residential development at Ponto, but think this last small amount of vacant Coastal land should be reserved for Coastal Recreation.

One of the reasons that this lovely community continues to attract residents and tourists is the beauty of our natural surroundings, including coastline , parks and open spaces. Residential development is highly desired.. but INLAND, please! Protect our Coastal open spaces, for our good, and our visitors, for now AND the future. Once we squander it, it cannot easily be reclaimed...

Thank you  
Barbara M Kesten

**Subject:** Public input to the 2-26-23 Carlsbad Tomorrow Growth Management Committee, and upcoming Carlsbad City Council and Parks and Planning Commissions - LCPA and Growth Management-Parks Master Plan Updates - Parks & Open Space

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks and Planning Commissions, , CA Coastal Commission and CA State Parks:

As the City has requested specific reference regarding public input, I ask you to please deliver to the those address this email and attachment as public input for:

1. the CTGMC's 2/26/23 meeting,
2. the next Carlsbad Council meeting,
3. the next Carlsbad Planning and Parks Commission meetings on the Parks Master Plan and Growth Management Program Updates, Ponto Planning Area F and Site 18 land use changes, and Local Coastal Program Amendments, and
4. as public input to the CCC on Carlsbad proposed Local Coastal Program, and
5. as public input to Carlsbad's proposed Local Coastal Program Amendment.

In reading through the 2/26/23 staff report and attachments to CTGMC on Open Space, the staff report did not include the attached data, like it included data from Mike Howes. Mike and I worked together at the City of Carlsbad at that time so have comparable knowledge, that I documented and shared in the attached files. This data should be presented just as Mike's information was presented.

Also, there are a few omissions in the staff report regarding Open Space in LFMP Zone 9 (BLEP MP that was never built) and relative to LFMP Zone 19 (Aviara Master Plan) in that both Zone 9 & 19 were about the same in terms of planning process in 1986 and in fact the 1986 Growth Management Ordinance 21.90.030(g) identifies both BLEP MP and Aviara MP as being exempt from the building permit moratorium. But Zone 19 the Aviara MP was required to provide 15% of Growth Management Open Space and Zone 9 the BLEP was NOT Required (aka exempted) from providing the required 15% GM Open Space. In 1996 developers and the City deleted/removed BLEP MP Open Space and replaced it with residential land use. But the 'GM Open Space exemption' was specifically only based on the BLEP MP land uses. Even though most of the Public Input to the CTGMC has been about Ponto Park and Open Space needs these critical Open Space facts were never discussed in the staff report, even though the documented evidence was provided to the City a month ago.

Ponto (LFMP Zone 9) developers were/are clearly falsely exempted from providing the required 15% GM Open Space, and the extensive Carlsbad Citizen outcry and petitions reflect this false exemption, that needs correction by the CTGMC and City Council. The facts on the ground, the City's Open Space maps, Parks Master Plan service area maps, the attached data all point to fact that Ponto is missing the 15% GM Open Space that the City should have required and provided. The impacts to current and future Carlsbad Citizens of this missing GM Open Space are real and will get worse as Carlsbad's population is required to increase. The CTGMC and City Council can fix this past mistake (as clearly documented in the attached 'History of Open Space at Ponto') and as outlined in the attached 'CTGMC key issues and suggestions' file. We can fix this and provide a fair Carlsbad Tomorrow.

Please care. Don't cover-up past mistakes. Do what is right and honest. Please work with your fellow citizens and acknowledge and fix the past Growth Management Open Space mistakes at Ponto, and also provide a much needed meaningful Ponto Park for South Carlsbad.

Thank you,  
Lance Schulte

**Subject:** Public input to the 1-16-22 Carlsbad Tomorrow Growth Management Committee, and upcoming Carlsbad City Council and Parks and Planning Commissions - LCPA and Growth Management-Parks Master Plan Updates - Parks & Open Space

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks and Planning Commissions, , CA Coastal Commission and CA State Parks:

As the City has requested specific reference regarding public input, I ask you to please deliver to the those address this email and attachment as public input for:

1. the CTGMC's 1/26/22 meeting,
2. the next Carlsbad Council meeting,
3. the next Carlsbad Planning and Parks Commission meetings on the Parks Master Plan and Growth Management Program Updates, Ponto Planning Area F and Site 18 land use changes, and Local Coastal Program Amendments, and
4. as public input to the CCC on Carlsbad proposed Local Coastal Program, and
5. as public input to Carlsbad's proposed Local Coastal Program Amendment.

At the 1-11-22 CTGMC meeting questions logically arouse about how Ponto/LFMP-9 was falsely exempted from the Growth Management Open Space Standards in 1986 when the two adopted reasons for that exemption were not true per the City's Open Space map/data base, air-photos and development records, and the requirements of the Growth Management Ordinance and Open Space Standard. People for Ponto Carlsbad Citizens have been bringing this up to the City since 2017 when we first had City data that showed the GM Open Space Standard exemption was incorrect. Attached is some more detailed data that provides a History of Open Space at Ponto – 2022-1-26. There are more details and interesting bits of information, but the attached provides the basics on the History and also offers some critical historical context for the CTGMC, Carlsbad Commissions, City Council and Carlsbad Citizens to consider. I hope this is helpful.

The History of Ponto Open Space and historical context fits into the 'CTGMP Key Issues and Suggestions – 2022-12-6' file and email to you on 8/8/22 and 12/13/22 that provides a time-tested, logical, legal, tax-payer saving approach to

dealing with the missing Ponto Open Space and need for a significant Coastal Park at Ponto to serve Ponto and South Carlsbad and relieve Coastal Park pressures on North Carlsbad.

Please know People for Ponto Carlsbad Citizens deeply care and love Carlsbad. We bring the data and requests to you because we care. You have received well over 5,000 People for Ponto petitions regarding Ponto Park and Open Space. During the CTGMC meetings many have spoken and summited in favor of the issues identified in the People for Ponto petitions. I may have missed it but do not recall any Carlsbad citizen speak/submit to the CTGMC in opposition to what People for Ponto Carlsbad Citizens have provided you. As representative of the Citizens of Carlsbad we ask you honestly represent the Carlsbad Citizen desires so overwhelming expressed to you.

Thank you, and with Aloha Aina for Carlsbad,  
Lance

**CAUTION:** Do not open attachments or click on links unless you recognize the sender and know the content is safe.

Following are 6 key major Growth Management Standards issues of citywide relevance that the Carlsbad Tomorrow Growth Management Committee (CTGMC) needs to act on, and citizen “Suggestions to CTGMC” on how to honestly and responsibly act on these 6 key issues in the CTGMC’s recommendations to the New City Council. This Update includes new information (pp 5-6) on the improved affordability of Ponto Park, and on how GM Open Space shortfall can be repaired. We hope the CTGMC will act honestly to make recommendations that truly and responsibly address known documented shortfalls in both Parks and GM Open Space. Responsible recommendations by the CTGMC can provide a sustainable Quality of Life to future Carlsbad generations and visitors. Only you own your recommendations.

1. The State of CA is forcing Carlsbad and all cities/counties in CA to provide for unlimited or Infinite Population and Visitor growth. So there will be an Infinite population & visitor demands for Parks, Open Space, water, and demands on our roads/transportation systems, and other Growth Management (GM) Quality of Life facilities. These infinite increases in population and visitor demand will come from high density development that requires more public Parks and Open Space to balance the high-densities. **Carlsbad’s new GM Standards will have to provide for a system of Infinite proportional increases in the supply of Parklands, Open Spaces, water, transportation facility capacity, etc. or our Quality of Life will diminish.**
  - a. Suggestions to CTGMC:
    - i. Completely restructure the General Plan, Local Coastal Program and GM Program to clearly recognize these facts and State requirements to proportionately provide public facilities to maintain/improve Carlsbad GM Quality of Life Standards for this Infinite growth of Population and Visitor demands.
    - ii. **Being a Coastal city Carlsbad has an added responsibility to proportionately maintain/improve providing High-Priority Coastal land uses (Coastal Recreation {i.e. Public Parks} and Low-cost Visitor Accommodations) needed at a regional and statewide level to address visitor needs for Coastal Recreation, access, and affordable accommodations.** Carlsbad needs to work with the State of CA Coastal Commission to completely restructure Carlsbad’s Coastal Land Use Plan to addresses the State’s requirement to provide an Infinite amount high-priority Coastal land uses for those Infinite Population and Visitor demands.
    - iii. **Trying to ignore these Infinite demands for Carlsbad’s Quality of Life facilities – like Parks and Open Spaces is a path to disaster and the ultimate degradation of Carlsbad’s Quality of Life.**
2. **Carlsbad has a huge Jobs v. Housing supply imbalance – far too many jobs around the airport for our amount of housing. This creates negative and costly land use and transportation planning distortions that radiate from the Airport Central Jobs through Carlsbad in all directions.** CA Housing law penalizes unbalanced cities like Carlsbad by requiring more housing in Carlsbad to bring jobs/housing ratio into balance. Carlsbad can correct this imbalance by 1 of 2 ways: 1) greatly increase housing supply (and thus increase the need and City expense for more GM Quality of Life facilities), or 2) more logically and cost effectively greatly decrease the amount of Jobs land use, so Carlsbad’s housing supply is in balance with jobs. These jobs will move to surrounding Cities that have more housing than jobs. **Rebalancing by reducing jobs land use creates added benefits for Carlsbad and our region by reducing Carlsbad’s peak-hour job commute traffic volumes and**

vehicle miles traveled (VMT), and by reducing the costs Carlsbad (and other cities and the region) have to pay to accommodate inter-city commute traffic. If Carlsbad reduces jobs land use will also reduce the amount of housing the State of California and SANDAG requires Carlsbad provide in its Housing Element thus reducing forcing incompatible high-density development into established neighborhoods and pressure to convert useable GM Open Space lands to housing land use.

a. Suggestions to CTGMC:

- i. **Carlsbad can logically and cost effectively balance Jobs/housing supply by updating Growth Management Policy to reduce jobs to be in balance with housing by changing some of Carlsbad's General Plan land use around the airport into several high-density residential mixed-use Villages.** The City has started some of this, but can expand this effort but has not planned creating mixed-use village environments. These high-density villages will reduce jobs and provide both high-quality and high-density (affordable) housing within walking/biking distance to the major job center and new neighborhood commercial and Park uses in the Villages.
- ii. Prioritize transportation investments in safe bike paths, walking paths between Carlsbad's Central Jobs Core around the airport and Carlsbad's housing, particularly strongly connecting these new high-density mixed-use villages with the Central Jobs Core.
- iii. Update General Plan land use and housing policy to reduce concentrations of higher-density housing except around the airport jobs core.
- iv. Recognize the central Airport jobs core is 'Carlsbad's New Urban Downtown and "Transect Plan" accordingly toward lower densities on the City periphery.

3. Although some very critical areas (such as the Coastal lands at Ponto) are still vacant and can be wisely used for critical GM Quality of Life needs, much of Carlsbad is largely developed.

**Redevelopment of developed land will require creating increased supplies of Parkland, Open Spaces, transportation capacity, and other Quality of Life facilities.**

a. Suggestions to CTGMC:

- i. **Completely rethink all City planning on existing vacant lands to assure that remaining vacant land is planned and being used wisely and fairly distributed to address critical Quality of Life needs in those areas, and not squandered on redundant land use.** The location of vacant land to address critical Park & Open Space needs should be preserved with land use planning.
- ii. Work with the State and CA Coastal Commission to preserve our Finite vacant Coastal lands for High-Priority Coastal Land Uses (Coastal Recreation {i.e. Public Parks} and Low-cost Visitor Accommodations and services) for the Infinite population and visitor demands both internal and external to Carlsbad that are/will be placed on them.
- iii. Fully and at the very beginning of any Carlsbad General Plan, Local Coastal Program and Growth Management Program actions going forward fully disclose, map and require consideration of the impact of future sea level rise and coastal erosion on Coastal land acres and land uses. Carlsbad has lost and will accelerate losing acres of Coastal land and High-priority Coastal Land Uses. Carlsbad must know, see, and discuss these losses BEFORE making any land use decisions in Carlsbad's Coastal Zone and any vacant Coastal Land.

4. **Carlsbad General Plan & Growth Management Plan do not provide a fair distribution of adequately sized City Parks for all Carlsbad families.** Veterans Park is a classic example. What will

be the City's largest park is only about 1-mile away from three other major City Parks (Zone 5, and the future Robinson Ranch and Hub Parks). This is a poor and unfair distribution and a misallocation City Park land resources. Saying Veterans Park is 'the park to serve SW, SE, and NE Carlsbad families' (the overwhelming major/majority funders of veterans Park) when those families are upwards of 6-miles away on major commercial arterials that kids can't logically/safely use is false and unfair. Most all the funding (developer fees) to build Veterans Park come from the SW, SE and NW Carlsbad but those areas are denied the Park the paid for. Veterans Park is inaccessible by almost all its intended users except by driving their cars and then storing their cars in parking lots on Parkland thus making less park land available for actual park use – this makes little common sense and is a great waste of tax-payer funds. This is dysfunctional along with being very unfair to families in SW, SE and NE Quadrats that are denied park acres near their homes which they funded. **Carlsbad's Park Master Plan maps 'Park Service' areas of existing known Park Inequity or Unfairness (dysfunction), to show where new City Park investments should be made (See City map image with notes below).**

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

The Trust for Public Land provides a Park-Score to compare both a City's amount of park acres and the 'fairness' of access (within a 10-minute walk) to parks. **Carlsbad is below national averages in both park acres and fair access to parks. Carlsbad is also well below what our adjacent Coastal cities of Encinitas and Oceanside provide. Carlsbad only requires 3 acres of Park land per 1,000 population, while Encinitas and Oceans require 5 acres - 67% more than Carlsbad – of parkland. Also, Encinitas and Oceanside require parks to be within a 10-minute walk to their citizens and families. Carlsbad has no such requirement.**

a. Suggestions to CTGMC:

**Carlsbad should change its General Plan, Parks and Growth Management Standards and CMC 20.44 to:**

- i. **Be Above Average Nationally in both providing park acreage and in locating adequate park acreage to be within a 10-minute walk to all neighborhoods.**
  - ii. **Raise its minimum park acreage standard to 5 acres per 1,000 population, versus the current low 3 acres per 1,000. Carlsbad should be at least as good as Encinitas and Oceanside in requiring 5 acres, not 40% below what our adjacent Cities require/provide.**
  - iii. **Raise its park location standard to require an adequately sized park be provided to serve the neighborhood population within a 10-minute walk for all neighborhoods.**
  - iv. **Prioritize City Policy and Park Budgets and investments to achieve park fairness in 'Park Unserved areas' identified by Carlsbad's Park Master Plan.**
  - v. **Per Carlsbad's Municipal Code Chapter 20.44- DEDICATION OF LAND FOR RECREATIONAL FACILITIES to require developers in 'Park Unserved areas' and in areas that do not have an adequately sized (5 acres per 1,000 population) park within a 10-minute walk to provide their developments required Park land acre dedication in actual Park land within a 10-minute walk to their development.**
  - vi. **Update the City's Park-in-lieu fee to assure the fee is adequate to actually buy the amount of park land a developer is to provide within a 10-minute walk of their development. The City's current 'Park-in-lieu-fee' is far too low and inadequate to actually buy land in area surrounding the proposed development.**
  - vii. **Only allow developers to pay a Park-in-lieu-fee where there is an adequately sized park (provide 5 acres per 1,000 population) within a 10-minute walk of their development, and growth management planned future development in that area will not require more park land to provide 5 acres per 1,000 population) within a 10-minute walk.**
  - viii. **Consider updating Park policy to provide more multi-use flexibility in park land acres and development on Parks. Many Carlsbad Park acres are developed/dedicated to a single-purpose use, and unavailable for other park uses.**
  - ix. **Consider eliminating car parking lots from land that can be counted as parkland; or by significantly limiting park land used for parking to around 5%.**
  - x. **Eliminate the counting of 'GM Constrained and Unusable land' and Protected Endangered Species Habitat land as Park land. GM Constrained/Unusable lands are undevelopable. Protected Habitat lands are by definition not useable for development by people. Habitat is dedicated for plants and animals. Parks are open spaces dedicated intended for people. Parkland calculations should exclude Unusable lands and Protected Habitat lands and only count 100% people Useable land as Park land. Where Park land abuts Habitat land a sufficient buffer space shall be provided to prevent people mixing with animals (ex. Rattlesnakes, etc.) and animals from people (habitat disturbance or destruction). This buffer area should not be counted as Park or Habitat acres, but as natural/developed buffer open space acres, and can be counted as part of the City's 15% Growth Management 'Aesthetic open Space'.**
5. **Carlsbad's Coast is the most, if not the most, important feature of Carlsbad; and is consistently identified by citizens and businesses and our Community Vision. Carlsbad's Coastal Parks (west of the I-5 corridor) are grossly unfairly distributed. Carlsbad's Coastal Parks do not fairly match the**

**locational needs of the population. North Carlsbad that is 38% of Carlsbad's population and has 10 Coastal Parks totaling 37+ acres in size. South Carlsbad that is 62% of Carlsbad's population has 0 [ZERO] Coastal Parks totaling 0 [ZERO] acres.** Again, Carlsbad's Park Master Plan maps this citywide unfairness (dots show park locations and circles show the area served by each park) and says that the City should look at buying and building New Parks in these areas that are unserved by City Parks (are not covered by a circle). The GM Update should correct this citywide unfair distribution of City Parks by making plans for new Park purchases to create City Parks in these unserved areas of Park Inequity.

To address citywide Coastal Park unfairness the current City Council wants to spend \$60-85 million in Carlsbad tax-payer funds to Relocate 2.3 miles of constrained Pacific Coast Highway median to try to make some of the narrow PCH median 'useable' by people. 2001 and 2013 City PCH Relocation studies identified only a small amount of 'people-useable acres' would be created next to PCH. The \$60-85 million tax-payer cost (\$26-37 million per mile) does NOT add one single square foot of new City land, it only inefficiently rearranges a small amount PCH median. The City can most tax-payer cost effectively provide needed sidewalks and bike improvements along the outside edges of PCH without PCH Relocation. The City's 2001 PCH Relocation Financial Study and 2013 PCH Relocation Design both indicated minimal useable land could be achieved by Relocation, and that the very high tax-payer cost to do so would be very difficult to fund. The City has known for well over 20-years that PCH Relocation is a high-cost and a poor solution to address the Citywide Coastal Park unfairness in South Carlsbad.

However, a **better and far less costly solution to correct Citywide Coastal Park unfairness and provide a much needed South Carlsbad Coastal Park is to simply buy currently vacant land that is for sale.** The City did this (although the City actually bought existing homes) when it expanded Pine Park. **Carlsbad tax-payers have used the City's own data to compare the tax-payer Cost/Benefits of simply purchasing vacant land v. trying to rearrange existing City owned land at PCH. Simply buying vacant land saves tax-payers saves tax-payers over \$32.7 to \$7.7 million.** Please read the following data files:

- 2022-June General Comparative tax-payer Costs/Benefits of Completing PCH, 2.3 miles of PCH Modification (Island Way to La Costa Ave.), and 14.3 acre Ponto Park (Kam Sang) to address planned loss of 30+ acres of Coastal Open Space Land Use at Ponto in South Carlsbad: Part 1 of 2.
- City's PCH Modification Proposal Area Map with notes on usability Constraints and Issues: P4P Input: Part 2 of 2
- The most recent (9/19/22) land sale of 11.1 acre Ponto Planning Area F was less than \$8 million (less than \$706,000 per acre).
- **Buying and developing this 11.1 acre Ponto Park would cost less than \$20 million assuming a 10% profit to the new land-owner, and \$1 million per acre park construction cost like our newest Buena Vista Reservoir Park.** The cost to help correct a Citywide Coastal Park unfairness by simply buying & building a much needed **11.1 acre Ponto Coastal Park would cost tax-payers less than the recently approved Measure J City Monroe Street Pool Renovation.** Investing less than \$20 million (\$1.8 million per acre) to buy and build an 11.1 acre Ponto Coastal Park is a great tax-payer value v. \$65-80 million in tax-payer funds to rearrange 15.8 acres of narrow strips of constrained PCH median (City documented "Surplus Land Area #4 &5") for some minimal people use at a tax-payer cost of \$4-5 million per acre. **The overall and per acre costs of buying/building Ponto Park are over 2 to 3 times better value for tax-payers than PCH Relocation/rearrangement.**

- The City Council could/can buy land for Open Space (Parks are the most useable of the City's 4 Open Space categories) under voter approved Prop C Open Space land acquisition authority. **The City has been advised to buy Ponto Park under Prop C per the City's settlement of a Growth Management law suit.**

**The Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad is clearly a citywide issue. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad as it is unfair to the vast majority of Carlsbad citizens and their families as 62% of Carlsbad is in South Carlsbad. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad is unfair to our major Visitor serving industries (and tax generators) in South Carlsbad. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad are clearly inconsistent with the CA Coastal Act, Carlsbad's Community Vision, and common sense.** The Coastal South Carlsbad Park Inequity is also unfair to North Carlsbad because South Carlsbad's Coastal Park demand is being forced into Coastal North Carlsbad and congesting those parks, and adding to Coastal North Carlsbad traffic and parking impacts. It also increases greenhouse gases and VMT as it forces longer vehicle trips.

a. Suggestions to CTGMC:

- i. 11.1 acre Ponto Planning Area F has a specific Local Coastal Program Land Use Policy that says The City of Carlsbad must for the Ponto Area LCP 'Consider and Document the need for Coastal Recreation (i.e. Public Park) and or Low-Cost Visitor Accommodations west of the railroad tracks (at Ponto) prior to any Land Use change. **The discussion of Parks by the CTGMC is such a situation that requires the CTGMC to consider this adopted LCP Land Use Policies. Official public records requests have shown the City never followed this LCP Land Use Policy Requirement during the 2005 Ponto Vision Plan and 2015 General Plan Update, and in 2010 the CA Coastal Commission rejected the Ponto Vision Plan and told the City in 2017 that that land uses at Ponto could change based on the need for Coastal Recreation and/or Low Cost Visitor Accommodations.** The Mello II LCP that covers most of Carlsbad's Coastal Zone also has Land Use Policy 6.2 for the City to consider a major park in the Batiquitos (Ponto/South Carlsbad) area. The City has only implemented 1/6 to 1/3 of this policy. **The CTGMC should fully evaluate the citywide/South Carlsbad and local Ponto need for Coastal Parks as required by the City's adopted LCPs and CA Coastal Act.**
- ii. Carlsbad's 2015 General Plan Update and Growth Management Plan (GMP) did not, and was not updated to, consider the 2017 Sea Level Rise (SLR) Impact report showing the loss/impact on 32+ acres of Carlsbad's Coastal Land Use acreage in South Carlsbad – primarily Open Space Land Use (beach and Campground). **Both the General Plan (and Local Coastal Program Land Use Plan) and GMP should be updated to account for the loss and replacement of these 32+ acres of high-priority Coastal Open Space Land Use due to SLR.** The updates and the CTGMC should use the newest CA Coastal Commission SLR Guidelines/science, not the old guidelines used in 2017. Carlsbad's LCP and CA Coastal Act Land Use Polies call for 'upland relocation' to replace the SLR loss of high-priority Coastal Land Uses.
- iii. **The availability over the past several years of the last two sufficiently sized vacant lands suitable for a Ponto/South Carlsbad Coastal Park is a citywide issue. If these last two vacant lands are lost to development forever future generations will have lost the last opportunity for the needed South Carlsbad Coastal Park.** The 5/3/22 Citizen requests for the City to jointly study acquisition of one or both these last vacant lands for a needed (and only possible) true and meaningful Coastal Park for

South Carlsbad should be recommended by the CTGMC. **The CTGMC should recommend Carlsbad’s GMP be updated to incorporate Parkland acquisition of these last opportunities to provide the needed Coastal Park for South Carlsbad.**

6. Carlsbad Growth Management Open Space Standard is that 15% of all the Useable (unconstrained and fully buildable) areas is to be preserved as Useable Open Space, and that all the 25 Local Facility Management Plans (LFMP) show how that 15% is provided. The City says:

---

---

**OPEN SPACE**

---

---

**A. Performance Standard**

Fifteen percent of the total land area in the Local Facility Management Zone (LFMZ) exclusive of environmentally constrained non-developable land must be set aside for permanent open space and must be available concurrent with development.

Yet the City has mapped and documented that this 15% Useable Open Space Performance Standard was not complied with. The City also acknowledges that without changes to current City planning the 15% Useable Open Space Performance Standard will never be complied with. The City acknowledges that only 13% has/will under current plans ever be provided. This missing 2% equals 501 acers of lost GM Open Space the GMP promised citizens. **Carlsbad law the Growth Management Ordinance 21.90, and section ‘21.90.130 Implementation of facilities and improvements requirements’; provide guidance on how non-compliance with a Performance Standards is to be handled.**

a. Suggestions to CTGMC:

- i. Retain the GM Open Space Standard of 15% of all unconstrained and developable land is maintained as Open Space. If the City removes the Open Space Standard, it will allow and encourage land use changes to remove GM Open Space and replace with development.
- ii. **The CTGMC should make a recommendation that an inventory of all 25 LFMP Zones be conducted and an inventory of each LFMP Zones provision of at least 15% Useable Open Space shall be compiled. No LFMP Zone shall be allowed to be “exempt” from this inventory.** The City’s computerized GIS mapping system makes it easy and clear as shown in the following City GIS map for LFMP Zone 9 (aka Ponto).

**City GIS map of Ponto's (LFMP Zone 9) Open Space:**

- Light green areas meet the City's 15% unconstrained Growth Management Program Open Space Standard
- Most Ponto Open Space (pink hatch & blue [water] on map) is "Constrained" and does not meet the Standard
- **Aviara - Zone 19, Ponto - Zone 9 and Hanover/Poinsettia Shores – Zone 22 all developed around the same time and had similar vacant lands.**
- **City required Aviara - Zone 19 east of Ponto to provide the 15% Standard Open Space. Why not Ponto? Aviara includes the same lagoon.**
- **City required Hanover & Poinsettia Shores area Zone 22 just north of Ponto to provide the 15% Standard Open Space. Why not Ponto?**
- Why Ponto developers were not required to comply with the 15% Useable Open Space Standard is subject to current litigation
- Below is City GIS data from this map

**City GIS map data summary of the Growth Management Standard of 15% Useable Open Space at Ponto**

472 Acres	Total land in LFMP Zone 9 [Ponto]
<u>(197 Acres)</u>	Constrained land excluded from Growth Management (GMP) Open Space
275 Acres	Unconstrained land in LFMP Zone 9 [Ponto]
X 15%	GMP Minimum Unconstrained Open Space requirement
41 Acres	GMP Minimum Unconstrained Open Space required
<u>(11 Acres)</u>	GMP Open Space provided & mapped per City GIS data
<b>30 Acres</b>	<b>Missing Unconstrained Open Space needed in LFMP Zone 9 [Ponto] to meet the City's minimum GMP Open Space Standard per City's GIS map &amp; data</b>

**73% of the City's minimum 15% required Open Space Standard is missing due to over development of LFMP Zone 9 [Ponto]**

- iii. In instances like LFMP Zone 9 (above image) that clearly did not provide at least 15% Useable Open Space and/or were falsely “exempted” the CTGMC should recommend that a **Local Facilities Zone Useable Open Space Correction Plan** shall be developed that explores the GM Open Space use/reuse of City land, land use planning requirements, and/or possible acquisitions of remaining vacant land acres to make up for any shortfall in meeting the 15% Useable Open Space in that a Zone. An example of this in LFMP Zone 9 is that the City’s regional Rail Trail will convert 2-lanes of almost all of Avenida Encinas to wider buffered bike lanes and an adequate portion of the converted 2 vehicle lanes can be landscaped (v. just painting strips as a buffer) to provide a safer/better bike lane buffer within a GM compliant Open Space. 2 vehicle lanes in Windrose Circle could also be similarly landscaped and converted to GM complaint Open Space. This is just one example of a cost-effective means to add GM Open Space that developers were falsely allowed to remove.
- iv. A **Local Facilities Zone Useable Open Space Correction Plan** should involve a Citizens Advisory Committee composed of citizens within the impacted Zone and appointed by the Council Members representing the Zone, and a representative of each vacant land owner over of over 1-acre in size.
- v. Consistent with the Growth Management Ordinance land use changes and development applications within a **Local Facilities Zone Useable Open Space Correction Plan** Zone shall be deferred until the applications can considered with (or after adoption of) a **Local Facilities Zone Useable Open Space Correction Plan**.

## **History of the false exemption of the Growth Management Open Space Standard provided Ponto developers in Local Facility Management Plan Zone 9 (LFMP-9):**

---

The history of how required Growth Management Open Space (i.e. unconstrained/developable land) that should have been dedicated Open Space was, and is now being proposed to be, inappropriately converted to Residential land use by a Perpetuating a False Exemption of the Open Space Standard provided Ponto Developers. This False Exemption needs correction and restitution. Ponto's False Exemption of the Open Space Standard and the 'amendment shell-game' GM Open Space history is a critical warning sign to the **Carlsbad Tomorrow** Growth Management Committee, Planning Commission and City Council. Ponto is a critical warning that a strong, accountable and accurate Open Space Standard needs to be established for **Carlsbad Tomorrow**, AND a Growth Management Open Space restitution plan needs to be established and funded that corrects the False Exemption for Ponto Developers. If Ponto Developers were required like other similar developers at the time (Aviara and Poinsettia Shores, "urbanizing La Costa Zones 11 & 12, etc.) to provide the required Growth Management Open Space some of the critical Coastal Recreation and Coastal Park issues and extensive Carlsbad Citizen needs/demands/desires at Ponto could likely have already been addressed.

### How citizens found out about the False Exemption provided Ponto Developers:

In 2017 for the 1<sup>st</sup> time the city provided the GIS maps/data base accounting of Open Space in the City. The City did this a part of settlement to a North County Advocates citizens' lawsuit. The City Open Space maps/data base allowed Carlsbad Citizens for the 1<sup>st</sup> time the ability to see and confirm what Open Space was produced by Growth Management (GM). The City's Open Space map/data based for Ponto (LFMP-9) documented that about 30-acres of GM Open Space was missing (see; Carlsbad Official Public Records Request - PRR 2017-164). As required by GM, and as Staff has said, to count as GM Open Space it must be dedicated and 'unconstrained/developable land' to meet the GM Open Space Standard. Being able to see for the 1<sup>st</sup> time the missing GM Open Space was one of the key awakenings that started People for Ponto Carlsbad Citizens. Below is the City's Open Space Map for LFMP-9, with notes. We have the City's parcel-based Open Space data base that confirms all the numerical data in the notes.

**City GIS map of Ponto's (LFMP Zone 9)  
Open Space:**

- Light green areas meet the City's 15% unconstrained Growth Management Program Open Space Standard
- Most Ponto Open Space (pink hatch & blue [water] on map) is "Constrained" and does not meet the Standard
- **Aviara - Zone 19, Ponto - Zone 9 and Hanover/Poinsettia Shores – Zone 22 all developed around the same time and had similar vacant lands.**
- **City required Aviara - Zone 19 east of Ponto to provide the 15% Standard Open Space. Why not Ponto? Aviara had the same lagoon waters.**
- **City required Hanover & Poinsettia Shores area Zone 22 just north of Ponto to provide the 15% Standard Open Space. Why not Ponto?**
- Why Ponto developers were never required to comply with the 15% Standard Open Space is subject to current litigation
- Below is City GIS data from this map

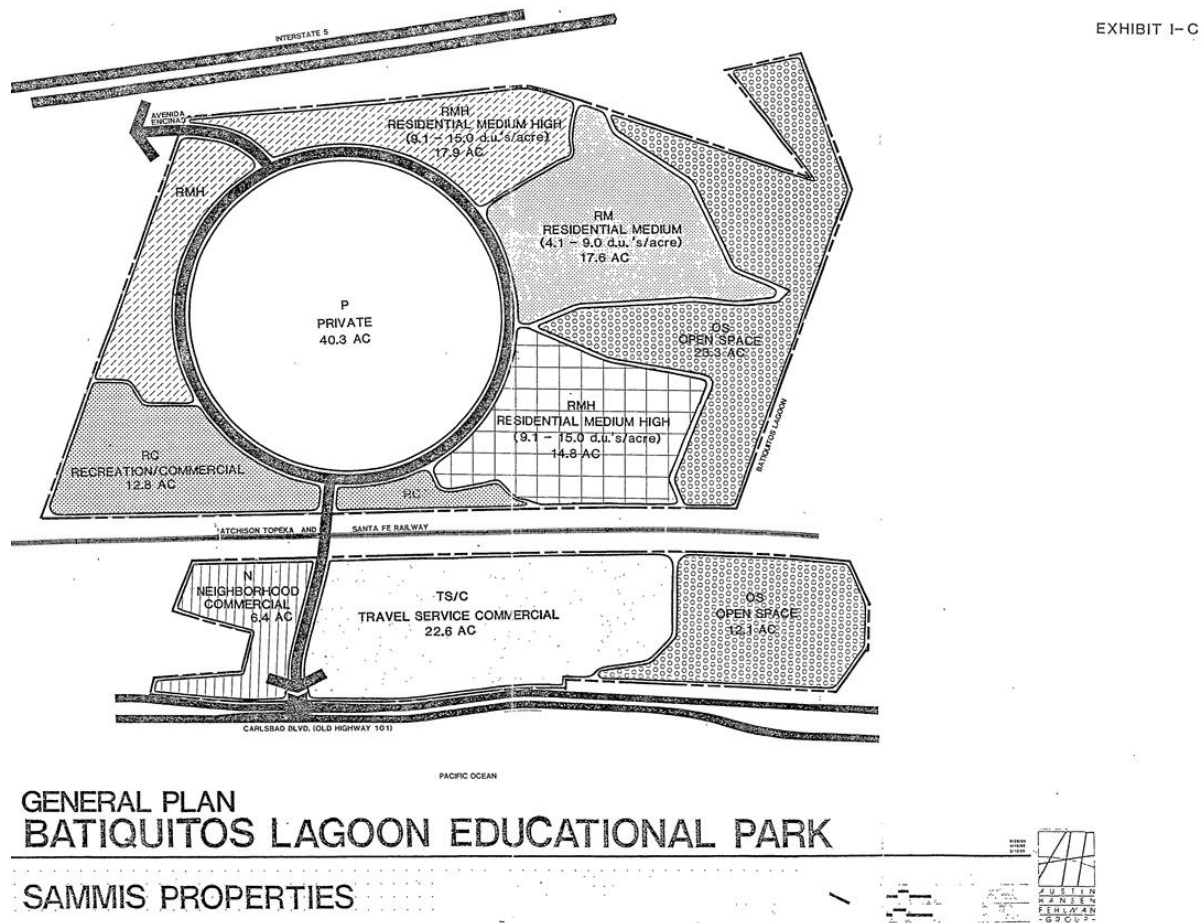

**City GIS map data summary of the 15% Growth Management Standard Open Space at Ponto**

472 Acres	Total land in LFMP Zone 9 [Ponto]
<u>(197 Acres)</u>	Constrained land excluded from GMP Open Space
275 Acres	Unconstrained land in LFMP Zone 9 [Ponto]
<u>X 15%</u>	GMP Minimum Unconstrained Open Space requirement
41 Acres	GMP Minimum Unconstrained Open Space required
<u>(11 Acres)</u>	GMP Open Space provided & mapped per City GIS data
<b>30 Acres</b>	<b>Missing Unconstrained Open Space needed in LFMP Zone 9 [Ponto] to meet the City's minimum GMP Open Space Standard per City's GIS map &amp; data</b>
	<b>73% of the City's minimum 15% required Open Space Standard is missing due to over development of LFMP Zone 9 [Ponto]</b>

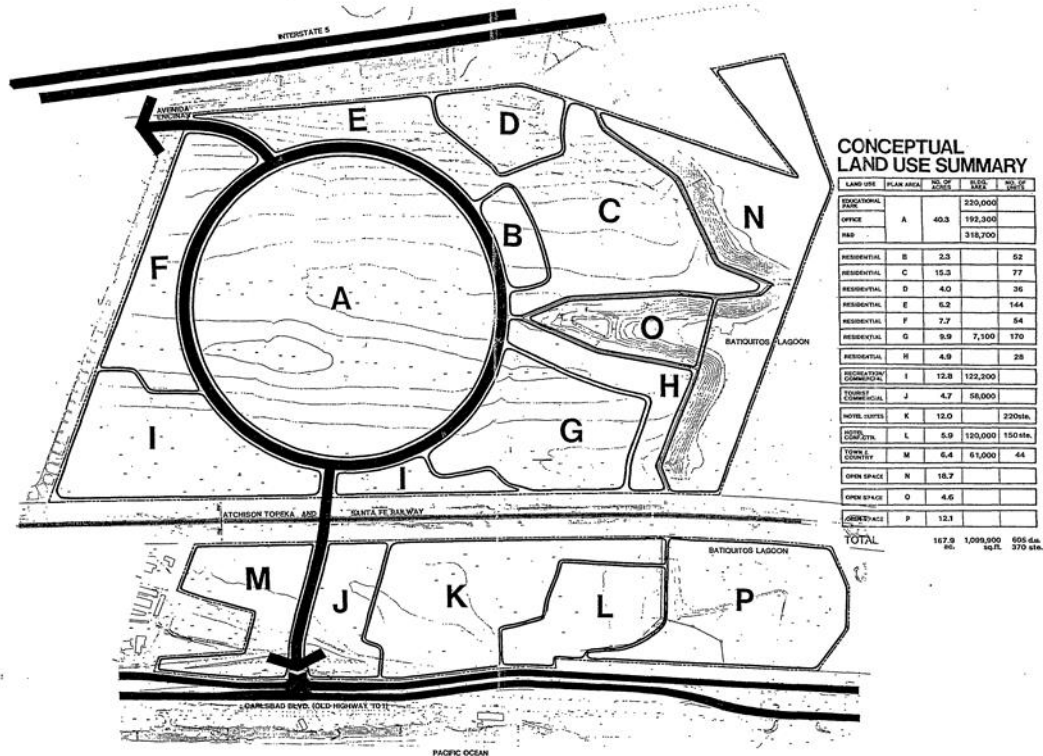

So were did the missing GM Open Space go?

In early 1985 prior to the Ponto's developer (SAMMIS) annexing Ponto into the City of Carlsbad, San Diego County's LAFCO (local agency formation commission) General Planned and pre-zoned, Ponto's Batiqitos Lagoon waters and the lagoon bluff slopes as Open Space. This Open Space was "Constrained Open Space" – State jurisdictional waters, and steep slopes with Coastal Sage Scrub (CSS) habitat. These already pre-zoned constrained/non-developable Open Spaces were accounted for as part of the City's 25% pre-Growth Management Plan Open Space, and per Growth Management can't be counted in meeting the 15% Growth Management Open Space Standard. The pre-zoned Open Space is shown in the City's Open Space map and properly marked as "Preservation of Natural Resources" Open Space land. This already pre-zoned Constrained (non-developable, aka 'Preservation of Natural Resources') Open Space land at Ponto was documented in the proposed SAMMIS Batiqitos Lagoon Educational Park (BLEP) Master Plan MP-175 as Areas N, O, and P in the Land Use Summary below.

On Oct, 1 1985 Carlsbad approved SAMIS's Master Plan and EIR to develop Ponto. SAMIS's BLEP Master Plan MP-175. Following are BLEP MP-175's General Plan & Land Use Summary maps:

**CONCEPTUAL LAND USE PLAN  
BATIQUITOS LAGOON EDUCATIONAL PARK**  
**SAMMIS PROPERTIES**

The BLEP MP-175 did include a variety of GM compliant Open Space.

- 12.8 acre Recreation Commercial land use that was playfields and Coastal Recreation site for MP-175 and South Carlsbad. This is a Critical GM Open Space that was never dedicated.
- A minimum 30' wide landscaped Open Space on both sides of Windrose Circle that circled the Area P. Windrose Circle was bordered on each side by 30' of landscaped Open Space.
- Additional minimum 30' wide landscaped setbacks between buildings in Area A
- 2.8 acres of private recreation open space for the maximum amount of residential units
- 45' to 50' landscaped setbacks from the Batiquitos Lagoon Bluff edge (this was later developed with Residential land use in some areas of Ponto).
- 75' landscaped separation between Areas C and D
- 70' landscaped separation between Areas D and E
- 25' landscaped setback along Avenida Encinas for Area E
- 30' to 80' landscape setback between Lakeshore Gardens and Area F
- 25' landscaped setback along Avenida Encinas for Area F
- 50' landscaped setback between Areas F and I
- 75' landscaped separation between Areas G and H
- 50' to 80' landscape setback for Area I between Lakeshore Gardens and between Area F

So, prior to Ponto being annexed into the City of Carlsbad in the mid-1980's and prior to Growth Management the Batiquitos Lagoon and lagoons bluff slopes (constrained and unusable due to habitat and slope constraints) were already pre-zoned Open Space and General Planned as Constrained Habitat Open Space. This constrained Open Space did not and cannot meet the 15% GM Open Space Standard.

In 1986 Citizens voted for the City's version of Growth Management that included a New Standard for Useable Open Space. The new standard was that 15% of all unconstrained useable/developable land within a Local Facility Management Zone was to be dedicated as Open Space. Once the vote was in the City adopted the Growth Management Ordinance 21.90 of Carlsbad's Municipal Code (City Council Ordinance No. 9791. (Ord. 9829 § 1, 1987; Ord. 9808 § 1, 1986)).

In adopting the Growth Management Ordinance 21.90.010 the Council Clearly stated:

(b) The city council of the city has determined **despite previous city council actions**, including but not limited to, amendments to the land use, housing, and parks and recreation elements of the general plan, amendments to city council Policy No. 17, adoption of traffic impact fees, and modification of park dedication and improvement requirements, that the demand for facilities and improvements has outpaced the supply resulting in shortages in public facilities and improvements, including, but not limited to, streets, **parks, open space**, schools, libraries, drainage facilities and general governmental facilities. **The city council has further determined that these shortages are detrimental to the public health, safety and welfare of the citizens of Carlsbad.**

(c) This chapter is adopted to ensure the implementation of the policies stated in subsection (a), to eliminate the shortages identified in subsection (b), **to ensure that no development occurs without providing for adequate facilities and improvements, ..."**

The Citizens and Council recognized that prior City plans were not adequate to address the current (and future) needs for facilities. Upon adoption of the New Growth Management Standards certain facilities were already below-Standard simply based on the existing development and population. Growth Management required additional facilities simply to bring the then current development/population up to the New Minimum Standards. I am personally familiar with 3 GM Standards in LFMP-6 (old La Costa) that I worked on – Library, Fire, and Park where already below-Standard i.e. existing development/population in Old La Costa required more facilities to meet the new Growth Management Standards. We worked to provide these new facilities for the existing development/population (i.e. fix the Standard deficits) and then to also plan even more additional facilities at a ratio that met the New Standards for the additional future development in Old La Costa. I can provide you some interesting stories on that.

I also recall working on the surrounding La Costa LRMP Zones 11 & 12 that Like Ponto/FMP-9 were considered "Cat II: Urbanizing" yet Unlike Ponto/LFMP-9 LFMP Zone 11 & 12 were not falsely exempted

for the GMP Open Space Standard and had to provide the GM Open Space Standard of 15% of the unconstrained/developable lands as dedicated Useable Open Space.

The Citizens vote on Proposition E and the subsequent Growth Management Ordinance 21.90 are the rules on which the Growth Management Plans (both Citywide and 25 Local Facility Plans) are required to follow.

To create the Citywide and the Local plans (Zones 1-6) for the largely developed areas the City needed to temporarily pause development activity to allow time for city staff to Draft the Growth Management Plan (my work as a city planner at the time was re-directed to draft growth management plans). So the Growth Management Ordinance 21.90.030, established a Temporary Development Moratorium to pause development processing activity while the Growth Management Plan was being Drafted. Following is that language of 21.90.030. Notes are shown as italicized text within *[example]*:

“21.90.030 General prohibition—Exceptions.

(a) Unless exempted by the provisions of this chapter, **no application for any building permit or development permit shall be accepted, processed or approved until a city-wide facilities and improvements plan has been adopted and a local facilities management plan for the applicable local facilities management zone has been submitted and approved according to this chapter.** *[Clearly indicates the exemptions in 21.90.030 are only from the temporary development moratorium created by 21.90.]*

(b) No zone change, general plan amendment, master plan amendment or specific plan amendment which would increase the residential density or development intensity established by the general plan in effect on the effective date of this chapter shall be approved unless an amendment to the citywide facilities management plan and the applicable local facilities management plan has first been approved. *[FYI, this provision of 21.90.030 has direct implications with respect of currently City/developer proposed General Plan/Zoning code/Local Coastal Program Amendments now being pursued by the City at Ponto Planning Area F and Ponto Site 18. The City did not and has not yet amended the CFMP and LFMP-9 to increase the City/developer proposed residential density or development intensity at Ponto]*

(c) The classes of projects or permits listed in this subsection shall be exempt from the provisions of subsection (a). Development permits and building permits for these projects shall be subject to any fees established pursuant to the city-wide facilities and improvement plan and any applicable local facilities management plan. *[Then lists various exemptions from the temporary development processing/building permit moratorium in 21.90. The BLEP MP's exemption from the temporary moratorium is (g)]*

(g) The city council may authorize the processing of and decision making on building permits and development permits for a project with a master plan approved before July 20, 1986, subject to the following restrictions *[this only applies to the “approved before July 20, 1986” BLEP MP, and NOT to any subsequent Master Plan Amendment]:*

- (1) The city council finds that the **facilities and improvements required by the master plan are sufficient to meet the needs created by the project and that the master plan developer has agreed to install those facilities and improvements to the satisfaction of the city council.** *[The Ponto developer needed to provide the 12.8 acre Recreation Commercial land use and install the GM compliant Open Space required in the 1986 MP175 but did not]*
- (2) The master plan developer shall agree in writing that all facilities and improvement requirements, including, but not limited to, the payment of fees established by the city-wide facilities and management plan and the applicable local facilities management plan shall be applicable to development within the master plan area and that the master plan developer shall comply with those plans. *[this required the LFMP-9/BLEP MP to have 1) already been fully developed or 2) have already have dedicated 15% of the LFMP-9 as Growth Management compliant Open Space (i.e. Unconstrained and developable) to qualify for the Open Space exemption later falsely noted in the city-wide facilities and management plan. As clearly documented the BLEP MP did not meet the requirements to qualify for Open Space Standard Exemption in the city-wide facilities and management plan. The section also requires “all facilities” (including Open Space) requirements in the Citywide Growth Management Standard to apply to BLEP MP, not provide a means for a false exemption of the Open Space Standard]*
- (3) The master plan establishes an educational park and **all uses within the park comprise an integral part of the educational facility.** *[“all uses” including the 12.8 acre Recreation Commercial land use and all the other GM compliant Open Spaces are an integral part. However the 12.8 acre open space land use was never built and the BLEP MP GM compliant Open Space never dedicated.]*
- (4) **Building permits for the one hundred twenty-nine [129] unit residential portion of Phase I of the project may be approved provided the applicant has provided written evidence that an educational entity will occupy Phase I of the project** which the city council finds is satisfactory and consistent with the goals and intent of the approved master plan. *[Clearly indicates the 21.90.030 exemption is only for building permits for Phase I of the BLEP MP. Of the 129 units only the 75 unit Rosalena development applied for and received building permits under this exemption. There are some very interesting issues related to this Rosalena Phase I development relative to GM complaint Open Space along the bluff edge that can be expanded on later if the CTGMC has questions.]*
- (5) Prior to the approval of the final map for Phase I the master plan developer shall have agreed to participate in the restoration of a significant lagoon and wetland resource area and made any dedications of property necessary to accomplish the restoration. *[Again clearly notes the exemption only allows a final map for Phase I to be processed. The “lagoon and wetland resource area” are part of the same constrained/undevelopable lands already pre-zoned prior to the BLEP MP being incorporated into the City of Carlsbad]*

The Aviara Master Plan (directly adjacent and east of Ponto) and was also being developed at the same time as Ponto/BLEP MP. 21.90.030 also provided the Aviara Master Plan a similar exemption (h) and similar lagoon related quid-pro-quo for that exemption. But Aviara did not receive a GM Open Space Standard Exemption. :

“(iv) Prior to any processing on the [Aviara] master plan the applicant shall grant an easement over the property necessary for the lagoon restoration and the right-of-way necessary for the widening of La Costa Avenue and its intersection with El Camino Real. (Ord. NS-63 § 1, 1989; Ord. 9837 § 1, 1987; Ord. 9808 § 1, 1986)”

Some City staff have incorrectly stated to the City Council that they believe 21.90.030 exempts Ponto/LFMP-9 from the Growth Management Ordinance/Program or Growth Management Open Space Standard. RESOLUTION NO. 8666- A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF CARLSBAD, CALIFORNIA APPROVING TWO AGREEMENTS FOR BATIQUITOS LAGOON EDUCATIONAL PARK also shows the 21.90.030 exemption was only for development permits during the temporary building moratorium.

In 1986 the City falsely exempted in the Citywide Facilities Plan all Ponto developers from providing 15% of their useable/developable land as GM required Open Space. The City’s documented/adopted rationale in the Citywide Plan was that Ponto/LFMP-9 was 1) in 1986 already developed, or 2) in 1986 the developer had already met the GM Open Space Standard by having already dedicated 15% of the useable land as Open Space. Both situations were/are false. Any air photo map or even the 1986 LFMP-9 clearly states Ponto was NOT developed in 1986, as only the Lakeshore Gardens existed and the Ralphs Center was just starting construction. Also the City’s GIS Open Space mapping (see above) shows that SAMMIS the Ponto developer (BLEP Master Plan MP-175) in 1986 had Not dedicated as Open Space 15% of the useable land as Growth Management compliant Open Space as shown/described in the BLEP MP (i.e. the 12.8 Acre Recreation Commercial site and all the landscaped open space setbacks required in the BLEP MP-175. If that 15% was dedicated in 1986 it would show-up on the City’s inventory of Dedicated Open Space now. So how did this occur?

How Ponto’s planned GM Open Space was eliminated and replaced with Residential land use:

In late 1980’s SAMMIS the BLEP MP-175 developer started building the 75-home Rosalena Development as the first part of Phase I of the BLEP MP. The City (based on my recollection was very desirous to develop the BLEP MP) and required special time limits on the BLEP MP to actually advance building the ‘Educational Park’ with all the “initiated” land uses (including GM compliant Open Space) within a certain period of time. SAMMIS was having financial issues and difficulty delivering the BLEP MP land uses. Amendments (A, B, and C) to BLEP MP reflected on these difficulties:

- MP 175(A) to allow minor accessory structures within the rear yards of all Phase I single family lots located in Planning Area “C”. *[This is the Rosalena development that was part of Phase I for BLEP MP. This amendment has implications on the landscaped Open Space setback along the Batiquitos Lagoon bluff top, and the required Coastal access trail required by the Coastal*

*Development Permit for Rosalena. This is an interesting history that can be explained later if the CTGMC would like.]*

- MP 175(B) to realign Carlsbad Blvd., between North Batiquitos Lagoon and west of I-5 to accommodate the Sammis Development was WITHDRAWN January 12, 1990, and
- MP 175(C) a request for 5-year extension of time for Master Plan approval related to educational uses on this project was Approved Planning Commission Resolution No. 2841, April 19, 1989 and approved City Council Ordinance No. NS-83, September 5, 1990.

SAMMIS went bankrupt around 1990 and Kaiza Development purchased the BLEP MP. Kaiza completed the Rosalena development started by SAMMIS. Kaiza then sought to completely change the planned land uses on all the remaining unconstrained/developable land in the BLEP MP.

General Plan and Master Plan Amendments eliminated/reduced BLEP's Growth Management compliant Open Space and replace with Residential uses in the "amended" Poinsettia Shores Master Plan:

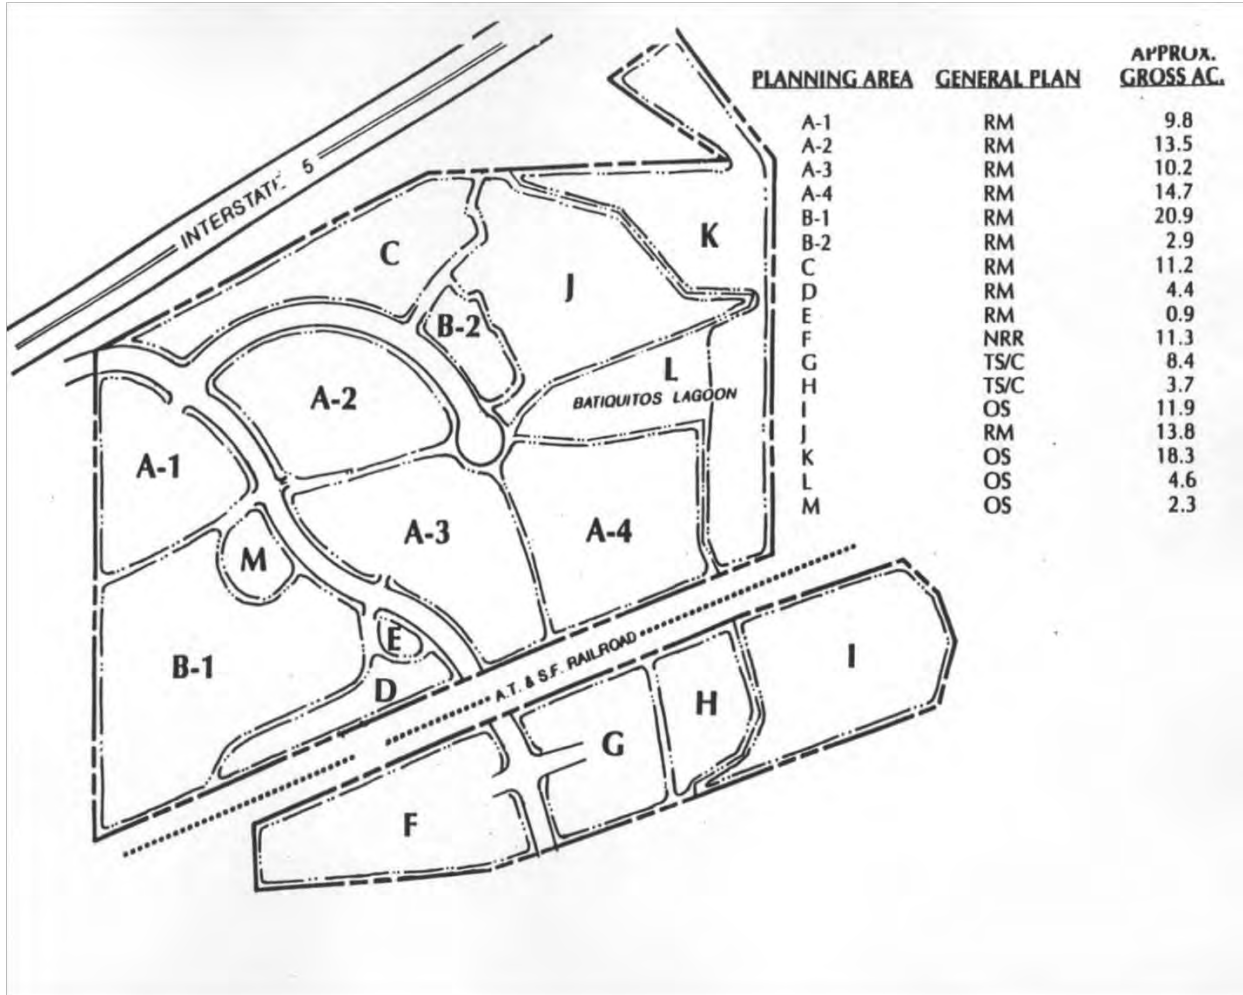

When Kaiza acquired the BLEP MP-175 and its vacant land only the State Campground, Lakeshore Gardens, Ralphs Center, and now Rosalena were approved/existing developments at Ponto. Kaiza proposed a Master Plan Amendment to delete the BLEP MP-175 and all its developable land uses, except for the only portion of Phase I developed – the 75 unit Rosalena subdivision. The pre-BLEP MP pre-zoned (and General Planned) constrained/undevelopable Lagoon waters and lagoon bluff Open Spaces and the CA Coastal Act (LCP) required bluff top setbacks were the only Open Spaces retained in Kaiza's proposed General Plan land use and Master Plan Amendments.

Most all of the BLEP MP-175 (and Ponto/LFMP-9) land area was still undeveloped at the time Kaiza proposed changing all the General Plan land uses at Ponto and eliminating the usable Open Space in BLEP MP.

Kaiza's General Plan land use and Master Plan 'Amendments' made radical land use changes that converted some critical Useable GM Open Space to residential land use and also reduced some GM Open Space provided in BLEP MP. Following is Kaiza's Amended General Plan land use map and bullet summary of the major Open Space changes without getting into a very detailed forensic analysis:

- Eliminated the 12.8 acre Recreation Commercial land use.
- Eliminated the minimum 30' wide landscaped Open Space on both sides of Windrose Circle for the large unbuilt portions of Windrose Circle
- Reduced by 10' the landscaped Open Space on the smaller built portion of Windrose Circle
- Eliminated on 40.3 acres the additional minimum 30' wide landscaped setbacks between buildings
- Reduced BLEP's 2.8 acres of private recreation open space to 2.3 acres
- Except for the Rosalena (BLEP Area C) and (PSMP Area J), maintained the 45' to 50' landscaped setbacks from the Batiquitos Lagoon Bluff edge
- Eliminated the 75' landscaped separation between BLEP MP Areas C and D

- Eliminated the 70' landscaped separation between BLEP MP Areas D and E
- Maintained the 25' landscaped setback along Avenida Encinas. [However new Master Plan Amendments MP-175L propose reducing the setback to 10' on the undeveloped frontage of Avenida between PCH and the railroad tracks]
- Placed a road in most of the 80' landscape setback between Lakeshore Gardens
- Eliminated the 50' landscaped setback between BLEP MP Areas F and I
- Eliminated the 75' landscaped separation between BLEP MP Areas G and H
- Added a 20' wide by 1,000' long landscaped strip for an HOA trail

Kaiza's Master Plan Amendment MP 175 (D) eliminated the 12.8 acre Open Space land use (with an associated General Plan Amendment to add more residential land use) and reduced the other useable Open Spaces required in the BLEP MP. When the 1994 Kaiza MP 175 (D) General Plan Amendments were proposed, it seemed they voided the '1986 GM Open Space exemption' that was clearly specific only to the 1986 BLEP MP land uses and regulation. Although this was a false exemption, the exemption only applied to the complete/integrated land use and open space provided in the 1986 BLEP MP. The 1986 exemption specific to BLEP MP could not apply to a different and later 1994 General Plan land use plan that eliminated the 12.8 acre Recreation Commercial (Open Space) site to add residential land use

and that also reduced the GM compliant Open Space provided in the 1986 BLEP MP. 21.90.030(b) notes that:

**“(b) No zone change, general plan amendment, master plan amendment or specific plan amendment which would increase the residential density or development intensity established by the general plan in effect on the effective date of this chapter shall be approved unless an amendment to the citywide facilities management plan and the applicable local facilities management plan has first been approved.”**

The 1994 Kaiza General Plan land use and Master Plan (MP 175(D)) Amendments removed 12.8 acres of Recreation Commercial (GM compliant Open Space) to add residential land use. This violated 21.90.030(b) by doing so without a first providing a Citywide Facilities Plan Amendment that analyzed the actual amount of GM compliant Open Space being proposed in the 1994 Kaiza MP 175(D) relative to the 1986 BLEP MP on which the 1986 GM Open Space exemption for LFMP-9 was based. MP 175(D) is noted in the MP as follows:

- “MP 175 (D) Kaiza Poinsettia Master Plan To **replace educational uses with residential land uses** And rename to Poinsettia Shores Master Plan (was) Approved Planning Commission Resolution No. 3552, November 3, 1993, Approved City Council Ordinance No. NS-266, January 18, 1994.”

Kaiza’s MP 175(D) inaccurately and bizarrely claimed BLEP MP’s prior false exemption from the GM Open Space Standard as the justification that Kaiza’s new 1994 Open Space land use changes that seem to reduce the amount of GM complaint Open Space in the 1986 BLEP MP are also exempt from the GM Open Space Standard. **Kaiza’s MP 175(D) claims the pre-Growth Management and pre-BLEP MP Constrained/Undevelopable lagoon waters and bluff habitat that per the 15% Growth Management Open Space Standard CAN NOT be counted as meeting the 15% GM Open Space Standard can be magically counted as meeting the 15% GM Open Space Standard. The GM Open Space Standard specifically states that only Unconstrained/Developable lands CAN BE counted as meeting the GM Open Space Standard.** The stated principles of Growth Management, the Growth Management Ordinance 21.90 and the Growth Management Open Space Standard DO NOT allow a developer or the City to count already documented Constrained and unbuildable habitat (and water) as Unconstrained and developable land. You can’t just turn ‘an apple into a banana by saying it’, or turn ‘Constrained/Undevelopable land into Unconstrained/Developable land by just saying it.

Compliance with the law in this Open Space issue is a part of a current lawsuit by North County Advocates a group of Citizens watchdogs. The City has unsuccessfully tried to diminish this lawsuit. A judge/jury will determine the outcome.

Additional MP 175 Amendments have been proposed by and approved to further modify land use and regulatory limitations at Ponto. These include:

- MP 175(E) Poinsettia Shores Master Plan, Redefinition of minor amendment to provide a flexible regulatory procedure to encourage creative and imaginative planning of coordinated communities, WITHDRAWN November 1, 1994

- MP 175(F) Poinsettia Shores Master Plan minor amendment to actualize off-site option for provision of 90 affordable housing dwelling units, Approved Planning Commission Resolution No. 3774, April 19, 1995
- MP 175(G) Poinsettia Shores Master Plan minor amendment to adopt Coastal Commission Suggested modifications, Approved Planning Commission Resolution No. 3922, June 5, 1996 Approved City Council July 16, 1996, NS-367
- MP 175(H) Poinsettia Shores Master Plan - major amendment FOR HOTEL AND TIMESHARE USES, WITHDRAWN January 16, 2003
- MP 175(I) Poinsettia Shores Master Plan – Rosalena Trail Amendment, WITHDRAWN January 8, 2002
- MP 175(J) Poinsettia Shores Master Plan – major amendment for Carlsbad Coast Residential project to allow RM land use on Poinsettia Shores, WITHDRAWN January 8, 2002
- MP 175 (K) Poinsettia Shores Master Plan – Ponto Area Specific Plan Mixed use consisting of residential, commercial and retail uses, WITHDRAWN August 19, 2004
- MP 175(L) Poinsettia Shores Master Plan – Major amendment for commercial and residential development on Planning Area F, Still being proposed by developers and being processed by the City.

**The false exemption for the BLEP MP based LFMP-9 should never have occurred. However, completely eliminating BLEP MP’s OpenSpace land use (12.8 acre Recreation Commercial) and reducing BLEP MP’s required Open Space while at the same time claiming the false BLEP MP Open Space Exemption is a violation of common sense, 21.90, and the very founding principles Growth Management.**

The CA Coastal Commission in MP 175 (G) in part recognized the elimination of the 12.8 acre Recreation Commercial land use and maybe some of the Open Space land use changes and added the following land use regulations for 11.1 acre Planning Area F in the Carlsbad’s Local Coastal Program LCP). The LCP as per State Law and referenced in Carlsbad’s General Plan is the controlling land use regulation over the General Plan, Poinsettia Shores Master Plan and in the Coastal Zone:

“PLANNING AREA F: Planning Area F is located at the far northwest corner of the Master Plan area west of the AT&SF Railway right-of-way. This Planning Area has a gross area of 11 acres and a net developable area of 10.7 acres. Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an “unplanned” area, for which land uses will be determined at a later date when more specific planning is carried out for areas west of the railroad right-of-way. A future Major Master Plan Amendment will be required prior to further development approvals for Planning Area F, and shall include an LCP Amendment with associated environmental review, if determined necessary.

The intent of the NRR designation is not to limit the range of potential future uses entirely to nonresidential, however, since the City's current general plan does not contain an “unplanned” designation, NRR was determined to be appropriate at this time. In the future, if the Local Coastal Program Amendment has not been processed, and the City develops an “unplanned”

General Plan designation, then this site would likely be redesignated as “unplanned.” Future uses could include, but are not limited to: commercial, residential, office, and other uses, subject to future review and approval.

**As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.”**

In 2010 the CA Coastal Commission in 2010 rejected the Ponto Beachfront Village Vision Plan on which MP 175(K) was based. MP 175(K) was withdrawn.

On July 3, 2017 the CA Coastal Commission provided direction to the City of Carlsbad regarding MP 175(G), Carlsbad’s 2015 General Plan Update, Carlsbad proposed Local Coastal Program Amendment Land Use Plan (LUP) . CA Coastal Commission wrote to the City the following. Notes on the context of communication are in bracketed italics *[example]*:

“The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto ... area. For example, **Planning Area F requires the city and developer to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e., public park) on the west side of the railroad. ...** this study should be undertaken as a part of the visitor serving use inventory analysis described above. *[the discussion of the need for the City to conduct a citywide analysis of the location and amount of these uses in the Coastal Zone to assure the City General Plan within the Coastal Zone is providing the adequate amounts and locations of these land uses to fulfill the long-term population/visitor needs for these uses according to the CA Coastal Act]* **If this analysis determines that there is a deficit of low cost visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed.”**

In 2017 the City conducted the first Sea Level Rise (SLR) Vulnerability Assessment <https://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=33958> . That first initial analysis, shows significant SLR impacts that will reduce existing Ponto Open Space - the State beach and Campground and along the Batiquitos Lagoon. The City identified SLR impacts on Ponto Open Space are summarized in the next section of this history.

In 2023 the CA Coastal Commission will consider the data and public input and decide the appropriate land use for 11.1 acre Planning Area F based the CA Coastal Act and Coastal Act land use policies.

You can determine the Open Space and Park Quality of Life Standards that will be applied to this and other future land uses.

[City assessment of Sea Level Rise impacts on reducing Ponto Open Space](#)

The City's 2017 SLR assessment shows SLR will significantly reduce or eliminate only existing Open Space land at Ponto. The City's assessment quantifies the sporadic/episodic loss of Ponto/Coastal South Carlsbad Open Space land and land uses being at the State Campground, Beaches, and Batiquitos Lagoon shoreline – about 32 acres by the year 2100, this would be an average loss of 17,000 square feet of Open Space per year. Following (within quotation marks) is a description, quantification and images of the City's projected loss of Ponto/Coastal South Carlsbad Open Space land and land use due to SLR. *[Italicized text within brackets]* is added data based on review of aerial photo maps in the Assessment.

“Planning Zone 3 consists of the Southern Shoreline Planning Area and the Batiquitos Lagoon. Assets within this zone are vulnerable to inundation, coastal flooding and bluff erosion in both planning horizons (2050 and 2100). A summary of the vulnerability assessment rating is provided in Table 5. A discussion of the vulnerability and risk assessment is also provided for each asset category.

#### 5.3.1. Beaches

Approximately 14 acres of beach area is projected to be impacted by inundation/erosion in 2050. ... Beaches in this planning area are backed by unarmored coastal bluffs. Sand derived from the natural erosion of the bluff as sea levels rise may be adequate to sustain beach widths, thus, beaches in this reach were assumed to have a moderate adaptive capacity. The overall vulnerability rating for beaches is moderate for 2050.

Vulnerability is rated moderate for the 2100 horizon due to the significant amount of erosion expected as the beaches are squeezed between rising sea levels and bluffs. Assuming the bluffs are unarmored in the future, sand derived from bluff erosion may sustain some level of beaches in this planning area. A complete loss of beaches poses a high risk to the city as the natural barrier from storm waves is lost as well as a reduction in beach access, recreation and the economic benefits the beaches provide.

#### 5.3.3. State Parks

A majority of the South Carlsbad State Beach day-use facilities and campgrounds (separated into four parcels) were determined to be exposed to bluff erosion by the 2050 sea level rise scenario (moderate exposure). This resource is considered to have a high sensitivity since bluff erosion could significantly impair usage of the facilities. Though economic impacts to the physical structures within South Carlsbad State Beach would be relatively low, the loss of this park would be significant since adequate space for the park to move inland is not available (low adaptive capacity). State parks was assigned a high vulnerability in the 2050 planning horizon. State park facilities are recognized as important assets to the city in terms of economic and recreation value as well as providing low-cost visitor serving amenities. This vulnerability poses a high risk to coastal access, recreation, and tourism opportunities in this planning area.

In 2100, bluff erosion of South Carlsbad State Beach day-use facilities and campgrounds become more severe and the South Ponto State Beach day-use area becomes exposed to coastal flooding during extreme events. The sensitivity of the South Ponto day-use area is low because impacts to usage will be temporary and no major damage to facilities would be anticipated. Vulnerability and risk to State

Parks remains high by 2100 due to the impacts to South Carlsbad State Beach in combination with flooding impacts to South Ponto.

Table 5: Planning Zone 3 Vulnerability Assessment Summary [condensed & notated]:

Asset	Horizon			Vulnerability
<u>Category</u>	<u>[time]</u>	<u>Hazard Type</u>	<u>Impacted Assets</u>	<u>Rating</u>
Beaches	2050	Inundation/Erosion, Flooding	<b>14 acres</b> (erosion)	Moderate
	2100	Inundation/Erosion, Flooding	<b>54 acres</b> (erosion)	Moderate
Public Access	2050	Inundation, Flooding	6 access points <b>4,791 feet of trails</b>	Moderate
	2100	Inundation, Flooding	10 access points <b>14,049 feet of trails</b>	Moderate
State Parks <i>[Campground - Low-cost Visitor Accommodations]</i>	2050	Flooding, Bluff Erosion	4 parcels [ <b>&lt;18 Acres</b> ]	High
	2100	Flooding, Bluff Erosion	4 parcels [ <b>&gt;18 Acres</b> ] <i>[loss of <b>over 50% of the campground &amp; its Low-cost Visitor Accommodations,</b></i>	High
<i>See Figure 5.]</i>				
Transportation (Road, Bike, Pedestrian)	2050	Bluff Erosion	<b>1,383 linear feet</b>	Moderate
	2100	Flooding, Bluff Erosion	<b>11,280 linear feet</b>	High

Environmentally Sensitive Lands	2050	Inundation, Flooding	572 acres	Moderate
	2100	Inundation, Flooding	606 acres	High

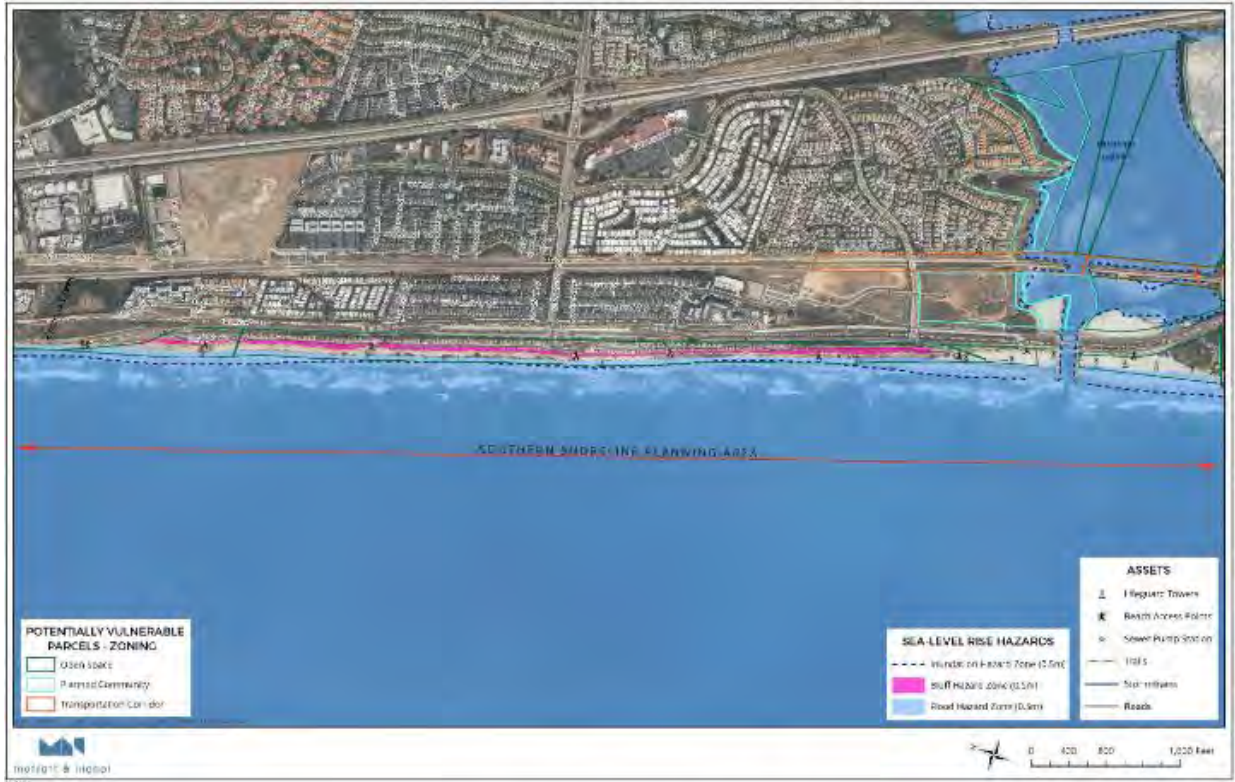

Figure 7: Southern Shoreline Planning Area – Year 2050

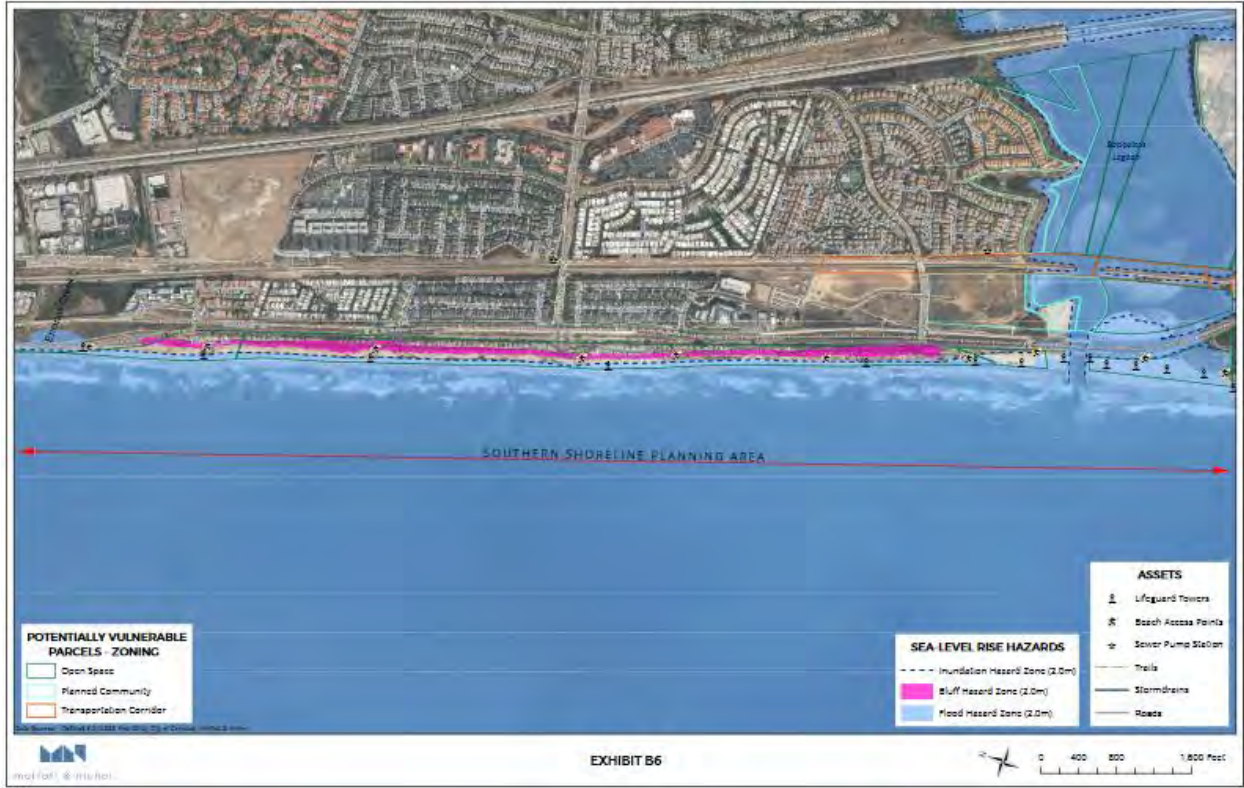

Figure 5: CoSMoS Bluff Erosion Projections by 2100  
(CoSMoS-COAST 2015)

[Figure 5 show the loss of over 50% of the campground and campground sites with a minimal .2 meter Sea Level Rise (SLR), and potentially the entire campground (due to loss of access road) in 2 meter SLF.]”

This 2017 SLR data and quantified losses of Ponto/Coastal South Carlsbad Open Space land and land uses was not considered in the City’s rejected (by CCC) Ponto Beachfront Village Vision Plan. The Ponto Vision Plan is the basis for the City’s 2015 General Plan Update that is now being proposed in the City’s Local Coastal Program Amendment now before the CA Coastal Commission.

#### Summary:

LFPM-9 was clearly not developed in 1986, and did not then or now dedicate 15% of the unconstrained/developable land as Open Space as required by the Growth Management Open Space Standard. These two reasons for the City to “exempt” LFMP-9 from Open Space Standard were/are False. Saying Constrained/undevelopable land can be counted as Unconstrained/developable land is also false and clearly not allowed according to the Growth Management Ordinance, Standards, principles, and common-sense honesty to Carlsbad Citizens. LFMP-9, as the City’s own maps/data base show is clearly missing 30-acres of GM Open Space. In addition in 2017 we learned that Ponto/Coastal South Carlsbad will lose about 32 acres of existing Open Space due to SLF.

#### Closing thoughts:

Growth Management is based on the type/amount/location of General Plan land use designations, the development potential of those land use designations in creating the demand for the type/amount/location of facilities, and supply of the type/amount/distribution of facilities – like Open Space and Parks. If the type/amount/location of supply of facilities does not meet the demand for those facilities then growth management fails and Quality of Life is reduced.

Quality of Life Standards are used to assure supply and demand for facilities is properly balanced with respect to type/amount/location.

Ponto is clearly unbalanced. The Ponto Census Tract is at a 40% higher population density than the rest of Carlsbad, yet is Ponto is NOT meeting the Open Space Standard and has NO Park (see City Open Space maps and Park Master Plan). Ponto and all South Carlsbad have higher population demand for Parks and Open Space facilities yet Ponto (that is the only place to provide Coastal Park and Open Space needs for South Carlsbad) has lower or none of those two most critical GM Facilities needed to balance and mitigate the 40% higher population density at Ponto and also the higher residential density in South Carlsbad.

Ponto and Coastal South Carlsbad also have additional State and regional responsibilities to provide Coastal Recreation and Open Space for populations of people and visitors from outside of Ponto and Carlsbad.

This failure to honestly and adequately balance the type/amount/location higher population density by providing higher levels of Parks and Open Space in those areas will lead to a slow and but eventual reduction of the Quality of Life for those areas.

Common sense and the Carlsbad's Growth Management law say if you change the land use (like what was done and is still being proposed at Ponto) you change the type/amount/location of potential development and population and the Growth Management impacts. Land use changes require and honest/accurate/balanced update to Citywide and Local Growth Management Plans to accurately reflect those changes and provide an updated plan to provide facilities that meet the Standards for those land use changes. This is the fundamental heart of any Growth Management.

The Carlsbad Tomorrow Growth Management Committee, and City Commissions and Council are all now facing the same issues and responsibility that we faced in the 1980's at the beginning of Growth Management. We established New Quality of Life Standards – for Open Space and Parks – that required New investments in Parks and Open Space by both the City and developers.

Open Space and Parks have always been identified as most critical for Carlsbad's quality of life. The Carlsbad Tomorrow Growth Management Committee, and City Commissions and Council, and Carlsbad Citizens are all at a critical crossroad.

- Do we, or don't we, enforce and set new standards that achieve the quality of life we desire?
- Do we or don't we, fix existing past errors and below desired standard situations?
- Do we or don't we, roll-up our sleeves a work together to a better Quality of Life?

As a long-time Carlsbad Citizen I am extremely disappointed by some who say we can't fulfill our Community Vision, we can't fix things, can't make things better, and can't add more Parks and Useable Open Space. This can't attitude is not out Community Vision. We can and we did before, and we can do it again and better.

Great cities for hundreds of years have Upgraded their Quality of Life Facility Standards, made and implemented/funded facilities to fix things up to those Standards. A City is just like a business or person - If you don't improve you decline. Examples of Upgrading and funding to New Parks and Open Space are many but include – Carlsbad's Buena Vista Reservoir Park, additions to Pine Park, Village H Park, and Aura Circle Open Space acquisition; and SDSU's major new Park at the redeveloped Qualcomm Stadium site.

Now like at the beginning of Carlsbad Growth Management the City can “despite previous city council actions” make improvements to its Growth Management and Quality of Life Standards to address past and future needs. Following illustrates existing R-23 (up to 23 dwellings per acre) development in Carlsbad – most of our future residential development will be required to be like this or more dense.

High-density housing can be great, but it requires MORE Parks and MORE useable Open Space within walking distance to balance the density and provide large places for families and kids to really play. In Carlsbad's high-density residential future with no backyards and stacked flat multi-family homes the need for both more Parks and Useable Open Space is much greater than in 1980's.

The time to fix the Parks and Useable Open Space problems at Ponto (LFMP-9) is now. Already Ponto is developed at a density that is 40% great than the rest of Carlsbad. New proposed and even higher-density developments (developer driven Amendments) propose to make Ponto even more dense, yet there are not Parks at Ponto and Ponto is missing 30-acres of Useable Open Space past developers should have provided.

A doable, time-tested, accountable, tax-payer saving, strongly citizen desired, accountable, and honest way to fix this was presented to you in 8/8/22 and 12/27/22 emails with attached "CTGMP Key Issues and Suggestions – 2022-12-6". Over 5,000 petitions expressing the need to fix the Park and Open Space problems at Ponto have been sent to the City and the City should have provided these to you in considering Park and Open Space issues.

Ponto Park and Open Space needs your help fixing NOW. If not Carlsbad Tomorrow will be less than it is today, and tragically will have failed our Community Vision.

**Subject:** RE: Public input for Carlsbad LCPA-Parks Master Plan & Growth Management Plan Updates - number of hotel rooms per mile of coastline for Carlsbad and comparable cities

Dear Carlsbad City Council, Carlsbad Tomorrow Growth Management Committee, Parks and Planning Commissions, and CA Coastal Commission and CA State Parks:

As the City has requested specific reference regarding public input, I ask you to please deliver to the those address this email and attachment as public input for:

1. the CTGMC's February 2023 meeting,
2. the next Carlsbad Council meeting,
3. the next Carlsbad Planning and Parks Commission meetings on the Parks Master Plan and Growth Management Program Updates, and Carlsbad's Ponto Planning Area F and Site 18 planning and development applications, and
4. as public input to the CA Coastal Commission on Carlsbad's proposed Local Coastal Program Amendment.

The CTGMC discussed the need to consider the impacts that Carlsbad visitors (i.e. hotel guests) have on City Parks and how that relates to the length of coastline. Staff did not provide the CTGMC that data so using data from the City's January 2015 Tourism Industry Study of 'comparable cities' the following data table below provides that information as of January 2015. Also included in the Parkserve Park Accessibility data from Trust for Public Land.

The 'comparable city' data show Carlsbad provides (in 2015) the 2<sup>nd</sup> highest amount of hotel rooms per mile of coastline, and the lowest park accessibility (for residents). The hotel room data could be updated to 2023, and GIS mapping could include park accessibility data for all land in a city so as to include non-residential hotel land uses.

Further research to address the CTGMC questions would be done to compare the amount of City Parkland each of the 'Carlsbad comparable cities' provide as their developer required acre of parkland (3 to 5 acres) relative to hotel rooms.

All this data has important relevance to Carlsbad's proposed Local Coastal Program Land Use Plan Amendment, Park Master Plan Update, Parkland Dedication 'In-lieu-fee' Update, and Carlsbad's Park amenity offering for hotel guests. Attached is Carlsbad's 2015 Tourism Industry Study for reference. The Study also documents Accommodation costs and key amenities desired by guests.

I hope the data is helpful.

Lance Schulte

**Subject:** Public input for Carlsbad LCPA-Parks Master Plan & Growth Management Plan Updates - Carlsbad below national average and lowest So CA Coastal city in providing Parks within 10-minute walk

Dear Carlsbad City Council, Carlsbad Tomorrow Growth Management Committee, Parks and Planning Commissions, and CA Coastal Commission and CA State Parks:

As the City has requested specific reference regarding public input, I ask you to please deliver to the those address this email and attachment as public input for:

1. the CTGMC's February 2023 meeting,
2. the next Carlsbad Council meeting,
3. the next Carlsbad Planning and Parks Commission meetings on the Parks Master Plan and Growth Management Program Updates, and Carlsbad's Ponto Planning Area F and Site 18 planning and development applications, and
4. as public input to the CA Coastal Commission on Carlsbad's proposed Local Coastal Program Amendment.

For years Carlsbad Citizens have told the City that there is a need for a Park at Ponto:

- to provide for documented Coastal Recreation (i.e. Public Park) land use at Ponto,
- to correct for the conversion of a 12.8 acre Recreation Commercial land use to Residential use and the elimination of planned Coastal Open Space at Ponto,
- to correct the Carlsbad's Park Master Plan documented lack of Park Service at Ponto,
- to provide South Carlsbad (62% of Carlsbad's total population and the City's major Coastal visitor and transit occupancy tax generator) with their ONLY Coastal Park west of I-5. The City unfairly, and contrary to CA Coastal Act Policy disproportionately provides 10 parks totaling 37 acres west of I-5 in Coastal North Carlsbad for 38% of the population but 0 (zero) Coastal Parks and 0 (zero) Coastal park acres west of I-5 in Coastal South Carlsbad for 62% of the population,
- to provide for an existing 6.5 acre local Neighborhood (i.e. Special use area) Park need at Ponto, and
- to provide a City Park within a 10-minute walk for Ponto residents.

Failure to correct this documented City Park unfairness is very damaging to the citizens, City finances, South Carlsbad's and California's visitor industry. The Coastal Recreation data file sent to you earlier documents some of the key facts.

However, we conducted some additional Trust for Public Land 10-minute walk data collection that the City Council, CTGMC, Parks and Planning Commissions and CA Coastal Commission need to also consider. That data is below and in the attached file, and again with last year's Trust for Public Land Ponto Park support letter (again attached) that reflects on Carlsbad poor performance relative to the 24 So Cal Coastal Cities (165 miles of coastline) from Malibu to the Mexican border in providing Parks within a 10-minute walk. The data and links to the data source is:

## **Carlsbad is 10% below the national average for cities & the worst of 24 Coastal So California cities - 165 miles of coastline - in providing Parks within a 10-minute walk to residents**

The Trust for Public Land documents a city's 10-minute walk to Park at <https://www.tpl.org/parkserve>. The Average USA City provides Parks within 10-minute walk to 55% of residents [10% above Carlsbad]. **Carlsbad** provides Parks within 10-minute walk to **49.9% of residents [10% below National Average]**. New York City provides Parks within 10-minute walk to 99% of residents.

## **The Trust of Public Land submitted a letter to the City of Carlsbad, CA Coastal Commission, and CA State Park supporting Ponto Park**

### **Carlsbad is the worst of 24 Southern CA Coastal cities (from Malibu south to Imperial Beach along 165 miles of coastline) in providing Parks within 10-minute walk to residents:**

1. Palos Verdes Estates provides Parks within 10-minute walk to 100% of residents
2. El Segundo provides Parks within 10-minute walk to 100% of residents
3. Hermosa Beach provides Parks within 10-minute walk to 100% of residents
4. Redondo Beach provides Parks within 10-minute walk to 98% of residents
5. Manhattan Beach provides Parks within 10-minute walk to 95% of residents
6. Del Mar provides Parks within 10-minute walk to 93% of residents
7. Dana Point provides Parks within 10-minute walk to 89% of residents
8. Huntington Beach provides Parks within 10-minute walk to 85% of residents
9. Long Beach provides Parks within 10-minute walk to 84% of residents
10. Laguna Beach provides Parks within 10-minute walk to 82% of residents
11. Santa Monica provides Parks within 10-minute walk to 82% of residents
12. San Diego provides Parks within 10-minute walk to 81% of residents
13. Coronado provides Parks within 10-minute walk to 76% of residents
14. Newport Beach provides Parks within 10-minute walk to 76% of residents
15. Imperial Beach provides Parks within 10-minute walk to 74% of residents
16. Encinitas provides Parks within 10-minute walk to 68% of residents
17. Los Angeles provides Parks within 10-minute walk to 63% of residents
18. Solana Beach provides Parks within 10-minute walk to 63% of residents
19. Oceanside provides Parks within 10-minute walk to 58% of residents
20. Seal Beach provides Parks within 10-minute walk to 57% of residents
21. Malibu provides Parks within 10-minute walk to 53% of residents
22. San Clemente provides Parks within 10-minute walk to 52% of residents
23. Rancho Palos Verdes provides Parks within 10-minute walk to 50% of residents
24. **Carlsbad** provides Parks within 10-minute walk to **49.9% of residents.**

**Carlsbad is the lowest & most unfair to citizens of the 24 Southern California Coastal cities along 165 miles of coast from Malibu to Imperial Beach.**

*Source of data: Trust for Public land parkscores*

Trust for Public Land's 10-minute walk to Park Maps/data:

Carlsbad = <https://parkserve.tpl.org/mapping/index.html?CityID=0611194#reportTop>

Encinitas = <https://parkserve.tpl.org/mapping/index.html?CityID=0622678>

Irvine = <https://parkserve.tpl.org/mapping/index.html?CityID=0636770>

Please, Please, please, consider and discuss this data, and

1. Create a 10-minute walk to City Park Standard in the
    - a. Parks Master Plan,
    - b. Growth Management Plan Update, and
    - c. Local Coastal Program Update.
  2. Create a Park Policy that requires developers to dedicate Park Land (not pay Park-in-lieu-fees) in areas that do not a minimum of 3 acers of City Park for each in 1,000 population within a 10-minute walk of the developer's proposed development (see attached CTGMC Key Issues & Suggestions file for details and Open Space suggestions)
  3. Fix Coastal South Carlsbad's documented City Park inequity/unfairness with a significant and real Ponto Park
  4. Save tax-payers tens of millions in dollars by cost effectively purchasing vacant land at Ponto for a Park, v. trying to maybe make a few bits of narrow PCH roadway median as a pseudo-park
- Do you want Carlsbad to be the worst city in Coastal Southern California in providing accessible Parks within a 10-minute walk to residents?
  - Do you want Carlsbad to fail to upgrade its park standards while other cities updated their park Standards and make their cities more desirable?
  - Do you want to undermine the quality of life for Carlsbad citizens and their children by not providing a park within a 10-minute walk to their home?
  - Do you want to force Carlsbad families to have to drive to park?
  - Do you want to slowly undermine a key visitor serving industry in South Carlsbad by not providing a significant and true and meaningful Coastal Park in South Carlsbad?
  - Do you want tax-payers to pay tens of millions more to try to maybe try to make a few narrow portions of PCH median useable to people?

Please take responsibility and full ownership of your decisions on these important issues and questions. The individual decisions you make will likely be the last ones made. Once vacant land like at Ponto is developed it will be forever lost to address the critical, well documented Park and Coastal Park needs at Ponto as overwhelmingly communicated by Carlsbad Citizens and visitor businesses, and other citizens.

Please be wise and think about the future your decisions will bring.

Thank you,  
Lance Schulte

PS: The initial version of the "CTGMC key issues and Suggestions 2022-12-6" file (attached) sent to you 8/8/22. The attached updated file should replace that older file as there is new data on significant tax-payer cost savings from Pronto Park relative to PCH Relocation, and updated examples of how Coastal Open Space can be cost-effectively persevered and increased. Both Coastal Parks and Open Space are important Carlsbad and State of CA issues.

- Parks: Updated data shows that a 11.1 acre Ponto Park would now cost less \$20 million to buy and build. This is less than a City Pool Renovation. Carlsbad’s Old City Council planned to spend \$65 to \$80 million in Carlsbad tax-payer dollars to address the Citywide need for a significant Coastal Park in South Carlsbad with a 2.3 mile PCH Relocation. The City identified in 2001 other pay-payer funds were highly unlikely. \$65 to \$80 million would only ‘free-up’ 15.8 acres of narrow PCH Median (City documented “Surplus Land Area #4 & #5”). As People for Ponto Citizens have been saying for years that Ponto Park is the better Park solution to the documented Coastal South Carlsbad Park needs – a citywide need. The CTGMC should include that citywide Park need and the logical, better and tax-payer responsible Ponto Park solution to that citywide Park need in your CTGMC recommendations to City Council.
- Open Space: Updated data shows how documented GM Open Space shortfalls can be properly and responsibly address in a collaborative citizen-based “Local Facilities Zone Useable Open Space Correction Plan” approached. Also the need to maintain the 15% GM (Useable) Open Space Standard will be critical in the future to maintain Open Space and prevent future conversion of Open Space to residential land use as part of Housing Plan updates.

For the CTGMC; Parks and Open Space are the 2 most critical/special of 6 Key Growth Management Program Update Issues and Suggestions the CTGMC should take to properly address these 6 key Growth Management Issues.

- Please read the Updated data and Suggestions.
- Please responsibly address the Growth Management issues of a citywide Park need for Coastal South Carlsbad as listed in the attached Suggestions. Include a South Carlsbad Coastal Park in your recommendations to the City Council. Acknowledge Ponto Park as the best and most tax-payer efficient solution to address that documented citywide park need.
- Please in your recommendations to City Council retain and enforce the Open Space Standard, and fix past errors made in falsely exempting certain developers in certain areas in the City from complying with the Growth Management Open Space Standard that other developers in other areas are required to provide.

Please consider this email and attachments, and know P4P Carlsbad Citizens are here to help assure we sustain and enhance our quality of life for future generations. People for Ponto love deeply Carlsbad and want to assure we leave a better Carlsbad to future generations.

Happy holidays and with Aloha Aina,  
Lance Schulte

## Introduction

Strategic Advisory Group (SAG) in conjunction with the City of Carlsbad, Carlsbad Tourism Business Improvement District (CTBID) and tourism industry stakeholders has completed an eight-month collaborative process that has included extensive research, ongoing input and collaboration, and a review of current practices. We have created a series of recommendations that have been developed from competitive destination research, collaboration with Carlsbad stakeholders, consumer research, Industry best practices and SAG's overall experience. SAG has presented draft recommendations to key tourism stakeholders and the CTBID Board of Directors to gain additional insight prior to drafting this report.

### Stakeholder Communication and Involvement

SAG would like to thank all of the participants in this study. The input and support that has been shown throughout this process has demonstrated a high degree of interest and willingness to be involved going forward. In particular, SAG would like to thank Christina Vincent (City of Carlsbad) and Sam Ross (Visit Carlsbad) for their involvement. A steering committee was formed to monitor the overall progress of the study and SAG would like to thank Hector Becerra, Nancy Nayudu, and Vikram Sood who participated with Ms. Vincent and Mr. Ross in over 25 weekly calls during the past eight months.

SAG also spoke to current contracted vendors of Visit Carlsbad to understand their approach and gain their insight. SAG would like to thank Mindgruve, DCI Group and Resonate for their time and insight.

June 9, 2014

## Tourism Industry Study - Stakeholder Update

Carlsbad Tourism Industry Stakeholders,

This is the first edition in a series of monthly updates you will receive as the Tourism Industry Study evolves. As vested members of the industry we want to keep you informed on the process as we study the tourism and hospitality landscape and hear your thoughts throughout the next few months. Below you will find information regarding our current efforts through research, additional conversations with individuals like yourself.

### Stakeholder Sessions

SAG visited and met with over 20 individuals from different leaders to learn about the current situation. There was feedback from those conversations was incredibly insightful. Conversations with follow up phone calls and a survey industry and local trends. SAG developed an initial SV Stakeholder conversations.

Stakeholders also provided valuable insight into the current direct competitive destinations as well as group market benchmarking research. We will look at resources, metrics competitive destinations and their respective tourism offerings.

SAG has created a supplemental stakeholder survey for sessions. The survey is based on initial research and focus groups. We encourage your feedback and to participate. (Survey Link: Carlsbad Stakeholder Survey)

### Research

SAG reviewed previously completed Visitor Profile Studies, Annual Reports, survey research, marketing and branding documents, and additional past tourism information to understand previous efforts in the Carlsbad market. SAG reviewed past research and current property amenities. We have a foundation of understanding into the demographics in this market and who has historically been visiting Carlsbad. SAG's foundation of understanding includes where they have historically come from and how they arrive in market.

We are building a Carlsbad-wide template with inventory, amenities, etc. for comparison with other destinations. SAG has begun the comparison for benchmarking research based on stakeholder input of competitive destinations. We are reviewing those competitive destinations and their organizations. SAG will be breaking out organizational assets, budgets, spending on marketing and promotional material, etc. to contribute to our comparison and eventual Strategic Action Plan to better compete locally, regionally and nationally.

### PRIZM

SAG proposed to take a deeper look into the current visitor to the Carlsbad market and with support from the City and the industry we are moving forward. The PRIZM Study is an important part of this overall study to determine which segments should be our future target. Participate in this as it will be an informative piece of the individual reports to properties that participate. SAG will allow properties to participate in this data collection process.

PRIZM will allow us to build a profile of past visitors. We will be pulling segments from reviewing the most recent data. Each segment will have its own respective guest profiles. This report will highlight potential segments. PRIZM results will allow us to evaluate the characteristics of these new segments.

Our goal is 100% participation from accommodation properties. The more valuable the results and more information recommendations and plan will be. Please submit the survey by July 15, 2014.

### Next Steps

In the coming weeks SAG will be continuing to work on the following:

- SAG will continue to have conversations with stakeholders
  - Additional stakeholder conversations
  - Retail

### Timeline

As SAG continues to work through this study we would like to have further conversations with you as stakeholders in the industry. You will receive updates similar to this one each month with progress and opportunities to get involved further. We value your opinions, feelings and your experiences here. Please do not hesitate to send us an email or give us a call, our contact information is below.

We Are Here!

The above timeline shows our current progress and path through this Tourism Industry Study.

### Thank You

We appreciate your time and interest in the Tourism Industry Study and thank you for participating thus far. We are excited to continue working with you all and moving a beautiful destination like Carlsbad into the future. Again, we encourage fluid dialogue and would love to hear from you as we move forward. Please feel free to contact us with additional information.

Sample Monthly Stakeholder Update  
Eight monthly updates were sent to a broad spectrum of stakeholders.

SAG produced monthly progress updates that were circulated to over 75 stakeholders through email correspondence. The purpose of this communication was to provide information on the progress of the study and gain additional feedback throughout. The email updates were opened and read by nearly 50% of the targeted audience on a consistent basis. There were follow up comments and input from stakeholders throughout the study process, which provided important insight and feedback.

The overall communication plan was successfully completed and proved to be very beneficial in maintaining contact and gaining insight throughout the process.

### **Ongoing Communication must continue**

The ongoing dialogue and reporting to the tourism industry and broader business community must continue as part of the successful implementation of the recommendations. SAG encountered many stakeholders who were not well informed about current activities and results. SAG recommends that electronic updates with newly recommended metrics for results continue to be distributed monthly. The communication should also include brief updates on the implementation of the approved recommendations. The monthly communication should be formatted to be reviewed in three to five minutes by the recipient.

In total, the study process included over 175 “points of contact” between focus groups, surveys, one-on-one interviews, group meetings, and draft presentations. This process has ensured that all interested parties have had the opportunity to give input and share perspectives. This input has been valuable and has helped craft the overall recommendations.

### **Opportunity for Transformation**

The recommendations in this report create a foundation for the transformation of the tourism sales and marketing efforts as well as an approach to future tourism product development. The process has uncovered opportunities to focus future efforts and monitor results. This approach will create an ongoing platform to continue to refine, monitor and evolve tourism efforts in the future. Recommendations are throughout the document and consolidated in the conclusion of this report.

## Executive Summary

SAG has completed an extensive analysis that has included internal and external research and input from the City of Carlsbad, CTBID, Visit Carlsbad, and numerous tourism stakeholders. This process has uncovered many recommendations that are detailed in the full report and summarized in the Executive Summary.

SAG would like to thank everyone who has been involved in the collaborative process throughout the past eight months. The level of interest and support for the future of tourism in Carlsbad is outstanding. This creates a solid foundation for the effective implementation of the approved recommendations.

Overall, SAG recommends a significant transformation in the direction of tourism for Carlsbad. There is an opportunity to focus future tourism efforts in a manner that will impact results and utilize resources in areas where there is a clear need to drive demand. In conjunction with this, SAG has recommended items to be considered to enhance the Carlsbad tourism experience in the future.

A successful tourism sales and marketing effort must have accountability and measurement built in as a fundamental practice. SAG has recommended a plan to ensure these characteristics begin immediately upon adoption of the recommendations. Initial goals have been presented in collaboration with industry stakeholders, CTBID and Visit Carlsbad. An effective measurement plan involves the tourism industry as well as Visit Carlsbad and will require ongoing collaboration.

The following list is an overview of the recommendations contained in this report. The subsequent sections in the report will describe these recommendations in more detail as well as describe implementation strategies.

### *Re-Focus a Majority of the Tourism Resources on Impacting the Shoulder Season*

Carlsbad enjoys strong tourist demand over the summer months. June, July, and August consistently produce hotel occupancies over 80% and the average daily hotel rate continues to grow over this period. SAG recommends shifting sales and marketing resources to measurable group and leisure efforts focused on increasing demand from September through March.

### *Reallocate Marketing Resources – Group vs. Leisure Transient*

The current funding allocation of sales and marketing resources from Visit Carlsbad focuses 90% of the overall resources on increasing awareness in the individual travel leisure market. The recommended approach will include the development of an effective group sales and marketing effort, as well as developing a more targeted approach with individual leisure travel.

### *Develop a Highly Targeted Approach for Leisure Sales and Marketing*

The combination of available research coupled with the outcome of the Nielsen lifestyle research creates an opportunity to focus on market segments that have shown interest in Carlsbad during the shoulder periods (September through March). SAG recommends utilizing a direct marketing approach to increase awareness and drive conversion of overnight stays from these markets.

### *Institute a New Approach to Measurement and Reporting*

It is recommended that there is a new approach to tracking and reporting tourism results in the future. This includes a broader stakeholder report that will track quantitative results on a monthly basis and how the overall performance compares to annually approved goals.

### *Refocus Target Markets for Leisure travel*

SAG has evaluated current online data, past visitor profile studies, as well as completed an analysis of over 50,000 hotel guest records to determine the market segments that present the highest potential for Carlsbad's future leisure sales and marketing efforts. The research has indicated that there is a significant difference in who has shown interest in Carlsbad during the shoulder periods (September through March) and the highly occupied summer months. This underscores the need to focus on those segments where Carlsbad can build increased visitor activity during the times of year that warrant proactive efforts.

In summary, the segment (called "Uppercrust" by Nielsen) that surfaced in the analysis can be characterized as higher income (over \$100,000), over 55 years old, and without kids in the house. The top three Shoulder Season markets are outlined in this report. This research and data creates an opportunity to target this segment with specific offers as recommended earlier.

### *Create and Implement a new Group Sales and Marketing Effort*

With 287,000 square feet of meeting space in Carlsbad and after receiving consistent stakeholder feedback, SAG has conducted an analysis of a national meetings database and determined that there is an opportunity to develop a group sales and marketing plan to increase awareness and develop new business for Carlsbad.

### *Create a Unified Approach to Governance*

The current governance model that encompasses two governing boards of directors for the CTBID and Visit Carlsbad can be more efficient and effective. The recommendation is to create a singular governing board that will provide the oversight and guidance for both CTBID and Visit Carlsbad. In conjunction with this, the formation of active committees to oversee the group sales and leisure sales and marketing efforts will help support the implementation of the recommendations in these areas.

### *Funding*

The benchmarking data indicated Carlsbad ranked very low in amount of tourism dollars expended based on the overall size of the tourism industry in comparison with cities of similar size and quality. The opportunity exists to bring additional industry partners into the funding model over time. The restaurant industry is a natural partner due to the direct benefit it receives from successful tourism marketing.

SAG recommends a performance-based approach to expending future transient occupancy tax (TOT) dollars for use on tourism marketing efforts. The other recommended opportunity is to increase the current fees that are paid for the CTBID in conjunction with industry support of the future direction.

The overall approach of the report recommendations creates an effective platform for determining the return on investment for future expenditures.

### *The Carlsbad Experience*

The quantitative and qualitative research reinforced the challenge of increasing awareness and interest in the balance of tourism opportunities in Carlsbad beyond LEGOLAND and the beach. The current and proposed retail development will greatly improve the Carlsbad shopping experience. SAG has evaluated other potential investments to enhance the Carlsbad experience. Investments in the Carlsbad Aqua Hedionda Lagoon, transportation, a new approach to beach camping, and a conference/event center are

highlighted in this report. An increased collaboration with the Carlsbad Village is recommended. This will highlight current events as well as maximize the opportunities to leverage marketing efforts and support future funding and capital plans.

## Conclusion

The collaborative and research-based approach that we have employed in this process has uncovered many exciting opportunities for the future of tourism in Carlsbad. The recommendations that are contained in this report can be achieved within the current resources that are available. This does not include the resources needed to impact the tourism assets outlined in the report. The need for additional funding will increase awareness of the destination and the conversion of new business for Carlsbad.

The key stakeholders including the City of Carlsbad, CTBID, Visit Carlsbad and the tourism industry have demonstrated interest in transforming the future approach to tourism. The recommendations contained in this report create the roadmap to increasing the overall effectiveness of future efforts.

SAG recommends the approval and adoption of the recommendations contained in this report.

## The State of the Carlsbad Tourism Economy

SAG has reviewed the current tourism economy to understand current trends and determine opportunities for future growth. Tourism is a major economic driver for the City of Carlsbad and benefits multiple industries and attractions within the City. In 2013, Carlsbad saw nearly 3 million tourists, according to an annual survey of visitors to San Diego County completed by CIC Research Inc. This is a 10% increase over 2011 generating millions of dollars in spending and revenue for the City.

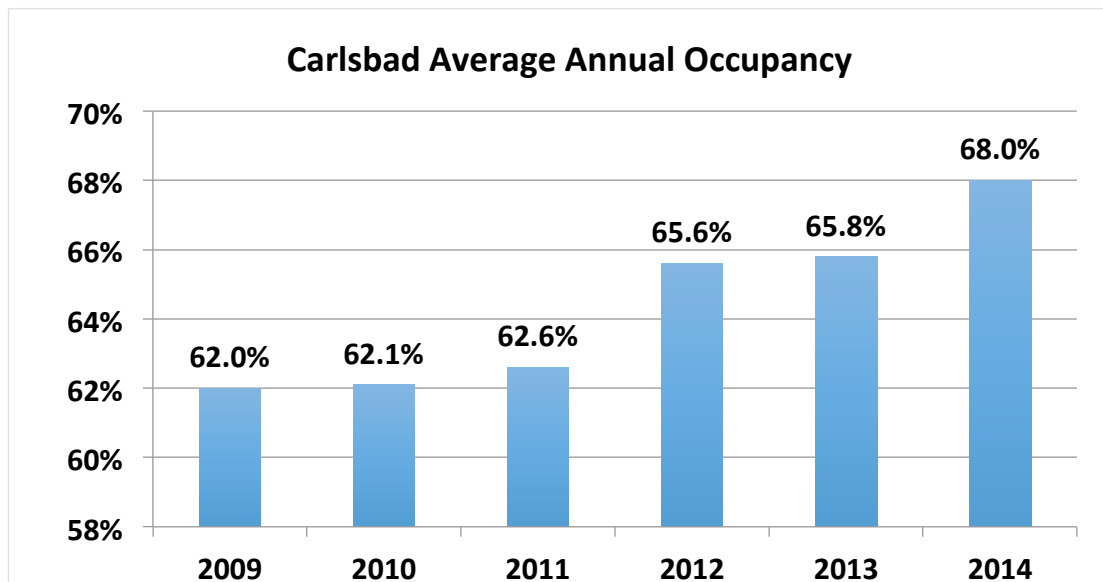

The following is an overview of key indicators of the Carlsbad Tourism Economy:

### Current Target Market:

Families with children under 12 years old with a median household income of \$79,800. This determination was made based on the results of past visitor profile studies. These were findings based on a year round aggregate of Carlsbad visitors. SAG has conducted research to distinguish future target markets for different times of year. This will be reviewed later in this report.

### Occupancy

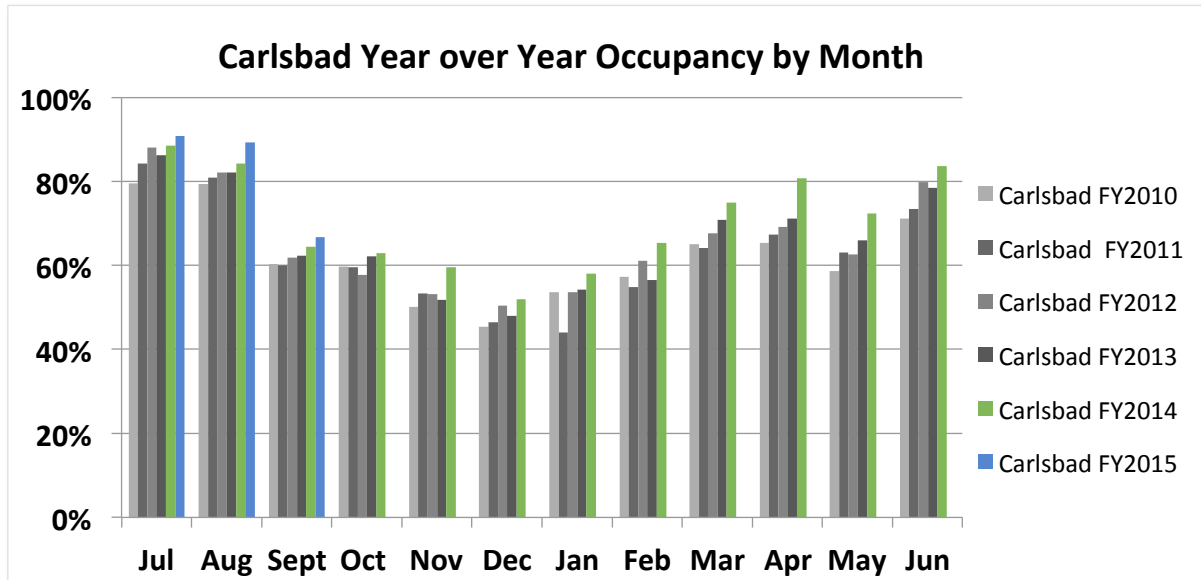

Carlsbad is seeing an increase in annual occupancy. The chart below shows the trends of occupancy growth over the past five years. The year-to-date occupancy for Carlsbad is 68%. While the trends are positive, this demonstrates that there is opportunity to improve year-round occupancy. The occupancy during summer months is 87% and only 62% in the shoulder season according to 2014 occupancy reports tracked by Visit Carlsbad. This indicates an opportunity for growth. The focus of recommendations contained in this report is on increasing visitation during non-summer periods.

Source: Visit Carlsbad

\*Data for 2014 only through September

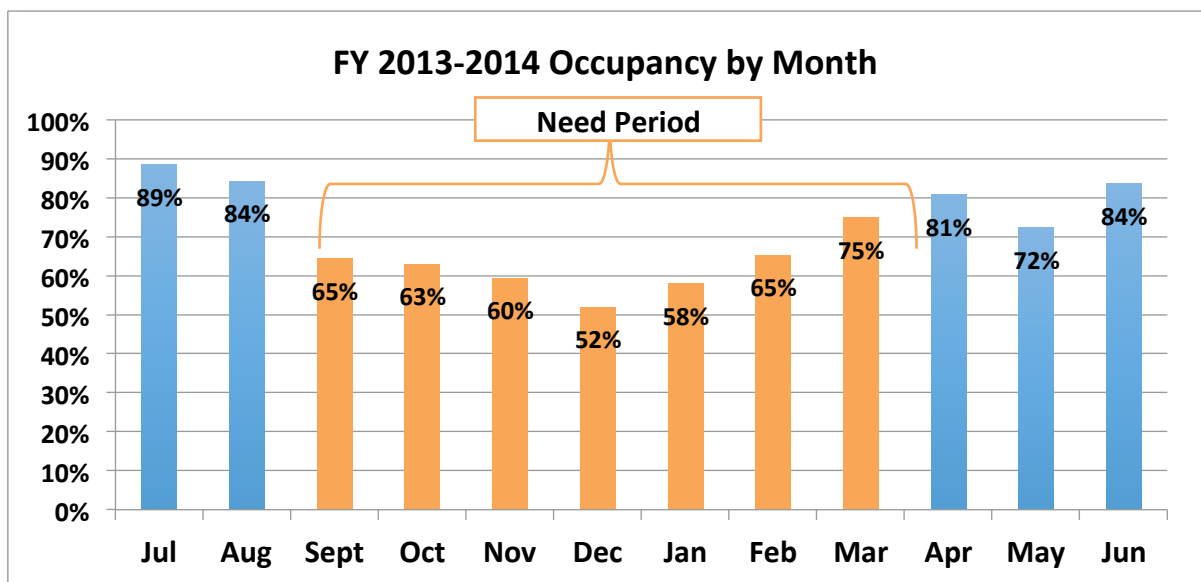

The chart below shows last fiscal year(FY) 2014 in green and the beginning of FY 2015 in blue. Carlsbad’s monthly occupancy trends are rising each year respectively each month.

\*Carlsbad FY2015 (blue) – data only through September 2014

### Seasonality

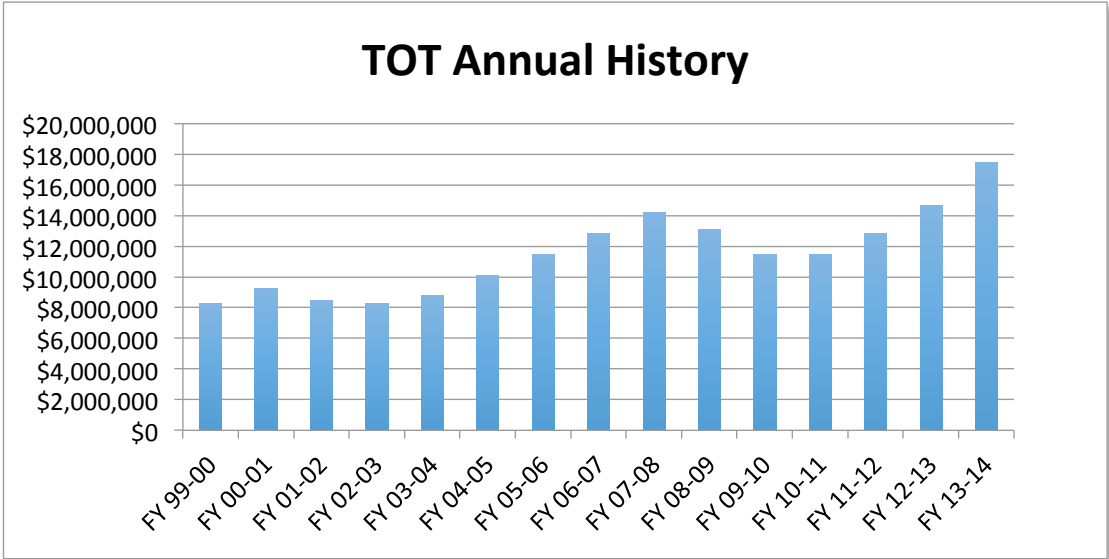

Carlsbad experiences a high Summer Season and a lower Shoulder Season for hotel and visitor demand. High season, summer, begins after Easter, typically in May and continues through August. During these months, Carlsbad’s hotels experience high demand and high occupancy. Conversely, the Shoulder Season months of September through March experience much lower demand and therefore lower occupancy. The need period for hotels and for the City is the Shoulder Season of September through March. The chart below illustrates the Shoulder Season that must be a focus of future tourism efforts.

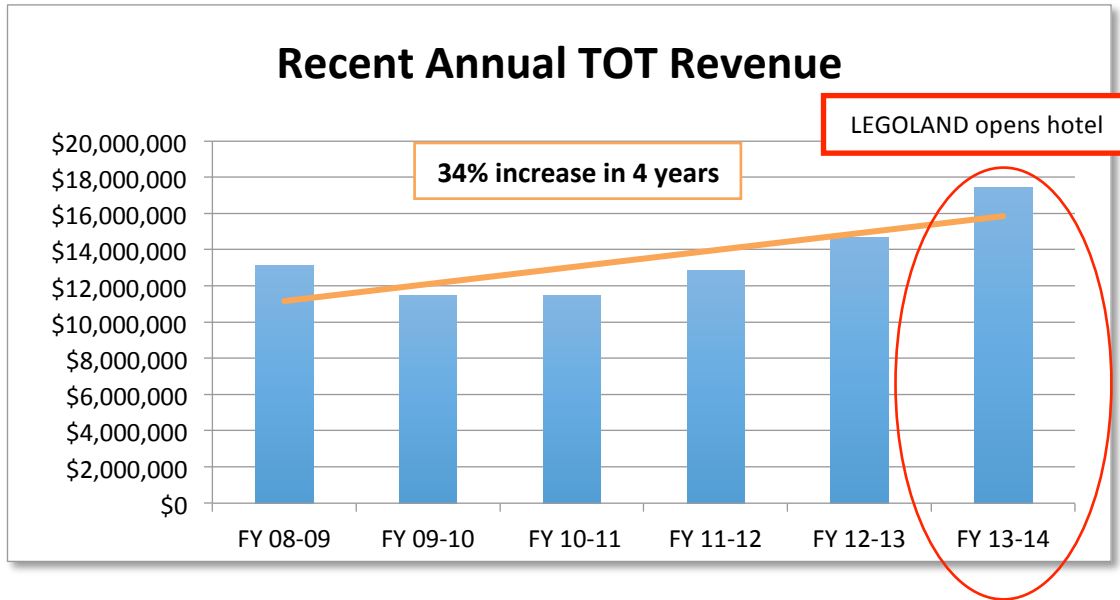

### Transient Occupancy Tax Collection

The Transient Occupancy Tax (TOT) revenue has steadily increased since Fiscal Year 2009-2010. Year over Year the average increase is about 15% in TOT revenue. Last Fiscal Year (2013-2014) the City of Carlsbad collected \$17,453,760 in TOT and is on pace to beat that number in the current fiscal year (2014-2015). All of the TOT revenue collected by the City goes into the City’s General Fund and does not resupply the tourism effort. The TOT revenue accounts for 7% of the City of Carlsbad’s annual revenue, which is projected to increase in FY 2014-2015. The opening of the LEGOLAND hotel in spring 2013 provided a new demand generator, which helped increase occupancy and overall tax collection. The growth of the TOT presents an opportunity for future tourism funding. This is reviewed later in the report.

### Recent Growth

The chart below highlights the growth of TOT revenue over the past six years, in spite of coming out of the Great Recession (Dec. 2007 – June 2009). It is important to note that during this time revenues quickly rebounded and grew 34%. This trend opens the possibility of using TOT as a vehicle to increase tourism marketing resources in the future.

### Tourism Spending

Carlsbad’s local economy benefits from tourism direct spending in the City at restaurants, shops, hotels, amenities, and attractions year round. In the last Visitor Profile Study, conducted by the San Diego Tourism Authority in 2013, it was determined the average spend per person, per day was \$328 and the average visitor group size was 3.1 people. Based on the Visit Carlsbad website statistics, the most frequent visitors to the Carlsbad website had a household income of \$150,000+ with children; significantly different from \$77,000 according to the Visitor Profile Study in 2013. In addition, most visitors are staying overnight for an average of two nights.

With the recent uptick in the economy and strengthened recovery from the recession, SAG would estimate that the tourism economy in Carlsbad is poised to grow stronger in time with a focused marketing effort.

## Stakeholder Immersion – Focus Groups

### Stakeholder Involvement

SAG engaged over 100 tourism, business and regional stakeholders invested in Carlsbad during this process. SAG held three in-person focus groups, conducted dozens of one-on-one phone interviews, distributed monthly stakeholder updates via email to 75 stakeholders, and conducted two targeted surveys for feedback and perception of Carlsbad as a tourism destination.

#### *The Good News*

Stakeholders in Carlsbad are engaged and interested in the future of the City and the tourism market. The feedback we received repeated several themes around inclusion in future planning, target markets, and interest in development and funding. The responses demonstrated that a stakeholder-supported approach will garner stronger participation and involvement. This is a critical ingredient in the successful implementation of the final recommendations.

#### *The Important News*

Stakeholders firmly believe the marketing efforts need to be reevaluated and refocused. SAG spent time on this topic with stakeholders and with Mindgruve as well as DCI, both marketing and public relations partners of Visit Carlsbad, to understand the current efforts, targets, and goals. More detail is provided in the Leisure Sales & Marketing section of this report as well as the Public Relations section. Stakeholders also believe that the tourism efforts are underfunded and would support new funding initiatives if they had the opportunity to review and contribute to a new plan.

#### *Stakeholder comments around interest in the tourism plan and future funding:*

*“The importance of tourism marketing should be embraced by entities and businesses that benefit from tourism dollars. It is a fact that Carlsbad does have competitors and those competitors that have a city who embraces destination marketing will be the big winners.”*

*“We would want to see other organizations joining in and see a better return on investment.”*

*“It would depend on the funding models, but we support a greater level of funding.”*

*“I would have to see the plan first and it would need to be presented to the appropriate channels.”*

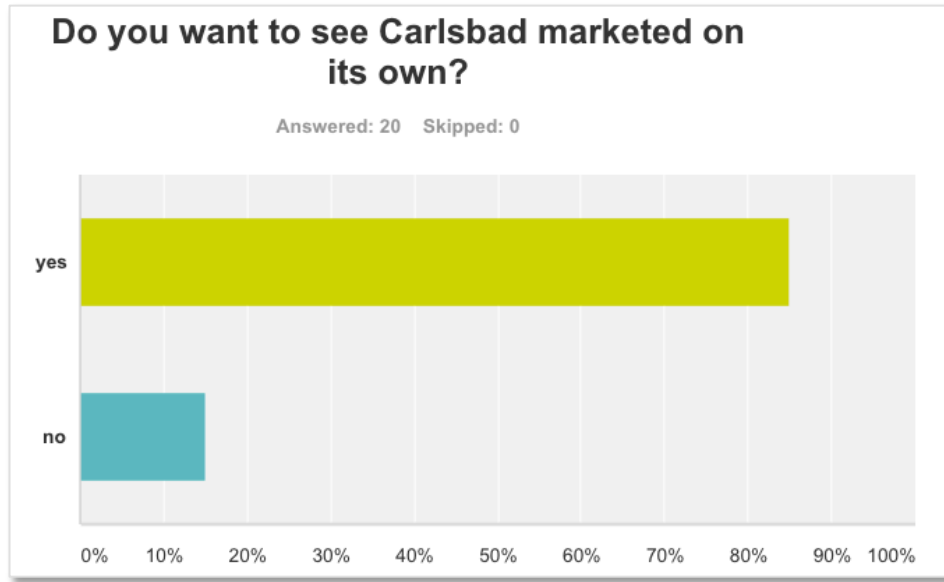

*“I believe there is an opportunity to create a platform for increased funding.”*

These comments show that the stakeholders are engaged and interested in growing tourism in Carlsbad, and most importantly, being a part of the planning process. The comments above also point out a reluctance to increase their financial participation until a new direction is implemented. Carlsbad has a unique opportunity with a majority of stakeholders willing to come to the table to plan together for the future of the destination.

## Stakeholder Survey

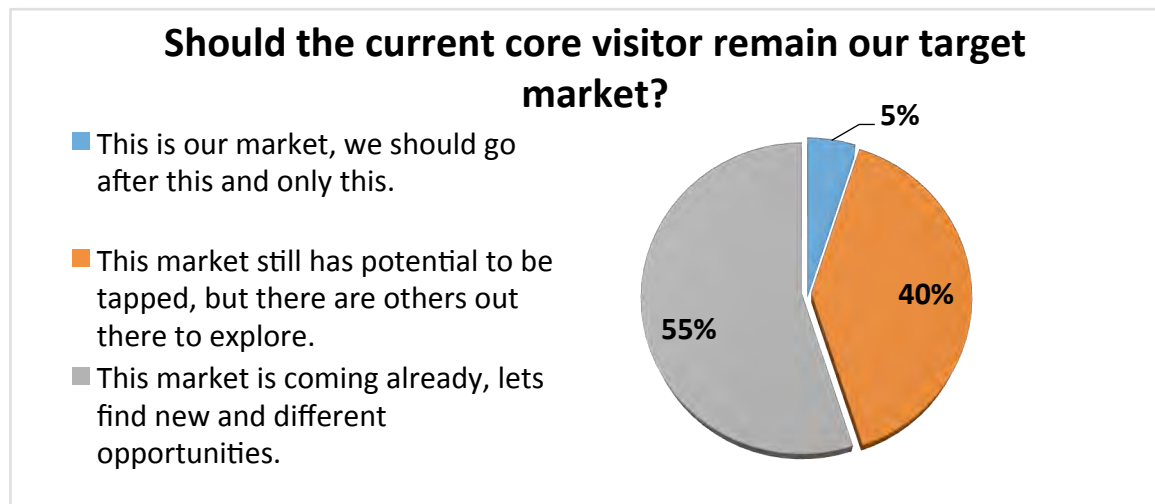

SAG conducted a quantitative survey and reached out to over 75 Carlsbad tourism stakeholders. Stakeholders are made up of people that have knowledge of the tourism industry through hotel properties, restaurants, amenities, or civic engagement. There was a 30% response rate, which provided a representative sample. The following is a recap of the responses to the survey.

Stakeholders believe Carlsbad is a true destination worthy of its own brand and marketing efforts.

Stakeholders also felt that the current Visitor Profile Study supported information should not necessarily remain as Carlsbad’s primary target market. The stakeholders indicated an interest in evaluating which markets would impact the shoulder periods.

Currently, Carlsbad is targeting families with children under 12 years old and stakeholders believe there is more out there for this destination as 55% of respondents want to pursue “new and different opportunities” for Carlsbad. The chart below depicts the strong opinion that there is a need to diversify future marketing efforts.

## Regional Targets

SAG also asked stakeholders about regional targets and what areas they thought should be pursued to increase tourism results. According to the survey, stakeholders felt that the following locations were the top priorities for regional marketing:

- Southern California (drive in)
- Northern California
- Arizona and Mountain States
- Mexico

There was consistent feedback and survey responses that supported the “drive in” Southern California market was the highest priority. According to the latest Visitor Profile Study conducted by the SDTA, nearly 70% of the current visitors are driving to Carlsbad.

In addition to these four core areas, stakeholders also felt that there were new opportunities in a geographically larger space including Texas, Colorado, Washington, Nevada, and Utah.

The current geographical markets and stakeholder suggested markets are depicted above.

**Gold – Current Markets**

**Blue – Stakeholder Suggestions**

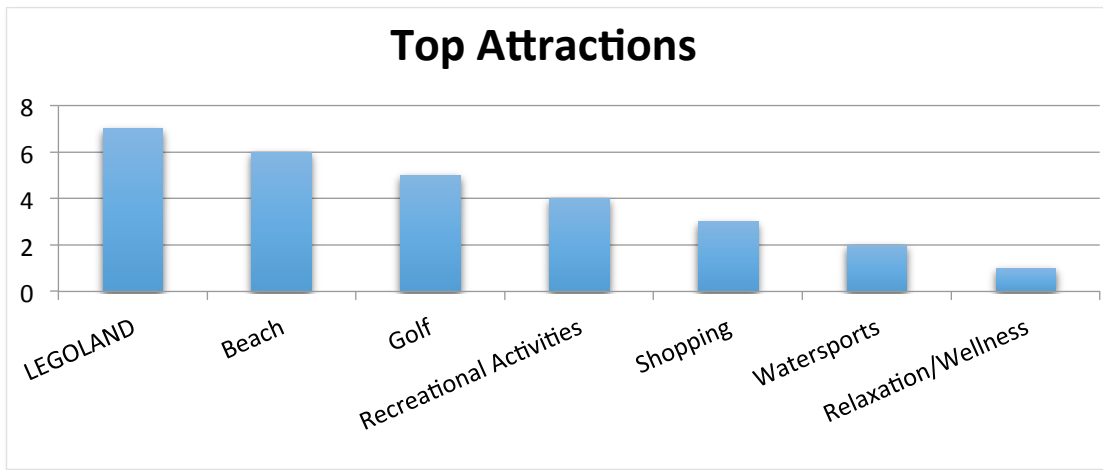

## Target Market Segment

Stakeholders expressed strong interest in finding new target markets, as 55% of respondents said “let’s find new and different opportunities in addition to this market.” Stakeholders were asked to suggest target market segments they believed were opportunities for Carlsbad above and beyond the current target of families with children under 12. Stakeholders suggested multiple new target market segments. Repeated suggestions included the theme of childless households including older and younger demographics. Specific groups included: retirees, young couples, business travelers, groups and conventions.

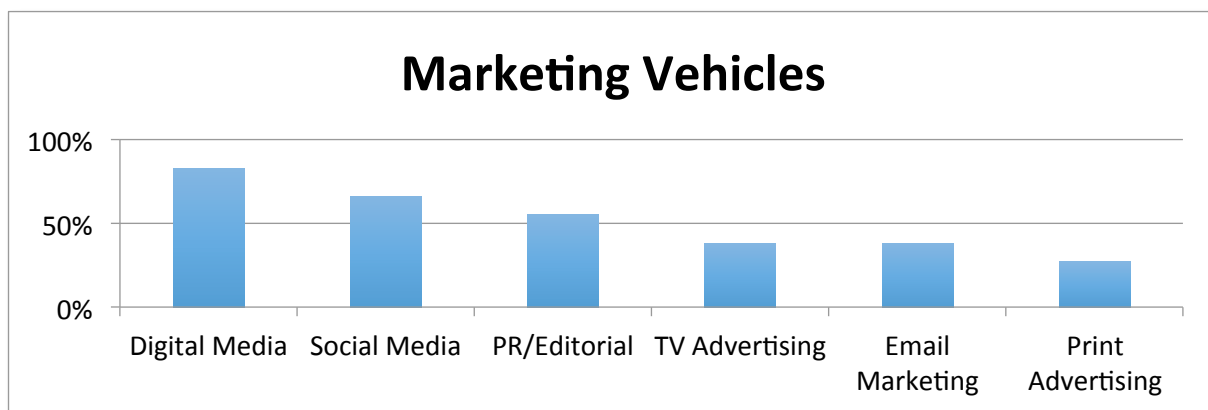

**Attractions**

Carlsbad has a multitude of attractions and entertainment options for visitors coming to the area. Stakeholders were asked to rank the attractions that came out of the focus groups. The results indicated that LEGOLAND and the Beach are Carlsbad’s top attractions according to hospitality and tourism stakeholders. Golf rounded out the top three, followed by recreational activities, shopping, watersports and relaxation and wellness. This response indicated an opportunity to develop new experiences and or potentially enhance current Carlsbad visitor options.

**Marketing**

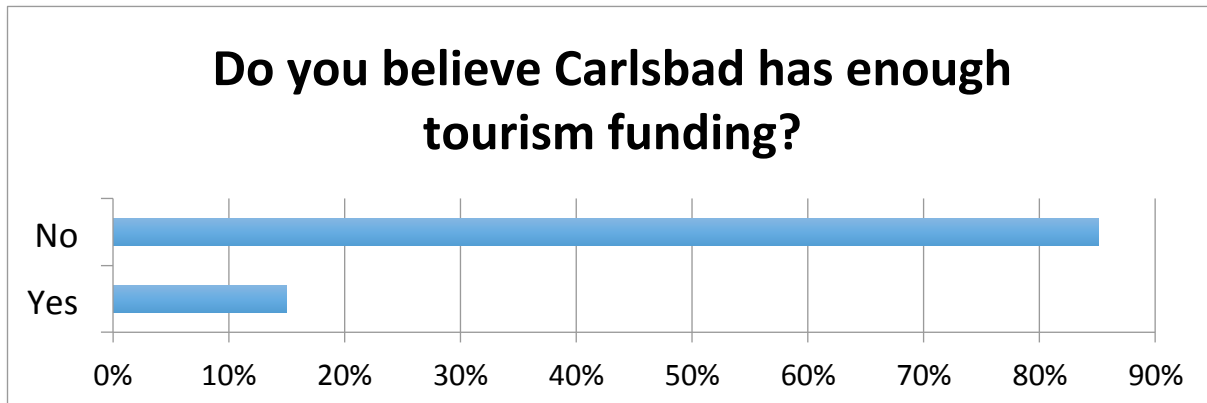

Carlsbad is currently utilizing digital media, social media and email marketing as the primary vehicles to promote the destination. Carlsbad’s tourism and hospitality stakeholders reiterated that choice and expressed a high level of support for digital media marketing and well as social media and public relations through editorial content. This effort is reinforced by the 2013 SDTA Visitor Profile Study, which states that 85% of those surveyed utilized the internet as their information source for travel to Carlsbad.

Over 80% of the stakeholders rated Digital Media as an important vehicle in future tourism marketing efforts.

### Funding

Stakeholders felt strongly that the level of funding for marketing Carlsbad as a destination is not enough to compete in the Southern California tourism marketplace. Currently Visit Carlsbad has a budget of \$755,500 for Fiscal Year 2015. Over 85% of the tourism industry in Carlsbad want to see more funding for marketing and of those, over 50% would support a new model for marketing financially if they could be involved in the process. This is a further indication of the strong level of stakeholders' desired engagement in planning for Visit Carlsbad's future. The additional message was the interest in a new plan as part of the support for more funding.

Almost 85% of the stakeholder respondents felt there was a need for more funding.

### Stakeholder Feedback Conclusions

Based on the tourism industry stakeholders' feedback in focus groups, phone calls and the survey, SAG has drawn the following conclusions:

1. Carlsbad's tourism stakeholders are engaged and have strong interest in planning for the destination's future.
2. Stakeholders have appreciated the regular communication and updates SAG has provided and would like to see ongoing effective communication continue.
3. Stakeholders believe Carlsbad is a true destination with valuable assets to promote.
4. Smart development and growth were important topics for stakeholders who felt there could potentially be too much hotel inventory in the market already.
5. Stakeholders felt the purpose of Visit Carlsbad should extend past broad awareness and move in the direction of measurable increased conversion.
6. Stakeholders want to see increased reporting from Visit Carlsbad on tracking marketing efforts through conversion.
7. Some stakeholders were concerned with the overall ability of all constituents to implement and execute a new plan.

Stakeholder participation in this study has demonstrated an interest in engagement in the future. There is an understanding that their participation in the implementation of a new direction is critical for its success.

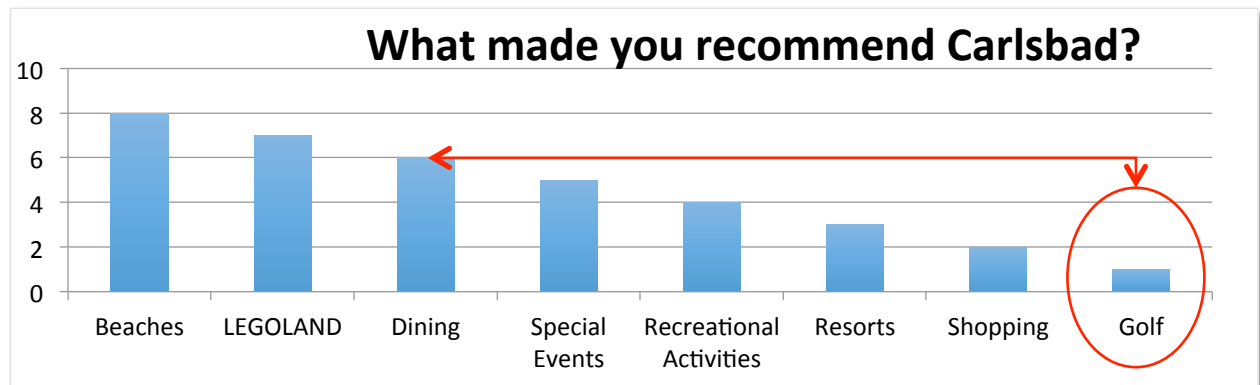

## Regional Industry Stakeholder Survey

SAG created a regional perception survey to better understand the broader business community's thoughts and perceptions of Carlsbad as a tourism destination within the greater Southern California area. The regional stakeholders gave valuable feedback on how the perception of Carlsbad currently is positioned and how that could be enhanced.

Regional stakeholders felt informed only 50% of the time about tourism events and activities going on within the destination. Most of these stakeholders are getting their information from email subscription updates and word of mouth as well as social media and informational City signage. This group also felt there could be more done to keep them informed through increased direct mail and increased use of social media.

Regional stakeholders also have a strong influence on groups who visit Carlsbad and over 80% of respondents had referred business to stay in Carlsbad. Regional stakeholders had positive things to say about Carlsbad and their referrals received strong positive feedback about their stays.

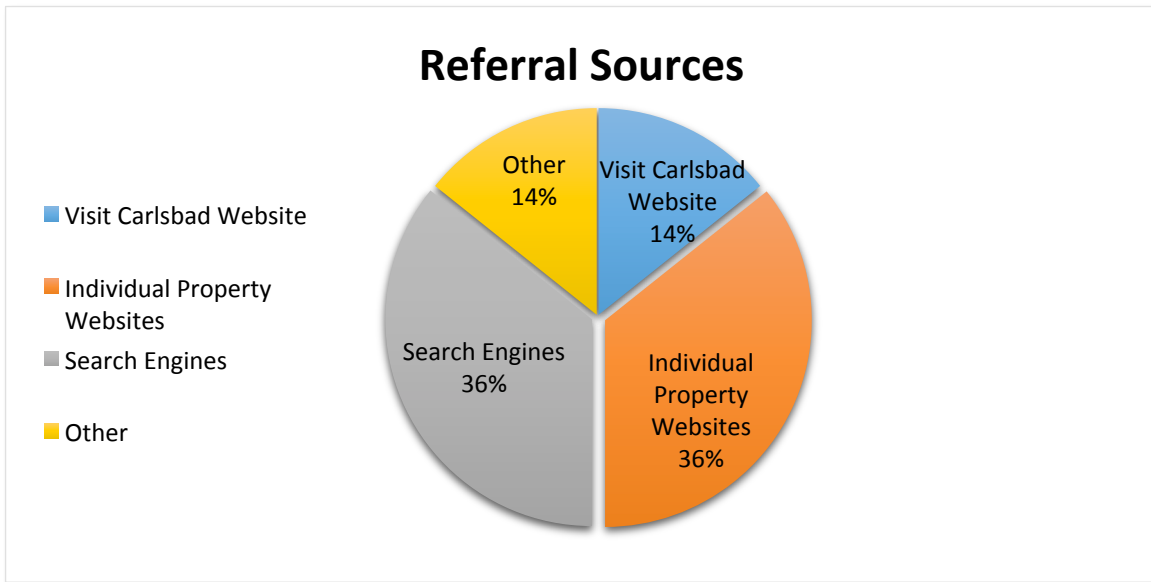

Regional stakeholders ranked Carlsbad's assets and attractions differently than the industry stakeholders, most notably golf fell from 3<sup>rd</sup> to 8<sup>th</sup>. This tells us that while Carlsbad has golf opportunities, there is enough competition in the market that it is not a top of mind attraction to recommend the destination as one of the top three primary strengths.

## Referral Platforms

Regional stakeholders also utilized multiple sources when looking into and/or booking hotel reservations for their groups. Most used individual property websites and third party search engines i.e. Kayak, Priceline, Expedia, etc. Only 14% used Visit Carlsbad’s website to get information. This was an indication of the variety of options available when making a hotel reservation and the potential to raise awareness of the Visit Carlsbad booking engine.

Regional stakeholders provided insight into how the destination could be enhanced through additional attractions and amenities. Themes from regional stakeholder feedback included dining and entertainment, recreation, wine and beer tours and sports tournaments. Additional comments included:

- “more music concerts”
- “upgrade the theatres for top entertainment”
- “easier access for food along the beach”
- “meeting space in one location for more than 1,500 people”

## Regional Stakeholder Feedback Conclusions:

The regional group surveyed perceived Carlsbad as a Southern California beach destination and is interested in continuing to refer business to the area. They are looking for ways to engage with their clients and improve Carlsbad’s visibility among its competition and provide an enhanced experience for their visitors. Regional stakeholders were also very interested in future development decisions and believe there is a way to work together for the future of Carlsbad as a destination.

## *Benchmarking*

SAG reviewed with stakeholders, City staff, CTBID, Visit Carlsbad staff, and others the competitive and comparable destinations to profile and study during this process. The goal was to use a sampling of destinations, which are competitors of Carlsbad and have similarities in their visitor experience.

SAG studied the following destinations for the Tourism Industry Study:

1. Newport Beach
2. Huntington Beach
3. Laguna Beach
4. Santa Monica
5. Santa Barbara
6. Monterey County
7. Del Mar
8. Coronado
9. Oceanside

SAG researched these destinations and gathered data on the DMO in the following criteria:

- Destination Property Mix
- Number of hotel rooms by type
- Annual average hotel occupancy rate and TOT Revenue
- Tourism marketing spending
- Return on Investment from tourism marketing spending
- Target markets and market segmentation
- Destination assets
- Funding
- Budgets

SAG's approach to gathering data included interviewing the respective DMO's, reviewing annual reports, Smith Travel Research reports and researching available data and reports.

On the following pages SAG has created the destination profiles of each competitive destination.

## Destination Profile: Newport Beach

### **Visit Newport Beach**

Visit Newport Beach is a DMO under contract by the City of Newport Beach. It is a membership-based organization operating within a Business Improvement District with 19 staff members and 23 board of directors representing hotels, restaurants, resorts, marketing & travel firms, entertainment, and fashion.

### **Annual DMO Revenue:**

FY 15: \$4,350,841\*

\*Projected

### **Annual Budget:**

FY 15: \$3,332,841

### **Budget : Rooms Ratio**

About \$1,388.10

### **TOT Annual Collection:**

\$16,400,000 - 2013

### **Budget Breakdown**

Not provided

### **Leisure Research**

- 79.2% of survey respondents who visited in last 2 years visited for leisure. Of those 52.3% came for vacation and 26.9% came to visit friends and family. 10.8% came for personal reasons and 7.7% came for business.
- The average survey respondent stayed 3.7 days and 3.2 nights in Newport Beach. Markets from a greater distance stay up to a week.
- During their ideal trip to Newport Beach, respondents would most likely stay in commercial lodging, such as a hotel (61.4%) or resort hotel (37.7%). 39.2 percent would stay overnight in a motel (23.9%) or inn (15.3%).

### **Funding Structure**

Visit Newport Beach is funded primarily by the city through Transient Occupancy Tax (TOT), as well as through a Tourism Business Improvement District (TBID) and private sector membership dues from the hospitality industry or other related businesses.

#### Funding Sources

- TOT – 10% (City collection rate)
- TBID – 2% assessment
- Membership dues

### **Visitor Services**

Includes a Visitor Center with visitor guides, maps, directions, and information on activities and attractions in Newport Beach.

### **Online Service**

Includes digital visitor guide, online maps, and a mobile app. There is also a booking engine for hotels, attractions, flights, and car services. Listings by multiple areas of interest, holidays, and regions. Custom group packages are available upon inquiry.

### **Target Audiences**

The demographic profile of Newport's domestic traveler:

- They primarily reside in state (75%)
- Affluent (49% have an annual household income of over 75K)
- Mature (56% are over 45 years old)
- Married (68%)
- White or Asian
- Over one in four of these travelers have children living at home (26%).

## Visit Newport Beach Group Sales Efforts

### Budget Overview

#### Forecasted Revenue:

\$3,057,283

#### Operating Expenses:

\$1,392,585

#### Advertising:

\$279,312

#### Conference/Group Sales:

\$1,366,800

#### Research:

\$18,586

### Strategy

- Recruit experienced sales manager with contacts in the region
- Work with TBID hotels to create equal opportunities to host events and showcase hotels
- Rolling out of new conference service “tier” structure, which differentiates the service level for each incoming group, which will actively engage each client at least 13 months before their group, arrives to Newport Beach.
- Develop advertising and promotional campaigns that are on brand and are integrated with the other marketing disciplines in order to encourage submission of RFPs and convert RFPs into confirmed bookings.

## Destination Profile: Huntington Beach

### Visit Huntington Beach

Visit Huntington Beach (Huntington Beach Marketing and Visitors Bureau) is a private, non-profit, non-membership, mutual benefit corporation. Visit Huntington Beach is composed of 19 Board of Directors representing, hotels, event planning, music, transportation and the Chamber of Commerce, in addition to 9 regular staff members. Huntington Beach's tagline "Surf City USA" has a strong focus on surfing, sports and an active lifestyle.

### Budget Overview

#### Annual DMO Revenue:

FY13: \$2,283,000

#### Annual Budget:

FY13: \$2,535,000

#### Budget : Rooms Ratio

About \$1,304

#### Annual TOT Collection

\$7,700,000 - 2013

### Budget Breakdown

Revenues	
Tourism Occupancy Tax	\$763,000
Hotel/Motel Business Improvement District	\$1,519,000
Website/Interest/Other	\$1,000
<b>TOTAL REVENUE</b>	<b>\$2,283,000</b>

Expenses	
Media Advertising	\$397,000
Printed Marketing Collateral	\$131,000
Collateral Distribution	\$36,000
Public Relations	\$246,000
Travel Trade	\$64,000
Website	\$141,000
Event Hosting	\$4,000
Local Partner/Community/Other	\$55,000
Familiarization Tours/Site Visits	\$28,000
Film & Sports Commissions	\$23,000
Trade Shows & Travel	\$140,000
Salaries & Benefits	\$994,000
Administration	\$276,000
<b>TOTAL EXPENSES</b>	<b>\$2,535,000</b>

### Funding Structure

The City of Huntington Beach funds the Marketing and visitors Bureau with 2% of Transient Occupancy Tax (TOT).

#### Funding Sources

- TOT – 10% (City collection rate)
- BID – 1% assessment

### Visitor Services

New welcome center at International Surfing Museum. The Visitor Information Kiosk is staffed by paid employees of Visit Huntington Beach and offers the following amenities:

- Huntington Beach Visitor Guides and Maps
- Huntington Beach Dining Guides
- Downtown Huntington Beach Historical Walking Tour
- City Beach Map
- Downtown Huntington Beach maps in French, German, Japanese and Spanish
- Huntington Beach monthly event calendars and upcoming event flyers
- Coupons for local businesses and attractions
- Transportation information
- Restaurant and shopping recommendations
- Southern California attraction information

### Online Services Include

- Surf Report, social media, blog, virtual tour, listings, visitors guide, newsletter, maps, booking engine for hotels, events, and packages, weather, and additional languages.

### Target Audiences

- Regional Targets: California affluent families with teenagers
- International marketing to UK, Ireland, Germany, Switzerland, Canada, Austria, Australia, and New Zealand.
- Staff attends domestic trade shows and events for support.

## Destination Profile: Laguna Beach

### Visit Laguna Beach

Visit Laguna Beach (VLB) is a private, non-profit, member/partner industry association. VLB has a partnership organization structure. Basic partnerships are complimentary for visitor-serving Laguna Beach businesses; however, there are also paid tiered partnership levels based on marketing goals and objectives.

Staffing includes 5 members and 9 Board of Directors representing private hotels, resorts, and hospitality services.

### Budget Overview

#### Annual DMO Revenue:

FY13: \$5,761,200

#### Annual Budget:

FY13: \$1,520,000

#### Budget: Rooms Ratio

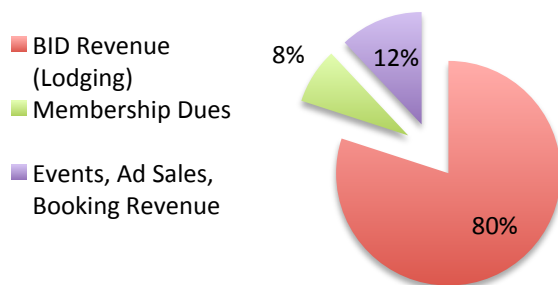

About \$1,169

#### Annual TOT Collection:

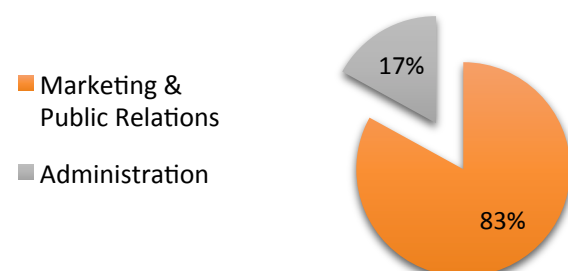

\$8,537,100 - 2013

### Budget Breakdown

#### 2013 Revenue Distribution

#### 2013 Expense Distribution

### Funding Structure

VLB receives its funding from the Business Improvement District (BID). The BID charges a 2% hotel tax and VLB receives half of that, or 1%. This makes up 80% of VLB revenue. *VLB does not receive TOT collected by the City.*

#### Funding Sources

- BID – 2% assessment

### Visitor Services

Includes Visitors center, mobile app, calendar of events, highlighted attractions, trip planner, blog and online booking engine provided by Travelocity for hotels, flights, and rentals.

California Welcome centers, John Wayne Airport, Disneyland Hotel, and car rental companies distribute VLB official visitors guides, dining guides, maps, and menu books.

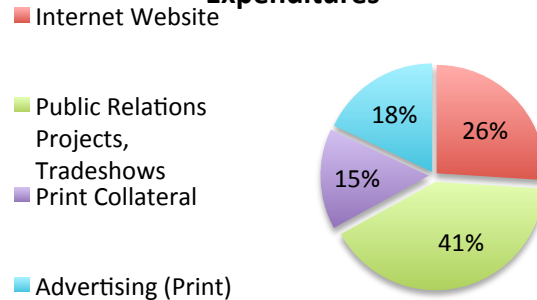

### TOT Revenue Growth

In FY 2011-12, transient occupancy tax revenue increased 11% compared to the year before and last year (FY 2012-13) it is expected to grow another 5.6%.

### Target Audiences

Almost all efforts are focus on Leisure Services. New partnership with Orange County Visitors Association to "reach the highly-affluent China market." Orange County offices in Beijing and Shanghai are now stocked with Laguna Beach information.

#### 2013 Advertising/Promotional Expenditures

## Destination Profile: Santa Monica

### ***Santa Monica Convention & Visitors Bureau***

The SMCVB is a private, non-profit, non-member corporation. There are 14 staff members and a various number of employees at 4 visitor centers. The Board of Directors is made of 11 professionals who represent hotels, restaurants, marketing & brokerage firms, and the City of Santa Monica.

### ***Budget Overview***

#### ***Annual DMO Revenue:***

Estimated \$5,600,000\*

*\*SMCVB did not provide the DMO revenue. Figure above is estimated based on 2012/2013 City budget data and approval of the SMTMD in 2012.*

#### ***Annual Budget:***

FY13: \$2,600,000

#### ***Budget: Rooms Ratio***

About \$696.12

#### ***Annual TOT Revenue:***

TOT: \$42,300,000

#### ***Budget Breakdown***

*Not provided*

#### ***Leisure Research***

- 7,298,857 visitors in 2013.
- Average length of stay: 1.56 days.
- Total annual visitor spending: \$1.63 Billion
  - 574 Million on shopping/gifts
  - 345 Million on lodging
  - 340 Million on meals
- Hotel tax revenue to city: \$42.3 Million
- Santa Monica jobs supported by tourism: 12,908

### ***Funding Structure***

The SMCVB is funded by TOT collected by the City and the Tourism Marketing District fund the SMCVB. Funding Sources

- TOT – 14% (City collection rate)
- BID – \$2 for rooms rented at \$100 - \$200  
– \$3 for rooms rented at \$200 - \$300  
– \$4 for rooms rented at \$300 - \$400

### ***Visitor Services***

Includes a Visitor Center with visitor guides, maps, directions, and information on activities and attractions in Santa Monica.

### ***Online Services***

Includes digital visitor guide, online maps, and e-newsletters. There is also a booking engine for hotels, attractions, flights, and car services.

### ***Visitor Profile 2013***

- 53% International
- 32% U.S. Resident (Non-California)
- 14% California Resident
- 64% Visit for Leisure
- Median Household Income: \$86,500
- Average daily visitor spending per person: \$143

### ***Marketing Efforts***

- \$2.6 million marketing budget
  - Focus on international travelers, who accounted for 63 percent of the \$1.53 billion spent by visitors to Santa Monica in 2012.
- Targets a specific type of traveler who is comfortable getting around by foot, bike or public transit and who is, in general, drawn to Santa Monica's healthy lifestyle.
- Primarily digital marketing efforts domestically.
- Hired full time reps in Australia, Brazil and England.

### Santa Monica Group Sales Efforts

#### Services Available:

- Personalized Meeting Planners
- Hotel Suggestions
- Group Dining Leads
- Team-building
- Event Planning
- Group volleyball tournaments, bike tours, etc.
- Request for publications

#### Strategy

- The SMCVB strongly focuses on Leisure Sales
- Most Group Sales are handled via inquiry over the phone or an online RFP

## Destination Profile: Santa Barbara

### *Visit Santa Barbara (VSB)*

VSB is governed by the Santa Barbara City Council, which is composed of a Mayor and six Council Members. VSB is membership-based. Members receive benefits such as website and publication promotion, referrals, access to VSB member networking events, newsletters, and access to national & local market research.

### *Budget Overview*

#### *Annual DMO Revenue:*

Figures not provided

#### *Annual Budget:*

Adopted FY14: \$4,000,000

#### *Budget: Rooms:*

\$153.38

#### *Annual TOT Revenue:*

\$16,821,995 – 2013

#### *Budget Breakdown*

Not provided

### *Funding Structure*

Visit Santa Barbara is funded through an annual contract with the City and through a BID.

#### Funding Sources

- TOT – 12% (City collection rate)
- BID – \$0.50 rooms rented at less than \$100  
– \$1 for rooms rented at \$100 - \$150  
– \$1.50 for rooms rented at \$150 - \$200  
– \$2 for rooms rented at \$200 or more

### *Visitor Services*

Includes a Visitor Center with visitor guides, maps, directions, various brochures, and travel listings.

### *Online Services*

Includes digital visitor guide, e-newsletters, a calendar of events, special offers, easy to success social media, referrals, and membership login. Booking engine for hotels, resorts, and campgrounds.

### *Visitor Profile*

About 2,000 collected surveys showed the below information:

- Female (58%)
- Caucasian (72%)
- Married (53%)
- Mid-life (avg. age 48 years).
- The average household income is \$119,428.
- The Los Angeles - Riverside - Orange County metropolitan statistical area (MSA) is by far the largest feeder market for tourism to the Santa Barbara South Coast (50% of all respondents),
- Followed by the San Francisco - Oakland - San Jose MSA (8%).
- 4 percent of visitors reside in the San Diego MSA.

## Destination Profile: Monterey County

### Monterey County Convention & Visitors Bureau

The Monterey County CVB is governed by a Board of Directors (30), an Executive Committee (5) and other committees to aid in sales and marketing initiatives for the destination. Membership includes businesses in the lodging, hospitality, entertainment and recreation industries.

### Budget Overview

#### Annual Revenue:

FY12-13: \$6,002,342

#### Annual Budget:

FY23-13: \$5,152,450

#### Budget: Rooms Ratio:

About \$429

#### Annual TOT Revenue:

\$40,000,000 – 2013

### Budget Breakdown

Monterey County CVB 2013-2014 Budget REVENUE	
<b>Jurisdiction Revenue</b>	
Monterey County	998,728
City of Monterey	992,179

### Monterey County Group Sales Efforts

#### Group Sales Info Points – Facilities

- Monterey hotel owners approved a plan to tax themselves to pay for the \$32M renovation of the Monterey Conference Center (MCC).
- MCC has 41K sq. ft. meeting space & can hold 1,700 guests.
- 28 Golf Courses
- Also hosts: 8K sq.ft. Sunset Center
- 32K sq.ft. Fair & Event Center
- 13K sq.ft. Salinas Sports Complex.

#### Group Sales Partnership Initiatives 2014

Monterey has always benefited from a high level of collaboration with community stakeholders. In the coming year collaboration will advance exponentially through:

- Introduction of the Monterey Room Night Index (RNI), an industry trend-setting measurement tool
- Involvement in sales program development, execution and evaluation from RNI participants
- Yielding Return on Experience (ROE) with the creation of the Strategic Client Services team which will utilize the power of extraordinary service as a competitive differentiator
- Focused development of partnerships with third party companies such as HelmsBriscoe and ConferenceDirect.

## Destination Profile: Del Mar

### *Del Mar Tourism Business Improvement District (TBID)*

The TBID is composed of 5 Board Members, all representing hotels. In the last two years the public and stakeholders in Del Mar have become frustrated and have demanded additional transparency in the organization. “Dream Del Mar” was recently created out of the TBID and launched a new website.

### *Budget Overview*

#### *Annual Revenue:*

Figure not provided

#### *Annual Budget:*

FY 13: \$ 185,000

#### *Budget: Rooms Ratio*

About \$678

#### *Annual TOT Revenue:*

\$1,934,020 - 2013

#### *Budget Breakdown*

Not provided

#### *Group Sales Efforts*

According to the website Dream Del Mar is focused on group meetings and events. They leverage the San Diego airport and ability to be in and out of the big city quickly

They promote six hotels with meeting space. Specifics of those properties are not listed on the organization’s website.

### *Structure*

Del Mar mandates a 1% assessment on overnight stays at lodging facilities within the district’s boundaries.

#### Funding Sources

- BID – 1% assessment

### *Organization Stats:*

Dream Del Mar recently launched marketing and branding campaign along with new tourism website in May 2013. Del Mar “Your California Dream” campaign launched in April 2013. City Council and stakeholders have been dissatisfied with reporting from the organization.

According to recent articles the City’s tourism efforts include the below:

- \$213,000 for efforts including marketing, web development, photography, direct mail and administrative costs.
- About \$30,000 is set aside for streetscape

## Destination Profile: Coronado

### *Coronado Tourism Improvement District (CTID)*

The CTID was established to fund, implement and measure strategies that promote Coronado as a year-round destination for visitors from across the bridge and across the country. Specifically, the CTID works to improve occupancy in Coronado hotels and as a by-product, the vitality of our community. Off-season growth is the primary focus of the Advisory Board.

### *Budget Overview*

#### *Annual Revenue:*

FY13: \$546,530

#### *Annual Budget:*

FY14: \$545,000

#### *Budget: Rooms Ratio*

About \$230

#### *Annual TOT Revenue:*

\$10,366,000 - 2013

### *Budget Breakdown*

Not provided in full

- \$196,674 national advertising budget

### *Funding Structure*

The CTID is funded by a .5% guest assessment at hotels with over ninety (90) rooms. No funding comes from the City of Coronado, local businesses, residents or the State of California. The CTID does not fundraise, pursue grants or accept donations. Funding Sources

- BID – 0.5% assessment

### *Visitor Services*

Includes:

- Visitor Center
- Digital Visitor Guide
- Online Map
- Mobile App.

### *Partnership*

The \$328,000 partnership with San Diego Tourism Authority in FY13 has resulted in:

- \$138,843 in added-value (bonus) media from precise negotiation
- 266 million impressions obtained from hosting press and media outreach
- 339,413 page views from media campaigns (first 9 months of partnership)

### *Target Audiences*

Leisure guests typically between 25-54 in age

- Average household income of \$110,000 or more
- Residing in LA, Orange County, Phoenix and San Diego
- Mostly available to visit Coronado outside of summer
- Guests with an appreciation for resort accommodations

## Destination Profile: Oceanside

### Visit Oceanside

Visit Oceanside is a membership-based destination marketing organization. Staffing includes 4 Members on the Executive Committee representing major hotels. Board of Directors represent LEGOLAND, resorts, restaurants, and the City of Oceanside. There are also 7 Community Liaisons.

### Budget Overview

**Annual Revenue:**  
FY12-13: \$691,800

**Annual Budget:**  
FY12-13: \$691,800

**Budget: Rooms Ratio**  
About \$370

**Annual TOT Revenue:**  
\$4,100,000 – 2012

**Budget Breakdown**  
Percentages provided in chart below

### Funding Structure

Visit Oceanside is primarily funded through the Oceanside Tourism Marketing District and through annual membership fees from \$330-\$5,000. Visit Oceanside does not receive any of the TOT collected by the City.

#### Funding Sources

- BID – 1.5% assessment
- Membership dues

### Visitor Services

California Welcome Center in Oceanside. State, regional, and local info available. Hotel reservations and discounts available.

### Online Services

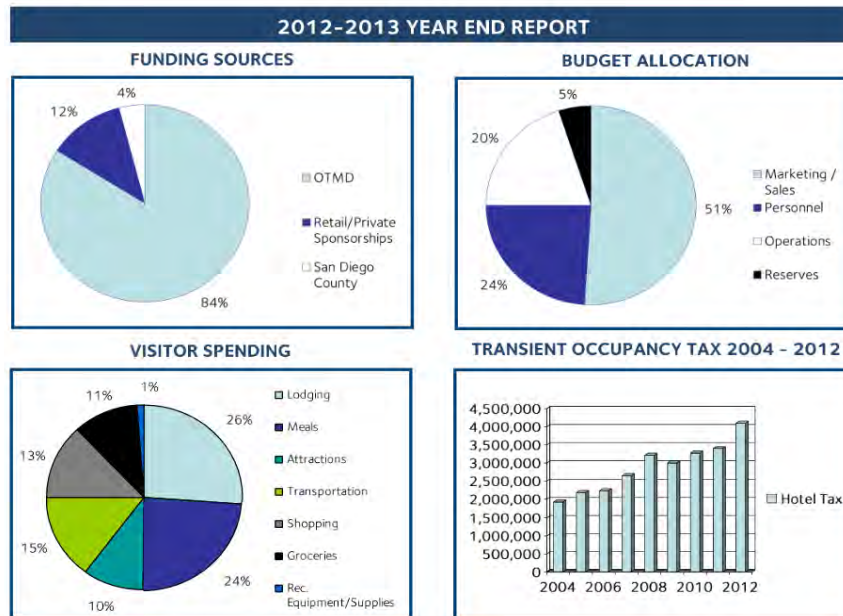

Includes blog, social media, visitors guide, calendar, and booking engine for lodging.

### Target Audiences

- 6k+ citywide event nights generated last FY
- 200k expenses in ad campaigns and 60k in public relations FY13

### Group Business Highlights

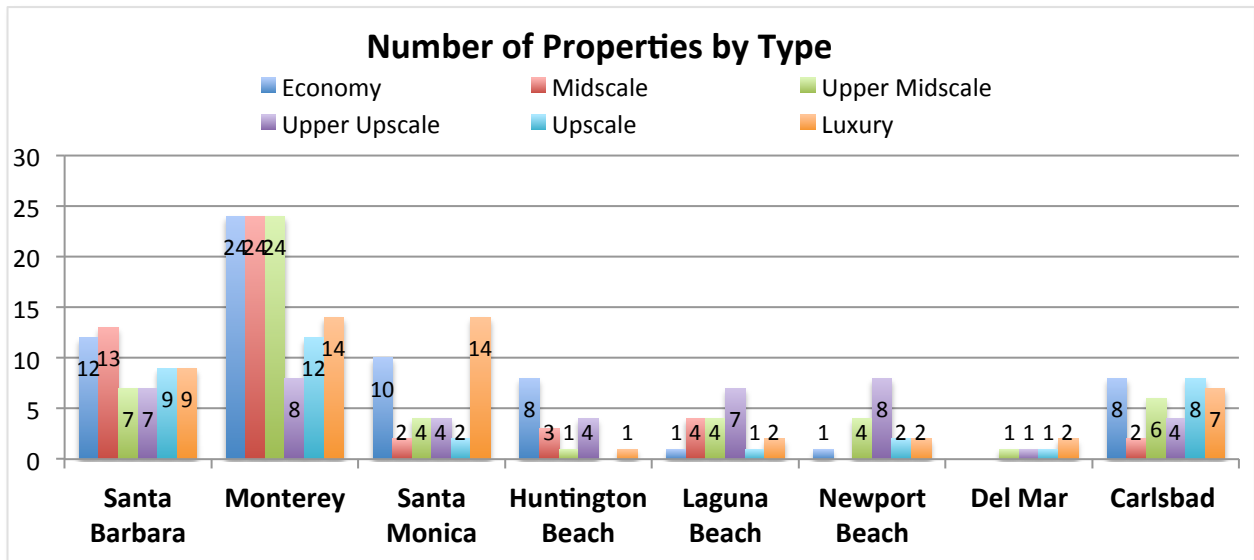

- Group Leads: 39
- Meeting & Event Leads: 17
- Groups Booked: 10
- Room Nights Generated (groups): 3,318
- Room Nights Generated (citywide events): 6,500

## Benchmarking Results

After compiling all of the data in the profiles above, SAG compared all the information gathered to Visit Carlsbad. Below are charted examples of how Carlsbad compares to the competitive destinations studied. \*Please note not all destinations provided information for each question and the charts below reflect the available data.

Of the comparable destinations, Carlsbad is a medium sized destination with 30+ properties in the market. Comparing the hotel properties that report to STR, Carlsbad is the fourth largest destination behind Monterey County, Santa Barbara and Santa Monica, respectively.

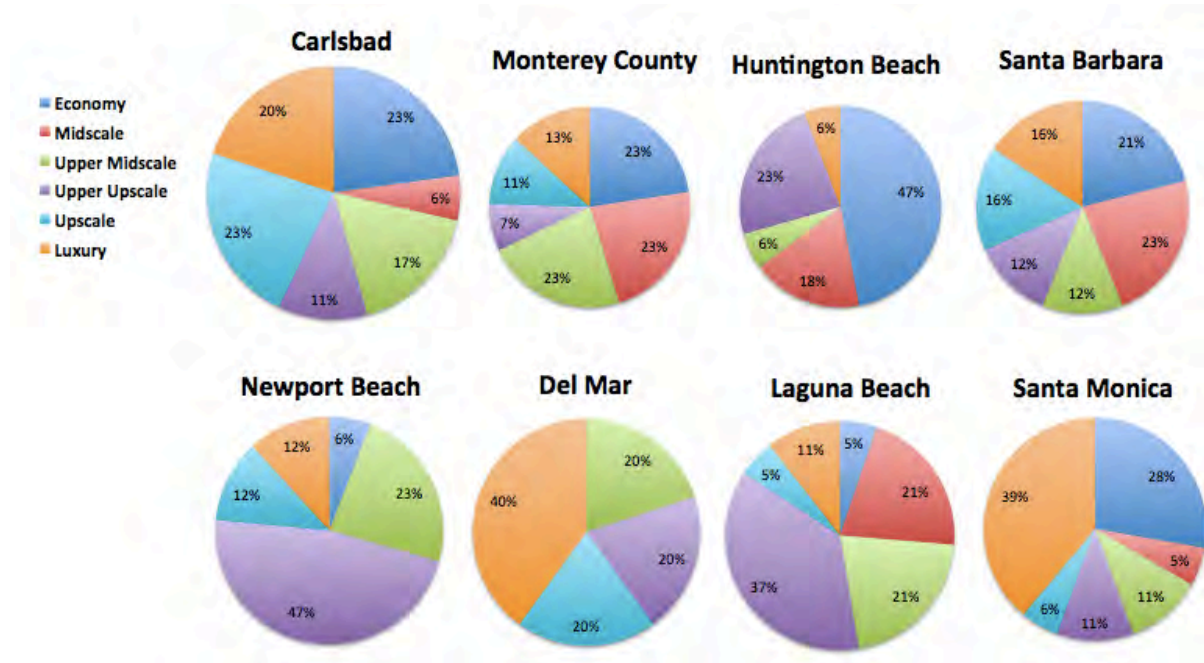

### Class Definitions according to STR:

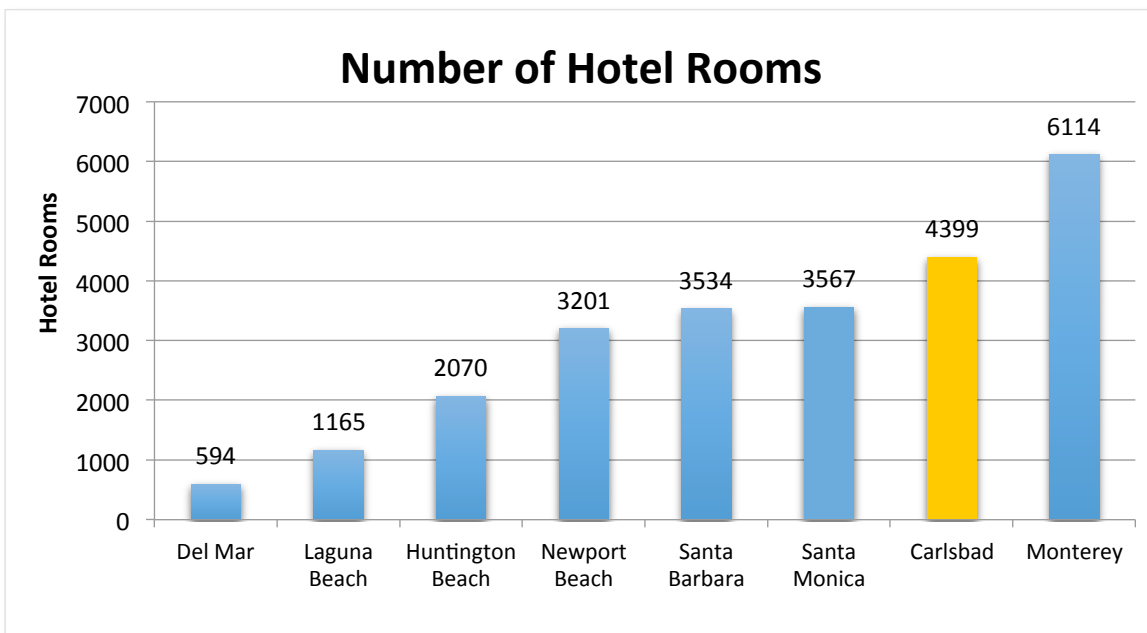

Market Class —Hotel classes are scaled through a method by which branded hotels are grouped based on the actual average room rates. Independent hotels are assigned a class based on the ADR, relative to that of the chain-affiliated hotels in its geographic proximity. The chain scale segments are:

- Luxury – example Ritz Carlton
- Upper Upscale – example Hilton
- Upscale – example Hyatt Place
- Upper Midscale – example Clarion
- Midscale – example La Quinta
- Economy – example Days Inn

SAG also found that more than half of Carlsbad’s properties are in the Upscale, Upper Upscale, and Luxury classification. This also indicated Carlsbad’s inventory is the third largest in the upscale market of destinations studied. The breadth of property types in Carlsbad creates an opportunity to confirm that the future marketing efforts are focused on a spectrum of market segments.

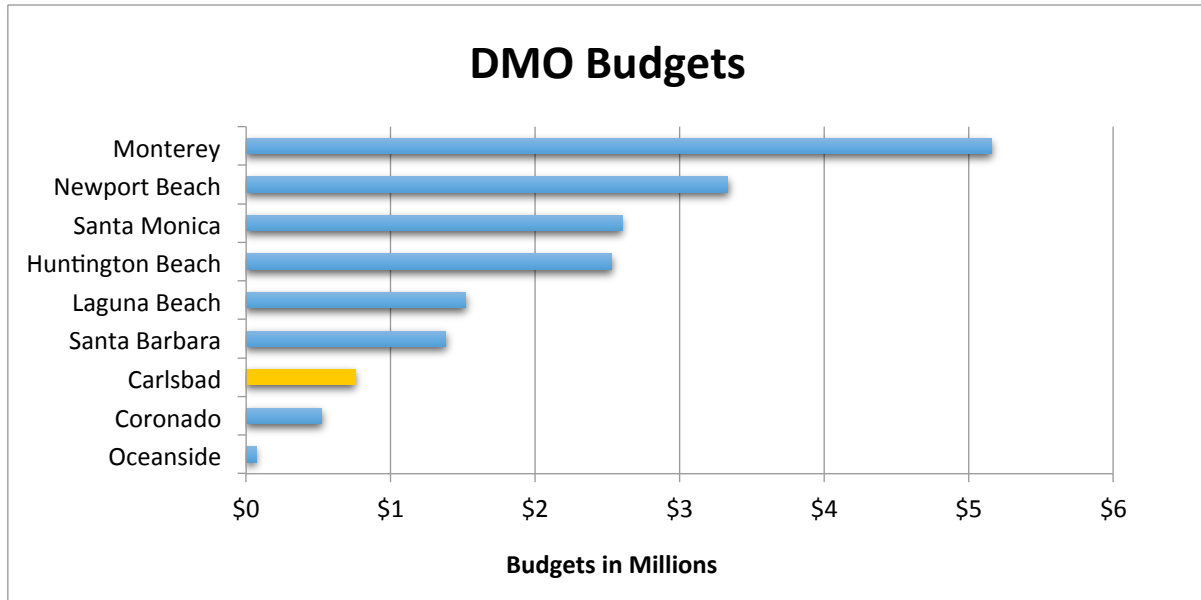

In looking at destinations as a whole, SAG found that Carlsbad has more hotel rooms than most comparable and competitive destinations. Currently, Carlsbad has 4,057 rooms in the market with 3,994 of properties that report to STR. In the next year, Carlsbad will have three new hotels in the market bringing the total to 4,399 rooms in the City. This number makes it the second largest destination in terms of hotel rooms in the competitive set.

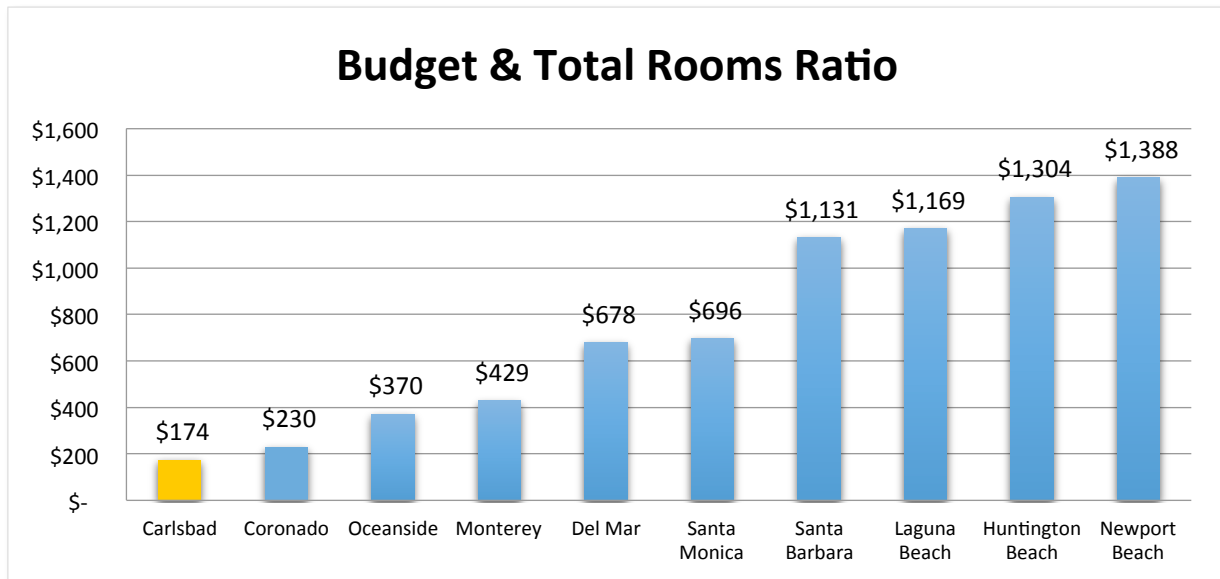

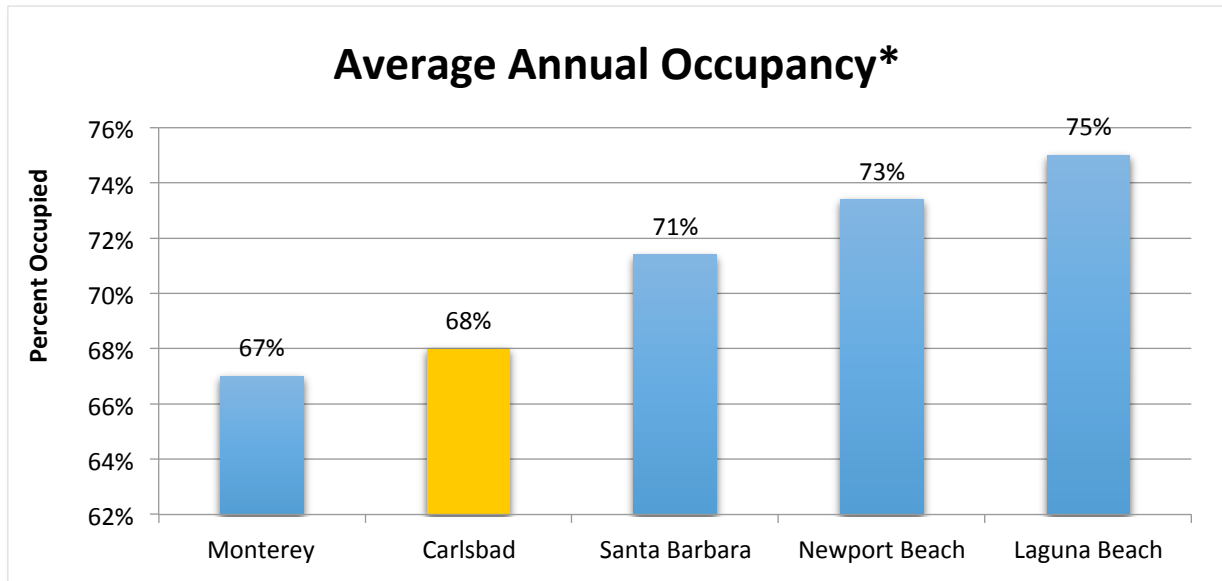

Budgets and funding are critical components for Destination Management Organizations (DMO)s to make an impactful difference in marketing the destination. While the size and scale of the operation and destination all vary and impact the budget number, SAG decided to look at the budgets side by side. While this is not an apples to apples comparison, it does begin to exhibit, based on the charts above, how under-funded Visit Carlsbad is as a marketing organization. Carlsbad has the third smallest DMO budget of the destinations studied.

In order to make a true comparison between budgets and levels of funding, SAG studied those budgets by contrasting how many hotel rooms are in each respective destination. This analysis provides insight to how the level of funding is allocated per room. In this regard, Carlsbad is spending the least amount per hotel room at \$174 per room.

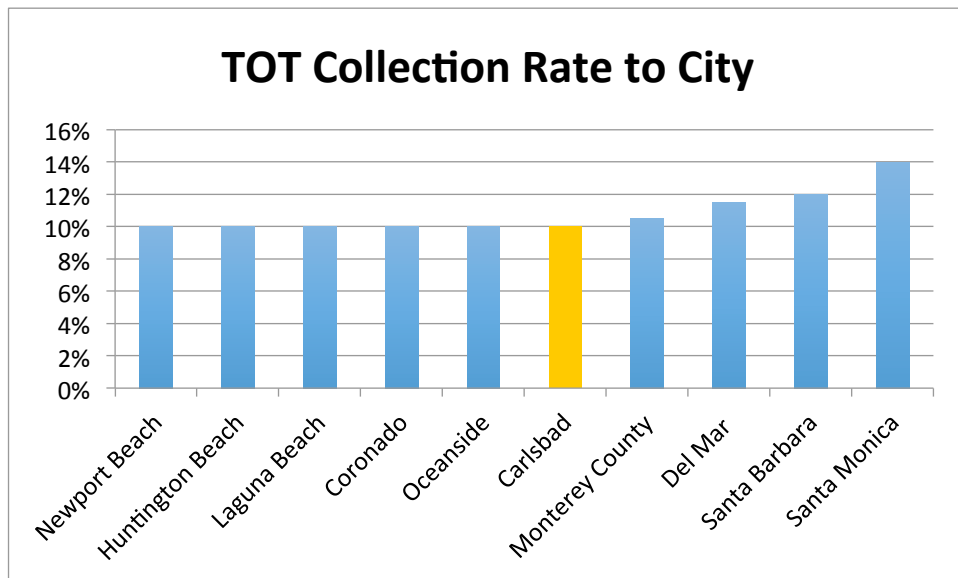

As noted above, Carlsbad has the second largest inventory of hotel rooms of the destination locations studied. In comparing occupancy of competitive destinations, Carlsbad has the second lowest average annual occupancy rate at 68% compared to Laguna Beach, which is highest at 75% annually.

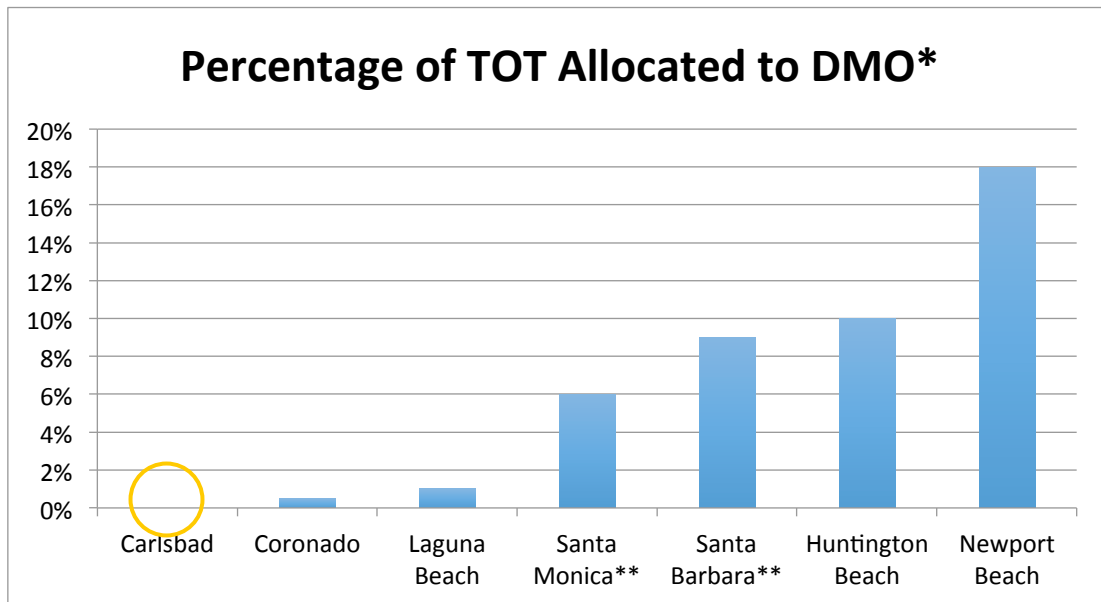

\*Not all cities in the original research set were able to provide Average Annual Occupancy.

A key component of DMO revenue and sustainable funding is the Transient Occupancy Tax (TOT) leveraged on hotel room nights. This TOT is handled differently in each destination.

The first chart below illustrates the rate by which the City/County collects TOT per transient room.

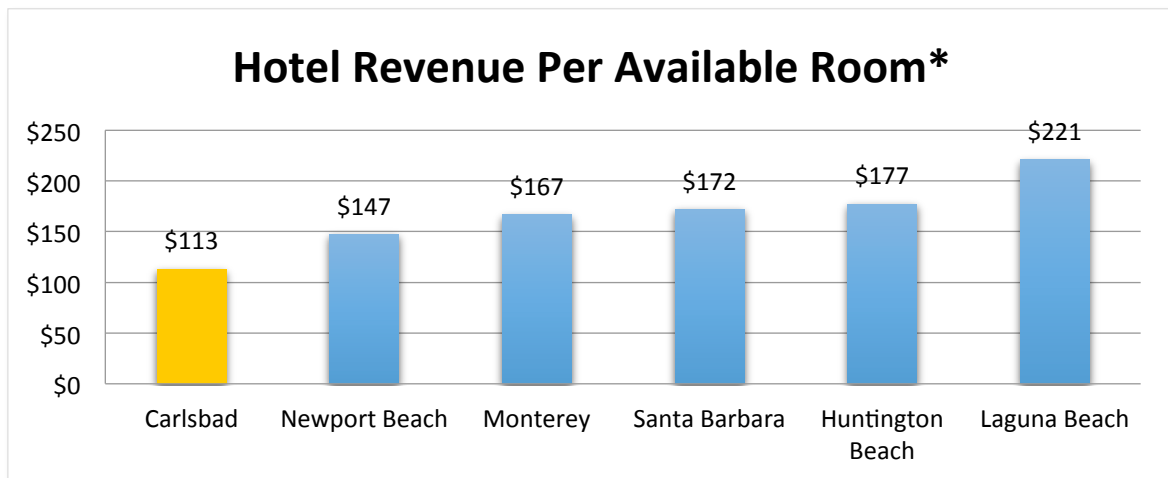

The second chart below illustrates the level of support from the same TOT that the City/County is allocating back to the DMO. Competitive destinations receive between .5%-18% of the TOT collected by the City. Visit Carlsbad does not receive any TOT funding.

\*TOT percentage varies annually. Figure above represents 2013 adopted budget percentage.

\*\*Not all cities in the original research set were able to provide this data

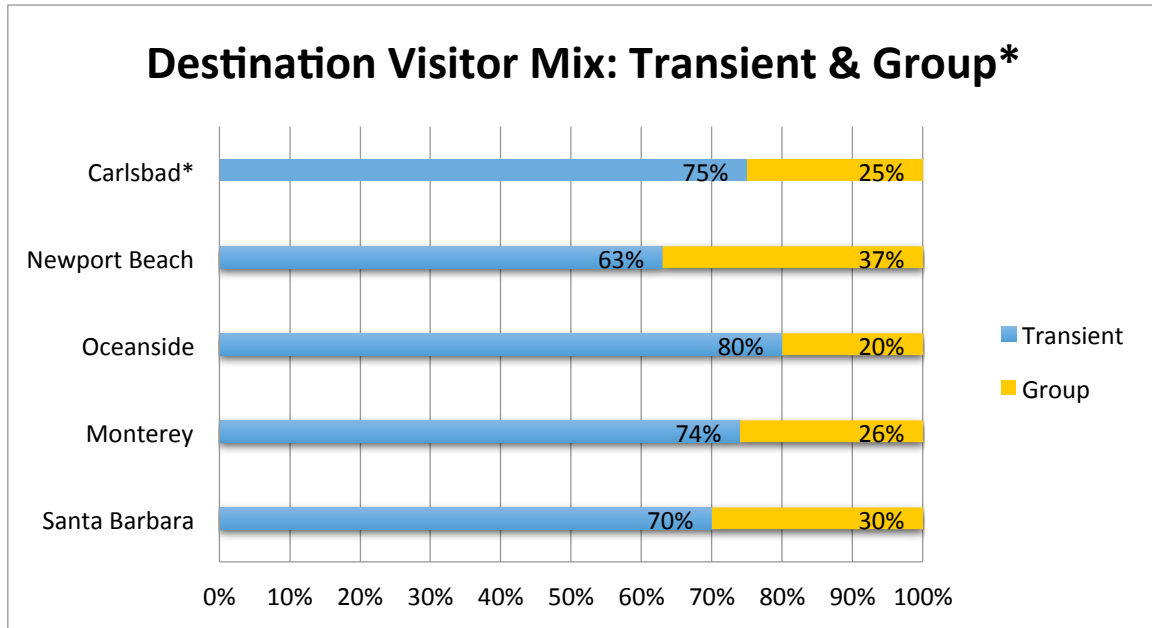

SAG also studied hotel Revenue per Available Room (RevPAR) to create another comparison and measure how Carlsbad is doing based on those in the comparable set. Carlsbad averages \$113 in RevPAR compared to its competitors who average close to \$160 or better year round. The gap in comparable RevPAR is an indicator of the potential to increase overall visitors as well as the hotel rates through targeted marketing designed to increase demand in the shoulder periods. If Carlsbad was to achieve the average RevPar for the competitive set (\$166) that would represent a 47% increase or over \$8 million in increased TOT. SAG has laid out goals for growth in the funding section of this report.

\*Source DMO provided data

\*\*Not all cities in the original research set were able to provide hotel RevPAR.

SAG reviewed destinations by their current business mix of transient and group segments. Of the destinations studied, the largest destination group mix by percentage was Newport Beach at 63% transient and 37% group and the smallest was Oceanside at 80-20% respectively. Carlsbad fell in line with the majority of the competition at 75% transient and 25% group. However, it is important to note that these numbers are not currently tracked by Visit Carlsbad. The Carlsbad number was determined based on Visit Carlsbad and hotel industry feedback.

\*Carlsbad’s numbers are estimated based on monthly data provided by Visit Carlsbad.

### Conclusion – Benchmarking

Carlsbad is situated in a very competitive market. All of the destinations studied are comparable and competitive because they are coastal, California beach destinations, mostly suburban and within a 2-3 hours drive of a major California city. All of the destinations studied have a significant share of the California tourism market and are becoming increasingly popular. Carlsbad competes directly with these cities and is positioned to improve its share of the tourism market based on the benchmarking research completed.

The destinations studied all experience a similar seasonal swing between the summer and non-summer months. The destinations respective marketing organizations are all thinking critically about how to improve return, reach more visitors and connect with new target markets. SAG compared destinations on key areas and points of comparison for Visit Carlsbad and believes that Carlsbad has an opportunity to improve its position in the market.

Overall, Carlsbad is a medium-sized destination with a year-round population of about 110,000 within 40 square miles of the City. The City’s tourism assets include the 7 miles of coastline, which welcomes over 2 million visitors each year. Of the competitive destinations, Carlsbad is one of the largest in terms

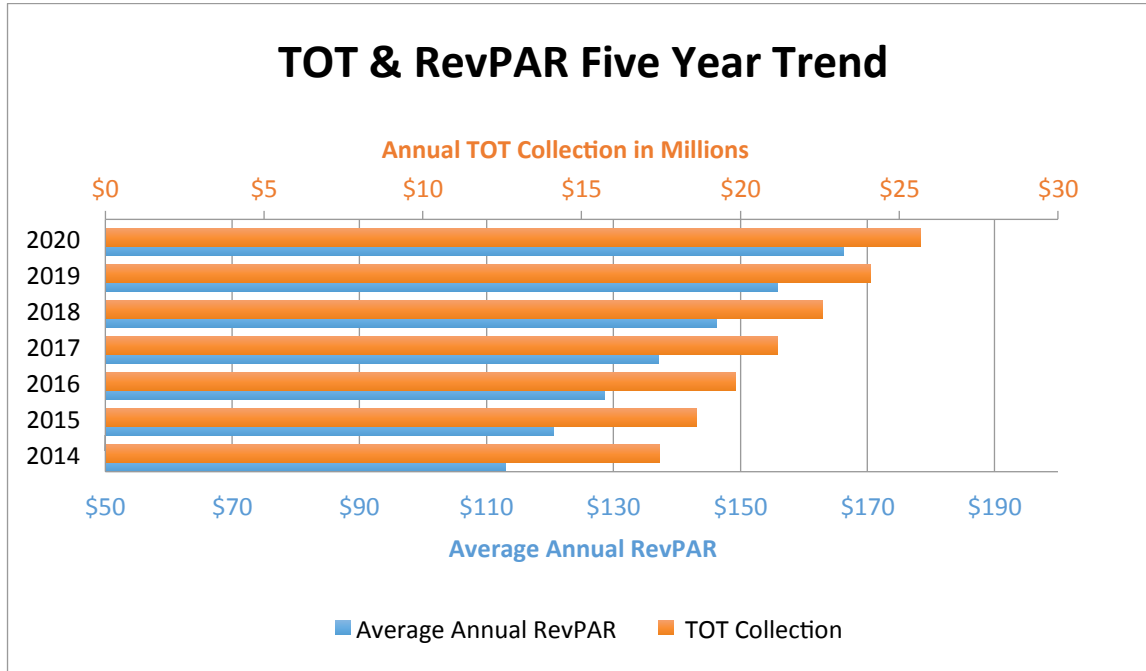

of year-round population and square miles. The competing cities were typically between 10-20 square miles and had a smaller year-round population. In the competing destinations' DMO websites, a reoccurring theme of community was expressed, as the marketing organization believes these residents are important aspects of why tourists repeatedly visit these destinations. With a smaller community, this is more manageable, however, SAG found that the connection to the community above and beyond the stakeholders was important to the competition.

Of the competitive destinations studied, Carlsbad is the third lowest DMO in terms of overall funding. Carlsbad is also the destination with the second highest number of hotel rooms at 4,392 (including the three new properties coming into the market). The only destination with more hotel rooms is Monterey County, with over 6,000 rooms and includes over eight contributing municipalities. These statistics were important in comparing the level of funding for each hotel room. In making a clear comparison, SAG created ratios for the total budget of each destination and the number of hotel rooms in each respective destination. This comparison shows that Carlsbad has the second lowest expenditure per hotel room at \$174. The highest expenditure per room is \$1,388 and the average among 10 competitors is \$659 per room. The differences in levels of funding reveals that not only do the competing destinations have a higher level of funding, but are drastically outspending Carlsbad on a per room basis.

A second key result from the benchmarking study is average annual occupancy. Carlsbad is currently averaging 68% percent occupied annually. Of five destinations, the annual average ranges from 67% to 75% occupied. Carlsbad is the second lowest above Monterey County. The highest average was 75% in Laguna Beach.

SAG also compared the Revenue Per Available Room (RevPAR) for these competitive destinations. Carlsbad's average RevPAR is \$113 and is the lowest of six competitive destinations. The average RevPAR among six destinations is \$166 and the highest RevPAR is \$221 in Laguna Beach. Carlsbad has a healthy mix of property types, however, as stated above it has more hotel rooms than much of the competition. This level of availability makes it important to create and cultivate demand from the market in order for the destination to see an increase in occupancy and RevPAR.

Two consistent differences in the structure of the competitive destinations versus Visit Carlsbad are both the way they are funded and the way they are governed. All of the competitive destinations receive a percentage of the TOT revenue to be funneled back into marketing the destination. The TOT funding in competitive destinations shows strong support for the organizations on behalf of the respective cities and allows the DMOs to compete on a higher level. The competitive destinations also have more than one source of funding. The other sources include assessments, business improvement districts, private revenue, event sales and membership dues. As shown in the above hotel RevPAR chart, Carlsbad's average annual RevPAR is \$113 compared to the average of \$166 across the competitive destinations. Carlsbad could attain the average annual RevPAR number over time with the recommended changes in the targeted marketing efforts addressed in the following sections. If Carlsbad set a target of reaching \$166 for the average annual RevPAR over 5 years (an increase of \$53 and 47%) it would increase the TOT collection to the City significantly. A 47% increase in TOT would be an additional \$8.4 million to the City, increasing the total TOT to \$26.4 million. The below chart illustrates the increases in both TOT (shown in orange) and the average annual RevPAR (shown in blue) over 5 years with a target of incrementally increasing both respectively by 6.6 percent annually.

If Carlsbad were to attain the average RevPAR of \$166, the TOT collection shown above supplies an additional \$8 million dollars to the City of Carlsbad. SAG believes this is attainable with the recommended shifts in targeted marketing and new market segments over the next five years. With these shifts the City of Carlsbad will see increased TOT collection, which could support new funding mechanisms for Visit Carlsbad and tourism product development.

In addition to being funded differently, many of the organizations are overseen by one board. In the event that there was additional funding from a BID or TID, the DMO did not report to that board and the budgeting was approved by the DMO board. In theory, this is similar to the Visit Carlsbad organization, however, SAG has found redundancies in the work done by the CTBID board and the Visit Carlsbad board. The most effective organizations have strong oversight by one streamlined process of governance. This is addressed later in the governance section of this report.

After completing in-depth research on these competitive destinations, SAG believes there is a strong opportunity for Carlsbad to grow in many categories and see a higher return for all stakeholders.

## Lifestyle Segmentation Analysis

SAG partnered with Nielsen to conduct a Lifestyle Segmentation Analysis also known as a PRIZM analysis on recent Carlsbad hotel visitor data. Lifestyle Segmentation allows SAG to review the types of visitors who have recently stayed in Carlsbad. The data is run through Nielsen's consumer profile database and is broken down to understand consumer behaviors, income levels, travel habits and more. The insights gathered from this segmented data allowed SAG to understand the types of people who have visited and where they are coming from. This will inform future efforts and which segments will create the highest return for Carlsbad.

*The Lifestyle Segmentation Analysis is broken out into 66 segments which are numbered according to socioeconomic rank (which takes into account characteristics such as income, education, occupation and home value) and are grouped into 11 Lifestage Groups and 14 Social Groups.*

SAG collected hotel data from seven individual hotel properties and the Visit Carlsbad ARES booking engine, which included results from 25 properties. SAG would like to thank the Pelican Cove Inn, Carlsbad by the Sea Resort and the Grand Pacific Resorts properties for submitting data for this analysis. SAG collected over 50,000 anonymous hotel records sorted by property, address, zip code, date of stay and lead source. These categories were key to understanding what segments come to Carlsbad, when they come, and where they live. This data allows SAG to geocode and map potential segments, which are target markets for Carlsbad's future growth.

Visit Carlsbad is currently targeting its marketing effort to a specific segment of families with children 12 and under with a household income of around \$87,000. Utilizing the Lifestyle Segmentation Analysis, SAG was able to validate when these families are coming to Carlsbad and explore new opportunities.

It is important to note that this Lifestyle Segmentation Analysis did not include hotel records from the most family oriented hotel, LEGOLAND Resort. Also, Sheraton, Hilton properties, Omni and the Park Hyatt were unable to provide detailed hotel records. While the reporting would have been enhanced with data from these properties, SAG believes that the data gathered provided key insight because these properties are less family dominant, especially in the summer months. SAG also recommends that a lifestyle analysis be conducted on a biannual basis. This will create an opportunity for more participation in the future. The hotels that have participated will receive an individual report with their specific market segment breakdown. The following is a breakdown of the top market segments based on current visitation to Carlsbad. The names of each segment are provided by Neilson.

### Top Carlsbad Segments

#### *Families*

SAG believes that the strongest segment of Carlsbad's visitor during the summer season is families with children, which is supported by the zip code data LEGOLAND was able to provide from LEGOLAND Resort. Family travel in Carlsbad is strong and SAG is confident that this market is returning each summer to enjoy the attractions and amenities of the destination. The following are descriptions of the

family segments that currently visit Carlsbad in the summer months. Please note that each segment that is listed is attached to a broader social and lifestage group. The detailed descriptions of these can be found in the appendix of this report.

### Upward Bound

#### Upscale Middle Age with Children

More than any other segment, Upward Bound appears to be the home of those legendary Soccer Moms and Dads. In these small satellite cities, upscale families boast dual incomes, college degrees, and new split levels and colonials. Residents of Upward Bound tend to be kid obsessed, with heavy purchases of computers, action figures, dolls, board games bicycles and camping equipment.

**Social Group:** 08 – Second City Society

**Lifestage Group:** 05 – Young Accumulators

#### Demographic Traits

- Urbanicity: Second City
- Income: Upscale - Median HH Income \$86,901
- Income Producing Assets: High
- Age Range: 35-54
- Presence of Kids: Household with Kids
- Homeownership: Mostly Owners
- Employment Levels: Management
- Education Levels: College Graduate
- Ethnic Diversity: White, Asian, Hispanic, Mix

#### Lifestyle & Media Traits

- Order from zappos.com
- Vacation at national parks
- Read *Outside*
- Watch America’s Funniest Home Videos
- Drive Mazda SUV

### Kids & Cul-de-sacs

#### Upper Mid Younger with Children

Upper-middle-class, suburban, married couples with children – that’s the skinny on Kids & Cul-de-sacs, an enviable lifestyle of large families in recently built subdivisions. With a high rate of Hispanic and Asian Americans, this segment is a refuge for college-educated, white-collar professionals with administrative jobs and upper-middle-class incomes. Their nexus of education, affluence and children translates to large outlays for child-centered products and services.

**Social Group:** 05 – The Affluentials

**Lifestage Group:** 05 – Young Accumulators

#### Demographic Traits

- Urbanicity: Suburban
- Income: Upper Mid – Median HH Income \$71,830
- Income Producing Assets: Above Average
- Age Range: 25-44
- Presence of Kids: Household with Kids
- Homeownership: Mostly Owners
- Employment Levels: Professional
- Education Level: College Graduate
- Ethnic Diversity: White, Black, Asian, Hispanic, Mix

#### Lifestyle & Media Traits

- Order from target.com
- Play fantasy sports
- Read *Parents Magazine*
- Watch X Games
- Drive Honda Odyssey

**Non-Family Segments**

SAG reviewed the highest indexing segments for both summer and Shoulder Seasons that were not families and not part of the current target market in order to determine viable opportunities for new targets. The data received on visitors who were already coming to Carlsbad is insightful as to who these visitors are and what aspects of their lives might fit Carlsbad in the future. The top non-family segments were a high percentage of the visitors during the shoulder periods. Below are the top non-family segments:

Upper Crust

**Upper Crust**

**Wealthy Older without Children**

The nation's most exclusive address, Upper Crust is the wealthiest lifestyle in America—a haven for empty-nesting couples over the age of 55. No segment has a higher concentration of residents earning over \$100,000 a year and possessing a postgraduate degree. And none has a more opulent standard of living.

**Social Group:** 04 – Elite Suburbs

**Lifestage Group:** 08 – Affluent Empty Nests

**Demographic Traits**

- Urbanicity: Suburban
- Income: Wealthy– Median HH Income \$110,117
- Income Producing Assets: Millionaires
- Age Range: 55+
- Presence of Kids: Household without Kids
- Homeownership: Home Owners
- Employment Levels: Professional
- Education Level: Graduate Plus
- Ethnic Diversity: White, Asian, Mix

**Lifestyle & Media Traits**

- Shop at Saks Fifth Avenue
- Vacation in Europe
- Read The Atlantic
- Watch Golf Channel
- Drive Lexus LS

*The Upper Crust segment visits Carlsbad in both the Summer Season and the Shoulder Season of September to March. This segment was 20% of the Shoulder Season visitor compared to only 13% of those visiting in the Summer Season. This data shows that Carlsbad should be targeting non-family households over 55 years in age that are living in wealthy suburban areas. This empty nest segment enjoys recreational activities including golf and sightseeing. This segment has disposable income for high end shopping, fine dining and most importantly regular travel.*

## Movers &amp; Shakers

## Movers &amp; Shakers

**Wealthy Older without Children**

Movers & Shakers is home to America's up-and-coming business class: a wealthy suburban world of dual-income couples who are highly educated, typically between the ages of 45 and 64, and without children. Given its high percentage of executives and white-collar professionals, there's a decided business bent to this segment: members of Movers & Shakers rank near the top for owning a small business and having a home office.

**Social Group:** 04 – Elite Suburbs

**Lifestage Group:** 01 – Midlife Success

**Demographic Traits**

- Urbanicity: Suburban
- Income: Wealthy– Median HH Income \$101,517
- Income Producing Assets: Elite
- Age Range: 45-64
- Presence of Kids: Household without Kids
- Homeownership: Mostly Owners
- Employment Levels: Management
- Education Level: Graduate Plus
- Ethnic Diversity: White, Asian, Mix

**Lifestyle & Media Traits**

- Shop at Nordstrom
- Play tennis
- Read Yoga Journal
- Watch NHL Games
- Drive Land Rover

*The Movers & Shakers segment was prevalent in both the Summer Season and the Shoulder Season of September through March. The Movers & Shakers segment showed a strong presence in the Summer Season with 19% of the visitor mix compared to 3% in the Shoulder Season. This segment as described above is a wealthy, highly educated couple, without children. This segment is active, healthy and interested in recreational activities. This segment is also likely to have a high level disposable income because they are childless. The presence of this segment in the summer months also indicates an appreciation for quick getaways in a clean, safe, active destination like Carlsbad.*

## The Cosmopolitans

### The Cosmopolitans

#### Upper Mid Older Mostly without Children

Educated, upper-midscale, and ethnically diverse, The Cosmopolitans are urbane couples in America's fast-growing cities. Concentrated in a handful of metros--such as Las Vegas, Miami, and Albuquerque--these households feature older, empty-nesting homeowners. A vibrant social scene surrounds their older homes and apartments, and residents love the nightlife and enjoy leisure-intensive lifestyles.

**Social Group:** 01 – Urban Uptown

**Lifestage Group:** 09 – Conservative Classics

#### Demographic Traits

- Urbanicity: Urban
- Income: Upper Mid– Median HH Income \$58,313
- Income Producing Assets: High
- Age Range: 55+
- Presence of Kids: Mostly without Kids
- Homeownership: Home Owners
- Employment Levels: White Collar, Mix
- Education Level: Graduate Plus
- Ethnic Diversity: White, Black, Asian, Hispanic Mix

#### Lifestyle & Media Traits

- Shop at Macy's
- Vacation abroad
- Read Audubon Magazine
- Watch Masterpiece
- Drive Lincoln Town Car Flex Fuel

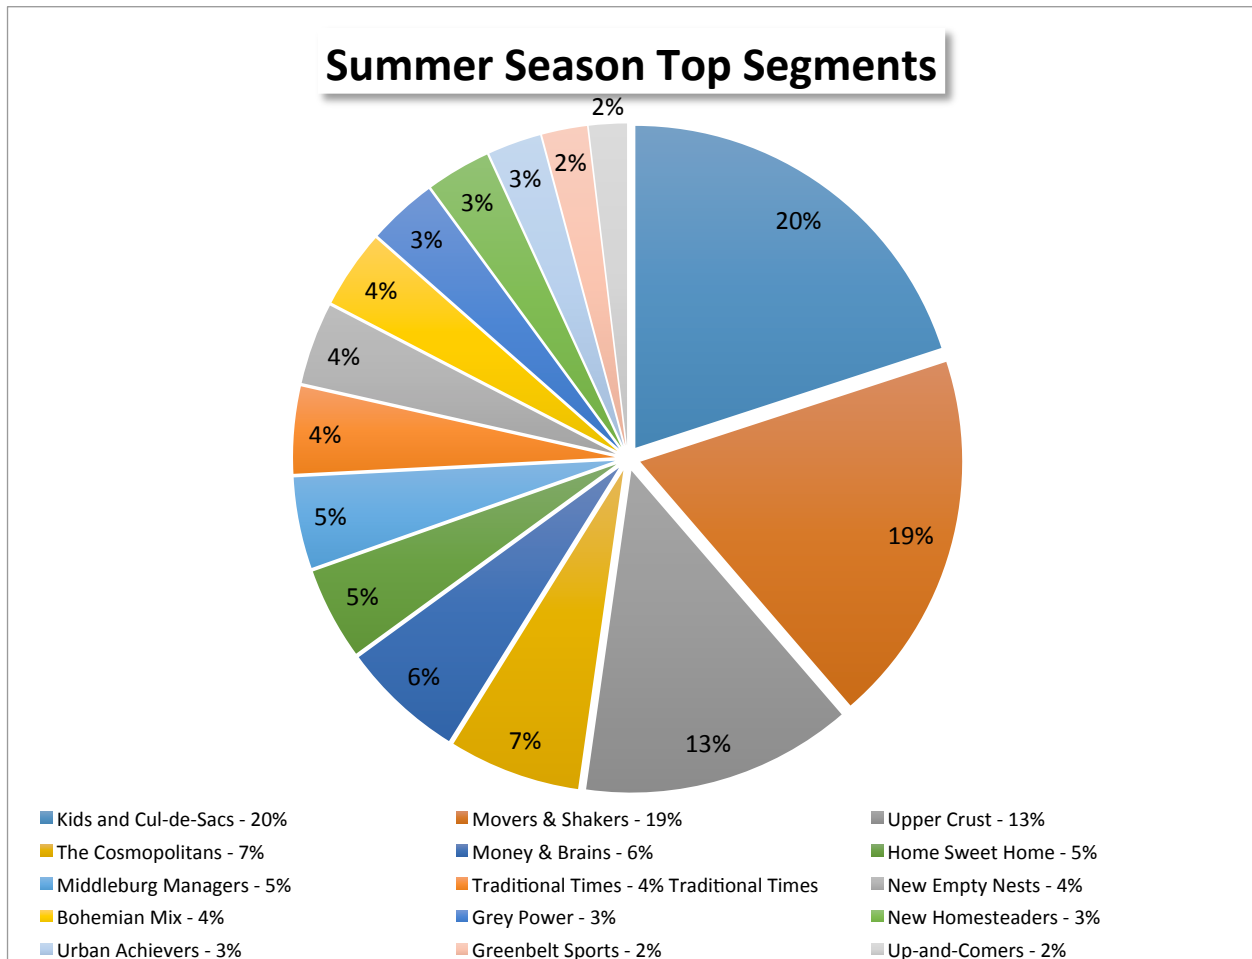

*The Cosmopolitan segment was prevalent in both the Summer Season and the Need Period. The Cosmopolitans made up 7% of the visitor mix in the Summer Season and 9% during the Shoulder period. This segment of empty-nesters has an upper to mid-level household income and live in more urban areas. This segment enjoys being able to up and go now that their children are out of the house. They are social couples who enjoy leisure activities. For Carlsbad, this market would enjoy the walking and hiking trails around the lagoon, yoga, stand-up paddle boarding, and golf. This is a potential growth market for Carlsbad.*

### Seasonal Segments Overview

SAG sorted the segmented data by month to determine which types of visitors were coming to Carlsbad during the Summer Season versus the Shoulder Season. SAG defined the Summer Season by May-August and the Shoulder Season by September-March. The results of this seasonal sorting indicates that there are distinct differences between those segments who travel to and have interest in Carlsbad in the summer and those who are visiting in the Shoulder Season. SAG has determined, based on these results that the marketing should be re-focused at these segments during the appropriate season.

### Summer Season Segments

As mentioned above, SAG is confident that the segments including families with children 12 and under are a key component of Carlsbad’s summer visitor mix. Those segments are visiting attractions, buying packages, and frequenting family hot spots like LEGOLAND and the Beach. Of the data records SAG was able to segment, the top 15 Summer Season segments of Nielsen’s 66 segments accounted for 65% of the Summer Season visitor mix. It is also important to note that the second largest segments were households with no kids. This indicates an opportunity to diversify our summer information. The below chart shows the breakdown by percentage of the top 15 segments that visit Carlsbad in the Summer Season:

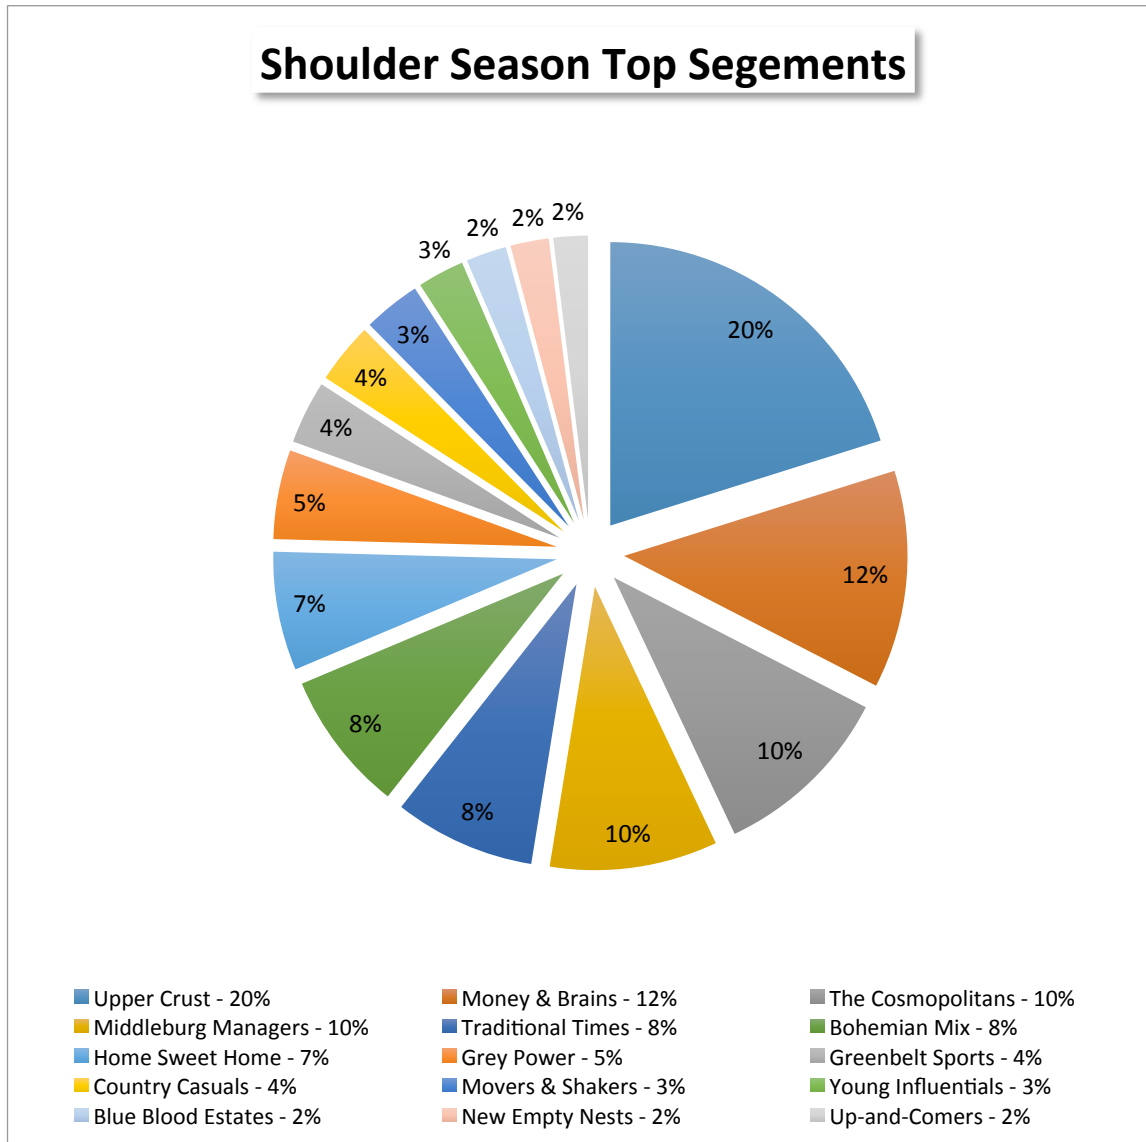

The top three segments for the summer were:

- **Kids and Cul-de-Sacs (20%)** – upper middle class families with children living in the suburbs. These families have a household median income of \$71,830 and the parents’ range in age from 25-44. The parents are college educated and hold professional positions. These families are in the “melting pot” category and are White, Black, Asian, Hispanic and Mixed. These families order on target.com, watch the X Games on TV and drive minivans like the Honda Odyssey.
- **Movers & Shakers (19%)** – wealthy, older households without kids living in the suburbs. These households are 45-64 with a median income of \$101,517. This segment is college educated carrying graduate degrees and holding management positions. They are mostly White and Asian. These households play tennis, shop at Nordstrom and drive higher end SUVs i.e., Land Rover.
- **Upper Crust (13%)** – significantly wealthy, older households without kids living in the suburbs. This segment is 55+ with a median household income of \$110,117 and classified by Nielsen as millionaires. These households are college educated with graduate degrees in upper management positions. They are mainly White. This segment shops at high end store like Saks Fifth Avenue, have vacationed in Europe, watch and play golf and drive luxury vehicles i.e., Lexus LS.

### Shoulder Season Segments

SAG was able to sort the segments by the time of year they visited and determined that the Shoulder Season of September-March had distinct segments that visited Carlsbad. These segments differ from the segments above and also vary in percentage. These segments were typically households without children who have disposable income and enjoy recreation and leisure activities. These segments would likely be spa-goers, golfers, hikers, shoppers and diners. These segments have flexibility to travel at will and are comfortable enough to do so regularly. Of the data records SAG was able to segment, the top 15 Shoulder Season segments of Nielsen’s 66 segments, which accounted for 75% of the Shoulder Season visitor mix. The below chart shows the breakdown by percentage of the top 15 segments that visit Carlsbad in the Shoulder Season:

The top three segments in order were:

- **Upper Crust (20%)** – significantly wealthy, older households without kids living in the suburbs. This segment is 55+ with a median household income of \$110,117 and are classified by Nielsen as millionaires. These households are college educated with graduate degrees in upper management positions. They are mainly White. This segment shops at high-end stores like Saks Fifth Avenue, have vacationed in Europe, watch and play golf and drive luxury vehicles i.e., Lexus LS.
- **Money & Brains (12%)** – wealthy, older family mix within the household, living in urban areas. The older family mix means the children are mostly older teenage or college age dependents. The parents are 45-64 with a median household income of \$88,837 and are college educated in management positions. These households are classified as a “Melting Pot” and include White, Asian, Black, Hispanic and Mixed. This segment shops at stores like Banana Republic, travel for business occasionally, watch tennis and drive luxury SUVs i.e., Mercedes Benz E Class.
- **The Cosmopolitans (10%)** – wealthy, mid to older age range, mostly without kids living in urban areas. This segment is 55+ with a household income of \$58,313 working in white collar settings. This segment is classified as a “Melting Pot” and includes White, Asian, Black, Hispanic and Mixed. These households shop at Macy’s, have vacationed outside the US, watch Masterpiece Theatre and drive upper midclass vehicles i.e., Lincoln Town Car - Flex Fuel.

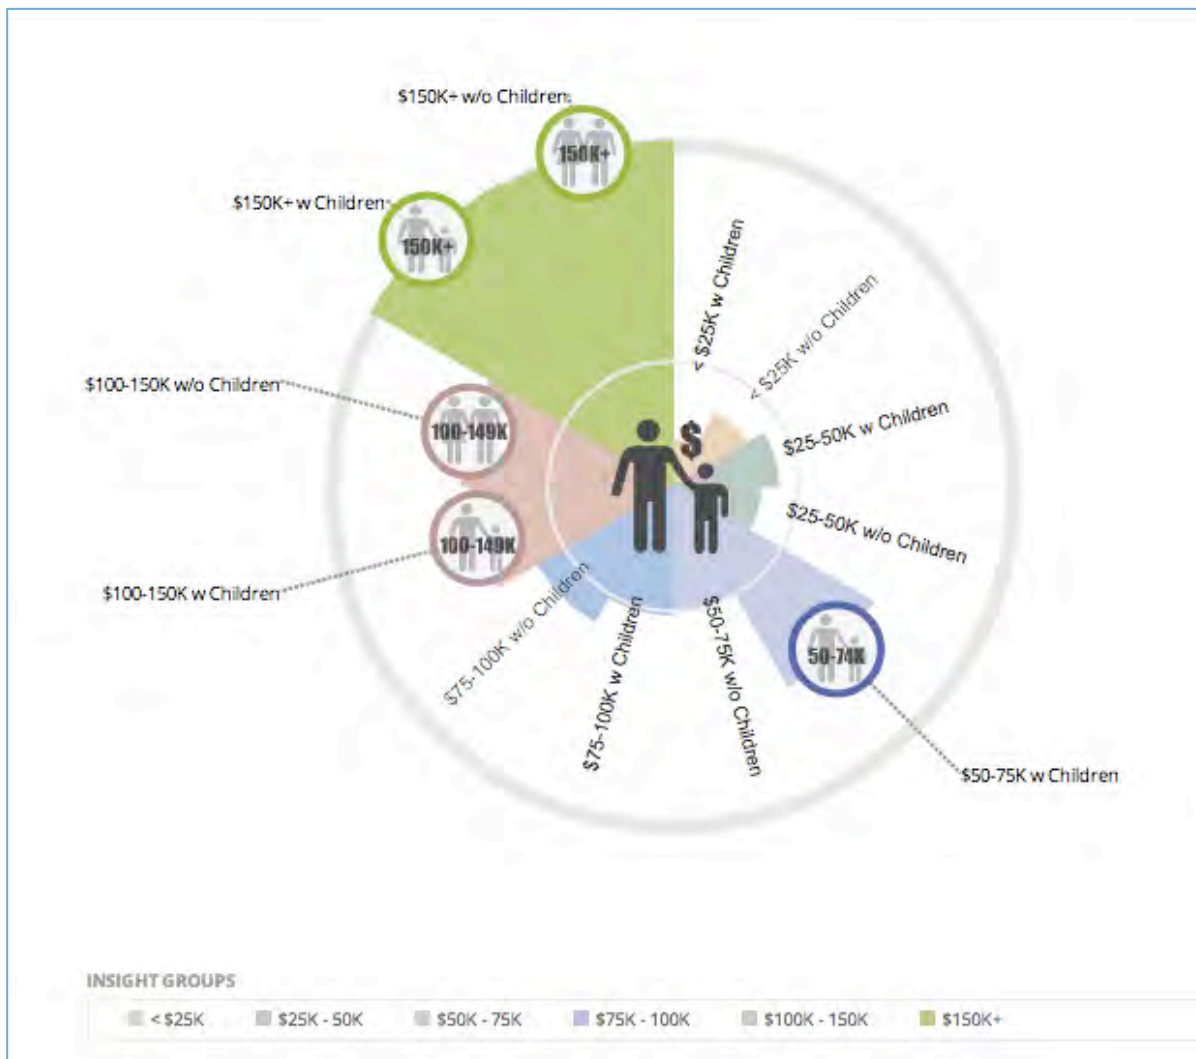

The results of this analysis support the shifting of resources to focus on the top segments that have been identified in this analysis. The opportunity is to increase Carlsbad’s share of these markets that have demonstrated interest in visiting in the shoulder periods.

### Comparable Segmentation Research

SAG, in conjunction with Mindgruve, met and talked with the research firm Resonate which has been monitoring audiences visiting the Visit Carlsbad website during the summer campaign from April to September. SAG analyzed the data collected by Resonate through the pixels embedded in each page. These pixels allow Resonate to capture data on the individuals using visitcarlsbad.com.

#### Resonate Audience Insights:

Resonate’s data showed different segments of people were actively going to the Visit Carlsbad website during different times of the campaign. The campaign began April 1, 2014 and ran through September 18, 2014. Below is a snapshot of Income and Household data collected on people who visited the DMO website during the month of April:

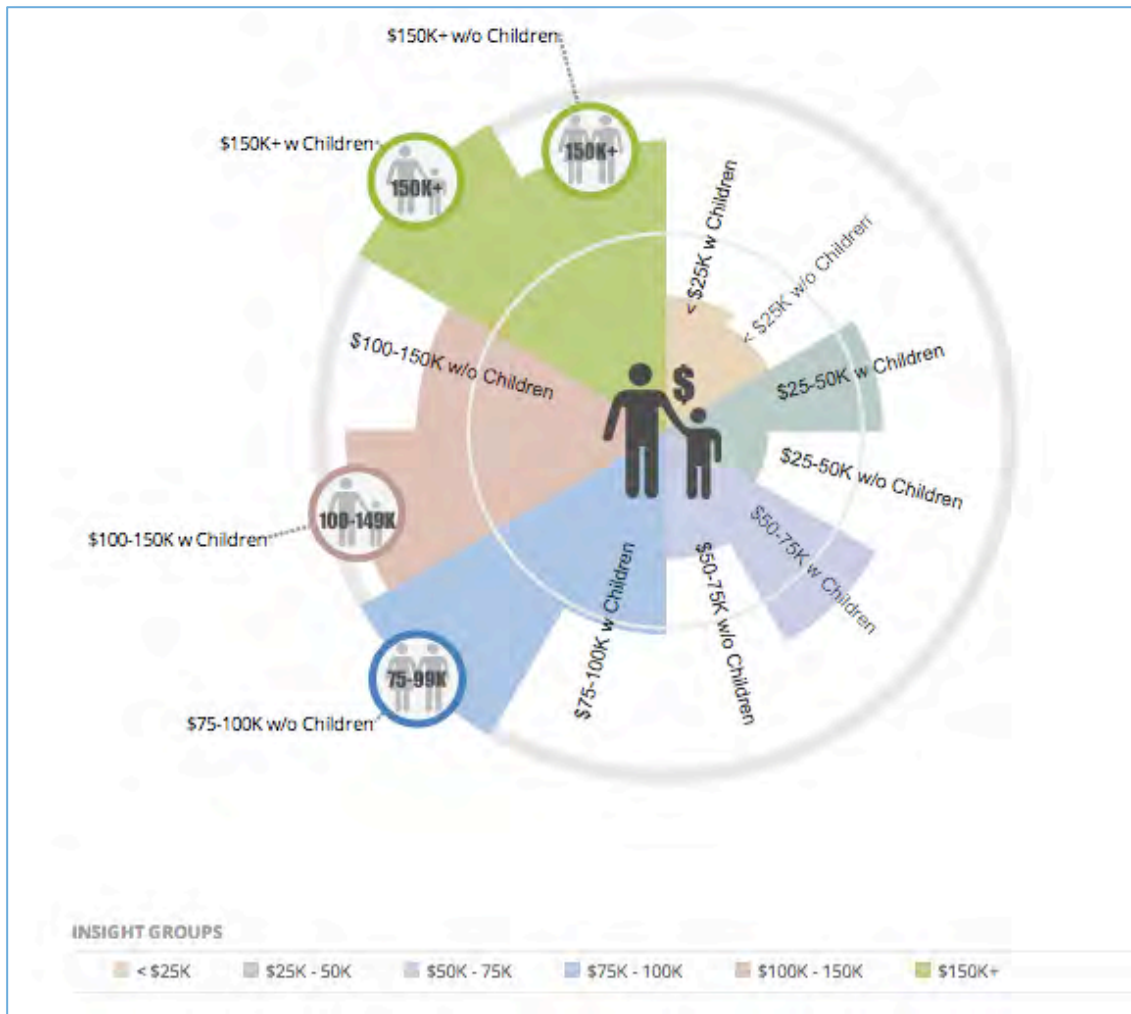

This data shows the Insight Groups who visited the DMO website in the month of April were more affluent than the current target market. The current target market actually indexes in the sixth position. The visitors that indexed the highest are ranked in order by income and presence of children in the household below (all segments indexed above 100 showing strong presence):

1. \$150,000+ annual income with children – highest index - 279
2. \$150,000+ annual income without children – index - 276
3. \$50,000-74,000 annual income with children – index - 185
4. \$100,000-150,000 annual income without children – index - 169
5. \$100,000-150,000 annual income with children – index – 162

Below is a snapshot of Income and Household data collected on people who visited the Visit Carlsbad website between the months of June and August:

This data shows the users who visited the DMO website between the months of June to Augusts were more affluent than the current target market. This data captures the current target market as the

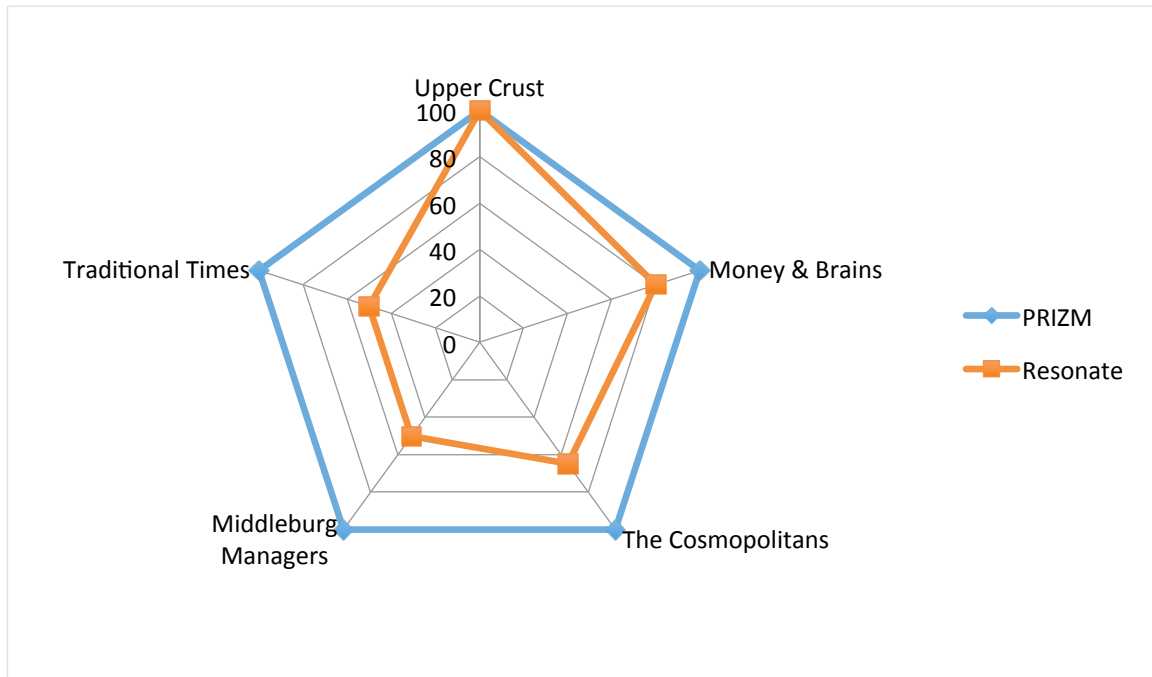

eighth highest indexing segment. This data also shows that there are additional segments actively interested in the Carlsbad product, which are viable targets. The visitors that indexed the highest are ranked in order by income and presence of children in the household below (all segments indexed above 100 showing strong presence):

1. \$150,000+ annual income with children – highest index
2. \$75,000 - \$100,000 annual income without children
3. \$100,000 - \$150,000 annual income with children
4. \$150,000+ annual income without children
5. \$100,000 - \$150,000 annual income without children

The current target market of Visit Carlsbad indexed in eighth place.

SAG compared the Resonate Audience Insight Groups data above to the Summer Season and Shoulder Season results from the Lifestyle Segmentation Analysis and developed the below profile. The charts below are the highest indexing segments for each respective season overlaid with the Resonate Audience Insight Groups.

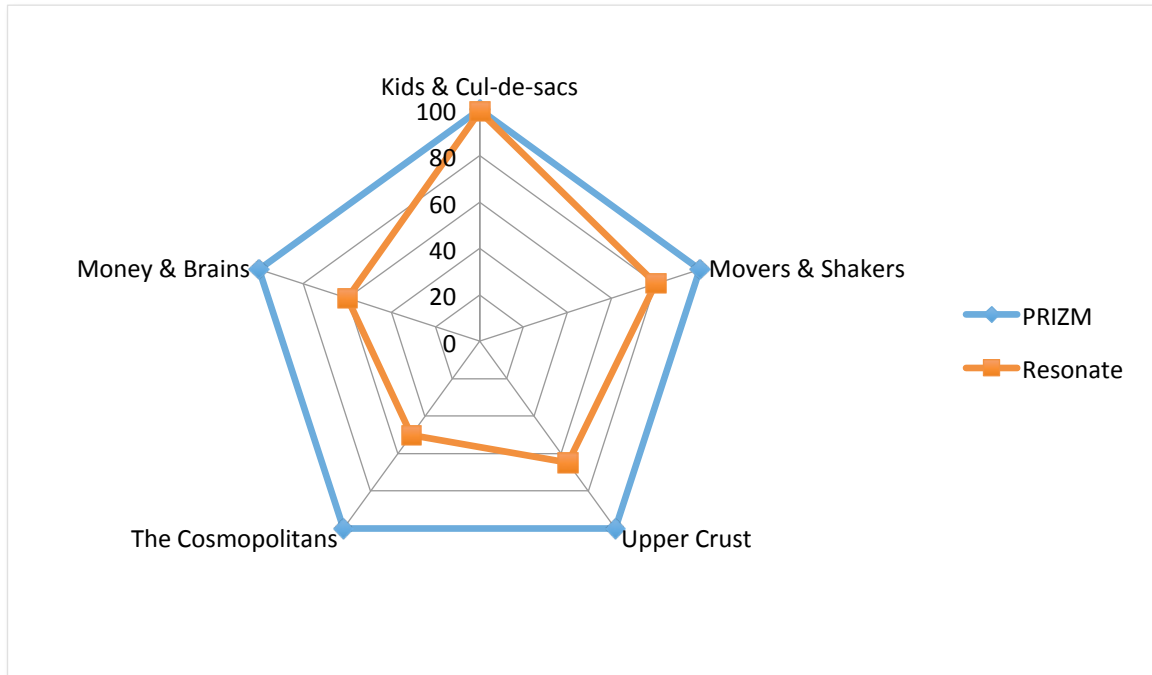

*Shoulder Season Segments & Audience Insights Groups*

This overlay of the PRIZM results from the Lifestyle Segmentation Analysis with the Resonate Audience Insight data is an illustration of similar segments interest in the Carlsbad tourism product. During the Shoulder Season, the Upper Crust PRIZM segment indexes the highest and correlates directly to the Resonate Audience Insight data profiles of those visiting the website.

This validates further the need to refocus the marketing resources on the markets indicated in the Lifestyle Segmentation Analysis and reinforced with the Resonate data gathered from recent web activity.

**Summer Season Top Segments & Audience Insight Data**

During the Summer Season the overlap of the results shows that the PRIZM segments that had the strongest market-share in Carlsbad were also indexing the highest against the Resonate results from the Visit Carlsbad website. Kids & Cul-de-sacs had the highest market share during the summer season and matches directly with the top profile of the Resonate Audience Insights data.

**Lifestyle Segmentation Analysis Conclusions**

This comparable analysis confirms and supports SAG’s research and recommendation of a new direction in target markets. The overlapping data of specific segments clearly show a presence of new and different segments, which should be targets for future marketing initiatives. These segments are all affluent households with relatively high incomes. The key targets for the shoulder periods are households without children. This allows Carlsbad to diversify the tourism product and create specific experiences that these markets will enjoy. The overall focus on the shoulder periods combined with the results of the segmentation study creates a clear path for future marketing efforts.

### Conclusion – Research

The research that was conducted by SAG provides the foundation for the recommendations contained in this report. It is clear that Carlsbad has an opportunity to improve its position in comparison to the destinations that were analyzed. Growth in the level of funding will increase Carlsbad’s ability to strengthen its position in the new target markets.

The segmentation research creates a clear path for future marketing. It is recommended that specific campaigns with relevant experiences and packages be created to drive more visitation from these market segments.

### SAG Research

The above chart illustrates the multifaceted approach to research for this report. This approach has created broad based input and participation coupled with market and competitive destination analysis.

## **Research Plan – Recommendation**

It is recommended that an annual research plan is developed as part of the overall tourism effort. The results of the research underscored the importance of an ongoing plan. A sustainable research plan will create research-based decision making for future marketing efforts. This investment can also be very valuable in refining future target markets. Research will give insight on the overall visitor experience in Carlsbad. The types of research that would be beneficial include:

### **Visitor Profile Study – Every Three Years**

A visitor profile study is designed to gain information on visitors to Carlsbad as well as gain insight on the overall visitor experience. The current visitor profile study questions should be reviewed to ensure a more thorough understanding of the overall visitor experience in Carlsbad. The current visitor profile study focuses on key characteristics of the surveyed travelers but doesn't probe the level of satisfaction or additional experiences that a visitor is interested in. Another dimension of the visitor profile study must entail a comparison of the demographics of visitors based on the time of year they have visited Carlsbad.

### **Benchmarking Study – Biannually**

The foundation for benchmarking that has been established with this process should be updated on a biannual basis. This could be accomplished internally and would evaluate the positioning of Carlsbad relative to the competitive set in a broad spectrum of areas. The benchmarking study could be conducted internally.

### **Target Audience Study – Biannually**

This study would be a continuation of the research conducted for this study to utilize hotel and inquiry guest data to further refine the demographics and interests of targeted audiences. The results of the study conducted for this report have been informative. The goal would be to have a greater level of participation by Carlsbad Hotels in future studies. This will help understand the trends in market mix and whether there is an increase in targeted markets visitation of Carlsbad. The expense associated with this study can be reduced if the data from the analysis is reviewed and reported internally.

### **Meeting Planner Survey – Biannually**

This study would focus on the desirability of Carlsbad as a meetings destination. The study would also focus on amenities and services that would enhance Carlsbad's competitiveness. SAG recommends conducting this study at the point that the implementation of the group sales plan is complete. This will help refine the messaging and approach of the group sales and marketing effort. The meeting planner survey will also give an indication of attendee trends by target group markets. Through the use of the Visit Carlsbad group database and MINT, this survey can be completed with minimal expense.

SAG has recommended an increase to the budget for research in order to create an ongoing research plan. The baseline that is created through consistent effective research will become the foundation for future marketing and advocacy.

## Leisure Sales and Marketing – A New Direction

SAG has reviewed the current activities and resources dedicated to Individual Leisure Sales and Marketing. SAG has met with the current digital advertising agency and public relations firm. Mindgruve and DCI have provided helpful analysis and insight for this study. SAG has reviewed the most current marketing plans and reports that are generated from both firms.

In conjunction with the research conducted that has identified potential new target markets for Carlsbad to increase visitors during shoulder periods, SAG evaluated the current approach in leisure sales and marketing. The proposed restructuring of the overall budget and resources for the development of a new groups sales and marketing effort has an impact on the approach and resources dedicated to leisure marketing.

The more compelling purpose of re-evaluating the current approach is to have a more targeted approach with a viable mechanism of tracking the actual conversion of future marketing efforts into overnight visitors. The plethora of options that exist for consumers to book their travel makes this challenging, however it must be aggressively pursued to demonstrate return on investment (ROI) of future activities. The current key measurements of success are focused on increasing online activity and overall impressions for Carlsbad.

The following is an overview of the current approach to measurement:

### Online/PR Activity Measures

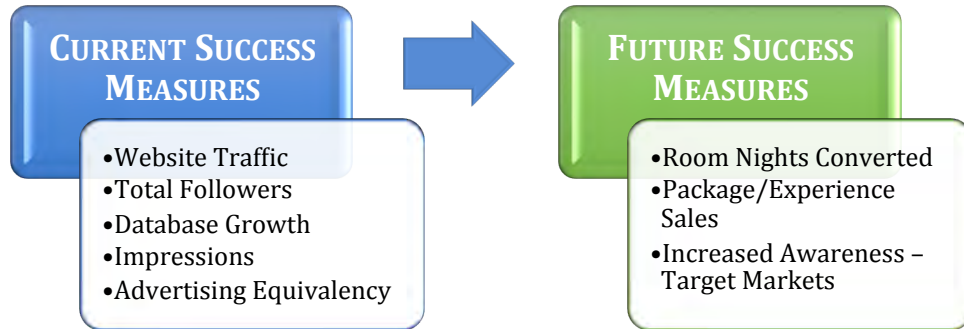

The following are the listed performance measures from the most recent annual report for Visit Carlsbad.

- ❖ Google Analytics
  - Direct & referral traffic
  - Time on Website
  - Page Views
- ❖ Social Media
  - Total Likes, followers & video views
  - Social referral traffic to website
- ❖ Email Marketing
  - Open & Click through ratios
  - Subscriber database growth

The most recent report shows an increase in web traffic, an increase in social media followers, and other indicators of increased traffic due to the digital marketing efforts. The investment that has been made in online marketing has been successful in increasing overall activity and awareness of Carlsbad as a destination. The reports generated by DCI focus on overall impressions generated by the public relations efforts and determine the value of those impressions in advertising dollars. These results also demonstrate that the public relations efforts are driving increased awareness of Carlsbad as a destination.

### Future Direction

SAG recommends refining the future focus and measurement to determine impact that sales and marketing efforts have had on driving room nights or incremental visitors to Carlsbad. The other measure would be on increasing awareness of Carlsbad with agreed-upon targeted markets.

The increased focus on targeted marketing with a collaborative effort to track results is an important new direction for Carlsbad leisure meeting efforts. The more focused effort has the potential to produce more impactful results in the timeframes that have been determined as a priority.

### Direct Marketing

In conjunction with the outcome of the research on future target markets, SAG recommends shifting the current marketing approach from online advertising to a focused direct marketing approach. The benefit of this approach is the ability to create specific experiences designed to appeal to targeted audiences. This will include developing specific experiences and offers for the targeted market segments and utilizing e-marketing techniques to reach the desired audience. According to the 2013 SDTA Visitor Profile Study, 85% of the current visitors coming to Carlsbad are using the internet as their information source and are likely to be receptive to a targeted direct marketing approach.

The information gathered about the likes and interests of the targeted market segments create the opportunity to develop Carlsbad experiences that appeal to them. An example of this is the “Uppercrust” market segment that has shown a high interest in Carlsbad during the shoulder periods. They enjoy activities like golf and like to dine out. Carlsbad experiences would be developed with these components and sent directly to them through direct e-marketing.

Uppercrust

### Tracking Room Nights - Leisure Sales and Marketing

SAG recognizes the challenge of tracking room nights that have been generated from leisure sales and marketing activities. The plethora of options that a potential visitor has to book a room in Carlsbad is vast. Many studies have indicated that only a small percentage of visitors will book a room through a Destination Marketing Organization website. The opportunity exists to more predominantly position the booking engine as a vehicle to buy specific offers and gain insight through this activity as to the

success of future direct marketing campaigns. The booking engine, powered by aRes, will be an indicator of the success of a campaign.

### *Online Hotel Referrals – Recent Activity*

The following chart is a recent indicator of the number of monthly visitors to the Visit Carlsbad website that “clicked through” to specific Carlsbad hotels. The chart below indicates that there were 2,404 web users that have taken action to review and possibly book hotel rooms.

Outbound Traffic Sent to Hotel Sites		
	Hotel	Outbound Clicks
1	Ocean Villas	172
2	Beach Walk Villas	169
3	Seashore on the Sand	169
4	Oceanfront Carlsbad	109
5	Carlsbad Inn Beach Resort	74
6	Grand Pacific Palisades	69
7	Marbrisa Resort	66
8	LEGOLAND Hotel	64
9	Scandia Motel	64
10	Beach View Lodge	63
<b>Total</b>		<b>2,404</b>

SAG recommends that a system is designed through specific offers and collaboration with the individual hotel web analytics to determine how many Visit Carlsbad website users made reservations through the hotels’ online reservations platforms.

SAG discussed potential approaches with Mindgruve for the ability to track actual conversion from the Visit Carlsbad website. The following recommendation was developed in collaboration with Mindgruve.

*It is recommended that current individual hotel Google analytics are evaluated to determine goal tracking around bookings. Filters can be created specific to Visit Carlsbad referring traffic to view the number of conversions. The hotels will need to give access to this data, but once set up, an automated report can be created that can detail specific results to the stakeholders.*

### *Booking Engine*

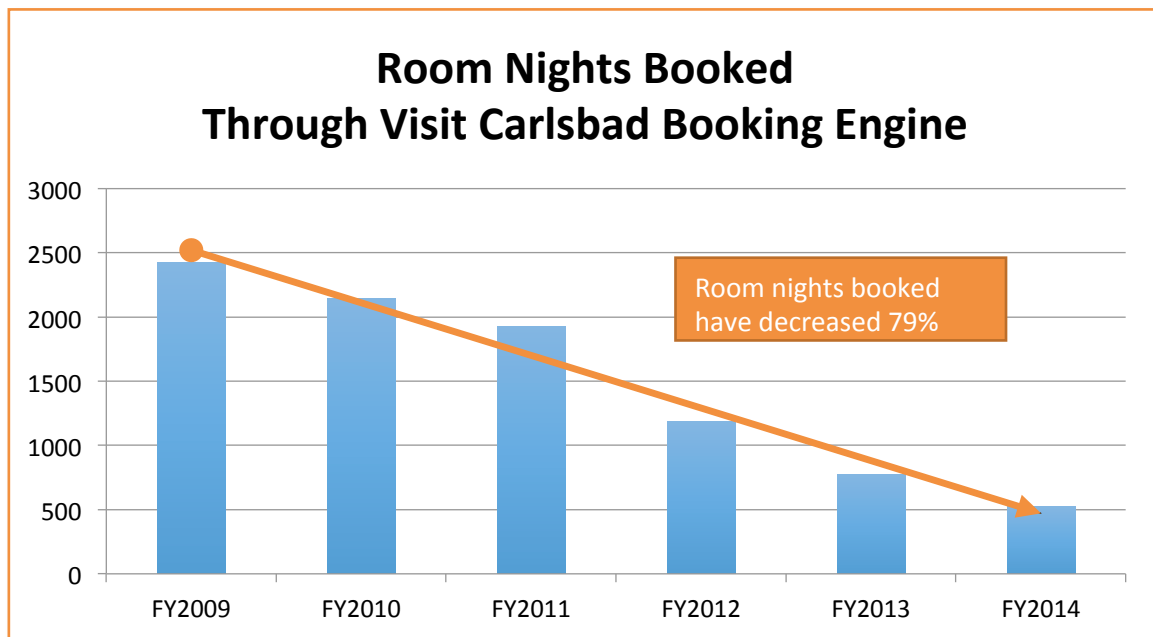

While a DMO booking engine is only one vehicle that a visitor can use to reserve hotel rooms in Carlsbad, the utilization can be an indicator of the success of a campaign or overall effort. Visit Carlsbad has contracted aRes Travel which supports the booking engine on the Visit Carlsbad website. The following is a breakdown of the hotel bookings made through the booking engine in 2014.

The total reservations that have been booked year to date is 186 and the total room nights are 424. This represents less than .001 percent of the unique visitors that have visited the website in 2014.

The following chart shows the past five years of room nights booked through the booking engine:

SAG recommends using the activity on the booking engine as a performance measure. A goal would be set annually to review growth in the booking engine activity. The recommended shift in marketing focus will position the booking engine more predominantly in the reservation process.

### *Package/Experience Sales*

An active package sales component is an important aspect of an effective leisure sales and marketing plan. The data that has been supplied from the research gives an indication of the priority leisure markets and their interests. SAG recommends that packages are created that are focused on driving new targeted visitors during the shoulder periods. These packages can also be utilized directly by the hotels in their reservations platforms.

Year to date 2014 package sales are as follows:

Package Name	# Sold	Total Amt	Room Nights	Tickets
<b>The Ultimate LEGOLAND® Family Fun Vacation</b>	24	\$22,161.63	63	108
<b>The Best of San Diego! Fabulous Four Combo Package</b>	2	\$2,510.00	10	16
<b>Romance Package - Holiday Inn Express and Suites Carlsbad Beach</b>	1	\$445.00	3	0
<b>Go Wild at the San Diego Zoo Safari Park - Holiday Inn Express and Suites Carlsbad Beach</b>	1	\$1,272.65	5	4

There were 28 “trackable” packages sold in the first 10 months of 2014, which accounted for 81 hotel room nights. In combination with a newly focused direct marketing campaign, this number will grow in the future.

### **Deals Page**

SAG also reviewed the “trackability” of the Deals Page on the Visit Carlsbad website and found that the click through rate (CTR) was low. During the 2014 calendar year the CTR for the deals page was .07% with the total page views at 648 and the total click throughs to the unique pages at only 51. This underscores the opportunity to monitor referral activity and adjust offerings on an on-going basis.

*Visitor Services – Visitor Experience Sales and Service*

Currently the Visit Carlsbad Information Center functions as an information and fulfillment operation for a visitor who walks in, calls in, or makes an online request for information. Year-to-date in 2014, the Visitor Services team has handled 8,360 inquiries. The Information Center has brochures from the attractions in Carlsbad and the San Diego region.

SAG recommends that the Visitor Information function evolve to Visitor Experience Sales and Service. The focus of this area will be to handle any inquiry as a “lead” and work closely with potential visitors to “convert” them to actual overnight visitors through directly booking future stays and packages. This will also be accomplished through referrals with follow up and confirmation. Destination software packages have the capability to support this type of effort. SAG has recommended the implementation of new software.

SAG recommends that goals are set for both inquiries and room night conversion from the Visitor Services efforts.

*Goal Setting – Leisure Sales and Marketing*

The overall recommendations for Leisure Sales and Marketing create the opportunity to set annual quantitative conversion goals. SAG has created preliminary goals for the first year of the new direction.

The following is a chart that depicts the components of annual goal tracking:

Activity	FY2014 Actual	FY2015 Goal
Package/Experience Sales	81	1,100
Booking Engine Hotel Bookings	424	1,500
Online Referral Room Nights	NA	750
Visitor Experience Sales and Service – Inquiries /Room Nights	NA	250
<b>Total Room Night Goal – 2015</b>		<b>3,600</b>

The projected 3,600 new “trackable” room nights assumes the approval of the recommendations in February and the ability to have new targeted marketing efforts in full implementation by March 1<sup>st</sup>.

## Public Relations

SAG had informational meetings with the current public relations contractor to understand the current activities. DCI was very informative and helpful in gaining an understanding of current activities.

The following is an illustration of the metrics that are currently used in measuring success and a sampling of the publications that are targeted for Carlsbad news.

PUBLIC RELATIONS	
<b>Total Impressions:</b>	37,465,502
✓ Broadcast Impressions:	3,518,406
✓ Print Impressions:	521,000
✓ Online Impressions:	33,426,096
✓ Advertising Equivalency:	\$830,862
✓ Return-On-Investment: Ad Equiv/ (\$5,000 x 12)	14:1
<b>Key Message Dissemination</b>	
✓ Carlsbad: California's Quintessential Oceanside Getaway	3,019,491
✓ In Carlsbad, LEGOLAND Anchors A Week of Family Fun in SoCal	9,262,408
✓ Carlsbad: Fostering Healthy Living Since 1882	28,023,050
✓ Carlsbad Woos Corporate Execs with Accessible, Pro Quality Golf	14,050
<b>Call To Action Placement</b>	
✓ visitcarlsbad.com	26,744,392
✓ 1-800-227-5722	102,028

The current four top line measures of success are:

1. Return on investment
  - a. Ad Equivalency / DCI Contract Amount
2. Circulation/Impressions
  - a. Verified circulation from media where PR efforts drove Carlsbad articles or features
3. Advertising Equivalency
  - a. The cost of the PR placements if they were to be purchased as advertising.
4. Call to Action
  - a. The level of activity driven from PR efforts on the Visit Carlsbad website.

The overarching goal of the current PR efforts is to increase awareness of Carlsbad nationally in a wide variety of travel related media, as well as general media. The illustration above shows the variety of media where Carlsbad has received publicity in conjunction with the current PR efforts.

### ***SAG Recommendation – Focused Public Relations***

In conjunction with the overall focus on key markets and with an emphasis on the shoulder periods, SAG recommends a focused approach to public relations. This will include gaining an understanding for the most effective vehicles to drive awareness to the target market segments. The Nielson Lifestyle Segmentation research indicates the most popular vehicles for reaching the key segments and with that information Visit Carlsbad can deploy public relations efforts in a targeted manner. This will contribute to a more focused plan going forward. The proposed budget has a smaller allocation for PR however a more targeted approach that will create more awareness in the top market segments.

### **Conclusion – Leisure Sales and Marketing**

There is an opportunity to re-focus the future efforts in leisure sales and marketing for Carlsbad. The research has identified the top segments to pursue to increase shoulder period visitation. The development of Carlsbad experiences that will raise awareness and create specific options for the targeted market segments create an effective and measurable approach for the future.

The recommended refocused targeted approach will be effective in driving increased awareness to the targeted markets while resources are reallocated for the development of the group sales and marketing plan.

## Group Sales and Marketing

The input received in the stakeholder focus groups as well as the review of competitive destinations mix of visitors uncovered the need to study the potential of conventions and meetings as a future target for tourism marketing. Currently, Visit Carlsbad utilizes empowerMINT (a subscription to the MINT database) to procure RFPs for group business through visitcarlsbad.com. Below are the 2014 leads generated through the Visit Carlsbad website:

SAG met with Visit Carlsbad's executive director along with the City's economic development manager and the Directors of Sales (DOSes) for the hotel properties that have larger amounts of meeting space in order to gain their insight on the potential of the group market and how tourism resources could be utilized most effectively. As is the overall recommended strategy of this report, the focus was to understand the current group sales efforts and the potential to focus future efforts on increasing the Shoulder Season visitation. The DOSes were very interested and supported a recommendation to work together on behalf of Visit Carlsbad to market the destination.

The following Carlsbad hotel leaders have participated in this process:

1. Vikram Sood, Hilton Oceanfront Resort & Spa
2. Julie Zahner, Sheraton Carlsbad Resort & Spa
3. Patsy Bock, Omni La Costa Resort & Spa
4. Jason McLaughlin, Park Hyatt Aviara Resort
5. Michael Swyney, Hilton Oceanfront Resort & Spa

The opportunity in creating a new group sales and marketing effort is to determine how to implement an approach that is complimentary to the current sales efforts of the individual hotels and resorts. SAG facilitated a discussion with the DOSes to determine how to create a new effort that was focused on raising awareness and bringing new groups that were not already being marketed and sold by Carlsbad hotels. This is a common concern for other destinations. The consensus was that the new group effort must be very open and transparent to allow for the oversight committee, in conjunction with Visit Carlsbad, to monitor and re-focus the business development efforts on a monthly basis. The recommendations in this area have been developed in conjunction with the participating DOSs.

The following are key components of the recommended new approach to attracting new group business to Carlsbad:

## Oversight

An oversight committee will be formed as a committee of the Board of Directors. This committee will be made up of the hotels with meeting space which can provide expertise and support in the development of a successful group sales and marketing program. This committee would monitor progress on a monthly basis as well as review and recommend the group sales budget and goals. The level of engagement of this committee will have a direct impact on the success of the program. The goal is that this group sales initiative will be a collaborative process.

## Goal Setting

The goal setting process will include initial research by the Visit Carlsbad Business Development Manager with review by the Executive Director. The goals will then be presented to the oversight committee for review and recommendation for the goals to be presented to the Visit Carlsbad Board of Directors and the TBID Board of Directors.

## Metrics

The primary metric for success of the group sales effort is definite room nights booked as a result of the sales and marketing efforts. The tracking of these room nights will require collaboration between the hotels booking the groups and Visit Carlsbad. Other important metrics will include the number of qualified leads generated as well as the number of new customers that have come to Carlsbad to learn about the destination from a meetings standpoint.

### *Key Group Sales Metrics*

- *Definite Room nights Booked*
- *Qualified Leads Generated*
- *New Customers coming to Carlsbad*

## Staffing

The recommended approach to staffing is the hiring of a Business Development Manager as a full time employee of Visit Carlsbad. This position would report to the Executive Director and be responsible for the driving awareness of Carlsbad as a meetings destination and identifying new customers in identified markets to bring to Carlsbad.

The job functions of this position would include:

1. Researching and developing the list of top group markets for Carlsbad
2. Developing an annual plan for external marketing events
3. Prospecting for new clients who have potential for Carlsbad
4. Organizing Familiarization trips to bring new clients to Carlsbad
5. Creating and implementing an awareness plan, including direct marketing
6. Coordinating a targeted PR effort for the Group Market
7. Developing a group database for Visit Carlsbad
8. Developing a group “Brand” for Carlsbad
9. Developing an approach to present the group experience in Carlsbad through a virtual presentation
10. Developing a complete online space for meeting planners that will include tools and meeting space specifications for all Carlsbad meeting options

This position would have the title of “business development” to signify that the role would be to work on uncovering new customers for Carlsbad and then coordinating with the hotels for the actual closing and contracting of business. The position would be measured based on the number of groups that actually booked Carlsbad from the new sales and marketing efforts. This makes it very important that there is a coordinated approach to tracking the new customers and whether they held a meeting in Carlsbad.

Meetings that take place from Sunday through Wednesday during the previously mentioned shoulder period (September through March) will be a primary focus of this new effort.

## Vertical Markets

SAG recommends that there is a facilitated session in conjunction with the sales department to finalize the top vertical markets for Carlsbad. The DOS’s have reviewed the current business mix and the following are the preliminary list of key group markets for Carlsbad:

1. Biotech
  - a. Medical device industry
  - b. Lifestyle companies
2. Sports business – examples: SKLZ\*, Golf Manufacturing Companies
3. Retail – Corporate - example: Reef\*
4. Incentive
  - a. Pharmaceutical
  - b. Financial
  - c. Insurance
  - d. C-level
5. Social, Military, Educational, Religious and Fraternal (SMERF)

## 6. Healthcare/Hospitals

*\*SAG understands that both SKLZ and Reef are current clients bringing group business to Carlsbad hotel properties. These companies are good examples of markets that work in Carlsbad.*

The importance of finalizing the top vertical markets is to give direction for the new sales efforts and where to focus resources.

### Initial Demand Review

**SAG conducted a search of the industry national meetings database (Mint) and found that there are 2,300 groups that have met in Southern California with a peak room night requirement of 25 – 500 rooms. This is an indicator of strong demand and opportunity for group business in Carlsbad.**

## Technology

It is also recommended that Visit Carlsbad obtain an effective Sales and Marketing software platform to support the new effort. The development of a database of contacts that have been identified as having potential for Carlsbad as well as the ability to develop targeted direct marketing programs are two examples of the benefit of an effective sales software platform. SAG has contacted an industry software supplier who has given a preliminary budget estimate that has been factored into the budget below.

SAG also recommends that Visit Carlsbad continue to be a subscriber to MINT. MINT is an industry driven database with over 40,000 meetings from 20,000 organizations. This will be an important tool to support the prospecting efforts. The cost for the subscription is \$5,000.

## Budget

The following is an initial draft of the budget for the first year of the new Group Sales and Marketing effort:

Staffing – Business Development Manager (total with benefits)	\$150,000
Familiarization Trips (two trips annually)	\$20,000
Sales Calls	\$15,000
Technology/MINT	\$15,000
Website Development	\$20,000
Digital Sales Tools (photos, video)	\$20,000
E-marketing	\$7,500
<b>Total</b>	<b>\$247,500</b>

As noted in the introduction, this represents approximately 50% of the available budget dollars. It is recommended that this budget is finalized as part of the implementation plan.

## Goals Setting

SAG has reviewed a preliminary approach to setting goals for the new sales and marketing effort. There will be a period of time needed for organizational items. The following is an approach to setting goals for the first full year of operation:

Activity	Frequency	Desired result
Familiarization Trips	2 in the first year	20 qualified new clients annually to attend
External Events/Shows	1 in the first year	15 new qualified clients annually
Business Development Activity	Ongoing throughout the year	60 new qualified clients annually (5 per month)
Direct Marketing	3 awareness campaigns annually	30 new qualified clients annually
<b>Total new qualified clients - first year:</b>		<b>125</b>
<b>Total Room Nights Booked – first year:</b>		<b>1,875</b>

Each client represents 150 total room nights on average.

The new qualified clients represent 18,750 new room nights.

The percentage of new clients who have been exposed to Carlsbad who will book in the first year is projected at 10%.

The first year of the new Sales and Marketing effort will generate 1,875 new room nights. This number will grow in future years as more qualified clients are added to the database and book meetings in the future.

## Raising Awareness of Carlsbad as a Group Destination

Together with the business development recommendations, the new Group Sales and Marketing effort must focus on how to raise awareness of Carlsbad as a meetings destination. In conjunction with the identified markets that will produce the highest return, a focused plan must be finalized that will move Carlsbad to a group's destination of choice.

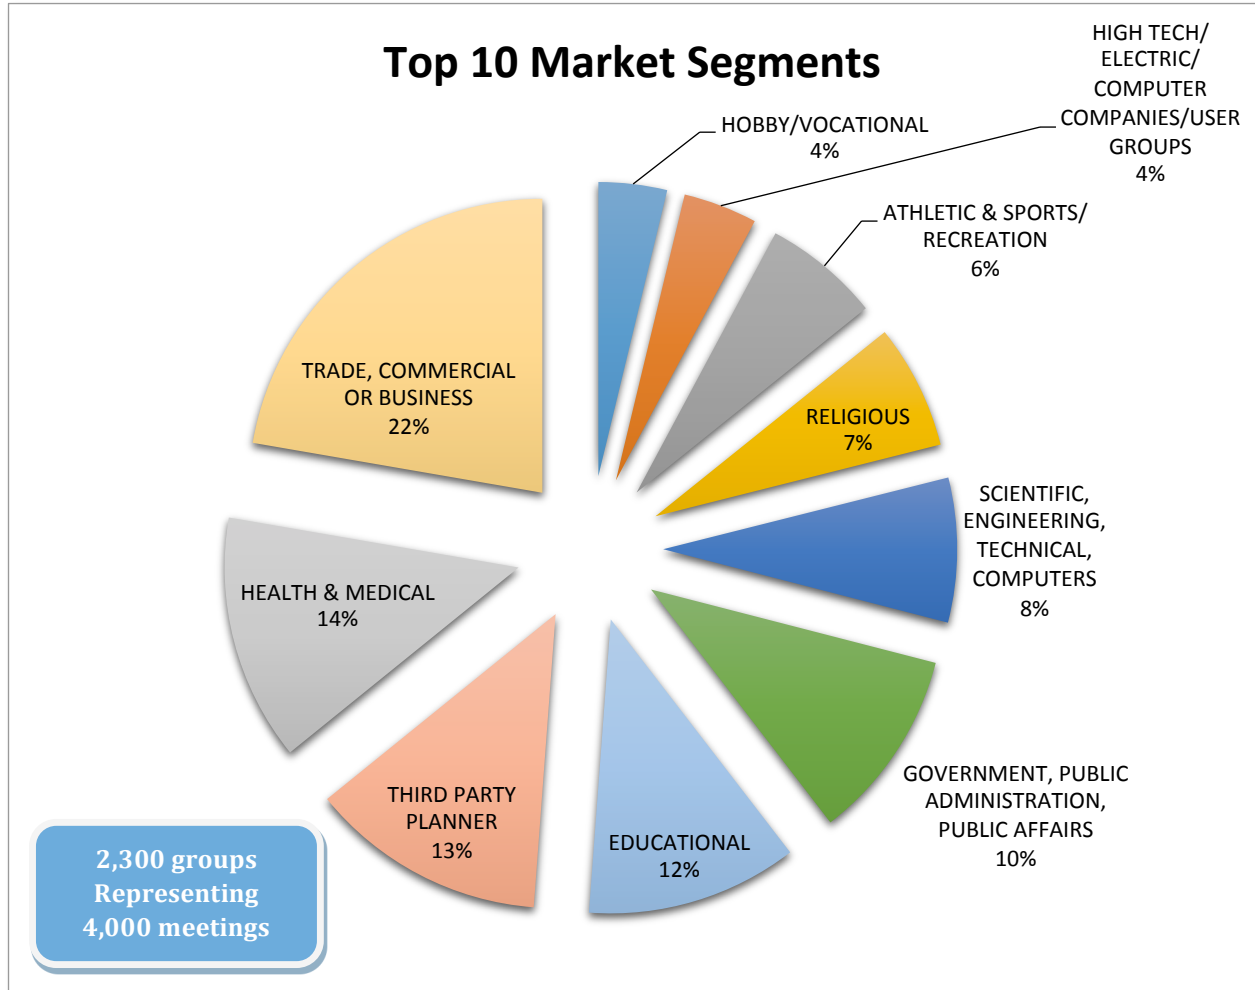

Components of the approach to increase awareness will include:

1. Social Media
  - a. The social media platforms can be used to target meeting planners.
2. Direct Marketing
  - a. The development of a qualified client database will create a platform for an ongoing direct marketing effort. A consistent effort will keep Carlsbad top of mind with targeted meeting planners.
  - b. The customers found in the MINT database should also receive a direct marketing piece re-introducing Carlsbad as a meetings destination.

SAG has conducted surveys of over 10,000 meeting planners and the most recent surveys point out the need to create meaningful attendee experiences. This includes the attendee understanding the “brand” of the destination and experiencing the unique attributes as part of the overall meeting plan. The further development of the Carlsbad brand and unique experience for the group market will be an integral part of the first year.

### Group Demand for Carlsbad

SAG, in conjunction with Visit Carlsbad, conducted a search of the MINT database to gain a preliminary understanding of the group demand for Carlsbad. The parameters for the search were groups that needed 25 to 500 rooms on their “peak” night and had met in Southern California (and the central coast). The following chart shows the breakdown of the market segments of the groups that met these criteria as a result of the MINT search:

The breakdown of market segments demonstrates that many of the segments correspond to the segments identified by the hotel Directors of Sales who participated in the development of the Group Sale and Marketing Plan. The overall universe of 2,300 groups representing 4,000 meetings demonstrates a significant market for future meetings in Carlsbad.

## *Carlsbad Conference Center*

There is an opportunity to explore the feasibility of a Conference Center being built in Carlsbad. There are many factors to consider in determining if a conference center would have an overall positive impact for Carlsbad. Those factors include the availability of a suitable site, a concentration of hotel rooms to create a viable room block within close proximity, sufficient demand, adequate funding and a viable ownership and operating model.

SAG conducted a search of meetings that had met in Southern California and required 500 to 1,000 hotel rooms simultaneously with an attendance of 800 to 2,000. These parameters were selected because these groups would need more than one hotel in Carlsbad and potentially a Conference Center for meeting space. The search produced over 750 groups, which indicates a large overall demand since the MINT database has relatively small percentage of the universe of meetings that would fall into this category.

*Large Group Demand  
750 Groups identified in a national  
meetings database*

The next steps are to determine if there are available viable sites and conduct a full feasibility study. It should be noted that there are a wide range of models and facilities that should be considered. A new facility could be developed that was flexible to handle multiple uses. This is important in attracting private investment. The feasibility study should take into account the combinations of uses from meetings and conferences to sporting activities and project the implications of different models.

*Examples of multiuse facilities designed to host a wide range of events.*

### **Conclusion - Group Sales and Marketing**

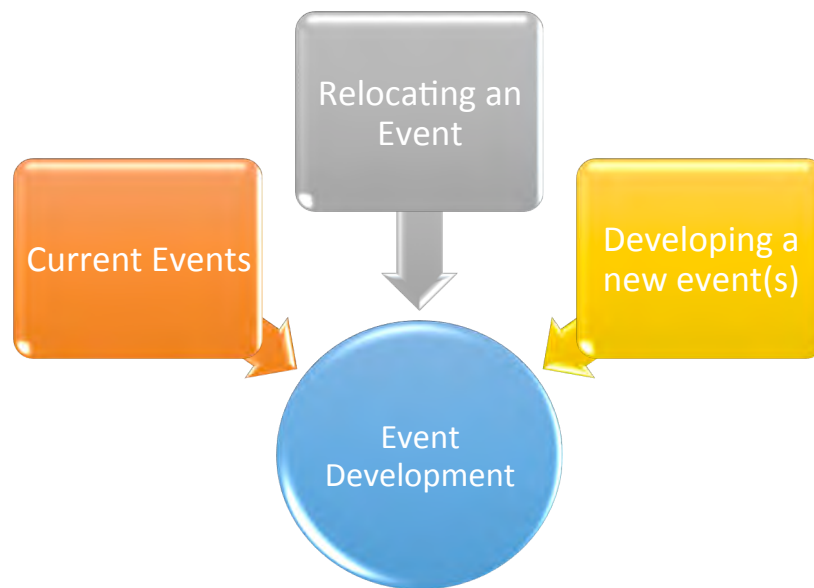

The development of a new and effective group sales and marketing plan will require the collective input and oversight of the Board of Directors, a designated committee, and Visit Carlsbad. The opportunity to recruit a new staff member and finalize the overall parameters is important in ensuring that the efforts are complimentary to the current group sales efforts of the Carlsbad hotels.

With this in mind, SAG recommends the development of a group sales and marketing plan as outlined above. With a successful effort, the definite room night bookings will grow significantly as qualified client databases are created and developed.

## Event Development

The development of events that will bring visitors to a destination during periods of softer demand is an important aspect of a tourism plan. There are three approaches to consider in the development of an overall event plan:

1. Are there current events that could develop into stronger tourism events with support and resources?
2. Are there events in other destinations that would be successful in Carlsbad? Can Carlsbad entice the event organizers to relocate or create a similar event in Carlsbad?
3. Should Carlsbad develop its own signature event to attract visitors? Could a new event that was unique to Carlsbad have a larger impact on the Carlsbad brand?

SAG recommends that all three approaches are used in developing an annual event plan. The current grant program that is administered by the CTBID Board of Directors should support a new overall approach to event development. Visit Carlsbad, in conjunction with the CTBID staff, would present a proposal annually that would encompass the overall approach to event development and how it supports the overall direction of the marketing plan.

The current events that are funded through the CTBID grant process are:

	Date	Room nights generated	Attendance
<b>2. Marathon</b>	January 19, 2014	379	13,855
<b>3. Carlsbad 5000</b>	March 29-30, 2014	2,686	7,333
<b>4. Film Festival</b>	September 18-21, 2014	75 (La Costa)	4,500
<b>5. Carlsbad Music Festival</b>	September 19-21, 2014	n/a	3,500

## Event Measurement and Reporting

It is critical to have a measurement and reporting plan for all events. This should include support for the event organizers in the best mechanisms to collect the data that is needed. SAG discussions with the CTBID staff indicated there was an opportunity to develop a consistent approach for the measurement requirements for events that receive support. SAG recommends the development of a required projection and measurement component as a requirement for all events receiving CTBID support.

Metrics would include:

1. Projected Attendance
2. Marketing Plan Metrics
  - a. Traditional Advertising Reach
  - b. Online activity
  - c. Social Media reach
3. Room Nights Generated – Tracking Method
4. Economic impact – (pre-approved formula)
  - a. Direct Spending
  - b. Tax Generation

The implementation of an event development plan will have quantitative goals. The data was not available for all of the currently funded events. This goal needs to be developed in conjunction with the overall annual goals.

In the area of larger event recruitment, a goal of one new large event every two years would be aggressive, yet achievable. SAG recommends establishing a goal for ongoing event development.

## The Carlsbad Experience

The development and prioritization of the Carlsbad tourism product is an integral part of the long-term strategic plan. The following are recommendations related to opportunities to continue to develop and enhance the overall visitor experience in Carlsbad.

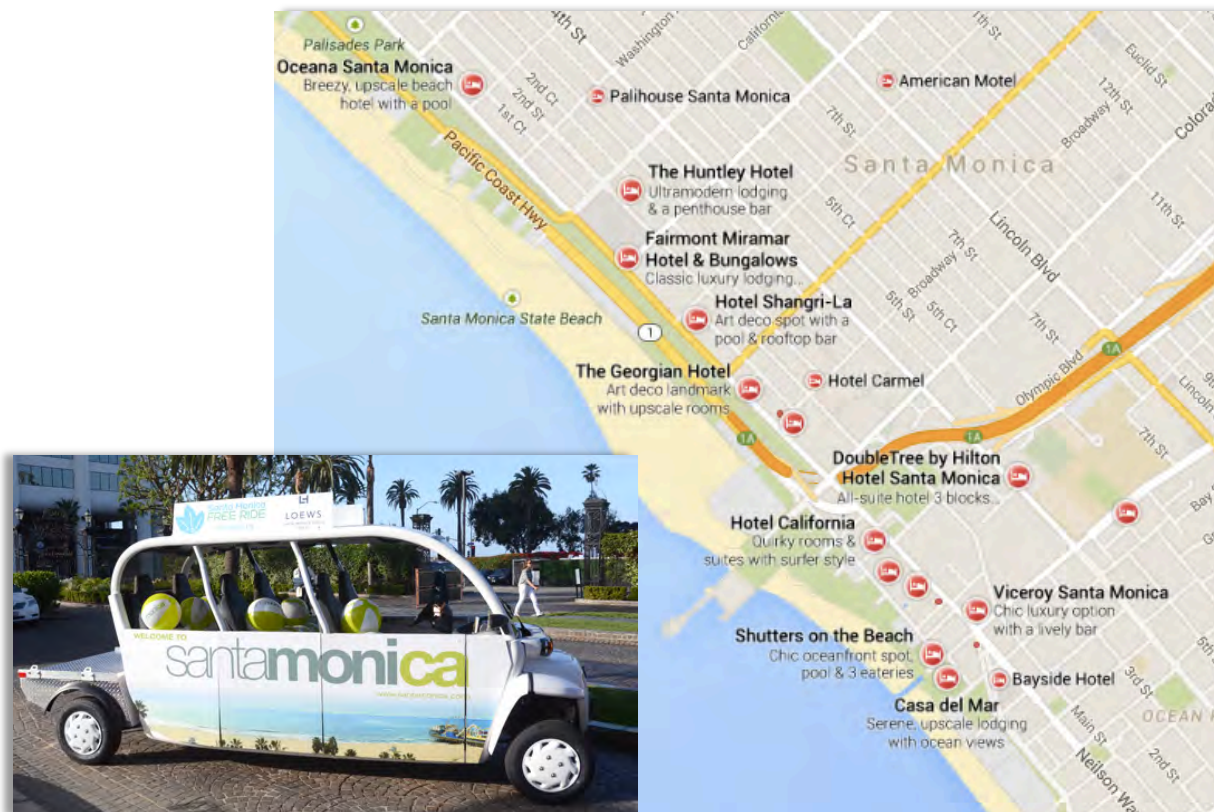

The results of the research highlighted the fact that after the beach and LEGOLAND, the recognition of other attractions or amenities dropped off significantly. The opportunity going forward is to determine the highest priorities and development of funding and recruitment plans.

The following are opportunities SAG recommends for future capital and marketing investment.

### Transportation System

The development of a transportation system to connect key points of interest such as the Carlsbad Village, retail, and hotels would provide an opportunity for visitors to experience Carlsbad without driving and navigating parking. This system could be funded through multiple businesses and business districts.

Competitive destinations have launched and implemented shuttles and services for tourism purposes to accommodate visitors transportation needs. Santa Monica is a good example of a hotel-sponsored tourism shuttle that was launched in May of 2014. The Santa Monica shuttle is free to visitors and its route covers Downtown Santa Monica, the Santa Monica Pier, Main Street, and Montana Avenue areas and is available at select hotels. Pedestrians can flag down the vehicles to be transported within the service area. The service runs seven days a week from 11:30am until at least 8pm, later on weekends and for special events.

## Carlsbad Lagoon – Agua Hedionda

The Agua Hedionda and neighboring lagoons create an opportunity for a new experience and are currently a fairly popular visitor experience. The below graphic delineates the different entities which currently have rights to areas of the Agua Hedionda Lagoon.

Based on research and stakeholder conversations, there are questions surrounding the rights and ownership of different parts of the Lagoon. Following is a description of each entity that operates on the lagoon and their rights to the space:

- **City of Carlsbad** – The City does not own the land or the water but has the right to grant permits for motorboat usage.
- **California Watersports** – California Watersports is a private operator who pays rent to a private landowner to maintain his business on private land along the lagoon. California Watersports also pays the City \$1.00 per boat launch for individual boats and personal watercrafts. California Watersports is considered a vendor of the City because of the existing agreement in place.
- **NRG (Power Company)** – NRG claims ownership of the surface of the water of the lagoon.
- **YMCA** – The YMCA entry point is on the north side of the middle section of the Lagoon. The YMCA leases the rights to use the Lagoon from the power company (NRG). It is understood that the YMCA lease is on an annual renewal with a 60-day notice. In previous years, the City used to lease the space from NRG and sublease to the YMCA. The current agreement is directly between NRG and the YMCA.
- **Hubbs Sea World Research Institute** – The Hubbs Sea World Research institute owns the land where the building is located and claims ownership of the surface of the water of the Lagoon.

- **Carlsbad Aquafarm** – the Carlsbad Aquafarm is a private company that cultivates Mediterranean Blue Mussels, Pacific Oysters and Ogo for sale to wholesalers and regional restaurants. The Aquafarm also raises different “live feed” for the aquaria trade industry.
- **Carlsbad Desalination Plant** – The Carlsbad Desalination Plant is owned, operated and maintained by Poseidon and will be operational in 2016. The site of the desalination plant is a 6-acre parcel in a portion of the site that leaves the majority of the EPS property open for potential recreational or redevelopment activity.

The entities described above own, lease, or have access to the Lagoon and are all separate from each other. The current organization of the Lagoon lacks continuity and oversight. The City has an opportunity to negotiate and/or increase oversight in certain areas to improve the Carlsbad experience when it comes to visitors of the Lagoon. SAG feels strongly that the Lagoon is a unique asset to the community and the tourism industry and the City is positioned to capitalize on this opportunity. SAG would recommend the following steps to improve the tourism product of the Agua Hedionda Lagoon:

1. Increase the parameters and quality requirements of the contract with California Watersports. The City collects revenue from the vendor and has an agreement with the operator although the lease is to a private landowner. At the next opportunity, the City should require higher quality standards of the operator in order to clean up the site and increase the quality of the patron experience. In conjunction with this, Visit Carlsbad would collaborate in the development of the annual marketing plan to include the overall approach to promoting the lagoon as a visitor experience. Visit Carlsbad would also proactively obtain visitor feedback to evaluate the quality of services.
2. Begin discussions with NRG and the YMCA about the current agreement and the best way for the City to make improvements for tourism and access for visitors. While the YMCA is an important community organization, they currently have sole rights to the middle section of the Lagoon, which is not maximizing the asset from the City’s perspective. Based on SAG’s research, the lease with NRG is year-to-year, which presents an opportunity to the City to get involved either directly with NRG or sublease from the YMCA.
3. Invest in a capital project on the Lagoon to increase the visitor experience. SAG conducted research and through stakeholder conversations, learned that the YMCA’s portion of the Lagoon is largely empty and presents an opportunity for an investment. SAG recommends completing further due diligence on the opportunity to invest in a capital project such as a Cable Wake Park (pictured below). A Cable Wake Park is a tow line operated by an electric motor on a series of towers. This creates a course that riders on wakeboards, wakeskates, waterskis, and wakesurfs follow on a tow line. The courses can be changed and updated to allow for different levels of difficulty. There are only seven Cable Wake Parks in California and none along the coast. Carlsbad is uniquely positioned to host a Cable Wake Park and would be the only coastal California destination to have an asset of this kind. An investment in a Cable Wake Park would also diversify the Carlsbad tourism product because the age range for riders is typically older than the current target market. The minimum age for riders at most Cable Wake Parks is 8 years old. Typically riders are in their teens and older.

The following images show a Cable Wake Park and how it could impact the Lagoon product:

## Conference/Convention Center

As mentioned in the previous section, SAG recommends conducting a more in-depth feasibility study to determine the viability of a conference/event center for Carlsbad. The preliminary demand analysis demonstrated a potential groups market for a conference center. The feasibility study should include site selection, flexible uses and the range of ownership and management models. This study could be completed in a cost effective manner with support from Visit Carlsbad in demand validation.

## Carlsbad Village

The Carlsbad Village provides a central business district for visitors staying in all areas of Carlsbad to enjoy. SAG has reviewed the current collaborative marketing between Visit Carlsbad and the Village. This was illustrated in the low referral numbers from the Visit Carlsbad website. There is an opportunity to fully integrate the collective marketing resources and activities.

One important note in reviewing feedback received by visitors and stakeholders is that Carlsbad Village is not mentioned often as an “attraction” when describing Carlsbad as a destination. This could be due to the ongoing need to expand the experiences as well as a lack of a cohesive marketing approach to increasing awareness and driving visitation.

SAG met with Urban Place Consulting to gain additional insight on current activities. The Village has had capital investment in streetscapes, way finding and lighting. They have also developed an active event schedule as a tool to increase visitation.

The recent plan developed for the Village included the intent to have an ongoing collaborative relationship with Visit Carlsbad. SAG recommends that this is established in the future. The collaboration should include the development of a joint marketing plan annually and involvement in

both organizations by the Executive Directors. This should include participation in both boards of directors.

The Village is also undertaking the challenge of gaining support and ultimately creating a PBID designed to produce an ongoing funding stream to support future economic development activity as well as marketing. The suggested budget for the Property-based Improvement District (PBID) should be reviewed and supported by the tourism industry after any suggestions are made for modifications.

**In 2014, there were 100 total web referrals from the Visit Carlsbad website to the Carlsbad Village website. This is an indicator of a future opportunity to increase the collaboration and cross promotional opportunities.**

In the area of product development, the current capital requests that will have the greatest impact on the visitor experience in the village should be a priority for advocacy support by Visit Carlsbad. These would include items that will improve the look and feel of the Village. The ongoing development of the Village creates a more viable Carlsbad experience for visitors

SAG also reviewed the potential of a transportation system that would connect the Carlsbad Village to retail opportunities as well as hotels and spas. There was support for this and an interest in being involved with the development of a plan.

SAG recommends the following

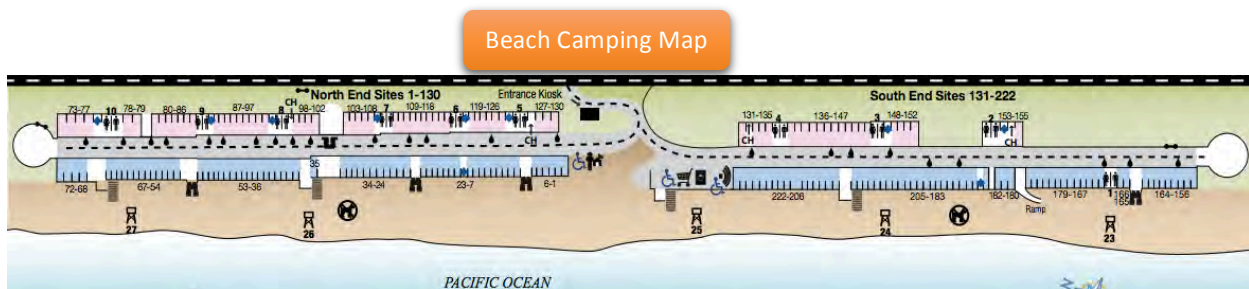

1. A more collaborative approach to marketing including the development of an annual marketing plan
2. A determination of which proposed capital projects warrant support and have the highest tourism value.
3. Review and support of the current proposed PBID based on agreed upon funding strategies
4. Participation in Visit Carlsbad and the Carlsbad Village Association board of directors by each organization.

## Beach Camping

Beach Camping is a popular activity in Carlsbad with over 200 spaces available on a daily basis. The program is administered by the State of California with rates ranging from \$35 to \$50 per day with second and third vehicles at \$15 each for entry. The opportunity exists to add landscaping and/or create new standards on the types of vehicles that are allowed on the site. Currently, the state-operated park is open year-round and experiences a similar seasonal swing the Carlsbad hotel properties experience. Reservations for beach camping are made through ReserveAmerica.com and can be made up to seven months in advance. Reserve America lists the following state-approved vendors for RV delivery: Albert's RV, Luv 2 Camp, MLG Enterprises RV Rentals, and Travel Time RV.

The State of California limits the size of RV's and campers to 35 feet in length. Each campsite can hold up to three vehicles and eight people. During the peak beach camping season (March-November), campers are limited to seven consecutive nights and must vacate the park for 24 hours before returning for additional nights. During the off season, campers are limited to 14 consecutive nights before having to vacate the camp. The maximum stay for campers is 30 days annually.

As of December 2014, over 80% of the campsites available to book are sold out. Historically, the beach camping reservations from June-August will be sold out by March. The images below show the length of the beach camping sites and also how the sites look from the nearby hotel properties:

Beach Camping is a valuable asset to Carlsbad and also presents a different type of product for different segments of visitors not staying in the hotels. SAG understands that while it is valuable to the specific segments it could, at times, have negative implications on hospitality properties on the beach and the overall beach experience. The view from an oceanfront room is not what guests expect when paying for an oceanfront view. This could have an impact on rates and the percentage of return visitors. SAG recommends the City begin dialogue with the California Department of Recreation and Parks to understand the City's rights in increasing guests' requirements and the City's ability to plant taller privacy shrubs and hedges in order to differentiate the spaces and provide an added level of quality for the patrons of the camp and the patrons of oceanfront hotel properties. SAG also recommends the CTBID facilitate further discussions with the State of California to increase the quality of the beach camping product to convert some of the RV sites to rental safari tents, yurts, mini-cabins, or furnished AirStream "retro" RVs. Similar products are currently offered in Santa Barbara. Packages developed in concert with the state could include partnerships with area hotels for spa services, dining experiences, etc. to further increase the beach camping product.

The recommendations delineated above, in conjunction with the current retail projects that are under development, will continue to advance Carlsbad as a destination. SAG recommends adopting these recommendations and determining the steps needed to begin the respective processes.

## Governance

SAG has researched and developed several governance models in tourism organizations nationally. The funding models as well as type of organization are practical factors in determining the most effective approach. There are key principles to consider in determining the most effective governance model. These include:

1. Governance and Accountability
2. Financial Oversight
3. Legal Compliance and Public Disclosure

### Effective Governance and Accountability

The success of the proposed approach will depend on the level of accountability and effective oversight of the governing body. This includes engagement and involvement in setting annual measurable goals and monitoring results on a regular basis.

Effective governance also includes industry leaders committing to invest the time in providing support and guidance to the executive director. There have been many stakeholders who have expressed interest in the future of tourism in Carlsbad. The success of the implementation of the recommendations will also depend on the level of commitment from the tourism industry in accepting governance roles and actively participating.

### Strong Financial Oversight

The fiscal oversight of the resources allocated to Carlsbad tourism is an area of focus in effective governance. This includes the compliance with General Accepted Accounting Principles (GAAP) as well as instituting processes to evaluate the effectiveness of key expenditures. SAG's recommendations include significant re-allocation of resources with an emphasis on key metrics and a focus on monitoring quantitative results. The governing body must actively participate in the development of this approach to ensure success.

### Legal Compliance and Public Disclosure

The area of legal compliance is generally overseen by a board and outside legal counsel working collaboratively with the City Attorney. The area of public disclosure includes the importance of communicating the results of the tourism efforts in a manner that is easily understood by a broad base of stakeholders. An effective governance model will monitor industry communications and solicit input on the overall effectiveness of this effort. The feedback that has been received in this process indicates a need to increase and focus future communication.

These areas point out the importance of an active and effective governance approach for the future of tourism. The current model creates a scenario where there are effectively two governing boards. Below are the current stated purposes of the CTBID and Visit Carlsbad:

### Current stated purpose of the Carlsbad Tourism Business Improvement District (CTBID)

- *To administer marketing and visitor programs to promote the City of Carlsbad as a tourism visitor destination and to fund projects, programs, and activities, including appropriate administrative charges that benefit hotels within the boundaries of the District.*

### Current stated purpose of Visit Carlsbad

- *The main purpose of the Carlsbad DMO is to execute an annual business plan on behalf of the City of Carlsbad Tourism Business Improvement District (CTBID). The DMO shall target commercial and leisure travelers and other potential hotel guests in order to stimulate demand of Carlsbad's hotel community and other services. This business will result in direct commercial benefit of the tourism community and will indirectly benefit the City of Carlsbad and its citizens. The DMO's vision for Carlsbad is to become a well-recognized travel destination in California and a preferred family destination in the Southern California Region.*

In review of these two statements above it is clear that the CTBID and Visit Carlsbad have very similar purposes. Both governing bodies are responsible for the oversight of Tourism Marketing for the City of Carlsbad. This includes the fact that both boards approve the annual marketing plan and budget for tourism expenditures.

### Boards of Directors – CTBID and Visit Carlsbad

The following are current members of the CTBID Board:

- Hector Becerra, Holiday Inn Carlsbad by the Sea
- Bill Canepa, Hilton Garden Inn Carlsbad Beach\*
- Larry Magor, Omni La Costa Resort and Spa\*
- Kim Akers, West Inn and Suites\*
- Nancy Nayudu, Pelican Cove Inn Bed & Breakfast
- Timothy Stripe, Grand Pacific Resorts\*
- Vacant Position, Park Hyatt Aviara Hotel

*Updated January 2015*

The following are current members of Visit Carlsbad Board of Directors:

- Mike Swyney, Hilton Garden Inn Carlsbad Beach\*
- Patsy Bock, Omni La Costa Spa and Resort\*
- Julie Zahner, Sheraton Carlsbad Resort & Spa\*
- Peter Kock, LEGOLAND California
- Jason McLaughlin, Park Hyatt Aviara Resort\*
- Linda Hopkins, West Inn & Suites
- Janissa Reyes, Carlsbad Premium Outlets\*

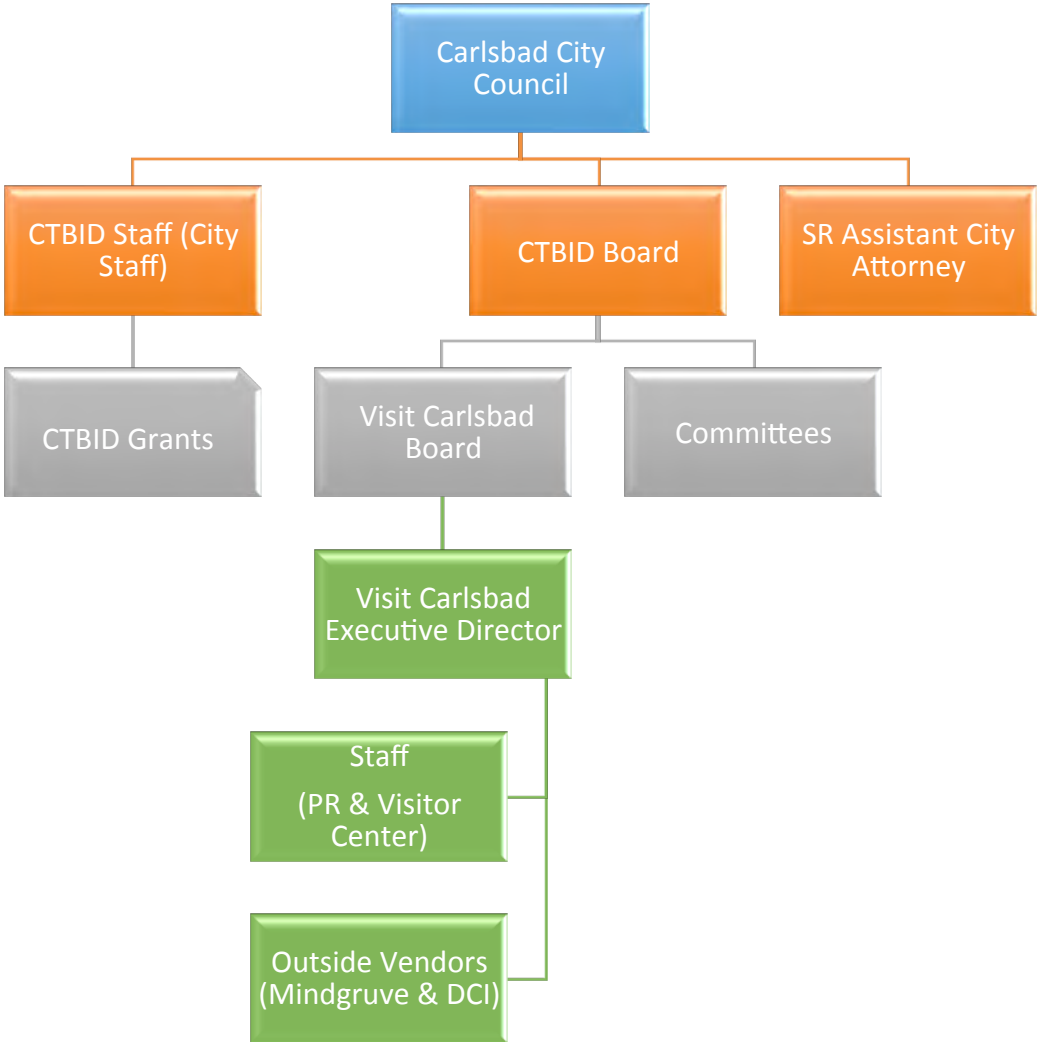

*\*Board members from the same organizations  
Updated January 2015*

The composition of both Boards of Directors is primarily hotel industry leaders and those designated above are members who come from the same organization. This indicates a potential opportunity to create a singular governing body with committees that are focused on the key areas for Carlsbad tourism. This would concentrate the oversight of the key planning tools and overall accountability with one Board of Directors. This restructuring would also allow for industry leaders to focus on specific sales and marketing initiatives through a committee structure. In the proposed structure, the respective entities would remain separate, however they would have common oversight.

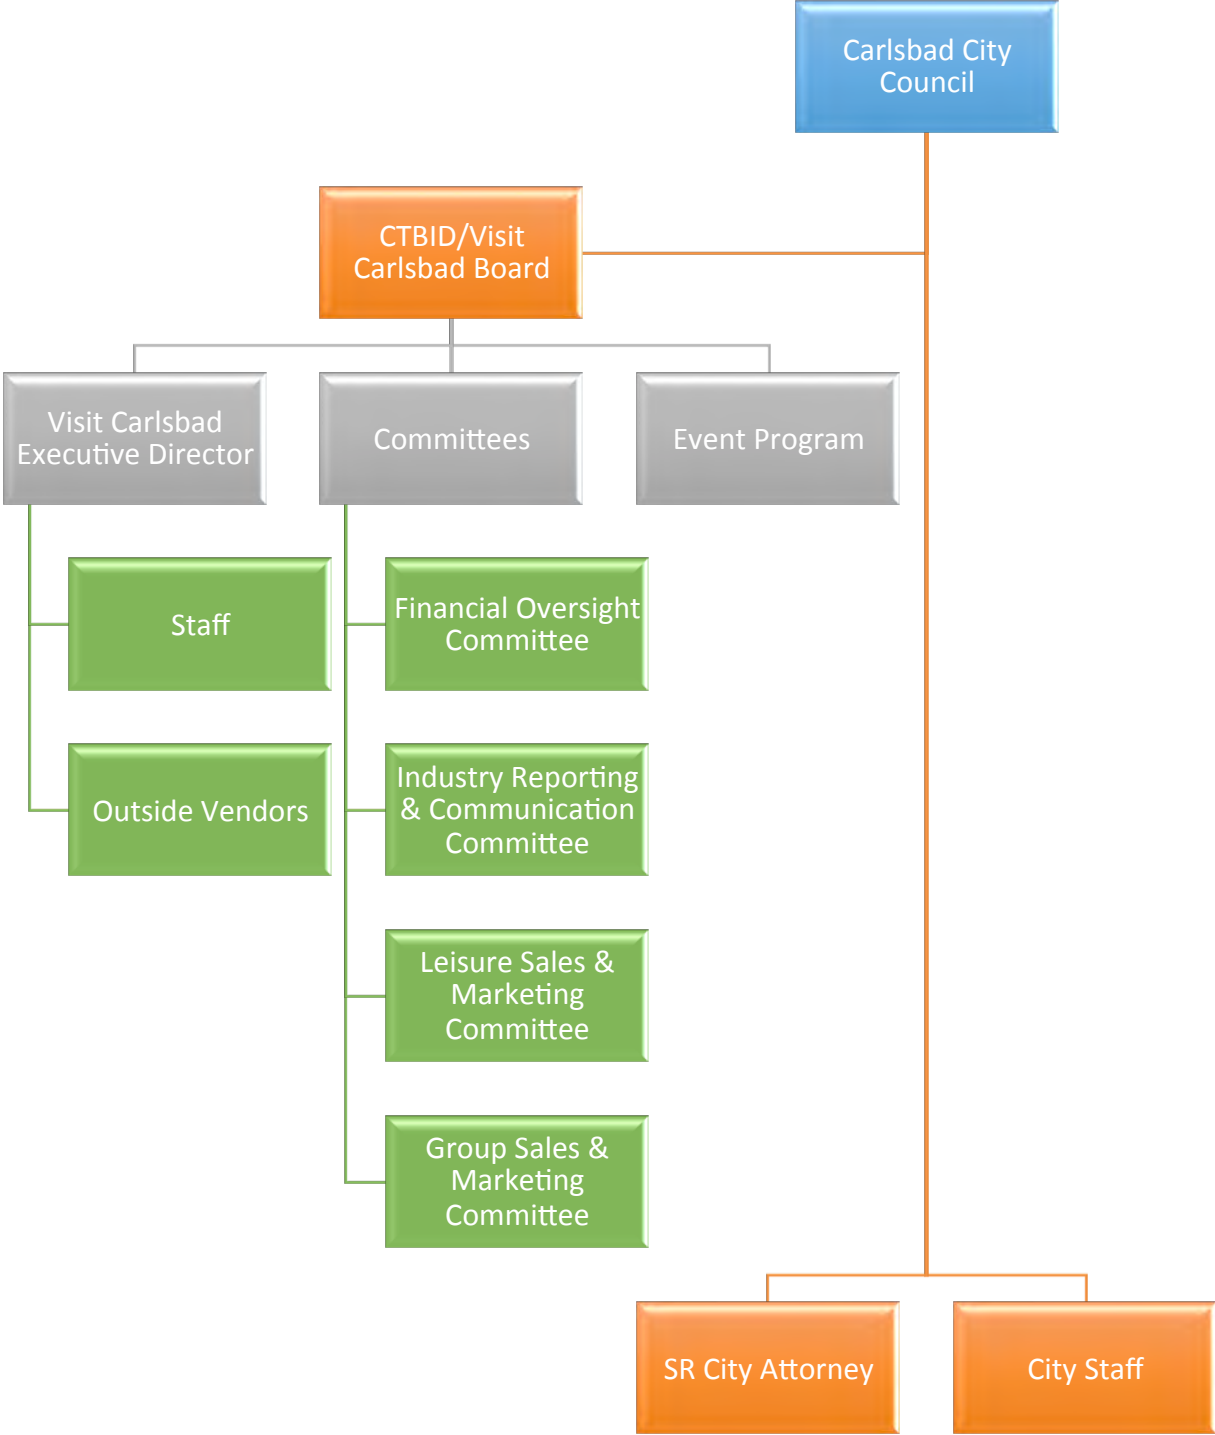

Another benefit of a streamlined governance model is the increased opportunity for the Visit Carlsbad staff and City staff to collaborate in supporting agreed upon tourism initiatives.

Four committees are recommended to focus on financial oversight, industry reporting and communication, leisure sales and marketing, and group sales and marketing.

Current Governance Model – Carlsbad Tourism

### Recommended Future Carlsbad Tourism Governance Model

SAG recommends the implementation of the above illustrated governance model. This will streamline the oversight of tourism marketing activities and increase the opportunity for active involvement in key initiatives as part of effective implementation and on-going success.

## Budget

The recommendations contained in this report relative to future sales and marketing initiatives can be implemented within the current resources of the CTBID and Visit Carlsbad. The proposed increases in funding create the opportunity to increase the penetration in targeted markets and develop a capital fund to support product and event development.

The following is an overview of the proposed budget that encompasses the sales and marketing recommendations

Highlights of these recommendations include:

### **Develop a Group Sales and Marketing Effort**

The proposed budget takes into account the resources needed to develop a Group Sales and Marketing initiative. The approach creates an equal division of resources between Group Sales and Marketing and Leisure Sales and Marketing.

### **New Position – Business Development Manager**

The proposed budget has an added senior position. The proposed Business Development Manager position is outlined in the groups sales and marketing section of the report. This senior level position would be responsible for the oversight and execution of the group sales and marketing plan as well as a focused approach to group business development.

### **Refocus of Leisure Sales and Marketing**

The overall resources dedicated to Leisure Sales and Marketing have been reduced and refocused on direct marketing. There is an increase in resources tied to Direct Marketing and the creation of Carlsbad experiences and packages. There is a reduction in the resources allocated to awareness campaigns and a reallocation of resources tied to Search Engine Optimization and Social Media Management.

### **Targeted Public Relations Effort**

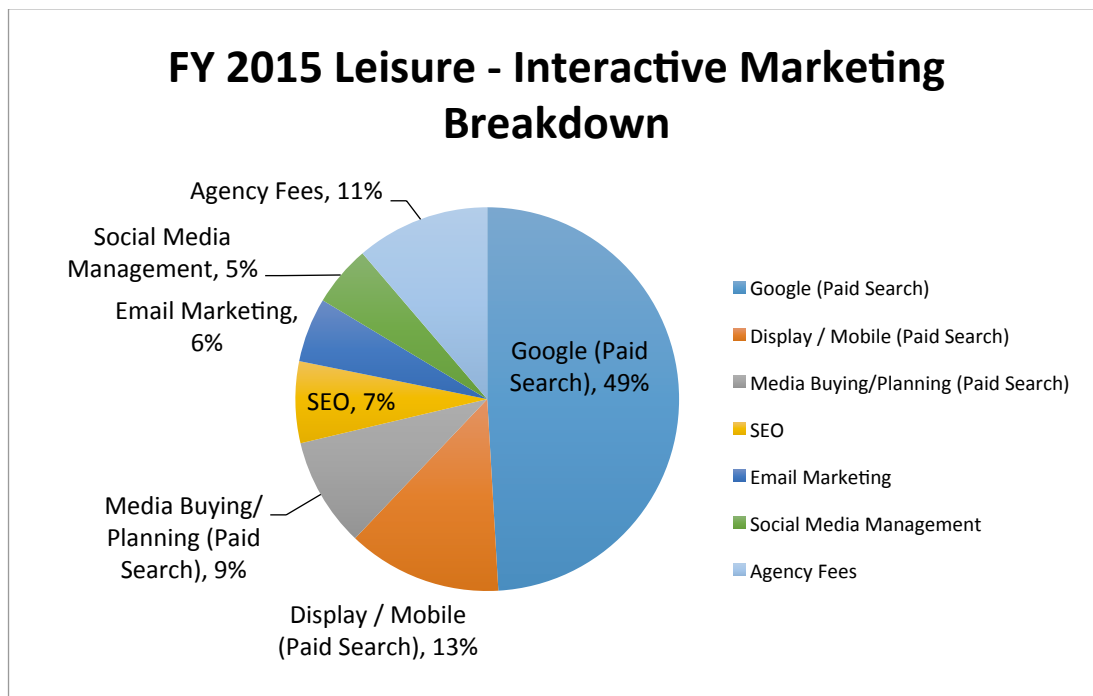

The budget has been reduced and the recommendation is to focus all PR efforts in the vehicles that are effective with the targeted audiences in both the leisure and group sales efforts.

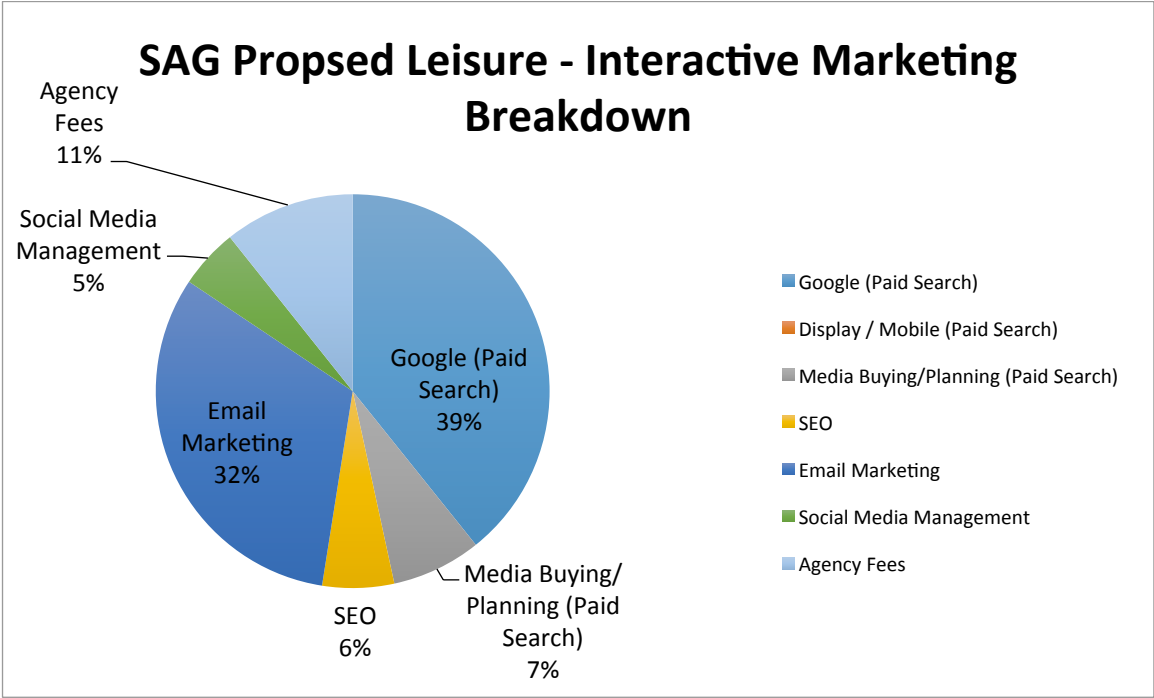

## Research

The proposed budget has an increase in annual resources for research. This will enable Visit Carlsbad to refine target markets on an annual basis.

The chart below is a summary of the reallocations of the current Visit Carlsbad budget to support the implementation of the recommendations.

Leisure – Interactive Marketing Breakdown			
	Visit Carlsbad FY2015	SAG Proposed	Variance
<b>Leisure-Interactive Marketing</b>	331,609	182,000	149,609
• <b>Google (Paid Search)</b>	162,737	80,000	82,737
• <b>Display / Mobile (Paid Search)</b>	43,155		43,155
• <b>Media Buying/Planning (Paid Search)</b>	30,555	15,000	15,555
• <b>SEO</b>	22,807	12,000	10,807
• <b>Email Marketing</b>	18,000	65,000	-47,000
• <b>Social Media Management</b>	17,000	10,000	7,000

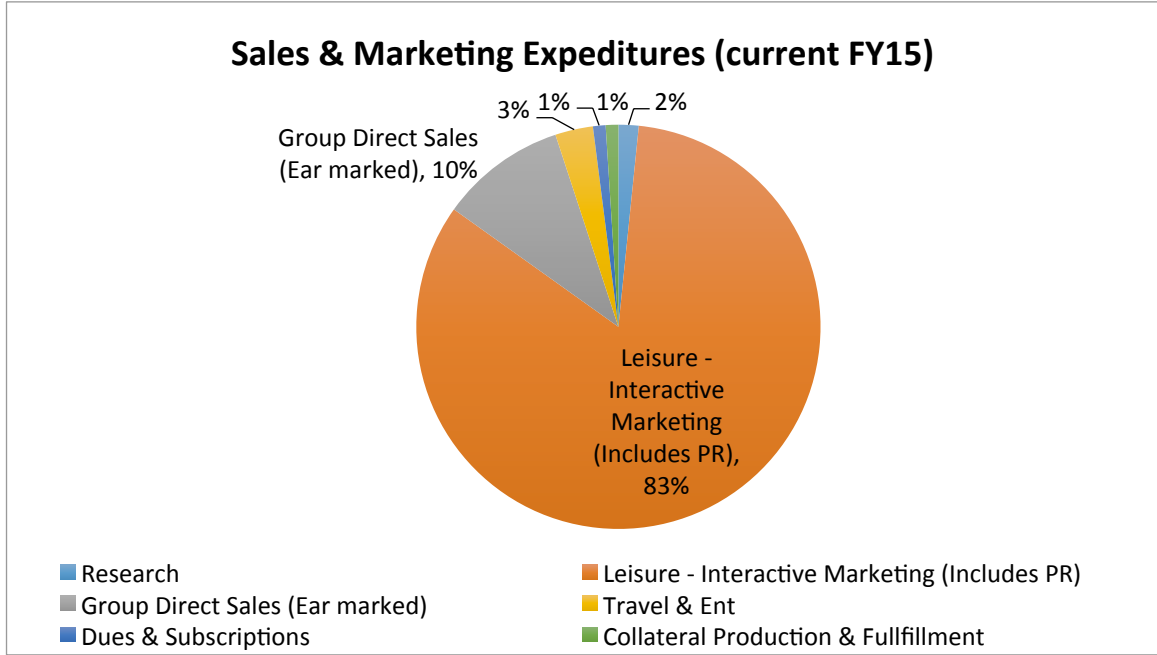

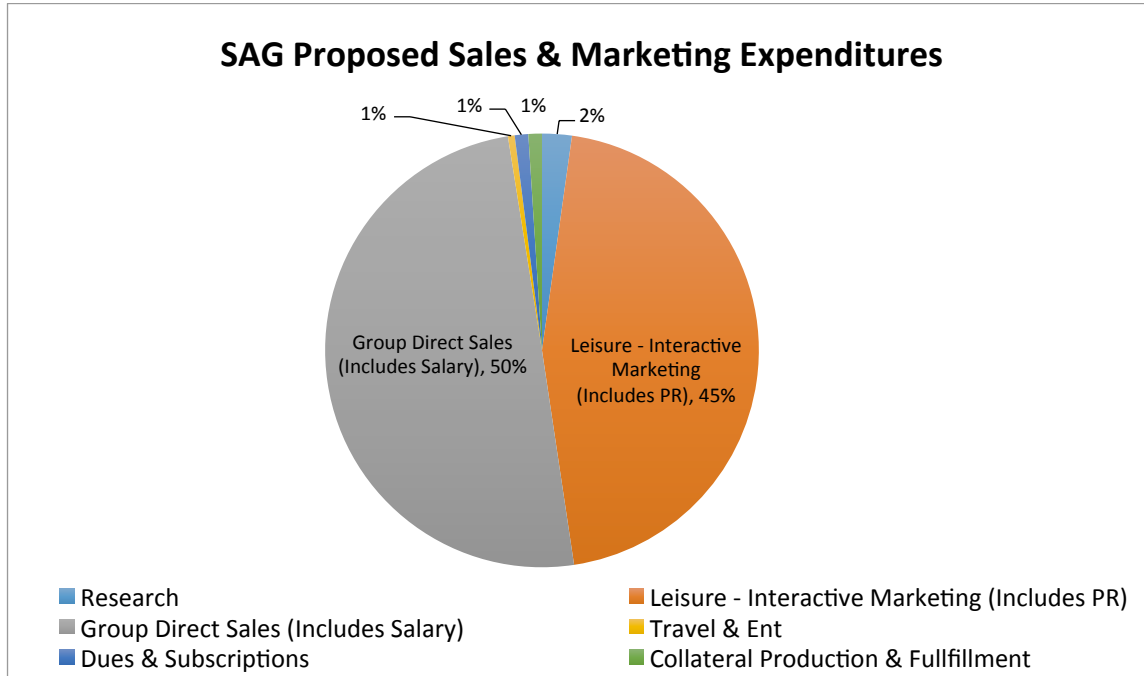

The charts above reflect the shift in focus for future Leisure Sales and Marketing. This reflects the shift to a direct marketing approach with a smaller budget that is focused on the shoulder periods.

**Overall Sales and Marketing Expenditures**

The following charts demonstrate the overall shift in resources from the current budget to a proposed reallocation of resources to support the overall recommendations

The charts above and the table below reflect the proposed shift in resources.

Current FY15 Promotional Programs Breakdown		SAG Proposed Promotional Programs Breakdown	
Research	8,000	Research	11,000
Leisure -Interactive Marketing (Includes PR)	412,609	Leisure - Interactive Marketing (Includes PR)	225,500
Group Direct Sales (Earmarked)	50,000	Group Direct Sales** Includes Salary	247,500
Travel & Ent	15,000	Travel & Ent	2,500
Dues & Subscriptions	5,000	Dues & Subscriptions	5,000
Collateral Production & Fulfillment	5,000	Collateral Production & Fulfillment	5,000
<b>Total</b>	<b>\$495,609</b>	<b>Total</b>	<b>\$496,000</b>

It reflects a 50/50 allocation of resources between the group and leisure group sales and marketing activities. SAG recommends this allocation in conjunction with stakeholder input and recommended shift in approach in Leisure Sales and Marketing.

### Overall Current and Proposed Budget

The following reflects the current line item budget for Visit Carlsbad and the recommended reallocations to support the proposed new directions in leisure and group sales and marketing.

	Adopted FY15 Budget	SAG Proposed Budget	SAG Variance to FY15 Budget Dollars Difference	SAG Variance to FY15 Budget Percent
<b>INCOME</b>				
Public Sources				
CTBID Revenues	755,500	755,500	755,500	
Private Source Income				
Total Public Sources	755,500	755,500	755,500	
Carry Over from 2013				
<b>TOTAL INCOME</b>	<b>755,500</b>	<b>755,500</b>	<b>755,500</b>	
<b>EXPENSE</b>				
Labor				
Salaries	189,817	\$ 289,817	\$ 100,000	35%

Postage	974	974	\$ -	0%
Taxes	150	150	\$ -	0%
Telephone	5,000	7,500	\$ 2,500	33%
Professional Services	5,600	5,600	\$ -	0%
Volunteer Program	1,000	1,000	\$ -	0%
Miscellaneous	1,000	3,500	\$ 2,500	71%
Utilities	2,500	2,500	\$ -	0%
Computer Expense	2,000	2,000	\$ -	0%
Total G&A	25,574	\$ 30,574.00	\$ 5,000	16%
TOTAL EXPENSE				
	755,500	\$ 754,331.00	\$ (1,169)	0.7%

The proposed budget above includes the recommended changes in the leisure sales and marketing efforts as well as group sales and marketing. The proposed budget does not include capital/product recommendations from the previous sections including:

- Feasibility study for conference center
- Feasibility study for Lagoon improvements
- Implementation of beach camping improvements
- Any capital improvements related to product development

## Funding

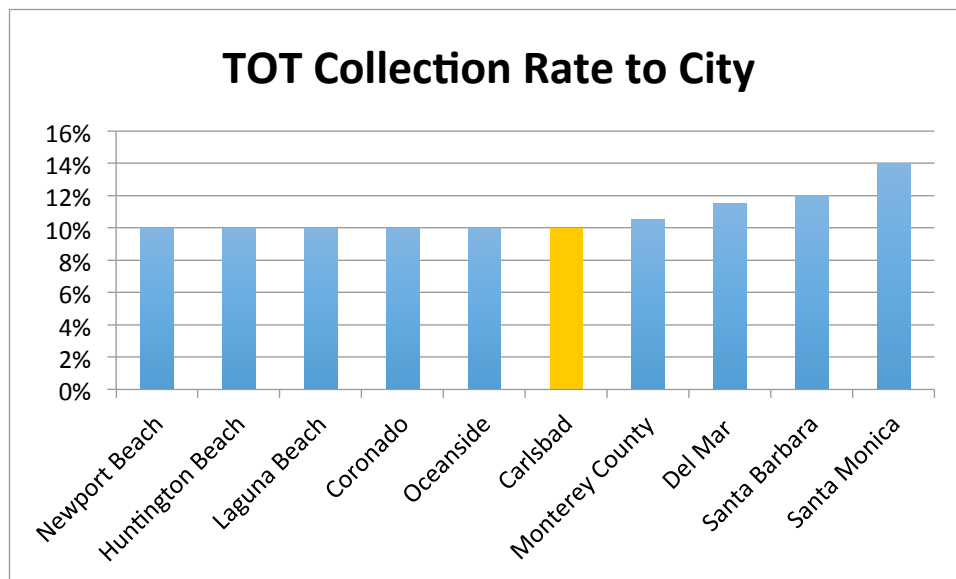

The results of the benchmarking research indicated that the level of funding for tourism marketing was low compared to other comparable destinations. The current visitor levels during the shoulder periods signify the importance of dedicated tourism resources in the future. The ratio of tourism dollars to hotel rooms was a key indicator as Carlsbad was the second lowest in the competitive set that was reviewed.

Another important outcome of the benchmarking study was the fact that Carlsbad was the only city with no TOT funding for tourism marketing.

SAG recommends taking a comprehensive approach to finalizing a new funding plan for the future of tourism. A combination of broad stakeholder involvement and a restructuring of the current approach to TOT funding is the foundation of the recommendation. The funding recommendations are predicated on the approval, adoption, and implementation of the stakeholder supported recommendations contained in this report. Without stakeholder support for future tourism efforts, SAG does not recommend instituting new funding strategies.

Currently the TOT percentage in Carlsbad is 10%. This provides an opportunity to potentially increase the TOT in Carlsbad for dedicated marketing and tourism product development efforts. The below charts, also included in the benchmarking section of this report, illustrate the competitive destinations' handling of TOT collection and distribution.

The chart below shows the TOT collection rate imposed on hotel rooms by the competitive city governments.

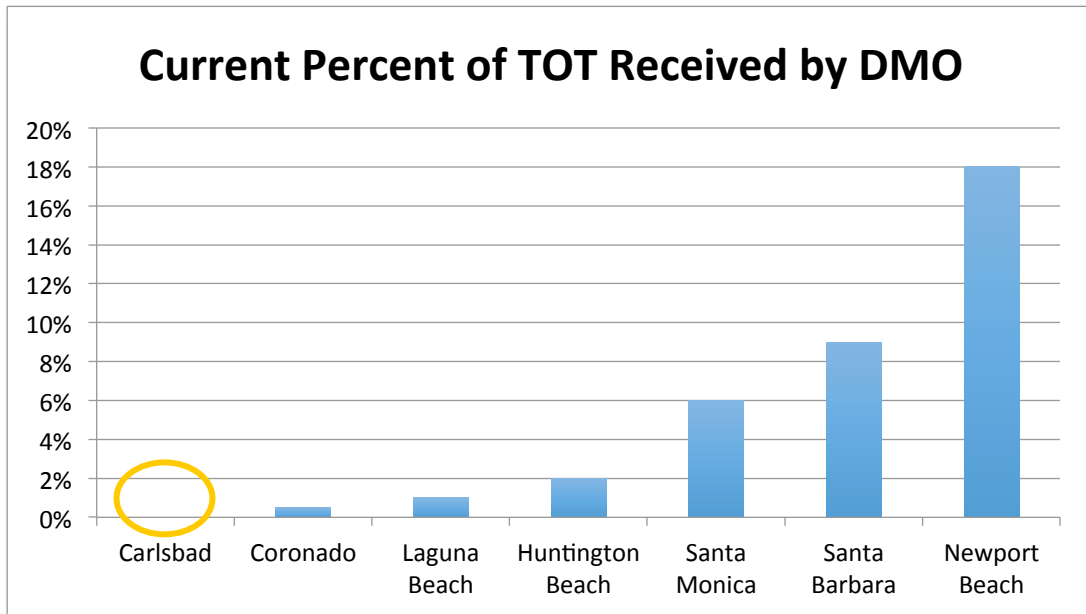

### New Funding Approach Components

The following are viable components of a new approach to funding:

**1. Transient Occupancy Tax Options**

- a. Increase the current TOT rate charged to Carlsbad Hotels
  - i. In conjunction with a dedicated commitment to spend the incremental dollars on agreed upon marketing efforts as well as Tourism product development, the TOT rate can be increased to 12%. This will raise two to three million dollars annually. The review of competitive destinations indicates an opportunity to raise the TOT percentage collected without a significant impact on occupancy.
  
- b. Reallocate a portion of the Transient Occupancy Tax to Tourism Marketing
  - i. SAG recommends in addition that a portion of the current TOT is allocated to tourism marketing. The formula for this would expand and contract based on the overall TOT collected. This allocation would also be predicated on the achievement of agreed upon goals. This “pay for performance” approach will support the overall goal of supporting measurable tourism activities in the future. The below chart shows in ascending order the destinations that receive a percentage of the TOT funding.

SAG recommends that 10% of the TOT is allocated in the first year with an incentive plan in place that could increase this to 20%.

**2. Create a larger “district” to include the Carlsbad restaurant industry**

Restaurants in Carlsbad are beneficiaries of effective tourism marketing. They are featured in all of the tourism marketing materials and sales tax revenues show an increase in restaurant activity during times with strong visitor demand. The segments that have been identified in the lifestyle segment study are also inclined to dine out when they are traveling. The success of these targeted efforts will have a direct impact on the restaurant industry. The restaurants that

would be included in an expanded district would be those that are the most positively impacted by tourism efforts.

Similar DMOs have included restaurants and other industries to support the tourism organization. For example, Mammoth Lakes Tourism in California leverages the following assessments on non-hotel entities to support the tourism industry:

Also, Visit California applies an assessment to multiple industries that partner with the state organization. The current assessment rate for accommodations, restaurants, retailers, attractions, transportation companies and travel service providers that have gross California receipts of \$1 million or more is 0.065%, and is applied only to tourism-related revenues. SAG also recommends that additional industries are considered for inclusion in the CTBID in the future

### 3. Increase or modify the current CTBID fees

Feedback from the hotel community indicated little interest in increasing the current CTBID fees until an industry supported plan was adopted. In conjunction with the approval and adoption of the agreed upon recommendations, SAG recommends an increase of 50 cents per occupied room to begin in the fiscal year of 2016. The implementation of the recommendations would be well underway at this point.

Another option would be to modify the current CTBID format to a percentage of the participating hotel rate. This could potentially raise additional funds and reallocate funding based on the overall revenue generation.

SAG estimates that the combination of the recommended funding would raise between \$1.5 and 3 million dollars. With the new additional revenue raised, Visit Carlsbad's budget could increase to \$1,755,500 with an additional fund developed for future Carlsbad tourism product development. This would move Carlsbad to \$399 marketing dollars per hotel room.

The goal for increased funding is to create more frequency in impacting the targeted markets that have been identified through research and stakeholder input. The increased funding would warrant increasing the leisure and group room night goals. The other important opportunity would be to have more resources for recruiting or developing new signature events.

The development of a tourism capital development fund creates the opportunity to support projects including a new transportation system, the Carlsbad Village efforts, the feasibility study of the

conference center and enhancement to the lagoon experience. SAG recommends this from a portion of the fund raised with the above recommendations.

**Return on Investment**

The goal of an increased funding stream for Carlsbad’s tourism efforts is to create an increased, measureable return on investment. The new recommendations for future tourism marketing efforts will provide “trackable” data to determine the overall economic return. Based on a blended spending multiplier for a visitor to Carlsbad of \$328 per person\*, the new recommended funding must generate an additional 3,050 visitors annually to “breakeven” on the new marketing expenses (assumes 1 million in new marketing revenue). Many destinations strive for 7 to 1 rate of return for dollars expended compared to direct spending generated. With that in mind, the newly funded tourism efforts would need to generate over 21,000 incremental visitors

\* 2013 SDTA Visitor Profile

## Conclusion

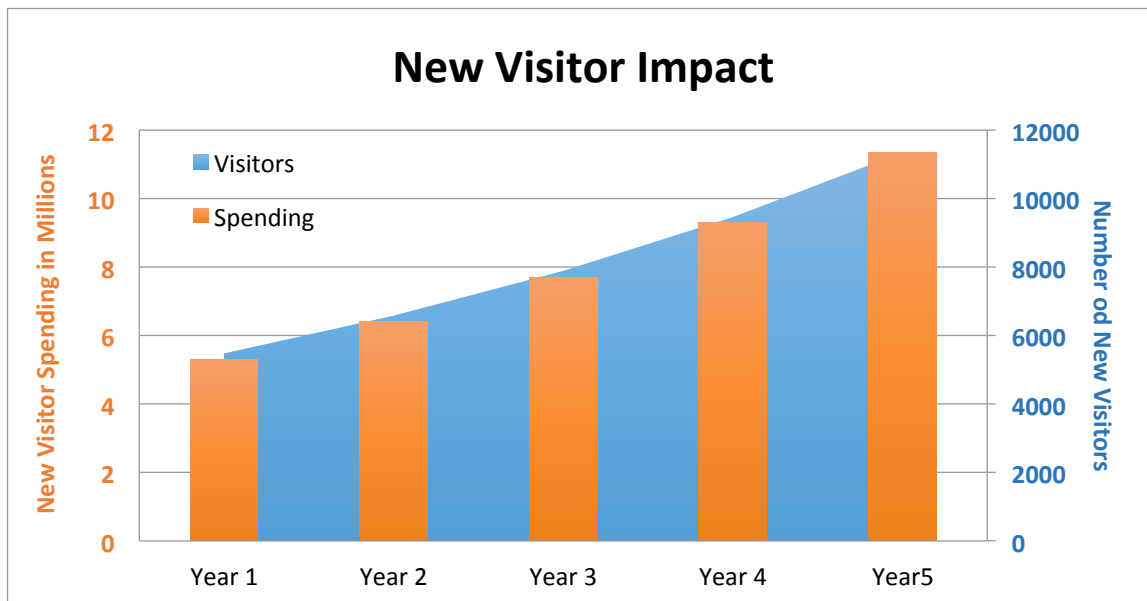

A comprehensive approach to gathering information, conducting extensive research and consistent stakeholder involvement has produced a new direction for tourism sales and marketing in Carlsbad. The direction that has been developed and recommended in this study process is designed to maximize the effectiveness of the current tourism resources and create a path for further investment. The interest in future increased investment will be validated by the intent to create a sales and marketing approach that is razor focused and highly measurable.

Carlsbad is a destination with many unique attributes that appeal to distinct audiences. The results of the market segment research in conjunction with Nielson and Resonate demonstrates the ability of Carlsbad to appeal to an upscale audience without kids as well as a family audience with kids who are interested in theme park type activities. The findings have uncovered an opportunity to focus on the upscale market segment and bring new visitors during the much needed shoulder periods.

The development of an aggressive and complimentary group sales and marketing plan will be another cornerstone of the direction. This plan has been developed in collaboration with the hotel community and is ready for implementation. This will take a few years to develop and can pay large dividends including validating the value of a new conference/event center for Carlsbad. The unique Carlsbad experience will provide a great differentiator for attracting group business.

### First Year Goals – Raising Awareness

The combination of the proposed goals for room nights generated for the first year (3,600 leisure and 1,875 group) is 5,475 room nights. This equates to the “trackable” room nights for the first year that will include a significant amount of implementation activity. These numbers should grow significantly in future years as databases are developed and the marketing efforts produce higher conversion. The full development of these efforts should increase annual room night production by twenty to thirty percent. The below is an illustration of “trackable” new visitors to Carlsbad over 5 years and the estimated visitor spending based on the 2013 SDTA Visitor Profile Study, which equates to 32,857 new visitors and \$39.7 million in new spending.

It is important to note that the proposed efforts will also increase the awareness of Carlsbad with the targeted individual and group markets with consistent frequency and a customized message. This will influence visitation beyond the visitors that can be tracked directly.

The successful implementation of the recommendations contained in this report will take a broad base of support from the City of Carlsbad, CTBID, Visit Carlsbad and the tourism stakeholders. The development of the direction that is recommended has been created with on-going input. This will lead to consensus that will be the foundation of future success. The recommended governance model will provide consistent oversight coupled with active committee involvement. This will increase the efficiency of the implementation process.

A full assessment of the needs and roles of each of the above partners should be conducted in conjunction with the implementation process. A first step would be a structured longer session to review all of the recommendations and assess and define the roles and accountability of the above-mentioned stakeholders.

Strategic Advisory Group would again like to thank the individuals who committed time and gave important insight during this process. The high level of engagement provided critical guidance for this report and the final recommendations.

## Recommendation Matrix

Recommendation	Strategy	Report Pages	Tactic	Timeframe
<i>Communication</i>				
<b>Regular stakeholder communication</b>	Keep stakeholders informed and part of the process. Allows for fluid communication to a large audience and provides transparency of the organization.	2	<ul style="list-style-type: none"> <li>• Monthly 1-2 page email outreach with updates and updates on metrics tracking.</li> <li>• Annual report on success measurements</li> </ul>	<ul style="list-style-type: none"> <li>• Immediate</li> </ul>
<i>Research</i>				
<b>Research plan</b>	Budget resources to execute research initiatives. Continue to refine target marketing efforts. Determine success of on-going efforts	54	<ul style="list-style-type: none"> <li>• Conduct a Visitor Profile Study every three years</li> <li>• Conduct a benchmarking study biannually</li> <li>• Conduct a Target Audience Study biannually</li> <li>• Conduct a Meeting Planner Survey biannually</li> </ul>	<ul style="list-style-type: none"> <li>• Approve research plan for 2015-2016 fiscal year</li> <li>• Conduct first series of research plan accordingly</li> </ul>
<i>Resources</i>				
<b>Refocus a majority of the tourism resources on impacting the Shoulder Season</b>	Allocate more of the marketing budget for targeted Shoulder Season campaigns	4, 8, 55-62	<ul style="list-style-type: none"> <li>• Confirm direction for Shoulder Season</li> <li>• Develop direct marketing campaigns for specific segments during the Shoulder Season</li> <li>• Measure success</li> </ul>	<ul style="list-style-type: none"> <li>• Begin to plan immediately</li> <li>• Budget approval 2015-2016 fiscal year</li> </ul>
<b>Reallocate marketing resources for group business</b>	Utilize the current budget to support a group sales effort	4, 63-70	<ul style="list-style-type: none"> <li>• Confirm/adopt group sales plan</li> <li>• Form the oversight committee</li> <li>• Set and agree upon goals</li> </ul>	<ul style="list-style-type: none"> <li>• Begin to plan immediately</li> <li>• Budget approval 2015-2016 fiscal year</li> </ul>

<i>Measurement</i>				
<b>Institute a new approach to measurement and reporting</b>	Keep a broad base of stakeholders informed through a monthly report	2, 4	<ul style="list-style-type: none"> <li>• Create/continue the monthly email report to stakeholders tracking quantitative success measures</li> <li>• Include room nights converted, packages sold</li> <li>• Include qualitative feedback on awareness</li> </ul>	<ul style="list-style-type: none"> <li>• Have agreed upon goals and metrics in place by 2015-2016 fiscal year</li> <li>• Have plan in place for adoption 2015-2016 fiscal year</li> </ul>
<i>Leisure Sales and Marketing</i>				
<b>Develop a highly targeted approach for leisure sales and marketing</b>	Utilize a direct marketing approach to new and expanded target markets for leisure travel	4, 40-54, 55-62	<ul style="list-style-type: none"> <li>• Select and confirm top 5 new segments from Nielsen results to pursue for the first 1-3 years</li> <li>• Create specific experiences for the targeted market segments</li> <li>• Work closely with an e-marketing partner to develop a platform for implementation and creative support</li> <li>• Set and agree upon goals</li> <li>• Utilize new success measures to track progress</li> </ul>	<ul style="list-style-type: none"> <li>• Decide on top segments immediately</li> <li>• Have plan approved for fiscal year 2015-2016</li> <li>• Have creative partner in place for 2015-2016 fiscal year</li> <li>• Have implementation tools in place by August 2015</li> <li>• Track success in the selected segments for years 1-3</li> <li>• Reevaluate market segments after three years</li> </ul>
<b>Refocus target markets for leisure travel</b>	Utilize the Nielsen segmentation results to target new markets that have already indicated presence in Carlsbad for tourism growth in Shoulder Season	5, 40-54	<ul style="list-style-type: none"> <li>• Select and confirm top 5 new segments from Nielsen results to pursue for the first 1-3 years</li> <li>• Keep family-friendly attitude, but add targets direct marketing for these new segments</li> <li>• Track success in new markets</li> </ul>	<ul style="list-style-type: none"> <li>• Decide on top segments immediately</li> <li>• Have plan approved for fiscal year 2015-2016</li> <li>• Reevaluate target markets after three years</li> </ul>

<i>Group Sales and Marketing</i>				
<b>Create and implement a new group sales and marketing effort</b>	Utilize MINT search results to target group business. Reallocate resources with measurement plan	5, 63-70	<ul style="list-style-type: none"> <li>• Recruit staff member</li> <li>• Approve a vertical market approach and establish targets</li> <li>• Obtain and implement a sales and marketing software platform</li> <li>• Execute a group destination awareness campaign</li> <li>• Complete a feasibility study on the possibility of adding a conference center for Carlsbad</li> </ul>	<ul style="list-style-type: none"> <li>• Begin recruiting staff member in July 2015 with new hire starting in August 2015</li> <li>• Implement new plan September 2015</li> <li>• Obtain software platform by January 2016</li> <li>• Complete feasibility study on conference center by year 3 (2018-2019 fiscal year)</li> </ul>
<i>Governance</i>				
<b>Create a unified approach to governance</b>	Bring the CTBID and Visit Carlsbad boards together by creating a singular governing board with active committees	5, 82-86	<ul style="list-style-type: none"> <li>• Perform the necessary legal actions to change the bylaws of Visit Carlsbad and the CTBID to meet as one board</li> <li>• Create one mission on behalf of the organization to market the destination and drive revenue to the City</li> <li>• Create/elect one board of 7-10 people</li> <li>• Create four committees to form accountability measures and delegate responsibilities including: finance, communication and reporting, leisure sales and marketing and group sales and marketing committees.</li> </ul>	<ul style="list-style-type: none"> <li>• Bring to City Council for review and adoption by March 2015</li> <li>• City Council time to select board members and City Attorney to reevaluate the legal entity by budget approval period for 2015-2016 fiscal year</li> <li>• Have new board in place by July 2015</li> </ul>

<i>Funding</i>				
<b>Implement a performance-based approach to new funding</b>	Utilize TOT funds through an increase and reallocation.	5, 92-94	<ul style="list-style-type: none"> <li>• Set and approve goals for TOT annual collection</li> <li>• Increase the current TOT to 12%</li> <li>• Allocate 10% of the current TOT collected to support tourism marketing</li> </ul>	<ul style="list-style-type: none"> <li>• Approve funding increases by mid year 2016</li> </ul>
<b>Create a larger district to include additional partners and increase funding</b>	Involve restaurants and additional beneficiaries of tourism spending to include a tourism tax on sales	5, 92-94	<ul style="list-style-type: none"> <li>• Develop applicable partners for tourism funding, i.e., restaurants, retail and attractions</li> <li>• Begin with restaurants as first industry to be included</li> <li>• Create and approve percentage tax for relative partners</li> </ul>	<ul style="list-style-type: none"> <li>• Partners support by June 2015</li> <li>• Implementation by 2016-2017 fiscal year</li> </ul>
<b>Increase the current fees for the CTBID</b>	Incrementally add a small amount to the CTBID fees	5, 92-94	<ul style="list-style-type: none"> <li>• Increase current CTBID fees by \$0.50</li> </ul>	<ul style="list-style-type: none"> <li>• Implementation of the \$0.50 increase should be in place by 2017-2018 fiscal year</li> </ul>

*Tourism Product Development*

<p><b>Create unique Carlsbad experiences</b></p>	<p>Invest in Carlsbad's assets to develop additional tourism experiences</p>	<p>5, 73-81</p>	<ul style="list-style-type: none"> <li>• Develop and implement a transportation system to connect key points for tourists</li> <li>• Utilize the City's position to negotiate terms for rights to the Agua Hedionda Lagoon</li> <li>• Increase the parameters of the contract with California Watersports for higher quality standards</li> <li>• Negotiate terms with NRG and the YMCA for tourism access to the Lagoon</li> <li>• Invest in a capital project to increase the visitor experience</li> <li>• Develop a long-term partnership with the Carlsbad Village for increased marketing, and packaging and advocacy</li> <li>• Engage the California Department of Recreation and Parks to understand the City's rights in increasing requirements and adding privacy shrubs</li> </ul>	<ul style="list-style-type: none"> <li>• Have transportation system outlined and approved in 2015-2016 fiscal year with contractor in place by 2016-2017</li> <li>• Have terms for rights to the Lagoon by City/Visit Carlsbad by fiscal year 2016-2017</li> <li>• Invest in a feasibility study/RFP process for a capital project on the lagoon by fiscal year 2016-2017</li> <li>• Solidify the Carlsbad Village as a partner in marketing and transportation by January 2016</li> <li>• Finalize beach camping rights on City's behalf by January 2016</li> <li>• Plan in place to augment the visibility issue of beach camping by 2016-2017 fiscal year</li> <li>• Implement beach camping augmentation in fiscal year 2016-2017 with completion prior to January 2017</li> </ul>

## **Summer Season Top 15 PRIZM Segments**

- **Kids and Cul-de-Sacs** – upper middle class families with children living in the suburbs. These families have a household median income of \$71,830 and the parents’ range in age from 25-44. The parents are college educated and hold professional positions. These families are in the “melting pot” category and are White, Black, Asian, Hispanic and Mixed. These families order on target.com, watch the X Games on TV and drive minivans like the Honda Odyssey.
- **Movers & Shakers** – wealthy, older households without kids living in the suburbs. These households are 45-64 with a median income of \$101,517. This segment is college educated carrying graduate degrees and holding management positions. They are mostly White and Asian. These households play tennis, shop at Nordstrom and drive higher end SUVs i.e., Land Rover.
- **Upper Crust**– significantly wealthy, older households without kids living in the suburbs. This segment is 55+ with a median household income of \$110,117 and are classified by Nielsen as millionaires. These households are college educated with graduate degrees in upper management positions. They are mainly White. This segment shops at high end store like Saks Fifth Avenue, have vacationed in Europe, watch and play golf and drive luxury vehicles i.e., Lexus LS.
- **The Cosmopolitans** – wealthy, mid to older age range, mostly without kids living in urban areas. This segment is 55+ with a household income of \$58,313 working in white-collar settings. This segment is classified as a “Melting Pot” and includes White, Asian, Black, Hispanic and Mixed. These households shop at Macy’s, have vacationed outside the US, watch Masterpiece Theatre and drive upper midclass vehicles i.e., Lincoln Town Car - Flex Fuel.
- **Money & Brains** – wealthy, older family mix within the household, living in urban areas. The older family mix means the children are mostly older teenage or college age dependents. The parents are 45-64 with a median household income of \$88,837 and are college educated in management positions. These households are classified as a “Melting Pot” and include White, Asian, Black, Hispanic and Mixed. This segment shops at stores like Banana Republic, travel for business occasionally, watch tennis and drive luxury SUVs i.e., Mercedes Benz E Class.
- **Home Sweet Home** – Widely scattered across the nation's suburbs, the residents of Home Sweet Home tend to be upper-middle-class married couples living in mid-sized homes without children. The adults in the segment, mostly under 55, have gone to college and hold professional and white-collar jobs. With their upper-middle-class incomes and small families, these folks have fashioned comfortable lifestyles, filling their homes with exercise equipment, TV sets, and pets. The Home Sweet Home Segment has a median household income of \$ 68,555 and is in the Melting Pot category made up of 5 White, Black, Asian and Mixed ethnicities. This segment shops from buy.com, download music from iTunes, watch shows like The Amazing Race, read Wired Magazine and drive middle class vehicles like the Mazda CX-7.

- **Middleburg Managers** - Middleburg Managers arose when empty nesters settled in satellite communities, which offered a lower cost of living and more relaxed pace. Today, segment residents tend to be middle class with solid white-collar jobs or comfortable retirements. In their older homes, they enjoy reading, playing musical instruments, indoor gardening, and refinishing furniture. This segment is upper middle class with a median household income of \$53,379. Middleburg Managers are mostly home owners without children. The main ethnicity in this segment is White and includes Black and Asian. Middleburg Managers shop at Pottery Barn, vacation on cruise lines, read Travel + Leisure, watch Washington Week and drive cars like the Hyundai Elantra Touring.
- **Traditional Times** - This segment is mostly middle-aged without children in the household. Traditional times are in the upper middleclass income level with a median household income of \$57,949. Traditional Times is the kind of lifestyle where small-town couples nearing retirement are beginning to enjoy their first empty-nest years. Typically in their fifties and older, these upper-middle-class Americans pursue a kind of granola-and-grits lifestyle. On their coffee tables are magazines with titles like Country Living and Country Home. But they're big travelers, especially in recreational vehicles and campers. This segment shops at Sam's Club, contribute to PBS, Read Southern Living, watch Antiques Roadshow and drive affordable cars i.e., Toyota Avalon.
- **New Empty Nests** - With their grown-up children recently out of the house, New Empty Nests is composed of upper-middle income older Americans who pursue active--and activist--lifestyles. Most residents are over 65 years old, but they show no interest in a rest-home retirement. This is the top-ranked segment for all-inclusive travel packages; the favorite destination is Europe. New Empty Nests are a mature segment, which is mostly White and retired with a median household income of \$71,212. This segment shops at T.J. Maxx, vacations for 2+ weeks a year, reads the Smithsonian magazine, watches golf, and drives luxury vehicles i.e., Cadillac sedan.
- **Bohemian Mix** - A collection of mobile urbanites, Bohemian Mix represents the nation's most liberal lifestyles. Its residents are an ethnically diverse, progressive mix of young singles, couples, and families ranging from students to professionals. In their funky row houses and apartments, Bohemian Mixers are the early adopters who are quick to check out the latest movie, nightclub, laptop, and microbrew. This upper middle class segment has a median household income of \$56,676 and mostly rent their homes or apartments. College graduates in professional positions, Bohemian Mix is in the Melting Pot category and have a race and ethnicity mix of 6 White, Black, Asian, Hispanic and mixed. This segment shops at the Gap, reads GQ, watches foreign films and drive vehicles like the Audi S4.
- **Gray Power** - Gray Power is a midscale mature segment in a household without children. The steady rise of older, healthier Americans over the past decade has produced one important by-product: middle-class, mostly home-owning suburbanites who are aging in place rather than moving to retirement communities. Gray Power reflects this trend, a segment of older, midscale singles and couples who live in quiet comfort. This segment is mostly White with a median household income of \$52,936. Gray Power shops at Lord & Taylor, read Barron's, own a stationary bike, watch Frontline and drive upscale vehicles like the Mercedes-Benz Sprinter.

- **New Homesteaders** - Young, upper-middle-class families seeking to escape suburban sprawl find refuge in New Homesteaders, a collection of small rustic townships filled with new ranches and Cape Cods. With decent-paying jobs in white and blue-collar industries, these dual-income couples have fashioned comfortable, child-centered lifestyles; their driveways are filled with campers and powerboats, their family rooms with PlayStations. This segment has a median household income of \$58,997 and is a white-collar employee. New Homesteaders are mostly white, black or mixed. They are child focused and drive affordable family friendly vehicles like this Kia Sedona.

## Shoulder Season Top 15 Segments

- **Upper Crust** – significantly wealthy, older households without kids living in the suburbs. This segment is 55+ with a median household income of \$110,117 and are classified by Nielsen as millionaires. These households are college educated with graduate degrees in upper management positions. They are mainly White. This segment shops at high-end stores like Saks Fifth Avenue, have vacationed in Europe, watch and play golf and drive luxury vehicles i.e., Lexus LS.
- **Money & Brains** – wealthy, older family mix within the household, living in urban areas. The older family mix means the children are mostly older teenage or college age dependents. The parents are 45-64 with a median household income of \$88,837 and are college educated in management positions. These households are classified as a “Melting Pot” and include White, Asian, Black, Hispanic and Mixed. This segment shops at stores like Banana Republic, travel for business occasionally, watch tennis and drive luxury SUVs i.e., Mercedes Benz E Class.
- **The Cosmopolitans** – wealthy, mid to older age range, mostly without kids living in urban areas. This segment is 55+ with a household income of \$58,313 working in white-collar settings. This segment is classified as a “Melting Pot” and includes White, Asian, Black, Hispanic and Mixed. These households shop at Macy’s, have vacationed outside the US, watch Masterpiece Theatre and drive upper midclass vehicles i.e., Lincoln Town Car - Flex Fuel.
- **Middleburg Managers** - Middleburg Managers arose when empty nesters settled in satellite communities, which offered a lower cost of living and more relaxed pace. Today, segment residents tend to be middle class with solid white-collar jobs or comfortable retirements. In their older homes, they enjoy reading, playing musical instruments, indoor gardening, and refinishing furniture. This segment is upper middle class with a median household income of \$53,379. Middleburg Managers are mostly home owners without children. The main ethnicity in this segment is White and includes Black and Asian. Middleburg Managers shop at Pottery Barn, vacation on cruise lines, read Travel + Leisure, watch Washington Week and drive cars like the Hyundai Elantra Touring.
- **Traditional Times** – This segment is mostly middle-aged without children in the household. Traditional times are in the upper middleclass income level with a median household income of \$57,949. Traditional Times is the kind of lifestyle where small-town couples nearing retirement are beginning to enjoy their first empty-nest years. Typically in their fifties and older, these upper-middle-class Americans pursue a kind of granola-and-grits lifestyle. On their coffee tables are magazines with titles like Country Living and Country Home. But they’re big travelers, especially in recreational vehicles and campers. This segment shops at Sam’s Club, contribute to PBS, Read Southern Living, watch Antiques Roadshow and drive affordable cars i.e., Toyota Avalon.
- **Bohemian Mix** - A collection of mobile urbanites, Bohemian Mix represents the nation’s most liberal lifestyles. Its residents are an ethnically diverse, progressive mix of young singles, couples, and families ranging from students to professionals. In their funky row houses and apartments, Bohemian Mixers are the early adopters who are quick to check out the latest movie, nightclub, laptop, and microbrew. This upper middle class segment has a median household income of \$56,676 and mostly rent their homes or apartments.

College graduates in professional positions, Bohemian Mix is in the Melting Pot category and have a race and ethnicity mix of 6 White, Black, Asian, Hispanic and mixed. This segment shops at the Gap, reads GQ, watches foreign films and drive vehicles like the Audi S4.

- **Home Sweet Home** – Widely scattered across the nation's suburbs, the residents of Home Sweet Home tend to be upper-middle-class married couples living in mid-sized homes without children. The adults in the segment, mostly under 55, have gone to college and hold professional and white-collar jobs. With their upper-middle-class incomes and small families, these folks have fashioned comfortable lifestyles, filling their homes with exercise equipment, TV sets, and pets. The Home Sweet Home Segment has a median household income of \$ 68,555 and is in the Melting Pot category made up of 5 White, Black, Asian and Mixed ethnicities. This segment shops from buy.com, download music from iTunes, watch shows like The Amazing Race, read Wired Magazine and drive middle class vehicles like the Mazda CX-7.
- **Gray Power** – Gray Power is a midscale mature segment in a household without children. The steady rise of older, healthier Americans over the past decade has produced one important by-product: middle-class, mostly home-owning suburbanites who are aging in place rather than moving to retirement communities. Gray Power reflects this trend, a segment of older, midscale singles and couples who live in quiet comfort. This segment is mostly White with a median household income of \$52,936. Gray Power shops at Lord & Taylor, read Barron's, own a stationary bike, watch Frontline and drive upscale vehicles like the Mercedes-Benz Sprinter.
- **Green Belt Sports** - A segment of upscale exurban couples, Greenbelt Sports is known for its active lifestyle. Most of these older residents are married, college-educated, and own new homes. Few segments have higher rates for pursuing outdoor activities such as skiing, canoeing, backpacking, boating, and mountain biking than this one. The Green Belt Sports segment is an older household between 45-64 without children and a median household income of \$59,646. This segment has white-collar jobs and is has a racial and ethnic mix of White and Asian. Green Belt Sports orders from ebay.com, vacations in tropical destinations, read More magazine and watch hockey.
- **Country Casuals** - There's a laid-back atmosphere in Country Casuals, a collection of older, upscale households that have started to empty-nest. Most households boast two earners who have well-paying management jobs or own small businesses. Today, these Baby-Boom couples have the disposable income to enjoy traveling, owning timeshares, and going out to eat. Country Casuals are mostly White and older between 45-64 with a median household income of \$74,208 and in a household without kids. This segment shops at Eddie Bauer, buy collectibles, read Backpacker magazine, watch the Big Bang Theory and drive sports cars i.e. Corvette.
- **Movers & Shakers** – wealthy, older households without kids living in the suburbs. These households are 45-64 with a median income of \$101,517. This segment is college educated carrying graduate degrees and holding management positions. They are mostly White and Asian. These households play tennis, shop at Nordstrom and drive higher end SUVs i.e., Land Rover.
- **Young Influentials** – Once known as the home of the nation's yuppies, Young Influentials reflects the fading glow of acquisitive yuppiedom. Today, the segment is a common address for middle-class singles and couples who are more preoccupied with

balancing work and leisure pursuits and who live in apartment complexes surrounded by ball fields, health clubs, and casual-dining restaurants. This segment is classified as middle aged and is under 55 with a median household income of \$49,942. The racial and ethnic mix is White, Black, Asian and Hispanic. Young Influentials shop at Best Buy, play racquetball, read Details magazine, watch American Dad and drive affordable cars i.e. Mazda 3.

- **Blue Blood Estates** - Blue Blood Estates is a family portrait of suburban wealth, a place of million-dollar homes and manicured lawns, high-end cars and exclusive private clubs. The nation's second-wealthiest lifestyle is characterized by married couples with children, graduate degrees, a significant percentage of Asian Americans, and six-figure incomes earned by business executives, managers, and professionals. Blue Blood Estates are 45-64 with children and a median household income of \$119,595. This segment shops at Crate & Barrel, goes skiing, watch HBO and drive luxury vehicles i.e. Acura RL.
- **New Empty Nests** - With their grown-up children recently out of the house, New Empty Nests is composed of upper-middle income older Americans who pursue active--and activist--lifestyles. Most residents are over 65 years old, but they show no interest in a rest-home retirement. This is the top-ranked segment for all-inclusive travel packages; the favorite destination is Europe. New Empty Nests are a mature segment, which is mostly White and retired with a median household income of \$71,212. This segment shops at T.J. Maxx, vacations for 2+ weeks a year, reads the Smithsonian magazine, watches golf, and drives luxury vehicles i.e., Cadillac sedan.
- **Up-and-Comers** - Up-and-Comers is a stopover for younger, upper-midscale singles before they marry, have families, and establish more deskbound lifestyles. Found in second-tier cities, these mobile adults, mostly age 25 to 44, include a disproportionate number of recent college graduates who are into athletic activities, the latest technology, and nightlife entertainment. This segment has a racial and ethnic mix of White and Asian with a median household income of \$52,930. Up-and-Comers typically order from priceline.com, travel to South America, read Cigar Aficionado, watch South Park, and drive cars like the Nissan Altima Hybrid.

**Subject:** Public input to March 2023 Carlsbad Tomorrow Growth Management Committee -Carlsbad City Council and Commisi0sns & CCC - Tax-payer savings and more benefits from Ponto Park data files

**Importance:** High

Dear Carlsbad City Council, Carlsbad Tomorrow Growth Management Committee, Parks and Planning Commissions, and CA Coastal Commission and CA State Parks:

As the City has requested specific reference regarding public input, I ask you to please deliver to the those address this email and attachment as public input for:

1. the CTGMC's March 2023 meeting,
2. the next Carlsbad Council meeting,
3. the next Carlsbad Planning and Parks Commission meetings on the Parks Master Plan and Growth Management Program Updates, and Carlsbad's Ponto Planning Area F and Site 18 planning and development applications, and
4. as public input to the CA Coastal Commission on Carlsbad's proposed Local Coastal Program Amendment.

For years Carlsbad Citizens have told the City that Ponto Park is the far better solution to the documented Park and Open Space mistakes at Ponto and Coastal South Carlsbad. Ponto Park will save tax-payers tens of millions of dollars and provide a true and better Park. The attached data files should be thoroughly presented, reviewed, and publicly discussed by the CTGMC, Carlsbad City Council and Commissions, and CA Coastal Commission. Wasting tax-payer funds is not in the best interest of Carlsbad or the State of Californian.

Sincerely,  
Lance Schulte

**Importance:** High

Dear Michele & City Clerk:

I could not see/find that this email and 4 of 5 attachments were ever sent to the Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks and Planning Commissions. I looked through both the Aug 25th and Sep 22nd Additional Meeting materials Staff sent to the CTGMC and could not find the email & 4 of 5 attachments. Maybe staff failed to forward them to as addressed.

Critical in these 4 files are the "2021-Oct Updated Coastal Recreation data file" & "2022 Sea Level Rise & planned loss of Open Space at Ponto" that provide critical data for the Sept 22<sup>nd</sup> 2022 meeting of the CTGMC.

Can I receive confirmation the May 30, 2022 email below & it's 4 of 5 attachments were forwarded as addressed, and when and how so I can reference that transmittal?

Thank you,  
Lance

Michele:

Thanks for letting me know that the 'Public input to Carlsbad Tomorrow Growth Management Committee & CCC - NRPA & TPL data comparing Carlsbad Parks performance' emails were sent to the CTGMC.

I did not hear from you if these emails below and attachments were sent to the CTGMC? Can you please confirm?

Thanks,  
Lance

**Subject:** Public input to Carlsbad Tomorrow Growth Management Committee & CCC - Parks & Unconstrained-Useable Open Space facilities

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad Council and Parks and Planning Commissions, & CA Coastal Commission:

The Committee is tasked with recommending to the Council proposed changes to City Park and City Unconstrained/Useable Open Space Standards within the Growth Management Program Update.

Because Carlsbad is quickly running out of vacant land, the Committee's recommendations are critical for very obvious reasons. The Committee will be recommending (for all future generations) the final methods to supply Citizen desired Parks and Unconstrained/Useable Open Space. It is important the Committee wisely represent the interests of those future generations. The Park and Open Space supply solutions for future generations will amend Carlsbad's updated 2015 General Plan and the "as of 2013" Local Coastal Program.

Since 2017 many People for Ponto Carlsbad Citizens have overwhelmingly expressed their need and desire for:

1. Fairness, and a true adequately sized and dimensioned Ponto Park to address City Park Master Plan documented "lack of Park Service and Park Inequity" in this area, and
2. Correcting the City's documented 30-acre shortfall in required Unconstrained and Useable Open Space in the Ponto area, and
3. Correcting the City's planned loss of 32+ acres of Coastal Open Space at Ponto (the State Campground and Beach) first documented in 2017 and thus not a part of the City's General Plan & Growth Management Program.

Since 2017, over 5,000 Carlsbad Citizen and visitor petitions have been sent to the City & Coastal Commission expressing the desire and need of both Citizens and visitors to have these Parks and Open Space issues addressed. The Council has been narrowing deferring addressing these issues and noted waiting for the Carlsbad Tomorrow Growth Management Committee to consider both the data and Citizen and visitor desires.

Attached are 5 data files sent to the City by Carlsbad People for Ponto. The data files were sent as comments to the City's proposed Local Coastal Program (LCP) Amendment that seeks to change Carlsbad's 2013 LCP with the outdated 2015 General Plan, Carlsbad's Park Master Plan Update process, and the Growth Management Program that your Committee will be making recommendations to change. People for Ponto Carlsbad Citizens conducted over 50 official Carlsbad Public Records Requests to compile this data. We provide these data files in preparation of your June 23<sup>rd</sup> meeting.

1. Coastal Recreation and comparative Park data: Summary data on supply/demand/distribution-fairness of City Parks in Carlsbad, unflattering comparative data on how much parkland and where Carlsbad provides Parks

relative to Encinitas and Oceanside and national averages, documents Carlsbad's Park Master Plan mapping Park distribution unfairness at Ponto, and documenting that many Carlsbad's Park acres are Unusable for people because they are constrained habitat land protected from human use/intrusion.

2. Sea Level Rise & Carlsbad planned loss of Open Space at Ponto: A) Summary data on how sea level rise (SLR) will remove Open Space at Ponto. B) City GIS maps/data that shows 30-acres of required Unconstrained/Useable Open Space was not provided at Ponto (Zone 9) by using false exemptions while similar and adjacent Local Facility Management Zones (19 & 22) provided their required Unconstrained/Useable Open Space. C) City maps and data tables documenting the both loss of Open Space at Ponto from SLR and the missing Growth Management Open Space at Ponto.
3. Updated 2022-June Comparative Cost-Benefits of PCH Modification and Ponto Park: A) Summary City data comparing the Citizen and tax-payer Cost-Benefit of Park and Useable Open Space alternatives at Ponto. The data file initially compared cost-benefits of the 11-acre Ponto Planning Area F and pre-2022 City Cost data. However in May 2022 the City updated its PCH Relocation costs, and a willing seller of 14.3 acres of adjacent land (Ponto Planning Area G, H, and I; aka Kam Sang) was listed for sale. B) The Kam Sang list price of \$2.7 million per acre or a bit more than the \$2.4 to \$1.4 million per acre price of recent Ponto land sales noted in the file but are close. C) The City's updated PCH Relocation Costs are similar. The Cost-Benefit Comparison still shows purchasing Ponto Park land is still a better value for Carlsbad Citizens, and saves tax-payers money. The Comparison references a City map and data showing sea level rise impact areas, and the City's PCH Relocation environmental and design constraints.
4. Citizens' City Budget Ponto Park need-requests: A) Summary data and verbatim documentation of Carlsbad Citizens requests to budget to address the need for Ponto Park, and Open Space issues at Ponto. B) The volume of Citizen input on Ponto Park and Open Space, and the actual verbatim Carlsbad Citizen comments should be considered. C) In addition since 2017 when Carlsbad Citizen first became aware of several Ponto Planning Mistakes by the City:
  - a. false Growth Management Unconstrained/Useable Open Space 'Standard exemption' at Ponto
  - b. failure in the 2010 Ponto Vision Plan that is the basis for the 2015 General Plan Update, and the failure of the 2015 General Plan Update to follow the 1996 Local Coastal Program Land Use Policy for Planning Area F that required the City to consider and document the need for Coastal Recreation (i.e. Public Park) and Low-cost Visitor Accommodation land use prior to proposing a change in the Non-residential Reserve land use policy. Failing to fully disclose the Coastal Commission's rejection of the Ponto Vision Plan in 2010 because of these reasons, and not disclosing 2016, 2017 and 2022 directions to the City..
  - c. SW Quadrant Park deficits going back to 2012
  - d. Not considering 2017 Sea Level Rise Impact Report that shows the loss of 32+ acres of high-priority Coastal Open Space land uses at Ponto.
  - e. As a corollary example, the City has additional history in collaborating with developers to skirt standards and allow development without developers providing their required public facilities - the Rosalena HOA Trail segment of the Batiquitos Lagoon Bluff-top trail at Ponto is a classic example. This example resulted in delaying construction of the public trail by over 35-years and ended up costing about 75 Carlsbad homeowners over \$1 million in additional costs. It almost resulted in no trail being built and City and/or developer pocketing money meant to pay for the trail. This scenario could happen a far larger scale and cost if Ponto developers are not required to provide the missing 30acres of required Useable Open Space at Ponto

Carlsbad People for Ponto Citizens have asked the City to provide the Citizen input since 2017 for all things Ponto related. Reviewing the public record of 5,000+ citizen communications since 2017 reveals only maybe a dozen (mostly developer paid or supported) are not in support of Ponto Park. Your fellow Carlsbad Citizens ask the Growth Management Committee to read their input and to consider future generations.

Thank you for serving on the Growth Management Committee. You each have a large and vital task, as your recommendations will be the beginnings of what (due to Carlsbad running out of vacant land) will be the 'final glide path' that forever defines Carlsbad's Quality of Life. After your recommendations, there will only be added population

demands on the public facilities. As more infill development is added and there may be no vacant land to provide needed supplies of facilities like Parks and Unconstrained/Useable Open Space.

I speak from having already professionally followed the path you are on. After working on Carlsbad's Growth Management Program in the mid-1980s I addressed this same issues for the then new City of Dana Point that (in 1989) was at a similar stage of 'near buildout as Carlsbad is now.

Based on my professional experience I implore you seriously and fully consider that data and desires your fellow Carlsbad People for Ponto Citizens have provided you and the City. Based on where Carlsbad is we, and you, will only get this one chance to get it right.

Sincerely,  
Lance Schulte  
35-year Carlsbad resident  
former Carlsbad Growth Management and Dana Point city planner

## **2022-June General Comparative tax-payer Costs/Benefits of Completing PCH, PCH Modification, and 14.3 acre Ponto Park to address planned loss of 30+ acres of Coastal Open Space Land Use at Ponto/WestBL/South Carlsbad: Part 1 of 2**

---

Key points regarding tax-payer Cost/Benefit comparison:

City Park Fairness: Ponto/Coastal South Carlsbad has ZERO Parks and ZERO Park acres v. 10 Coastal Parks totaling 37 acres in North Carlsbad. South Carlsbad is home to 62% of Carlsbad citizens and the City major visitor industries, and they have no Coastal Park. North Carlsbad is home to 38% of Carlsbad citizens have the entire City's Coastal Parks. The City also falsely allowed Ponto Developers to NOT provide the required 15% unconstrained Growth Management Open Space required by other adjacent developers in Carlsbad. Consequently Ponto is already developed at a density 35% higher than the rest of City.

What is missing from South PCH: The only missing components of a Carlsbad Livable (Complete) Street are adequate Coastal sidewalks/pedestrian paths. Better safer protected bike paths for the volume of bike traffic on a higher-speed roadway are highly desired. Both these missing features can be cost-efficiently provided in the existing PCH configuration. The City had over 35-years to provide the missing sidewalks on PCH and should have added sidewalks years ago.

Generalized Costs: Costs initially came from publicly stated costs by Mayor Hall in a 2019 at Meet the Mayor Realtor luncheon at Hilton Garden Inn, the City's 2001 PCH Feasibility Analysis for PCH Relocation, the earlier \$13 million per mile cost for the simpler .85 mile City CIP #6054 PCH Modification Project at Terramar, general City cost data from official public records requests, and vacant Ponto land costs of \$1.4 to \$2.4 million per acre from recent recorded land sales at Ponto.

In May, 2022 the City released an updated cost increase for the .85 mile Terramar PCH Modification of \$22.4 million per mile; and an updated cost of between \$85 - \$60 million for the 2.3 mile South PCH Relocation Proposal that comes to \$40 to 26.1 million per mile. Kam Sang listed their 14.3 acre vacant site at Ponto for sale for \$2.7 million per acre in May. The Kam Sang list price is a bit higher than recent Ponto land costs, but the Kam Sang site is of significantly higher quality being adjacent to Batiquitos Lagoon, and with 270 degree lagoon and ocean views.

Generalized Benefits: The number of acres and the quality and usability of each of those acres, and the number of new added beach parking for each of the known Option's define each Option's benefits. There may be other unknown Options that have different benefits. The City's 2001 PCH Relocation Feasibility Analysis's highest Park and Open Space Option (2001 ERA Financial Analysis "Alternative 1-parks and open space scheme") only made possible a 4-acre Active Park north of Palomar Airport Road in North Carlsbad. The City's 2013 PCH Relocation Concept design eliminated that 4-acre Active Park and only showed a few small open space areas with picnic tables. Any PCH Modification benefits are limited by existing PCH constraints. See attached Part 2: City PCH map with numbered notes on various existing environmental and land use constraints from the City's 2013 PCH Modification Design.

PCH Modification limitations: Most critically PCH Modification does NOT add any new City land. Rearranging existing PCH land may add some usability beyond the usability of existing parkway areas along PCH. However significant land in PCH right-of-way is already constrained by habitat, slopes, and water quality detention basins. Past City Studies in 2001 and 2013 showed relatively modest changes in useable acreage from major PCH Modifications. Forever removing 2-travel lanes (over 50% of PCH capacity due to removing passing ability) will

create Terramar like traffic congestion, but could repurpose that City pavement for open space. Any net usable land in the PCH median will be relatively narrow and may be modest once all constraints are accounted for. PCH Modification should be accurately compared with the existing usable and open space parkway areas in the existing PCH configuration and Ponto Park situation. See attached Part 2: City PCH map with numbered notes on various existing land use constraints from the City's 2013 PCH Modification Design.

#### **Four (4) Comparative tax-payer Cost/Benefits:**

##### **1. Completing PCH & adding missing sidewalk/path and additional public parking and bike safety:**

4 vehicle lanes and 2 bike lanes 177 parking spaces currently exist along South Carlsbad Blvd

The only missing component of "Complete/Livable Street" is a pedestrian sidewalk/path on about 70% of PCH

**Total Cost to provide missing sidewalks per City data = \$3-5 million (based on path width)**

**Costs for desirable safety upgrade to existing bike lanes are not known**

**Cost to add more Beach parking on City owned abandoned PCH North and South of Poinsettia ranges from:**

- 273 additional spaces = \$ 0.76 million
- 546 additional spaces = \$ 1.1 million
- Plus an estimated \$1.5 million for 2 signalized intersection upgrades for full 4-way access
- Cost per parking space is estimated at \$19,275 to \$13,899 per additional parking space

**Total cost: \$ 3.8 to 6.1 million to provide missing sidewalk/path and add more parking + unknown amount for any desired upgrades to existing bike lanes**

##### **2. '2013 2.3 mile PCH Modification Proposal' [AECOM 11/26/2013 Alternative Development Meeting]**

Total Cost is \$75 million per Mayor Matt Hall, but updated by City to \$85-60 Million or \$40-26.1 million per mile.

The costs appear consistent with 20-years of cost inflation of the basic (unmitigated environmental and traffic)

2001 costs of \$26.5 to 37.3 million (in 2001 dollars) identified by the City's 2001 Feasibility Analysis by ERA. The City's 2001 ERA Analysis indicated fully mitigated costs will be higher.

**Total \$85 to 60 million PCH Modification cost comes to:**

**\$ 21 to 6 million per acre to reuse existing City land into narrow open space areas (from portions of city roadway)**

**\$872,093 per additional parking space**

- 86 additional parking spaces created = 263 replacement spaces - 177 existing spaces removed
- Includes multi-use pathway (sidewalk) within primarily native/natural landscaping.
- Possible 50% reduction in vehicle lanes (from 4 to 2 lanes) with corresponding traffic congestion like at Terramar. Not clear if Citizens and tax-payers will approve spending \$85 - 60 million to double traffic congestion.
- Includes about 4 - 10 acres for possible narrow passive Park area identified in City's 2001 PCH Modification Feasibility Analysis by ERA. However City's 2013 PCH Modification (AECOM) plans look like smaller acreage is provided.
- Does not purchase any new City land (only reconfigures existing City land) so requires Carlsbad Citizens to vote to expend funds per Proposition H, and as noted in the City's 2001 Feasibility Analysis likely will not qualify for regional, State or Federal tax-payer funding.
- 2013 PCH Modification proposal could not/did not consider and map City's 2017 sea level rise data to show what areas would be lost due to sea level rise and account for any added cost and issues.

### 3. 14.3 acre Ponto Coastal Park

**Total Cost: \$52.3 million that includes \$38 million (full list price) to purchase 14.3 acres plus \$1 million per acre to landscape/irrigate like the recent development cost for Buena Vista Reservoir Park (aka Poinsettia 61). \$ 3.7 million per acre is the cost for buying 14.3 acres of New City land and developing a true City Park.**

**Ponto Park purchase:**

- **is \$3.7 million per New Added Park Acre v. \$21 to \$6 million per acre to NOT buy new land but simply repurposed existing City land in PCH,**
- **Saves tax-payers \$17.3 million to \$2.3 million per acre,**
- **Saves tax-payers \$32.7 to \$7.7 million, and**
- **Provides up to 278% to 43% more Parkland than the 2.3 mile 'PCH Modification option'**
- Includes adding 14.3-acres of new and viable parkland similar to (but twice as large) as Carlsbad's Holiday Park. Site includes habitat and habitat connection to Batiquitos Lagoon, and lagoon and ocean view trails that connect to the ocean and eventually east along Batiquitos Lagoon to El Camino Real.
- Since an Open Space land purchase per Proposition C acquisition voters exempted such purchases from Proposition H. NCA already recommended vacant Ponto land be considered for City purchase as Open Space per the City's obligations under a lawsuit settlement.
- Ponto Park's cost savings over '2.3 mile PCH Modification' = \$32.7 to 7.7 million
- Ponto Park's + adding missing sidewalks cost savings over 'PCH Modification' = \$28.7 to 2.7 million
- Ponto Park's + adding missing sidewalks + 273 additional parking spaces cost savings over "PCH Modification" = \$28 to 2 million
- Ponto Park's + adding missing sidewalks + 546 additional parking spaces cost savings over "PCH Modification" = \$27.6 to 1.6 million

### 4. Combining both #1-PCH Completion and #3-Ponto Park:

Combining #1 and #3 creates at cost effective and more beneficial Coastal Park-Coastal Parking-Completes Streets solution. This solution actually adds 14.3-acres of New City land for a needed Park, provides for a Complete PCH without increasing traffic congestion, does not forever congest PCH travel if future PCH traffic increases, adds comparatively more beach parking, and preserves PCH land and provides the City with Coastal land use and sea level rise planning flexibility to address future needs by not forever committing the City's PCH land to a Final solution. See map on page 4 showing land use synergy of combining #1 and #3. **\$27.6 to 1.6 million in tax-payer cost savings are estimated from combining #1 & #3 compared to the estimated \$85 - 60 million PCH Modification of 2.3 miles. Combining #1 and #3 provides all the PCH Modification features, added beach parking benefits, and Adds 14.3 acres of New City land for parks, provides the City 100% of the flexibility it will need to address sea level rise, and do so for a reduced cost to tax-payers.** Page 5 shows the synergistic beach parking and Ponto Park relationship. The new 14.3 acre Kam Sang Ponto Park site is just south of the 11-acre Planning Area F site and between Avenida Encinas and Batiquitos Lagoon.

- a. Ponto Park's location allows it to use the 337-610 parking spaces created by #1 above (177 existing + 273 to 546 new parking spaces). The 337-610 parking spaces will allow Ponto Park to effectively host Carlsbad's special community events.
- b. Acquiring Ponto Park's 14.3-acres provides both the City and State of CA with important future land use options to address the Sea Level Rise and Coastal Erosion (SLR) planned by the City. These options are created by leaving the exiting South Carlsbad Blvd right-of-way substantially the same (except for adding needed sidewalks and using the existing Old paved roadway for parking) thus allowing future upland relocation of the Campground. If \$85 to \$60 million is spent on #2 the

likelihood this very expensive City expenditure would never be abandoned by the City to allow relocation of the Campground.

- c. Carlsbad' 2017 Sea Level Rise study shows SLR will eliminate ½ of the State Campground – a high-priority Coastal land use under the CA Coastal Act. The CA Coastal Act calls for “upland” relocation of high-priority Coastal land uses due to SLR impacts. Ponto Park could also provide for “upland” relocation of the State Campground.

Part 2 of this Comparative analysis is a separate 2-page map and data file. This Part 2 file consists of the City's PCH map of a reduced one lane in each direction (greater than 50% roadway capacity reduction) PCH configuration that maximizes potential 'excess right-of-way'. That map has numbered notes to marking locations of PCH environmental and design constraints from the City's 2013 PCH Relocation design, maps the City's 2017 Sea Level Rise Impact Areas, and for reference outlines the easterly 6.5 acre portion of the 11-acre Planning Area F site for acreage comparison purposes.

Updated Pubic Comments Coastal Recreation submitted on Oct 12<sup>th</sup> 2021:

---

On 10/8/21 the Carlsbad City Council and CA Coastal Commission were emailed data from an Official Carlsbad Public Records Request (# R002393-092121) on the City of Carlsbad's past compliance/noncompliance with the currently exiting Mello II LCP Land Use Policies # 6-2, 6-4 & 6-10 Certified in the mid-1980s. The City's documents show:

- For Policy 6-2 the 200-300 acre Park called out in Policy 6-2 has been reduced to Veterans Park's 91.5 acres, of which only 54% or 49.5 acres is even useable as a Park. The City provided no documents on how a 200-300 acre park called for in Policy 6-4 is now only 49.5 useable acres.
- For Policy 6-4 there were no City documents were provided. There was no City Public discussion, consideration, or City compliance with Policy 6-4 since the mid-1980's.
- For Policy 6-10 concerns providing Low Cost Visitor Accommodations. Public Parks are the lowest cost (free) Visitor accommodating land use there is.

The 3 existing LCP Land Use Policies are important for Carlsbad, and California's, Coastal land use resources. There appears little to no discussion of the City's past apparent failure to implementation of these 3 LCP LUPs in the current City consideration of changes to the LCP.

Following is a copy of Public Records Request # R002393-092121: "Carlsbad's Local Coastal Program (LCP) for the Mello II Segment of Carlsbad's Coastal Zone has long established land use Policies 6-2, 6-4 & 6-10 that were adopted by Carlsbad and Certified by the CA Coastal Commission in the early/mid-1980's. Mello II LCP Policies 6-2, 6-4 & 6-10 are shown on page 86-87 of Carlsbad's 2016 compiled LCP and are:

- "POLICY 6-2 REGIONAL PARK: If the population of Carlsbad increases in accordance with SANDAG's projected Series V Population Forecasts, it is estimated that Carlsbad will need to develop a new regional park containing 200 to 300 acres in order to adequately serve the public. A location for a new regional park must, therefore, be established. Consideration should be given to a facility within the Aqua Hedionda Specific Plan Area, or adjacent lands. The Batiquitos Lagoon area should also be considered.
- POLICY 6-4 NEED FOR ADDITIONAL OVERNIGHT CAMPING: Additional overnight camping facilities, the main source of lower cost visitor and recreational facilities, are needed throughout the San Diego coastal region. Additional facilities of this kind should be provided in a regional park within the Carlsbad area. This can be accomplished in conjunction with an eventual Batiquitos Park, within the Aqua Hedionda Specific Plan Area, and/or along with the development of private recreational facilities.
- POLICY 6-10 LOWER COST VISITOR-SERVING RECREATIONAL USES: Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Encourage a range of affordability for overnight visitor accommodations. Evaluate the affordability of any new or redeveloped overnight visitor accommodations, including amenities that reduce the cost of stay. Mitigation may be applied to protect and encourage affordable overnight accommodations"

The public record request is to see documents of:

- City Staff reports, presentations and communications to the Carlsbad Planning and Parks Commissions, and City Council regarding the City’s consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies; and
- Carlsbad Planning and Parks Commissions, and City Council minutes, resolutions and ordinances documenting City of Carlsbad consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies.”

Updated Pubic Comments Coastal Recreation submitted on January 2021:

---

Over 11-months ago in a 1/29/20 1:56PM email People for Ponto Carlsbad citizens first provided the City of Carlsbad both data and comments on **14 critical Coastal Recreation issues (see pages 5-30 below)**. The data and the 14 critical issues do not seem to be receiving appropriate disclosure/presentation/discussion/consideration in the Dec 2, 2020 Staff Report to the Planning Commission. To assure the 26-pages of citizen data and requests in the 1/29/20 email was received by the Planning Commission the file was re-emailed on 12/22/20 12:24pm and specifically addressed to City Council, City Clerk, Planning Commission, Parks Commission, Housing Commission, HEAC, CA Coastal Commission, and CA HCD. As citizens we request each of these 14 data points (with supporting data) be honestly considered.

In reading the Dec 2 Staff Report citizens conducted additional analysis of City Park data. That research further reinforces and documents the 14 Critical Coastal Recreation issues and highlights the relatively poor amount of City Park and Coastal Recreation planned by Carlsbad’s Staff proposed Draft LCP-LUPA. We hope the City Council and City Commissions, and CA Coastal Commission & HCD will consider this additional analysis of City data and citizen input:

<u>Coastal Zone data</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>	<u>note or source</u>
Coastline miles	6.4	3.9	6.0	Carlsbad Draft LCPA 201, Google Maps
Coastal Zone Acres	9,219	1,460	7,845	& Oceanside & Encinitas LCPs
Coastal Zone Acres	100%	16%	85%	% relative to Carlsbad

City Park Standard data

City Park Standard	3	5	5	required park acres / 1,000 population
Park Standard %	100%	167%	167%	% is relative to Carlsbad

- Oceanside & Encinitas 'require' and plan for 67% MORE Parkland than Carlsbad
- Carlsbad 'requires' and plans for ONLY 60% as much Parkland as Oceanside & Encinitas
- Carlsbad only requires developers provide 60% of the parkland (or in-lieu fees) as Oceanside & Encinitas require
- Encinitas has a 'Goal' to provide 15 acres of Park land per 1,000 population

Developed City Park	2.47	3.65	5.5	acres / 1,000 population
Developed Park	100%	148%	223%	% is relative to Carlsbad

- Oceanside provides 48% MORE developed park land than Carlsbad
- Encinitas provide 123% MORE developed park land than Carlsbad
- Carlsbad ONLY provides 68% and 45% as much Parks as Oceanside & Encinitas respectively

National Recreation & Park Asso. Metric: a typical City provides 1 park / 2,281 pop. & 9.9 Park acres / 1,000 population

- Carlsbad (3 acre) Park Standard is ONLY 30% of what a typical City provides nationally
- Carlsbad requires developers to provide, 70% LESS Park acres than typical City provides nationally

National Recreation & Park Asso., Trust for Public Land, et. al.: 10 minute (1/2 mile) Walk to a Park Planning Goal

- Both Oceanside and Encinitas plan parks to be within a 10-minute (1/2 mile) walk to homes.
- Carlsbad DOES NOT plan Parks within walking distance to homes
- Carlsbad is NOT providing equitable and walking/biking access to Parks

Some Carlsbad Parks that are not fully useable as Parks:

<u>Existing Parks with Unusable Open Space acreage</u>	<u>total park acres</u>	<u>Unusable park acres</u>	<u>% of park unusable</u>	<u>reason unusable</u>
Alga Norte - SE quadrant	32.1	10.7	33%	1/3 of park is a Parking lot not a park In many other Carlsbad Parks a significant percentage of those Parks are consumed by paved parking lots and unusable as a Park.
Hidden Hills - NE quadrant	22.0	12.7	58%	city identified unusable habitat open space
La Costa Canyon SE quadrant	14.7	8.9	61%	city identified unusable habitat open space
Leo Carrillo - SE quadrant	27.4	16.5	60%	city identified unusable habitat open space
Poinsettia - SW quadrant	<u>41.2</u>	<u>11.1</u>	<u>27%</u>	city identified unusable habitat open space
Existing Park subtotal	137.4	59.9	44%	44% of these Parks are unusable as Parkland

Anticipated Future Park development projects

<u>Park - quadrant</u>				
Veterans - NW	91.5	49.5	54%	estimated unusable habitat open space
Cannon Lake - NW	6.8	3.4	50%	estimated unusable water open space
Zone 5 Park expansion - NW	9.3	0	0	appears 100% useable as a Park
Robertson Ranch - NE	<u>11.2</u>	<u>0</u>	<u>0</u>	appears 100% useable as a Park
Future park subtotal	118.8	52.9	45%	45% of Future Parks are unusable as Parks

**Unusable Open Space acres**

**in Existing & Future Parks**      256.2    112.8      44%      **112.8 acres or 44% is unusable as Parks**

- 112.8 acres or 44% of the Existing & Future Parks are unusable Open Space and can't be used as Parkland
- **Based on City's minimum 3-acres/1,000 population Park Standard, 112.8 acres of Unusable Parkland means 37,600 Carlsbad Citizens (or 32.5% of Carlsbad's current population of 112,877) will be denied Parkland that they can actually use as a Park.**
- 112.8 acres of Existing & Future unusable 'park' / 3 acre park standard x 1,000 population = 37,600 Carlsbad citizens without useable parkland per City minimum standard.
- **59.9 acres of Existing unusable 'park' / 3 acre park standard x 1,000 population = 19,967 Carlsbad citizens and their children are currently being denied useable park land. 19,967 is 17.7% of Carlsbad's current population.**
- In addition to these 19,967 existing citizens and their children denied park land, the City needs to develop additional Park acreage in the NE, SW and SE quadrants to cover current shortfalls in meeting in the minimal 3 acre/1,000 population park standard for the current populations in the NE, SW and SE quadrants.
- **The current NE, SW and SE quadrants park acreage shortfalls are in addition to the 19,967 Carlsbad citizens and their children that do not have the minimum 3 acres of parkland per 1,000 population**
- **Current FY 2018-19 MINIMUM park acreage shortfalls are listed below. They are:**
  - **4.3 acres for 1,433 people in NE quadrant,**
  - **6.8 acres for 2,266 people in SW quadrant, and**
  - **2.3 acres for 767 people in SE quadrant**

Shortfall (excess) in  
Current Quadrant  
Park standard by

	population		Future Park		existing Park shortfalls are for NE, SW & SE quadrants
	acres	need	acres	%	
NW quadrant	(-14.2)	(-4,733)	107.6	91%	Current NW parks are 14.2 acres over min. standard & capacity for 4,733 more people at min. park standard. 91% of all Future City Parks are in NW quadrant
NE quadrant	4.3	1,433	11.2	9%	Future Park will exceed minimum NE park standard
SW quadrant	6.8	2,266	0	0%	No min. parks for 2,266 people in SW quad. Park deficit
SE quadrant	2.3	767	0	0%	No min. parks for 767 SE quadrant Park deficit

A Park Standard minimum is just a “Minimum”. City policy allows the City to buy/create parks above the City’s current 3 acre/1,000 pop. MINIMUM (and lowest) Park Standard of surrounding Coastal cities. Carlsbad already did this in the NW quadrant. It then added 3.1 more NW quadrant Park acres as part of the Poinsettia 61 Agreement. Poinsettia 61:

- converted 3.1 acres of NW City land planned/zoned for Residential use to Open Space Park land use/zoning,
- facilitated a developer building condos (increasing park demand) in the SW quadrant,
- required the SW Quadrant developer pay \$3 million to build the 3.1 acre NW quadrant park, and
- required the SW Quadrant developer pay to convert 3.1 acres of NW Quadrant & 5.7 acres of SW Quadrant City Park land to habitat that will be unusable as a City Park.

So Poinsettia 61 increased SW Quadrant development (that both increased SW Park Demand and expanded the current SW Quadrant Park deficit) while simultaneously using SW Quadrant development to pay for the conversion of 3.1 acres of residential land in the NW Quadrant to City Park (the NW Quadrant already has surplus park land per the City’s minimum standard).

People for Ponto strongly supports creating City Parks above the City’s current low 3-acre per 1,000 population minimum, as the City’s minimum standard is relatively low and substandard relative to other cities; many Carlsbad parks have significant acreage that is in fact ‘unusable’ as a park. Most importantly People for Ponto Citizens think it is very important to prioritize providing City Parks in areas of Park Inequity that are unserved by City Parks. However it seems very unfair to the SW Quadrant citizens to be so unserved and starved of the bare minimum of City Parks while at the same time funding City Parks in excess of City standard in other Quadrants.

The Poinsettia 61 illustrates a larger unfair (and dysfunctional) distribution of Quadrant based City Park demand and supply that is keenly evident in the demands/supply funding and location disparity of Veterans Park. Most all the development impact and park demand that paid Veterans Park fees came from the SW, SE and NE Quadrants yet the Veterans Park (supply) is not in those SW, SE and NE Quadrants. This inequity is counter to the implicit City requirement that City Parks be provided within the Quadrant of their Park demand. It is logical and proper that City Parks be provided and equitably distributed to be close to the development and population that generated the demand for that Park.

The City Park inequity at Ponto and in other Coastal areas of the City is counter to several CA Coastal Act policies; counter to good city planning and good CA Coastal planning; is highly detrimental to the City, City and CA citizens in the long-term; fails to properly distribute and match the location supply with the location of demand for Parks; and is counter to basic fundamental issues of fairness. Since 2017 People for Ponto has tried to get the City Council and City Staff to address this inequity, specifically at Ponto, and to do so in a way that embraces a true and honest Citizen-based planning process.

**Coastal Recreation:**

2. Request that the City as part of its Draft LCP Public Review process broadly-publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCPA processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park: This disclosure is needed to correct about 20 years of City misrepresentation to the public on the since 1996 and currently Existing LCP requirements at Ponto, and the City's prior planning mistakes at Ponto. Citizens have been falsely told by the City that all the Coastal planning at Ponto was done already and that the City followed its Existing LCP regarding the need for a park at Ponto, and that this is already decided and could not be reversed. This misinformation has fundamentally stifled public review and public participation regarding the Coastal Zone. City failure to provide such a broad-public disclosure on the documented prior, and apparently current proposed, "planning mistakes" would appear to violate the principles of Ca Coastal Act Section 30006. A broad-public disclosure would for the first time allow citizens to be accurately informed on the Existing LCP requirements at Ponto so they can provide informed public review and comment regarding the need for a Coastal Park in in this last vacant 'unplanned' area. The requested broad-public disclosure by the City of the City past mistakes and the Existing LCP requirements at Ponto is consistent with CA Coastal Act (CCA) "Section 30006 Legislative findings and declarations; public participation - The Legislature further finds and declares that **the public has a right to fully participate in decisions affecting coastal planning**, conservation and development; that achievement of **sound coastal conservation and development is dependent upon public understanding and support**; and that the continuing planning and implementation of **programs for coastal conservation and development should include the widest opportunity for public participation.**" The public cannot participate as outlined in CCA Section 30006 if past City 'mistakes' and misrepresentations on Coastal planning at Ponto go undisclosed to the public. If the public isn't fully informed about the 20-years of LCP planning mistakes at Ponto how could the public in the past (and now in the present) participate in the proposed LCP Amendment – **Public Participation as noted in Section 30006 above is the means to sound coastal conservation and development and is "... dependent upon public understanding ..."**. The City's past mistakes at Ponto need to be corrected by slightly different a Draft LCP Amendment process than currently outlined by the City; a new process is needed that clearly, opening and honestly informs and engages the public on the Existing LCP Ponto issues. The City's current Draft LCP Amendment process fails to follow CCA Section 30006 in that most all the citizens we encounter are as yet unaware of the City's Ponto mistakes and how they can participate in in the DLCPA process without that information. We see this daily in conversations we have with our fellow citizens. We even saw at the Oct 20, 2019 Carlsbad Planning Commission meeting that the Planning Commission was unaware of the planning mistakes at Ponto. How can a decision body of the City make a decision without knowing about these prior 'planning mistakes' facts that surround what they are being asked to decide on? Repeatedly since 2017 Carlsbad citizens and People for Ponto have asked the City to fully acknowledge the City's prior flawed planning at Ponto, and to correct that with ether maintaining the Existing LCP Non-residential Reserve Land Use or restarting the Coastal Planning at Ponto with a true and accurately informed Community-based Coastal Planning process consistent with Section 30006.

We request the City during the DLCPA Public Review period broadly and publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCP and other "planning efforts" public participation processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park, and 1) provide a truly honest public participation process on that disclosure consistent with CCA Section 30006 as part of the Draft LCP Amendment process or 2) retain the Existing LCP Non-residential Reserve Land Use and require a comprehensive and honest community-based redo of Coastal Resource planning at Ponto.

3. City fully and publicly reply to and the City Council consider the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process: Lance Schulte on 1/23/20 received an email reply by the City to his follow-up email regarding the status of the 11/20/19 citizen concerns/requests public comments and letters presented to the Planning Commission. This is appreciated, however it is request that the City fully publicly reply to the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process and present the to the City Council 11/20/19 citizen concerns/requests so the City Council can consider them and provide any direction to City Staff. City Staff first presented a summary presentation of the proposed Draft LCP Amendment to the Carlsbad Planning Commission on November 20, 2019, and indicated the public comment period would close on November in less than 2-weeks. Citizens and citizen groups provided public testimony to the Planning Commission, both verbally and in two written letters. The CCC was copied on those letters. The testimony and letters noted significant concerns about the City's proposed LCP Amendment process and made three requests:
- Disclose and provide a publically accessible 'Redline Version' of the Existing 2016/Proposed LCP land use Plan and Policies so everyone can see the proposed changes to the Existing LCP.
  - Provide true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern or objections. Citizen Workshops, when done right, are valuable means to openly educate, discuss and work to consensus options. These areas, including Ponto, were/are subject to multiple lawsuits, so true open and honest public workshops would provide an opportunity to openly and honestly discuss the issues and hopefully build public consensus/support for solutions. This approach seems consistent with CCA Section 30006, and common sense.
  - Extend the public comment period 6-months to allow Citizen Review of the Redline Version of the LCPA and allow time for Citizen Workshops.

The City did extend the Public Review period 2-months over the holidays to January 31, 2020. This is appreciated although many think this is inadequate given the significance of the Proposed Land Use Plan Amendments, and lack of Redline Version to compare. The City and their consultants required several extra years beyond schedule prepare the proposed LCP Amendments. The extra years of City Staff work reflects on the volume of the over 500-pages in the documents and the time needed to understand the Existing LCP and then create an Amended LCP. Citizens need sufficient time, proper comparative tools (redline) and a process (workshops) to understand the proposed LCP Amendments that is reflective of extensive extra time needed by City Staff and consultants needed. Truncation of lay public review to a few months for an Amendment that took paid professionals many years to produce seems a more than a bit inappropriate. The City appears to be rejecting citizens' request to be provided a 'Redline Version' of the Existing 2016/Proposed LCP land use Plan. So public review comments will tainted or will miss many issues due having to manually cross-reference a 150-page Existing LCP LUP with a Proposed 350-page Proposed LCP LUP. There will be unknown and unconsidered changes in the Draft LCP Amendment that the public and city and CCC decision makers will not know about due to the lack of 'Redline Version'.

The City also appears to reject citizen requests for true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern – such as Ponto. Like Coastal Recreation issue #1 above the following citizen requests appear consistent with CA Coastal Act (CCA) Section 30006, and the City's rejection of that requests seem counter to the CA Coastal Act.

We again request of the City to provide: 1) a 'Redline Version' to the public and decision makers, along with sufficient time to review and comment on the 'Redline Version'; and 2) true Citizen Workshops for Ponto and the

other last remaining significant vacant Coastal lands in Carlsbad as part of the Draft LCP Amendment process, or as part of deferred LCP Amendment process for those areas.

4. Coastal Zoned land is precious: the very small amount of remaining vacant Coastal land should be reserved for “High-Priority” Coastal Recreation Land Uses under the CA Coastal Act to provide for the growing and forever ‘Buildout’ needs of Carlsbad and CA Citizens, and our visitors.
  - Less than 1.8% (76 square miles) of San Diego County’s 4,207 square miles is in Coastal Zone. This small area needs to provide for all the forever Coastal needs of the County, State of CA, and Visitors. Upland Coastal Recreation (Coastal Park) land use is needed to provide land to migrate the projected/planned loss of “High-Priority” Coastal Recreation land uses due to Sea Level Rise impacts. There is only 76 miles of total coastline in San Diego County; a significant amount is publicly inaccessible military/industrial land. So how the last few portions of Coastal Land within Carlsbad (which is about 8% of San Diego County’s Coastline) is planned for the forever needs for High-Coastal-Priority Recreation Land Use is critical for Carlsbad, San Diego, and California Statewide needs into the future.
  - Most all the developable Coastal land in Carlsbad is already developed with Low-Coastal-Priority residential uses. Only a very small percentage of Carlsbad’s developable Coastal land, maybe 1-2%, is still vacant. This last tiny portion of fragment of vacant developable Coastal Land should be documented in the Draft LCP and reserved for “High-Priority” Coastal Land uses – most critically Coastal Recreation – to address the growing Coastal Recreation needs from a growing population and visitors. These growing needs are all the more critical in that existing Coastal Recreation lands will be decreasing due to inundation and erosion due to DLCPA planned Sea Level Rise.
  - This image of the western half of San Diego County graphically shows (in the blue line) the very small Coastal Zone Area that needs to provide the Carlsbad’s and California’s Coastal Recreational needs for all San Diego County residents and Visitors:

We request that 1) the amount and location of remaining vacant Coastal land in Carlsbad be documented and mapped and be reserved for high-priority Coastal Land Uses consistent with CCA Goals in Section 30001.5 “... (c) ... **maximize public recreational opportunities in the coastal zone** consistent with sound resources conservation principles and constitutionally protected rights of private property owners. (d) **Assure priority for coastal-dependent and coastal-related development over other development on the coast.** ...”; 2). This data be used in the City’s analysis and the public’s review and discussion about the City’s proposed Draft ‘Buildout’ Land Use Plan. The City’s proposed Draft ‘Buildout’ Land Use Plan will forever lock in the amount “maximum public recreational opportunities in the coastal zone” and will be the final Coastal Land Use Plan that is supposed to “assure priority for coastal-dependent and coastal-related development over other development on the coast”. Most of Carlsbad’s Coastal Zone is already developed or committed to low-priority land uses contrary to these CCA Goals, so how we finally and forever plan to use of the last small remaining vacant Coastal Land is very important.

5. The proposed Draft LCP Amendment in Chapter 3 makes unfounded statements regarding the proposed Amendment to the LCP Land Use Plan provision of “High-Priority” Coastal Recreation land use: On page 3-3, at the beginning of the Chapter 3 – Recreation and Visitor Serving Uses the City correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation uses, and cites multiple CCA Sections to that effect. The City’s proposed Coastal Land Use Plan then states on page 3-5 that a high proportion of land in the City is dedicated open

space available for passive and active use, yet provides no justification or accurate metric to support this statement. This is a critical unsubstantiated and speculative statement that is not supported by any comparative data (justifying the “high proportion” statement). The City later in Chapter 3 compared the adjoining cities of Oceanside and Encinitas to try to show how the proposed Draft LCP LUP Amendment provides higher levels of Visitor Serving Accommodations. That ‘non-common denominator’ comparison was fundamentally flawed, as noted in a prior separate Draft LCPA public review comment from People for Ponto regarding another high-priority Coastal land use (visitor accommodations) planned for in Chapter 3, but at least it was an attempt to compare. However, for the Coastal Recreation portion of Chapter 3, the City does not even attempt to provide any comparative data to support (or justify) the proposed Coastal Recreation Land Use Plan and statements. The Coastal Recreation Chapter also fails to disclose Carlsbad’s adopted City Park Master Plan (Park Service Area and Equity map) data that shows a clear conflict between the CA Coastal Act Policy Sections noted at the beginning of Chapter 3 and Chapter 3’s proposed Draft Coastal Recreation Land Use Plan.

Comparative Coastal Recreation: Comparing the Land Use Plan and policies of Oceanside, Carlsbad and Encinitas, one finds Carlsbad’s proposed Coastal Recreational Plan and Policies are not “high”, but very low compared with Oceanside and Encinitas. Carlsbad has a General Plan Park Standard of 3 acres of City Park per 1,000 Population. Oceanside has a 5 acres of City Park Standard per 1,000 population, and Encinitas has a 15 acres per 1,000 population standard, and an in-lieu park fee requirement of 5 acres per 1,000 population. Carlsbad’s proposed Coastal Recreation Land Use Plan is in fact not ‘high’ but is in fact the lowest of the three cities, with Carlsbad providing only 40% of Oceanside’s park standard, and only 20% of Encinitas’s Park Standard. Citywide Carlsbad currently has 2.47 acres of developed park per 1,000 population, Oceanside currently has 3.6 acres of developed park per 1,000 population, and Encinitas currently has 5.5 acres of developed park per 1,000 population. Although this data is citywide, it shows Carlsbad’s current amount of developed parkland is less than 70% of what Oceanside currently provides, and less than 45% of what Encinitas currently provides. Carlsbad is not currently providing, nor proposing a Coastal Land Use Plan to provide, a ‘high’ proportion of Coastal Recreation Land Use compared to Oceanside and Encinitas.

On page 3-5 Carlsbad may be misrepresenting city open space that is needed and used for the preservation of federally endangered species habitats and lagoon water bodies. This open space Land cannot be Used for Coastal Recreation purposes; and in fact Land Use regulations prohibit public access and Recreational Use on these Lands and water bodies to protect those endangered land and water habitats. 78% of Carlsbad’s open space is “open space for the preservation of natural resources” and cannot be used for Coastal Parks and Recreational use. Although “open space for the preservation of natural resources” does provide scenic or visual amenity, and this amenity is addressed as a different coastal resource. Visual open space is not Coastal Recreation Land Use. It appears Carlsbad is proposing in the Draft LCP Amendment to continue to, providing a ‘low’ percentage of Coastal Park Land Use and Coastal Recreation Land Use compared to adjoining cities.

In addition to the comparatively low amount of Coastal Park land Carlsbad plans for, Carlsbad scores very poorly regarding the equitable and fair distribution and accessibility of Coastal Parks and Coastal Recreation Land Uses. Both the City of Oceanside and Encinitas have very robust and detailed Park and Land Use plans to promote an equitable distribution of, and good non-vehicular accessibility, to their Coastal Parks. By comparison, Carlsbad’s park land use plan scores poorly, as exemplified in Ponto and South Carlsbad. Ponto’s existing population requires about 6.6 acres of City Parkland per Carlsbad’s low 3 acres per 1,000 population standard. Yet the nearest City Park is several miles away and takes over 50 minutes to walk along major arterial roadways and across Interstate 5 to access. As such this nearest park is not an accessible park for Ponto children, and thus Ponto children have to play in

our local streets to find a significantly large open area to play in. Ponto residents have to drive their kids to get to a park increasing VMT and GHG emissions. The City's proposed Coastal Recreation Land Use Plan 'solution' to Ponto's no-park condition, along with the City's need to add an additional 6.5 acres of new City parks in Southwest Carlsbad to comply with the Southwest Carlsbad's 2012 population demand (at a ratio of 3-acre/1,000 population) is to provide a City Park – Veterans Park – over 6-miles away from the Ponto and Southwest Carlsbad population need. This makes a bad situation worse. The City's proposed location is totally inaccessible to serve the needs of the population of children or anyone without a car, that it is intended to serve in South Carlsbad. This City proposed Coastal Recreation Land Use Plan 'solution' seems inappropriate and inconsistent with the CA Coastal Act and common sense. During the City's Veterans Park and budget community workshops citizens expressed a desire for a Ponto Park to be the solution to our Ponto and Southwest Carlsbad Park deficits. Those citizen requests were not apparently considered as part of the City's proposed Draft Coastal Recreation Land Use Plan. Following is an image summarizing the magnitude of citizen needs/desires expressed at the City's Budget workshop. Note the number and size of the text citing Ponto Park and South Carlsbad that reflects the number and magnitude/intensity of citizen workshop groups' input. The failure to acknowledge this public participation and data in the Coastal Recreation Land Use Plan Park seems in conflict with CCA Sections 30006 and 30252(6):

For South Carlsbad there is a complete lack of any existing or planned City Coastal Park and park acreage west of I-5, while North Carlsbad has 9 existing and 1 planned City Coastal Parks totaling 37.8 acres of City Coastal W of I-5 North Carlsbad. Not only is this unfair to South Carlsbad, it is also unfair to North Carlsbad as it increases VMT and parking impacts in North Carlsbad because South Carlsbad is not providing the City Coastal Parks for South Carlsbad resident/visitor demands. This City Park disparity is shown on Figure 3-1 of the Coastal Recreation Land Use Plan;

however it more accurately illustrated in the following data/image from the adopted Carlsbad Park Master Plan's "Service Area Maps (Equity Maps)". The image below titled 'No Coastal Park in South Carlsbad' shows Carlsbad's adopted "Park Service Area Maps (Equity Maps)" from the City's Park Master Plan that says it maps "the population being served by that park type/facility." The added text to the image is data regarding park inequity and disparity in South Carlsbad. The image compiles Carlsbad's adopted Park "Park Service Area Maps (Equity Maps)" for Community Parks and Special Use Area Parks that are the City's two park acreage types produced by the City's comparatively low standard of 3 acre of City Park per 1,000 population. The City's Park Service Area Maps (Equity Maps) shows areas and populations served by parks within the blue and red circles. City data clearly shows large areas of overlapping Park Service (areas/populations served by multiple parks) in North Carlsbad and also shows large areas in South Carlsbad with No Park Service (areas/populations unserved by any parks) and Park Inequity in South Carlsbad. It clearly shows the City's Documented Park Need and Park inequity at Ponto. The Existing LCP LUP for Ponto's Planning Area F in is required to "consider" and "document" the need for a "Public Park". The City's adopted Park Service Area Maps (Equity Maps) clearly shows the inequity of Coastal City Park between North and South Carlsbad, and the need for Coastal Parks in South Carlsbad – particularly at Ponto. The City's proposed Draft 'Buildout' Coastal Recreation Land Use Plan instead proposes to lock-in documented City Public Coastal Park inequity and unserved Coastal Park demand at Ponto and South Carlsbad forever. It does so by proposing the last vacant undeveloped/unplanned Coastal land – Ponto Planning Area F - in the unserved Ponto and South Carlsbad coastline areas instead of being planned for much needed City Park and Coastal Recreation use be converted to even more low-priority residential and general commercial land uses. These 'low-priority' residential uses, by the way, further increase City Park and Coastal Recreation demand and inequity in Coastal South Carlsbad. This is wrong, and a proposed 'forever-buildout' wrong at the most basic and fundamental levels. The proposed Draft Coastal Recreation Land Use Plan by NOT providing documented needed City parks for vast areas of Coastal South Carlsbad is inconsistent with the CA Coastal Act policies and Existing LCP LUP requirements for Ponto Planning Area F; and also inconsistent with fair/equitable/commonsense land use and park planning principles, inconsistent with CA Coastal Commission social justice goals, inconsistent with social equity, inconsistent with VMT reduction requirements, and inconsistent with common fairness. A different Coastal Recreation Land Use Plan should be provided that provides for a socially equitable distribution of Coastal Park resources so as to would allow children, the elderly and those without cars to access Coastal Parks. The proposed Draft 'Buildout' Coastal Recreation Land Use Plan forever locking in the unfair distribution of City Parks appears a violation of the not only CCA Sections 30213, 30222, 30223, and 30252(6) but also the fundamental values and principles of the CA Coastal Act. The Draft also appears a violation of Carlsbad's Community Vision.

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

A different Coastal Recreation Land Use Plan is required to provide a more equitable distribution of City Parks with non-vehicular accessibility. Such a different plan would advance State and City requirements to reduce vehicle Miles Traveled (VMT) and greenhouse gas emissions that contribute to climate change and sea level rise impacts. Please note that the data for the above basic comparison comes from City of Carlsbad, Oceanside and Encinitas General Plan and Park Master Plan documents.

Data shows the proposed Coastal Recreation Plan conflicts with the CA Coastal Act policy Sections. As mentioned page 3-3 correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation Land Uses, and pages 3-5 list multiple CA Coastal Act (CCA) policy Sections that confirm this. However, given the significant statewide importance of Coastal Recreation Land Use, the City proposed 'Buildout' Coastal Recreation Land Use Plan does not appear to adequately address and implement these CCA Policies, and most noticeably in the Ponto area of South Carlsbad. Coastal Recreation is a significant Statewide High-Priority Land Use under the CCA. For a substantially developed non-coastal-industry city like Carlsbad Coastal Recreation is likely the biggest land use issue. This issue is even more elevated due to the fact that there are only a few small areas left of undeveloped Coastal land on which to provide Coastal Recreation, and Carlsbad is proposing a Coastal 'Buildout' Land Use Plan on those areas. The use of the last few remaining vacant portions of Coastal land for Coastal Recreation Land Use is the most important land use consideration in the proposed Draft LCP Land Use Plan Amendment as population and visitor growth will increase demands for Coastal Recreation. It is thus very surprising, and disturbing that the proposed Coastal Recreation Land Use Plan is so short, lacks any comparative and demand projection data, lacks any resource demand/distribution and social equity data, and lacks any rational and clear connection with CCA Policy and the proposed 'Buildout' Coastal Land Use plan. This is all the more troubling given that:

- The Ponto area represents the last significant vacant undeveloped/unplanned land near the coast in South Carlsbad that can provide a meaningful Coastal Park.
- The fact that the City's Existing LCP requires the city consider and document the need for a "i.e. Public Park" on Ponto's Planning Area F prior to the City proposing a change of Planning Area F's "Non-residential

Reserve” land use designation. The City has repeatedly failed to comply with this LCP LUP requirement, and worse has repeatedly failed to honestly inform citizens of this LCP LUP requirement at planning Area F before it granted any land use. The City, apparently implementing speculative developer wishes, has repeatedly proposed changing Planning Area F’s Coastal Land Use designation to “low-priority” residential and general commercial land uses without publically disclosing and following the Existing LCP LUP.

- The City’s currently developed parks in the southern portion of the City do not meet the city’s comparatively low public park standard of only 3 acres per 1,000 population. Since 2012 there has been City park acreage shortfall in both SW and SE Carlsbad.
- The Existing population of Ponto (west of I-5 and south of Poinsettia Lane) requires about 6.6 acres of Public Park based on the City’s comparatively low public park standard of 3 acres per 1,000 population. There is no Public Park in Ponto. Adding more population at Ponto will increase this current park demand/supply disparity.
- Carlsbad and other citizens have since 2017 expressed to the City the strong need for a Coastal Park at Ponto, and requested the City to provide a true citizen-based planning process to consider the Public Park need at Ponto. The Citizens’ requested process is fully in-line with CCA Goals, Public Participation Policy, Land Use Policies, and the Existing LCP Land Use Plan/requirements for Planning Area F and is the most appropriate means to consider and document the need for a Public Park at Ponto as required by the Existing LCP Land Use Plan.
- Planning Area F is for sale, and a non-profit citizens group has made an offer to purchase Planning Area F for a much needed Coastal Park for both Ponto and inland South Carlsbad residents and visitors. How should these facts be considered by the City and CCC?
- Carlsbad has no Coastal Parks west of I-5 and the railroad corridor for the entire southern half of Carlsbad’s 7-mile coastline.
- The southern half of Carlsbad’s coastline is 5.7% of the entire San Diego County coastline and represents a significant portion of regional coastline without a meaningful Coastal Park west of I-5 and the Railroad corridor.
- The City’s proposed Coastal Recreation Land Use Plan provides No Documentation, No Rational, and No Supporting or Comparative Data to show the proposed Coastal Recreation Land Use Plan in fact complies with the CA Coastal Act.

6. There is no Coastal Recreation/Park west of interstate 5 for all South Carlsbad, or half of the entire City. This is an obviously unfair and inequitable distribution of Coastal Recreation/Park resources that should be corrected by changes to the Draft LCP Land Use Amendment: The following image (which was sent to the City and CCC on several prior communications) was first requested by former Carlsbad Councilman Michael Schumacher during a People for Ponto presentation/request at the Oct 23, 2018 City Council meeting. The data compiled in the image shows how the South Coastal Carlsbad (Ponto) is not served by a Park per the City’s adopted Parks Master Plan. The blue dots on the map are park locations and blue circle(s) show the City’s Park Master Plan adopted Park Service Areas and Park Equity. This data, from pages 87-88 of the City of Carlsbad Parks Master Plan, shows all City Parks (both Community Parks and Special Use Areas in Coastal Carlsbad (except Aviara Park east of Poinsettia Park and west of Alga Norte Park). The text on the left margin identifies the South Carlsbad Coastal Park (west of I-5) gap along with the number of South Carlsbad Citizens (over half the City’s population) without a Coastal Park. The left margin also identifies more local issues for the over 2,000 Ponto area adults and children. For Ponto residents the nearest Public Park and City proposed ‘solution’ to the South Carlsbad and Ponto Public Park deficit are miles away over high-speed/traffic roadways and thus somewhat hazardous to access and effectively unusable by children/the elderly or

those without cars. Having been a 20-year resident of Ponto I regularly see our children have to play in the street as there are no Public Park with large open fields to play at within a safe and under 1-hour walk away. Ponto citizens have submitted public comments regarding this condition and the lack of a Park at Ponto

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

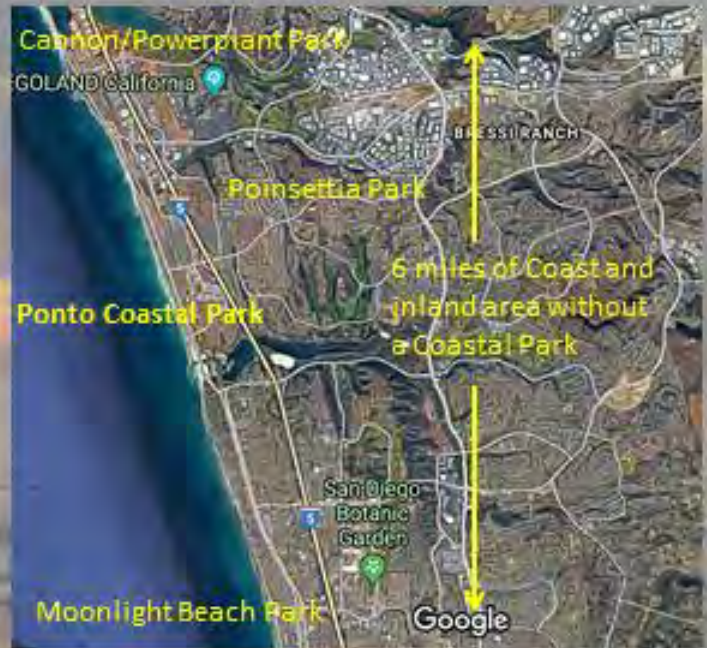

Ponto is at the center of regional 6-mile Coastal Park Gap. A Coastal Park in this instance being a Public Park with practical green play space and a reasonable connection with the Coast (i.e. located west of the regional rail and Interstate-5 corridors). The following image shows this larger regional Coastal Park Gap centered on the Ponto Area, and the nearest Coastal Parks – Cannon Park to the north, and Moonlight Park to the south.

Regionally this image shows Ponto is the last remaining significant vacant Coastal land that could accommodate a Coastal Park to serve the Coastal Park current needs of over existing 2,000 Ponto residents, 64,000 existing South Carlsbad residents, and a larger regional population. It is also the only area to serve the Coastal Park needs for the thousands of hotel rooms in Upland Visitor Accommodations in South Carlsbad.

# How Ponto Serves Region

- Ponto is in the middle of the regional Coastal Park Gap
- A Ponto Coastal Park fills a critical 6 mile gap of coastline without a Coastal Park - 8.6% of SD County coastline
- A Ponto Coastal Park Serves over 26,000 homes & 64,000 citizens just in South Carlsbad without a Coastal Park
- Serves many more people outside Carlsbad

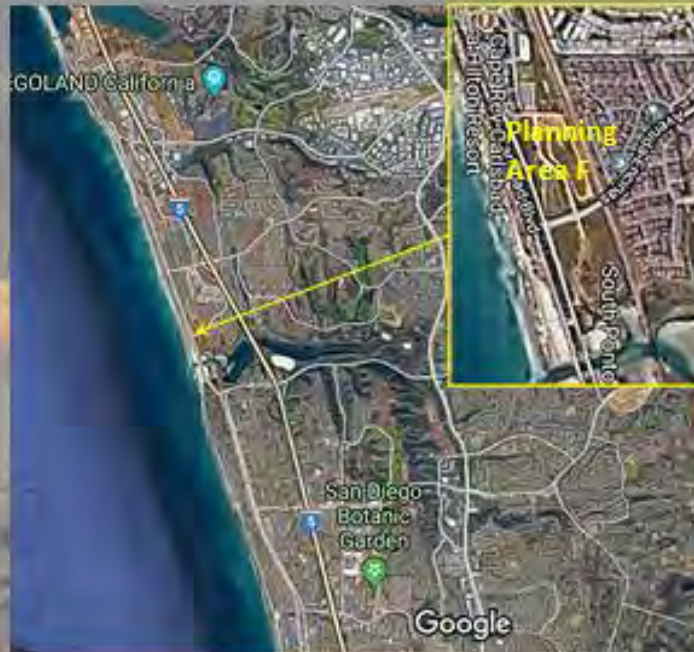

As People for Ponto first uncovered and then communicated in 2017 to the City and CCC; Carlsbad's Existing (since 1994) Local Coastal Program LUP currently states (on page 101) that Ponto's Planning Area F: carries a Non-Residential Reserve (NRR) General Plan designation. Carlsbad's Existing Local Coastal Program Land Use Plan states: "Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an "unplanned" area ..." and requires that: "... **As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.**" CA Coastal Commission actions, Carlsbad Public Records Requests 2017-260, 261, and 262, and 11/20/19 City Planner statements confirm the City never fully communicated to Carlsbad Citizens the existence of this LCP requirement nor did the City comply with the requirements. Of deep concern is that the City is now (as several times in the past) still not honestly disclosing to citizens and implementing this Existing LCP requirement as a true and authentic 'planning effort'. The lack of open public disclosure and apparent fear of true public workshops and Public Comment about the Existing Planning Area F LCP requirements are troubling. The point of a 'planning effort' is to openly and publically present data, publically discuss and explore possibilities/opportunities, and help build consensus on the best planning options. Citizens are concerned the city has already made up its mind and there is no real "planning effort" in the proposed Draft LCP Amendment process, just a brief Staff Report and at the end provide citizens 3-minutes to comment on the proposal. This is not the proper way to treat the last remaining significant vacant land in South Carlsbad that will forever determine the Coastal Recreation environment for generations of Carlsbad and California citizens and visitors to come.

The following data/images show how Ponto is in the center of the 6-mile (west of I-5 and Railroad corridor) regional Coastal Park gap. Ponto is the last remaining vacant and currently "unplanned" Coastal land that is available to address this regional Coastal Park Gap.

## How Ponto Serves Region cont.

- **Relieves Coastal Park congestion** in North Carlsbad, Encinitas and Solana Beach
- Area currently needs Coastal Park as seen by:
  - Ponto Beach parking congestion
  - current trespass use of Planning Area F as a Park
- **6.6 acre portion of Planning Area F** addresses SW Quad City Park deficit

## How Ponto Serves Region cont.

- A Ponto Park helps address 2050 and beyond Regional Population and Visitor Growth demands for Coastal Parks
- A Ponto Park provides the lowest-cost coastal access and recreation opportunities for CA citizens and visitors

## How Ponto Serves Region cont.

- Vital park and open space amenity for Visitor serving businesses and accommodations
- 6.6 acre unique City Coastal Park venue to stage special events: Runs, bike rides, triathlons, sports, coastal festivals, etc.

## How Ponto Serves Region cont.

- Critical Park space for So. Carlsbad State Beach Campground
- Provides a big training and staging space for Junior lifeguards
- Dog walk trail

# Ponto Coastal Park Concept

- A concept – but shows potential recreational opportunities
- Provides **vital parkland support for beach & open play fields**
- Concept plan a gift from San Pacifico Community Association

One possible Concept image of a potential Ponto Coastal Park at Planning Area F is illustrated below. The potential for a Ponto Coastal Park is real. The speculative land investment fund (Lone Star Fund #5 USA L.P. and Bermuda L.P.) that currently owns Planning Area F is selling the property, and is available for the City of Carlsbad to acquire to address the documented demand/need for a City Park and City Park inequity at Ponto and in Coastal South Carlsbad. A Ponto Beachfront Park 501c3 is working to acquire donations to help purchase the site for a Park. These situations and opportunities should be publicly discussed as part of the City Staff's proposed Local Coastal Program Land Use Plan Amendment.

- Increasing Visitor demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

Yearly Visitors to San Diego County – source: *San Diego Tourism Authority; San Diego Travel Forecast, Dec, 2017*

2016	34,900,000
2017	34,900,000
2018	35,300,000
2019	35,900,000
2020	36,500,000 = average 100,000 visitors per day, or 2.83% of County’s Population per day, or 1,316 Visitors/coastal mile/day in 2020
2021	37,100,000
2022	37,700,000

This is growth at about a 1.6% per year increase in visitors. Projecting this Visitor growth rate from 2020 to 2050 results in a 61% or 22,265,000 increase in Visitors in 2050 to:

2050	58,765,000 = average 161,000 visitors per day, or 3.67% of the County’s projected 2050 Population per day, or 2,120 Visitors/coastal mile/day in 2050.
------	--

The number of Visitors is likely to increase beyond the year 2050. There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for these projected 2050 61% increase, and beyond 2050, increases in Visitor demand for Coastal Recreational Resources. Increasing Coastal Recreation land is a vital and critically supporting Land Use and vital amenity for California’s, the San Diego Region’s and Carlsbad’s Visitor Serving Industry. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5). There are thousands of hotel rooms in South Carlsbad that have NO Coastal Park to go to in South Carlsbad. This needs correcting as both a Coastal Act and also a City economic sustainability imperative.

- We request that the as part of the public’s review, the City Staff proposed Draft LCP Amendment to the Land Use Plan clearly document if and/or how future forever ‘Buildout’ City, Regional and Statewide population and visitor population demand for Coastal Recreation and City Coastal Parks are adequately provided for both in amount and locational distribution in the Carlsbad proposed Amendment of the LCP Land Use Plan.

8. Carlsbad’s Draft Local Coastal Program Land Use Plan Amendment says it plans to a year 2050 buildout of the Coastal Zone. The Draft Local Coastal Program Land Use Plan Amendment then is the last opportunity to create a Coastal Land Use Plan to provide “High-Priority” Coastal Recreation Land Use, and will forever impact future generations of California, San Diego County, and Carlsbad Citizens and Visitors:

- The Draft LCPA indicates in 2008 only 9% of All Carlsbad was vacant land. Less is vacant now in 2019. Carlsbad’s Coastal Zone is 37% of the City, so vacant unconstrained land suitable for providing Coastal Recreation is likely only 3-4%. The prior request for a full documentation of the remaining vacant Coastal lands will provide a better understanding needed to begin to make the final ‘buildout’ Coastal Land Use Plan for Carlsbad. The Draft LCPA does not indicate the amount and locations of currently vacant unconstrained Coastal Land in Carlsbad. This final limited vacant land resource should be clearly documented and mapped in the DLCPA as it represents the real focus of the DLCPA – the Coastal Plan for these remaingn undeveloped

lands. These last remaining vacant lands should be primarily used to provide for and equitably distribute “High-Priority” Coastal Recreation Land Uses consistent with CCA Sections:

- i. Section 30212.5 “... Wherever appropriate and feasible, public facilities, including parking areas or facilities, **shall be distributed throughout an area so as to mitigate against the impacts, social and otherwise, of overcrowding or overuse by the public of any single area.**”;
- ii. Section 30213 “... **Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...**”;
- iii. Section 30222 “**The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development,** but not over agriculture or coastal-dependent industry.”
- iv. Section 30223 “**Upland areas necessary to support coastal recreational uses shall be reserved for such uses, where feasible**” ,
- v. Section 30251 ... The location and amount of new development should maintain and enhance public access to the coast by ... 6) assuring that the recreational needs of new residents will not overload nearby coastal recreation areas by **correlating the amount of development with local park acquisition** and development plans with the provision of onsite recreational facilities to serve the new development”

Adopted City Park Service Area and Park Equity maps discussed earlier document the proposed Draft LCP Amendment’s inconstancy with the above CCA Policy Sections. The locations and small amounts remaining vacant Coastal lands provide the last opportunities to correct the inconsistencies of City proposed Draft “buildout” LCP Land Use Plan Amendment with these Coastal Act Policies.

Currently and since 1996 there has been LCP LUP Policy/regulations for Ponto Planning Area F that require consideration of a “Public Park” prior to changing the existing “unplanned Non-residential Reserve” Land Use designation. A map and data base of vacant developable Coastal land should be provided as part of the Draft LCPA and the Draft LCPA. This map and data base should document the projected/planned loss of Coastal land use due to Sea Level Rise. Draft LCPA projects Sea Level Rise will eliminate several beaches and High-Priority Coastal Land Uses like Coastal Lagoon Trails and the Campground.

- The LCP Land Use Plan should plan and reserve the very limited vacant developable Coastal land for the long-term ‘Buildout’ needs of “High-Priority” Coastal Recreation Land Use. Vacant developable Coastal land is too scarce to be squandered for “low-priority” uses. Sea Level Rise will reduce “High-Priority” Coastal Uses. So how vacant developable Upland area should be preserved for “High-Priority” Coastal Uses is a key requirement to be fully documented and discussed in the Draft LCPA. If not one of two things will eventually happen 1) any new Coastal Park land will require very expensive purchase and demolition of buildings or public facilities to create any new Coastal Park land to meet existing and growing demand; or 2) Coastal Recreation will be hemmed-in by “low-priority” uses and thus force Coastal Recreation to decrease and become increasingly concentrated and overcrowded in its current locations; and thus will promote the eventual deterioration of our current Coastal Recreation resources. A plan that fails to fix Coastal Park deficits and then increase Coastal Parks in pace with increased population/visitor demand is a plan that can

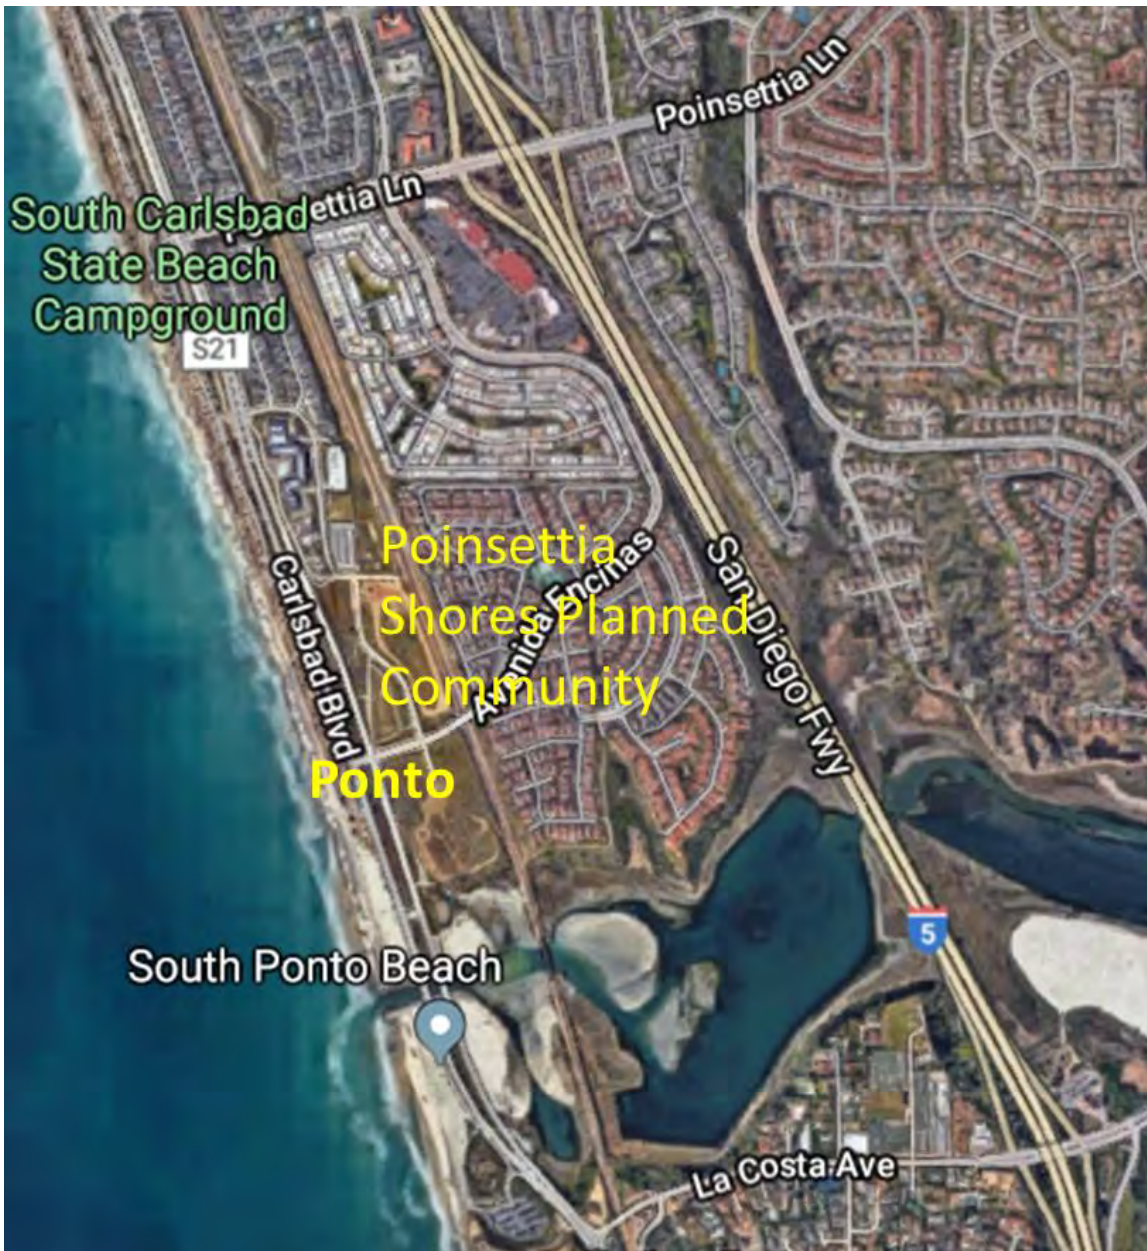

only result in degradation. How the Draft LCPA documents and addresses the land use planning of the last small portions of vacant developable Coastal land is critical for the future and future generations.

9. Citizens of South Carlsbad are concerned about the City's multiple prior flawed Ponto planning processes or 'mistakes' the City has made yet is basing the City Staff's proposed Draft LCP LUP. The concerns being the City is not openly and honestly communicating information to citizens and the public, and not allowing a reasonable and appropriate community-based planning process to address the documented Park, Coastal Recreation and unconstrained open space needs in South Carlsbad. One of these groups of citizens has created a [www.peopleforponto.com](http://www.peopleforponto.com) website to try to research and compile information and hopefully provide a better means for citizens to understand facts and then express their concerns/desires to the City of Carlsbad (City) and CA Coastal Commission (CCC). Over 2,000 emails have sent to the City and CCC regarding Coastal Land Use Planning Issues at Ponto. The San Pacifico Planned Community (i.e. San Pacifico Community Association) has also, since 2015, sent numerous emailed letters to the City and CCC noting the significant concerns about changes in Coastal planning the City is proposing for our Planned Community.

Repeatedly over 90% of surveyed citizens (results emailed prior to both the City and CCC) have expressed the vital need and desire for a Coastal Park at Ponto to serve the current and future Coastal Recreation needs for all both Ponto and South Carlsbad and for larger regional and State Coastal Recreational needs. This desire is supported by data, CA Coastal Act Policy, and also Carlsbad's Community Vision – the foundation for the City's General Plan. Ponto is the last remaining vacant Coastal area available to provide for those needs in South Carlsbad and for a regional 6-mile stretch of coastline. Citizens have expressed deep concern about the City's flawed prior Coastal planning efforts for Coastal Recreation at Ponto, including two repeated LCP Amendment "mistakes" (Ponto Beachfront Village Vision Plan in 2010 and General Plan Update in 2015) when the City twice failed to publicly disclose/discuss and then follow the Existing LCP requirements at Ponto – specifically for Planning Area F. People for Ponto had to use multiple Carlsbad Public Records Requests in 2017 to find these "mistakes". CCC Staff was helpful in both confirming the City "mistakes" and communicating back to the City. As citizens we are still unclear as to how/why these two repeated "mistakes" happened. There is citizen concern that the City is again repeating these two prior "mistakes" by not at the beginning of the Public Comment Period clearly and publicly disclosing the Planning Area F LCP requirements to citizens as part of the current LCP Amendment process, and also by not implementing the existing LCP requirement PRIOR to proposing an Amended Coastal Land Use Plan for Ponto. The City in its proposed LCP Amendment process is putting-the-cart-before-the-horse with respect to honest and open consideration, documentation and public discussion of the need for high-priority Coastal Recreation land use required of Planning Area F at Ponto. The City is also not clearly letting all Carlsbad citizens know about the Existing LCP requirements for Ponto's Planning Area F so they can be informed to reasonably participate in public review and comment regarding amending that LCP requirement, and the need for Coastal Recreation land uses in South Carlsbad. Since 2017 there has been repeated citizen requests to the City (copies were provided to the CCC) to fix these multiple fundamental/foundational flaws by in the City's prior Coastal Recreation and Public Parks and Open Space at planning, and the currently Proposed Draft LCP Land Use Plan Amendment. Since 2017 there have also been repeated citizen requests to the City to provide a truly open, honest, inclusive community-based planning process and workshops with the accurate and honest information, prior to forming a proposed Draft LCP Land Use Plan Amendment. As citizens we believe we can constructively work with the City and CCC towards a consensus or viable options on these important Coastal Recreation issues if the City allows and encourages such an open, honest and inclusive process. We request the City respond to the requests submitted to the City since 2017, and again request such a process from the City before any LCP Amendment is first considered by the Planning Commission and City Council. Such a requested process benefits all.

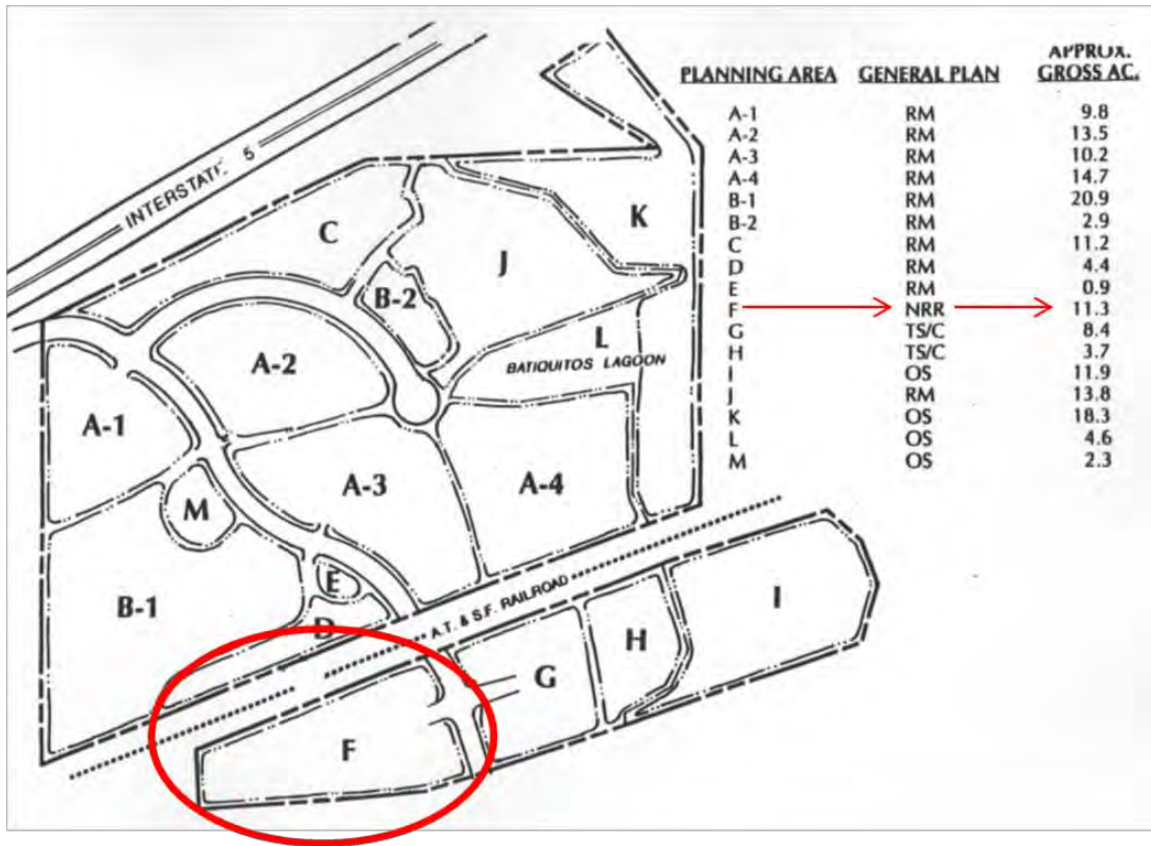

10. Why the Draft LCPA Land Use Plan for Ponto should provide for the current and future Coastal Park and Recreation needs for South Carlsbad, the San Diego Region and California.

- Ponto, is one of last remaining vacant and undeveloped Coastal lands in North County
- Ponto is the last remaining undeveloped Coastal land in South Carlsbad
- Ponto has the last unplanned Planning Area of the Existing Poinsettia Shores Planned Community & Local Coastal Program that can be planned for high-priority Coastal Recreation land use. This Existing LCP requires Planning Area F be considered for a “Public Park”.
- Following is a map of the Ponto area in South Carlsbad:

Following is the LCP Land Use map from the Existing Poinsettia Shores Master Plan & Local Coastal Program adopted in 1996. This is the Land Use map that the City is proposing to change in the proposed LCP Amendment to the Land Use Plan. As the Existing LCP Land Use map shows most all the land is ‘low-priority’ residential use at an RM Residential medium density, a small portion is ‘high-priority’ Visitor Serving TC/C Tourist Commercial. Most all the

Open Space is constrained and undevelopable land (the steep CSS habitat bluffs above Batiquitos Lagoon) or water (the lagoon water). This land/water is owned by the State of California, like the inner lagoon east of I-5. Only Planning Area M at 2.3 acres is unconstrained Open Space and it provides a small private internal recreation facility for the approximately 450 homes and 1,000 people in the Planned Community. This small recreation area is a City requirement for ‘planned developments’ to off-set loss open space from planned development impacts on housing quality. Planned developments can propose designs that reduce normal setback and open space areas – they bunch together buildings to increase development – such as the smaller lot sizes, and extensive use of “zero-setbacks” to reduce typical lot sizes that occurs at Poinsettia Shores. A private recreation facility in any of the City’s planned developments is never considered a replacement for required City Parks. Planned Developments, like unplanned developments, are required to dedicate Park land to the City, or pay a Park In-Lieu fee to the City so the City provide the developer’s obligation to provide City Park acreage to address the population increase of their proposed planned development. For Poinsettia Shores’ population the City’s minimum City Park Standard would require developers set aside 3 acres of City Park land for local park needs. For the larger Ponto area population about 6.6 acres of City Park Land is required. The Existing LCP reserves Planning Area F as an unplanned “Non-residential Reserve” Land Use until the Public Park needs for Ponto are considered and documented. Only then can the NRR land use be changed.

11. Developers have overbuilt in the Ponto area of the Coastal Zone. The City of Carlsbad has under questionable circumstances is currently choosing to ‘exempted’ Ponto developers from providing the minimum amount of unconstrained Open Space according to the City’s developer required Open Space Public Facilities Standard. The legality of these confusing circumstances is subject to a lawsuit against the City. However the City’s computerize mapping system has documented that the Ponto area of the Coastal Zone is missing about 30-acres of Unconstrained Open Space that can be used to fulfill the City’s Open Space Performance Standard that states that

15% of unconstrained and developable land must be preserved by developers as Open Space. Following is a summary of data from the City data regarding the missing Open Space at Ponto (Local Facility Management Plan Zone 9, LFMP Zone 9) in the Coastal Zone pursuant to the City's Open Space Performance Standard. If it is desirable People for Ponto can provide the City GIS map and parcel-by-parcel data base on which the following summary is based:

City of Carlsbad GIS data calculations of Open Space at Ponto area of Coastal Zone:

472 Acres = Total land in LFMP Zone 9 [Ponto area] per City of Carlsbad GIS data

(197 Acres) = Constrained land/water/infrastructure that is excluded from the City's Open Space Standard

275 Acres = Unconstrained land in LFMP Zone 9 (Ponto) subject to the City's Open Space Standard

X 15% = Minimum unconstrained Open Space requirement per the City Open Space Standard

41 Acres = Minimum unconstrained Open Space required in LFMP Zone 9

(11 Acres) = Actual unconstrained Open Space provided & mapped by City in LFMP Zone 9

**30 Acres = Missing unconstrained Open Space needed in LFMP Zone 9 [Ponto area of Coastal Zone] to meet the City's minimum GMP Open Space Standard. 73% of the required Open Space Standard is missing.**

Thus the Ponto area of the Coastal Zone appears overdeveloped with 30 additional acres of "low-priority" residential land uses due to developers' non-compliance to the City's Open Space Public Facility Performance Standard's Minimum developer required Open Space requirement. As noted a citizens group has a pending lawsuit with the City over the City's current 'exempting' Ponto and future developers from meeting the Open Space Standard.

12. The prior pre-1996 LCP for Ponto – the Batiquitos Lagoon Educational Park Master Plan & LCP (BLEP MP/LCP) had significant Open Space and recreational areas. These significant Open Space and Recreational areas were removed with BLEP MP/LCP's replacement in 1996 by the currently existing Poinsettia Shores Master & LCP (PSMP/LCP) and its City Zoning and LCP LUP requirements that reserved Planning Area F with the current "Non-residential Reserve" Land Use designation. Since the BLEP MP/LCP it appears developers and the City of Carlsbad have worked to remove "High-Priority" Coastal land uses (i.e. Coastal Recreation and Park uses) out of the Ponto area and replaced them with more "low-priority" residential and general commercial land uses. For example:

- Planning Area F used to be designated "Visitor Serving Commercial" as part of the original 1980's BLEP MP/LCP for Ponto.
- In 1996 the BLEP MP LCP was changed by developer application to the now current PSMP LCP, and the LCP LUP designation changed from "Visitor Serving Commercial" to "Non-Residential Reserve" with the requirement to study and document the need for "High-Priority" Coastal Recreation (i.e. Public Park) and/or Low-cost visitor accommodations prior to any change to Planning Area F's "Non-residential Reserve" LCP land use.
- In 2005 the City started to try to change Planning Area F to low-priority residential and general commercial land use in the City's Ponto Beachfront Village Vision Plan (PBVVP). At this time the City made its first documented Coastal 'planning mistake' by not disclosing to the public the existence of Planning Area F's LCP requirements and then also not following those LCP requirements. The City's planning process seemed focused on addressing developer's land use desires, and increasing land use intensity to boost "Tax-increment financing" as the City had established a Redevelopment Project Area at Ponto. A short time after the State of CA dissolved Redevelopment Agencies due in part to such abuses by cities. The CCC formally rejected the PBVVP in 2010, citing the City's failure to follow the LCP requirements for Planning Area F.

- Five years later in 2015 the City again adopted a proposed General Plan Update to again change Planning Area F to low-priority residential and general commercial land use. The General Plan Update cited the City's PBVVP that was in fact rejected by the CCC only a few years before. The City again repeated their PBVVP's Coastal land use 'planning mistake' by again not disclosing to the public the existence of Planning Area F's LCP requirements and then not following those LCP requirements. It is unclear why the City did this only 5-years after the CCC specifically rejected the Ponto Beachfront Village Vision Plan for those same reasons.
- In 2017 citizens found and then confirmed these Ponto Coastal 'planning mistakes' by the City through multiple official Carlsbad Public Records Requests and CCC Staff confirmation. The CCC readily identified the mistakes, but the City's 2019 proposed Draft LCP Land Use Plan and planning process still has yet fully disclose these prior Coastal 'planning mistakes' to ALL citizens of Carlsbad - the failure to disclose and follow the Planning Area F LCP LUP and City Zoning requirements. Full City disclosure is needed now to try to correct many years of City misrepresentation to citizens on LCP required Coastal land Use planning at Ponto. It is needed now so the public is aware at the start of the Public Comment Period. In 2017 citizens began asking the City fix the City's over 12-years of misinformation and planning mistakes by 'restarting' Coastal land use planning at Ponto with an open and honest community-based Coastal planning process. These citizens' requests have been rejected.
- In 2019 the City Staff proposed citywide Draft LCP land Use Plan Amendment that again proposed to change Planning Area F to "low-priority" residential and general commercial land use, without First disclosing the Planning Area F LCP requirements with corresponding analysis of the Need for Coastal Recreation (i.e. Public Park) and/or low-cost visitor accommodations at Planning Area F and providing that Documented analysis for public review/Consideration/comment. This seems like another 3<sup>rd</sup> repeat of the prior two Coastal planning mistakes by the City. In 2019, again citizens asked for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again the City rejected citizens' requests.
- In 2020 thousands of public requests again asked, and are currently asking, for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again these requests are being rejected. Based on the significant citizen concern and the documented prior 'planning mistakes' at Ponto it appears reasonable and responsible for Ponto's Planning Area F to ether:
  - i. Retain its current Existing LCP LUP land Use of "Non-Residential Reserve" until such time as the City's past Ponto Beachfront Village Vision Plan and General Plan Update planning mistakes and other issues subject to current planning lawsuits against the City are resolved with a true, honest and open community-based Coastal planning process asked for by citizens since 2017. Or
  - ii. Propose in the Draft LCP Land Use Plan Amendment to re-designated Planning Area F back to a Visitor Serving Commercial and Open Space ("i.e. Public Park") to provide both "High-Priory" coastal uses v. low-priority residential/general commercial uses due to the documented Coastal Recreation and Low-cost visitor accommodation needs for both citizens and visitors at Ponto and South Carlsbad.

13. Questionable logic and inconsistency in proposed Draft land use map and policies: Chapter 2 Figure 2-2B & C on pages 2-19 & 20 proposes to Amend the existing LCP Land Use Plan Map, and policies LCP-2-P.19 and 20 on pages 2-27 to 2-29 propose Amendments to existing LCP policy and create a new added layer of policy referencing a Ponto/Southern Waterfront. The proposed Land Use Map and Policies serve to firmly plan for "low-priority" residential and general commercial land uses at Ponto with a clear regulatory Land Use Plan Map showing these land uses and by specific regulatory policy (LCP-2-20) that clearly requires (by using the words "shall") these "low

priority” uses. In contrast the “High-Priority” Coastal Recreation and Coastal Park land uses that would be designated as Open Space are not mapped at all in Figure 2-2B & C; and the proposed policy LCP-2-P.19 is both misleading and specifically does Not Require any “High-Priority” Coastal Recreation and Coastal Park land Use at Ponto and South Carlsbad. In fact page 2-22 specifically indicates two “may” criteria that would first need to occur in the positive before any potential Coastal Recreation and Coastal Park Land could then theoretically even be possible. It is highly probable that it is already known by the City that the proposed relocation of Carlsbad Boulevard (Coast Highway) is not very feasible and not cost effective, and will not yield (due to environmental habitat constraints, narrowness of the roadway median, and other design constraints) any significant dimensions of land that could potentially be designated Open Space and realistically be used as a Park.

The blank outline map (Figure 2-2B & C) provides no mapped Open Space Land Use designation, other than for the currently existing State Campgrounds’ low-cost visitor accommodations, so the proposed Land Use Plan Map is Not providing/mapping any new Open Space land use to address Coastal Recreation and Coastal Park needs. The Draft LCP Land Use Plan Amendment’s proposed/projected/planned Sea Level Rise and associated coastal erosion appears to indicate that this “High-Priority” low-cost visitor accommodation (Campground) land use designated as Open Space will be reduced in the ‘Buildout’ condition due to coastal erosion. So **the Draft LCP Land Use Plan is actually planning for a Reduction in Open Space Land Use in South Carlsbad and Ponto.** Both the blank outline map and the proposed Land Use Map Figure 2-1 DO NOT clearly map and designate both South Carlsbad’s Draft LCP Planned Loss of the Open Space Land Use and also any New or replacement unconstrained land as Open Space land use for Coastal Recreation and Coastal Park. This is an internal inconsistency in Land Use Mapping that should be corrected in two ways:

- 1) Showing on all the Land Use (Figure 2-1), Special Planning Area (Figure 2-2B & C), and other Draft LCP Maps the Draft LCP’s planned loss of land area in those maps due to the Draft LCP’s planned loss of land due to Sea Level Rise and Coastal Land Erosion. This is required to show how land use boundaries and Coastal Recourses are planned to change over time. or
- 2) Provide detailed Land Use Constraint Maps for the current Carlsbad Boulevard right-of-way that the City “may” or ‘may not’ choose (per the proposed “may” LCP-2-P.19 policy) use to explore to address the City’s (Park Master Plan) documented Coastal Recreation and Coastal Park land use shortages in Coastal South Carlsbad and Ponto. Clearly showing the potential residual Unconstrained Land within a Carlsbad Boulevard relocation that have any potential possibility to add new Open Space Land Use Designations (for Coastal Recreation) is needed now to judge if the policy is even rational, or is it just a Trojan horse.

The proposed internal inconsistency in mapping and policy appears like a plan/policy ‘shell game’. The proposed Land Use Plan Maps and Policies should be consistent and equality committed (mapped-shall v. unmapped-may) to a feasible and actual Plan. If not then there is No real Plan.

There is no Regulatory Policy requirement in LCP-2-P.19 to even require the City to work on the two “may” criteria. The City could choose to bury the entire Carlsbad Boulevard relocation concept and be totally consistent with Policy LCP-2-P.19 and the LCP. As such the language on 2-22, Figure 2-2C (and the proposed Land Use Map), and policy LCP-2-P.19 and 20 appear conspire to create a shell game or bait-and-switch game in that only “low-priority” residential and general commercial uses are guaranteed (by “shall” policy) winners, and “high-priority” Coastal Recreation and Coastal Park Land Uses are at best a non-committal ‘long-shot’ (“may” policy) that the city is specifically not providing a way to ever define, or commit to implement. The proposed Draft LCP Land Use Plan Coastal Recreation and Coastal Park statements for Ponto are just words on paper that are designed to have no force, no commitment, no defined outcome, and no defined requirement to even have an outcome regarding the

documented “High-Priority” Coastal Recreation and Coastal Park needs at Ponto, Coastal South Carlsbad and the regional 6-mile Coastal Park gap centered around Ponto.

Policy LCP-2-P.19 falsely says it “promotes development of recreational use” but does not in fact do that. How is development of ‘recreational use promoted’ when the Use is both unmapped and no regulatory policy requirement and commitment (no “shall” statement) to ‘promote’ that Use is provided? Policy LCP-2-19.19 appears a misleading sham that does not ‘promote’ or require in any way “High-Priority” Coastal Recreation and Park Land Use at Ponto. There should be open and honest public workshops before the Draft LCP Amendment goes to its first public hearing to clearly define the major environmental constraints and cost estimates involving possible relocation of Carlsbad Boulevard and constructing needed beach access parking, and sufficient and safe sidewalks and bike paths along Carlsbad Boulevard; and then map the amount and dimensions of potential ‘excess land’ that maybe available for possible designation as Open Space in the City General Plan and Local Coastal Program. The City should not repeat the mistakes at the Carlsbad Municipal Golf Course (resulting in the most expensive to construct maniple course in the USA) by not defining and vetting the concept first. A preliminary review of City GIS data appears the amount, dimensions and locations of any potential ‘excess’ land maybe modest at best. However before the City proposes a ‘Buildout’ Coastal Land Use Plan this critical information should be clearly provided and considered. It is likely the City’s Carlsbad Boulevard relocation concept is unfeasible, inefficient, too costly, and yields too little actual useable ‘excess land’ to ever approach the Coastal Recreation and Coastal Park needs for South Carlsbad. This may already be known by the City, but it surely should be publicly disclosed and discussed in the DLPCA.

The proposed Coastal Land Use Plan to address Carlsbad’s, San Diego County’s and California’s High-Priority Coastal Recreation Land Use and Coastal Park needs should NOT be vague “may” policy that appears to be purposely designed/worded to not commit to actually providing any “High-Priority” Coastal Recreation and Coastal Park land uses on the map or in policy commitments. The Land Use Plan and Policy for High-Priority Coastal Recreation and Coastal Park Land Use should be definitive with triggered “shall” policy statements requiring and assuring that the ‘Forever’ “High-Priority” Coastal Recreation and Coastal Park needs are properly and timely addressed in the City’s proposed ‘Buildout’ Coastal Land Use Plan. This “shall” policy commitment should be clearly and consistently mapped to show the basic feasibility of the planned outcomes and the resulting actual Land that could feasibly implement the planned outcome.

Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard: Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard are Coastal Access and Completes Streets issues. South Carlsbad Boulevard now and has for decades been a highly used Incomplete Street that is out of compliance with the City’s minimum Street Standards for pedestrian and bike access and safety. The Coastal Access portion of the Draft Land Use Plan should strongly address the Complete Street requirements for South Carlsbad Boulevard. Those policy commitments should be reference in Policy LCP-2-P.19 and 20 as Carlsbad Boulevard in **South Carlsbad is the most Complete Street deficient portion of Carlsbad Boulevard**. Forever Coastal Access parking demand and the proposed LCP Amendment’s Land Use Plan to supply parking for those demands should also be addressed as part of the Coastal Access and Complete Streets issues for South Carlsbad Boulevard. If much needed Coastal Access Parking is provided on South Carlsbad Boulevard as part of a “maybe” implemented realignment, most of the “maybe” realignment land left after constraints are accommodated for and buffered will likely be consumed with these parking spaces and parking drive aisles/buffer area needed to separate high-speed vehicular traffic from parking, a buffered bike path, and a sufficiently wide pedestrian sidewalk or Coastal Path. After accommodating these much needed Complete Street facilitates there will likely be little if any sufficiently

dimensioned land available for a Coastal Recreation and a Coastal Park. The needed Coastal Access and Complete Street facilities on South Carlsbad Boulevard are very much needed, but they are NOT a Coastal Park.

As mentioned the proposed Draft Coastal Land Use Plan's Maps and Policies are very specific in providing for the City's proposed LCP Land Use changes to 'low-priority' Residential and General Commercial' on Planning Area F (proposed to be renamed to Area 1 and 2). It is curious as to why the proposed Draft LCP Land Use Plan Amendment has no Land Use Map and minor vague unaccountable Land Use Policy concerning 'High-priority Coastal Recreation Land Use' at Ponto, while the very same time proposing very clear Land Use Mapping and detailed unambiguous "shall" land use policy requirements for 'low-priority' Residential and General Commercial land use at Ponto. Why is the City Not committing and requiring (in a Land Use Map and Land Use Policy) to much needed 'High-priority' Coastal Recreation and Coastal Park Land Use' needs at Ponto the same detail and commitment as the City is providing for "low-priority" uses? This is backwards and inappropriate. It is all the more inappropriate given the 'Buildout' Coastal Land Use Plan the City is proposing at Ponto. These issues and plan/policy commitments and non-commitments will be 'forever' and should be fully and publicly evaluated as previously requested, or the Existing LCP Land Use Plan of "Non-residential Reserve" for Planning Area F should remain unchanged and until the forever-buildout Coastal Recreation and Coastal Park issues can be clearly, honestly and properly considered and accountably planned for. This is vitally important and seems to speak to the very heart of the CA Coastal Act, its founding and enduring principles, and its policies to maximize Coastal Recreation. People for Ponto and we believe many others, when they are aware of the issues, think the City and CA Coastal Commission should be taking a long-term perspective and be more careful, thorough, thoughtful, inclusive, and in the considerations of the City's proposal/request to permanently convert the last vacant unplanned (Non-residential Reserve) Coastal land at Ponto to "low-priority" land uses and forever eliminate any Coastal Recreation and Coastal Park opportunities.

14. Public Coastal View protection: Avenida Encinas is the only inland public access road and pedestrian sidewalk to access the Coast at Ponto for one mile in each direction north and south. It is also hosts the regional Coastal Rail Trail in 3' wide bike lanes. There exist now phenomenal coastal ocean views for the public along Avenida Encinas from the rail corridor bridge to Carlsbad Boulevard. It is assumed these existing expansive public views to the ocean will be mostly eliminated with any building development seaward or the Rail corridor. This is understandable, but an accountable ('shall') Land Use Plan/Policy addition to proposed Policy LCP-2-P.20 should be provided for a reasonable Public Coastal View corridor along both sides of Avenida Encinas and at the intersection with Carlsbad Boulevard. Public Coastal view analysis, building height-setback standards along Avenida Encinas, and building placement and site design and landscaping criteria in policy LCP-2-P.20 could also considered to reasonably provide for some residual public coastal view preservation.
  
15. Illogical landscape setback reductions proposed along Carlsbad Boulevard, and Undefined landscape setback along the Lagoon Bluff Top and rail corridor in Policy LCP-2-P.20: Logically setbacks are used in planning to provide a buffering separation of incompatible land uses/activities/habitats. The intent of the setback separation being to protect adjacent uses/activities/habitats from incompatibility, nuisance or harassment by providing a sufficient distance/area (i.e. setback) between uses/activities/habitats and for required urban design aesthetics – almost always a buffering landscaping. Policy LCP-2-P.20. A.4 and C.3 says the required 40' landscape setback along Carlsbad Boulevard "maybe reduced due to site constraints or protection of environmental resources." The ability to reduce the setback is illogical in that setbacks are intended to protect environmental resources and provide a buffer for constraints. In the Carlsbad Boulevard right-of-way there is documented sensitive environmental habitat, along with being a busy roadway. How could reducing the protective 40' setback in anyway better protect that habitat or provide a better landscaped compatibility or visual aesthesis buffer along Carlsbad Boulevard? It is

illogical. If anything the minimum 40' landscaped setback should likely be expanded near "environmental resources". Regarding reducing the minimum 40' landscape setback for "site constraints" there is no definition of what a "site constraint" is or why it (whatever it may be) justifies a reduction of the minimum landscaped setback. Is endangered species habitat, or a hazardous geologic feature, or a slope, or on-site infrastructure considered a "site constraint"? There should be some explanation of what a "site constraint" is and is not, and once defined if it warrants a landscape setback reduction to enhance the buffering purpose of a landscape setback. Or will a reduction only allow bringing the defined constraint closer to the adjacent uses/activities/habitats that the landscape setback is designed to buffer. It is good planning practice to not only be clear in the use of terms; but also, if a proposed reduction in a minimum standard is allowed, to define reasonably clear criteria for that reduction/modification and provide appropriate defined mitigation to assume the intended performance objectives of the minimum landscape setback are achieved.

Policy LCP-2-P.20.C.4 is missing a critical Bluff-Top landscape setback. It seems impossible that the DLCPA is proposing no Bluff-Top setback from the lagoon bluffs and sensitive habitat. The Batiqitos Lagoon's adjoining steep sensitive habitat slopes directly connect along the Bluff-top. Batiqitos Lagoon's and adjoining steep sensitive habitat is a sensitive habitat that requires significant setbacks as a buffer from development impacts. Setbacks similar to those required for the San Pacifico area inland of the rail corridor, should be provided unless updated information about habitat sensitivity or community aesthetics requires different setback requirements.

Policy LCP-2-P.20 does not include a landscape setback standard adjacent to the rail corridor. This is a significant national transportation corridor, part of the 2<sup>nd</sup> busiest rail corridor in the USA. Train travel along this corridor is planned to increase greatly in the years to come. Now there is significant noise, Diesel engine pollution, and extensive ground vibration due to train travel along the rail corridor. Long freight trains which currently run mostly at night and weekends are particularly noisy and heavy, and create significant ground vibration (underground noise). These issues are best mitigated by landscape setbacks and other buffers/barriers. A minimum setback standard for sufficient landscaping for a visual buffer and also factoring appropriate noise and ground vibration standards for a buildout situation should be used to establish an appropriate landscape setback that should be provided along the rail corridor. Carlsbad's landscape aesthetics along the rail corridor should be factored into how wide the setback should be and how landscaping should be provided. An example for the landscape aesthetic portion of the setback standard could be landscape design dimensions of the San Pacifico community on the inland side of the rail corridor. However, noise and vibrational impacts at San Pacifico are felt much further inland and appear to justify increased setbacks for those impacts.

Submitted: May 28, 2020

Dear Carlsbad City Council, Carlsbad Planning and Parks Commissions, and Coastal Commission:

The City Budget should address both short-term Covid-19 impacts, and near/longer-term investments needed for Economic Recovery and Revitalization.

The quality of our Carlsbad coastline, Coastal Parks and open spaces are continually rated by Carlsbad citizens and businesses as the critical foundation of our quality of life, economic strength, and tourism industry. Ponto Coastal Park is a critically needed investment, and the last opportunity for the City to make an investment for Carlsbad's long-term sustainability. South Carlsbad Citizens, visitors, and the Visitor Industry have no Southern Coastal Park. Ponto is the only place to provide that needed investment for residents and visitors, and advance Economic Recovery and Revitalization of South Carlsbad's significant Visitor Industry. Coastal Recreation is the major attraction for visitors.

With these understandings we submit the following testimony and data from the City's FY 2019-20 Budget Public Input Report that highlights the documented significant number of citizens asking for a Ponto Coastal Park. We also note concerns about the Report's dilution of specific citizen input provided at both the March 4, 2019 and 2020 Citizen Workshops.

Citizen input on the need for a Ponto Coastal Park was the most numerous specific place need/desire citizens mentioned in the City's:

- Budget Public Input process,
- Draft Local Coastal Program Amendment process, and
- Parks Master Plan Update process.

The Budget Public Input process documented 85 specific, verbatim citizen comments on Ponto area park needs and over 90% of citizen requests that Council budget to address this need. These 85 Verbatim Citizen comments (listed at the end of this testimony and data) specifically address how they would like their (Park) tax dollars budgeted. Additionally, 2,500 similar public input email/petitions were submitted as public comments on Carlsbad's Draft Local Coastal Program Amendment and Park Master Plan Update processes spoke to the need for a Ponto Coastal Park.

As you know, the 11-acre Ponto Planning Area F site is for sale. This site is similar in size/shape as Holiday Park, providing a Coastal site for similar multipurpose community functions.

Carlsbad's Local Coastal Program (and thus General Plan and Zoning Code) requires the City to first consider and document the need for a "Public Park" before any land use can be planned for the Planning Area F site.

The City's Park Master Plan already documents the need for a Ponto "Public Park", showing the area as "unserved" by City Parks and an area of Park "inequity" correlating well with Citizen input.

The City also received offers of potential donations, or cost-saving collaborations from Carlsbad Citizens and non-profits to advance the much needed Ponto Coastal Park. The City disappointingly has not replied to these special opportunities.

**Therefore, it is requested the City budget for a Ponto Coastal Park and contact the Planning Area F landowner regarding site purchase.**

Consistent with Budget Public Input Report page 3 it is requested that this this testimony and data be provided to the Planning and Parks Commissions; and Coastal Commission as public input on the City Staff's proposed 1) City Budget, 2) Draft Local Coastal Program Amendment, and 3) Parks Master Plan Update.

Thank you.  
People for Ponto

The following data is from the Carlsbad FY 2019-20 Budget Public Input Report:  
<https://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=38546>

In reading the data different text treatment is used to differentiate between actual page number and text in the Report, Important Report text, and public comments and analysis of Report text. Following is a legend to those text treatments:

- (p.X) is the Report page number where the information is found, and normal text is the actual Report text.
- Text in **Bold Face** is particularly important Report text.
- **Arrow bullets and Text in Bold Italic Text** are analysis and comments on the Report's information.

Introduction (p. 3):

---

- **Members of the public have a right to be involved in decisions affecting their lives.**
- **It is the city's responsibility to seek out and facilitate the involvement of those interested in or affected by a decision. The city errs on the side of reaching out to people who might not be interested, rather than potentially missing people who are.**
- **City staff provide balanced and factual information to the public and do not engage in advocacy.**
- **Public dialogue strives for a focus on values over interests and positions.**
- **Public involvement planning is coordinated across all city departments to ensure consistency and avoid process fatigue.**

On (p. 5) specific Verbatim Public Input was generalized by City Staff as follows:

---

Main Themes: The following themes were a high priority overall:

- **Neighborhood quality of life**
- **Access to nature, trails and open space**
- Environmental sustainability
- Traffic and mobility

Most Important Services: City services in the following areas were identified as the most important:

- **Neighborhood quality of life**
- **Parks and recreation**
- Law enforcement
- Fire and paramedic service

- Environmental sustainability

Specific Areas for Budget Enhancement: When asked which services they would like to see enhanced in next year's budget, the top five responses were:

- **Neighborhood quality of life**
- **Parks and recreation**
- **Environmental sustainability**
- **Mobility/transportation**
- Arts and culture

- *The lack of a Coastal Park at Ponto impacts all South Carlsbad neighborhoods' quality of life. Carlsbad's Park Master Plan documents that Ponto and Coastal South Carlsbad are "not served" by parks and Ponto and Coastal South Carlsbad is an area of park "inequity"*
- *The City and CA Coastal Commission are required to consider and document the need for a "Public Park" before any planning to allow any land use on Ponto Planning Area F. For over 10-years the City failed to disclose and follow this requirement – making multiple "Ponto planning mistakes". The City will now have to correct its multiple "Ponto planning mistakes" as part of the Draft Local Coastal Program Amendment*
- *The lack of a Park at Ponto also impacts both Environmental Sustainability and Mobility/Transportation:*
  - *Prevents parks within walking distance, forces driving (and the need for more parking in our Park) to access parks.*
  - *Forces South Carlsbad Neighborhoods to drive long distances to North Carlsbad and/or Encinitas to access a Coastal Park*
  - *Congests North Carlsbad and/or Encinitas Coastal Parks with South Carlsbad Coastal Park demands*
  - *Congests North Carlsbad and/or Encinitas roadways and parking facilities with South Carlsbad Coastal Park demands.*
  - *Importantly, it would forever negatively impact the economic sustainability of Carlsbad's Visitor industry. There are thousands of inland South Carlsbad resort/hotel rooms that have no access to a Coastal Park. This will ultimately undermine the attractiveness and competitiveness of South Carlsbad's Visitor industry and the tax revenue the City receives from that industry.*

Word Maps (pp 6-8)

Staff provided 3 'word maps' saying the show the words mentioned at the March 4<sup>th</sup> 2020 workshop attend by 38 citizens.

- *There is citizen concern about the accuracy of these word maps and what is conveyed on pages 6-8 of the Report.*
- *Several of those 38 citizens, provided specific written (individual index cards) and verbal (round table flip chart notes) Pubic Input several stating the need for a "Ponto Coastal Park", another mentioned a "liner Park", and several mentioned the "Senior Center", all these written/verbal comments were not accurately documented or reported on pages 6-8. It appears the City Staff interrupted and translated/transformed the actual citizen comments (as documented in the index cards and flip chart notes) when creating the word maps. There is a concern that specific citizen input provided at the actual workshop was not accurately*

reported in the Public Input Report to the City Council. As citizens we are concerned that our input is accurately reported and conveyed to the City Council.

- Surprisingly no word map was provided in the Report for the much larger (1,330 to 1,710 person) March 5-22, 2019 Public Input process. Following is the actual word map the city showed participants at the March 4, 2019 Public Input Workshop. The image of the word map was taken with a participant's cell phone. It summarized the magnitude of citizen needs/desires expressed at this larger Budget workshop.

The word map graphic above from the March 4, 2019 Workshop although not summarized by Staff in the Report is clearly documented in the Verbatim Comments (Public Input) that was included in pages 24-91 of the Report and accounted for below.

Verbatim Comments (pp 24-91): **Number of times a specific Place Name was mentioned:**

- **Ponto, Zone 9, and Southwest Carlsbad: 85 times** (see below for list of Verbatim Public Input)
- Village: 23 times, this is 27% as much as Ponto area
- Carlsbad Senior Center: 7 times, this is 8% as much as Ponto area
- Agua Hedionda Lagoon: 3 times, this is 4% as much as Ponto area
- New Village Arts: 3 times, this is 4% as much as Ponto area
- Barrio: 2 times, this is 2% as much as Ponto area
- Calaveras: 2 times, this is 2% as much as Ponto area
- Alga Norte Park: 2 times, this is 2% as much as Ponto area

- Poinsettia Park: 2 times, this is 2% as much as Ponto area
- Veterans Park: 2 times, this is 2% as much as Ponto area
- Rancho Carrillo: 1 time, this is 1% as much as Ponto area
- Hub Park: 1 time, this is 1% as much as Ponto area
- Crossings Golf Course: 1 time, this is 1% as much as Ponto area
- Robertson Ranch: 1 time, this is 1% as much as Ponto area
- Palomar Airport: 1 time, this is 1% as much as Ponto area

➤ ***As the Budget Public Input Report suggests, reading of each of the Verbatim Comments of actual public input should be done. The place names area specific list above does not include broad places such as “beaches” the names of specific roads, and other names that appeared vague. It is clear in reading through and counting the place name references that the Ponto area expressed as Ponto, Zone 9 (i.e. Local Facilities Management Plan Zone 9), and the coastal park references to Southwest Carlsbad and South Carlsbad was by far the greatest area of public input. This makes perfect sense in that for half of the City Ponto is the last significant vacant Coastal land available to address two of Carlsbad Citizens’ most important budget concerns ‘Neighborhood quality of life’ and ‘Parks and recreation’ that relate to core community values around Carlsbad’s “Beach”, “small beach town character”, and “valued open space”.***

***Following is the listing of the Verbatim Public Input (Appendix A in Public Input Report, pp 24-91) that specifically referenced Ponto or a clear reference to Ponto such as Zone 9 or Coastal Park needs in Southwest Carlsbad. There are many more comments such as “The purchase of remaining open space for preservation of the last remaining coastal areas.” that logically and clearly refers to the Ponto situation. However these many additional comments were excluded from the list below since they did not specifically mention Ponto, Zone 9, or SW Carlsbad place names.***

***Of the 85 citizen comments below specifically referencing Ponto, 77 or 90.6% were asking the City to budget for a Ponto Coastal Park. Only 8, or 9.4% of those citizen comments were not asking for a Ponto Coastal Park. We are not sure if the 8 commenters knew about the City’s now acknowledged “Ponto planning mistakes” dating back over the past 10-years, as the City only first briefly acknowledged this recently on 1/28/20. We have found once citizens are truly aware of the facts and prior “Ponto planning mistakes” there is almost uniform desire for a Ponto Coastal Park. There is citizen concern that these “Ponto planning mistakes” are not being fully, openly and accurately being disclosed to Citizens during the various Public Input processes, thus tainting those Public Input processes.***

Verbatim Ponto City Budget Public Input from pages 24-91 of FY 2019-20 Budget Public Input Report:

1. My biggest disappointment is the lack of park facilities in my section of the city, near South Ponto Beach. Lots of open land but no park within at least 2 miles. This should be a city priority
2. It used to be the beach but now Ponto & South Carlsbad are more like rocky shores. I’d like to see the rocks cleared up and more sand added to these beaches
3. COMMENT TRAFFIC IS BEING SPAMMED HERE TO PUSH THIS PONTO PARK PLOY (PPP) Develop Ponto and have the hotel maintain our beach! It’s all rocks currently!
4. Ponto Beach. We do NOT need a commercial development or hotel there. That needs to be a park and/or open space for future generations.

5. Ponto beach.
6. Don't ruin South Ponto Beach with condos and/or hotel, need to restore the sand on the beach.
7. Like most residents and visitors I treasure the beach. I feel the highest priority should be open space and parks that serve the beach region. Particularly important is the open space still available in the Ponto region. There is ample space here for an extraordinary area of open space and even a park. There is not one of either of these in the southwest quadrant near the beach. Children cannot walk safely to a park from that area. Open space and a park in the Ponto area would serve all residents, visitors, and the business community.
8. Beaches, parks, safe neighborhoods, OPEN SPACE! Need Beach parks like Del Mar Powerhouse/Sea Grove Park & Encinitas Community Park. Ponto Beach needs some attention.
9. I love the beach and the parks and fields and open space and hiking trails in Carlsbad. I wish we had more!! We have had 3 kids in sports in Carlsbad. Currently, field/park space is very limited and often over committed. Currently, there aren't enough fields to meet the need of the community. Adding more parks and fields would create a better community in the following ways.... The sports played on these fields help keep our kids fit and healthy; It keeps kids busy and out of trouble; It fosters friendships and community; it teaches team work and fosters dedication and teaches a willingness to help others succeed; it brings in community \$\$ from other teams who come to play on Carlsbad fields; It's a wonderful way to showcase our city to others who will want to return thus helping grow tourism. Additional Parks would offer the same benefits. We do not need more high density building. And, Please do NOT ruin Ponto with more building!!!!!!
10. We love the beach and the small-town feel Carlsbad has. We love the scattered open spaces and trails. Carlsbad is a great place to live and spend time outdoors, like the Ponto area. Let's keep it that way by not developing every last square foot into a condo complex, hotel or shopping mall, if that's what you want please move to Oceanside.
11. Let us protect the valuable open space that is left and not develop every square inch. Especially at the beach, let us save the land across the coast highway from Ponto Beach and make a beautiful park, not more condos and hotels. Carlsbad is in great financial shape and does not need to go after every development and tax dollar it can get. Some things are more important, like quality of life, than a fat wallet. I know that this will fall upon deaf ears amongst the two older members of the City Council, but maybe some rearranging of priorities is in order.
12. Would love to see the last areas of open land to stay that way. I have lived here for 25 years and have seen a tremendous amount of development eating away at the open beauty of the area. We have enough shopping centers and homes. Please leave the area at Ponto open and do not approve the Ponto development.
13. Keep Ponto Beach development free!
14. Preserving Open Space and Building Ponto Park in the South West Quadrant!
15. I second Tisha Klingensmith's comment and all the others regarding Ponto Beach development.
16. Preserving open space and maintaining high quality Parks and Rec with park location emphasis on geographical location. It's time to build a park in the SW quadrant near the beach for locals and visitors alike. Veterans Park is not a solution for each quadrant's deficiency, particularly in the south.
17. We need more parks, especially in southwest Carlsbad!
18. I agree, we need more parks and open space. I live in Zone 9 and don't have a park anywhere within walking distance.
19. We need to continue to preserve open space and NOT develop Ponto into an awful condo complex. We would love a park!

20. We need a park in the Ponto area and not a development. It is the last open space next to the beach left
21. I agree with the need to preserve open space throughout Carlsbad and NOT develop Ponto into awful condo complex.
22. We need to preserve our open space --it's what keeps the city feeling like a small town. We need more parks -esp one at Ponto in the SW quad!
23. Preserve the open space and build a park in SW quadrant at Ponto. We do not need or want any more huge developments, especially right by the beach in one of the last remaining open spaces. Once it's built, you can't un-build it. Build Ponto Park in SW quadrant. Do the right thing. Especially for our children and grandchildren. They won't thank us for building outrageously tall high density condos, hotels and unnecessary shops right by our gorgeous beaches. The only people this benefits are some wealthy developers, not the people of Carlsbad. Think long term, not short term. We have a beautiful city and community-preserve it now or it's gone forever!
24. We really need a park in the southwest quad by the beach. This could be an amazing asset (on SO many levels) for the community and visitors alike. The revenue stream would return the city investment in spades!
25. Parks. Needed in Ponto area our children in this area don't have a close park. And the house lots in our area are small.
26. I agree that we should be very mindful that the citizens of Carlsbad voted out the retail space plan at the power plant site a few years ago. The new Ponto project should not replace that. Citizens should be part of the decision to build out that area
27. We need to preserve our open space and we need a park at Ponto!
28. We need a park in the Southwest quadrant of our community. Safety in the community is what we like best in this area
29. Carlsbad's small town feel, friendly atmosphere and location has made it our ideal place to live for the past 20 years, We live across from South Ponto Beach and DESPERATELY need a park for our area residents. It would be sad to see the area overbuilt with high density projects and not retain some of the open space at this southern entrance to our "Village by the Sea". PLEASE help preserve some of its appeal before it is too late.
30. I love the quaintness of the Village, the open land areas, trails, small businesses and the arts. A huge NO to PONTO. Please stop the excessive building and development of the open areas of our beautiful and unique city. We have lived here for over 30 years and are sad to see so much over development. Keep our special village a village, and please don't turn it into another ordinary city.
31. Favorite is small town feel and the beach --the beach provides us with all the open space we need. The city has enough open space with all the lagoons, etc. --we don't need any more parks --especially at PONTO --I am thrilled to see and drive by every day the new resort at La Costa which is in Encinitas and that is what we need here at the South end of Carlsbad --more residential --NO more open space
32. What I love about Carlsbad is that it has a small village feel but it also has the beach and some restaurants and then little town. I really would like more to walk to around the Ponto area. Specifically I think it should be more of a beat centered area with places to grab ice cream or grab some food or a coffee and walk to the beach.
33. I love that our village that is not a strip of 101. The quaint cottages helped Carlsbad have a downtown feel. It has several streets with unique interest. I love the Trees on Grand! The landscape of the trees setting the height of the town. Unfortunately the taller buildings are killing that. Vertical dwellings are taking over.. think of the reason you travel to Europe. It's not

for Developers Generica. We also want the NRG power plant space into a Park... and... I would LOVE for the city to finish the rail trail to Ponto. Imagine taking a trail to Ponto? It would be a dream!

34. Our San Pacifico Community and the surrounding neighborhoods need a local park. So far Carlsbad has no real performing arts venue of any size to meet the needs of a city of more than 100,000. This should be a serious consideration when the new civic center is being designed.
35. We need more coastal parks and open space. Especially in zone 9
36. protect more open space, including Ponto
37. We need Veterans Park completed and Ponto park developed. Everyone in Carlsbad is engaged and we have been talking about the park deficits for a while now. Veterans park is over-due!!!
38. Our libraries are the best in the region! But I have to put them 4th to our Neighborhood quality of life, which is being impacted by huge developments destroying our property values, our piece of mind and privacy. We do need to insure that our environment is cared for, since all of these housing projects are going in. I do love our parks but we need to insure that the SW quadrant has their share of parks (think-Ponto).
39. Zone 9 (in southwest Carlsbad) does not have a park within walking distance! I hope the City can remedy this.
40. Ponto needs a park not a hotel or more condos. Please stop building on every last piece of land
41. See previous comment concerning the lack of a local, beach oriented park in the South Ponto area. Ditto a performing arts venue.
42. PLS get the Ponto Proyect development going....., that area of Carlsbad needs it asap
43. I support Ponto Development. PLs get it going...
44. Ponto has 2 miles of unobstructed beach access and a lagoon that already act as a "park within walking distance". The Ponto project was approved long ago and is part of the citizen approved master plan. Please get it done.
45. Strengthen and protect the financial stability of the City. Businesses pay a significant amount of taxes, property, sales and income and those employed spend and live here. Encourage affordable housing opportunities for everyone, think outside the box and find some unique solutions. Complete build out in areas available, Ponto Beach is a great opportunity and the project is well thought out, get it built. And please don't become a 'Nanny City' and waste time to pass frivolous laws restricting straws, plastic bags, soda consumption, etc.
46. Development of open space and parking space in the Ponto region
47. Specifically, I want the city to remedy the lack of equal access to parks and trails evident in the southwest quadrant of the city. I support a park project at Ponto: in the long run, the south coastal gateway to Carlsbad needs a welcoming park with beach access and supporting facilities. Though less extensive than Village beach areas, good design would merge a Ponto park with access to beach and access to the 'memorial area on the bluff at city border with the ecology of the Batiquitos Lagoon adjacent to make a marvelous creek to beach environment accessible for all and ever.
48. There are two miles of unobstructed beach plus the lagoon within "walking distance" of the neighborhoods near Ponto. The project was approved long ago and is part of the Master Plan approved by the citizens of Carlsbad. Zoning changes and project vote downs are often just another way to steal private property.
49. Local park deficits continue to be a problem. Let's please support Ponto Park development. We as a city are losing an unobstructed landmark in our community. Please share some of that with local residents. And, did I mention parking??
50. The extreme southwestern (Ponto) area of Carlsbad does not have a park within walking distance -this is my top priority to fix.

51. We have wonderful neighborhood parks, but not in Ponto and it's on the beach; Veteran's Park is more of a hiker/nature lover's place to enjoy nature.
52. We need a park at Ponto - to serve not only residents, but visitors and tourists.
53. A park is much needed in SW Quadrant of the city
54. Ponto Park. So much has been done for businesses, tourism, etc. This is the last bit of Carlsbad coast line left. And the residents could use more park space in the south part of the City. I don't want to see this area developed. Carlsbad has become overdeveloped.
55. I want to see a park for the Ponto road area. I feel that that area should not be used for condo - residential development. It is so important to showcase that wonderful piece of property, which is so rare to find all up the coast of Calif. and would be a welcomed park for all as you drive north into Carlsbad. ALSO I am very concerned that the Palomar Airport and the larger airplanes the new plan will bring and ask that the city stay involved to support our concerns, thank you for help I appreciate all off the councils work.
56. Ponto area open space and park development
57. Take control of our coastline, bring fire rings to Ponto beach, every family should have the experience of gathering around a roaring fire on evening.
58. Cancel the Ponto development tragedy. Build a free park and keep the free beach parking there.
59. Buy the land for open space on Ponto Drive and build a park in Zone 9 that has no park even though developers paid into the park fees for 20 + years.
60. support Ponto development
61. Now that we have removed the jetty and allowed Warm Waters to wash away, and now we are planning to build on Ponto, where will locals access the beach? If 50% of responders stated the beach is the best part of Carlsbad living, why are continually squandering this gift? I know the council would live to sell Agua Hedionda to a developer too. When will there be decisions made to maintain our quality of life? Furthermore, I selected transportation because my commute time has DOUBLED in the past 5 years. The 55mph speed limit on El Camino is a joke. It takes me 2 light cycles just to cross each intersection now due to this unmitigated growth with no regard for how people will get around. I'm continually dismayed by this city.
62. Preserve the open space at Ponto. Keep traffic under control.
63. Preserve open space in zone 9
64. Money for persevering open space in zone 9 and building parks in the SW quadrant!
65. More parks and open space in Southwest Carlsbad!
66. Why another proposed hotel at Ponto? There are an abundance of hotels & stores already available ---even more than necessary. Preserving nature & some green space is more important than more concrete & businesses with "lease available" signs everywhere!
67. Prop to aid Ponto to keep it natural, as park area & natural habitat.
68. Put budget money towards Parks and Recreation, specifically Preserving Open Space in Zone 9 and Building #PontoPark in the SW Quadrant (p 84)
69. Please put budget money towards Parks and Recreation, specifically Preserving Open Space in Zone 9 and Building #PontoPark in the SW Quadrant (p 85)
70. need a park in the southwest Carlsbad post development
71. Parks in southwest Carlsbad!
72. Zone 9's lack of park and open space is sad. The SW quadrant needs more places to take kids to play, seniors to walk and get outside, and for the community to gather. A park at Ponto would be an ideal place for that and would make for a beautiful and welcoming entry into Carlsbad for locals and tourists.
73. We need a park site near Ponto Beach on the property now slated for a 5 star hotel which has not been built despite attempts by several developers over the last ten plus years.

74. Please spend more on Parks and Recreation. We need to Preserve Open Space in Zone 9 and Build Ponto Park in the SW Quadrant. We do not need more homes congesting the already packed Coast Hwy. Adding sand to Ponto Beach would be nice too -too rocky!
75. I'm asking the City to put budget money towards Parks and Recreation, specifically Preserving Open Space in Zone 9 and Building #PontoPark in the SW Quadrant -this will enhance the quality of life in Carlsbad, contribute to the highest and best use, meet the requirement to have a park in this area, and make the area so desirable that it will allow raising of local tax rates (I don't believe I'm saying this). Best Regards, David Johnson
76. Put some park and playgrounds in SW Carlsbad. There are none near Ponto, yet there are open spaces, near Avenida Encinas and 101. Nothing to walk to. Thank you
77. We could really use a park in southwest Carlsbad especially the San Pacifico area. Thank you
78. Work toward filling the deficit in parks and open space in the Southwest part of Carlsbad, especially Ponto.
79. Would truly love the Ponto Beach Park! As a resident of South Carlsbad we need this!!!
80. There are no Parks in South Carlsbad. We are neglected here yet I pay very high taxes.
81. Build a Park at Ponto! Keep the open space!
82. I would like to see the city buy the Ponto property and develop it into a park.
83. Build a park at ponto
84. Appropriate development of open space and park space in the Ponto region. We are currently at huge deficit of both of these in the Ponto region
85. We are very quickly running out of open space. This is probably one of the most beautiful areas in the country, we need to preserve that beauty and maintain some open space. The open land near South Ponto beach must be preserved. There are no parks in the area, developing that area would not only add to the pollution but it would sacrifice one of the most beautiful parts of Carlsbad. Towns and Cities across the country are prioritizing open space that is so important, it is time we did that in Carlsbad. We need open space near Ponto Beach.

**A few of the many Citizens asking the City Council to budget for a much needed Ponto Coastal Park**

## City's PCH Modification Proposal Area Map with notes on usability Constraints and Issues: P4P Input 2 of 2

---

The City's map below is marked with the following numbered list of Area Constraints and Issues. The Constraints are from the City's 2013 PCH Modification designs, the City's older 2017 Sea Level Rise Impact Study, and on-site observations. The Constraints will limit any fundamental change to the existing PCH landscape. For instance existing slope and habitat area will remain or have to be relocated which will limit the use of any excess land area from PCH Modification. These Constraints will then reduce from 62 acres the actual number of unconstrained and acres that are actually useable and can be used for different uses than currently exist.

1. Loss of the last section of Old "Historic 101" design, ambiance, and openness. Will it be replaced with typical urban arterial design?
2. Freshwater habitat
3. Sewer pumping facility
4. City's 2013 PCH plan for RESTORED RIPARIAN HABITAT
5. Sea Level Rise 2 meter Impact Area
6. City's 2013 PCH plan for BIO SWALE AND RESTORED RIPARIAN HABITAT
7. Existing beach parking to be retained
8. Least Tern habitat
9. Major storm water detention basin
10. Water
11. Slopes will likely need retaining walls to move road inland closer to proposed Kam Sang Resort
12. Endangered Species Habitat
13. City's 2013 PCH plan for COASTAL SAGE SCRUB RESTORATION
14. City's 2013 PCH plan for NATIVE GRASSLAND RESTORATION
15. City's 2013 PCH plan for BIO SWALE AND RESTORED RIPARIAN HABITAT
16. Eliminating access road for homes/businesses south of Cape Rey Resort. Who pays to replace?
17. Removes Cape Rey Resort developer required GMP Open Space for this LFMP. This GMP Open Space will have to be replaced. Who Pays?
18. City's 2013 PCH plan for L.I.D. BASIN / BIO SWALE
19. City left several acres vacant for 20+ years. This area can cost-effectively provide 200-500 more parking spaces w/o any PCH relocation.
20. Unusual jog in roadway. Is this viable?
21. City's 2013 PCH plan for RESTORED NATIVE LANDSCAPE
22. Habitat & need to provide major storm water quality detention basin before discharging urban and creek runoff into ocean.
23. Slopes will likely need retaining walls to move road inland closer to mobile home community.
24. Steep unusable slopes needed for Palomar Airport Road overpass over railroad corridor.

For a Cost/Benefit reference point, the City's PCH Modification at Terramar (CIP project #6054 from Cannon to Manzano) that is less constrained and simpler than South Carlsbad is projected to cost around \$13 million per mile. Vacant primarily unconstrained land sale costs at Ponto are documented at around \$1.4 to \$2.4 million per acre. Honest Cost/Benefit of these two options should be a public tax-payer discussion.

**Carlsbad Boulevard Realignment: Right-of-Way and Available Land Analysis\***

- Proposed ROW (Approximately 43 acres)
- Area Available for Other Uses (Approximately 62 acres)

July 13, 2021

\* Analysis is based on aerial imagery. Right-of-way boundaries and acreages are approximate and intended for planning level analysis only.

Item #14

Page 47 of 53

\* For comparative visual reference the \* area is the 6.5 acre eastern portion of Planning Area F.

## **Sea Level Rise and Carlsbad's DLCP-LUPA's projected/planned Loss of Open Space at Ponto**

### **Introduction:**

Carlsbad first documented Sea Level Rise (SLR) and associated increases in coastal erosion in a December 2017 Sea Level Rise Vulnerability Assessment (2017 SLR Assessment). Prior planning activities (2010 Ponto Vision Plan – rejected by CA Coastal Commission, and 2015 General Plan Update) did not consider SLR and how SLR would impact Coastal Open Space Land Use & CA Coastal Act 'High-Priority' Coastal Open Space Land Uses at Ponto. The 2017 SLR Assessment shows Open Space land and Open Space Land Uses are almost exclusively impacted by SLR at Ponto & South Coastal Carlsbad. The 2017 SLF Assessment also shows significant LOSS of Open Space land acreage and Land Uses. Most all impacted Open Space Land Uses are CA Coastal Act "High-Priority Coastal Land Uses" – Coastal Recreation (i.e. Public Park) and Low-Cost Visitor Accommodations. Existing Ponto Open Space Land Uses are already very congested (non-existent/narrow beach) and have very high, almost exclusionary, occupancy rates (Campground) due to existing population/visitor demands. Future population/visitor increases will make this demand situation worst. The significant permanent LOSS of existing Coastal Open Space land and Coastal Open Space Land Use (and land) due to SLR reduces existing supply and compounds Open Space congestion elsewhere. Prior Ponto planning did not consider, nor plan, for significant SLR and current/future "High-Priority" Coastal Open Space Land Use demands.

### **Open Space and City Park demand at Ponto:**

Open Space at Ponto is primarily 'Constrained' as defined by the City's Growth Management Program (GMP), and cannot be counted in meeting the City's minimal 15% 'Unconstrained' GMP Open Space Standard. Per the GMP Open Space Standard, the developers of Ponto should have provided in their developments at least 30-acres of additional 'Unconstrained' GMP Open Space at Ponto. City GIS mapping data confirm 30-acres of GMP Standard Open Space is missing at Ponto (Local Facilities Management Plan Zone 9).

The City of Carlsbad GIS Map on page 2 shows locations of Open Spaces at Ponto. This map and its corresponding tax parcel-based data file document Ponto's non-compliance with the GMP Open Space Standard. A summary of that City GIS data file is also on page 2. The City said Ponto's non-compliance with the GMP Open Space Standard was 'justified' by the City 'exempting' compliance with the Standard. The City 'justified' this 'exemption' for reasons that do not appear correct based on the City's GIS map and data on page 2, and by a review of 1986 aerial photography that shows most of Ponto as vacant land. The City in the Citywide Facilities Improvement Plan (CFIP) said 1) Ponto was already developed in 1986, or 2) Ponto in 1986 already provided 15% of the 'Unconstrained' land as GMP Standard Open Space. Both these 'justifications' for Ponto 'exemption' in the CFIP were not correct. The legality of the City 'exempting' Ponto developers from the GMP Open Space Standard is subject to current litigation.

The City proposes to continue to exempt future Ponto developers from providing the missing 30-acres of minimally required GMP Open Space, even though a change in Ponto Planning Area F land use from the current 'Non-Residential Reserve' Land Use requires comprehensive Amendment of the Local Facilities Management Plan Zone 9 to account for a land use change. City exemption is subject of litigation.

Ponto (west of I-5 and South of Poinsettia Lane) currently has 1,025 homes that per Carlsbad's minimal Park Standard demand an 8-acre City Park. There is no City Park at Ponto. Coastal Southwest Carlsbad has an over 6.5 acre Park deficit that is being met 6-miles away in NW Carlsbad. Ponto is in the middle of 6-miles of Coastline without a City Coastal Park west of the rail corridor.

### City GIS map of Ponto's (LFMP Zone 9) Open Space:

- Light green areas meet the City's 15% unconstrained Growth Management Program Open Space Standard
- Most Ponto Open Space (pink hatch & blue [water] on map) is "Constrained" and does not meet the Standard
- **Aviara - Zone 19, Ponto - Zone 9 and Hanover/Poinsettia Shores – Zone 22 all developed around the same time and had similar vacant lands.**
- **City required Aviara - Zone 19 east of Ponto to provide the 15% Standard Open Space. Why not Ponto? Aviara had the same lagoon waters.**
- **City required Hanover & Poinsettia Shores area Zone 22 just north of Ponto to provide the 15% Standard Open Space. Why not Ponto?**
- Why Ponto developers were never required to comply with the 15% Standard Open Space is subject to current litigation
- Below is City GIS data from this map

### City GIS map data summary of the 15% Growth Management Standard Open Space at Ponto

472 Acres  
(197 Acres)  
 275 Acres  
X 15%  
 41 Acres  
(11 Acres)  
**30 Acres**

Total land in LFMP Zone 9 [Ponto]  
 Constrained land excluded from GMP Open Space  
 Unconstrained land in LFMP Zone 9 [Ponto]  
 GMP Minimum Unconstrained Open Space requirement  
 GMP Minimum Unconstrained Open Space required  
 GMP Open Space provided & mapped per City GIS data  
**Missing Unconstrained Open Space needed in LFMP Zone 9 [Ponto] to meet the City's minimum GMP Open Space Standard per City's GIS map & data**

**73% of the City's minimum 15% required Open Space Standard is missing due to over development of LFMP Zone 9 [Ponto]**

### **Sea Level Rise impacts on Open Space and Open Space Land Use Planning at Ponto:**

The City's 2015 General Plan Update did not factor in the impacts of Sea Level Rise (SLR) on Ponto's Open Space land. In December 2017 the City conducted the first Sea Level Rise Vulnerability Assessment <https://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=33958>. The 2017 SLR Assessment is an initial baseline analysis, but it shows significant SLR impacts on Ponto Open Space. More follow-up analysis is being conducted to incorporate newer knowledge on SLR projections and coastal land erosion accelerated by SLR. Follow-up analysis may likely show SLR impacts occurring sooner and more extreme.

Troublingly the 2017 SLR Assessment shows SLR actually significantly reducing or eliminating Open Space land at Ponto. SLR is projected to only impact and eliminate Open Space lands and Open Space Land Use at Ponto. The loss of Ponto Open Space land and Land Use being at the State Campground, Beaches, and Batiquitos Lagoon shoreline. The losses of these Open Space lands and land uses would progress over time, and be a permanent loss. The 2017 SLR Assessment provides two time frames near-term 2050 that match with the Carlsbad General Plan, and the longer-term 'the next General Plan Update' time frame of 2100. One can think of these timeframes as the lifetimes of our children and their children (2050), and the lifetimes of our Grandchildren and their children (2100). SLR impact on Coastal Land Use and Coastal Land Use planning is a perpetual (permanent) impact that carries over from one Local Coastal Program (LCP) and City General Plan (GP) to the next Updated LCP and GP.

Following (within quotation marks) are excerpts from Carlsbad's 2017 Sea Level Rise Vulnerability Assessment:

*[Italicized text within brackets]* is added data based on review of aerial photo maps in the Assessment.

"Planning Zone 3 consists of the Southern Shoreline Planning Area and the Batiquitos Lagoon. Assets within this zone are vulnerable to inundation, coastal flooding and bluff erosion in both planning horizons (2050 and 2100). A summary of the vulnerability assessment rating is provided in Table 5. A discussion of the vulnerability and risk assessment is also provided for each asset category.

#### 5.3.1. Beaches

Approximately 14 acres of beach area is projected to be impacted by inundation/erosion in 2050. ... Beaches in this planning area are backed by unarmored coastal bluffs. Sand derived from the natural erosion of the bluff as sea levels rise may be adequate to sustain beach widths, thus, beaches in this reach were assumed to have a moderate adaptive capacity. The overall vulnerability rating for beaches is moderate for 2050.

Vulnerability is rated moderate for the 2100 horizon due to the significant amount of erosion expected as the beaches are squeezed between rising sea levels and bluffs. Assuming the bluffs are unarmored in the future, sand derived from bluff erosion may sustain some level of beaches in this planning area. A complete loss of beaches poses a high risk to the city as the natural barrier from storm waves is lost as well as a reduction in beach access, recreation and the economic benefits the beaches provide.

#### 5.3.3. State Parks

A majority of the South Carlsbad State Beach day-use facilities and campgrounds (separated into four parcels) were determined to be exposed to bluff erosion by the 2050 sea level rise scenario (moderate exposure). This resource is considered to have a high sensitivity since bluff erosion could significantly impair usage of the facilities. Though economic impacts to the physical structures within South Carlsbad State Beach would be relatively low, the loss of this park would be significant

since adequate space for the park to move inland is not available (low adaptive capacity). State parks was assigned a high vulnerability in the 2050 planning horizon. State park facilities are recognized as important assets to the city in terms of economic and recreation value as well as providing low-cost visitor serving amenities. This vulnerability poses a high risk to coastal access, recreation, and tourism opportunities in this planning area.

In 2100, bluff erosion of South Carlsbad State Beach day-use facilities and campgrounds become more severe and the South Ponto State Beach day-use area becomes exposed to coastal flooding during extreme events. The sensitivity of the South Ponto day-use area is low because impacts to usage will be temporary and no major damage to facilities would be anticipated. Vulnerability and risk to State Parks remains high by 2100 due to the impacts to South Carlsbad State Beach in combination with flooding impacts to South Ponto.

Table 5: Planning Zone 3 Vulnerability Assessment Summary [condensed & notated]:

<u>Asset Category</u>	<u>Horizon [time]</u>	<u>Hazard Type</u>	<u>Impacted Assets</u>	<u>Vulnerability Rating</u>
Beaches	2050	Inundation/Erosion, Flooding	<b>14 acres</b> (erosion)	Moderate
	2100	Inundation/Erosion, Flooding	<b>54 acres</b> (erosion)	Moderate
Public Access	2050	Inundation, Flooding	6 access points <b>4,791 feet of trails</b>	Moderate
	2100	Inundation, Flooding	10 access points <b>14,049 feet of trails</b>	Moderate
State Parks <i>[Campground - Low-cost Visitor Accommodations]</i>	2050	Flooding, Bluff Erosion	4 parcels [ <b>&lt;18 Acres</b> ]	High
	2100	Flooding, Bluff Erosion	4 parcels [ <b>&gt;18 Acres</b> ] <i>[loss of over 50% of the campground &amp; its Low-cost Visitor Accommodations, See Figure 5.]</i>	High
Transportation (Road, Bike, Pedestrian)	2050	Bluff Erosion	<b>1,383 linear feet</b>	Moderate
	2100	Flooding, Bluff Erosion	<b>11,280 linear feet</b>	High
Environmentally Sensitive Lands	2050	Inundation, Flooding	<b>572 acres</b>	Moderate
	2100	Inundation, Flooding	<b>606 acres</b>	High

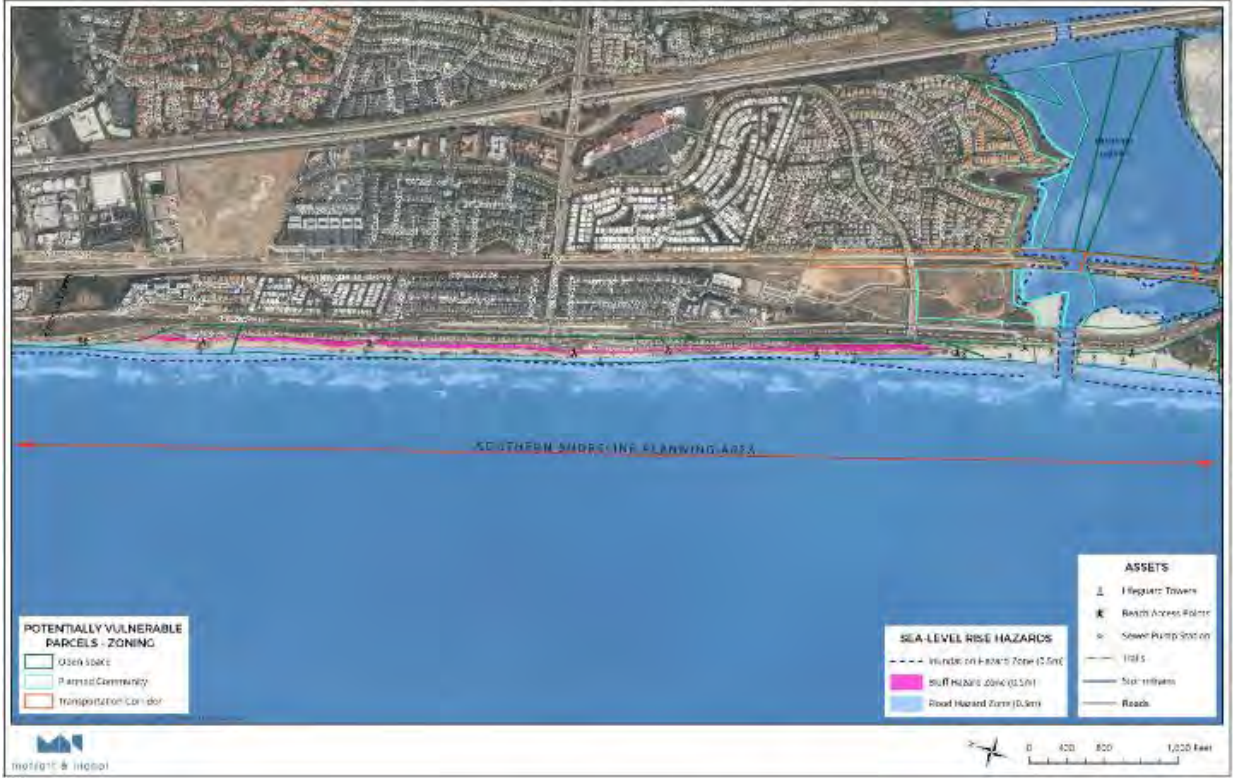

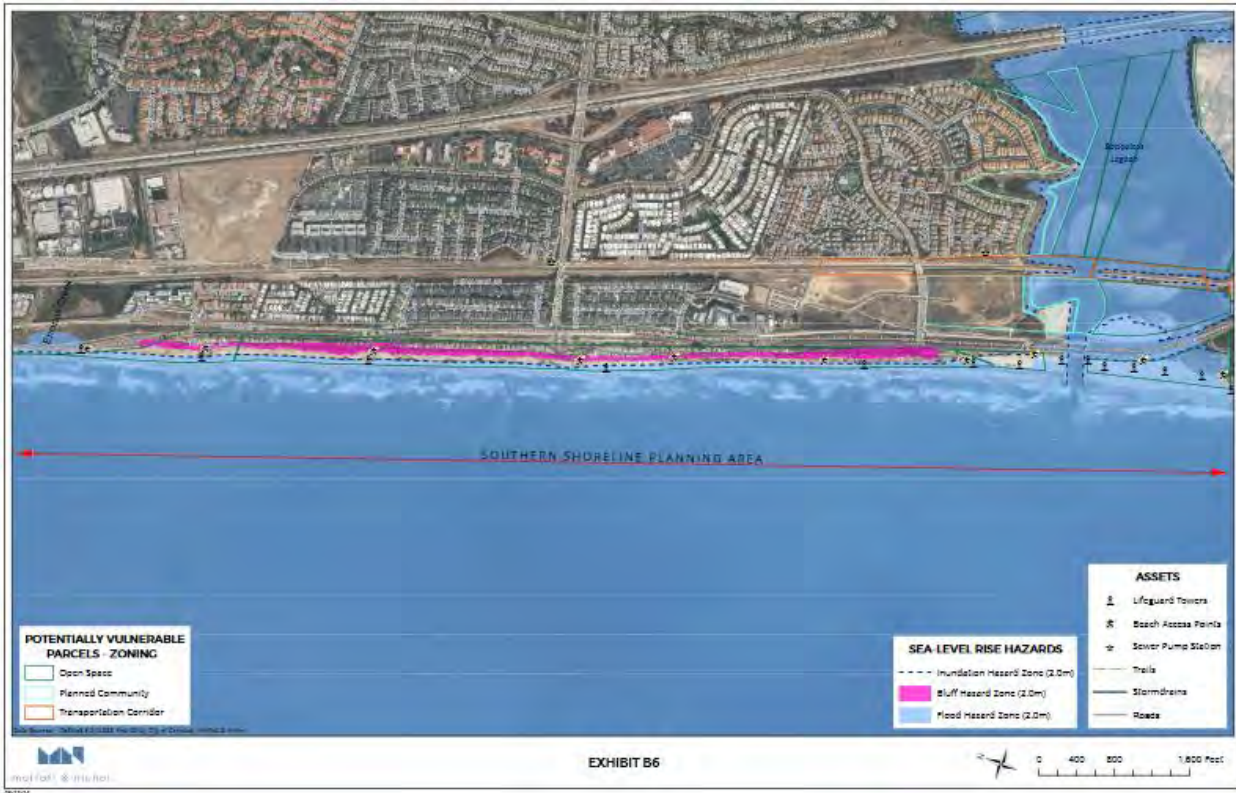

Figure 7: Southern Shoreline Planning Area – Year 2050

Figure 5: CoSMoS Bluff Erosion Projections by 2100  
(CoSMoS-COAST 2015)

[Figure 5 show the loss of over 50% of the campground and campground sites with a minimal .2 meter Sea Level Rise (SLR), and potentially the entire campground (due to loss of access road) in 2 meter SLF.]”

**Directions to analyze and correct current and future LOSS of Coastal Open Space Land Use at Ponto**

On July 3, 2017 the CA Coastal Commission provided direction to Carlsbad stating:

“The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto ... area. For example, Planning Area F requires the city and developer to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e., public park) on the west side of the railroad. ... this study should be undertaken as a part of the visitor serving use inventory analysis described above. If this analysis determines that there is a deficit of low cost visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed.”

Official Carlsbad Public Records Requests (PRR 2017-260, et. al.) confirmed Carlsbad’s Existing LCP and its Ponto specific existing LUP polices and Zoning regulations were never followed in the City’s prior Ponto planning activities (i.e. 2010 Ponto Vision Plan & 2015 General Plan Update). The projected SLR loss of recreation (beach) and low-cost visitor accommodations (campground) at Ponto should factor in this Existing LCP required analysis, and a LCP-LUP for Ponto and Ponto Planning Area F.

In a February 11, 2020 City Council Staff Report City Staff stated:

“On March 14, 2017, the City Council approved the General Plan Lawsuit Settlement Agreement (Agreement) between City of Carlsbad and North County Advocates (NCA). Section 4.3.15 of the Agreement requires the city to continue to consider and evaluate properties for potential acquisition of open space and use good faith efforts to acquire those properties.”

In 2020 NCA recommended the City acquire Ponto Planning Area F as Open Space. The status of City processing that recommendation is unclear. However the Lawsuit Settlement Agreement and NCA's recommendation to the City should also be considered in the required Existing LCP analysis.

**Summary:**

Tragically Carlsbad's Draft Local Coastal Program – Land Use Plan Amendment (DLCP-LUPA) is actually planning to both SIGNIFICANTLY REDUCE Coastal Open Space acreage, and to eliminate 'High-Priority Coastal Open Space Land Uses at Ponto due to SLR.

The Existing LCP requirements for Ponto Planning Area F to analyze the deficit of Coastal Open Space Land Use should factor in the currently planned LOSS of both Coastal Open Space acreage and Coastal Open Space Land Uses at Ponto due to SLR. As a long-range Coastal Land Use Plan this required LCP analysis needs to also consider the concurrent future increases in both population and visitor demand for those LOST Coastal Open Space acres and Coastal Open Space Land Uses.

It is very troubling that demand for these CA Coastal Act 'High-Priority' Coastal Open Space Land Uses is increasing at the same time the current (near/at capacity) supply of these CA Coastal Act 'High-Priority' Coastal Open Space Land Uses is significantly decreasing due to SLR. Instead of planning for long-term sustainability of these CA Coastal Act 'High-Priority' Coastal Open Space Land Uses for future generations there appears to be a plan to use SLR and inappropriate (lower-priority residential) Coastal Land Use planning to forever remove those CA Coastal Act 'High-Priority' Coastal Open Space Land Uses from Ponto. CA Coastal Act Policies to address these issues should be thoroughly considered.

2021-2 proposed Draft Local Coastal Program – Land Use Plan Amendment (DLCP-LUPA) will likely result in City and CA Coastal Commission making updates to the 2015 General Plan, based on the existing Ponto Planning Area F LCP – LUP Policy requirements, Ponto Open Space issues, high-priority Coastal Land Use needs, and SLR issues not addressed in the 2015 General Plan.

**Subject:** Public input for Carlsbad LCPA-Parks Master Plan & Growth Management Plan Updates - do the right and smart thing for our future

Dear Carlsbad City Council, Carlsbad Tomorrow Growth Management Committee, Parks and Planning Commissions, and CA Coastal Commission and CA State Parks:

As the City has requested specific reference regarding public input, I ask you to please deliver to the those address this email and attachment as public input for:

1. the CTGMC's February 2023 meeting,
2. the next Carlsbad Council meeting,
3. the next Carlsbad Planning and Parks Commission meetings on the Parks Master Plan and Growth Management Program Updates, and Carlsbad's Ponto Planning Area F and Site 18 planning and development applications, and
4. as public input to the CA Coastal Commission on Carlsbad's proposed Local Coastal Program Amendment.

In looking over the CTGMC's proposed report and recommendations, it appears the attached data and issues from over 5,000+ emails and extensive numbers of Carlsbad Citizens verbal comments provided city staff and the CTGMC have not been addressed.

Failure of the city staff and city to address these issues and providing a much needed and TRUE and significant Ponto Park (the last vacant land and opportunity to provide a true and meaningful Coastal Park) will undermine the Coastal Recreation needs (and future economic and social sustainability) of Carlsbad and future CA residents and visitors. Ponto has the last remaining vacant and unplanned Coastal land for a 6-mile length of coast that is without Coastal Park. Buying Ponto Park is the far better and magnitude CHEAPER means to provide a significant Coastal Park for this 6-mile length of Coast (and ALL South Carlsbad) that is without a Coastal Park.

The CTGMC needs to responsibly address the data and issues thousands of Carlsbad and North County Citizens and visitors have sent you. CTGMC and staff failure to address these issues will forever negativity impact forever our quality of life and eliminate the last viable, least constrained, and tax-payer effective option (Buying Ponto Park) for or future.

The CTGMC and city staff Own your decisions. Go down in history as being wise, true and doing the right thing for the future. Don't fail to address the FACTS and do nothing but kick-the-can-down-the road. We are running out of road and going over the cliff; as Seal Level Rise erodes our Coastal Recreation lands and our last vacant inland areas are vanishing. Your time is now or never to do the right (and most tax-payer efficient) think – buy Ponto Park!

Lance Schulte

**Subject:** Public input for Carlsbad LCPA-Parks Master Plan & Growth Management Plan Updates - Carlsbad below national average and lowest So CA Coastal city in providing Parks within 10-minute walk

Dear Carlsbad City Council, Carlsbad Tomorrow Growth Management Committee, Parks and Planning Commissions, and CA Coastal Commission and CA State Parks:

As the City has requested specific reference regarding public input, I ask you to please deliver to the those address this email and attachment as public input for:

1. the CTGMC's February 2023 meeting,
2. the next Carlsbad Council meeting,
3. the next Carlsbad Planning and Parks Commission meetings on the Parks Master Plan and Growth Management Program Updates, and Carlsbad's Ponto Planning Area F and Site 18 planning and development applications, and
4. as public input to the CA Coastal Commission on Carlsbad's proposed Local Coastal Program Amendment.

For years Carlsbad Citizens have told the City that there is a need for a Park at Ponto:

- to provide for documented Coastal Recreation (i.e. Public Park) land use at Ponto,
- to correct for the conversion of a 12.8 acre Recreation Commercial land use to Residential use and the elimination of planned Coastal Open Space at Ponto,
- to correct the Carlsbad's Park Master Plan documented lack of Park Service at Ponto,
- to provide South Carlsbad (62% of Carlsbad's total population and the City's major Coastal visitor and transit occupancy tax generator) with their ONLY Coastal Park west of I-5. The City unfairly, and contrary to CA Coastal Act Policy disproportionately provides 10 parks totaling 37 acres west of I-5 in Coastal North Carlsbad for 38% of the population but 0 (zero) Coastal Parks and 0 (zero) Coastal park acres west of I-5 in Coastal South Carlsbad for 62% of the population,
- to provide for an existing 6.5 acre local Neighborhood (i.e. Special use area) Park need at Ponto, and
- to provide a City Park within a 10-minute walk for Ponto residents.

Failure to correct this documented City Park unfairness is very damaging to the citizens, City finances, South Carlsbad's and California's visitor industry. The Coastal Recreation data file sent to you earlier documents some of the key facts.

However, we conducted some additional Trust for Public Land 10-minute walk data collection that the City Council, CTGMC, Parks and Planning Commissions and CA Coastal Commission need to also consider. That data is below and in the attached file, and again with last year's Trust for Public Land Ponto Park support letter (again attached) that reflects on Carlsbad poor performance relative to the 24 So Cal Coastal Cities (165 miles of coastline) from Malibu to the Mexican border in providing Parks within a 10-minute walk. The data and links to the data source is:

**Carlsbad is 10% below the national average for cities & the worst of 24 Coastal So California cities - 165 miles of coastline - in providing Parks within a 10-minute walk to residents**

The Trust for Public Land documents a city's 10-minute walk to Park at <https://www.tpl.org/parkserve>  
The Average USA City provides Parks within 10-minute walk to 55% of residents [10% above Carlsbad].  
**Carlsbad** provides Parks within 10-minute walk to **49.9% of residents [10% below National Average]**.  
New York City provides Parks within 10-minute walk to 99% of residents.

## **The Trust of Public Land submitted a letter to the City of Carlsbad, CA Coastal Commission, and CA State Park supporting Ponto Park**

### **Carlsbad is the worst of 24 Southern CA Coastal cities (from Malibu south to Imperial Beach along 165 miles of coastline) in providing Parks within 10-minute walk to residents:**

1. Palos Verdes Estates provides Parks within 10-minute walk to 100% of residents
2. El Segundo provides Parks within 10-minute walk to 100% of residents
3. Hermosa Beach provides Parks within 10-minute walk to 100% of residents
4. Redondo Beach provides Parks within 10-minute walk to 98% of residents
5. Manhattan Beach provides Parks within 10-minute walk to 95% of residents
6. Del Mar provides Parks within 10-minute walk to 93% of residents
7. Dana Point provides Parks within 10-minute walk to 89% of residents
8. Huntington Beach provides Parks within 10-minute walk to 85% of residents
9. Long Beach provides Parks within 10-minute walk to 84% of residents
10. Laguna Beach provides Parks within 10-minute walk to 82% of residents
11. Santa Monica provides Parks within 10-minute walk to 82% of residents
12. San Diego provides Parks within 10-minute walk to 81% of residents
13. Coronado provides Parks within 10-minute walk to 76% of residents
14. Newport Beach provides Parks within 10-minute walk to 76% of residents
15. Imperial Beach provides Parks within 10-minute walk to 74% of residents
16. Encinitas provides Parks within 10-minute walk to 68% of residents
17. Los Angeles provides Parks within 10-minute walk to 63% of residents
18. Solana Beach provides Parks within 10-minute walk to 63% of residents
19. Oceanside provides Parks within 10-minute walk to 58% of residents
20. Seal Beach provides Parks within 10-minute walk to 57% of residents
21. Malibu provides Parks within 10-minute walk to 53% of residents
22. San Clemente provides Parks within 10-minute walk to 52% of residents
23. Rancho Palos Verdes provides Parks within 10-minute walk to 50% of residents
24. **Carlsbad** provides Parks within 10-minute walk to **49.9% of residents.**

**Carlsbad is the lowest & most unfair to citizens of the 24 Southern California Coastal cities along 165 miles of coast from Malibu to Imperial Beach.**

*Source of data: Trust for Public land parkscores*

Trust for Public Land's 10-minute walk to Park Maps/data:

Carlsbad = <https://parkserve.tpl.org/mapping/index.html?CityID=0611194#reportTop>

Encinitas = <https://parkserve.tpl.org/mapping/index.html?CityID=0622678>

Irvine = <https://parkserve.tpl.org/mapping/index.html?CityID=0636770>

Please, Please, please, consider and discuss this data, and

1. Create a 10-minute walk to City Park Standard in the
  - a. Parks Master Plan,
  - b. Growth Management Plan Update, and

c. Local Coastal Program Update.

2. Create a Park Policy that requires developers to dedicate Park Land (not pay Park-in-lieu-fees) in areas that do not have a minimum of 3 acres of City Park for each in 1,000 population within a 10-minute walk of the developer's proposed development (see attached CTGMC Key Issues & Suggestions file for details and Open Space suggestions)
3. Fix Coastal South Carlsbad's documented City Park inequity/unfairness with a significant and real Ponto Park
4. Save tax-payers tens of millions in dollars by cost effectively purchasing vacant land at Ponto for a Park, v. trying to maybe make a few bits of narrow PCH roadway median as a pseudo-park

- Do you want Carlsbad to be the worst city in Coastal Southern California in providing accessible Parks within a 10-minute walk to residents?
- Do you want Carlsbad to fail to upgrade its park standards while other cities updated their park Standards and make their cities more desirable?
- Do you want to undermine the quality of life for Carlsbad citizens and their children by not providing a park within a 10-minute walk to their home?
- Do you want to force Carlsbad families to have to drive to park?
- Do you want to slowly undermine a key visitor serving industry in South Carlsbad by not providing a significant and true and meaningful Coastal Park in South Carlsbad?
- Do you want tax-payers to pay tens of millions more to try to maybe try to make a few narrow portions of PCH median useable to people?

Please take responsibility and full ownership of your decisions on these important issues and questions. The individual decisions you make will likely be the last ones made. Once vacant land like at Ponto is developed it will be forever lost to address the critical, well documented Park and Coastal Park needs at Ponto as overwhelmingly communicated by Carlsbad Citizens and visitor businesses, and other citizens.

Please be wise and think about the future your decisions will bring.

Thank you,  
Lance Schulte

PS: The initial version of the "CTGMC key issues and Suggestions 2022-12-6" file (attached) sent to you 8/8/22. The attached updated file should replace that older file as there is new data on significant tax-payer cost savings from Pronto Park relative to PCH Relocation, and updated examples of how Coastal Open Space can be cost-effectively persevered and increased. Both Coastal Parks and Open Space are important Carlsbad and State of CA issues.

- Parks: Updated data shows that a 11.1 acre Ponto Park would now cost less \$20 million to buy and build. This is less than a City Pool Renovation. Carlsbad's Old City Council planned to spend \$65 to \$80 million in Carlsbad tax-payer dollars to address the Citywide need for a significant Coastal Park in South Carlsbad with a 2.3 mile PCH Relocation. The City identified in 2001 other pay-payer funds were highly unlikely. \$65 to \$80 million would only 'free-up' 15.8 acres of narrow PCH Median (City documented "Surplus Land Area #4 & #5"). As People for Ponto Citizens have been saying for years that Ponto Park is the better Park solution to the documented Coastal South Carlsbad Park needs – a citywide need. The CTGMC should include that citywide Park need and the logical, better and tax-payer responsible Ponto Park solution to that citywide Park need in your CTGMC recommendations to City Council.
- Open Space: Updated data shows how documented GM Open Space shortfalls can be properly and responsibly address in a collaborative citizen-based "Local Facilities Zone Useable Open Space Correction Plan" approached. Also the need to maintain the 15% GM (Useable) Open Space Standard will be critical in the future

to maintain Open Space and prevent future conversion of Open Space to residential land use as part of Housing Plan updates.

For the CTGMC; Parks and Open Space are the 2 most critical/special of 6 Key Growth Management Program Update Issues and Suggestions the CTGMC should take to properly address these 6 key Growth Management Issues.

- Please read the Updated data and Suggestions.
- Please responsibly address the Growth Management issues of a citywide Park need for Coastal South Carlsbad as listed in the attached Suggestions. Include a South Carlsbad Coastal Park in your recommendations to the City Council. Acknowledge Ponto Park as the best and most tax-payer efficient solution to address that documented citywide park need.
- Please in your recommendations to City Council retain and enforce the Open Space Standard, and fix past errors made in falsely exempting certain developers in certain areas in the City from complying with the Growth Management Open Space Standard that other developers in other areas are required to provide.

Please consider this email and attachments, and know P4P Carlsbad Citizens are here to help assure we sustain and enhance our quality of life for future generations. People for Ponto love deeply Carlsbad and want to assure we leave a better Carlsbad to future generations.

Happy holidays and with Aloha Aina,  
Lance Schulte

## **2022 General Comparative tax-payer Costs/Benefits of Completing PCH, PCH Modification, and Ponto Park to address planned loss of 30+ acres of Coastal Open Space Land Use at Ponto/West BL/South Carlsbad: Part 1 of 2**

---

Key base facts regarding tax-payer Cost/Benefit comparison:

City Coastal Park Fairness: Ponto/Coastal South Carlsbad has ZERO Parks and ZERO Park acres v. 10 Coastal Parks in North Carlsbad. 62% of Carlsbad citizens and major visitor industries live in South Carlsbad with no Coastal Park. 38% of Carlsbad citizens have the entire City's Coastal Parks. The City also falsely allowed Ponto Developers to NOT PROVIDE the required 15% unconstrained Open Space required by other developers in Carlsbad. Consequently Ponto is already developed at a density 35% higher than the rest of City.

What is missing from South PCH: The only missing components of a Carlsbad Livable (Complete) Street are adequate Coastal sidewalks/pedestrian paths. Better safer protected bike paths for the volume of bike traffic on a higher-speed roadway are highly desired. Both these missing features can be (and should have already long ago been) provided in the existing PCH configuration.

Generalized Costs: Costs come from publicly stated costs by Mayor Hall in a 2019 at Meet the Mayor Realtor luncheon at Hilton Garden Inn, City PCH Modification Cost Studies for South PCH, \$13 million per mile cost for the simpler City CIP #6054 PCH Modification Project at Terramar, general City cost data from official public records requests, and vacant Ponto land costs of \$1.4 to \$2.4 million per acre from recent recorded land sales at Ponto.

Generalized Benefits: The number of acres and the quality and usability of each of those acres, and the number of new added beach parking for each of the known Option's define each Option's benefits. There may be other unknown Options that have different benefits. The City's 2001 PCH Modification Studies' highest Park and Open Space Option (2001 ERA Financial Analysis "Alternative 1-parks and open space scheme") only made possible a 4-acre Active Park north of Palomar Airport Road in North Carlsbad. The City's 2013 PCH Concept design eliminated that 4-acre Active Park and only showed a few small open space areas with picnic tables. Any PCH Modification Benefits are limited by existing PCH constraints. See attached Part 2: City PCH map with numbered notes on various existing land use constraints from the City's 2013 PCH Modification Design.

PCH Modification: PCH Modification does not add any new City land. Rearranging PCH land may add some usability beyond the usability of existing parkway areas along PCH. However significant land in PCH right-of-way is already constrained by habitat, slopes, and water quality detention basins. Past City Studies in 2001 and 2013 showed relatively modest changes in useable acreage from major PCH Modifications. Forever removing 2-travel lanes (over 50% of PCH capacity due to removing passing ability) will create Terramar traffic congestion, but could repurpose that City pavement for open space. Any net usable amount of open space land will however be relatively narrow and may be modest once all constraints are accounted for. PCH Modification should be accurately compared with the existing usable and open space parkway areas in the existing PCH configuration and Ponto Park situation. See attached Part 2: City PCH map with numbered notes on various existing land use constraints from the City's 2013 PCH Modification Design.

### Comparative tax-payer Cost/Benefits:

#### 1. Completing PCH & adding missing sidewalk/path and additional public parking and bike safety:

177 existing parking spaces along South Carlsbad Blvd

Existing 4 vehicle lanes and 2 bike lanes

The only missing component of “Complete/Livable Street” is a pedestrian sidewalk/path

**Total Cost to provide missing sidewalks per City data = \$3-5 million (based on path width)**

**Costs for desirable safety upgrade to existing bike lanes are not known**

**Cost to add more Beach parking in abandoned PCH North and South of Poinsettia ranges from:**

- 273 additional spaces = \$ 0.76 million
- 546 additional spaces = \$ 1.1 million
- Plus an estimated \$1.5 million for 2 signalized intersection upgrades for full 4-way access
- Cost per parking space is estimated at \$19,275 to \$13,899 per additional parking space

**Total cost: \$ 3.8 to 6.1 million to provide missing sidewalk/path and add more parking + unknown amount for any desired upgrades to existing bike lanes**

#### 2. ‘2013 PCH Modification Proposal’ [AECOM 11/26/2013 Alternative Development Meeting]

Total Cost is \$75 million per Mayor Matt Hall. PCH Modification would be most the expensive City project so far. \$75 million current cost appears consistent with 20-years of cost inflation of the basic (unmitigated environmental and traffic) 2001 costs of \$26.5 to 37.3 million (in 2001dollars) identified by the City. The City’s 2001 Study indicated fully mitigated costs will be higher.

**Total \$75 million PCH Modification cost comes to:**

**\$ 18.7 to 7.5 million per acre for narrow open space areas (from portions of city roadway)**

**\$872,093 per additional parking space**

- 86 additional parking spaces created = 263 replacement spaces - 177 existing spaces removed
- Includes multi-use pathway (sidewalk) within primarily native/natural landscaping.
- Possible 50% reduction in vehicle lanes (from 4 to 2 lanes) with corresponding traffic congestion like at Terramar. Not clear if Citizens will approve spending \$75 million to double traffic congestion.
- Includes about 4 - 10 acres for possible narrow passive Park area identified in City’s 2001 PCH Modification Studies. However City’s 2013 PCH Modification (AECOM) plans look like smaller acreage is provided.
- Does not purchase any new land (only reconfigures existing City land) so requires Carlsbad Citizens to vote to expend funds per Proposition H.
- 2013 PCH Modification proposal did not consider and map City’s 2017 sea level rise data to show what areas would be lost due to sea level rise and account for any added cost and issues.

#### 3. Ponto Coastal Park

**Total Cost: \$20 – 22 million to purchase and build 11-acres as Mayor Matt Hall has publicly stated**

**\$ 2 to 1.8 million per acre (per Mayor) for new and fully useable City Park area**

**175% to 10% more total park land than ‘PCH Modification options’**

- Includes adding 11-acres of new and viable parkland similar in shape (but larger in size) than Carlsbad’s Holiday Park. Site includes both habitat and E-W and N-S connections.

- Since an Open Space land purchase per Proposition C acquisition voters exempted such purchases from Proposition H. NCA recommend the site be considered for purchase as Open Space per the City's obligations under a lawsuit settlement.
- Ponto Park's cost savings over 'PCH Modification' = \$55 to 53 million
- Ponto Park's + adding missing sidewalks cost savings over 'PCH Modification' = \$51 to 47 million
- Ponto Park's + adding missing sidewalks + 273 additional parking spaces cost savings over "PCH Modification" = \$50.4 to 46.1 million
- Ponto Park's + adding missing sidewalks + 546 additional parking spaces cost savings over "PCH Modification" = \$50.1 to 45.8 million

4. Combining both #1-PCH Completion and #3-Ponto Park:

Combining #1 and #3 creates at cost effective and more beneficial Coastal Park-Coastal Parking-Completes Streets solution. This solution actually adds 11-acres of new City land for a needed Park, provides for a Complete PCH without increasing traffic congestion, does not forever congest PCH travel if future PCH traffic increases, adds comparatively more beach parking, and provides the City with Coastal land use and sea level rise planning flexibility to address future needs by not forever committing the City's PCH land to a Final solution. See map on page 4 showing land use synergy of combining #1 and #3.

**\$50.4 to 45.8 million in tax-payer cost savings are estimated from combining #1 & #3 compared to the estimated \$75 million PCH Modification concept. Combining #1 and #3 provide all the features provided by more Benefits for a reduced**

- a. Ponto Park's location allows it to use the 337-610 parking spaces created by #1 above (177 existing + 273 to 546 new parking spaces). The 337-610 parking spaces will allow Ponto Park to effectively host Carlsbad's special community events.
- b. Acquiring Ponto Park's 11-acres provides both the City and State of CA with important future land use options to address the Sea Level Rise and Coastal Erosion (SLR) planned by the City. These options are created by leaving the exiting South Carlsbad Blvd right-of-way substantially the same (except for adding needed sidewalks and using the existing Old paved roadway for parking) thus allowing future upland relocation of the Campground. If \$75,000,000 is spent on #2 the likelihood this very expensive City expenditure would never be abandoned by the City to allow relocation of the Campground.
- c. Carlsbad' 2017 Sea Level Rise study shows SLR will eliminate ½ of the State Campground – a high-priority Coastal land use under the CA Coastal Act. The CA Coastal Act calls for "upland" relocation of high-priority Coastal land uses due to SLR impacts. Ponto Park could also provide for "upland" relocation of the State Campground.

Part 2 of this Comparative analysis is a separate 2-page data file. This Part 2 file consists of the City's PCH map with numbered notes to documented City data on PCH design constraints, mapping the City's 2017 Sea Level Rise Impact Areas, and outlining the easterly 6.5 acre portion of the 11-acre Planning Area F site that could be Ponto Park for acreage comparison purposes.

Updated Pubic Comments Coastal Recreation submitted on Oct 12<sup>th</sup> 2021:

---

On 10/8/21 the Carlsbad City Council and CA Coastal Commission were emailed data from an Official Carlsbad Public Records Request (# R002393-092121) on the City of Carlsbad's past compliance/noncompliance with the currently exiting Mello II LCP Land Use Policies # 6-2, 6-4 & 6-10 Certified in the mid-1980s. The City's documents show:

- For Policy 6-2 the 200-300 acre Park called out in Policy 6-2 has been reduced to Veterans Park's 91.5 acres, of which only 54% or 49.5 acres is even useable as a Park. The City provided no documents on how a 200-300 acre park called for in Policy 6-4 is now only 49.5 useable acres.
- For Policy 6-4 there were no City documents were provided. There was no City Public discussion, consideration, or City compliance with Policy 6-4 since the mid-1980's.
- For Policy 6-10 concerns providing Low Cost Visitor Accommodations. Public Parks are the lowest cost (free) Visitor accommodating land use there is.

The 3 existing LCP Land Use Policies are important for Carlsbad, and California's, Coastal land use resources. There appears little to no discussion of the City's past apparent failure to implementation of these 3 LCP LUPs in the current City consideration of changes to the LCP.

Following is a copy of Public Records Request # R002393-092121: "Carlsbad's Local Coastal Program (LCP) for the Mello II Segment of Carlsbad's Coastal Zone has long established land use Policies 6-2, 6-4 & 6-10 that were adopted by Carlsbad and Certified by the CA Coastal Commission in the early/mid-1980's. Mello II LCP Policies 6-2, 6-4 & 6-10 are shown on page 86-87 of Carlsbad's 2016 compiled LCP and are:

- "POLICY 6-2 REGIONAL PARK: If the population of Carlsbad increases in accordance with SANDAG's projected Series V Population Forecasts, it is estimated that Carlsbad will need to develop a new regional park containing 200 to 300 acres in order to adequately serve the public. A location for a new regional park must, therefore, be established. Consideration should be given to a facility within the Aqua Hedionda Specific Plan Area, or adjacent lands. The Batiquitos Lagoon area should also be considered.
- POLICY 6-4 NEED FOR ADDITIONAL OVERNIGHT CAMPING: Additional overnight camping facilities, the main source of lower cost visitor and recreational facilities, are needed throughout the San Diego coastal region. Additional facilities of this kind should be provided in a regional park within the Carlsbad area. This can be accomplished in conjunction with an eventual Batiquitos Park, within the Aqua Hedionda Specific Plan Area, and/or along with the development of private recreational facilities.
- POLICY 6-10 LOWER COST VISITOR-SERVING RECREATIONAL USES: Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Encourage a range of affordability for overnight visitor accommodations. Evaluate the affordability of any new or redeveloped overnight visitor accommodations, including amenities that reduce the cost of stay. Mitigation may be applied to protect and encourage affordable overnight accommodations"

The public record request is to see documents of:

- City Staff reports, presentations and communications to the Carlsbad Planning and Parks Commissions, and City Council regarding the City’s consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies; and
- Carlsbad Planning and Parks Commissions, and City Council minutes, resolutions and ordinances documenting City of Carlsbad consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies.”

Updated Pubic Comments on Coastal Recreation submitted on January 2021:

---

Over 11-months ago in a 1/29/20 1:56PM email People for Ponto Carlsbad citizens first provided the City of Carlsbad both data and comments on **14 critical Coastal Recreation issues (see pages 5-30 below)**. The data and the 14 critical issues do not seem to be receiving appropriate disclosure/presentation/discussion/consideration in the Dec 2, 2020 Staff Report to the Planning Commission. To assure the 26-pages of citizen data and requests in the 1/29/20 email was received by the Planning Commission the file was re-emailed on 12/22/20 12:24pm and specifically addressed to City Council, City Clerk, Planning Commission, Parks Commission, Housing Commission, HEAC, CA Coastal Commission, and CA HCD. As citizens we request each of these 14 data points (with supporting data) be honestly considered.

In reading the Dec 2 Staff Report citizens conducted additional analysis of City Park data. That research further reinforces and documents the 14 Critical Coastal Recreation issues and highlights the relatively poor amount of City Park and Coastal Recreation planned by Carlsbad’s Staff proposed Draft LCP-LUPA. We hope the City Council and City Commissions, and CA Coastal Commission & HCD will consider this additional analysis of City data and citizen input:

<u>Coastal Zone data</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>	<u>note or source</u>
Coastline miles	6.4	3.9	6.0	Carlsbad Draft LCPA 201, Google Maps
Coastal Zone Acres	9,219	1,460	7,845	& Oceanside & Encinitas LCPs
Coastal Zone Acres	100%	16%	85%	% relative to Carlsbad

<u>City Park Standard data</u>				
City Park Standard	3	5	5	required park acres / 1,000 population
Park Standard %	100%	167%	167%	% is relative to Carlsbad

- Oceanside & Encinitas 'require' and plan for 67% MORE Parkland than Carlsbad
- Carlsbad 'requires' and plans for ONLY 60% as much Parkland as Oceanside & Encinitas
- Carlsbad only requires developers provide 60% of the parkland (or in-lieu fees) as Oceanside & Encinitas require
- Encinitas has a 'Goal' to provide 15 acres of Park land per 1,000 population

Developed City Park	2.47	3.65	5.5	acres / 1,000 population
Developed Park	100%	148%	223%	% is relative to Carlsbad

- Oceanside provides 48% MORE developed park land than Carlsbad
- Encinitas provide 123% MORE developed park land than Carlsbad
- Carlsbad ONLY provides 68% and 45% as much Parks as Oceanside & Encinitas respectively

National Recreation & Park Asso. Metric: a typical City provides 1 park / 2,281 pop. & 9.9 Park acres / 1,000 population

- Carlsbad (3 acre) Park Standard is ONLY 30% of what a typical City provides nationally
- Carlsbad requires developers to provide, 70% LESS Park acres than typical City provides nationally

National Recreation & Park Asso., Trust for Public Land, et. al.: 10 minute (1/2 mile) Walk to a Park Planning Goal

- Both Oceanside and Encinitas plan parks to be within a 10-minute (1/2 mile) walk to homes.
- Carlsbad DOES NOT plan Parks within walking distance to homes
- Carlsbad is NOT providing equitable and walking/biking access to Parks

Some Carlsbad Parks that are not fully useable as Parks:

<u>Existing Parks with Unusable Open Space acreage</u>	<u>total park acres</u>	<u>Unusable park acres</u>	<u>% of park unusable</u>	<u>reason unusable</u>
Alga Norte - SE quadrant	32.1	10.7	33%	1/3 of park is a Parking lot not a park In many other Carlsbad Parks a significant percentage of those Parks are consumed by paved parking lots and unusable as a Park.
Hidden Hills - NE quadrant	22.0	12.7	58%	city identified unusable habitat open space
La Costa Canyon SE quadrant	14.7	8.9	61%	city identified unusable habitat open space
Leo Carrillo - SE quadrant	27.4	16.5	60%	city identified unusable habitat open space
Poinsettia - SW quadrant	<u>41.2</u>	<u>11.1</u>	<u>27%</u>	city identified unusable habitat open space
Existing Park subtotal	137.4	59.9	44%	44% of these Parks are unusable as Parkland

Anticipated Future Park development projects

Park - quadrant

Veterans - NW	91.5	49.5	54%	estimated unusable habitat open space
Cannon Lake - NW	6.8	3.4	50%	estimated unusable water open space
Zone 5 Park expansion - NW	9.3	0	0	appears 100% useable as a Park
Robertson Ranch - NE	<u>11.2</u>	<u>0</u>	<u>0</u>	appears 100% useable as a Park
Future park subtotal	118.8	52.9	45%	45% of Future Parks are unusable as Parks

**Unusable Open Space acres**

**in Existing & Future Parks 256.2 112.8 44% 112.8 acres or 44% is unusable as Parks**

- 112.8 acres or 44% of the Existing & Future Parks are unusable Open Space and can't be used as Parkland
- **Based on City's minimum 3-acres/1,000 population Park Standard, 112.8 acres of Unusable Parkland means 37,600 Carlsbad Citizens (or 32.5% of Carlsbad's current population of 112,877) will be denied the minimum amount of Parkland that they can actually use as a Park.**
- **59.9 acres of Existing unusable 'park' / 3 acre park standard x 1,000 population = 19,967 Carlsbad citizens and their children are currently being denied useable park land. 19,967 is 17.7% of Carlsbad's current population.**
- In addition to these 19,967 existing citizens and their children denied park land, the City needs to develop additional Park acreage in the NE, SW and SE quadrants to cover current shortfalls in meeting in the minimal 3 acre/1,000 population park standard for the current populations in the NE, SW and SE quadrants.
- **The current NE, SW and SE quadrants park acreage shortfalls are in addition to the 19,967 Carlsbad citizens and their children that do not have the minimum 3 acres of parkland per 1,000 population**
- **Current FY 2018-19 MINIMUM park acreage shortfalls are listed in the table below. They are:**
  - **4.3 acres for 1,433 people in NE quadrant,**
  - **6.8 acres for 2,266 people in SW quadrant, and**
  - **2.3 acres for 767 people in SE quadrant**

Shortfall (excess) in  
Current Quadrant  
Min. Park standard by  
population      Future Park

	<u>acres</u>	<u>need</u>	<u>acres</u>	<u>%</u>	<u>existing Park shortfalls are for NE, SW &amp; SE quadrants</u>
NW quadrant	(-14.2)	(-4,733)	107.6	91%	Current NW parks are 14.2 acres over min. standard & capacity for 4,733 more people at min. park standard. 91% of all Future City Parks are in NW quadrant
NE quadrant	4.3	1,433	11.2	9%	Future Park will exceed minimum NE park standard
SW quadrant	6.8	2,266	0	0%	No min. parks for 2,266 people in SW quad. Park deficit
SE quadrant	2.3	767	0	0%	No min. parks for 767 SE quadrant Park deficit

A Park Standard minimum is just a “Minimum”. City policy allows the City to buy/create parks above the City’s current 3 acre/1,000 pop. MINIMUM (and lowest) Park Standard of surrounding Coastal cities. Carlsbad already did this in the NW quadrant. It then added 3.1 more NW quadrant Park acres as part of the Poinsettia 61 Agreement. Poinsettia 61:

- converted 3.1 acres of NW City land planned/zoned for Residential use to Open Space Park land use/zoning,
- facilitated a developer building condos (increasing park demand) in the SW quadrant,
- required the SW Quadrant developer pay \$3 million to build the 3.1 acre NW quadrant park, and
- required the SW Quadrant developer pay to convert 3.1 acres of NW Quadrant & 5.7 acres of SW Quadrant City Park land to habitat that will be unusable as a City Park.

So Poinsettia 61 increased SW Quadrant development (that both increased SW Park Demand and expanded the current SW Quadrant Park deceit) while simultaneously using SW Quadrant development to pay for the conversion of 3.1 acres of residential land in the NW Quadrant to City Park (the NW Quadrant already has surplus park land per the City’s minimum standard).

People for Ponto strongly supports creating City Parks above the City’s current low 3-acre per 1,000 population minimum, as the City’s minimum standard is relatively low and substandard relative to other cities; many Carlsbad parks have significant acreage that is in fact ‘unusable’ as a park. Most importantly People for Ponto Citizens think it is very important to prioritize providing City Parks in areas of Park Inequity that are unserved by City Parks. However it seems very unfair to the SW Quadrant citizens to be so unserved and starved of the bare minimum of City Parks while at the same time funding City Parks in excess of City standard in other Quadrants.

The Poinsettia 61 illustrates a larger unfair (and dysfunctional) distribution of Quadrant based City Park demand and supply that is keenly evident in the demands/supply funding and location disparity of Veterans Park. Most all the development impact and park demand that paid Veterans Park fees came from the SW, SE and NE Quadrants yet the Veterans Park (supply) is not in those SW, SE and NE Quadrants. This inequity is counter to the implicit City requirement that City Parks be provided within the Quadrant of their Park demand. It is logical and proper that City Parks be provided and equitably distributed to be close to the development and population that generated the Park demand.

The City Park inequity at Ponto and in other Coastal areas of the City is counter to several CA Coastal Act policies; counter to good city planning and good CA Coastal planning. Park Inequity is highly detrimental to the City, and City and CA citizens in the long-term; fails to properly distribute and match the location supply with the location of demand for Parks; and is counter to basic fundamental issues of fairness. Since 2017 People for Ponto has tried to get the City Council and Staff to address this inequity, specifically at Ponto, and to do so in a way that embraces a true and honest Citizen-based planning process.

**Coastal Recreation:**

2. Request that the City as part of its Draft LCP Public Review process broadly-publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCPA processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park: This disclosure is needed to correct about 20 years of City misrepresentation to the public on the since 1996 and currently Existing LCP requirements at Ponto, and the City's prior planning mistakes at Ponto. Citizens have been falsely told by the City that all the Coastal planning at Ponto was done already and that the City followed its Existing LCP regarding the need for a park at Ponto, and that this is already decided and could not be reversed. This misinformation has fundamentally stifled public review and public participation regarding the Coastal Zone. City failure to provide such a broad-public disclosure on the documented prior, and apparently current proposed, "planning mistakes" would appear to violate the principles of Ca Coastal Act Section 30006. A broad-public disclosure would for the first time allow citizens to be accurately informed on the Existing LCP requirements at Ponto so they can provide informed public review and comment regarding the need for a Coastal Park in in this last vacant 'unplanned' area. The requested broad-public disclosure by the City of the City past mistakes and the Existing LCP requirements at Ponto is consistent with CA Coastal Act (CCA) "Section 30006 Legislative findings and declarations; public participation - The Legislature further finds and declares that **the public has a right to fully participate in decisions affecting coastal planning**, conservation and development; that achievement of **sound coastal conservation and development is dependent upon public understanding and support**; and that the continuing planning and implementation of **programs for coastal conservation and development should include the widest opportunity for public participation.**" The public cannot participate as outlined in CCA Section 30006 if past City 'mistakes' and misrepresentations on Coastal planning at Ponto go undisclosed to the public. If the public isn't fully informed about the 20-years of LCP planning mistakes at Ponto how could the public in the past (and now in the present) participate in the proposed LCP Amendment – **Public Participation as noted in Section 30006 above is the means to sound coastal conservation and development and is "... dependent upon public understanding ..."**. The City's past mistakes at Ponto need to be corrected by slightly different a Draft LCP Amendment process than currently outlined by the City; a new process is needed that clearly, opening and honestly informs and engages the public on the Existing LCP Ponto issues. The City's current Draft LCP Amendment process fails to follow CCA Section 30006 in that most all the citizens we encounter are as yet unaware of the City's Ponto mistakes and how they can participate in in the DLCPA process without that information. We see this daily in conversations we have with our fellow citizens. We even saw at the Oct 20, 2019 Carlsbad Planning Commission meeting that the Planning Commission was unaware of the planning mistakes at Ponto. How can a decision body of the City make a decision without knowing about these prior 'planning mistakes' facts that surround what they are being asked to decide on? Repeatedly since 2017 Carlsbad citizens and People for Ponto have asked the City to fully acknowledge the City's prior flawed planning at Ponto, and to correct that with ether maintaining the Existing LCP Non-residential Reserve Land Use or restarting the Coastal Planning at Ponto with a true and accurately informed Community-based Coastal Planning process consistent with Section 30006.

We request the City during the DLCPA Public Review period broadly and publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCP and other "planning efforts" public participation processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park, and 1) provide a truly honest public participation process on that disclosure consistent with CCA Section 30006 as part of the Draft LCP Amendment process or 2) retain the Existing LCP Non-residential Reserve Land Use and require a comprehensive and honest community-based redo of Coastal Resource planning at Ponto.

3. City fully and publicly reply to and the City Council consider the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process: Lance Schulte on 1/23/20 received an email reply by the City to his follow-up email regarding the status of the 11/20/19 citizen concerns/requests public comments and letters presented to the Planning Commission. This is appreciated, however it is request that the City fully publicly reply to the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process and present the to the City Council 11/20/19 citizen concerns/requests so the City Council can consider them and provide any direction to City Staff. City Staff first presented a summary presentation of the proposed Draft LCP Amendment to the Carlsbad Planning Commission on November 20, 2019, and indicated the public comment period would close on November in less than 2-weeks. Citizens and citizen groups provided public testimony to the Planning Commission, both verbally and in two written letters. The CCC was copied on those letters. The testimony and letters noted significant concerns about the City's proposed LCP Amendment process and made three requests:
- Disclose and provide a publically accessible 'Redline Version' of the Existing 2016/Proposed LCP land use Plan and Policies so everyone can see the proposed changes to the Existing LCP.
  - Provide true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern or objections. Citizen Workshops, when done right, are valuable means to openly educate, discuss and work to consensus options. These areas, including Ponto, were/are subject to multiple lawsuits, so true open and honest public workshops would provide an opportunity to openly and honestly discuss the issues and hopefully build public consensus/support for solutions. This approach seems consistent with CCA Section 30006, and common sense.
  - Extend the public comment period 6-months to allow Citizen Review of the Redline Version of the LCPA and allow time for Citizen Workshops.

The City did extend the Public Review period 2-months over the holidays to January 31, 2020. This is appreciated although many think this is inadequate given the significance of the Proposed Land Use Plan Amendments, and lack of Redline Version to compare. The City and their consultants required several extra years beyond schedule prepare the proposed LCP Amendments. The extra years of City Staff work reflects on the volume of the over 500-pages in the documents and the time needed to understand the Existing LCP and then create an Amended LCP. Citizens need sufficient time, proper comparative tools (redline) and a process (workshops) to understand the proposed LCP Amendments that is reflective of extensive extra time needed by City Staff and consultants needed. Truncation of lay public review to a few months for an Amendment that took paid professionals many years to produce seems a more than a bit inappropriate. The City appears to be rejecting citizens' request to be provided a 'Redline Version' of the Existing 2016/Proposed LCP land use Plan. So public review comments will tainted or will miss many issues due having to manually cross-reference a 150-page Existing LCP LUP with a Proposed 350-page Proposed LCP LUP. There will be unknown and unconsidered changes in the Draft LCP Amendment that the public and city and CCC decision makers will not know about due to the lack of 'Redline Version'.

The City also appears to reject citizen requests for true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern – such as Ponto. Like Coastal Recreation issue #1 above the following citizen requests appear consistent with CA Coastal Act (CCA) Section 30006, and the City's rejection of that requests seem counter to the CA Coastal Act.

We again request of the City to provide: 1) a 'Redline Version' to the public and decision makers, along with sufficient time to review and comment on the 'Redline Version'; and 2) true Citizen Workshops for Ponto and the

other last remaining significant vacant Coastal lands in Carlsbad as part of the Draft LCP Amendment process, or as part of deferred LCP Amendment process for those areas.

4. Coastal Zoned land is precious: the very small amount of remaining vacant Coastal land should be reserved for “High-Priority” Coastal Recreation Land Uses under the CA Coastal Act to provide for the growing and forever ‘Buildout’ needs of Carlsbad and CA Citizens, and our visitors.
  - Less than 1.8% (76 square miles) of San Diego County’s 4,207 square miles is in Coastal Zone. This small area needs to provide for all the forever Coastal needs of the County, State of CA, and Visitors. Upland Coastal Recreation (Coastal Park) land use is needed to provide land to migrate the projected/planned loss of “High-Priority” Coastal Recreation land uses due to Sea Level Rise impacts. There is only 76 miles of total coastline in San Diego County; a significant amount is publicly inaccessible military/industrial land. So how the last few portions of Coastal Land within Carlsbad (which is about 8% of San Diego County’s Coastline) is planned for the forever needs for High-Coastal-Priority Recreation Land Use is critical for Carlsbad, San Diego, and California Statewide needs into the future.
  - Most all the developable Coastal land in Carlsbad is already developed with Low-Coastal-Priority residential uses. Only a very small percentage of Carlsbad’s developable Coastal land, maybe 1-2%, is still vacant. This last tiny portion of fragment of vacant developable Coastal Land should be documented in the Draft LCP and reserved for “High-Priority” Coastal Land uses – most critically Coastal Recreation – to address the growing Coastal Recreation needs from a growing population and visitors. These growing needs are all the more critical in that existing Coastal Recreation lands will be decreasing due to inundation and erosion due to DLCPA planned Sea Level Rise.
  - This image of the western half of San Diego County graphically shows (in the blue line) the very small Coastal Zone Area that needs to provide the Carlsbad’s and California’s Coastal Recreational needs for all San Diego County residents and Visitors:

We request that 1) the amount and location of remaining vacant Coastal land in Carlsbad be documented and mapped and be reserved for high-priority Coastal Land Uses consistent with CCA Goals in Section 30001.5 “... (c) ... **maximize public recreational opportunities in the coastal zone** consistent with sound resources conservation principles and constitutionally protected rights of private property owners. (d) **Assure priority for coastal-dependent and coastal-related development over other development on the coast.** ...”; 2). This data be used in the City’s analysis and the public’s review and discussion about the City’s proposed Draft ‘Buildout’ Land Use Plan. The City’s proposed Draft ‘Buildout’ Land Use Plan will forever lock in the amount “maximum public recreational opportunities in the coastal zone” and will be the final Coastal Land Use Plan that is supposed to “assure priority for coastal-dependent and coastal-related development over other development on the coast”. Most of Carlsbad’s Coastal Zone is already developed or committed to low-priority land uses contrary to these CCA Goals, so how we finally and forever plan to use of the last small remaining vacant Coastal Land is very important.

5. The proposed Draft LCP Amendment in Chapter 3 makes unfounded statements regarding the proposed Amendment to the LCP Land Use Plan provision of “High-Priority” Coastal Recreation land use: On page 3-3, at the beginning of the Chapter 3 – Recreation and Visitor Serving Uses the City correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation uses, and cites multiple CCA Sections to that effect. The City’s proposed Coastal Land Use Plan then states on page 3-5 that a high proportion of land in the City is dedicated open

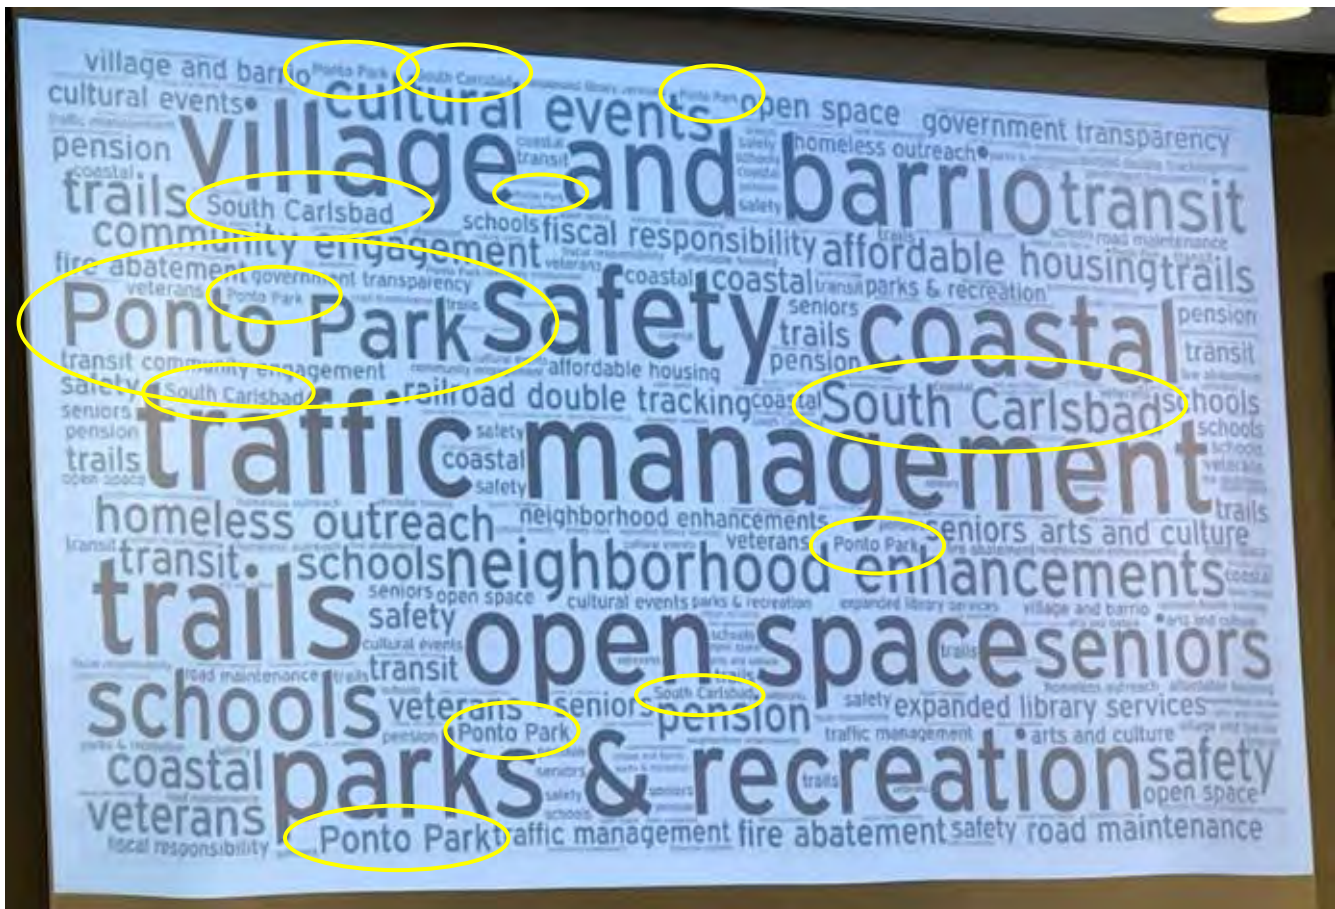

space available for passive and active use, yet provides no justification or accurate metric to support this statement. This is a critical unsubstantiated and speculative statement that is not supported by any comparative data (justifying the “high proportion” statement). The City later in Chapter 3 compared the adjoining cities of Oceanside and Encinitas to try to show how the proposed Draft LCP LUP Amendment provides higher levels of Visitor Serving Accommodations. That ‘non-common denominator’ comparison was fundamentally flawed, as noted in a prior separate Draft LCPA public review comment from People for Ponto regarding another high-priority Coastal land use (visitor accommodations) planned for in Chapter 3, but at least it was an attempt to compare. However, for the Coastal Recreation portion of Chapter 3, the City does not even attempt to provide any comparative data to support (or justify) the proposed Coastal Recreation Land Use Plan and statements. The Coastal Recreation Chapter also fails to disclose Carlsbad’s adopted City Park Master Plan (Park Service Area and Equity map) data that shows a clear conflict between the CA Coastal Act Policy Sections noted at the beginning of Chapter 3 and Chapter 3’s proposed Draft Coastal Recreation Land Use Plan.

Comparative Coastal Recreation: Comparing the Land Use Plan and policies of Oceanside, Carlsbad and Encinitas, one finds Carlsbad’s proposed Coastal Recreational Plan and Policies are not “high”, but very low compared with Oceanside and Encinitas. Carlsbad has a General Plan Park Standard of 3 acres of City Park per 1,000 Population. Oceanside has a 5 acres of City Park Standard per 1,000 population, and Encinitas has a 15 acres per 1,000 population standard, and an in-lieu park fee requirement of 5 acres per 1,000 population. Carlsbad’s proposed Coastal Recreation Land Use Plan is in fact not ‘high’ but is in fact the lowest of the three cities, with Carlsbad providing only 40% of Oceanside’s park standard, and only 20% of Encinitas’s Park Standard. Citywide Carlsbad currently has 2.47 acres of developed park per 1,000 population, Oceanside currently has 3.6 acres of developed park per 1,000 population, and Encinitas currently has 5.5 acres of developed park per 1,000 population. Although this data is citywide, it shows Carlsbad’s current amount of developed parkland is less than 70% of what Oceanside currently provides, and less than 45% of what Encinitas currently provides. Carlsbad is not currently providing, nor proposing a Coastal Land Use Plan to provide, a ‘high’ proportion of Coastal Recreation Land Use compared to Oceanside and Encinitas.

On page 3-5 Carlsbad may be misrepresenting city open space that is needed and used for the preservation of federally endangered species habitats and lagoon water bodies. This open space Land cannot be Used for Coastal Recreation purposes; and in fact Land Use regulations prohibit public access and Recreational Use on these Lands and water bodies to protect those endangered land and water habitats. 78% of Carlsbad’s open space is “open space for the preservation of natural resources” and cannot be used for Coastal Parks and Recreational use. Although “open space for the preservation of natural resources” does provide scenic or visual amenity, and this amenity is addressed as a different coastal resource. Visual open space is not Coastal Recreation Land Use. It appears Carlsbad is proposing in the Draft LCP Amendment to continue to, providing a ‘low’ percentage of Coastal Park Land Use and Coastal Recreation Land Use compared to adjoining cities.

In addition to the comparatively low amount of Coastal Park land Carlsbad plans for, Carlsbad scores very poorly regarding the equitable and fair distribution and accessibility of Coastal Parks and Coastal Recreation Land Uses. Both the City of Oceanside and Encinitas have very robust and detailed Park and Land Use plans to promote an equitable distribution of, and good non-vehicular accessibility, to their Coastal Parks. By comparison, Carlsbad’s park land use plan scores poorly, as exemplified in Ponto and South Carlsbad. Ponto’s existing population requires about 6.6 acres of City Parkland per Carlsbad’s low 3 acres per 1,000 population standard. Yet the nearest City Park is several miles away and takes over 50 minutes to walk along major arterial roadways and across Interstate 5 to access. As such this nearest park is not an accessible park for Ponto children, and thus Ponto children have to play in

our local streets to find a significantly large open area to play in. Ponto residents have to drive their kids to get to a park increasing VMT and GHG emissions. The City's proposed Coastal Recreation Land Use Plan 'solution' to Ponto's no-park condition, along with the City's need to add an additional 6.5 acres of new City parks in Southwest Carlsbad to comply with the Southwest Carlsbad's 2012 population demand (at a ratio of 3-acre/1,000 population) is to provide a City Park – Veterans Park – over 6-miles away from the Ponto and Southwest Carlsbad population need. This makes a bad situation worse. The City's proposed location is totally inaccessible to serve the needs of the population of children or anyone without a car, that it is intended to serve in South Carlsbad. This City proposed Coastal Recreation Land Use Plan 'solution' seems inappropriate and inconsistent with the CA Coastal Act and common sense. During the City's Veterans Park and budget community workshops citizens expressed a desire for a Ponto Park to be the solution to our Ponto and Southwest Carlsbad Park deficits. Those citizen requests were not apparently considered as part of the City's proposed Draft Coastal Recreation Land Use Plan. Following is an image summarizing the magnitude of citizen needs/desires expressed at the City's Budget workshop. Note the number and size of the text citing Ponto Park and South Carlsbad that reflects the number and magnitude/intensity of citizen workshop groups' input. The failure to acknowledge this public participation and data in the Coastal Recreation Land Use Plan Park seems in conflict with CCA Sections 30006 and 30252(6):

For South Carlsbad there is a complete lack of any existing or planned City Coastal Park and park acreage west of I-5, while North Carlsbad has 9 existing and 1 planned City Coastal Parks totaling 37.8 acres of City Coastal W of I-5 North Carlsbad. Not only is this unfair to South Carlsbad, it is also unfair to North Carlsbad as it increases VMT and parking impacts in North Carlsbad because South Carlsbad is not providing the City Coastal Parks for South Carlsbad resident/visitor demands. This City Park disparity is shown on Figure 3-1 of the Coastal Recreation Land Use Plan;

however it more accurately illustrated in the following data/image from the adopted Carlsbad Park Master Plan's "Service Area Maps (Equity Maps)". The image below titled 'No Coastal Park in South Carlsbad' shows Carlsbad's adopted "Park Service Area Maps (Equity Maps)" from the City's Park Master Plan that says it maps "the population being served by that park type/facility." The added text to the image is data regarding park inequity and disparity in South Carlsbad. The image compiles Carlsbad's adopted Park "Park Service Area Maps (Equity Maps)" for Community Parks and Special Use Area Parks that are the City's two park acreage types produced by the City's comparatively low standard of 3 acre of City Park per 1,000 population. The City's Park Service Area Maps (Equity Maps) shows areas and populations served by parks within the blue and red circles. City data clearly shows large areas of overlapping Park Service (areas/populations served by multiple parks) in North Carlsbad and also shows large areas in South Carlsbad with No Park Service (areas/populations unserved by any parks) and Park Inequity in South Carlsbad. It clearly shows the City's Documented Park Need and Park inequity at Ponto. The Existing LCP LUP for Ponto's Planning Area F in is required to "consider" and "document" the need for a "Public Park". The City's adopted Park Service Area Maps (Equity Maps) clearly shows the inequity of Coastal City Park between North and South Carlsbad, and the need for Coastal Parks in South Carlsbad – particularly at Ponto. The City's proposed Draft 'Buildout' Coastal Recreation Land Use Plan instead proposes to lock-in documented City Public Coastal Park inequity and unserved Coastal Park demand at Ponto and South Carlsbad forever. It does so by proposing the last vacant undeveloped/unplanned Coastal land – Ponto Planning Area F - in the unserved Ponto and South Carlsbad coastline areas instead of being planned for much needed City Park and Coastal Recreation use be converted to even more low-priority residential and general commercial land uses. These 'low-priority' residential uses, by the way, further increase City Park and Coastal Recreation demand and inequity in Coastal South Carlsbad. This is wrong, and a proposed 'forever-buildout' wrong at the most basic and fundamental levels. The proposed Draft Coastal Recreation Land Use Plan by NOT providing documented needed City parks for vast areas of Coastal South Carlsbad is inconsistent with the CA Coastal Act policies and Existing LCP LUP requirements for Ponto Planning Area F; and also inconsistent with fair/equitable/commonsense land use and park planning principles, inconsistent with CA Coastal Commission social justice goals, inconsistent with social equity, inconsistent with VMT reduction requirements, and inconsistent with common fairness. A different Coastal Recreation Land Use Plan should be provided that provides for a socially equitable distribution of Coastal Park resources so as to would allow children, the elderly and those without cars to access Coastal Parks. The proposed Draft 'Buildout' Coastal Recreation Land Use Plan forever locking in the unfair distribution of City Parks appears a violation of the not only CCA Sections 30213, 30222, 30223, and 30252(6) but also the fundamental values and principles of the CA Coastal Act. The Draft also appears a violation of Carlsbad's Community Vision.

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

A different Coastal Recreation Land Use Plan is required to provide a more equitable distribution of City Parks with non-vehicular accessibility. Such a different plan would advance State and City requirements to reduce vehicle Miles Traveled (VMT) and greenhouse gas emissions that contribute to climate change and sea level rise impacts. Please note that the data for the above basic comparison comes from City of Carlsbad, Oceanside and Encinitas General Plan and Park Master Plan documents.

Data shows the proposed Coastal Recreation Plan conflicts with the CA Coastal Act policy Sections. As mentioned page 3-3 correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation Land Uses, and pages 3-5 list multiple CA Coastal Act (CCA) policy Sections that confirm this. However, given the significant statewide importance of Coastal Recreation Land Use, the City proposed 'Buildout' Coastal Recreation Land Use Plan does not appear to adequately address and implement these CCA Policies, and most noticeably in the Ponto area of South Carlsbad. Coastal Recreation is a significant Statewide High-Priority Land Use under the CCA. For a substantially developed non-coastal-industry city like Carlsbad Coastal Recreation is likely the biggest land use issue. This issue is even more elevated due to the fact that there are only a few small areas left of undeveloped Coastal land on which to provide Coastal Recreation, and Carlsbad is proposing a Coastal 'Buildout' Land Use Plan on those areas. The use of the last few remaining vacant portions of Coastal land for Coastal Recreation Land Use is the most important land use consideration in the proposed Draft LCP Land Use Plan Amendment as population and visitor growth will increase demands for Coastal Recreation. It is thus very surprising, and disturbing that the proposed Coastal Recreation Land Use Plan is so short, lacks any comparative and demand projection data, lacks any resource demand/distribution and social equity data, and lacks any rational and clear connection with CCA Policy and the proposed 'Buildout' Coastal Land Use plan. This is all the more troubling given that:

- The Ponto area represents the last significant vacant undeveloped/unplanned land near the coast in South Carlsbad that can provide a meaningful Coastal Park.
- The fact that the City's Existing LCP requires the city consider and document the need for a "i.e. Public Park" on Ponto's Planning Area F prior to the City proposing a change of Planning Area F's "Non-residential

Reserve” land use designation. The City has repeatedly failed to comply with this LCP LUP requirement, and worse has repeatedly failed to honestly inform citizens of this LCP LUP requirement at planning Area F before it granted any land use. The City, apparently implementing speculative developer wishes, has repeatedly proposed changing Planning Area F’s Coastal Land Use designation to “low-priority” residential and general commercial land uses without publically disclosing and following the Existing LCP LUP.

- The City’s currently developed parks in the southern portion of the City do not meet the city’s comparatively low public park standard of only 3 acres per 1,000 population. Since 2012 there has been City park acreage shortfall in both SW and SE Carlsbad.
- The Existing population of Ponto (west of I-5 and south of Poinsettia Lane) requires about 6.6 acres of Public Park based on the City’s comparatively low public park standard of 3 acres per 1,000 population. There is no Public Park in Ponto. Adding more population at Ponto will increase this current park demand/supply disparity.
- Carlsbad and other citizens have since 2017 expressed to the City the strong need for a Coastal Park at Ponto, and requested the City to provide a true citizen-based planning process to consider the Public Park need at Ponto. The Citizens’ requested process is fully in-line with CCA Goals, Public Participation Policy, Land Use Policies, and the Existing LCP Land Use Plan/requirements for Planning Area F and is the most appropriate means to consider and document the need for a Public Park at Ponto as required by the Existing LCP Land Use Plan.
- Planning Area F is for sale, and a non-profit citizens group has made an offer to purchase Planning Area F for a much needed Coastal Park for both Ponto and inland South Carlsbad residents and visitors. How should these facts be considered by the City and CCC?
- Carlsbad has no Coastal Parks west of I-5 and the railroad corridor for the entire southern half of Carlsbad’s 7-mile coastline.
- The southern half of Carlsbad’s coastline is 5.7% of the entire San Diego County coastline and represents a significant portion of regional coastline without a meaningful Coastal Park west of I-5 and the Railroad corridor.
- The City’s proposed Coastal Recreation Land Use Plan provides No Documentation, No Rational, and No Supporting or Comparative Data to show the proposed Coastal Recreation Land Use Plan in fact complies with the CA Coastal Act.

6. There is no Coastal Recreation/Park west of interstate 5 for all South Carlsbad, or half of the entire City. This is an obviously unfair and inequitable distribution of Coastal Recreation/Park resources that should be corrected by changes to the Draft LCP Land Use Amendment: The following image (which was sent to the City and CCC on several prior communications) was first requested by former Carlsbad Councilman Michael Schumacher during a People for Ponto presentation/request at the Oct 23, 2018 City Council meeting. The data compiled in the image shows how the South Coastal Carlsbad (Ponto) is not served by a Park per the City’s adopted Parks Master Plan. The blue dots on the map are park locations and blue circle(s) show the City’s Park Master Plan adopted Park Service Areas and Park Equity. This data, from pages 87-88 of the City of Carlsbad Parks Master Plan, shows all City Parks (both Community Parks and Special Use Areas in Coastal Carlsbad (except Aviara Park east of Poinsettia Park and west of Alga Norte Park). The text on the left margin identifies the South Carlsbad Coastal Park (west of I-5) gap along with the number of South Carlsbad Citizens (over half the City’s population) without a Coastal Park. The left margin also identifies more local issues for the over 2,000 Ponto area adults and children. For Ponto residents the nearest Public Park and City proposed ‘solution’ to the South Carlsbad and Ponto Public Park deficit are miles away over high-speed/traffic roadways and thus somewhat hazardous to access and effectively unusable by children/the elderly or

those without cars. Having been a 20-year resident of Ponto I regularly see our children have to play in the street as there are no Public Park with large open fields to play at within a safe and under 1-hour walk away. Ponto citizens have submitted public comments regarding this condition and the lack of a Park at Ponto

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

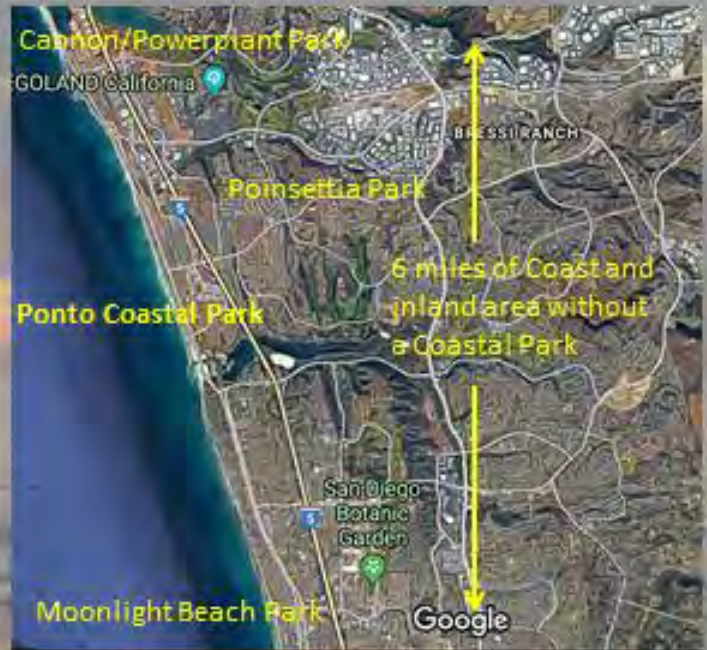

Ponto is at the center of regional 6-mile Coastal Park Gap. A Coastal Park in this instance being a Public Park with practical green play space and a reasonable connection with the Coast (i.e. located west of the regional rail and Interstate-5 corridors). The following image shows this larger regional Coastal Park Gap centered on the Ponto Area, and the nearest Coastal Parks – Cannon Park to the north, and Moonlight Park to the south.

Regionally this image shows Ponto is the last remaining significant vacant Coastal land that could accommodate a Coastal Park to serve the Coastal Park current needs of over existing 2,000 Ponto residents, 64,000 existing South Carlsbad residents, and a larger regional population. It is also the only area to serve the Coastal Park needs for the thousands of hotel rooms in Upland Visitor Accommodations in South Carlsbad.

# How Ponto Serves Region

- Ponto is in the middle of the regional Coastal Park Gap
- A Ponto Coastal Park fills a critical 6 mile gap of coastline without a Coastal Park - 8.6% of SD County coastline
- A Ponto Coastal Park Serves over 26,000 homes & 64,000 citizens just in South Carlsbad without a Coastal Park
- Serves many more people outside Carlsbad

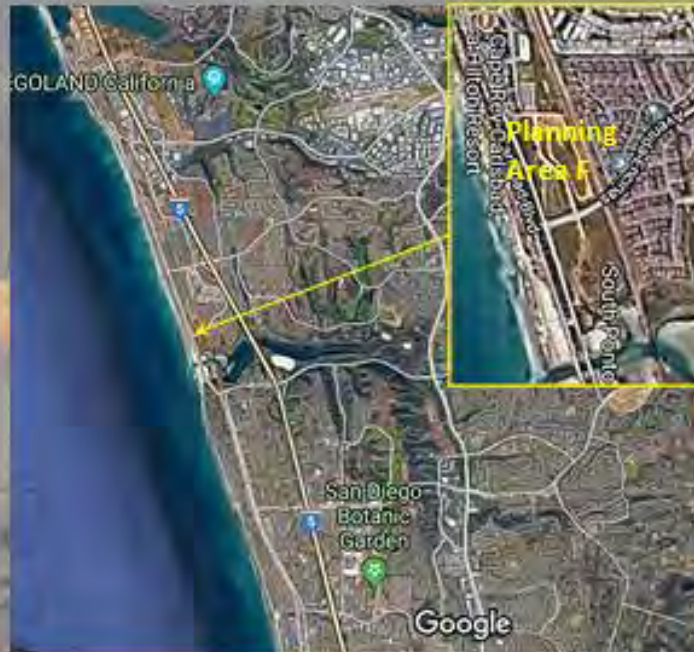

As People for Ponto first uncovered and then communicated in 2017 to the City and CCC; Carlsbad's Existing (since 1994) Local Coastal Program LUP currently states (on page 101) that Ponto's Planning Area F: carries a Non-Residential Reserve (NRR) General Plan designation. Carlsbad's Existing Local Coastal Program Land Use Plan states: "Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an "unplanned" area ..." and requires that: "... **As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.**" CA Coastal Commission actions, Carlsbad Public Records Requests 2017-260, 261, and 262, and 11/20/19 City Planner statements confirm the City never fully communicated to Carlsbad Citizens the existence of this LCP requirement nor did the City comply with the requirements. Of deep concern is that the City is now (as several times in the past) still not honestly disclosing to citizens and implementing this Existing LCP requirement as a true and authentic 'planning effort'. The lack of open public disclosure and apparent fear of true public workshops and Public Comment about the Existing Planning Area F LCP requirements are troubling. The point of a 'planning effort' is to openly and publically present data, publically discuss and explore possibilities/opportunities, and help build consensus on the best planning options. Citizens are concerned the city has already made up its mind and there is no real "planning effort" in the proposed Draft LCP Amendment process, just a brief Staff Report and at the end provide citizens 3-minutes to comment on the proposal. This is not the proper way to treat the last remaining significant vacant land in South Carlsbad that will forever determine the Coastal Recreation environment for generations of Carlsbad and California citizens and visitors to come.

The following data/images show how Ponto is in the center of the 6-mile (west of I-5 and Railroad corridor) regional Coastal Park gap. Ponto is the last remaining vacant and currently "unplanned" Coastal land that is available to address this regional Coastal Park Gap.

## How Ponto Serves Region cont.

- **Relieves Coastal Park congestion** in North Carlsbad, Encinitas and Solana Beach
- Area currently needs Coastal Park as seen by:
  - Ponto Beach parking congestion
  - current trespass use of Planning Area F as a Park
- **6.6 acre portion of Planning Area F** addresses SW Quad City Park deficit

## How Ponto Serves Region cont.

- A Ponto Park helps address 2050 and beyond Regional Population and Visitor Growth demands for Coastal Parks
- A Ponto Park provides the lowest-cost coastal access and recreation opportunities for CA citizens and visitors

## How Ponto Serves Region cont.

- Vital park and open space amenity for Visitor serving businesses and accommodations
- 6.6 acre unique City Coastal Park venue to stage special events: Runs, bike rides, triathlons, sports, coastal festivals, etc.

## How Ponto Serves Region cont.

- Critical Park space for So. Carlsbad State Beach Campground
- Provides a big training and staging space for Junior lifeguards
- Dog walk trail

# Ponto Coastal Park Concept

- A concept – but shows potential recreational opportunities
- Provides **vital parkland support for beach & open play fields**
- Concept plan a gift from San Pacifico Community Association

One possible Concept image of a potential Ponto Coastal Park at Planning Area F is illustrated below. The potential for a Ponto Coastal Park is real. The speculative land investment fund (Lone Star Fund #5 USA L.P. and Bermuda L.P.) that currently owns Planning Area F is selling the property, and is available for the City of Carlsbad to acquire to address the documented demand/need for a City Park and City Park inequity at Ponto and in Coastal South Carlsbad. A Ponto Beachfront Park 501c3 is working to acquire donations to help purchase the site for a Park. These situations and opportunities should be publicly discussed as part of the City Staff's proposed Local Coastal Program Land Use Plan Amendment.

7. Projected increases in California, San Diego County and Carlsbad population and visitor growth increases the demand for High-Priority-Coastal Recreation land use:

- Increasing Citizen demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

San Diego County Citizen Population - Source: SANDAG Preliminary 2050 Regional Growth Forecast

1980	1,861,846
1990	2,498,016
2000	2,813,833
2010	3,095,313
2020	3,535,000 = 46,500 Citizens per mile of San Diego County coastline
2030	3,870,000
2040	4,163,688
2050	4,384,867 = 57,700 Citizens per mile of San Diego County coastline

2020 to 2050 = 24% increase in San Diego County population.

Citizen Population will continue beyond 2050. Carlsbad may plan for 'Buildout' in 2050, but what is San Diego County's 'Buildout'? There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for this growing population. If we do not increase our supply of Coastal Recreational Resources for these increased demands our Coastal Recreation Resources will become more overcrowded, deteriorated and ultimately diminish the Coastal Recreation quality of life for Citizens of Carlsbad and California. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5) and there is No Coastal Park in all of South Carlsbad to address the Coastal Recreation needs of the 64,000 South Carlsbad Citizens.

- Increasing Visitor demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

Yearly Visitors to San Diego County – source: *San Diego Tourism Authority; San Diego Travel Forecast, Dec, 2017*

2016	34,900,000
2017	34,900,000
2018	35,300,000
2019	35,900,000
2020	36,500,000 = average 100,000 visitors per day, or 2.83% of County’s Population per day, or 1,316 Visitors/coastal mile/day in 2020
2021	37,100,000
2022	37,700,000

This is growth at about a 1.6% per year increase in visitors. Projecting this Visitor growth rate from 2020 to 2050 results in a 61% or 22,265,000 increase in Visitors in 2050 to:

2050	58,765,000 = average 161,000 visitors per day, or 3.67% of the County’s projected 2050 Population per day, or 2,120 Visitors/coastal mile/day in 2050.
------	--

The number of Visitors is likely to increase beyond the year 2050. There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for these projected 2050 61% increase, and beyond 2050, increases in Visitor demand for Coastal Recreational Resources. Increasing Coastal Recreation land is a vital and critically supporting Land Use and vital amenity for California’s, the San Diego Region’s and Carlsbad’s Visitor Serving Industry. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5). There are thousands of hotel rooms in South Carlsbad that have NO Coastal Park to go to in South Carlsbad. This needs correcting as both a Coastal Act and also a City economic sustainability imperative.

- We request that the as part of the public’s review, the City Staff proposed Draft LCP Amendment to the Land Use Plan clearly document if and/or how future forever ‘Buildout’ City, Regional and Statewide population and visitor population demand for Coastal Recreation and City Coastal Parks are adequately provided for both in amount and locational distribution in the Carlsbad proposed Amendment of the LCP Land Use Plan.

8. Carlsbad’s Draft Local Coastal Program Land Use Plan Amendment says it plans to a year 2050 buildout of the Coastal Zone. The Draft Local Coastal Program Land Use Plan Amendment then is the last opportunity to create a Coastal Land Use Plan to provide “High-Priority” Coastal Recreation Land Use, and will forever impact future generations of California, San Diego County, and Carlsbad Citizens and Visitors:

- The Draft LCPA indicates in 2008 only 9% of All Carlsbad was vacant land. Less is vacant now in 2019. Carlsbad’s Coastal Zone is 37% of the City, so vacant unconstrained land suitable for providing Coastal Recreation is likely only 3-4%. The prior request for a full documentation of the remaining vacant Coastal lands will provide a better understanding needed to begin to make the final ‘buildout’ Coastal Land Use Plan for Carlsbad. The Draft LCPA does not indicate the amount and locations of currently vacant unconstrained Coastal Land in Carlsbad. This final limited vacant land resource should be clearly documented and mapped in the DLCPA as it represents the real focus of the DLCPA – the Coastal Plan for these remaingn undeveloped

lands. These last remaining vacant lands should be primarily used to provide for and equitably distribute “High-Priority” Coastal Recreation Land Uses consistent with CCA Sections:

- i. Section 30212.5 “... Wherever appropriate and feasible, public facilities, including parking areas or facilities, **shall be distributed throughout an area so as to mitigate against the impacts, social and otherwise, of overcrowding or overuse by the public of any single area.**”;
- ii. Section 30213 “... **Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...**”;
- iii. Section 30222 “**The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development,** but not over agriculture or coastal-dependent industry.”
- iv. Section 30223 “**Upland areas necessary to support coastal recreational uses shall be reserved for such uses, where feasible**” ,
- v. Section 30251 ... The location and amount of new development should maintain and enhance public access to the coast by ... 6) assuring that the recreational needs of new residents will not overload nearby coastal recreation areas by **correlating the amount of development with local park acquisition** and development plans with the provision of onsite recreational facilities to serve the new development”

Adopted City Park Service Area and Park Equity maps discussed earlier document the proposed Draft LCP Amendment’s inconstancy with the above CCA Policy Sections. The locations and small amounts remaining vacant Coastal lands provide the last opportunities to correct the inconsistencies of City proposed Draft “buildout” LCP Land Use Plan Amendment with these Coastal Act Policies.

Currently and since 1996 there has been LCP LUP Policy/regulations for Ponto Planning Area F that require consideration of a “Public Park” prior to changing the existing “unplanned Non-residential Reserve” Land Use designation. A map and data base of vacant developable Coastal land should be provided as part of the Draft LCPA and the Draft LCPA. This map and data base should document the projected/planned loss of Coastal land use due to Sea Level Rise. Draft LCPA projects Sea Level Rise will eliminate several beaches and High-Priority Coastal Land Uses like Coastal Lagoon Trails and the Campground.

- The LCP Land Use Plan should plan and reserve the very limited vacant developable Coastal land for the long-term ‘Buildout’ needs of “High-Priority” Coastal Recreation Land Use. Vacant developable Coastal land is too scarce to be squandered for “low-priority” uses. Sea Level Rise will reduce “High-Priority” Coastal Uses. So how vacant developable Upland area should be preserved for “High-Priority” Coastal Uses is a key requirement to be fully documented and discussed in the Draft LCPA. If not one of two things will eventually happen 1) any new Coastal Park land will require very expensive purchase and demolition of buildings or public facilities to create any new Coastal Park land to meet existing and growing demand; or 2) Coastal Recreation will be hemmed-in by “low-priority” uses and thus force Coastal Recreation to decrease and become increasingly concentrated and overcrowded in its current locations; and thus will promote the eventual deterioration of our current Coastal Recreation resources. A plan that fails to fix Coastal Park deficits and then increase Coastal Parks in pace with increased population/visitor demand is a plan that can

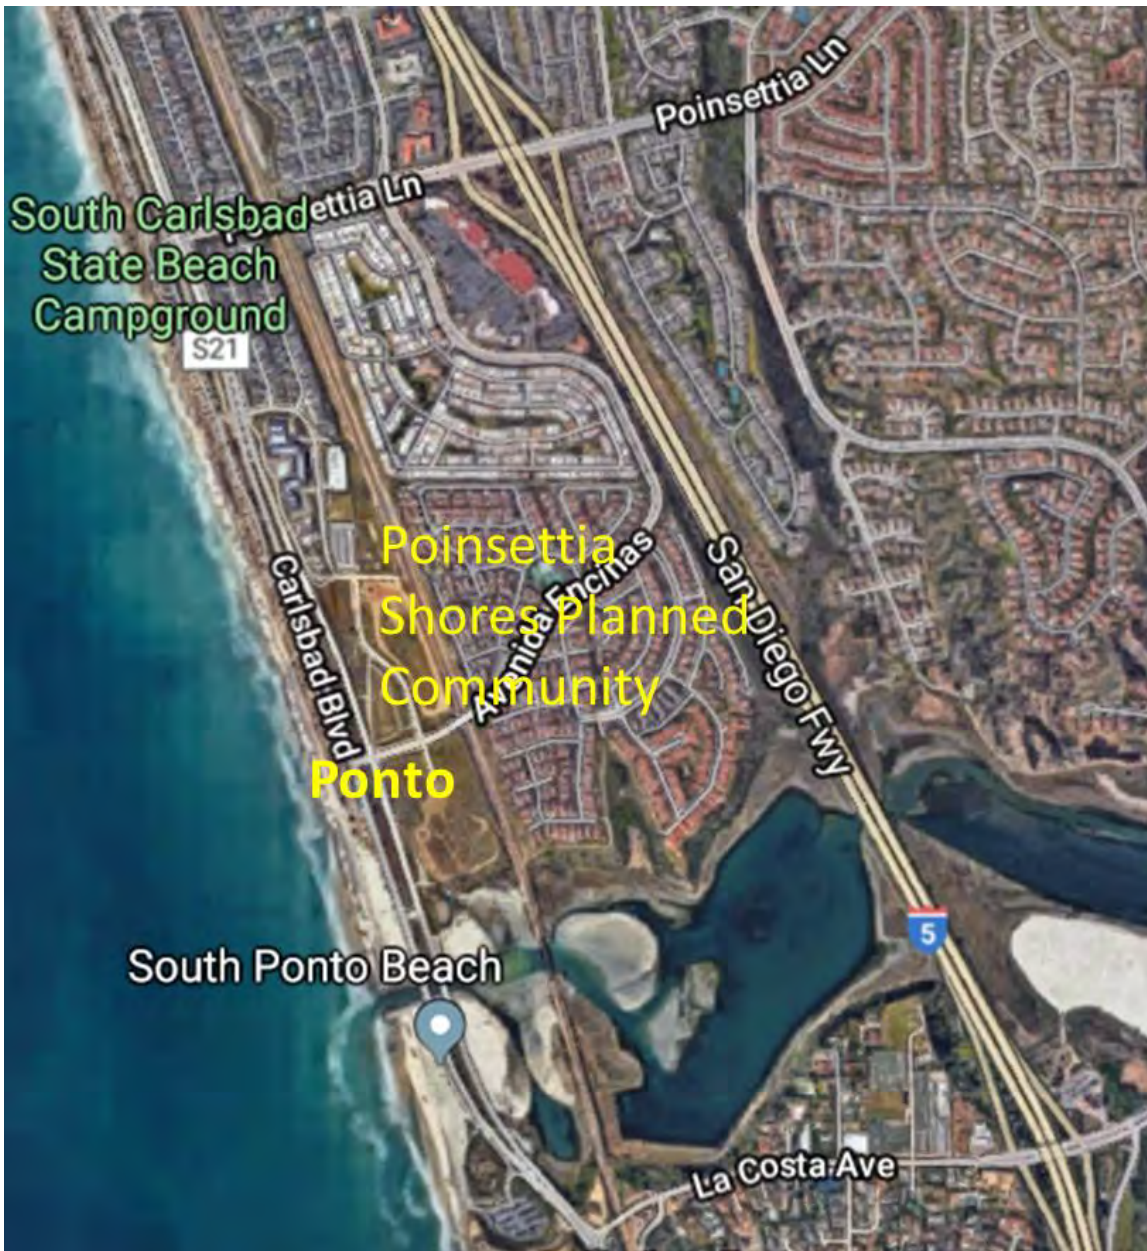

only result in degradation. How the Draft LCPA documents and addresses the land use planning of the last small portions of vacant developable Coastal land is critical for the future and future generations.

9. Citizens of South Carlsbad are concerned about the City's multiple prior flawed Ponto planning processes or 'mistakes' the City has made yet is basing the City Staff's proposed Draft LCP LUP. The concerns being the City is not openly and honestly communicating information to citizens and the public, and not allowing a reasonable and appropriate community-based planning process to address the documented Park, Coastal Recreation and unconstrained open space needs in South Carlsbad. One of these groups of citizens has created a [www.peopleforponto.com](http://www.peopleforponto.com) website to try to research and compile information and hopefully provide a better means for citizens to understand facts and then express their concerns/desires to the City of Carlsbad (City) and CA Coastal Commission (CCC). Over 2,000 emails have sent to the City and CCC regarding Coastal Land Use Planning Issues at Ponto. The San Pacifico Planned Community (i.e. San Pacifico Community Association) has also, since 2015, sent numerous emailed letters to the City and CCC noting the significant concerns about changes in Coastal planning the City is proposing for our Planned Community.

Repeatedly over 90% of surveyed citizens (results emailed prior to both the City and CCC) have expressed the vital need and desire for a Coastal Park at Ponto to serve the current and future Coastal Recreation needs for all both Ponto and South Carlsbad and for larger regional and State Coastal Recreational needs. This desire is supported by data, CA Coastal Act Policy, and also Carlsbad's Community Vision – the foundation for the City's General Plan. Ponto is the last remaining vacant Coastal area available to provide for those needs in South Carlsbad and for a regional 6-mile stretch of coastline. Citizens have expressed deep concern about the City's flawed prior Coastal planning efforts for Coastal Recreation at Ponto, including two repeated LCP Amendment "mistakes" (Ponto Beachfront Village Vision Plan in 2010 and General Plan Update in 2015) when the City twice failed to publicly disclose/discuss and then follow the Existing LCP requirements at Ponto – specifically for Planning Area F. People for Ponto had to use multiple Carlsbad Public Records Requests in 2017 to find these "mistakes". CCC Staff was helpful in both confirming the City "mistakes" and communicating back to the City. As citizens we are still unclear as to how/why these two repeated "mistakes" happened. There is citizen concern that the City is again repeating these two prior "mistakes" by not at the beginning of the Public Comment Period clearly and publicly disclosing the Planning Area F LCP requirements to citizens as part of the current LCP Amendment process, and also by not implementing the existing LCP requirement PRIOR to proposing an Amended Coastal Land Use Plan for Ponto. The City in its proposed LCP Amendment process is putting-the-cart-before-the-horse with respect to honest and open consideration, documentation and public discussion of the need for high-priority Coastal Recreation land use required of Planning Area F at Ponto. The City is also not clearly letting all Carlsbad citizens know about the Existing LCP requirements for Ponto's Planning Area F so they can be informed to reasonably participate in public review and comment regarding amending that LCP requirement, and the need for Coastal Recreation land uses in South Carlsbad. Since 2017 there has been repeated citizen requests to the City (copies were provided to the CCC) to fix these multiple fundamental/foundational flaws by in the City's prior Coastal Recreation and Public Parks and Open Space at planning, and the currently Proposed Draft LCP Land Use Plan Amendment. Since 2017 there have also been repeated citizen requests to the City to provide a truly open, honest, inclusive community-based planning process and workshops with the accurate and honest information, prior to forming a proposed Draft LCP Land Use Plan Amendment. As citizens we believe we can constructively work with the City and CCC towards a consensus or viable options on these important Coastal Recreation issues if the City allows and encourages such an open, honest and inclusive process. We request the City respond to the requests submitted to the City since 2017, and again request such a process from the City before any LCP Amendment is first considered by the Planning Commission and City Council. Such a requested process benefits all.

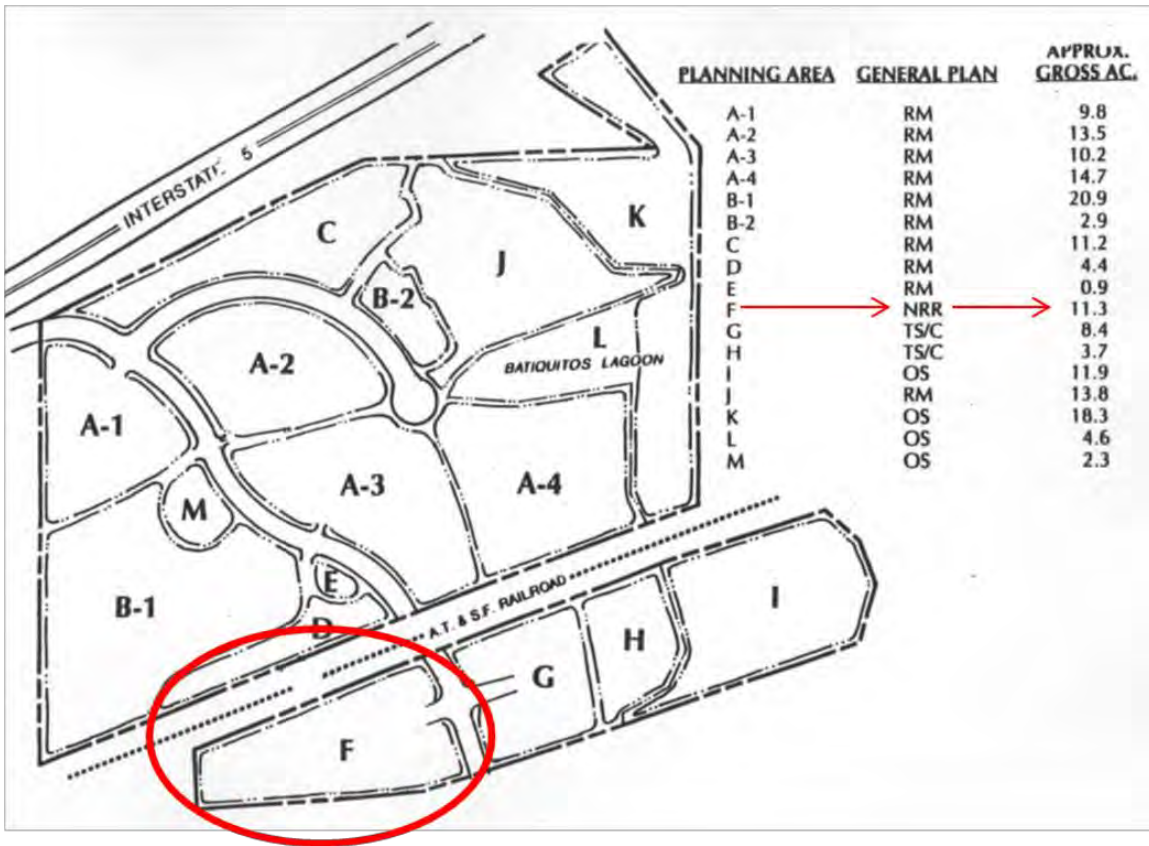

10. Why the Draft LCPA Land Use Plan for Ponto should provide for the current and future Coastal Park and Recreation needs for South Carlsbad, the San Diego Region and California.

- Ponto, is one of last remaining vacant and undeveloped Coastal lands in North County
- Ponto is the last remaining undeveloped Coastal land in South Carlsbad
- Ponto has the last unplanned Planning Area of the Existing Poinsettia Shores Planned Community & Local Coastal Program that can be planned for high-priority Coastal Recreation land use. This Existing LCP requires Planning Area F be considered for a “Public Park”.
- Following is a map of the Ponto area in South Carlsbad:

Following is the LCP Land Use map from the Existing Poinsettia Shores Master Plan & Local Coastal Program adopted in 1996. This is the Land Use map that the City is proposing to change in the proposed LCP Amendment to the Land Use Plan. As the Existing LCP Land Use map shows most all the land is ‘low-priority’ residential use at an RM Residential medium density, a small portion is ‘high-priority’ Visitor Serving TC/C Tourist Commercial. Most all the

Open Space is constrained and undevelopable land (the steep CSS habitat bluffs above Batiquitos Lagoon) or water (the lagoon water). This land/water is owned by the State of California, like the inner lagoon east of I-5. Only Planning Area M at 2.3 acres is unconstrained Open Space and it provides a small private internal recreation facility for the approximately 450 homes and 1,000 people in the Planned Community. This small recreation area is a City requirement for ‘planned developments’ to off-set loss open space from planned development impacts on housing quality. Planned developments can propose designs that reduce normal setback and open space areas – they bunch together buildings to increase development – such as the smaller lot sizes, and extensive use of “zero-setbacks” to reduce typical lot sizes that occurs at Poinsettia Shores. A private recreation facility in any of the City’s planned developments is never considered a replacement for required City Parks. Planned Developments, like unplanned developments, are required to dedicate Park land to the City, or pay a Park In-Lieu fee to the City so the City provide the developer’s obligation to provide City Park acreage to address the population increase of their proposed planned development. For Poinsettia Shores’ population the City’s minimum City Park Standard would require developers set aside 3 acres of City Park land for local park needs. For the larger Ponto area population about 6.6 acres of City Park Land is required. The Existing LCP reserves Planning Area F as an unplanned “Non-residential Reserve” Land Use until the Public Park needs for Ponto are considered and documented. Only then can the NRR land use be changed.

11. Developers have overbuilt in the Ponto area of the Coastal Zone. The City of Carlsbad has under questionable circumstances is currently choosing to ‘exempted’ Ponto developers from providing the minimum amount of unconstrained Open Space according to the City’s developer required Open Space Public Facilities Standard. The legality of these confusing circumstances is subject to a lawsuit against the City. However the City’s computerize mapping system has documented that the Ponto area of the Coastal Zone is missing about 30-acres of Unconstrained Open Space that can be used to fulfill the City’s Open Space Performance Standard that states that

15% of unconstrained and developable land must be preserved by developers as Open Space. Following is a summary of data from the City data regarding the missing Open Space at Ponto (Local Facility Management Plan Zone 9, LFMP Zone 9) in the Coastal Zone pursuant to the City's Open Space Performance Standard. If it is desirable People for Ponto can provide the City GIS map and parcel-by-parcel data base on which the following summary is based:

City of Carlsbad GIS data calculations of Open Space at Ponto area of Coastal Zone:

472 Acres = Total land in LFMP Zone 9 [Ponto area] per City of Carlsbad GIS data

(197 Acres) = Constrained land/water/infrastructure that is excluded from the City's Open Space Standard

275 Acres = Unconstrained land in LFMP Zone 9 (Ponto) subject to the City's Open Space Standard

X 15% = Minimum unconstrained Open Space requirement per the City Open Space Standard

41 Acres = Minimum unconstrained Open Space required in LFMP Zone 9

(11 Acres) = Actual unconstrained Open Space provided & mapped by City in LFMP Zone 9

**30 Acres = Missing unconstrained Open Space needed in LFMP Zone 9 [Ponto area of Coastal Zone] to meet the City's minimum GMP Open Space Standard. 73% of the required Open Space Standard is missing.**

Thus the Ponto area of the Coastal Zone appears overdeveloped with 30 additional acres of "low-priority" residential land uses due to developers' non-compliance to the City's Open Space Public Facility Performance Standard's Minimum developer required Open Space requirement. As noted a citizens group has a pending lawsuit with the City over the City's current 'exempting' Ponto and future developers from meeting the Open Space Standard.

12. The prior pre-1996 LCP for Ponto – the Batiquitos Lagoon Educational Park Master Plan & LCP (BLEP MP/LCP) had significant Open Space and recreational areas. These significant Open Space and Recreational areas were removed with BLEP MP/LCP's replacement in 1996 by the currently existing Poinsettia Shores Master & LCP (PSMP/LCP) and its City Zoning and LCP LUP requirements that reserved Planning Area F with the current "Non-residential Reserve" Land Use designation. Since the BLEP MP/LCP it appears developers and the City of Carlsbad have worked to remove "High-Priority" Coastal land uses (i.e. Coastal Recreation and Park uses) out of the Ponto area and replaced them with more "low-priority" residential and general commercial land uses. For example:

- Planning Area F used to be designated "Visitor Serving Commercial" as part of the original 1980's BLEP MP/LCP for Ponto.
- In 1996 the BLEP MP LCP was changed by developer application to the now current PSMP LCP, and the LCP LUP designation changed from "Visitor Serving Commercial" to "Non-Residential Reserve" with the requirement to study and document the need for "High-Priority" Coastal Recreation (i.e. Public Park) and/or Low-cost visitor accommodations prior to any change to Planning Area F's "Non-residential Reserve" LCP land use.
- In 2005 the City started to try to change Planning Area F to low-priority residential and general commercial land use in the City's Ponto Beachfront Village Vision Plan (PBVVP). At this time the City made its first documented Coastal 'planning mistake' by not disclosing to the public the existence of Planning Area F's LCP requirements and then also not following those LCP requirements. The City's planning process seemed focused on addressing developer's land use desires, and increasing land use intensity to boost "Tax-increment financing" as the City had established a Redevelopment Project Area at Ponto. A short time after the State of CA dissolved Redevelopment Agencies due in part to such abuses by cities. The CCC formally rejected the PBVVP in 2010, citing the City's failure to follow the LCP requirements for Planning Area F.

- Five years later in 2015 the City again adopted a proposed General Plan Update to again change Planning Area F to low-priority residential and general commercial land use. The General Plan Update cited the City's PBVVP that was in fact rejected by the CCC only a few years before. The City again repeated their PBVVP's Coastal land use 'planning mistake' by again not disclosing to the public the existence of Planning Area F's LCP requirements and then not following those LCP requirements. It is unclear why the City did this only 5-years after the CCC specifically rejected the Ponto Beachfront Village Vision Plan for those same reasons.
- In 2017 citizens found and then confirmed these Ponto Coastal 'planning mistakes' by the City through multiple official Carlsbad Public Records Requests and CCC Staff confirmation. The CCC readily identified the mistakes, but the City's 2019 proposed Draft LCP Land Use Plan and planning process still has yet fully disclose these prior Coastal 'planning mistakes' to ALL citizens of Carlsbad - the failure to disclose and follow the Planning Area F LCP LUP and City Zoning requirements. Full City disclosure is needed now to try to correct many years of City misrepresentation to citizens on LCP required Coastal land Use planning at Ponto. It is needed now so the public is aware at the start of the Public Comment Period. In 2017 citizens began asking the City fix the City's over 12-years of misinformation and planning mistakes by 'restarting' Coastal land use planning at Ponto with an open and honest community-based Coastal planning process. These citizens' requests have been rejected.
- In 2019 the City Staff proposed citywide Draft LCP land Use Plan Amendment that again proposed to change Planning Area F to "low-priority" residential and general commercial land use, without First disclosing the Planning Area F LCP requirements with corresponding analysis of the Need for Coastal Recreation (i.e. Public Park) and/or low-cost visitor accommodations at Planning Area F and providing that Documented analysis for public review/Consideration/comment. This seems like another 3<sup>rd</sup> repeat of the prior two Coastal planning mistakes by the City. In 2019, again citizens asked for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again the City rejected citizens' requests.
- In 2020 thousands of public requests again asked, and are currently asking, for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again these requests are being rejected. Based on the significant citizen concern and the documented prior 'planning mistakes' at Ponto it appears reasonable and responsible for Ponto's Planning Area F to either:
  - i. Retain its current Existing LCP LUP land Use of "Non-Residential Reserve" until such time as the City's past Ponto Beachfront Village Vision Plan and General Plan Update planning mistakes and other issues subject to current planning lawsuits against the City are resolved with a true, honest and open community-based Coastal planning process asked for by citizens since 2017. Or
  - ii. Propose in the Draft LCP Land Use Plan Amendment to re-designated Planning Area F back to a Visitor Serving Commercial and Open Space ("i.e. Public Park") to provide both "High-Priority" coastal uses v. low-priority residential/general commercial uses due to the documented Coastal Recreation and Low-cost visitor accommodation needs for both citizens and visitors at Ponto and South Carlsbad.

13. Questionable logic and inconsistency in proposed Draft land use map and policies: Chapter 2 Figure 2-2B & C on pages 2-19 & 20 proposes to Amend the existing LCP Land Use Plan Map, and policies LCP-2-P.19 and 20 on pages 2-27 to 2-29 propose Amendments to existing LCP policy and create a new added layer of policy referencing a Ponto/Southern Waterfront. The proposed Land Use Map and Policies serve to firmly plan for "low-priority" residential and general commercial land uses at Ponto with a clear regulatory Land Use Plan Map showing these land uses and by specific regulatory policy (LCP-2-20) that clearly requires (by using the words "shall") these "low

priority” uses. In contrast the “High-Priority” Coastal Recreation and Coastal Park land uses that would be designated as Open Space are not mapped at all in Figure 2-2B & C; and the proposed policy LCP-2-P.19 is both misleading and specifically does Not Require any “High-Priority” Coastal Recreation and Coastal Park land Use at Ponto and South Carlsbad. In fact page 2-22 specifically indicates two “may” criteria that would first need to occur in the positive before any potential Coastal Recreation and Coastal Park Land could then theoretically even be possible. It is highly probable that it is already known by the City that the proposed relocation of Carlsbad Boulevard (Coast Highway) is not very feasible and not cost effective, and will not yield (due to environmental habitat constraints, narrowness of the roadway median, and other design constraints) any significant dimensions of land that could potentially be designated Open Space and realistically be used as a Park.

The blank outline map (Figure 2-2B & C) provides no mapped Open Space Land Use designation, other than for the currently existing State Campgrounds’ low-cost visitor accommodations, so the proposed Land Use Plan Map is Not providing/mapping any new Open Space land use to address Coastal Recreation and Coastal Park needs. The Draft LCP Land Use Plan Amendment’s proposed/projected/planned Sea Level Rise and associated coastal erosion appears to indicate that this “High-Priority” low-cost visitor accommodation (Campground) land use designated as Open Space will be reduced in the ‘Buildout’ condition due to coastal erosion. So **the Draft LCP Land Use Plan is actually planning for a Reduction in Open Space Land Use in South Carlsbad and Ponto.** Both the blank outline map and the proposed Land Use Map Figure 2-1 DO NOT clearly map and designate both South Carlsbad’s Draft LCP Planned Loss of the Open Space Land Use and also any New or replacement unconstrained land as Open Space land use for Coastal Recreation and Coastal Park. This is an internal inconsistency in Land Use Mapping that should be corrected in two ways:

- 1) Showing on all the Land Use (Figure 2-1), Special Planning Area (Figure 2-2B & C), and other Draft LCP Maps the Draft LCP’s planned loss of land area in those maps due to the Draft LCP’s planned loss of land due to Sea Level Rise and Coastal Land Erosion. This is required to show how land use boundaries and Coastal Recourses are planned to change over time. or
- 2) Provide detailed Land Use Constraint Maps for the current Carlsbad Boulevard right-of-way that the City “may” or ‘may not’ choose (per the proposed “may” LCP-2-P.19 policy) use to explore to address the City’s (Park Master Plan) documented Coastal Recreation and Coastal Park land use shortages in Coastal South Carlsbad and Ponto. Clearly showing the potential residual Unconstrained Land within a Carlsbad Boulevard relocation that have any potential possibility to add new Open Space Land Use Designations (for Coastal Recreation) is needed now to judge if the policy is even rational, or is it just a Trojan horse.

The proposed internal inconsistency in mapping and policy appears like a plan/policy ‘shell game’. The proposed Land Use Plan Maps and Policies should be consistent and equality committed (mapped-shall v. unmapped-may) to a feasible and actual Plan. If not then there is No real Plan.

There is no Regulatory Policy requirement in LCP-2-P.19 to even require the City to work on the two “may” criteria. The City could choose to bury the entire Carlsbad Boulevard relocation concept and be totally consistent with Policy LCP-2-P.19 and the LCP. As such the language on 2-22, Figure 2-2C (and the proposed Land Use Map), and policy LCP-2-P.19 and 20 appear conspire to create a shell game or bait-and-switch game in that only “low-priority” residential and general commercial uses are guaranteed (by “shall” policy) winners, and “high-priority” Coastal Recreation and Coastal Park Land Uses are at best a non-committal ‘long-shot’ (“may” policy) that the city is specifically not providing a way to ever define, or commit to implement. The proposed Draft LCP Land Use Plan Coastal Recreation and Coastal Park statements for Ponto are just words on paper that are designed to have no force, no commitment, no defined outcome, and no defined requirement to even have an outcome regarding the

documented “High-Priority” Coastal Recreation and Coastal Park needs at Ponto, Coastal South Carlsbad and the regional 6-mile Coastal Park gap centered around Ponto.

Policy LCP-2-P.19 falsely says it “promotes development of recreational use” but does not in fact do that. How is development of ‘recreational use promoted’ when the Use is both unmapped and no regulatory policy requirement and commitment (no “shall” statement) to ‘promote’ that Use is provided? Policy LCP-2-19.19 appears a misleading sham that does not ‘promote’ or require in any way “High-Priority” Coastal Recreation and Park Land Use at Ponto. There should be open and honest public workshops before the Draft LCP Amendment goes to its first public hearing to clearly define the major environmental constraints and cost estimates involving possible relocation of Carlsbad Boulevard and constructing needed beach access parking, and sufficient and safe sidewalks and bike paths along Carlsbad Boulevard; and then map the amount and dimensions of potential ‘excess land’ that maybe available for possible designation as Open Space in the City General Plan and Local Coastal Program. The City should not repeat the mistakes at the Carlsbad Municipal Golf Course (resulting in the most expensive to construct maniple course in the USA) by not defining and vetting the concept first. A preliminary review of City GIS data appears the amount, dimensions and locations of any potential ‘excess’ land maybe modest at best. However before the City proposes a ‘Buildout’ Coastal Land Use Plan this critical information should be clearly provided and considered. It is likely the City’s Carlsbad Boulevard relocation concept is unfeasible, inefficient, too costly, and yields too little actual useable ‘excess land’ to ever approach the Coastal Recreation and Coastal Park needs for South Carlsbad. This may already be known by the City, but it surely should be publicly disclosed and discussed in the DLPCA.

The proposed Coastal Land Use Plan to address Carlsbad’s, San Diego County’s and California’s High-Priority Coastal Recreation Land Use and Coastal Park needs should NOT be vague “may” policy that appears to be purposely designed/worded to not commit to actually providing any “High-Priority” Coastal Recreation and Coastal Park land uses on the map or in policy commitments. The Land Use Plan and Policy for High-Priority Coastal Recreation and Coastal Park Land Use should be definitive with triggered “shall” policy statements requiring and assuring that the ‘Forever’ “High-Priority” Coastal Recreation and Coastal Park needs are properly and timely addressed in the City’s proposed ‘Buildout’ Coastal Land Use Plan. This “shall” policy commitment should be clearly and consistently mapped to show the basic feasibility of the planned outcomes and the resulting actual Land that could feasibly implement the planned outcome.

Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard: Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard are Coastal Access and Completes Streets issues. South Carlsbad Boulevard now and has for decades been a highly used Incomplete Street that is out of compliance with the City’s minimum Street Standards for pedestrian and bike access and safety. The Coastal Access portion of the Draft Land Use Plan should strongly address the Complete Street requirements for South Carlsbad Boulevard. Those policy commitments should be reference in Policy LCP-2-P.19 and 20 as Carlsbad Boulevard in **South Carlsbad is the most Complete Street deficient portion of Carlsbad Boulevard**. Forever Coastal Access parking demand and the proposed LCP Amendment’s Land Use Plan to supply parking for those demands should also be addressed as part of the Coastal Access and Complete Streets issues for South Carlsbad Boulevard. If much needed Coastal Access Parking is provided on South Carlsbad Boulevard as part of a “maybe” implemented realignment, most of the “maybe” realignment land left after constraints are accommodated for and buffered will likely be consumed with these parking spaces and parking drive aisles/buffer area needed to separate high-speed vehicular traffic from parking, a buffered bike path, and a sufficiently wide pedestrian sidewalk or Coastal Path. After accommodating these much needed Complete Street facilitates there will likely be little if any sufficiently

dimensioned land available for a Coastal Recreation and a Coastal Park. The needed Coastal Access and Complete Street facilities on South Carlsbad Boulevard are very much needed, but they are NOT a Coastal Park.

As mentioned the proposed Draft Coastal Land Use Plan's Maps and Policies are very specific in providing for the City's proposed LCP Land Use changes to 'low-priority' Residential and General Commercial' on Planning Area F (proposed to be renamed to Area 1 and 2). It is curious as to why the proposed Draft LCP Land Use Plan Amendment has no Land Use Map and minor vague unaccountable Land Use Policy concerning 'High-priority Coastal Recreation Land Use' at Ponto, while the very same time proposing very clear Land Use Mapping and detailed unambiguous "shall" land use policy requirements for 'low-priority' Residential and General Commercial land use at Ponto. Why is the City Not committing and requiring (in a Land Use Map and Land Use Policy) to much needed 'High-priority' Coastal Recreation and Coastal Park Land Use' needs at Ponto the same detail and commitment as the City is providing for "low-priority" uses? This is backwards and inappropriate. It is all the more inappropriate given the 'Buildout' Coastal Land Use Plan the City is proposing at Ponto. These issues and plan/policy commitments and non-commitments will be 'forever' and should be fully and publicly evaluated as previously requested, or the Existing LCP Land Use Plan of "Non-residential Reserve" for Planning Area F should remain unchanged and until the forever-buildout Coastal Recreation and Coastal Park issues can be clearly, honestly and properly considered and accountably planned for. This is vitally important and seems to speak to the very heart of the CA Coastal Act, its founding and enduring principles, and its policies to maximize Coastal Recreation. People for Ponto and we believe many others, when they are aware of the issues, think the City and CA Coastal Commission should be taking a long-term perspective and be more careful, thorough, thoughtful, inclusive, and in the considerations of the City's proposal/request to permanently convert the last vacant unplanned (Non-residential Reserve) Coastal land at Ponto to "low-priority" land uses and forever eliminate any Coastal Recreation and Coastal Park opportunities.

14. Public Coastal View protection: Avenida Encinas is the only inland public access road and pedestrian sidewalk to access the Coast at Ponto for one mile in each direction north and south. It is also hosts the regional Coastal Rail Trail in 3' wide bike lanes. There exist now phenomenal coastal ocean views for the public along Avenida Encinas from the rail corridor bridge to Carlsbad Boulevard. It is assumed these existing expansive public views to the ocean will be mostly eliminated with any building development seaward or the Rail corridor. This is understandable, but an accountable ('shall') Land Use Plan/Policy addition to proposed Policy LCP-2-P.20 should be provided for a reasonable Public Coastal View corridor along both sides of Avenida Encinas and at the intersection with Carlsbad Boulevard. Public Coastal view analysis, building height-setback standards along Avenida Encinas, and building placement and site design and landscaping criteria in policy LCP-2-P.20 could also considered to reasonably provide for some residual public coastal view preservation.
  
15. Illogical landscape setback reductions proposed along Carlsbad Boulevard, and Undefined landscape setback along the Lagoon Bluff Top and rail corridor in Policy LCP-2-P.20: Logically setbacks are used in planning to provide a buffering separation of incompatible land uses/activities/habitats. The intent of the setback separation being to protect adjacent uses/activities/habitats from incompatibility, nuisance or harassment by providing a sufficient distance/area (i.e. setback) between uses/activities/habitats and for required urban design aesthetics – almost always a buffering landscaping. Policy LCP-2-P.20. A.4 and C.3 says the required 40' landscape setback along Carlsbad Boulevard "maybe reduced due to site constraints or protection of environmental resources." The ability to reduce the setback is illogical in that setbacks are intended to protect environmental resources and provide a buffer for constraints. In the Carlsbad Boulevard right-of-way there is documented sensitive environmental habitat, along with being a busy roadway. How could reducing the protective 40' setback in anyway better protect that habitat or provide a better landscaped compatibility or visual aesthesis buffer along Carlsbad Boulevard? It is

illogical. If anything the minimum 40' landscaped setback should likely be expanded near "environmental resources". Regarding reducing the minimum 40' landscape setback for "site constraints" there is no definition of what a "site constraint" is or why it (whatever it may be) justifies a reduction of the minimum landscaped setback. Is endangered species habitat, or a hazardous geologic feature, or a slope, or on-site infrastructure considered a "site constraint"? There should be some explanation of what a "site constraint" is and is not, and once defined if it warrants a landscape setback reduction to enhance the buffering purpose of a landscape setback. Or will a reduction only allow bringing the defined constraint closer to the adjacent uses/activities/habitats that the landscape setback is designed to buffer. It is good planning practice to not only be clear in the use of terms; but also, if a proposed reduction in a minimum standard is allowed, to define reasonably clear criteria for that reduction/modification and provide appropriate defined mitigation to assume the intended performance objectives of the minimum landscape setback are achieved.

Policy LCP-2-P.20.C.4 is missing a critical Bluff-Top landscape setback. It seems impossible that the DLCPA is proposing no Bluff-Top setback from the lagoon bluffs and sensitive habitat. The Batiqitos Lagoon's adjoining steep sensitive habitat slopes directly connect along the Bluff-top. Batiqitos Lagoon's and adjoining steep sensitive habitat is a sensitive habitat that requires significant setbacks as a buffer from development impacts. Setbacks similar to those required for the San Pacifico area inland of the rail corridor, should be provided unless updated information about habitat sensitivity or community aesthetics requires different setback requirements.

Policy LCP-2-P.20 does not include a landscape setback standard adjacent to the rail corridor. This is a significant national transportation corridor, part of the 2<sup>nd</sup> busiest rail corridor in the USA. Train travel along this corridor is planned to increase greatly in the years to come. Now there is significant noise, Diesel engine pollution, and extensive ground vibration due to train travel along the rail corridor. Long freight trains which currently run mostly at night and weekends are particularly noisy and heavy, and create significant ground vibration (underground noise). These issues are best mitigated by landscape setbacks and other buffers/barriers. A minimum setback standard for sufficient landscaping for a visual buffer and also factoring appropriate noise and ground vibration standards for a buildout situation should be used to establish an appropriate landscape setback that should be provided along the rail corridor. Carlsbad's landscape aesthetics along the rail corridor should be factored into how wide the setback should be and how landscaping should be provided. An example for the landscape aesthetic portion of the setback standard could be landscape design dimensions of the San Pacifico community on the inland side of the rail corridor. However, noise and vibrational impacts at San Pacifico are felt much further inland and appear to justify increased setbacks for those impacts.

## **Carlsbad is 10% below the national average for cities & the worst of 24 Coastal So California cities - 165 miles of coastline - in providing Parks within a 10-minute walk to residents**

The Trust for Public Land documents a city's 10-minute walk to Park at <https://www.tpl.org/parkserve>  
The Average USA City provides Parks within 10-minute walk to 55% of residents [10% above Carlsbad].  
**Carlsbad provides Parks within 10-minute walk to 49.9% of residents [10% below National Average].**  
New York City provides Parks within 10-minute walk to 99% of residents.

## **The Trust of Public Land submitted a letter to the City of Carlsbad, CA Coastal Commission, and CA State Park supporting Ponto Park**

### **Carlsbad is the worst of 24 Southern CA Coastal cities (from Malibu south to Imperial Beach along 165 miles of coastline) in providing Parks within 10-minute walk to residents:**

1. Palos Verdes Estates provides Parks within 10-minute walk to 100% of residents
2. El Segundo provides Parks within 10-minute walk to 100% of residents
3. Hermosa Beach provides Parks within 10-minute walk to 100% of residents
4. Redondo Beach provides Parks within 10-minute walk to 98% of residents
5. Manhattan Beach provides Parks within 10-minute walk to 95% of residents
6. Del Mar provides Parks within 10-minute walk to 93% of residents
7. Dana Point provides Parks within 10-minute walk to 89% of residents
8. Huntington Beach provides Parks within 10-minute walk to 85% of residents
9. Long Beach provides Parks within 10-minute walk to 84% of residents
10. Laguna Beach provides Parks within 10-minute walk to 82% of residents
11. Santa Monica provides Parks within 10-minute walk to 82% of residents
12. San Diego provides Parks within 10-minute walk to 81% of residents
13. Coronado provides Parks within 10-minute walk to 76% of residents
14. Newport Beach provides Parks within 10-minute walk to 76% of residents
15. Imperial Beach provides Parks within 10-minute walk to 74% of residents
16. Encinitas provides Parks within 10-minute walk to 68% of residents
17. Los Angeles provides Parks within 10-minute walk to 63% of residents
18. Solana Beach provides Parks within 10-minute walk to 63% of residents
19. Oceanside provides Parks within 10-minute walk to 58% of residents
20. Seal Beach provides Parks within 10-minute walk to 57% of residents
21. Malibu provides Parks within 10-minute walk to 53% of residents
22. San Clemente provides Parks within 10-minute walk to 52% of residents
23. Rancho Palos Verdes provides Parks within 10-minute walk to 50% of residents
24. **Carlsbad provides Parks within 10-minute walk to 49.9% of residents.**

**Carlsbad is the lowest & most unfair to citizens of the 24 Southern California Coastal cities along 165 miles of coast from Malibu to Imperial Beach.**

Following are 6 key major Growth Management Standards issues of citywide relevance that the Carlsbad Tomorrow Growth Management Committee (CTGMC) needs to act on, and citizen “Suggestions to CTGMC” on how to honestly and responsibly act on these 6 key issues in the CTGMC’s recommendations to the New City Council. This Update includes new information (pp 5-6) on the improved affordability of Ponto Park, and on how GM Open Space shortfall can be repaired. We hope the CTGMC will act honestly to make recommendations that truly and responsibly address known documented shortfalls in both Parks and GM Open Space. Responsible recommendations by the CTGMC can provide a sustainable Quality of Life to future Carlsbad generations and visitors. Only you own your recommendations.

1. The State of CA is forcing Carlsbad and all cities/counties in CA to provide for unlimited or Infinite Population and Visitor growth. So there will be an Infinite population & visitor demands for Parks, Open Space, water, and demands on our roads/transportation systems, and other Growth Management (GM) Quality of Life facilities. These infinite increases in population and visitor demand will come from high density development that requires more public Parks and Open Space to balance the high-densities. **Carlsbad’s new GM Standards will have to provide for a system of Infinite proportional increases in the supply of Parklands, Open Spaces, water, transportation facility capacity, etc. or our Quality of Life will diminish.**
  - a. Suggestions to CTGMC:
    - i. Completely restructure the General Plan, Local Coastal Program and GM Program to clearly recognize these facts and State requirements to proportionately provide public facilities to maintain/improve Carlsbad GM Quality of Life Standards for this Infinite growth of Population and Visitor demands.
    - ii. **Being a Coastal city Carlsbad has an added responsibility to proportionately maintain/improve providing High-Priority Coastal land uses (Coastal Recreation {i.e. Public Parks} and Low-cost Visitor Accommodations) needed at a regional and statewide level to address visitor needs for Coastal Recreation, access, and affordable accommodations.** Carlsbad needs to work with the State of CA Coastal Commission to completely restructure Carlsbad’s Coastal Land Use Plan to addresses the State’s requirement to provide an Infinite amount high-priority Coastal land uses for those Infinite Population and Visitor demands.
    - iii. **Trying to ignore these Infinite demands for Carlsbad’s Quality of Life facilities – like Parks and Open Spaces is a path to disaster and the ultimate degradation of Carlsbad’s Quality of Life.**
2. **Carlsbad has a huge Jobs v. Housing supply imbalance – far too many jobs around the airport for our amount of housing. This creates negative and costly land use and transportation planning distortions that radiate from the Airport Central Jobs through Carlsbad in all directions.** CA Housing law penalizes unbalanced cities like Carlsbad by requiring more housing in Carlsbad to bring jobs/housing ratio into balance. Carlsbad can correct this imbalance by 1 of 2 ways: 1) greatly increase housing supply (and thus increase the need and City expense for more GM Quality of Life facilities), or 2) more logically and cost effectively greatly decrease the amount of Jobs land use, so Carlsbad’s housing supply is in balance with jobs. These jobs will move to surrounding Cities that have more housing than jobs. **Rebalancing by reducing jobs land use creates added benefits for Carlsbad and our region by reducing Carlsbad’s peak-hour job commute traffic volumes and**

vehicle miles traveled (VMT), and by reducing the costs Carlsbad (and other cities and the region) have to pay to accommodate inter-city commute traffic. If Carlsbad reduces jobs land use will also reduce the amount of housing the State of California and SANDAG requires Carlsbad provide in its Housing Element thus reducing forcing incompatible high-density development into established neighborhoods and pressure to convert useable GM Open Space lands to housing land use.

a. Suggestions to CTGMC:

- i. **Carlsbad can logically and cost effectively balance Jobs/housing supply by updating Growth Management Policy to reduce jobs to be in balance with housing by changing some of Carlsbad's General Plan land use around the airport into several high-density residential mixed-use Villages.** The City has started some of this, but can expand this effort but has not planned creating mixed-use village environments. These high-density villages will reduce jobs and provide both high-quality and high-density (affordable) housing within walking/biking distance to the major job center and new neighborhood commercial and Park uses in the Villages.
- ii. Prioritize transportation investments in safe bike paths, walking paths between Carlsbad's Central Jobs Core around the airport and Carlsbad's housing, particularly strongly connecting these new high-density mixed-use villages with the Central Jobs Core.
- iii. Update General Plan land use and housing policy to reduce concentrations of higher-density housing except around the airport jobs core.
- iv. Recognize the central Airport jobs core is 'Carlsbad's New Urban Downtown and "Transect Plan" accordingly toward lower densities on the City periphery.

3. Although some very critical areas (such as the Coastal lands at Ponto) are still vacant and can be wisely used for critical GM Quality of Life needs, much of Carlsbad is largely developed.

**Redevelopment of developed land will require creating increased supplies of Parkland, Open Spaces, transportation capacity, and other Quality of Life facilities.**

a. Suggestions to CTGMC:

- i. **Completely rethink all City planning on existing vacant lands to assure that remaining vacant land is planned and being used wisely and fairly distributed to address critical Quality of Life needs in those areas, and not squandered on redundant land use.** The location of vacant land to address critical Park & Open Space needs should be preserved with land use planning.
- ii. Work with the State and CA Coastal Commission to preserve our Finite vacant Coastal lands for High-Priority Coastal Land Uses (Coastal Recreation {i.e. Public Parks} and Low-cost Visitor Accommodations and services) for the Infinite population and visitor demands both internal and external to Carlsbad that are/will be placed on them.
- iii. Fully and at the very beginning of any Carlsbad General Plan, Local Coastal Program and Growth Management Program actions going forward fully disclose, map and require consideration of the impact of future sea level rise and coastal erosion on Coastal land acres and land uses. Carlsbad has lost and will accelerate losing acres of Coastal land and High-priority Coastal Land Uses. Carlsbad must know, see, and discuss these losses BEFORE making any land use decisions in Carlsbad's Coastal Zone and any vacant Coastal Land.

4. **Carlsbad General Plan & Growth Management Plan do not provide a fair distribution of adequately sized City Parks for all Carlsbad families.** Veterans Park is a classic example. What will

be the City's largest park is only about 1-mile away from three other major City Parks (Zone 5, and the future Robinson Ranch and Hub Parks). This is a poor and unfair distribution and a misallocation City Park land resources. Saying Veterans Park is 'the park to serve SW, SE, and NE Carlsbad families' (the overwhelming major/majority funders of veterans Park) when those families are upwards of 6-miles away on major commercial arterials that kids can't logically/safely use is false and unfair. Most all the funding (developer fees) to build Veterans Park come from the SW, SE and NW Carlsbad but those areas are denied the Park the paid for. Veterans Park is inaccessible by almost all its intended users except by driving their cars and then storing their cars in parking lots on Parkland thus making less park land available for actual park use – this makes little common sense and is a great waste of tax-payer funds. This is dysfunctional along with being very unfair to families in SW, SE and NE Quadrats that are denied park acres near their homes which they funded. **Carlsbad's Park Master Plan maps 'Park Service' areas of existing known Park Inequity or Unfairness (dysfunction), to show where new City Park investments should be made (See City map image with notes below).**

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

The Trust for Public Land provides a Park-Score to compare both a City's amount of park acres and the 'fairness' of access (within a 10-minute walk) to parks. **Carlsbad is below national averages in both park acres and fair access to parks. Carlsbad is also well below what our adjacent Coastal cities of Encinitas and Oceanside provide. Carlsbad only requires 3 acres of Park land per 1,000 population, while Encinitas and Oceans require 5 acres - 67% more than Carlsbad – of parkland. Also, Encinitas and Oceanside require parks to be within a 10-minute walk to their citizens and families. Carlsbad has no such requirement.**

a. Suggestions to CTGMC:

Carlsbad should change its General Plan, Parks and Growth Management Standards and CMC 20.44 to:

- i. **Be Above Average Nationally in both providing park acreage and in locating adequate park acreage to be within a 10-minute walk to all neighborhoods.**
  - ii. **Raise its minimum park acreage standard to 5 acres per 1,000 population, versus the current low 3 acres per 1,000. Carlsbad should be at least as good as Encinitas and Oceanside in requiring 5 acres, not 40% below what our adjacent Cities require/provide.**
  - iii. **Raise its park location standard to require an adequately sized park be provided to serve the neighborhood population within a 10-minute walk for all neighborhoods.**
  - iv. **Prioritize City Policy and Park Budgets and investments to achieve park fairness in 'Park Unserved areas' identified by Carlsbad's Park Master Plan.**
  - v. **Per Carlsbad's Municipal Code Chapter 20.44- DEDICATION OF LAND FOR RECREATIONAL FACILITIES to require developers in 'Park Unserved areas' and in areas that do not have an adequately sized (5 acres per 1,000 population) park within a 10-minute walk to provide their developments required Park land acre dedication in actual Park land within a 10-minute walk to their development.**
  - vi. **Update the City's Park-in-lieu fee to assure the fee is adequate to actually buy the amount of park land a developer is to provide within a 10-minute walk of their development. The City's current 'Park-in-lieu-fee' is far too low and inadequate to actually buy land in area surrounding the proposed development.**
  - vii. **Only allow developers to pay a Park-in-lieu-fee where there is an adequately sized park (provide 5 acres per 1,000 population) within a 10-minute walk of their development, and growth management planned future development in that area will not require more park land to provide 5 acres per 1,000 population) within a 10-minute walk.**
  - viii. Consider updating Park policy to provide more multi-use flexibility in park land acres and development on Parks. Many Carlsbad Park acres are developed/dedicated to a single-purpose use, and unavailable for other park uses.
  - ix. Consider eliminating car parking lots from land that can be counted as parkland; or by significantly limiting park land used for parking to around 5%.
  - x. **Eliminate the counting of 'GM Constrained and Unusable land' and Protected Endangered Species Habitat land as Park land. GM Constrained/Unusable lands are undevelopable. Protected Habitat lands are by definition not useable for development by people. Habitat is dedicated for plants and animals. Parks are open spaces dedicated intended for people. Parkland calculations should exclude Unusable lands and Protected Habitat lands and only count 100% people Useable land as Park land. Where Park land abuts Habitat land a sufficient buffer space shall be provided to prevent people mixing with animals (ex. Rattlesnakes, etc.) and animals from people (habitat disturbance or destruction). This buffer area should not be counted as Park or Habitat acres, but as natural/developed buffer open space acres, and can be counted as part of the City's 15% Growth Management 'Aesthetic open Space'.**
5. Carlsbad's Coast is the most, if not the most, important feature of Carlsbad; and is consistently identified by citizens and businesses and our Community Vision. **Carlsbad's Coastal Parks (west of the I-5 corridor) are grossly unfairly distributed. Carlsbad's Coastal Parks do not fairly match the**

**locational needs of the population. North Carlsbad that is 38% of Carlsbad's population and has 10 Coastal Parks totaling 37+ acres in size. South Carlsbad that is 62% of Carlsbad's population has 0 [ZERO] Coastal Parks totaling 0 [ZERO] acres.** Again, Carlsbad's Park Master Plan maps this citywide unfairness (dots show park locations and circles show the area served by each park) and says that the City should look at buying and building New Parks in these areas that are unserved by City Parks (are not covered by a circle). The GM Update should correct this citywide unfair distribution of City Parks by making plans for new Park purchases to create City Parks in these unserved areas of Park Inequity.

To address citywide Coastal Park unfairness the current City Council wants to spend \$60-85 million in Carlsbad tax-payer funds to Relocate 2.3 miles of constrained Pacific Coast Highway median to try to make some of the narrow PCH median 'useable' by people. 2001 and 2013 City PCH Relocation studies identified only a small amount of 'people-useable acres' would be created next to PCH. The \$60-85 million tax-payer cost (\$26-37 million per mile) does NOT add one single square foot of new City land, it only inefficiently rearranges a small amount PCH median. The City can most tax-payer cost effectively provide needed sidewalks and bike improvements along the outside edges of PCH without PCH Relocation. The City's 2001 PCH Relocation Financial Study and 2013 PCH Relocation Design both indicated minimal useable land could be achieved by Relocation, and that the very high tax-payer cost to do so would be very difficult to fund. The City has known for well over 20-years that PCH Relocation is a high-cost and a poor solution to address the Citywide Coastal Park unfairness in South Carlsbad.

However, a **better and far less costly solution to correct Citywide Coastal Park unfairness and provide a much needed South Carlsbad Coastal Park is to simply buy currently vacant land that is for sale.** The City did this (although the City actually bought existing homes) when it expanded Pine Park. **Carlsbad tax-payers have used the City's own data to compare the tax-payer Cost/Benefits of simply purchasing vacant land v. trying to rearrange existing City owned land at PCH. Simply buying vacant land saves tax-payers saves tax-payers over \$32.7 to \$7.7 million.** Please read the following data files:

- 2022-June General Comparative tax-payer Costs/Benefits of Completing PCH, 2.3 miles of PCH Modification (Island Way to La Costa Ave.), and 14.3 acre Ponto Park (Kam Sang) to address planned loss of 30+ acres of Coastal Open Space Land Use at Ponto in South Carlsbad: Part 1 of 2.
- City's PCH Modification Proposal Area Map with notes on usability Constraints and Issues: P4P Input: Part 2 of 2
- The most recent (9/19/22) land sale of 11.1 acre Ponto Planning Area F was less than \$8 million (less than \$706,000 per acre).
- **Buying and developing this 11.1 acre Ponto Park would cost less than \$20 million assuming a 10% profit to the new land-owner, and \$1 million per acre park construction cost like our newest Buena Vista Reservoir Park.** The cost to help correct a Citywide Coastal Park unfairness by simply buying & building a much needed **11.1 acre Ponto Coastal Park would cost tax-payers less than the recently approved Measure J City Monroe Street Pool Renovation.** Investing less than \$20 million (\$1.8 million per acre) to buy and build an 11.1 acre Ponto Coastal Park is a great tax-payer value v. \$65-80 million in tax-payer funds to rearrange 15.8 acres of narrow strips of constrained PCH median (City documented "Surplus Land Area #4 &5") for some minimal people use at a tax-payer cost of \$4-5 million per acre. **The overall and per acre costs of buying/building Ponto Park are over 2 to 3 times better value for tax-payers than PCH Relocation/rearrangement.**

- The City Council could/can buy land for Open Space (Parks are the most useable of the City's 4 Open Space categories) under voter approved Prop C Open Space land acquisition authority. **The City has been advised to buy Ponto Park under Prop C per the City's settlement of a Growth Management law suit.**

**The Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad is clearly a citywide issue. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad as it is unfair to the vast majority of Carlsbad citizens and their families as 62% of Carlsbad is in South Carlsbad. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad is unfair to our major Visitor serving industries (and tax generators) in South Carlsbad. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad are clearly inconsistent with the CA Coastal Act, Carlsbad's Community Vision, and common sense.** The Coastal South Carlsbad Park Inequity is also unfair to North Carlsbad because South Carlsbad's Coastal Park demand is being forced into Coastal North Carlsbad and congesting those parks, and adding to Coastal North Carlsbad traffic and parking impacts. It also increases greenhouse gases and VMT as it forces longer vehicle trips.

a. Suggestions to CTGMC:

- i. 11.1 acre Ponto Planning Area F has a specific Local Coastal Program Land Use Policy that says The City of Carlsbad must for the Ponto Area LCP 'Consider and Document the need for Coastal Recreation (i.e. Public Park) and or Low-Cost Visitor Accommodations west of the railroad tracks (at Ponto) prior to any Land Use change. **The discussion of Parks by the CTGMC is such a situation that requires the CTGMC to consider this adopted LCP Land Use Policies. Official public records requests have shown the City never followed this LCP Land Use Policy Requirement during the 2005 Ponto Vision Plan and 2015 General Plan Update, and in 2010 the CA Coastal Commission rejected the Ponto Vision Plan and told the City in 2017 that that land uses at Ponto could change based on the need for Coastal Recreation and/or Low Cost Visitor Accommodations.** The Mello II LCP that covers most of Carlsbad's Coastal Zone also has Land Use Policy 6.2 for the City to consider a major park in the Batiquitos (Ponto/South Carlsbad) area. The City has only implemented 1/6 to 1/3 of this policy. **The CTGMC should fully evaluate the citywide/South Carlsbad and local Ponto need for Coastal Parks as required by the City's adopted LCPs and CA Coastal Act.**
- ii. Carlsbad's 2015 General Plan Update and Growth Management Plan (GMP) did not, and was not updated to, consider the 2017 Sea Level Rise (SLR) Impact report showing the loss/impact on 32+ acres of Carlsbad's Coastal Land Use acreage in South Carlsbad – primarily Open Space Land Use (beach and Campground). **Both the General Plan (and Local Coastal Program Land Use Plan) and GMP should be updated to account for the loss and replacement of these 32+ acres of high-priority Coastal Open Space Land Use due to SLR.** The updates and the CTGMC should use the newest CA Coastal Commission SLR Guidelines/science, not the old guidelines used in 2017. Carlsbad's LCP and CA Coastal Act Land Use Polies call for 'upland relocation' to replace the SLR loss of high-priority Coastal Land Uses.
- iii. **The availability over the past several years of the last two sufficiently sized vacant lands suitable for a Ponto/South Carlsbad Coastal Park is a citywide issue. If these last two vacant lands are lost to development forever future generations will have lost the last opportunity for the needed South Carlsbad Coastal Park.** The 5/3/22 Citizen requests for the City to jointly study acquisition of one or both these last vacant lands for a needed (and only possible) true and meaningful Coastal Park for

South Carlsbad should be recommended by the CTGMC. **The CTGMC should recommend Carlsbad’s GMP be updated to incorporate Parkland acquisition of these last opportunities to provide the needed Coastal Park for South Carlsbad.**

6. Carlsbad Growth Management Open Space Standard is that 15% of all the Useable (unconstrained and fully buildable) areas is to be preserved as Useable Open Space, and that all the 25 Local Facility Management Plans (LFMP) show how that 15% is provided. The City says:

---

---

**OPEN SPACE**

---

---

**A. Performance Standard**

Fifteen percent of the total land area in the Local Facility Management Zone (LFMZ) exclusive of environmentally constrained non-developable land must be set aside for permanent open space and must be available concurrent with development.

Yet the City has mapped and documented that this 15% Useable Open Space Performance Standard was not complied with. The City also acknowledges that without changes to current City planning the 15% Useable Open Space Performance Standard will never be complied with. The City acknowledges that only 13% has/will under current plans ever be provided. This missing 2% equals 501 acers of lost GM Open Space the GMP promised citizens. **Carlsbad law the Growth Management Ordinance 21.90, and section ‘21.90.130 Implementation of facilities and improvements requirements’; provide guidance on how non-compliance with a Performance Standards is to be handled.**

a. Suggestions to CTGMC:

- i. Retain the GM Open Space Standard of 15% of all unconstrained and developable land is maintained as Open Space. If the City removes the Open Space Standard, it will allow and encourage land use changes to remove GM Open Space and replace with development.
- ii. **The CTGMC should make a recommendation that an inventory of all 25 LFMP Zones be conducted and an inventory of each LFMP Zones provision of at least 15% Useable Open Space shall be compiled. No LFMP Zone shall be allowed to be “exempt” from this inventory.** The City’s computerized GIS mapping system makes it easy and clear as shown in the following City GIS map for LFMP Zone 9 (aka Ponto).

**City GIS map of Ponto's (LFMP Zone 9) Open Space:**

- Light green areas meet the City's 15% unconstrained Growth Management Program Open Space Standard
- Most Ponto Open Space (pink hatch & blue [water] on map) is "Constrained" and does not meet the Standard
- **Aviara - Zone 19, Ponto - Zone 9 and Hanover/Poinsettia Shores – Zone 22 all developed around the same time and had similar vacant lands.**
- **City required Aviara - Zone 19 east of Ponto to provide the 15% Standard Open Space. Why not Ponto? Aviara includes the same lagoon.**
- **City required Hanover & Poinsettia Shores area Zone 22 just north of Ponto to provide the 15% Standard Open Space. Why not Ponto?**
- Why Ponto developers were not required to comply with the 15% Useable Open Space Standard is subject to current litigation
- Below is City GIS data from this map

**City GIS map data summary of the Growth Management Standard of 15% Useable Open Space at Ponto**

472 Acres	Total land in LFMP Zone 9 [Ponto]
<u>(197 Acres)</u>	Constrained land excluded from Growth Management (GMP) Open Space
275 Acres	Unconstrained land in LFMP Zone 9 [Ponto]
X 15%	GMP Minimum Unconstrained Open Space requirement
41 Acres	GMP Minimum Unconstrained Open Space required
<u>(11 Acres)</u>	GMP Open Space provided & mapped per City GIS data
<b>30 Acres</b>	<b>Missing Unconstrained Open Space needed in LFMP Zone 9 [Ponto] to meet the City's minimum GMP Open Space Standard per City's GIS map &amp; data</b>

**73% of the City's minimum 15% required Open Space Standard is missing due to over development of LFMP Zone 9 [Ponto]**

- iii. In instances like LFMP Zone 9 (above image) that clearly did not provide at least 15% Useable Open Space and/or were falsely “exempted” the CTGMC should recommend that a **Local Facilities Zone Useable Open Space Correction Plan** shall be developed that explores the GM Open Space use/reuse of City land, land use planning requirements, and/or possible acquisitions of remaining vacant land acres to make up for any shortfall in meeting the 15% Useable Open Space in that a Zone. An example of this in LFMP Zone 9 is that the City’s regional Rail Trail will convert 2-lanes of almost all of Avenida Encinas to wider buffered bike lanes and an adequate portion of the converted 2 vehicle lanes can be landscaped (v. just painting strips as a buffer) to provide a safer/better bike lane buffer within a GM compliant Open Space. 2 vehicle lanes in Windrose Circle could also be similarly landscaped and converted to GM complaint Open Space. This is just one example of a cost-effective means to add GM Open Space that developers were falsely allowed to remove.
- iv. A **Local Facilities Zone Useable Open Space Correction Plan** should involve a Citizens Advisory Committee composed of citizens within the impacted Zone and appointed by the Council Members representing the Zone, and a representative of each vacant land owner over of over 1-acre in size.
- v. Consistent with the Growth Management Ordinance land use changes and development applications within a **Local Facilities Zone Useable Open Space Correction Plan** Zone shall be deferred until the applications can considered with (or after adoption of) a **Local Facilities Zone Useable Open Space Correction Plan**.

## **History of the false exemption of the Growth Management Open Space Standard provided Ponto developers in Local Facility Management Plan Zone 9 (LFMP-9):**

---

The history of how required Growth Management Open Space (i.e. unconstrained/developable land) that should have been dedicated Open Space was, and is now being proposed to be, inappropriately converted to Residential land use by a Perpetuating a False Exemption of the Open Space Standard provided Ponto Developers. This False Exemption needs correction and restitution. Ponto's False Exemption of the Open Space Standard and the 'amendment shell-game' GM Open Space history is a critical warning sign to the **Carlsbad Tomorrow** Growth Management Committee, Planning Commission and City Council. Ponto is a critical warning that a strong, accountable and accurate Open Space Standard needs to be established for **Carlsbad Tomorrow**, AND a Growth Management Open Space restitution plan needs to be established and funded that corrects the False Exemption for Ponto Developers. If Ponto Developers were required like other similar developers at the time (Aviara and Poinsettia Shores, "urbanizing La Costa Zones 11 & 12, etc.) to provide the required Growth Management Open Space some of the critical Coastal Recreation and Coastal Park issues and extensive Carlsbad Citizen needs/demands/desires at Ponto could likely have already been addressed.

### How citizens found out about the False Exemption provided Ponto Developers:

In 2017 for the 1<sup>st</sup> time the city provided the GIS maps/data base accounting of Open Space in the City. The City did this a part of settlement to a North County Advocates citizens' lawsuit. The City Open Space maps/data base allowed Carlsbad Citizens for the 1<sup>st</sup> time the ability to see and confirm what Open Space was produced by Growth Management (GM). The City's Open Space map/data based for Ponto (LFMP-9) documented that about 30-acres of GM Open Space was missing (see; Carlsbad Official Public Records Request - PRR 2017-164). As required by GM, and as Staff has said, to count as GM Open Space it must be dedicated and 'unconstrained/developable land' to meet the GM Open Space Standard. Being able to see for the 1<sup>st</sup> time the missing GM Open Space was one of the key awakenings that started People for Ponto Carlsbad Citizens. Below is the City's Open Space Map for LFMP-9, with notes. We have the City's parcel-based Open Space data base that confirms all the numerical data in the notes.

**City GIS map of Ponto's (LFMP Zone 9) Open Space:**

- Light green areas meet the City's 15% unconstrained Growth Management Program Open Space Standard
- Most Ponto Open Space (pink hatch & blue [water] on map) is "Constrained" and does not meet the Standard
- **Aviara - Zone 19, Ponto - Zone 9 and Hanover/Poinsettia Shores – Zone 22 all developed around the same time and had similar vacant lands.**
- **City required Aviara - Zone 19 east of Ponto to provide the 15% Standard Open Space. Why not Ponto? Aviara had the same lagoon waters.**
- **City required Hanover & Poinsettia Shores area Zone 22 just north of Ponto to provide the 15% Standard Open Space. Why not Ponto?**
- Why Ponto developers were never required to comply with the 15% Standard Open Space is subject to current litigation
- Below is City GIS data from this map

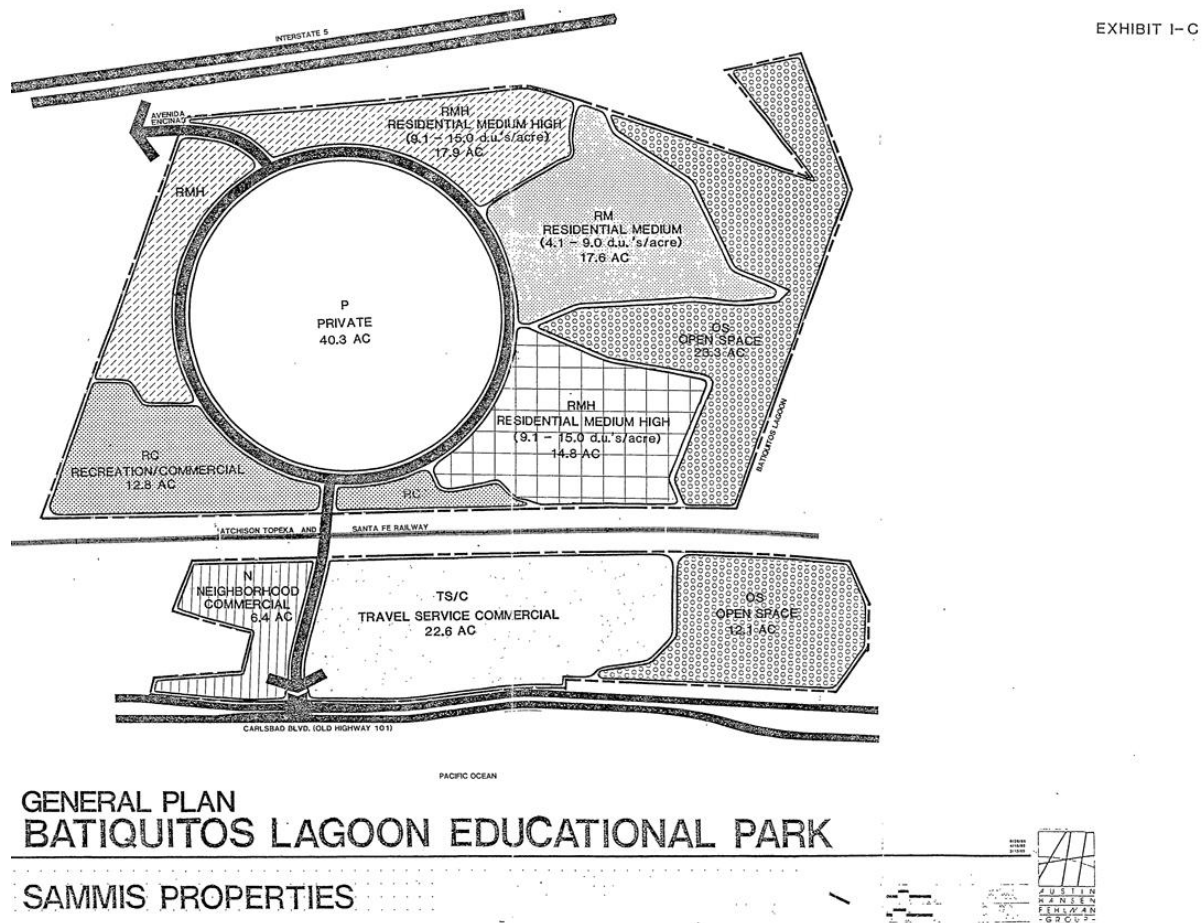

**City GIS map data summary of the 15% Growth Management Standard Open Space at Ponto**

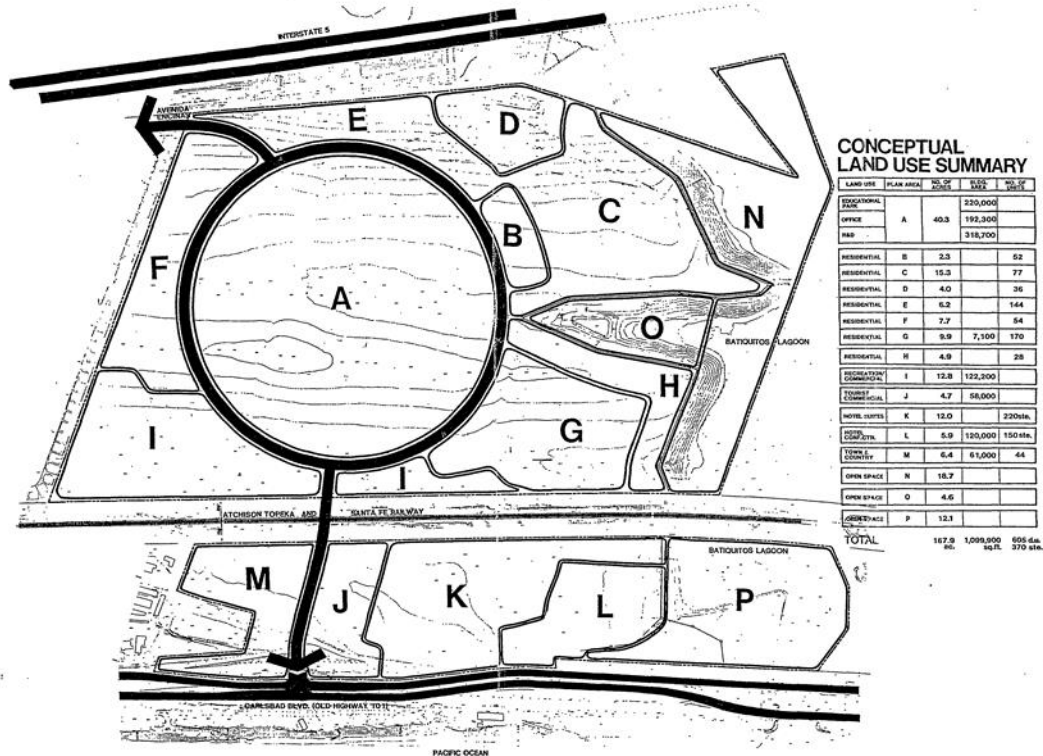

472 Acres	Total land in LFMP Zone 9 [Ponto]
<u>(197 Acres)</u>	Constrained land excluded from GMP Open Space
275 Acres	Unconstrained land in LFMP Zone 9 [Ponto]
<u>X 15%</u>	GMP Minimum Unconstrained Open Space requirement
41 Acres	GMP Minimum Unconstrained Open Space required
<u>(11 Acres)</u>	GMP Open Space provided & mapped per City GIS data
<b>30 Acres</b>	<b>Missing Unconstrained Open Space needed in LFMP Zone 9 [Ponto] to meet the City's minimum GMP Open Space Standard per City's GIS map &amp; data</b>
	<b>73% of the City's minimum 15% required Open Space Standard is missing due to over development of LFMP Zone 9 [Ponto]</b>

So were did the missing GM Open Space go?

In early 1985 prior to the Ponto's developer (SAMMIS) annexing Ponto into the City of Carlsbad, San Diego County's LAFCO (local agency formation commission) General Planned and pre-zoned, Ponto's Batiqitos Lagoon waters and the lagoon bluff slopes as Open Space. This Open Space was "Constrained Open Space" – State jurisdictional waters, and steep slopes with Coastal Sage Scrub (CSS) habitat. These already pre-zoned constrained/non-developable Open Spaces were accounted for as part of the City's 25% pre-Growth Management Plan Open Space, and per Growth Management can't be counted in meeting the 15% Growth Management Open Space Standard. The pre-zoned Open Space is shown in the City's Open Space map and properly marked as "Preservation of Natural Resources" Open Space land. This already pre-zoned Constrained (non-developable, aka 'Preservation of Natural Resources') Open Space land at Ponto was documented in the proposed SAMMIS Batiqitos Lagoon Educational Park (BLEP) Master Plan MP-175 as Areas N, O, and P in the Land Use Summary below.

On Oct, 1 1985 Carlsbad approved SAMIS's Master Plan and EIR to develop Ponto. SAMIS's BLEP Master Plan MP-175. Following are BLEP MP-175's General Plan & Land Use Summary maps:

**CONCEPTUAL LAND USE PLAN  
BATIQUITOS LAGOON EDUCATIONAL PARK**  
**SAMMIS PROPERTIES**

The BLEP MP-175 did include a variety of GM compliant Open Space.

- 12.8 acre Recreation Commercial land use that was playfields and Coastal Recreation site for MP-175 and South Carlsbad. This is a Critical GM Open Space that was never dedicated.
- A minimum 30' wide landscaped Open Space on both sides of Windrose Circle that circled the Area P. Windrose Circle was bordered on each side by 30' of landscaped Open Space.
- Additional minimum 30' wide landscaped setbacks between buildings in Area A
- 2.8 acres of private recreation open space for the maximum amount of residential units
- 45' to 50' landscaped setbacks from the Batiquitos Lagoon Bluff edge (this was later developed with Residential land use in some areas of Ponto).
- 75' landscaped separation between Areas C and D
- 70' landscaped separation between Areas D and E
- 25' landscaped setback along Avenida Encinas for Area E
- 30' to 80' landscape setback between Lakeshore Gardens and Area F
- 25' landscaped setback along Avenida Encinas for Area F
- 50' landscaped setback between Areas F and I
- 75' landscaped separation between Areas G and H
- 50' to 80' landscape setback for Area I between Lakeshore Gardens and between Area F

So, prior to Ponto being annexed into the City of Carlsbad in the mid-1980's and prior to Growth Management the Batiquitos Lagoon and lagoons bluff slopes (constrained and unusable due to habitat and slope constraints) were already pre-zoned Open Space and General Planned as Constrained Habitat Open Space. This constrained Open Space did not and cannot meet the 15% GM Open Space Standard.

In 1986 Citizens voted for the City's version of Growth Management that included a New Standard for Useable Open Space. The new standard was that 15% of all unconstrained useable/developable land within a Local Facility Management Zone was to be dedicated as Open Space. Once the vote was in the City adopted the Growth Management Ordinance 21.90 of Carlsbad's Municipal Code (City Council Ordinance No. 9791. (Ord. 9829 § 1, 1987; Ord. 9808 § 1, 1986)).

In adopting the Growth Management Ordinance 21.90.010 the Council Clearly stated:

(b) The city council of the city has determined **despite previous city council actions**, including but not limited to, amendments to the land use, housing, and parks and recreation elements of the general plan, amendments to city council Policy No. 17, adoption of traffic impact fees, and modification of park dedication and improvement requirements, that the demand for facilities and improvements has outpaced the supply resulting in shortages in public facilities and improvements, including, but not limited to, streets, **parks, open space**, schools, libraries, drainage facilities and general governmental facilities. **The city council has further determined that these shortages are detrimental to the public health, safety and welfare of the citizens of Carlsbad.**

(c) This chapter is adopted to ensure the implementation of the policies stated in subsection (a), to eliminate the shortages identified in subsection (b), **to ensure that no development occurs without providing for adequate facilities and improvements, ..."**

The Citizens and Council recognized that prior City plans were not adequate to address the current (and future) needs for facilities. Upon adoption of the New Growth Management Standards certain facilities were already below-Standard simply based on the existing development and population. Growth Management required additional facilities simply to bring the then current development/population up to the New Minimum Standards. I am personally familiar with 3 GM Standards in LFMP-6 (old La Costa) that I worked on – Library, Fire, and Park where already below-Standard i.e. existing development/population in Old La Costa required more facilities to meet the new Growth Management Standards. We worked to provide these new facilities for the existing development/population (i.e. fix the Standard deficits) and then to also plan even more additional facilities at a ratio that met the New Standards for the additional future development in Old La Costa. I can provide you some interesting stories on that.

I also recall working on the surrounding La Costa LRMP Zones 11 & 12 that Like Ponto/FMP-9 were considered "Cat II: Urbanizing" yet Unlike Ponto/LFMP-9 LFMP Zone 11 & 12 were not falsely exempted

for the GMP Open Space Standard and had to provide the GM Open Space Standard of 15% of the unconstrained/developable lands as dedicated Useable Open Space.

The Citizens vote on Proposition E and the subsequent Growth Management Ordinance 21.90 are the rules on which the Growth Management Plans (both Citywide and 25 Local Facility Plans) are required to follow.

To create the Citywide and the Local plans (Zones 1-6) for the largely developed areas the City needed to temporarily pause development activity to allow time for city staff to Draft the Growth Management Plan (my work as a city planner at the time was re-directed to draft growth management plans). So the Growth Management Ordinance 21.90.030, established a Temporary Development Moratorium to pause development processing activity while the Growth Management Plan was being Drafted. Following is that language of 21.90.030. Notes are shown as italicized text within *[example]*:

“21.90.030 General prohibition—Exceptions.

(a) Unless exempted by the provisions of this chapter, **no application for any building permit or development permit shall be accepted, processed or approved until a city-wide facilities and improvements plan has been adopted and a local facilities management plan for the applicable local facilities management zone has been submitted and approved according to this chapter. *[Clearly indicates the exemptions in 21.90.030 are only from the temporary development moratorium created by 21.90.]***

(b) No zone change, general plan amendment, master plan amendment or specific plan amendment which would increase the residential density or development intensity established by the general plan in effect on the effective date of this chapter shall be approved unless an amendment to the citywide facilities management plan and the applicable local facilities management plan has first been approved. *[FYI, this provision of 21.90.030 has direct implications with respect of currently City/developer proposed General Plan/Zoning code/Local Coastal Program Amendments now being pursued by the City at Ponto Planning Area F and Ponto Site 18. The City did not and has not yet amended the CFMP and LFMP-9 to increase the City/developer proposed residential density or development intensity at Ponto]*

(c) The classes of projects or permits listed in this subsection shall be exempt from the provisions of subsection (a). Development permits and building permits for these projects shall be subject to any fees established pursuant to the city-wide facilities and improvement plan and any applicable local facilities management plan. *[Then lists various exemptions from the temporary development processing/building permit moratorium in 21.90. The BLEP MP’s exemption from the temporary moratorium is (g)]*

(g) The city council may authorize the processing of and decision making on building permits and development permits for a project with a master plan approved before July 20, 1986, subject to the following restrictions *[this only applies to the “approved before July 20, 1986” BLEP MP, and NOT to any subsequent Master Plan Amendment]*:

- (1) The city council finds that the **facilities and improvements required by the master plan are sufficient to meet the needs created by the project and that the master plan developer has agreed to install those facilities and improvements to the satisfaction of the city council.** *[The Ponto developer needed to provide the 12.8 acre Recreation Commercial land use and install the GM compliant Open Space required in the 1986 MP175 but did not]*
- (2) The master plan developer shall agree in writing that all facilities and improvement requirements, including, but not limited to, the payment of fees established by the city-wide facilities and management plan and the applicable local facilities management plan shall be applicable to development within the master plan area and that the master plan developer shall comply with those plans. *[this required the LFMP-9/BLEP MP to have 1) already been fully developed or 2) have already have dedicated 15% of the LFMP-9 as Growth Management compliant Open Space (i.e. Unconstrained and developable) to qualify for the Open Space exemption later falsely noted in the city-wide facilities and management plan. As clearly documented the BLEP MP did not meet the requirements to qualify for Open Space Standard Exemption in the city-wide facilities and management plan. The section also requires “all facilities” (including Open Space) requirements in the Citywide Growth Management Standard to apply to BLEP MP, not provide a means for a false exemption of the Open Space Standard]*
- (3) The master plan establishes an educational park and **all uses within the park comprise an integral part of the educational facility.** *[“all uses” including the 12.8 acre Recreation Commercial land use and all the other GM compliant Open Spaces are an integral part. However the 12.8 acre open space land use was never built and the BLEP MP GM compliant Open Space never dedicated.]*
- (4) **Building permits for the one hundred twenty-nine [129] unit residential portion of Phase I of the project may be approved provided the applicant has provided written evidence that an educational entity will occupy Phase I of the project** which the city council finds is satisfactory and consistent with the goals and intent of the approved master plan. *[Clearly indicates the 21.90.030 exemption is only for building permits for Phase I of the BLEP MP. Of the 129 units only the 75 unit Rosalena development applied for and received building permits under this exemption. There are some very interesting issues related to this Rosalena Phase I development relative to GM complaint Open Space along the bluff edge that can be expanded on later if the CTGMC has questions.]*
- (5) Prior to the approval of the final map for Phase I the master plan developer shall have agreed to participate in the restoration of a significant lagoon and wetland resource area and made any dedications of property necessary to accomplish the restoration. *[Again clearly notes the exemption only allows a final map for Phase I to be processed. The “lagoon and wetland resource area” are part of the same constrained/undevelopable lands already pre-zoned prior to the BLEP MP being incorporated into the City of Carlsbad]*

The Aviara Master Plan (directly adjacent and east of Ponto) and was also being developed at the same time as Ponto/BLEP MP. 21.90.030 also provided the Aviara Master Plan a similar exemption (h) and similar lagoon related quid-pro-quo for that exemption. But Aviara did not receive a GM Open Space Standard Exemption. :

“(iv) Prior to any processing on the [Aviara] master plan the applicant shall grant an easement over the property necessary for the lagoon restoration and the right-of-way necessary for the widening of La Costa Avenue and its intersection with El Camino Real. (Ord. NS-63 § 1, 1989; Ord. 9837 § 1, 1987; Ord. 9808 § 1, 1986)”

Some City staff have incorrectly stated to the City Council that they believe 21.90.030 exempts Ponto/LFMP-9 from the Growth Management Ordinance/Program or Growth Management Open Space Standard. RESOLUTION NO. 8666- A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF CARLSBAD, CALIFORNIA APPROVING TWO AGREEMENTS FOR BATIQUITOS LAGOON EDUCATIONAL PARK also shows the 21.90.030 exemption was only for development permits during the temporary building moratorium.

In 1986 the City falsely exempted in the Citywide Facilities Plan all Ponto developers from providing 15% of their useable/developable land as GM required Open Space. The City’s documented/adopted rationale in the Citywide Plan was that Ponto/LFMP-9 was 1) in 1986 already developed, or 2) in 1986 the developer had already met the GM Open Space Standard by having already dedicated 15% of the useable land as Open Space. Both situations were/are false. Any air photo map or even the 1986 LFMP-9 clearly states Ponto was NOT developed in 1986, as only the Lakeshore Gardens existed and the Ralphs Center was just starting construction. Also the City’s GIS Open Space mapping (see above) shows that SAMMIS the Ponto developer (BLEP Master Plan MP-175) in 1986 had Not dedicated as Open Space 15% of the useable land as Growth Management compliant Open Space as shown/described in the BLEP MP (i.e. the 12.8 Acre Recreation Commercial site and all the landscaped open space setbacks required in the BLEP MP-175. If that 15% was dedicated in 1986 it would show-up on the City’s inventory of Dedicated Open Space now. So how did this occur?

How Ponto’s planned GM Open Space was eliminated and replaced with Residential land use:

In late 1980’s SAMMIS the BLEP MP-175 developer started building the 75-home Rosalena Development as the first part of Phase I of the BLEP MP. The City (based on my recollection was very desirous to develop the BLEP MP) and required special time limits on the BLEP MP to actually advance building the ‘Educational Park’ with all the “initiated” land uses (including GM compliant Open Space) within a certain period of time. SAMMIS was having financial issues and difficulty delivering the BLEP MP land uses. Amendments (A, B, and C) to BLEP MP reflected on these difficulties:

- MP 175(A) to allow minor accessory structures within the rear yards of all Phase I single family lots located in Planning Area “C”. *[This is the Rosalena development that was part of Phase I for BLEP MP. This amendment has implications on the landscaped Open Space setback along the Batiquitos Lagoon bluff top, and the required Coastal access trail required by the Coastal*

*Development Permit for Rosalena. This is an interesting history that can be explained later if the CTGMC would like.]*

- MP 175(B) to realign Carlsbad Blvd., between North Batiquitos Lagoon and west of I-5 to accommodate the Sammis Development was WITHDRAWN January 12, 1990, and
- MP 175(C) a request for 5-year extension of time for Master Plan approval related to educational uses on this project was Approved Planning Commission Resolution No. 2841, April 19, 1989 and approved City Council Ordinance No. NS-83, September 5, 1990.

SAMMIS went bankrupt around 1990 and Kaiza Development purchased the BLEP MP. Kaiza completed the Rosalena development started by SAMMIS. Kaiza then sought to completely change the planned land uses on all the remaining unconstrained/developable land in the BLEP MP.

General Plan and Master Plan Amendments eliminated/reduced BLEP's Growth Management compliant Open Space and replace with Residential uses in the "amended" Poinsettia Shores Master Plan:

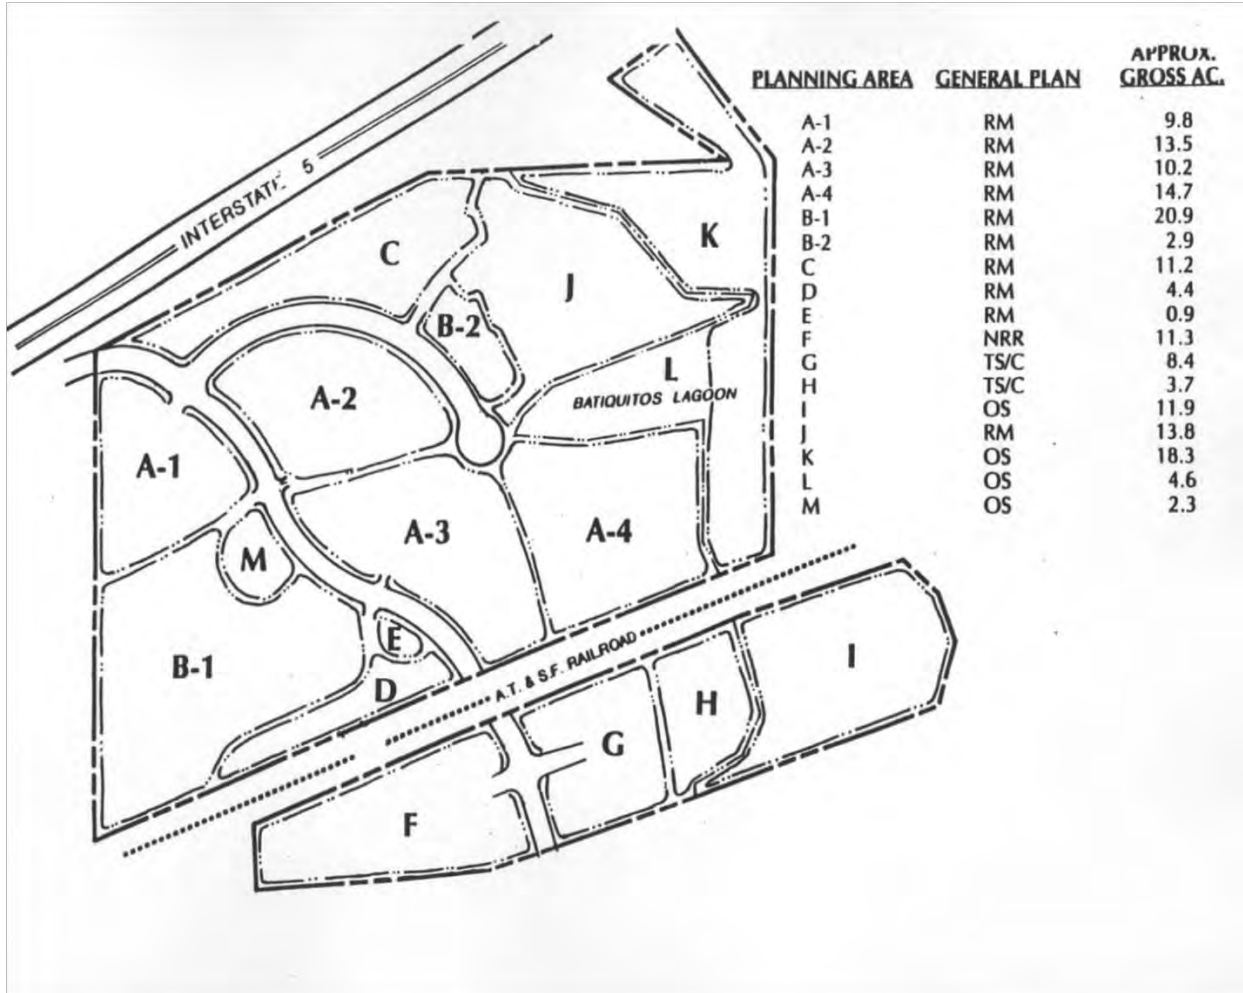

When Kaiza acquired the BLEP MP-175 and its vacant land only the State Campground, Lakeshore Gardens, Ralphs Center, and now Rosalena were approved/existing developments at Ponto. Kaiza proposed a Master Plan Amendment to delete the BLEP MP-175 and all its developable land uses, except for the only portion of Phase I developed – the 75 unit Rosalena subdivision. The pre-BLEP MP pre-zoned (and General Planned) constrained/undevelopable Lagoon waters and lagoon bluff Open Spaces and the CA Coastal Act (LCP) required bluff top setbacks were the only Open Spaces retained in Kaiza's proposed General Plan land use and Master Plan Amendments.

Most all of the BLEP MP-175 (and Ponto/LFMP-9) land area was still undeveloped at the time Kaiza proposed changing all the General Plan land uses at Ponto and eliminating the usable Open Space in BLEP MP.

Kaiza's General Plan land use and Master Plan 'Amendments' made radical land use changes that converted some critical Useable GM Open Space to residential land use and also reduced some GM Open Space provided in BLEP MP. Following is Kaiza's Amended General Plan land use map and bullet summary of the major Open Space changes without getting into a very detailed forensic analysis:

- Eliminated the 12.8 acre Recreation Commercial land use.
- Eliminated the minimum 30' wide landscaped Open Space on both sides of Windrose Circle for the large unbuilt portions of Windrose Circle
- Reduced by 10' the landscaped Open Space on the smaller built portion of Windrose Circle
- Eliminated on 40.3 acres the additional minimum 30' wide landscaped setbacks between buildings
- Reduced BLEP's 2.8 acres of private recreation open space to 2.3 acres
- Except for the Rosalena (BLEP Area C) and (PSMP Area J), maintained the 45' to 50' landscaped setbacks from the Batiquitos Lagoon Bluff edge
- Eliminated the 75' landscaped separation between BLEP MP Areas C and D

- Eliminated the 70' landscaped separation between BLEP MP Areas D and E
- Maintained the 25' landscaped setback along Avenida Encinas. [However new Master Plan Amendments MP-175L propose reducing the setback to 10' on the undeveloped frontage of Avenida between PCH and the railroad tracks]
- Placed a road in most of the 80' landscape setback between Lakeshore Gardens
- Eliminated the 50' landscaped setback between BLEP MP Areas F and I
- Eliminated the 75' landscaped separation between BLEP MP Areas G and H
- Added a 20' wide by 1,000' long landscaped strip for an HOA trail

Kaiza's Master Plan Amendment MP 175 (D) eliminated the 12.8 acre Open Space land use (with an associated General Plan Amendment to add more residential land use) and reduced the other useable Open Spaces required in the BLEP MP. When the 1994 Kaiza MP 175 (D) General Plan Amendments were proposed, it seemed they voided the '1986 GM Open Space exemption' that was clearly specific only to the 1986 BLEP MP land uses and regulation. Although this was a false exemption, the exemption only applied to the complete/integrated land use and open space provided in the 1986 BLEP MP. The 1986 exemption specific to BLEP MP could not apply to a different and later 1994 General Plan land use plan that eliminated the 12.8 acre Recreation Commercial (Open Space) site to add residential land use

and that also reduced the GM compliant Open Space provided in the 1986 BLEP MP. 21.90.030(b) notes that:

**“(b) No zone change, general plan amendment, master plan amendment or specific plan amendment which would increase the residential density or development intensity established by the general plan in effect on the effective date of this chapter shall be approved unless an amendment to the citywide facilities management plan and the applicable local facilities management plan has first been approved.”**

The 1994 Kaiza General Plan land use and Master Plan (MP 175(D)) Amendments removed 12.8 acres of Recreation Commercial (GM compliant Open Space) to add residential land use. This violated 21.90.030(b) by doing so without a first providing a Citywide Facilities Plan Amendment that analyzed the actual amount of GM compliant Open Space being proposed in the 1994 Kaiza MP 175(D) relative to the 1986 BLEP MP on which the 1986 GM Open Space exemption for LFMP-9 was based. MP 175(D) is noted in the MP as follows:

- “MP 175 (D) Kaiza Poinsettia Master Plan To **replace educational uses with residential land uses** And rename to Poinsettia Shores Master Plan (was) Approved Planning Commission Resolution No. 3552, November 3, 1993, Approved City Council Ordinance No. NS-266, January 18, 1994.”

Kaiza’s MP 175(D) inaccurately and bizarrely claimed BLEP MP’s prior false exemption from the GM Open Space Standard as the justification that Kaiza’s new 1994 Open Space land use changes that seem to reduce the amount of GM complaint Open Space in the 1986 BLEP MP are also exempt from the GM Open Space Standard. **Kaiza’s MP 175(D) claims the pre-Growth Management and pre-BLEP MP Constrained/Undevelopable lagoon waters and bluff habitat that per the 15% Growth Management Open Space Standard CAN NOT be counted as meeting the 15% GM Open Space Standard can be magically counted as meeting the 15% GM Open Space Standard. The GM Open Space Standard specifically states that only Unconstrained/Developable lands CAN BE counted as meeting the GM Open Space Standard.** The stated principles of Growth Management, the Growth Management Ordinance 21.90 and the Growth Management Open Space Standard DO NOT allow a developer or the City to count already documented Constrained and unbuildable habitat (and water) as Unconstrained and developable land. You can’t just turn ‘an apple into a banana by saying it’, or turn ‘Constrained/Undevelopable land into Unconstrained/Developable land by just saying it.

Compliance with the law in this Open Space issue is a part of a current lawsuit by North County Advocates a group of Citizens watchdogs. The City has unsuccessfully tried to diminish this lawsuit. A judge/jury will determine the outcome.

Additional MP 175 Amendments have been proposed by and approved to further modify land use and regulatory limitations at Ponto. These include:

- MP 175(E) Poinsettia Shores Master Plan, Redefinition of minor amendment to provide a flexible regulatory procedure to encourage creative and imaginative planning of coordinated communities, WITHDRAWN November 1, 1994

- MP 175(F) Poinsettia Shores Master Plan minor amendment to actualize off-site option for provision of 90 affordable housing dwelling units, Approved Planning Commission Resolution No. 3774, April 19, 1995
- MP 175(G) Poinsettia Shores Master Plan minor amendment to adopt Coastal Commission Suggested modifications, Approved Planning Commission Resolution No. 3922, June 5, 1996 Approved City Council July 16, 1996, NS-367
- MP 175(H) Poinsettia Shores Master Plan - major amendment FOR HOTEL AND TIMESHARE USES, WITHDRAWN January 16, 2003
- MP 175(I) Poinsettia Shores Master Plan – Rosalena Trail Amendment, WITHDRAWN January 8, 2002
- MP 175(J) Poinsettia Shores Master Plan – major amendment for Carlsbad Coast Residential project to allow RM land use on Poinsettia Shores, WITHDRAWN January 8, 2002
- MP 175 (K) Poinsettia Shores Master Plan – Ponto Area Specific Plan Mixed use consisting of residential, commercial and retail uses, WITHDRAWN August 19, 2004
- MP 175(L) Poinsettia Shores Master Plan – Major amendment for commercial and residential development on Planning Area F, Still being proposed by developers and being processed by the City.

**The false exemption for the BLEP MP based LFMP-9 should never have occurred. However, completely eliminating BLEP MP’s OpenSpace land use (12.8 acre Recreation Commercial) and reducing BLEP MP’s required Open Space while at the same time claiming the false BLEP MP Open Space Exemption is a violation of common sense, 21.90, and the very founding principles Growth Management.**

The CA Coastal Commission in MP 175 (G) in part recognized the elimination of the 12.8 acre Recreation Commercial land use and maybe some of the Open Space land use changes and added the following land use regulations for 11.1 acre Planning Area F in the Carlsbad’s Local Coastal Program LCP). The LCP as per State Law and referenced in Carlsbad’s General Plan is the controlling land use regulation over the General Plan, Poinsettia Shores Master Plan and in the Coastal Zone:

“PLANNING AREA F: Planning Area F is located at the far northwest corner of the Master Plan area west of the AT&SF Railway right-of-way. This Planning Area has a gross area of 11 acres and a net developable area of 10.7 acres. Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an “unplanned” area, for which land uses will be determined at a later date when more specific planning is carried out for areas west of the railroad right-of-way. A future Major Master Plan Amendment will be required prior to further development approvals for Planning Area F, and shall include an LCP Amendment with associated environmental review, if determined necessary.

The intent of the NRR designation is not to limit the range of potential future uses entirely to nonresidential, however, since the City's current general plan does not contain an “unplanned” designation, NRR was determined to be appropriate at this time. In the future, if the Local Coastal Program Amendment has not been processed, and the City develops an “unplanned”

General Plan designation, then this site would likely be redesignated as “unplanned.” Future uses could include, but are not limited to: commercial, residential, office, and other uses, subject to future review and approval.

**As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.”**

In 2010 the CA Coastal Commission in 2010 rejected the Ponto Beachfront Village Vision Plan on which MP 175(K) was based. MP 175(K) was withdrawn.

On July 3, 2017 the CA Coastal Commission provided direction to the City of Carlsbad regarding MP 175(G), Carlsbad’s 2015 General Plan Update, Carlsbad proposed Local Coastal Program Amendment Land Use Plan (LUP) . CA Coastal Commission wrote to the City the following. Notes on the context of communication are in bracketed italics *[example]*:

“The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto ... area. For example, **Planning Area F requires the city and developer to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e., public park) on the west side of the railroad. ...** this study should be undertaken as a part of the visitor serving use inventory analysis described above. *[the discussion of the need for the City to conduct a citywide analysis of the location and amount of these uses in the Coastal Zone to assure the City General Plan within the Coastal Zone is providing the adequate amounts and locations of these land uses to fulfill the long-term population/visitor needs for these uses according to the CA Coastal Act]* **If this analysis determines that there is a deficit of low cost visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed.”**

In 2017 the City conducted the first Sea Level Rise (SLR) Vulnerability Assessment <https://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=33958> . That first initial analysis, shows significant SLR impacts that will reduce existing Ponto Open Space - the State beach and Campground and along the Batiquitos Lagoon. The City identified SLR impacts on Ponto Open Space are summarized in the next section of this history.

In 2023 the CA Coastal Commission will consider the data and public input and decide the appropriate land use for 11.1 acre Planning Area F based the CA Coastal Act and Coastal Act land use policies.

You can determine the Open Space and Park Quality of Life Standards that will be applied to this and other future land uses.

[City assessment of Sea Level Rise impacts on reducing Ponto Open Space](#)

The City's 2017 SLR assessment shows SLR will significantly reduce or eliminate only existing Open Space land at Ponto. The City's assessment quantifies the sporadic/episodic loss of Ponto/Coastal South Carlsbad Open Space land and land uses being at the State Campground, Beaches, and Batiquitos Lagoon shoreline – about 32 acres by the year 2100, this would be an average loss of 17,000 square feet of Open Space per year. Following (within quotation marks) is a description, quantification and images of the City's projected loss of Ponto/Coastal South Carlsbad Open Space land and land use due to SLR. *[Italicized text within brackets]* is added data based on review of aerial photo maps in the Assessment.

“Planning Zone 3 consists of the Southern Shoreline Planning Area and the Batiquitos Lagoon. Assets within this zone are vulnerable to inundation, coastal flooding and bluff erosion in both planning horizons (2050 and 2100). A summary of the vulnerability assessment rating is provided in Table 5. A discussion of the vulnerability and risk assessment is also provided for each asset category.

#### 5.3.1. Beaches

Approximately 14 acres of beach area is projected to be impacted by inundation/erosion in 2050. ... Beaches in this planning area are backed by unarmored coastal bluffs. Sand derived from the natural erosion of the bluff as sea levels rise may be adequate to sustain beach widths, thus, beaches in this reach were assumed to have a moderate adaptive capacity. The overall vulnerability rating for beaches is moderate for 2050.

Vulnerability is rated moderate for the 2100 horizon due to the significant amount of erosion expected as the beaches are squeezed between rising sea levels and bluffs. Assuming the bluffs are unarmored in the future, sand derived from bluff erosion may sustain some level of beaches in this planning area. A complete loss of beaches poses a high risk to the city as the natural barrier from storm waves is lost as well as a reduction in beach access, recreation and the economic benefits the beaches provide.

#### 5.3.3. State Parks

A majority of the South Carlsbad State Beach day-use facilities and campgrounds (separated into four parcels) were determined to be exposed to bluff erosion by the 2050 sea level rise scenario (moderate exposure). This resource is considered to have a high sensitivity since bluff erosion could significantly impair usage of the facilities. Though economic impacts to the physical structures within South Carlsbad State Beach would be relatively low, the loss of this park would be significant since adequate space for the park to move inland is not available (low adaptive capacity). State parks was assigned a high vulnerability in the 2050 planning horizon. State park facilities are recognized as important assets to the city in terms of economic and recreation value as well as providing low-cost visitor serving amenities. This vulnerability poses a high risk to coastal access, recreation, and tourism opportunities in this planning area.

In 2100, bluff erosion of South Carlsbad State Beach day-use facilities and campgrounds become more severe and the South Ponto State Beach day-use area becomes exposed to coastal flooding during extreme events. The sensitivity of the South Ponto day-use area is low because impacts to usage will be temporary and no major damage to facilities would be anticipated. Vulnerability and risk to State

Parks remains high by 2100 due to the impacts to South Carlsbad State Beach in combination with flooding impacts to South Ponto.

Table 5: Planning Zone 3 Vulnerability Assessment Summary [condensed & notated]:

Asset	Horizon			Vulnerability
<u>Category</u>	<u>[time]</u>	<u>Hazard Type</u>	<u>Impacted Assets</u>	<u>Rating</u>
Beaches	2050	Inundation/Erosion, Flooding	<b>14 acres</b> (erosion)	Moderate
	2100	Inundation/Erosion, Flooding	<b>54 acres</b> (erosion)	Moderate
Public Access	2050	Inundation, Flooding	6 access points <b>4,791 feet of trails</b>	Moderate
	2100	Inundation, Flooding	10 access points <b>14,049 feet of trails</b>	Moderate
State Parks <i>[Campground - Low-cost Visitor Accommodations]</i>	2050	Flooding, Bluff Erosion	4 parcels [ <b>&lt;18 Acres</b> ]	High
	2100	Flooding, Bluff Erosion	4 parcels [ <b>&gt;18 Acres</b> ] <i>[loss of <b>over 50% of the campground &amp; its Low-cost Visitor Accommodations,</b></i>	High
<i>See Figure 5.]</i>				
Transportation (Road, Bike, Pedestrian)	2050	Bluff Erosion	<b>1,383 linear feet</b>	Moderate
	2100	Flooding, Bluff Erosion	<b>11,280 linear feet</b>	High

Environmentally Sensitive Lands	2050	Inundation, Flooding	572 acres	Moderate
	2100	Inundation, Flooding	606 acres	High

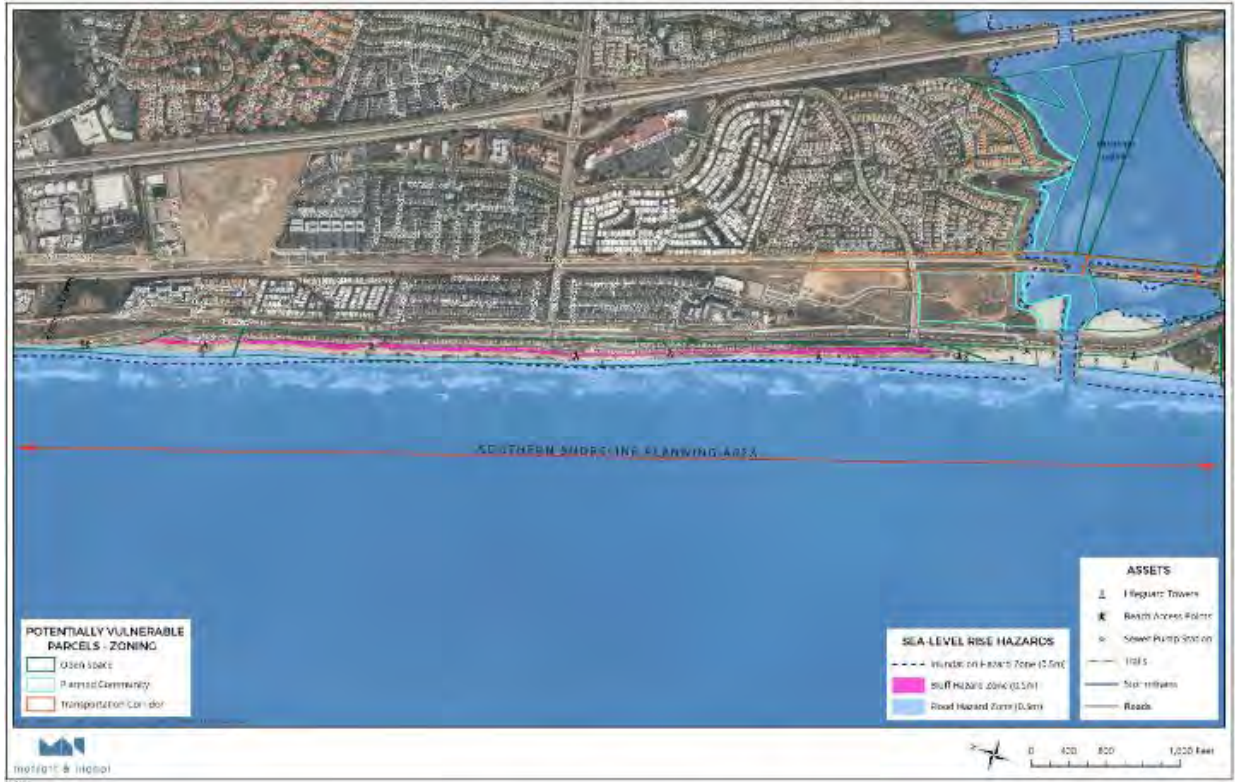

Figure 7: Southern Shoreline Planning Area – Year 2050

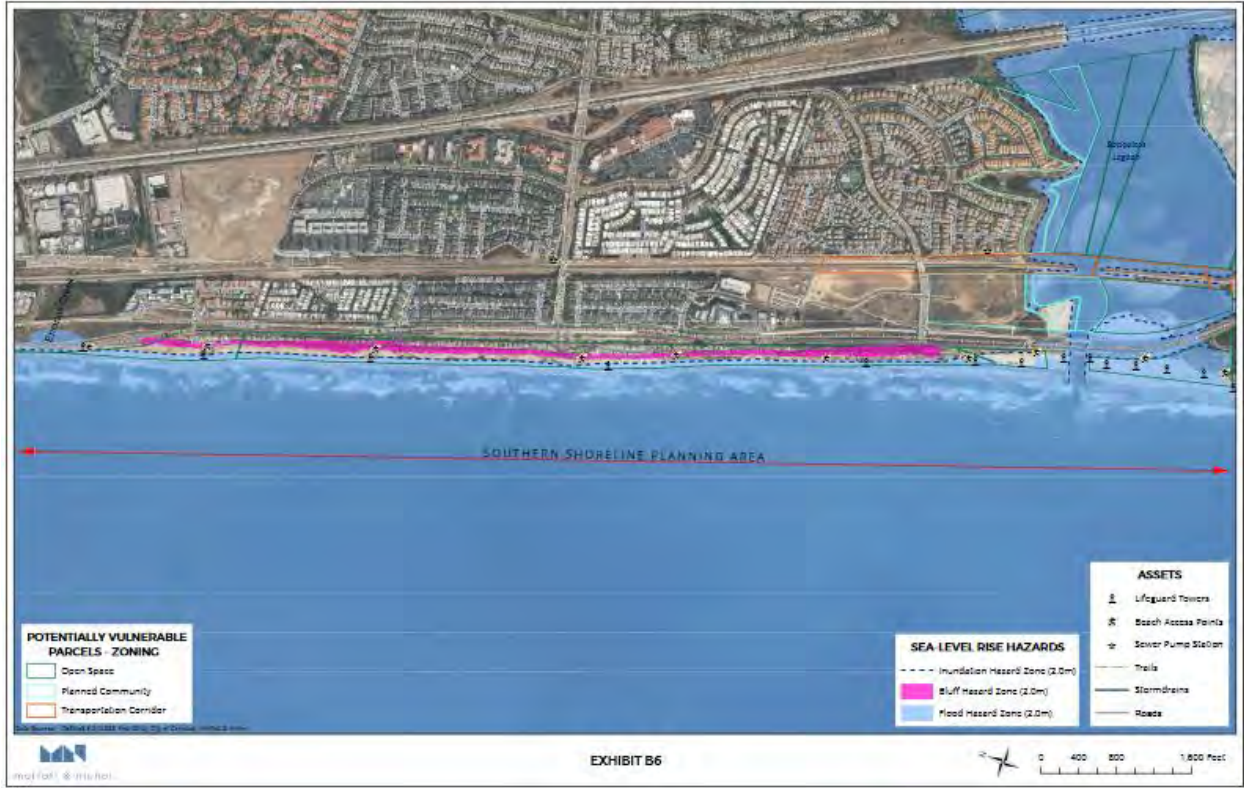

Figure 5: CoSMoS Bluff Erosion Projections by 2100  
(CoSMoS-COAST 2015)

[Figure 5 show the loss of over 50% of the campground and campground sites with a minimal .2 meter Sea Level Rise (SLR), and potentially the entire campground (due to loss of access road) in 2 meter SLF.]”

This 2017 SLR data and quantified losses of Ponto/Coastal South Carlsbad Open Space land and land uses was not considered in the City’s rejected (by CCC) Ponto Beachfront Village Vision Plan. The Ponto Vision Plan is the basis for the City’s 2015 General Plan Update that is now being proposed in the City’s Local Coastal Program Amendment now before the CA Coastal Commission.

#### Summary:

LFPM-9 was clearly not developed in 1986, and did not then or now dedicate 15% of the unconstrained/developable land as Open Space as required by the Growth Management Open Space Standard. These two reasons for the City to “exempt” LFMP-9 from Open Space Standard were/are False. Saying Constrained/undevelopable land can be counted as Unconstrained/developable land is also false and clearly not allowed according to the Growth Management Ordinance, Standards, principles, and common-sense honesty to Carlsbad Citizens. LFMP-9, as the City’s own maps/data base show is clearly missing 30-acres of GM Open Space. In addition in 2017 we learned that Ponto/Coastal South Carlsbad will lose about 32 acres of existing Open Space due to SLF.

#### Closing thoughts:

Growth Management is based on the type/amount/location of General Plan land use designations, the development potential of those land use designations in creating the demand for the type/amount/location of facilities, and supply of the type/amount/distribution of facilities – like Open Space and Parks. If the type/amount/location of supply of facilities does not meet the demand for those facilities then growth management fails and Quality of Life is reduced.

Quality of Life Standards are used to assure supply and demand for facilities is properly balanced with respect to type/amount/location.

Ponto is clearly unbalanced. The Ponto Census Tract is at a 40% higher population density than the rest of Carlsbad, yet is Ponto is NOT meeting the Open Space Standard and has NO Park (see City Open Space maps and Park Master Plan). Ponto and all South Carlsbad have higher population demand for Parks and Open Space facilities yet Ponto (that is the only place to provide Coastal Park and Open Space needs for South Carlsbad) has lower or none of those two most critical GM Facilities needed to balance and mitigate the 40% higher population density at Ponto and also the higher residential density in South Carlsbad.

Ponto and Coastal South Carlsbad also have additional State and regional responsibilities to provide Coastal Recreation and Open Space for populations of people and visitors from outside of Ponto and Carlsbad.

This failure to honestly and adequately balance the type/amount/location higher population density by providing higher levels of Parks and Open Space in those areas will lead to a slow and but eventual reduction of the Quality of Life for those areas.

Common sense and the Carlsbad's Growth Management law say if you change the land use (like what was done and is still being proposed at Ponto) you change the type/amount/location of potential development and population and the Growth Management impacts. Land use changes require and honest/accurate/balanced update to Citywide and Local Growth Management Plans to accurately reflect those changes and provide an updated plan to provide facilities that meet the Standards for those land use changes. This is the fundamental heart of any Growth Management.

The Carlsbad Tomorrow Growth Management Committee, and City Commissions and Council are all now facing the same issues and responsibility that we faced in the 1980's at the beginning of Growth Management. We established New Quality of Life Standards – for Open Space and Parks – that required New investments in Parks and Open Space by both the City and developers.

Open Space and Parks have always been identified as most critical for Carlsbad's quality of life. The Carlsbad Tomorrow Growth Management Committee, and City Commissions and Council, and Carlsbad Citizens are all at a critical crossroad.

- Do we, or don't we, enforce and set new standards that achieve the quality of life we desire?
- Do we or don't we, fix existing past errors and below desired standard situations?
- Do we or don't we, roll-up our sleeves a work together to a better Quality of Life?

As a long-time Carlsbad Citizen I am extremely disappointed by some who say we can't fulfill our Community Vision, we can't fix things, can't make things better, and can't add more Parks and Useable Open Space. This can't attitude is not out Community Vision. We can and we did before, and we can do it again and better.

Great cities for hundreds of years have Upgraded their Quality of Life Facility Standards, made and implemented/funded facilities to fix things up to those Standards. A City is just like a business or person - If you don't improve you decline. Examples of Upgrading and funding to New Parks and Open Space are many but include – Carlsbad's Buena Vista Reservoir Park, additions to Pine Park, Village H Park, and Aura Circle Open Space acquisition; and SDSU's major new Park at the redeveloped Qualcomm Stadium site.

Now like at the beginning of Carlsbad Growth Management the City can “despite previous city council actions” make improvements to its Growth Management and Quality of Life Standards to address past and future needs. Following illustrates existing R-23 (up to 23 dwellings per acre) development in Carlsbad – most of our future residential development will be required to be like this or more dense.

High-density housing can be great, but it requires MORE Parks and MORE useable Open Space within walking distance to balance the density and provide large places for families and kids to really play. In Carlsbad's high-density residential future with no backyards and stacked flat multi-family homes the need for both more Parks and Useable Open Space is much greater than in 1980's.

The time to fix the Parks and Useable Open Space problems at Ponto (LFMP-9) is now. Already Ponto is developed at a density that is 40% great than the rest of Carlsbad. New proposed and even higher-density developments (developer driven Amendments) propose to make Ponto even more dense, yet there are not Parks at Ponto and Ponto is missing 30-acres of Useable Open Space past developers should have provided.

A doable, time-tested, accountable, tax-payer saving, strongly citizen desired, accountable, and honest way to fix this was presented to you in 8/8/22 and 12/27/22 emails with attached "CTGMP Key Issues and Suggestions – 2022-12-6". Over 5,000 petitions expressing the need to fix the Park and Open Space problems at Ponto have been sent to the City and the City should have provided these to you in considering Park and Open Space issues.

Ponto Park and Open Space needs your help fixing NOW. If not Carlsbad Tomorrow will be less than it is today, and tragically will have failed our Community Vision.

## **Sea Level Rise and Carlsbad's DLCP-LUPA's projected/planned Loss of Open Space at Ponto**

### **Introduction:**

Carlsbad first documented Sea Level Rise (SLR) and associated increases in coastal erosion in a December 2017 Sea Level Rise Vulnerability Assessment (2017 SLR Assessment). Prior planning activities (2010 Ponto Vision Plan – rejected by CA Coastal Commission, and 2015 General Plan Update) did not consider SLR and how SLR would impact Coastal Open Space Land Use & CA Coastal Act 'High-Priority' Coastal Open Space Land Uses at Ponto. The 2017 SLR Assessment shows Open Space land and Open Space Land Uses are almost exclusively impacted by SLR at Ponto & South Coastal Carlsbad. The 2017 SLF Assessment also shows significant LOSS of Open Space land acreage and Land Uses. Most all impacted Open Space Land Uses are CA Coastal Act "High-Priority Coastal Land Uses" – Coastal Recreation (i.e. Public Park) and Low-Cost Visitor Accommodations. Existing Ponto Open Space Land Uses are already very congested (non-existent/narrow beach) and have very high, almost exclusionary, occupancy rates (Campground) due to existing population/visitor demands. Future population/visitor increases will make this demand situation worst. The significant permanent LOSS of existing Coastal Open Space land and Coastal Open Space Land Use (and land) due to SLR reduces existing supply and compounds Open Space congestion elsewhere. Prior Ponto planning did not consider, nor plan, for significant SLR and current/future "High-Priority" Coastal Open Space Land Use demands.

### **Open Space and City Park demand at Ponto:**

Open Space at Ponto is primarily 'Constrained' as defined by the City's Growth Management Program (GMP), and cannot be counted in meeting the City's minimal 15% 'Unconstrained' GMP Open Space Standard. Per the GMP Open Space Standard, the developers of Ponto should have provided in their developments at least 30-acres of additional 'Unconstrained' GMP Open Space at Ponto. City GIS mapping data confirm 30-acres of GMP Standard Open Space is missing at Ponto (Local Facilities Management Plan Zone 9).

The City of Carlsbad GIS Map on page 2 shows locations of Open Spaces at Ponto. This map and its corresponding tax parcel-based data file document Ponto's non-compliance with the GMP Open Space Standard. A summary of that City GIS data file is also on page 2. The City said Ponto's non-compliance with the GMP Open Space Standard was 'justified' by the City 'exempting' compliance with the Standard. The City 'justified' this 'exemption' for reasons that do not appear correct based on the City's GIS map and data on page 2, and by a review of 1986 aerial photography that shows most of Ponto as vacant land. The City in the Citywide Facilities Improvement Plan (CFIP) said 1) Ponto was already developed in 1986, or 2) Ponto in 1986 already provided 15% of the 'Unconstrained' land as GMP Standard Open Space. Both these 'justifications' for Ponto 'exemption' in the CFIP were not correct. The legality of the City 'exempting' Ponto developers from the GMP Open Space Standard is subject to current litigation.

The City proposes to continue to exempt future Ponto developers from providing the missing 30-acres of minimally required GMP Open Space, even though a change in Ponto Planning Area F land use from the current 'Non-Residential Reserve' Land Use requires comprehensive Amendment of the Local Facilities Management Plan Zone 9 to account for a land use change. City exemption is subject of litigation.

Ponto (west of I-5 and South of Poinsettia Lane) currently has 1,025 homes that per Carlsbad's minimal Park Standard demand an 8-acre City Park. There is no City Park at Ponto. Coastal Southwest Carlsbad has an over 6.5 acre Park deficit that is being met 6-miles away in NW Carlsbad. Ponto is in the middle of 6-miles of Coastline without a City Coastal Park west of the rail corridor.

**City GIS map of Ponto's (LFMP Zone 9) Open Space:**

- Light green areas meet the City's 15% unconstrained Growth Management Program Open Space Standard
- Most Ponto Open Space (pink hatch & blue [water] on map) is "Constrained" and does not meet the Standard
- **Aviara - Zone 19, Ponto - Zone 9 and Hanover/Poinsettia Shores – Zone 22 all developed around the same time and had similar vacant lands.**
- **City required Aviara - Zone 19 east of Ponto to provide the 15% Standard Open Space. Why not Ponto? Aviara had the same lagoon waters.**
- **City required Hanover & Poinsettia Shores area Zone 22 just north of Ponto to provide the 15% Standard Open Space. Why not Ponto?**
- Why Ponto developers were never required to comply with the 15% Standard Open Space is subject to current litigation
- Below is City GIS data from this map

**City GIS map data summary of the 15% Growth Management Standard Open Space at Ponto**

472 Acres  
(197 Acres)  
 275 Acres  
X 15%  
 41 Acres  
(11 Acres)  
**30 Acres**

Total land in LFMP Zone 9 [Ponto]  
 Constrained land excluded from GMP Open Space  
 Unconstrained land in LFMP Zone 9 [Ponto]  
 GMP Minimum Unconstrained Open Space requirement  
 GMP Minimum Unconstrained Open Space required  
 GMP Open Space provided & mapped per City GIS data  
**Missing Unconstrained Open Space needed in LFMP Zone 9 [Ponto] to meet the City's minimum GMP Open Space Standard per City's GIS map & data**

**73% of the City's minimum 15% required Open Space Standard is missing due to over development of LFMP Zone 9 [Ponto]**

### **Sea Level Rise impacts on Open Space and Open Space Land Use Planning at Ponto:**

The City's 2015 General Plan Update did not factor in the impacts of Sea Level Rise (SLR) on Ponto's Open Space land. In December 2017 the City conducted the first Sea Level Rise Vulnerability Assessment <https://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=33958>. The 2017 SLR Assessment is an initial baseline analysis, but it shows significant SLR impacts on Ponto Open Space. More follow-up analysis is being conducted to incorporate newer knowledge on SLR projections and coastal land erosion accelerated by SLR. Follow-up analysis may likely show SLR impacts occurring sooner and more extreme.

Troublingly the 2017 SLR Assessment shows SLR actually significantly reducing or eliminating Open Space land at Ponto. SLR is projected to only impact and eliminate Open Space lands and Open Space Land Use at Ponto. The loss of Ponto Open Space land and Land Use being at the State Campground, Beaches, and Batiquitos Lagoon shoreline. The losses of these Open Space lands and land uses would progress over time, and be a permanent loss. The 2017 SLR Assessment provides two time frames near-term 2050 that match with the Carlsbad General Plan, and the longer-term 'the next General Plan Update' time frame of 2100. One can think of these timeframes as the lifetimes of our children and their children (2050), and the lifetimes of our Grandchildren and their children (2100). SLR impact on Coastal Land Use and Coastal Land Use planning is a perpetual (permanent) impact that carries over from one Local Coastal Program (LCP) and City General Plan (GP) to the next Updated LCP and GP.

Following (within quotation marks) are excerpts from Carlsbad's 2017 Sea Level Rise Vulnerability Assessment:

*[Italicized text within brackets]* is added data based on review of aerial photo maps in the Assessment.

"Planning Zone 3 consists of the Southern Shoreline Planning Area and the Batiquitos Lagoon. Assets within this zone are vulnerable to inundation, coastal flooding and bluff erosion in both planning horizons (2050 and 2100). A summary of the vulnerability assessment rating is provided in Table 5. A discussion of the vulnerability and risk assessment is also provided for each asset category.

#### 5.3.1. Beaches

Approximately 14 acres of beach area is projected to be impacted by inundation/erosion in 2050. ... Beaches in this planning area are backed by unarmored coastal bluffs. Sand derived from the natural erosion of the bluff as sea levels rise may be adequate to sustain beach widths, thus, beaches in this reach were assumed to have a moderate adaptive capacity. The overall vulnerability rating for beaches is moderate for 2050.

Vulnerability is rated moderate for the 2100 horizon due to the significant amount of erosion expected as the beaches are squeezed between rising sea levels and bluffs. Assuming the bluffs are unarmored in the future, sand derived from bluff erosion may sustain some level of beaches in this planning area. A complete loss of beaches poses a high risk to the city as the natural barrier from storm waves is lost as well as a reduction in beach access, recreation and the economic benefits the beaches provide.

#### 5.3.3. State Parks

A majority of the South Carlsbad State Beach day-use facilities and campgrounds (separated into four parcels) were determined to be exposed to bluff erosion by the 2050 sea level rise scenario (moderate exposure). This resource is considered to have a high sensitivity since bluff erosion could significantly impair usage of the facilities. Though economic impacts to the physical structures within South Carlsbad State Beach would be relatively low, the loss of this park would be significant

since adequate space for the park to move inland is not available (low adaptive capacity). State parks was assigned a high vulnerability in the 2050 planning horizon. State park facilities are recognized as important assets to the city in terms of economic and recreation value as well as providing low-cost visitor serving amenities. This vulnerability poses a high risk to coastal access, recreation, and tourism opportunities in this planning area.

In 2100, bluff erosion of South Carlsbad State Beach day-use facilities and campgrounds become more severe and the South Ponto State Beach day-use area becomes exposed to coastal flooding during extreme events. The sensitivity of the South Ponto day-use area is low because impacts to usage will be temporary and no major damage to facilities would be anticipated. Vulnerability and risk to State Parks remains high by 2100 due to the impacts to South Carlsbad State Beach in combination with flooding impacts to South Ponto.

Table 5: Planning Zone 3 Vulnerability Assessment Summary [condensed & notated]:

<u>Asset Category</u>	<u>Horizon [time]</u>	<u>Hazard Type</u>	<u>Impacted Assets</u>	<u>Vulnerability Rating</u>
Beaches	2050	Inundation/Erosion, Flooding	<b>14 acres</b> (erosion)	Moderate
	2100	Inundation/Erosion, Flooding	<b>54 acres</b> (erosion)	Moderate
Public Access	2050	Inundation, Flooding	6 access points <b>4,791 feet of trails</b>	Moderate
	2100	Inundation, Flooding	10 access points <b>14,049 feet of trails</b>	Moderate
State Parks <i>[Campground - Low-cost Visitor Accommodations]</i>	2050	Flooding, Bluff Erosion	4 parcels [ <b>&lt;18 Acres</b> ]	High
	2100	Flooding, Bluff Erosion	4 parcels [ <b>&gt;18 Acres</b> ] <i>[loss of over 50% of the campground &amp; its Low-cost Visitor Accommodations, See Figure 5.]</i>	High
Transportation (Road, Bike, Pedestrian)	2050	Bluff Erosion	<b>1,383 linear feet</b>	Moderate
	2100	Flooding, Bluff Erosion	<b>11,280 linear feet</b>	High
Environmentally Sensitive Lands	2050	Inundation, Flooding	<b>572 acres</b>	Moderate
	2100	Inundation, Flooding	<b>606 acres</b>	High

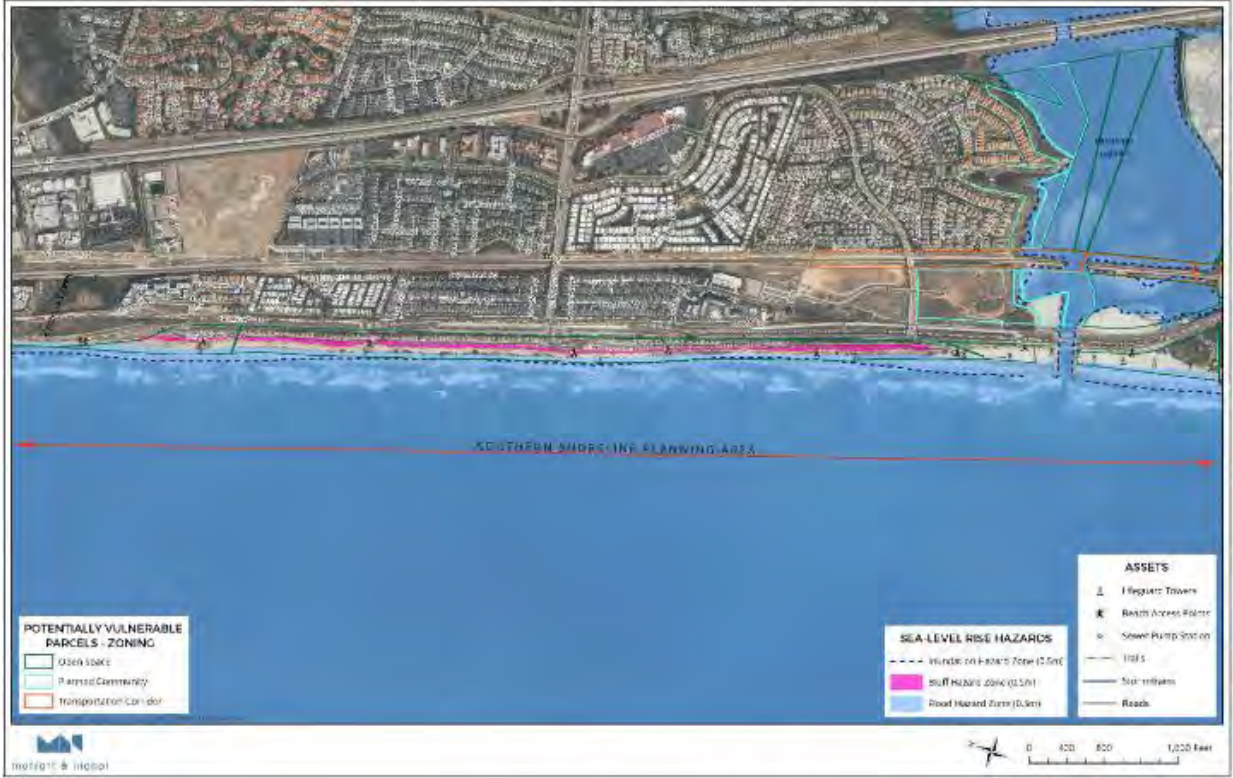

Figure 7: Southern Shoreline Planning Area – Year 2050

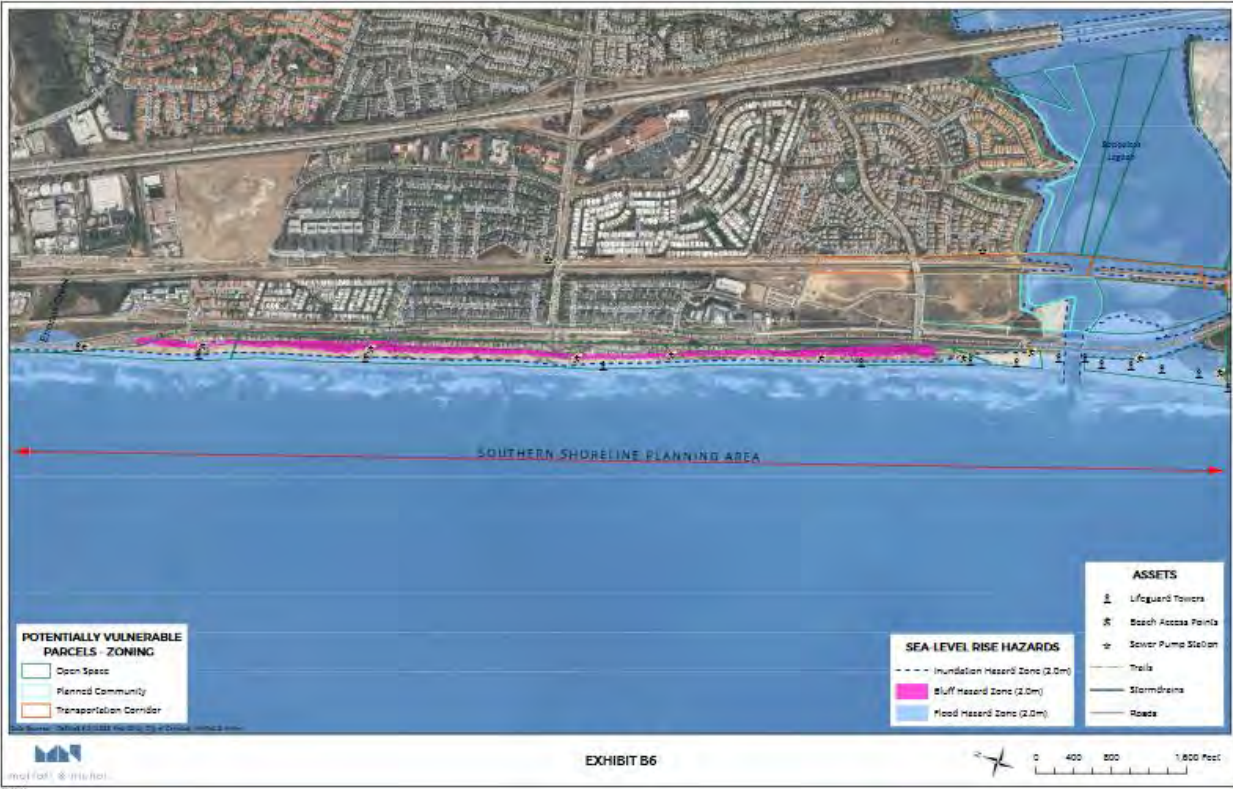

Figure 5: CoSMoS Bluff Erosion Projections by 2100  
(CoSMoS-COAST 2015)

[Figure 5 show the loss of over 50% of the campground and campground sites with a minimal .2 meter Sea Level Rise (SLR), and potentially the entire campground (due to loss of access road) in 2 meter SLF.]”

**Directions to analyze and correct current and future LOSS of Coastal Open Space Land Use at Ponto**

On July 3, 2017 the CA Coastal Commission provided direction to Carlsbad stating:

“The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto ... area. For example, Planning Area F requires the city and developer to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e., public park) on the west side of the railroad. ... this study should be undertaken as a part of the visitor serving use inventory analysis described above. If this analysis determines that there is a deficit of low cost visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed.”

Official Carlsbad Public Records Requests (PRR 2017-260, et. al.) confirmed Carlsbad’s Existing LCP and its Ponto specific existing LUP polices and Zoning regulations were never followed in the City’s prior Ponto planning activities (i.e. 2010 Ponto Vision Plan & 2015 General Plan Update). The projected SLR loss of recreation (beach) and low-cost visitor accommodations (campground) at Ponto should factor in this Existing LCP required analysis, and a LCP-LUP for Ponto and Ponto Planning Area F.

In a February 11, 2020 City Council Staff Report City Staff stated:

“On March 14, 2017, the City Council approved the General Plan Lawsuit Settlement Agreement (Agreement) between City of Carlsbad and North County Advocates (NCA). Section 4.3.15 of the Agreement requires the city to continue to consider and evaluate properties for potential acquisition of open space and use good faith efforts to acquire those properties.”

In 2020 NCA recommended the City acquire Ponto Planning Area F as Open Space. The status of City processing that recommendation is unclear. However the Lawsuit Settlement Agreement and NCA's recommendation to the City should also be considered in the required Existing LCP analysis.

**Summary:**

Tragically Carlsbad's Draft Local Coastal Program – Land Use Plan Amendment (DLCP-LUPA) is actually planning to both SIGNIFICANTLY REDUCE Coastal Open Space acreage, and to eliminate 'High-Priority Coastal Open Space Land Uses at Ponto due to SLR.

The Existing LCP requirements for Ponto Planning Area F to analyze the deficit of Coastal Open Space Land Use should factor in the currently planned LOSS of both Coastal Open Space acreage and Coastal Open Space Land Uses at Ponto due to SLR. As a long-range Coastal Land Use Plan this required LCP analysis needs to also consider the concurrent future increases in both population and visitor demand for those LOST Coastal Open Space acres and Coastal Open Space Land Uses.

It is very troubling that demand for these CA Coastal Act 'High-Priority' Coastal Open Space Land Uses is increasing at the same time the current (near/at capacity) supply of these CA Coastal Act 'High-Priority' Coastal Open Space Land Uses is significantly decreasing due to SLR. Instead of planning for long-term sustainability of these CA Coastal Act 'High-Priority' Coastal Open Space Land Uses for future generations there appears to be a plan to use SLR and inappropriate (lower-priority residential) Coastal Land Use planning to forever remove those CA Coastal Act 'High-Priority' Coastal Open Space Land Uses from Ponto. CA Coastal Act Policies to address these issues should be thoroughly considered.

2021-2 proposed Draft Local Coastal Program – Land Use Plan Amendment (DLCP-LUPA) will likely result in City and CA Coastal Commission making updates to the 2015 General Plan, based on the existing Ponto Planning Area F LCP – LUP Policy requirements, Ponto Open Space issues, high-priority Coastal Land Use needs, and SLR issues not addressed in the 2015 General Plan.

March 11<sup>th</sup>, 2022

Carlsbad City Council  
1200 Carlsbad Village Drive  
Carlsbad, CA 92008

**Re: Support creation of Ponto Park – a needed park for South Carlsbad**

Dear Mayor Hall,

The Trust for Public Land (TPL) is strongly supporting the efforts of 'People for Ponto' and thousands of Carlsbad residents to build Ponto Park in the 11-acre coastal parcel known as 'Planning Area F' in South Carlsbad. For over 40-years TPL has been designing and building parks in California and although we have world-class parks and beaches, the fact remains 3.2 million Californians don't have access to a park, and some of those Californians are residents of South Carlsbad. While the National Recreation and Park Association calls for 10-acres of park lands per 1000 residents as standard metric for healthy and vibrant cities, Carlsbad has a comparatively and relatively low park standard of only 3-acres/1,000 population and no requirement to provide accessible parks within walking distance.

And according to our own Trust for Public Land 2020-21 'City Parkscore', Carlsbad is also below national averages both providing park land acreage and in providing residents a park within a 10-minute walk.

The City of Carlsbad's Park Master Plan on pages 86-89 documents park service and park equity/inequity. Carlsbad's Park Master Plan documents that Ponto area has no park and all of South Carlsbad (over 61% of the entire city population) has no Coastal Park while . Carlsbad provides 10 City Coastal Parks (totaling over 35-acres) in North Carlsbad, while South Carlsbad has no coastal parks to serve the 64,000 residents, many of which are children. Ponto Park at 11-acre Planning Area F is the last remaining reasonable bit of vacant and currently unplanned Coastal land to provide a Coastal Park for South Carlsbad. Ponto Park would also be in the middle of a 6-mile long section of North San Diego County coastline without Coastal Park, and would help address a regional need for a Coastal Park for these 6-miles of coastline.

The CA Coastal Act has numerous policies that support the creation of Ponto Park and Coastal Recreation land use. The City of Carlsbad's history of following these CA Coastal Act policies now and over the past 40-years in its Local Coastal Program should be considered now in the City's proposed Local Coastal Program Amendment. Over the past 40-years Carlsbad and California residents have forever

lost numerous opportunities to create vital Coastal Parks and Coastal Recreation for our growing population.

In addition to the clear need for coastal parks in South Carlsbad, the citizens are overwhelmingly supporting the creation of Ponto Park in Planning area F. As you know during the past 2-years during the City Budget and Local Coastal Program Amendment processes, residents strongly demonstrated their desire that the City Council purchase and build Ponto Park. In 2019, 2020 and 2021 over 90% of citizen input expressed need was for Ponto Park, along with extensive verbal and written citizen testimony.

As COVID-19 vividly pointed out, parks are not an amenity, but a key component to human physical and mental health. Parks also provide environmental benefits and contribute to cleaner air and water, climate adaptation and social cohesion. TPL think you have a great opportunity to address equity and access to park space and improving the lives of thousands of Carlsbad residents and strongly urge you to support the building of Ponto Park for families and community.

Sincerely,

Rico Mastrodonato  
Government Relations Director

Playing pickle ball on tennis court. As a both a tennis and pickle ball player , I would like to ask that Carlsbad tennis courts be open to either player. I have played at Kelly Park where tennis players have the gaul to protest players that choose to use pickle ball equipment on these courts open to the public. Now we see signs preventing pickle ball on these courts , obviously a result of tennis players protesting. Other cities ( I moved into Carlsbad from the Bay Area ) like Palo Alto seem to be responding to the increased demand and have granted access to both types of players to their public courts. I hope that Carlsbad can be progressive as well and take down these offensive signs and allow equal opportunity access to play any racket sport on these courts that my tax dollars support

**Subject:** Public Input To Carlsbad Park Master Plan Update & LCPA - Critical data the Parks Commission & CCC should read-Consider  
**Importance:** High

Dear Carlsbad Commission, City Council and **Park Commission**; and CA Coastal Commission:

The data input below is for Carlsbad Parks Master Plan Update and LCPA regarding local City Parks and Coastal Parks. This was emailed below last week, but not sure if the data was provided to the Carlsbad Park Commission and being considered by the Commission and Council in the aforementioned update and LCPA. So resending to make sure the data is delivered as addressed and considered.

Given the many People for Ponto Citizens that have provided data/desires regarding Ponto Park we would have assumed the City would have provided some advance notice to People for Ponto Citizens so they could again provide public input, v. learning after the fact a meeting was held of expressed concern by citizens. It appears no such advance notice was provided

In emails Kyle Lancaster confirmed that ALL the People for Ponto public input since 2017 would be provided to the Parks Commission during the Park Master Plan Update public input process. There is well over 5,500 data emails/petitions that have been sent since 2017, and P4P Carlsbad Citizens would like confirmation that that input is being provided to the Parks Commission and is being considered. Can documentation of that be provided?

The public input data below, and since 2017, is important.

Thank you.

Lance Schulte

**Subject:** 5/23/23 PC mtg Item #4 - Carlsbad & CA State laws on Park land dedication and fees - 5 acre per 1,000 population

Dear Carlsbad Planning Commission, City Council and **Park Commission**; and CA Coastal Commission and State Parks:

The Carlsbad Planning Commission (or City Council on appeal) should require Fenton the Ponto Developer of a portion of Ponto Site 18 to provide their required Parkland Dedication in actual Parkland at Ponto. Carlsbad staff should also be more honest and publicly communicate to Carlsbad Citizens the documented data enclosed in the email so Carlsbad Citizens are properly informed about Ponto Park issues and have a true and honest opportunity to provide input to the City and CA Coastal Commission.

As noted below I requested the email and data below be provided to you for the Ponto Site 18 related land use changes/development proposal that clearly documents the City's Parkland Dedication Ordinance (CMC 20.44) and standards that clearly states per 20.44.040 & 20.44.050 that it is the City's "decision making body" for the development proposal, i.e. Planning Commission or City Council, that decides if Park land is required or a commensurate Park in lieu fee will be required from the developer. Eric lardy has confirmed with me that the Planning Commission can legally ask for free City Parkland at Ponto to be provided by Fenton the Ponto developer per CMC 20.44 . However, it appears Eric has not provided that same information to the Planning Commission or Public.

As has been communicated to you and City the Planning Commission (as the "decision making body") should on May 3<sup>rd</sup> for Agenda Item #4 require developers at Ponto (Fenton) to provide their required by 20.44 Parkland dedication as an actual City dedication of land to the City for a Park as primarily intended by 20.44. This dedication of land will be free to the City and as noted in the financial calculations in the email below result in the City receiving over \$1 million more parkland value than a sub-standard in-lieu-fee. Requiring Fenton the Ponto developer to provide their require Parkland dedication in land as primarily intended by 20.44 and CA law is the smart, and right decision. Additional reasons the Planning Commission (or City Council on appeal) should require the Primary Land Dedication are:

1. Over 5,000 formally written petitions have been sent to the City Council, Planning and Parks Commissions; and CA Coastal Commission asking that a much needed Public Park be provided at Ponto for both the 6.5 acre City Park needs of the Ponto residents and also for the Coastal Park needs for all of South Carlsbad that has no Coastal Park west of I-5 and Railroad corridor. There is also a regional need for a Coastal park at Ponto as Ponto is in the center of a 6-mile long section of coastline without any Coastal Park, and the Low-cost visitor Accommodation land use of the State Campground is planned to be further reduced or eliminated by Sea Level Rise and Coastal erosion and there is no plan and funding in place to address this loss.
2. Following is what Carlsbad Citizens told the City Council what they wanted the City to budget for and fund – Ponto Park. The Planning Commission getting free to the City Parkland at Ponto is the City's most cost effective way to provide a Ponto Park.

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

7. The City and Carlsbad Taxpayers lose over \$1million in Parkland value if the Planning Commission fails to require Fenton provide their required CMC 20.44 Parkland Dedication as actual land dedicated at Ponto. Planning Commission failure to legally capture this lost value will push the cost of this lost value onto current/future Carlsbad tax-payers to make up for lost land value. See the legal and financial CMC 20.44 analysis in the 1/24/23 email below.
8. City has indicated it will Cost Carlsbad tax-payers at least \$65-80 million for a 3-mile PCH Relocation from Island Way to La Costa Avenue that per the City's 2001 PCH Relocation Analysis will only MAYBE make available about 16-acres of Carlsbad Blvd (aka Coast Highway/PCH) "surplus land" in this area for uses that maybe different than what they are used for now which is mostly constrained protected habitat. The City's 2001 Land Use and Financial Feasibility Studies of PCH Relocation has already 1) documented these 16 acres of "surplus land" which is mostly very narrow and highly constrained, 2) itemized only about 4 acres of reasonable Park land in North of Palomar Airport Road that maybe created from PCH Relocation, and 3) clearly documented that outside funding for PCH Relocation is very unlikely so most or the entire \$65-80 million cost for these 16 acres will be paid for by Carlsbad tax-payers. Carlsbad's 2001 PCH Relocation Financial study concluded the only viable way to pay for PCH Relocation was to sell most all the "documented and numbered Surplus Land" for commercial uses. So per the City's 2001 financial report PCH Relocation is not an Open Space or Park project but a land development project. Per Proposition H Carlsbad tax-payers will have to vote if they want the City to send \$65-80 million for maybe allowing some of 16 acres of Surplus land available for other uses, or \$4 to \$5 million per "surplus acre". Recent polling by the City shows that Carlsbad Citizens are not wanting PCH Relocation and voting for PCH Relocation is high unlikely. Verbatim Summary information from the City's 2001 PCH Relocation Studies by URS and ERA include:
  - a. The 2001 URS Carlsbad Boulevard Realignment Study documented the amount of potential "Surplus land" created by PCH Relocation as noted below. Only "Surplus Areas 4, 5 and 6A" which total 16.5 acres are in South Carlsbad (South of Palomar Airport Road) and need PCH Relocation to be accessible. Surplus Area 6A is east of PCH and can be used now without any PCH Relocation. The City has been misrepresenting how much "surplus land" is created by PCH Relocation. A lot of PCH land is does not need Relocation to be used for needed sidewalks and enhancing current bike lanes. The City incorrectly communicates that 60 acres of City land can be used due to PCH Relocation, which is not correct per the City's own 2001 URS Carlsbad Boulevard Realignment Study.

**4.1 LAND USE ANALYSIS**

Figure 4-1A shows the General Plan Land Use Designations, and Figure 4-1B shows the Zoning Designations. Most of the project area is residential, open space/unplanned, and industrial. The parcels being considered for this project are all currently designated as open space.

**4.1.1 Surplus Lands**

A City-provided GIS parcel map was used in conjunction with a City-generated map showing land ownership in the project area to calculate the acres of land remaining after Carlsbad Boulevard is realigned (Figure 1-3). Additionally, the amount of land owned by the State in the area north of Palomar Airport Road and south of Manzano Drive was calculated. The acres of land available following realignment of Carlsbad Boulevard are shown in Table 4.1-1. The amount of City-owned land available for other uses following realignment of Carlsbad Boulevard is approximately 41 acres. The amount of land owned by the State in the area north of Palomar Airport Road and south of Manzano Drive is approximately 15 acres.

**Table 4.1-1  
LAND OWNERSHIP AND AMOUNT OF LAND AVAILABLE  
CARLSBAD BOULEVARD REALIGNMENT**

Landowner	Acreage
City of Carlsbad	41
State of California	15

The surplus useable land that will result from realigning Carlsbad Boulevard has been grouped into a total of seven surplus land areas, described in Table 4.1-2 below and illustrated in Figures 1-3 through 1-10.

**Table 4.1-2  
SURPLUS LAND AREA DESCRIPTIONS  
CARLSBAD BOULEVARD REALIGNMENT**

Surplus Land Area Number	Surplus Land Area Name	Acreage	Owner
1	Manzano Parcel	20.8	State: approximately 14 acres City: approximately 6 acres
2	Palomar Point	5.1	State: approximately 0.5 acre City: approximately 4.5 acres
3	North Ponto Beach	10.1	City
4	State Beach and Campground	13.7	City
5	Boca Beach	2.3	City
6A	Seapointe Parcel	0.5	City
6B	PA "F" Frontage	2.0	City

- b. The 2001 ERA Carlsbad Boulevard Realignment Study used the URS data to fiscally analyze alternative scenarios for realigning Carlsbad Boulevard away from the coast bluff edge and, in the process, creating opportunities for commercial, recreation, and open space uses. One of the study's objectives is to explore ways to generate revenue from useable public land created, including potential land sale or lease opportunities, and using this revenue to help offset the cost of realigning the road.
- c. The scenario that provided the most "Park and Open Space" is Alternative 1. The PCH Relocation "Surplus Areas" that are in South Carlsbad are #4, 5 and 6A or 6B as documented below. Table 1 below documents how many Gross Acres of "Surplus land Area" PCH Relocation provides. The report notes that there are many Constraints on these "Surplus Areas" and the acres listed below may not be achievable or may cost much more to be made/mitigated to be used as noted.

Table 1: DEVELOPMENT PROGRAM SCENARIOS - Alternative 1 - Parks and Open Space

e.

Qualifications: While it appears that alternatives 3 and 4 generate enough revenue to cover development costs, the findings at this preliminary planning stage of analysis are qualified, as follows: •

The cost estimates are based on gross cost factors and need to be refined as project design becomes more specific. • The cost estimates do not include any extraordinary off-site costs, such as for environmental or traffic mitigation. • Some of the parcels identified for potential development, particularly those west of the alignment, may be vulnerable to long term erosion problems; therefore, their stability needs to be verified. • Most of the value is generated on Surplus Area 1 [aka the Manzano Drive Site that is north of Palomar Airport Road], which is owned by the State of California. The City or Redevelopment Agency would not realize the value of Surplus Area 1 unless the State trades the parcel to the City or Agency for other considerations. Therefore, the City or Agency may not be able to apply proceeds from the value of Surplus Area 1 to road realignment and public facility costs.

- f. [other tax-payer funding] CONCLUSION: Both the SANDAG representative and the CalTrans Local Assistance Program representative noted that most road or highway realignments are done to facilitate development. Policymakers are aware of this and generally design funding programs in a way that encourages the private sector to pay for as much of the project costs as possible. Programs are also designed to encourage municipalities to utilize funds from their share of the gas tax, TransNet, and even the General Fund and Community Development Block Grants before turning to State and Federal funds. Finally, due to the limited funds available, all funding sources give priority to projects of a regional significance over those of local importance.

Since PCH Relocation is not needed to add any new roadway (or bike lane or sidewalk) capacity to PCH, and in fact will DECREASE vehicle roadway capacity if PCH is converted from 4 to 2 lanes, additional roadway funding to Relocate PCH is unlikely. The cost of PCH Relocation will therefore likely fall predominately on Carlsbad tax-payers. The tax-payer value of PCH Relocation has always been questionable at best. That is the reason it has not been built over the past 40-years and even now the City's General Plan DOES NOT COMMIT to providing PCH Relocation only that it "may" or 'may not' ever happen. A People for Ponto Citizen prepared using City cost data A Cost-Benefit Analysis comparing PCH Relocation with simply providing the missing sidewalks on PCH and buying Vacant Ponto land for a Ponto Park. That Cost-Benefit Analysis showed that Buying Ponto Park would save Carlsbad's and other tax-payers tens of millions of tax-dollars and while also providing more and better Park and beach parking facilities and benefits. These 2001 Study and People for Ponto's Cost-Benefits facts need to be publicly disclosed to and considered by the Planning Commission.

9. As noted in 20.44 there is nothing in Carlsbad's Growth Management Program that supersedes or prevents the Planning Commission (or City Council on appeal) from requiring the Parkland dedication as land. A Carlsbad City Ordinance and City discretion on how to augment /address City Park needs supersedes a LFMP plan. The City has clearly demonstrated this fact in its most recent Park - Buena Vista Reservoir Park (aka Poinsettia 61) in NW Carlsbad; and in its suggestion that PCH Relocation is the Park solution. All the City's Growth Management documents (both Citywide and LFMP Zone 1) DID NOT include require, include or even mention Buena Vista Reservoir Park. Nor do they mention PCH Relocation. The City used its authority to provide Buena Vista Reservoir Park independently and outside of any Growth Management plan . The City did not Violate its Growth Management Plan by creating Buena Vista Reservoir Park, and the Planning Commission and City are legally allowed to create a City Park at Ponto and are legally allowed to require the Ponto developer provide their Parkland dedication requirement as actual Parkland at Ponto.
10. The City is in the process of updating its Growth Management Program. The need for Ponto Park was the most Citizen requested item submitted to the City's Carlsbad Tomorrow Growth Management Committee with well over 100 emails and many speakers over many meetings. The Growth Management Update Committee was prevented from making Ponto need and Ponto specific recommendations to the City Council, but the **has recommended**
11. The City is the worst Coastal City for 165 miles of coastline from the City of Malibu to the City of Imperial Beach in providing Parkland access to its citizens. Requiring Fenton the Ponto developer to provide their Required Parkland as land at Ponto will be a small but very important step in the right direction to start digging Carlsbad out of being dead last in providing park access. The Trust for Public Land has mapped and documented this fact. The Trust for Public Land has also sent a letter to the City and City Council highlighting the need for a City Park at Ponto. The Planning Commission should have been provided a copy of the Trust for Public Land's letter. Following is the Trust for Public Land data showing that Carlsbad is the worst City in providing Park access to its citizens. Ponto is one of worst areas in Carlsbad for City Park access per the City's Park Master Plan. The

Planning Commission getting .7 acres of free City Parkland at Ponto as Fenton is required to provide by CMC 20.44 will help Carlsbad move from being the worst City in Coastal So. California in providing Park access for its citizens.

The Trust for Public Land documents a city's 10-minute walk to Park at <https://www.tpl.org/parkserve>  
The Average USA City provides Parks within 10-minute walk to 55% of residents [10% above Carlsbad].  
**Carlsbad provides Parks within 10-minute walk to 49.9% of residents [10% below National Average].**  
New York City provides Parks within 10-minute walk to 99% of residents.

**The Trust of Public Land submitted a letter to the City of Carlsbad, CA Coastal Commission, and CA State Park supporting Ponto Park**

**Carlsbad is the worst of 24 Southern CA Coastal cities (from Malibu south to Imperial Beach along 165 miles of coastline) in providing Parks within 10-minute walk to residents:**

1. Palos Verdes Estates provides Parks within 10-minute walk to 100% of residents
2. El Segundo provides Parks within 10-minute walk to 100% of residents
3. Hermosa Beach provides Parks within 10-minute walk to 100% of residents
4. Redondo Beach provides Parks within 10-minute walk to 98% of residents
5. Manhattan Beach provides Parks within 10-minute walk to 95% of residents
6. Del Mar provides Parks within 10-minute walk to 93% of residents
7. Dana Point provides Parks within 10-minute walk to 89% of residents
8. Huntington Beach provides Parks within 10-minute walk to 85% of residents
9. Long Beach provides Parks within 10-minute walk to 84% of residents
10. Laguna Beach provides Parks within 10-minute walk to 82% of residents
11. Santa Monica provides Parks within 10-minute walk to 82% of residents
12. San Diego provides Parks within 10-minute walk to 81% of residents
13. Coronado provides Parks within 10-minute walk to 76% of residents
14. Newport Beach provides Parks within 10-minute walk to 76% of residents
15. Imperial Beach provides Parks within 10-minute walk to 74% of residents
16. Encinitas provides Parks within 10-minute walk to 68% of residents
17. Los Angeles provides Parks within 10-minute walk to 63% of residents
18. Solana Beach provides Parks within 10-minute walk to 63% of residents
19. Oceanside provides Parks within 10-minute walk to 58% of residents
20. Seal Beach provides Parks within 10-minute walk to 57% of residents
21. Malibu provides Parks within 10-minute walk to 53% of residents
22. San Clemente provides Parks within 10-minute walk to 52% of residents
23. Rancho Palos Verdes provides Parks within 10-minute walk to 50% of residents
24. **Carlsbad provides Parks within 10-minute walk to 49.9% of residents.**

**Carlsbad is the lowest & most unfair to citizens of the 24 Southern California Coastal cities along 165 miles of coast from Malibu to Imperial Beach.**

*Source of data: Trust for Public land parkscores*

Trust for Public Land's 10-minute walk to Park Maps/data:  
Carlsbad = <https://parkserve.tpl.org/mapping/index.html?CityID=0611194#reportTop>  
Encinitas = <https://parkserve.tpl.org/mapping/index.html?CityID=0622678>  
Irvine = <https://parkserve.tpl.org/mapping/index.html?CityID=0636770>

Planning and Park Commissions, City Council and CA Coastal Commission, please require Fenton provide their City Parkland dedication requirement as actual Parkland at Ponto as legally allowed by CMC 20.44. It is the right, it is legal thing to do. Please also ready the Data in the 1/24/23 email below that you should have been provided earlier.

**Subject:** 1-26-23 CTGMC mtg - CA State law on Park land dedication and fees - 5 acre per 1,000 population

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks and Planning Commissions, , CA Coastal Commission and CA State Parks:

As the City has requested specific reference regarding public input, I ask you to please deliver to the those address this email and attachment as public input for:

1. the CTGMC's 1/26/22 meeting,
2. the next Carlsbad Council meeting,
3. the next Carlsbad Planning and Parks Commission meetings on the Parks Master Plan and Growth Management Program Updates, Ponto Planning Area F and Site 18 land use changes, and Local Coastal Program Amendments, and
4. as public input to the CCC on Carlsbad proposed Local Coastal Program, and
5. as public input to Carlsbad's proposed Local Coastal Program Amendment.

At the 1-11-22 CTGMC meeting comments are what is the State Park Land Dedication Standard. This Standard (the Qumby Act) defines under that Ca Subdivision code how much land a city in the State of CA can require or developers to provide a city for park land. I recall the It was apparently incorrectly mentioned as 3 acres of Park land per 1,000 population was the State Standard, where as it is up to 5 acres per 1,000 population. Following is a link to the CA Qumby Act and the citation that 5 acres per 1,000 population can be required of new development.

[https://codelibrary.amlegal.com/codes/taftca/latest/taft\\_ca/0-0-0-12312](https://codelibrary.amlegal.com/codes/taftca/latest/taft_ca/0-0-0-12312)

“10-11-6: LAND DEDICATION AND FEE DETERMINATIONS: .... (C) The amount of land to be dedicated shall be based on the number of units in the subdivision multiplied by the number of persons per dwelling (as determined pursuant to subsection (B) of this section) **multiplied by five (5) acres per one thousand (1,000) city inhabitants (section 66477 of the subdivision map act)**”

I hope this data clears up confusion on how many acres of Park land Carlsbad can require of new development. It seems prudent to require developers provide the maximum amount of Park land per State law and not less, and most particularly in areas of Carlsbad that have no accessible Park within a 10-minute walk.

Thank you, and with Aloha Aina for Carlsbad,  
Lance

**Subject:** 1-26-23 CTGMC mtg - public input on Carlsbad Parkland Dedication Ordinance and City losses

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks, Housing and Planning Commissions, , CA Coastal Commission and CA State Parks:

Please again consider this email and attachment on 1/26/23.

This may clear up some what appeared to be a miscommunication by staff on 1/11/23 that appeared to say that the developer can decide how to comply with the Park Dedication Ordinance (Dedicate land or pay an in-lieu-of-dedication fee). This is not correct. Per 21.44 a develop may propose, but it is the City that decides how and where the Park land required is to be provided. Per 21.44.040 & 21.44.050 of the City's Park Dedication Ordinance Clearly states it is the City “decision making body” for the development proposal, i.e. Planning Commission or City Council, that decides is Park land is required or a commensurate Park in lieu fee will be required from the developer. In almost all instances Park land in the area (aka 10-minutewalk) of the development is better as that is where the development's Park land demand is created and where additional Park land supply should be created.

I hope this email and data helps the CTGMC in address the critical Park Land needs in various areas of Carlsbad, and this Ponto Site 18 example provides actual data using a currently proposed project in an area Carlsbad's Park Master Plan (current but soon to be changed) indicates is 'unserved by parks' and should be an area where new parks should be provided.

Please note in this Ponto Site 18 example there IS vacant land (about 1 acre) left-over after the development that the developer could dedicate to the City for the developer's Park Land dedication requirement. The CTGMC would be thoughtful to include in your Standard recommendations to include strong policy requirements to get Park land v. fees in areas needing Parks.

Thank you,  
Lance

**Subject:** public input on Carlsbad Parkland Dedication Ordinance and City losses

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks, Housing and Planning Commissions, , CA Coastal Commission and CA State Parks:

Please consider this data file and public input email/attachment in the CTGMC, Housing Element and Parks Master Plan Updates, Proposed Local Coastal Program Amendment, and the Ponto Site 18 proposed land use changes and development application.

'Example of Carlsbad's Park-in-lieu Fee failing to actually provide the required Parkland or improvements

The example is for Ponto Site 18 one of the City's proposed General Plan & Local Coastal Program land use changes to provide RHNA required housing sites for the years 2021-2029. Ponto Site 18 is the Ponto Storage site and surrounding lots. Ponto Site 18's map and City description is provided on pages 4-5 below.

**The example shows Carlsbad loses significant amounts of money, and more critically loses precious and irreplaceable Parkland that developers are required to provide for free. These City losses are absorbed by current and future Carlsbad tax-payers. For the relatively small 5 acre and 86 dwelling unit Ponto Site 18 proposal the loss to Carlsbad is \$ 1.084 million in lost parkland value. Below is the spreadsheet calculation of that loss.**

Beyond showing a typical over \$ 1 million loss per 86 dwellings, there is added concern for the CTGMC in that this example is a proposed Carlsbad General Plan & Local Coastal Program Land Use Change to try to accommodate the years 2021-2029 the RHNA requirement to add/increase Residential use. Every 8 years we are/will be changing our General Plan land use to add more high-density housing and increasing City Park demand particularly for areas developed more densely.

If these higher-density projects do not dedicate actual City Park within walking distance not only is Carlsbad loosing over \$1 million per 86 dwellings, we are losing free and easy opportunities to get City Parkland dedicated for free per CMC 20.44, and will slowly be degrading our Quality of Life in these areas and also Citywide.

Calculation of Ponto Site 18 Parkland dedication requirement and City losses from the Park-in-lieu Fee:

Ponto Site 18 - Fenton proposed development's Park land dedication requirement	
Park land dedication requirement per CMC 20.44	<a href="https://library.qcode.us/lib/carlsbad_ca/pub/municipal_code/item/title_20-chapter_20_44">https://library.qcode.us/lib/carlsbad_ca/pub/municipal_code/item/title_20-chapter_20_44</a>
US Census data	<a href="https://www.census.gov/quickfacts/fact/table/carlsbadcitycalifornia/POP060210#POP060210">https://www.census.gov/quickfacts/fact/table/carlsbadcitycalifornia/POP060210#POP060210</a>
Carlsbad Park Dedication Requirement is 3 acres of land per 1,000 population of the proposed development. Population of proposed development is based on population per household based on latest US Census data 2020 US Census data is 2.64 people per household	
FYI, Carlsbad 3 acres /1,000 is comparatively very low both locally and nationally. And there is no 'walkably requirement'. 5 acres /1,000 population is what Encinitas and Oceanside require along with a 10-minute walk location requirement.	
Fenton owns almost 6 acres of land in Site 18, 4.64 acres of which they want to develop now, and the other 1+ acre part they want to develop later. on the 4.64 acre site change VC-Visitor Commercial/R-15 (15 dwellings per acre) General Plan land use and Zoning to 100% residential and develop at 19.125 dwellings per acre on 4.64 acres. On the 1+ acre site, instead of providing their required Park land dedication, Fenton is proposing to develop the remaining 1 acre area (between PCH & Ponto Drive) as General Commercial. Instead of providing the required Park land dedication, Fenton is proposing to develop the remaining 1 acre area (between Pecha and Ponto Drive) as General Commercial.	
Site 18 (Fenton) development proposal for the 4.64 acre portion is development of 86 household units (over 19 dwelling units per acre in higher occupancy units than typical) consisting of:	
8	2-bedroom homes = 9% of total units proposed
40	3-bedroom homes = 47% of total units proposed
38	4-bedroom homes = 44% of total units proposed
86	100%
Fenton is proposing 91% of the project with 3 or 4 bedrooms so the project will have higher occupancy, and likely more children, per housing unit than the Citywide average of 2.64 people per housing unit	
Fenton Park land dedication requirement per CMC 20.44	
calculation	86 DU of Fenton proposed development
X	2.64 average population per DU per 2020 US Census
-	227 estimated population of Fenton project
/	1,000 population that needs 3 acres of Park land per CMC 20.44
-	0.22704 percentage of 3 acres of Park land required for 227 people
X	3 acres of Park land required per 1,000 people
-	0.68112 acres of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU
X	43,560 square feet per acre
-	29,670 square feet of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU
	1 acre of Fenton's unused vacant 'Ice plant lots' between PCH & Ponto Drive that can provide Fenton's Park land requirement
\$	398,696 per City Master Fee Schedule. Consistent with what Fenton said was would be the 'Park-in-lieu Fee for their 86 DU project
\$	50 Estimated SF cost Fenton paid for Ponto Site 18 or S 2.18 million per acre
\$	1,483,479 cost of 29,670 SF of Ponto Site 18 land to satisfy Fenton's Park land requirement
for the Ponto Site 18 5-acre 86 dwelling unit land use change and development proposal:	
\$	(1,064,783) Dollars the City is losing in Park land value and not receiving in its Park-in-lieu Fee, so this is a gift to the developer
	-73% % of lost Park land value City is losing and not receiving in its PIL Fee, so this is a City gift to the developer
\$	1,000,000 per acre cost to develop a Park like Buena Vista Reservoir Park
	43,560 square feet per acre
\$	22.96 Cost per sq. ft.
	29,670 square feet of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU
\$	681,120 Cost to develop Fenton's 29,670 sq. ft. of Park Land Dedication as a Park
\$ (282,424) Dollars City loses from Park-in-lieu Fees not even being adequate to cover Actual Minimal Park Development Costs	

Following this calculation:

- on page 3-4 are the relevant excerpts of Carlsbad's Dedication of Land for Recreational Purposes Ordinance 20.44, and
- on page 5-6 is the City's map and description of the proposed Ponto Site 18 land use change

## 20.44 Dedication of Land for Recreational Facilities

### 20.44.010 Purpose.

This chapter is enacted pursuant to the authority granted by Section 66477 of the Government Code of the State of California. The park and recreational facilities for which dedication of land and/or payment of a fee is required by this chapter are in accordance with the recreational element of the general plan of the City of Carlsbad. (Ord. 9614 § 1, 1982; Ord. 9190 § 2)

### 20.44.040 Standards and formula for dedication of land.

If the decision-making authority for the tentative map or tentative parcel map determines that a park or recreational facility is to be located in whole or in part within the proposed subdivision to serve the immediate and future needs of the residents of the subdivision, the subdivider shall, at the time of the filing of the final or parcel map, dedicate land for such facility pursuant to the following standards and formula:

The formula for determining acreage to be dedicated shall be as follows:

Average no. of persons per dwelling unit (based on most recent federal census)

x

3 park acres per 1,000 population

x

Total number of dwelling units

The total number of dwelling units shall be the number permitted by the city on the property in the subdivision at the time the final map or parcel map is filed for approval, less any existing residential units in single-family detached or duplex dwellings. The park land dedication requirement will be reviewed annually effective July 1, and adjusted as necessary by resolution of the city council to reflect the latest federal census data. (Ord. CS-192 § 49, 2012; Ord. CS-162 § 1, 2011; Ord. NS-757 § 1, 2005; Ord. NS-588 § 1, 2001; Ord. 9831 § 1, 1987; Ord. 9770 § 1, 1985; Ord. 9724 § 1, 1984; Ord. 9644 § 1, 1982; Ord.

### 20.44.050 Standards for fees in lieu of land dedication.

A. If the decision-making authority for the tentative map or tentative parcel map determines that there is no park or recreational facility to be located in whole or in part within the proposed subdivision, the subdivider shall, in lieu of dedicating land, pay a fee equal to the value of the land prescribed for dedication in Section 20.44.040 and in an amount determined in accordance with the provisions of Section 20.44.080.

B. If the proposed subdivision contains 50 parcels or less, only the payment of fees shall be required except that when a condominium project, stock cooperative, or community apartment project exceeds 50 dwelling units, dedication of land may be required notwithstanding that the number of parcels may be less than 50.

### 20.44.060 Determination of land or fee.

A. Whether the decision-making authority for the tentative map or tentative parcel map requires land dedication or elects to accept payment of a fee in lieu thereof, or a combination of both, shall be determined by the decision-making authority at the time of approval of the tentative map or tentative parcel map. In making that determination, the decision-making authority shall consider the following:

- 1 Park and recreation element of the general plan;
- 2 Topography, geology, access and location of land in the subdivision available for dedication;
- 3 Size and shape of the subdivision and land available for dedication;
- 4 The feasibility of dedication;
- 5 Availability of previously acquired park property.

B. The determination of the city council as to whether land shall be dedicated, or whether a

## POTENTIAL HOUSING SITES

Site Number: 18 – North Ponto Parcels

### SITE DESCRIPTION

The site is a group of eight vacant and underutilized properties in the Ponto area, located south of the Cape Rey Carlsbad Beach hotel and east of Carlsbad Boulevard. The site is bisected by Ponto Drive. North of Ponto Drive are three underutilized parcels containing a mini storage, miscellaneous buildings and other storage uses on nearly five acres. To the south, across Ponto Drive, is a cluster of five small vacant properties total just over an acre.

Site topography is generally flat. Some of the parcels may be constrained due to environmentally sensitive habitat. One parcel is alongside the railroad corridor. All the parcels are located outside the McClellan-Palomar Airport flight path.

The site does not include a vacant 11-acre parcel along either side of Ponto Drive and fronting Avenida Encinas. The parcel is commonly referred to as "Planning Area F."

### SITE FEATURES

- Vacant/underutilized
- Utilities accessible
- In the Coastal Zone
- Site constraints

### SITE OPPORTUNITY

The site consists of a mix of residential and non-residential land use designations. Two of the eight parcels have a split land use designation of VC (Visitor Commercial) and R-15 (11.5 to 15 dwelling units per acre, or du/ac). The one parcel alongside the railroad corridor is designated R-15. The R-15 designation often applies to small lot single family or detached or attached condominium development. The cluster of five vacant parcels south of Ponto Drive is designated GC (General Commercial). General Commercial permits a broad range of commercial uses. It also permits properties to be developed in a mixed-use format, with limited residential above first floor commercial.

Staff has received a letter from one property owner expressing support for higher density.

Except for the VC-designated portion of the two parcels, which is not anticipated to change, the redesignation of all parcels to R-23 is contemplated. R-23 is a residential designation the state identifies as suitable for moderate income households. The R-23 designation would permit a density range of 19 to 23 dwelling units per acre (du/ac). This density is typical of two- and three-story apartment and condominium developments.

To change any designation, amendments to the General Plan, Local Coastal Program, zoning, Poinsettia Shores Master Plan, and the Ponto Beachfront Village Vision Plan would be required. These amendments would require City Council and California Coastal Commission approval.

Upper area proposed for land use change & higher density

Part of Lower area can (should) be dedicated to provided needed parkland

Honorable Mayor Keith Blackburn, City Council Members, Melanie Burkholder, Priya Bhat-Patel, and Teresa Acosta.

Over the past several years the sport of pickleball has become the fastest growing sport in America. As the result, the need for additional outdoor Pickleball facilities has grown at an exponential rate. One factor contributing to the sustained growth of pickleball is that it is played by men, women and children of all age groups. Also, it is inexpensive to purchase Pickleball equipment and the game is much easier and less physically demanding than the sport of tennis.

Unfortunately, throughout these "past several years," the City of Carlsbad has built only six (6) dedicated outdoor Pickleball courts. During this time, many Carlsbad Pickleball players have attended City Planning and Council meetings urging decision makers to increase the availability of outdoor dedicated Pickleball courts. It has been brought to your attention that the use of our parks "court sports" assets is heavily skewed toward the game of tennis yet nothing has been done to remedy this situation.

Members of the Pickleball community understand the Growth Management Process and the time required to ensure the availability of outstanding facilities like our Poinsettia Community Park. They also see extremely long waits to play their game while tennis courts sit empty. In the case of Poinsettia, 50 feet away. From the standpoint of space efficiency, the area required for one tennis court, where up to four Tennis players can play, can contain four Pickleball courts that can accommodate up to sixteen players.

By this petition, Carlsbad Pickleball players are requesting that you promptly address and take steps to increase the availability outdoor courts for the game of Pickleball in Carlsbad.

Honorable Mayor Keith Blackburn, City Council Members, Melanie Burkholder, Priya Bhat-Patel, and Teresa Acosta.

Over the past several years the sport of pickleball has become the fastest growing sport in America. As the result, the need for additional outdoor Pickleball facilities has grown at an exponential rate. One factor contributing to the sustained growth of pickleball is that it is played by men, women and children of all age groups. Also, it is inexpensive to purchase Pickleball equipment and the game is much easier and less physically demanding than the sport of tennis.

Unfortunately, throughout these "past several years," the City of Carlsbad has built only six (6) dedicated outdoor Pickleball courts. During this time, many Carlsbad Pickleball players have attended City Planning and Council meetings urging decision makers to increase the availability of outdoor dedicated Pickleball courts. It has been brought to your attention that the use of our parks "court sports" assets is heavily skewed toward the game of tennis yet nothing has been done to remedy this situation.

Members of the Pickleball community understand the Growth Management Process and the time required to ensure the availability of outstanding facilities like our Poinsettia Community Park. They also see extremely long waits to play their game while tennis courts sit empty. In the case of Poinsettia, 50 feet away. From the standpoint of space efficiency, the area required for one tennis court, where up to four Tennis players can play, can contain four Pickleball courts that can accommodate up to sixteen players.

By this petition, Carlsbad Pickleball players are requesting that you promptly address and take steps to increase the availability outdoor courts for the game of Pickleball in Carlsbad.

**Subject:** Public input to Carlsbad City Council-Planning-Parks-mobility Commissions and CA Coastal Commission on City Budget -DLCPA-PMU processes - So Carlsbad Blvd. Realignment

Dear Carlsbad City Council, and Planning, Parks and Traffic & Mobility Commissions; and CA Coastal Commission:

People for Ponto submits this email, and the two (2) attachments as public comments on the City Budget, Draft Local Coastal Program Amendment, Parks Master Plan Update, and Livable Streets improvement processes. We request this email and attachment be provided to the Carlsbad City Council, and Planning, Parks and Mobility Commissions; and CA Coastal Commission as public input on the City Staff proposed 1) Draft Local Coastal Program Amendment, 2) Parks Master Plan Update, and 3) Mobility improvement processes. Thank you.

Email confirmation of receipt and delivery of this email/attachment is requested. Thank you.

Sincerely,  
Lance Schulte  
People for Ponto

## **Carlsbad proposed Draft Budget, Local Coastal Program Amendment, & Parks Master Plan Update – Public Comments**

City Budget, Draft LCP Amendment and Parks Master Plan Update issues – South Carlsbad Boulevard (PCH) Realignment land use policy/mapping clarity, and environmental and budget feasibility:

---

Please see and include the attached City of Carlsbad’s CARLSBAD BOULEVARD REALIGNMENT STUDY PHASE II: PRELIMINARY FINANCIAL ANALYSIS dated October 4, 2001 in this public comment. The realignment study evaluated the City selling and/or leasing portions of the exiting South Carlsbad Boulevard right-of-way for Commercial land use. This is concerning on serval levels.

This public comment requests that in the Draft Local Coastal Program Amendment (DLCPA) and Parks Master Plan Update processes:

1. Provide clear public disclosure and discussion as to if the City’s:
  - a. proposed DLCPA Land Use policies [Pages/Figures: p. 1-5 Figure 1-1, p. 2-11 Figure 2-1, pp. 2-19 & 20 Figure 2-2b & 2-2c; and Pages/Policies: p. 2-22, Ponto/Southern Waterfront, p. 2-23 Draft Policy LCP-2-P.5, p. 2-24 Draft Policy LCP-2-P.7, p. 2-26 Draft Policy LCP-2-P.19]; or
  - b. existing General Plan Land Use Element [Pages: p. 2-35, p. 2-38, pp. 2-47-48; and Policies: 2-G.20, 2-P.51, 2-P.52, 2-P.53, 2-P.55, and 2-P.90] General Plan policies)

provide in any way the opportunity to convert South Carlsbad Boulevard right-of-way into Commercial Land Use as part of realignment. Realignment was portrayed to Citizens as an elaborate way to provide a much needed pedestrian sidewalk/pathway, or Promenade along South Carlsbad Boulevard, not a ‘pathway to change open landscaped right-of-way land to Commercial uses’.

- Are the DLCPA Realignment Land Use policy and/or mapping allowing Commercial use on City designated right-of-way land like proposed in Carlsbad’s 2001 Realignment Study?
  - Does the City’s General Plan polices allow, support or imply Commercial use in any Realignment right-of-way land?
2. To even start having that important public disclosure and discussion, citizens must have both clear DLCPA Land Use Policies and Land Use Maps that show exactly “what and where” the City’s potential proposed Carlsbad Boulevard Realignment “is, and what and where it is not”.
    - The DLCPA Land Use Policies are vague and DLCPA Land Use Maps do not show any Land Use (Open Space or Commercial) associated with the Realignment. This vagueness is counter to the some very specific land uses and areas itemized in the City’s 2001 Study – why?

It is requested that both the DLCPA Land Use Policies and Maps be amended to be consistent and clear as to “what” and “where” the Realignment is and what proposed DLCPA policies apply to those areas, and what Land Uses are being proposed to be assigned to those areas in the Land Use Plan(s).

3. As part of this clear disclosure by the City and public discussion, it also seems logical to roughly update the 20-year old ‘preliminary study’ of realignment costs to have a general understanding if South Carlsbad Boulevard Realignment is even environmentally/fiscally viable. Current costs could exceed \$75 million. Carlsbad Citizens and taxpayers need to know if the ‘Realignment Promenade/Linear Park’ is a viable project the City will be implementing and when. Or is the ‘Realignment Promenade/Linear Park’ more a ‘Trojan horse’ – outside an apparently attractive celebration, while truthfully hidden inside is disappointment resulting in ruin. The City’s 20-year old 2001 Realignment Study seems to point to this concern/possibility.
4. The DLCPA should add a clear and accountable Public Coastal Access, Livable Streets and Connectivity Policy (Section 4.8, at p. 4-41) that requires the City to fully fund and construct as soon as possible a sidewalk/pedestrian path/‘Promenade’ along South Carlsbad Boulevard to “Complete” and make “Livable” this street. The missing safe pedestrian Coastal Access along South Carlsbad Boulevard represents over ½ of Carlsbad’s coastline. The City’s CIP #60311 Budget already has \$3.2 million, which based on City costs for sidewalk construction, is sufficient to complete most of this needed sidewalk/pedestrian path/‘Promenade’. The sidewalk/pedestrian path/‘Promenade’ can be quickly, simply and cost effectively accomplished with an existing budget for that purpose, and within the existing right-of-way configuration. The few short sections along bridges can be cost effectively addressed with vehicle/bike lane restriping and maybe a ‘jersey barrier’ similar to what was done at Agua Hedionda. Again, the missing sidewalk/pedestrian path/‘Promenade’ can be substantially completed using existing budgeted CIP funds for that purpose. Special design and landscape qualities could be budgeted and incorporated to enhance to a ‘Promenade’ level, or be similar to North Carlsbad Boulevard’s ‘Promenade’ design. A community-based design process could define consensus on that.

As supporting data that should be factored in the above 4 requests, the Mayor stated in 2020 that the South Carlsbad Boulevard Realignment would presently cost about \$75 million. This figure appears it maybe a rational estimate, but should be verified. Would South Carlsbad Boulevard Realignment be the most expensive City project ever? The \$75 million Realignment cost is \$5 million more than the City’s Golf Course land acquisition and construction costs. The City Golf Course is 402.8 acres, and is understood to be the most expensive to acquire/build municipal golf course in the USA, and most expensive to-date Carlsbad City project.

Sadly in comparison, South Carlsbad Boulevard Realignment does Not acquire or add any new land. Realignment simply realigns up to 54.5 acres of existing City owned landscaped right-of-way, to then repurpose only 4 - 10.8 acres for possible Park use under the 4 Land Use Alternatives as documented in the City’s 2001 Realignment Study. The \$75 million Realignment cost would thus cost \$7 - 19 million to simply repurpose each acre of existing City right-of-way land for Park use. This cost per acre appears

fiscally imprudent given much better alternatives. In comparison the Mayor stated the alternative 11 acre Ponto Coastal Park that is required to be studied under Carlsbad's Local Coastal Program would only cost \$20-22 million. The \$20-22 million figure also appears a rational estimate given vacant land costs in the area is roughly \$1.5 – 2 million per acre. So it is actually 7 to 9.5 times more cost effective to simply purchase vacant land that actually adds New land and is also required to be studied/considered for Park use. Again, the Relocation proposal's \$7 – 19 million cost per acre is NOT to buy any new land, but simply rearrange existing land the City already owns and is already landscaped and open as part of the roadway median. It seems logical to fully and publicly vet the proposed South Carlsbad Boulevard Realignment Land Use Policies/Map/Costs. The Realignment concept seems fiscally imprudent and a significant squandering of taxpayer resources.

These public comments are not against a much needed Coastal Park for South Carlsbad as there is none and this is vitally needed to provide a Coastal Park for ½ of Carlsbad's citizens and for the thousands of Visitors staying at the thousands of South Carlsbad Resort and hotel rooms. As the Mayor stated this is the most cost effective solution providing MORE NEW parkland at a fraction of the cost of the Realignment. Over 2,500 emails from citizens and visitors have asked the City Council to provide this much needed Ponto Coastal Park.

These public comments are also not against a much needed sidewalk/pedestrian pathway (including a wider than normal pathway) to provide safe (Complete-Livable Streets) pedestrian Coastal Access along South CARLSBAD Boulevard - in fact just the opposite. The public comment #4 specifically asks for a clear, accountable, funded DLCPA Policy that achieves rapid implementation of a sidewalk/pedestrian path/Promenade within the existing South Carlsbad Boulevard right-of-way configuration. This requested LCP Policy would address the critically needed Coastal Access, public safety, and mobility needs along South Carlsbad Boulevard, that has been delayed way too long. Citizens and visitors should not have to wait over 20-years for this much needed Coastal Access and public safety facility for over ½ of Carlsbad's coastline.

Thank you for your consideration,

Lance Schulte

## GENERAL LIMITING CONDITIONS

Every reasonable effort has been made to ensure that the data contained in this study reflect the most accurate and timely information possible, and they are believed to be reliable. This study is based on estimates, assumptions and other information reviewed and evaluated by Economics Research Associates from its consultations with the client and the client's representatives and within its general knowledge of the industry. No responsibility is assumed for inaccuracies in reporting by the client, the client's agent and representatives or any other data source used in preparing or presenting this study.

This report is based on information that was current as of *October 2001* or as noted in the report, and Economics Research Associates has not undertaken any update of its research effort since such date.

No warranty or representation is made by Economics Research Associates that any of the projected values or results contained in this study will actually be achieved.

Possession of this study does not carry with it the right of publication thereof or to use the name of "Economics Research Associates" in any manner without first obtaining the prior written consent of Economics Research Associates. No abstracting, excerpting or summarization of this study may be made without first obtaining the prior written consent of Economics Research Associates. This report is not to be used in conjunction with any public or private offering of securities or other similar purpose where it may be relied upon to any degree by any person other than the client without first obtaining the prior written consent of Economics Research Associates. This study may not be used for purposes other than that for which it is prepared or for which prior written consent has first been obtained from Economics Research Associates.

This study is qualified in its entirety by, and should be considered in light of, these limitations, conditions and considerations.

**I. INTRODUCTION**

The *Carlsbad Boulevard Realignment Study* is an analysis of alternative scenarios for realigning Carlsbad Boulevard away from the coast bluff edge and, in the process, creating opportunities for commercial, recreation, and open space uses. One of the study's objectives is to explore ways to generate revenue from useable public land created, including potential land sale or lease opportunities, and using this revenue to help offset the cost of realigning the road.

This Phase II report is a preliminary evaluation of each scenario's financial implications. The Phase I report, presented in April 1999, evaluated the market context in which development may take place. Some of the key rent and market assumptions presented in this report are based on the 1999 research, adjusted for inflation. A market analysis update has not taken place since 1999. The values presented here are preliminary estimates for planning purposes only, and should not be interpreted as valuations or appraisals since they are based on conceptual development programs, gross preliminary development cost factors, and two-year old market research. Valuations or appraisals will require greater due diligence regarding current market conditions, more specific development and site planning programs, and more detailed cost estimates.

**II. DEVELOPMENT SCENARIOS**

URS Corporation and the City of Carlsbad have identified four alternative land use scenarios for a realigned Carlsbad Boulevard. The proposed realignment creates 4-6 new surplus land areas resulting 5-7 potential parcels (see the Carlsbad Boulevard Realignment Study – Phase I and Phase II for more details regarding these alignments and surplus land areas). The consultant team prepared hypothetical development programs for each alternative. These hypothetical development programs are not recommendations; rather, they were devised to test the potential financial impact of the following alternative approaches towards reuse of the surplus land that is created with the road realignment. They were also designed to serve as a starting point for discussion of preferred uses and to allow the decision-makers to select and combine the elements from each alternative that they find most desirable. Finally, these scenarios serve as starting points for discussions with State Parks, which is critical for the pivotal Manzano parcel.

- Alternative 1 tests the financial impacts of a parks and open space scheme. It assumes that no major commercial development occurs and that the surplus parcels are used for parking, community facilities, parks, open space, and camping (concessionaire), as shown in Table 1.
- Alternative 2 tests the financial impacts of a predominately parks and open space scheme, with limited commercial development. It assumes that a time-share and executive meeting hotel is built on a small portion of Surplus Area 1, and that the rest of Surplus Area 1 and all of the other parcels are used for parking, community facilities, parks, or open space, as shown in Table 2.
- Alternative 3, as shown in Table 3, tests the financial impacts of a significant commercial development scheme. It assumes significant commercial development on almost half of Surplus Areas 1 (specialty retail, restaurants, and office) and 3 (hotel), and all of Surplus Areas 2 (time-share), 6A (time-share), and 6B (office), as shown in Table 3. More than half of Surplus Area 1 is used as park space and more than half of Surplus Area 3 remains open space. Parcels 4 and 5 provide parking and open space.
- Alternative 4 tests the financial impacts of a significant commercial development scheme for a majority of Surplus Area 1 (specialty retail, restaurants, time-share, and executive meeting hotel), with a neighborhood park on the remaining portion of Surplus Area 1, as shown in Table 4. Parcels 2, 3, and 6A remain open space, and 4, 5, and 6B contain public parking and open space.

**III. LAND AND FISCAL VALUE ESTIMATES**

ERA estimated the approximate residual land value and the capitalized value of the estimated fiscal revenue associated with each of the alternative alignments and development scenarios. The estimates are very preliminary since they are based on hypothetical development programs without architectural designs, rent assumptions based on 1999 research (updated to 2001 values), preliminary site capacity and site planning analysis, and gross development cost estimates for buildings and site development. The detailed analyses for each alternative are presented in Appendix A. These estimates, which are not appraisals, will need to be revised as development programs become more specific, and they do not form the basis for a financial offering, bond, or prospectus without additional planning, engineering, cost estimating, and due diligence.

The residual land value estimates translate into the potential revenue generated from commercial land sales, or the capitalized values of leases, of surplus land areas created by the road realignment. These estimates are preliminary approximations of what a developer might be willing to pay for the land in order to obtain a reasonable rate of return on total capital (debt and equity capital). In order to be conservative, no real appreciation was assumed; in other words, rents only rise with inflation. Some developers may speculate that rents will rise faster than inflation, which would result in higher values than estimated in this report. The fiscal revenue translates into the capitalized value of the potential fiscal resources to the City and Redevelopment Agency that could help finance some of the Carlsbad Boulevard realignment costs.

The total revenue from commercial land sales (or leases) and the capitalized value of fiscal revenue was compared to URS Corporation's preliminary estimate of road realignment costs (\$18.8 million), and Wallace, Roberts, and Todd's preliminary estimates of possible public parking, parks, open space, and community facility costs (\$8.5-12.1 million). While road realignment costs are required to produce the surplus parcels, costs to develop the open space are flexible. The estimates provided assume maximum improvements to the open space.

As shown in Table 5, Alternative 1, the least commercial scenario, generates very limited revenue, only \$1.1 million in commercial land value, and over \$0.2 million in the capitalized value of fiscal revenue, for a total of almost \$1.3 million. Other sources would have to fund over \$17.5 million in road construction costs, and \$9.0 million in public facility, parks, and open space costs, or the amount of improvements would have to be reduced.

**Table 5: PRELIMINARY REVENUE/COST COMPARISON (Year 2001 Dollars)**

	<b>Alternatives</b>			
	<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>
<b>Revenues From Commercial Land Sales</b>	\$ 1,131,000	\$ 9,219,000	\$ 28,155,000	\$ 19,465,000
<b>Capitalized Value of Fiscal Revenues to City &amp; RDA</b>	\$ 217,000	\$ 10,849,000	\$ 24,743,000	\$ 16,429,000
<b>Total Potential Revenues</b>	\$ 1,348,000	\$ 20,068,000	\$ 52,898,000	\$ 35,894,000
<b>Less: Road Construction Costs</b>	\$ 18,800,000	\$ 18,800,000	\$ 18,800,000	\$ 18,800,000
<b>Net Revenues &lt;Deficit&gt; After Road Construction Costs</b>	\$ (17,452,000)	\$ 1,268,000	\$ 34,098,000	\$ 17,094,000

Source: Economics Research Associates; URS; Wallace, Roberts & Todd

Alternative 2 generates over \$9.2 million in commercial land value, and \$10.8 million in fiscal revenue, for a total of \$20.1 million. This amount is enough to cover the \$18.8 million in road realignment costs, but not enough to cover the estimated \$12.1 million in potential public facility, parks, and open space costs. Other sources would have to fund approximately \$10.8 million in public facility, parks, and open space costs, or the amount or type of improvements would have to be reduced.

Alternative 3, the most commercial scenario, generates an estimated \$28.2 million in revenues from commercial land value, and \$24.7 million in capitalized fiscal revenue, for a total of \$52.9 million. This amount is substantially more than enough to cover the \$18.8 million in road realignment costs, and \$8.5 million in public facility, parks, and open space costs.

Alternative 4 generates an estimated \$19.5 million in commercial land value, and \$16.4 million in capitalized fiscal revenue, for a total of \$35.9 million, which is more than enough to cover the \$18.8 million in road realignment costs, and \$9.4 million in public facility, parks, and open space costs.

### QUALIFICATIONS

While it appears that alternatives 3 and 4 generate enough revenue to cover development costs, the findings at this preliminary planning stage of analysis are qualified, as follows:

- The cost estimates are based on gross cost factors and need to be refined as project design becomes more specific.
- The cost estimates do not include any extraordinary off-site costs, such as for environmental or traffic mitigation.
- Some of the parcels identified for potential development, particularly those west of the alignment, may be vulnerable to long term erosion problems; therefore, their stability needs to be verified.

- A significant share of value and fiscal revenue in scenarios 2, 3, and 4 is attributable to hotels, which in 1999 demonstrated only average performance, especially among moderately priced hotels. Also, a new hotel has been developed since 1999. While the parcels identified for potential hotel development are competitive because of the views they offer, hotel development and financing are relatively risky.
- WRT has determined that the hypothetical development programs can fit on the parcels, and URS Corporation has initially determined that the circulation system can accommodate the development. However, there could be difficult site planning issues with some of the parcels that would limit their development potential to less than what is assumed in this analysis.
- The development cost estimates for the commercial development scenarios, for the most part, do not assume structured parking. If structured parking is required, development costs could be greater which would diminish residual land values unless higher rents are achievable.
- Most of the value is generated on Surplus Area 1, which is owned by the State of California. The City or Redevelopment Agency would not realize the value of Surplus Area 1 unless the State trades the parcel to the City or Agency for other considerations. Therefore, the City or Agency may not be able to apply proceeds from the value of Surplus Area 1 to road realignment and public facility costs. Nevertheless, under Alternative 3, the capitalized value of the fiscal revenue alone might be sufficient to cover road construction costs and a portion of public facility costs. The capitalized value of fiscal revenue under Alternative 4 comes close to covering road construction costs, but is not sufficient to cover other public facility costs.
- Competitive market conditions could change which would affect the market potential of the development programs assumed in the scenarios analyzed in this report. The estimated values are based on the hypothetical development programs for each parcel. If development programs change, the values will change.

#### **IV. OTHER POTENTIAL SOURCES FOR FUNDING REALIGNMENT COSTS**

The U.S. Department of Transportation (DOT) and State of California Transportation Department (CalTrans) are the traditional sources of funds for capital improvements to highways. For example, the Federal government offers approximately 70 different transportation-funding programs. The majority of these funds are made available for disbursement to regional entities such as SANDAG, while a small portion is made available directly to municipalities.

##### **FUNDS AVAILABLE DIRECTLY TO MUNICIPALITIES**

The CalTrans Local Assistance Program (LAP) is responsible for helping municipalities located in CalTrans District 11 identify which Federal and State funding programs for which they are eligible and guiding them through the application process. Each program is specifically tailored for a given need, and has very strict eligibility requirements. One such specialized program funds "Intelligent Transportation Systems". Funds are available to projects that integrate new technology (computer-related) with the road/highway project to improve traffic flow. Because this program is new, eligibility requirements are not yet well defined.

There is no program specifically for road or highway realignment. Moreover, it is estimated that for every 10 applicants to each of the programs above, only the most urgent project is funded, leaving 90 percent of the applications unsuccessful. Given the level of competition for funds, if the City of Carlsbad finds that portions of the road may fall into one or more of the eligible categories, the application should present as compelling a case as possible. In any case, once a specific construction plan has been determined, a representative from the City of Carlsbad should meet with a representative from the Local Assistance Program to discuss the program in detail and determine whether or not portions of the project are eligible for Federal or State aid.

Finally, another option is direct funding from special state legislative action.

##### **REGIONAL FUNDS**

The San Diego Association of Governments (SANDAG) administers the apportionment of funds from the larger, more general State and Federal transportation funding programs. The most likely source of funding for a project such as the realignment of Carlsbad Boulevard is the Regional Arterial Projects section of the Surface Transportation Projects.

For a project to receive an apportionment from SANDAG, it must be included in the Regional Transportation Improvement Plan (RTIP). The City of Carlsbad is an active participant on the CTEC committee, the body that periodically updates the RTIP. However, it is important to note that the current RTIP (2000-2004) provides only \$153 million towards projects estimated to cost nearly \$392 million. Also, the current RTIP specifically states that "local governments will obtain private developer financing for those on- and off-site roadway and transit improvement necessary to accommodate the increased travel generated by private development."

The major source of Federal transportation funds administered by SANDAG is the Transportation Equity Act for the 21<sup>st</sup> Century (TEA-21). In addition to highway and surface road construction and improvements, TEA-21 is a source of funds for driver safety initiatives, transit programs, rail projects, and transportation research. TEA-21 was established in 1998 and funded through 2003, thus funding levels beyond that time are unknown. The Surface Transportation Program (STP) is the section of TEA-21 relevant to the realignment of Carlsbad Boulevard. One STP program, Transportation Enhancement Activities Program, funds highway enhancement activities over and above mitigation, standard landscaping and other permit requirements for a normal transportation project. Project eligibility categories under the Transportation Enhancement Program which may be applicable to the realignment of Carlsbad Boulevard are: 1) Scenic or historic highway programs; 2) Landscaping and other scenic beautification; 3) Environmental mitigation to address water pollution due to highway runoff.

Currently, all TEA-21 funds, including STP, have been assigned to projects (detailed in SANDAG's 2000 Regional Transportation Improvement Plan); however, SANDAG continues to pursue additional discretionary funding available through TEA-21 on an annual basis.

In 1987, San Diego voters passed Proposition A, which authorized a one-half percent sales tax increase dedicated for transportation improvements. The first \$1 million in annual TransNet revenue is set aside for bicycle-related projects and the remainder is divided equally between highway, public transit and local street and road projects. Highway projects are approved for funding by SANDAG, CalTrans, the San Diego Metropolitan Transit Development Board, and the North San Diego County Transit Development Board. Local street and road projects are approved for funding by the city councils of the 18 cities and the County Board of Supervisors. The Carlsbad Boulevard Realignment project is a potential candidate project. TransNet funds have been programmed through 2004, and the measure will expire in 2008.

LOCAL SOURCES

Local sources include developer financed road improvements, transportation impact fees, tax increment financing in redevelopment project areas, infrastructure financing districts, assessment districts, Community Facilities Districts, General Obligation Bonds, and the General Fund.

To the extent that the realignment also increases road capacity that is required to mitigate the impacts of new development, developer financed road improvements or impact fees may apply. If the road realignment simply moves the road without enhancing capacity for future local developments, however, the nexus may not be strong enough for developer funding or impact fees to apply. Alternatively, the City may negotiate voluntary contributions to road realignment costs through development agreements on larger land development projects in the vicinity of Carlsbad Boulevard that require City discretionary approval.

Since the proposed Carlsbad Boulevard Realignment project is within a newly adopted redevelopment project area, the City's Redevelopment Agency may use tax increment to finance some of the realignment costs. Tax increment financing does not result in higher tax rates; rather, the incremental gain in property tax revenues is directed toward certain improvements within a redevelopment project area. To the extent that the realignment creates parcels that are commercially developed, the realignment project will be directly responsible for the tax increment generated by those commercial developments. Because tax increment will not be generated until the parcels are developed with commercial uses, there may be a cash flow financing issue to overcome to fund the realignment costs that will occur in advance of tax increment.

Another type of property tax increment financing is the Infrastructure Financing District (IFD). It also is based on the incremental gain in property taxes rather than an increase in tax rates. The City of Carlsbad was one of the first jurisdictions in California to form an IFD. Unlike tax increment in redevelopment project areas, an IFDs do not have to be located in redevelopment project areas and, therefore, do not have to address blight or meet the "predominately urbanized" test of redevelopment law. The public facility that is financed must serve the community at large. However, unlike a redevelopment project area that can be formed by Council action, an IFD must be approved by two-thirds of the voters if 12 or more registered voters reside in the district. Otherwise, two-thirds of the property owners within the district must vote to approve the district. The affected taxing agencies must also approve the district and tax increment sharing must be negotiated.

Properties that benefit from the realignment may be assessed for a portion of the cost through a benefit assessment district, such as the *Municipal Improvement Act of 1913*. The assessments may be pledged to support debt service on bonds, issued under the *Improvement Bond Act of 1915*. The formation process must establish the scope of improvements, identify the benefiting parcels, and determine an equitable allocation of costs. Property owners vote for or against formation of an assessment district at a public hearing. Some of the benefiting properties that are owned by the State may not be assessed.

A Community Facilities District, commonly known as a Mello-Roos district, is a special tax that can be based on a formula that has a less strict benefit allocation. However, a Community Facilities District requires two-thirds voter approval of voters residing within the district. If there are fewer than twelve registered voters in the district, the qualified electors are defined as owners of land within the district, with each owner allowed one vote per acre.

General Obligation Bonds, backed by the full faith and credit of the City, are the most secure and lowest cost form of debt financing. However, it would require two-thirds voter approval among Carlsbad's electorate, which may be difficult for the Carlsbad Boulevard Realignment project unless it is perceived as a project that has citywide benefits.

Finally, the General Fund may be used to fund a portion of road improvements through the Capital Improvement Plan, either as direct allocations, or as annual lease payments on Certificates of Participation. Fiscal revenue from development on surplus parcels could help augment the General Fund, especially if a hotel or specialty retail is developed, to enable the City to use General Fund monies for some of the road realignment and other public facility costs.

### CONCLUSION

Both the SANDAG representative and the CalTrans Local Assistance Program representative noted that most road or highway realignments are done to facilitate development. Policymakers are aware of this and generally design funding programs in a way that encourages the private sector to pay for as much of the project costs as possible. Programs are also designed to encourage municipalities to utilize funds from their share of the gas tax, TransNet, and even the General Fund and Community Development Block Grants before turning to State and Federal funds. Finally, due to the limited funds available, all funding sources give priority to projects of a regional significance over those of local importance.

**Subject:** 2023-7-18 Council meeting agenda Item #9 Public Input data for Carlsbad's proposed Local Coastal Program Amendment, Park Master Plan Update, Growth Management Plan Update, and South Carlsbad Coastline Project.

Dear City Council; CA Coastal Commission & State Parks; and Carlsbad Planning, Mobility/Traffic and Park Commissions:

Please receive and consider this public input email and attached '2008 internal City Staff memo, and 2-part Cost/Benefit/Constraints data regarding the Carlsbad's 40-year old PCH Median Relocation/Adjustment proposal, as Pubic Input data for 1) Carlsbad's proposed Local Coastal Program Amendment, 2) Park Master Plan Update, 3) Growth Management Plan Update, and 4) South Carlsbad Coastline Project.

The attached "2008 ." file is an internal City Memo to "Leadership Team" on the 40-year history of City plans/motivations for PCH Median Relocation that discusses several issues that the City has not publicly disclosed to Carlsbad Citizens nor posted on the City's South Carlsbad Coastline Project, thus preventing Citizens from being properly informed about the City's proposal that will require a Citizen vote to fund. Some of the key points from that internal City Memo include:

- The project was to be "dedicated to recreational purposes, including campsites"
- 7 parcels of land could be created.
- Most of the 7 parcels of land, and the most useable/viable land, is owned by the State of California
- Without a trade of City and State land the City "would not experience any significant revenue producing land that could help finance the alignment"
- 2001 City Financial Analysis concluded:
  - Project costs are high, and the acreage of the 7 Parcels is modest as noted in the Memo (documented in 2001 URS & ERA Studies)
  - Since project does not increase roadway capacity the project is NOT fundable by developers or traffic/road funds
  - City studied different land use plans on the 7 Parcels that were NOT "dedicated to recreational purposes, including campsites", and the "highest development value (was) attributed to ("risky") hotel development" of the Parcels
  - No project funding source was identified by the Financial Analysis
- City's Ponto Vision Plan
  - moved southbound lanes east

- used “narrow median” for parking, ‘liner park’, and possible campground addition
- concluded public funding is needed for a realignment of median
- The August 4, 2008 internal City Memo to “Leadership Team” includes “Table 6-2 Comparison of Carlsbad Boulevard Re-alignment Alternates” that documents comparative data on the 4 re-alignment alternatives in the Ponto Vision Plan area

The City’s 2001 URS and ERA PCH Relocation Studies of both the amount of land in the 7 Parcels that could be created from PCH Median Relocation/Modification and the City’s current cost estimates should be fully disclosed to Citizens. For the 3-mile segment from Island Way south to La Costa Avenue (aka State Campground), there is only about 16 acres in 3 of the 7 Parcels. The City’s current cost estimate for this 3-mile segment is \$65 to \$80 million or \$21.6 to \$26.6 million per mile, or \$4 to \$5 million per acre to access the City’s existing land in the PCH Median. Attached are summary portions of the City’s URS & ERA Relocation Studies that list the 7 Parcels and note key PCH Financing issues (this was emailed to the City and CA Coastal Commission and State Parks on Monday, May 1, 2023 12:08 PM).

The attached 2-part ‘Cost/Benefit/Constraints’ data uses City data to summarize and compare the City’s PCH Median Relocation/Modification project with other alternative Plans to achieve a much needed Ponto Coastal Park and the Projects stated purpose to be “dedicated to recreational purposes, including campsites”. For example a recent sale of 11.1 acres of vacant Ponto land sold for around \$720,000 per acre and another 15 acre vacant parcel at Ponto currently for sale for about \$2.5 million per acre. Both the vacant sites are far more cost effective for tax-payers than the \$4 to \$5 million per acre cost to make narrow (less useable/desirable) Parcels from the City’s already owned PCH Median.

The City Council and CA Coastal Commission should consider this Alternative and the comparative data as part of the City’s analysis and Public communication/discussion of 1) Carlsbad’s proposed Local Coastal Program Amendment, 2) Park Master Plan Update, 3) Growth Management Plan Update, and 4) South Carlsbad Coastline Project.

Can Citizens please get a confirmation from the City and CCC that this data will be Publicly communicated/discussed and considered?

Thank you,  
Lance Schulte

## CARLSBAD BOULEVARD REALIGNMENT

### History

- City and State began to explore a program to relocate the southbound lanes in early 1980s
- Potential realignment incorporated into South Carlsbad State Beach General Plan and adopted by State in 1982.
- Plan proposed additional property to the west be dedicated to recreational purposes, including campsites, parking, beach access, and state administration and maintenance facilities.
- A major feature of plan was a group campsite and hostel on Manzano property.
- Plan anticipated a "T" intersection with Carlsbad Blvd.

### Studies Summary

- 1992 - report completed on Carlsbad Blvd and Palomar Airport Intersection
- Study concluded not cost effective to salvage the existing bridge; minimize the skew of intersection
  
- Conceptual eastern alignment for Carlsbad Blvd and studied from an environmental standpoint in 1998.
- 7 parcels of land adjacent to the existing So. Carlsbad State Beach campground and coastline created
- No significant environmental constraints.
- Additional evaluation needed on historical significance of bridges.
- Exterior noise levels might be exceeded at Solamar Mobile Home Park; mitigation possible
- Most of value in surplus land generated on the land owned by the State
- Unless there was a trade of lands, the City would not experience any significant revenue producing land that could be used to help finance the alignment.
  
- 2001 – Financial analysis completed for Carlsbad Blvd Realignment.
- Explore ways to generate revenue from useable public land created from project.
- Use revenue to offset costs of realignment
- Preliminary estimates were \$18.8 million to realign.
- Highest development value attributed to hotel development.
- May be difficult to have private development pay for road realignment if it does not create enhanced capacity for private development; no nexus
- City could negotiate contributions from private developers.
- No specific funding source for the realignment project; included in SCCRA as a result.
- SCCRA could bond or take a loan from the City to complete realignment project; repay through future tax increment generated by private development

### Ponto Plan

- Southbound lanes to move east; public amenities such as parking, linear park included on surplus land
- Ponto Drive to the lagoon bridge; northbound lanes stay where they are
- Narrow median, remove cypress trees and create a standard intersection at Avenida Encinas.
- Surplus land could be used for expansion of campgrounds.
- Assumption that realignment project would need to be publicly financed to create the opportunities.

August 4, 2008

**TO: LEADERSHIP TEAM**

**FROM: HOUSING AND REDEVELOPMENT DIRECTOR**

**INFORMATION ON CARLSBAD BOULEVARD REALIGNMENT STUDY AND OTHER DISCUSSIONS AS RELATED TO PONTO BEACHFRONT VILLAGE VISION PLAN AND OTHER PLANNING EFFORTS**

Per the request of the Leadership Team, this memorandum is provided to summarize the activity to date as related to studies of the Carlsbad Boulevard Realignment Project, project financing and any related planning documents, studies, etc.

**Historical Background from State perspective**

Based on research related to the Carlsbad Boulevard Realignment, the City and State of California began to explore a program to relocate the southbound lanes of Carlsbad Boulevard (between Manzano Drive and San Marcos Creek to the east and adjacent to the northbound lanes) in the early 1980s. The potential realignment was incorporated into the South Carlsbad State Beach General Plan and adopted by the State in 1982.

The 1982 plan proposed that all additional property west of the realigned Carlsbad Boulevard be dedicated to various recreational purposes, including additional campsites, parking, beach access, and State administration and maintenance facilities. A major feature of this plan was a group campsite and hostel on property owned by the State between Manzano Drive and Palomar Airport Road. This plan anticipated that Palomar Airport Road would be realigned to a "T" intersection with Carlsbad Boulevard. To date, limited progress has been made towards implementing this plan.

**Studies of Carlsbad Boulevard Realignment by the City**

The City commissioned a study of the reconfiguration of the Carlsbad Boulevard and Palomar Airport Road (PAR) Intersection in the early 1990s. A report was prepared by Boyle Engineering in 1992. Key issues evaluated in the study included the irregular angle created where PAR joins Carlsbad Boulevard, vertical alignments, and the feasibility of salvaging the existing railroad bridge west of Avenida Encinas. The study concluded that it was not cost effective to salvage the existing bridge and recommended an alternative that would minimize the skew of the intersection.

A conceptual eastern alignment for Carlsbad Boulevard was developed by staff and a study of the environmental constraints and opportunities created by the realignment was commissioned in 1998. The study was also to include 1) a technical evaluation of alternative land uses for the surplus land, with a number-one priority on open-space recreational opportunities; and, 2) potential for reveue-generating recreational/tourist-serving commercial land uses to fund the realignment. If realigned according to the staff conceptual plan, which includes the "T" intersection at Carlsbad Boulevard and PAR, seven (7) parcels of land adjacent to the existing South Carlsbad State Beach campground and the coastline would be created for public and/or private development.

Conclusions of this study included: 1) no significant environmental constraints; 2) two bridges located across Encinas Creek on the southbound lanes of Carlsbad Boulevard were built in 1928 and may be historically significant. Further evaluation was recommended; 3) City's exterior noise levels may be exceeded at the Solamar Mobile Home Park due to the expected increases in traffic. However, mitigation could easily be achieved; and, 4) most of the value in surplus land would be generated on the land owned by the State. Unless there was a trade of lands, the City would not experience any significant revenue producing land that could be used to help finance the realignment.

In 2001, a financial analysis was completed for the Carlsbad Boulevard Realignment project. An objective of this study was to explore ways to generate revenue from useable public land created from the realignment project, including potential land sale or lease opportunities, and using this revenue to help offset the cost of realigning the road. The preliminary estimates of the Carlsbad Boulevard Realignment project were \$18.8 million. The significant value for development purposes (to assist in paying for the improvements) was attributable to hotel development, but considered risky from a financing standpoint. A specific note in the financial analysis indicated that if the road realignment simply moves the road without enhancing capacity for future local developments, developer financed road improvements or impact fees may not apply due to the lack of a nexus. The report indicated that the City could negotiate contributions to the road alignment costs. Because there was not a specific funding source (including developer financing) identified for the Carlsbad Boulevard Realignment project and the realignment was deemed necessary to generate developable properties, the City formed a Redevelopment Area, known as the South Carlsbad Coastal Redevelopment Area in 2000. It was intended that the Redevelopment Agency would initially finance the realignment and that subsequent development would then reimburse the Agency and repay the debt. No action has been taken to date to proceed with the Carlsbad Boulevard Realignment project and create financing through the Redevelopment Agency. However, it is important to note that a portion of Carlsbad Boulevard was realigned with the Poinsettia Properties project. Apparently, this was a negotiated project with the developer. This created some surplus land (city-owned land) in front of, and immediately adjacent to, the State campground.

When work began on the Ponto Vision Plan, staff reviewed the initial studies completed on the Carlsbad Boulevard Realignment. A consensus was reached at that time with Public Works that the specific alignment within the Ponto Vision Plan area could be further studied to determine the most appropriate alignment to benefit the City. The consultant for the Ponto Vision Plan was instructed to do so.

### **Ponto Vision Plan Studies**

Preliminary land use strategies by RBF (consultant on the Ponto Vision Plan) indicated that the City would get the most public benefit from relocating the Carlsbad Boulevard southbound travel lanes eastward (which is consistent with the initial studies) and adjacent to the northbound lanes. No realignment was recommended for the northbound lanes. The staff team working on this project felt that it was important to include public parking and public space (linear park) in the excess right-of-way to be created by the realignment.

In 2007, 4 alternatives for the realignment of Carlsbad Boulevard were presented to the City Council and Housing and Redevelopment Commission for consideration and a selection of alignment choice. The Council selected the alignment which: moved the Southbound lanes to the east from Ponto Drive to the lagoon bridge (adjacent to the northbound lanes, which would not be realigned), narrowing the

median in middle, removing the Cypress Trees and creating a more standard intersection at Avenida Encinas. This would create additional land on the west side for more public parking and an expanded linear park. It could also be used for expansion of the State campground if a subsequent decision is approved to do so. At the time of this approval, no decision was made as to how the realignment project or the public improvements would be funded. If a nexus can be made or a deal negotiated with a private developer, these improvements could potentially be developer financed. It is more likely, however, that the realignment project and public improvements would need to be publicly financed with the potential to raise additional revenues through development to repay the financing debt.

### **South Carlsbad Coastal Redevelopment Area (SCCRA) Master Plan**

When the SCCRA was adopted in 2000, the original intent was to subsequently prepare a Master Plan for the entire area that would address the Carlsbad Boulevard Realignment project (and make a final decision on the alignment) as well as develop a desired comprehensive land use strategy for the area, including both private and public development. The Master Plan was intended to provide better detail and a more comprehensive plan for future development. However, after adoption of the redevelopment plan, a subsequent decision was made to discontinue efforts for an area-wide Master Plan. The SCCRA was subsequently divided into three (3) planning areas for land use planning purposes (see attached map). Planning Area #3 (the Ponto Area) was identified as the first area for which to develop a land use strategy. This is because it was the only area at the time with interested developers and the greatest immediate demonstrated need for City/Agency guidance. The Ponto Vision Plan was completed and approved in November/December, 2007.

It was intended that Planning Area #1 (the power plant properties) would be the second area for which a land use strategy would be developed. However, this action was delayed in order to incorporate the area into the larger "Cannon Corridor land use strategy". This strategy was also subsequently abandoned and the focus was placed on the "Prop D" lands. The land use strategy for these open space areas did not incorporate the power plant properties or the 48 acres of visitor-serving commercial land east of I-5 (owned by SDGE). As a result, it may be necessary for the City and/or Redevelopment Agency to reconsider a land use strategy for these properties at a later date.

Planning Area #2 (Manzano Property to Ponto Drive) was considered the last area for which a land use strategy was needed due to the influence that the State of California had over much of the land and their public statements that they had no interest (at the time) in trading lands with the City or pursuing development on their properties. This plan was also put on hold due to the decline in tax increment revenues for the Redevelopment Agency as a result of reassessment of the power plant properties. There was concern that there would be no potential funding for the Carlsbad Realignment project and that bonds could not be issued to finance the project due to the uncertain tax increment revenues. A loan from the General Fund to the Redevelopment Agency was also viewed as financially infeasible due to concerns over future ability by the Agency to repay the debt. At this time, there are no land use planning strategies under development for Planning Areas #1 or #2.

Please contact me at X2935 if any additional information is required, or if there are any questions on the information provided above.

**Debbie Fountain**

**Table 6-2  
Comparison of Carlsbad Boulevard Re-Alignment Alternatives**

<b>FACTOR</b>	<b>ALTERNATIVE 1</b>	<b>ALTERNATIVE 2</b>	<b>ALTERNATIVE 3</b>	<b>ALTERNATIVE 4</b>
Additional Vacated Acreage Available for Other Uses	Creates 0.8 acres on west side of Carlsbad Boulevard, available for use as a public linear park.	Creates 2.0 acres on west side of Carlsbad Boulevard north of Avenida Encinas and 1.8 acres on west side of Carlsbad Boulevard south of Avenida Encinas, available for use as a public linear park or potential expanded use for the South Carlsbad State Beach Campground.	Creates 0.8 acres on west side of Carlsbad Boulevard, available to be used as a public linear park.  Creates 1.2 acres on east side of Carlsbad Boulevard, north of Avenida Encinas and 2.2 acres on east side of Carlsbad Boulevard, south of Avenida Encinas, available for additional development or community amenities.	Creates 0.5 acres on west side of Carlsbad Boulevard, available for use as a public linear park.  South of Beach Way: Creates 0.8 acres on west side of Carlsbad Boulevard, available for use as a public linear park.
Effect on Vegetative Communities	Approximately 3.0 acres of Disturbed Diegan coastal sage scrub to be affected in median between Ponto Drive and Avenida Encinas.  Retains cypress trees in median south of Avenida Encinas.	Approximately 3.7 acres of Disturbed Diegan coastal sage scrub to be affected in median between Ponto Drive and Avenida Encinas.  Potential disturbance to approximately 0.6 acres of Southern Coastal Salt Marsh in median immediately north of the Los Batiquitos Lagoon bridges.  Removal of cypress trees in median south of Avenida Encinas.	Approximately 3.7 acres of Disturbed Diegan coastal sage scrub to be affected in median between Ponto Drive and Avenida Encinas.  Potential disturbance to approximately 0.6 acres of Southern Coastal Salt Marsh in median immediately north of the Los Batiquitos Lagoon bridges.  Removal of cypress trees in median south of Avenida Encinas.	Approximately 3.0 acres of Disturbed Diegan coastal sage scrub to be affected in median between Ponto Drive and Avenida Encinas.  Retains cypress trees in median south of Avenida Encinas.
Parking	Provides 61 parking spaces (60 degree diagonal) and 48 parallel parking spaces.	Provides 61 parking spaces (60 degree diagonal) and 48 parallel parking spaces.	Provides 61 parking spaces (60 degree diagonal) and 48 parallel parking spaces.	Provides 61 parking spaces (60 degree diagonal) and 48 parallel parking spaces.

<b>FACTOR</b>	<b>ALTERNATIVE 1</b>	<b>ALTERNATIVE 2</b>	<b>ALTERNATIVE 3</b>	<b>ALTERNATIVE 4</b>
<b>Traffic Signal Operations</b>	More complex signal operation at Avenida Encinas due to width of median (longer time to make turning movements) but similar to existing condition.	Less complex signal operation at Avenida Encinas, due to standardized intersection (i.e., no wide median).	Less complex signal operation at Avenida Encinas, due to standardized intersection (i.e., no wide median).	More complex signal operation at Avenida Encinas due to width of median (longer time to make turning movements) but similar to existing condition.
<b>Vehicular Bridges</b>	Retains existing northbound bridge; requires new southbound bridge to implement the grade-separated pedestrian underpass to the west.	Retains existing northbound bridge; requires new southbound bridge to accommodate lanes re-location and to implement the grade-separated pedestrian underpass to the west.	Requires two new bridges – one northbound and one southbound.	Retains existing northbound bridge; requires new southbound bridge to accommodate lanes re-location and to implement the grade-separated pedestrian underpass to the west.

## **2022 General Comparative tax-payer Costs/Benefits of Completing PCH, 2.3 mile PCH Modification, and Ponto Park to address planned loss of 30+ acres of Coastal Open Space Land Use at Ponto/West BL/South Carlsbad: Part 1 of 2**

---

Key base facts regarding tax-payer Cost/Benefit comparison:

City Coastal Park Fairness: Ponto/Coastal South Carlsbad has ZERO Parks and ZERO Park acres v. 10 Coastal Parks and 37 Park acres in North Carlsbad. 62% of Carlsbad citizens and major visitor industries live in South Carlsbad with no Coastal Park. 38% of Carlsbad citizens have the entire City's Coastal Parks. The City also falsely allowed Ponto Developers to NOT PROVIDE the required 15% unconstrained Open Space required by other developers in Carlsbad. Consequently Ponto is already developed at a density 35% higher than the rest of City. Higher density logically requires more parks and park acres.

What is missing from 2.3 mile South PCH: The only missing components of a Carlsbad Livable (Complete) Street are about 1.6 miles of adequate Coastal sidewalks. Better, safer protected bike paths for the volume of bike traffic on a higher-speed roadway are highly desired. Both these features can be (and should have already long ago been) provided in the existing PCH configuration.

Generalized Costs: Costs come from publicly stated costs by Mayor Hall in a 2019 at Meet the Mayor Realtor luncheon at Hilton Garden Inn, City PCH Modification Cost Studies for South PCH, \$13 million per mile cost for the simpler City CIP #6054 PCH Modification Project at Terramar, general City cost data from official public records requests, and vacant Ponto land costs of \$1.4 to \$2.4 million per acre from recent recorded land sales at Ponto.

Generalized Benefits: The number of acres and the quality and usability of each of those acres, and the number of new added beach parking for each of the known Option's define each Option's benefits. There may be other unknown Options that have different benefits. The City's 2001 PCH Modification Studies' highest Park and Open Space Option (2001 ERA Financial Analysis "Alternative 1-parks and open space scheme") only made possible a 4-acre Active Park north of Palomar Airport Road in North Carlsbad. The City's 2013 PCH Concept design eliminated that 4-acre Active Park and only showed a few small open space areas with picnic tables. Any PCH Modification Benefits are significantly limited by existing PCH constraints. See attached Part 2: City PCH map with numbered notes on various existing land use constraints from the City's 2013 PCH Modification Design.

PCH Modification: PCH Modification does not add any new City land. Rearranging PCH land may add some usability beyond the existing usability of parkway areas along PCH. However significant land in PCH right-of-way is already constrained by habitat, slopes, and water quality detention basins. Past City Studies in 2001 and 2013 showed relatively modest changes in useable acreage from major PCH Modifications. Forever removing 2-travel lanes (over 50% of PCH capacity due to removing passing ability) will create Terramar traffic congestion, but could repurpose some of that City pavement for open space. Any net usable amount of open space land will however be relatively narrow and may be modest once all constraints are accounted for. PCH Modification should be accurately compared with the existing usable and open space parkway areas in the existing PCH configuration and Ponto Park situation. See attached Part 2: City PCH map with numbered notes on various existing land use constraints from the City's 2013 PCH Modification Design.

### Comparative tax-payer Cost/Benefits:

#### 1. Completing 2.3 miles of PCH by adding missing sidewalk/path. Adding parking and bike safety:

Only about 1.6 miles of the 2.3 miles needs sidewalks

There are 177 existing parking spaces along South Carlsbad Blvd

Existing 4 vehicle lanes and 2 bike lanes

The only missing component of "Complete/Livable Street" is some pedestrian sidewalk/paths

**Total Cost to provide missing sidewalks per City data = \$3-5 million (based on path width)**

**Costs for desirable safety upgrade to existing bike lanes are not known**

**Cost to add more beach parking in abandoned PCH North and South of Poinsettia ranges from:**

- 273 additional spaces = \$ 0.76 million
- 546 additional spaces = \$ 1.1 million
- Plus an estimated \$1.5 million for 2 signalized intersection upgrades for full 4-way access
- Cost per parking space is estimated at \$19,275 to \$13,899 per additional parking space

**Total cost: \$ 3.8 to 6.1 million to provide missing sidewalk/path and add more parking + unknown amount for any desired upgrades to existing bike lanes**

#### 2. '2013 PCH Modification Proposal' [AECOM 11/26/2013 Alternative Development Meeting]

Total Cost is \$75 million per Mayor Matt Hall. PCH Modification would be most the expensive City project so far. \$75 million current cost appears consistent with 20-years of cost inflation of the basic (unmitigated environmental and traffic) 2001 costs of \$26.5 to 37.3 million (in 2001dollars) identified by the City. The City's 2001 Study indicated fully mitigated costs will be higher.

**Total \$75 million PCH Modification cost comes to:**

**\$ 18.7 to 7.5 million per acre for narrow open space areas (from portions of city roadway)**

**\$872,093 per additional parking space**

- 86 additional parking spaces created = 263 replacement spaces - 177 existing spaces removed
- Includes multi-use pathway (sidewalk) within primarily native/natural landscaping.
- Possible 50% reduction in vehicle lanes (from 4 to 2 lanes) with corresponding traffic congestion like at Terramar. Not clear if Citizens will approve spending \$75 million to double traffic congestion.
- Includes about 4 - 10 acres for possible narrow passive Park area identified in City's 2001 PCH Modification Studies. However City's 2013 PCH Modification (AECOM) plans look like smaller acreage is provided.
- Does not purchase any new land (only reconfigures existing City land) so requires Carlsbad Citizens to vote to expend funds per Proposition H.
- 2013 PCH Modification proposal did not consider and map City's 2017 sea level rise data to show what areas would be lost due to sea level rise and account for any added cost and issues.

#### 3. Ponto Coastal Park

**Total Cost: \$20 – 22 million to purchase and build 11-acres as Mayor Matt Hall has publicly stated**

**\$ 2 to 1.8 million per acre (per Mayor) for new and fully useable City Park area**

**175% to 10% more total park land than 'PCH Modification options'**

- Includes adding 11-acres of new and viable parkland similar in shape (but larger in size) than Carlsbad's Holiday Park. Site includes both habitat and E-W and N-S connections.

- Since an Open Space land purchase per Proposition C acquisition voters exempted such purchases from Proposition H. NCA recommend the site be considered for purchase as Open Space per the City's obligations under a lawsuit settlement.
- Ponto Park's cost savings over 'PCH Modification' = \$55 to 53 million
- Ponto Park's + adding missing sidewalks cost savings over 'PCH Modification' = \$51 to 47 million
- Ponto Park's + adding missing sidewalks + 273 additional parking spaces cost savings over "PCH Modification" = \$50.4 to 46.1 million
- Ponto Park's + adding missing sidewalks + 546 additional parking spaces cost savings over "PCH Modification" = \$50.1 to 45.8 million

4. Combining both #1-PCH Completion and #3-Ponto Park:

Combining #1 and #3 creates at cost effective and more beneficial Coastal Park-Coastal Parking-Completes Streets solution. This solution actually adds 11-acres of new City land for a needed Park, provides for a Complete PCH without increasing traffic congestion, does not forever congest PCH travel if future PCH traffic increases, adds comparatively more beach parking, and provides the City with Coastal land use and sea level rise planning flexibility to address future needs by not forever committing the City's PCH land to a Final solution. See map on page 4 showing land use synergy of combining #1 and #3.

**\$50.4 to 45.8 million in tax-payer cost savings are estimated from combining #1 & #3 compared to the estimated \$75 million PCH Modification concept. Combining #1 and #3 provide all the features provided by more Benefits for a reduced**

- a. Ponto Park's location allows it to use the 337-610 parking spaces created by #1 above (177 existing + 273 to 546 new parking spaces). The 337-610 parking spaces will allow Ponto Park to effectively host Carlsbad's special community events.
- b. Acquiring Ponto Park's 11-acres provides both the City and State of CA with important future land use options to address the Sea Level Rise and Coastal Erosion (SLR) planned by the City. These options are created by leaving the exiting South Carlsbad Blvd right-of-way substantially the same (except for adding needed sidewalks and using the existing Old paved roadway for parking) thus allowing future upland relocation of the Campground. If \$75,000,000 is spent on #2 the likelihood this very expensive City expenditure would never be abandoned by the City to allow relocation of the Campground.
- c. Carlsbad' 2017 Sea Level Rise study shows SLR will eliminate ½ of the State Campground – a high-priority Coastal land use under the CA Coastal Act. The CA Coastal Act calls for "upland" relocation of high-priority Coastal land uses due to SLR impacts. Ponto Park could also provide for "upland" relocation of the State Campground.

Part 2 of this Comparative analysis is a separate 2-page data file. This Part 2 file consists of the City's PCH map with numbered notes to documented City data on PCH design constraints, mapping the City's 2017 Sea Level Rise Impact Areas, and outlining the easterly 6.5 acre portion of the 11-acre Planning Area F site that could be Ponto Park for acreage comparison purposes.

## City's PCH Modification Proposal Area Map with notes on usability Constraints and Issues: P4P Input 2 of 2

---

The City's map below is marked with the following numbered list of Area Constraints and Issues. The Constraints are from the City's 2013 PCH Modification designs, the City's older 2017 Sea Level Rise Impact Study, and on-site observations. The Constraints will limit any fundamental change to the existing PCH landscape. For instance existing slope and habitat area will remain or have to be relocated which will limit the use of any excess land area from PCH Modification. These Constraints will then reduce from 62 acres the actual number of unconstrained and acres that are actually useable and can be used for different uses than currently exist.

1. Loss of the last section of Old "Historic 101" design, ambiance, and openness. Will it be replaced with typical urban arterial design?
2. Freshwater habitat
3. Sewer pumping facility
4. City's 2013 PCH plan for RESTORED RIPARIAN HABITAT
5. Sea Level Rise 2 meter Impact Area
6. City's 2013 PCH plan for BIO SWALE AND RESTORED RIPARIAN HABITAT
7. Existing beach parking to be retained
8. Least Tern habitat
9. Major storm water detention basin
10. Water
11. Slopes will likely need retaining walls to move road inland closer to proposed Kam Sang Resort
12. Endangered Species Habitat
13. City's 2013 PCH plan for COASTAL SAGE SCRUB RESTORATION
14. City's 2013 PCH plan for NATIVE GRASSLAND RESTORATION
15. City's 2013 PCH plan for BIO SWALE AND RESTORED RIPARIAN HABITAT
16. Eliminating access road for homes/businesses south of Cape Rey Resort. Who pays to replace?
17. Removes Cape Rey Resort developer required GMP Open Space for this LFMP. This GMP Open Space will have to be replaced. Who Pays?
18. City's 2013 PCH plan for L.I.D. BASIN / BIO SWALE
19. City left several acres vacant for 20+ years. This area can cost-effectively provide 200-500 more parking spaces w/o any PCH relocation.
20. Unusual jog in roadway. Is this viable?
21. City's 2013 PCH plan for RESTORED NATIVE LANDSCAPE
22. Habitat & need to provide major storm water quality detention basin before discharging urban and creek runoff into ocean.
23. Slopes will likely need retaining walls to move road inland closer to mobile home community.
24. Steep unusable slopes needed for Palomar Airport Road overpass over railroad corridor.

For a Cost/Benefit reference point, the City's PCH Modification at Terramar (CIP project #6054 from Cannon to Manzano) that is less constrained and simpler than South Carlsbad is projected to cost around \$13 million per mile. Vacant primarily unconstrained land sale costs at Ponto are documented at around \$1.4 to \$2.4 million per acre. Honest Cost/Benefit of these two options should be a public tax-payer discussion.

**Carlsbad Boulevard Realignment: Right-of-Way and Available Land Analysis\***

- Proposed ROW (Approximately 43 acres)
- Area Available for Other Uses (Approximately 62 acres)

July 13, 2021

\* Analysis is based on aerial imagery. Right-of-way boundaries and acreages are approximate and intended for planning level analysis only.

Item #14 Page 47 of 53

\* For comparative visual reference the \* area is the 6.5 acre eastern portion of Planning Area F.

**Excerpt from Monday, May 1, 2023 12:08 PM email to City of Carlsbad, and CA Coastal Commission & State Parks regarding City of Carlsbad's proposed PCH Relocation Project**

1. City has indicated it will Cost Carlsbad tax-payers at least \$65-80 million for a 3-mile PCH Relocation from Island Way to La Costa Avenue that per the City's 2001 PCH Relocation Analysis will only MAYBE make available about 16-acres of Carlsbad Blvd (aka Coast Highway/PCH) "surplus land" in this area for uses that maybe different than what they are used for now which is mostly constrained protected habitat. The City's 2001 Land Use and Financial Feasibility Studies of PCH Relocation has already 1) documented these 16 acres of "surplus land" which is mostly very narrow and highly constrained, 2) itemized only about 4 acres of reasonable Park land in North of Palomar Airport Road that maybe created from PCH Relocation, and 3) clearly documented that outside funding for PCH Relocation is very unlikely so most or the entire \$65-80 million cost for these 16 acres will be paid for by Carlsbad tax-payers. Carlsbad's 2001 PCH Relocation Financial study concluded the only viable way to pay for PCH Relocation was to sell most all the "documented and numbered Surplus Land" for commercial uses. So per the City's 2001 financial report PCH Relocation is not an Open Space or Park project but a land development project. Per Proposition H Carlsbad tax-payers will have to vote if they want the City to send \$65-80 million for maybe allowing some of 16 acres of Surplus land available for other uses, or \$4 to \$5 million per "surplus acre". Recent polling by the City shows that Carlsbad Citizens are not wanting PCH Relocation and voting for PCH Relocation is high unlikely. Verbatim Summary information from the City's 2001 PCH Relocation Studies by URS and ERA include:
  - a. The 2001 URS Carlsbad Boulevard Realignment Study documented the amount of potential "Surplus land" created by PCH Relocation as noted below. Only "Surplus Areas 4, 5 and 6A" which total 16.5 acres are in South Carlsbad (South of Palomar Airport Road) and need PCH Relocation to be accessible. Surplus Area 6A is east of PCH and can be used now without any PCH Relocation. The City has been misrepresenting how much "surplus land" is created by PCH Relocation. A lot of PCH land is does not need Relocation to be used for needed sidewalks and enhancing current bike lanes. The City incorrectly communicates that 60 acres of City land can be used due to PCH Relocation, which is not correct per the City's own 2001 URS Carlsbad Boulevard Realignment Study.

## SECTION FOUR

## Phase II Findings

### 4.1 LAND USE ANALYSIS

Figure 4-1A shows the General Plan Land Use Designations, and Figure 4-1B shows the Zoning Designations. Most of the project area is residential, open space/unplanned, and industrial. The parcels being considered for this project are all currently designated as open space.

#### 4.1.1 Surplus Lands

A City-provided GIS parcel map was used in conjunction with a City-generated map showing land ownership in the project area to calculate the acres of land remaining after Carlsbad Boulevard is realigned (Figure 1-3). Additionally, the amount of land owned by the State in the area north of Palomar Airport Road and south of Manzano Drive was calculated. The acres of land available following realignment of Carlsbad Boulevard are shown in Table 4.1-1. The amount of City-owned land available for other uses following realignment of Carlsbad Boulevard is approximately 41 acres. The amount of land owned by the State in the area north of Palomar Airport Road and south of Manzano Drive is approximately 15 acres.

**Table 4.1-1  
LAND OWNERSHIP AND AMOUNT OF LAND AVAILABLE  
CARLSBAD BOULEVARD REALIGNMENT**

Landowner	Acreage
City of Carlsbad	41
State of California	15

The surplus useable land that will result from realigning Carlsbad Boulevard has been grouped into a total of seven surplus land areas, described in Table 4.1-2 below and illustrated in Figures 1-3 through 1-10.

**Table 4.1-2  
SURPLUS LAND AREA DESCRIPTIONS  
CARLSBAD BOULEVARD REALIGNMENT**

Surplus Land Area Number	Surplus Land Area Name	Acreage	Owner
1	Manzano Parcel	20.8	State: approximately 14 acres City: approximately 6 acres
2	Palomar Point	5.1	State: approximately 0.5 acre City: approximately 4.5 acres
3	North Ponto Beach	10.1	City
4	State Beach and Campground	13.7	City
5	Boca Beach	2.3	City
6A	Seapointe Parcel	0.5	City
6B	PA "F" Frontage	2.0	City

- b. The 2001 ERA Carlsbad Boulevard Realignment Study used the URS data to fiscally analyze alternative scenarios for realigning Carlsbad Boulevard away from the coast bluff edge and, in the process, creating opportunities for commercial, recreation, and open space uses. One of the study's objectives is to explore ways to generate revenue from useable public land created, including potential land sale or lease opportunities, and using this revenue to help offset the cost of realigning the road.
- c. The scenario that provided the most "Park and Open Space" is Alternative 1. The PCH Relocation "Surplus Areas" that are in South Carlsbad are #4, 5 and 6A or 6B as documented below. Table 1 below documents how many Gross Acres of "Surplus land Area" PCH Relocation provides. The report notes that there are many Constraints on these "Surplus Areas" and the acres listed below may not be achievable or may cost much more to be made/mitigated to be used as noted.

Table 1: DEVELOPMENT PROGRAM SCENARIOS - Alternative 1 - Parks and Open Space

e.

Qualifications: While it appears that alternatives 3 and 4 generate enough revenue to cover development costs, the findings at this preliminary planning stage of analysis are qualified, as follows: • The cost estimates are based on gross cost factors and need to be refined as project design becomes more specific. • The cost estimates do not include any extraordinary off-site costs, such as for environmental or traffic mitigation. • Some of the parcels identified for potential development, particularly those west of the alignment, may be vulnerable to long term erosion problems; therefore, their stability needs to be verified. • Most of the value is generated on Surplus Area 1 [aka the Manzano Drive Site that is north of Palomar Airport Road], which is owned by the State of California. The City or Redevelopment Agency would not realize the value of Surplus Area 1 unless the State trades the parcel to the City or Agency for other considerations. Therefore, the City or Agency may not be able to apply proceeds from the value of Surplus Area 1 to road realignment and public facility costs.

f. [other tax-payer funding] CONCLUSION: Both the SANDAG representative and the CalTrans Local Assistance Program representative noted that most road or highway realignments are done to facilitate development. Policymakers are aware of this and generally design funding programs in a way that encourages the private sector to pay for as much of the project costs as possible. Programs are also designed to encourage municipalities to utilize funds from their share of the gas tax, TransNet, and even the General Fund and Community Development Block Grants before turning to State and Federal funds. Finally, due to the limited funds available, all funding sources give priority to projects of a regional significance over those of local importance.

Since PCH Relocation is not needed to add any new roadway (or bike lane or sidewalk) capacity to PCH, and in fact will DECREASE vehicle roadway capacity if PCH is converted from 4 to 2 lanes, additional roadway funding to Relocate PCH is unlikely. The cost of PCH Relocation will therefore likely fall predominately on Carlsbad tax-payers. The tax-payer value of PCH Relocation has always been questionable at best. That is the reason it has not been built over the past 40-years and even now the City's General Plan DOES NOT COMMIT to providing PCH Relocation only that it "may" or 'may not' ever

happen. A People for Ponto Citizen prepared using City cost data A Cost-Benefit Analysis comparing PCH Relocation with simply providing the missing sidewalks on PCH and buying Vacant Ponto land for a Ponto Park. That Cost-Benefit Analysis showed that Buying Ponto Park would save Carlsbad's and other tax-payers tens of millions of tax-dollars and while also providing more and better Park and beach parking facilities and benefits. These 2001 Study and People for Ponto's Cost-Benefits facts need to be publicly disclosed to and considered by the Planning Commission.

**Subject:** Public Input to Carlsbad's proposed Local Coastal Program Amendments and Parks Master Plan & Growth Management Plan Updates - TPL map showing how poorly Carlsbad provides Parks - do the right thing for our future

Dear Carlsbad City Council, CA Coastal Commission and CA State Parks, and Carlsbad Parks and Planning Commissions:

This is public input to the Carlsbad City Council and Parks and Planning Commissions; and CA Coastal Commission regarding Carlsbad's proposed Local Coastal Program Amendment, and Growth Management & Parks Master Plan Updates.

Carlsbad City staff is directed to provide the City Council with a staff customized 'park accessibility' data from City staff consultants. However most of this work has already been done, is for free, and well documented by the Trust for Public Lands "Park Serve" data base. The TPL's "Park Serve" data base is the only data base that allows an 'apples-to-apples comparison' with other cities. The TPL's 'apples-to-apples comparison' shows:

- Carlsbad is the worst city in the 29 cities from Santa Barbara south to the Mexican board - for over 250 miles of CA coastline and for the over 5 million CA State Citizens within those Coastal cities – in providing park access. Attached is Carlsbad's "Park Serve" map/data that:
  - 48% of Carlsbad residents live within a 10-minute walk of a park
  - Only 57,941 (48%) of Carlsbad's population of 119,744 are within 10-minute walk of a park a is Served by Parks
  - TPL's data base is overgenerous in its accounting the Total Number of Parks in Carlsbad as 46 'parks'. This includes
  - TPL's data base is overgenerous in its accounting the Total Park Acres as 3,364 'park acres'.
- Still with the overgenerous accounting of 46 Parks and 3,364 park acres for Carlsbad, Carlsbad is still the worst of the 29 CA Coastal Cities from Santa Barbara to the Mexico (over 250 miles of CA Coastline and for over 5 Million CA Citizens) in providing Park Access to citizens, families and children per the same TPL's 'apples-to-apples' comparison. as listed below:

The Trust of Public Land submitted the attached letter to the City of Carlsbad, CA Coastal Commission, and CA State Park supporting Ponto Park. The TPL's 'apples-to-apples' comparison of these 29 Cities from Best-to-Worst is as follows:

1. Palos Verdes Estates provides Parks within 10-minute walk to 100% of residents
2. El Segundo provides Parks within 10-minute walk to 100% of residents
3. Hermosa Beach provides Parks within 10-minute walk to 100% of residents
4. Redondo Beach provides Parks within 10-minute walk to 98% of residents

5. Manhattan Beach provides Parks within 10-minute walk to 95% of residents
6. Del Mar provides Parks within 10-minute walk to 93% of residents
7. Dana Point provides Parks within 10-minute walk to 89% of residents
8. Carpinteria provides Parks within 10-minute walk to 87% of residents
9. Huntington Beach provides Parks within 10-minute walk to 85% of residents
10. Long Beach provides Parks within 10-minute walk to 84% of residents
11. Laguna Beach provides Parks within 10-minute walk to 82% of residents
12. Santa Monica provides Parks within 10-minute walk to 82% of residents
13. Oxnard provides Parks within 10-minute walk to 82% of residents
14. San Diego provides Parks within 10-minute walk to 81% of residents
15. Santa Barbara provides Parks within 10-minute walk to 78% of residents
16. Coronado provides Parks within 10-minute walk to 76% of residents
17. Newport Beach provides Parks within 10-minute walk to 76% of residents
18. Imperial Beach provides Parks within 10-minute walk to 74% of residents
19. Port Hueneme provides Parks within 10-minute walk to 73% of residents
20. Ventura provides Parks within 10-minute walk to 69% of residents
21. Encinitas provides Parks within 10-minute walk to 68% of residents
22. Los Angeles provides Parks within 10-minute walk to 63% of residents
23. Solana Beach provides Parks within 10-minute walk to 63% of residents
24. Oceanside provides Parks within 10-minute walk to 58% of residents
25. Seal Beach provides Parks within 10-minute walk to 57% of residents
26. Malibu provides Parks within 10-minute walk to 53% of residents
27. San Clemente provides Parks within 10-minute walk to 52% of residents
28. Rancho Palos Verdes provides Parks within 10-minute walk to 50% of residents
29. **Carlsbad provides Parks within 10-minute walk to 48% of residents [Carlsbad is lowest & most unfair]**

The Council and staff should be embarrassed if this is Park Standard you are providing citizens.

The CA Coastal Commission and Carlsbad City Council, Parks and Planning Commissions should read the data in the attached "Coastal Recreation" data file that has been provided many times but never acknowledged or discussed by the City. The "Coastal Recreation" data file documents some of the past Mayor and Council's shortcomings in Parks and Coastal Land Use planning for Parks in South Carlsbad.

Carlsbad Citizens have provided the City Council multiple times Key Suggestions on how the new Mayor and new Council can honestly, responsibly and more cost effectively address the documented need for Ponto Park (and fix the FALSE 'Open Space Standard exemption' past Councils provided Ponto developers. Those Suggestions are summarized in the attached "CTGMC key issues and suggestions 2022-12-6" file. Sadly these Carlsbad Citizen Suggestions have been completely ignored and not publicly disclosed/discussed/considered by the City Council.

We again ask the new Mayor and new Council to read/disclose/publicly discuss the Public Input Citizens send you. Please don't ignore, hide, cover up and fail to discuss this Public Input.

We are sending you this public input because we sincerely/deeply care about Carlsbad and the future Park environment we will leave future generations of Carlsbad citizens, families, children and visitors.

Aloha Aina,  
Lance

**Subject:** 2023-7-18 Council agenda item #9 - Public input for Carlsbad LCPA-Parks Master Plan & Growth Management Plan Updates - do the right and smart thing for our future

Dear Carlsbad City Council, CA Coastal Commission and CA State Parks, and Carlsbad Parks and Planning Commissions:

We again send you data and request you read, publicly disclose/discuss/consider the extensive Carlsbad Citizen input and documented data, as has been asked of you by over 5,500 petitions and many verbal presentations.

- Your Staff Report did not clearly disclose to you and Carlsbad Citizens the extent of Public Input on the Growth Management Update. The Staff Report hides from your and Citizen review 1,248 pages and 21 MB of Citizen Public in a link at a bottom of a report and does not even not even attempt to summarized the magnitude and main points of Citizen Input on Growth Management. Those failings are a disservice to you and Carlsbad Citizens. The vast majority of Carlsbad Citizens wanted an honest addressing of needed Park Accessibility, removing false ‘exemptions’ to the Open Space Standard, and because these issues intersect in a critical location specifically provide a much needed (and better tax-payer solution) Ponto Park. This was the vast majority of Citizen input, but was/is being hidden and ‘swept under the rug’ in the report to you and Citizens. Over 400 formal written petitions were submitted to the Committee.
  - Do the Right Thing – require an honest and full public accounting of the Carlsbad Citizen Input on Growth Management and Council Please discuss and honestly consider and represent that Carlsbad Citizen input.
  - Do the Right Thing – read and publicly disclose/discuss and direct staff to work WITH (not against) Citizens on the practical and data based suggestions in the attached “CTGMC key issues and suggestions 2022-12-6” file.
  
- Carlsbad Citizens had to find out that Carlsbad is 5 more cities worst at providing Park access for its residents. Carlsbad is the worst city in the 29 cities from Santa Barbara south to the Mexican board - for over 250 miles of CA coastline – in providing park access. The Council and staff should be embarrassed if this is Park Standard you are providing citizens. See the attached “Coastal Recreation” data file for that and other data showing the past Council’s failure in Parks and Coastal Land use planning for Parks in South Carlsbad.
  - Do the Right Thing – plan and fund Park accessibility for all Carlsbad residents be best not the worst.
  - Do the Right Thing – plan/fund a well-documented and much needed Ponto Park that is adequate in size/share to be a Park. A ‘fancy sidewalk’ is not a Park.
  - Do the Right Thing – READ, publicly discuss, take ownership in your direction to City staff on the Updated Park and Coastal Recreation (i.e. Public Park) data in the attached “2023 Jul - Coastal Recreation” file.
  - Do the Right Thing – READ, publicly discuss, take ownership the Park input from the nationally recognized Trust for Public Land in the attached “TPL Support for Ponto Park” file.
  - Do the Right Thing – fix the unfair distribution of City Parks and fix the clear need for a true Ponto Park as outlined in the attached “CTGMC key issues and suggestions 2022-12-6” file.
  - Do the Right Thing and work with Carlsbad People for Ponto Citizens. Carlsbad can be great if you let Carlsbad Citizens in and work for them. We have offered to help with dotation’s but have been turned away by the City.
  
- It is well documented in the attached “History of Open Space at Ponto” data file that past Council’s falsely “exempted” certain developers from providing the 15% Useable Growth Amendment Open Space required by the Open Space Standard. Ponto (LFMP Zone 9) developers were falsely ‘exempted’ as City data clearly shows Ponto was not developed in 1986 and did not in 1986 already dedicate 15% of the developable land as GM Open Space. In fact the City removed planned GM Open Space out of Ponto in 1996 land use changes that converted planned GM Open Space into Residential land use. The data in the “History of Open Space at Ponto” shows why Ponto, even with its currently 32 acres of vacant land – that last along Coastal South Carlsbad, is already developed at 40% higher residential density than the rest of the Carlsbad. Ponto has 40% more residential density, NO Park, and is missing due to past false ‘exemptions’ about 30 acres GM Open Space that Ponto

developers should have been required to provide. If this Council perpetuates a false 'exemption' that falsehood and lie to citizens will be your personal lie to both current and future Carlsbad families.

- Do the Right Thing – READ and publicly and honestly discuss the History of Growth Management Open Space at Ponto, and take ownership in your direction to City staff in the attached "History of Open Space at Ponto" file.
  - Do the Right Thing – and don't perpetuate a lie to Carlsbad Citizens about False Growth Management Open Space Exemptions. Be honest in your representation of current and future Citizens
  - Do the Right Thing – fix the False Open Space Exemptions as outlined in the attached "CTGMC key issues and suggestions 2022-12-6" file.
- Sadly Carlsbad found out in 2017 it will lose about 30 acres of Open Space (the State Campground and City's ONLY Low-cost Visitor Accommodations) in Coastal South Carlsbad due to sea level rise and increased Coastal/bluff erosion. Prior Council's never considered this loss of Open Space in the 2015 General Plan. Yet the City still asking the CA Coastal Commission to adopt the 2015 General Plan even though the Council now knows about how Carlsbad will lose 30 acres of Coastal Open Space in South Carlsbad. The attached "sea level rise & DLUP-LUPA planned loss of OS at Ponto" data file documents the Coastal Open Space loss the Past Council ignored. The current Council should account for and replace this loss of 30 acres of Coastal Open Space due to sea level rise in both the Growth Management plan and Local Coastal Program Updates.
    - Do the Right Thing – READ and publicly and honestly discuss Sea Level Rise/Coastal Erosion issues never considered in the Growth Management Plan Update, 2015 General Plan Update, and City proposed LCPA based on 2015 General Plan. The Sea Level Rise/Coastal Erosion issues are in the attached "Sea Level Rise & Carlsbad DLCP-LUPA planned loss of OS at Ponto" file.
    - Do the Right Thing – address this Coastal Open Space loss now with full public disclosure to Citizens, and directing accountable plans and funded actions in both the proposed Growth Management and Local Coastal Program updates.
    - Do the Right Thing – use the data/suggestions in the attached "CTGMC key issues and suggestions 2022-12-6" file to synergistically support addressing the loss of Coastal Open Space and critical Coastal Open Space Land Use in Coastal South Carlsbad.
- Sadly the current Council, and Carlsbad Citizens, were not provided all the over \$2 million in tax-payer paid Council studies and past Council's actions/inactions over 40-years on the proposed PCH Median Relocation Proposal. Most critically the current Council and Carlsbad Citizens have not been publicly presented the two 2001 Studies by URS & ERA that defined the number/amount of "Surplus Area" created by PCH Median Relocation and the "Financial Feasibility" of PCH Median Relocation. The current Council and Citizens are not being provided all the facts and data on the City's website. It is dishonest not to fully provide Citizens that data. Sadly the past Council's never considered other tax-payer saving solutions to address the well documented need for Ponto Park. Then, as now, there are more tax-payer efficient means to address the documented need for a Ponto Park and Complete PCH with needed sidewalks, bike lane improvements, and beach parking along PCH as documented in the attached "2 Part General Comparative Cost-Benefit & PCH Constraints Map" data files.
    - Do the right thing – direct staff to provide you and Carlsbad Citizens the 2001 Studies by URS and ERA, and the 2013 Study that shows likely environmental constraints in the PCH.
      - The current Council is now seeing PCH Relocation around Palomar Airport Road is already falling short and not able to 'create' the amount of "Surplus Area" from PCH Median Relocation as mapped out in the 2001 Studies; and the current Council is seeing costs are coming in at a far higher tax-payer cost.
      - Other better options to address Ponto Park needs are available and documented in the attached "2 Part General Comparative Cost-Benefit & PCH Constraints" data files.
    - Do the Right Thing – read, disclose and make publicly available to Carlsbad Citizens the two 2001 PCH Studies and the attached "2 Part Comparative Cost-Benefits & PCH Constraints" data files.
      - Carlsbad tax-payers will need to vote on PCH Median Relocation and both YOU and Citizens need to know the facts and fully consider the better options available to address the

documented need for a true Ponto Coastal Park and PCH (sidewalk, bikelane improvements, and beach parking).

If the current Council has a once in lifetime opportunity to correct past false exemptions and errors before it is too late. If the current Council fails to represent Carlsbad Citizens and perpetuates past falsehoods/errors/unfairness, they will become your personal falsehoods to the current Citizens you are supposed to represent and a false and failed legacy for future Carlsbad Citizens and their children. If the current Council fails to honestly represent and address Citizens' data/desires on Growth Management and Quality of Life issues you will ultimately lead the City down a path of lower quality of life (and reduced relative investment and value) as other cities provide more and better distributed Parks.

Failure to honestly provide a much needed and TRUE and significant Ponto Park (the last vacant land and opportunity to provide a true and meaningful Coastal Park) will push demand, increase VMT, traffic and parking congestion into North Carlsbad. Failure to provide a TRUE and significant Ponto Park will undermine the South Carlsbad's Coastal Recreation needs (and future economic and social sustainability) of all of current and future Carlsbad residents and visitors.

Ponto has the last remaining vacant and unplanned Coastal land for a 6-mile length of coast that is without Coastal Park. Buying Ponto Park is the far better and magnitude CHEAPER means for tax-payers to provide a significant Coastal Park for this 6-mile length of Coast (and ALL South Carlsbad) that is without a Coastal Park. The current Council should give Citizens the option to vote on the best and most cost effective solution for a much needed Ponto Park.

The current Council needs to responsibly address the data and issues thousands of Carlsbad Citizens have sent you. If the current Council fails to address these issues you will forever negatively impact forever our quality of life and eliminate the last viable, least constrained, and tax-payer effective option (Buying Ponto Park) for our future.

Each of the City Council members individually our your decision. Go down in history as being wise, true and doing the right thing for the future. Don't fail to disclose/address the FACTS. Your time is now. do the Right (and most tax-payer efficient) Thing – buy Ponto Park!

Lance Schulte

On 7/14/23 the following data was sent to the City of Carlsbad & CA Coastal Commission. The City is the worse Coastal City for over 250 miles of coastline from the City of Santa Barbara to the Mexican border in providing Parkland access to its citizens. Requiring Fenton the Ponto developer to provide their Required Parkland as land at Ponto will be a small but very important step in the right direction to start digging Carlsbad out of being dead last in providing park access. In 2023 Carlsbad refused to even ask the Ponto developer to provide their required Parkland Dedication as actual ParkLand at Ponto. The Trust for Public Land has mapped and documented this fact. The Trust for Public Land has also sent a letter to the City and City Council highlighting the need for a City Park at Ponto. Following is the Trust for Public Land data showing that Carlsbad is the worst City in providing Park access to its citizens. Ponto is one of worst areas in Carlsbad for City Park access per the City's Park Master Plan. The Trust for Public Land documents a city's 10-minute walk to Park at <https://www.tpl.org/parkserve>. The Average USA City provides Parks within 10-minute walk to 55% of residents [10% above Carlsbad]. **Carlsbad** provides Parks within 10-minute walk to **49.9% of residents [10% below National Average]**.

**Carlsbad is the worst of 29 Southern CA Coastal cities (from Santa Barbara south to the Mexican Border on over 250 miles of coastline) in providing Parks within 10-minute walk to residents:**

1. Palos Verdes Estates provides Parks within 10-minute walk to 100% of residents
2. El Segundo provides Parks within 10-minute walk to 100% of residents
3. Hermosa Beach provides Parks within 10-minute walk to 100% of residents
4. Redondo Beach provides Parks within 10-minute walk to 98% of residents
5. Manhattan Beach provides Parks within 10-minute walk to 95% of residents
6. Del Mar provides Parks within 10-minute walk to 93% of residents
7. Dana Point provides Parks within 10-minute walk to 89% of residents
8. Carpinteria provides Parks within 10-minute walk to 87% of residents
9. Huntington Beach provides Parks within 10-minute walk to 85% of residents
10. Long Beach provides Parks within 10-minute walk to 84% of residents
11. Laguna Beach provides Parks within 10-minute walk to 82% of residents
12. Santa Monica provides Parks within 10-minute walk to 82% of residents
13. Oxnard provides Parks within 10-minute walk to 82% of residents
14. San Diego provides Parks within 10-minute walk to 81% of residents
15. Santa Barbara provides Parks within 10-minute walk to 78% of residents
16. Coronado provides Parks within 10-minute walk to 76% of residents
17. Newport Beach provides Parks within 10-minute walk to 76% of residents
18. Imperial Beach provides Parks within 10-minute walk to 74% of residents
19. Port Hueneme provides Parks within 10-minute walk to 73% of residents
20. Ventura provides Parks within 10-minute walk to 69% of residents
21. Encinitas provides Parks within 10-minute walk to 68% of residents
22. Los Angeles provides Parks within 10-minute walk to 63% of residents
23. Solana Beach provides Parks within 10-minute walk to 63% of residents
24. Oceanside provides Parks within 10-minute walk to 58% of residents
25. Seal Beach provides Parks within 10-minute walk to 57% of residents
26. Malibu provides Parks within 10-minute walk to 53% of residents
27. San Clemente provides Parks within 10-minute walk to 52% of residents
28. Rancho Palos Verdes provides Parks within 10-minute walk to 50% of residents
29. **Carlsbad** provides Parks within 10-minute walk to **49.9% of residents [Carlsbad is lowest & most unfair]**

**Carlsbad is the lowest & most unfair to citizens of the 29 Southern California Coastal cities along over 250 miles of CA Coastline from Santa Barbara to the Mexican border. The population in these 29 cities is in the millions, and Carlsbad is the worst in providing (and planning to provide) Park access. Additional facts in this document, further documents the situation, and need for Ponto Park.**

*Source of data: Trust for Public land parkscores*

Trust for Public Land's 10-minute walk to Park Maps/data:

Carlsbad = <https://parkserve.tpl.org/mapping/index.html?CityID=0611194#reportTop>

Encinitas = <https://parkserve.tpl.org/mapping/index.html?CityID=0622678>

Irvine = <https://parkserve.tpl.org/mapping/index.html?CityID=0636770>

As fully documented in the "History of Open Space at Ponto" data file sent to both the City & CCC. The initial 1986 LCP for Ponto included a 12.8 acre Recreation Commercial land use (along with other additional Recreation and Open Space uses) that were never built. The 12.8 Recreation Commercial land use was eliminated by the City & CCC and converted to Residential land use in a 1994 LCP amendment with a land use regulation Policy placed on a 11.1 acre Planning Area F site to address the Coastal Recreation and Low-cost Visitor Accommodation needs for the State and LCP area. That existing Planning Area F LCP Policy a critical subject of the Carlsbad's proposed 2019 LCP Amendment

Updated Pubic Comments Coastal Recreation submitted on Oct 12<sup>th</sup> 2021:

---

On 10/8/21 the Carlsbad City Council and CA Coastal Commission were emailed data from an Official Carlsbad Public Records Request (# R002393-092121) on the City of Carlsbad's past compliance/noncompliance with the currently exiting Mello II LCP Land Use Policies # 6-2, 6-4 & 6-10 Certified in the mid-1980s. The City's documents show:

- For Policy 6-2 the 200-300 acre Park called out in Policy 6-2 has been reduced to Veterans Park's 91.5 acres, of which only 54% or 49.5 acres is even useable as a Park. The City provided no documents on how a 200-300 acre park called for in Policy 6-4 is now only 49.5 useable acres.
- For Policy 6-4 there were no City documents were provided. There was no City Public discussion, consideration, or City compliance with Policy 6-4 since the mid-1980's.
- For Policy 6-10 concerns providing Low Cost Visitor Accommodations. Public Parks are the lowest cost (free) Visitor accommodating land use there is.

The 3 existing LCP Land Use Policies are important for Carlsbad, and California's, Coastal land use resources. There appears little to no discussion of the City's past apparent failure to implementation of these 3 LCP LUPs in the current City consideration of changes to the LCP.

Following is a copy of Public Records Request # R002393-092121: "Carlsbad's Local Coastal Program (LCP) for the Mello II Segment of Carlsbad's Coastal Zone has long established land use Policies 6-2, 6-4 & 6-10 that were adopted by Carlsbad and Certified by the CA Coastal Commission in the early/mid-1980's. Mello II LCP Policies 6-2, 6-4 & 6-10 are shown on page 86-87 of Carlsbad's 2016 compiled LCP and are:

- "POLICY 6-2 REGIONAL PARK: If the population of Carlsbad increases in accordance with SANDAG's projected Series V Population Forecasts, it is estimated that Carlsbad will need to develop a new regional park containing 200 to 300 acres in order to adequately serve the public. A location for a new regional park must,

therefore, be established. Consideration should be given to a facility within the Aqua Hedionda Specific Plan Area, or adjacent lands. The Batiquitos Lagoon area should also be considered.

- **POLICY 6-4 NEED FOR ADDITIONAL OVERNIGHT CAMPING:** Additional overnight camping facilities, the main source of lower cost visitor and recreational facilities, are needed throughout the San Diego coastal region. Additional facilities of this kind should be provided in a regional park within the Carlsbad area. This can be accomplished in conjunction with an eventual Batiquitos Park, within the Aqua Hedionda Specific Plan Area, and/or along with the development of private recreational facilities.
- **POLICY 6-10 LOWER COST VISITOR-SERVING RECREATIONAL USES:** Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Encourage a range of affordability for overnight visitor accommodations. Evaluate the affordability of any new or redeveloped overnight visitor accommodations, including amenities that reduce the cost of stay. Mitigation may be applied to protect and encourage affordable overnight accommodations”

The public record request is to see documents of:

- City Staff reports, presentations and communications to the Carlsbad Planning and Parks Commissions, and City Council regarding the City’s consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies; and
- Carlsbad Planning and Parks Commissions, and City Council minutes, resolutions and ordinances documenting City of Carlsbad consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies.”

Updated Pubic Comments on Coastal Recreation submitted on January 2021:

---

Over 11-months ago in a 1/29/20 1:56PM email People for Ponto Carlsbad citizens first provided the City of Carlsbad both data and comments on **14 critical Coastal Recreation issues (see pages 5-30 below)**. The data and the 14 critical issues do not seem to be receiving appropriate disclosure/presentation/discussion/consideration in the Dec 2, 2020 Staff Report to the Planning Commission. To assure the 26-pages of citizen data and requests in the 1/29/20 email was received by the Planning Commission the file was re-emailed on 12/22/20 12:24pm and specifically addressed to City Council, City Clerk, Planning Commission, Parks Commission, Housing Commission, HEAC, CA Coastal Commission, and CA HCD. As citizens we request each of these 14 data points (with supporting data) be honestly considered.

In reading the Dec 2 Staff Report citizens conducted additional analysis of City Park data. That research further reinforces and documents the 14 Critical Coastal Recreation issues and highlights the relatively poor amount of City Park and Coastal Recreation planned by Carlsbad’s Staff proposed Draft LCP-LUPA. We hope the City Council and City Commissions, and CA Coastal Commission & HCD will consider this additional analysis of City data and citizen input:

<u>Coastal Zone data</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>	<u>note or source</u>
Coastline miles	6.4	3.9	6.0	Carlsbad Draft LCPA 201, Google Maps
Coastal Zone Acres	9,219	1,460	7,845	& Oceanside & Encinitas LCPs
Coastal Zone Acres	100%	16%	85%	% relative to Carlsbad
<u>City Park Standard data</u>				
City Park Standard	3	5	5	required park acres / 1,000 population

Park Standard %      100%                  167%                  167%                  % is relative to Carlsbad

- Oceanside & Encinitas 'require' and plan for 67% MORE Parkland than Carlsbad
- Carlsbad 'requires' and plans for ONLY 60% as much Parkland as Oceanside & Encinitas
- Carlsbad only requires developers provide 60% of the parkland (or in-lieu fees) as Oceanside & Encinitas require
- Encinitas has a 'Goal' to provide 15 acres of Park land per 1,000 population

Developed City Park      2.47                  3.65                  5.5                  acres / 1,000 population

Developed Park      100%                  148%                  223%                  % is relative to Carlsbad

- Oceanside provides 48% MORE developed park land than Carlsbad
- Encinitas provide 123% MORE developed park land than Carlsbad
- Carlsbad ONLY provides 68% and 45% as much Parks as Oceanside & Encinitas respectively

National Recreation & Park Asso. Metric: a typical City provides 1 park / 2,281 pop. & 9.9 Park acres / 1,000 population

- Carlsbad (3 acre) Park Standard is ONLY 30% of what a typical City provides nationally
- Carlsbad requires developers to provide, 70% LESS Park acres than typical City provides nationally

National Recreation & Park Asso., Trust for Public Land, et. al.: 10 minute (1/2 mile) Walk to a Park Planning Goal

- Both Oceanside and Encinitas plan parks to be within a 10-minute (1/2 mile) walk to homes.
- Carlsbad DOES NOT plan Parks within walking distance to homes
- Carlsbad is NOT providing equitable and walking/biking access to Parks

Some Carlsbad Parks that are not fully useable as Parks:

	<b>total park acres</b>	<b>Unusable park acres</b>	<b>% of park unusable</b>	<b>reason unusable</b>
Existing Parks with Unusable Open Space acreage				
Alga Norte - SE quadrant	32.1	10.7	33%	1/3 of park is a Parking lot not a park In many other Carlsbad Parks a significant percentage of those Parks are consumed by paved parking lots and unusable as a Park.
Hidden Hills - NE quadrant	22.0	12.7	58%	city identified unusable habitat open space
La Costa Canyon SE quadrant	14.7	8.9	61%	city identified unusable habitat open space
Leo Carrillo - SE quadrant	27.4	16.5	60%	city identified unusable habitat open space
Poinsettia - SW quadrant	<u>41.2</u>	<u>11.1</u>	<u>27%</u>	city identified unusable habitat open space
Existing Park subtotal	137.4	59.9	44%	44% of these Parks are unusable as Parkland

Anticipated Future Park

development projects

Park - quadrant

Veterans - NW	91.5	49.5	54%	estimated unusable habitat open space
Cannon Lake - NW	6.8	3.4	50%	estimated unusable water open space
Zone 5 Park expansion - NW	9.3	0	0	appears 100% useable as a Park
Robertson Ranch - NE	<u>11.2</u>	<u>0</u>	<u>0</u>	appears 100% useable as a Park
Future park subtotal	118.8	52.9	45%	45% of Future Parks are unusable as Parks

**Unusable Open Space acres**

**in Existing & Future Parks      256.2      112.8                  44%                  112.8 acres or 44% is unusable as Parks**

- 112.8 acres or 44% of the Existing & Future Parks are unusable Open Space and can't be used as Parkland
- **Based on City's minimum 3-acres/1,000 population Park Standard, 112.8 acres of Unusable Parkland means 37,600 Carlsbad Citizens (or 32.5% of Carlsbad's current population of 112,877) will be denied the minimum amount of Parkland that they can actually use as a Park.**

- **59.9 acres of Existing unusable ‘park’ / 3 acre park standard x 1,000 population = 19,967 Carlsbad citizens and their children are currently being denied useable park land. 19,967 is 17.7% of Carlsbad’s current population.**
- In addition to these 19,967 existing citizens and their children denied park land, the City needs to develop additional Park acreage in the NE, SW and SE quadrants to cover current shortfalls in meeting in the minimal 3 acre/1,000 population park standard for the current populations in the NE, SW and SE quadrants.
- **The current NE, SW and SE quadrants park acreage shortfalls are in addition to the 19,967 Carlsbad citizens and their children that do not have the minimum 3 acres of parkland per 1,000 population**
- **Current FY 2018-19 MINIMUM park acreage shortfalls are listed in the table below. They are:**
  - **4.3 acres for 1,433 people in NE quadrant,**
  - **6.8 acres for 2,266 people in SW quadrant, and**
  - **2.3 acres for 767 people in SE quadrant**

	Shortfall (excess) in Current Quadrant <u>Min. Park standard by</u>		<u>Future Park</u>		<u>existing Park shortfalls are for NE, SW &amp; SE quadrants</u>
	<u>acres</u>	<u>population need</u>	<u>acres</u>	<u>%</u>	
NW quadrant	(-14.2)	(-4,733)	107.6	91%	Current NW parks are 14.2 acres over min. standard & capacity for 4,733 more people at min. park standard. 91% of all Future City Parks are in NW quadrant
NE quadrant	4.3	1,433	11.2	9%	Future Park will exceed minimum NE park standard
SW quadrant	6.8	2,266	0	0%	No min. parks for 2,266 people in SW quad. Park deficit
SE quadrant	2.3	767	0	0%	No min. parks for 767 SE quadrant Park deficit

A Park Standard minimum is just a “Minimum”. City policy allows the City to buy/create parks above the City’s current 3 acre/1,000 pop. MINIMUM (and lowest) Park Standard of surrounding Coastal cities. Carlsbad already did this in the NW quadrant. It then added 3.1 more NW quadrant Park acres as part of the Poinsettia 61 Agreement. Poinsettia 61:

- converted 3.1 acres of NW City land planned/zoned for Residential use to Open Space Park land use/zoning,
- facilitated a developer building condos (increasing park demand) in the SW quadrant,
- required the SW Quadrant developer pay \$3 million to build the 3.1 acre NW quadrant park, and
- required the SW Quadrant developer pay to convert 3.1 acres of NW Quadrant & 5.7 acres of SW Quadrant City Park land to habitat that will be unusable as a City Park.

So Poinsettia 61 increased SW Quadrant development (that both increased SW Park Demand and expanded the current SW Quadrant Park deceit) while simultaneously using SW Quadrant development to pay for the conversion of 3.1 acres of residential land in the NW Quadrant to City Park (the NW Quadrant already has surplus park land per the City’s minimum standard).

People for Ponto strongly supports creating City Parks above the City’s current low 3-acre per 1,000 population minimum, as the City’s minimum standard is relatively low and substandard relative to other cities; many Carlsbad parks have significant acreage that is in fact ‘unusable’ as a park. Most importantly People for Ponto Citizens think it is very important to prioritize providing City Parks in areas of Park Inequity that are unserved by City Parks. However it seems very unfair to the SW Quadrant citizens to be so unserved and starved of the bare minimum of City Parks while at the same time funding City Parks in excess of City standard in other Quadrants.

The Poinsettia 61 illustrates a larger unfair (and dysfunctional) distribution of Quadrant based City Park demand and supply that is keenly evident in the demands/supply funding and location disparity of Veterans Park. Most all the

development impact and park demand that paid Veterans Park fees came from the SW, SE and NE Quadrants yet the Veterans Park (supply) is not in those SW, SE and NE Quadrants. This inequity is counter to the implicit City requirement that City Parks be provided within the Quadrant of their Park demand. It is logical and proper that City Parks be provided and equitably distributed to be close to the development and population that generated the Park demand.

The City Park inequity at Ponto and in other Coastal areas of the City is counter to several CA Coastal Act policies; counter to good city planning and good CA Coastal planning. Park Inequity is highly detrimental to the City, and City and CA citizens in the long-term; fails to properly distribute and match the location supply with the location of demand for Parks; and is counter to basic fundamental issues of fairness. Since 2017 People for Ponto has tried to get the City Council and Staff to address this inequity, specifically at Ponto, and to do so in a way that embraces a true and honest Citizen-based planning process.

**Coastal Recreation:**

2. Request that the City as part of its Draft LCP Public Review process broadly-publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCPA processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park: This disclosure is needed to correct about 20 years of City misrepresentation to the public on the since 1996 and currently Existing LCP requirements at Ponto, and the City's prior planning mistakes at Ponto. Citizens have been falsely told by the City that all the Coastal planning at Ponto was done already and that the City followed its Existing LCP regarding the need for a park at Ponto, and that this is already decided and could not be reversed. This misinformation has fundamentally stifled public review and public participation regarding the Coastal Zone. City failure to provide such a broad-public disclosure on the documented prior, and apparently current proposed, "planning mistakes" would appear to violate the principles of Ca Coastal Act Section 30006. A broad-public disclosure would for the first time allow citizens to be accurately informed on the Existing LCP requirements at Ponto so they can provide informed public review and comment regarding the need for a Coastal Park in in this last vacant 'unplanned' area. The requested broad-public disclosure by the City of the City past mistakes and the Existing LCP requirements at Ponto is consistent with CA Coastal Act (CCA) "Section 30006 Legislative findings and declarations; public participation - The Legislature further finds and declares that **the public has a right to fully participate in decisions affecting coastal planning**, conservation and development; that achievement of **sound coastal conservation and development is dependent upon public understanding and support**; and that the continuing planning and implementation of **programs for coastal conservation and development should include the widest opportunity for public participation.**" The public cannot participate as outlined in CCA Section 30006 if past City 'mistakes' and misrepresentations on Coastal planning at Ponto go undisclosed to the public. If the public isn't fully informed about the 20-years of LCP planning mistakes at Ponto how could the public in the past (and now in the present) participate in the proposed LCP Amendment – **Public Participation as noted in Section 30006 above is the means to sound coastal conservation and development and is "... dependent upon public understanding ..."**. The City's past mistakes at Ponto need to be corrected by slightly different a Draft LCP Amendment process than currently outlined by the City; a new process is needed that clearly, opening and honestly informs and engages the public on the Existing LCP Ponto issues. The City's current Draft LCP Amendment process fails to follow CCA Section 30006 in that most all the citizens we encounter are as yet unaware of the City's Ponto mistakes and how they can participate in in the DLCPA process without that information. We see this daily in conversations we have with our fellow citizens. We even saw at the Oct 20, 2019 Carlsbad Planning Commission meeting that the Planning Commission was unaware of the planning mistakes at Ponto. How can a decision body of the City make a decision without knowing about these prior 'planning mistakes' facts that surround what they are being asked to decide on? Repeatedly since 2017 Carlsbad citizens and People for Ponto have asked the City to fully acknowledge the City's prior flawed planning at Ponto, and to correct that with ether maintaining the Existing LCP Non-residential Reserve Land Use or restarting the Coastal Planning at Ponto with a true and accurately informed Community-based Coastal Planning process consistent with Section 30006.

We request the City during the DLCPA Public Review period broadly and publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCP and other "planning efforts" public participation processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park, and 1) provide a truly honest public participation process on that disclosure consistent with CCA Section 30006 as part of the Draft LCP Amendment process or 2) retain the Existing LCP Non-residential Reserve Land Use and require a comprehensive and honest community-based redo of Coastal Resource planning at Ponto.

3. City fully and publicly reply to and the City Council consider the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process: Lance Schulte on 1/23/20 received an email reply by the City to his follow-up email regarding the status of the 11/20/19 citizen concerns/requests public comments and letters presented to the Planning Commission. This is appreciated, however it is request that the City fully publicly reply to the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process and present the to the City Council 11/20/19 citizen concerns/requests so the City Council can consider them and provide any direction to City Staff. City Staff first presented a summary presentation of the proposed Draft LCP Amendment to the Carlsbad Planning Commission on November 20, 2019, and indicated the public comment period would close on November in less than 2-weeks. Citizens and citizen groups provided public testimony to the Planning Commission, both verbally and in two written letters. The CCC was copied on those letters. The testimony and letters noted significant concerns about the City's proposed LCP Amendment process and made three requests:
- Disclose and provide a publically accessible 'Redline Version' of the Existing 2016/Proposed LCP land use Plan and Policies so everyone can see the proposed changes to the Existing LCP.
  - Provide true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern or objections. Citizen Workshops, when done right, are valuable means to openly educate, discuss and work to consensus options. These areas, including Ponto, were/are subject to multiple lawsuits, so true open and honest public workshops would provide an opportunity to openly and honestly discuss the issues and hopefully build public consensus/support for solutions. This approach seems consistent with CCA Section 30006, and common sense.
  - Extend the public comment period 6-months to allow Citizen Review of the Redline Version of the LCPA and allow time for Citizen Workshops.

The City did extend the Public Review period 2-months over the holidays to January 31, 2020. This is appreciated although many think this is inadequate given the significance of the Proposed Land Use Plan Amendments, and lack of Redline Version to compare. The City and their consultants required several extra years beyond schedule prepare the proposed LCP Amendments. The extra years of City Staff work reflects on the volume of the over 500-pages in the documents and the time needed to understand the Existing LCP and then create an Amended LCP. Citizens need sufficient time, proper comparative tools (redline) and a process (workshops) to understand the proposed LCP Amendments that is reflective of extensive extra time needed by City Staff and consultants needed. Truncation of lay public review to a few months for an Amendment that took paid professionals many years to produce seems a more than a bit inappropriate. The City appears to be rejecting citizens' request to be provided a 'Redline Version' of the Existing 2016/Proposed LCP land use Plan. So public review comments will tainted or will miss many issues due having to manually cross-reference a 150-page Existing LCP LUP with a Proposed 350-page Proposed LCP LUP. There will be unknown and unconsidered changes in the Draft LCP Amendment that the public and city and CCC decision makers will not know about due to the lack of 'Redline Version'.

The City also appears to reject citizen requests for true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern – such as Ponto. Like Coastal Recreation issue #1 above the following citizen requests appear consistent with CA Coastal Act (CCA) Section 30006, and the City's rejection of that requests seem counter to the CA Coastal Act.

We again request of the City to provide: 1) a 'Redline Version' to the public and decision makers, along with sufficient time to review and comment on the 'Redline Version'; and 2) true Citizen Workshops for Ponto and the

other last remaining significant vacant Coastal lands in Carlsbad as part of the Draft LCP Amendment process, or as part of deferred LCP Amendment process for those areas.

4. Coastal Zoned land is precious: the very small amount of remaining vacant Coastal land should be reserved for “High-Priority” Coastal Recreation Land Uses under the CA Coastal Act to provide for the growing and forever ‘Buildout’ needs of Carlsbad and CA Citizens, and our visitors.
  - Less than 1.8% (76 square miles) of San Diego County’s 4,207 square miles is in Coastal Zone. This small area needs to provide for all the forever Coastal needs of the County, State of CA, and Visitors. Upland Coastal Recreation (Coastal Park) land use is needed to provide land to migrate the projected/planned loss of “High-Priority” Coastal Recreation land uses due to Sea Level Rise impacts. There is only 76 miles of total coastline in San Diego County; a significant amount is publicly inaccessible military/industrial land. So how the last few portions of Coastal Land within Carlsbad (which is about 8% of San Diego County’s Coastline) is planned for the forever needs for High-Coastal-Priority Recreation Land Use is critical for Carlsbad, San Diego, and California Statewide needs into the future.
  - Most all the developable Coastal land in Carlsbad is already developed with Low-Coastal-Priority residential uses. Only a very small percentage of Carlsbad’s developable Coastal land, maybe 1-2%, is still vacant. This last tiny portion of fragment of vacant developable Coastal Land should be documented in the Draft LCP and reserved for “High-Priority” Coastal Land uses – most critically Coastal Recreation – to address the growing Coastal Recreation needs from a growing population and visitors. These growing needs are all the more critical in that existing Coastal Recreation lands will be decreasing due to inundation and erosion due to DLCPA planned Sea Level Rise.
  - This image of the western half of San Diego County graphically shows (in the blue line) the very small Coastal Zone Area that needs to provide the Carlsbad’s and California’s Coastal Recreational needs for all San Diego County residents and Visitors:

We request that 1) the amount and location of remaining vacant Coastal land in Carlsbad be documented and mapped and be reserved for high-priority Coastal Land Uses consistent with CCA Goals in Section 30001.5 "... (c) ... **maximize public recreational opportunities in the coastal zone** consistent with sound resources conservation principles and constitutionally protected rights of private property owners. (d) **Assure priority for coastal-dependent and coastal-related development over other development on the coast.** ... "; 2). This data be used in the City's analysis and the public's review and discussion about the City's proposed Draft 'Buildout' Land Use Plan. The City's proposed Draft 'Buildout' Land Use Plan will forever lock in the amount "maximum public recreational opportunities in the coastal zone" and will be the final Coastal Land Use Plan that is supposed to "assure priority for coastal-dependent and coastal-related development over other development on the coast". Most of Carlsbad's Coastal Zone is already developed or committed to low-priority land uses contrary to these CCA Goals, so how we finally and forever plan to use of the last small remaining vacant Coastal Land is very important.

5. The proposed Draft LCP Amendment in Chapter 3 makes unfounded statements regarding the proposed Amendment to the LCP Land Use Plan provision of "High-Priority" Coastal Recreation land use: On page 3-3, at the beginning of the Chapter 3 – Recreation and Visitor Serving Uses the City correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation uses, and cites multiple CCA Sections to that effect. The City's proposed Coastal Land Use Plan then states on page 3-5 that a high proportion of land in the City is dedicated open

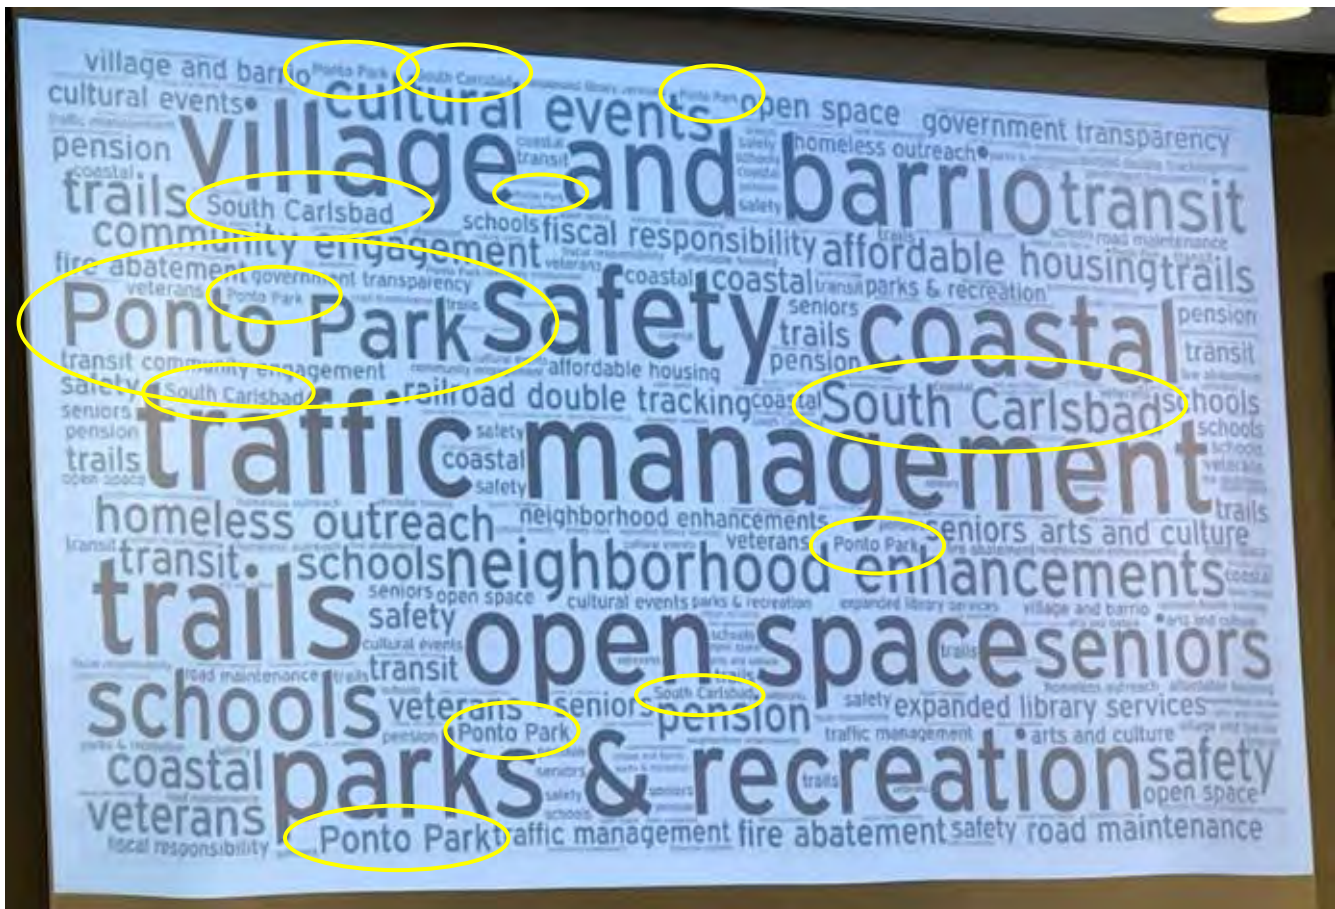

space available for passive and active use, yet provides no justification or accurate metric to support this statement. This is a critical unsubstantiated and speculative statement that is not supported by any comparative data (justifying the “high proportion” statement). The City later in Chapter 3 compared the adjoining cities of Oceanside and Encinitas to try to show how the proposed Draft LCP LUP Amendment provides higher levels of Visitor Serving Accommodations. That ‘non-common denominator’ comparison was fundamentally flawed, as noted in a prior separate Draft LCPA public review comment from People for Ponto regarding another high-priority Coastal land use (visitor accommodations) planned for in Chapter 3, but at least it was an attempt to compare. However, for the Coastal Recreation portion of Chapter 3, the City does not even attempt to provide any comparative data to support (or justify) the proposed Coastal Recreation Land Use Plan and statements. The Coastal Recreation Chapter also fails to disclose Carlsbad’s adopted City Park Master Plan (Park Service Area and Equity map) data that shows a clear conflict between the CA Coastal Act Policy Sections noted at the beginning of Chapter 3 and Chapter 3’s proposed Draft Coastal Recreation Land Use Plan.

Comparative Coastal Recreation: Comparing the Land Use Plan and policies of Oceanside, Carlsbad and Encinitas, one finds Carlsbad’s proposed Coastal Recreational Plan and Policies are not “high”, but very low compared with Oceanside and Encinitas. Carlsbad has a General Plan Park Standard of 3 acres of City Park per 1,000 Population. Oceanside has a 5 acres of City Park Standard per 1,000 population, and Encinitas has a 15 acres per 1,000 population standard, and an in-lieu park fee requirement of 5 acres per 1,000 population. Carlsbad’s proposed Coastal Recreation Land Use Plan is in fact not ‘high’ but is in fact the lowest of the three cities, with Carlsbad providing only 40% of Oceanside’s park standard, and only 20% of Encinitas’s Park Standard. Citywide Carlsbad currently has 2.47 acres of developed park per 1,000 population, Oceanside currently has 3.6 acres of developed park per 1,000 population, and Encinitas currently has 5.5 acres of developed park per 1,000 population. Although this data is citywide, it shows Carlsbad’s current amount of developed parkland is less than 70% of what Oceanside currently provides, and less than 45% of what Encinitas currently provides. Carlsbad is not currently providing, nor proposing a Coastal Land Use Plan to provide, a ‘high’ proportion of Coastal Recreation Land Use compared to Oceanside and Encinitas.

On page 3-5 Carlsbad may be misrepresenting city open space that is needed and used for the preservation of federally endangered species habitats and lagoon water bodies. This open space Land cannot be Used for Coastal Recreation purposes; and in fact Land Use regulations prohibit public access and Recreational Use on these Lands and water bodies to protect those endangered land and water habitats. 78% of Carlsbad’s open space is “open space for the preservation of natural resources” and cannot be used for Coastal Parks and Recreational use. Although “open space for the preservation of natural resources” does provide scenic or visual amenity, and this amenity is addressed as a different coastal resource. Visual open space is not Coastal Recreation Land Use. It appears Carlsbad is proposing in the Draft LCP Amendment to continue to, providing a ‘low’ percentage of Coastal Park Land Use and Coastal Recreation Land Use compared to adjoining cities.

In addition to the comparatively low amount of Coastal Park land Carlsbad plans for, Carlsbad scores very poorly regarding the equitable and fair distribution and accessibility of Coastal Parks and Coastal Recreation Land Uses. Both the City of Oceanside and Encinitas have very robust and detailed Park and Land Use plans to promote an equitable distribution of, and good non-vehicular accessibility, to their Coastal Parks. By comparison, Carlsbad’s park land use plan scores poorly, as exemplified in Ponto and South Carlsbad. Ponto’s existing population requires about 6.6 acres of City Parkland per Carlsbad’s low 3 acres per 1,000 population standard. Yet the nearest City Park is several miles away and takes over 50 minutes to walk along major arterial roadways and across Interstate 5 to access. As such this nearest park is not an accessible park for Ponto children, and thus Ponto children have to play in

our local streets to find a significantly large open area to play in. Ponto residents have to drive their kids to get to a park increasing VMT and GHG emissions. The City’s proposed Coastal Recreation Land Use Plan ‘solution’ to Ponto’s no-park condition, along with the City’s need to add an additional 6.5 acres of new City parks in Southwest Carlsbad to comply with the Southwest Carlsbad’s 2012 population demand (at a ratio of 3-acre/1,000 population) is to provide a City Park – Veterans Park – over 6-miles away from the Ponto and Southwest Carlsbad population need. This makes a bad situation worse. The City’s proposed location is totally inaccessible to serve the needs of the population of children or anyone without a car, that it is intended to serve in South Carlsbad. This City proposed Coastal Recreation Land Use Plan ‘solution’ seems inappropriate and inconsistent with the CA Coastal Act and common sense. During the City’s Veterans Park and budget community workshops citizens expressed a desire for a Ponto Park to be the solution to our Ponto and Southwest Carlsbad Park deficits. Those citizen requests were not apparently considered as part of the City’s proposed Draft Coastal Recreation Land Use Plan. Following is an image summarizing the magnitude of citizen needs/desires expressed at the City’s Budget workshop. Note the number and size of the text citing Ponto Park and South Carlsbad that reflects the number and magnitude/intensity of citizen workshop groups’ input. The failure to acknowledge this public participation and data in the Coastal Recreation Land Use Plan Park seems in conflict with CCA Sections 30006 and 30252(6):

For South Carlsbad there is a complete lack of any existing or planned City Coastal Park and park acreage west of I-5, while North Carlsbad has 9 existing and 1 planned City Coastal Parks totaling 37.8 acres of City Coastal W of I-5 North Carlsbad. Not only is this unfair to South Carlsbad, it is also unfair to North Carlsbad as it increases VMT and parking impacts in North Carlsbad because South Carlsbad is not providing the City Coastal Parks for South Carlsbad resident/visitor demands. This City Park disparity is shown on Figure 3-1 of the Coastal Recreation Land Use Plan;

however it more accurately illustrated in the following data/image from the adopted Carlsbad Park Master Plan's "Service Area Maps (Equity Maps)". The image below titled 'No Coastal Park in South Carlsbad' shows Carlsbad's adopted "Park Service Area Maps (Equity Maps)" from the City's Park Master Plan that says it maps "the population being served by that park type/facility." The added text to the image is data regarding park inequity and disparity in South Carlsbad. The image compiles Carlsbad's adopted Park "Park Service Area Maps (Equity Maps)" for Community Parks and Special Use Area Parks that are the City's two park acreage types produced by the City's comparatively low standard of 3 acre of City Park per 1,000 population. The City's Park Service Area Maps (Equity Maps) shows areas and populations served by parks within the blue and red circles. City data clearly shows large areas of overlapping Park Service (areas/populations served by multiple parks) in North Carlsbad and also shows large areas in South Carlsbad with No Park Service (areas/populations unserved by any parks) and Park Inequity in South Carlsbad. It clearly shows the City's Documented Park Need and Park inequity at Ponto. The Existing LCP LUP for Ponto's Planning Area F in is required to "consider" and "document" the need for a "Public Park". The City's adopted Park Service Area Maps (Equity Maps) clearly shows the inequity of Coastal City Park between North and South Carlsbad, and the need for Coastal Parks in South Carlsbad – particularly at Ponto. The City's proposed Draft 'Buildout' Coastal Recreation Land Use Plan instead proposes to lock-in documented City Public Coastal Park inequity and unserved Coastal Park demand at Ponto and South Carlsbad forever. It does so by proposing the last vacant undeveloped/unplanned Coastal land – Ponto Planning Area F - in the unserved Ponto and South Carlsbad coastline areas instead of being planned for much needed City Park and Coastal Recreation use be converted to even more low-priority residential and general commercial land uses. These 'low-priority' residential uses, by the way, further increase City Park and Coastal Recreation demand and inequity in Coastal South Carlsbad. This is wrong, and a proposed 'forever-buildout' wrong at the most basic and fundamental levels. The proposed Draft Coastal Recreation Land Use Plan by NOT providing documented needed City parks for vast areas of Coastal South Carlsbad is inconsistent with the CA Coastal Act policies and Existing LCP LUP requirements for Ponto Planning Area F; and also inconsistent with fair/equitable/commonsense land use and park planning principles, inconsistent with CA Coastal Commission social justice goals, inconsistent with social equity, inconsistent with VMT reduction requirements, and inconsistent with common fairness. A different Coastal Recreation Land Use Plan should be provided that provides for a socially equitable distribution of Coastal Park resources so as to would allow children, the elderly and those without cars to access Coastal Parks. The proposed Draft 'Buildout' Coastal Recreation Land Use Plan forever locking in the unfair distribution of City Parks appears a violation of the not only CCA Sections 30213, 30222, 30223, and 30252(6) but also the fundamental values and principles of the CA Coastal Act. The Draft also appears a violation of Carlsbad's Community Vision.

# No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

A different Coastal Recreation Land Use Plan is required to provide a more equitable distribution of City Parks with non-vehicular accessibility. Such a different plan would advance State and City requirements to reduce vehicle Miles Traveled (VMT) and greenhouse gas emissions that contribute to climate change and sea level rise impacts. Please note that the data for the above basic comparison comes from City of Carlsbad, Oceanside and Encinitas General Plan and Park Master Plan documents.

Data shows the proposed Coastal Recreation Plan conflicts with the CA Coastal Act policy Sections. As mentioned page 3-3 correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation Land Uses, and pages 3-5 list multiple CA Coastal Act (CCA) policy Sections that confirm this. However, given the significant statewide importance of Coastal Recreation Land Use, the City proposed 'Buildout' Coastal Recreation Land Use Plan does not appear to adequately address and implement these CCA Policies, and most noticeably in the Ponto area of South Carlsbad. Coastal Recreation is a significant Statewide High-Priority Land Use under the CCA. For a substantially developed non-coastal-industry city like Carlsbad Coastal Recreation is likely the biggest land use issue. This issue is even more elevated due to the fact that there are only a few small areas left of undeveloped Coastal land on which to provide Coastal Recreation, and Carlsbad is proposing a Coastal 'Buildout' Land Use Plan on those areas. The use of the last few remaining vacant portions of Coastal land for Coastal Recreation Land Use is the most important land use consideration in the proposed Draft LCP Land Use Plan Amendment as population and visitor growth will increase demands for Coastal Recreation. It is thus very surprising, and disturbing that the proposed Coastal Recreation Land Use Plan is so short, lacks any comparative and demand projection data, lacks any resource demand/distribution and social equity data, and lacks any rational and clear connection with CCA Policy and the proposed 'Buildout' Coastal Land Use plan. This is all the more troubling given that:

- The Ponto area represents the last significant vacant undeveloped/unplanned land near the coast in South Carlsbad that can provide a meaningful Coastal Park.
- The fact that the City's Existing LCP requires the city consider and document the need for a "i.e. Public Park" on Ponto's Planning Area F prior to the City proposing a change of Planning Area F's "Non-residential

Reserve” land use designation. The City has repeatedly failed to comply with this LCP LUP requirement, and worse has repeatedly failed to honestly inform citizens of this LCP LUP requirement at planning Area F before it granted any land use. The City, apparently implementing speculative developer wishes, has repeatedly proposed changing Planning Area F’s Coastal Land Use designation to “low-priority” residential and general commercial land uses without publically disclosing and following the Existing LCP LUP.

- The City’s currently developed parks in the southern portion of the City do not meet the city’s comparatively low public park standard of only 3 acres per 1,000 population. Since 2012 there has been City park acreage shortfall in both SW and SE Carlsbad.
- The Existing population of Ponto (west of I-5 and south of Poinsettia Lane) requires about 6.6 acres of Public Park based on the City’s comparatively low public park standard of 3 acres per 1,000 population. There is no Public Park in Ponto. Adding more population at Ponto will increase this current park demand/supply disparity.
- Carlsbad and other citizens have since 2017 expressed to the City the strong need for a Coastal Park at Ponto, and requested the City to provide a true citizen-based planning process to consider the Public Park need at Ponto. The Citizens’ requested process is fully in-line with CCA Goals, Public Participation Policy, Land Use Policies, and the Existing LCP Land Use Plan/requirements for Planning Area F and is the most appropriate means to consider and document the need for a Public Park at Ponto as required by the Existing LCP Land Use Plan.
- Planning Area F is for sale, and a non-profit citizens group has made an offer to purchase Planning Area F for a much needed Coastal Park for both Ponto and inland South Carlsbad residents and visitors. How should these facts be considered by the City and CCC?
- Carlsbad has no Coastal Parks west of I-5 and the railroad corridor for the entire southern half of Carlsbad’s 7-mile coastline.
- The southern half of Carlsbad’s coastline is 5.7% of the entire San Diego County coastline and represents a significant portion of regional coastline without a meaningful Coastal Park west of I-5 and the Railroad corridor.
- The City’s proposed Coastal Recreation Land Use Plan provides No Documentation, No Rational, and No Supporting or Comparative Data to show the proposed Coastal Recreation Land Use Plan in fact complies with the CA Coastal Act.

6. There is no Coastal Recreation/Park west of interstate 5 for all South Carlsbad, or half of the entire City. This is an obviously unfair and inequitable distribution of Coastal Recreation/Park resources that should be corrected by changes to the Draft LCP Land Use Amendment: The following image (which was sent to the City and CCC on several prior communications) was first requested by former Carlsbad Councilman Michael Schumacher during a People for Ponto presentation/request at the Oct 23, 2018 City Council meeting. The data compiled in the image shows how the South Coastal Carlsbad (Ponto) is not served by a Park per the City’s adopted Parks Master Plan. The blue dots on the map are park locations and blue circle(s) show the City’s Park Master Plan adopted Park Service Areas and Park Equity. This data, from pages 87-88 of the City of Carlsbad Parks Master Plan, shows all City Parks (both Community Parks and Special Use Areas in Coastal Carlsbad (except Aviara Park east of Poinsettia Park and west of Alga Norte Park). The text on the left margin identifies the South Carlsbad Coastal Park (west of I-5) gap along with the number of South Carlsbad Citizens (over half the City’s population) without a Coastal Park. The left margin also identifies more local issues for the over 2,000 Ponto area adults and children. For Ponto residents the nearest Public Park and City proposed ‘solution’ to the South Carlsbad and Ponto Public Park deficit are miles away over high-speed/traffic roadways and thus somewhat hazardous to access and effectively unusable by children/the elderly or

those without cars. Having been a 20-year resident of Ponto I regularly see our children have to play in the street as there are no Public Park with large open fields to play at within a safe and under 1-hour walk away. Ponto citizens have submitted public comments regarding this condition and the lack of a Park at Ponto

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

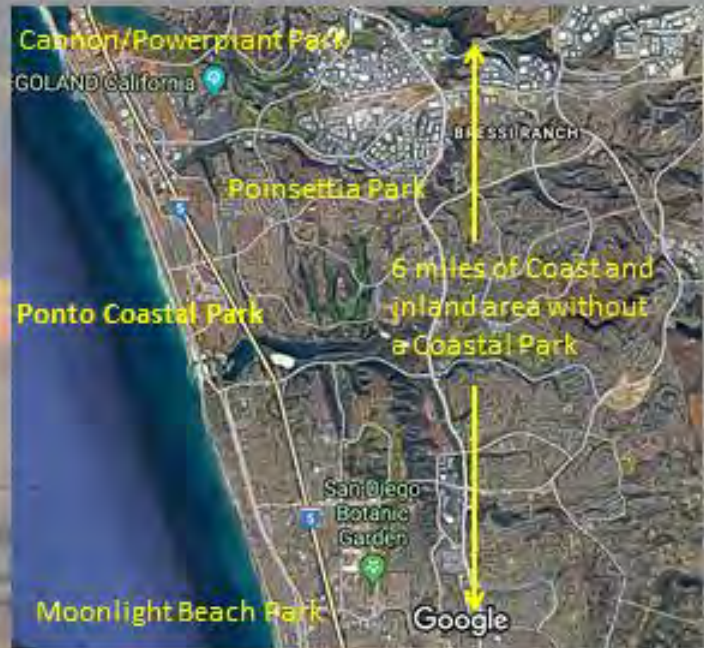

Ponto is at the center of regional 6-mile Coastal Park Gap. A Coastal Park in this instance being a Public Park with practical green play space and a reasonable connection with the Coast (i.e. located west of the regional rail and Interstate-5 corridors). The following image shows this larger regional Coastal Park Gap centered on the Ponto Area, and the nearest Coastal Parks – Cannon Park to the north, and Moonlight Park to the south.

Regionally this image shows Ponto is the last remaining significant vacant Coastal land that could accommodate a Coastal Park to serve the Coastal Park current needs of over existing 2,000 Ponto residents, 64,000 existing South Carlsbad residents, and a larger regional population. It is also the only area to serve the Coastal Park needs for the thousands of hotel rooms in Upland Visitor Accommodations in South Carlsbad.

# How Ponto Serves Region

- Ponto is in the middle of the regional Coastal Park Gap
- A Ponto Coastal Park fills a critical 6 mile gap of coastline without a Coastal Park - 8.6% of SD County coastline
- A Ponto Coastal Park Serves over 26,000 homes & 64,000 citizens just in South Carlsbad without a Coastal Park
- Serves many more people outside Carlsbad

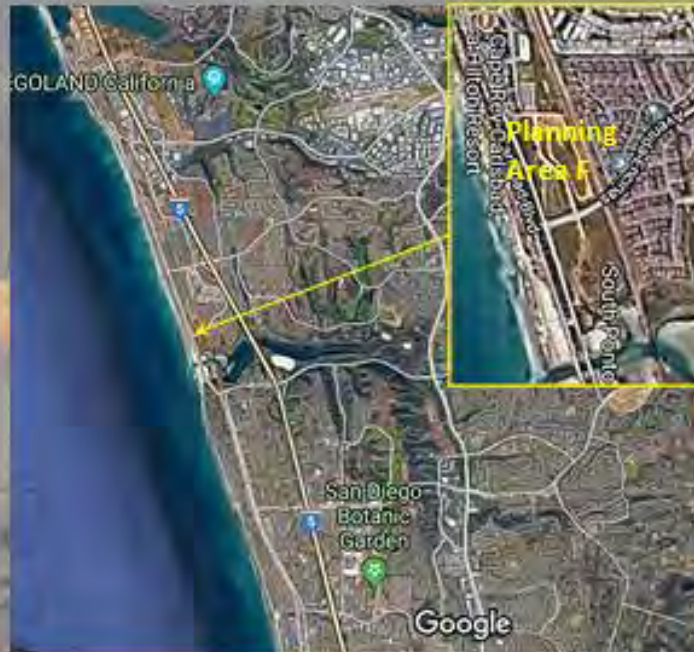

As People for Ponto first uncovered and then communicated in 2017 to the City and CCC; Carlsbad's Existing (since 1994) Local Coastal Program LUP currently states (on page 101) that Ponto's Planning Area F: carries a Non-Residential Reserve (NRR) General Plan designation. Carlsbad's Existing Local Coastal Program Land Use Plan states: "Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an "unplanned" area ..." and requires that: "... **As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.**" CA Coastal Commission actions, Carlsbad Public Records Requests 2017-260, 261, and 262, and 11/20/19 City Planner statements confirm the City never fully communicated to Carlsbad Citizens the existence of this LCP requirement nor did the City comply with the requirements. Of deep concern is that the City is now (as several times in the past) still not honestly disclosing to citizens and implementing this Existing LCP requirement as a true and authentic 'planning effort'. The lack of open public disclosure and apparent fear of true public workshops and Public Comment about the Existing Planning Area F LCP requirements are troubling. The point of a 'planning effort' is to openly and publically present data, publically discuss and explore possibilities/opportunities, and help build consensus on the best planning options. Citizens are concerned the city has already made up its mind and there is no real "planning effort" in the proposed Draft LCP Amendment process, just a brief Staff Report and at the end provide citizens 3-minutes to comment on the proposal. This is not the proper way to treat the last remaining significant vacant land in South Carlsbad that will forever determine the Coastal Recreation environment for generations of Carlsbad and California citizens and visitors to come.

The following data/images show how Ponto is in the center of the 6-mile (west of I-5 and Railroad corridor) regional Coastal Park gap. Ponto is the last remaining vacant and currently "unplanned" Coastal land that is available to address this regional Coastal Park Gap.

## How Ponto Serves Region cont.

- **Relieves Coastal Park congestion** in North Carlsbad, Encinitas and Solana Beach
- Area currently needs Coastal Park as seen by:
  - Ponto Beach parking congestion
  - current trespass use of Planning Area F as a Park
- **6.6 acre portion of Planning Area F** addresses SW Quad City Park deficit

## How Ponto Serves Region cont.

- A Ponto Park helps address 2050 and beyond Regional Population and Visitor Growth demands for Coastal Parks
- A Ponto Park provides the lowest-cost coastal access and recreation opportunities for CA citizens and visitors

## How Ponto Serves Region cont.

- Vital park and open space amenity for Visitor serving businesses and accommodations
- 6.6 acre unique City Coastal Park venue to stage special events: Runs, bike rides, triathlons, sports, coastal festivals, etc.

## How Ponto Serves Region cont.

- Critical Park space for So. Carlsbad State Beach Campground
- Provides a big training and staging space for Junior lifeguards
- Dog walk trail

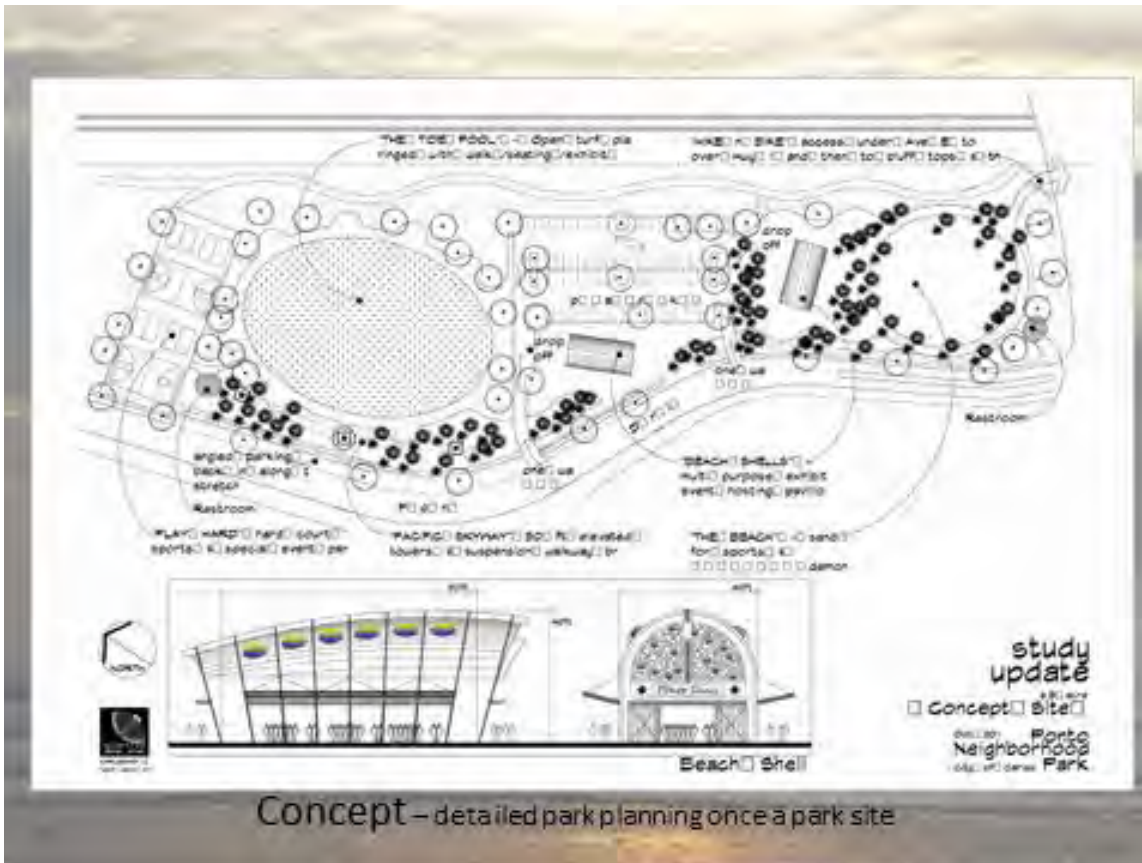

# Ponto Coastal Park Concept

- A concept – but shows potential recreational opportunities
- Provides **vital parkland support for beach & open play fields**
- Concept plan a gift from San Pacifico Community Association

One possible Concept image of a potential Ponto Coastal Park at Planning Area F is illustrated below. The potential for a Ponto Coastal Park is real. The speculative land investment fund (Lone Star Fund #5 USA L.P. and Bermuda L.P.) that currently owns Planning Area F is selling the property, and is available for the City of Carlsbad to acquire to address the documented demand/need for a City Park and City Park inequity at Ponto and in Coastal South Carlsbad. A Ponto Beachfront Park 501c3 is working to acquire donations to help purchase the site for a Park. These situations and opportunities should be publicly discussed as part of the City Staff's proposed Local Coastal Program Land Use Plan Amendment.

7. Projected increases in California, San Diego County and Carlsbad population and visitor growth increases the demand for High-Priority-Coastal Recreation land use:

- Increasing Citizen demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

San Diego County Citizen Population - Source: SANDAG Preliminary 2050 Regional Growth Forecast

1980	1,861,846
1990	2,498,016
2000	2,813,833
2010	3,095,313
2020	3,535,000 = 46,500 Citizens per mile of San Diego County coastline
2030	3,870,000
2040	4,163,688
2050	4,384,867 = 57,700 Citizens per mile of San Diego County coastline

2020 to 2050 = 24% increase in San Diego County population.

Citizen Population will continue beyond 2050. Carlsbad may plan for 'Buildout' in 2050, but what is San Diego County's 'Buildout'? There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for this growing population. If we do not increase our supply of Coastal Recreational Resources for these increased demands our Coastal Recreation Resources will become more overcrowded, deteriorated and ultimately diminish the Coastal Recreation quality of life for Citizens of Carlsbad and California. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5) and there is No Coastal Park in all of South Carlsbad to address the Coastal Recreation needs of the 64,000 South Carlsbad Citizens.

- Increasing Visitor demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

Yearly Visitors to San Diego County – source: *San Diego Tourism Authority; San Diego Travel Forecast, Dec, 2017*

2016	34,900,000
2017	34,900,000
2018	35,300,000
2019	35,900,000
2020	36,500,000 = average 100,000 visitors per day, or 2.83% of County’s Population per day, or 1,316 Visitors/coastal mile/day in 2020
2021	37,100,000
2022	37,700,000

This is growth at about a 1.6% per year increase in visitors. Projecting this Visitor growth rate from 2020 to 2050 results in a 61% or 22,265,000 increase in Visitors in 2050 to:

2050	58,765,000 = average 161,000 visitors per day, or 3.67% of the County’s projected 2050 Population per day, or 2,120 Visitors/coastal mile/day in 2050.
------	--

The number of Visitors is likely to increase beyond the year 2050. There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for these projected 2050 61% increase, and beyond 2050, increases in Visitor demand for Coastal Recreational Resources. Increasing Coastal Recreation land is a vital and critically supporting Land Use and vital amenity for California’s, the San Diego Region’s and Carlsbad’s Visitor Serving Industry. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5). There are thousands of hotel rooms in South Carlsbad that have NO Coastal Park to go to in South Carlsbad. This needs correcting as both a Coastal Act and also a City economic sustainability imperative.

- We request that the as part of the public’s review, the City Staff proposed Draft LCP Amendment to the Land Use Plan clearly document if and/or how future forever ‘Buildout’ City, Regional and Statewide population and visitor population demand for Coastal Recreation and City Coastal Parks are adequately provided for both in amount and locational distribution in the Carlsbad proposed Amendment of the LCP Land Use Plan.

8. Carlsbad’s Draft Local Coastal Program Land Use Plan Amendment says it plans to a year 2050 buildout of the Coastal Zone. The Draft Local Coastal Program Land Use Plan Amendment then is the last opportunity to create a Coastal Land Use Plan to provide “High-Priority” Coastal Recreation Land Use, and will forever impact future generations of California, San Diego County, and Carlsbad Citizens and Visitors:

- The Draft LCPA indicates in 2008 only 9% of All Carlsbad was vacant land. Less is vacant now in 2019. Carlsbad’s Coastal Zone is 37% of the City, so vacant unconstrained land suitable for providing Coastal Recreation is likely only 3-4%. The prior request for a full documentation of the remaining vacant Coastal lands will provide a better understanding needed to begin to make the final ‘buildout’ Coastal Land Use Plan for Carlsbad. The Draft LCPA does not indicate the amount and locations of currently vacant unconstrained Coastal Land in Carlsbad. This final limited vacant land resource should be clearly documented and mapped in the DLCPA as it represents the real focus of the DLCPA – the Coastal Plan for these remaingn undeveloped

lands. These last remaining vacant lands should be primarily used to provide for and equitably distribute “High-Priority” Coastal Recreation Land Uses consistent with CCA Sections:

- i. Section 30212.5 “... Wherever appropriate and feasible, public facilities, including parking areas or facilities, **shall be distributed throughout an area so as to mitigate against the impacts, social and otherwise, of overcrowding or overuse by the public of any single area.**”;
- ii. Section 30213 “... **Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...**”;
- iii. Section 30222 “**The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development,** but not over agriculture or coastal-dependent industry.”
- iv. Section 30223 “**Upland areas necessary to support coastal recreational uses shall be reserved for such uses, where feasible**” ,
- v. Section 30251 ... The location and amount of new development should maintain and enhance public access to the coast by ... 6) assuring that the recreational needs of new residents will not overload nearby coastal recreation areas by **correlating the amount of development with local park acquisition** and development plans with the provision of onsite recreational facilities to serve the new development”

Adopted City Park Service Area and Park Equity maps discussed earlier document the proposed Draft LCP Amendment’s inconstancy with the above CCA Policy Sections. The locations and small amounts remaining vacant Coastal lands provide the last opportunities to correct the inconsistencies of City proposed Draft “buildout” LCP Land Use Plan Amendment with these Coastal Act Policies.

Currently and since 1996 there has been LCP LUP Policy/regulations for Ponto Planning Area F that require consideration of a “Public Park” prior to changing the existing “unplanned Non-residential Reserve” Land Use designation. A map and data base of vacant developable Coastal land should be provided as part of the Draft LCPA and the Draft LCPA. This map and data base should document the projected/planned loss of Coastal land use due to Sea Level Rise. Draft LCPA projects Sea Level Rise will eliminate several beaches and High-Priority Coastal Land Uses like Coastal Lagoon Trails and the Campground.

- The LCP Land Use Plan should plan and reserve the very limited vacant developable Coastal land for the long-term ‘Buildout’ needs of “High-Priority” Coastal Recreation Land Use. Vacant developable Coastal land is too scarce to be squandered for “low-priority” uses. Sea Level Rise will reduce “High-Priority” Coastal Uses. So how vacant developable Upland area should be preserved for “High-Priority” Coastal Uses is a key requirement to be fully documented and discussed in the Draft LCPA. If not one of two things will eventually happen 1) any new Coastal Park land will require very expensive purchase and demolition of buildings or public facilities to create any new Coastal Park land to meet existing and growing demand; or 2) Coastal Recreation will be hemmed-in by “low-priority” uses and thus force Coastal Recreation to decrease and become increasingly concentrated and overcrowded in its current locations; and thus will promote the eventual deterioration of our current Coastal Recreation resources. A plan that fails to fix Coastal Park deficits and then increase Coastal Parks in pace with increased population/visitor demand is a plan that can

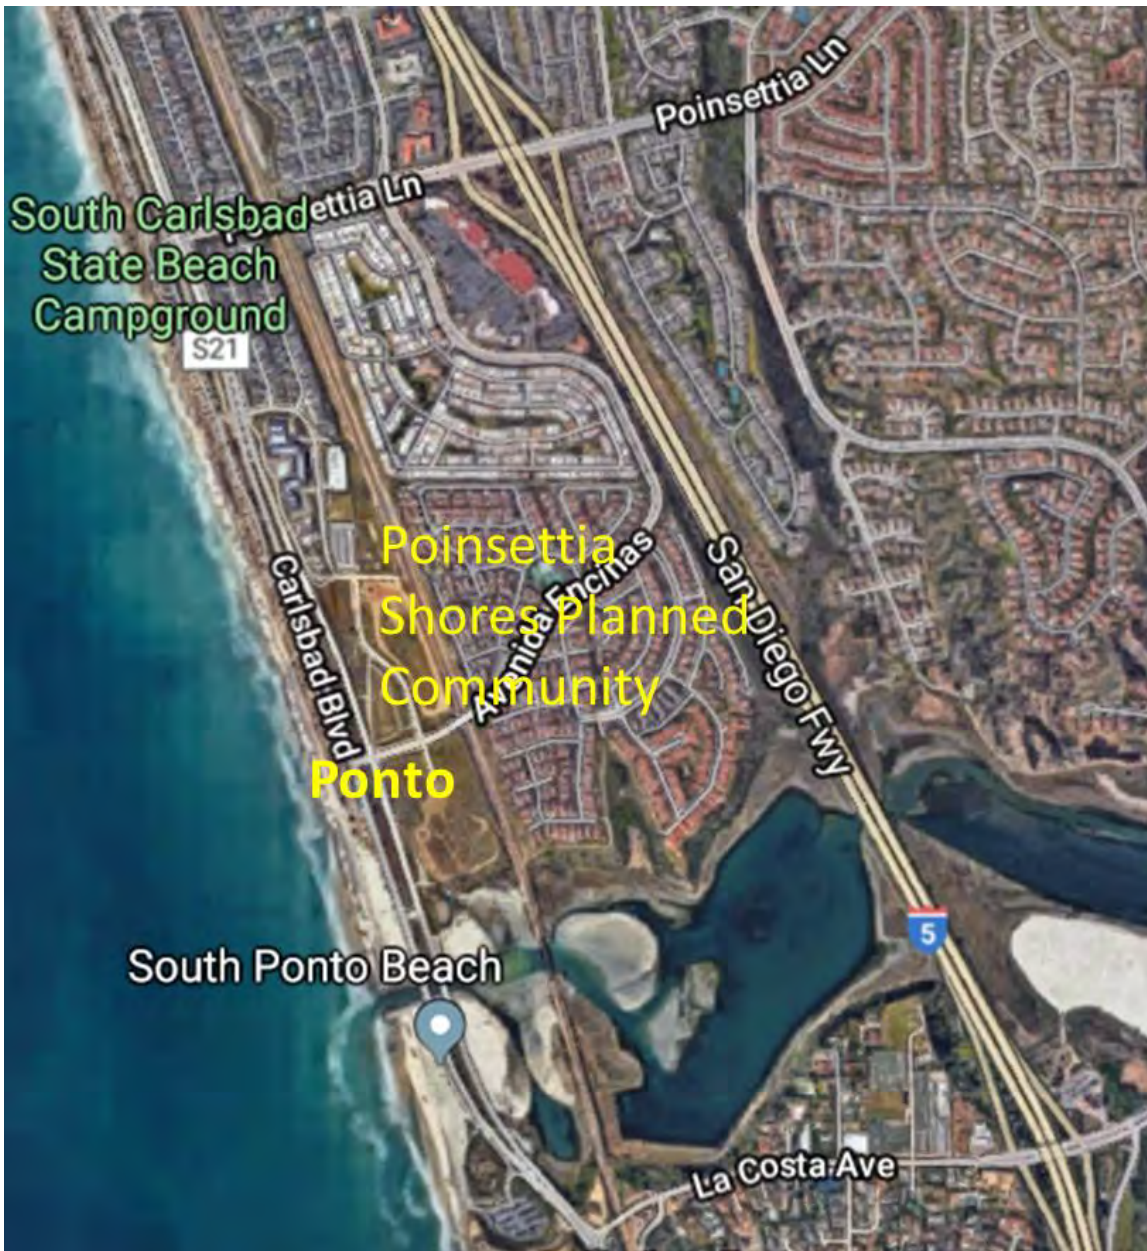

only result in degradation. How the Draft LCPA documents and addresses the land use planning of the last small portions of vacant developable Coastal land is critical for the future and future generations.

9. Citizens of South Carlsbad are concerned about the City's multiple prior flawed Ponto planning processes or 'mistakes' the City has made yet is basing the City Staff's proposed Draft LCP LUP. The concerns being the City is not openly and honestly communicating information to citizens and the public, and not allowing a reasonable and appropriate community-based planning process to address the documented Park, Coastal Recreation and unconstrained open space needs in South Carlsbad. One of these groups of citizens has created a [www.peopleforponto.com](http://www.peopleforponto.com) website to try to research and compile information and hopefully provide a better means for citizens to understand facts and then express their concerns/desires to the City of Carlsbad (City) and CA Coastal Commission (CCC). Over 2,000 emails have sent to the City and CCC regarding Coastal Land Use Planning Issues at Ponto. The San Pacifico Planned Community (i.e. San Pacifico Community Association) has also, since 2015, sent numerous emailed letters to the City and CCC noting the significant concerns about changes in Coastal planning the City is proposing for our Planned Community.

Repeatedly over 90% of surveyed citizens (results emailed prior to both the City and CCC) have expressed the vital need and desire for a Coastal Park at Ponto to serve the current and future Coastal Recreation needs for all both Ponto and South Carlsbad and for larger regional and State Coastal Recreational needs. This desire is supported by data, CA Coastal Act Policy, and also Carlsbad's Community Vision – the foundation for the City's General Plan. Ponto is the last remaining vacant Coastal area available to provide for those needs in South Carlsbad and for a regional 6-mile stretch of coastline. Citizens have expressed deep concern about the City's flawed prior Coastal planning efforts for Coastal Recreation at Ponto, including two repeated LCP Amendment "mistakes" (Ponto Beachfront Village Vision Plan in 2010 and General Plan Update in 2015) when the City twice failed to publicly disclose/discuss and then follow the Existing LCP requirements at Ponto – specifically for Planning Area F. People for Ponto had to use multiple Carlsbad Public Records Requests in 2017 to find these "mistakes". CCC Staff was helpful in both confirming the City "mistakes" and communicating back to the City. As citizens we are still unclear as to how/why these two repeated "mistakes" happened. There is citizen concern that the City is again repeating these two prior "mistakes" by not at the beginning of the Public Comment Period clearly and publicly disclosing the Planning Area F LCP requirements to citizens as part of the current LCP Amendment process, and also by not implementing the existing LCP requirement PRIOR to proposing an Amended Coastal Land Use Plan for Ponto. The City in its proposed LCP Amendment process is putting-the-cart-before-the-horse with respect to honest and open consideration, documentation and public discussion of the need for high-priority Coastal Recreation land use required of Planning Area F at Ponto. The City is also not clearly letting all Carlsbad citizens know about the Existing LCP requirements for Ponto's Planning Area F so they can be informed to reasonably participate in public review and comment regarding amending that LCP requirement, and the need for Coastal Recreation land uses in South Carlsbad. Since 2017 there has been repeated citizen requests to the City (copies were provided to the CCC) to fix these multiple fundamental/foundational flaws by in the City's prior Coastal Recreation and Public Parks and Open Space at planning, and the currently Proposed Draft LCP Land Use Plan Amendment. Since 2017 there have also been repeated citizen requests to the City to provide a truly open, honest, inclusive community-based planning process and workshops with the accurate and honest information, prior to forming a proposed Draft LCP Land Use Plan Amendment. As citizens we believe we can constructively work with the City and CCC towards a consensus or viable options on these important Coastal Recreation issues if the City allows and encourages such an open, honest and inclusive process. We request the City respond to the requests submitted to the City since 2017, and again request such a process from the City before any LCP Amendment is first considered by the Planning Commission and City Council. Such a requested process benefits all.

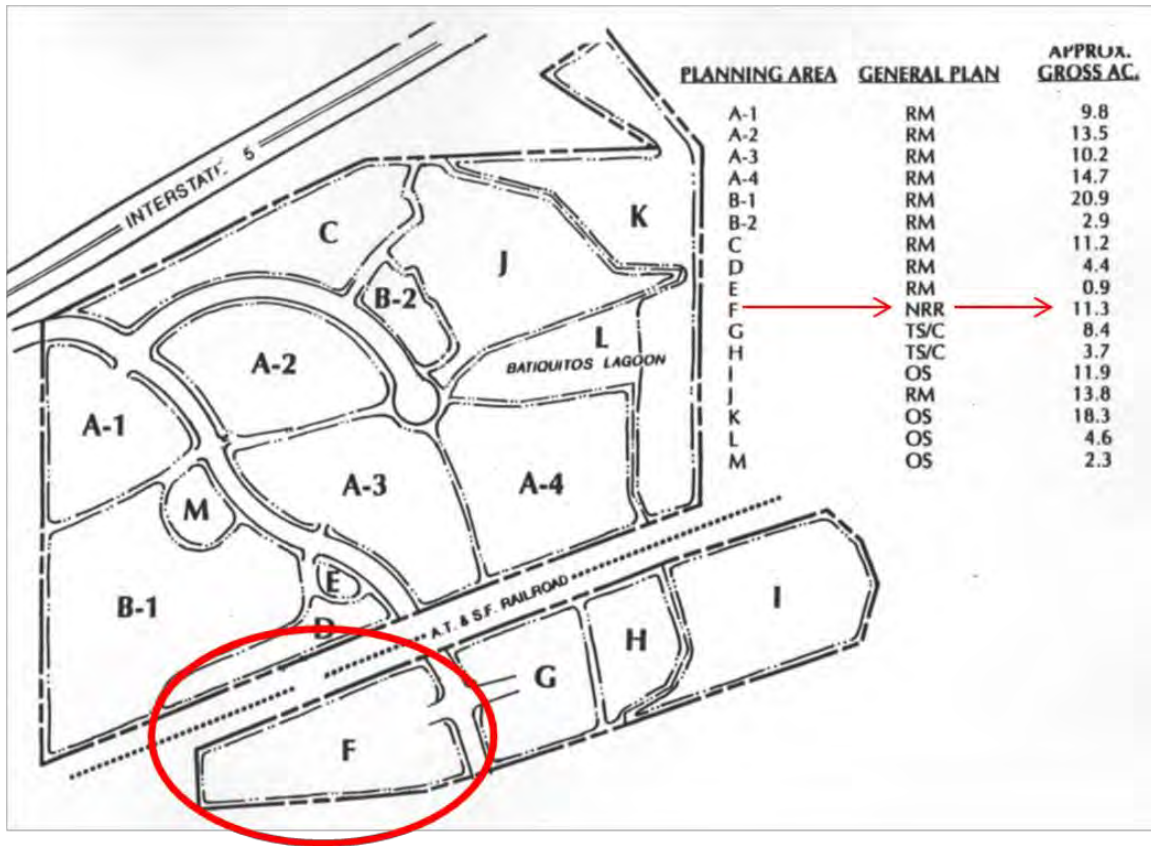

10. Why the Draft LCPA Land Use Plan for Ponto should provide for the current and future Coastal Park and Recreation needs for South Carlsbad, the San Diego Region and California.

- Ponto, is one of last remaining vacant and undeveloped Coastal lands in North County
- Ponto is the last remaining undeveloped Coastal land in South Carlsbad
- Ponto has the last unplanned Planning Area of the Existing Poinsettia Shores Planned Community & Local Coastal Program that can be planned for high-priority Coastal Recreation land use. This Existing LCP requires Planning Area F be considered for a “Public Park”.
- Following is a map of the Ponto area in South Carlsbad:

Following is the LCP Land Use map from the Existing Poinsettia Shores Master Plan & Local Coastal Program adopted in 1996. This is the Land Use map that the City is proposing to change in the proposed LCP Amendment to the Land Use Plan. As the Existing LCP Land Use map shows most all the land is ‘low-priority’ residential use at an RM Residential medium density, a small portion is ‘high-priority’ Visitor Serving TC/C Tourist Commercial. Most all the

Open Space is constrained and undevelopable land (the steep CSS habitat bluffs above Batiquitos Lagoon) or water (the lagoon water). This land/water is owned by the State of California, like the inner lagoon east of I-5. Only Planning Area M at 2.3 acres is unconstrained Open Space and it provides a small private internal recreation facility for the approximately 450 homes and 1,000 people in the Planned Community. This small recreation area is a City requirement for ‘planned developments’ to off-set loss open space from planned development impacts on housing quality. Planned developments can propose designs that reduce normal setback and open space areas – they bunch together buildings to increase development – such as the smaller lot sizes, and extensive use of “zero-setbacks” to reduce typical lot sizes that occurs at Poinsettia Shores. A private recreation facility in any of the City’s planned developments is never considered a replacement for required City Parks. Planned Developments, like unplanned developments, are required to dedicate Park land to the City, or pay a Park In-Lieu fee to the City so the City provide the developer’s obligation to provide City Park acreage to address the population increase of their proposed planned development. For Poinsettia Shores’ population the City’s minimum City Park Standard would require developers set aside 3 acres of City Park land for local park needs. For the larger Ponto area population about 6.6 acres of City Park Land is required. The Existing LCP reserves Planning Area F as an unplanned “Non-residential Reserve” Land Use until the Public Park needs for Ponto are considered and documented. Only then can the NRR land use be changed.

11. Developers have overbuilt in the Ponto area of the Coastal Zone. The City of Carlsbad has under questionable circumstances is currently choosing to ‘exempted’ Ponto developers from providing the minimum amount of unconstrained Open Space according to the City’s developer required Open Space Public Facilities Standard. The legality of these confusing circumstances is subject to a lawsuit against the City. However the City’s computerize mapping system has documented that the Ponto area of the Coastal Zone is missing about 30-acres of Unconstrained Open Space that can be used to fulfill the City’s Open Space Performance Standard that states that

15% of unconstrained and developable land must be preserved by developers as Open Space. Following is a summary of data from the City data regarding the missing Open Space at Ponto (Local Facility Management Plan Zone 9, LFMP Zone 9) in the Coastal Zone pursuant to the City's Open Space Performance Standard. If it is desirable People for Ponto can provide the City GIS map and parcel-by-parcel data base on which the following summary is based:

City of Carlsbad GIS data calculations of Open Space at Ponto area of Coastal Zone:

472 Acres = Total land in LFMP Zone 9 [Ponto area] per City of Carlsbad GIS data

(197 Acres) = Constrained land/water/infrastructure that is excluded from the City's Open Space Standard

275 Acres = Unconstrained land in LFMP Zone 9 (Ponto) subject to the City's Open Space Standard

X 15% = Minimum unconstrained Open Space requirement per the City Open Space Standard

41 Acres = Minimum unconstrained Open Space required in LFMP Zone 9

(11 Acres) = Actual unconstrained Open Space provided & mapped by City in LFMP Zone 9

**30 Acres = Missing unconstrained Open Space needed in LFMP Zone 9 [Ponto area of Coastal Zone] to meet the City's minimum GMP Open Space Standard. 73% of the required Open Space Standard is missing.**

Thus the Ponto area of the Coastal Zone appears overdeveloped with 30 additional acres of "low-priority" residential land uses due to developers' non-compliance to the City's Open Space Public Facility Performance Standard's Minimum developer required Open Space requirement. As noted a citizens group has a pending lawsuit with the City over the City's current 'exempting' Ponto and future developers from meeting the Open Space Standard.

12. The prior pre-1996 LCP for Ponto – the Batiquitos Lagoon Educational Park Master Plan & LCP (BLEP MP/LCP) had significant Open Space and recreational areas. These significant Open Space and Recreational areas were removed with BLEP MP/LCP's replacement in 1996 by the currently existing Poinsettia Shores Master & LCP (PSMP/LCP) and its City Zoning and LCP LUP requirements that reserved Planning Area F with the current "Non-residential Reserve" Land Use designation. Since the BLEP MP/LCP it appears developers and the City of Carlsbad have worked to remove "High-Priority" Coastal land uses (i.e. Coastal Recreation and Park uses) out of the Ponto area and replaced them with more "low-priority" residential and general commercial land uses. For example:

- Planning Area F used to be designated "Visitor Serving Commercial" as part of the original 1980's BLEP MP/LCP for Ponto.
- In 1996 the BLEP MP LCP was changed by developer application to the now current PSMP LCP, and the LCP LUP designation changed from "Visitor Serving Commercial" to "Non-Residential Reserve" with the requirement to study and document the need for "High-Priority" Coastal Recreation (i.e. Public Park) and/or Low-cost visitor accommodations prior to any change to Planning Area F's "Non-residential Reserve" LCP land use.
- In 2005 the City started to try to change Planning Area F to low-priority residential and general commercial land use in the City's Ponto Beachfront Village Vision Plan (PBVVP). At this time the City made its first documented Coastal 'planning mistake' by not disclosing to the public the existence of Planning Area F's LCP requirements and then also not following those LCP requirements. The City's planning process seemed focused on addressing developer's land use desires, and increasing land use intensity to boost "Tax-increment financing" as the City had established a Redevelopment Project Area at Ponto. A short time after the State of CA dissolved Redevelopment Agencies due in part to such abuses by cities. The CCC formally rejected the PBVVP in 2010, citing the City's failure to follow the LCP requirements for Planning Area F.

- Five years later in 2015 the City again adopted a proposed General Plan Update to again change Planning Area F to low-priority residential and general commercial land use. The General Plan Update cited the City's PBVVP that was in fact rejected by the CCC only a few years before. The City again repeated their PBVVP's Coastal land use 'planning mistake' by again not disclosing to the public the existence of Planning Area F's LCP requirements and then not following those LCP requirements. It is unclear why the City did this only 5-years after the CCC specifically rejected the Ponto Beachfront Village Vision Plan for those same reasons.
- In 2017 citizens found and then confirmed these Ponto Coastal 'planning mistakes' by the City through multiple official Carlsbad Public Records Requests and CCC Staff confirmation. The CCC readily identified the mistakes, but the City's 2019 proposed Draft LCP Land Use Plan and planning process still has yet fully disclose these prior Coastal 'planning mistakes' to ALL citizens of Carlsbad - the failure to disclose and follow the Planning Area F LCP LUP and City Zoning requirements. Full City disclosure is needed now to try to correct many years of City misrepresentation to citizens on LCP required Coastal land Use planning at Ponto. It is needed now so the public is aware at the start of the Public Comment Period. In 2017 citizens began asking the City fix the City's over 12-years of misinformation and planning mistakes by 'restarting' Coastal land use planning at Ponto with an open and honest community-based Coastal planning process. These citizens' requests have been rejected.
- In 2019 the City Staff proposed citywide Draft LCP land Use Plan Amendment that again proposed to change Planning Area F to "low-priority" residential and general commercial land use, without First disclosing the Planning Area F LCP requirements with corresponding analysis of the Need for Coastal Recreation (i.e. Public Park) and/or low-cost visitor accommodations at Planning Area F and providing that Documented analysis for public review/Consideration/comment. This seems like another 3<sup>rd</sup> repeat of the prior two Coastal planning mistakes by the City. In 2019, again citizens asked for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again the City rejected citizens' requests.
- In 2020 thousands of public requests again asked, and are currently asking, for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again these requests are being rejected. Based on the significant citizen concern and the documented prior 'planning mistakes' at Ponto it appears reasonable and responsible for Ponto's Planning Area F to either:
  - i. Retain its current Existing LCP LUP land Use of "Non-Residential Reserve" until such time as the City's past Ponto Beachfront Village Vision Plan and General Plan Update planning mistakes and other issues subject to current planning lawsuits against the City are resolved with a true, honest and open community-based Coastal planning process asked for by citizens since 2017. Or
  - ii. Propose in the Draft LCP Land Use Plan Amendment to re-designated Planning Area F back to a Visitor Serving Commercial and Open Space ("i.e. Public Park") to provide both "High-Priority" coastal uses v. low-priority residential/general commercial uses due to the documented Coastal Recreation and Low-cost visitor accommodation needs for both citizens and visitors at Ponto and South Carlsbad.

13. Questionable logic and inconsistency in proposed Draft land use map and policies: Chapter 2 Figure 2-2B & C on pages 2-19 & 20 proposes to Amend the existing LCP Land Use Plan Map, and policies LCP-2-P.19 and 20 on pages 2-27 to 2-29 propose Amendments to existing LCP policy and create a new added layer of policy referencing a Ponto/Southern Waterfront. The proposed Land Use Map and Policies serve to firmly plan for "low-priority" residential and general commercial land uses at Ponto with a clear regulatory Land Use Plan Map showing these land uses and by specific regulatory policy (LCP-2-20) that clearly requires (by using the words "shall") these "low

priority” uses. In contrast the “High-Priority” Coastal Recreation and Coastal Park land uses that would be designated as Open Space are not mapped at all in Figure 2-2B & C; and the proposed policy LCP-2-P.19 is both misleading and specifically does Not Require any “High-Priority” Coastal Recreation and Coastal Park land Use at Ponto and South Carlsbad. In fact page 2-22 specifically indicates two “may” criteria that would first need to occur in the positive before any potential Coastal Recreation and Coastal Park Land could then theoretically even be possible. It is highly probable that it is already known by the City that the proposed relocation of Carlsbad Boulevard (Coast Highway) is not very feasible and not cost effective, and will not yield (due to environmental habitat constraints, narrowness of the roadway median, and other design constraints) any significant dimensions of land that could potentially be designated Open Space and realistically be used as a Park.

The blank outline map (Figure 2-2B & C) provides no mapped Open Space Land Use designation, other than for the currently existing State Campgrounds’ low-cost visitor accommodations, so the proposed Land Use Plan Map is Not providing/mapping any new Open Space land use to address Coastal Recreation and Coastal Park needs. The Draft LCP Land Use Plan Amendment’s proposed/projected/planned Sea Level Rise and associated coastal erosion appears to indicate that this “High-Priority” low-cost visitor accommodation (Campground) land use designated as Open Space will be reduced in the ‘Buildout’ condition due to coastal erosion. So **the Draft LCP Land Use Plan is actually planning for a Reduction in Open Space Land Use in South Carlsbad and Ponto.** Both the blank outline map and the proposed Land Use Map Figure 2-1 DO NOT clearly map and designate both South Carlsbad’s Draft LCP Planned Loss of the Open Space Land Use and also any New or replacement unconstrained land as Open Space land use for Coastal Recreation and Coastal Park. This is an internal inconsistency in Land Use Mapping that should be corrected in two ways:

- 1) Showing on all the Land Use (Figure 2-1), Special Planning Area (Figure 2-2B & C), and other Draft LCP Maps the Draft LCP’s planned loss of land area in those maps due to the Draft LCP’s planned loss of land due to Sea Level Rise and Coastal Land Erosion. This is required to show how land use boundaries and Coastal Recourses are planned to change over time. or
- 2) Provide detailed Land Use Constraint Maps for the current Carlsbad Boulevard right-of-way that the City “may” or ‘may not’ choose (per the proposed “may” LCP-2-P.19 policy) use to explore to address the City’s (Park Master Plan) documented Coastal Recreation and Coastal Park land use shortages in Coastal South Carlsbad and Ponto. Clearly showing the potential residual Unconstrained Land within a Carlsbad Boulevard relocation that have any potential possibility to add new Open Space Land Use Designations (for Coastal Recreation) is needed now to judge if the policy is even rational, or is it just a Trojan horse.

The proposed internal inconsistency in mapping and policy appears like a plan/policy ‘shell game’. The proposed Land Use Plan Maps and Policies should be consistent and equality committed (mapped-shall v. unmapped-may) to a feasible and actual Plan. If not then there is No real Plan.

There is no Regulatory Policy requirement in LCP-2-P.19 to even require the City to work on the two “may” criteria. The City could choose to bury the entire Carlsbad Boulevard relocation concept and be totally consistent with Policy LCP-2-P.19 and the LCP. As such the language on 2-22, Figure 2-2C (and the proposed Land Use Map), and policy LCP-2-P.19 and 20 appear conspire to create a shell game or bait-and-switch game in that only “low-priority” residential and general commercial uses are guaranteed (by “shall” policy) winners, and “high-priority” Coastal Recreation and Coastal Park Land Uses are at best a non-committal ‘long-shot’ (“may” policy) that the city is specifically not providing a way to ever define, or commit to implement. The proposed Draft LCP Land Use Plan Coastal Recreation and Coastal Park statements for Ponto are just words on paper that are designed to have no force, no commitment, no defined outcome, and no defined requirement to even have an outcome regarding the

documented “High-Priority” Coastal Recreation and Coastal Park needs at Ponto, Coastal South Carlsbad and the regional 6-mile Coastal Park gap centered around Ponto.

Policy LCP-2-P.19 falsely says it “promotes development of recreational use” but does not in fact do that. How is development of ‘recreational use promoted’ when the Use is both unmapped and no regulatory policy requirement and commitment (no “shall” statement) to ‘promote’ that Use is provided? Policy LCP-2-19.19 appears a misleading sham that does not ‘promote’ or require in any way “High-Priority” Coastal Recreation and Park Land Use at Ponto. There should be open and honest public workshops before the Draft LCP Amendment goes to its first public hearing to clearly define the major environmental constraints and cost estimates involving possible relocation of Carlsbad Boulevard and constructing needed beach access parking, and sufficient and safe sidewalks and bike paths along Carlsbad Boulevard; and then map the amount and dimensions of potential ‘excess land’ that maybe available for possible designation as Open Space in the City General Plan and Local Coastal Program. The City should not repeat the mistakes at the Carlsbad Municipal Golf Course (resulting in the most expensive to construct maniple course in the USA) by not defining and vetting the concept first. A preliminary review of City GIS data appears the amount, dimensions and locations of any potential ‘excess’ land maybe modest at best. However before the City proposes a ‘Buildout’ Coastal Land Use Plan this critical information should be clearly provided and considered. It is likely the City’s Carlsbad Boulevard relocation concept is unfeasible, inefficient, too costly, and yields too little actual useable ‘excess land’ to ever approach the Coastal Recreation and Coastal Park needs for South Carlsbad. This may already be known by the City, but it surely should be publicly disclosed and discussed in the DLPCA.

The proposed Coastal Land Use Plan to address Carlsbad’s, San Diego County’s and California’s High-Priority Coastal Recreation Land Use and Coastal Park needs should NOT be vague “may” policy that appears to be purposely designed/worded to not commit to actually providing any “High-Priority” Coastal Recreation and Coastal Park land uses on the map or in policy commitments. The Land Use Plan and Policy for High-Priority Coastal Recreation and Coastal Park Land Use should be definitive with triggered “shall” policy statements requiring and assuring that the ‘Forever’ “High-Priority” Coastal Recreation and Coastal Park needs are properly and timely addressed in the City’s proposed ‘Buildout’ Coastal Land Use Plan. This “shall” policy commitment should be clearly and consistently mapped to show the basic feasibility of the planned outcomes and the resulting actual Land that could feasibly implement the planned outcome.

Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard: Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard are Coastal Access and Completes Streets issues. South Carlsbad Boulevard now and has for decades been a highly used Incomplete Street that is out of compliance with the City’s minimum Street Standards for pedestrian and bike access and safety. The Coastal Access portion of the Draft Land Use Plan should strongly address the Complete Street requirements for South Carlsbad Boulevard. Those policy commitments should be reference in Policy LCP-2-P.19 and 20 as Carlsbad Boulevard in **South Carlsbad is the most Complete Street deficient portion of Carlsbad Boulevard**. Forever Coastal Access parking demand and the proposed LCP Amendment’s Land Use Plan to supply parking for those demands should also be addressed as part of the Coastal Access and Complete Streets issues for South Carlsbad Boulevard. If much needed Coastal Access Parking is provided on South Carlsbad Boulevard as part of a “maybe” implemented realignment, most of the “maybe” realignment land left after constraints are accommodated for and buffered will likely be consumed with these parking spaces and parking drive aisles/buffer area needed to separate high-speed vehicular traffic from parking, a buffered bike path, and a sufficiently wide pedestrian sidewalk or Coastal Path. After accommodating these much needed Complete Street facilitates there will likely be little if any sufficiently

dimensioned land available for a Coastal Recreation and a Coastal Park. The needed Coastal Access and Complete Street facilities on South Carlsbad Boulevard are very much needed, but they are NOT a Coastal Park.

As mentioned the proposed Draft Coastal Land Use Plan's Maps and Policies are very specific in providing for the City's proposed LCP Land Use changes to 'low-priority' Residential and General Commercial' on Planning Area F (proposed to be renamed to Area 1 and 2). It is curious as to why the proposed Draft LCP Land Use Plan Amendment has no Land Use Map and minor vague unaccountable Land Use Policy concerning 'High-priority Coastal Recreation Land Use' at Ponto, while the very same time proposing very clear Land Use Mapping and detailed unambiguous "shall" land use policy requirements for 'low-priority' Residential and General Commercial land use at Ponto. Why is the City Not committing and requiring (in a Land Use Map and Land Use Policy) to much needed 'High-priority' Coastal Recreation and Coastal Park Land Use' needs at Ponto the same detail and commitment as the City is providing for "low-priority" uses? This is backwards and inappropriate. It is all the more inappropriate given the 'Buildout' Coastal Land Use Plan the City is proposing at Ponto. These issues and plan/policy commitments and non-commitments will be 'forever' and should be fully and publicly evaluated as previously requested, or the Existing LCP Land Use Plan of "Non-residential Reserve" for Planning Area F should remain unchanged and until the forever-buildout Coastal Recreation and Coastal Park issues can be clearly, honestly and properly considered and accountably planned for. This is vitally important and seems to speak to the very heart of the CA Coastal Act, its founding and enduring principles, and its policies to maximize Coastal Recreation. People for Ponto and we believe many others, when they are aware of the issues, think the City and CA Coastal Commission should be taking a long-term perspective and be more careful, thorough, thoughtful, inclusive, and in the considerations of the City's proposal/request to permanently convert the last vacant unplanned (Non-residential Reserve) Coastal land at Ponto to "low-priority" land uses and forever eliminate any Coastal Recreation and Coastal Park opportunities.

14. Public Coastal View protection: Avenida Encinas is the only inland public access road and pedestrian sidewalk to access the Coast at Ponto for one mile in each direction north and south. It is also hosts the regional Coastal Rail Trail in 3' wide bike lanes. There exist now phenomenal coastal ocean views for the public along Avenida Encinas from the rail corridor bridge to Carlsbad Boulevard. It is assumed these existing expansive public views to the ocean will be mostly eliminated with any building development seaward or the Rail corridor. This is understandable, but an accountable ('shall') Land Use Plan/Policy addition to proposed Policy LCP-2-P.20 should be provided for a reasonable Public Coastal View corridor along both sides of Avenida Encinas and at the intersection with Carlsbad Boulevard. Public Coastal view analysis, building height-setback standards along Avenida Encinas, and building placement and site design and landscaping criteria in policy LCP-2-P.20 could also considered to reasonably provide for some residual public coastal view preservation.
  
15. Illogical landscape setback reductions proposed along Carlsbad Boulevard, and Undefined landscape setback along the Lagoon Bluff Top and rail corridor in Policy LCP-2-P.20: Logically setbacks are used in planning to provide a buffering separation of incompatible land uses/activities/habitats. The intent of the setback separation being to protect adjacent uses/activities/habitats from incompatibility, nuisance or harassment by providing a sufficient distance/area (i.e. setback) between uses/activities/habitats and for required urban design aesthetics – almost always a buffering landscaping. Policy LCP-2-P.20. A.4 and C.3 says the required 40' landscape setback along Carlsbad Boulevard "maybe reduced due to site constraints or protection of environmental resources." The ability to reduce the setback is illogical in that setbacks are intended to protect environmental resources and provide a buffer for constraints. In the Carlsbad Boulevard right-of-way there is documented sensitive environmental habitat, along with being a busy roadway. How could reducing the protective 40' setback in anyway better protect that habitat or provide a better landscaped compatibility or visual aesthesis buffer along Carlsbad Boulevard? It is

illogical. If anything the minimum 40' landscaped setback should likely be expanded near "environmental resources". Regarding reducing the minimum 40' landscape setback for "site constraints" there is no definition of what a "site constraint" is or why it (whatever it may be) justifies a reduction of the minimum landscaped setback. Is endangered species habitat, or a hazardous geologic feature, or a slope, or on-site infrastructure considered a "site constraint"? There should be some explanation of what a "site constraint" is and is not, and once defined if it warrants a landscape setback reduction to enhance the buffering purpose of a landscape setback. Or will a reduction only allow bringing the defined constraint closer to the adjacent uses/activities/habitats that the landscape setback is designed to buffer. It is good planning practice to not only be clear in the use of terms; but also, if a proposed reduction in a minimum standard is allowed, to define reasonably clear criteria for that reduction/modification and provide appropriate defined mitigation to assume the intended performance objectives of the minimum landscape setback are achieved.

Policy LCP-2-P.20.C.4 is missing a critical Bluff-Top landscape setback. It seems impossible that the DLCPA is proposing no Bluff-Top setback from the lagoon bluffs and sensitive habitat. The Batiqitos Lagoon's adjoining steep sensitive habitat slopes directly connect along the Bluff-top. Batiqitos Lagoon's and adjoining steep sensitive habitat is a sensitive habitat that requires significant setbacks as a buffer from development impacts. Setbacks similar to those required for the San Pacifico area inland of the rail corridor, should be provided unless updated information about habitat sensitivity or community aesthetics requires different setback requirements.

Policy LCP-2-P.20 does not include a landscape setback standard adjacent to the rail corridor. This is a significant national transportation corridor, part of the 2<sup>nd</sup> busiest rail corridor in the USA. Train travel along this corridor is planned to increase greatly in the years to come. Now there is significant noise, Diesel engine pollution, and extensive ground vibration due to train travel along the rail corridor. Long freight trains which currently run mostly at night and weekends are particularly noisy and heavy, and create significant ground vibration (underground noise). These issues are best mitigated by landscape setbacks and other buffers/barriers. A minimum setback standard for sufficient landscaping for a visual buffer and also factoring appropriate noise and ground vibration standards for a buildout situation should be used to establish an appropriate landscape setback that should be provided along the rail corridor. Carlsbad's landscape aesthetics along the rail corridor should be factored into how wide the setback should be and how landscaping should be provided. An example for the landscape aesthetic portion of the setback standard could be landscape design dimensions of the San Pacifico community on the inland side of the rail corridor. However, noise and vibrational impacts at San Pacifico are felt much further inland and appear to justify increased setbacks for those impacts.

Following are 6 key major Growth Management Standards issues of citywide relevance that the Carlsbad Tomorrow Growth Management Committee (CTGMC) needs to act on, and citizen “Suggestions to CTGMC” on how to honestly and responsibly act on these 6 key issues in the CTGMC’s recommendations to the New City Council. This Update includes new information (pp 5-6) on the improved affordability of Ponto Park, and on how GM Open Space shortfall can be repaired. We hope the CTGMC will act honestly to make recommendations that truly and responsibly address known documented shortfalls in both Parks and GM Open Space. Responsible recommendations by the CTGMC can provide a sustainable Quality of Life to future Carlsbad generations and visitors. Only you own your recommendations.

1. The State of CA is forcing Carlsbad and all cities/counties in CA to provide for unlimited or Infinite Population and Visitor growth. So there will be an Infinite population & visitor demands for Parks, Open Space, water, and demands on our roads/transportation systems, and other Growth Management (GM) Quality of Life facilities. These infinite increases in population and visitor demand will come from high density development that requires more public Parks and Open Space to balance the high-densities. **Carlsbad’s new GM Standards will have to provide for a system of Infinite proportional increases in the supply of Parklands, Open Spaces, water, transportation facility capacity, etc. or our Quality of Life will diminish.**
  - a. Suggestions to CTGMC:
    - i. Completely restructure the General Plan, Local Coastal Program and GM Program to clearly recognize these facts and State requirements to proportionately provide public facilities to maintain/improve Carlsbad GM Quality of Life Standards for this Infinite growth of Population and Visitor demands.
    - ii. **Being a Coastal city Carlsbad has an added responsibility to proportionately maintain/improve providing High-Priority Coastal land uses (Coastal Recreation {i.e. Public Parks} and Low-cost Visitor Accommodations) needed at a regional and statewide level to address visitor needs for Coastal Recreation, access, and affordable accommodations.** Carlsbad needs to work with the State of CA Coastal Commission to completely restructure Carlsbad’s Coastal Land Use Plan to addresses the State’s requirement to provide an Infinite amount high-priority Coastal land uses for those Infinite Population and Visitor demands.
    - iii. **Trying to ignore these Infinite demands for Carlsbad’s Quality of Life facilities – like Parks and Open Spaces is a path to disaster and the ultimate degradation of Carlsbad’s Quality of Life.**
2. **Carlsbad has a huge Jobs v. Housing supply imbalance – far too many jobs around the airport for our amount of housing. This creates negative and costly land use and transportation planning distortions that radiate from the Airport Central Jobs through Carlsbad in all directions.** CA Housing law penalizes unbalanced cities like Carlsbad by requiring more housing in Carlsbad to bring jobs/housing ratio into balance. Carlsbad can correct this imbalance by 1 of 2 ways: 1) greatly increase housing supply (and thus increase the need and City expense for more GM Quality of Life facilities), or 2) more logically and cost effectively greatly decrease the amount of Jobs land use, so Carlsbad’s housing supply is in balance with jobs. These jobs will move to surrounding Cities that have more housing than jobs. **Rebalancing by reducing jobs land use creates added benefits for Carlsbad and our region by reducing Carlsbad’s peak-hour job commute traffic volumes and**

vehicle miles traveled (VMT), and by reducing the costs Carlsbad (and other cities and the region) have to pay to accommodate inter-city commute traffic. If Carlsbad reduces jobs land use will also reduce the amount of housing the State of California and SANDAG requires Carlsbad provide in its Housing Element thus reducing forcing incompatible high-density development into established neighborhoods and pressure to convert useable GM Open Space lands to housing land use.

a. Suggestions to CTGMC:

- i. **Carlsbad can logically and cost effectively balance Jobs/housing supply by updating Growth Management Policy to reduce jobs to be in balance with housing by changing some of Carlsbad's General Plan land use around the airport into several high-density residential mixed-use Villages.** The City has started some of this, but can expand this effort but has not planned creating mixed-use village environments. These high-density villages will reduce jobs and provide both high-quality and high-density (affordable) housing within walking/biking distance to the major job center and new neighborhood commercial and Park uses in the Villages.
- ii. Prioritize transportation investments in safe bike paths, walking paths between Carlsbad's Central Jobs Core around the airport and Carlsbad's housing, particularly strongly connecting these new high-density mixed-use villages with the Central Jobs Core.
- iii. Update General Plan land use and housing policy to reduce concentrations of higher-density housing except around the airport jobs core.
- iv. Recognize the central Airport jobs core is 'Carlsbad's New Urban Downtown and "Transect Plan" accordingly toward lower densities on the City periphery.

3. Although some very critical areas (such as the Coastal lands at Ponto) are still vacant and can be wisely used for critical GM Quality of Life needs, much of Carlsbad is largely developed.

**Redevelopment of developed land will require creating increased supplies of Parkland, Open Spaces, transportation capacity, and other Quality of Life facilities.**

a. Suggestions to CTGMC:

- i. **Completely rethink all City planning on existing vacant lands to assure that remaining vacant land is planned and being used wisely and fairly distributed to address critical Quality of Life needs in those areas, and not squandered on redundant land use.** The location of vacant land to address critical Park & Open Space needs should be preserved with land use planning.
- ii. Work with the State and CA Coastal Commission to preserve our Finite vacant Coastal lands for High-Priority Coastal Land Uses (Coastal Recreation {i.e. Public Parks} and Low-cost Visitor Accommodations and services) for the Infinite population and visitor demands both internal and external to Carlsbad that are/will be placed on them.
- iii. Fully and at the very beginning of any Carlsbad General Plan, Local Coastal Program and Growth Management Program actions going forward fully disclose, map and require consideration of the impact of future sea level rise and coastal erosion on Coastal land acres and land uses. Carlsbad has lost and will accelerate losing acres of Coastal land and High-priority Coastal Land Uses. Carlsbad must know, see, and discuss these losses BEFORE making any land use decisions in Carlsbad's Coastal Zone and any vacant Coastal Land.

4. **Carlsbad General Plan & Growth Management Plan do not provide a fair distribution of adequately sized City Parks for all Carlsbad families.** Veterans Park is a classic example. What will

be the City's largest park is only about 1-mile away from three other major City Parks (Zone 5, and the future Robinson Ranch and Hub Parks). This is a poor and unfair distribution and a misallocation City Park land resources. Saying Veterans Park is 'the park to serve SW, SE, and NE Carlsbad families' (the overwhelming major/majority funders of veterans Park) when those families are upwards of 6-miles away on major commercial arterials that kids can't logically/safely use is false and unfair. Most all the funding (developer fees) to build Veterans Park come from the SW, SE and NW Carlsbad but those areas are denied the Park the paid for. Veterans Park is inaccessible by almost all its intended users except by driving their cars and then storing their cars in parking lots on Parkland thus making less park land available for actual park use – this makes little common sense and is a great waste of tax-payer funds. This is dysfunctional along with being very unfair to families in SW, SE and NE Quadrats that are denied park acres near their homes which they funded. **Carlsbad's Park Master Plan maps 'Park Service' areas of existing known Park Inequity or Unfairness (dysfunction), to show where new City Park investments should be made (See City map image with notes below).**

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

The Trust for Public Land provides a Park-Score to compare both a City's amount of park acres and the 'fairness' of access (within a 10-minute walk) to parks. **Carlsbad is below national averages in both park acres and fair access to parks. Carlsbad is also well below what our adjacent Coastal cities of Encinitas and Oceanside provide. Carlsbad only requires 3 acres of Park land per 1,000 population, while Encinitas and Oceans require 5 acres - 67% more than Carlsbad – of parkland. Also, Encinitas and Oceanside require parks to be within a 10-minute walk to their citizens and families. Carlsbad has no such requirement.**

a. Suggestions to CTGMC:

**Carlsbad should change its General Plan, Parks and Growth Management Standards and CMC 20.44 to:**

- i. **Be Above Average Nationally in both providing park acreage and in locating adequate park acreage to be within a 10-minute walk to all neighborhoods.**
  - ii. **Raise its minimum park acreage standard to 5 acres per 1,000 population, versus the current low 3 acres per 1,000. Carlsbad should be at least as good as Encinitas and Oceanside in requiring 5 acres, not 40% below what our adjacent Cities require/provide.**
  - iii. **Raise its park location standard to require an adequately sized park be provided to serve the neighborhood population within a 10-minute walk for all neighborhoods.**
  - iv. **Prioritize City Policy and Park Budgets and investments to achieve park fairness in 'Park Unserved areas' identified by Carlsbad's Park Master Plan.**
  - v. **Per Carlsbad's Municipal Code Chapter 20.44- DEDICATION OF LAND FOR RECREATIONAL FACILITIES to require developers in 'Park Unserved areas' and in areas that do not have an adequately sized (5 acres per 1,000 population) park within a 10-minute walk to provide their developments required Park land acre dedication in actual Park land within a 10-minute walk to their development.**
  - vi. **Update the City's Park-in-lieu fee to assure the fee is adequate to actually buy the amount of park land a developer is to provide within a 10-minute walk of their development. The City's current 'Park-in-lieu-fee' is far too low and inadequate to actually buy land in area surrounding the proposed development.**
  - vii. **Only allow developers to pay a Park-in-lieu-fee where there is an adequately sized park (provide 5 acres per 1,000 population) within a 10-minute walk of their development, and growth management planned future development in that area will not require more park land to provide 5 acres per 1,000 population) within a 10-minute walk.**
  - viii. Consider updating Park policy to provide more multi-use flexibility in park land acres and development on Parks. Many Carlsbad Park acres are developed/dedicated to a single-purpose use, and unavailable for other park uses.
  - ix. Consider eliminating car parking lots from land that can be counted as parkland; or by significantly limiting park land used for parking to around 5%.
  - x. **Eliminate the counting of 'GM Constrained and Unusable land' and Protected Endangered Species Habitat land as Park land. GM Constrained/Unusable lands are undevelopable. Protected Habitat lands are by definition not useable for development by people. Habitat is dedicated for plants and animals. Parks are open spaces dedicated intended for people. Parkland calculations should exclude Unusable lands and Protected Habitat lands and only count 100% people Useable land as Park land. Where Park land abuts Habitat land a sufficient buffer space shall be provided to prevent people mixing with animals (ex. Rattlesnakes, etc.) and animals from people (habitat disturbance or destruction). This buffer area should not be counted as Park or Habitat acres, but as natural/developed buffer open space acres, and can be counted as part of the City's 15% Growth Management 'Aesthetic open Space'.**
5. Carlsbad's Coast is the most, if not the most, important feature of Carlsbad; and is consistently identified by citizens and businesses and our Community Vision. **Carlsbad's Coastal Parks (west of the I-5 corridor) are grossly unfairly distributed. Carlsbad's Coastal Parks do not fairly match the**

**locational needs of the population. North Carlsbad that is 38% of Carlsbad's population and has 10 Coastal Parks totaling 37+ acres in size. South Carlsbad that is 62% of Carlsbad's population has 0 [ZERO] Coastal Parks totaling 0 [ZERO] acres.** Again, Carlsbad's Park Master Plan maps this citywide unfairness (dots show park locations and circles show the area served by each park) and says that the City should look at buying and building New Parks in these areas that are unserved by City Parks (are not covered by a circle). The GM Update should correct this citywide unfair distribution of City Parks by making plans for new Park purchases to create City Parks in these unserved areas of Park Inequity.

To address citywide Coastal Park unfairness the current City Council wants to spend \$60-85 million in Carlsbad tax-payer funds to Relocate 2.3 miles of constrained Pacific Coast Highway median to try to make some of the narrow PCH median 'useable' by people. 2001 and 2013 City PCH Relocation studies identified only a small amount of 'people-useable acres' would be created next to PCH. The \$60-85 million tax-payer cost (\$26-37 million per mile) does NOT add one single square foot of new City land, it only inefficiently rearranges a small amount PCH median. The City can most tax-payer cost effectively provide needed sidewalks and bike improvements along the outside edges of PCH without PCH Relocation. The City's 2001 PCH Relocation Financial Study and 2013 PCH Relocation Design both indicated minimal useable land could be achieved by Relocation, and that the very high tax-payer cost to do so would be very difficult to fund. The City has known for well over 20-years that PCH Relocation is a high-cost and a poor solution to address the Citywide Coastal Park unfairness in South Carlsbad.

However, a **better and far less costly solution to correct Citywide Coastal Park unfairness and provide a much needed South Carlsbad Coastal Park is to simply buy currently vacant land that is for sale.** The City did this (although the City actually bought existing homes) when it expanded Pine Park. **Carlsbad tax-payers have used the City's own data to compare the tax-payer Cost/Benefits of simply purchasing vacant land v. trying to rearrange existing City owned land at PCH. Simply buying vacant land saves tax-payers saves tax-payers over \$32.7 to \$7.7 million.** Please read the following data files:

- 2022-June General Comparative tax-payer Costs/Benefits of Completing PCH, 2.3 miles of PCH Modification (Island Way to La Costa Ave.), and 14.3 acre Ponto Park (Kam Sang) to address planned loss of 30+ acres of Coastal Open Space Land Use at Ponto in South Carlsbad: Part 1 of 2.
- City's PCH Modification Proposal Area Map with notes on usability Constraints and Issues: P4P Input: Part 2 of 2
- The most recent (9/19/22) land sale of 11.1 acre Ponto Planning Area F was less than \$8 million (less than \$706,000 per acre).
- **Buying and developing this 11.1 acre Ponto Park would cost less than \$20 million assuming a 10% profit to the new land-owner, and \$1 million per acre park construction cost like our newest Buena Vista Reservoir Park.** The cost to help correct a Citywide Coastal Park unfairness by simply buying & building a much needed **11.1 acre Ponto Coastal Park would cost tax-payers less than the recently approved Measure J City Monroe Street Pool Renovation.** Investing less than \$20 million (\$1.8 million per acre) to buy and build an 11.1 acre Ponto Coastal Park is a great tax-payer value v. \$65-80 million in tax-payer funds to rearrange 15.8 acres of narrow strips of constrained PCH median (City documented "Surplus Land Area #4 &5") for some minimal people use at a tax-payer cost of \$4-5 million per acre. **The overall and per acre costs of buying/building Ponto Park are over 2 to 3 times better value for tax-payers than PCH Relocation/rearrangement.**

- The City Council could/can buy land for Open Space (Parks are the most useable of the City's 4 Open Space categories) under voter approved Prop C Open Space land acquisition authority. **The City has been advised to buy Ponto Park under Prop C per the City's settlement of a Growth Management law suit.**

**The Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad is clearly a citywide issue. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad as it is unfair to the vast majority of Carlsbad citizens and their families as 62% of Carlsbad is in South Carlsbad. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad is unfair to our major Visitor serving industries (and tax generators) in South Carlsbad. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad are clearly inconsistent with the CA Coastal Act, Carlsbad's Community Vision, and common sense.** The Coastal South Carlsbad Park Inequity is also unfair to North Carlsbad because South Carlsbad's Coastal Park demand is being forced into Coastal North Carlsbad and congesting those parks, and adding to Coastal North Carlsbad traffic and parking impacts. It also increases greenhouse gases and VMT as it forces longer vehicle trips.

a. Suggestions to CTGMC:

- i. 11.1 acre Ponto Planning Area F has a specific Local Coastal Program Land Use Policy that says The City of Carlsbad must for the Ponto Area LCP 'Consider and Document the need for Coastal Recreation (i.e. Public Park) and or Low-Cost Visitor Accommodations west of the railroad tracks (at Ponto) prior to any Land Use change. **The discussion of Parks by the CTGMC is such a situation that requires the CTGMC to consider this adopted LCP Land Use Policies. Official public records requests have shown the City never followed this LCP Land Use Policy Requirement during the 2005 Ponto Vision Plan and 2015 General Plan Update, and in 2010 the CA Coastal Commission rejected the Ponto Vision Plan and told the City in 2017 that that land uses at Ponto could change based on the need for Coastal Recreation and/or Low Cost Visitor Accommodations.** The Mello II LCP that covers most of Carlsbad's Coastal Zone also has Land Use Policy 6.2 for the City to consider a major park in the Batiquitos (Ponto/South Carlsbad) area. The City has only implemented 1/6 to 1/3 of this policy. **The CTGMC should fully evaluate the citywide/South Carlsbad and local Ponto need for Coastal Parks as required by the City's adopted LCPs and CA Coastal Act.**
- ii. Carlsbad's 2015 General Plan Update and Growth Management Plan (GMP) did not, and was not updated to, consider the 2017 Sea Level Rise (SLR) Impact report showing the loss/impact on 32+ acres of Carlsbad's Coastal Land Use acreage in South Carlsbad – primarily Open Space Land Use (beach and Campground). **Both the General Plan (and Local Coastal Program Land Use Plan) and GMP should be updated to account for the loss and replacement of these 32+ acres of high-priority Coastal Open Space Land Use due to SLR.** The updates and the CTGMC should use the newest CA Coastal Commission SLR Guidelines/science, not the old guidelines used in 2017. Carlsbad's LCP and CA Coastal Act Land Use Polies call for 'upland relocation' to replace the SLR loss of high-priority Coastal Land Uses.
- iii. **The availability over the past several years of the last two sufficiently sized vacant lands suitable for a Ponto/South Carlsbad Coastal Park is a citywide issue. If these last two vacant lands are lost to development forever future generations will have lost the last opportunity for the needed South Carlsbad Coastal Park.** The 5/3/22 Citizen requests for the City to jointly study acquisition of one or both these last vacant lands for a needed (and only possible) true and meaningful Coastal Park for

South Carlsbad should be recommended by the CTGMC. **The CTGMC should recommend Carlsbad’s GMP be updated to incorporate Parkland acquisition of these last opportunities to provide the needed Coastal Park for South Carlsbad.**

6. Carlsbad Growth Management Open Space Standard is that 15% of all the Useable (unconstrained and fully buildable) areas is to be preserved as Useable Open Space, and that all the 25 Local Facility Management Plans (LFMP) show how that 15% is provided. The City says:

---

---

**OPEN SPACE**

---

---

**A. Performance Standard**

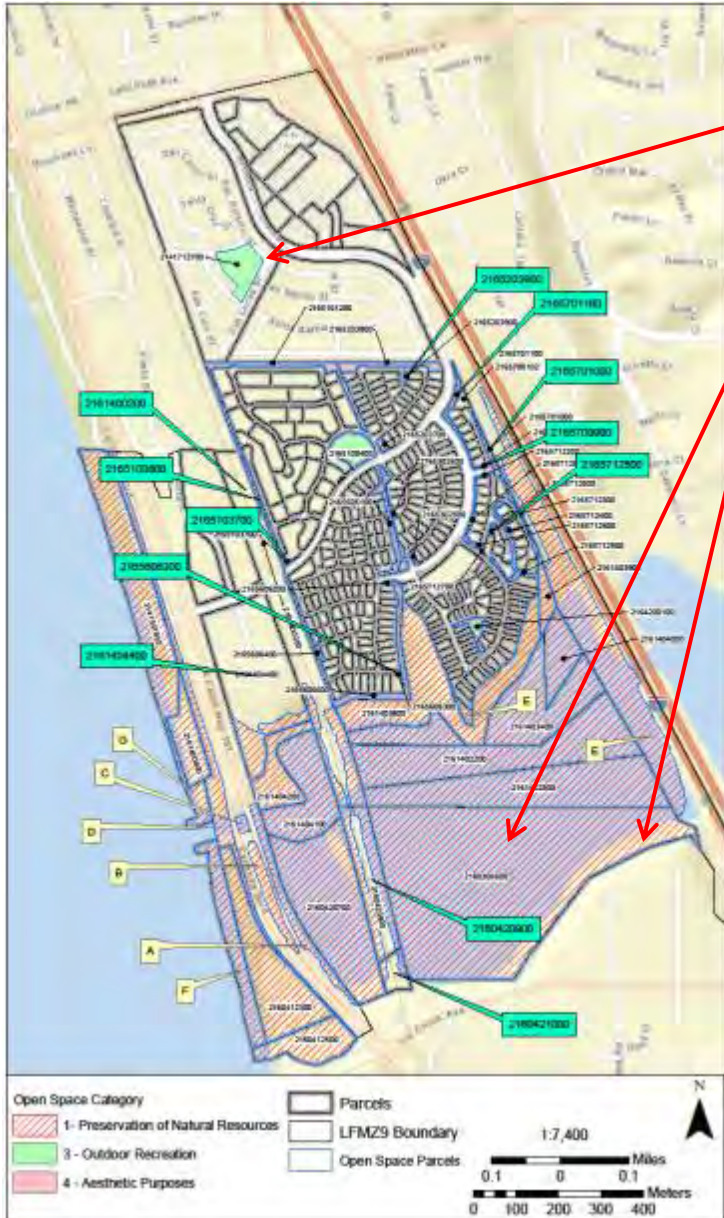

Fifteen percent of the total land area in the Local Facility Management Zone (LFMZ) exclusive of environmentally constrained non-developable land must be set aside for permanent open space and must be available concurrent with development.

Yet the City has mapped and documented that this 15% Useable Open Space Performance Standard was not complied with. The City also acknowledges that without changes to current City planning the 15% Useable Open Space Performance Standard will never be complied with. The City acknowledges that only 13% has/will under current plans ever be provided. This missing 2% equals 501 acers of lost GM Open Space the GMP promised citizens. **Carlsbad law the Growth Management Ordinance 21.90, and section ‘21.90.130 Implementation of facilities and improvements requirements’; provide guidance on how non-compliance with a Performance Standards is to be handled.**

a. Suggestions to CTGMC:

- i. Retain the GM Open Space Standard of 15% of all unconstrained and developable land is maintained as Open Space. If the City removes the Open Space Standard, it will allow and encourage land use changes to remove GM Open Space and replace with development.
- ii. **The CTGMC should make a recommendation that an inventory of all 25 LFMP Zones be conducted and an inventory of each LFMP Zones provision of at least 15% Useable Open Space shall be compiled. No LFMP Zone shall be allowed to be “exempt” from this inventory.** The City’s computerized GIS mapping system makes it easy and clear as shown in the following City GIS map for LFMP Zone 9 (aka Ponto).

**City GIS map of Ponto's (LFMP Zone 9) Open Space:**

- Light green areas meet the City's 15% unconstrained Growth Management Program Open Space Standard
- Most Ponto Open Space (pink hatch & blue [water] on map) is "Constrained" and does not meet the Standard
- **Aviara - Zone 19, Ponto - Zone 9 and Hanover/Poinsettia Shores – Zone 22 all developed around the same time and had similar vacant lands.**
- **City required Aviara - Zone 19 east of Ponto to provide the 15% Standard Open Space. Why not Ponto? Aviara includes the same lagoon.**
- **City required Hanover & Poinsettia Shores area Zone 22 just north of Ponto to provide the 15% Standard Open Space. Why not Ponto?**
- Why Ponto developers were not required to comply with the 15% Useable Open Space Standard is subject to current litigation
- Below is City GIS data from this map

**City GIS map data summary of the Growth Management Standard of 15% Useable Open Space at Ponto**

472 Acres	Total land in LFMP Zone 9 [Ponto]
<u>(197 Acres)</u>	Constrained land excluded from Growth Management (GMP) Open Space
275 Acres	Unconstrained land in LFMP Zone 9 [Ponto]
<u>X 15%</u>	GMP Minimum Unconstrained Open Space requirement
41 Acres	GMP Minimum Unconstrained Open Space required
<u>(11 Acres)</u>	GMP Open Space provided & mapped per City GIS data
<b>30 Acres</b>	<b>Missing Unconstrained Open Space needed in LFMP Zone 9 [Ponto] to meet the City's minimum GMP Open Space Standard per City's GIS map &amp; data</b>

**73% of the City's minimum 15% required Open Space Standard is missing due to over development of LFMP Zone 9 [Ponto]**

- iii. In instances like LFMP Zone 9 (above image) that clearly did not provide at least 15% Useable Open Space and/or were falsely “exempted” the CTGMC should recommend that a **Local Facilities Zone Useable Open Space Correction Plan** shall be developed that explores the GM Open Space use/reuse of City land, land use planning requirements, and/or possible acquisitions of remaining vacant land acres to make up for any shortfall in meeting the 15% Useable Open Space in that a Zone. An example of this in LFMP Zone 9 is that the City’s regional Rail Trail will convert 2-lanes of almost all of Avenida Encinas to wider buffered bike lanes and an adequate portion of the converted 2 vehicle lanes can be landscaped (v. just painting strips as a buffer) to provide a safer/better bike lane buffer within a GM compliant Open Space. 2 vehicle lanes in Windrose Circle could also be similarly landscaped and converted to GM complaint Open Space. This is just one example of a cost-effective means to add GM Open Space that developers were falsely allowed to remove.
- iv. A **Local Facilities Zone Useable Open Space Correction Plan** should involve a Citizens Advisory Committee composed of citizens within the impacted Zone and appointed by the Council Members representing the Zone, and a representative of each vacant land owner over of over 1-acre in size.
- v. Consistent with the Growth Management Ordinance land use changes and development applications within a **Local Facilities Zone Useable Open Space Correction Plan** Zone shall be deferred until the applications can considered with (or after adoption of) a **Local Facilities Zone Useable Open Space Correction Plan**.

March 11<sup>th</sup>, 2022

Carlsbad City Council  
1200 Carlsbad Village Drive  
Carlsbad, CA 92008

**Re: Support creation of Ponto Park – a needed park for South Carlsbad**

Dear Mayor Hall,

The Trust for Public Land (TPL) is strongly supporting the efforts of 'People for Ponto' and thousands of Carlsbad residents to build Ponto Park in the 11-acre coastal parcel known as 'Planning Area F' in South Carlsbad. For over 40-years TPL has been designing and building parks in California and although we have world-class parks and beaches, the fact remains 3.2 million Californians don't have access to a park, and some of those Californians are residents of South Carlsbad. While the National Recreation and Park Association calls for 10-acres of park lands per 1000 residents as standard metric for healthy and vibrant cities, Carlsbad has a comparatively and relatively low park standard of only 3-acres/1,000 population and no requirement to provide accessible parks within walking distance.

And according to our own Trust for Public Land 2020-21 'City Parkscore', Carlsbad is also below national averages both providing park land acreage and in providing residents a park within a 10-minute walk.

The City of Carlsbad's Park Master Plan on pages 86-89 documents park service and park equity/inequity. Carlsbad's Park Master Plan documents that Ponto area has no park and all of South Carlsbad (over 61% of the entire city population) has no Coastal Park while . Carlsbad provides 10 City Coastal Parks (totaling over 35-acres) in North Carlsbad, while South Carlsbad has no coastal parks to serve the 64,000 residents, many of which are children. Ponto Park at 11-acre Planning Area F is the last remaining reasonable bit of vacant and currently unplanned Coastal land to provide a Coastal Park for South Carlsbad. Ponto Park would also be in the middle of a 6-mile long section of North San Diego County coastline without Coastal Park, and would help address a regional need for a Coastal Park for these 6-miles of coastline.

The CA Coastal Act has numerous policies that support the creation of Ponto Park and Coastal Recreation land use. The City of Carlsbad's history of following these CA Coastal Act policies now and over the past 40-years in its Local Coastal Program should be considered now in the City's proposed Local Coastal Program Amendment. Over the past 40-years Carlsbad and California residents have forever

lost numerous opportunities to create vital Coastal Parks and Coastal Recreation for our growing population.

In addition to the clear need for coastal parks in South Carlsbad, the citizens are overwhelmingly supporting the creation of Ponto Park in Planning area F. As you know during the past 2-years during the City Budget and Local Coastal Program Amendment processes, residents strongly demonstrated their desire that the City Council purchase and build Ponto Park. In 2019, 2020 and 2021 over 90% of citizen input expressed need was for Ponto Park, along with extensive verbal and written citizen testimony.

As COVID-19 vividly pointed out, parks are not an amenity, but a key component to human physical and mental health. Parks also provide environmental benefits and contribute to cleaner air and water, climate adaptation and social cohesion. TPL think you have a great opportunity to address equity and access to park space and improving the lives of thousands of Carlsbad residents and strongly urge you to support the building of Ponto Park for families and community.

Sincerely,

Rico Mastrodonato  
Government Relations Director

**Importance:** High

Dear Carlsbad City Council and Park-Planning-Beach Preservation Commissions; and CA Coastal Commission and State Parks:

Please receive and consider this email and attached "Ponto Park City-State donor-supporter presentation" file as public input to Carlsbad's proposed Local Coastal Program Amendment, Park Master Plan and Growth Management Plan Updates.

The "Ponto Park City-State donor-supporter presentation" file summarizes/visualizes some key points and how People for Ponto Carlsbad/regional Citizens are willing to help support Carlsbad and/or State of CA to create the much needed Ponto Park. But the City Council of Carlsbad and/or State of CA must lead in advancing Ponto Park.

As has been well documented and extensively communicated by well over 5,500 citizen petitions to the City of Carlsbad and CCC about the clear/fact-based need for a significant, adequately sized and dimensioned Coastal Park in the 6-miles of coastline centered around Ponto – a Coastal Park free from SLR/Coastal Erosion loss

A significant Coastal Park is needed for all the inland population along this 6-mile stretch of coastline and also for the many (hotel) visitors to the area. The 6-mile length of Coast at Ponto is 8% of San Diego County's entire coastline and these 6-miles have no Coastal Park. Ponto is the Only area of adequate vacant useable land along this 6-mile section of coast. All other land is developed (primarily with residential land use). Ponto has over 26 vacant acres of land available for providing this much needed Coastal Park. 11.1 acres of Ponto vacant land is specifically required to address Coastal Recreation (i.e. Public Park) needs and/or Low-cost Visitor Accommodation needs.

Alone Ponto's 2020 population of a bit over 2,100 has a Local Park demand of 6.5 acres per Carlsbad's minimal 3 acre per 1,000 population Park Acreage Standard. The City is not providing for this Local Park demand at/near Ponto. Since 2012 the SW Quadrant of Carlsbad has been deficient of Park acres relative the population of SW Carlsbad. Nor is the City providing for the much larger demand for a South Carlsbad Coastal Park to address the Coastal Recreation (i.e. Public Park) needs for over 64,000 South Carlsbad citizens (and visitors) and the larger population of inland San Diego County residents.

There is a critical need to provide more than just Local Park needs, but to provide for a larger Coastal Park for the over 64,000 people in South Carlsbad that have no Coastal Park, and for the tens of thousands more in adjacent inland cities so they have a Coastal Park to go to. The vacant land at Ponto is the last chance to provide this needed Coastal Park. The 2019 and most recent 2023 July 'Coastal Recreation data files' previously sent to the City, CCC and CA State Parks documents some key Coastal Recreation(i.e. Public Park) facts.

Please read the attached "Ponto Park City-State donor-supporter presentation" file that summarizes/illustrates what people are basically asking for. It has some key implementation/cost data that you will find interesting.

Since Carlsbad citizens 1<sup>st</sup> sent a 2017 letter to the City/CCC People for Ponto Citizens have asked for an open/honest/inclusive/Citizen-based Planning Process to address the documented need for Ponto Park and are ready and able to be positive contributors to solving the Ponto Park needs as noted in the attached file.

Sadly Carlsbad's Old Mayor and City Council refused to address the 2017 citizen request/help in creating a consensus solution. Hopefully Carlsbad's New Mayor and Council will listen to the data and represent citizen desires.

Hopefully the CCC can be the entity that can provide the process for honestly and opening addressing the critical, and last opportunities, for needed Coastal Recreation (i.e. Public Park) at Ponto in South Carlsbad.

With love for our Coast and Carlsbad and future generations,  
Lance Schulte

# Ponto Park

the last and best opportunity to  
address Sea Level Rise impacts to  
Carlsbad & State Coastal Recreation  
(i.e. Public Park) per CA Coastal Act

Presented by

Ponto Beachfront Park 501c

May 2023

- \* Planning Area F (11-acres) & Planning Area G&H (14.3 –acres)
- \* Across PCH & inland from South Carlsbad State Campground
- \* Most tax-payer efficient solutions for ‘managed retreat’ from Sea Level Rise impacts to Carlsbad State Campground

# What's at stake

## Planning Area G & H

- \* Planning Area G & H (PAGH) – 14.3 acre site is for sale Now and landowner will work with City/State/citizens on selling for a Park
- \* Next to CA State owned Batiquitos Lagoon Preserve
- \* Site includes Federally protected habitat
- \* Next to CA State Campground to allow Campground's managed retreat from Sea Level Rise
- \* Limited window of opportunity for City and/or State and Federal governments to acquire site for Coastal Park and expand State Preserve and Campground

Ponto Planning Area G-H:  
A future Coastal Park?

Ponto State Park  
Connection to beach

Ponto Planning Area F:  
A future Coastal Park?

# What's at stake

## Planning Area F

- \* Planning Area F (PAF) - last vacant 'unplanned coastal property' next to CA State Campground to allow Campground's managed retreat from Sea Level Rise
- \* For Planning Area F the CA Coastal Commission (CCC) requires the City, both 1) Citywide and 2) for PAF and Ponto area, to study and document the "buildout" need for 'High-Priority' Coastal Recreation (i.e. Public Park) and Low-cost Visitor Accommodation" land uses as part of Carlsbad's proposed LCP Amendment # LCP-6-CAR-21-0087-3
- \* Site includes Federally protected habitat with a yet to be started 5-year habitat restoration requirement

# Ponto Planning Area F: from center looking north

# Ponto Planning Area F: from center looking south & beyond

# What's at stake for Ponto, Carlsbad & CA

- \* Based on City/State population 'Buildout Need', the CA Coastal Commission may require the City to provide more Coastal Recreation (i.e. Public Park) & Low-cost Visitor Accommodation land uses in the City's proposed LCP Amendment
- \* The 'Buildout Need Study' will have to factor in unlimited population growth per State Housing Law
- \* Carlsbad has historically significantly underperformed in providing both Coastal Recreation & Low-cost Visitor Accommodation land uses

# What's at Stake –Timing is critical as vacant land could be gone

- \* 14.3 acre Planning Area G&H is available Now to buy and provide needed Coastal Recreation and Low-cost Visitor Accommodation land uses and mitigate the planned loss of South Carlsbad State Campground
- \* Buying this site saves tax-payers many millions more than City's proposed realignment of narrow strips of Historic Old Coast Highway (PCH).
- \* PCH Realignment add zero (0) acres of new public land, only rearranges thin strips of existing City land.
- \* Realignment can serve as a future SLR mitigation area

Ponto Planning Area G-H:  
A future Coastal Park?

Ponto State Park  
Connection to beach

Ponto Planning Area F:  
A future Coastal Park?

# Ponto & State Park Scenarios – Sea Level Rise

- \* Carlsbad SEA LEVEL RISE VULNERABILITY ASSESSMENT, of Dec 2017 not considered by City & CCC in City's proposed 2015 General Plan
- \* 2 meter SLR will eliminate 32+ acres of Coastal Open Space:
  - \* All sandy beaches at South Carlsbad State Beach
  - \* Most all of the State Campground sites and Campground
- \* See following images of areas to be lost to SLF

# Ponto State Park Scenarios – Sea Level Rise

Figure 5: CoSMoS Bluff Erosion Projections by 2100  
(CoSMoS-COAST 2015)

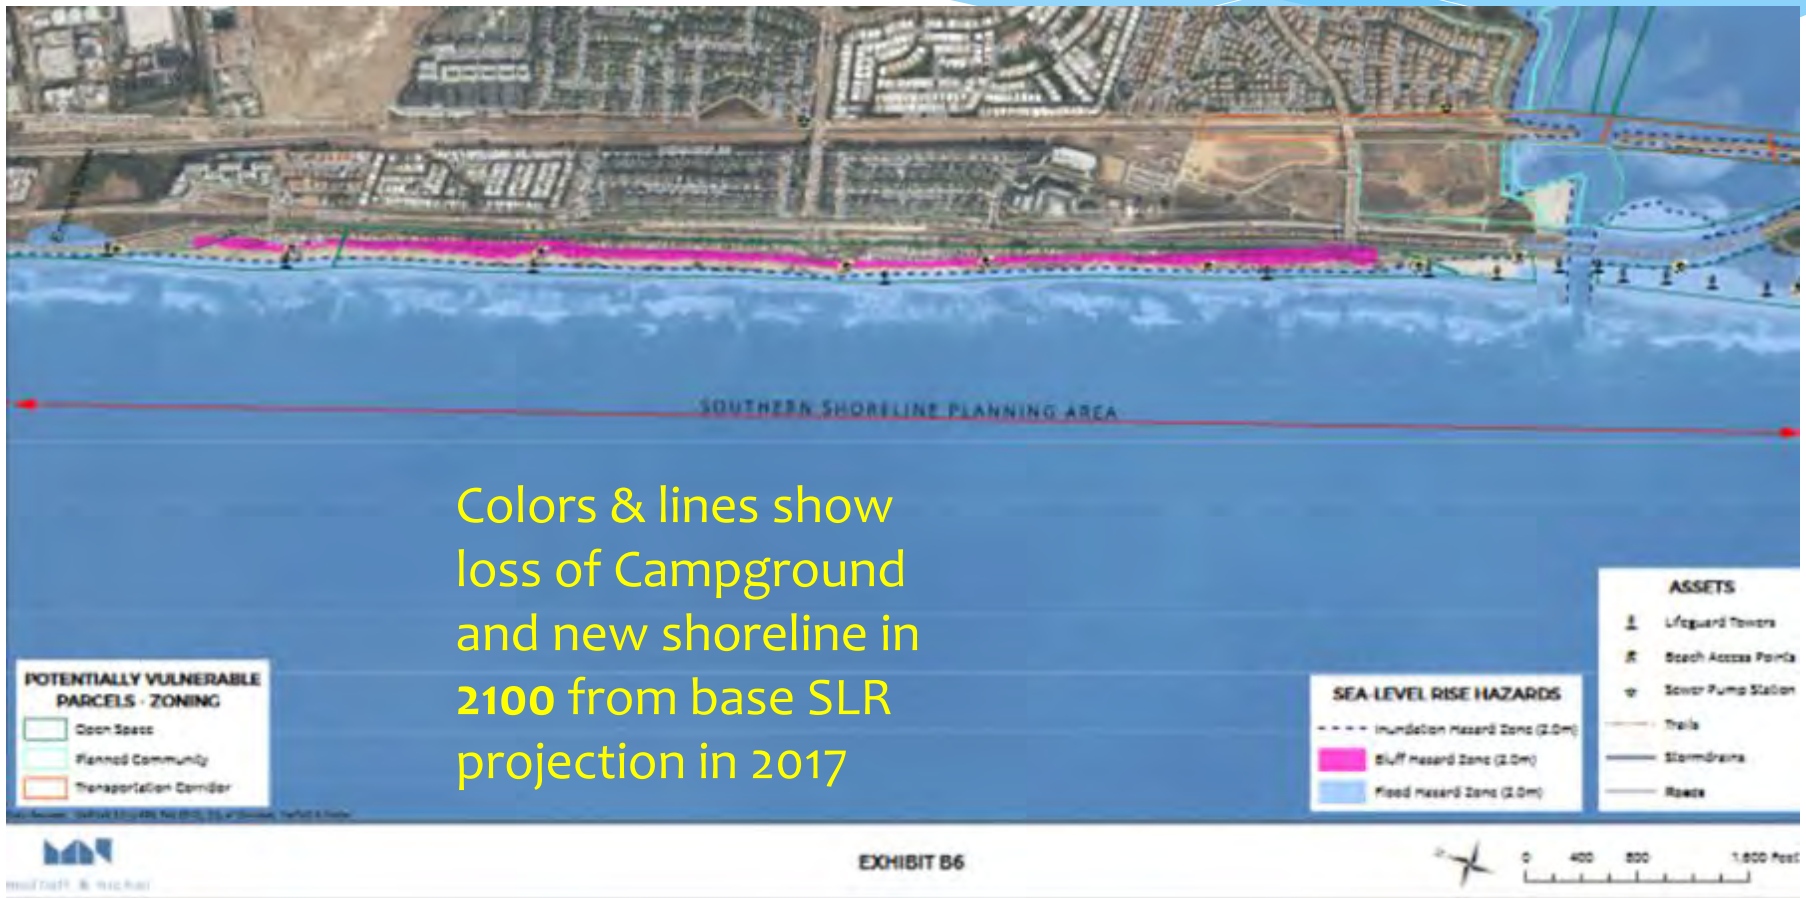

# Ponto & State Park Scenarios – Sea Level Rise

Colors & lines show  
loss of Campground  
and new shoreline in  
**2050** from base SLR  
projection in Dec 2017

Figure 7: Southern Shoreline Planning Area – Year 2050

# Ponto & State Park Scenarios – Sea Level Rise

# Ponto & State Park Scenarios – Sea Level Rise

1. Planning Area G & H is “Upland” site for Managed Retreat:
  1. Provides State a site for Campground relocation due to SLR
    1. 14.3 acres = around 200 campsites, + day-use park and habitat
  2. Provides some City Coastal Recreation Parkland
2. If not used for Managed Retreat of key Coastal land uses
  1. State Campground has no or only one very limited, expensive and suboptimal “Upland” option; or be forced to be lost due to SLR.
3. Federal, State, County and Carlsbad opportunity to share costs on the most cost-efficient solution – **Buy vacant land**

# Ponto & State Park Scenarios – Sea Level Rise

1. Planning Area F is “Upland” site for Managed Retreat:
  1. Provides State a site for Campground relocation due to SLR
    1. 11.1 acres = around 100 campsites, + day-use park and habitat
  2. Provides some City Coastal Recreation Parkland
2. If not used for Managed Retreat of key Coastal land uses
  1. State Campground has no or only one very limited, expensive and suboptimal “Upland” option; or be forced to be lost due to SLR.
3. Federal, State, County and Carlsbad opportunity to share costs on the most cost-efficient solution – Buy vacant land

# Ponto & State Park Scenarios – Sea Level Rise

1. Planning Area F existing LCP Land Use Policy requirement
  1. Carlsbad must “consider and document the need for both Coastal Recreation (i.e. Public Park) and Low-cost Visitor Accommodations” in the City’s proposed land use for Planning Area F s part of City’s LCP Amendment
  2. Carlsbad’s Park Master Plan documents in maps that Ponto is ‘unserved by Parks’ and an area the City should make new Park investments.

# City's Ponto Planning mistakes & CCC direction to City 1 of 2

- \* Following is from a 7/3/17 CCC letter to City Staff on the City's proposed land use changes at Planning Area F. City Staff provided this to City Council on 1/28/20:

“The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto/Southern Waterfront area. **For example, Planning Area F requires the city and developer to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e., public park) on the west side of the railroad. ... and this study should be undertaken as a part of the visitor serving use inventory analysis described above. If this analysis determines that there is a deficit of low cost visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed.”**

# City's Ponto Planning mistakes & CCC direction to City 2 of 2

- \* CCC Staff acknowledged the City has not yet complied with the LCP and in an 8/16/2017 email said:

“The City is currently undertaking a comprehensive update to their LCP funded in part through a CCC grant. As a part of this process the City will be consolidating all previous LCP segments into a single, unified LCP. **The City has received direction from both the Commission (May 2016 CCC hearing) and Commission staff, that as a part of this update the City shall undertake an inventory of visitor serving uses currently provided within the City’s Coastal Zone which will then serve to inform updates to the City’s land use and zoning maps as necessary. This inventory could have future implications for the appropriate land use and zoning associated with the Ponto area.**”

# Ponto & State Park

## Carlsbad's Park Master Plan

### No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

Carlsbad's Park Master Plan maps showing park locations (blue dots) and areas served by parks (blue circles). Blank areas are unserved by Parks' and an area the City should make new Park investments.

# Ponto Coastal Park beach connection

- \* Ponto Coastal Park provides a direct planned pedestrian connection to the Campground and beach
- \* Under north-bound Carlsbad Boulevard and then signalized pedestrian crossing (like those in Downtown Carlsbad) or under future south-bound

# Ponto

## A Special Place for all is needed Now

- \* In the middle of a 6-mile long section of coastline without a Coastal Park – over 8% of San Diego's coast without a Park
- \* Southern Coastal gateway to Carlsbad
- \* On iconic and old historic 101 Coastal Highway
- \* Ocean Views and Beach Access
- \* Batiquitos Lagoon Preserve and Public lagoon trails connect a Coastal Park with habitat lands
- \* City's Park Master Plan already says Ponto an area Unserved by Parks or Park Inequity and should be an area the City makes new Park Investments
- \* Saves tax-payers tens of millions of dollars

Ponto Planning Area G & H:  
A future Coastal Park?

Ponto State Park  
Connection to beach

Ponto Planning Area F:  
A future Coastal Park?

An aerial photograph of a coastal area. In the foreground, there is a large, green, vegetated area with a dirt path. A road runs along the right side of this area. In the middle ground, a bridge crosses a body of water. To the left of the bridge, there is a residential area with houses and palm trees. To the right, there is a beach and the ocean. The sky is blue with some light clouds.

Ponto Planning Area G & H:  
A future Coastal Park?

Ponto State Park  
Connection to beach

Ponto Planning Area F:  
A future Coastal Park?

# Funding Needs & Tax-payer Benefits

- \* \$38 million to purchase 14.3 acre Planning Area G &H at current 'list price'
- \* Around \$8 million to purchase 11.1-acre Planning Area F based on recent 2023 sale and purchase by Fenton
- \* Park development costs about \$ 1million per acre
- \* Most all Fed-State-City 'soft environmental study costs' may have already been paid for at both these two sites
- \* Saves tax-payers \$60.9 to \$12.7 million compared to Carlsbad's proposed 'PCH Relocation' that adds zero land
- \* Opportunity for private 501c3 donations and Bequests to help fund acquisition and operations

# Funding Needs & Tax-payer Benefits

- \* Batiquitos Lagoon Foundation's proposed Coastal Science and Cultural Center adds funding opportunities
- \* Permanente Donor Recognition in world-class bronze whale sculpture already offered for donation to Park
- \* Your legacy for future generations of public use at a very special & vanishing part of California's Coastline
- \* Opportunity to fund Coastal Science Education for future generations

# Donor Recognition Sculpture

- \* Permanente Donor Recognition in bronze whale sculpture & base plaque
- \* Artwork to be donated for Ponto Coastal Park

*Clay maquette*

*Clay proof  
height: 12 ft.*

*Jan., 2013*

*“Young Grey”*

# Working Together to make Ponto Coastal Park a reality

- \* People for Ponto researches, informs and works to protect Ponto for all generations to come
- \* Ponto Beachfront Park 501c3 receives tax-deductible donations for initial Ponto Coastal Park acquisition, and refund of initial donations.
- \* Batiquitos Lagoon Foundation 501c3 receives donations for the Science/Cultural Center within a Ponto Park

Ponto Planning Area F:

**Sent:** Wednesday, August 2, 2023 10:20 AM  
**To:** Council Internet Email <[CityCouncil@carlsbadca.gov](mailto:CityCouncil@carlsbadca.gov)>; City Clerk <[Clerk@carlsbadca.gov](mailto:Clerk@carlsbadca.gov)>; Kyle Lancaster <[Kyle.Lancaster@carlsbadca.gov](mailto:Kyle.Lancaster@carlsbadca.gov)>; [CarlsbadLCPA@coastal.ca.gov](mailto:CarlsbadLCPA@coastal.ca.gov)  
**Subject:** Public input for 9-18-23 Parks Commission & 9-26-23 City Council meeting agenda items on Growth Management-Parks Master Plan Updates and Proposed Local Coastal Program Amendment

We again ask the New Mayor and City Council, Parks Commission and City staff to acknowledge, discuss and honestly consider the attached Suggestions for honestly, responsibly, and most beneficially and cost effectively address the known Park and Unconstrained/Useable Open Space Standard deficits at Ponto and for other such areas in the City.

Ponto is the last significant vacant Coastal land in South Carlsbad. The City allowed (and appears to be continuing to allow) Ponto developers to 'falsely be "exempted" from providing both Useable Open Space at Ponto and providing a Park IN SW Carlsbad for SW Carlsbad families. That is why Ponto is currently developed at a density 40% higher than the rest of the City.

Because of the False Exemptions there is NO Coastal Park for all of inland South Carlsbad (62% of Carlsbad's population) and Ponto is the last remaining adequately sized/dimensioned vacant land that can address these Ponto, SW Carlsbad, and South Carlsbad Park and Coastal Park needs.

City Councils have known since 2001 that PCH Median Relocation is not needed to use most of PCH land for needed sidewalks. The Surplus Areas identified in the City's two (URS & ERA) 2001 Studies show significantly less acreage than the 50-acres (mostly narrow constrained area) being advertised. And the tax-payer costs for these narrow strips is much more expensive than simply buying better vacant land at Ponto. Buying Ponto Vacant land for the needed Park saves tax-payers tens of millions of dollars.

Failure of the Parks Commission and New Mayor and Council to correct past Mayor/Council policy errors would be both wasteful and a forever tragedy for future generations of Carlsbad citizens, families, and visitors.

Please Parks Commission, New Mayor and Council, and CA Coastal Commission do the right thing.

Sincerely,  
Lance

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks and Planning Commissions, , CA Coastal Commission and CA State Parks:

As the City has requested specific reference regarding public input, I ask you to please deliver to the those address this email and attachment as public input for:

1. the CTGMC's 12/15/22 meeting,
2. the next Carlsbad Council meeting,
3. the next Carlsbad Planning and Parks Commission meetings on the Parks Master Plan and Growth Management Program Updates, Ponto Planning Area F and Site 18 land use changes, and Local Coastal Program Amendments, and
4. as public input to the CCC on Carlsbad proposed Local Coastal Program, and
5. as public input to Carlsbad's proposed Local Coastal Program Amendment.

The initial version of attached file was sent to you 8/8/22. The attached updated file should replace that older file as there is new data on significant tax-payer cost savings from Pronto Park relative to PCH Relocation, and updated examples of how Coastal Open Space can be cost-effectively persevered and increased. Both Coastal Parks and Open Space are important Carlsbad and State of CA issues.

- Parks: Updated data shows that a 11.1 acre Ponto Park would now cost less \$20 million to buy and build. This is less than a City Pool Renovation. Carlsbad's Old City Council planned to spend \$65 to \$80 million in Carlsbad tax-payer dollars to address the Citywide need for a significant Coastal Park in South Carlsbad with a 2.3 mile PCH Relocation. The City identified in 2001 other pay-payer funds were highly unlikely. \$65 to \$80 million would only 'free-up' 15.8 acres of narrow PCH Median (City documented "Surplus Land Area #4 & #5"). As People for Ponto Citizens have been saying for years that Ponto Park is the better Park solution to the documented Coastal South Carlsbad Park needs – a citywide need. The CTGMC should include that citywide Park need and the logical, better and tax-payer responsible Ponto Park solution to that citywide Park need in your CTGMC recommendations to City Council.
- Open Space: Updated data shows how documented GM Open Space shortfalls can be properly and responsibly address in a collaborative citizen-based "Local Facilities Zone Useable Open Space Correction Plan" approached. Also the need to maintain the 15% GM (Useable) Open Space Standard will be critical in the future to maintain Open Space and prevent future conversion of Open Space to residential land use as part of Housing Plan updates.

For the CTGMC; Parks and Open Space are the 2 most critical/special of 6 Key Growth Management Program Update Issues and Suggestions the CTGMC should take to properly address these 6 key Growth Management Issues.

- Please read the Updated data and Suggestions.
- Please responsibly address the Growth Management issues of a citywide Park need for Coastal South Carlsbad as listed in the attached Suggestions. Include a South Carlsbad Coastal Park in your recommendations to the City Council. Acknowledge Ponto Park as the best and most tax-payer efficient solution to address that documented citywide park need.
- Please in your recommendations to City Council retain and enforce the Open Space Standard, and fix past errors made in falsely exempting certain developers in certain areas in the City from complying with the Growth Management Open Space Standard that other developers in other areas are required to provide.

Please consider this email and attachments, and know P4P Carlsbad Citizens are here to help assure we sustain and enhance our quality of life for future generations. People for Ponto love deeply Carlsbad and want to assure we leave a better Carlsbad to future generations.

Happy holidays and with Aloha Aina,  
Lance Schulte

**CAUTION:** *Do not open attachments or click on links unless you recognize the sender and know the content is safe.*

Following are 6 key major Growth Management Standards issues of citywide relevance that the Carlsbad Tomorrow Growth Management Committee (CTGMC) needs to act on, and citizen “Suggestions to CTGMC” on how to honestly and responsibly act on these 6 key issues in the CTGMC’s recommendations to the New City Council. This Update includes new information (pp 5-6) on the improved affordability of Ponto Park, and on how GM Open Space shortfall can be repaired. We hope the CTGMC will act honestly to make recommendations that truly and responsibly address known documented shortfalls in both Parks and GM Open Space. Responsible recommendations by the CTGMC can provide a sustainable Quality of Life to future Carlsbad generations and visitors. Only you own your recommendations.

1. The State of CA is forcing Carlsbad and all cities/counties in CA to provide for unlimited or Infinite Population and Visitor growth. So there will be an Infinite population & visitor demands for Parks, Open Space, water, and demands on our roads/transportation systems, and other Growth Management (GM) Quality of Life facilities. These infinite increases in population and visitor demand will come from high density development that requires more public Parks and Open Space to balance the high-densities. **Carlsbad’s new GM Standards will have to provide for a system of Infinite proportional increases in the supply of Parklands, Open Spaces, water, transportation facility capacity, etc. or our Quality of Life will diminish.**
  - a. Suggestions to CTGMC:
    - i. Completely restructure the General Plan, Local Coastal Program and GM Program to clearly recognize these facts and State requirements to proportionately provide public facilities to maintain/improve Carlsbad GM Quality of Life Standards for this Infinite growth of Population and Visitor demands.
    - ii. **Being a Coastal city Carlsbad has an added responsibility to proportionately maintain/improve providing High-Priority Coastal land uses (Coastal Recreation {i.e. Public Parks} and Low-cost Visitor Accommodations) needed at a regional and statewide level to address visitor needs for Coastal Recreation, access, and affordable accommodations.** Carlsbad needs to work with the State of CA Coastal Commission to completely restructure Carlsbad’s Coastal Land Use Plan to addresses the State’s requirement to provide an Infinite amount high-priority Coastal land uses for those Infinite Population and Visitor demands.
    - iii. **Trying to ignore these Infinite demands for Carlsbad’s Quality of Life facilities – like Parks and Open Spaces is a path to disaster and the ultimate degradation of Carlsbad’s Quality of Life.**
2. **Carlsbad has a huge Jobs v. Housing supply imbalance – far too many jobs around the airport for our amount of housing. This creates negative and costly land use and transportation planning distortions that radiate from the Airport Central Jobs through Carlsbad in all directions.** CA Housing law penalizes unbalanced cities like Carlsbad by requiring more housing in Carlsbad to bring jobs/housing ratio into balance. Carlsbad can correct this imbalance by 1 of 2 ways: 1) greatly increase housing supply (and thus increase the need and City expense for more GM Quality of Life facilities), or 2) more logically and cost effectively greatly decrease the amount of Jobs land use, so Carlsbad’s housing supply is in balance with jobs. These jobs will move to surrounding Cities that have more housing than jobs. **Rebalancing by reducing jobs land use creates added benefits for Carlsbad and our region by reducing Carlsbad’s peak-hour job commute traffic volumes and**

**vehicle miles traveled (VMT), and by reducing the costs Carlsbad (and other cities and the region) have to pay to accommodate inter-city commute traffic. If Carlsbad reduces jobs land use will also reduce the amount of housing the State of California and SANDAG requires Carlsbad provide in its Housing Element thus reducing forcing incompatible high-density development into established neighborhoods and pressure to convert useable GM Open Space lands to housing land use.**

a. Suggestions to CTGMC:

- i. **Carlsbad can logically and cost effectively balance Jobs/housing supply by updating Growth Management Policy to reduce jobs to be in balance with housing by changing some of Carlsbad's General Plan land use around the airport into several high-density residential mixed-use Villages.** The City has started some of this, but can expand this effort but has not planned creating mixed-use village environments. These high-density villages will reduce jobs and provide both high-quality and high-density (affordable) housing within walking/biking distance to the major job center and new neighborhood commercial and Park uses in the Villages.
- ii. Prioritize transportation investments in safe bike paths, walking paths between Carlsbad's Central Jobs Core around the airport and Carlsbad's housing, particularly strongly connecting these new high-density mixed-use villages with the Central Jobs Core.
- iii. Update General Plan land use and housing policy to reduce concentrations of higher-density housing except around the airport jobs core.
- iv. Recognize the central Airport jobs core is 'Carlsbad's New Urban Downtown and "Transect Plan" accordingly toward lower densities on the City periphery.

3. Although some very critical areas (such as the Coastal lands at Ponto) are still vacant and can be wisely used for critical GM Quality of Life needs, much of Carlsbad is largely developed.

**Redevelopment of developed land will require creating increased supplies of Parkland, Open Spaces, transportation capacity, and other Quality of Life facilities.**

a. Suggestions to CTGMC:

- i. **Completely rethink all City planning on existing vacant lands to assure that remaining vacant land is planned and being used wisely and fairly distributed to address critical Quality of Life needs in those areas, and not squandered on redundant land use.** The location of vacant land to address critical Park & Open Space needs should be preserved with land use planning.
- ii. Work with the State and CA Coastal Commission to preserve our Finite vacant Coastal lands for High-Priority Coastal Land Uses (Coastal Recreation {i.e. Public Parks} and Low-cost Visitor Accommodations and services) for the Infinite population and visitor demands both internal and external to Carlsbad that are/will be placed on them.
- iii. Fully and at the very beginning of any Carlsbad General Plan, Local Coastal Program and Growth Management Program actions going forward fully disclose, map and require consideration of the impact of future sea level rise and coastal erosion on Coastal land acres and land uses. Carlsbad has lost and will accelerate losing acres of Coastal land and High-priority Coastal Land Uses. Carlsbad must know, see, and discuss these losses BEFORE making any land use decisions in Carlsbad's Coastal Zone and any vacant Coastal Land.

4. **Carlsbad General Plan & Growth Management Plan do not provide a fair distribution of adequately sized City Parks for all Carlsbad families.** Veterans Park is a classic example. What will

be the City's largest park is only about 1-mile away from three other major City Parks (Zone 5, and the future Robinson Ranch and Hub Parks). This is a poor and unfair distribution and a misallocation City Park land resources. Saying Veterans Park is 'the park to serve SW, SE, and NE Carlsbad families' (the overwhelming major/majority funders of veterans Park) when those families are upwards of 6-miles away on major commercial arterials that kids can't logically/safely use is false and unfair. Most all the funding (developer fees) to build Veterans Park come from the SW, SE and NW Carlsbad but those areas are denied the Park the paid for. Veterans Park is inaccessible by almost all its intended users except by driving their cars and then storing their cars in parking lots on Parkland thus making less park land available for actual park use – this makes little common sense and is a great waste of tax-payer funds. This is dysfunctional along with being very unfair to families in SW, SE and NE Quadrats that are denied park acres near their homes which they funded. **Carlsbad's Park Master Plan maps 'Park Service' areas of existing known Park Inequity or Unfairness (dysfunction), to show where new City Park investments should be made (See City map image with notes below).**

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

The Trust for Public Land provides a Park-Score to compare both a City's amount of park acres and the 'fairness' of access (within a 10-minute walk) to parks. **Carlsbad is below national averages in both park acres and fair access to parks. Carlsbad is also well below what our adjacent Coastal cities of Encinitas and Oceanside provide. Carlsbad only requires 3 acres of Park land per 1,000 population, while Encinitas and Oceans require 5 acres - 67% more than Carlsbad – of parkland. Also, Encinitas and Oceanside require parks to be within a 10-minute walk to their citizens and families. Carlsbad has no such requirement.**

a. Suggestions to CTGMC:

**Carlsbad should change its General Plan, Parks and Growth Management Standards and CMC 20.44 to:**

- i. **Be Above Average Nationally in both providing park acreage and in locating adequate park acreage to be within a 10-minute walk to all neighborhoods.**
  - ii. **Raise its minimum park acreage standard to 5 acres per 1,000 population, versus the current low 3 acres per 1,000. Carlsbad should be at least as good as Encinitas and Oceanside in requiring 5 acres, not 40% below what our adjacent Cities require/provide.**
  - iii. **Raise its park location standard to require an adequately sized park be provided to serve the neighborhood population within a 10-minute walk for all neighborhoods.**
  - iv. **Prioritize City Policy and Park Budgets and investments to achieve park fairness in 'Park Unserved areas' identified by Carlsbad's Park Master Plan.**
  - v. **Per Carlsbad's Municipal Code Chapter 20.44- DEDICATION OF LAND FOR RECREATIONAL FACILITIES to require developers in 'Park Unserved areas' and in areas that do not have an adequately sized (5 acres per 1,000 population) park within a 10-minute walk to provide their developments required Park land acre dedication in actual Park land within a 10-minute walk to their development.**
  - vi. **Update the City's Park-in-lieu fee to assure the fee is adequate to actually buy the amount of park land a developer is to provide within a 10-minute walk of their development. The City's current 'Park-in-lieu-fee' is far too low and inadequate to actually buy land in area surrounding the proposed development.**
  - vii. **Only allow developers to pay a Park-in-lieu-fee where there is an adequately sized park (provide 5 acres per 1,000 population) within a 10-minute walk of their development, and growth management planned future development in that area will not require more park land to provide 5 acres per 1,000 population) within a 10-minute walk.**
  - viii. **Consider updating Park policy to provide more multi-use flexibility in park land acres and development on Parks. Many Carlsbad Park acres are developed/dedicated to a single-purpose use, and unavailable for other park uses.**
  - ix. **Consider eliminating car parking lots from land that can be counted as parkland; or by significantly limiting park land used for parking to around 5%.**
  - x. **Eliminate the counting of 'GM Constrained and Unusable land' and Protected Endangered Species Habitat land as Park land. GM Constrained/Unusable lands are undevelopable. Protected Habitat lands are by definition not useable for development by people. Habitat is dedicated for plants and animals. Parks are open spaces dedicated intended for people. Parkland calculations should exclude Unusable lands and Protected Habitat lands and only count 100% people Useable land as Park land. Where Park land abuts Habitat land a sufficient buffer space shall be provided to prevent people mixing with animals (ex. Rattlesnakes, etc.) and animals from people (habitat disturbance or destruction). This buffer area should not be counted as Park or Habitat acres, but as natural/developed buffer open space acres, and can be counted as part of the City's 15% Growth Management 'Aesthetic open Space'.**
5. **Carlsbad's Coast is the most, if not the most, important feature of Carlsbad; and is consistently identified by citizens and businesses and our Community Vision. Carlsbad's Coastal Parks (west of the I-5 corridor) are grossly unfairly distributed. Carlsbad's Coastal Parks do not fairly match the**

**locational needs of the population. North Carlsbad that is 38% of Carlsbad's population and has 10 Coastal Parks totaling 37+ acres in size. South Carlsbad that is 62% of Carlsbad's population has 0 [ZERO] Coastal Parks totaling 0 [ZERO] acres.** Again, Carlsbad's Park Master Plan maps this citywide unfairness (dots show park locations and circles show the area served by each park) and says that the City should look at buying and building New Parks in these areas that are unserved by City Parks (are not covered by a circle). The GM Update should correct this citywide unfair distribution of City Parks by making plans for new Park purchases to create City Parks in these unserved areas of Park Inequity.

To address citywide Coastal Park unfairness the current City Council wants to spend \$60-85 million in Carlsbad tax-payer funds to Relocate 2.3 miles of constrained Pacific Coast Highway median to try to make some of the narrow PCH median 'useable' by people. 2001 and 2013 City PCH Relocation studies identified only a small amount of 'people-useable acres' would be created next to PCH. The \$60-85 million tax-payer cost (\$26-37 million per mile) does NOT add one single square foot of new City land, it only inefficiently rearranges a small amount PCH median. The City can most tax-payer cost effectively provide needed sidewalks and bike improvements along the outside edges of PCH without PCH Relocation. The City's 2001 PCH Relocation Financial Study and 2013 PCH Relocation Design both indicated minimal useable land could be achieved by Relocation, and that the very high tax-payer cost to do so would be very difficult to fund. The City has known for well over 20-years that PCH Relocation is a high-cost and a poor solution to address the Citywide Coastal Park unfairness in South Carlsbad.

However, a **better and far less costly solution to correct Citywide Coastal Park unfairness and provide a much needed South Carlsbad Coastal Park is to simply buy currently vacant land that is for sale.** The City did this (although the City actually bought existing homes) when it expanded Pine Park. **Carlsbad tax-payers have used the City's own data to compare the tax-payer Cost/Benefits of simply purchasing vacant land v. trying to rearrange existing City owned land at PCH. Simply buying vacant land saves tax-payers saves tax-payers over \$32.7 to \$7.7 million.** Please read the following data files:

- 2022-June General Comparative tax-payer Costs/Benefits of Completing PCH, 2.3 miles of PCH Modification (Island Way to La Costa Ave.), and 14.3 acre Ponto Park (Kam Sang) to address planned loss of 30+ acres of Coastal Open Space Land Use at Ponto in South Carlsbad: Part 1 of 2.
- City's PCH Modification Proposal Area Map with notes on usability Constraints and Issues: P4P Input: Part 2 of 2
- The most recent (9/19/22) land sale of 11.1 acre Ponto Planning Area F was less than \$8 million (less than \$706,000 per acre).
- **Buying and developing this 11.1 acre Ponto Park would cost less than \$20 million assuming a 10% profit to the new land-owner, and \$1 million per acre park construction cost like our newest Buena Vista Reservoir Park.** The cost to help correct a Citywide Coastal Park unfairness by simply buying & building a much needed **11.1 acre Ponto Coastal Park would cost tax-payers less than the recently approved Measure J City Monroe Street Pool Renovation.** Investing less than \$20 million (\$1.8 million per acre) to buy and build an 11.1 acre Ponto Coastal Park is a great tax-payer value v. \$65-80 million in tax-payer funds to rearrange 15.8 acres of narrow strips of constrained PCH median (City documented "Surplus Land Area #4 &5") for some minimal people use at a tax-payer cost of \$4-5 million per acre. **The overall and per acre costs of buying/building Ponto Park are over 2 to 3 times better value for tax-payers than PCH Relocation/rearrangement.**

- The City Council could/can buy land for Open Space (Parks are the most useable of the City's 4 Open Space categories) under voter approved Prop C Open Space land acquisition authority. **The City has been advised to buy Ponto Park under Prop C per the City's settlement of a Growth Management law suit.**

**The Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad is clearly a citywide issue. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad as it is unfair to the vast majority of Carlsbad citizens and their families as 62% of Carlsbad is in South Carlsbad. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad is unfair to our major Visitor serving industries (and tax generators) in South Carlsbad. Park and Coastal Park Inequity at Ponto and Coastal South Carlsbad are clearly inconsistent with the CA Coastal Act, Carlsbad's Community Vision, and common sense.** The Coastal South Carlsbad Park Inequity is also unfair to North Carlsbad because South Carlsbad's Coastal Park demand is being forced into Coastal North Carlsbad and congesting those parks, and adding to Coastal North Carlsbad traffic and parking impacts. It also increases greenhouse gases and VMT as it forces longer vehicle trips.

a. Suggestions to CTGMC:

- i. 11.1 acre Ponto Planning Area F has a specific Local Coastal Program Land Use Policy that says The City of Carlsbad must for the Ponto Area LCP 'Consider and Document the need for Coastal Recreation (i.e. Public Park) and or Low-Cost Visitor Accommodations west of the railroad tracks (at Ponto) prior to any Land Use change. **The discussion of Parks by the CTGMC is such a situation that requires the CTGMC to consider this adopted LCP Land Use Policies. Official public records requests have shown the City never followed this LCP Land Use Policy Requirement during the 2005 Ponto Vision Plan and 2015 General Plan Update, and in 2010 the CA Coastal Commission rejected the Ponto Vision Plan and told the City in 2017 that that land uses at Ponto could change based on the need for Coastal Recreation and/or Low Cost Visitor Accommodations.** The Mello II LCP that covers most of Carlsbad's Coastal Zone also has Land Use Policy 6.2 for the City to consider a major park in the Batiquitos (Ponto/South Carlsbad) area. The City has only implemented 1/6 to 1/3 of this policy. **The CTGMC should fully evaluate the citywide/South Carlsbad and local Ponto need for Coastal Parks as required by the City's adopted LCPs and CA Coastal Act.**
- ii. Carlsbad's 2015 General Plan Update and Growth Management Plan (GMP) did not, and was not updated to, consider the 2017 Sea Level Rise (SLR) Impact report showing the loss/impact on 32+ acres of Carlsbad's Coastal Land Use acreage in South Carlsbad – primarily Open Space Land Use (beach and Campground). **Both the General Plan (and Local Coastal Program Land Use Plan) and GMP should be updated to account for the loss and replacement of these 32+ acres of high-priority Coastal Open Space Land Use due to SLR.** The updates and the CTGMC should use the newest CA Coastal Commission SLR Guidelines/science, not the old guidelines used in 2017. Carlsbad's LCP and CA Coastal Act Land Use Polies call for 'upland relocation' to replace the SLR loss of high-priority Coastal Land Uses.
- iii. **The availability over the past several years of the last two sufficiently sized vacant lands suitable for a Ponto/South Carlsbad Coastal Park is a citywide issue. If these last two vacant lands are lost to development forever future generations will have lost the last opportunity for the needed South Carlsbad Coastal Park.** The 5/3/22 Citizen requests for the City to jointly study acquisition of one or both these last vacant lands for a needed (and only possible) true and meaningful Coastal Park for

South Carlsbad should be recommended by the CTGMC. **The CTGMC should recommend Carlsbad’s GMP be updated to incorporate Parkland acquisition of these last opportunities to provide the needed Coastal Park for South Carlsbad.**

6. Carlsbad Growth Management Open Space Standard is that 15% of all the Useable (unconstrained and fully buildable) areas is to be preserved as Useable Open Space, and that all the 25 Local Facility Management Plans (LFMP) show how that 15% is provided. The City says:

---

---

**OPEN SPACE**

---

---

**A. Performance Standard**

Fifteen percent of the total land area in the Local Facility Management Zone (LFMZ) exclusive of environmentally constrained non-developable land must be set aside for permanent open space and must be available concurrent with development.

Yet the City has mapped and documented that this 15% Useable Open Space Performance Standard was not complied with. The City also acknowledges that without changes to current City planning the 15% Useable Open Space Performance Standard will never be complied with. The City acknowledges that only 13% has/will under current plans ever be provided. This missing 2% equals 501 acers of lost GM Open Space the GMP promised citizens. **Carlsbad law the Growth Management Ordinance 21.90, and section ‘21.90.130 Implementation of facilities and improvements requirements’; provide guidance on how non-compliance with a Performance Standards is to be handled.**

a. Suggestions to CTGMC:

- i. Retain the GM Open Space Standard of 15% of all unconstrained and developable land is maintained as Open Space. If the City removes the Open Space Standard, it will allow and encourage land use changes to remove GM Open Space and replace with development.
- ii. **The CTGMC should make a recommendation that an inventory of all 25 LFMP Zones be conducted and an inventory of each LFMP Zones provision of at least 15% Useable Open Space shall be compiled. No LFMP Zone shall be allowed to be “exempt” from this inventory.** The City’s computerized GIS mapping system makes it easy and clear as shown in the following City GIS map for LFMP Zone 9 (aka Ponto).

**City GIS map of Ponto's (LFMP Zone 9) Open Space:**

- Light green areas meet the City's 15% unconstrained Growth Management Program Open Space Standard
- Most Ponto Open Space (pink hatch & blue [water] on map) is "Constrained" and does not meet the Standard
- **Aviara - Zone 19, Ponto - Zone 9 and Hanover/Poinsettia Shores – Zone 22 all developed around the same time and had similar vacant lands.**
- **City required Aviara - Zone 19 east of Ponto to provide the 15% Standard Open Space. Why not Ponto? Aviara includes the same lagoon.**
- **City required Hanover & Poinsettia Shores area Zone 22 just north of Ponto to provide the 15% Standard Open Space. Why not Ponto?**
- Why Ponto developers were not required to comply with the 15% Useable Open Space Standard is subject to current litigation
- Below is City GIS data from this map

**City GIS map data summary of the Growth Management Standard of 15% Useable Open Space at Ponto**

472 Acres	Total land in LFMP Zone 9 [Ponto]
<u>(197 Acres)</u>	Constrained land excluded from Growth Management (GMP) Open Space
275 Acres	Unconstrained land in LFMP Zone 9 [Ponto]
X 15%	GMP Minimum Unconstrained Open Space requirement
41 Acres	GMP Minimum Unconstrained Open Space required
<u>(11 Acres)</u>	GMP Open Space provided & mapped per City GIS data
<b>30 Acres</b>	<b>Missing Unconstrained Open Space needed in LFMP Zone 9 [Ponto] to meet the City's minimum GMP Open Space Standard per City's GIS map &amp; data</b>

**73% of the City's minimum 15% required Open Space Standard is missing due to over development of LFMP Zone 9 [Ponto]**

- iii. In instances like LFMP Zone 9 (above image) that clearly did not provide at least 15% Useable Open Space and/or were falsely “exempted” the CTGMC should recommend that a **Local Facilities Zone Useable Open Space Correction Plan** shall be developed that explores the GM Open Space use/reuse of City land, land use planning requirements, and/or possible acquisitions of remaining vacant land acres to make up for any shortfall in meeting the 15% Useable Open Space in that a Zone. An example of this in LFMP Zone 9 is that the City’s regional Rail Trail will convert 2-lanes of almost all of Avenida Encinas to wider buffered bike lanes and an adequate portion of the converted 2 vehicle lanes can be landscaped (v. just painting strips as a buffer) to provide a safer/better bike lane buffer within a GM compliant Open Space. 2 vehicle lanes in Windrose Circle could also be similarly landscaped and converted to GM complaint Open Space. This is just one example of a cost-effective means to add GM Open Space that developers were falsely allowed to remove.
- iv. A **Local Facilities Zone Useable Open Space Correction Plan** should involve a Citizens Advisory Committee composed of citizens within the impacted Zone and appointed by the Council Members representing the Zone, and a representative of each vacant land owner over of over 1-acre in size.
- v. Consistent with the Growth Management Ordinance land use changes and development applications within a **Local Facilities Zone Useable Open Space Correction Plan** Zone shall be deferred until the applications can considered with (or after adoption of) a **Local Facilities Zone Useable Open Space Correction Plan**.

**Subject:** Public input for upcoming Carlsbad LCPA-Parks Master Plan & Growth Management Plan Updates - Parkland losses not considered in minimal 3 acre Parkland dedication for new unlimited development

Dear City Council, Parks and Planning Commissions; and CA Coastal Commission:

Please read the data below and attachments in your upcoming Growth Management and Park Master Plan Update processes, and for Carlsbad's proposed Draft Local Coastal Program Amendment.

This data was previously provided to the City on 2/6/23, but apparently not adequately discussed or considered as it documents the New City Council will lose 20.6 acres of free Parkland or \$20.6 million in Park-in-lieu-fees by not using a 5 acres/1,000 Parkland Dedication requirement over the next 8-years of the (2021-2029) Housing Element cycle, and continue to lose both Parkland and Park-in-lieu-fees every 8-year Housing Element cycle.

The loss in Park land and fees is a significant issue relative to City Budget and Quality of Life that seems should be of great importance to the City Council regarding the benefits and impacts of a 3 or 5 acre per 1,000 population Parkland Dedication requirement in Updating the Growth Management Park Standard, Park Master Plan, Local Coastal Program Land Use Plan, and Housing Element.

Since staff prevented a thorough comparative discussion of the 3 to 5 acre Parkland dedication requirement for new developers relative to the impacts to City finances by the CTGMC, that thorough comparative discussion of the 3 to 5 acre Parkland dedication requirement rests with the New City Council. Not fully considering the impacts of a 3 v. 5 acre per 1,000 population Park land dedication Standard to City finances and to the Quality of Life would be irresponsible.

Following is a base calculation of the Parkland and/or Park money lost by the New City Council by not Updating new developer Parkland dedication requirements to be consistent with the 5 acre per 1,000 population requirements of Encinitas and Oceanside. Carlsbad not matching and keeping up with new Parklands created by Encinitas and Oceanside will over time, and a several Housing Element (and required land use changes to higher-density) Updates, retard Carlsbad's desirability and Quality of Life. Remember CA law prevents any city from being 'Buildout', and future land use changes to create more new housing units will be required of Carlsbad (and every other city) at every eight year Housing Element Cycle.

It is folly to not consider these growth/Parkland impacts of more unlimited new high-density housing and lower relative new developer required Parkland dedication vis-à-vis adjoining Cities. Not considering the significant loss of free Parkland and/or free Park-in-lieu-fees from new development and the impact on City finances and Quality of Life is folly and mismanagement of Carlsbad Tomorrow.

[2021-29 Housing Element \(and required land use changes\) Update for ONLY to 2029 or next 7-years](#)

HCD required new Housing Units to be accommodated to 2029 = 3,900  
Average population per housing unit in Carlsbad (2020 Census) = 2.64  
Required new population to be accommodated until 2029 = 10,296 (8.9% City pop. increase)  
For simplicity of comparison reasonably assume Carlsbad Land costs \$1 million per acre, so:

New developer Parkland Dedication and/or Park-in-lieu-fee (free to City) for 2021-29 period:  
3 acres per 1,000 = 30.9 free to City Park acres or \$30.9 million in free Park-in-lieu-fees to add parks  
4 acres per 1,000 = 41.2 free to City Park acres or \$41.2 million in free Park-in-lieu-fees to add parks  
5 acres per 1,000 = 51.5 free to City Park acres or \$51.5 million in free Park-in-lieu-fees to add parks

Free to City Park acres or free Park-in-lieu-fees LOST to City by only requiring new developers provide 3 acres of Parkland per 1,000 in only 8-years (2021-29) Housing Element Cycle:

**City loses 10.3 acres of free Parkland or \$10.3 million in Park-in-lieu-fees by not using 4 acres/1,000**  
**City loses 20.6 acres of free Parkland or \$20.6 million in Park-in-lieu-fees by not using 5 acres/1,000**

For an 8-year period losing 10.3 to 20.6 acres of free City Parkland or \$10.3 to \$20.6 million in free Park-in-lieu-fees are significant developer giveaways and impacts to City finances and future Quality of Life.

This loss of free Parkland and/or Park fees will repeat every 8-year Housing Element Update Cycle as CA HCD requires more land use changes to add more high-density housing units. These high-density housing units are most in need of City Parks to balance their high-density. Every 8 years there will be more increases City population and high-density development Parkland demands. City staff has indicated to the CTGMC that in the next 2030-38 Housing Element (and required land use changes) Update for that 8-year period that HCD will likely require be similar or more units to be provided in the 2030-2038 period as required in the 2021-29 period.

The New Mayor and City Council fully consider these issues and had a fair comparative consideration of the 3, or 5 acre Parkland dedication issues.

The New Mayor and City Council should now require new development to dedicate 5 acres of free Parkland. This is common sense, wise land use/Park planning and prudent City fiscal policy.

Thank you,  
Lance Schulte

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council and Parks Commission

Apparently on 1/26/23 the CTGMC did not have a discussion considering the impacts of a 3 or 4 or 5 acre per 1,000 population Parkland Dedication requirements as recommend Updates to the City Council.

Since there was no comparative discussion of the 3 to 4 to 5 acre Parkland dedication requirement for new developers the CTGMC did not compare/consider the relative impacts to City finances from the lost Parkland and/or Park-in-lieu-fees new developers would be giving to the City. Not considering the impacts to City finances and to the Quality of Life for the future seems somewhat irresponsible.

Following is a base calculation of the Parkland and/or Park money lost by the City by not Updating new developer Parkland dedication requirements to be consistent with the 5 acre per 1,000 population requirements of Encinitas and Oceanside. Carlsbad not matching and keeping up with new Parklands created by Encinitas and Oceanside will over time, and a several Housing Element (and required land use changes to higher-density) Updates, retard Carlsbad's desirability and Quality of Life. Remember CA law prevents any city from being 'Buildout', and future land use changes to create more new housing units will be required of Carlsbad (and every other city) at every eight year Housing Element Cycle.

It is folly to not consider these growth/Parkland impacts of more unlimited new high-density housing and lower relative new developer required Parkland dedication vis-à-vis adjoining Cities. Not considering the significant loss of free Parkland and/or free Park-in-lieu-fees from new development and the impact on City finances and Quality of Life is folly and mismanagement of Carlsbad Tomorrow.

2021-29 Housing Element (and required land use changes) Update for ONLY to 2029 or next 7-years

HCD required new Housing Units to be accommodated to 2029 = 3,900

Average population per housing unit in Carlsbad (2020 Census) = 2.64

Required new population to be accommodated until 2029 = 10,296 (8.9% City pop. increase)

For simplicity of comparison reasonably assume Carlsbad Land costs \$1 million per acre, so:

New developer Parkland Dedication and/or Park-in-lieu-fee (free to City) for 2021-29 period:

3 acres per 1,000 = 30.9 free to City Park acres or \$30.9 million in free Park-in-lieu-fees to add parks

4 acres per 1,000 = 41.2 free to City Park acres or \$41.2 million in free Park-in-lieu-fees to add parks

5 acres per 1,000 = 51.5 free to City Park acres or \$51.5 million in free Park-in-lieu-fees to add parks

Free to City Park acres or free Park-in-lieu-fees LOST to City by only requiring new developers provide 3 acres of Parkland per 1,000 in only 8-years (2021-29) Housing Element Cycle:

**City loses 10.3 acres of free Parkland or \$10.3 million in Park-in-lieu-fees by not using 4 acres/1,000**

**City loses 20.6 acres of free Parkland or \$20.6 million in Park-in-lieu-fees by not using 5 acres/1,000**

These are significant developer giveaways and impacts to City finances and future Quality of Life. The lost free Parkland and/or Park fess will repeat every 8-year Housing Element Update Cycle as more land use changes are required to add more high-density housing units (that most need City Parks to balance the high-density) increases City population and Parkland demands. City staff has indicated to the CTGMC that in the next 2030-38 Housing Element (and required land use changes) Update for that 8-year period that HCD will likely require be similar or more units to be provided in the 2030-2038 period as required in the 2021-29 period. CTGMC and City Council should now require new development to dedicate 5 or 4 acres of free Parkland. This is common sense, wise land use/Park planning and prudent City fiscal policy.

*Carlsbad losses from not requiring new developers dedicate 4 or 5 acres of Parkland*

Dear City Council, Parks, Planning and Traffic Commissions; and CA Coastal Commission:

Please read the data below and attachments in your upcoming Growth Management and Park Master Plan Update processes, and for Carlsbad's proposed Draft Local Coastal Program Amendment.

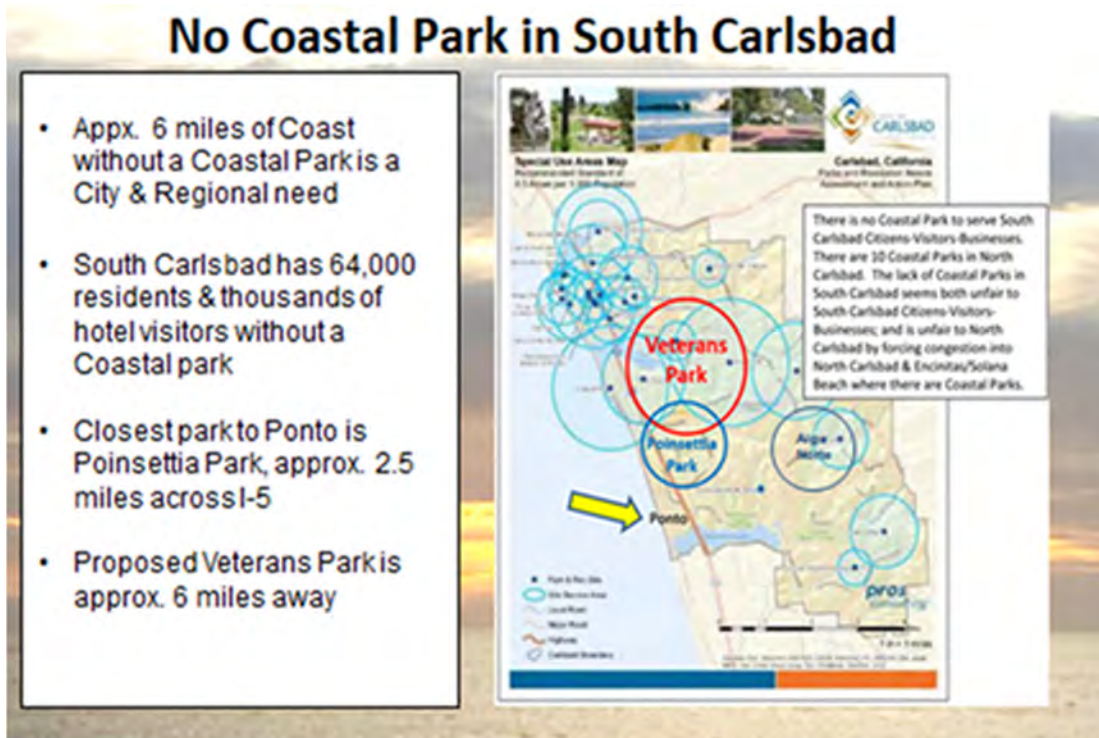

This data was previously provided to the City on 9/19/22, but was ignored and not discussed or considered.

Please review and consider this email and data on regional VMT data and your considerations of Carlsbad General Plan/LCPA, Growth Management Standards and Park Master Plan Updates. As has been provided in many data supported Citizen desires (and Trust for Public Land ParkScore data), Carlsbad's Parkland distribution Imbalance creates multiple negative impacts to current and future generations and the environment. As documented in People for Ponto's "Coastal Recreation" data file and extensive public input Carlsbad's Parkland Imbalance is in conflict with CA Coastal Act Policy. As Carlsbad citizens have repeatedly told you Carlsbad's Parkland Imbalance is increasing Carlsbad's VMT for Park access, or by requiring high VMT restricting Park access for citizens. The City's restrictive Park access and high VMT requirements to access City Parks is in conflict with State law to reduce VMT, and CA Coastal Act Policies. As the Trust for Public Land Parkscore data show Carlsbad is a relatively poor performer in regards to both providing Park acres and fairly distributing Park acres so more Citizens and their families can walk to Parks.

Carlsbad is also below average nationally in both providing Park acres and in fairly distributing Park acres. Carlsbad has one park for 2,797 residents with 2.95 acres of parkland per 1,000 residents. National Recreation and Park Association (NRPA) data show that Carlsbad is 20% below what is typical in providing the number of parks, and Carlsbad is 72% below what is typical in providing acres of parkland (<https://www.nrpa.org/publications-research/research-papers/agency-performance-review/>). The Trust for Public Land (TPL) also measures a City's Park performance (<https://www.tpl.org/city/carlsbad-california>). TPL data show Carlsbad total Park land acres (including counting State Park land acres) is 26% below the Median for the TPL's 100 ParkScore® cities, and 7% below the Median for the 14,000 cities and towns in the TPL ParkServe® database. The TPL also maps if a City provides/has Parks within a 10-minute walk to a Park; and Carlsbad is 33% below the Median for the TPL's 100 ParkScore® cities and 9% below the Median for the 14,000 cities and towns in the TPL ParkServe® database. This comparative information has not been publicly addressed by Council or in the 2015 General Plan Update. As noted both the Cities of Encinitas & Oceanside and many others have a 10-minute walk to Park Standard. Carlsbad does not and thus makes Carlsbad Parks less accessible and forces more VMT on Carlsbad roadways.

The CARB data so the SANDAG Regional average for Parks within walking distance is 71%, and the Statewide average is 72%. Carlsbad's Trust for Public Land Parkscore as noted above shows Carlsbad is only 50% or almost ½ worse than both the Regional and Statewide averages for walkable access to Parks. Carlsbad requires about 50% more VMT than the Region and State for Park access. This is the Imbalance People for Ponto Citizens have repeatedly shown the City but is being ignored.

Simply look at the following image from the City's own Park Service Area Maps in the Carlsbad Park Master Plan to see the unfairness, added VMT and gross Imbalance in the Land Use Plan. The blue dot is a Park and the light blue circle is that Park's service area. Even a 5-year child can see the unfairness and Imbalance.

I hope you consider this data. Our future depends on it.

Lance

*Note: This beta dashboard is a draft. Do not cite.*

## Introduction

In 2008, the California Legislature passed the Sustainable Communities and Climate Protection Act, Senate Bill 375 (SB 375). SB 375 is a first-of-its-kind law to recognize the critical role of integrating transportation, land use, and housing decisions. The law requires each of California's 18 metropolitan planning organizations (MPOs) to include a sustainable communities strategy (SCS) in its long-range regional transportation plan. The SCS identifies strategies to meet regional greenhouse gas (GHG) emission reduction targets set by the California Air Resources Board (CARB).

In 2017, the Legislature passed Senate Bill 150 (SB 150), tasking CARB with issuing a progress report every four years that assesses progress each MPO has made in meeting the regional GHG emission reduction targets set by CARB. This dashboard showcases over two dozen data-supported metrics that CARB analyzed to support the Draft 2022 Progress Report.

## How to Use This Dashboard

The purpose of this dashboard is to highlight transportation, land use, and housing metrics that CARB analyzed to support the 2022 Progress Report. Users can interact with the visualizations below to filter data or reveal additional information.

### Filter Data

Use filters at the top of each visualization to narrow down data of interest. Most visualizations allow filtering by MPO region. Some visualizations also allow filtering by year.

### Find Additional Information

Hover or click on a chart or graphic to reveal additional information about a given metric. For details on how a metric was calculated, see the linked methodology below each visualization.

## Progress Toward SB 375 GHG Emission Reduction Targets

Changes in transportation, land use, and housing are essential to meeting the State's climate and equity goals. Despite

California’s aggressive work on vehicle technology, advancing vehicle electrification alone will not be enough to get to carbon neutrality.

CARB estimated passenger vehicle miles traveled (VMT) and associated GHG emissions compared to each MPO’s regional GHG emission reduction targets (which are set relative to a 2005 baseline). This comparison shows that California is not on track to reduce GHG emissions from personal vehicle travel under SB 375. Actual per capita GHG emissions and VMT continue to increase throughout the state. However, per capita VMT and GHG increases have slowed down since 2017.

## Shifting Travel Patterns

Transportation and land use development can reduce GHG emissions by making it easier for people to get around on foot, by bike, or by transit. Travel indicators such as vehicle ownership, transit ridership, commute mode share, and commute time paint a picture of how transit, carpooling, and active transportation usage have changed relative to driving. In general, Californians continue to drive alone more and carpool less to work. Household vehicle ownership is growing, transit ridership is falling, and the small percentage of people that walk or bike to work is declining.

Methodology (Appendix A)

## Sustainable Regional Growth

One way to reduce the need to drive long distances is to build homes, jobs, and other key destinations closer together. CARB examined changes in land use to assess whether development patterns were becoming more compact. This included evaluating changes in three types of land use: developed acres, agricultural acres, and conserved acres. Developed acres are areas that have been converted from other uses to urban land. Agricultural acres lost are areas that have been converted from agriculture to other uses. Conserved acres are areas that are protected from development of any kind. All three of these indicators vary by region, as illustrated in the maps below.

*DRAFT - DO NOT CITE*

Methodology (Appendix A )

## Accessible Communities

When people live near shops, schools, parks, and transit, they can meet many of their daily needs without having to drive long distances. They may even be able to walk, bike, or ride a bus to their destination.

For each region, CARB evaluated the percentage of the population that lived within a 15-minute walk to four key destination types: park/open space, educational facilities, transit stops, and grocery stores. Unfortunately, most residents in California lack good accessibility to key destinations: less than half of the population in every region can access all four destination types by walking.

Methodology (Appendix A)

## A Growing Housing Market

Housing development is an essential component for achieving SB 375 goals. For example, housing policies that promote multi-family units and equitable development can improve transit accessibility and help reduce trip length.

CARB compared permitted new housing construction to each region's housing need by income group as defined by the State Regional Housing Needs Allocation (RHNA) 5th planning cycle. Housing permitting and constructions were significantly behind regional housing allocations, especially for low-income housing.

CARB also analyzed the growth rate in single-family and multi-family housing units. The state continues to build more single-family housing than multi-family housing. However, since 2013 the growth rate of new housing has started to rebound, and the share of multi-family housing units has outpaced the percentage of single-family housing units.

Housing costs can be a substantial financial burden to predominantly low-income households. CARB analyzed the percentage of households that are overburdened by housing costs (defined as households that spend more than 35% of their income on housing). The percentage of overburdened households increased from 2010 to 2014 and slowly decreased in recent years.

Methodology (Appendix A)

Funding and Delivering Travel Choices

Funding for SCS projects comes from local, regional, state, and federal funding programs. Planned financing can explain whether a region is implementing projects and programs that reduce VMT and GHG emissions.

The charts below illustrate planned spending by mode in each region according to the MPOs most recent Regional Transportation Plan (RTP). RTPs typically cover a period of two or three decades and must cover at least 20 years. MPOs have discretionary authority over only a portion of the funds in RTPs, and that portion differs by region. Local governments, County Transportation Commissions, and transit agencies are examples of authorities with decision-making power over funds in the RTPs. Certain funding sources also have constraints attached.

With a few notable exceptions, most regions have more spending dedicated to roads than transit or active travel. Many regions continue to include significant funding for road expansion.

**Re: Support creation of Ponto Park – a needed park for South Carlsbad**

Dear Mayor Hall,

The Trust for Public Land (TPL) is strongly supporting the efforts of ‘People for Ponto’ and thousands of Carlsbad residents to build Ponto Park in the 11-acre coastal parcel known as ‘Planning Area F’ in South Carlsbad. For over 40-years TPL has been designing and building parks in California and although we have world-class parks and beaches, the fact remains 3.2 million Californians don’t have access to a park, and some of those Californians are residents of South Carlsbad. While the National Recreation and Park Association calls for 10-acres of park lands per 1000 residents as standard metric for healthy and vibrant cities, Carlsbad has a comparatively and relatively low park standard of only 3-acres/1,000 population and no requirement to provide accessible parks within walking distance.

And according to our own Trust for Public Land 2020-21 ‘City Parkscore’, Carlsbad is also below national averages both providing park land acreage and in providing residents a park within a 10-minute walk.

The City of Carlsbad’s Park Master Plan on pages 86-89 documents park service and park equity/inequity. Carlsbad’s Park Master Plan documents that Ponto area has no park and all of South Carlsbad (over 61% of the entire city population) has no Coastal Park while . Carlsbad provides 10 City Coastal Parks (totaling over 35-acres) in North Carlsbad, while South Carlsbad has no coastal parks to serve the 64,000 residents, many of which are children. Ponto Park at 11-acre Planning Area F is the last remaining reasonable bit of vacant and currently unplanned Coastal land to provide a Coastal Park for South Carlsbad. Ponto Park would also be in the middle of a 6-mile long section of North San Diego County coastline without Coastal Park, and would help address a regional need for a Coastal Park for these 6-miles of coastline.

The CA Coastal Act has numerous policies that support the creation of Ponto Park and Coastal Recreation land use. The City of Carlsbad’s history of following these CA Coastal Act polies now and over the past 40-years in its Local Coastal Program should be considered now in the City’s proposed Local Coastal Program Amendment. Over the past 40-years Carlsbad and California residents have forever

lost numerous opportunities to create vital Coastal Parks and Coastal Recreation for our growing population.

In addition to the clear need for coastal parks in South Carlsbad, the citizens are overwhelmingly supporting the creation of Ponto Park in Planning area F. As you know during the past 2-years during the City Budget and Local Coastal Program Amendment processes, residents strongly demonstrated their desire that the City Council purchase and build Ponto Park. In 2019, 2020 and 2021 over 90% of citizen input expressed need was for Ponto Park, along with extensive verbal and written citizen testimony.

As COVID-19 vividly pointed out, parks are not an amenity, but a key component to human physical and mental health. Parks also provide environmental benefits and contribute to cleaner air and water, climate adaptation and social cohesion. TPL think you have a great opportunity to address equity and access to park space and improving the lives of thousands of Carlsbad residents and strongly urge you to support the building of Ponto Park for families and community.

Sincerely,

Rico Mastrodonato  
Government Relations Director

**Subject:** pickleball courts/poinsetta/lack of!

dear management of carlsbad.i'm sure you're tired of hearing about the lack of available pickleball courts at poinsetta park.lets review the situation...there are 6 courts: 2 for very good players and 4 for the rest of us.on most days it can take a 45 minute wait to play a 10 minute game.people are waiting inappropriate amounts of time.meanwhile on most days there are many tennis courts sitting empty.so what I envision is pickleball players will take it upon themselves and take over some tennis courts with their portable nets and removable tape.then when the tennis players show up...there will be a confrontation,the police will be called,the newspapers will get a story, give us some options.so why not avoid this potential problem. when is a rich city like carlsbad going to acquire some more land and develop more pickleball courts??.why do i have to wait 45 minutes to play a game of pickleball or drive 1/2 hr to bobby riggs to play there .??why is carlsbad,a very rich city unable to create more pickleball courts for a rapidly growing sport??.come on ...what is the answer??john houston 2953 avenida valera,carlsbad([jbuster1951@aol.com](mailto:jbuster1951@aol.com))

**Subject:** Public input to next Carlsbad Council & Parks Commission meetings on Growth Management Plan & Park Master Plan Updates; and Carlsbad Local Coastal Program Amendment and State Park Planning

**Importance:** High

Dear Carlsbad City Council, Parks and Planning Commissions, & CA Coastal Commission and State Parks:

Please read, discuss and consider this public input of 5 requests and 20 facts that support and justify the requests at each of your respective meetings on the Growth Management Plan & Park Master Plan Updates; and Carlsbad Local Coastal Program Amendment.

Since 2017 People for Ponto Carlsbad Citizens have provided documented facts and over 5,500 citizen petitions requesting: **Carlsbad's City Council and/or CA Coastal Commission (CCC) honestly look at the facts and provide a much needed Ponto Park.**

**The over 5,500 petitions from Carlsbad citizens and other People for Ponto are still asking the Carlsbad City Council and Commissions; and/or State of California to:**

- Provide a 6-7 acre Ponto Park to for the minimal neighborhood needs of Ponto's population.
- Provide more Ponto Park acreage for the Coastal recreation (i.e. Public Park) needs for South Carlsbad (64,000 people & 62% of City) per Carlsbad Local Coastal Program & CA Coastal Act
- Ponto Park must be wide, flat and fully useable. A multi-use grassed area to allow kids/families space to informally play/picnic at the coast is what is needed. No thin/leftover strips along PCH.
- Replace the 32+ acres of Coastal Open Space (State beach/campground) to be lost from sea level rise in the next 70-years by allowing the Campground (Carlsbad's only Low-cost Visitor Accommodations) to move inland, allow bluff erosion and beach sand to preserve the beach.
- Use the People for Ponto Citizens plan to help replace Ponto's missing 30 acres of Useable Open Space, and fund Ponto Park while at the same time saving tax-payers tens of millions of dollars.

**20 key facts documented by over 65 official Carlsbad Public Records Requests:**

1. A 12.8 acre Commercial Recreation land use (Useable Growth Management Open Space) was planned at Ponto (BLEP MP/LCP) in mid-1980s. In early 1990s developers, City, and CA Coastal Commission (CCC) replaced it with a 11.1 acre Planning Area F "Non-Residential Reserve" land use that requires the City to consider/document the need for Coastal Recreation (i.e. Public Park) and/or the State Campground Low-Cost Visitor Accommodations (L-CVA) at Ponto.

2. Developers and City in the late-1990s Ponto Vision Plan tried to change Planning Area F to high-density residential. In 2010 the CCC rejected this Local Coastal Program Amendment because the City failed to comply with the Ponto Planning Area F regulations – consider a Public Park, et. al.
3. The CCC informed the City in 2016/2017 that the City’s proposed Ponto and Planning Area F land use changes may not be approved based on the need for “Coastal Recreation (i.e. Public Park) and/or L-CVA land uses”. The CCC will soon act on the land use for Planning Area F and City’s Draft LCPA.
4. The City never considered Sea Level Rise impacts on providing Coastal Recreation, and impacting existing Low-Cost Visitor Accommodation land use in the City’s Ponto Vision Plan, current 2015-2017 proposed General Plan and Draft LCPA. Only in 2017 and 2020 did the City conduct Sea Level Rise Impact Assessments that show the eventual loss of 32 acres of beach and L-CVA (Campground) land use within 70 years. In 2023 State Parks started to consider Sea Level Rise Impacts. Due the Campground’s road configuration sea level rise and erosion will eliminate the Campground use (Carlsbad’s only L-CVA) by 2100. Current demand at the Campground and for L-CVA is very high, and will only grow in the future. A clear and funded plan to move the Campground inland and increase the number of campsites is needed and logical.
5. Most of Carlsbad’s Visitor Accommodations and hotel taxes are in South Carlsbad; yet they have no Coastal Park in South Carlsbad. South Carlsbad Visitor industry has supported Ponto Park.
6. Carlsbad’s ONLY Low-Cost Visitor Accommodations (Campground) are in South Carlsbad. There’s no grassy Day-Use Park at the Campground, or in Coastal South Carlsbad.
7. Since 2012 there has been a 6.5 acre Park deficit in the SW Quadrant area that includes Ponto. That deficit has since grown to around 7 acres based on development approvals. The City GM Park Standard requires Parks to be provided concurrent with development and within the Quadrant where Park demand is created. This Standard has not been, and still is not being complied with.
8. CA Coastal Act Policy also supports equitable distribution land uses such as high-priority Public Park uses. Carlsbad provides 37 Park acres within 10 Coastal Parks in/for North Carlsbad (38% of the City) and 0 (zero) Park acres within 0 (zero) Coastal Parks in/for South Carlsbad (62% of the City).
9. The City’s 2015 Park Master Plan maps Park locations and Park service areas. It provides City Park Master Plan Policy and documents that the Ponto area and much of the SW Quadrant is ‘unserved by Parks’, and that ‘unserved areas’ should be locations to provide future City Parks (pp 86-88).
10. The Trust for Public Land’s ParkServe data documents Carlsbad is the worst Coastal city in providing 10-minute walk access to Parks in Southern CA. Carlsbad is the worst of 29 cities from Santa Barbara to Imperial Beach that includes over 250 miles of So. CA coastline and 5 million residents in providing Parks with a 10-minute walk. The Trust for Public Land supports a Ponto Park.
11. Carlsbad has one park per 2,797 residents and 2.95 acres of Park land per 1,000 residents. National Recreation and Park Association (NRPA) data show that nationally Carlsbad is 20% below what is typical in providing the number of parks, and Carlsbad is 72% below what is typical in providing the amount of Park acres. The Trust for Public Land data base shows that Carlsbad’s total Park land acers (including counting State Park land acres) is 26% below the Median for the TPL’s 100 ParkScore® cities, and 7% below the Median for the 14,000 cities and towns in the TPL ParkServe® database of USA cities.
12. Encinitas and Oceanside require/provide 5 acres of Park per 1,000 population that is 67% more than Carlsbad requires/provides (only 3 acre/1,000). Encinitas and Oceanside also plan/require their Parks to be within a 10-minute walk to their citizens and families.
13. In just 8-years Carlsbad loses 20.6 acres of Free Parkland or \$20.6 million in Free Park-in-lieu-fees by not using a 5 acres per 1,000 population Parkland dedication Standard for just the new development in the year 2021-29 Housing Element. Every 8-year Housing Element will add more population in high-density developments and the more Free Parkland or Free Park-in-lieu-fees Carlsbad loses by not increasing the Parkland dedication Standard to 5 are per 1,000 population.
14. Ponto is in the center of a 6-mile length San Diego County coastline (8% of the County’s coast) without a significant Coastal Park west of the rail/I-5 corridors. Inland of these 6-miles are likely over 100,000 Carlsbad and San Diego County residents and visitors that do not have a Coastal Park.
15. Ponto has the last remaining vacant land (Planning Areas F, G, & H) suitable for a viable Coastal Park in this 6-mile length of coast. The cost to buy these vacant lands saves tax-payers tens of millions of dollars. 11.1 acre Planning Area F recently sold for under \$8 million or about \$ 720,000 per acre. 15 acre Planning Area G & H is listed for \$38

million or about \$2.5 million per acre. The City's 2001 URS and ERA Studies identified 3 South Carlsbad "Surplus Areas" totaling about 15 existing acres of narrow/constrained developed infrastructure land south of Island Way that could be converted to other uses. The City said the cost to do that would be \$65 to \$80 million, or \$ 4.3 to \$5.3 million per existing acre of narrow land, and the City's 2001 ERA Study said funding was problematic.

16. Past Carlsbad Councils Falsely "exempted" Ponto developers from providing the 15% Unconstrained & Useable Growth Management Open Space other developers were required to provide. City data/maps confirm this. Ponto needs 30 more acres of Unconstrained/Useable Open Space to meet the Standard. The False "Exemption" is why Ponto is already developed at 40% higher density than the rest of Carlsbad.
17. People for Ponto Citizens continue to try to work with multiple Ponto land owners to affect a land swap with the city, similar to the successful Poinsettia 61/Buena Vista Reservoir Park solution. The City has Surplus Sites it is working on disposing to land-swap with Ponto land owners. A win-win- win solution is possible if City Council would take lead of the opportunity.
18. Ponto Park 501c3 can help the City or State Parks in acquiring donations /funding for Ponto Park.
19. People for Ponto Carlsbad Citizens provided the New Mayor and Council with "6 Growth Management Issues and Suggestions" summarizing logical, doable, cost-effective, sustainable, and collaborative solutions to address these facts.
20. People for Ponto Carlsbad are here to help the New Mayor & Council succeed for Carlsbad's future.

Thank you for reading and considering these facts, and taking affirmative action to fulfill these citizen desires to provide the best and most tax-payer efficient Coastal Park at Ponto on the last reasonable sized/dimensioned vacant land left for 6-miles of San Diego County Coastline missing a Coastal Park. Buying vacant Ponto land for a much needed Ponto Coastal Park is rational, justified by the data, saves taxpayers tens of millions of tax-dollars, and will be forever remembered by future generations as wise action by you as decision makers in this once and only opportunity.

You have one last chance to be remembered now and in history as wise or foolish. Please be wise and recognize your place in history.

Thank you,  
Lance Schulte

# City of Carlsbad California

**Reply-To:** [info@ourcitysc.com](mailto:info@ourcitysc.com)

Attention City SC Carlsbad Members:

Please help us in communicating the need for additional field space by attending one of these two Parks and Recreation workshops tomorrow night or Saturday. Our voices need to be heard to address overcrowding, poor field conditions, safety at Pine Ave Park, late practice times for young children, new school start times that will exacerbate these issues, housing growth that hasn't generated the supporting infrastructure, etc.

Youth sports within our city is at an all time high. Our partners in football, baseball, softball, lacrosse, rugby, adult sports leagues and other soccer clubs that serve this city are feeling the pinch too. Please help Parks and Recreation understand that the youth of Carlsbad are underserved. For those competitive parents seeking to fulfill their volunteer hours, here is the perfect chance.

If you would like additional information or want to discuss our talking points, please call me.  
I hope to see you there.

All the best-

**Jim Barnhill**  
VP Recreational Soccer

## Community Invited to Provide Input on Future of City's Parks and Recreation Offerings

As the City of Carlsbad kicks off a process to update its Parks & Recreation Department Master plan, community members are invited to share their ideas at one of two upcoming workshops this week.

Thursday, Feb. 20, 6 to 8 p.m.  
Alga Norte Community Park  
6565 Alicante Road

Saturday, Feb. 22, 10 a.m. to noon  
Pine Avenue Community Center  
3209 Harding Street

The city's Parks & Recreation Department Master Plan update is a blueprint that will guide priority investments in parks and recreation facilities and services for the next five years. The city's previous parks and recreation master plan was completed in 2015. The update will cover:

- Assessment of current parks, facilities and recreational programs
- Demographic and industry trends

- Community needs and priorities
- Funding needs and revenue opportunities
- A five year action plan

In addition to the February workshops, the process will include online and mailed surveys, interviews with community members and other outreach.

**Comments** I am hoping for the sake of our kids' health that there are plans to replace the rubber crumb fill on the fields with coconut or cork fiber. The rubber gives off fumes in the heat and ends up in our kids' eyes and noses and down their shorts. The City of LA has banned the rubber crumb during the unknown long term effects on health. We can do the same. Thank you!

**Comments** I would like the plan to include upgrades to street landscapes that are under control of Parks. An example is improvement to the landscaping of the Village - potted plants, benches, trash cans, etc. Together with Public Works and Public Arts the streetscapes could be very special and make a positive statement. Also, please include in the plan - to work with Public Arts to turn the trunks of diseased/old tree into pieces of art. Additionally, freeway off ramp landscape improvements should be added to the plan - work with Cal Trans. Thank you

I would like to request that 5G small cell towers not be placed within or near any of our Carlsbad parks. This is a new technology that emits millimeter-wavelength microwave energy from small cell towers (or larger pole-mounted units) positioned in an array. These towers will generate a higher energy density around them than from the previous 1 - 4G technologies. The safety of this new 5G technology has not been proven by long term toxicology or epidemiological studies in either animals or humans. The biological effects of 5G radiation are unknown and may jeopardize the health of those exposed to them, especially children. Implementing 5G technology before investigating its effects on human health makes us lab rats in an unnecessary experiment. Please protect the health of our children by preventing the placement of 5G small cell towers (and larger towers) within or near parks.

Dear City of Carlsbad Parks and Recreation Department,  
Just a preface to my remarks: We LOVE the Alga Norte Aquatic Center!! My husband and I swim there usually six mornings a week. It is an amazing facility. I was a swim instructor at Alga Norte when the facility first opened six years ago. We have been disappointed, though, with some of the maintenance that DOESN'T happen. The spa was out of order for probably seven months and seems to have ongoing problems. The other problem is the card readers. They don't work. They haven't worked in MONTHS!! This causes a back up in the morning when the swimmers first arrive. Instead of having the outside reader, the inside reader and an employee checking the card, everyone has to wait in line for the slow check in process. If this was a privately owned facility with paying members, these scanners would have been fixed within a week or within days. It is unacceptable that these card readers have been broken for months. We don't think it's an unreasonable request to expect that the repairs get done now. I attended the February 20th meeting at Alga Norte and was able to express my concerns after the meeting. Please consider this request as I know I'm not alone in wanting this problem to be taken care of! Thank you so much, Debbie Tanner

**Subject:** Fwd: Poinsettia Park

Kyle,

I'm forwarding to you correspondence I've had with Mick Colarco and Mike Pacheco regarding Poinsettia Park... the tennis courts in particular. I haven't heard anything from Mike about a meeting but I want to make sure you are aware of the background. I would appreciate a meeting to discuss the issues before recommendations go to the council.

In brief, both the tennis courts and pickleball courts are well used, particularly during the mornings, late afternoons and weekends. According to the consultant and the results of the 2015 master plan, Carlsbad is short on needed tennis facilities. The best solution for additional pickleball courts is not converting existing tennis courts but rather in planning for future parks [Veterans Memorial and/or Robertson Ranch]. Facilities there could allow for expansion should the need be demonstrated.

I look forward to meeting with you,

Doren Curtiss

**To:** Mick Calarco <[Mick.Calarco@carlsbadca.gov](mailto:Mick.Calarco@carlsbadca.gov)>

Hello Mick,

Thanks for the reply. Mike and I have been trading answer machine messages. Hopefully we can set up something for next week. I heard that it was recognized that the restrooms disappeared when the 11th tennis court was dropped and that parking on the upper level is now not sufficient. I'm interested to see how those changes are being planned. There is hazard on the ingress/exit road that should also be addressed.

I'm also concerned about the future of the tennis courts. We've been through the "converting tennis courts" before and I hope we don't have to repeat that exercise. If you look back at the 2015 final plan you'll see that at that point of time we had the right number of courts and it forecasted we'd be 3 courts

short by 2018 if no more were built. If the error in the inventory of courts is corrected, the shortage of courts is now 5 or more.

I don't doubt that the 6 pickle ball courts at Poinsettia are crowded. Shoehorning them into Poinsettia was maybe not the best choice and has complicated planning for that area of the park. There have to be better alternatives for increasing the number of courts.

Hope to see you next week,

Doren

**Comments** I would love to see a new community garden in South Carlsbad. We need a lot to grow vegetables/ fruits. The wait in the other gardens is very long, If I just wait I won't have a chance to garden with my 3 daughters while they are still home. Gardening in a small condo with many HOA restrictions is extremely difficult. It is important to teach this valuable skill to the rising generation and to complement our food with a garden. It is necessary to become more self sufficient and to work together. If a new garden is opened, please give first choice to condo and apartment families that have no back yard. I love living in this beautiful city. Thank you for the amazing job keeping it safe and beautiful.

**Subject:** garden space needed

Hello,

My family is new to Carlsbad and we live near the two community gardens in Old Carlsbad. I was excited to sign up for a plot, but then disappointed to hear how long it may take to get one. I know that you are in the midst of a new master plan and I wanted to urge you to add a new community garden space. Now more than ever sustainability is crucial. Gardening is also good for physical and mental health and children's development.

I'm sure you may have heard from others who feel the same since there are over 200 on the waiting list. I know it may be late in the planning process, but I hope you will consider adding a garden to the plan. It would mean so much to those of us who want to join in.

Thanks for your time and feel free to contact me, Sharon McKeeman

Hi Kyle, you've done a wonderful job since taking over the Carlsbad parks. Poinsettia Park in particular is a wonderful Park. Probably the best tennis courts of all San Diego. I heard a rumor that pickleball might be taking over two of the tennis courts on top. I plead with you not to let this happen, if it's even true. Please keep the tennis courts as they are. There is already plenty of people waiting every day for tennis everyday between the hours of 3 p.m. and 7 p.m. EVERY DAY!! Taking away any tennis courts/or converting them would add further wait times and go against what you guys have done so wonderfully at poinsettia Park. Please help keep the tennis courts intact!!

**Subject:** Pickleball courts

There is a big push for players who play at poinsettia Park to get involved with your webinars, hopefully the city will be able to vet the participants and only allow residents of Carlsbad to be involved. I mentioned to council member Keith Blackburn that parking meters be installed at the parks and residents of Carlsbad wouldn't have to pay to park. Are parks and facilities should be a benefit to residents, currently most residents have to wait to play while outsiders hold the courts.

A couple things we need shade over the sitting area. The challenge courts should also have a 2 game max, we get professional players who team up and hold the court for hours.

**Subject:** Getting Feedback for Senior Center

Hi Mick,

Most seniors are able to attend Zoom meetings or are on Facebook or some social media and there are seniors who prefer talking in person and hearing what is going on? Could you have an event in the park near Pine Ave. community center and senior center to gather opinions and have staff ask questions? Or perhaps, the downtown merchants would like to have seniors come to the downtown shopping areas to get discounts on merchandise and fill out a card on what they want or find needs to be improved at the Center since Mark Olson and M. Hamer have been "running" the Senior Center?

Thanks,

Mary Lucid

As a Carlsbad resident, and pretty active person, I love outdoor activities! I play tennis, swim, hike, rock climb, surf, and mountain bike. I have access to pretty much all of these areas, except good mountain biking. Getting an excellent bike park similar to Sapwi Bike Park in Los Angeles would be great! The current parks, such as the Greg Cox park, Sweetwater, and Velocity pump track, are all subpar. There needs to be a bike park built by bikers where everyone will have fun! A beginner track for users to learn, an intermediate track where riders can progress, and a truly advanced track that weeds out the less experienced riders and provides advanced riders the ability to push their limits. Though the advanced track may have higher consequence features, I believe this is safer since it means advanced riders won't be interfering with less experienced riders. Currently, I see a lot of issues with fast riders catching up to slower riders. Even though crashes don't occur, I view this as a safety hazard. Giving advanced users their own track will reduce potential collisions.

**Subject:** Pickleball

Dear Mick,

I am very concerned and disappointed with the initial approach being taken by PROS Consulting in assessing the future parks and recreation needs in our city. In 2013 this same group was hired to assist and advise the city in identifying and planning for then current and future recreational needs.

At that time, the sport of pickleball was the fastest growing sport in America. Even so, PROS, for the most part, appeared unaware of or chose to ignore this fact. Their initial assessment of possible future needs in Carlsbad did not even mention this sport. It was not until members of the Carlsbad pickleball community questioned this omission did the matter come to the attention of PROS. As the result of the resolve of pickleball players within the community, not PROS, that pickleball was finally acknowledged and became part of the city survey and subsequent recommendations.

Very recently, it seems the current approach of PROS is a rerun of their efforts in 2013. Again, on December 9 and December 11, 2021 during the Master Plan Workshop, "Pickleball" was nowhere to be seen. This is the case in the "General Sports MPI" bar chart. Pickleball is not shown in the slide asking citizens to "Choose The Top 3 New Facilities/Amenities You Want The City To Provide."

Given the significance of this sport, it's rate of growth, PROS previous experience regarding Pickleball in their last engagement in Carlsbad and the under representation of outdoor Pickleball facilities in Carlsbad, it appears PROS is out of touch or has no record of the February 18, 2020 meeting they conducted at Alga Norte Park, with more than 70 Pickleball players in attendance. At that meeting, PROS Consulting showed this exact same "General Sports MPI" slide. When many attendees complained that Pickleball was not listed on any of their slides, PROS Consulting said "We hear you, we will add Pickleball to the slide deck" obviously they did not.

One would think that any professional consulting group would review past files on a "repeat client" to ensure that the Project Manager on the engagement is familiar with the history of the engagement(s). How can Pros Consulting present a 2022 statically correct report to the city when Pickleball is not specifically addressed on any of the data gathering media or presentation material?

By this letter I am requesting that PROS make the necessary updates to their material(s) regarding Pickleball that reflects the status of this sport and the needs in Carlsbad to address the serious lack of outdoor Pickleball Facilities.

"Is the city of Carlsbad Parks and Recreation going to send out a questionnaire/survey to the general public without Pickleball being listed?"

"Is the city of Carlsbad Parks and Recreation going to present and or send to the city council of Carlsbad a statistically correct survey that didn't include pickleball?"

Should you have any questions or need any additional information please contact me by e-mail or telephone 760-717-2286

Douglas Gore

**Subject:** Carlsbad parks and play structures

Hello,

I am reaching out after just completing the community survey regarding our city parks and recreational services. Thank you for your part in asking for input.

The topic of play structures in our city is one I've been grappling with for some time. I find that other cities have made significant progress in building innovative playgrounds for a wide range of ages. However, I find our Carlsbad structures lacking.

We have grandchildren in the Midwest who have access to gorgeous parks in their hometowns and in nearby communities. On a scale of 1-10 these parks are 10+ while ours might be a 2 or 3. As the special projects director, I'm sure you have goals to upscale our parks for our kids and their future kids. Although we have beautiful beaches, parks are year round venues for family fun and getting fresh air and exercise. We all know the stress these last few months have added to our lives. Why not set higher goals for our parks as a means to relieve stress?

I'm reaching out not to complain but to offer insight to what is available in other states. Our daughter created an entire Instagram account just to inform other families of each of the parks in her Missouri community. It made me realize how deeply lacking we are here in So Cal. And to think their parks are uninhabitable several months each year due to weather. And yet, their parks and aquatics centers are ten fold what ours are.

I am a retired elementary school principal so have knowledge of legal and practical limitations regarding playgrounds. I believe I could be helpful in supporting selections for future playgrounds should you desire additional community input. In the meantime, we will continue to take our three year old granddaughter to Agua Norte Park even though we live within walking distance to Holiday Park. I know the city has the money to provide excellent parks for all neighborhoods and look forward to seeing the master plan as it evolves.

Kindly,

Lynda McDonell

**Comments** Would like to inquire on why Carlsbad doesn't have a disc golf course? This sport is growing rapidly and all cities with the exception of Carlsbad and Encinitas have courses. Oceanside, San Marcos, vista and Escondido all have courses. There are a lot of open space the city has that is not being fully utilized that would be great for a course! Under the transmission line off of chestnut, hosp grove, the veterans park off of cannon, not to mention existing gold courses that could easily add disc golf. I am a city of Carlsbad resident. Thanks!

Hello, I've lived in the San Diego region for 8+ years now, 6 of which were in Carlsbad. I am a disc golf enthusiast and am writing here in hopes that the city will consider investing in this booming sport. Disc golf is easy to learn, inexpensive, brings people together, and gets people outside and moving. The only difficult part about the sport is finding land and installing disc golf baskets, especially in SD county where land is at a premium. However, the county as a whole and Carlsbad are in desperate need of a disc golf course in my opinion. It would help tourism as well as physical and mental health of residents. Please consider installing a course in the city. The sport is seeing rapid growth and the region has a desperate demand for more disc golf. Thank you for your consideration.

Hi! I'm an avid Disc Golfer in Oceanside that would LOVE to see Carlsbad become apart of the rapidly growing number of cities that have added a disc golf course into their repertoire of outdoor activities. Vista, Oceanside, Escondido and plenty more have with the help of local disc golf groups and companies installed courses at parks like Kit Carson and Brengle Terrace that have added to the foot traffic and interest in the city through the thousands of Southern California disc golfers that have come to enjoy the property. I would suggest reaching out to Innova Discs or on the smaller scale Matt at the SDSF Pro Shop at Kit Carson for information on how they suggest the most cost effective and appropriate approach would be going forward. I hope these comments help to build a lasting tradition of Disc Golf in the beautiful city of Carlsbad!

**Subject:** Padel Courts

Hello! Thank you for asking for community input for the South Carlsbad Coastline Project. I feel so lucky to live in Carlsbad where community voices matter and so much thought is put into developments.

I was wondering if there were any plans for installing Padel Courts in Carlsbad? There are currently 3 courts at the Barnes Tennis Center which is a far drive from Carlsbad. I think it is a great sport that the whole Carlsbad community would enjoy. Another great option to offer the community in addition to pickle ball and tennis.

Please let me know if there are plans for padel in the near future. Many thanks for your time!

I'm a member of the board of the San Diego District Tennis Association, as well as Youth Tennis San Diego, and the manager of Wheelchair Tennis San Diego. Over the years, and especially recently, we've run into a lot of issues with Pickleball. In fact, approximately 5 years ago, a group of Pickleball players attempted to have courts at Laguna Rivera converted to Pickleball - claiming that they were grossly underused. This, of course, was untrue. Similar things have taken place within the greater San Diego region recently. I want to ensure that Tennis does not become a victim of the dishonesty of some Pickleball Groups. On another note, I wanted to also point out that any assertion of the tennis courts from the High School being included in the numbers is unfair. The courts at the High School require players to climb stairs to access outside of school hours. This renders them unavailable for wheelchair players, and thus, IMO, should not be considered in any such count.

Hello,

Aviara Park often has several soccer camps throughout the seasons and sometimes LaCrosse, and one area for baseball.

BUT there is no area designed for Youth Football. Whoever made the decision to allow the largest number of attendees we've ever seen crowded into the all areas of the park, also hopefully attended and realized they made a mistake.

By mistake I am not sure of the numbers allowed at the site at any given time, nor do we have bleachers to hold crowds like Poinsettia Park. There was a constant barrage of drivers looking for places to park, a heavy flow of attendees that resulted in congestion, irritated drivers, and two dead squirrels on the road that had played in that area for years. There had to be thousands in and out throughout the event that ran into the evening. There were kids in uniforms practicing everywhere. Heavy cleats running on the turf, but also newly planted grass areas.

Maybe the city government should develop fields for football and bleachers for Youth Football, as I'm not sure if the local high schools would let these groups on their fields. But the intense, large number of people really need to be serviced in a much larger setting appropriate for that sport.

\*Did anyone on your staff monitor the use of the field on July 22nd?

Do you get rent from this group, and will it cover the maintenance and turf replacement?

Sandy Bartels

Hi, Sara!

Thanks for your message. My name is Mick Calarco, I am the recreation services manager with the City of Carlsbad Parks & Recreation Department.

Good news! There is a community garden coming [relatively] soon to Stagecoach Community Park. We expect planning and construction to take approximately two years to complete. Although the city doesn't utilize volunteers for planning or construction, in the meantime, you may volunteer with the [Carlsbad Community Gardens Collaborative](#) if you'd like to get involved.

Todd Reese (copied herein) is the Parks Services Manager, and he or a member of his parks maintenance/parks planning team will be happy to answer any questions you may have.

Best,

Mick

**Subject:** Carlsbad Senior Services

Right now the only classes and events for seniors in Carlsbad are held in the village of Carlsbad.

Since most of the Carlsbad Senior population lives south and east of the village, it's my concern that, as a senior myself, and others I know here in LaCosta, we are at a disadvantage in attending these events due to distance and traffic issues.

I live 3 miles from the Encinitas Community Center on Balour, which I cannot attend as a LaCosta resident.

When will planning for the rest of Carlsbad, especially South Carlsbad and LaCosta, include some Senior activities locally?

I look forward to hearing from you and any ideas you may have for me to collaborate and/or volunteer to develop plans and goals for more senior activities here locally.

**Subject:** Disc Golf for Carlsbad  
**Attachments:** Disc Golf Growth Report.pdf

Hi Mick-

Thanks for sending out an e-mail regarding the status of the Parks & Recreation Master Plan. You, your team and consultants have done a thorough job creating this plan.

I wish Disc Golf would be mentioned more in the plan.

I have attached a 2021 Disc Golf Growth Report. There are some great statistics that may surprise you within the report. My hope is that Carlsbad would consider Disc Golf a little more seriously.

Recently, me and a group of about 25 players from San Diego County created a "temporary course" one day at a very unused section (East side) of East Hosp Grove Park. The layout we created was incredible. If we were allowed to create a permanent course there, it would be unlike any other course in Southern California because of the trees and terrain. I think it is a unique opportunity to create something amazing.

Disc Golf offers many advantages verses traditional ball golf for a community:

- easier to learn
- faster to play a round
- same pressure and adrenaline
- serves entire community, young/old, m/f, all socio-economic demographics
- less expensive (about 5% of the cost of ball golf-rounds are free and equipment is not a big investment)

I would love to set up a time where we could discuss Disc Golf for Carlsbad further.

Thanks for your time.

Sincerely,

Ron Krippner  
3195 Falcon Drive

**Subject:** Comment on agenda item #1. REPORT ON DATA COMPILED FOR THE PARKS & RECREATION MASTER PLAN UPDATE

Hello

I am happy to see that the city is interested in updating the parks and recreation Master plan after the long COVID break. I think a lot has changed in that time frame. Carlsbad has approached it's Parks and recreation from a very conservative and traditional perspective. The city relies heavily on its beach access and it's traditional development of parks to include baseball diamonds, soccer fields, and play structures. These access points and recreational developments are amazing and world class but I would like to see the city move towards an all-encompassing outdoor lifestyle approach. Carlsbad has near perfect weather and I would love to see the city capitalize on this with hiking trails, biking trails, and an adventure approach towards accessing all of the nooks and crannies of the city. I visit other cities that don't have half of the resources that Carlsbad has but I see the emphasis they put in on creating citywide trail systems and city parks that Foster adventure beyond soccer and baseball. From skate parks to bike parks to rock climbing and everything in between, these other cities have developed a culture that fosters our youth to explore all avenues of adventure and athleticism. Our beaches are amazing and our parks are great but the city of Carlsbad can do better and should look to what other cities have done like St George, Moab, Tahoe, Mammoth Lakes, Sedona, etc.

Thank you  
Joey Bradshaw

**Sent:** Sunday, April 2, 2023 6:47 PM  
**To:** Mick Calarco  
**Subject:** save the tennis courts!

Dear Mr. Calarco,

It has come to my attention that Carlsbad Parks & Recreation is considering a proposal to convert two Poinsettia Park tennis courts into pickleball courts. I have been playing tennis at these courts for years and it has become increasingly impossible to get on a court particularly at peak times and at other times as well. It is especially difficult when waiting for a court with children who don't have the patience to wait for an hour or more, not to mention that when the court finally opens up the children have lost interest or have to attend another commitment.

I have been informed that Parks & Recreation hired a consultant to monitor tennis court usage and determined that the courts are underutilized. However, they were apparently not aware that a group I play with (with 30+ tennis players) moved last year from Poinsettia Park to Carlsbad High School because of the difficulty in reserving courts at Poinsettia Park. It should also be mentioned that the last few months have seen much lower usage with the rainy weather. In addition, seasonal usage is very different, with summer visitors causing extended wait times. Finally, in my experience, the tennis courts are not underutilized and especially not during peak pickleball hours. As a player of both tennis and pickleball at Poinsettia Park, peak playing times for both overlap. So converting tennis courts to pickleball courts would only serve to increase the already extended wait times for tennis courts. It isn't equitable to reduce pickleball wait times at the expense of tennis wait times.

Please don't take away our precious tennis courts!

Sincerely,

Mary Kay Romero

**Sent:** Monday, April 3, 2023 11:34 PM  
**To:** Mick Calarco  
**Subject:** Re: proposal to convert two Poinsettia tennis courts into pickleball courts.

Dear Mick,

I am writing to express my concern about the potential loss of tennis courts to pickleball. As a tennis player in the Carlsbad community, I have enjoyed playing on the Poinsettia tennis courts and would be disappointed to see them converted to pickleball courts.

While I understand the growing popularity of pickleball and the need to accommodate the demand for the sport, I believe it's important to consider the impact on other recreational activities in the community. Tennis is a beloved sport with a strong following, and it would be a shame to see fewer opportunities for tennis players to enjoy the game.

I urge you to consider other options for accommodating the demand for pickleball, such as building new courts or converting other facilities. It's important to strike a balance between different recreational activities to ensure that everyone in the community has access to the sports and activities they enjoy.

Thank you for your attention to this matter.

Sincerely,

Victoria Krysova

**Subject:** Poinsettia tennis courts

Hello,

I'm a resident of Carlsbad, and I often use the tennis courts at Poinsettia Park. I recently heard that the city may be planning on converting some of the tennis courts to pickle ball courts. I am writing to voice my strong opinion against this.

I have nothing against Pickleball, except perhaps the noise, but we already have so few public tennis courts in the Poinsettia/aviara area, that it would be a huge shame to lose more of them. The poinsettia park tennis courts serve a very large area of Carlsbad, and as it stands, you often have to wait an hour or more to get a court.

I strongly hope that the City will not take away any of the existing tennis courts at Poinsettia Park.

Thank you,  
Amanda Clardy  
Aviara resident

**Subject:** Poinsettia Tennis Courts

Hello

The word on the street is Carlsbad City is considering converting two tennis courts at Poinsettia Park to pickle ball courts.

If this is actually true, I would like to ensure the decision makers are aware of my experience. I play both tennis and Pickleball and regardless of which I am going to play, I must arrive before either courts are opened or I will be waiting for availability.

I suggest that two tennis courts not be converted to pickleball and instead let commercial endeavors offer more pickleball courts if needed.

**To:** Mick Calarco  
**Subject:** Poinsettia Tennis Courts

Hi Mick!

I wanted to express my opinion on the proposal to convert two Poinsettia tennis courts into pickleball courts. Please do not do this. I live in the Seaside Heights community, just a couple of blocks away from the park and it was a big part of why we chose to raise our family here as we are a tennis family. We have three boys that enjoy walking/riding to the park. Since the park has added the pickleball courts and the dog park it has gotten a lot more crowded and has drawn a lot of people to our community and up the street into our neighborhood. We live on Bluebonnet Drive, just off Plum Tree Road that has just recently held a meeting with the city regarding the dangerous driving and lack of stopping at the stop sign on Plum Tree and Bluebonnet as people are flying down and into Poinsettia Park. I believe adding more pickleball courts will draw even more people to an already very crowded park and more traffic to an already dangerous road to our children on bikes, scooters, etc.

In addition to the increased traffic, it seems to me to be an unnecessary conversion. I've seen people play pickleball on a tennis court as it CAN be modified to do this. Many communities have a set up for pickleball to play on their tennis courts. Tennis on the other hand CAN NOT play on a pickleball court. This would eliminate the option for this sport on those courts. There is often a line to play as it is and taking away two courts would make this wait a lot longer. Tennis is a popular sport too and it's rare to have a court sitting empty.

Noise is also a concern. It is already very loud with the pickleball courts that are there. Because the sport is loud, the players are too. I'm sure neighbors that don't even play tennis would oppose this as well.

Please don't take away our courts. They are hard to come by and enjoyed by many. Please consider adding pickleball courts in another location... Zone 5? Alga Norte? etc. This would help decrease an already very crowded park and help to reduce some of the issues that have increased since adding the pickleball and dog park.

I appreciate you hearing me out and I will continue to follow up on this proposal. If you have any questions for me, please feel free to reach out.

Thank you!

**To:** Mick Calarco  
**Subject:** Tennis courts

Please reconsider converting our tennis courts into pickleball courts. I understand it's popular now but it is also less expensive to join a pickleball club than a tennis club. Having been a member of several tennis clubs over the past 40 years, I can no longer afford the dues and rely on public courts. There are always people waiting for our court. Pickleball moves much faster than tennis, and is a "drop in" game, so the wait is not as long! Tennis has been around much longer than pickleball, so what happens if the trend changes? It's a fun sport for those that don't move as well as they used to, but you need to think of the younger generation. I believe they prefer to hone their tennis skills

**Sent:** Monday, April 3, 2023 7:40 PM  
**To:** Mick Calarco  
**Subject:** Tennis Courts at Poinsettia Park

Dear Mr. Calarco,

It has come to my attention that Carlsbad Parks & Rec is considering converting two of the tennis courts at Poinsettia Park into pickleball courts. As an avid tennis player, but also a pickleball player, I would like to strongly protest this move.

I use the tennis courts regularly at Poinsettia and for the past 3 years (since the pandemic began) they have been full to capacity 90% of the time I've been there to play. I play socially with friends in the week, as well as with my family on the weekends. I'm there at various times of day, and the courts are incredibly well used, often to the point of people waiting at the top of the stairs to get onto a court as soon as one frees up.

While I understand that pickleball is a rapidly growing sport, and I encourage and support its growth, tennis players should not be put at a disadvantage by removing our playing space.

Having moved here 6 years ago, and also having lived all over the United States, I can honestly say we were hugely impressed by the Parks & Rec facilities in Carlsbad. City planning has been done well when we compare to other places we've lived. That being said, the better solution for pickleball would be to invest in developing new facilities as city parks continue to be renovated, planned and built (for instance in the new Veterans Memorial Park or in other parks that may be developed or remodeled in the future). It's clear the demand for pickleball is high in Carlsbad and beyond, but equally other towns should be picking up the slack and accommodating the demand. It would be unfair to take resources away from tennis players who are using the available space to capacity a large majority of the time.

I implore you to please come up with other alternatives. Don't take away our already limited free tennis space.

Kind regards,  
Christie Sweaney  
Carlsbad Resident since 2016

**From:** Claudio Garcia <claggarcia@hotmail.com>  
**Sent:** Monday, April 3, 2023 3:36 PM  
**To:** Mick Calarco  
**Subject:** My opposition to the planned tennis courts conversion at Poinsettia Park

To: City of Carlsbad Parks and Recreation Department,

It has come to my attention that the City of Carlsbad is considering to convert two tennis courts at Poinsettia Park to pickleball courts. As a longtime neighbor of the park and avid tennis player I would like to express my opposition to the project given the following:

- 1) Lately, I have experienced long lines at the tennis courts in the park at many times during the day and the situation got worse when the tennis courts hours were shortened due to the noise emanating from the pickleball courts which led to a complaint from many of my neighbors. More pickleball courts will increase the noise level which is already annoying and disturbing the peaceful neighborhood we used to live in.
- 2) By the way, the noise coming from the pickleball courts is also bothering us tennis players, especially when we play in the upper courts next to theirs. Tennis is a sport that appreciates and respects silence, and expanding the pickleball courts, will make things worse for us.
- 3) Although we understand the popularity of pickleball, there have been an explosion of places to play it within 10 minutes from Poinsettia Park. Why do we need to sacrifice our tennis courts to a new sport that maybe popular now, but may not be in the future?
- 4) Some of our tennis friends who also play pickleball at our park, have told us that most people come from other cities as far as Chula Vista to play pickleball here. It does not seem fair that Carlsbad is planning to sacrifice our tennis players to accommodate pickleball players from outside our city limits.
- 5) Finally, there should be other options to expand pickleball access if that was the decision to be explored. Our park has some other open spaces that could accommodate new pickleball courts, or even find other spaces in the other Carlsbad parks.

I hope that you reconsider your options and do not take our tennis courts away at Poinsettia Park.

Thank you for your time!

**Subject:** Tennis court change

To the recreation service management -

It was just brought to my attention that there has been talk of converting two of the Poinsettia tennis courts into pickleball courts.

As an avid tennis player, I truly enjoy the availability of all of your current tennis courts. There are not many public tennis facilities with so many available courts, this is why all of us tennis people love Poinsettia so much!

The popularity of tennis still exists! Come any morning of the week and see how many people are waiting to play. Often, people think that “the tennis players” dislike pickle ball. This is absolutely false. What we don’t like is the pattern we’re seeing everywhere, in which the conversion of tennis courts become pickle ball courts. Slowly the tennis courts disappear.

It would be so devastating to see this happen at Poinsettia park with so many current and new tennis players enjoying the courts.

Please re consider this plan

Much appreciated,

Dominique Gambale

Hello Mr Reese

Please reconsider taking away any tennis courts at Poinsettia Park! We are a tennis family with grandsons that are playing and practicing tennis at Poinsettia! The park is two blocks from their home! Taking just one court would cut down time and availability! Please reconsider!

Thank you

Fred Heymann

**Subject:** Pickleball courts

Hi Mike. I am contacting you regarding the proposed pickleballs courts. As an avid tennis player who uses the courts, the court time is limited due to the volume of players. We have had pickleballers take over the courts in spite of the signage saying tennis only. Pickleball is not compatible with tennis courts due to the loud noise due to the plastic ball. Tennis player cannot concentrate with that racket. You add two courts and they will eventually lobby for all courts to be accessed. Tennis and pickleball are two completely different sports, like skiing and snowboarding. Pickleballers have their own courts at poinsettia park. Sincerely Fred

**From:** GREG SMITH <smithgandc@aol.com>  
**Sent:** Monday, April 3, 2023 4:45 PM  
**To:** Mick Calarco; Tony Navarro  
**Subject:** Tennis/Pickleball courts

Both Tennis and Pickleball courts are both busy during the morning hours with wait times experienced by both groups. Pickleball match times run around 15-20 minutes and then players rotate in. Tennis matches run around an hour and a half which leads to greater wait times when courts are full. With Pickleball players waiting times are minimal and they get to play several times. Increasing the number of Pickleball courts will not change the wait times significantly. With more Pickleball courts more players will show up and the crowd situation will continue. With tennis the number of people waiting for courts would also lead to more wait times which is significantly longer than for Pickleball participants. Penalizing one group to please the other is not a viable solution. Both groups do not utilize the courts in the afternoons. A good solution would be to encourage more afternoon play. Greg Smith/participant of both sports.

**Subject:** Tennis courts

Hi Mr Mick Calarco,

Please DO NOT convert any of the tennis courts to pickle ball courts in Poinsettia park. There aren't enough tennis courts as it is. If I may I would like to suggest putting a pickle ball court in other parks like Alga Norte or Aviara park as there is space there and to decrease the congestion in poinsettia park.

Thanks,

**Sent:** Tuesday, April 4, 2023 6:28 PM  
**To:** Mick Calarco  
**Subject:** Pickle ballCourts

To whom it may concern:

I would like to oppose the suggestion to take two tennis courts and convert them into pickle ball courts. The waiting time for both are not the same. Pickle ball matches last around 20 minutes, then players rotate in. They get to play several times. Tennis matches last between 1 hr to 1:30, unless you're playing doubles which will take longer. It's even greater if the courts are full, especially during Spring and Summer seasons. If you increase the number of pickle ball courts it will only increase the number of people coming in from all around and it won't decrease the waiting time for either sport. If you penalize tennis players to please pickle ballers I don't think this is a good solution. If you want to increase the pickle ball courts, please consider another alternative or site to do this.

Sincerely,

A. Navarro

**To:** Mick Calarco  
**Subject:** Please do not close more tennis courts

Dear Mick, we need your help, due to the heavy rains we have experienced this year, most of us tennis players have not been able to go play at Poinsettia Park.

Because the courts are not as busy due to the weather, it's my understanding that the city wants to take two courts for pickle ball, this will be very hard for all of us tennis players.

At times when it is not raining, we must wait for hours to get an empty tennis court, due to the lack of courts in the area.

I am asking you Mick to please do not close the few tennis courts we have left in the Carlsbad area.

Respectfully yours,

Martha Y Torres

To: Kyle Lancaster <Kyle.Lancaster@carlsbadca.gov>  
Subject: Poinsettia Park tennis

Hello Kyle. I'm writing because I'm told of a proposal to convert two tennis courts into pickle ball courts. The tennis community, of which I am a member, is alarmed. This is unadvisedly being approached as a zero sum game — a winner and a loser. That's bad public policy.

We're all for the city keeping up with the rising demand for tennis courts. So identify vacant properties and increase the supply. The tennis courts are loved and used by lots of your citizens. You have such a beautiful facility that we wait 30 minutes often times to get a court. This is not underutilized. You should not consider it underutilized because it isn't fully used at all times.

Even if they're more pickle ballers, it's a loser of a move for the city to take away from another group that loves what you've provided for them.

You really should not recommend this to the city council. It's a loser.

Sincerely,  
Keith Till,  
Carlsbad resident

**To:** Mick Calarco; Todd Reese; Nick Stupin  
**Subject:** Please DON'T convert tennis courts to pickle ball @ Poinsettia

We have been residents of Carlsbad for 26 years.  
Usually when we use the Poinsettia tennis courts they are busy and we have to wait for about 20 minutes to get a court.

I heard you are considering a proposal to convert two Poinsettia tennis courts into pickleball courts.

I urge you not to do this conversion before you study the resident use of the courts.

What I see at Poinsettia is that the pickleball courts appear to be used by mostly Encinitas, San Marcos and Oceanside residents.

The tennis courts appear to be used by mostly Carlsbad residents.

Why does Carlsbad have to supply the pickleball recreation for neighboring towns??!! Our neighboring towns need to step up their game!

Carlsbad is spending taxes so that Encinitas residents ( in particular) do not have to devote taxes to recreation.

UNFAIR -- Taxation without representation (on the pickleball courts)!!

In addition, children under ten often use the tennis courts--I have not seen young children on the pickleball courts.

So, currently, Carlsbad taxes are being used to satisfy Encinitas adults. UGH  
To convert tennis courts into pickleball courts would not be fair to Carlsbad children.

Many thanks for your time and attention.

Marianne and Michael Townsend  
1241 Belleflower Rd. in Carlsbad

**Subject:** Poinsettia Park Tennis and Pickleball Courts

Hi Todd,

I am a 23-year resident of Carlsbad who utilizes the tennis courts at Poinsettia Park multiple times per week. I understand that there is a proposal to convert two of the ten tennis courts at Poinsettia Park into additional Pickleball courts. While I understand that the existing Pickleball courts are very popular and wait times are the norm, I can attest that the same is true of the tennis courts. Myself and my playing partners typically wait between 15-60 minutes for a tennis court to become available. It is not unusual to find Pickleball players on the tennis courts, in spite of the prominent signage that expressly prohibits this. Losing 20-percent of the highly utilized tennis courts at Poinsettia is a poor option.

There are several other parks in Carlsbad which have tennis courts that are far less utilized than Poinsettia Park's courts are. These include Calavera Park and Laguna Riviera Park, both of which have tennis courts which are utilized far less than Poinsettia Park's tennis courts. I would propose converting the tennis courts (2) at one of those parks to Pickleball, to alleviate the demand at Poinsettia Park.

Please feel free to reach out to me if follow-up is requested.  
Best,

Paul L Wagner  
2169 Dickinson Dr.

**Sent:** Tuesday, April 4, 2023 7:04 PM  
**To:** Mick Calarco; todd.reese@carlsbadca.gov; Nick Stupin  
**Subject:** [tennis courts]

**Dear Carlsbad Officials:**

**I am concerned that Carlsbad is considering to replace two tennis courts with pickleball courts.**

**We are the seniors who play tennis at the Poinsettia Community Park every weekday: Monday through Friday. Sometimes with 12 players on 3 courts, we still have more than 10 people waiting. Moreover, cutting down the court hours to 8am has also greatly reduced the availability of the courts, and making the usage of the courts less effective particularly in summer time since the temperature could turn up quickly in the mid-morning. Moreover, it is expensive to build the tennis courts, let alone tearing them down and building pickleball courts over them.**

**May I suggest to open the tennis courts at 7:30am, and develop the pickleball courts in the vacant land. Some parking lots and pet park , in my opinion, have much less usage in comparison to the tennis courts.**

**Thanks for your kind consideration.**

**Regards,  
James J Y Hsu**

**Sent:** Wednesday, April 5, 2023 1:10 AM  
**To:** Mick Calarco  
**Subject:** Poinsettia park tennis courts

Good evening,

My name is Yadira Navarro. I live in Carlsbad and enjoy the use of the tennis courts in poinsettia park for years. I have been told there is a consideration to take two of our tennis courts to convert them into pickle ball courts. Have you see the waiting line in the evenings?

We have to wait up to an hour and some times even more to get our turn.

If the people that enjoy pickle ball are asking for more courts and you want to help them. Please take their parking lot in front of their courts and provide them more courts but don't take our tennis courts. I see kids playing with their parents. The entire family inside the tennis court enjoying together. I don't see that in the pickle ball courts. It's obviously pickle ball participants are more adult retired crowd that have more time to be in the courts all the time. The tennis players is a different crowd. People that still works and has different schedules. That doesn't mean the tennis courts are not being used.

I hope this helps for whoever is considering to take tennis courts into something else no to do it.

There is a very high demand for them already.

Thank you for your time.

Yadira Navarro

**To:** Mick Calarco  
**Subject:** In support of keeping Poinsettia tennis courts

Hi Mick,

I'm a Carlsbad resident and a tennis player (both my children play as well) and I wanted to send this email to show my support for keeping all Poinsettia tennis courts vs. converting them into pickleball courts.

It is already very tough to get tennis courts at Poinsettia during peak times and there are very few public court alternatives in Carlsbad. Tennis was one of the fastest growing sports during the pandemic where people of all ages have got started and we need more courts, not less to support the need for affordable access to this sport. Private courts around the area have hiked up their prices knowing public court access is very limited.

I do play pickleball as well and fully support this wonderful new sport but pickleball needs must be met separately without taking away facilities from another sport.

Thank you for your consideration!

Best,

Sanem Ahearn

**To:** Nick Stupin; Mick Calarco; Todd Reese  
**Subject:** Save Carlsbad Poinsetta Tennis Courts

Good afternoon,

I am an avid tennis player and have been coached by Coach Frank through the City of Carlsbad tennis lessons. One main reason I moved to this part of Carlsbad is because of Poinsettia Park and the amazing amenities.

Playing tennis has been a great way to stay in shape and meet other community members. Frank offers great lessons. The ability of being able to walk to the tennis courts makes it accessible. I frequently use the tennis courts to meet friends to play during the evenings.

Please take into consideration that there is an uptick in tennis players during the spring/summer as there is more light and it's warmer. Oftentimes when meeting friends to play Friday and Saturday mornings; there are lines for the courts. In addition, the evenings there are classes (Tues, Wed, Thurs) this also removes use of 2 courts for the lessons.

We are very fortunate to live in a City with well maintained tennis courts equivalent to any private tennis club.

As a tax paying homeowner of poinsettia community I am asking to leave the tennis courts as they are today. Tennis can be a high cost entry sport and having public (free) access to tennis courts is important to making this sport accessible.

Thank you so much!

**Cc:** Jeff Jaureguy  
**Subject:** Poinsettia Park Tennis ball courts into pickle ball is a bad idea

To whom it may concern:

I just heard about a proposal to convert tennis courts to pickle ball at Poinsettia Park. I wait in line a minimum of a half hour up to an hour for Tennis courts regularly on M, Tu, Thurs, and Fridays late afternoons. I'm not sure how to explain what a bad idea this is, since I have never seen a line of people that overtakes our line waiting for Tennis courts. I realize there is an interest in pickle ball at this time, but I doubt this will last 10, 15, or 20 years and I have played at public courts regularly in Carlsbad, much longer than pickle ball was around.

I play on a USTA Tennis team at Rancho Del Oro, but only because Poinsettia does not allow teams due to no reservation. We wanted to start a team at your facility much like Kit Carson, but we simply can't. The interest for more team competition and court reservation has always been there. Now, we have less courts to challenge and practice singles / doubles tennis. Please don't let this happen! We need more public Tennis courts!

Sincerely,  
Chris Berg

**Sent:** Wednesday, April 12, 2023 1:48 PM  
**To:** Mick Calarco  
**Subject:** Keep Tennis Courts at Poinsettia Park

Hi Mick,

I am writing to advocate for the retention of all tennis courts at Poinsettia Park in Carlsbad, CA and to reject the proposal to convert a tennis court to two pickleball courts.

Poinsettia Park is a wonderful place to play tennis. I play there two to three times a week, either as a small group or with my USTA Tennis Team. Regardless, there are long wait times for tennis courts at all times of the day and every day of the week. Sometimes, I have to wait up to an hour for a court, but I am please to do so because I love the sport. If one tennis court is converted, the wait times for courts will be increased, which will discourage players and myself from playing tennis at Poinsettia.

Unlike tennis, there are no wait-times to play pickleball at Poinsettia Park. There are six pickleball courts and the players rotate in-and-out. This allows pickleball players to drop in and play whenever they choose.

There is a large tennis community in Carlsbad and many people that are part of that community rely on Poinsettia Park and the reliability to play tennis there without unreasonable wait times. By taking away a court, you would discourage people from visiting the park to play tennis. Tennis is a time-tested sport that many generations benefit from. Sure, pickleball is new and exciting as an emerging hobby, but do not mistake it as having the staying power as tennis does. Please keep tennis a priority at Poinsettia Park. Thank you.

Hi all,

I'm a regular player 3x a week at Poinsettia Park. I've heard yal are thinking about converting some tennis courts into pickle ball courts?

Tennis courts there are high lights of my retirement, I love the park and how they're maintained.

There are alot of tennis players and we have to wait sometimes, can be up to 45 mins if they're full or in the weekend.

I hope you're considering other options instead of take away tennis courts. Please. Add more pickle ball courts instead. There's still plenty room and I don't think it will save that much to convert. 😞

Thank you for hearing me out.

Everyone I know from out of town love Carlsbad and I'm proud of it, too. I think the city is taking care of things well.

Cheers,  
Yume

**Subject:** Keep Poinsettia Courts for tennis

Gentlemen:

I understand that Carlsbad is considering Transitioning the Poinsettia tennis courts to pickleball courts. This is a big mistake!

I play tennis at the Poinsettia courts and I often have to wait for a court since they are all full. These courts are in high demand!

I am happy that so many people are enjoying pickleball but that doesn't mean that tennis players should be penalized. If more pickleball courts are needed then they should be built. Also, the Old Macys building at the Carlsbad mall is being turned into a pickleball facility.

Please don't accommodate the enthusiastic and possibly tunnel-vision views of pickleballers by taking away courts from calm and agreeable tennis players. We can all get along.!

Thank you,  
Lisa Hyndman

**Sent:** Wednesday, April 19, 2023 11:53 PM  
**To:** Mick Calarco  
**Subject:** Do NOT covert TENNIS courts to pickleball

Please stop the assault on tennis players.

When I go to Poinsettia Park to play tennis, I have to wait a minimum of 40 minutes to get a tennis court as it is. There's a lot of demand.

Just because a tennis court sometimes sits idle is no reason to take courts away from tennis players. Ball fields take up huge amounts of space - more than tennis courts, and involve less players relative to the space AND ball fields are NOT USED all day. --Yet I don't hear people trying to convert ball fields into pickleball courts. You think baseball players would like random lines painted all over their fields?

You should not be considering messing up, or taking away tennis courts!!!

Pickleball players are not being good community members when they see an empty tennis court and think it should be theirs.

And pickleball has noise issues that tennis does not. No one ever complains about noise from tennis courts, but all over the country, pickleball play is being restricted to certain times, or being forced to MOVE courts because the noise is so obnoxious. I learned that the reason the Poinsettia Park TENNIS courts are not open until 8:00 am is because you had to locked the pickleball courts because of the complaining neighbors and then the picklers went to the TENNIS courts and made noise while waiting for the pickleball courts to be unlocked!

Picklers have already screwed tennis at Poinsettia because the 8am start has put even more pressure and demand on the tennis courts. In the past, many people started around 7:15 and could play before work. Now that's impossible. a total turn over occurred at around 9:00 am - now the turnover occurs around 10:00.

Tennis is an established professional sport. California produces great professional and amateur tennis players. Don't take opportunity away from the general public. That's how many students and professionals get their start. Students get tennis scholarships, just as other sports. It's not dying, so don't kill it.

You should BUILD more pickleball courts in a DIFFERENT location.

Thank you for your public service.

Respectfully,

Ellen Fales

**Subject:** Tennis court conversion at Poinsettia Park

Mr. Calarco,

Please note my opposition as a resident of Carlsbad for over 36 years and as an avid tennis player to any conversion of the existing tennis courts at Poinsettia Park to either part-time or full-time pickleball use. The tennis courts are well-used and players often face wait times to obtain a court.

Tennis and pickleball have both seen significant growth in the last few years. The solution to the needs of one sport is not to detract from the needs of another.

Thank you,

Alice Cooney

**Subject:** Opposition to more pickle ball courts at Poinsettia Park

Hello,

Please consider my opposition to adding more pickle ball courts at poinsettia park by converting 2 existing tennis courts.

I have no problem with pickleball courts. However they should not take away tennis courts - just build new pickleball courts! There are already people waiting in line for tennis courts in the AM, PM and weekends

Thanks

Patrick Coughlin

**Subject:** No to Poinsettia Tennis Court conversions

Dear Mr. Calarco,

I'd like to voice my concern over any conversion of any public tennis court in Carlsbad, including Poinsettia.

I play tennis at Poinsettia several days per week, as does my family who own property and pay property taxes in Carlsbad. We nearly always have to wait in a que. There are already and insufficient number of courts. More are needed. Not less!

If additional pickleball courts are desired, then build new ones at Alga, Laguna Riveria or elsewhere. You should also charge an access fee to cover the expense of the new courts.

Regards,

S. Tara

**Subject:** Poinsettia Park Courts

I live a short distance from the Poinsettia Pickle ball courts @ 6454 Topmast Drive. When we purchased the home in 2006 the masterplan called for a stadium tennis court and tennis shop to be built in the Northeast corner of the park.

When the city was considering building pickle ball courts I voiced my concerns at City Council meeting regarding the noise and additional traffic. The city reassured that additional sound proofing was being put in and there would be a requirement for quiet pickle ball paddles 'Green Zone Approved'.

I do not believe any formal noise studies were ever conducted and on a daily basis I can hear pickle ball from both front/back yards and inside the house with the windows open.

This noise is an irritating nuisance that was never a part of the original park master plan. I have played on the pickle ball courts and am aware that the use of Green Zone Approved paddles is not being enforced.

I am especially concerned because I have heard that the city is considering expanding pickle ball into the existing tennis courts. This will only further the noise, constrain the tennis courts, and increase traffic, both around and within the park.

I would like to strongly recommend:

- That any additional pickle ball courts be located at a park other than Poinsettia.
- A comprehensive survey of the tennis courts be conducted, as when I go to play tennis other than the middle of the day, the courts are occupied with most times a waiting line at the top of the stairs. There are a number of tennis players that have relocated to Carlsbad HS public tennis courts because of scheduling difficulty at Poinsettia.
- The city devise a means to enforce the use of Green Zone Approved pickle ball paddles.
- Residents within 1000ft of the park formally approve of proposed revisions to the master plan that will increase noise and/or traffic.
- Carlsbad partner closely with neighboring cities in having each develop out pickle ball courts in respective areas. There are a significant number of the pickle ball participants who come to play at Poinsettia from areas outside of Carlsbad because there are no and or limited public courts.
- Given a significant number of Carlsbad residents pay a MelloRoo to support Parks and Schools, non residents who access Carlsbad parks pay a small fee.

On a separate note, I went to play tennis this late afternoon and noticed that one of the tennis courts now has unauthorized permanent markings for pickle ball dimensions with chalk connecting the lines (pictures

below). Worth a mention as well that all of the courts, pickle ball and tennis, were full and I had to wait 30m for a tennis court.

Jeremy

**Subject:** Pickleball Courts @ Poinsettia Park

Dear City of Carlsbad -

I have been playing tennis in North County San Diego for 35 years and I can tell you it is only getting harder to find courts to play on. Bobby Riggs has completely converted to pickleball. San Dieguito High School is locked to outsiders. Carlsbad High is in serious need of resurfacing. Some nights (usually Wednesdays and Thursdays around 5pm) I've waited over an hour to get a court at Poinsettia Park. Please reconsider any conversion of the precious few tennis courts that are still available in North County.

Thank You -

Armen Dabaghian

**To:** Parks and Recreation <[parksandrec@CarlsbadCA.gov](mailto:parksandrec@CarlsbadCA.gov)>  
**Subject:** Poinsettia Park Tennis Courts

Hi,

I understand that the Carlsbad Parks & Rec department is considering removing some of the tennis courts at Poinsettia Park and replacing them with pickleball courts. While I am not against more pickleball courts, removing tennis courts will put a huge strain on the already limited resource. I play tennis at Poinsettia 3-4 times a week and I always have to wait for a court - sometimes as long as an hour. The tennis courts at Poinsettia are a heavily utilized resource - go by after 5pm on a weekday or on the weekend and you will see all the tennis courts are in use.

Again, I understand that pickleball, at the moment, is incredibly popular, but there are ways to expand the pickleball courts without taking away a heavily utilized resource like the tennis courts. For instance, the parking lot next to the current pickleball courts could be leveraged to expand the number of courts. In addition, the number of tennis courts in the area is incredibly limited. There are also fewer options for public play for tennis in the area. For pickleball, there are several nearby options at Bobby Riggs, which has 22 pickleball courts, and the Pickleball Club of Carlsbad, which has 6 courts available.

I hope you will consider the tremendous impact taking away tennis courts will have on a large tennis community here in North County. I think there can be some creative ways to allow for the growth of both sports. This does not have to be a zero sum game, where one group has to lose something in order for another to gain.

Thank you for your consideration.

**To:** Parks and Recreation <[parksandrec@CarlsbadCA.gov](mailto:parksandrec@CarlsbadCA.gov)>  
**Subject:** Save our tennis courts at Poinsettia Park!

Hi Carlsbad Parks and Rec,

I'm a Carlsbad resident and an avid tennis player who loves playing at Poinsettia Park. I'm writing to urge you not to convert two of the tennis courts at Poinsettia into Pickle Ball courts. I grew up relying on public tennis courts as an affordable, accessible way to play the sport. As an adult, I continue to play exclusively on public courts and see them as a great benefit to our community.

When I moved to Carlsbad 5 years ago, I didn't have many friends or connections in the area. I knew I could find community through playing tennis. I began taking the classes taught by Frank Arlen on Tuesday and Thursday evenings at Poinsettia Park and quickly found a group of people that love the game of tennis as much as I do. We love using the courts outside of our class time and play bi-weekly doubles games after work. We almost always have to wait for a court to open up. We're all fine with a short wait and often connect with other tennis players who are also waiting in line. Some have even joined our weekly games! If the tennis players have to wait for courts, so should the pickleball players. In the past week, I've played at Poinsettia three times and have had to wait for a court for at least 25 minutes.

One thing is true about both tennis and pickleball: it brings a diverse group of people from the community together and differences that we may have outside of the court are forgotten while we're enjoying our respective matches. In 2023, 'third spaces' like public courts are crucial for people to be able to actively participate in their communities and forge connections with others. However, tennis is a sport that has stood the test of time and benefits the mind and body in ways that pickle ball doesn't. Tennis reduces stress, encourages self discipline and a strong work ethic and helps you learn from mistakes and problem solve. Children who play tennis perform better in school. Tennis has also been shown to activate neural connections in the brain and encourage lifelong brain development. Tennis players live ten years longer than non-tennis players on average. Carlsbad must continue to make tennis accessible and affordable for the betterment of our community!

Sincerely,

Lisa Burgnon

**Subject:** pickleball courts at Poinsettia - important info about petition

Hii Mick,

I wrote you a while back about my concern that tennis courts might be converted to pickleball courts at Poinsettia Park.

You wrote back a very informative note explaining that that is/was not being considered.

Thank you.

The tennis community is running scared and circulating a lot of unsubstantiated rumor. This is because in fact, SO MANY public tennis courts HAVE BEEN converted to tennis courts and or had ridiculous lines painted all over them.

Now, there's a petition circulating among the tennis community (link below) in advance of your upcoming public meeting:

[No additional pickleball courts at Poinsettia Park](#)

[https://sign.moveon.org/petitions/no-additional-pickleball-courts-at-poinsettia-park?source=rawlink&utm\\_source=rawlink&share=730f6bea-4b8f-416e-98c0-23f7000e3865](https://sign.moveon.org/petitions/no-additional-pickleball-courts-at-poinsettia-park?source=rawlink&utm_source=rawlink&share=730f6bea-4b8f-416e-98c0-23f7000e3865)

Unfortunately, dozens of women have signed this petition without knowing that what they are signing. And the creators of this petition are obviously not stating the truth about what you intend to do. Either *they're* completely misinformed, or it's intentional -- to get more people to sign the petition.

The second paragraph of the petition states:

"If you are a tennis player and are concerned about **tennis courts getting converted to pickleball courts** then also pls sign up to let the city official know your disapproval by signing this petition"

Of course people who read the petition immediately assume that Carlsbad Parks and Rec are going to convert tennis courts to pickleball.

All of the women that signed, that I've spoken to, had NO IDEA that you do not intend to convert tennis courts to pickleball.

They are NOT opposed to the construction of new and separate pickleball courts.

I hope you find this helpful.

You well know that being in government means that half of the people will oppose what you're doing no matter how hard you're trying to help them!

Sincerely,

Ellen

RE: Save the Poinsettia Park Tennis Courts

Dear Mick, Todd, and Nick,

I was disappointed and quite distraught to hear that some of the tennis courts in Poinsettia Park might be converted into pickleball courts.

I am a home owner in Carlsbad and tennis player. Poinsettia Park is my main venue of play. The tennis courts there are in high demand. In weekday mornings the courts are usually full; on weekends there are almost always a long queue with players lined up for courts to free up, as more players come to play, and the City instructors often take up some courts for public lessons which leads to fewer courts available. Many times I have seen players, often families with kids, walk back to the parking lot, never found a court available to play because they couldn't come earlier.

As a tennis player, I feel it is already quite difficult to get a court to play as is. Taking away some of these courts would only worsen the situation. Therefore I plead with you to keep the tennis courts as they are.

I would support the idea of developing more sports and recreational facilities in our city, but don't think it should be done by sacrificing the existing ones, particularly when they are in high demand. To me it would be like rob Peter to pay Paul.

Thank you and kind regards.

Sophie Ding  
Carlsbad resident

## 2023 - 2030

APPENDIX J - AGE-  
FRIENDLY CARLSBAD  
ACTION PLAN GOALS &  
OBJECTIVES

## APPENDIX J – AGE-FRIENDLY CARLSBAD ACTION PLAN GOALS AND OBJECTIVES

<b>Domain 1: Outdoor Spaces &amp; Buildings</b>	<b>Goals</b>
	Provide well-maintained and safe public spaces to all residents across all city-owned facilities
	<b>Objectives</b>
	Inform the public on the progress of policies related to older adults
	Involve the community in the development of plans and programs that facilitate the use and progression of public spaces
	Support programs, activities and amenities that facilitate the routine use of public spaces and the maintenance of these facilities

### Domain 1

<b>Domain 2: Social &amp; Civic Participation</b>	<b>Goals</b>
	Build on and expand opportunities for social participation for all ages
	Build capacity for civic engagement, volunteerism and employment
	<b>Objectives</b>
	Continue to provide high-quality and diverse activities and events
	Increase visibility of opportunities for social participation
	Train and develop citizen leaders
Empower residents to work or volunteer as they desire	

### Domain 2

<b>Domain 3: Housing</b>	<b>Goals</b>
	Provide safe, affordable housing options for all residents to age in place comfortably
	Grow and preserve the affordable housing stock in Carlsbad and expand alternative living options
	<b>Objectives</b>
	Inform the public on the progress of the 2021–2029 Housing Element that relate directly to the concerns of older adults
	Implement strategies to protect the comfort and safety of residents in neighborhoods
Promote Carlsbad as a community where people of all ages and backgrounds can live and thrive	

### Domain 3

<b>Domain 4: Health &amp; Wellness</b>	<b>Goals</b>
	Review current health conditions for Carlsbad populations to identify areas of concern
	Provide health-related programs to expand upon the educational health resources available in Carlsbad
	<b>Objectives</b>
	Assess health-related data and make health information available to residents
	Increase awareness around health and wellness across all ages and populations
	Provide workshops and classes on healthy lifestyle living, eating, exercise and mental health
	Raise awareness around mental health and the importance of socialization

**Domain 4**

<b>Domain 5: Mobility</b>	<b>Goals</b>
	Provide opportunities for the community to be involved in active transportation planning
	Support safe mobility options in the City of Carlsbad for all ages and abilities
	Provide information and education about transportation options
	<b>Objectives</b>
	Provide education and opportunities for public participation in transportation planning
	Support a accessible public transportation experience for all
	Use engineering and design to achieve roadway speed targets and support mobility for all roadway users
	Apply traffic calming measures and infrastructure improvements where appropriate to enhance the pedestrian experience
	Provide transportation-specific education through workshops and informational strategies

**Domain 5**

#	IF YES, WHAT DO YOU ENJOY MOST ABOUT GOING TO CITY PARKS? WHAT WOULD MAKE GOING TO CITY PARKS EVEN BETTER?	DATE
	There are no responses.	

## Q2 What would make going to city parks even better?

Answered: 1,176 Skipped: 590

#	RESPONSES	DATE
1	If there was something closer to the beach in South Carlsbad that would be great	1/11/2022 5:36 AM
2	Good parking lot structure, lots of green space, shade for a hot day	1/10/2022 3:23 PM
3	More of them--especially open space. Playing fields and open space can be difficult to find. Also, more shaded areas.	1/10/2022 12:49 PM
4	Closer parks, within walking distance of Ponto and Avenida Encinitas.	1/10/2022 12:36 PM
5	More shade and Community classes and activities	1/10/2022 12:34 PM
6	More of them. Like everything in SoCal these days, it's very crowded at our parks.	1/10/2022 12:22 PM
7	Need a park with a running track surface that is well lit.	1/10/2022 12:17 PM
8	Restrooms at every park. And maybe a coffee cart ;).	1/10/2022 11:19 AM
9	We need more parks with bigger play structures for older kids/tweens.	1/10/2022 11:08 AM
10	Allow dogs at all parks	1/10/2022 11:00 AM
11	closer park to Ponto beach, otherwise we often go to Encinitas parks	1/10/2022 9:47 AM
12	more parks by the ocean, please build Ponto Park	1/10/2022 7:54 AM
13	A park by the ocean. Please please please build Ponto Park. Do we REALLY need to build housing on EVERY INCH of dirt???	1/9/2022 6:11 PM
14	Safety, cleanliness, openness	1/9/2022 12:39 PM
15	Coastal corridor access parks such as proposed Ponto Park	1/9/2022 12:07 PM
16	clean restrooms and facilities, convenience, good parking	1/9/2022 10:09 AM
17	Closer park to me in southwest Carlsbad	1/8/2022 6:21 PM
18	We have no park near our home that we can walk to. We live near Ponto Beach. Hoping for the addition of a city park near Aveneida Encinias and Coast Highway, along Ponto Road.	1/8/2022 5:35 PM
19	More pickleball courts, tennis courts and playground equipment for children would make it better for my family.	1/8/2022 4:47 PM
20	Do not develop Ponto beach area. Reserve this for a park	1/8/2022 2:36 PM
21	If we had a costal access Park at Ponto Creek	1/8/2022 2:34 PM
22	having one closer	1/8/2022 2:31 PM
23	If people would read and follow the rules.	1/8/2022 1:58 PM
24	More seating available	1/8/2022 1:10 PM
25	more of them	1/8/2022 1:08 PM
26	I would like to see a park by the ocean near Ponto that is open space and walking paths. Having a quiet place without souvenir shops, housing, or skateboards would be great.	1/8/2022 10:29 AM
27	closer to our home	1/8/2022 10:23 AM
28	More Park area	1/8/2022 9:52 AM
29	More of them!	1/8/2022 9:42 AM
30	More open space around beaches	1/8/2022 9:13 AM

## Q2 What would make going to city parks even better?

31	More pickle ball courts Better beach sand	1/8/2022 8:57 AM
32	Having more parks, especially in the southwest area of Carlsbad.	1/8/2022 8:56 AM
33	More coastal parks	1/8/2022 8:28 AM
34	More parks by the ocean! There's already so much development on the PCH and it will ruin the natural environment that's barely left :(	1/8/2022 8:24 AM
35	More pickle ball courts	1/8/2022 7:47 AM
36	If they were within walking or biking distance to our home in San Pacifico	1/8/2022 7:34 AM
37	If there was a coastal park in south Carlsbad	1/8/2022 7:20 AM
38	If there was a park that was closer to where I live.	1/8/2022 7:17 AM
39	More parks located in south Carlsbad along the coast	1/8/2022 6:57 AM
40	More parks close to the beach; particularly Ponto area.	1/8/2022 6:34 AM
41	I wish there were some parks that were walkable from my home honestly.	1/7/2022 11:46 PM
42	Build one in our neighborhood, the Ponto beach area.	1/7/2022 9:21 PM
43	Closer with walkable access to the park. Nice grassy area.	1/7/2022 9:20 PM
44	Being able to enjoy sunsets at our unmatched beaches and coastal open spaces.	1/7/2022 9:19 PM
45	Parks by the ocean. Build Ponto Park!	1/7/2022 8:59 PM
46	Less Rules and more Open spaces	1/7/2022 8:52 PM
47	More coastal locations	1/7/2022 8:39 PM
48	A park at Ponto. It's such an amazing opportunity to give all South Carlsbad residents and people from all over to enjoy equitable access to the coast. Do not give in to private development here.	1/7/2022 8:28 PM
49	Skateparks	1/7/2022 7:56 PM
50	More parks by the ocean. Build Ponto park.	1/7/2022 7:55 PM
51	To have more parks in neighborhoods do we can walk to them. This is important for veterans and elderly.	1/7/2022 7:48 PM
52	I like parks to be walkable and to have both passive and active features.	1/7/2022 7:38 PM
53	More parks by the ocean and less high density housing	1/7/2022 7:21 PM
54	A park near the ocean would provide open space for all of the community to enjoy instead of high density condos or resorts that do not. A park at Ponto would be a perfect way to preserve coastal land and provide a wonderful park for ALL to enjoy. Carlsbad has the opportunity to become a model for other cities by preserving areas now and for future generations.	1/7/2022 7:20 PM
55	Having more of them!	1/7/2022 7:15 PM
56	If we had a linear park behind the state campground. Linear Park is a much better option than the Ponto Park idea. Ponto Park will serve just a privileged few who are fighting to retain their ocean views at the expense of the greater population group.	1/7/2022 7:08 PM
57	Coastal/beach park space	1/7/2022 7:05 PM
58	Building a linear park on the narrow strip behind the campground.	1/7/2022 7:04 PM
59	A linear park behind the state campground. Linking the city to the beach and making it more accessible to all. Stretching from Palomar Road to Avenue Encinas.	1/7/2022 7:01 PM
60	Newer equipment, more garden area to sit and walk through, enough parking, activites offered.	1/7/2022 6:58 PM
61	Please build a "Linear Park" behind the state campground. It will transform the city to a world class city. That is a much better idea than a small Ponto Park.	1/7/2022 6:57 PM

## Q2 What would make going to city parks even better?

62	More Coastal Parks. Especially the large open space by Ponto beach / Avenida Encinas	1/7/2022 6:49 PM
63	If we had one in walking distance of our home.	1/7/2022 6:47 PM
64	I am an older woman, and the greatest need for me and my friends is comfortable seating in the shade, and well kept walkways.	1/7/2022 6:47 PM
65	We need more parks. So many families have small yards and the need for parks is critical for children to have areas to run and play.	1/7/2022 6:33 PM
66	There is really no need for a Ponto Park. Developing the space behind the campground is a better option and will serve a broader community and is a better alternative. They People for Ponto group do not represent the community, they are just a small vocal group, trying to protect the ocean views of a privileged few.	1/7/2022 6:29 PM
67	If there was a coastal park in South Carlsbad. We have very limited parks in the southern/coastal region of our city.	1/7/2022 6:28 PM
68	More park space in South Carlsbad coastal region please!	1/7/2022 6:25 PM
69	Bike/walk trails to connect them, and more parks.	1/7/2022 6:09 PM
70	More parks!! Build Ponto Ocean Park!! We need more open space not high density housing or strip malls.	1/7/2022 6:03 PM
71	Having more of them especially a coastal park in South Carlsbad	1/7/2022 6:00 PM
72	If there was a city park within walking distance of my home in South Carlsbad.	1/7/2022 5:54 PM
73	One that was on the COAST!	1/7/2022 5:49 PM
74	open spaces with trash receptacles to keep them clean	1/7/2022 5:49 PM
75	More of them	1/7/2022 5:43 PM
76	More trails that allow for a view - especially of the coastline.	1/7/2022 5:43 PM
77	Create Ponto Park and do not increase density in the area. There are fewer parks in our area vs. surrounding (e.g., Oceanside and Encinitas).	1/7/2022 5:40 PM
78	Views of ocean	1/7/2022 5:30 PM
79	Clearing out homeless people from thwm	1/7/2022 5:12 PM
80	Ponto park close by	1/7/2022 5:02 PM
81	Access — our home is in south carlsbad and we don't have reasonable access to a local park. Our kids can't bike or walk to a park...everything is miles away and requires crossing very busy streets and the freeway overpass. Only way to reach a park is by car.	1/7/2022 4:46 PM
82	I would have answered "all the time" in question #1, however I live in southwest Carlsbad and we don't have convenient access to a park like the other 3 quadrants of Carlsbad have. Would prefer a park in open space and not next to high density housing, and near the ocean like other cities have. However I don't like at all the concept of a linear park along 101. This design would restrict the design and the amenities you can offer and be too close to traffic. This is not what the people of Carlsbad want. A more traditional square space but still near the ocean works best.	1/7/2022 4:39 PM
83	Whiffle ball games	1/7/2022 4:37 PM
84	More access to lighted fields for my kids to play in the local rec lacrosse program. Last spring and this past fall the teams were practicing on top of each other.	1/7/2022 4:35 PM
85	Parks closer to my home location...parks by the ocean...Ponto Park!	1/7/2022 4:31 PM
86	More of them . Sitting areas for picnics, concerts in the park, play areas for children , spaces for dogs to run and play, walking paths	1/7/2022 4:31 PM
87	If they were more accessible	1/7/2022 4:26 PM
88	We live in the San Pacifico area and have no park within walking distance. A coastal park near Ponto would be great!	1/7/2022 4:19 PM

## Parks & Recreation Master Plan Update

89	Putting one near the coast in the SW quadrant WHERE WE DO NOT HAVE ONE!	1/7/2022 4:18 PM
90	More natural parks, more nature, more trees, good trails and a section for dogs on beaches	1/7/2022 4:18 PM
91	A Park at Ponto for access and use for those citizens in the area and others. I currently have to drive to other city parks	1/7/2022 4:14 PM
92	The Southwest quadrant requires equal amount of parks as Northwest. We do not even have an indoor gym	1/7/2022 4:05 PM
93	Open areas	1/7/2022 4:02 PM
94	We need a Costal park in south Carlsbad. The last remaining open space at Avenida Encinas and PCH should be made into a park!	1/7/2022 4:01 PM
95	If there was a coastal park in South Carlsbad. Like that perfectly beautiful area Ponto. Please don't turn it into south Orange County. We are a beach community, we need a coastal park!	1/7/2022 4:01 PM
96	As much open space as possible. Walking trails, views of the ocean, etc.	1/7/2022 3:59 PM
97	If there was a park located in south Carlsbad by the beach/Ponto.	1/7/2022 3:57 PM
98	Having a park nearby at South Pinto where I could walk to with my very young grandchildren. Taking them to the beach just doesn't cut it and a park would be much safer. Please?!	1/7/2022 3:55 PM
99	More parks closer to my home. Walking distance.	1/7/2022 3:54 PM
100	One that is near my home	1/7/2022 3:53 PM
101	More turf and lights at the parks for Lacrosse. Soccer dominates and doesn't give local lacrosse players field space	1/7/2022 3:53 PM
102	More of them.	1/7/2022 3:51 PM
103	A park along the coast near Ponto	1/7/2022 3:51 PM
104	It would be better if there were more parks near ocean, I understand there is potential to build a park at Ponto.	1/7/2022 3:51 PM
105	We need an additional park in southwest coastal Carlsbad.	1/7/2022 3:50 PM
106	More parks in South Carlsbad near the coast. There are no parks in the coastal area. We could use a park that could hold events and create picnic areas for families.	1/7/2022 3:50 PM
107	Bring back TGIF concerts.	1/7/2022 3:09 PM
108	More activity space for younger (aged 5-10) kids sports. Basketball courts with lower hoop options, flat easy bike and gravel trails/loops, soccer fields.	1/7/2022 8:35 AM
109	Add bike parks. Connect short trails together across the city.	1/7/2022 8:26 AM
110	Dog friendly	1/7/2022 7:19 AM
111	More pickleball courts for playing rather than more time waiting	1/7/2022 5:25 AM
112	more pickleball	1/6/2022 6:34 PM
113	More pickleball courts, please! More parking at Poinsettia Park.	1/6/2022 1:51 PM
114	Carlsbad does an excellent job!!!!	1/6/2022 12:12 PM
115	More pickleball courts in south Carlsbad. Stagecoach Park would be a perfect spot!	1/6/2022 9:53 AM
116	More of them. Especially coastal S CBad.	1/6/2022 8:42 AM
117	Having a dog park near the coast	1/6/2022 8:17 AM
118	There are more people playing pickleball at Poinsettia Park than any other sport. The courts are always overcrowded. We need more courts to accommodate all players.	1/5/2022 11:57 PM
119	More PICKLEBALL courts! We don't have enough. The wait is always so long.	1/5/2022 11:35 PM
120	having one closer and by the ocean! BUILD PONTO PARK	1/5/2022 6:24 PM

## Q2 What would make going to city parks even better?

121	It would be great to have more shade from trees in our parks and interpretative signage about the trees and plants in our parks.	1/5/2022 9:16 AM
122	Dog area (or dogs allowed) at stagecoach.	1/5/2022 7:08 AM
123	Update & repurpose unused areas in Old Carlsbad area: such as the unused horseshoe pit at Laguna Riviera Park and designate a small and large dog run at Holiday Park.	1/5/2022 12:12 AM
124	Safety is important. As well as diverse activities for others to enjoy.	1/4/2022 9:27 PM
125	More parks by the ocean - Ponto park!	1/4/2022 7:13 PM
126	More pickle ball courts	1/4/2022 6:51 PM
127	More pickle ball courts	1/4/2022 5:36 PM
128	Ability to bring my four legged family member.	1/4/2022 5:26 PM
129	More Pickleball courts!	1/4/2022 4:52 PM
130	More pickleball courts.	1/4/2022 4:49 PM
131	More Pickleball space	1/4/2022 4:48 PM
132	More locations	1/4/2022 4:25 PM
133	More tennis courts	1/4/2022 3:35 PM
134	More parks.	1/4/2022 3:12 PM
135	More natural spaces, more trails/open space, more playgrounds that are not primary color plastic - more organic structures	1/4/2022 2:28 PM
136	Holiday park really needs a sidewalk that wraps around the entire park, and the bathrooms need toilet seat covers and a baby changing station. Safety is a huge issue at Pine Park, the homeless are always next to the playground, and fights break out amongst them, or the mentality unstable/drugged out ones are on the playground walking around shouting. Pine park also needs some shade over the playground, it's unusable on hot days (which is all the time in Southern California). Holiday park has a beautiful tree in the center that keeps it cool, and Pine needs something to the same effect.	1/4/2022 2:16 PM
137	More dog-friendly parks.	1/4/2022 1:06 PM
138	Clean bathrooms, shade coverings over all playgrounds	1/4/2022 12:33 PM
139	Classes at Poinsettia park	1/4/2022 12:31 PM
140	More dog recreation areas	1/4/2022 12:31 PM
141	Trees for shade in the more open areas.	1/4/2022 12:22 PM
142	Even more trails, paths, hiking. Open views. A long, one-way paved bike path.	1/4/2022 12:21 PM
143	more pickleball	1/4/2022 8:39 AM
144	More pickleball courts.	1/4/2022 8:28 AM
145	More pickleball courts.	1/4/2022 8:27 AM
146	WiFi. Charging Station benches.	1/4/2022 7:40 AM
147	Shaded playgrounds. Walking paths. Skateboarding/scooter ramps	1/3/2022 11:58 PM
148	Add meditation gardens like self realization gardens in encinitas, an activity center for classes like Zumba, and Zumba gold, gentle yoga, cooking, art classes all ages. Was disappointed the community center was eliminated from Poinsettia Community Park. We needed an indoor activity center to meet needs of seniors and families in south Carlsbad besides sports. Transportation shuttles for concerts.	1/3/2022 10:47 PM
149	More pickleball courts - there are so few courts and lots of people who want to play.	1/3/2022 8:00 PM
150	more of them - especially near the ocean - Carlsbad should accept the 15 minute walk challenge and ensure there are parks in every neighborhood - Especially a Park at Ponto	1/3/2022 7:03 PM

## Parks & Recreation Master Plan Update

151	Bike trails	1/3/2022 4:02 PM
152	More Pickleball courts	1/3/2022 4:00 PM
153	more pickleball courts and parking	1/3/2022 3:36 PM
154	Variety of playgrounds that appeal to more ages. More skate parks.	1/3/2022 2:14 PM
155	Having dog bags available in all of them	1/3/2022 1:37 PM
156	I don't find it difficult going to any city parks...thank goodness. Are there bus stops near all the parks?	1/3/2022 1:12 PM
157	More Pickleball courts and exercise equipment	1/3/2022 12:23 PM
158	More of them!	1/3/2022 12:06 PM
159	More dog park areas with grass	1/3/2022 10:58 AM
160	bigger play structure at Stagecoach Park	1/3/2022 10:53 AM
161	More parks and another pool.	1/3/2022 10:49 AM
162	Some on-leash, dog-friendly spots where families can gather for picnics and kids can play on equipment.	1/3/2022 9:58 AM
163	More Pickle ball courts. please add more courts to Poinsettia Park. Fastest growing sport in the US.	1/3/2022 9:39 AM
164	More frequent monitoring for litter and volunteer trash cleanup events.	1/3/2022 9:33 AM
165	More dedicated outdoor pickleball courts.	1/3/2022 9:04 AM
166	more native plantings and sustainable practices to show P&R is actively working to help address climate change and support local ecosystems, more community gardens, sharing of facilities/fields/courts to the extend possible to limit cost and waste of resources (thus also addressing climate change) (ie, dual marked tennis/pickelball courts)	1/3/2022 8:09 AM
167	New playgrounds	1/3/2022 8:05 AM
168	Park features for older youth, such as what is at Buccaneer Park in Oceanside.	1/3/2022 7:19 AM
169	Trees	1/3/2022 6:00 AM
170	increased awareness of park locations and recreation opportunities	1/3/2022 5:08 AM
171	more pickleball courts	1/2/2022 10:38 PM
172	More climbing structures for kids. It would be nice to have a wall to hit tennis balls against so you can practice hitting.	1/2/2022 8:15 PM
173	discount in classes or events for Carlsbad residents. bike routes within parks or around them.	1/2/2022 7:55 PM
174	More pickleball courts. Pickleball is the only activity at Poinsettia Park which is seemingly always over-capacity.	1/2/2022 6:21 PM
175	More public pool space	1/2/2022 5:47 PM
176	More pickleball courts	1/2/2022 5:24 PM
177	Off leash dog Beach and beach parks	1/2/2022 4:10 PM
178	More Pickleball courts.	1/2/2022 3:58 PM
179	Shade & sitting areas for parents while kids play	1/2/2022 3:54 PM
180	So far, I have been well pleased, can't think of anything	1/2/2022 3:32 PM
181	More small, passive neighborhood parks	1/2/2022 3:29 PM
182	Allowing pickleball to be played on empty tennis courts	1/2/2022 2:51 PM
183	More pickleball courts	1/2/2022 2:14 PM
184	Restrooms	1/2/2022 1:55 PM

## Q2 What would make going to city parks even better?

185	Regular maintenance.	1/2/2022 1:51 PM
186	Clean & safe	1/2/2022 1:49 PM
187	More pickle ball courts	1/2/2022 1:27 PM
188	More pickleball courts	1/2/2022 12:58 PM
189	Parks should be within a short walking distance. Parks should have plentiful flat grassy areas for formal or informal gatherings.	1/2/2022 12:24 PM
190	Swimming at Alga Norte seems too expensive. Consider more resident discounts. We also despise going to Poinsettia during large events because the parking situation is so challenging.	1/2/2022 12:23 PM
191	Pickleball!!	1/2/2022 12:15 PM
192	More pickle ball courts	1/2/2022 11:42 AM
193	A bathroom at the new Buena Vista Park and more shade at all parks (especially playground areas).	1/2/2022 11:23 AM
194	Safety - the skateboarders at Alga Norte are all over the place - including the parking lot. Reinforce the helmet law.	1/2/2022 10:22 AM
195	More events held in the parks (like we went to an art pop-up craft at the library in the garden, but those kind of pop-up events in the parks would be cool too)	1/2/2022 10:02 AM
196	Less homeless people. More dog friendly parks.	1/2/2022 9:29 AM
197	Pickle ball courts that are accessible without ridiculous wait times. Better dog park facilities, get rid of the wood chips.	1/2/2022 9:19 AM
198	Free electric car charging stations. More dog friendly and dog parks. More pickleball courts	1/2/2022 9:02 AM
199	More Pickleball courts especially for challenge level play	1/2/2022 8:56 AM
200	Making village H a leash-free area. It's ridiculous how long this new plan will take. We used to enjoy it all the time, but never go anymore. Very sad...	1/2/2022 8:51 AM
201	Until more City pool lifeguards are hired, rotate lifeguards between Alga Norte Pool and Monroe Street Pool (MSP) so that MSP patrons do not bear the entire burden of the lifeguard shortage. Alga Norte Pool patrons can drive to the MSP between 6:00am and 3:00pm for the next four months since MSP patrons have been driving to the Alga Norte Pool during those hours since September 2021.	1/2/2022 8:37 AM
202	More pickleball courts	1/2/2022 8:22 AM
203	Not sure	1/2/2022 8:20 AM
204	Dog runs, Pickleball courts	1/2/2022 8:12 AM
205	More skateparks, enforce the rules about scooters and bikes and helmets. Maintain the concrete at the parks and sweep the bowls each morning	1/2/2022 6:37 AM
206	Mountain biking trails.	1/2/2022 5:23 AM
207	I would love to see more pickleball courts. The public courts get quite crowded with lengthy wait times.	1/1/2022 11:34 PM
208	Actually have Parks & Recreation DO THEIR JOB! Like keeping Aqua Norte's Spa working for more than a few weeks a year!	1/1/2022 10:41 PM
209	most parks are in good shape	1/1/2022 9:10 PM
210	Pickleball courts and sand volleyball courts.	1/1/2022 8:51 PM
211	Shade and better seating for parents.	1/1/2022 8:48 PM
212	more pickle ball	1/1/2022 8:42 PM
213	More pickleball courts	1/1/2022 8:38 PM
214	more pickleball courts	1/1/2022 8:33 PM

## Parks & Recreation Master Plan Update

215	More play areas for kids	1/1/2022 8:27 PM
216	More pickle ball and tennis courts	1/1/2022 8:20 PM
217	More Tennis And Pickleball courts.	1/1/2022 6:59 PM
218	More of them and bear the coast	1/1/2022 6:56 PM
219	More pickleball courts	1/1/2022 6:39 PM
220	Pickleball	1/1/2022 6:09 PM
221	More Pickle ball courts. One near Kelly Park.	1/1/2022 5:53 PM
222	shaded places to sit water fountains	1/1/2022 5:51 PM
223	More Pickleball courts	1/1/2022 5:44 PM
224	More pickles ball courts	1/1/2022 5:43 PM
225	More Pickleball courts	1/1/2022 5:42 PM
226	no dogs off lease enforced	1/1/2022 5:14 PM
227	Better use of Space. Lots of areas not being utilized, where you could put a pump track/ Bike park/ or Skate Park.	1/1/2022 5:05 PM
228	Either enforce no dogs sign or change the rules	1/1/2022 5:01 PM
229	pickle ball courts	1/1/2022 4:58 PM
230	More pickleball courts More open school fields	1/1/2022 4:40 PM
231	Having a Coastal Park at Ponto with space to watch the sunsets, have picnics, possible 2 story building for cafe and viewing deck.	1/1/2022 4:39 PM
232	Game room	1/1/2022 3:51 PM
233	More pickleball courts (after sports fields for children of Carlsbad)	1/1/2022 3:11 PM
234	Pickleball courts	1/1/2022 2:14 PM
235	More shade around equipment	1/1/2022 1:23 PM
236	More pickleball courts, more dog parks	1/1/2022 1:13 PM
237	more off leash doggie play areas	1/1/2022 1:03 PM
238	have some dog-free parks	1/1/2022 12:12 PM
239	Safety, clean, flexible schedules, more afternoon activities, weekend activities	1/1/2022 11:43 AM
240	More pickleball courts	1/1/2022 11:42 AM
241	I think going to the parks currently is already pretty great.	1/1/2022 11:38 AM
242	More pickleball courts.	1/1/2022 10:49 AM
243	More free time	1/1/2022 10:38 AM
244	More pickleball courts	1/1/2022 10:36 AM
245	More Pickleball courts and less noisy 'blowers'!!	1/1/2022 10:34 AM
246	Having one within walking distance of my home. Please work on the proposed Veteran's Park off Cannon and Faraday.	1/1/2022 9:46 AM
247	Less Homeless people residing in the parks.	1/1/2022 9:34 AM
248	Pickle ball and senior activities	1/1/2022 9:29 AM
249	Trees shade and green space	1/1/2022 9:25 AM
250	More Pickleball courts so I didn't have to wait until people leave.	1/1/2022 9:15 AM

## Q2 What would make going to city parks even better?

251	Adding more pickleball courts	1/1/2022 8:57 AM
252	No vagrants. Updated bathrooms.	1/1/2022 8:43 AM
253	Pickleball courts and lots of them	1/1/2022 8:42 AM
254	Maintenance	1/1/2022 8:32 AM
255	Please build a dedicated bicycle park. I know Veterans is on the books but it's going far to slow. It's been how many years since the city recognized the need?	1/1/2022 7:57 AM
256	pickle ball courts	1/1/2022 7:55 AM
257	Convert some of the under utilized tennis courts to dedicated pickleball courts.	1/1/2022 7:53 AM
258	more walking trails	1/1/2022 7:43 AM
259	More Pickleball courts	1/1/2022 7:38 AM
260	More pickleball courts so that they aren't so crowded. Allowing dogs on leash. Outdoor fitness classes	1/1/2022 7:38 AM
261	More easy walking trails within the parks.	1/1/2022 7:27 AM
262	Permanent removal of homeless individuals. For example, Pine Park and McGee, the situation was cleaned up and as of this week, worse than ever. What is the homeless task force and millions of \$\$\$ doing.?????	1/1/2022 7:01 AM
263	Pickleball courts at more parks. There is often a wait to play at Poinsettia.	1/1/2022 6:59 AM
264	Handicap accessible and special needs equipment for kids in wheelchairs	1/1/2022 6:42 AM
265	open play pickle ball courts.	1/1/2022 5:34 AM
266	Sometimes crowded	1/1/2022 3:15 AM
267	Indoor basketball and rec center at Poinsettia park. Double the pickleball courts at least.	1/1/2022 1:26 AM
268	More Pickleball courts die to extreme demand	12/31/2021 11:42 PM
269	Outdoor tennis and pickle ball	12/31/2021 10:29 PM
270	More Pickleball courts!	12/31/2021 9:45 PM
271	Shade Trails that are connected (the hiking and biking trails are super short and disconnected). safe pathways for kids to walk and bike to parks.	12/31/2021 9:34 PM
272	More pickle ball families 👍😊	12/31/2021 9:13 PM
273	More pickleball courts	12/31/2021 8:47 PM
274	1. Replace benches to Models homeless and transients cannot sleep. 2. Enforce to keep off dogs unless it's a dog park.	12/31/2021 8:44 PM
275	add pickleball courts to Alga norte or nearby that area	12/31/2021 8:39 PM
276	No homeless people	12/31/2021 8:12 PM
277	more running trails	12/31/2021 6:39 PM
278	More pickleball courts	12/31/2021 6:38 PM
279	Employees who know how to greet & interact with the public.	12/31/2021 6:12 PM
280	Bike paths that are off the road to get to the parks.	12/31/2021 6:02 PM
281	Allow dogs	12/31/2021 5:41 PM
282	More parking, more sun protection.	12/31/2021 5:40 PM
283	Outdoor pickleball courts	12/31/2021 5:33 PM
284	I use Poinsettia Park all the time and with the improvements currently in the works, it's PERFECT!!	12/31/2021 4:56 PM

## Parks & Recreation Master Plan Update

285	More Pickleball Courts	12/31/2021 4:35 PM
286	Allow leashed dogs	12/31/2021 4:25 PM
287	Getting rid of the homeless who spoil it for the rest of us.	12/31/2021 4:22 PM
288	I go for pickleball at Poinsettia Park	12/31/2021 4:18 PM
289	More Pickleball courts	12/31/2021 4:15 PM
290	More pickleball courts outside and available.	12/31/2021 4:13 PM
291	More pickleball courts	12/31/2021 3:55 PM
292	Adequate parking	12/31/2021 3:52 PM
293	more pickleball cts	12/31/2021 3:49 PM
294	Safe bike paths to get to the parks, bike racks in the parks	12/31/2021 3:47 PM
295	Voting at Alga Norte was great.	12/31/2021 3:44 PM
296	Aviara community park needs to have another exit route.	12/31/2021 3:26 PM
297	More seating near shade trees	12/31/2021 3:24 PM
298	More Pickleball Courts	12/31/2021 3:05 PM
299	Relaxing areas with pleasant surroundings.	12/31/2021 3:05 PM
300	More pickleball courts	12/31/2021 2:59 PM
301	More pickleball courts	12/31/2021 2:58 PM
302	more pickleball courts	12/31/2021 2:58 PM
303	more pickleball courts	12/31/2021 2:55 PM
304	More pickleball courts	12/31/2021 2:55 PM
305	covered picnic areas	12/31/2021 2:53 PM
306	to keep clean avoid hazards such as those skate boarding on sidewalks as their error causes other suffering.	12/31/2021 2:43 PM
307	More Pickleball courts	12/31/2021 2:26 PM
308	More lifeguards at Monroe st pool! Less homeless in downtown parks...a sad situation for all!	12/31/2021 2:23 PM
309	More pickleball courts	12/31/2021 2:20 PM
310	more parking at some of the athletic fields	12/31/2021 2:15 PM
311	More of them within walking or biking distance. Large parks.	12/31/2021 2:09 PM
312	more pickleball courts	12/31/2021 1:43 PM
313	more pickle ball courts	12/31/2021 1:40 PM
314	More Pickleball Courts	12/31/2021 1:40 PM
315	We used to enjoy the Jazz festivals during the summer. But it was a little bit of a hassle to attend at a park other than the one near me.	12/31/2021 1:34 PM
316	Trails or walkable connections between parks.	12/31/2021 1:33 PM
317	Clean bathrooms, a broader range of activities (splash pads, frisbee golf, bocce ball, ninja course)	12/31/2021 1:15 PM
318	Beach volleyball courts	12/31/2021 1:14 PM
319	More tennis courts, dog parks, bike trails, exercise trails and play structures. Keeping them free of homeless and safe for kids.	12/31/2021 1:03 PM
320	clean, open toilets	12/31/2021 1:00 PM

## Q2 What would make going to city parks even better?

321	Pickleball courts	12/31/2021 12:59 PM
322	More Pickleball	12/31/2021 12:52 PM
323	More pickelball courts	12/31/2021 12:40 PM
324	More outdoor Pickleball courts throughout the park system.	12/31/2021 12:24 PM
325	Clean bathrooms, places to bike and skateboard off the street, shade, structures for older kids 10+, I hate to say it but less homeless people sleeping in the parks. :(	12/31/2021 12:14 PM
326	More pickleball courts	12/31/2021 12:13 PM
327	More Pickleball courts	12/31/2021 12:08 PM
328	more pickleball courts	12/31/2021 12:07 PM
329	Coastal Park in South carlsbad.	12/31/2021 11:54 AM
330	More pickleball courts	12/31/2021 11:45 AM
331	More pickleball	12/31/2021 11:43 AM
332	more picnic tables.	12/31/2021 11:35 AM
333	More Pickleball courts.	12/31/2021 11:31 AM
334	More parking spaces	12/31/2021 11:31 AM
335	No new ideas	12/31/2021 11:30 AM
336	Pickleball's Local Popularity Is Outgrowing Available Facilities. I would like to see more pickleball courts and more multipurpose tennis courts that would allow you to play pickleball on the tennis courts.	12/31/2021 11:24 AM
337	More shade. More tables with benches.	12/31/2021 11:20 AM
338	Keep them open! Keep events	12/31/2021 11:19 AM
339	Open beyond 10pm	12/31/2021 11:15 AM
340	i can't think of anything	12/31/2021 11:10 AM
341	more pickleball courts	12/31/2021 11:06 AM
342	More Pickleball courts	12/31/2021 11:05 AM
343	Put a park in at s Ponto	12/31/2021 11:02 AM
344	More Pickleball courts	12/31/2021 10:57 AM
345	pickleball courts	12/31/2021 10:54 AM
346	Allow leashed dogs. More baseball fields. Our baseball fields are often used by soccer and lacrosse instead of baseball.	12/31/2021 10:46 AM
347	Pickleball courts!	12/31/2021 10:44 AM
348	More Pickleball court	12/31/2021 10:42 AM
349	Most are well planned and kept clean and neat for various activities.	12/31/2021 10:41 AM
350	If your ads would feature the white people that actually paid for all these parks.	12/31/2021 10:38 AM
351	More pickleball courts	12/31/2021 10:30 AM
352	nothing. they are fine as is	12/31/2021 10:24 AM
353	Better surface on Calavera pedestrian/bike trail bridges. Too slippery.	12/31/2021 10:22 AM
354	More pickleball courts with better spacing between courts, air circulation, and sound dampening on the courts.	12/31/2021 10:19 AM
355	Pickle ball courts, dog parks, bathrooms	12/31/2021 10:12 AM

## Parks & Recreation Master Plan Update

356	More designated pickleball courts	12/31/2021 10:11 AM
357	If you built more places for kids to skateboard, that would be great.	12/31/2021 10:11 AM
358	More pickleball courts	12/31/2021 10:04 AM
359	More pickleball courts	12/31/2021 9:59 AM
360	More pickleball courts please. The wait time for a game can be over 30 minutes at times.	12/31/2021 9:58 AM
361	More Pickelball courts	12/31/2021 9:56 AM
362	More pickleball courts	12/31/2021 9:47 AM
363	More pickleball courts	12/31/2021 9:43 AM
364	Less home challenged individuals	12/31/2021 9:41 AM
365	Outdoor pickleball courts	12/31/2021 9:35 AM
366	nice and great pickleball courts!!	12/31/2021 9:28 AM
367	Walking trails or walking track, community centers with activities	12/31/2021 9:12 AM
368	More pickleball courts and restrooms	12/31/2021 9:12 AM
369	Free parking - increased toilet facilities.	12/31/2021 9:11 AM
370	more swimming pools	12/31/2021 9:11 AM
371	More facilities for sports activities, especially more Pickleball courts.	12/31/2021 9:08 AM
372	No homeless people Allowing dogs on leash More art	12/31/2021 9:06 AM
373	Ensuring they are clean and kept up	12/31/2021 9:05 AM
374	Less aggressive dogs at the Alga Norte dog park	12/31/2021 9:03 AM
375	We need lots more public pickleball courts with lights so working people can enjoy playing pb aftr work and play til 10pm!!!	12/31/2021 9:03 AM
376	Food vendors, maybe. I'd like to see what we would get if we allowed food trucks.	12/31/2021 9:02 AM
377	maybe an adults section?	12/31/2021 8:54 AM
378	Letting me take my dog into more parks	12/31/2021 8:53 AM
379	more pickleball courts	12/31/2021 8:52 AM
380	more pickle ball courts and at various locations. These are the most used of the city's sports facilities.	12/31/2021 8:51 AM
381	More pickleball courts please! If they can't be built then at least turn some tennis courts into pickleball courts please!	12/31/2021 8:45 AM
382	Pickle ball courts	12/31/2021 8:37 AM
383	They're nice now	12/31/2021 8:34 AM
384	1. More native plants, making native plants a priority over exotic plants. This supports native wildlife, and essentially expands the usable area of local preserves. 2. I really like the outdoor workout area currently being installed at Calavera Community Park. Great use of outdoor space. 3. Holiday Park is a lovely outdoor space with the huge downside of noise pollution from the freeway. It would be great to collaborate with State resources to build a wall along the freeway at that location in order to reduce the significant noise pollution that makes that park unpleasant to visit.	12/31/2021 8:33 AM
385	More skateboard facilities	12/31/2021 8:31 AM
386	More dedicated pickleball courts!!!!!!	12/31/2021 8:30 AM
387	More pickleball courts and dog parks.	12/31/2021 8:29 AM
388	Ample parking Updated, clean facilities	12/31/2021 8:26 AM

## Q2 What would make going to city parks even better?

389	A bike park, pump track, another city pool.	12/31/2021 8:26 AM
390	More tennis courts	12/31/2021 8:24 AM
391	More Pickleball courts	12/31/2021 8:23 AM
392	Connection to and extension of trails. Bocce Ball courts available at nearby park.	12/31/2021 8:21 AM
393	Improved lighting ( LED ) is needed at the Valley St and Basswood CHS courts. There is more per person usage on these tennis courts over the course of a year than the 2 high school football fields that we all paid millions to fund. Secondly, a large acre off leash dog park is desperately needed.	12/31/2021 8:20 AM
394	More bathrooms. More pickleball courtr	12/31/2021 8:16 AM
395	More Pickleball courts	12/31/2021 8:14 AM
396	Additional pickleball courts at Poinsettia Park	12/31/2021 8:14 AM
397	More parks with hiking trails, more pickleball courts, more play equipment for children, and a dog beach.	12/31/2021 8:08 AM
398	More shade, more trail maps	12/31/2021 8:07 AM
399	Pickleball Courts	12/31/2021 8:07 AM
400	more public pools. more dog parks. more pickle ball courts	12/31/2021 8:05 AM
401	More pickleball courts	12/31/2021 8:04 AM
402	If homeless people didn't leave trash and drug paraphernalia. Some parks are very clean, but some have homeless problems.	12/31/2021 8:03 AM
403	Not enough pickle all courts in the city always a wait	12/31/2021 8:01 AM
404	having a park within a 10-minute walk from my home. Carlsbad's parks are not very very accessible.	12/31/2021 7:58 AM
405	Additional Pickleball Courts	12/31/2021 7:57 AM
406	No homeless	12/31/2021 7:55 AM
407	We would like more pickleball courts. The Poinsettia Park courts are very crowded and you have to wait so long to play.	12/31/2021 7:54 AM
408	More recreational pickleball courts. It's the fastest growing sport in America for young and old alike	12/31/2021 7:53 AM
409	Nothing, they are already great!	12/31/2021 7:52 AM
410	More pickleball courts at Poinsettia park	12/31/2021 7:51 AM
411	more pickleball courts. because the challenge courts are monopolized by the the best players for 2 to 3 hours at a time until they are too tired to play many players do not go there anymore because of that. because the wait time to play on challenge courts is usually 20 to 30 mins or more while the same 4 people have a great day the rest wait then lose and then wait forever that sucks. no oter courts allow that around the country i have played many states and places carlsbad is the only place that would allow the same players to monopolize courts for as long as they please. usually you play 2 with your partner then split up or stay together and sit and wait for next game together this way it keeps things fair and equitable! for all players to enjoy your parks. i dont think you all know how bad it is and never intended it to be dominated by 4 or 5 players that are the best and therefore play continuously for hours i cant tell you how many times i and many others have showed up to play and left in disgust after sitting for 30 mins then losing to them only to sit for 30 again so we just leave if this policy changed it would be a much improved and happier place to play. because now what it means is wait and lose all day long its the least fun place i have ever played and dread going there. so keep the 2 courts as advanced players but you cannot allow unlimited play for the 4 winners it does not work! play 2 and split up or sit and stay with your partner andwait for next game like everyone else...this is how it is done at all other courts i have played i have played many places im still amazed the city would allow this kind of selfish domination of its public facilities its awe full.	12/31/2021 7:50 AM
412	More Pickleball courts	12/31/2021 7:43 AM

## Parks & Recreation Master Plan Update

413	More Pickleball courts	12/31/2021 7:40 AM
414	More parks in general and more pickleball courts	12/31/2021 7:37 AM
415	Better childrens facilities	12/31/2021 7:36 AM
416	More pools pickle ball courts and hiking trails.	12/31/2021 7:36 AM
417	Concert the Poinsettia tennis courts to pickleball courts.	12/31/2021 7:36 AM
418	More nature trails	12/31/2021 7:33 AM
419	More pickle ball courts	12/31/2021 7:32 AM
420	Pickleball courts	12/31/2021 7:32 AM
421	more pickleball courts	12/31/2021 7:31 AM
422	Pump tracks, mountain bike flow and jump trails.	12/31/2021 7:31 AM
423	Pickleball courts	12/31/2021 7:30 AM
424	more of them!	12/31/2021 7:28 AM
425	More pickleball courts.	12/31/2021 7:22 AM
426	More pools	12/31/2021 7:19 AM
427	More Pickleball courts	12/31/2021 7:17 AM
428	More pickleball	12/31/2021 6:57 AM
429	More pickleball courts More walking trails	12/31/2021 6:55 AM
430	More Pickleball courts	12/31/2021 6:53 AM
431	Regular visits by security / safety personnel	12/31/2021 6:48 AM
432	More pickelball courts	12/31/2021 6:47 AM
433	More pickleball	12/31/2021 6:45 AM
434	Nothing. I am happy with the current parks.	12/31/2021 6:43 AM
435	More pickleball courts	12/31/2021 6:43 AM
436	More pickleball courts.	12/31/2021 6:43 AM
437	We stopped going to the parks in the village- too many homeless. Never know who is wasted or just plain unstable. Creepy houseless persons with their decrepit RVs. We do NOT feel safe. Pre covid, I even stopped sending them to camps at the village parks.	12/31/2021 6:43 AM
438	Additional pickleball facilities	12/31/2021 6:39 AM
439	More Pickleball courts.	12/31/2021 6:33 AM
440	The one I go to by the beach at Tamarack is perfect	12/31/2021 6:26 AM
441	Pickleball	12/31/2021 6:21 AM
442	If have hiking trails connected to them.	12/31/2021 6:21 AM
443	More pickleball courts A lot more..	12/31/2021 6:20 AM
444	More Pickleball courts in Carlsbad	12/31/2021 6:15 AM
445	Better parking and more pickleball courts	12/31/2021 6:15 AM
446	More Pickleball courts.	12/31/2021 6:09 AM
447	Safety. Clear out the vagrants.	12/31/2021 6:09 AM
448	Ability to take dogs to more of the parks	12/31/2021 6:02 AM
449	Keep ensuring the equipment is maintained well & modernized, and that the parks are safe for	12/31/2021 5:59 AM

## Q2 What would make going to city parks even better?

visitors, i.e., no drugs, homeless camps, etc.

450	25 more pickleball courts	12/31/2021 5:51 AM
451	More Pickleball courts	12/31/2021 5:51 AM
452	More pickleball courts	12/31/2021 5:50 AM
453	More pickleball courts	12/31/2021 5:45 AM
454	More pickleball courts, more parking.	12/31/2021 5:40 AM
455	A place to get away from urbanization.	12/31/2021 5:25 AM
456	A better system for housing homeless people (available homeless shelter and prohibition of over night sleeping in our parks and hiking areas) We need restroom facilities in our open area hiking areas (Hosp grove and calaveras lake.	12/31/2021 5:20 AM
457	More Pickleball and kid zones (water features during summer for them to get wet)	12/31/2021 5:12 AM
458	More pickle all courts, more enclosed dog parks	12/31/2021 5:06 AM
459	More Pickleball courts	12/31/2021 5:06 AM
460	More pickleball courts	12/31/2021 5:06 AM
461	Keeping the kids play equipment clean and working. Not excusing dogs from the perimeter of most Carlsbad parks	12/31/2021 4:54 AM
462	Adding a bathroom to the Hosp Grove Park! If possible (and reasonable), having more areas for dogs would be great, since we are such a dog-friendly city.	12/31/2021 4:49 AM
463	More pickleball courts	12/31/2021 4:09 AM
464	More available pickleball courts.	12/31/2021 3:09 AM
465	More Pickleball courts	12/31/2021 2:37 AM
466	The Poinsettia pickleball courts are to crowded. It would be better if some of the many unused tennis courts were converted to pickleball. Or new outdoor courts opened in North Carlsbad.	12/31/2021 2:05 AM
467	More Pickleball courts. Open spaces for dogs and owners to roam. More dedicated baseball fields.	12/31/2021 12:46 AM
468	more pickleball courts	12/31/2021 12:30 AM
469	Remove all sand.	12/31/2021 12:21 AM
470	More pickleball courts please :) !!	12/31/2021 12:09 AM
471	More trees, trails, pickleball courts, soccer fields, football field goal posts, old kid (teen) play structure.	12/30/2021 11:41 PM
472	Trails or sidewalks especially for the larger properties	12/30/2021 11:34 PM
473	Additional parking spots.	12/30/2021 11:31 PM
474	The European style of a series exercise equipment challenges.	12/30/2021 11:30 PM
475	Specific things for sports, like lines, goals, goalposts, and courts for pickleball	12/30/2021 11:29 PM
476	Our south western section of Carlsbad is underserved from a parks&rec point of view.	12/30/2021 11:20 PM
477	More shade, more walking areas (like track material), clean bath facilities	12/30/2021 11:20 PM
478	More pickleball courts please.	12/30/2021 11:12 PM
479	Less homeless people hanging out at them. Cleaner restrooms	12/30/2021 11:11 PM
480	More outdoor pickleball	12/30/2021 11:07 PM
481	Less wait time at the courts pickle ball. And more shade	12/30/2021 11:05 PM
482	Pickleball courts	12/30/2021 11:04 PM

## Parks & Recreation Master Plan Update

483	Having a city park in the south Carlsbad beach area	12/30/2021 11:01 PM
484	public pickleball courts	12/30/2021 11:00 PM
485	More out door Pickkebalk courts	12/30/2021 10:59 PM
486	Not sure	12/30/2021 10:54 PM
487	Parking at Stagecoach needs to be improved. There is not enough parking on either side. Also, please make sure to adjust the water on the grass, because there are times when it is just too muddy - the grass is not getting a chance to get dry (even in summer). Also, the park next to La Costa Heights Elementary School is not a dog park, but there are always too many dogs there! And the dog owners do not pick up after their pets :(	12/30/2021 10:54 PM
488	More pickleball courts	12/30/2021 10:45 PM
489	Pickleball courts and dedicated dog parks	12/30/2021 10:31 PM
490	Pickleball courts, hiking trails, clean bathrooms, trees	12/30/2021 10:28 PM
491	More pickleball courts	12/30/2021 10:20 PM
492	Off road parking and toilets	12/30/2021 10:20 PM
493	More plays for big kids	12/30/2021 10:19 PM
494	They're pretty great as they are. We don't have an archery range in north county. That would be awesome.	12/30/2021 10:16 PM
495	More trash cans / less trash around. Removal of agressive skaters or vagrants.	12/30/2021 10:12 PM
496	Completion of Veterans Park! Larger and cleaner restrooms.	12/30/2021 10:11 PM
497	Young grandkids. Mine are all grown now!!	12/30/2021 10:10 PM
498	Encouraging people to clean up trash after them on Saturdays & Sunday's or have crews clean on Sunday morning particularly when there is a large park event such as a softball tournament.	12/30/2021 10:09 PM
499	Better animal control	12/30/2021 10:07 PM
500	Less restrictions to use recreation facilities	12/30/2021 10:04 PM
501	Walking trails without bikes	12/30/2021 10:02 PM
502	Trees, grass, pickleball courts,	12/30/2021 10:01 PM
503	More community gardens in the parks, like the Pine Avenue Park.	12/30/2021 9:57 PM
504	dog parks organized clean and so nice!	12/30/2021 9:53 PM
505	More hiking trail access leading to, in and around the parks. Pull-up bars at each trailhead near the park! Balance of trails and open spaces. Keep the area within the parks open and dispersed (i.e. not crowded).	12/30/2021 9:53 PM
506	Outdoor pickleball courts available at more of the parks	12/30/2021 9:51 PM
507	Hard to say, they're pretty darn good.	12/30/2021 9:51 PM
508	If dogs would not be there. People bring their dogs, disregarding the sighs.	12/30/2021 9:50 PM
509	More shaded areas	12/30/2021 9:45 PM
510	No dogs, or at least enforced leashing and curbing. It is disgusting to have little kids run into dog waste when playing in the grass at a park.	12/30/2021 9:36 PM
511	More walking paths.	12/30/2021 9:35 PM
512	Bathrooms, shade, maybe splash pads.	12/30/2021 9:31 PM
513	Walking trails, and fewer dog parks.	12/30/2021 9:23 PM
514	Ply structures and climbing structures for older kids too. Bike parks bike parks bike parks!!!! Bmx and mountain bikes. Trails	12/30/2021 9:20 PM

## Q2 What would make going to city parks even better?

515	MORE PICKLEBALL COURTS!!!!	12/30/2021 9:19 PM
516	Make more dog friendly parks. A new park or open public space should be the priority at South Ponto and Avenida Encinas instead of commercial development.	12/30/2021 9:17 PM
517	More activities for the kids and a skate park at every park	12/30/2021 9:16 PM
518	More of them	12/30/2021 9:09 PM
519	Pickleball courts	12/30/2021 8:55 PM
520	More of them and connected to existing trails	12/30/2021 8:52 PM
521	More pickleball courts	12/30/2021 8:51 PM
522	Less emphasis on dogs. Parks should be focused on people.	12/30/2021 8:50 PM
523	More off-leash dog parks, without wood chips.	12/30/2021 8:47 PM
524	More pickleball courts	12/30/2021 8:43 PM
525	More trees	12/30/2021 8:43 PM
526	More Pickleball courts and parking as it's getting busy! Lighting for parking so it's safe.	12/30/2021 8:39 PM
527	Nothing I think they're great	12/30/2021 8:35 PM
528	Bike parks	12/30/2021 8:35 PM
529	Installation of more pickleball courts.	12/30/2021 8:33 PM
530	More tennis and basketball courts and soccer fields	12/30/2021 8:31 PM
531	More pickleball courts	12/30/2021 8:26 PM
532	More pickleball courts.	12/30/2021 8:25 PM
533	Dogs allowed.	12/30/2021 8:23 PM
534	More Pickelball courts	12/30/2021 8:19 PM
535	Pickleball courts!	12/30/2021 8:19 PM
536	Pickleball	12/30/2021 8:18 PM
537	Lots of trees, water features	12/30/2021 8:16 PM
538	Water bottle refill stations, bike maintenance station,	12/30/2021 8:16 PM
539	More pickleball courts with a bathroom close by. We are old most of us. This is the most healthy thing we can do.	12/30/2021 8:12 PM
540	Fewer homeless people	12/30/2021 8:10 PM
541	Where absent, bathroom facilities so I'm not concerned about going to a park with kids.	12/30/2021 8:08 PM
542	More Pickleball courts.	12/30/2021 8:05 PM
543	We love city parks but don't go as much any more since my kids are older	12/30/2021 7:58 PM
544	Nothing. Love our parks!	12/30/2021 7:54 PM
545	More Pickleball	12/30/2021 7:53 PM
546	more pickleball courts	12/30/2021 7:50 PM
547	More pickleball courts, and Paddletennis courts	12/30/2021 7:49 PM
548	More pickleball courts and parking	12/30/2021 7:48 PM
549	More Pickleball courts	12/30/2021 7:48 PM
550	Nonsmoking/ vaping at skatepark. More free swim at pools. It is full with lessons most days.	12/30/2021 7:42 PM
551	Bigger dog park in Carlsbad.	12/30/2021 7:41 PM

## Parks & Recreation Master Plan Update

552	Cleaner parks, including more consistent trash removal from receptacles	12/30/2021 7:41 PM
553	If they were safe. While I sympathize with the homeless situation their presence makes me feel afraid.	12/30/2021 7:41 PM
554	More trees and shade maybe. More art events after the pandemic	12/30/2021 7:38 PM
555	More restrooms that are kept clean. More pickleball courts - it's the fastest growing sport in the US - has been for at least 4 years running yet Carlsbad is WAY behind in representing the sport. The number of tennis courts that sit idle is ridiculous. At the very least, double line half of the courts & have nets available just like they do at Cottonwood. At Poinsettia have one day a week that is men only & one for women only. Innovative & INCLUSIVE playgrounds	12/30/2021 7:30 PM
556	Additional parking More comfortable seating in bleachers	12/30/2021 7:28 PM
557	Pickleball	12/30/2021 7:25 PM
558	Bike paths to each one	12/30/2021 7:23 PM
559	Quieter settings. Fewer homeless.	12/30/2021 7:14 PM
560	More pickleball courts!!!	12/30/2021 7:11 PM
561	More pickle ball courts	12/30/2021 7:08 PM
562	More pickleball courts!	12/30/2021 7:07 PM
563	Parking meters for those who don't live in carlsbad. Are parks are full from people outside our city	12/30/2021 7:03 PM
564	Shady areas, bathrooms	12/30/2021 7:02 PM
565	Allow leashed dogs at all parks	12/30/2021 7:01 PM
566	Up to date schedules available on your website. Holiday hours	12/30/2021 6:59 PM
567	Tennis courts, Walking trails	12/30/2021 6:58 PM
568	clean bathrooms	12/30/2021 6:58 PM
569	the city coordinate personel to develop pickleball leagues or other kind of activities.	12/30/2021 6:55 PM
570	A lighted walking/running track	12/30/2021 6:50 PM
571	Better trail maintenance	12/30/2021 6:48 PM
572	If I had more time	12/30/2021 6:46 PM
573	More native plants and perhaps a butterfly garden ie plant milkweed for monarch butterflies. More trees and natural areas.	12/30/2021 6:45 PM
574	More accessible features	12/30/2021 6:43 PM
575	More shade over the play structures	12/30/2021 6:41 PM
576	There needs to be more pickle ball courts at Poinsettia. Some of the existing tennis courts need to be predesignated for pickle ball. It would also be nice to have pickle ball courts at other park locations throughout the city.	12/30/2021 6:34 PM
577	Easier parking at some	12/30/2021 6:34 PM
578	More pickle ball courts.	12/30/2021 6:33 PM
579	Pickleball courts at Calavera would be nice.	12/30/2021 6:29 PM
580	Pickleball courts	12/30/2021 6:27 PM
581	Yes	12/30/2021 6:26 PM
582	Have a non concrete walking path around the perimeter.	12/30/2021 6:21 PM
583	ore dog parks	12/30/2021 6:17 PM
584	More dog parks.	12/30/2021 6:17 PM

## Q2 What would make going to city parks even better?

585	More Masters swimming times with coaches	12/30/2021 6:14 PM
586	More Pickleball courts	12/30/2021 6:14 PM
587	More parking	12/30/2021 6:12 PM
588	More pickle ball courts	12/30/2021 6:10 PM
589	remove homeless drug addicts	12/30/2021 6:10 PM
590	cleaner restrooms especially at Pine ave & Magee	12/30/2021 6:10 PM
591	Accommodations for the wheelchair bound	12/30/2021 6:09 PM
592	Not sure I can think of anything.	12/30/2021 6:09 PM
593	More pickleball courts Designated soccer field hours for adults	12/30/2021 6:07 PM
594	More Pickleball courts	12/30/2021 6:06 PM
595	Less homeless people. More open space for hiking and walking	12/30/2021 6:06 PM
596	Bike parks and another swim facility. Alga Norte is now like a private facility for NCA swimmers. There are never enough lanes.	12/30/2021 6:03 PM
597	More parks and more green spaces	12/30/2021 6:01 PM
598	More of them	12/30/2021 5:59 PM
599	Pretty good now but opening Monroe would be great	12/30/2021 5:59 PM
600	I swim at Alga Norte at least once every week. I would go more often if the pool opened earlier. It opens at 6 AM during the week. I wish it opened much earlier on the weekends - it's too late for me to use.	12/30/2021 5:56 PM
601	20 more pickleball courts!!!	12/30/2021 5:52 PM
602	Well-maintained playgrounds and lawn for playing.	12/30/2021 5:52 PM
603	More pickle ball courts	12/30/2021 5:51 PM
604	More pickleball courts	12/30/2021 5:50 PM
605	Fewer humans	12/30/2021 5:48 PM
606	pickleball courts	12/30/2021 5:47 PM
607	more dog parks, with more cover/shade and grass	12/30/2021 5:44 PM
608	Pickleball courts.	12/30/2021 5:44 PM
609	More seating in the shade.	12/30/2021 5:44 PM
610	Pickleball	12/30/2021 5:43 PM
611	Find homes for the homeless.	12/30/2021 5:41 PM
612	More Pickleball courts.	12/30/2021 5:41 PM
613	more tennis courts at some of the parks such as Calavera Hills park.	12/30/2021 5:41 PM
614	If my dog could go with me	12/30/2021 5:40 PM
615	The parks are great, the Alga Norte spa is a problem staying operational.	12/30/2021 5:33 PM
616	Enforce no smoking and cameras at night	12/30/2021 5:33 PM
617	More regularly scheduled programs like bird and plant ID at different parks	12/30/2021 5:33 PM
618	Barbeques	12/30/2021 5:31 PM
619	Clean tables to eat on	12/30/2021 5:29 PM
620	No Dogs and enforcing no dogs allowed policy	12/30/2021 5:29 PM
621	More Pickleball courts	12/30/2021 5:26 PM

## Parks & Recreation Master Plan Update

622	better parking	12/30/2021 5:25 PM
623	More PICKLEBALL courts, PLEASE!	12/30/2021 5:22 PM
624	More Pickleball courts	12/30/2021 5:21 PM
625	More pickleball courts	12/30/2021 5:16 PM
626	More trails connected to parks or nearby	12/30/2021 5:16 PM
627	I love them being open, bathrooms open. I like the open space, lots of benches helps.	12/30/2021 5:16 PM
628	Prosecute the riff raff thugs who consistently give security, families, and young kids trouble without any real consequences. This is mainly a skate park issue at Alga. The same handful bad apples ruin the park experience over and over for the vast majority of residents and visitors.	12/30/2021 5:15 PM
629	They are already great	12/30/2021 5:14 PM
630	Clear signage, parking info	12/30/2021 5:12 PM
631	More community gardens nearby to keep attracting community minded peoples attention to those amenities and parks.	12/30/2021 5:11 PM
632	More shade and community events	12/30/2021 5:10 PM
633	Safety is essential, they are clean and well maintained.	12/30/2021 5:10 PM
634	Fewer homeless people using the parks inappropriately	12/30/2021 5:08 PM
635	Occasional patrols for safety	12/30/2021 5:08 PM
636	Active live web cam of (pickleball) courts to determine how busy it is prior to driving to Poinsettia.	12/30/2021 5:08 PM
637	Bike trail @ Veterans' Park	12/30/2021 5:07 PM
638	Access to dog friendly space. Walking paths Cleaner and safer bathrooms Shade/covered dugouts at Poinsettia park. Better more organized parking lots	12/30/2021 5:07 PM
639	More shade on play structures. More parking at some parks. Water play areas for kids.	12/30/2021 5:06 PM
640	Less homeless	12/30/2021 5:05 PM
641	Parking at Poinsettia	12/30/2021 5:05 PM
642	Pickleball courts are always so crowded. I like to play on competitve courts and the wait is too long. The sport is growing faster than anyone can keep up so now I belong to Castle Creek. It sucks because Poinsettia is a 10 minute drive and CC is 30.	12/30/2021 5:04 PM
643	Removing the homeless that live there.	12/30/2021 5:04 PM
644	More pickleball courts.	12/30/2021 5:03 PM
645	Safety	12/30/2021 5:02 PM
646	Additional trails	12/30/2021 5:01 PM
647	More open swim time.	12/30/2021 4:59 PM
648	More natural spaces (keep the natural ecosystem rather than turn it all into a developed park)	12/30/2021 4:54 PM
649	More Skateboard parks. More MOuntain bike trails.	12/30/2021 4:53 PM
650	Outdoor work out equipment, more events	12/30/2021 4:52 PM
651	Not much. I think Carlsbad has already done a great job. At least, for the area within a couple of miles from my home.	12/30/2021 4:52 PM
652	More Pickleball courts	12/30/2021 4:51 PM
653	later swim times at Alga Norte swim complex. Turning more of the tennis courts into Pickleball courts at Poinsettia Park or add courts to other parks.	12/30/2021 4:49 PM

## Q2 What would make going to city parks even better?

654	More pickleball courts	12/30/2021 4:47 PM
655	Allowing dogs in more parks.	12/30/2021 4:46 PM
656	Improved/updated playgrounds and clean bathrooms with soap.	12/30/2021 4:46 PM
657	More benches and places where small groups (5 and less) can meet. Also, prohibiting sleeping in the park.	12/30/2021 4:46 PM
658	Allowing dogs	12/30/2021 4:45 PM
659	It would be great if there were some beach parks. It would be nice if the homeless had their own areas so that they wouldn't disturb those who find them bothersome.	12/30/2021 4:45 PM
660	More solar panels that provide shaded parking.	12/30/2021 4:45 PM
661	Better, safer and more abundant parking. Better and cleaner drinking fountains and restrooms.	12/30/2021 4:44 PM
662	permission to walk my dog on leash	12/30/2021 4:43 PM
663	More trails	12/30/2021 4:42 PM
664	Green space, walkways	12/30/2021 4:41 PM
665	Allow leased dogs to be walked.	12/30/2021 4:40 PM
666	Volleyball courts. I'm not sure why you dedicated so much space to the dog park at poinsettia. That was disappointing	12/30/2021 4:38 PM
667	More swim lap lanes. More hiking trails and easy parking at trailheads.	12/30/2021 4:37 PM
668	Having the park grass area's for families. All I see is youth groups out ripping the park open area's up playing soccer.	12/30/2021 4:34 PM
669	Within walking distance. Can't drive to them.	12/30/2021 4:31 PM
670	I'm a swimmer, and use the Alga Norte Aquatic facility.	12/30/2021 4:31 PM
671	Open 50m lanes at Alga Norte Aquatic Center	12/30/2021 4:30 PM
672	It would be better if it felt safer. Some of the parks have people doing drugs.	12/30/2021 4:29 PM
673	please do not let homeless take over a portion of a park	12/30/2021 4:28 PM
674	Food trucks, wine bar, local arts and stuff	12/30/2021 4:27 PM
675	Some grills at poinsettia park.	12/30/2021 4:26 PM
676	Skateparks Trees	12/30/2021 4:25 PM
677	More walking paths that add mileage	12/30/2021 4:24 PM
678	More trees	12/30/2021 4:24 PM
679	Speed up completion of construction projects (e.g. Poinsettia park)	12/30/2021 4:24 PM
680	Safe play apparatus for children under 8.	12/30/2021 4:20 PM
681	More availability of handicap parking spots.	12/30/2021 4:19 PM
682	More pickleball courts	12/30/2021 4:17 PM
683	Re-open lap swimming hours at Monroe Street Pool	12/30/2021 4:17 PM
684	If there was a park for meditation or mind clearing. One with a fountain and quiet zone. No kids.	12/30/2021 4:16 PM
685	All dogs on leashes & an alternative for houseless people	12/30/2021 4:15 PM
686	Safer	12/30/2021 4:13 PM
687	More recreation and play equipment	12/30/2021 4:13 PM
688	More pickle ball courts	12/30/2021 4:12 PM

## Parks & Recreation Master Plan Update

689	More Pickleball courts	12/30/2021 4:08 PM
690	More pickleball courts!	12/30/2021 4:06 PM
691	More Pickleball courts	12/30/2021 4:06 PM
692	More bike trails More tennis courts	12/30/2021 4:05 PM
693	Need more community garden spaces.	12/30/2021 4:05 PM
694	More frequent trash pickup	12/30/2021 4:04 PM
695	More PICKLEBALL courts	12/30/2021 4:04 PM
696	Bathrooms at every park- Buena vista community park sadly missed the mark on this	12/30/2021 4:00 PM
697	more interesting play structures. Other parks in other cities that I have gone to have balance, spinning and climbing structures that are very fun. There are also building toys (like large Lego) or large rafts with long poles to get across large but shallow ponds. There are treehouse type structures that the children can run across rope bridges and climb down rope ladders. We need more creative structures in our city parks!	12/30/2021 4:00 PM
698	More pickleball courts that are free and lit at night	12/30/2021 3:59 PM
699	More Pickleball courts An additional indoor gym (what ever happened to gym at Poinsettia?)	12/30/2021 3:59 PM
700	More parking options....I know, that's a tough one.	12/30/2021 3:58 PM
701	More tennis courts	12/30/2021 3:57 PM
702	More pickleball courts	12/30/2021 3:57 PM
703	Water fountains tenth of a mile markers Chairs with backs Picnic tables	12/30/2021 3:57 PM
704	More pickleball courts	12/30/2021 3:56 PM
705	Having a park nearer to my residence. Nearest park is almost three miles away and across the freeway.	12/30/2021 3:56 PM
706	More pickleball courts	12/30/2021 3:55 PM
707	More pickleball courts, please.	12/30/2021 3:55 PM
708	Less crowded facilities.	12/30/2021 3:55 PM
709	More Pickelball courts	12/30/2021 3:54 PM
710	More pickleball courts please!	12/30/2021 3:54 PM
711	More Pickleball courts	12/30/2021 3:53 PM
712	More pickleball courts	12/30/2021 3:53 PM
713	sand volleyball courts at Poinsettia Park	12/30/2021 3:53 PM
714	Access to Agua Hedionda would be a plus. Very disappointed that Coruso's project didn't go through	12/30/2021 3:53 PM
715	More pickleball courts	12/30/2021 3:52 PM
716	Adult facilities, e.g., trails of longer than 3 miles in length, track and field facilities (they exit for students but not for the public).	12/30/2021 3:52 PM
717	More Pickleball courts at Poinsettia	12/30/2021 3:51 PM
718	Allowing pets in all areas on leash; have walks with poop bag drop off;	12/30/2021 3:51 PM
719	Additional pickleball courts	12/30/2021 3:51 PM
720	More pickleball courts!	12/30/2021 3:50 PM
721	More pickleball courts	12/30/2021 3:49 PM
722	Evening masters swim option	12/30/2021 3:49 PM

## Q2 What would make going to city parks even better?

723	as long as we can bring our dogs there, they're good!	12/30/2021 3:48 PM
724	The woody area at Stagecoach park used to be one of our favorite areas. We'd visit the giant tree, and walk a beautiful path through the trees. But at some point the park stopped maintaining the pathways. I understand the need for the fencing at the top of the hill, but people would ideally still be able to access the area through the main entrance. Would just take someone clipping the branches periodically. It's such a beautiful nature area, and I would love to be able to take my family into it again.	12/30/2021 3:48 PM
725	More mountain biking parks	12/30/2021 3:47 PM
726	More tennis and pickle ball courts	12/30/2021 3:47 PM
727	Need "warm water" aquatic pools for older residents, like the Arthritis Assoc warm water exercise classes.	12/30/2021 3:47 PM
728	More Pickleball Cardiff	12/30/2021 3:44 PM
729	Extended hours for the dog park park and more more after school and not school day options for elementary age youth	12/30/2021 3:43 PM
730	MORE PICKLEBALL COURTS	12/30/2021 3:43 PM
731	More pickleball courts	12/30/2021 3:42 PM
732	open space, natural settings, interesting attractions like the zip line and grass slides at the Encinitas park north of the freeway and south of La Costa Avenue.	12/30/2021 3:41 PM
733	My kids enjoy outdoor park	12/30/2021 3:41 PM
734	More pickleball courts	12/30/2021 3:39 PM
735	More seating.	12/30/2021 3:38 PM
736	A pump track or place for kids to ride bikes on a bigger trail. More concert in park events. Dog park with grass not bark in north Carlsbad. Indoor pool.	12/30/2021 3:36 PM
737	Less homeless people	12/30/2021 3:36 PM
738	More parks, more swimming options, more mountain biking and hiking options	12/30/2021 3:36 PM
739	Probably more Pickleball courts	12/30/2021 3:34 PM
740	More hiking trails	12/30/2021 3:33 PM
741	More pocket parks that people can walk to. Also more dog parks.	12/30/2021 3:33 PM
742	Closer parking in some cases.	12/30/2021 3:32 PM
743	We occasionally feel unsafe at Pine Park, so we appreciate all the city is doing to help minimize inappropriate use of the park.	12/30/2021 3:31 PM
744	Less cars. After all they should be parks not car- parks	12/30/2021 3:29 PM
745	More walking trails & better lite trails	12/30/2021 3:28 PM
746	Grass dog parks.	12/30/2021 3:28 PM
747	Increase shaded areas with hard surfaces for exercises such as Taiji, line dancing, qigong and yoga.	12/30/2021 3:28 PM
748	Bike Park and More Dedicated Pickleball Courts	12/30/2021 3:27 PM
749	Native trees and habitat islands. Basket ball courts reserved for girls. The young males dominate the courts. Walls to bounce balls off. Security cameras. I am afraid to walk the canyon walk alone. Areas for seniors to exercise that don't have a fee.	12/30/2021 3:27 PM
750	Enforcement of dog excrement & leash laws	12/30/2021 3:26 PM
751	Would feel safer if there were no homeless folks in the parks and no dogs. People unleash their dogs so they can run free, not thinking that others might be concerned for their safety.	12/30/2021 3:25 PM
752	not allowing dogs. Their owners let them crap all over the trails.....disgusting.....@ Lake	12/30/2021 3:25 PM

## Parks & Recreation Master Plan Update

Calavera		
753	Ore pickleball courts and dog parks.	12/30/2021 3:23 PM
754	More pickleball, less tennis courts	12/30/2021 3:22 PM
755	Less homeless (any police enforcement whatsoever) and people picking up after their pets.	12/30/2021 3:21 PM
756	More Pickleball courts	12/30/2021 3:18 PM
757	More restrooms	12/30/2021 3:16 PM
758	Lately I've noticed less trash cans. The ones that are there are usually full. Also the grass between the tennis courts are ridiculously long.	12/30/2021 3:16 PM
759	More walking trails, more parking, benches or covered seating along the way, water fountains	12/30/2021 3:15 PM
760	More off leash areas with separated small and large dog areas	12/30/2021 3:13 PM
761	1. My own discipline; 2. Meet up group	12/30/2021 3:12 PM
762	Obviously MORE: more trails, more pickle ball courts, safe parking at Poinsettia & Calavera, more bathrooms etc.	12/30/2021 3:11 PM
763	More walking/ running trails	12/30/2021 3:10 PM
764	More pickleball courts all collocated so there could be multiple levels of play at one venue.	12/30/2021 3:10 PM
765	enjoy greenery	12/30/2021 3:08 PM
766	Homeless people removed.	12/30/2021 3:07 PM
767	Seating for parents and parties, shaded play equipment. Enclosures so kids can't take off towards danger.	12/30/2021 3:05 PM
768	Pickle ball	12/30/2021 3:03 PM
769	More pickleball courts. Maybe 16 or 20 in one venue. Like other cities have. Build the courts the people will come.	12/30/2021 3:03 PM
770	More pickleball courts	12/30/2021 3:02 PM
771	More pickleball courts	12/30/2021 3:01 PM
772	Nothing	12/30/2021 3:01 PM
773	more walking trails and tennis courts :)	12/30/2021 3:00 PM
774	Restroom facilities	12/30/2021 3:00 PM
775	more knowledgeable trail maintenance workers	12/30/2021 2:59 PM
776	nice as is	12/30/2021 2:59 PM
777	More open space, better parking.	12/30/2021 2:59 PM
778	If we could walk dogs on leash through the parks.	12/30/2021 2:59 PM
779	More pickelball courts	12/30/2021 2:58 PM
780	more shade doggy walking areas (leashed)	12/30/2021 2:57 PM
781	More Pickleball Courts	12/30/2021 2:56 PM
782	Allowing dogs and opening the snack shacks or cafes for quick snacks and drinks or things we may have forgotten like sunscreen or water	12/30/2021 2:56 PM
783	More Pickleball courts like Pointsettia	12/30/2021 2:55 PM
784	Swimming pools and tennis courts.	12/30/2021 2:55 PM
785	Trails easy to walk	12/30/2021 2:54 PM
786	Being able to find parking.	12/30/2021 2:54 PM

## Q2 What would make going to city parks even better?

787	Can't wait for the Poinsettia dog park! More pickleball & tennis courts.	12/30/2021 2:54 PM
788	More trails and open space along lagoon. We definitely need more sports parks and parking.	12/30/2021 2:54 PM
789	More pickleball courts	12/30/2021 2:53 PM
790	There great; I personally don't have enough free time	12/30/2021 2:53 PM
791	more events, like the summer music series	12/30/2021 2:51 PM
792	A less restrictive pandemic policy.	12/30/2021 2:51 PM
793	More pickleball courts	12/30/2021 2:50 PM
794	recycle bins	12/30/2021 2:50 PM
795	More Pickleball courts	12/30/2021 2:47 PM
796	Pickle ball courts	12/30/2021 2:45 PM
797	clean and easily accessible restrooms clean sources of water	12/30/2021 2:45 PM
798	More pickleball courts	12/30/2021 2:44 PM
799	More pickleball courts!	12/30/2021 2:44 PM
800	More PickleBall courts!!! 😊	12/30/2021 2:42 PM
801	Trails, picnic tables, more pickleball courts.	12/30/2021 2:41 PM
802	Good food being available at a snack bar or food truck.	12/30/2021 2:40 PM
803	More pickle ball courts and bathroom	12/30/2021 2:40 PM
804	Pickle ball courts!	12/30/2021 2:40 PM
805	More options/locations More walking/running trails Safer and more enjoyable environment. Less homeless, vagrants, and people hanging out and drinking would be nice	12/30/2021 2:39 PM
806	Bike paths	12/30/2021 2:38 PM
807	More pickleball courts	12/30/2021 2:37 PM
808	More local spots that aren't overcrowded. The big parks are nice, too, but it's nice to have small community centers and youth sports at parks that are close to your house and that you see/meet neighborhood friends at.	12/30/2021 2:37 PM
809	Trails, dog parks, tennis, swimming pools skateparks at more of them.	12/30/2021 2:36 PM
810	More Pickleball courts	12/30/2021 2:36 PM
811	More fields and tennis/pickleball courts	12/30/2021 2:34 PM
812	Additional Pickleball courts	12/30/2021 2:34 PM
813	More pickleball courts! The ones at poinsettia are WAY overcrowded. A simple fix would be to convert a couple tennis courts. We are waiting up to half hour for a single game!	12/30/2021 2:34 PM
814	Fewer dogs.	12/30/2021 2:32 PM
815	More Pickleball courts	12/30/2021 2:31 PM
816	more pickleball	12/30/2021 2:31 PM
817	Off leash dog trails	12/30/2021 2:31 PM
818	Less dogs walking around!	12/30/2021 2:29 PM
819	More parks by the beach. Easily accessible and connected to bike paths. More tennis courts.	12/30/2021 2:29 PM
820	Pickleball courts	12/30/2021 2:28 PM
821	More skateboard friendly areas for smaller kids and beginners because they feel intimidated being forced to skate only in their skateparks due to HOAs banning skateboarding and threatening preschoolers who are learning to balance and glide on their boards with hefty fines.	12/30/2021 2:28 PM

## Parks & Recreation Master Plan Update

822	Clean restrooms, no vagrants, safe for families	12/30/2021 2:28 PM
823	Indoor and outdoor fitness area with training equipment.	12/30/2021 2:28 PM
824	Pickle ball courts	12/30/2021 2:27 PM
825	Picnic areas, walking paths, benches for sitting	12/30/2021 2:26 PM
826	NO pesticide or chemical spraying of grass or plants	12/30/2021 2:25 PM
827	Pickleball	12/30/2021 2:23 PM
828	A lot more permanent Pickleball courts and multi-purpose courts; tennis courts with Pickleball lines.	12/30/2021 2:23 PM
829	More Pickleball courts	12/30/2021 2:22 PM
830	More pickleball courts so less waiting time	12/30/2021 2:22 PM
831	Dogs allowed on leash.	12/30/2021 2:21 PM
832	Better control of people camping in the parking lot. Better sanitation.	12/30/2021 2:21 PM
833	Enforcing the "No Dog Rules". It's not acceptable that the city put this rule on a sign as a "CYA" but do nothing to enforce it. Every park and beach access has it on the sign. It's not fair for those of us who want to be good citizens and follow codes and rules while others feel the rules of society are for others and not them	12/30/2021 2:20 PM
834	Bathrooms	12/30/2021 2:20 PM
835	Flatter lawns	12/30/2021 2:18 PM
836	Extended hours at the Monroe Street Pool. Or even keeping the pool open during the day so the community can use it.	12/30/2021 2:18 PM
837	Fields at Magnolia and Valley are super bumpy	12/30/2021 2:15 PM
838	Fix the jacuzzi at Agua Norte	12/30/2021 2:15 PM
839	More shading, natural vs artificial is better.	12/30/2021 2:15 PM
840	Better choices for water for athletes, thank you!	12/30/2021 2:15 PM
841	City staff test	12/30/2021 2:14 PM
842	Old age-friendly such as bench for sitting.	12/30/2021 2:14 PM
843	Keeping it clean and green	12/30/2021 2:13 PM
844	More pools!! Alga is overloaded. It's a shame so many kids and teams need pool time and have to grovel at odd hours to get pool time... that's not ok for such a well Funded city in an affluent community	12/30/2021 2:13 PM
845	more dedicated pickleball courts with shade for the people waiting to play	12/30/2021 2:12 PM
846	Enforcement of no dogs. Dogs everywhere and off leash.	12/30/2021 2:10 PM
847	More Pickleball courts	12/30/2021 2:09 PM
848	More shade and pickleball courts	12/30/2021 2:09 PM
849	Reluctant to go to a few parks because homeless make me feel unsafe in the bathrooms/ make me worried about my kids	12/30/2021 2:08 PM
850	Possible snack stand	12/30/2021 2:07 PM
851	Eliminate all homelessness and vagrancy	12/30/2021 2:07 PM
852	Allow dogs. On leash. Dog parks are not the best way to safely socialize dogs	12/30/2021 2:06 PM
853	work out equipment/ circuit type exercises for adults	12/30/2021 2:06 PM
854	More pickleball courts!	12/30/2021 2:05 PM

## Q2 What would make going to city parks even better?

855	Keep drug users out of public areas.	12/30/2021 2:04 PM
856	Better layout, landscaping and park benches	12/30/2021 2:04 PM
857	Additional outdoor pickleball courts and the ability to reserve a pickleball court for private play.	12/30/2021 2:04 PM
858	Clean and safe facility, many recreation options for kids and affordable, family event and special events for kids, build more new Otho of park in residential area	12/30/2021 2:03 PM
859	No homeless people Dogs allowed	12/30/2021 2:02 PM
860	Repair of Abha Norte spa pool pump!	12/30/2021 2:02 PM
861	Convenient location and plenty of parking	12/30/2021 2:02 PM
862	Nothing, they are beautiful and well maintained.	12/30/2021 2:01 PM
863	Following your City rules!	12/30/2021 2:00 PM
864	Dog parks	12/30/2021 2:00 PM
865	Updated restrooms	12/30/2021 2:00 PM
866	Bathrooms, more modern equipment like kids rope climbing and sliding hill like Olympus park	12/30/2021 2:00 PM
867	Enforcing tickets for drivers idling in red curb zones; large open area to fly kites	12/30/2021 2:00 PM
868	More pickleball courts!	12/30/2021 1:58 PM
869	More paths, picnic tables, gazebos	12/30/2021 1:58 PM
870	Shade. The new park, Buena Vista Reservoir Park really needs more shade!	12/30/2021 1:57 PM
871	More Pickleball courts	12/30/2021 1:57 PM
872	More restrooms and more parking	12/30/2021 1:57 PM
873	More of them.	12/30/2021 1:57 PM
874	Restrooms always need to be clean, well ventilated, and fully equipped with soap, paper, etc. Doggie poo bags available. Signs to clean up after your pet--if needed. I have not been to a park in awhile--so this is not a criticism.	12/30/2021 1:57 PM
875	Improved restroom facilities. Updating playground equipment, walking paths	12/30/2021 1:56 PM
876	More Pickleball court options.	12/30/2021 1:56 PM
877	More pickle ball courts as numerous tennis courts are not being utilized. Just paint pickle ball lines on all tennis courts as nets are same for both sports.	12/30/2021 1:56 PM
878	Additional pickleball courts at Poinsetta Community Park.	12/30/2021 1:56 PM
879	A Real Dog park	12/30/2021 1:55 PM
880	Improved safety - no criminal activity	12/30/2021 1:54 PM
881	Sports in poor weather	12/30/2021 1:53 PM
882	More courts for Pickleball	12/30/2021 1:53 PM
883	A small area to practice golf chipping and putting in these parks remote from The Crossings.	12/30/2021 1:53 PM
884	More small benches to rest or have peace.	12/30/2021 1:53 PM
885	Clean and convenient bathrooms at all parks	12/30/2021 1:52 PM
886	More Pickleball courts that you could reserve	12/30/2021 1:52 PM
887	More Pickleball courts please!	12/30/2021 1:52 PM
888	running trails with wood chips like in eugene oregon.	12/30/2021 1:52 PM
889	More Pickleball courts	12/30/2021 1:51 PM
890	More biking areas	12/30/2021 1:50 PM

## Parks & Recreation Master Plan Update

891	More exercise options. Bike trails, pickle ball & hiking trails.	12/30/2021 1:50 PM
892	Concert in the park	12/30/2021 1:49 PM
893	Allowing dogs on leashes	12/30/2021 1:49 PM
894	The playground equipment offered is outdated and uninteresting for all ages. I have family in the Midwest and their parks have endless options in their play structures. Our children deserve interesting, challenging and developmentally appropriate structures. I know they are available and the city has plenty of money to purchase, install and maintain them. It's embarrassing what other communities offer their children compared to Carlsbad. I am happy to offer examples.	12/30/2021 1:49 PM
895	More concerts in the park	12/30/2021 1:48 PM
896	More rest rooms and places to sit	12/30/2021 1:48 PM
897	Better dog control in the dog parks. More holiday events.	12/30/2021 1:47 PM
898	More pickleball courts	12/30/2021 1:46 PM
899	We need more mountain bike trails and bike-specific parks	12/30/2021 1:45 PM
900	I can't think of anything.	12/30/2021 1:45 PM
901	Quiet nature with babbling brooks.	12/30/2021 1:45 PM
902	More trails and open grassy space for relaxing or picnicking.	12/30/2021 1:43 PM
903	Grass is too wet to play on.	12/30/2021 1:43 PM
904	Officially allow dogs	12/30/2021 1:42 PM
905	Community gardens	12/30/2021 1:42 PM
906	- A running track! - More trees and more grass areas are always nice. - Less space dedicated to dogs areas and more for people.	12/30/2021 1:42 PM
907	A grass dog park	12/30/2021 1:40 PM
908	More parks and parks that are actually parks not a picnic bench on a plot next to the freeway that is called a park and added into the footage to achice the required total	12/30/2021 1:40 PM
909	More outdoor music events, even small acoustic ones... LOVED the TGIF series!	12/30/2021 1:40 PM
910	I would love a frisbee/disc golf course	12/30/2021 1:39 PM
911	Having more native plants	12/30/2021 1:39 PM
912	The online pool system schedule was awful, I changed to Oceanside as a result	12/30/2021 1:38 PM
913	Less entitled Carlsbad privileged brats cussing and acting like they own it.	12/30/2021 1:38 PM
914	I live be pointsettia park and I already love so much about it. Very clean and well kept. I am excited for the dog park	12/30/2021 1:38 PM
915	More parking	12/30/2021 1:38 PM
916	Less non-Carlsbad residents using the parks	12/30/2021 1:38 PM
917	Ensuring that parks are clean and safe are of outmost importance. I think it will be good if you can offer group activities, e.g., Zumba, and outdoor events to attract more people.	12/30/2021 1:37 PM
918	No ebikes. No motorized vehicles.	12/30/2021 1:36 PM
919	clean	12/30/2021 1:36 PM
920	More security	12/30/2021 1:35 PM
921	They are crowded w youth sports teams and parking lots crowded	12/30/2021 1:35 PM
922	More swim lanes	12/30/2021 1:34 PM
923	fewer dogs	12/30/2021 1:33 PM

## Q2 What would make going to city parks even better?

924	Making separate bicycle routes as kids on bikes are careless about relinquishing sidewalk space to walkers	12/30/2021 1:33 PM
925	more benches	12/30/2021 1:32 PM
926	South Carlsbad needs a community pool - Stagecoach area would be great. Then LCC and other local schools could rent the pool for practices and sports events.	12/30/2021 1:32 PM
927	Parking is difficult at some parks during sports events	12/30/2021 1:31 PM
928	more runny/walking trails	12/30/2021 1:31 PM
929	If the rule regarding no dogs allowed was enforced	12/30/2021 1:31 PM
930	More parks in the Village area. Beach boardwalk/park needs benches with backs for seniors. Also, concrete on the boardwalk needs to be replaced. Ocean Avenue/beach parking needs more handicapped parking spaces.	12/30/2021 1:31 PM
931	Security guards	12/30/2021 1:30 PM
932	Have some type of regulations from homeless camping there overnight and taking over the sitting areas with there personal possessions	12/30/2021 1:30 PM
933	More swimming facilities	12/30/2021 1:29 PM
934	Enhanced pool hours at Monroe St pool	12/30/2021 1:29 PM
935	Having s bike park with beginner, intermediate and expert dirt jumps	12/30/2021 1:29 PM
936	More pickleball courts	12/30/2021 1:29 PM
937	Dog park	12/30/2021 1:29 PM
938	Lights and not having the grass saturated	12/30/2021 1:28 PM
939	Limiting the number of non residents.	12/30/2021 1:28 PM
940	BAN DOGS FROM GRASSY AREAS. KIDS CAN'T PLAY ON THE GRASS BECAUSE OF DOG POOP - EVEN IF PICKED UP, THERE ARE SMEARS AND SMALL DROPPINGS.	12/30/2021 1:28 PM
941	Bigger and better play grounds. More kids type educational events.	12/30/2021 1:28 PM
942	more running trails	12/30/2021 1:27 PM
943	Allow leashed dogs to walk on side walks through the parks. I've been stopped by the park ranger for doing just that.	12/30/2021 1:27 PM
944	Parks and Recreation Management doing a poor job of enforcing policy. All talk. Dogs in parks, off leash on trails, do not enforce community garden policy. Lots on waiting list but no action on inactive gardeners or those violating policy	12/30/2021 1:27 PM
945	Making sure the bathrooms are always clean	12/30/2021 1:25 PM
946	More poop bag dispensers for dogs.	12/30/2021 1:25 PM
947	Monitoring homeless so that it does not feel unsafe to walk alone or take children.	12/30/2021 1:25 PM
948	Abundant seating and shade	12/30/2021 1:25 PM
949	maybe more dogs parks, more green space	12/30/2021 1:24 PM
950	Having more pickleball courts including courts with lights (since I work during the day).	12/30/2021 1:24 PM
951	More pickleball courts	12/30/2021 1:23 PM
952	more parks	12/30/2021 1:23 PM
953	Parking	12/30/2021 1:23 PM
954	They are safer, no shootings or a homeless problem. They are cleaner, remove graffiti and trash.	12/30/2021 1:23 PM
955	No dogs allowed.	12/30/2021 1:22 PM

## Parks & Recreation Master Plan Update

956	Better/ More turf fields	12/30/2021 1:22 PM
957	Plenty of walking space and trails, trees, native landscaping.	12/30/2021 1:22 PM
958	One that I could walk to.	12/30/2021 1:22 PM
959	If the playgrounds weren't so busy, more shaded areas, bathrooms at the smaller parks, an race track/field area for kids/adults	12/30/2021 1:22 PM
960	Dog friendly and more shade structures	12/30/2021 1:21 PM
961	Trees for shade, or areas with shade and seating.	12/30/2021 1:21 PM
962	ample parking and clean restrooms	12/30/2021 1:20 PM
963	More parks	12/30/2021 1:20 PM
964	Allowing residents to bring along their beloved dogs, and offering MANY more off-leash friendly dog parks and trails - as most other cities do. Carlsbad comes off as very unfriendly toward family-member pets. This issue needs to be rectified quickly. It mustn't be left up to other nearby cities to offer Carlsbad pets fun places to play and explore, off-leash. The two bark-covered dog parks available in Carlsbad are highly inadequate, and cause paw injuries and veterinary expenses.	12/30/2021 1:20 PM
965	Maintaining a clean and SAFE environment.	12/30/2021 1:19 PM
966	more gardens	12/30/2021 1:19 PM
967	Space and fresh air	12/30/2021 1:18 PM
968	Continued upkeep/refurbishment of facilities	12/30/2021 1:18 PM
969	Pet friendly, athletic opportunities like pickle ball	12/30/2021 1:17 PM
970	Have more shaded patio area for doing activities like Taichi or dance	12/30/2021 1:17 PM
971	Clean/functioning bathrooms.	12/30/2021 1:17 PM
972	More meeting places and party places	12/30/2021 1:16 PM
973	Ample parking (including handicap spaces) and clean, accessible restrooms	12/30/2021 1:16 PM
974	more bike areas	12/30/2021 1:15 PM
975	N/A	12/30/2021 1:14 PM
976	More dog parks, allowing dogs on leashes to walk the perimeter of the parks; a park west of I-5 in the southeast quadrant of the city	12/30/2021 1:13 PM
977	More events	12/30/2021 1:13 PM
978	walking path softer than concrete	12/30/2021 1:12 PM
979	Bigger better playgrounds and skate parks	12/30/2021 1:11 PM
980	Maybe more shaded play areas	12/30/2021 1:10 PM
981	More versatile use tennis/pickle ball courts (we use pickle ball equipment to play "tennis")	12/30/2021 1:10 PM
982	More shade trees and less over-pruning of the shrubs we have. Being able to walk my dogs on leash.	12/30/2021 1:10 PM
983	Build a disc golf course at Hosp Grove	12/30/2021 1:09 PM
984	If dangerous drug-dealing vagrants weren't there	12/30/2021 1:09 PM
985	Our family uses the pool at alga Norte. More lanes for free swim would help. When I get off work and go to pool there's usually full lanes	12/30/2021 1:09 PM
986	Maybe a sitting area that is a little more not so out in the open - an area where you can go to read, enjoy the sunshine etc. just not a park bench right in t he middle of everything.	12/30/2021 1:08 PM
987	More pickle ball courts	12/30/2021 1:08 PM

## Q2 What would make going to city parks even better?

988	Good the way they are.	12/30/2021 1:06 PM
989	Adequate parking for dog park and soccer fields	12/30/2021 1:06 PM
990	Love the parks. Sounds crazy but a rec room where people can check out items (board games, frisbee, bocce ball, etc..) This will bring in jobs	12/30/2021 1:05 PM
991	A system whereby you could sign up late for a class, at least 2 weeks after a 4-5 week class has started, if the class is not full	12/30/2021 1:05 PM
992	Clean facilities, accessible bathrooms	12/30/2021 1:04 PM
993	being able to walk our dogs as we do in the city of O'side, Encinitas and Del Mar. Responsibly, of course	12/30/2021 1:04 PM
994	I appreciate when the parks are geared for all ages. I love it when there's a walking path with exercise stations. I love playgrounds, skate parks, picnic areas with shade, and multi use fields. I find that the one thing the city is lacking is enough pools. Pools meet the demands of all ages and currently the 2 pools we have are impacted with the various user groups. Another thing that would make the parks better is if we had some beach volleyball courts with nets that were always up. The courts at the beach are always controlled by the tamarack beach volleyball club.	12/30/2021 1:04 PM
995	If my grandchildren lived close and visited often	12/30/2021 1:03 PM
996	Open space for off leash dogs. Pickle ball courts/	12/30/2021 1:03 PM
997	Shade and playground equipment that stays cool in summer. Some slides would cause a burn injury	12/30/2021 1:03 PM
998	A concern is how to keep children's play equipment as virus-free as possible. If something could be done to address that concern, going to city parks would be even better. But our parks are very nice.	12/30/2021 1:03 PM
999	More dog-friendly parks	12/30/2021 1:02 PM
1000	More parks by the beach to enjoy our ocean.	12/30/2021 1:02 PM
1001	Turn over the tennis and pickle ball courts to private management under contract with the city. Similar to Rancho Penasquitos	12/30/2021 1:01 PM
1002	Making a dog park like "Power line dog park" in Encinitas	12/30/2021 1:01 PM
1003	More varieties of botanicals with QR signs to download info, like at the Batiguitos Lagoon. More interactive stations. Meandering paths. Ample parking.	12/30/2021 1:01 PM
1004	Walking paths and nature trails that are non concrete paths, offering dog poop bags, trash cans , community gardens , more seating areas . Better lighting at Poinsetta tennis courts specifically the lower courts #1-4. Having bathroom built will be better too (close to the courts).	12/30/2021 1:01 PM
1005	Water bottle filling stations at all parks, more play structures intended for climbing (like rope climbing courses, climbing domes)	12/30/2021 1:01 PM
1006	I would like to see better "picnic" and "small event" facilities, such as outdoor or enclosed food prep stations where hand washing and serving counters with electrical outlets. In addition, small performance platforms with electrical outlets for gatherings.	12/30/2021 1:01 PM
1007	Less transients	12/30/2021 1:00 PM
1008	If parks included culture like theater etc.	12/30/2021 1:00 PM
1009	Vending machines	12/30/2021 12:58 PM
1010	More swimming pools	12/30/2021 12:58 PM
1011	Less drug dealers, esp. in the bathrooms	12/30/2021 12:58 PM
1012	Detailed maps	12/30/2021 12:58 PM
1013	Safety (homeless population) Age appropriate restrictions (fewer teenagers overtaking the park on their ebikes)	12/30/2021 12:58 PM

## Parks & Recreation Master Plan Update

1014	They are great but maybe sanitizer stations	12/30/2021 12:57 PM
1015	Keeping dogs off of fields that say "no dogs allowed". Dog shit and kids do not go together.	12/30/2021 12:56 PM
1016	More places to take dogs. More hiking trails.	12/30/2021 12:56 PM
1017	better parking and more pickleball courts. Also, upgrading the Dog park to grass instead of the bark that is currently used.	12/30/2021 12:56 PM
1018	concerts and gatherings with grass and picnic tables	12/30/2021 12:55 PM
1019	Allowing dogs	12/30/2021 12:55 PM
1020	Skateparks (or skateboard-friendly areas/features) in more parks. Restroom facilities in all parks. Water-bottle filling stations in all parks. Bike-friendly trails.	12/30/2021 12:55 PM
1021	We definitely need more pickleball courts.	12/30/2021 12:55 PM
1022	Bathrooms	12/30/2021 12:54 PM
1023	More sports areas, convert Stagecoach field 1 to turf so it can be used year round	12/30/2021 12:54 PM
1024	More parks	12/30/2021 12:53 PM
1025	I enjoy hiking and walking. Emphasizing trails and inter-connected trails would be a benefit	12/30/2021 12:53 PM
1026	Better all around lighting, solution for muddy areas during and after rain, all dog parks be grass, more Rest Rooms and drinking fountains.	12/30/2021 12:53 PM
1027	Clean bathrooms at all parks.	12/30/2021 12:53 PM
1028	I would love to see some more variety of use spaces. Trails/tracks for riding non-motorized bikes with banked turns and small rolling hills. Level Asphalt or concrete trails for families to go on long bike rides or roller blading together ( maybe with bathrooms and picnic tables at the halfway point). Dirt tracks for driving RC cars, maybe with small scale terrain features. This could be a great opportunity for youth to practice filmmaking and a tremendous resource for kids who desperately need ways to engage outdoors that aren't part of a competitive sports league. One thing all of north county lacks is a dedicated area for flying drones. This could adjoin RC car tracks and miniature filmmaking Towns and become a skill building hub that could lead to future careers for lots of youth. Perhaps an amphitheater for scout troops and other outdoor education purposes.	12/30/2021 12:53 PM
1029	Nothing	12/30/2021 12:52 PM
1030	Parking for sporting events	12/30/2021 12:52 PM
1031	Can't think of anything. They are perfect	12/30/2021 12:52 PM
1032	Grassy dog park instead of wood chips.	12/30/2021 12:52 PM
1033	Not approving Severely Mentally Ill housing within close proximity to parks and schools. Patrolling parks to keep them free of undesirable elements...Holiday and Pine Parks	12/30/2021 12:52 PM
1034	Some fields (baseball) are not open because they will be used for organized sports in future, I would like to see them not locked up when not in use, since this is a public park, not only for paid sporting activities.	12/30/2021 12:52 PM
1035	more pickleball courts!	12/30/2021 12:51 PM
1036	Dogs in parks on leash to be changed	12/30/2021 12:51 PM
1037	More parking for events like FNL and soccer tournaments.	12/30/2021 12:51 PM
1038	Great lighting for night time walking & to enjoy the park in the evening.	12/30/2021 12:51 PM
1039	Less Homeless	12/30/2021 12:50 PM
1040	I would love to see native plantings and areas for kids to experience wildlife	12/30/2021 12:50 PM
1041	I prefer San Marcos and Vista parks because they are more natural and graceful. They have more trees, incorporate walking trails that not just dead, and have no homeless people. The playgrounds are more organic too. Carlsbad parks are very sterile.	12/30/2021 12:50 PM

## Q2 What would make going to city parks even better?

1042	Less homeless people and vagrants.	12/30/2021 12:50 PM
1043	Snack bar, more benches for us old decrepid people	12/30/2021 12:49 PM
1044	more kid activities/play areas	12/30/2021 12:49 PM
1045	My kids say: "bigger slide and zip line" calisthenics Stations	12/30/2021 12:49 PM
1046	More pools	12/30/2021 12:48 PM
1047	Having more pickleball courts.	12/30/2021 12:48 PM
1048	No sand. More table/benches. Shade.	12/30/2021 12:48 PM
1049	Allow Dogs	12/30/2021 12:47 PM
1050	Skate or water features	12/30/2021 12:47 PM
1051	Less homeless people	12/30/2021 12:47 PM
1052	Bike park	12/30/2021 12:46 PM
1053	Opportunities for pickle ball.	12/30/2021 12:46 PM
1054	If they had enough pickleball courts I would go every day!	12/30/2021 12:46 PM
1055	Natural features for kids to climb on.	12/30/2021 12:46 PM
1056	I'm older and there isn't much in the parks for me.	12/30/2021 12:46 PM
1057	Besides making them larger and more of them, not much.	12/30/2021 12:46 PM
1058	More Pickleball courts. Cheaper access to swimming pools for adult residents.	12/30/2021 12:45 PM
1059	1. More passive use pocket parks with nearby parking so older individuals can easily access an outdoor space, 2. allowing dogs on lease to visit the park in the passive use areas, 3. more soft scape; large trees and grass and less hard scape	12/30/2021 12:45 PM
1060	More softball parks	12/30/2021 12:45 PM
1061	More cleanliness and maintenance of structures	12/30/2021 12:44 PM
1062	more open field dog parks, more bike parks for teens, tennis or pickle ball courts, handball courts	12/30/2021 12:44 PM
1063	Having trails around the parks	12/30/2021 12:43 PM
1064	Designated dog areas Low noise areas Let skate parks have an area to themselves	12/30/2021 12:43 PM
1065	A better trail system in the open spaces.	12/30/2021 12:43 PM
1066	Dogs on leashes, and owners of dogs being more responsible, especially around kids, and knowing the rules. Also more open times for fields, seems as soccer rules all fields and has more times and it limits the fields availability too much. Or, post the times that are unavailable to the public, or even post times that are open on the fields for the kids to play beyond the limited green spaces	12/30/2021 12:43 PM
1067	More Theater Plays events.	12/30/2021 12:43 PM
1068	More bench space for sporting events	12/30/2021 12:42 PM
1069	More sports fields	12/30/2021 12:42 PM
1070	More walking paths	12/30/2021 12:42 PM
1071	Events. Live music performances. Food trucks (well, part of an event.)	12/30/2021 12:42 PM
1072	Nothing I can think of.	12/30/2021 12:42 PM
1073	Quiet benches and areas.	12/30/2021 12:42 PM
1074	Just making sure it's safe for all (no homeless living in the bathrooms, ext.)	12/30/2021 12:42 PM
1075	Actually, I feel you have done a good job. Wish the dog park closest to me separated the smaller dogs then I would use it	12/30/2021 12:42 PM

## Parks & Recreation Master Plan Update

1076	If they were free of the homeless and we felt safe going there.	12/30/2021 12:41 PM
1077	shady place to walk	12/30/2021 12:41 PM
1078	More community events	12/30/2021 12:41 PM
1079	Having more planned activities	12/30/2021 12:41 PM
1080	Covered picnic and barbecue shelters	12/30/2021 12:41 PM
1081	Deal with homeless in the village. More bathrooms.	12/30/2021 12:41 PM
1082	Allowing dogs on a leash in the parks with notes to pick up after your pet.	12/30/2021 12:41 PM
1083	I think as we move forward past the pandemic, we have learned to appreciate multi-use outdoor opportunities vs. single-use ball fields, dog parks, etc. Moving forward, it would be great to think of park space as opportunities for all types of users, with park benches, small entertainment venues, walking paths, places for outdoor festivals and similar events, pop-up food kiosks, and perhaps even cafes or other dining options as part of the available offerings. I would love to see areas that are also designed just for the experience of enjoying space outside, which could include hard surfaces such as piazzas with fountains, etc. Finally, I think it important to not only "design" the park spaces, but also look at public access to get to and from the spaces, with consideration for well-designed, pedestrian-friendly opportunities.	12/30/2021 12:41 PM
1084	Easier access to parking.	12/30/2021 12:40 PM
1085	Allowing dogs on a leash	12/30/2021 12:40 PM
1086	More shade areas	12/30/2021 12:40 PM
1087	Walking dogs there.	12/30/2021 12:38 PM
1088	More bike trails & bike skills areas	12/30/2021 12:38 PM
1089	More pickleball Courts	12/30/2021 12:37 PM
1090	Greener initiatives	12/30/2021 12:37 PM
1091	Would love a park closer to the beach near Ponto!	12/30/2021 12:37 PM
1092	less use by out-of-town residents. Sometime, due to Yelp ratings, the park and full of loud non-residents	12/30/2021 12:37 PM
1093	Meditation spaces, rock formations and statuary in a variety of forms.	12/30/2021 12:37 PM
1094	MOre parking at Poinsettia Park	12/30/2021 12:37 PM
1095	Clean and kept maintained	12/30/2021 12:36 PM
1096	More volleyball nets and outdoor Pickleball courts.	12/30/2021 12:36 PM
1097	views, landscaping, tranquility	12/30/2021 12:36 PM
1098	Me having more time. Lol	12/30/2021 12:36 PM
1099	Pickle ball courts. Mini botanic gardens to walk through	12/30/2021 12:36 PM
1100	Bathrooms in all parks. I'm a parent of a toddler and we don't get to stay long at some of the parks because there is no bathroom for her to use!	12/30/2021 12:36 PM
1101	A better attention to detail. Cleanliness and anticipating patron needs is often lacking	12/30/2021 12:36 PM
1102	Pickleball players access of tennis courts	12/30/2021 12:35 PM
1103	Homelessness prevalence at parks near Village is unsafe for children.	12/30/2021 12:35 PM
1104	Wish there were practice walls for tennis.	12/30/2021 12:35 PM
1105	More Places to sit with shaded areas and some tables to picnic. Trash receptacles and recycle bins too.	12/30/2021 12:35 PM
1106	Alga Norte pools are pretty close to perfect!	12/30/2021 12:35 PM

## Q2 What would make going to city parks even better?

1107	A return to the original nature of parks . . . more shade trees, rocks, lawn, etc. , far less emphasis on athletic fields and competitive sports.	12/30/2021 12:35 PM
1108	Keeping mentally unstable people with drug and/or violent behavior away from park users. More programs and careful monitoring are needed to help them and to safeguard the community.	12/30/2021 12:35 PM
1109	greater availability of parking	12/30/2021 12:34 PM
1110	More shade for parents to sit in at playgrounds	12/30/2021 12:34 PM
1111	Special activities such as TGIF or other organized activities	12/30/2021 12:34 PM
1112	Keeping electric bikes off the trails. They are still motorized vehicles and they're dangerous.	12/30/2021 12:34 PM
1113	Dog parks adjacent with lighting and extended hours. More basketball courts.	12/30/2021 12:34 PM
1114	Activities for seniors	12/30/2021 12:34 PM
1115	getting Monroe St pool back up and running in the morning to lessen the morning swimmer burden at Alga del Norte Aquatic Center	12/30/2021 12:34 PM
1116	More pickle ball courts. (Could easily share with tennis courts, (like Harding Center shares with basketball).	12/30/2021 12:34 PM
1117	Dogs being allowed on leash	12/30/2021 12:33 PM
1118	Mountain Bike Park	12/30/2021 12:33 PM
1119	More lights	12/30/2021 12:33 PM
1120	More walking trails	12/30/2021 12:33 PM
1121	Bike parks. More pickleball courts.	12/30/2021 12:32 PM
1122	Restrooms and more Pickleball courts	12/30/2021 12:32 PM
1123	Improving the bathrooms or more cleaner pots potties	12/30/2021 12:32 PM
1124	More adult features: workout stations, walking tracks, disc golf, mountain bike parks	12/30/2021 12:32 PM
1125	More detail to picking up trash in the landscaping, weeding in the planter beds, and enforcement of dogs off leash at the park.	12/30/2021 12:32 PM
1126	No complaints	12/30/2021 12:31 PM
1127	More trails and bicycle friendly amenities like bike parks.	12/30/2021 12:31 PM
1128	More facilities for group gatherings. Indoor is less practical these days.	12/30/2021 12:31 PM
1129	Have more fenced in dog parks. Have a hand washing station at the dog park. I really like the Alga dog park and it would be nice if there was a hand washing station within the dog park area itself.	12/30/2021 12:31 PM
1130	More seating to watch our kids play, preferably with some shade. Better access by bike and walking. Streets and cross walks are not pedestrian friendly.	12/30/2021 12:31 PM
1131	A crackdown on the speed electric bikes.	12/30/2021 12:31 PM
1132	Events	12/30/2021 12:30 PM
1133	Open space for the dog to run	12/30/2021 12:30 PM
1134	more open spaces (greenways)	12/30/2021 12:30 PM
1135	Convert field 1 @ Stagecoach to synthetic turf	12/30/2021 12:30 PM
1136	Skate park. Dog park	12/30/2021 12:30 PM
1137	More lighting, more amenities - ex clean restrooms	12/30/2021 12:30 PM
1138	Clear signage re. when the bathrooms open /close in the morning / night. Better control of outside boot camps and yoga lessons in the park. These seem to pop up unexpectedly.	12/30/2021 12:30 PM

## Parks & Recreation Master Plan Update

1139	Remove the homeless hanging out there	12/30/2021 12:28 PM
1140	They are great as they are	12/30/2021 12:28 PM
1141	Walking paths	12/30/2021 12:28 PM
1142	allowing dogs	12/30/2021 12:28 PM
1143	Fewer dogs. More soccer fields, more tennis courts, running track	12/30/2021 12:28 PM
1144	Don't let people spend all their time there. The park is for everyone to enjoy	12/30/2021 12:28 PM
1145	More parks and trails Safer bike roads, preferably separately from car streets More pickleball courts	12/30/2021 12:28 PM
1146	Walking and shade area.relax and fresh air.	12/30/2021 12:28 PM
1147	Enforce dog leash and skateboard/bicycle rules at Poinsettia.	12/30/2021 12:28 PM
1148	If I had one walking distance from my house. Feel that we need perhaps smaller and more accessible (more quantity) of them. There is nothing to walk to by my area Luciernaga St. Carlsbad 92009. I have three little girls.	12/30/2021 12:28 PM
1149	Less number of club sports taking over parks during their practices.	12/30/2021 12:27 PM
1150	more parking availability	12/30/2021 12:27 PM
1151	Have more closer to home. Mini parks for kids in walking distance of each neighborhood. Take a lesson from Palo Alto, CA.	12/30/2021 12:27 PM
1152	well maintained bathrooms, well lit parking	12/30/2021 12:26 PM
1153	More parking during youth season	12/30/2021 12:26 PM
1154	Regular police and ir security checks on the skateparks.	12/30/2021 12:26 PM
1155	allow dogs ON LEASH to walk through the parks	12/30/2021 12:26 PM
1156	Expedite the bike park please. Then do more public private partnerships.	12/30/2021 12:26 PM
1157	Nicer grass areas to hang out on, more shade and trees	12/30/2021 12:26 PM
1158	creating a variety of terrain and experiences. Also providing more indoor sports space (for volleyball, gymnastics, etc)	12/30/2021 12:26 PM
1159	Nothing! Carlsbad has more parks with recreational activities than I could ever imagine.	12/30/2021 12:26 PM
1160	More shade / playgrounds/ skateparks / pump tracks	12/30/2021 12:25 PM
1161	Shaded areas, walking paths, creative/inclusive playgrounds. We moved here in 2016 from San Jose/Santa Clara. They have amazing parks.	12/30/2021 12:25 PM
1162	clean bathrooms, safe environment.	12/30/2021 12:25 PM
1163	Having a designated dog area so dog owners do not allow their pets to relieve themselves on the baseball and soccer fields.	12/30/2021 12:25 PM
1164	More Pickleball courts.	12/30/2021 12:24 PM
1165	Dogs allowed	12/30/2021 12:24 PM
1166	Having a bathroom at every park.	12/30/2021 12:24 PM
1167	rid them of homeless, improve public safety, clean up the trash more often	12/30/2021 12:24 PM
1168	Connected to a city wide system of trails/bike paths. More trash cans and off leash dog areas	12/30/2021 12:24 PM
1169	not having to worry about the homeless who live at the park	12/30/2021 12:24 PM
1170	Less homeless people	12/30/2021 12:24 PM
1171	closer to my home, trees, picnic areas of quiet without noise and activity	12/30/2021 12:24 PM
1172	It would be good if the masters swimming coaches were there at each workout	12/30/2021 12:24 PM

## Q2 What would make going to city parks even better?

1173	Better parking management (at Poinsettia Park) when there are large scale sports events like football and soccer.	12/30/2021 12:24 PM
1174	More covered shelter as it get too sunny or rainy	12/30/2021 12:23 PM
1175	NO HOMELESS. Less garbage.	12/30/2021 12:23 PM
1176	More lighting	12/30/2021 10:24 AM

## Q3 What do you enjoy most about going to city parks?

Answered: 1,215 Skipped: 551

#	RESPONSES	DATE
1	Lack of congestion and crowded sidewalks. Fresh air. Coastal foliage and green spaces.	1/11/2022 5:36 AM
2	My kids can run around and play on the playground	1/10/2022 3:23 PM
3	Open space and equipment for children.	1/10/2022 12:36 PM
4	Green and garden space	1/10/2022 12:34 PM
5	Great facilities and maintenance.	1/10/2022 12:22 PM
6	They are clean! Each one is different and there are so many options!	1/10/2022 11:19 AM
7	Being outdoors with my family.	1/10/2022 11:08 AM
8	Open space and fields available for public use	1/10/2022 11:00 AM
9	playgrounds	1/10/2022 9:47 AM
10	the natural open space and no high density housing	1/10/2022 7:54 AM
11	No high rises or high density housing so we can enjoy the natural open space. And to enjoy an ocean view if we build Ponto Park!	1/9/2022 6:11 PM
12	Freedom and beauty of where we live	1/9/2022 12:39 PM
13	Family and community atmosphere	1/9/2022 12:07 PM
14	great areas that have been kept up	1/9/2022 10:09 AM
15	The peace and open spaces	1/8/2022 6:21 PM
16	Access, close proximity to our home so we can enjoy picnics, open space, walkability.	1/8/2022 5:35 PM
17	Pickleball and tennis.	1/8/2022 4:47 PM
18	Nature and the beauty of the Calif.Coast,	1/8/2022 2:34 PM
19	Watching the kids	1/8/2022 2:31 PM
20	cleanliness, restrooms, parking	1/8/2022 1:58 PM
21	Enjoying nature and sunlight, taking my dog out, open space	1/8/2022 1:10 PM
22	recreational opportunity	1/8/2022 1:08 PM
23	nature	1/8/2022 10:29 AM
24	open space	1/8/2022 10:23 AM
25	The open space and enjoyment in knowing it will remain	1/8/2022 9:52 AM
26	Relaxation	1/8/2022 9:42 AM
27	Open space. We live in a dense area where houses are right next to each other's. We need places To decompress	1/8/2022 9:13 AM
28	Outside recreation	1/8/2022 8:57 AM
29	Open space, lack of traffic.	1/8/2022 8:56 AM
30	Being outdoors in a coastal community	1/8/2022 8:28 AM
31	the natural open space and no high density housing, open space especially with COVID, a place to get away from cookie cutter spaces/suburbia	1/8/2022 8:24 AM

## Parks & Recreation Master Plan Update

32	Open spaces	1/8/2022 7:47 AM
33	concerts	1/8/2022 7:37 AM
34	The open space. The room to enjoy the natural beauty of the area without the intrusion of cars and dense housing	1/8/2022 7:34 AM
35	The open space, no congestion, taking kids. There seems to be some space in the Ponto area for a park, near the campground. That would be amazing.	1/8/2022 7:20 AM
36	Being with family and youth sports	1/8/2022 7:17 AM
37	Great play areas for younger children	1/8/2022 6:57 AM
38	Open space makes our area less dense.	1/8/2022 6:34 AM
39	Seeing my kids enjoy themselves in sports or just playing in the playground.	1/7/2022 11:46 PM
40	A place to walk the dog, relax, recreate, play with my grandkids.	1/7/2022 9:21 PM
41	Having Picnics, small playground, playing with my dog	1/7/2022 9:20 PM
42	The native habitats and recreational opportunities for all ages.	1/7/2022 9:19 PM
43	Natural open space. Preserve and keep and protect natural environments and maintain as much open space as possible. Save nature and it's beauty.	1/7/2022 8:59 PM
44	Playing with my grandkids!!! Hiking and getting into nature!	1/7/2022 8:52 PM
45	Clean, well maintained facilities	1/7/2022 8:39 PM
46	Being outdoors. Views. Birds. Seeing neighbors.	1/7/2022 8:28 PM
47	Walk dog, family get-togethers, playing sports.	1/7/2022 7:56 PM
48	the natural open space and no high density housing	1/7/2022 7:55 PM
49	We can enjoy the day with our families and have a picnic. Please visit Moonlight beach in Encinitas and Fletcher Cove. We use parks in Encinitas due to lack of parks in South west Carlsbad.	1/7/2022 7:48 PM
50	Natural surroundings, quiet, peaceful, fun activities like pickle ball	1/7/2022 7:38 PM
51	Open spaces with views of the ocean	1/7/2022 7:21 PM
52	We enjoy being in a natural space where everyone is happy, relaxed, playing, and enjoying nature. Watching kids playing in playgrounds, and sports fields. Adults hiking, biking, playing with their kids and grand kids. There is nothing better and we need more parks and open space.	1/7/2022 7:20 PM
53	Walking, playgrounds, picnic space	1/7/2022 7:15 PM
54	Fresh air and open space	1/7/2022 7:08 PM
55	Open space, easy walking for elderly parents	1/7/2022 7:05 PM
56	Uncrowded spaces	1/7/2022 7:04 PM
57	Shady trees and turf areas	1/7/2022 7:01 PM
58	Outside place to enjoy as a family.	1/7/2022 6:58 PM
59	Open spaces and trees	1/7/2022 6:57 PM
60	Being able to get outside in the sunshine (and even when cloudy)	1/7/2022 6:47 PM
61	Walking and watching children play.	1/7/2022 6:47 PM
62	Knowing my child can run and play in safe area. Letting my child meet and play with other children, the feeling of community when meeting other parents.	1/7/2022 6:33 PM
63	Open grass spaces.	1/7/2022 6:29 PM
64	Events, such as concerts at the park. Playing pickleball at Pointsettia park.	1/7/2022 6:28 PM

### Q3 What do you enjoy most about going to city parks?

65	Open space, nature, fresh ocean air... have we not learned the importance of these things especially during our pandemic?	1/7/2022 6:25 PM
66	Visual relief from monotonous beige housing tracts	1/7/2022 6:09 PM
67	Birds and wildlife, peaceful places to relax.	1/7/2022 6:03 PM
68	The open space to play and recreate with my kids.	1/7/2022 6:00 PM
69	the green open space, trees, vegetation and birds	1/7/2022 5:54 PM
70	Open space & fresh air!!	1/7/2022 5:49 PM
71	nature and open spaces; spending time with friends and family	1/7/2022 5:49 PM
72	Being outdoors	1/7/2022 5:43 PM
73	The open space.	1/7/2022 5:43 PM
74	Being able to be out doors and experiencing nature vs. sprawl.	1/7/2022 5:40 PM
75	Playground & soccer with my grandkids	1/7/2022 5:30 PM
76	Usually to watch and play sports	1/7/2022 5:12 PM
77	grandchildren playing	1/7/2022 5:02 PM
78	Open space that was thoughtful planned out so residents and visitors can enjoy our beautiful city! We need space for our kids to play outdoors!	1/7/2022 4:46 PM
79	Open space, large grassy areas, equipment for young kids to play on and get exercise. Swim facilities are nice. A park in the Ponto area could also serve 101 bikers, group training classes, etc.	1/7/2022 4:39 PM
80	Get out	1/7/2022 4:37 PM
81	Watching my kids get exercise and enjoy their friends.	1/7/2022 4:35 PM
82	natural open green spaces, trees, trails, being in/with nature	1/7/2022 4:31 PM
83	Get outside in the beautiful sunshine, converse with the people of the community and love to be a part of nature .	1/7/2022 4:31 PM
84	The open area	1/7/2022 4:26 PM
85	Watching my kids play sports (and being off their electronics!). Being outside away from the high-density housing areas	1/7/2022 4:19 PM
86	Peace and quiet	1/7/2022 4:18 PM
87	nature. fresh air, grounding	1/7/2022 4:18 PM
88	Open spaces and events	1/7/2022 4:14 PM
89	Being active and outdoors in communion with our neighbors	1/7/2022 4:05 PM
90	I like the open space and trees	1/7/2022 4:02 PM
91	I do not have a city park walking distance to my community. Ponto Park should be built for the southwest community!	1/7/2022 4:01 PM
92	Family time!	1/7/2022 4:01 PM
93	The outdoors, fresh air, the ability to get away from crowded areas, and just enjoy nature.	1/7/2022 3:59 PM
94	Open space, natural landscaping, views of the ocean/surrounding geography.	1/7/2022 3:57 PM
95	I love having a safe place for my grandkids to play with other kids and to meet with neighbors. We love outdoor sports!	1/7/2022 3:55 PM
96	The open space to play games with my family	1/7/2022 3:54 PM
97	Trees grass open space and serenity	1/7/2022 3:53 PM

## Parks & Recreation Master Plan Update

98	Seeing my girls play lacrosse and sports at the parks. It is good for their self esteem and confidence.	1/7/2022 3:53 PM
99	Being in the community in a beautiful spot.	1/7/2022 3:51 PM
100	Walking in a beautiful area and watching families enjoy the space	1/7/2022 3:51 PM
101	I most enjoy the natural open space and scenery. Its nice to get away from the fast paced life and visit a park, and again, near the beach would be much needed, especially in South Carlsbad where I live. The worst would be doing high density housing at Ponto	1/7/2022 3:51 PM
102	I enjoy the open space and landscaping. We must drive to our closest park since we live in southwest coastal Carlsbad.	1/7/2022 3:50 PM
103	Peace and quiet. Open area to picnic and hang out with my family, play bocce ball. Provides open space instead of more density. Let's protect our coastal areas with parks, not more high-density condos near the beach.	1/7/2022 3:50 PM
104	Well maintained.	1/7/2022 3:09 PM
105	Accessibility, close to home.	1/7/2022 8:35 AM
106	Quality of the structures and layout is great.	1/7/2022 8:26 AM
107	Variety	1/7/2022 7:19 AM
108	Recreation, social, exercise	1/7/2022 5:25 AM
109	pic kleball	1/6/2022 6:34 PM
110	Playing pickleball. Meeting friends for walks. Watching my kids play flag football games.	1/6/2022 1:51 PM
111	Hiking with my dog and family	1/6/2022 12:12 PM
112	Being outside	1/6/2022 9:53 AM
113	Variety of activities. Open grassy areas to kick a ball, jungle gyms, courts, ball fields, pools, skate park etc	1/6/2022 8:42 AM
114	Being outdoors	1/6/2022 8:17 AM
115	They are well maintained.	1/5/2022 11:57 PM
116	Playing pickleball	1/5/2022 11:35 PM
117	open space and trails	1/5/2022 6:24 PM
118	The ability to participate in active and passively recreational opportunities.	1/5/2022 9:16 AM
119	Space to run dogs. Concerts.	1/5/2022 7:08 AM
120	I enjoy useful & upgraded facilities like tennis & basketball courts. But the city has neglected the parks in old Carlsbad for too long! The city is constantly upgrading and improving parks like Bressi & Poinsettia. Enough is enough, the city needs to stop playing favorites to areas they think are more affluent and deserving of quality park services. More people are purchasing in the Old/Olde Carlsbad area. Many of us are affluent too and deserve to have updated parks for our children instead of the old neglected parks in our neighborhoods.	1/5/2022 12:12 AM
121	The pickleball courts	1/4/2022 9:27 PM
122	The Natural open space	1/4/2022 7:13 PM
123	Pickle ball	1/4/2022 6:51 PM
124	The open space and the pickle ball courts	1/4/2022 5:36 PM
125	The concerts, bit I DO wish Parks would require some sound abatement.	1/4/2022 5:26 PM
126	Playing pickle ball	1/4/2022 4:52 PM
127	Playgrounds for kids and pickleball courts	1/4/2022 4:49 PM
128	Pickleball	1/4/2022 4:48 PM

### Q3 What do you enjoy most about going to city parks?

129	Feeling of Open Space, respect for nature/environment, sense of community/tradition (national past time historic values of simple life) large undeveloped green areas	1/4/2022 4:25 PM
130	Tennis courts, clean, safe, well-lit, bathrooms available.	1/4/2022 3:35 PM
131	Enjoying the outdoors.	1/4/2022 3:12 PM
132	Playgrounds, greenery and open spaces for calm and exercise	1/4/2022 2:28 PM
133	Many are within walking distance. The spacious lawns for activities and picnics. I love how Holiday Park has all the sand, the kids love it.	1/4/2022 2:16 PM
134	The diversity of activities available.	1/4/2022 1:06 PM
135	Playgrounds for kids and areas for dogs	1/4/2022 12:33 PM
136	Open spaces	1/4/2022 12:31 PM
137	Being outdoors and enjoying our fabulous weather!	1/4/2022 12:31 PM
138	The various trails, seeing people enjoying picnics, games, sports, seeing friends.	1/4/2022 12:22 PM
139	Walking, hiking. Different ecosystems. Grass fields.	1/4/2022 12:21 PM
140	pickelball	1/4/2022 8:39 AM
141	Playing pickleball.	1/4/2022 8:28 AM
142	Facilities	1/4/2022 8:27 AM
143	Carlsbad has done a nice job with the playgrounds & they seem to always be clean. Also I always feel that my family is safe	1/3/2022 11:58 PM
144	Green space and trees, activities	1/3/2022 10:47 PM
145	Being able to play pickleball and not having to wait for upwards of an hour.	1/3/2022 8:00 PM
146	open space, getting away from over development	1/3/2022 7:03 PM
147	Being outdoors in a safe and clean environment with minimal traffic concerns	1/3/2022 4:02 PM
148	Playing on the Pickleball court	1/3/2022 4:00 PM
149	pickleball	1/3/2022 3:36 PM
150	Well kept parks, different types of parks	1/3/2022 2:14 PM
151	dog friendly	1/3/2022 1:54 PM
152	Natural beauty, playgrounds, open space	1/3/2022 1:37 PM
153	Beautiful outdoors, our weather and the friendly folks	1/3/2022 1:12 PM
154	The open space	1/3/2022 12:23 PM
155	The amenities, safety, green places, innovative place spaces for the kids	1/3/2022 12:06 PM
156	cleanliness, dog friendly, lots of sports courts and activities	1/3/2022 11:35 AM
157	open space; activities	1/3/2022 11:35 AM
158	The open spaces with trees and kids playing on equipment and general sports activities. Walking paths, both wide concrete walks and some natural trails	1/3/2022 10:58 AM
159	clean, accessible, open, safe	1/3/2022 10:53 AM
160	Having green space available.	1/3/2022 10:49 AM
161	I love talking to fellow dog owners and generally being out with people. My Girl Scout troop occasionally meets for special events in parks, esp with COVID	1/3/2022 9:58 AM
162	Playing pickle ball and walking some of the paths.	1/3/2022 9:39 AM
163	I enjoy the option to be outside in our beautiful city.	1/3/2022 9:33 AM

## Parks & Recreation Master Plan Update

164	Playing pickleball.	1/3/2022 9:04 AM
165	enjoying natural open space, community gardens, tennis/pickleball courts	1/3/2022 8:09 AM
166	Playgrounds, restrooms, cleanliness, trails	1/3/2022 8:05 AM
167	The lovely landscape	1/3/2022 7:19 AM
168	Walking trails	1/3/2022 6:00 AM
169	recreation and exercise	1/3/2022 5:08 AM
170	They are very well kept and beautiful. I go for the pickleball courts most of the time.	1/2/2022 10:38 PM
171	Easy parking, lots of open space to run around, great play structures, good shade.	1/2/2022 8:15 PM
172	size and diversity at each park.	1/2/2022 7:55 PM
173	Clean, well kept	1/2/2022 5:47 PM
174	Pickleball	1/2/2022 5:24 PM
175	Off leash dog parks and beach and walking paths -also soft ball fields for my husband	1/2/2022 4:10 PM
176	Playing pickleball	1/2/2022 3:58 PM
177	Outdoor space for kids to play	1/2/2022 3:54 PM
178	The greenery and peace. Thanks for the upkeep and for caring.	1/2/2022 3:32 PM
179	The open space and people	1/2/2022 3:29 PM
180	Being outside and exercising through tennis, pickleball or hiking	1/2/2022 2:51 PM
181	Playing pickleball and jazz in the park.	1/2/2022 2:14 PM
182	Outside, open air	1/2/2022 1:55 PM
183	Open space and swimming pools.	1/2/2022 1:51 PM
184	Be in the outdoor space with my grandchildren	1/2/2022 1:49 PM
185	Walking trails	1/2/2022 1:27 PM
186	Making friends at the pickleball courts	1/2/2022 12:58 PM
187	Being out of doors away from the inherent hazards of motor vehicles, e.g., noise, pollution and negligent drivers.	1/2/2022 12:24 PM
188	So many great parks to enjoy our beautiful climate.	1/2/2022 12:23 PM
189	Pickleball	1/2/2022 12:15 PM
190	Pickle vall	1/2/2022 11:42 AM
191	being outside in a clean, safe environment	1/2/2022 11:23 AM
192	The areas to walk and exercise. Pool access and the opportunity for sports teams.	1/2/2022 10:22 AM
193	The play structures (the kiddo likes), the cleanliness, being able to enjoy a well designed outdoor spot.	1/2/2022 10:02 AM
194	Getting our kids outside.	1/2/2022 9:29 AM
195	Not seeing homeless people sleeping in them.	1/2/2022 9:19 AM
196	Beautiful outdoor areas! The alga Norte pool! Play space for kids. Walking trails.	1/2/2022 9:02 AM
197	Pickleball	1/2/2022 8:56 AM
198	With the exception of Pine, Holiday, and Magee parks, most parks are safe public spaces to enjoy open space and park amenities.	1/2/2022 8:37 AM
199	Pickleball	1/2/2022 8:22 AM
200	Alga Norte pool	1/2/2022 8:20 AM

### Q3 What do you enjoy most about going to city parks?

201	Spaciousness, cleanliness	1/2/2022 8:12 AM
202	Skateparks	1/2/2022 6:37 AM
203	Being outside	1/2/2022 5:23 AM
204	Meeting people in our neighborhoods and playing and socializing with them.	1/1/2022 11:34 PM
205	I would enjoy using the spa If it was actually properly maintained! Since it is Not maintained I CAN'T ENJOY IT SINCE IT IS RARELY OPEN!	1/1/2022 10:41 PM
206	open space	1/1/2022 9:10 PM
207	Fields and play structures	1/1/2022 8:51 PM
208	My kids enjoy the play structures.	1/1/2022 8:48 PM
209	the beautiful green parks, pickle ball and dog parks	1/1/2022 8:42 PM
210	Pickleball courts	1/1/2022 8:38 PM
211	open-air, but not waiting in line to play pickleball. Courts are too crowded, obviously, we need more.	1/1/2022 8:33 PM
212	The play structures for children	1/1/2022 8:27 PM
213	Tennis	1/1/2022 8:20 PM
214	Tennis and Pickleball games.	1/1/2022 6:59 PM
215	Youth sports activities	1/1/2022 6:56 PM
216	Play & socializing w people	1/1/2022 6:39 PM
217	Trees	1/1/2022 6:09 PM
218	Playing tennis, playing on the lawn, and walking the trails.	1/1/2022 5:53 PM
219	the beauty	1/1/2022 5:51 PM
220	Pickleball	1/1/2022 5:44 PM
221	Yes	1/1/2022 5:43 PM
222	Pickleball	1/1/2022 5:42 PM
223	open space	1/1/2022 5:14 PM
224	Baseball fields and currently because of the age of my children, the play equipment.	1/1/2022 5:05 PM
225	Green grass and the opportunity to be in an outside setting with trees/open spaces to enjoy	1/1/2022 5:01 PM
226	Seeing happy kids. Wonderful outdoor space with trees.	1/1/2022 4:58 PM
227	Playing pickleball Walking and running around the school fields	1/1/2022 4:40 PM
228	Safe, well lit spaces where everyone of every age can access the outdoors. So many of todays new townhomes, condos and apartment buildings lack a yard of any kind.	1/1/2022 4:39 PM
229	Playground, sand box	1/1/2022 3:51 PM
230	Playing pickleball	1/1/2022 3:11 PM
231	Wonderful places for my grandchildren to play.	1/1/2022 2:18 PM
232	Pickleball courts	1/1/2022 2:14 PM
233	outdoors, fresh air, beauty	1/1/2022 1:25 PM
234	outdoor activities for kids	1/1/2022 1:23 PM
235	the swimming at Alga Norte	1/1/2022 1:03 PM
236	hiking, sitting	1/1/2022 12:12 PM

## Parks & Recreation Master Plan Update

237	Cleanliness, safety, exercise, learning, meeting new friends and seeing the old ones.	1/1/2022 11:43 AM
238	Playing pickleball	1/1/2022 11:42 AM
239	The outdoor space.	1/1/2022 11:38 AM
240	Open spaces. Well designed.	1/1/2022 10:49 AM
241	Cleanliness	1/1/2022 10:38 AM
242	Pickle ball community and beautiful outdoor park	1/1/2022 10:36 AM
243	The open green areas secluded from baseball fields and playgrounds.	1/1/2022 10:34 AM
244	The playgrounds.	1/1/2022 9:46 AM
245	Open space, green grass, children's joy, places for gathering friends/families for parties, bbq, outdoor sporting games	1/1/2022 9:34 AM
246	Exercise and meeting new people	1/1/2022 9:29 AM

255	Nice and clean. Friendly staff.	1/1/2022 7:53 AM
256	the green and serenity	1/1/2022 7:43 AM
257	Pickleball	1/1/2022 7:38 AM
258	The amenities	1/1/2022 7:38 AM
259	Walking, pickle ball, scenery and tranquillity.	1/1/2022 7:27 AM
260	Open spaces with beautiful grass areas.	1/1/2022 7:01 AM
261	Parks are clean, safe, and well maintained.	1/1/2022 6:59 AM
262	Seeing my kids have fun	1/1/2022 6:42 AM
263	Meeting new people playing pickle ball.	1/1/2022 5:34 AM
264	Large, clean	1/1/2022 3:15 AM
265	Facilities.	1/1/2022 1:26 AM
266	Pickleball courts	12/31/2021 11:42 PM
267	Above	12/31/2021 10:29 PM
268	Pickleball	12/31/2021 9:45 PM
269	Variety	12/31/2021 9:34 PM
270	How the city of Carlsbad is always willing to improve everyone's experience. Especially the upcoming sports like Pickle Ball ❤️	12/31/2021 9:13 PM
271	Pickleball	12/31/2021 8:47 PM
272	Quiet time	12/31/2021 8:44 PM
273	Pool at Alga Norte	12/31/2021 8:39 PM

### Q3 What do you enjoy most about going to city parks?

274	Trees	12/31/2021 8:12 PM
275	running trails	12/31/2021 6:39 PM
276	Playing pickleball	12/31/2021 6:38 PM
277	Being outdoors & learning something new.	12/31/2021 6:12 PM
278	Walking	12/31/2021 6:02 PM
279	Open space	12/31/2021 5:41 PM
280	They are clean, safe, modern, and offer many amenities.	12/31/2021 5:40 PM
281	Walking, birdwatching and pickleball	12/31/2021 5:33 PM
282	The open options to use fields/space early morning quietly/peacefully	12/31/2021 4:56 PM
283	Exercise in a social environment	12/31/2021 4:35 PM
284	Playgrounds, tennis courts, pickle ball courts, walking paths	12/31/2021 4:25 PM
285	Greenery and quiet.	12/31/2021 4:22 PM
286	concerts	12/31/2021 4:21 PM
287	Nice people	12/31/2021 4:18 PM
288	Pickleball,large green areas and concerts	12/31/2021 4:15 PM
289	Playing picklebal lwith all age groups.	12/31/2021 4:13 PM
290	Pickleball and kids flagfootball games	12/31/2021 3:55 PM
291	The different types of playground and cleanliness. People are kind and respectful.	12/31/2021 3:55 PM
292	Fun for picnics, gatherings and bringing grandchildren to play.	12/31/2021 3:52 PM
293	pickleball	12/31/2021 3:49 PM
294	Being outside in natural settings	12/31/2021 3:47 PM
295	Activity for seniors. Have no kids, so those activities not relevant to us.	12/31/2021 3:44 PM
296	Well kept, easy parking, clean & maintained facilities	12/31/2021 3:36 PM
297	All of it, green space, trees, programs at recreation centers	12/31/2021 3:24 PM
298	Pickleball	12/31/2021 3:05 PM
299	Peace and quiet	12/31/2021 3:05 PM
300	Play pickleball	12/31/2021 2:59 PM
301	Pickleball	12/31/2021 2:58 PM
302	picikleball	12/31/2021 2:58 PM
303	Areas for children to play. Sports, playgrounds	12/31/2021 2:57 PM
304	pickleball	12/31/2021 2:55 PM
305	Pickleball	12/31/2021 2:55 PM
306	pickle ball concerts	12/31/2021 2:53 PM
307	being able to walk or relax in a safe and clean environment	12/31/2021 2:43 PM
308	Playing pickleball	12/31/2021 2:26 PM
309	Swimming...	12/31/2021 2:23 PM
310	Pickleball	12/31/2021 2:20 PM
311	facilities are in good shape and diverse	12/31/2021 2:15 PM

## Parks & Recreation Master Plan Update

312	Hiking, open space, native plants and wildlife	12/31/2021 2:09 PM
313	pickleball	12/31/2021 1:43 PM
314	playing tennis, soccer, pickle ball	12/31/2021 1:40 PM
315	Playing Pickleball at Poinsettia Park.	12/31/2021 1:40 PM
316	Sport fields, tennis courts, basketball courts, etc.	12/31/2021 1:34 PM
317	Exposure to nature/outdoors. Allowing our children to play our participate in sports.	12/31/2021 1:33 PM
318	getting my kids out of the house and active	12/31/2021 1:15 PM
319	Hanging out assuming it's safe and there aren't a bunch of drug addicts around.	12/31/2021 1:14 PM
320	Being outside	12/31/2021 1:03 PM
321	sitting on benches and watching children play	12/31/2021 1:00 PM
322	Playing pickleball.	12/31/2021 12:59 PM
323	Pickleball	12/31/2021 12:52 PM
324	Engaging with friendly fellow community members!	12/31/2021 12:40 PM
325	Pickleball is the primary reason, but my wife and I have attended concerts on occasion.	12/31/2021 12:24 PM
326	Seeing neighbors, safe place for kids to play, keeping kids active, multi use, fresh air, there are so many different types of parks in the city. I love living in Carlsbad.	12/31/2021 12:14 PM
327	The great friends I see playing pickleball	12/31/2021 12:13 PM
328	Pickleball	12/31/2021 12:08 PM
329	pickleball	12/31/2021 12:07 PM
330	Depends upon the Park. In the case of a) Alga Norte Park: the pool, the splash park, and the play area. b) Magee Park: the wide expanse of grass, the tall shade trees, and the rose gardens.	12/31/2021 12:06 PM
331	Cleanliness and quality of the facilities.	12/31/2021 11:54 AM
332	Playing pickleball	12/31/2021 11:45 AM
333	Pickleball	12/31/2021 11:43 AM
334	playground	12/31/2021 11:35 AM
335	Playing pickleball	12/31/2021 11:31 AM
336	outdoors, fresh air, activity such as pickleball and tennis courts	12/31/2021 11:31 AM
337	Cleanliness, variety, themes, activities	12/31/2021 11:30 AM
338	The city parks offer a variety of amenities and are clean.	12/31/2021 11:24 AM
339	They seem to be kept clean and inviting.	12/31/2021 11:20 AM
340	Jazz @ the park concerts. Walking thru them.	12/31/2021 11:19 AM
341	Quality of facilities	12/31/2021 11:15 AM
342	variety activities available-waling paths, grass areas to lay on, picnic tables	12/31/2021 11:10 AM
343	playing pickleball	12/31/2021 11:06 AM
344	Using a variety of facilities.	12/31/2021 11:05 AM
345	Versatility	12/31/2021 11:02 AM
346	Playing Pickleball	12/31/2021 10:57 AM
347	pickleball courts	12/31/2021 10:54 AM
348	Clean, updated facilities, beautiful trees.	12/31/2021 10:46 AM

### Q3 What do you enjoy most about going to city parks?

349	Space, foliage and native plants, clean	12/31/2021 10:44 AM
350	Pickleball	12/31/2021 10:42 AM
351	We enjoy the open spaces and view the natural habitat.	12/31/2021 10:41 AM
352	Open spaces.	12/31/2021 10:38 AM
353	playing pickleball	12/31/2021 10:30 AM
354	walking and hiking	12/31/2021 10:24 AM
355	A nice safe space to walk around, see nature, kids playing, and pickleball.	12/31/2021 10:19 AM
356	Enjoying our city and the outdoors	12/31/2021 10:12 AM
357	Playing pickleball	12/31/2021 10:11 AM
358	The peace and quiet.	12/31/2021 10:11 AM
359	Pickleball	12/31/2021 10:04 AM
360	aquatic center, Alga Norte	12/31/2021 10:02 AM
361	Pickleball and the great facilities	12/31/2021 9:59 AM
362	Pickleball courts	12/31/2021 9:58 AM
363	Pickleball and tennis courts	12/31/2021 9:56 AM
364	Playing Pickleball	12/31/2021 9:47 AM
365	Playing pickleball	12/31/2021 9:43 AM
366	peaceful green relaxing experience	12/31/2021 9:41 AM
367	We enjoy Alga Norte because of the variety of options for families. Also, having dog parks is important as many families don't have a large yard for their dog to run.	12/31/2021 9:41 AM
368	Getting fresh air	12/31/2021 9:35 AM
369	exercise/ sports	12/31/2021 9:28 AM
370	Walking	12/31/2021 9:12 AM
371	Pickleball courts	12/31/2021 9:12 AM
372	hiking	12/31/2021 9:11 AM
373	kids play	12/31/2021 9:11 AM
374	Open spaces, social interaction with others, facilities for activities.	12/31/2021 9:08 AM
375	Well Maintained	12/31/2021 9:06 AM
376	How well maintained they are!	12/31/2021 9:05 AM
377	Walking with my dog	12/31/2021 9:03 AM
378	City parks are for friends and family and communities to enjoy, year round because we are so fortunate to live in beautiful San Diego!!!	12/31/2021 9:03 AM
379	Parks are clean, the bathrooms almost always have soap, facilities are in good repair.	12/31/2021 9:02 AM
380	Softball fields	12/31/2021 8:54 AM
381	pickleball	12/31/2021 8:52 AM
382	being out in the sunshine and enjoying our great weather in a safe environment.	12/31/2021 8:51 AM
383	Playing pickleball. It saved my life during Covid and I've been playing for a year now and LOVE it!	12/31/2021 8:45 AM
384	Being outside	12/31/2021 8:37 AM

## Parks & Recreation Master Plan Update

385	Cleanliness. Safe. Bathroom accessibility.	12/31/2021 8:34 AM
386	I appreciate the open space, large trees, recreation opportunities and integrated native vegetation at some sites like the riparian area at Poinsettia Park.	12/31/2021 8:33 AM
387	Skateboarding	12/31/2021 8:31 AM
388	Pickleball	12/31/2021 8:30 AM
389	They are nicely maintained.	12/31/2021 8:29 AM
390	Outdoors Variety of spaces (playgrounds, sporting, open/nature)	12/31/2021 8:26 AM
391	Outdoor space, place for kids sports	12/31/2021 8:26 AM
392	Tennis	12/31/2021 8:24 AM
393	Clean areas; well maintained; fits with City and surroundings.	12/31/2021 8:23 AM
394	Open space. Clean, safe natural environments.	12/31/2021 8:21 AM
395	These courts are generally well maintained and high in number ( 9 courts total). It is a favorite spot for the private teaching coaches. City parks are clean and generally safe.	12/31/2021 8:20 AM
396	Meeting new people from the community. Being outdoors	12/31/2021 8:16 AM
397	Clean and safe	12/31/2021 8:14 AM
398	Playing and meeting people.	12/31/2021 8:14 AM
399	I visit alga Norte several days a week. I appreciate the pool v much. Meeting friends at the park during pandemic was a wonderful resource	12/31/2021 8:12 AM
400	Feeling refreshed by being outdoors whether alone or with others.	12/31/2021 8:08 AM
401	Playgrounds, trails, skate park	12/31/2021 8:07 AM
402	Pickleball	12/31/2021 8:07 AM
403	cleanliness, spaciousness, well managed/maintained	12/31/2021 8:05 AM
404	Pickleball	12/31/2021 8:04 AM
405	Preserving the open space and beautiful views	12/31/2021 8:03 AM
406	being outdoors is a healthy environment to be in well Maine	12/31/2021 8:01 AM
407	For some of the single-purpose activities you can only do at some of the parks. I enjoy some of these single purpose activities. But these single purpose functions are also key Park limitations and prevent fundamental park functions of providing usable grassed multi-use space for all sorts of recreation.	12/31/2021 7:58 AM
408	Outdoor activities. Well maintained	12/31/2021 7:57 AM
409	Grass areas for games	12/31/2021 7:55 AM
410	Walking.	12/31/2021 7:55 AM
411	We enjoy the pickleball courts. We like that they have the low fences between the courts to prevent balls from rolling in to nearby courts.	12/31/2021 7:54 AM
412	Pool activities.	12/31/2021 7:52 AM
413	Pickleball!	12/31/2021 7:51 AM
414	being able to play without sitting and watching the same 4 people play nonstop all day.	12/31/2021 7:50 AM
415	Big, cleaned and well maintained	12/31/2021 7:43 AM
416	Playing Pickleball	12/31/2021 7:40 AM
417	Pickleball	12/31/2021 7:37 AM
418	Taking my grandkids and tennis	12/31/2021 7:36 AM

### Q3 What do you enjoy most about going to city parks?

419	Large spaces to sit,play ,picnic that a clean and we'll maintained.	12/31/2021 7:36 AM
420	The safe environment and welcoming community at the pickleball courts. All ages- from school age, teens, college, moms, retirees to octogenarians and beyond, socialize and enjoy	12/31/2021 7:36 AM
421	Clean, safe	12/31/2021 7:33 AM
422	Open land	12/31/2021 7:32 AM
423	The open spaces, concerts in the parks, picnic areas and pickleball	12/31/2021 7:31 AM
424	Watching my kids play	12/31/2021 7:31 AM
425	Pickleball courts	12/31/2021 7:30 AM
426	jazz concerts	12/31/2021 7:28 AM
427	Outdoor recreation and meeting new people.	12/31/2021 7:22 AM
428	Our aquatic center but it needs to be bigger. The swim team uses it so much that other programs don't have water space.	12/31/2021 7:19 AM
429	The park	12/31/2021 7:17 AM
430	Pickleball	12/31/2021 6:57 AM
431	Pickleball walking	12/31/2021 6:55 AM
432	Pickleball	12/31/2021 6:53 AM
433	Easy to get to by the bus	12/31/2021 6:48 AM
434	Clean and safe	12/31/2021 6:47 AM
435	Playing pickleball	12/31/2021 6:45 AM
436	Well kept and clean.	12/31/2021 6:43 AM
437	Meeting new friends and exercise.	12/31/2021 6:43 AM
438	Pickleball facility at Poinsettia had changed my life. I would be there all day except it so busy at peak times that it's hard to get playing time.	12/31/2021 6:43 AM
439	There is a lot to do, they are all close by and they are free.	12/31/2021 6:43 AM
440	Meeting others while getting exercise playing pickleball	12/31/2021 6:39 AM
441	Pickleball	12/31/2021 6:33 AM
442	Walking there at sunset	12/31/2021 6:26 AM
443	Pickleball	12/31/2021 6:21 AM
444	Open space, enjoy walking around parks	12/31/2021 6:21 AM
445	Pickleball courts	12/31/2021 6:20 AM
446	Pickleball!	12/31/2021 6:15 AM
447	Playing at the Pickleball courts.	12/31/2021 6:09 AM
448	Used to be safe places to go with family.	12/31/2021 6:09 AM
449	The green and spacious environment	12/31/2021 6:02 AM
450	The variety of use-spaces, e.g., playgrounds, basketball, softball, etc.	12/31/2021 5:59 AM
451	Tennis and pickleball	12/31/2021 5:51 AM
452	Recreation and social	12/31/2021 5:51 AM
453	Playing pickleball	12/31/2021 5:50 AM
454	Pickleball	12/31/2021 5:45 AM
455	Location, pickleball courts.	12/31/2021 5:40 AM

## Parks & Recreation Master Plan Update

456	Space, grass, trees	12/31/2021 5:25 AM
457	Open space and playground and athletic facilities	12/31/2021 5:20 AM
458	Pickleball	12/31/2021 5:12 AM
459	Being active	12/31/2021 5:06 AM
460	Exercising outdoors	12/31/2021 5:06 AM
461	Well maintained. Diverse and abundant activities.	12/31/2021 5:06 AM
462	Play with grandkids, walk dog, walk trails. Availability of restrooms.	12/31/2021 4:54 AM
463	How well-maintained they are. The restrooms and facilities at Holiday Park are always clean, the park is always in great condition.	12/31/2021 4:49 AM
464	Pickleball	12/31/2021 4:09 AM
465	Open space and Pickleball.	12/31/2021 3:09 AM
466	Clean well kept facilities	12/31/2021 2:37 AM
467	Exercise	12/31/2021 2:05 AM
468	They are generally well-maintained.	12/31/2021 12:46 AM
469	playing pickleball with everyone	12/31/2021 12:30 AM
470	They are clean, well maintained, and my kids love playing there.	12/31/2021 12:21 AM
471	I live right by Poinsettia Park. Love the bowl & new playground. Looking forward to the dog park, too.	12/31/2021 12:09 AM
472	Playing pickleball	12/30/2021 11:44 PM
473	Greenery.	12/30/2021 11:41 PM
474	The beauty and diversity and accessibility for all of Carlsbad	12/30/2021 11:34 PM
475	Cleanliness and green areas.	12/30/2021 11:31 PM
476	Open space, the people, the trails	12/30/2021 11:30 PM
477	Clean, lots of room, many different activities	12/30/2021 11:29 PM
478	Crossings golf and beaches and trails.	12/30/2021 11:20 PM
479	Space to move without cars nearby, trees and plants, swimming laps	12/30/2021 11:20 PM
480	Playing pickleball with all sorts of people from all sorts of places.	12/30/2021 11:12 PM
481	Landscape Picnic facilities	12/30/2021 11:11 PM
482	Volleyball and pickleball	12/30/2021 11:07 PM
483	Meeting people and playing pickle ball and walks. Enjoying the scenery	12/30/2021 11:05 PM
484	Pickleball	12/30/2021 11:04 PM
485	Open areas with grass.	12/30/2021 11:01 PM
486	How beautifully the parks are maintained and the variety of activities available.	12/30/2021 11:00 PM
487	I like that Poinsettia park Pickleball courts are nice and well cared for. They are not "let go" like they are in Pacific Beach.	12/30/2021 10:59 PM
488	How nice the parks are	12/30/2021 10:54 PM
489	Our city parks are really a nice place for the community. They are usually well-maintained.	12/30/2021 10:54 PM
490	The friendly community	12/30/2021 10:45 PM
491	Seeing neighbors and hearing kids play	12/30/2021 10:31 PM

## Q3 What do you enjoy most about going to city parks?

492	Pickleball, trails	12/30/2021 10:28 PM
493	Pickleball	12/30/2021 10:20 PM
494	Quietness	12/30/2021 10:20 PM
495	The green areas	12/30/2021 10:19 PM
496	They're so clean!! The staff that take care of them do an excellent job. The trash is almost never overflowing and the dog park off Carlsbad village is always well taken care of. They bring fresh chips regularly, and I swear a poop fairy must come by every night because I rarely see any poop. Our residents are pretty good about it, but not THAT good.	12/30/2021 10:16 PM
497	Nature	12/30/2021 10:12 PM
498	Walking, enjoying the views.	12/30/2021 10:11 PM
499	Freedom to run and play in a safe, beautiful setting.	12/30/2021 10:10 PM
500	Playgrounds children	12/30/2021 10:09 PM
501	Open space	12/30/2021 10:07 PM
502	Walking dogs, using tennis courts to get exercise to play pickleball.	12/30/2021 10:04 PM
503	Walking spaces	12/30/2021 10:02 PM
504	Benches, picnic areas	12/30/2021 10:01 PM
505	A chance to see other members of my community in an outdoor setting.	12/30/2021 9:57 PM
506	Concerts in the park. Hire touring talents not just local var bands!	12/30/2021 9:53 PM
507	They're clean, dog waste bags are always available, diverse areas that they're available, there's something for everyone to do (relax, walk, play, playgrounds, etc.).	12/30/2021 9:53 PM
508	The city parks are well kept and fun places to go to. Put outdoor pickleball courts at more of them - then the parks would be even better!	12/30/2021 9:51 PM
509	Open space and well cared for plants and trees	12/30/2021 9:51 PM
510	Trees, clean air, soccer field	12/30/2021 9:50 PM
511	The amenities are wonderful. We love alga Norte aquatics and the updated structure at poinsettia park.	12/30/2021 9:45 PM
512	Lots of green spaces, trees, and fun places for kids and adults.	12/30/2021 9:36 PM
513	Walking, and seeing trees and plants.	12/30/2021 9:35 PM
514	I enjoy how many there are and for the most part well kept.	12/30/2021 9:31 PM
515	My grandkids enjoy the playgrounds and I enjoy just being able to walk around. I'd love to use the pickleball courts, but they are too crowded.	12/30/2021 9:23 PM
516	Skate parks, monkey bars, zip lines	12/30/2021 9:20 PM
517	The camaraderie, the variety of people from all walks of life, the availability, the exercise	12/30/2021 9:19 PM
518	Open space, grassy areas and kids playgrounds and sports fields.	12/30/2021 9:17 PM
519	The fun safe atmosphere. Holiday park needs more homeless enforcment.	12/30/2021 9:16 PM
520	High quality facilities. Clean rest rooms.	12/30/2021 9:09 PM
521	Playing pickleball	12/30/2021 8:55 PM
522	More trails and all connected	12/30/2021 8:52 PM
523	Pickleball along with everything else the basic park items already at most of these parks	12/30/2021 8:51 PM
524	Being able to walk around, throw in a few baskets. Just relax. I'd like to take up pickleball - will Calavera park have courts as part of the improvements?	12/30/2021 8:50 PM
525	The outdoor space to enjoy fresh air & sunshine without having to wear a mask! (Keeping	12/30/2021 8:47 PM

## Parks & Recreation Master Plan Update

	appropriate social distance, of course)	
526	Playing pickleball	12/30/2021 8:43 PM
527	Trees	12/30/2021 8:43 PM
528	Social aspect and the fitness too!	12/30/2021 8:39 PM
529	Taking walks. Walking dogs. Basketball and pickleball	12/30/2021 8:38 PM
530	They are clean and safe	12/30/2021 8:35 PM
531	Bike parks	12/30/2021 8:35 PM
532	Open spaces, well maintained.	12/30/2021 8:33 PM
533	Getting outside and playing	12/30/2021 8:31 PM
534	Pickleball	12/30/2021 8:26 PM
535	Good hours, great commradery, always able to find a other pickleball player.	12/30/2021 8:25 PM
536	Playing sports and kids' events	12/30/2021 8:23 PM
537	Playing pickleball and softball.	12/30/2021 8:19 PM
538	Lots of activities like playgrounds, game courts and fields (various), hiking paths	12/30/2021 8:19 PM
539	Outdoors	12/30/2021 8:18 PM
540	Being outside in nature	12/30/2021 8:16 PM
541	Clean, playground for all ages, open grass area	12/30/2021 8:16 PM
542	Variety of parks. Well thought out events and leagues.	12/30/2021 8:12 PM
543	The trees and grass and open space	12/30/2021 8:10 PM
544	My kids being able to play and get exercise.	12/30/2021 8:08 PM
545	poinsettia park is clean and offers something for everyone	12/30/2021 8:07 PM
546	Playing with my grandchildren.	12/30/2021 8:05 PM
547	Open space, activities, hiking paths	12/30/2021 7:55 PM
548	Trails, walkways, greenery, trees, sport fields, playgrounds, and dog parks.	12/30/2021 7:54 PM
549	Pickleball and open spaces for dog walking mainly; playgrounds with kids I babysit.	12/30/2021 7:53 PM
550	playing pickleball	12/30/2021 7:50 PM
551	Pickleball, hiking and bike riding	12/30/2021 7:49 PM
552	Playing pickleball	12/30/2021 7:48 PM
553	Getting together with neighbors and friends to play pickleball.	12/30/2021 7:48 PM
554	Pools	12/30/2021 7:42 PM
555	Playing with my dog.	12/30/2021 7:41 PM
556	Walking	12/30/2021 7:41 PM
557	The open space. The manicured lawn.	12/30/2021 7:41 PM
558	Long walks and possibly recharging my EV car when available. Cannot wait for Poinsettia to be equipped.	12/30/2021 7:38 PM
559	Walking with my dog	12/30/2021 7:30 PM
560	Like having multiple activities in one spot so that all family members can participate in a variety of things.	12/30/2021 7:30 PM
561	Grass openness	12/30/2021 7:28 PM

### Q3 What do you enjoy most about going to city parks?

562	Pickleball	12/30/2021 7:25 PM
563	The views, the cleanliness, the water fountains and lovely play equipment with large open field for picnics, families and dogs.	12/30/2021 7:23 PM
564	Hiking trails, Tennis courts, picnic areas,	12/30/2021 7:14 PM
565	Playing pickleball with my family!	12/30/2021 7:11 PM
566	Concerts in n the park	12/30/2021 7:08 PM
567	Being outdoors!	12/30/2021 7:07 PM
568	All the amenities	12/30/2021 7:03 PM
569	Nature, kid playgrounds	12/30/2021 7:02 PM
570	Walking pathes, BBQ	12/30/2021 7:01 PM
571	Alga Norte swim complex	12/30/2021 6:59 PM
572	Tennis courts	12/30/2021 6:58 PM
573	open space/ multiple activities	12/30/2021 6:58 PM
574	the Cleanliness	12/30/2021 6:55 PM
575	The greenery	12/30/2021 6:50 PM
576	The great outdoor's	12/30/2021 6:48 PM
577	Clean, well kept, peaceful	12/30/2021 6:46 PM
578	Well planned clean well lighted.	12/30/2021 6:45 PM
579	Playgrounds	12/30/2021 6:43 PM
580	Kids happiness	12/30/2021 6:41 PM
581	Nice equipment and good parking. Also the lack of homeless people hanging out.	12/30/2021 6:38 PM
582	The parks are all layer out so nicely and it's fun to take the kids to play.	12/30/2021 6:34 PM
583	Being able relax and take in the beauty in many. And a place to walk and not worry about traffic	12/30/2021 6:34 PM
584	I play pickle ball frequently.	12/30/2021 6:33 PM
585	Cleanliness and upkeep	12/30/2021 6:29 PM
586	Location to my home and many activities for kids and families.	12/30/2021 6:29 PM
587	Fields, courts picnic areas	12/30/2021 6:28 PM
588	Beautiful settings	12/30/2021 6:27 PM
589	Playing tennis, walking dog, and strolling	12/30/2021 6:26 PM
590	The ability to sit and relax and read, or visit with friends. Watching the children play. Watching wild life.	12/30/2021 6:21 PM
591	Walking around them	12/30/2021 6:17 PM
592	The summer concerts.	12/30/2021 6:17 PM
593	Pools	12/30/2021 6:14 PM
594	Playing Pickleball	12/30/2021 6:14 PM
595	Community gathering	12/30/2021 6:12 PM
596	Pickle ball	12/30/2021 6:10 PM
597	cleanliness	12/30/2021 6:10 PM
598	Alga Norte pool	12/30/2021 6:10 PM

## Parks & Recreation Master Plan Update

599	Walking in them	12/30/2021 6:09 PM
600	The number of locations available, the safety and cleanliness/maintenance is extremely important.	12/30/2021 6:09 PM
601	Soccer and pickleball	12/30/2021 6:07 PM
602	Playing Pickleball and enjoying a walk around your park	12/30/2021 6:06 PM
603	Open space	12/30/2021 6:06 PM
604	Decent quality facilities	12/30/2021 6:03 PM
605	Natural beauty	12/30/2021 6:01 PM
606	Cleanliness	12/30/2021 5:59 PM
607	Alga/Monroe pools	12/30/2021 5:59 PM
608	Very pretty parks and very clean, esp Alga Norte. I also bike past Laguna ? Park (on Kelly Drive) and that looks very nice to use.	12/30/2021 5:56 PM
609	pickling!	12/30/2021 5:52 PM
610	When our kids were young they LOVED the playgrounds. And it was a wonderful break for me!	12/30/2021 5:52 PM
611	I like to play pickleball at the pickleball courts.	12/30/2021 5:51 PM
612	Pickleball	12/30/2021 5:51 PM
613	Pickling !	12/30/2021 5:50 PM
614	The Pickleball court at poinsettia park	12/30/2021 5:50 PM
615	The tennis courts	12/30/2021 5:48 PM
616	pickleball courts	12/30/2021 5:47 PM
617	Pickleball courts.	12/30/2021 5:44 PM
618	Nature	12/30/2021 5:44 PM
619	Pickleball	12/30/2021 5:43 PM
620	How well tended the grounds are kept	12/30/2021 5:41 PM
621	Meeting new people at the courts	12/30/2021 5:41 PM
622	Multi-use and tennis.	12/30/2021 5:41 PM
623	Nice out side space. Well maintained	12/30/2021 5:40 PM
624	I enjoy using the spa at Alga Norte	12/30/2021 5:33 PM
625	Enjoying the outdoors in a clean and beautiful setting	12/30/2021 5:33 PM
626	Grounds well maintained Bathrooms clean with toilet paper Dog parks Sense of community spirit cuz so well used	12/30/2021 5:33 PM
627	They are usually clean and well equipped	12/30/2021 5:31 PM
628	Being outdoors	12/30/2021 5:31 PM
629	Walking	12/30/2021 5:29 PM
630	Cleanliness	12/30/2021 5:29 PM
631	Open space but with places to exercise.	12/30/2021 5:26 PM
632	grandkids games	12/30/2021 5:25 PM
633	Playing pickleball with family and friends	12/30/2021 5:22 PM
634	They are well maintained	12/30/2021 5:21 PM

### Q3 What do you enjoy most about going to city parks?

635	Pickleball, safe spaces, and open areas	12/30/2021 5:16 PM
636	Being outdoors, the trails & the views	12/30/2021 5:16 PM
637	Open space, play areas for children and adults and teens.	12/30/2021 5:16 PM
638	Well maintained and clearly used as day use parks and not used as illegal encampments for the unsheltered.	12/30/2021 5:15 PM
639	quiet reflection, greenery, walking areas,	12/30/2021 5:14 PM
640	Walking, watching	12/30/2021 5:12 PM
641	Open fresh air, greenery, community interaction, the presence laughter/life, a place to escape the more crowded recreation venues.	12/30/2021 5:11 PM
642	Open space	12/30/2021 5:10 PM
643	Talking our granddaughter and playing pickle ball	12/30/2021 5:10 PM
644	Open space, a place to picnic	12/30/2021 5:08 PM
645	Open space ,grass,trees, some tables, parking	12/30/2021 5:08 PM
646	How clean and well maintained our city parks are	12/30/2021 5:08 PM
647	Layout	12/30/2021 5:07 PM
648	Nice baseball and soccer fields Nice grass and clean play spaces	12/30/2021 5:07 PM
649	Beautiful surroundings.	12/30/2021 5:06 PM
650	Open space, nature	12/30/2021 5:05 PM
651	They are really nice	12/30/2021 5:05 PM
652	Poinsettia is a great park. Everyone knows it which is why it is so crowded. Word of mouth can be a good thing, in this case.....not so good. I see people leave all the time when they see so many paddles on the rack.	12/30/2021 5:04 PM
653	Walking trails	12/30/2021 5:04 PM
654	Pickleball	12/30/2021 5:03 PM
655	Relaxing meditation	12/30/2021 5:02 PM
656	Taking my grandchildren	12/30/2021 5:01 PM
657	Beautiful place to exercise and relax with ample night lighting and bathroom facilities.	12/30/2021 4:59 PM
658	Being outdoors	12/30/2021 4:54 PM
659	The open space and greenery.	12/30/2021 4:53 PM
660	I swim 4x's per week at Alga Norte. I love that place!	12/30/2021 4:52 PM
661	Playing pickleball	12/30/2021 4:51 PM
662	My backyard shares a fence with one of the city parks and has for over 20 years and I love all the healthy happy cheer and family fun the park system brings to a community. The only down side is the landscape blowers.	12/30/2021 4:49 PM
663	Pickleball	12/30/2021 4:47 PM
664	They're beautiful, clean and well-maintained. Easy parking. Walking paths.	12/30/2021 4:46 PM
665	Open space and scenery, playgrounds, outdoor space for gatherings	12/30/2021 4:46 PM
666	The upkeep is very good. Environmentally, the parks are peaceful and pleasant.	12/30/2021 4:46 PM
667	Very little	12/30/2021 4:45 PM
668	Wide open space, lovely views, taking care of my garden	12/30/2021 4:45 PM
669	Green space/landscaping and opportunities to exercise and play.	12/30/2021 4:45 PM

## Parks & Recreation Master Plan Update

670	Parks with no pets around.	12/30/2021 4:44 PM
671	walking my dog on leash until I was told I was breaking the law	12/30/2021 4:43 PM
672	Trees, birds, running with dog	12/30/2021 4:42 PM
673	A place to walk	12/30/2021 4:41 PM
674	Clean and safe	12/30/2021 4:40 PM
675	Green grass.	12/30/2021 4:38 PM
676	Swimming at Monroe and hiking on trails.	12/30/2021 4:37 PM
677	The pools at Alga Norte	12/30/2021 4:35 PM
678	Going down to Stage Coach to see if I can actually sit out in the park for once.	12/30/2021 4:34 PM
679	Open space to enjoy with family.	12/30/2021 4:31 PM
680	Carlsbad parks are always clean and well maintained.	12/30/2021 4:31 PM
681	Alga Norte is a good pool	12/30/2021 4:30 PM
682	I enjoy seeing my kids run around and play outside.	12/30/2021 4:29 PM
683	open space	12/30/2021 4:28 PM
684	Feeling connected to the neighborhood and community.	12/30/2021 4:27 PM
685	Safe environment for walking and playing sports	12/30/2021 4:27 PM
686	The availability. even with a lot of users there is an adequate amount of space to enjoy our parks.	12/30/2021 4:26 PM
687	Being outdoors	12/30/2021 4:25 PM
688	Open area and lots of options	12/30/2021 4:24 PM
689	Chance to get out with nature and observe kids at play	12/30/2021 4:24 PM
690	Access to nature, safe/nice place to walk, able to see folks of all ages enjoying themselves.	12/30/2021 4:24 PM
691	Playing with my grandson.	12/30/2021 4:20 PM
692	Being outdoors, availability of restrooms.	12/30/2021 4:19 PM
693	Pickleball	12/30/2021 4:17 PM
694	Swimming	12/30/2021 4:17 PM
695	Being outside	12/30/2021 4:16 PM
696	Everything	12/30/2021 4:15 PM
697	Trails walking	12/30/2021 4:13 PM
698	There are clean and well maintained.	12/30/2021 4:13 PM
699	Playing pickleball and dog parks	12/30/2021 4:12 PM
700	Pickleball	12/30/2021 4:08 PM
701	Open space, community, and fellow pickleballers. I moved here knowing zero people. One day at Poinsettia Park... 50 new friends!	12/30/2021 4:06 PM
702	The peaceful environment, seeing people enjoy themselves, Pickleball softball tennis frisbee	12/30/2021 4:06 PM
703	Walking trails and playing tennis	12/30/2021 4:05 PM
704	Nicely groomed open areas.	12/30/2021 4:05 PM
705	Very diverse	12/30/2021 4:04 PM
706	Friendly people at the PICKLEBALL courts	12/30/2021 4:04 PM

### Q3 What do you enjoy most about going to city parks?

707	The cleanliness and easy of parking(at most)	12/30/2021 4:00 PM
708	Playing with my children. Giving them room to ride their bikes and scooters on curving paths. Having the space to play ball or soccer. It would be great to have better play equipment for the kids to play on.	12/30/2021 4:00 PM
709	Playing pickleball	12/30/2021 3:59 PM
710	Playing Pickleball	12/30/2021 3:59 PM
711	Being able to spend time outdoors with friends and family!	12/30/2021 3:58 PM
712	Playing tennis	12/30/2021 3:57 PM
713	Pickleball	12/30/2021 3:57 PM
714	Walk through and around Parking from walk through the surrounding areas Bathrooms	12/30/2021 3:57 PM
715	Clean and well laid out	12/30/2021 3:56 PM
716	Play softball in a league so I go at least twice a week. Also enjoy special events like Oktoberfest, Brewfest, etc. Play tennis as well. Also like to take my grandson to fly kites, practice batting and fielding.	12/30/2021 3:56 PM
717	Free	12/30/2021 3:55 PM
718	Pickleball	12/30/2021 3:55 PM
719	Pickleball players.	12/30/2021 3:55 PM
720	Community and connection with others playing Pickelball	12/30/2021 3:54 PM
721	Outdoor activities	12/30/2021 3:54 PM
722	Pickleball	12/30/2021 3:53 PM
723	Playing pickleball	12/30/2021 3:53 PM
724	the beautiful landscapes and facilities	12/30/2021 3:53 PM
725	Being outdoors	12/30/2021 3:53 PM
726	Green grass and clean surrounding areas	12/30/2021 3:53 PM
727	Playing pickleball	12/30/2021 3:52 PM
728	The space...especially along the coast.	12/30/2021 3:52 PM
729	The great upkeep and the pickle ball courts	12/30/2021 3:51 PM
730	Peaceful and relaxing. Sitting areas should be where young kids may not be.	12/30/2021 3:51 PM
731	Gathering with friends in beautiful Carlsbad	12/30/2021 3:51 PM
732	Being able to bring my family to the park to play while I get to play some pickleball games as well.	12/30/2021 3:50 PM
733	Pickleball	12/30/2021 3:49 PM
734	Tennis and walking	12/30/2021 3:49 PM
735	outdoors, clean fresh air, benches to relax on, meeting people and other dogs	12/30/2021 3:48 PM
736	Used to be the woody area at Stagecoach Park :-/	12/30/2021 3:48 PM
737	Mountain Biking	12/30/2021 3:47 PM
738	Meeting up with friends	12/30/2021 3:47 PM
739	Pickleball playing competitive games and meeting new people getting out into the open air environment	12/30/2021 3:44 PM
740	Clean clean facilities and friendly staff	12/30/2021 3:43 PM
741	Pickelball	12/30/2021 3:43 PM

## Parks & Recreation Master Plan Update

742	Pickleball	12/30/2021 3:42 PM
743	open feeling	12/30/2021 3:41 PM
744	Play ground and grassy area	12/30/2021 3:41 PM
745	Playing pickleball	12/30/2021 3:39 PM
746	Well maintained	12/30/2021 3:39 PM
747	Recreational facilities available	12/30/2021 3:38 PM
748	Outdoor concert series, pickleball courts. When kids were young, having birthday parties in reserved spots.	12/30/2021 3:37 PM
749	When my kids play sports at the parks like soccer or basketball	12/30/2021 3:36 PM
750	Watching grand kids play in grassy bowl at Poinsetia Park	12/30/2021 3:36 PM
751	Getting outdoors and being active.	12/30/2021 3:36 PM
752	The tennis courts and Pickleball courts are first class...Nice to hang out there too	12/30/2021 3:34 PM
753	Open spaces	12/30/2021 3:33 PM
754	The open space and horticulture.	12/30/2021 3:33 PM
755	The easy of parking. Amenities. Pool.	12/30/2021 3:32 PM
756	Landscaping and open areas.	12/30/2021 3:32 PM
757	My kids love running around in the large fields and playing on the play structures. We all enjoy meeting up with friends in a fun place that's outside so we can minimize exposure to sickness. We no longer feel comfortable having playdates or meeting with others in our home, so we're very grateful to have the city parks available to allow us to get together with others.	12/30/2021 3:31 PM
758	Walking, watching landscape.	12/30/2021 3:29 PM
759	Walking trails	12/30/2021 3:28 PM
760	The play areas for my grandsons.	12/30/2021 3:28 PM
761	Open space,trees, paths.	12/30/2021 3:28 PM
762	Recreating in the outdoors	12/30/2021 3:27 PM
763	Greenery, nature, hearing the laughter of children and people and children enjoying playing.	12/30/2021 3:27 PM
764	Hiking trails	12/30/2021 3:26 PM
765	Picnic facilities, playgrounds and a nice area to walk around in.	12/30/2021 3:25 PM
766	Getting away from cement and roofs	12/30/2021 3:25 PM
767	Playing pickleball.	12/30/2021 3:23 PM
768	1) the open green space 2) tennis courts, b-ball fields, soccer fields	12/30/2021 3:23 PM
769	Pickleball and cycling	12/30/2021 3:22 PM
770	Used to be a safe place for families or to get together with friends.	12/30/2021 3:21 PM
771	The peaceful atmosphere	12/30/2021 3:18 PM
772	Pickleball courts	12/30/2021 3:18 PM
773	They are modern, clean, and well kept. Easy access for everyone.	12/30/2021 3:17 PM
774	Parking and quality of the facilities	12/30/2021 3:16 PM
775	Big open spaces for pets and easy parking	12/30/2021 3:16 PM
776	Beautiful views, fresh air, EXERCISE	12/30/2021 3:15 PM
777	Natural landscape; cleanliness; distance	12/30/2021 3:12 PM

### Q3 What do you enjoy most about going to city parks?

778	open trails well kept, well kept courts	12/30/2021 3:11 PM
779	The open spaces	12/30/2021 3:10 PM
780	They are clean and mostly safe, though there have been a lot of car break-ins lately.	12/30/2021 3:10 PM
781	openness	12/30/2021 3:08 PM
782	Outdoor fun.	12/30/2021 3:07 PM
783	Meeting up with friends. Getting my kids out of the house.	12/30/2021 3:05 PM
784	Space to eat outside and play	12/30/2021 3:03 PM
785	Walking my dog, riding my bike and playing Pickleball.	12/30/2021 3:03 PM
786	We go to Carlsbad specifically to play pickleball	12/30/2021 3:01 PM
787	The carefree environment	12/30/2021 3:01 PM
788	I enjoy the open space, trees, trails and tennis courts the most.	12/30/2021 3:00 PM
789	Open space	12/30/2021 3:00 PM
790	walking the dog on the trails	12/30/2021 2:59 PM
791	level safe walking areas for limited mobility folks	12/30/2021 2:59 PM
792	Nature	12/30/2021 2:59 PM
793	Beauty and sense of community it brings to the neighborhood.	12/30/2021 2:59 PM
794	playing pickelball	12/30/2021 2:58 PM
795	open air kids having alot to do	12/30/2021 2:57 PM
796	Very good facility	12/30/2021 2:56 PM
797	Watching my kids play sports	12/30/2021 2:56 PM
798	Pickleball courts at Pointsettia	12/30/2021 2:55 PM
799	I love the Alga Norte Park, with the pool and water park. This park has something for everyone.	12/30/2021 2:55 PM
800	Walking quiet	12/30/2021 2:54 PM
801	The playground, pools and tennis facilities	12/30/2021 2:54 PM
802	Beautiful, well maintained spaced. Sports fields, esp. tennis & pickleball and dog parks.	12/30/2021 2:54 PM
803	The nature, access to good parking and sports facilities	12/30/2021 2:54 PM
804	Playing pickleball	12/30/2021 2:53 PM
805	Location and ambience	12/30/2021 2:53 PM
806	The variety of things to do at the parks.	12/30/2021 2:51 PM
807	Alga norte pool	12/30/2021 2:51 PM
808	The parks are city treasures and park staff are friendly and helpful.	12/30/2021 2:51 PM
809	sense of community	12/30/2021 2:50 PM
810	Pickleball courts	12/30/2021 2:47 PM
811	The weather and surroundings	12/30/2021 2:45 PM
812	the feeling of getting away from the city sprawl/suburbanization	12/30/2021 2:45 PM
813	Pickleball	12/30/2021 2:44 PM
814	Playing pickleball	12/30/2021 2:44 PM
815	Good unkept play structure Clean bathrooms	12/30/2021 2:43 PM

## Parks & Recreation Master Plan Update

816	Playing poinsettia PickleBall & tennis	12/30/2021 2:42 PM
817	Nice way to enjoy being outside. Enjoy the openness and well kept grounds	12/30/2021 2:42 PM
818	Getting outside!	12/30/2021 2:41 PM
819	Concerts in the park	12/30/2021 2:40 PM
820	I like clean safe Outdoor space	12/30/2021 2:40 PM
821	Sports access	12/30/2021 2:40 PM
822	Healthy and exercise Good quality of life Play areas Grass areas and trails	12/30/2021 2:39 PM
823	Swimming	12/30/2021 2:38 PM
824	Concerts. Pickleball	12/30/2021 2:37 PM
825	Grass. Trees. Picnic tables. Limited entrance / exit areas so that little kids aren't running into the parking lots too easily.	12/30/2021 2:37 PM
826	Family time	12/30/2021 2:36 PM
827	Pickleball courts	12/30/2021 2:36 PM
828	Playing sports	12/30/2021 2:34 PM
829	Play Pickleball	12/30/2021 2:34 PM
830	Pickleball!	12/30/2021 2:34 PM
831	Well maintained	12/30/2021 2:32 PM
832	Hiking	12/30/2021 2:31 PM
833	Playing Pickleball	12/30/2021 2:31 PM
834	Nature, wide open spaces and dog friendly hikes	12/30/2021 2:31 PM
835	Great locations.	12/30/2021 2:29 PM
836	Safety, well-kept, access to clean restrooms	12/30/2021 2:29 PM
837	Cleanliness	12/30/2021 2:28 PM
838	Outdoor space. Skateparks aren't locked up like they are in San Diego city	12/30/2021 2:28 PM
839	Scenery, area for kids to run around	12/30/2021 2:28 PM
840	Their integration with their natural surroundings.	12/30/2021 2:28 PM
841	Pickle ball coirt d	12/30/2021 2:27 PM
842	Playground for the kids.	12/30/2021 2:26 PM
843	Being outdoors	12/30/2021 2:26 PM
844	Taking my dog	12/30/2021 2:25 PM
845	Pickleball	12/30/2021 2:23 PM
846	They are clean and well maintained.	12/30/2021 2:23 PM
847	Being with friends, being outside, playing sports	12/30/2021 2:22 PM
848	Pickleball and good parking	12/30/2021 2:22 PM
849	Pickleball, walking.	12/30/2021 2:21 PM
850	Being outside.	12/30/2021 2:21 PM
851	The wide variety of activities available	12/30/2021 2:20 PM
852	Hiking and relaxing Picnics	12/30/2021 2:20 PM

### Q3 What do you enjoy most about going to city parks?

853	Open space, accessible	12/30/2021 2:18 PM
854	Access to fitness activities that we enjoy.	12/30/2021 2:18 PM
855	exercise and community!	12/30/2021 2:15 PM
856	Pool at Agua Norte, seeing kids play at parks & act normal again	12/30/2021 2:15 PM
857	The cleanliness you currently maintain.	12/30/2021 2:15 PM
858	LOVE the tennis courts at Poinsettia Park. Like having a place for meeting like minded, athletic, peaceful people expressing themselves through friendly competitive spirit.	12/30/2021 2:15 PM
859	plants, paths, people	12/30/2021 2:14 PM
860	City staff test	12/30/2021 2:14 PM
861	walking and hiking	12/30/2021 2:14 PM
862	Not crowded most of the time...relaxing	12/30/2021 2:13 PM
863	Wide Open spaces, dog parks, skate park for kids, and pools	12/30/2021 2:13 PM
864	how nice they are	12/30/2021 2:12 PM
865	Dog park	12/30/2021 2:10 PM
866	Open space	12/30/2021 2:10 PM
867	Fresh air and exercise	12/30/2021 2:09 PM
868	Pickleball and play structures suitable for older kids	12/30/2021 2:09 PM
869	Walking path	12/30/2021 2:09 PM
870	Pointsettia is awesome, alga Norte, Aviara and holiday park are also fun. Like having lots of play structures to climb in, unusual swings at pointsettia and alga norte	12/30/2021 2:08 PM
871	Availability	12/30/2021 2:07 PM
872	Generally very clean and well kept. Also we have a lot of options. Very nice overall.	12/30/2021 2:07 PM
873	Clean ope	12/30/2021 2:06 PM
874	the open space	12/30/2021 2:06 PM
875	Pickleball!	12/30/2021 2:05 PM
876	They are beautiful.	12/30/2021 2:05 PM
877	Baseball	12/30/2021 2:04 PM
878	The quiet time, peacefulness, the wildlife and the opportunity to walk/hike/workout.	12/30/2021 2:04 PM
879	Meeting new people at Poinsettia Pickleball Courts. Carlsbad parks are the most beautifully-landscaped and meticulous city parks in San Diego County.	12/30/2021 2:04 PM
880	New, clean facility. Many classes and activists to enjoy	12/30/2021 2:03 PM
881	Trees, little kids	12/30/2021 2:02 PM
882	Walking dogs and myself on a safe natural outdoor trail	12/30/2021 2:02 PM
883	Convenient location and plenty of parking. Classes for yoga. Concerts in the park.	12/30/2021 2:02 PM
884	Quiet peaceful well maintained.	12/30/2021 2:01 PM
885	They're beautiful	12/30/2021 2:00 PM
886	Convenience	12/30/2021 2:00 PM
887	Clean, safe, easy parking	12/30/2021 2:00 PM
888	Organized youth sports - lessons in different sports and aquatics	12/30/2021 2:00 PM
889	The pickleball courts at Pointsettia	12/30/2021 1:58 PM

## Parks & Recreation Master Plan Update

890	Walking paths	12/30/2021 1:58 PM
891	The green space.	12/30/2021 1:57 PM
892	Play equipment for our granddaughters.	12/30/2021 1:57 PM
893	The Pickleball courts	12/30/2021 1:57 PM
894	Sports dog parks pickle ball court	12/30/2021 1:57 PM
895	Nature. Extremely important since overgrowth (more/higher buildings) is taking away quality of life. Parks is all we have left.	12/30/2021 1:57 PM
896	Lots of open space, nature, trees (shade). Walkways, clean picnic tables.	12/30/2021 1:57 PM
897	Facilities	12/30/2021 1:56 PM
898	Well maintained and safe.	12/30/2021 1:56 PM
899	Areas to walk	12/30/2021 1:56 PM
900	Pickle ball courts and dog parks fenced in	12/30/2021 1:56 PM
901	Playgrounds, Pickleball and fields.	12/30/2021 1:56 PM
902	Green space	12/30/2021 1:55 PM
903	Community	12/30/2021 1:54 PM
904	Sports	12/30/2021 1:53 PM
905	Visiting	12/30/2021 1:53 PM
906	Being out in the fresh air.	12/30/2021 1:53 PM
907	A place to get away from home and crowds	12/30/2021 1:53 PM
908	Variety of activities and convenience of locations	12/30/2021 1:52 PM
909	Pickleball Courts	12/30/2021 1:52 PM
910	My kids love the playgrounds and large grass areas to relax or play	12/30/2021 1:52 PM
911	open space	12/30/2021 1:52 PM
912	Playing Pickleball	12/30/2021 1:51 PM
913	Playgrounds, walking, biking, and some that are dog friendly	12/30/2021 1:50 PM
914	Well maintained, safe and clean.	12/30/2021 1:50 PM
915	Walking paths, benches, picnic tables	12/30/2021 1:49 PM
916	The walking paths and trees	12/30/2021 1:49 PM
917	Seeing families outside enjoying fresh air. Seeing organized classes and sports utilizing the space.	12/30/2021 1:49 PM
918	Concerts in the park, walking paths, watching sports	12/30/2021 1:48 PM
919	Cleanliness and open feeling	12/30/2021 1:48 PM
920	Open plan form. Walking. Watching the sports events. Halloween at the water park.	12/30/2021 1:47 PM
921	Locations	12/30/2021 1:46 PM
922	They are always well kept and clean.	12/30/2021 1:45 PM
923	Quiet NATURAL environment	12/30/2021 1:45 PM
924	Being with family and our dog	12/30/2021 1:43 PM
925	Play equipment is well maintained. Bathroom facilities. Close parking. Not too crowded.	12/30/2021 1:43 PM
926	Ball fields and tennis courts.	12/30/2021 1:42 PM

### Q3 What do you enjoy most about going to city parks?

927	Cleanliness and well maintained parks.	12/30/2021 1:42 PM
928	They're well maintained and there's fun things for the kids to do.	12/30/2021 1:42 PM
929	Nature & open space	12/30/2021 1:42 PM
930	How well maintained they are	12/30/2021 1:40 PM
931	Well maintained and some nicely blend the structured and the natural area together	12/30/2021 1:40 PM
932	Seeing the families enjoying the parks.	12/30/2021 1:40 PM
933	They have functional things I enjoy (tennis, soccer fields, walking trails, etc), are clean, and accessible.	12/30/2021 1:39 PM
934	Trees and plants	12/30/2021 1:39 PM
935	Pool	12/30/2021 1:38 PM
936	Only place in Carlsbad with green grass!	12/30/2021 1:38 PM
937	Being outside, the plants, and sometimes playing pickleball with friends	12/30/2021 1:38 PM
938	Great for an escape	12/30/2021 1:38 PM
939	Cleanliness , new equipment, landscaping	12/30/2021 1:38 PM
940	Peaceful and quiet surroundings, seeing people enjoying themselves, clean air, sunshine.	12/30/2021 1:37 PM
941	they are well done	12/30/2021 1:36 PM
942	The pool at alga	12/30/2021 1:35 PM
943	Nice facilities	12/30/2021 1:35 PM
944	Swimming	12/30/2021 1:34 PM
945	natural beauty	12/30/2021 1:33 PM
946	Including the walkways in my daily walks	12/30/2021 1:33 PM
947	green space, I wish there was some near Ponto Ave Encinas	12/30/2021 1:32 PM
948	I truly appreciate our the variety of our parks - the many options offered for all age groups! Thank you!	12/30/2021 1:32 PM
949	Enjoy taking grandchildren to parks and watching their sporting events.	12/30/2021 1:31 PM
950	the beautiful landscape and cleanliness	12/30/2021 1:31 PM
951	Being outdoors, seeing children play, trees and bushes.	12/30/2021 1:31 PM
952	Exercise, relaxation, enjoying the beautiful beaches and ocean. Gardening in the community gardens. Picnicking at Maxton Park.	12/30/2021 1:31 PM
953	Open space	12/30/2021 1:30 PM
954	The access and cleanliness	12/30/2021 1:30 PM
955	Open space	12/30/2021 1:29 PM
956	Pools	12/30/2021 1:29 PM
957	Bring outside	12/30/2021 1:29 PM
958	Well maintained	12/30/2021 1:29 PM
959	Area for my infant to play	12/30/2021 1:29 PM
960	The pool at Alga Norte	12/30/2021 1:29 PM
961	Fresh air. Room to roam.	12/30/2021 1:28 PM
962	Alga Norte Aquatic Center, I consider a park. I love the Deep Water Boot Camp taught by Darcy. The new instructor is feeling her way and needs to conform to the generation she is	12/30/2021 1:28 PM

## Parks & Recreation Master Plan Update

	instructing. The open lane swim in the competitive pool is wonderful.	
963	OPEN SPACE	12/30/2021 1:28 PM
964	Kids playgrounds and dog off leash areas. Also I like that the jungle gyms and swings are in new condition.	12/30/2021 1:28 PM
965	swimming, running trails	12/30/2021 1:27 PM
966	Open space and watching children/parents play.	12/30/2021 1:27 PM
967	Alga pool	12/30/2021 1:27 PM
968	Places to walk	12/30/2021 1:27 PM
969	The playground for the tots	12/30/2021 1:25 PM
970	Walking paths, large open grassy areas, lots of parking.	12/30/2021 1:25 PM
971	Being outdoors, landscaping to appreciate, swimming.	12/30/2021 1:25 PM
972	Being outside, walking	12/30/2021 1:25 PM
973	we have many to choose from and not all are recreational purpose. Lots of green space	12/30/2021 1:24 PM
974	Feeling safe and playing pickleball. I also enjoy watching my daughters play soccer and other sports.	12/30/2021 1:24 PM
975	the pool	12/30/2021 1:23 PM
976	Playing pickleball	12/30/2021 1:23 PM
977	They are clean and safe	12/30/2021 1:23 PM
978	Jazz in the Park (when we can have it again), seeing families together, clean and landscaped spaces.	12/30/2021 1:23 PM
979	The playgrounds for kids and picnic tables.	12/30/2021 1:23 PM
980	Peaceful walks	12/30/2021 1:22 PM
981	Turf fields	12/30/2021 1:22 PM
982	Going for walks! Hidden Canyon is wonderful!	12/30/2021 1:22 PM
983	The trails and the landscaping.	12/30/2021 1:22 PM
984	Lots of options for playgrounds, exploring, sports, etc.	12/30/2021 1:22 PM
985	Walking trails picnic areas	12/30/2021 1:21 PM
986	Parks are clean and well kept with nice green space.	12/30/2021 1:21 PM
987	Cleanliness	12/30/2021 1:20 PM
988	playgrounds	12/30/2021 1:20 PM
989	open space	12/30/2021 1:20 PM
990	Being outdoors and relaxing in grassy areas. Not being harassed and intimidated if my dogs are along with me while in Carlsbad. Antiquated and discriminatory rules toward our furry family members must be abolished. Most dogs are in fact better behaved, and more sanitary, than many people's children! Yet children are allowed everywhere. People are animals too. This is a scientific fact. People's animal dog family must be allowed to join them for outings in Carlsbad, while also unperturbed by overzealous enforcement of arcane laws. Most people in Carlsbad have dogs, and realize how unfriendly our city is toward them. This is a shame!	12/30/2021 1:20 PM
991	The ability to be part of the community in a beautiful outdoor setting.	12/30/2021 1:19 PM
992	beautiful maintenance and appeal to children	12/30/2021 1:19 PM
993	Open space and ocean breeze	12/30/2021 1:18 PM
994	Comprehensive and well painted facilities. Variable options for all age ranges including children	12/30/2021 1:18 PM

### Q3 What do you enjoy most about going to city parks?

995	Fun place, nature, facilities	12/30/2021 1:17 PM
996	Wide open Space	12/30/2021 1:17 PM
997	Walking around	12/30/2021 1:17 PM
998	Being outdoors. Green space within city. I like the trails through Leo Cabrillo Park.	12/30/2021 1:17 PM
999	Getting out of the house	12/30/2021 1:16 PM
1000	Great place for an outdoor venue with family and friends.	12/30/2021 1:16 PM
1001	They are very well maintained	12/30/2021 1:15 PM
1002	Beautiful open green spaces w/ areas for sports & picnicing	12/30/2021 1:15 PM
1003	The parks are active and it's a pleasure seeing them utilized.	12/30/2021 1:14 PM
1004	Ample parking	12/30/2021 1:13 PM
1005	Green space, trees.	12/30/2021 1:13 PM
1006	walking and watching games and people enjoying themselves.	12/30/2021 1:12 PM
1007	Playgrounds	12/30/2021 1:11 PM
1008	they're clean and feel safe	12/30/2021 1:10 PM
1009	Spending time in the outdoors with friends	12/30/2021 1:10 PM
1010	N/A	12/30/2021 1:10 PM
1011	clean, maintained	12/30/2021 1:09 PM
1012	The trees	12/30/2021 1:09 PM
1013	The pool	12/30/2021 1:09 PM
1014	They have something for everyone. Sports courts, fields, playgrounds, picnic areas to have family gatherings, and bday parties.	12/30/2021 1:08 PM
1015	Recreation. Family gatherings	12/30/2021 1:08 PM
1016	Walking	12/30/2021 1:06 PM
1017	Dog park Playset when our children were younger	12/30/2021 1:06 PM
1018	The cleanliness and peaceful times.	12/30/2021 1:05 PM
1019	Classes and going with my grandchildren, parks are very popular with my grandchildren aged 4 to 10 years	12/30/2021 1:05 PM
1020	Space for kids to play and quality play equipment	12/30/2021 1:04 PM
1021	Aquatic center	12/30/2021 1:04 PM
1022	They are so well kept	12/30/2021 1:04 PM
1023	I appreciate that the city put in pickleball courts. It is apparent that they are well loved and we could possibly use more. I also enjoy using the city pools for recreational and also for my sons practice.	12/30/2021 1:04 PM
1024	Tennis	12/30/2021 1:03 PM
1025	Athletic field and amenities	12/30/2021 1:03 PM
1026	Clean and well maintained	12/30/2021 1:03 PM
1027	Letting the grandkids run around and be free! And good class/camp options for kids and adults.	12/30/2021 1:03 PM
1028	Group activities, concerts, walking, biking, reading, picnics	12/30/2021 1:02 PM
1029	They are clean and safe.	12/30/2021 1:02 PM
1030	Nice to walk around	12/30/2021 1:01 PM

## Parks & Recreation Master Plan Update

1031	Tennis	12/30/2021 1:01 PM
1032	Dog parks	12/30/2021 1:01 PM
1033	Usually they're clean and landscaped. The City does a great job with graffiti abatement and trash clean up - great job people!	12/30/2021 1:01 PM
1034	They are green. Ability to access park by walking less than 1 mile from home. Ability to walk dog at the park. Having tennis courts.	12/30/2021 1:01 PM
1035	Mix of playground and grass/open areas, convenient locations, abundant parking, well-maintained bathrooms	12/30/2021 1:01 PM
1036	I enjoy the green open space, trees, being outdoors with friends and family, walking and activities, children play areas, and available sports activities.	12/30/2021 1:01 PM
1037	Kids playing	12/30/2021 1:00 PM
1038	The greater density that a city commitment to parks allows. Single-family homes are very isolating, especially for children who need friends. Parks are meeting grounds, and multifamily living creates a natural neighborhood.	12/30/2021 1:00 PM
1039	Playinh with my kids	12/30/2021 12:58 PM
1040	Open space	12/30/2021 12:58 PM
1041	Beauty, relaxation, nature, meeting friends for walks and talks, but the roses at magee park are my favorite!	12/30/2021 12:58 PM
1042	Walking/Hiking	12/30/2021 12:58 PM
1043	Green spaces and playgrounds	12/30/2021 12:58 PM
1044	Very clean	12/30/2021 12:57 PM
1045	Variety of experiences	12/30/2021 12:56 PM
1046	Our kids are now grown, so for us, its hiking and taking our dogs places where they can be off leash.	12/30/2021 12:56 PM
1047	Pickleball	12/30/2021 12:56 PM
1048	being outdoors outside the house	12/30/2021 12:55 PM
1049	Nature/plants	12/30/2021 12:55 PM
1050	Being outside	12/30/2021 12:55 PM
1051	Playing pickleball in Poinsettia Park	12/30/2021 12:55 PM
1052	Large open grass areas, picnic tables, pickle ball courts	12/30/2021 12:54 PM
1053	Swimming Pool	12/30/2021 12:54 PM
1054	Softball fields	12/30/2021 12:54 PM
1055	Space	12/30/2021 12:53 PM
1056	hiking and walking	12/30/2021 12:53 PM
1057	They're well maintained, peaceful, offer a multitude of activities, dog parks	12/30/2021 12:53 PM
1058	Different things are enjoyed at different parks. We enjoy walking at the Lagoon trails- we enjoy playground equipment at Alga Norte.	12/30/2021 12:53 PM
1059	Getting out of suburban surroundings and into green spaces	12/30/2021 12:53 PM
1060	Pool	12/30/2021 12:52 PM
1061	Community gathering	12/30/2021 12:52 PM
1062	Playground for our grandkids	12/30/2021 12:52 PM
1063	I use the pool on a regular basis. Love it!	12/30/2021 12:52 PM

### Q3 What do you enjoy most about going to city parks?

1064	Close to home, well maintained, like to see people using the parks	12/30/2021 12:52 PM
1065	They are well maintained	12/30/2021 12:52 PM
1066	Well maintained.	12/30/2021 12:52 PM
1067	the people that attend	12/30/2021 12:51 PM
1068	Walking	12/30/2021 12:51 PM
1069	Clean, pretty space	12/30/2021 12:51 PM
1070	Walking or just sitting on the benches on a nice day.	12/30/2021 12:51 PM
1071	beaches, green grass and clean bathrooms close to all	12/30/2021 12:50 PM
1072	The trees and plants	12/30/2021 12:50 PM
1073	The nature, getting outside. Feeling safe, and getting away from the political troubles (so looking at bums and their trash, and the new prevalence of graffiti kinda kills it.)	12/30/2021 12:50 PM
1074	Open space, concerts and walking paths.	12/30/2021 12:50 PM
1075	the lools	12/30/2021 12:49 PM
1076	Kids say: swinging on swings and playing with friends Opens spaces	12/30/2021 12:49 PM
1077	Pools, skateboarding	12/30/2021 12:48 PM
1078	Meeting new people	12/30/2021 12:48 PM
1079	Variety of play structures for different ages. Areas to ride scooters. Not right next to road/parking lot for safety. Grassy areas.	12/30/2021 12:48 PM
1080	Walking dogs	12/30/2021 12:47 PM
1081	Close	12/30/2021 12:47 PM
1082	Green space, trees and places to gather work friends for picnicking	12/30/2021 12:47 PM
1083	Finding a spot to throw frisbees.	12/30/2021 12:47 PM
1084	Keeping kids active	12/30/2021 12:46 PM
1085	Open space.	12/30/2021 12:46 PM
1086	Playing Pickleball	12/30/2021 12:46 PM
1087	Clean, open space for people to meet and get fresh air.	12/30/2021 12:46 PM
1088	Having something to do there.	12/30/2021 12:46 PM
1089	Getting away from the congested neighborhoods to a safe place the kids can run and play freely	12/30/2021 12:46 PM
1090	Pickleball, masters swimming and spa at alga Norte	12/30/2021 12:45 PM
1091	Being outside away from electronic distractions, and having the kids in eyesight in a multi use area, such as small area with playground and also grassy area for sitting in the grass	12/30/2021 12:45 PM
1092	Artificial (non grass) Ball fields	12/30/2021 12:45 PM
1093	Clean, safe	12/30/2021 12:44 PM
1094	Balance of green space and play structures	12/30/2021 12:44 PM
1095	basketball courts	12/30/2021 12:44 PM
1096	The playgrounds and variety of parks	12/30/2021 12:43 PM
1097	Open space	12/30/2021 12:43 PM
1098	Pedestrian friendly open spaces, with safety and pleasant surroundings.	12/30/2021 12:43 PM
1099	The number of parks, and the cleanliness and the various opportunities of activities.	12/30/2021 12:43 PM

## Parks & Recreation Master Plan Update

1100	TGIF Concerts	12/30/2021 12:43 PM
1101	Being outside	12/30/2021 12:42 PM
1102	Open space and sports fields	12/30/2021 12:42 PM
1103	Pickleball and Tennis Dog park Birdwatching	12/30/2021 12:42 PM
1104	Being outdoors. Seeing neighbors.	12/30/2021 12:42 PM
1105	I get exercise while surrounded by a beautiful park and wonderful people.	12/30/2021 12:42 PM
1106	I used to go to the dog park but it was not well maintained	12/30/2021 12:42 PM
1107	Walking, concerts, seeing people enjoying the park.	12/30/2021 12:42 PM
1108	Visiting with friends. It has been a blessing during this pandemic	12/30/2021 12:42 PM
1109	The open space.	12/30/2021 12:41 PM
1110	nature--trees, grass, birds	12/30/2021 12:41 PM
1111	Playgrounds for kids	12/30/2021 12:41 PM
1112	I have a 4yr old grandson. We like BIG playgrounds	12/30/2021 12:41 PM
1113	Jazz in the Park	12/30/2021 12:41 PM
1114	Well maintained	12/30/2021 12:41 PM
1115	Open space with walking paths	12/30/2021 12:41 PM
1116	Walking, looking at the views and the plants, seeing dogs and children playing, and sitting on the benches.	12/30/2021 12:41 PM
1117	trails, picnics, classes, and recreation.	12/30/2021 12:41 PM
1118	With much more time having to be spent inside one's homes, particularly with much business being conducted in virtual formats, it has been enjoyable to use parks as a means of getting out in the fresh air to simply enjoy the spaces. I appreciate the picnic areas as well as the open lawn areas that allow for putting down a blanket and sharing a picnic with family or friends. We have made use of the BBQ areas as well. It has also been a welcome location for small gatherings with youth groups such as Scouts, for example, during times when indoor gatherings have been discouraged. In the past, we enjoyed the Carlsbad summer "Concerts in the Park" and look forward to their return in the future.	12/30/2021 12:41 PM
1119	no dogs allowed	12/30/2021 12:40 PM
1120	Outdoor activities	12/30/2021 12:40 PM
1121	The playground and walking trails	12/30/2021 12:40 PM
1122	walking trails	12/30/2021 12:40 PM
1123	open space, greenery, relaxing feeling	12/30/2021 12:38 PM
1124	Safe locations	12/30/2021 12:38 PM
1125	Dog parks & bike trails Quality of facilities	12/30/2021 12:38 PM
1126	Pickleball courts and soccer fields	12/30/2021 12:37 PM
1127	I enjoy it when they are not too crowded.	12/30/2021 12:37 PM
1128	1. Trails 2. Bringing grandchildren to play equipment	12/30/2021 12:37 PM
1129	location	12/30/2021 12:37 PM
1130	Pleasant place to meet and have a lunch or dinner with family and friends sometimes it is fun sit and reflect.	12/30/2021 12:37 PM
1131	The quiet & solitude when I want to just sit & read under a tree or take a good walk.	12/30/2021 12:37 PM
1132	Open area and available activities/sports	12/30/2021 12:36 PM

## Q3 What do you enjoy most about going to city parks?

1133	Relaxing.	12/30/2021 12:36 PM
1134	see #2	12/30/2021 12:36 PM
1135	I love that they're taking care of well, seemingly patrolled and the community takes part in them.	12/30/2021 12:36 PM
1136	So we'll maintained.	12/30/2021 12:36 PM
1137	Fun structures and activities at the playground. Good walking trails and paths	12/30/2021 12:36 PM
1138	The aquatics center is amazing. Facilities like this are hard to find.	12/30/2021 12:36 PM
1139	Pickleball, trails and pool	12/30/2021 12:35 PM
1140	Turf fields and skateparks.	12/30/2021 12:35 PM
1141	Enjoy tennis.	12/30/2021 12:35 PM
1142	The well maintained grass and walkways. Quiet areas it provides to rest outside or while on a walk to stop and pause / sit.	12/30/2021 12:35 PM
1143	I love the warm pool at Alga Norte! It's clean and well-maintained.	12/30/2021 12:35 PM
1144	Early mornings, when you can have a peaceful walk.	12/30/2021 12:35 PM
1145	Clean without dog poop and adequate parking and restrooms.	12/30/2021 12:35 PM
1146	open space, trees	12/30/2021 12:34 PM
1147	Playgrounds	12/30/2021 12:34 PM
1148	Activities	12/30/2021 12:34 PM
1149	Getting into nature.	12/30/2021 12:34 PM
1150	Playing sports with children, enjoying youth sports leagues- would like other leagues to be able to rent out fields too so current ones don't have a monopoly and overcharge as FNL flag football does.	12/30/2021 12:34 PM
1151	Walking	12/30/2021 12:34 PM
1152	Swimming at Alga del Norte	12/30/2021 12:34 PM
1153	Pickle-ball, tennis, walking.	12/30/2021 12:34 PM
1154	Proximity	12/30/2021 12:33 PM
1155	So many of them	12/30/2021 12:33 PM
1156	riding bikes	12/30/2021 12:33 PM
1157	My kids having a safe place to play	12/30/2021 12:33 PM
1158	Getting to enjoy the outdoors safely	12/30/2021 12:33 PM
1159	Getting Exercise.	12/30/2021 12:32 PM
1160	The people and courts	12/30/2021 12:32 PM
1161	The fresh air, clean scenery and sitting areas	12/30/2021 12:32 PM
1162	Great for kids	12/30/2021 12:32 PM
1163	Close to home and generally well kept aside from some areas.	12/30/2021 12:32 PM
1164	Playgrounds for our grandchildren	12/30/2021 12:31 PM
1165	The open space and the cleanliness	12/30/2021 12:31 PM
1166	Taking my dog to a fenced in dog park	12/30/2021 12:31 PM
1167	Free time	12/30/2021 12:31 PM
1168	Walking . We have beautiful parks. The staff does a great great job and they are are friendly	12/30/2021 12:31 PM

## Parks & Recreation Master Plan Update

	and courteous.	
1169	Available parking	12/30/2021 12:30 PM
1170	Walking with dog	12/30/2021 12:30 PM
1171	Being outside and enjoying the many features at different parks	12/30/2021 12:30 PM
1172	open spaces	12/30/2021 12:30 PM
1173	Clean @ well maintained	12/30/2021 12:30 PM
1174	Open space. Skate parks	12/30/2021 12:30 PM
1175	Walking	12/30/2021 12:30 PM
1176	I use Alga Norte Park and Pool 2-3 times per week. It is always clean and I feel very protected during COVID with the precautions that are in place. However now that spread is faster than ever I think splitting swim lanes should be discontinued.	12/30/2021 12:30 PM
1177	Parks are super well maintained. Plants are amazing.	12/30/2021 12:30 PM
1178	Get rid off all the homeless	12/30/2021 12:28 PM
1179	Green open space	12/30/2021 12:28 PM
1180	walking	12/30/2021 12:28 PM
1181	Picnic area, trails	12/30/2021 12:28 PM
1182	Clean, safe and diverse options	12/30/2021 12:28 PM
1183	Clean and spaces.	12/30/2021 12:28 PM
1184	A place to walk near my house.	12/30/2021 12:28 PM
1185	The kids facilities & playgrounds.	12/30/2021 12:28 PM
1186	Swim pools Kid play areas	12/30/2021 12:27 PM
1187	There are several of them and mostly away from high-traffic areas.	12/30/2021 12:27 PM
1188	enjoying my grandchildren's activities	12/30/2021 12:27 PM
1189	Grass, trees, open spaces, no dog poop, play structures for children.	12/30/2021 12:27 PM
1190	community events	12/30/2021 12:26 PM
1191	Basketball	12/30/2021 12:26 PM
1192	My teenage son enjoys the skateboard parks.	12/30/2021 12:26 PM
1193	Open space, fresh air	12/30/2021 12:26 PM
1194	Location then beauty.	12/30/2021 12:26 PM
1195	Being able to be outside, do gymnastics on real grass, playing on playgrounds	12/30/2021 12:26 PM
1196	Enjoying natural and historical features-- i.e. Rancho Carrillo; using the dog park, doing summer programs with arts & crafts.	12/30/2021 12:26 PM
1197	Tennis courts, open space, hiking trails, space for public meetings and gatherings.	12/30/2021 12:26 PM
1198	Cleanliness	12/30/2021 12:25 PM
1199	Watching my kids play safely.	12/30/2021 12:25 PM
1200	Open areas, place for kids, dogs	12/30/2021 12:25 PM
1201	Other than dog feces on the playing fields the parks are pretty clean	12/30/2021 12:25 PM
1202	Playing Pickleball.	12/30/2021 12:24 PM
1203	Pool and playground	12/30/2021 12:24 PM
1204	How well kept and beautiful they are	12/30/2021 12:24 PM

### Q3 What do you enjoy most about going to city parks?

1205	being in an open space	12/30/2021 12:24 PM
1206	Basketball hoops, views, good maintenance.	12/30/2021 12:24 PM
1207	How clean they are	12/30/2021 12:24 PM
1208	Playing basketball and frisbee w the kids	12/30/2021 12:24 PM
1209	GREEN!	12/30/2021 12:24 PM
1210	They fields are all kept in great shape. It's great that the pool is open so much.	12/30/2021 12:24 PM
1211	Well maintained, lots of activities, spacious.	12/30/2021 12:24 PM
1212	Greenery	12/30/2021 12:24 PM
1213	Meeting homeless people as that's why I am there	12/30/2021 12:23 PM
1214	the quietness and openness.	12/30/2021 12:23 PM
1215	the amenities	12/30/2021 10:24 AM

## Q4 What is the main reason you don't visit city parks?

Answered: 51 Skipped: 1,715

#	RESPONSES	DATE
1	No reason to visit.	1/10/2022 12:32 PM
2	Currently live in Carmel Valley, considered at one time (6 or so years ago) purchasing a home in the Pacifico development area near Ponto, decided not to buy based on the plans to develop the coastal area.	1/8/2022 6:32 AM
3	No park near me.	1/7/2022 8:21 PM
4	Not convenient. Dog parks are unwelcoming. There is not one park close to my home. None	1/7/2022 6:23 PM
5	Because there are no parks near me that are walkable.	1/7/2022 4:33 PM
6	Single woman, no children, work full time	1/7/2022 10:45 AM
7	I am so busy i don't have time to go lie down on the lawn.	1/6/2022 5:44 PM
8	leave in Riverside County	1/6/2022 10:05 AM
9	no reason to - my granddaughter lives in northern CA, and I don't tend to hold get togethers at parks	1/5/2022 12:51 PM
10	We are seniors and stay closer to home.	1/5/2022 12:28 PM
11	Homeless people hang around there	1/4/2022 8:31 PM
12	I have other interests like hiking.	1/3/2022 4:53 PM
13	Nothing there for me, we are both in our 80s	1/3/2022 9:58 AM
14	Children are grown, and we go to the beach.	1/2/2022 6:15 PM
15	i prefer the trails in the open spaces	1/2/2022 9:06 AM
16	They don't allow dogs.	1/1/2022 8:33 AM
17	Live out of state	12/31/2021 7:05 PM
18	no facilities comfortable for seniors age 94	12/31/2021 5:00 PM
19	crime, drug use, people living in the parks	12/31/2021 3:16 PM
20	Not a huge fan of parks and don't go unless I have a reason (invited to a sport game or party).	12/31/2021 8:16 AM
21	I do not have young children	12/31/2021 6:59 AM
22	Don't want to	12/31/2021 6:14 AM
23	Our children are adults now, and there is nothing that interests us at the parks currently. Also, we live close to the border of Carlsbad and Encinitas, so Stagecoach is the closest and most convenient location, and there is no pool there for lap swimming and no Pickleball courts.	12/31/2021 3:58 AM
24	I am older and unable to participate in recreation.	12/30/2021 10:31 PM
25	Not of interest to me. Don't walk much and when I do, I prefer the beach.	12/30/2021 10:15 PM
26	to lazy	12/30/2021 8:18 PM
27	I prefer the beach.	12/30/2021 5:50 PM
28	There are no walking trails. I don't know if Bataquitos Lagoon is a city park. I walk there.	12/30/2021 5:06 PM
29	Don't live in the area	12/30/2021 3:55 PM
30	Kids older now	12/30/2021 3:51 PM

## Parks & Recreation Master Plan Update

31	can not walk very well	12/30/2021 3:32 PM
32	Because you continue to rent out the fields and park space to private organizations and travel teams!!!	12/30/2021 3:32 PM
33	Being harassed by homeless	12/30/2021 3:14 PM
34	No reason	12/30/2021 2:57 PM
35	I feel they are mostly sports oriented as opposed to a nice place to just sit and contemplate nature.	12/30/2021 2:37 PM
36	Currently disabled.	12/30/2021 2:37 PM
37	I am alone and don't feel safe	12/30/2021 2:36 PM
38	My recreational activities revolve primarily around my dogs. Since dogs aren't allowed in Carlsbad parks I don't use the Carlsbad parks. Dog parks are not the same. I want to be able to walk around and through the parks with my dogs. Perhaps stop and sit, throw a ball or run around a bit. I'm not nearly as interested in off leash as I am about being able to have my leashed dog with me.	12/30/2021 2:23 PM
39	i do no have small children.	12/30/2021 2:10 PM
40	I am a disabled senior and don't drive.	12/30/2021 2:08 PM
41	People do NOT keep their dogs on a leash.	12/30/2021 1:45 PM
42	i live in a park	12/30/2021 1:42 PM
43	My family and I Ride bikes (bmx, pump tracks and jump lines) currently there are places for skaters and soccer fields but no place for bikes. There was a few spots people built hills but they were torn down.	12/30/2021 1:37 PM
44	Don't care for non well behaved children. Also, I don't really know where they all are and have been living in Carlsbad for 4+ years, San Diego for 14 total.	12/30/2021 1:21 PM
45	High risk individual and trying to stay away from unmasked people!	12/30/2021 1:13 PM
46	Too much dog poop left by careless dog owners or wandering pets.	12/30/2021 1:11 PM
47	Time	12/30/2021 12:52 PM
48	There's not enough reasons: no special gardens nor art; no flat and paved paths to take; not enough seating; not enough shade.	12/30/2021 12:48 PM
49	I ride a bike or hike the trails.	12/30/2021 12:44 PM
50	as a senior adult, it's not a place to generally hang out (no family)	12/30/2021 12:29 PM
51	I swim at Alga Norte Swim Complex	12/30/2021 12:23 PM

## Q5 What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?

Answered: 1,220 Skipped: 546

#	RESPONSES	DATE
1	Walking and cycling. Outdoor activities suited to seniors.	1/11/2022 5:37 AM
2	I wish the city offered gymnastics for kids 6-14 year old	1/10/2022 8:55 PM
3	Kids tennis, kids swim, summer camps	1/10/2022 3:24 PM
4	team sports, martial arts	1/10/2022 12:49 PM
5	Soccer	1/10/2022 12:37 PM
6	Yoga, Pilates, art, photography, volunteer opportunities	1/10/2022 12:35 PM
7	None.	1/10/2022 12:32 PM
8	Soccer, pickleball, volleyball, etc.	1/10/2022 12:22 PM
9	Running clubs	1/10/2022 12:18 PM
10	Soccer, karate, swimming, dance!	1/10/2022 11:20 AM
11	Soccer, already play with CitySC.	1/10/2022 11:09 AM
12	Youth baseball and football, archery as well.	1/10/2022 11:00 AM
13	soccer, tennis, holiday events	1/10/2022 9:47 AM
14	Open space is all I would require	1/10/2022 7:54 AM
15	I teach a fitness class for the city	1/9/2022 6:11 PM
16	surfing for kids, summer water activities for kids, dog freedom on the beach to run	1/9/2022 12:39 PM
17	Coastal activities such as volleyball and water sports and bark parks.	1/9/2022 12:09 PM
18	Just open to the ocean for walking and peace.	1/8/2022 6:22 PM
19	Outdoor yoga	1/8/2022 5:35 PM
20	N/A	1/8/2022 4:48 PM
21	Pottery classes	1/8/2022 2:37 PM
22	Senior softball League, ocean water safety for pre teens	1/8/2022 2:35 PM
23	outdoor yoga or tai chi	1/8/2022 2:32 PM
24	safe space for walking	1/8/2022 2:00 PM
25	Yoga and weighted classes	1/8/2022 1:10 PM
26	dog park	1/8/2022 1:09 PM
27	yoga, tai chi, and dance classes would be nice. NO sports leagues!	1/8/2022 10:30 AM
28	open space next to ocean	1/8/2022 10:24 AM
29	All of the above	1/8/2022 9:53 AM
30	soccer	1/8/2022 9:42 AM
31	Anything at or near the beach - especially Ponto	1/8/2022 9:13 AM

## Parks & Recreation Master Plan Update

32	Pickle ball	1/8/2022 8:58 AM
33	Nature tours of areas near the coast.	1/8/2022 8:57 AM
34	Golf, yoga	1/8/2022 8:28 AM
35	I don't participate in classes, just enjoying grass areas/picnic areas	1/8/2022 8:25 AM
36	Yoga, soccer, playgrounds	1/8/2022 7:20 AM
37	Youth sports	1/8/2022 7:17 AM
38	Soccer and crafts for youth as well as tennis and picks all leagues for seniors	1/8/2022 6:58 AM
39	Volleyball, walking/hiking for seniors	1/8/2022 6:35 AM
40	Baseball. Swim.	1/7/2022 11:47 PM
41	Walking, biking,hiking	1/7/2022 9:24 PM
42	Excercise activities for senior citizens, summer camp for my grandkids.	1/7/2022 9:23 PM
43	Nature tours and coastal view points	1/7/2022 9:20 PM
44	Hiking trails	1/7/2022 9:00 PM
45	Grandkids are getting into karate and fishing and I would love to see an archery range and more obstacle type courses.	1/7/2022 8:53 PM
46	Volleyball and soccer	1/7/2022 8:39 PM
47	Yoga. Tai chi.	1/7/2022 8:29 PM
48	Open space to walk ...	1/7/2022 8:22 PM
49	Skateparks, fishing availability, more water sports.	1/7/2022 7:57 PM
50	Pickleball	1/7/2022 7:55 PM
51	We would appreciate a neighborhood park with covered picnic benches. No athletic fields required	1/7/2022 7:50 PM
52	Pickle ball - more courts! Local runs on the trails	1/7/2022 7:39 PM
53	Volleyball, hiking	1/7/2022 7:22 PM
54	Hiking trails, bike trails, playgrounds for kids, sports fields, and courts.	1/7/2022 7:22 PM
55	kid's sports	1/7/2022 7:16 PM
56	Softball or Ultimate frisbee leagues;	1/7/2022 7:15 PM
57	Safe biking	1/7/2022 7:08 PM
58	COASTAL PARK AT PONTO. NO MORE HOUSING THERE! We are a pathetic exception among coastal cities that have public open space near/at the beach	1/7/2022 7:06 PM
59	Biking	1/7/2022 7:04 PM
60	None	1/7/2022 7:01 PM
61	Art, yoga, cooking, soccer, tennis, gardening,.	1/7/2022 6:58 PM
62	Mountain Bike trails	1/7/2022 6:57 PM
63	During, paddle boarding, pickle ball, basketball, beach parks and open space	1/7/2022 6:50 PM
64	Our grandkids would enjoy sports there, such as pickle ball or basketball.	1/7/2022 6:49 PM
65	-0-	1/7/2022 6:48 PM
66	Yoga in the park, soccer, tennis	1/7/2022 6:35 PM
67	None	1/7/2022 6:29 PM
68	more pickleball courts please!	1/7/2022 6:28 PM

## Q5 What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?

69	Dog play and training and I'm a proponent of all sports and classes and camps outdoors. So important at every age.	1/7/2022 6:26 PM
70	Walking areas in a safe environment and a place where the kids can play	1/7/2022 6:24 PM
71	None--Just beautiful open space that draws local native flora and fauna	1/7/2022 6:10 PM
72	None. I'm just looking for space, and places to get away from other people. Not taking more classes.	1/7/2022 6:04 PM
73	Soccer and sports camps and more hiking trails.	1/7/2022 6:01 PM
74	N/A	1/7/2022 5:55 PM
75	none	1/7/2022 5:49 PM
76	Surfing and sandy beaches.	1/7/2022 5:44 PM
77	Biking. Soccer. Lacrosse. Skateboarding	1/7/2022 5:43 PM
78	Outdoor Yoga and other fitness classes.	1/7/2022 5:41 PM
79	Water aerobics, basketball, baseball, soccer.	1/7/2022 5:32 PM
80	None, kids are in high school and coloege	1/7/2022 5:13 PM
81	all of the above	1/7/2022 5:02 PM
82	Adult baseball/softball, Pickleball, soccer, outdoor Zumba, a rec center with covered space, picnic spaces	1/7/2022 4:47 PM
83	Outdoor yoga, cross training group classes, swimming, basketball	1/7/2022 4:40 PM
84	whiffle ball	1/7/2022 4:37 PM
85	Lacrosse for all three of my kids, basketball for my son.	1/7/2022 4:36 PM
86	running.	1/7/2022 4:34 PM
87	I go to the Y for fitness and special interest classes. Possibly yoga on the grass.	1/7/2022 4:33 PM
88	Yoga, mediation , bacci ball, any children sports . We also need more recreational pools for the children of north county	1/7/2022 4:32 PM
89	Swimming, soccer	1/7/2022 4:27 PM
90	Soccer, flag football, lacrosse, parkour, skateboarding (by the way, we love Alga Norte - it's just a bit of a drive away ... thank you so much for that park!!!)	1/7/2022 4:21 PM
91	yoga in the parks. and in covered areas. tai chi or chi gong in the park	1/7/2022 4:19 PM
92	None. Just enjoy being by myself	1/7/2022 4:18 PM
93	Concerts at the Park	1/7/2022 4:15 PM
94	Yoga, adult dance & racket sports	1/7/2022 4:07 PM
95	Would like more PickleBall courts	1/7/2022 4:03 PM
96	We need more pools in Carlsbad! Simply upgrading Monroe Street pool will not meet demand. A new pool should be built at Alga!	1/7/2022 4:02 PM
97	Water safety classes at the new South Ponto Coastal Park.	1/7/2022 4:02 PM
98	Kids sports of all kind, yoga, nature painting, pet friendly areas.	1/7/2022 4:01 PM
99	Walking trails	1/7/2022 3:57 PM
100	Yard games, yoga, baseball.	1/7/2022 3:55 PM
101	Anything and everything! We love fitness and outdoor sports	1/7/2022 3:55 PM
102	Fitness, walking trails	1/7/2022 3:54 PM

## Parks & Recreation Master Plan Update

103	Youth Lacrosse	1/7/2022 3:53 PM
104	Yoga in the park.	1/7/2022 3:51 PM
105	Pickleball	1/7/2022 3:51 PM
106	Soccer, Yoga, playgrounds, barbeques	1/7/2022 3:51 PM
107	Not sure	1/7/2022 3:51 PM
108	My wife and I are seniors. We enjoy walking through a quiet park environment.	1/7/2022 3:50 PM
109	Bocce ball court.	1/7/2022 3:09 PM
110	Middle-aged, non-married, no children focus--cooking classes, beginners programs like mountain biking, first time volunteer opportunities, etc --but for single professionals that are age group 35-45ish.	1/7/2022 10:48 AM
111	- Swim team (not lessons) or camp for younger kids aged 5-10 year olds. - Swim options with actual 'coaches' not high school students who don't seem to care about the advancement of kids progress. - Master Sports type camps	1/7/2022 8:37 AM
112	Mountain bike basics. Summer surf camps.	1/7/2022 8:27 AM
113	Yoga Pilates boot camp	1/7/2022 7:20 AM
114	Dog parks, pickleball courts	1/7/2022 5:25 AM
115	pickleball tennis	1/6/2022 6:34 PM
116	Spanish lessons	1/6/2022 5:45 PM
117	Pickleball, FNL flag football, yoga with mat Pilates.	1/6/2022 1:52 PM
118	?	1/6/2022 12:12 PM
119	swimming	1/6/2022 10:05 AM
120	Pickleball clinics or tournaments would be fun!	1/6/2022 9:54 AM
121	Soccer, rugby, baseball, mountain biking, rock climbing/bouldering, races/challenges.	1/6/2022 8:44 AM
122	Yoga	1/6/2022 8:17 AM
123	More pickleball courts!	1/5/2022 11:57 PM
124	Pickleball. We need more courts across carlsbad!	1/5/2022 11:35 PM
125	open space for play, walking trails, yoga	1/5/2022 6:50 PM
126	pickleball, bocce ball, outdoor yoga, outdoor circuit training class	1/5/2022 12:52 PM
127	Martial Arts and Yoga	1/5/2022 9:16 AM
128	Over 35 softball	1/5/2022 7:08 AM
129	spin classes, low-impact fitness	1/5/2022 12:14 AM
130	Soccer, pickleball, baseball	1/4/2022 9:27 PM
131	Yoga, trail hikes	1/4/2022 7:13 PM
132	Pickle ball	1/4/2022 6:51 PM
133	Pickle ball	1/4/2022 5:36 PM
134	Ping pong, yoga/pilates, Community Days - events with coffee and maybe activities to get to know your neighbors.	1/4/2022 5:28 PM
135	Pickle ball leagues and beach volleyball leagues	1/4/2022 4:53 PM
136	Kids summer camps, archery, and kids pickleball	1/4/2022 4:50 PM
137	Pickleball	1/4/2022 4:48 PM

## Q5 What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?

138	Ocean natural orientations - large flat outdoor walking track around green lawn area - yoga, dog park, elderly, disabled, tri city wellness center had right idea for catering to aging population with warm water and medical related fitness but needed indoor AND outdoor pool and walking and class areas. Could use large lawn area for music and movie amphitheater functions near ocean as community and entertainment draw to hotel area	1/4/2022 4:31 PM
139	Tennis courts, adding better lights to the basketball courts at Laguna Rivera	1/4/2022 3:36 PM
140	Yoga classes	1/4/2022 3:13 PM
141	Environmental classes, paint and sip classes, camps and classes for kids that focus on art and handy skills, intergenerational activities for grandparents-kids, outdoor acoustic music	1/4/2022 2:30 PM
142	Children's yoga, children's rollerblading	1/4/2022 2:18 PM
143	High school-aged flag football	1/4/2022 1:07 PM
144	Swimming / water activities	1/4/2022 12:34 PM
145	Tai chi, pickle ball	1/4/2022 12:32 PM
146	Tennis	1/4/2022 12:32 PM
147	Mainly walking for me — I live alone. Also area where one could do a fitness circuit.	1/4/2022 12:22 PM
148	Improvements to Monroe Street pool. Paved biking course. Increase and improve rail trail access and length.	1/4/2022 12:22 PM
149	pickleball	1/4/2022 8:39 AM
150	pickleball	1/4/2022 8:28 AM

## Parks & Recreation Master Plan Update

171	We really need reservable and free (or very cheap - like \$5) places for Girl Scouts to meet where there's shelter. Schools are no longer available. I would love some more arts and crafts offerings, vinyasa yoga for seniors (not chair yoga or yin), game clubs or classes for older nerds and techies.	1/3/2022 10:03 AM
172	if you had bocce ball courts. We go to play bocce ball in Encinitas twice a week.	1/3/2022 10:00 AM
173	Pickle Ball and Tennis	1/3/2022 9:39 AM
174	Youth sports camps for older (Middle and high school aged) children. Outdoor yoga classes in City parks and beaches.	1/3/2022 9:34 AM
175	Pickleball.	1/3/2022 9:04 AM
176	natural education, gardening/cooking, yoga, dance, art, local history	1/3/2022 8:15 AM
177	Soccer and movie nights	1/3/2022 8:05 AM
178	Soccer, more basketball	1/3/2022 7:20 AM
179	Swimming	1/3/2022 6:50 AM
180	adult basketball, hiking, youth sports	1/3/2022 5:09 AM
181	Pickleball courts and basketball	1/2/2022 10:38 PM
182	Summer sport camps, STEAM activities. Open rec basketball.	1/2/2022 8:15 PM
183	quilting, yoga, stretching, other sewing classes	1/2/2022 7:58 PM
184	None, at this time	1/2/2022 6:15 PM
185	None - just more pool space	1/2/2022 5:47 PM
186	Pickleball	1/2/2022 5:25 PM
187	Soft ball for old people and adult dance classes	1/2/2022 4:10 PM
188	Pickleball	1/2/2022 3:58 PM
189	Pickleball, volleyball, gymnastics, roller skating	1/2/2022 3:55 PM
190	I think it would be great to have camp counselors at the parks during the summer months. I was one at a city park when I was in high school years ago. It was a great summer job. We led checker tournaments, arts and crafts projects and all kinds of fun races and athletic activities. I loved it as much as the kids and their parents!	1/2/2022 3:34 PM
191	hiking, picnicing and just hanging out	1/2/2022 3:33 PM
192	Pickleball	1/2/2022 2:51 PM
193	Sports,	1/2/2022 1:50 PM
194	Pickle Ball	1/2/2022 1:28 PM
195	Croquet, lawn bowling or bocce ball; exercise and fitness; street dance; den building; and swimming are just a few of the physical activities. Classes/presentations/lectures that allow participants to experience nature.	1/2/2022 1:12 PM
196	Pickleball	1/2/2022 12:58 PM
197	Surf camps and lifeguard camp similar to encinitas	1/2/2022 12:24 PM
198	Pickleball	1/2/2022 12:15 PM
199	Pickle ball	1/2/2022 11:42 AM
200	pickleball (kids and adults)	1/2/2022 11:23 AM
201	NCEA - swim team	1/2/2022 10:22 AM
202	My 7yo would really like something along the lines of stretching, tumbling, core building (with a Ninja theme, but it doesn't have to be - it's just him). He HATES team sports, so fitness classes that have kids doing stuff individually in a class would benefit him the most (i.e.	1/2/2022 10:10 AM

## Q5 What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?

obstacle courses, light gymnastics, core/balance moves to music, etc. ). I always wished there were more of that kind of thing for kids and adults in the Park & Recs in North County (and tai-chi not just for 50+). Otherwise some weekend camps would be lovely! He did a week long summer one (science) that he adored, but some weekend long ones (particularly on long weekend with holiday/school closures?) here and there we'd definitely do. Any classes focused on science, engineering, Legos and such are a huge interest and would have him wanting to sign up. Oh, does Carlsbad have any performance arts programs? More gender neutral and not just dance classes? He loves to perform but I have a hard time finding classes locally.

203	Pickle ball	1/2/2022 9:19 AM
204	n/a	1/2/2022 9:06 AM
205	Pickleball.	1/2/2022 9:03 AM

339	Pickleball and yoga	12/31/2021 12:24 PM
340	Yoga, dog training, skateboarding	12/31/2021 12:17 PM
341	only pickleball	12/31/2021 12:13 PM
342	Dog park and Pickleball	12/31/2021 12:08 PM

**Q5 What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?**

343	pickleball	12/31/2021 12:08 PM
344	Tai Chi in one or more of the parks	12/31/2021 12:07 PM
345	Tennis camps, adult soccer indoor league, bigger dog parks.	12/31/2021 11:56 AM
346	Pickleball	12/31/2021 11:45 AM
347	Pickleball tournaments	12/31/2021 11:44 AM
348	?? not sure right now.	12/31/2021 11:36 AM
349	pickleball, tennis , painting (art) classes,	12/31/2021 11:32 AM
350	Pickleball	12/31/2021 11:31 AM
351	All of my family members play pickleball. The sport has outgrown the facilities in Carlsbad by a long shot. It would be nice if the city offered pickleball lessons and tournaments.	12/31/2021 11:27 AM
352	Yoga, Tai Chi.	12/31/2021 11:21 AM
353	I am missing the Boys/Girls club indoor heated pool and the Artheritis class they had. Best thing for Seniors that Carlsbad offered. Wish city could participate and have this class included in the Sr. Agenda.	12/31/2021 11:21 AM
354	Fitness classes	12/31/2021 11:20 AM
355	Soccer and Swimming	12/31/2021 11:16 AM
356	tai chi like classes or groups to join	12/31/2021 11:11 AM
357	pickleball	12/31/2021 11:06 AM
358	Pickleball. The fastest growing sport in the USA.	12/31/2021 11:06 AM
359	Love the kids sports offered for grandchildren	12/31/2021 11:03 AM
360	Pickleball	12/31/2021 10:57 AM
361	pickleball courts	12/31/2021 10:55 AM
362	Baseball LCYO. We never seem to have enough space to practice during the weekdays.	12/31/2021 10:46 AM
363	Pickleball outdoor courts, indoor basketball,	12/31/2021 10:44 AM
364	Pickleball	12/31/2021 10:43 AM
365	We enjoy playing Bocce Ball, Biking, walking & Pickle Ball.	12/31/2021 10:42 AM
366	Yoga	12/31/2021 10:38 AM
367	pickleball	12/31/2021 10:30 AM
368	ok as is. Although it would be nice to have a "Hollywood Bowl" type facility at the Strawberry fields	12/31/2021 10:25 AM
369	N/A	12/31/2021 10:23 AM

476	All levels of yoga classes	12/31/2021 5:08 AM
477	Pickleball	12/31/2021 5:07 AM
478	Pickleball, softball	12/31/2021 5:07 AM
479	Programs for kids younger than kindergarten. Yoga, senior activites	12/31/2021 4:55 AM
480	Pickleball, tennis, Soccer	12/31/2021 4:52 AM
481	Pickleball	12/31/2021 4:09 AM
482	Pickleball, adult tap dancing, lap swimming.	12/31/2021 4:00 AM
483	Pickleball.	12/31/2021 3:09 AM
484	Pickleball open play and round robin tourney	12/31/2021 2:38 AM
485	Pickleball	12/31/2021 2:06 AM
486	More Pickleball courts!	12/31/2021 12:46 AM
487	pickleball	12/31/2021 12:30 AM

## Parks & Recreation Master Plan Update

488	Yoga Swim Cooking	12/31/2021 12:22 AM
489	Pickleball :)	12/31/2021 12:10 AM
490	youth camps in all sports	12/30/2021 11:45 PM
491	Pickleball, football, soccer.	12/30/2021 11:41 PM
492	We are retired and belong to a local gym. We probably would not partake in classes. We especially love the summer concert series!	12/30/2021 11:35 PM
493	Senior softball in the evenings to accommodate seniors that are not retired.	12/30/2021 11:32 PM
494	Prefer independent activities	12/30/2021 11:31 PM
495	Soccer, football, pickleball	12/30/2021 11:30 PM
496	Get Junior Lifeguards going at full capacity soonest.	12/30/2021 11:21 PM
497	Swimming, volleyball	12/30/2021 11:20 PM
498	Pickleball	12/30/2021 11:13 PM
499	More pickleball courts are needed	12/30/2021 11:12 PM
500	Adult Volleyball Open pickleball at pointsetia park	12/30/2021 11:08 PM
501	Pickle Ball and Line Dance, Improver. Classes of interest such as people talking about their trips, religion, geology etc.	12/30/2021 11:08 PM
502	Pickleball	12/30/2021 11:04 PM
503	more pickleball courts	12/30/2021 11:00 PM
504	More out door Pickkeball.	12/30/2021 11:00 PM
505	Friday Night Lights, Soccer, Dance, or Cheer It would be good to have camps that are longer than 3 hours with a lunch break in between, so working parents can have an option. Swim at Alga Norte has been great.	12/30/2021 10:56 PM
506	Pickle ball , Zumba	12/30/2021 10:55 PM
507	Pickleball clinics	12/30/2021 10:45 PM
508	Senior fitness, yoga	12/30/2021 10:32 PM
509	Pickleball, tennis, yoga	12/30/2021 10:31 PM
510	Pickleball, soccer	12/30/2021 10:28 PM
511	Yoga, habitat identification	12/30/2021 10:22 PM
512	Pickleball	12/30/2021 10:20 PM
513	Tenis	12/30/2021 10:20 PM
514	None	12/30/2021 10:16 PM
515	Archery, archery, archery.	12/30/2021 10:16 PM
516	General adult & teen fitness - aerobics, yoga, stretching. More tennis & pickleball coaching options.	12/30/2021 10:13 PM
517	As a Senior citizens I would like to see more fitness classes for seniors.	12/30/2021 10:12 PM
518	Walking	12/30/2021 10:10 PM
519	Soccer, basketball, Judo, Yoga	12/30/2021 10:10 PM
520	More areas to play pickleball Using parks for concerts and special events Running and biking trails for exercise	12/30/2021 10:05 PM
521	Soccer, baseball, outdoor yoga	12/30/2021 10:03 PM
522	Pickleball classes	12/30/2021 10:01 PM

**Q5 What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?**

523	Bocce ball, tai chi	12/30/2021 9:58 PM
524	Aquatic camp Lego camp	12/30/2021 9:58 PM
525	Krav maga, Parkour, yoga, foreign language (Spanish)	12/30/2021 9:55 PM
526	Outdoor Thai Chi	12/30/2021 9:54 PM
527	Mostly outdoor pickleball - there aren't nearly enough courts in carlsbad	12/30/2021 9:52 PM
528	Soccer and foreign language classes	12/30/2021 9:52 PM
529	Fitness for old folks	12/30/2021 9:52 PM
530	Tween sports and science programs/camps. In addition to the many fine current offerings, we would love to see archery and rock climbing since we must travel to other cities for those sports classes.	12/30/2021 9:38 PM
531	Any sport would be great.	12/30/2021 9:36 PM
532	adult and adult with kids work out boot camp.	12/30/2021 9:35 PM
533	Senior fitness, all sports for kids, dance classes, pickleball.	12/30/2021 9:23 PM
534	Junior life guards at pools	12/30/2021 9:21 PM
535	PICKLEBALL	12/30/2021 9:19 PM
536	Soccer, Flag Football, Yoga, Musical Theater, Horseback Riding.	12/30/2021 9:19 PM
537	swimming	12/30/2021 9:16 PM
538	Another pool would be great.	12/30/2021 9:10 PM
539	Pickleball	12/30/2021 8:55 PM
540	Senior activities	12/30/2021 8:52 PM
541	Pickleball open play!	12/30/2021 8:51 PM
542	Our children are both grown up now, but both utilized sports fields and camps at local parks. These should continue for all kids, and for older folks: tai chi, yoga, stretching, mindfulness, fitness walking, etc would be most welcome. A dog park where people could socialize and attend training classes would also be wonderful!	12/30/2021 8:51 PM
543	Pickleball	12/30/2021 8:51 PM
544	None	12/30/2021 8:43 PM
545	Pickle ball, Zumba classes, etc.	12/30/2021 8:43 PM
546	Pickleball for kids !	12/30/2021 8:40 PM
547	Rolley Skating and I'll all area Ana basketball	12/30/2021 8:39 PM
548	More for little kids on the weekends	12/30/2021 8:36 PM
549	Bike parks	12/30/2021 8:35 PM
550	Pickleball, Tai chi,	12/30/2021 8:34 PM
551	Soccer	12/30/2021 8:32 PM
552	Pickleball	12/30/2021 8:26 PM
553	Pickleball, tennis	12/30/2021 8:26 PM
554	FNL, soccer, baseball, softball	12/30/2021 8:24 PM
555	More pickleball courts and tap, ballroom dance classes, yoga.	12/30/2021 8:23 PM
556	N/A	12/30/2021 8:21 PM
557	Pickleball	12/30/2021 8:19 PM

## Parks & Recreation Master Plan Update

558	Pickleball	12/30/2021 8:18 PM
559	Dance, soccer, gymnastics, science camp, swim , animal, art	12/30/2021 8:18 PM
560	Zumba and dance	12/30/2021 8:17 PM
561	Pickleball, the zip line park is amazing.	12/30/2021 8:12 PM
562	Yoga softball pickleball flag football ultimate frisbee	12/30/2021 8:11 PM
563	Track and field classes for elementary aged kids. Sports or dance classes that are available at 4:30-5:30 start time. Working parents can't get young children to classes that start too early.	12/30/2021 8:10 PM
564	yoga for seniors	12/30/2021 8:08 PM
565	Pickleball, water aerobics	12/30/2021 8:05 PM
566	More Pickleball courts, pickleball leagues and clinics; gentle yoga classes; golf clinics; women's beginner golf league; spinning classes. Games such as Mexican train dominoes would be fun. Bridge lessons. Computer classes. Book clubs.	12/30/2021 7:58 PM
567	yoga, adult dance classes	12/30/2021 7:58 PM
568	Yoga classes	12/30/2021 7:55 PM
569	Pickleball, and better use of recreation centers. Rec centers cater to basketball leagues, run by the same people, all over the city, and the participants are the SAME GUYS, traveling to various rec centers, all over this city. I am a referee. I know this to be true. We should have volleyball and badminton nights, for LOCAL residents!!!!	12/30/2021 7:52 PM
570	pickleball	12/30/2021 7:50 PM
571	Pickleball league	12/30/2021 7:49 PM
572	Pickleball	12/30/2021 7:48 PM
573	Football, waterpolo, lacrosse	12/30/2021 7:42 PM
574	tai chi	12/30/2021 7:42 PM
575	N/A	12/30/2021 7:41 PM
576	I like the unstructured feel of a park actually.	12/30/2021 7:41 PM
577	Everything is pretty good the way it is.	12/30/2021 7:39 PM
578	Pottery, tennis, woodworking, visual arts, ballroom dancing, salsa dancing	12/30/2021 7:32 PM
579	As mentioned, pickleball. Great sport for a family if there is a non competitive environment available for them to just play & have fun.	12/30/2021 7:32 PM
580	Pickleball	12/30/2021 7:29 PM
581	Pickleball	12/30/2021 7:25 PM
582	Soccer, yoga, kickboxing	12/30/2021 7:24 PM
583	Tennis, pickelball	12/30/2021 7:14 PM
584	Pickleball please	12/30/2021 7:12 PM
585	Softball yoga	12/30/2021 7:09 PM
586	Pickleball	12/30/2021 7:07 PM
587	Special-Needs geared camps, spots. With teachers/counselors/coaches who are highly experienced with working with Special-needs kids.	12/30/2021 7:04 PM
588	Youth Baseball	12/30/2021 7:01 PM
589	Swim	12/30/2021 6:59 PM
590	Tennis	12/30/2021 6:58 PM
591	yoga, craft classes, tennis lessons	12/30/2021 6:58 PM

**Q5 What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?**

592	pickle ball, softball, senoir sports	12/30/2021 6:56 PM
593	Stretching class	12/30/2021 6:51 PM
594	Outdoor yoga	12/30/2021 6:48 PM
595	Bicycle trails, dog runs	12/30/2021 6:46 PM
596	Gardening classes and composting classes	12/30/2021 6:46 PM
597	Tai chi	12/30/2021 6:43 PM
598	Soccer, tennis, volleyball, for children and adults. You guys do a good job.	12/30/2021 6:42 PM
599	Deep Water Boot Camp	12/30/2021 6:41 PM
600	Swimming, surfing, lifeguard skills. Water safety.	12/30/2021 6:39 PM
601	I don't need any now but my grandsons loved the summer camps	12/30/2021 6:36 PM
602	Pickle ball Classes/ camps for 16-22 year olds with disabilities.	12/30/2021 6:35 PM
603	Pickle ball	12/30/2021 6:33 PM
604	Golf. Carlsbad is the epicenter of the golf universe but it's golf course is too expensive for us retired folk. Why can't Carlsbad provide affordable opportunities to play and practice???	12/30/2021 6:32 PM
605	Pickleball, yoga,	12/30/2021 6:29 PM
606	Pickleball clinics, leagues, and tournaments	12/30/2021 6:28 PM
607	Softball, basketball	12/30/2021 6:28 PM
608	Senior walking trails	12/30/2021 6:27 PM
609	Tennis lessons	12/30/2021 6:27 PM
610	More pickleball courts please.	12/30/2021 6:26 PM
611	Tai Chi classes early in the AM.	12/30/2021 6:22 PM
612	I don't really do that.	12/30/2021 6:17 PM
613	Aquatics	12/30/2021 6:14 PM
614	Pickleball clinics, leagues and open play	12/30/2021 6:14 PM
615	Pickleball, stroller strides	12/30/2021 6:13 PM
616	Pickle ball	12/30/2021 6:11 PM
617	more open swimming time at city pools	12/30/2021 6:11 PM
618	N/A	12/30/2021 6:10 PM
619	Nothing until covid has passed	12/30/2021 6:09 PM
620	Women's soccer league (11v11 or 8v8)	12/30/2021 6:08 PM
621	Pickleball	12/30/2021 6:07 PM
622	Yoga, Pilates, pickle ball, tennis. Swimming g	12/30/2021 6:07 PM
623	Mountain bike instruction and trails	12/30/2021 6:04 PM
624	Another swimming pool in south Carlsbad!	12/30/2021 6:02 PM
625	More dog parks	12/30/2021 6:00 PM
626	Nine	12/30/2021 6:00 PM
627	Ultimate (frisbee/disk throwing game), water aerobics. Co-ed softball or kickball teams	12/30/2021 5:57 PM
628	Outdoor yoga and fitness boot camp.	12/30/2021 5:53 PM

## Parks & Recreation Master Plan Update

629	pickleball competitions!	12/30/2021 5:52 PM
630	Senior Yoga and Tai Chi	12/30/2021 5:52 PM
631	Pickleball	12/30/2021 5:51 PM

642	Yoga	12/30/2021 5:41 PM
643	soccer and tennis	12/30/2021 5:41 PM
644	Yoga Out door stationery bike classes	12/30/2021 5:34 PM
645	I am a masters endurance runner, anything along that line would interest me	12/30/2021 5:33 PM
646	Pickleball league	12/30/2021 5:33 PM
647	Craft classes	12/30/2021 5:31 PM
648	Gardening	12/30/2021 5:31 PM
649	Yoga,	12/30/2021 5:29 PM
650	Toddler classes	12/30/2021 5:29 PM
651	Walking trails and Pickleball courts.	12/30/2021 5:26 PM
652	kids leagues	12/30/2021 5:26 PM
653	Yoga, swimming, exercise for seniors	12/30/2021 5:24 PM
654	Pickleball	12/30/2021 5:23 PM
655	Pickleball facilities including with lights and s Ed's to water fountains	12/30/2021 5:22 PM
656	Basic computer & phone operation classes. I believe you already offer these connected to the senior center. Will be nice when Covid is gone. Also field trips for seniors would be nice.	12/30/2021 5:17 PM
657	skateboarding, dance for HS age kids, and rock band	12/30/2021 5:17 PM
658	Pickleball	12/30/2021 5:16 PM
659	You already offer a ton of classes. I'd like to see one day classes. Photography for a half day, flower arranging for a half day, etc.	12/30/2021 5:16 PM
660	Girls softball,	12/30/2021 5:13 PM
661	Crafts, gardening, diy, self sufficiency type activities.	12/30/2021 5:12 PM
662	I live in La Costa Greens. You built Agua Norte - a large Park without a walking path. You built a dog park. Apparently you think dogs need to walk more than people.	12/30/2021 5:11 PM
663	Yoga, Pilates, art, photography, music	12/30/2021 5:10 PM
664	Pickle ball! Lol	12/30/2021 5:10 PM
665	Pickleball, walking/hiking/jogging trails that are well established, and lit.	12/30/2021 5:09 PM

**Q5 What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?**

666	Baseball, soccer, volleyball and tennis camps Music/instrumental classes for kids	12/30/2021 5:09 PM
667	Yoga, some type of free fitness too	12/30/2021 5:08 PM
668	Water aerobics, water boot camp in the afternoon (I work until 1:30) and miss my am class I took in the summer!	12/30/2021 5:08 PM
669	Teen yoga, multi-sport camps	12/30/2021 5:07 PM
670	Soccer	12/30/2021 5:05 PM
671	Pickleball and youth baseball	12/30/2021 5:05 PM
672	yoga, youth sports	12/30/2021 5:05 PM
673	We like pickleball and tennis. But prefer pickleball. that's the trend my friend	12/30/2021 5:04 PM
674	Pickleball	12/30/2021 5:03 PM
675	Pickleball	12/30/2021 5:03 PM
676	Science/art/nature camps for grandchildren. Low cost art classes for adults.	12/30/2021 5:03 PM
677	Swimming pool and community garden	12/30/2021 5:02 PM
678	Softball, inner tube water polo	12/30/2021 5:00 PM
679	Tennis, swimming, dog training, yoga	12/30/2021 4:55 PM
680	Skateboarding classes, mountain biking classes, sailing camps.	12/30/2021 4:53 PM
681	Swimming at Alga Norte. I swim there 4x's per week and my wife swims there 3x's per week.	12/30/2021 4:53 PM
682	I'm happy with how you are operating the parks system.	12/30/2021 4:51 PM
683	Pickleball	12/30/2021 4:48 PM
684	Non-competitive volleyball and paddleball, dancing, arts and crafts. I find it annoying that regular people can't play games on the fields because they are so often in use by sports leagues that only some people can belong to and that cost money. If regular citizens can't use the parks they pay for because a Vista football team is using the field, that doesn't seem quite fair.	12/30/2021 4:48 PM
685	Adult aerobics and yoga classes; art and sports camps/classes for kids	12/30/2021 4:47 PM
686	Morning yoga classes in the park would be wonderful!	12/30/2021 4:47 PM
687	Senior fitness and aquatic opportunities. Yoga.	12/30/2021 4:47 PM
688	Enjoyed baseball, basketball and soccer youth sports leagues in the past. No interest currently.	12/30/2021 4:47 PM
689	None	12/30/2021 4:45 PM
690	An indoor running track would be nice, but a professional surfaced outdoor track would be very nice.	12/30/2021 4:45 PM
691	special interest classes	12/30/2021 4:43 PM
692	Seniors activities, exercise, place to cook and picnic.	12/30/2021 4:42 PM
693	Yoga	12/30/2021 4:41 PM
694	Rock climbing classes and sessions. Yoga classes.	12/30/2021 4:40 PM
695	Soccer	12/30/2021 4:38 PM
696	Just the pool at Alga Norte	12/30/2021 4:35 PM
697	The kind that stay where they belong, and not all over the open park area.	12/30/2021 4:35 PM
698	Swimming is important to me. My grandchildren love the swings and park area at Alga.	12/30/2021 4:35 PM
699	Barre classes	12/30/2021 4:32 PM

## Parks & Recreation Master Plan Update

700	None	12/30/2021 4:31 PM
701	basketball, soccer, tennis, archery, rock climbing, gymnastics	12/30/2021 4:30 PM
702	senior citizen	12/30/2021 4:29 PM
703	Yoga, archery, decathlon events, steeplechase	12/30/2021 4:29 PM
704	Yoga, pickle ball	12/30/2021 4:28 PM
705	Horticulture and gardening classes, Yoga, Pilates, arts & Crafts, painting, photography, historical tours.	12/30/2021 4:28 PM
706	jazzercise classes or some outdoors Tai Chi classes	12/30/2021 4:27 PM
707	A class on flexibility that is not tied exclusively to yoga poses/practice (e.g. Paul Ecke YMCA)	12/30/2021 4:26 PM
708	None	12/30/2021 4:25 PM
709	Basketball, pickleball, football	12/30/2021 4:24 PM
710	yoga	12/30/2021 4:20 PM
711	Not able to participate	12/30/2021 4:20 PM
712	Pilates, fitness classes not just for senior citizens	12/30/2021 4:18 PM
713	Pickleball clinics	12/30/2021 4:17 PM
714	Yoga Tai Chi, stretching. Belly dancing.	12/30/2021 4:17 PM
715	Yoga, dog training groups, walking groups	12/30/2021 4:17 PM
716	Yoga, senior sports	12/30/2021 4:14 PM
717	Pickleball classes and play.	12/30/2021 4:13 PM
718	Pickle ball lessons	12/30/2021 4:13 PM
719	Pickleball	12/30/2021 4:08 PM
720	Pickleball	12/30/2021 4:06 PM
721	Pickleball and softball	12/30/2021 4:06 PM
722	Tennis	12/30/2021 4:06 PM
723	More community garden spaces.	12/30/2021 4:05 PM
724	Hiking	12/30/2021 4:05 PM
725	PICKLEBALL	12/30/2021 4:04 PM
726	jazzercise type classes. Art classes, Cooking classes	12/30/2021 4:01 PM
727	Pickleball and walking	12/30/2021 4:00 PM
728	Soccer, field hockey, womens only exercise classes	12/30/2021 4:00 PM
729	N/A	12/30/2021 3:59 PM
730	Pickleball!	12/30/2021 3:59 PM
731	Senior fitness classes,, beginner pickle ball for seniors	12/30/2021 3:58 PM
732	Softball pickleball	12/30/2021 3:57 PM
733	Softball. Basketball.	12/30/2021 3:57 PM
734	Pickleball	12/30/2021 3:56 PM
735	1) Hiking: The seniors in the area are walkers but, the available trails are so short they aren't worth walking. 2) There are a large number of nationally competitive athletes in Carlsbad but we all have to go somewhere else to work out.	12/30/2021 3:56 PM

**Q5 What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?**

736	Pickleball	12/30/2021 3:55 PM
737	Pickleball	12/30/2021 3:55 PM
738	Pickleball.	12/30/2021 3:55 PM
739	Pickelball please! The demand is high yet than thy he number of courts. Please	12/30/2021 3:55 PM
740	Pickleball	12/30/2021 3:54 PM
741	We have no sports from the City at Poinsettia Park. That would be a nice change.	12/30/2021 3:54 PM
742	Boot camp style workouts, more Pickleball courts	12/30/2021 3:54 PM
743	You have a good mix now	12/30/2021 3:54 PM
744	Pickleball	12/30/2021 3:53 PM
745	Pickleball	12/30/2021 3:53 PM
746	Pickleball	12/30/2021 3:52 PM
747	Just using pool	12/30/2021 3:52 PM
748	Pickleball	12/30/2021 3:52 PM
749	Pickleball	12/30/2021 3:51 PM
750	Pickleball leagues and tournaments.	12/30/2021 3:50 PM
751	Pickleball	12/30/2021 3:49 PM
752	Masters swimming	12/30/2021 3:49 PM
753	Mountain biking. Off lease dog trails	12/30/2021 3:48 PM
754	zumba gold, yoga	12/30/2021 3:48 PM
755	Over 50 soccer (men and women)	12/30/2021 3:48 PM
756	My 10 year old daughter loves going to camps & classes offered by the city... especially the STEM ones (game design, animation, etc).	12/30/2021 3:48 PM
757	Warm water aquatics, deep water running	12/30/2021 3:47 PM
758	Outdoor yoga classes What's Covid being a constant problem outdoor classes would be a great benefit an alternative	12/30/2021 3:45 PM
759	After school and non school day activities especially sports	12/30/2021 3:43 PM
760	Pickelball	12/30/2021 3:43 PM
761	Pickleball	12/30/2021 3:42 PM
762	Soccoer	12/30/2021 3:42 PM
763	n/a	12/30/2021 3:41 PM
764	Kids soccer and nature camps for age 4+ Adult womens soccer	12/30/2021 3:40 PM
765	Pickleball	12/30/2021 3:39 PM
766	Not applicable	12/30/2021 3:38 PM
767	We're seniors, so pickleball opportunities or outdoor yoga classes. More concerts (could be on a smaller scale than Jazz series.)	12/30/2021 3:38 PM
768	Options for different level of Yoga, swim for kids- lessons, basketball pick up games indoors	12/30/2021 3:37 PM
769	Aqua fit. I love it. Please fix the spa at Alga Norte pool.	12/30/2021 3:37 PM
770	Surfing, swimming, yoga, mountain biking, hiking, tennis	12/30/2021 3:37 PM
771	N/A	12/30/2021 3:34 PM
772	Yoga over 65. Pottery. Knitting	12/30/2021 3:34 PM

## Parks & Recreation Master Plan Update

773	art clases and aerobic fitness classes.	12/30/2021 3:34 PM
774	probably non	12/30/2021 3:34 PM
775	The grandchildren enjoy your youth baseball leagues & the fitness classes for seniors I enjoy.	12/30/2021 3:33 PM
776	Basketball, football and acting classes.	12/30/2021 3:33 PM
777	I would love for my kids to be able to do gymnastics! There used to be gymnastics for elementary and middle school kids held during a weekday afternoon, but it stopped being offered when my kids were old enough for it.	12/30/2021 3:33 PM
778	Archeology camp where kids could dig for fossils, arrow heads, etc. Similar to what is at the nature center on Cannon.	12/30/2021 3:32 PM
779	Outdoor yoga	12/30/2021 3:29 PM
780	Taiji, qigong, yoga, line dance, Taiji fan.	12/30/2021 3:29 PM
781	Walking	12/30/2021 3:28 PM
782	Mountain Biking, Pickleball	12/30/2021 3:27 PM
783	Yoga	12/30/2021 3:27 PM
784	I am 77. I would like free tai chi	12/30/2021 3:27 PM
785	Yoga & aerobic classes.	12/30/2021 3:25 PM
786	Hiking	12/30/2021 3:25 PM
787	Pickleball. Yoga in the park.	12/30/2021 3:24 PM
788	Exercise room (that we could pay monthly to use), tennis lessons, first aid training or CPR training.	12/30/2021 3:24 PM
789	Nothing comes to mind.	12/30/2021 3:23 PM
790	Walking club	12/30/2021 3:19 PM
791	Pickleball	12/30/2021 3:18 PM
792	Pickleball leagues	12/30/2021 3:17 PM
793	Softball, Racquetball, fitness classes	12/30/2021 3:17 PM
794	Yoga, softball league, run groups	12/30/2021 3:17 PM
795	Aquatic based fitness in afternoon	12/30/2021 3:16 PM
796	Pickle ball, kick ball, cycling	12/30/2021 3:15 PM
797	Indoor fitness centers would be nice	12/30/2021 3:14 PM
798	Yoga	12/30/2021 3:13 PM
799	swimming & pickle ball	12/30/2021 3:12 PM
800	Yoga	12/30/2021 3:10 PM
801	Pickleball	12/30/2021 3:10 PM
802	n/a	12/30/2021 3:09 PM
803	My two oldest are 4 years apart so I gravitate towards camps that have a wide age group so they can go together. We also like camps with activities we don't normally do at home. Science experiments, larger scale arts and crafts, robotic legos.	12/30/2021 3:08 PM
804	Anything golf related.	12/30/2021 3:07 PM
805	Pickle ball, soccer	12/30/2021 3:04 PM
806	Only walking and pickleball here.	12/30/2021 3:04 PM

**Q5 What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?**

807	Pickleball leagues possibly	12/30/2021 3:03 PM
808	Actual sports for kids. Not a team nor a league but teaching them basic rules followed by actual play of the actual game like kids used to do in the 50's through 90's	12/30/2021 3:02 PM
809	Pickleball!	12/30/2021 3:01 PM
810	yoga, running, tennis	12/30/2021 3:01 PM
811	None	12/30/2021 3:00 PM
812	none specifically- current approach is excellent	12/30/2021 3:00 PM
813	City camps for grandchildren.	12/30/2021 2:59 PM
814	balance classes	12/30/2021 2:59 PM
815	Yoga	12/30/2021 2:59 PM
816	Fitness class	12/30/2021 2:58 PM
817	Pickleball	12/30/2021 2:58 PM
818	soccer, basketball, baseball, outdoor sports	12/30/2021 2:57 PM
819	Baseball, Basketball, Soccer, Running, Pilates or Yoga, Hiking	12/30/2021 2:57 PM
820	Senior fitness classes and senior computer classes.	12/30/2021 2:56 PM
821	Pickleball leagues by level	12/30/2021 2:55 PM
822	Surfing classes	12/30/2021 2:55 PM
823	Water aerobics, tennis and pickle ball	12/30/2021 2:55 PM
824	Classes: Yoga & Tai Chi	12/30/2021 2:55 PM
825	Better/more frequent swim camps. We swim, play soccer, softball, football and basketball and always look to participate in the associated camps.	12/30/2021 2:55 PM
826	Pickleball	12/30/2021 2:53 PM
827	Tennis	12/30/2021 2:53 PM
828	Senior Softball, Jacki Sorenson's Aerobic Dance, all kids' sports camps.	12/30/2021 2:53 PM
829	Aquatics Lectures on early California life from docents at Carrillo Ranch	12/30/2021 2:53 PM
830	swimming	12/30/2021 2:51 PM
831	Pickleball	12/30/2021 2:50 PM
832	dance, gymnastics	12/30/2021 2:50 PM
833	pilates/calisthenics fun group sports such as kickball, reindeer tag, four corners, capture the flag, ultimate frisbee, and open court volleyball summer camps on gardening and about native wildlife	12/30/2021 2:48 PM
834	Pickleball	12/30/2021 2:47 PM
835	Pickle ball	12/30/2021 2:45 PM
836	Pickleball	12/30/2021 2:44 PM
837	Pickleball	12/30/2021 2:44 PM
838	None Opening Monroe street pool with the old hours opening at 6 am	12/30/2021 2:43 PM
839	Tennis & PickleBall lessons	12/30/2021 2:43 PM
840	Pickle ball classes	12/30/2021 2:42 PM
841	Pickleball, yoga.	12/30/2021 2:42 PM
842	Outdoor concerts	12/30/2021 2:41 PM

## Parks & Recreation Master Plan Update

843	Basketball leagues, yoga, outdoor activities, volleyball, and swimming	12/30/2021 2:41 PM
844	Pickleball please	12/30/2021 2:40 PM
845	Art classes	12/30/2021 2:39 PM
846	Yoga, meditation, art, crafts for adults. Walking and hiking for seniors.	12/30/2021 2:38 PM
847	Yoga. CrossFit. Pickleball	12/30/2021 2:38 PM
848	I would like to take my dogs with me to a park. Easy paved walking trails.	12/30/2021 2:38 PM
849	youth sports at local fields. Softball, baseball, basketball, volleyball, tennis, football, pools, parkour, gymnastics. Nearby to each neighborhood.	12/30/2021 2:38 PM
850	Yoga. Balance. The Japanese slow movement process.	12/30/2021 2:37 PM
851	Rugby, tennis, lacrosse for youth and outdoor fitness for adults.	12/30/2021 2:37 PM
852	Pickleball	12/30/2021 2:37 PM
853	fitness classes for over 55, outside or inside	12/30/2021 2:36 PM
854	Softball, pickle ball	12/30/2021 2:34 PM
855	Pickleball	12/30/2021 2:34 PM
856	Pickleball lessons	12/30/2021 2:34 PM
857	Tennis and aquatics	12/30/2021 2:33 PM
858	More swimming pools so we can get better time slots for club Water Polo. Water polo is a great team sport that builds great adults. When I was in the military, a lot of my officer friends who played intercollegiate Water Polo went on to be special ops officers who were SEALs, Combat Controller, and Pararescuers. Water Polo teaches leadership and teamwork, and your local club team (Carlsbad Water Polo) has really made a positive impact in a lot of young lives in our community. More areas for skateboarding. More bike and pedestrian trails independent of automobiles leading between neighborhoods, schools, and major public gathering spaces--cars drive too fast and aggressively here. Dirt tracks and trails for mountainbikers. Look at the city of Folsom, CA, and how they integrated cycling into their city design. Kids had somewhere safe to walk and bike to schools, parks, and athletic centers.	12/30/2021 2:33 PM
859	Carlsbad Tri	12/30/2021 2:32 PM
860	Pickleball	12/30/2021 2:32 PM
861	Ocean front campsites on the sand instead of the highway	12/30/2021 2:32 PM
862	pickleball, tennis, art	12/30/2021 2:31 PM
863	Lacrosse, yoga outside and concerts in the parks.	12/30/2021 2:30 PM
864	Tae Kwon Do, outdoor yoga, outdoor fitness training.	12/30/2021 2:30 PM
865	Badminton, softball, yoga	12/30/2021 2:30 PM
866	Swimming, surfing classes, Zumba	12/30/2021 2:29 PM
867	Pickleball	12/30/2021 2:28 PM
868	Pickle ball courts	12/30/2021 2:27 PM
869	Softball league	12/30/2021 2:27 PM
870	Community Gardening	12/30/2021 2:25 PM
871	A running club, game nights	12/30/2021 2:25 PM
872	It might be very beneficial to have a program or function where volunteer mentors can spend time with underserved kids that need more access to sports recreation and/or more engagement and structure with adults.	12/30/2021 2:24 PM
873	Pickleball	12/30/2021 2:23 PM

**Q5 What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?**

874	Pickleball leagues and tournaments.	12/30/2021 2:23 PM
875	Pickleball	12/30/2021 2:22 PM
876	Yoga and pickleball	12/30/2021 2:22 PM
877	Pickleball	12/30/2021 2:21 PM
878	More outside senior walking groups.	12/30/2021 2:21 PM
879	Bicycling	12/30/2021 2:21 PM
880	Our family participates in swim lessons, lap swimming and recreational swimming during the summer.	12/30/2021 2:19 PM
881	Pickleball	12/30/2021 2:18 PM
882	Fewer special interests & more free lanes to swim at Agua - sometimes there are so many "special interests" that if you are merely a taxpaying adult , good luck swimming.	12/30/2021 2:17 PM
883	swim, frisbee, pickle ball, ping pong,	12/30/2021 2:16 PM
884	youth volleyball, baseball, soccer, basketball and art co-ed softball, volleyball and more	12/30/2021 2:15 PM
885	fitness, senior sports	12/30/2021 2:15 PM
886	City staff test	12/30/2021 2:14 PM
887	Water polo, skateboarding, and dog exercise	12/30/2021 2:14 PM
888	Picked ball	12/30/2021 2:13 PM
889	pickleball	12/30/2021 2:13 PM
890	Tai-chi instruction	12/30/2021 2:11 PM

936	See #1 question	12/30/2021 1:51 PM
937	Karate; soccer; dance	12/30/2021 1:50 PM
938	Volleyball for beg/int players, more tennis, rec leagues for teenagers	12/30/2021 1:50 PM
939	Na	12/30/2021 1:49 PM
940	Racquetball, pickle ball	12/30/2021 1:49 PM
941	Maybe a senior walking group, maybe	12/30/2021 1:49 PM
942	Yoga Day camps for preschoolers Dog training Volleyball Pickle ball	12/30/2021 1:49 PM
943	Dog training. Camping over night event	12/30/2021 1:48 PM
944	What is provided so far from our real estate and other taxes are enjoyed by other communities that do not have the amenities provided here in Carlsbad. We see overcrowded situations with people coming from other communities.	12/30/2021 1:48 PM
945	An asphalt pump track built by velosolutions like the one we always go to in Temecula. The asphalt is cheap to maintain, cheap to repair, has good drainage and attracts an amazing community of people. Also velosolutions is the top pump track builder in the world. There was	12/30/2021 1:46 PM

## Q5 What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?

one built in rainier by a contractor that was not a track builder and they made a huge track no one uses cause it is designed so terribly.....not Elsinore wants to know why no one comes to it. The truth is because it is a botched job.....also the one in Carmel valley was supposed to be for bikes.....it was contracted out to spohn ranch...a skate park builder(don't get me wrong, they are an amazing skate park builder) but they designed it for skate boards....so once again the bikers get run off into the hills they we are getting kicked out of because another skate oriented park was built. Sorry if it seems like I'm ranting, I'm just raising 2 kids that race bmx and I grew up racing motocross here as well as bmx. The best motocross riders in the world as well as the top factories for the sport are right here in San Diego. Bikes are the best way for Mx riders to cross train and have fun.....the entire community is missed by our cities cause skaters get a park every 2 blocks and no bikes are ever allowed. You should go to the Temecula pump track and ask everyone how far from the track they live....on most days 8 out of 10 are and hour plus away. We all go there and spend our money and time in Temecula cause we have nothing here.

946	Bike trails and bike parks	12/30/2021 1:45 PM
947	Swim, Karate, Soccer, Softball for children.	12/30/2021 1:45 PM
948	We used to enjoy all the sports, skate park, and pool but our children have grown out of that stage.	12/30/2021 1:44 PM
949	Preschool sports of any kind: martial arts, t-ball, etc.	12/30/2021 1:44 PM
950	yoga	12/30/2021 1:43 PM
951	Tennis, pickle ball, softball, archery	12/30/2021 1:43 PM
952	Kids volleyball, a climbing wall and more adult art and gardening classes. Thanks	12/30/2021 1:43 PM
953	Running, Soccer, & swimming.	12/30/2021 1:43 PM
954	Aquatic classes	12/30/2021 1:42 PM
955	Pilates or yoga classes but only in the shade. Self defense for females (shade also required, possibly a pergola situation). I don't go in the sun anymore. Outdoor cooking classes, especially grilling. Wine tastings, small intimate groups. Stationery cycling outdoors. Citizens pay for these classes at a modest fee. Succulent identification. Creating a drought tolerant garden area.	12/30/2021 1:42 PM
956	In our house thinks like yoga, zumba, pilates, etc	12/30/2021 1:41 PM
957	More fields available for pick-up games.	12/30/2021 1:41 PM
958	Tai chi	12/30/2021 1:40 PM
959	Frisbee/disc golf!	12/30/2021 1:40 PM
960	A snorkeling/freediving expedition to explore the local reef! And other ways to learn about the nature around us :)	12/30/2021 1:40 PM
961	Volleyball, pickle ball, core-hiit fitness training. Fitness obstacle course. Long hiking trails-connect current trail system.	12/30/2021 1:40 PM
962	Gardening, exotic fruits and vegetable growers club	12/30/2021 1:39 PM
963	All	12/30/2021 1:39 PM
964	Yoga	12/30/2021 1:38 PM
965	None	12/30/2021 1:38 PM
966	fitness/nutrition classes	12/30/2021 1:38 PM
967	Zumba, Tai-chi, yoga	12/30/2021 1:38 PM
968	A master swim for younger people like teens	12/30/2021 1:36 PM
969	walking trails	12/30/2021 1:36 PM
970	More Aqua Aerobics. More over 55 age activities	12/30/2021 1:35 PM

## Parks & Recreation Master Plan Update

971	Adult swimming	12/30/2021 1:35 PM
972	No particular preferences	12/30/2021 1:34 PM
973	A general fitness class designed for 4-5 year olds. This age is still a bit young for organized sports but really responds to physical activities like running and climbing	12/30/2021 1:33 PM
974	outdoor yoga Stretching aerobics in place	12/30/2021 1:32 PM
975	Fitness classes for seniors	12/30/2021 1:32 PM
976	Swim, yoga, dance, youth leadership	12/30/2021 1:32 PM
977	Reinstate morning hours at Monroe Street Pool!	12/30/2021 1:32 PM
978	Softball, pickle ball	12/30/2021 1:31 PM
979	Pickleball outdoors and more classes for learning and maybe some organized league play Also more outdoor activities eg. Walking for seniors.	12/30/2021 1:31 PM
980	Swimming pool in poinsettia Park. Not dog parks	12/30/2021 1:30 PM
981	Swimming	12/30/2021 1:30 PM
982	Bike, basketball, soccer, FNL	12/30/2021 1:30 PM
983	Yoga	12/30/2021 1:30 PM
984	Swimming, Gymnastics and kids self defense classes. Not Karate but actual self defense and safety.	12/30/2021 1:30 PM
985	Toddler and kid courses	12/30/2021 1:29 PM
986	Yoga and pilates in an outdoor setting.	12/30/2021 1:29 PM
987	My children are grown. We are predominantly aquatic people.	12/30/2021 1:28 PM
988	masters swimming at Alga Norte running groups	12/30/2021 1:28 PM
989	Allow dogs to be on leashes and walk on sidewalks inside the parks, especially at the new Buena Vista park.	12/30/2021 1:28 PM
990	None of the above. We currently participate in all activities that interest us.	12/30/2021 1:28 PM
991	ANY	12/30/2021 1:28 PM
992	Pickleball open play for different levels of play might be helpful. Maybe have challenge/advanced courts, intermediate courts and beginner courts during busy times of the day.	12/30/2021 1:28 PM
993	Longer trails and trails that connect as a means of getting places.	12/30/2021 1:27 PM
994	Yoga, meditation, stretching, kick boxing for exercise	12/30/2021 1:27 PM
995	Spanish classes	12/30/2021 1:26 PM
996	In the barrio many cannot easily access the Monroe St. pool. I wish we had a pool in walking distance in the 92008 area.	12/30/2021 1:26 PM
997	Spin classes	12/30/2021 1:25 PM
998	none	12/30/2021 1:24 PM
999	I go to the SeniorCenter for art classes. We are two seniors, but my daughter really enjoyed to spaces for play and sport	12/30/2021 1:24 PM
1000	Martial Arts, Soccer and swimming.	12/30/2021 1:24 PM
1001	Pickleball	12/30/2021 1:23 PM
1002	No classes needed- our gym is the great outdoors!	12/30/2021 1:23 PM
1003	Tennis, pickle ball, bird watching.	12/30/2021 1:23 PM
1004	Tennis	12/30/2021 1:22 PM

**Q5 What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?**

1005	Soccer	12/30/2021 1:22 PM
1006	Running/track and field for little kids 6 years old	12/30/2021 1:22 PM
1007	Better hours and more availability for lap swimming at Monroe Street Pool.	12/30/2021 1:22 PM
1008	Many more varieties of aquatic aerobics programs, aside from organizations like NCA dominating our city pools! These pools are supposed to be for the use of residents to recreate in and enjoy.	12/30/2021 1:22 PM
1009	Preschool / kids classes outside	12/30/2021 1:21 PM
1010	gardening for kids	12/30/2021 1:21 PM
1011	N/A	12/30/2021 1:21 PM
1012	none of the above	12/30/2021 1:20 PM
1013	swimming and martial arts	12/30/2021 1:19 PM
1014	youth sports of all kinds, rec basketball, outdoor yoga	12/30/2021 1:19 PM
1015	Waterpolo and tennis	12/30/2021 1:18 PM
1016	Taichi, Zumba, yoga	12/30/2021 1:18 PM
1017	Masters Swimming at Monroe Pool	12/30/2021 1:18 PM
1018	Pickle ball	12/30/2021 1:17 PM
1019	Arts and crafts for beginners	12/30/2021 1:17 PM
1020	N/A	12/30/2021 1:17 PM
1021	Ti chi	12/30/2021 1:16 PM
1022	Biking, hiking, dog walking	12/30/2021 1:15 PM
1023	Don't know	12/30/2021 1:14 PM
1024	Tennis, pickleball	12/30/2021 1:13 PM
1025	walking groups, swimming exercise	12/30/2021 1:13 PM
1026	Senior activities	12/30/2021 1:12 PM
1027	Soccer, football, basketball sports	12/30/2021 1:11 PM
1028	'Pickle ball'. Again we utilize full tennis court but use pickle ball equipment because we are seniors and pickle ball equipment does not require the same strength but we like running around the larger court to get more exercise	12/30/2021 1:11 PM
1029	I don't know	12/30/2021 1:10 PM
1030	n/a we use professional clubs for sports	12/30/2021 1:10 PM
1031	Pickleball, yoga, Pilates, different skill levels for walking groups and hiking groups, cooking classes	12/30/2021 1:10 PM
1032	None of these.	12/30/2021 1:10 PM
1033	More yoga offerings	12/30/2021 1:09 PM
1034	Fitness classes	12/30/2021 1:09 PM
1035	Dog park only at this point	12/30/2021 1:06 PM
1036	We are over 55 and would love to play softball. I'm sure she has some special classes for us to attend.	12/30/2021 1:06 PM
1037	Tai Chi	12/30/2021 1:06 PM
1038	Swimming, Silver Sneaker Free Swimming, or would that be Silver Flipper?	12/30/2021 1:05 PM

## Parks & Recreation Master Plan Update

1039	Kids cooking classes, little kids soccer and baseball, swim classes, drama camp	12/30/2021 1:05 PM
1040	We are swimmers and are very invested in Alga Norte and Monroe Street. Carlsbad still needs an additional pool and/or an opportunity to join a swim team besides NCA in Carlsbad. It is unfair to so many kids that have to commute to other cities every day to have something different than the monopoly NCA has. It's impossible for the public to even swim at Alga Norte after 3p every day because NCA occupies 19 out of 20 lanes. Many people have complained about this!	12/30/2021 1:05 PM
1041	Community sports, Adult leagues	12/30/2021 1:04 PM
1042	Swimming, aquatics, martial arts.	12/30/2021 1:04 PM
1043	Nothing in particular	12/30/2021 1:04 PM
1044	Tennis	12/30/2021 1:04 PM
1045	Adult softball, baseball, soccer, water polo, beach volleyball	12/30/2021 1:04 PM
1046	None	12/30/2021 1:03 PM
1047	Yoga, active aging, open air watercolor (plein aire) painting	12/30/2021 1:03 PM
1048	I would like to see a larger emphasis on family "activities" involving all generations. The inclusion of sports such as Pickleball and leagues for all ages.	12/30/2021 1:03 PM
1049	Senior fitness class	12/30/2021 1:02 PM
1050	Tennis. Latin dance classes. Language clases/clubs. Cycling classes.	12/30/2021 1:02 PM
1051	Kids swimming/aquatics classes and camps	12/30/2021 1:02 PM
1052	Tennis and pickle ball	12/30/2021 1:01 PM
1053	Swiming	12/30/2021 1:01 PM
1054	Baseball, dance, dodgeball, gymnastics	12/30/2021 1:01 PM
1055	None... spontaneous recreation is better. How about a beer and wine garden along a trail?	12/30/2021 1:00 PM
1056	Swimming	12/30/2021 12:59 PM
1057	Swim and dance	12/30/2021 12:58 PM
1058	Swimming	12/30/2021 12:58 PM
1059	Swimming and the park	12/30/2021 12:58 PM
1060	FNL Master Sports basketball Summer camps	12/30/2021 12:58 PM
1061	Outdoor yoga and Tai Chi classes, outdoor Ukel	12/30/2021 12:58 PM
1062	Swimming	12/30/2021 12:57 PM
1063	Sailing or open-water activities & instructors for kids. Archery	12/30/2021 12:57 PM
1064	None at this time	12/30/2021 12:56 PM
1065	Pickleball	12/30/2021 12:56 PM
1066	asian cooking classes....Thai food and chinese food cooking classes.	12/30/2021 12:56 PM
1067	Softball, dance, weight training, golf	12/30/2021 12:56 PM
1068	Pickleball	12/30/2021 12:55 PM
1069	Lap swimming and pickle ball and gentle yoga	12/30/2021 12:55 PM
1070	weight training, yoga, meditation, stretching. Emphasis on over-50 group.	12/30/2021 12:55 PM
1071	Masters Swim	12/30/2021 12:54 PM
1072	Softball	12/30/2021 12:54 PM
1073	Sports FNL, Baseball, swimming Pilates Aqua aerobics	12/30/2021 12:54 PM

**Q5 What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?**

1074	Aqua aerobics, square dancing, knitting, book exchange,	12/30/2021 12:54 PM
1075	Having a variety of options	12/30/2021 12:54 PM
1076	None	12/30/2021 12:53 PM
1077	Any kids adventure camps	12/30/2021 12:53 PM
1078	Zumba classes would be awesome. I currently go to Oceanside & Vista for classes.	12/30/2021 12:53 PM
1079	AYSO and Sr Walks and Hikes.	12/30/2021 12:53 PM
1080	Swimming, baseball	12/30/2021 12:53 PM
1081	Painting, sculpture, crafts	12/30/2021 12:52 PM
1082	Yoga	12/30/2021 12:52 PM
1083	water fitness, men's 55+ softball league	12/30/2021 12:52 PM
1084	pickleball league	12/30/2021 12:52 PM
1085	n/a	12/30/2021 12:52 PM
1086	Water polo, soccer, football and basketball	12/30/2021 12:51 PM
1087	senior and kids classes	12/30/2021 12:51 PM
1088	You have very little for early teens. Just because they are 12 or 14 doesn't mean they don't like art, and some of the fun summer camps you have for younger kids.	12/30/2021 12:51 PM
1089	Outdoor yoga and more community events.	12/30/2021 12:51 PM
1090	Youth soccer for young ages. Possibly ballet/dance. Love the swim programs, just would like it to be easier to get lessons in summer.	12/30/2021 12:51 PM
1091	My daughter has used the pool for years. When I was a kid (in Carlsbad), I took classes from the city including tennis lessons, etc. My son took drum lessons	12/30/2021 12:50 PM
1092	Golf, football (flag) , pickle ball	12/30/2021 12:50 PM
1093	Plein aire art classes or just gatherings for artists. Bocce ball grounds and croquet would be good. Everything you have is geared for the very active citizens.	12/30/2021 12:50 PM
1094	Pickleball	12/30/2021 12:49 PM
1095	Swim team opportunities - more pools	12/30/2021 12:48 PM
1096	All our three kids play soccer.	12/30/2021 12:47 PM
1097	Yoga	12/30/2021 12:47 PM
1098	Pickleball and Disc Golf	12/30/2021 12:47 PM
1099	Track and field for elementary age kids. Cooking classes, farming classes	12/30/2021 12:47 PM
1100	tennis courts	12/30/2021 12:47 PM
1101	Our family enjoys more open areas to play catch, frisbee, and picnicking.	12/30/2021 12:47 PM
1102	Craft classes for multi age groups- sewing, cooking, leather crafts, things that both parent or grandparent and child can participate in together.	12/30/2021 12:47 PM
1103	Bike camp	12/30/2021 12:46 PM
1104	Pickleball	12/30/2021 12:46 PM
1105	Pickleball for everyone in my household	12/30/2021 12:46 PM
1106	City should have a real baseball field with grass infield for senior baseball use. Plenty of softball fields.	12/30/2021 12:46 PM
1107	Senior classes stretching, building muscle and soft ball games.	12/30/2021 12:46 PM
1108	Masters swimming, Pickleball tournaments,	12/30/2021 12:45 PM

## Parks & Recreation Master Plan Update

1109	Softball	12/30/2021 12:45 PM
1110	Swimming Soccer	12/30/2021 12:44 PM
1111	None	12/30/2021 12:44 PM
1112	Golf	12/30/2021 12:44 PM
1113	basketball, football, lacrosse	12/30/2021 12:44 PM
1114	Native plant walks, fitness walks.	12/30/2021 12:44 PM
1115	Football, lacrosse, basketball, pickleball	12/30/2021 12:44 PM
1116	Pickleball, yoga, tai chi	12/30/2021 12:44 PM
1117	Bicycle	12/30/2021 12:43 PM
1118	Walking trails, swimming	12/30/2021 12:43 PM
1119	Senior fitness outdoors during Covid.	12/30/2021 12:43 PM
1120	I can't wait to use the new exercise area recently put in at Calaveras Park. More waking activities	12/30/2021 12:43 PM
1121	Yoga and Pilates	12/30/2021 12:43 PM
1122	At the moment, I would be interested in opportunities to participate in gentle yoga classes or meditation. We have also enjoyed a variety of other activities over the years, but I would like to encourage park planning that is less focussed on "programmed" activities, and more on open play and multi-use access opportunities.	12/30/2021 12:43 PM
1123	Baseball, soccer and football	12/30/2021 12:42 PM
1124	0	12/30/2021 12:42 PM
1125	exercise classes. From "low impact" (read: "EASY") to Intermediate.	12/30/2021 12:42 PM
1126	Adult kickball.	12/30/2021 12:42 PM
1127	Tennis, NCA, summer camps	12/30/2021 12:42 PM
1128	Masters swimming. Adult lap swim	12/30/2021 12:42 PM
1129	My sons would appreciate adult soccer leagues, or just more adult pickup soccer games.	12/30/2021 12:42 PM
1130	Not sure.	12/30/2021 12:42 PM
1131	art, yoga	12/30/2021 12:41 PM
1132	Sports, camps and classes for 4-7 years old, specifically in La Costa.	12/30/2021 12:41 PM
1133	None that I can think of	12/30/2021 12:41 PM
1134	Yoga classes along with any meditation activities	12/30/2021 12:40 PM
1135	genealogy special interest classes	12/30/2021 12:40 PM
1136	Yoga and watercolor painting	12/30/2021 12:38 PM
1137	Summer camps, FNL, City SC soccer and pickleball	12/30/2021 12:38 PM
1138	Bike park, bike camps, mtn bike skill instruction	12/30/2021 12:38 PM
1139	Yoga and perhaps fundraising events.	12/30/2021 12:38 PM
1140	I like the variety of classes at the Senior Center	12/30/2021 12:38 PM
1141	Softball, pickle ball, scavenger hunts, classes with academic value,	12/30/2021 12:38 PM
1142	Use to take be involved with soccer, but kids are older now and no longer on Teams.	12/30/2021 12:37 PM
1143	Pickleball Volleyball Roller skate	12/30/2021 12:37 PM
1144	Pickleball, hiking, art classes	12/30/2021 12:37 PM

**Q5 What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?**

1145	Yoga	12/30/2021 12:37 PM
1146	yoga	12/30/2021 12:37 PM
1147	Yoga fitness circuit Pilates	12/30/2021 12:37 PM
1148	Family friendly options. Young child sports. There is a lot for 4+ but virtually nothing for kids 2-3 years old. Dog friendly activities.	12/30/2021 12:37 PM
1149	Fitness classes	12/30/2021 12:37 PM
1150	Any programs for maintaining and improving the health of our aging population such as walking, posture and balance, qigong, low impact exercises, par courses with exercises that accommodate varying degrees of ability.	12/30/2021 12:37 PM
1151	I'd be more interested in some meditation. I love watching sports.	12/30/2021 12:36 PM
1152	Masters Swim	12/30/2021 12:36 PM
1153	Tennis and soccer.	12/30/2021 12:36 PM
1154	improved lap lane access for lap swimmers at Alga del Norte. NCA has far too many lanes reserved making it very hard to get a lap lane from 3-6 PM currently and it is worse in the summer.	12/30/2021 12:36 PM
1155	When the covid-19 virus is less prevalent, I would like to take a life-saving course that was geared to ordinary surfers/ocean-goers.	12/30/2021 12:36 PM
1156	None	12/30/2021 12:36 PM
1157	pickleball, hiking and pool	12/30/2021 12:35 PM
1158	fitness classes, soft ball league	12/30/2021 12:35 PM
1159	soccer, yoga, women's fitness classes	12/30/2021 12:35 PM
1160	Youth basketball, flag football, soccer leagues, school/holiday break sports camps, classes, after school sports classes	12/30/2021 12:35 PM
1161	Yoga, gentle Pilates, bridge	12/30/2021 12:35 PM
1162	Yoga	12/30/2021 12:34 PM
1163	Yoga in the wild.	12/30/2021 12:34 PM
1164	Pickle ball league, soccer leagues.	12/30/2021 12:34 PM
1165	We have no community center at our park (Aviara) so it is limited to what my park can provide. Would love a center that offered fitness and special interest classes (arts, crafts, etc.) that is walkable from my home as I continue to age in place.	12/30/2021 12:34 PM
1166	Mountain bike parks	12/30/2021 12:33 PM
1167	Sports for kids 2-5 that are actually affordable	12/30/2021 12:33 PM
1168	Pickleball, yoga	12/30/2021 12:33 PM
1169	N/a	12/30/2021 12:33 PM
1170	Pickleball, disc golf, mountain biking	12/30/2021 12:33 PM
1171	Pickle ball	12/30/2021 12:32 PM
1172	Pickleball if possible	12/30/2021 12:32 PM
1173	After school camps and holiday camps	12/30/2021 12:32 PM
1174	Outdoor exercise programs for the seniors.	12/30/2021 12:32 PM
1175	Pickleball, more softball availability	12/30/2021 12:31 PM
1176	Yoga, tennis, art, music	12/30/2021 12:31 PM
1177	Adult craft classes	12/30/2021 12:31 PM

## Parks & Recreation Master Plan Update

1178	Senior Softball	12/30/2021 12:31 PM
1179	Skate park. There are at least as many skaters as bicycle riders. Skate parks are really good for families.	12/30/2021 12:31 PM
1180	Learning pickle ball.	12/30/2021 12:31 PM
1181	Archery	12/30/2021 12:30 PM
1182	Yoga, sewing	12/30/2021 12:30 PM
1183	None.	12/30/2021 12:30 PM
1184	evening walking group - I'm not into the 7 am thing.	12/30/2021 12:29 PM
1185	Mindfulness	12/30/2021 12:29 PM
1186	Volleyball	12/30/2021 12:29 PM
1187	Running track, tennis, yoga	12/30/2021 12:29 PM
1188	Jackie Sorenson's class.	12/30/2021 12:29 PM
1189	Senor exercise class.	12/30/2021 12:29 PM
1190	Tennis, basketball fields, outdoor yoga & pilates	12/30/2021 12:29 PM
1191	Biking, nature hikes, kite flying, treasure hunts, geo-caching, bounce house, birding, wild life hike/class.	12/30/2021 12:29 PM
1192	volleyball, lacrosse, dog agility, skateboarding intro, plein air painting, gardening education, running training..	12/30/2021 12:29 PM
1193	dog parks fitness classes	12/30/2021 12:28 PM
1194	Aqua boot camp, aqua fit,	12/30/2021 12:28 PM
1195	Pickleball	12/30/2021 12:28 PM
1196	None, the city has enough of these. It would be great if parks were more available for open-community use.	12/30/2021 12:28 PM
1197	flag football, cross country competition, pickleball	12/30/2021 12:28 PM
1198	None	12/30/2021 12:28 PM
1199	Friday night lights flag football, alga Norte skate park	12/30/2021 12:27 PM
1200	Senior	12/30/2021 12:27 PM
1201	Bike park, then adult rugby league.	12/30/2021 12:27 PM
1202	Youth volleyball, golf, tennis.	12/30/2021 12:26 PM
1203	Football, yoga, running	12/30/2021 12:26 PM
1204	Senior Tennis play connections.	12/30/2021 12:26 PM
1205	Water polo. It would be great to have adult ultimate Frisbee league, and soccer league	12/30/2021 12:26 PM
1206	Pickleball	12/30/2021 12:25 PM
1207	Baseball / Lacrosse / Skating	12/30/2021 12:25 PM
1208	Soccer and volleyball	12/30/2021 12:25 PM
1209	tai chi, senior aerobics outdoors	12/30/2021 12:25 PM
1210	yoga areas	12/30/2021 12:25 PM
1211	Basketball, yoga, football, frisbee golf	12/30/2021 12:25 PM
1212	Running club	12/30/2021 12:24 PM
1213	Walking	12/30/2021 12:24 PM

**Q5 What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?**

1214	none	12/30/2021 12:24 PM
1215	Kendo if it starts up again	12/30/2021 12:24 PM
1216	fitness, crafts, computer classes, knitting, investment clubs	12/30/2021 12:24 PM
1217	Soccer (City Soccer)	12/30/2021 12:24 PM
1218	Tennis Barre Ballet	12/30/2021 12:24 PM
1219	Swimming for fun	12/30/2021 12:23 PM
1220	basketball, gymnastics	12/30/2021 10:24 AM

## Q6 What recreational activities would you like to see more of in Carlsbad?

Answered: 1,084 Skipped: 682

#	RESPONSES	DATE
1	Activities suited to seniors. Improved hiking trails in green spaces- city parks for example	1/11/2022 5:38 AM
2	Dance classes for kids	1/10/2022 8:55 PM
3	Archery, volleyball	1/10/2022 3:24 PM
4	Soccer	1/10/2022 12:37 PM
5	Outdoor music and events	1/10/2022 12:35 PM
6	We would like to see the elimination of e-bikes. They are dangerous on our streets and riders do not obey traffic signals.	1/10/2022 12:33 PM
7	Pickleball.	1/10/2022 12:22 PM
8	Safe running spaces	1/10/2022 12:18 PM
9	Not sure!	1/10/2022 11:20 AM
10	Pump track, skate parks, bigger play structure parks for older kids.	1/10/2022 11:10 AM
11	Archery	1/10/2022 11:00 AM
12	holiday events	1/10/2022 9:49 AM
13	A park by the ocean for those that can't afford to live there but want to enjoy an outdoor setting with an ocean view.	1/9/2022 6:12 PM
14	Biking, SAFE dog areas to run	1/9/2022 12:40 PM
15	Coastal location is what promotes this community, so coastal activities	1/9/2022 12:11 PM
16	pickleball	1/9/2022 10:10 AM
17	Pickle Ball	1/8/2022 6:22 PM
18	Recreational activities for all ages.	1/8/2022 5:41 PM
19	N/A	1/8/2022 4:48 PM
20	No housing developement in the Ponto region	1/8/2022 2:38 PM
21	Places for my family to be together	1/8/2022 2:36 PM
22	Pickle ball, Yoga, dance classes	1/8/2022 2:32 PM
23	Outdoor yoga	1/8/2022 1:10 PM
24	dog park	1/8/2022 1:09 PM
25	dedicated walking areas with NO bikes, e-bikes, or skateboards. This means no bikes or skateboards on the sidewalks, and giving pedestrians the right of way.	1/8/2022 10:33 AM
26	access to ocean	1/8/2022 10:25 AM
27	Walking	1/8/2022 9:53 AM
28	soccer	1/8/2022 9:42 AM
29	Bocce, pickle ball, pickup softball	1/8/2022 9:14 AM
30	Pickle ball Most cities have 3 times the pickle ball courts that we have	1/8/2022 8:59 AM
31	Would like more non-paved jogging trails, especially in the coastal area.	1/8/2022 8:59 AM

## Parks & Recreation Master Plan Update

32	More coastal parks and less developments from large developers looking for a quick buck	1/8/2022 8:31 AM
33	Does not matter to me as long as there is open space	1/8/2022 8:25 AM
34	Intergenerational	1/8/2022 7:48 AM
35	elder activities	1/8/2022 7:38 AM
36	Coastal parks with kids playground and picnic tables	1/8/2022 7:20 AM
37	Some place you could walk your dog.	1/8/2022 7:18 AM
38	Place a park in the Ponto area. Those of us living in southwest Carlsbad are underserved by park facilities	1/8/2022 6:59 AM
39	Live music	1/7/2022 11:47 PM
40	Runs	1/7/2022 9:29 PM
41	Outdoor yoga classes, boot camp classes	1/7/2022 9:26 PM
42	Open spaces for walking and recreating.	1/7/2022 9:23 PM
43	Make Ponto Park a reality. I have spent most of my 70 years enjoying the undeveloped open spaces overlooking Ponto and surfing, diving, fishing and boating at Ponto Beach. Losing this gem to development would be heart breaking.	1/7/2022 9:23 PM
44	Hiking trails	1/7/2022 9:00 PM
45	Hiking trails, archery range, disc golf course!	1/7/2022 8:54 PM
46	Martial arts	1/7/2022 8:39 PM
47	Better and safer biking opportunities.	1/7/2022 8:29 PM
48	Dog park with grass.	1/7/2022 8:22 PM
49	Skateparks and water facilities.	1/7/2022 7:58 PM
50	Pickleball	1/7/2022 7:55 PM
51	We need neighborhood parks in SW Carlsbad	1/7/2022 7:52 PM
52	Hiking trails with ways to connect them Biking paths with separation from the car traffic	1/7/2022 7:40 PM
53	We need to combine our resources and add more hiking, biking, and nature trails. Recently I spent time in Boulder Colorado. Trails everywhere, parks on every block, sports facilities for all to use and open space. Carlsbad has the opportunity to preserve what little coastal open space that is left. Ponto Park in South Carlsbad would be a welcome addition to the already beautiful trails around Batiquitos Lagoon. More Parks please!	1/7/2022 7:36 PM
54	Hiking trails	1/7/2022 7:22 PM
55	kid's outdoor classes, art outdoors	1/7/2022 7:16 PM
56	Biking around Batiquitos lagoon. Please let bikes share the path	1/7/2022 7:10 PM
57	More options for summer and after school kids	1/7/2022 7:07 PM
58	Safe bike trails.	1/7/2022 7:04 PM
59	Bike trails. Dedicated bike paths that are safe with barriers between cyclists and cars.	1/7/2022 7:02 PM
60	Bocce ball	1/7/2022 6:59 PM
61	Mountain biking trails on hilly areas.	1/7/2022 6:58 PM
62	More open space and parks by South Ponto	1/7/2022 6:50 PM
63	I do not know.	1/7/2022 6:49 PM
64	N/A	1/7/2022 6:35 PM
65	Mountain bike trails	1/7/2022 6:29 PM

## Q6 What recreational activities would you like to see more of in Carlsbad?

66	PICKLEBALL!!	1/7/2022 6:28 PM
67	Trails by Ponto Beach!	1/7/2022 6:27 PM
68	Dog areas	1/7/2022 6:25 PM
69	Opportunities for high quality long walks--trails that connect to parks that connect to restaurants/shops/beach...	1/7/2022 6:12 PM
70	None.	1/7/2022 6:04 PM
71	Preservation of open space and less development in the remaining open spaces we do have. We should not strive to be overly developed like National City. The City needs to just say NO to development of more homes and retail space on remaining open spaces.	1/7/2022 6:03 PM
72	More beach accessible park space particularly in So Carlsbad area.	1/7/2022 6:00 PM
73	safe walking paths free of wheeled vehicles	1/7/2022 5:56 PM
74	shuffleboard; tennis court for pickle ball; chess areas	1/7/2022 5:50 PM
75	Bike parks	1/7/2022 5:44 PM
76	Hiking and nature trails.	1/7/2022 5:44 PM
77	More activities towards preservation.	1/7/2022 5:42 PM
78	N/a	1/7/2022 5:32 PM
79	Surfing supporting services at the beach	1/7/2022 5:14 PM
80	swimming pool	1/7/2022 5:03 PM
81	We need an outdoor park that would serve coastal south carlsbad!	1/7/2022 4:49 PM
82	Any rec sport for the K-8th grade level that is reasonable in cost so my kids can try new things. Right now it seems to be all soccer and crazy expensive.	1/7/2022 4:45 PM
83	Outdoor yoga and outdoor fitness classes. Oh, and more pickle ball courts!	1/7/2022 4:41 PM
84	Walking paths and jogging trails.	1/7/2022 4:35 PM
85	More pools .	1/7/2022 4:32 PM
86	Swimming	1/7/2022 4:27 PM
87	We would just really love a place where our kids can go play sports - we live in a high-density area and a place where they could go play some "sand-lot" baseball, soccer, etc. would be great! Oh, and pickleball!	1/7/2022 4:22 PM
88	yoga, tai chi, nature walks, beach walks. like walking meditations. Communita Yoga does these in Oceanside.	1/7/2022 4:21 PM
89	Opportunities for beach volleyball for example at Ponto where there should be a park for everyone to enjoy	1/7/2022 4:19 PM
90	Health and wellness outdoor classes	1/7/2022 4:15 PM
91	See #4	1/7/2022 4:07 PM
92	Pickleball	1/7/2022 4:03 PM
93	Pools! Pools! Pools!	1/7/2022 4:02 PM
94	More activities for kids.	1/7/2022 4:02 PM
95	Kids soccer	1/7/2022 3:57 PM
96	Walking trails, tennis, picnic areas, play areas and BBQ areas for families.	1/7/2022 3:56 PM
97	A coastal southern park to fly kites, jog, play badminton, volleyball, basketball, whatever!	1/7/2022 3:56 PM
98	A park close to my home to enjoy outdoor activities...walking paths, bicycle path	1/7/2022 3:55 PM
99	Youth Lacrosse	1/7/2022 3:53 PM

## Parks & Recreation Master Plan Update

100	A paved ocean walk in south coast.	1/7/2022 3:52 PM
101	dog park, pickleball	1/7/2022 3:52 PM
102	Beach Kids	1/7/2022 3:52 PM
103	Music festivals or casual band days in the park; food truck days, small beer festivals	1/7/2022 3:52 PM
104	Access to the southwest Carlsbad beaches.	1/7/2022 3:51 PM
105	Nature hikes.	1/7/2022 3:10 PM
106	The fitness parks and/or addition of fitness components to existing parks	1/7/2022 10:49 AM
107	Swimming for kids, Basketball for kids, more accessibility to flat (not steep) trails for running and biking.	1/7/2022 8:38 AM
108	More summer surf camps. The Lego camps were also great but could do more.	1/7/2022 8:28 AM
109	Large dog park	1/7/2022 7:21 AM
110	Pickleball courts	1/7/2022 5:25 AM
111	pickleball	1/6/2022 6:34 PM
112	Parking for surfing and beach walking.	1/6/2022 5:45 PM
113	Pickleball! 🤪	1/6/2022 1:53 PM
114	Beach activities	1/6/2022 12:13 PM
115	Pickleball	1/6/2022 9:54 AM
116	Motorcross/4-wheeling, mountain biking, jogging trails, hiking. Please look at S CBad coastal to build a park;)	1/6/2022 8:46 AM
117	Yoga	1/6/2022 8:17 AM
118	Fewer dog parks and more pickleball courts!	1/5/2022 11:57 PM
119	Pickleball. There is always a crazy lineup of people waiting to play & the few courts we have are jam packed. The demand is extremely high for residents like me.	1/5/2022 11:36 PM
120	we need more parks and open land - we dont need more high density housing - we need a coastal park in SW Carlsbad	1/5/2022 6:50 PM
121	segregating a portion of our beach to dogs!	1/5/2022 12:52 PM
122	It would be great to see more exercise equipment.	1/5/2022 9:17 AM
123	Concerts in the park.	1/5/2022 7:09 AM
124	Sand volleyball pits, Bocce ball courts, small & large dog runs	1/5/2022 12:18 AM
125	Pickleball courts	1/4/2022 9:27 PM
126	Trails and open green spaces	1/4/2022 7:13 PM
127	Pickle ball	1/4/2022 6:51 PM
128	Pickle ball	1/4/2022 5:36 PM
129	Hiking trails. Offleash areas (as opposed to cookie cutter dog parks).	1/4/2022 5:29 PM
130	Pickle ball!	1/4/2022 4:53 PM
131	More pickleball courts for families	1/4/2022 4:50 PM
132	Pickleball	1/4/2022 4:48 PM
133	All levels of retired and disabled groups	1/4/2022 4:33 PM
134	Fitness	1/4/2022 3:44 PM
135	More pickleball courts (but not converting existing tennis courts)	1/4/2022 3:36 PM

## Q6 What recreational activities would you like to see more of in Carlsbad?

136	Happy with what is available.	1/4/2022 3:13 PM
137	hiking, intergenerational activities	1/4/2022 2:31 PM
138	Roller rink	1/4/2022 2:19 PM
139	More bike lanes, safer biking conditions on all roadways.	1/4/2022 1:07 PM
140	More toddler / family interactive activities	1/4/2022 12:34 PM
141	Even more walking trails!	1/4/2022 12:32 PM
142	I'm pretty content ... not sure. Lots Of walking trails.	1/4/2022 12:23 PM
143	Protected biking and walking lanes/paths. More availability at Monroe Street pool. Hiking and walking along lagoons, etc	1/4/2022 12:23 PM
144	pickleball	1/4/2022 8:39 AM
145	pickleball	1/4/2022 8:28 AM
146	See previous answers as well as add guided group hikes.	1/3/2022 11:04 PM
147	Pickleball	1/3/2022 8:00 PM
148	open space for doing whatever we want in nature	1/3/2022 7:04 PM
149	We've done the camps every summer and they've been wonderful so definitely keep those on the schedule. Soccer and ballet.	1/3/2022 6:45 PM
150	camping, hiking, cycling	1/3/2022 4:55 PM
151	Swim	1/3/2022 4:03 PM
152	Pickleball	1/3/2022 4:01 PM
153	more pickleball courts	1/3/2022 3:36 PM
154	Skate and surf	1/3/2022 2:14 PM
155	Hiking	1/3/2022 1:38 PM
156	Pickleball, continued growth of bike trails and Gaga ball and other outdoor activities for kids	1/3/2022 12:26 PM
157	You are already doing a great job!	1/3/2022 12:07 PM
158	more recreational classes for seniors at Stagecoach Park	1/3/2022 10:53 AM
159	More pool time availability.	1/3/2022 10:51 AM
160	movies in the park. Can't wait for covid restrictions to ease on large gatherings. Outdoor music festivals, wine and beer fests, smaller arts and crafts fairs, museums & galleries, etc. Cultural and lifestyle events. There should be something happening, like a gallery walk or pop-up sports or arts classes, at least twice a month in the summer.	1/3/2022 10:12 AM
161	Bocce ball courts	1/3/2022 10:00 AM
162	More Pickle Ball Courts	1/3/2022 9:39 AM
163	Hiking, bootcamp-style workouts, yoga, stretch classes and adult sports camps.	1/3/2022 9:35 AM
164	Pickleball courts (dedicated for public use). With the huge popularity players are quickly improving. Therefore at least 50% of all courts to be challenge courts and 50% to be social courts.	1/3/2022 9:08 AM
165	trails/natural areas, natural play spaces, bike trails for safe transportation through the city, community gardens, pickleball (shared courts with tennis for sustainability)	1/3/2022 8:17 AM
166	Educational	1/3/2022 8:05 AM
167	Running	1/3/2022 6:50 AM
168	Pickleball courts	1/2/2022 10:39 PM

## Q6 What recreational activities would you like to see more of in Carlsbad?

169	bike routes	1/2/2022 7:59 PM
170	Unsure	1/2/2022 6:17 PM
171	Pickleball, outdoor concerts, dog beach and dog friendly off-leash open space areas	1/2/2022 5:27 PM
172	Senior dance classes game nights for seniors Off leash dog parks more boardwalks at the beach ... NO HOMELESS AT THE PARKS	1/2/2022 4:13 PM
173	More multipurpose courts	1/2/2022 3:59 PM
174	Pickleball	1/2/2022 3:55 PM
175	I'm fine with what is here. Maybe more bike lanes.	1/2/2022 3:33 PM
176	Allowing pickleball to be played on empty city tennis courts	1/2/2022 2:51 PM
177	More pickleball courts.	1/2/2022 2:14 PM
178	Swimming	1/2/2022 1:28 PM
179	Croquet, lawn bowling or bocce ball; exercise and fitness; street dance; den building; and swimming are just a few of the physical activities. Classes/presentations/lectures that allow participants to experience nature.	1/2/2022 1:13 PM
180	Pickleball	1/2/2022 12:58 PM
181	more surf camps and junior lifeguarding. more martial arts	1/2/2022 12:25 PM
182	Pickleball Could you use the existing tennis courts and draw lines for Pickleball and use portable nets at the ends of the tennis court?	1/2/2022 12:16 PM
183	Pickle ball	1/2/2022 11:43 AM
184	Maybe some places for stretching on walking areas.	1/2/2022 10:23 AM
185	Science classes and performing arts camps/programs for kids. Individual (in a class) exercise programs for kids. More things at a 4pm time slot or utilized on weekends.	1/2/2022 10:12 AM
186	Pickle ball	1/2/2022 9:19 AM
187	hiking, mountain biking, trail running	1/2/2022 9:07 AM
188	Swimming access. Pickleball. Dog friendly areas.	1/2/2022 9:04 AM
189	Pickleball	1/2/2022 8:57 AM
190	A skateboard park in the Northern part of the City. Access to public school fields and running tracks for public use.	1/2/2022 8:41 AM
191	Pickleball	1/2/2022 8:22 AM
192	Walking trails with beach access	1/2/2022 8:21 AM
193	Pickleball	1/2/2022 8:13 AM
194	Tennis courts	1/2/2022 7:53 AM
195	Skateboarding and diving	1/2/2022 6:37 AM
196	Mountain biking trail and recreational water polo	1/2/2022 5:25 AM
197	Maintaining what you have would be good!	1/1/2022 10:46 PM
198	can't think of any	1/1/2022 9:11 PM
199	See previous	1/1/2022 8:53 PM
200	pickleball	1/1/2022 8:42 PM
201	Pickleball	1/1/2022 8:38 PM
202	pickleball	1/1/2022 8:34 PM
203	More martial arts and dance classes	1/1/2022 8:28 PM

## Parks & Recreation Master Plan Update

204	Pickle ball, tennis, hiking trails	1/1/2022 8:21 PM
205	Tennis and Pickleball courts.	1/1/2022 7:00 PM
206	Pickleball, volleyball	1/1/2022 6:10 PM
207	Pickleball	1/1/2022 6:05 PM
208	More open trails. One that would circle Agua Herionda Lagoon would be fun. The current trail is very short.	1/1/2022 5:55 PM
209	pickball	1/1/2022 5:52 PM
210	More Pickleball courts More tennis courts	1/1/2022 5:44 PM
211	Pickle ball and more fishing events for the community	1/1/2022 5:44 PM
212	Pickleball courts	1/1/2022 5:42 PM
213	unk	1/1/2022 5:14 PM
214	Skate and bike parks at every park, there is no reason they are not added for the enjoyment of kids and adults.	1/1/2022 5:06 PM
215	Pickleball	1/1/2022 5:02 PM
216	pickle ball courts	1/1/2022 5:01 PM
217	Turn some of that land at Ponto into a park that could be used for concerts, art and food events, etc.	1/1/2022 4:46 PM
218	Pickleball Dog Parks	1/1/2022 4:41 PM
219	Pickleball	1/1/2022 3:11 PM
220	Pickleball courts	1/1/2022 2:14 PM
221	Pickleball	1/1/2022 1:14 PM
222	heated pools - playgrounds	1/1/2022 1:04 PM
223	dancing	1/1/2022 12:13 PM
224	Biking trips around the Carlsbad areas. More evening and afternoon activities. Not everyone can go to the am activities. More library events. Carlsbad is doing a nice job and I enjoy what is offered. Thank you!	1/1/2022 11:51 AM
225	More pickleball courts	1/1/2022 11:43 AM
226	Nothing more at this time.	1/1/2022 11:39 AM
227	Pickleball, want stadium court	1/1/2022 10:49 AM
228	Swimming pools	1/1/2022 10:39 AM
229	Pickleball courts thank you	1/1/2022 10:36 AM
230	Pickleball.	1/1/2022 10:36 AM
231	Any activity that doesn't require masks.	1/1/2022 9:47 AM
232	Frisbee golf, pickle ball courts, skateboard parks	1/1/2022 9:35 AM
233	I would like to have more activities within walking distance and have all of our planned trails completed	1/1/2022 9:31 AM
234	Softball batting cages.	1/1/2022 9:25 AM
235	Pickleball	1/1/2022 9:16 AM
236	pickleball courts	1/1/2022 8:57 AM
237	Picklball!	1/1/2022 8:42 AM
238	Degsinated dog beach.	1/1/2022 8:36 AM

## Q6 What recreational activities would you like to see more of in Carlsbad?

239	Active senior	1/1/2022 8:33 AM
240	A bike park soon. Thank you.	1/1/2022 7:58 AM
241	pickleball	1/1/2022 7:56 AM
242	Pickleball leagues. Let's make Carlsbad a top Pickleball vacation destination!	1/1/2022 7:55 AM
243	lacrosse	1/1/2022 7:44 AM
244	Outdoor fitness classes	1/1/2022 7:39 AM
245	Pickleball	1/1/2022 7:38 AM
246	Outdoor performance area would be really nice.	1/1/2022 7:29 AM
247	Group exercise events for all ages.	1/1/2022 7:02 AM
248	Pretty well covered	1/1/2022 6:43 AM
249	pickleball	1/1/2022 5:35 AM
250	Hiking groups	1/1/2022 3:17 AM
251	Pickleball. It's the fastest growing sport, played by all ages, and as a 21 year resident and tax payer a easy burden on the city.	1/1/2022 1:29 AM
252	See 4.	12/31/2021 11:43 PM
253	Same	12/31/2021 10:30 PM
254	More pickleball for sure!	12/31/2021 9:46 PM
255	Connect bike and jogging trails, for example around the lagoons, to calavera preserve, and to the beach	12/31/2021 9:35 PM
256	PICKLEBALL!!	12/31/2021 9:13 PM
257	None. Please don't spend our tax dollars on any more recreational issues until drug dealing and homeless issues are gone. Carlsbad Village streets are not safe anymore.	12/31/2021 8:48 PM
258	Pickleball	12/31/2021 8:47 PM
259	same answers as question 4	12/31/2021 8:39 PM
260	N/a	12/31/2021 8:12 PM
261	long running and/or biking trails	12/31/2021 6:41 PM
262	Pickleball	12/31/2021 6:39 PM
263	Any & all.	12/31/2021 6:13 PM
264	Safe bike paths that are interconnected to the community that are not on the car road.	12/31/2021 6:04 PM
265	Yoga, swimming.	12/31/2021 5:40 PM
266	Pickleball	12/31/2021 5:34 PM
267	Pickleball	12/31/2021 4:35 PM
268	chair yoga for disabled at a time that is not at dawn.....better in the afternoon	12/31/2021 4:26 PM
269	Pickleball	12/31/2021 4:18 PM
270	Pickleball	12/31/2021 4:16 PM
271	Pickleball	12/31/2021 4:13 PM
272	Hopefully we can see more of the free library children's programs (legos, crafts and music for school age children).	12/31/2021 3:59 PM
273	Pickleball	12/31/2021 3:55 PM
274	Pools	12/31/2021 3:54 PM

## Parks & Recreation Master Plan Update

275	need more pickleball cts	12/31/2021 3:50 PM
276	Hiking and biking trails connected to those from other cities to form safe, continuous routes	12/31/2021 3:50 PM
277	Lawn concerts once Covid is calmed down	12/31/2021 3:45 PM
278	Pools, paths	12/31/2021 3:38 PM
279	More fitness classes, for all ages	12/31/2021 3:27 PM
280	leagues for over 55	12/31/2021 3:20 PM
281	Senior activities	12/31/2021 3:08 PM
282	Pickleball	12/31/2021 3:05 PM
283	Pickleball	12/31/2021 2:59 PM
284	Pickleball	12/31/2021 2:59 PM
285	PICKELBALL	12/31/2021 2:58 PM
286	pickleball	12/31/2021 2:56 PM
287	Pickleball	12/31/2021 2:56 PM
288	pickle ball bick lanes	12/31/2021 2:55 PM
289	More pickleball courts and more golf events, classes, etc	12/31/2021 2:40 PM
290	Pickleball	12/31/2021 2:27 PM
291	Another pool... sometime!	12/31/2021 2:26 PM
292	More pickleball courts at poinsettia park	12/31/2021 2:20 PM
293	golf	12/31/2021 2:16 PM
294	See previous answer. Also biking and e-bikes.	12/31/2021 2:13 PM
295	pickleball	12/31/2021 1:43 PM
296	Pickleball	12/31/2021 1:41 PM
297	pickle ball	12/31/2021 1:40 PM
298	Tennis, trails for walking/running/hiking.	12/31/2021 1:34 PM
299	scavenger hunts, digging areas like at the Botanic Gardens where they also have lightweight wood planks the kids use to build and pretend. Also want to express huge disappointment with the structures at buena vista playground. They are either too small for more than one kid or don't make sense with the type of play that kids do... must not have been designed by a parent...	12/31/2021 1:23 PM
300	Questions are getting repetitive here.	12/31/2021 1:15 PM
301	Bike trails, skate parks, pickleball, tennis courts, yoga classes, tai chi,	12/31/2021 1:05 PM
302	swimming pools	12/31/2021 1:00 PM
303	Pickleball	12/31/2021 1:00 PM
304	Pickleball	12/31/2021 12:53 PM
305	More pickel ball court space!	12/31/2021 12:41 PM
306	Pickleball	12/31/2021 12:24 PM
307	My kids want better monkey bars and more advanced equipment. Think the park off of Santa Fe in Encinitas. The love the new park on Buena Vista but think the play area is geared for little kids and want more of a challenge. (Don't get me wrong, that park is amazing and long over due!)	12/31/2021 12:24 PM
308	pickleball courts	12/31/2021 12:14 PM

## Q6 What recreational activities would you like to see more of in Carlsbad?

309	Pickleball courts	12/31/2021 12:08 PM
310	pickleball	12/31/2021 12:08 PM
311	Open trails for mountain biking.	12/31/2021 11:57 AM
312	Pickleball	12/31/2021 11:45 AM
313	Pickleball	12/31/2021 11:44 AM
314	Indoor pools and fitness classes for seniors and others who have physical limitations.- similar to what was offered at Tri-City Wellness.	12/31/2021 11:38 AM
315	Pickleball as it's wonderfully fun for everyone regardless of age.	12/31/2021 11:32 AM
316	pickleball courts	12/31/2021 11:32 AM
317	Pickleball courts, hiking and biking trails.	12/31/2021 11:27 AM
318	Senior Softball	12/31/2021 11:21 AM
319	Indoor swimming	12/31/2021 11:21 AM
320	Bring back concerts	12/31/2021 11:20 AM
321	Swimming	12/31/2021 11:16 AM
322	none	12/31/2021 11:11 AM
323	more pickleball courts - maybe share some tennis courts	12/31/2021 11:07 AM
324	Pickleball courts. Carlsbad has only one public outdoor Pickleball court.	12/31/2021 11:06 AM
325	More parks in de carlsbaf	12/31/2021 11:03 AM
326	More Pickleball courts	12/31/2021 10:57 AM
327	pickleball	12/31/2021 10:55 AM
328	Baseball. In south Carlsbad we do not seem to have a central location for baseball for our youth to have a community feeling. In North Carlsbad they have Chase field and families can picnic and use snack bar and it generates a true community feeling and a safe activity for the kids. We don't have that in South Carlsbad.	12/31/2021 10:47 AM
329	Bocce Ball Courts, It is a very nice and easy game for seniors to play. Costs and maintenance is minimal compared to many other sports activities.	12/31/2021 10:45 AM
330	Outdoor Pickleball courts	12/31/2021 10:44 AM
331	Bocce ball	12/31/2021 10:39 AM
332	pickleball	12/31/2021 10:30 AM
333	anything that is bike friendly	12/31/2021 10:26 AM
334	Pickleball and swimming.	12/31/2021 10:21 AM
335	Pickleball	12/31/2021 10:12 AM
336	Pickleball	12/31/2021 10:12 AM
337	Cycling, mountain biking, and skateboarding.	12/31/2021 10:12 AM
338	Pickleball	12/31/2021 10:04 AM
339	More pickleball courts. They offer so much health wise to the community.	12/31/2021 10:00 AM
340	Pickleball please	12/31/2021 9:58 AM
341	Pickleball and tennis	12/31/2021 9:56 AM
342	pickleball	12/31/2021 9:47 AM
343	Pickleball	12/31/2021 9:44 AM

## Parks & Recreation Master Plan Update

344	dog parks, SAFE walking areas	12/31/2021 9:43 AM
345	pickleball. the 6 courts are great but need more there are long waiting lines. I was surprised that the new DOG part is bigger than the current pickleball courts. Yu can walk your dog ANYwhere in the beautiful parks all over SD but very limited locations for pickelball. Even the tennis courts are not unutilized are much as the pickleball courts, i have never seen people waiting to play tennis and thet are 10 courts and tak up LOTS of space. Please note that the new bathroom has a tin/metal roof on it. It reflects on \the pickleball courts and is blinding and make the courts somewhat unusable (sunglasses do not even help) :( Brent 858.692.1844 bhaws@san.rr.com	12/31/2021 9:36 AM
346	Pickleball	12/31/2021 9:35 AM
347	indoor and outdoor pickle ball courts, some with lights for evening play.	12/31/2021 9:18 AM
348	Outdoor classes, like yoga and Pilates	12/31/2021 9:13 AM
349	Pickleball	12/31/2021 9:12 AM
350	I think most activities are provided. Carlsbad does a great job!	12/31/2021 9:12 AM
351	swimming	12/31/2021 9:12 AM
352	Outdoor Pickleball courts. Only 6 in Poinsettia, always crowded, long waiting times to play.	12/31/2021 9:10 AM
353	More pickleball courts Off road bike course Disc golf Foot volleyball	12/31/2021 9:08 AM
354	Pickleball tournmnts!!	12/31/2021 9:07 AM
355	bird-watching and naturalist pursuits to help people here learn more about what should be living here.	12/31/2021 9:06 AM
356	running and fitness events	12/31/2021 9:03 AM
357	more tennis courts please. Only 4 at stagecoach	12/31/2021 8:55 AM
358	pickleball	12/31/2021 8:53 AM
359	Some concerts or some kind of festival each year?	12/31/2021 8:46 AM
360	Morning swim at Monroe	12/31/2021 8:45 AM
361	Pickle ball league	12/31/2021 8:37 AM
362	Walking groups	12/31/2021 8:36 AM
363	More outdoor pickleball courts.	12/31/2021 8:35 AM
364	Skateboarding	12/31/2021 8:32 AM
365	Pickleball	12/31/2021 8:31 AM
366	Pickleball and dog parks.	12/31/2021 8:30 AM
367	Bike park like in Truckee, pump track like in Carmel Valley, a skatepark in the northern part of Carlsbad.	12/31/2021 8:28 AM
368	Tennis and pickleball. Us baby boomers don't want anymore soccer or baseball fields	12/31/2021 8:25 AM
369	Pickleball	12/31/2021 8:23 AM
370	More Community Gardens.	12/31/2021 8:23 AM
371	Multi acre, back country, Open area, off leash dog park.	12/31/2021 8:21 AM
372	More pickleball	12/31/2021 8:17 AM
373	Pickleball for all ages, play equipment, hiking trails, and a dog beach.	12/31/2021 8:17 AM
374	Pickleball	12/31/2021 8:15 AM
375	Additional pickleball courts at Poinsettia Park.	12/31/2021 8:15 AM
376	More swimming pool, please	12/31/2021 8:14 AM

## Q6 What recreational activities would you like to see more of in Carlsbad?

377	Pump tracks, gravel route signage	12/31/2021 8:09 AM
378	swimming, pickle ball	12/31/2021 8:08 AM
379	Pickleball	12/31/2021 8:07 AM
380	Organized fitness & conditioning classes near me (NE quadrant).	12/31/2021 8:07 AM
381	I think we have a nice variety of activities	12/31/2021 8:04 AM
382	just usable grassy multi-use parks within walking distance so all sorts of informal and formal recreation activities can be conducted. an outdoor neighborhood fitness classes would be nice, but you need neighborhood parks you can walk to for that.	12/31/2021 8:03 AM
383	Pickleball	12/31/2021 8:03 AM
384	Pickleball	12/31/2021 8:01 AM
385	More pickleball courts.	12/31/2021 7:57 AM
386	Yoga for seniors.	12/31/2021 7:55 AM
387	Pickleball	12/31/2021 7:53 AM
388	Pickleball!	12/31/2021 7:52 AM
389	pickleball since the current courts are impossible to play since they are monopolized by the same people everyday.	12/31/2021 7:51 AM
390	Pickleball courts	12/31/2021 7:44 AM
391	Bocce ball, Pickleball	12/31/2021 7:41 AM
392	More pickleball courts	12/31/2021 7:40 AM
393	Intramurals	12/31/2021 7:38 AM
394	More Pickleball and cheaper prices for your classes. \$70 for one class is too much.	12/31/2021 7:38 AM
395	TGIF,MORE POOLS, SENIOR LEAGUES AND ACTIVITIES	12/31/2021 7:38 AM
396	Dog friendly	12/31/2021 7:34 AM
397	Pickle ball	12/31/2021 7:33 AM
398	Pickleball	12/31/2021 7:32 AM
399	pickleball	12/31/2021 7:32 AM
400	Mountain biking	12/31/2021 7:32 AM
401	Pickleball	12/31/2021 7:31 AM
402	pickleball, pilates, yoga	12/31/2021 7:29 AM
403	More pickleball courts	12/31/2021 7:23 AM
404	Water sports and safety	12/31/2021 7:20 AM
405	Pickleball	12/31/2021 7:18 AM
406	Pickleball	12/31/2021 7:01 AM
407	Pickleball Swimming	12/31/2021 6:56 AM
408	Pickleball	12/31/2021 6:53 AM
409	there used to be a meetup group hosted by a Carlsbad employee, who led the group on walks and easy hikes through various parts of the city--would like to see this brought back, because it introduced us to parts of the city we hadn't seen	12/31/2021 6:50 AM
410	Pickel ball	12/31/2021 6:48 AM
411	Pickleball	12/31/2021 6:47 AM

## Parks & Recreation Master Plan Update

412	No need to bring in more activities-just keep the homeless wasted and mentally unstable out of the parks - use the money to get them somewhere safe and get the resources they need.	12/31/2021 6:47 AM
413	More pickleball and beach volleyball courts.	12/31/2021 6:45 AM
414	Pickleball	12/31/2021 6:44 AM
415	I would like to see more pickleball courts.	12/31/2021 6:43 AM
416	Additional pickleball opportunities	12/31/2021 6:40 AM
417	Pickleball	12/31/2021 6:33 AM
418	The Carlsbad Triathlon	12/31/2021 6:27 AM
419	Pickleball	12/31/2021 6:21 AM
420	Pickleball court	12/31/2021 6:20 AM
421	More Pickleball courts	12/31/2021 6:16 AM
422	?	12/31/2021 6:14 AM
423	Excursions/day trips	12/31/2021 6:11 AM
424	More Pickleball courts.	12/31/2021 6:10 AM
425	Dog training opportunities, hiking groups, art/clay classes for teens	12/31/2021 6:05 AM
426	Pickleball	12/31/2021 5:52 AM
427	Pickleball	12/31/2021 5:51 AM
428	Pickleball	12/31/2021 5:50 AM
429	Pickleball	12/31/2021 5:46 AM
430	Pickleball.	12/31/2021 5:40 AM
431	Pickleball	12/31/2021 5:21 AM
432	More outdoor pickleball courts!	12/31/2021 5:09 AM
433	Pickleball courts, softball diamonds	12/31/2021 5:08 AM
434	Pickleball	12/31/2021 5:07 AM
435	Keep some locations "wild" to enjoy nature. Don't need to "harden" all surfaces. Keep some remote hiking sites remote. Enjoy the multitude of all activities that are available even if I can't participate in all. Makes Carlsbad a wonderful place to live! Convert power plant site to open space park not housing or commercial!!!	12/31/2021 5:03 AM
436	Pickleball courts	12/31/2021 4:52 AM
437	Pickleball	12/31/2021 4:09 AM
438	Pickleball, adult tap dancing.	12/31/2021 4:03 AM
439	Pickleball	12/31/2021 3:10 AM
440	More Pickleball courts. Very crowded with long wait time now.	12/31/2021 2:40 AM
441	Pickleball	12/31/2021 2:06 AM
442	More Pickleball courts.	12/31/2021 12:46 AM
443	Pickleball	12/31/2021 12:30 AM
444	Outdoor concerts	12/31/2021 12:22 AM
445	Poinsettia pickleball courts have gotten really busy. Would love to be able to play more & to not have to wait as much.	12/31/2021 12:12 AM
446	more outdoor pickleball courts	12/30/2021 11:45 PM

## Q6 What recreational activities would you like to see more of in Carlsbad?

447	Pickleball, football, soccer.	12/30/2021 11:41 PM
448	No	12/30/2021 11:36 PM
449	Hosting youth baseball tournaments. Additional pickle ball courts.	12/30/2021 11:34 PM
450	Walking trails, Tai Chi	12/30/2021 11:31 PM
451	Soccer, football, pickleball	12/30/2021 11:30 PM
452	Men's softball.	12/30/2021 11:22 PM
453	Swimming lanes available for lap swim	12/30/2021 11:22 PM
454	Pickleballl	12/30/2021 11:13 PM
455	More pickleball courts needed	12/30/2021 11:12 PM
456	See previous	12/30/2021 11:09 PM
457	Pickleball at more locations	12/30/2021 11:08 PM
458	Pickleball	12/30/2021 11:04 PM
459	Public pickleball courst	12/30/2021 11:00 PM
460	Out door Pickleball	12/30/2021 11:00 PM
461	The concerts in the parks used to be fun. Egg hunt, obstacle course, etc. are also great.	12/30/2021 10:57 PM
462	Painting or ceramic classes also offered at all parks not just down at the senior center	12/30/2021 10:56 PM
463	Pickleball courts	12/30/2021 10:46 PM
464	Pickleball and tennis courts. Why are Carlsbad highest tennis courts open to the public and la costa Canyon's are not	12/30/2021 10:33 PM
465	Senior fitness, yoga especially on weekends.	12/30/2021 10:32 PM
466	Pickleball, soccer, football field goal posts	12/30/2021 10:29 PM
467	Off road cycling,	12/30/2021 10:23 PM
468	Pickleball	12/30/2021 10:21 PM
469	N/a	12/30/2021 10:21 PM
470	Well, archery obviously. I'd really love a pride parade once the world calms down a little. I'd also love to have the History of Calrsbad highlighted by making some sort of 3D film or the use of augmented reality.	12/30/2021 10:19 PM
471	Party Bridge	12/30/2021 10:16 PM
472	Groomed nature trails	12/30/2021 10:14 PM
473	Walking trails.	12/30/2021 10:12 PM
474	More activities for small children k-5	12/30/2021 10:12 PM
475	AquaFit at AlgaNorte pool. More classes!!	12/30/2021 10:11 PM
476	I'd like to just have this park. We were told there would be a park when we first moved to our community when my son started kindergarten. He's now 22. I feel this is stuck in planning. Maybe allow for time and money to tweak the plans but prob time to get started.	12/30/2021 10:10 PM
477	Pickleball for all ages. Make tennis courts pickleball friendly.	12/30/2021 10:06 PM
478	swimming	12/30/2021 10:01 PM
479	More gardening, and a way maybe to get more of the community, and maybe those experiencing homelessness, involved in gardening in Carlsbad.	12/30/2021 9:59 PM
480	Motorcycles to be able to use the trail system a couple times a year. Some people are unable to walk but can ride.	12/30/2021 9:57 PM

## Parks & Recreation Master Plan Update

481	Obstacle course integrated into the park, stewardship, drone racing	12/30/2021 9:56 PM
482	Local music in the park. Classical, Pop, rock, tribute, jazz, everything! Opera! Just more of that! Its all ages- and it brings us together - outdoors!	12/30/2021 9:55 PM
483	Since there are more and more pickleball players every day, I'd love to see more outdoor pickleball courts available at city parks	12/30/2021 9:53 PM
484	Ballroom dancing	12/30/2021 9:52 PM
485	Work out sites.	12/30/2021 9:36 PM
486	Disc golf	12/30/2021 9:35 PM
487	Pickleball courts and open plays.	12/30/2021 9:23 PM
488	Bike trails, bike parks, bmx and mountain bike please! Skate parks. Cool climbing features for older kids. Swings for older kids. Outdoor gym machines at parks for teens and adults. Plus pull up bars. Keep teens active and exercising they like parks too! Thank you	12/30/2021 9:23 PM
489	Allow dogs on public beaches one hour prior to sunset until 10 am the following day.	12/30/2021 9:21 PM
490	skate parks	12/30/2021 9:16 PM
491	Playgrounds and a pool.	12/30/2021 9:10 PM
492	Live music & movement—for parents with toddlers & preschoolers, for families who might want to come learn to do yoga or line dancing, or mindfulness, and relaxation exercises, for teens who might want to begin a fitness regimen or learn some new workouts. In other words, introductory styles of activities, where people could try or sample something & possibly continue with whichever fitness or other class, regularly on their own after that.	12/30/2021 9:00 PM
493	Pickleball	12/30/2021 8:56 PM
494	More trails and all connected	12/30/2021 8:52 PM
495	I don't see anything that needs improvement.	12/30/2021 8:52 PM
496	Pickle ball.	12/30/2021 8:44 PM
497	Pickleball	12/30/2021 8:43 PM
498	Kids activities	12/30/2021 8:40 PM
499	Pickleball	12/30/2021 8:39 PM
500	More movies in the park during summer	12/30/2021 8:36 PM
501	Bike parks	12/30/2021 8:35 PM
502	More pickleball courts in the Stagecoach Park area.	12/30/2021 8:35 PM
503	Pickleball	12/30/2021 8:26 PM
504	Pickleball.	12/30/2021 8:26 PM
505	Kids' sports	12/30/2021 8:24 PM
506	Pickleball leagues.	12/30/2021 8:24 PM
507	swimming horseback riding	12/30/2021 8:22 PM
508	Pickleball, trails and playgrounds	12/30/2021 8:20 PM
509	Pickleball	12/30/2021 8:18 PM
510	Nothing I can think of. You do a great job.	12/30/2021 8:18 PM
511	You guessed it. Pickleball.	12/30/2021 8:12 PM
512	Classes for elementary aged kids at expanded times.	12/30/2021 8:12 PM
513	Frisbee golf ultimate frisbee pickleball flag football	12/30/2021 8:11 PM
514	Yoga classes	12/30/2021 8:08 PM

## Q6 What recreational activities would you like to see more of in Carlsbad?

515	Pickleball	12/30/2021 8:06 PM
516	live music events	12/30/2021 7:59 PM
517	Pickleball!!	12/30/2021 7:58 PM
518	Racquetball	12/30/2021 7:55 PM
519	Pickleball. It's fast growing, and too crowded.	12/30/2021 7:53 PM
520	more pickleball	12/30/2021 7:50 PM
521	Rollerblading	12/30/2021 7:50 PM
522	Pickleball courts	12/30/2021 7:48 PM
523	N/A	12/30/2021 7:42 PM
524	8 entertain myself at the beach lol	12/30/2021 7:42 PM
525	Nature discovery treks, more beach related activities.	12/30/2021 7:41 PM
526	Adult classes	12/30/2021 7:33 PM
527	Pickleball courts or multipurpose courts Activities for seniors	12/30/2021 7:33 PM
528	Dogparks.	12/30/2021 7:29 PM
529	More pickleball courts	12/30/2021 7:26 PM
530	Community yoga	12/30/2021 7:24 PM
531	Bike paths, Hiking trails, Pickelball,	12/30/2021 7:15 PM
532	More pickleball courts!!!	12/30/2021 7:12 PM
533	Why are you allowing people to fill this survey out that don't live in the City? It's hard enough to use our parks or find parking when more than 50% come from another city.	12/30/2021 7:10 PM
534	Pickle ball	12/30/2021 7:09 PM
535	Pickleball	12/30/2021 7:08 PM
536	Special-needs friendly activities	12/30/2021 7:05 PM
537	unsure	12/30/2021 6:59 PM
538	Tennis and Pickleball	12/30/2021 6:58 PM
539	I should become more educated before ansswering this. i will go to <a href="http://www.carlsbadparksplan.com">www.carlsbadparksplan.com</a>	12/30/2021 6:57 PM
540	Walks	12/30/2021 6:51 PM
541	Trails of mountain bikes	12/30/2021 6:49 PM
542	can't think of anything	12/30/2021 6:46 PM
543	Tennis and hiking trails	12/30/2021 6:46 PM
544	Volleyball, pickle ball and soccer for adults	12/30/2021 6:44 PM
545	N/a	12/30/2021 6:43 PM
546	Running and hiking groups	12/30/2021 6:40 PM
547	More pickle all courts	12/30/2021 6:37 PM
548	Pickle ball	12/30/2021 6:35 PM
549	More pickle ball courts	12/30/2021 6:34 PM
550	Golf!!! Also, art classes/lessons along with adult dance lessons (most of the dance stuff is for kids now).	12/30/2021 6:34 PM

## Parks & Recreation Master Plan Update

551	Pickleball	12/30/2021 6:30 PM
552	Tennis at Alga Norte Community Park	12/30/2021 6:30 PM
553	More pickleball courts	12/30/2021 6:29 PM
554	Pickleball. Would love to see at least 2 of the tennis courts at Poinsettia converted to full time pickleball courts. Those tennis courts sit vacant most of the time while there are 12+ picklers waiting to play on the 6 congested pickleball courts.	12/30/2021 6:29 PM
555	Mid day, mid week senior activities	12/30/2021 6:28 PM
556	Hiking trails that are much longer than 1 mile round trip. And that are in a wilderness setting.	12/30/2021 6:23 PM
557	More Sr. activities at parks	12/30/2021 6:18 PM
558	Pickleball	12/30/2021 6:15 PM
559	Aquatics	12/30/2021 6:14 PM
560	Pickleball, concerts in the park	12/30/2021 6:13 PM
561	More pickle ball courts and some outdoor racquetball courts	12/30/2021 6:11 PM
562	none	12/30/2021 6:11 PM
563	There is currently a good variety.	12/30/2021 6:11 PM
564	Ramps down to the ocean so a wheelchair can have access	12/30/2021 6:10 PM
565	Outdoor pickleball courts and pickup soccer for adults	12/30/2021 6:09 PM
566	More Pickleball courts. The courts are too full everytime we visit. More courts will be nice	12/30/2021 6:07 PM
567	More swim and bike	12/30/2021 6:04 PM
568	More swimming pools and water features	12/30/2021 6:03 PM
569	More Pickleball courts	12/30/2021 6:00 PM
570	Good now	12/30/2021 6:00 PM
571	More co-ed teams and Ultimate.	12/30/2021 5:58 PM
572	More culturally diverse celebrations - maybe a Dia de Los Muertos event.	12/30/2021 5:57 PM
573	Pickleball and work out equipment stations	12/30/2021 5:53 PM
574	PICLLEBALL	12/30/2021 5:52 PM
575	Musical concerts.	12/30/2021 5:52 PM
576	Pickleball	12/30/2021 5:50 PM
577	Tennis	12/30/2021 5:48 PM
578	pickleball courts	12/30/2021 5:47 PM
579	More pickleball courts.	12/30/2021 5:44 PM
580	Senior walking groups	12/30/2021 5:44 PM
581	Pickleball	12/30/2021 5:43 PM
582	Cadensia park should be dog friendly also an area of beach should be dog friendly.	12/30/2021 5:43 PM
583	Outdoor aerobics for seniors.	12/30/2021 5:42 PM
584	Pickleball tournaments and classes	12/30/2021 5:41 PM
585	dog friendly trails	12/30/2021 5:41 PM
586	Nothing really, pretty good assortment of activities for the community	12/30/2021 5:34 PM
587	Pickleball	12/30/2021 5:34 PM

## Q6 What recreational activities would you like to see more of in Carlsbad?

588	Preschool outdoor play dates	12/30/2021 5:32 PM
589	Gardening	12/30/2021 5:31 PM
590	Outdoor senior exercise classes	12/30/2021 5:30 PM
591	None. We have enough	12/30/2021 5:29 PM
592	Pickleball tourney.	12/30/2021 5:27 PM
593	SAFE parks, trails, etc.	12/30/2021 5:26 PM
594	Again, pickleball	12/30/2021 5:23 PM
595	Pickleball	12/30/2021 5:22 PM
596	I think you do a really good job. Once Covid is over, field trips for seniors would be nice.	12/30/2021 5:18 PM
597	Better security at skate parks.	12/30/2021 5:18 PM
598	Pickleball	12/30/2021 5:17 PM
599	More community gardens, free concerts in parks, a swap/sale venue for residents to sell and buy used items free of commercial sales vendors and without exorbitant seller fees.	12/30/2021 5:16 PM
600	Love TGIF and look forward to it coming back. Thank you for putting it all together! It's one of the many things we love about Carlsbad!	12/30/2021 5:15 PM
601	I live in South Carlsbad. The Senior Center is about 10 miles away - too far to drive very often. You need a recreation center for seniors in South Carlsbad.	12/30/2021 5:13 PM
602	Pickleball, and trails	12/30/2021 5:10 PM
603	Music Youth Volleyball Kids Cooking classes	12/30/2021 5:10 PM
604	I attended the "Pop up" event in the sculpture garden. Bike club?	12/30/2021 5:09 PM
605	Movie nights, sports camps and water play events	12/30/2021 5:08 PM
606	Not sure	12/30/2021 5:05 PM
607	Pickleball	12/30/2021 5:05 PM
608	a pedal court would be nice.	12/30/2021 5:05 PM
609	Pickleball	12/30/2021 5:03 PM
610	More community gardens, please.	12/30/2021 5:03 PM
611	Well-lit nighttime walking paths.	12/30/2021 5:01 PM
612	Basketball, pools, bike trails, pickle ball	12/30/2021 5:00 PM
613	Skateboarding. Mountain biking.	12/30/2021 4:54 PM
614	I'm already satisfied with what you offer.	12/30/2021 4:53 PM
615	Pickleball and pool time.	12/30/2021 4:51 PM
616	More facilities for Carlsbad's rapidly aging demographics due to continually rising high housing costs..	12/30/2021 4:50 PM
617	Outdoor Tai Chi, yoga, and aerobic classes.	12/30/2021 4:49 PM
618	Pickleball	12/30/2021 4:48 PM
619	Beach-oriented and ocean-oriented, senior-oriented	12/30/2021 4:48 PM
620	More open lap and recreation swim, organized trail hikes, pickle ball.	12/30/2021 4:48 PM
621	Dog parks	12/30/2021 4:46 PM
622	Exercise circuits	12/30/2021 4:46 PM
623	Hiking trails	12/30/2021 4:45 PM

## Parks & Recreation Master Plan Update

624	pickle ball	12/30/2021 4:44 PM
625	Larger play areas, green fields, courts... tennis or pickle ball	12/30/2021 4:43 PM
626	Yoga, fitness type classes	12/30/2021 4:41 PM
627	Wall rock climbing sessions.	12/30/2021 4:41 PM
628	Water structures	12/30/2021 4:38 PM
629	Not sure?	12/30/2021 4:38 PM
630	Hand and racket ball	12/30/2021 4:36 PM
631	Nothing— perhaps more grass dog parks	12/30/2021 4:35 PM
632	Simply open space to sit, walk, converse, just "be".	12/30/2021 4:33 PM
633	Putt putt golf, tennis, gardening, first aid certifications, free activities	12/30/2021 4:32 PM
634	Triathlon or running races	12/30/2021 4:31 PM
635	Bocce ball, lawn darts, axe throwing	12/30/2021 4:29 PM
636	Walking and running trails	12/30/2021 4:28 PM
637	I think we are in good shape in this area.	12/30/2021 4:28 PM
638	more protection for bicycle paths (e.g. asphalt curbs, green paint in the bike lane)	12/30/2021 4:27 PM
639	Pickleball, outdoor yoga	12/30/2021 4:25 PM
640	Upgrade and open Monroe pool	12/30/2021 4:25 PM
641	yoga	12/30/2021 4:21 PM
642	Outdoor exercise groups; Outdoor social groups that ate NOT political.	12/30/2021 4:19 PM
643	More poo hours	12/30/2021 4:18 PM
644	Pickleball	12/30/2021 4:17 PM
645	Adult Rec. Water aerobics at Monroe st pool.	12/30/2021 4:17 PM
646	Senior sports	12/30/2021 4:15 PM
647	Additional outside pickleball courts where feasible.	12/30/2021 4:14 PM
648	Pickle ball	12/30/2021 4:13 PM
649	Pickleball	12/30/2021 4:08 PM
650	Pickleball courts, good seating with overhead sun shades	12/30/2021 4:07 PM
651	Pickleball	12/30/2021 4:06 PM
652	I'd like to be able to get a tennis court.	12/30/2021 4:06 PM
653	More activity geared towards adults.	12/30/2021 4:06 PM
654	PICKLEBALL	12/30/2021 4:04 PM
655	More interesting play structures in the parks. Other cities have interactive water pads for the kids to play in and get wet. Balance toys, climbing structures etc.	12/30/2021 4:03 PM
656	More pickleball	12/30/2021 4:00 PM
657	Bocce courts Musical equipment	12/30/2021 4:00 PM
658	Pickleball!	12/30/2021 3:59 PM
659	Things like adult basketball leagues would be great.	12/30/2021 3:58 PM
660	Senior pickle ball	12/30/2021 3:58 PM
661	Pickleball	12/30/2021 3:57 PM

## Q6 What recreational activities would you like to see more of in Carlsbad?

662	Pump Track & Pickleball	12/30/2021 3:57 PM
663	Pickleball	12/30/2021 3:56 PM
664	Pickleball.	12/30/2021 3:56 PM
665	tennis clinics for kids	12/30/2021 3:56 PM
666	Hiking and Track and Field	12/30/2021 3:56 PM
667	Pickleball	12/30/2021 3:56 PM
668	Pickleball	12/30/2021 3:55 PM
669	Pickleball	12/30/2021 3:55 PM
670	More Pickelball courts please	12/30/2021 3:55 PM
671	Extension of Rail Trail south	12/30/2021 3:55 PM
672	Pickleball courts	12/30/2021 3:54 PM
673	Pickleball	12/30/2021 3:53 PM
674	Pickleball	12/30/2021 3:53 PM
675	Pickleball	12/30/2021 3:52 PM
676	Pool availability	12/30/2021 3:52 PM
677	Pickleball courts	12/30/2021 3:52 PM
678	Pickleball	12/30/2021 3:51 PM
679	Expanded pickleball courts and maybe some youth programs.	12/30/2021 3:50 PM
680	Pickleball	12/30/2021 3:49 PM
681	arts and craftes	12/30/2021 3:49 PM
682	It's a pretty good balance of activities. Our family personally like nature & STEM activities the most (not big into sports).	12/30/2021 3:49 PM
683	Mountain Biking, Off leash dog trails	12/30/2021 3:48 PM
684	Pickle ball	12/30/2021 3:48 PM
685	warm water aquatics, deep water running	12/30/2021 3:47 PM
686	Pickleball	12/30/2021 3:46 PM
687	Youth sports And other active youth activities	12/30/2021 3:44 PM
688	Pickleball	12/30/2021 3:44 PM
689	Pickleball courts and ideally hosting camps and tournaments	12/30/2021 3:43 PM
690	hiking, particularly good walkable natural trails like the ones near the lagoons	12/30/2021 3:42 PM
691	NA	12/30/2021 3:42 PM
692	Pickleball	12/30/2021 3:39 PM
693	More pickle ball	12/30/2021 3:39 PM
694	Surfing, swimming, hiking, fishing, tennis, yoga	12/30/2021 3:38 PM
695	Basketball and surf lessons perhaps	12/30/2021 3:37 PM
696	Outdoor exercise class at Poinsettia.	12/30/2021 3:37 PM
697	I believe there are adequate recreational activities in Carlsbad.	12/30/2021 3:36 PM
698	Music events.	12/30/2021 3:35 PM
699	????	12/30/2021 3:35 PM

## Parks & Recreation Master Plan Update

700	Pickleball courts	12/30/2021 3:34 PM
701	Organized hikes and bike rides for kids. Something that doesn't cost a fortune like most of the camps.	12/30/2021 3:34 PM
702	Our family is pretty happy with the activities we have now.	12/30/2021 3:34 PM
703	I think you have a very diverse, well-rounded program.	12/30/2021 3:33 PM
704	All	12/30/2021 3:33 PM
705	Light aerobics, Taiji, qigong, yoga outdoors in shaded area.	12/30/2021 3:31 PM
706	Dancing, yoga	12/30/2021 3:30 PM
707	Longer and more varied walking trails	12/30/2021 3:29 PM
708	The fees are too high	12/30/2021 3:28 PM
709	n/a	12/30/2021 3:27 PM
710	n/a	12/30/2021 3:26 PM
711	Maybe some more hiking areas.	12/30/2021 3:25 PM
712	More leagues or groups to join, particularly for more entry level people who are hoping to learn and meet others.	12/30/2021 3:25 PM
713	Pickleball.	12/30/2021 3:24 PM
714	Pickleball	12/30/2021 3:22 PM
715	city of Carlsbad organized hiking trail exploration ( like they used to have many years ago when I moved here in 2005)	12/30/2021 3:21 PM
716	Pickleball	12/30/2021 3:18 PM
717	Trail running	12/30/2021 3:18 PM
718	Pickleball courts	12/30/2021 3:17 PM
719	Yoga Pilates Not at a senior center please	12/30/2021 3:17 PM
720	Charge less for access to the Alga Norte Swimming facility; Ted type talk show from a Carlsbad resident at the Dove Library How can we all implement "green" activities to lower climate change impact.	12/30/2021 3:16 PM
721	Indoor fitness centers	12/30/2021 3:14 PM
722	trails, pickle ball courts, bathrooms	12/30/2021 3:13 PM
723	Activities for younger kids, preschool and kindergarten age.	12/30/2021 3:12 PM
724	This is a recurring theme... more pickleball!	12/30/2021 3:11 PM
725	open to dogs	12/30/2021 3:09 PM
726	Off-leash time with our dogs. Live music.	12/30/2021 3:09 PM
727	We are Pickleball enthusiasts and a dog walker for our 4 legged friend Lucky.	12/30/2021 3:06 PM
728	Pickleball courts. Playgrounds for families.	12/30/2021 3:05 PM
729	Pickle ball	12/30/2021 3:04 PM
730	Team sports for kids but not in a league or team and not mere training related to skills involved in playing a sport that they will not even know how to play by the end of the class.	12/30/2021 3:04 PM
731	Is the North Bluff Batiquitos trail ever going to connect with the trail on the other side of the freeway? I understand the homeowners don't want to give up their easement, even though it was a condition when they bought the property?	12/30/2021 3:03 PM
732	Pickleball open play and leagues	12/30/2021 3:01 PM

## Q6 What recreational activities would you like to see more of in Carlsbad?

733	more public tennis courts	12/30/2021 3:01 PM
734	Dance classes	12/30/2021 3:01 PM
735	pickelball	12/30/2021 3:00 PM
736	Pickleball and yoga	12/30/2021 3:00 PM
737	Hiking trails.	12/30/2021 2:59 PM
738	pickelball courts	12/30/2021 2:59 PM
739	Pickleball	12/30/2021 2:58 PM
740	More senior outdoor recreational activities. Group walking on the trails	12/30/2021 2:58 PM
741	parkour Dog closed areas	12/30/2021 2:57 PM
742	Mountain biking and hiking	12/30/2021 2:57 PM
743	More outdoor Pickleball courts like Pointsettia	12/30/2021 2:56 PM
744	Basketball courts	12/30/2021 2:56 PM
745	More swimming and open play fields for soccer/football/lacrosse	12/30/2021 2:56 PM
746	More aquatic classes Pickle ball and tennis courts	12/30/2021 2:55 PM
747	More pball & tennis courts : )	12/30/2021 2:55 PM
748	Making sure the walking trails are maintained.	12/30/2021 2:54 PM
749	Pickleball	12/30/2021 2:53 PM
750	Tennis field hockey	12/30/2021 2:53 PM
751	None to offer	12/30/2021 2:53 PM
752	walking trails	12/30/2021 2:52 PM
753	Pickelball	12/30/2021 2:50 PM
754	art	12/30/2021 2:50 PM
755	I'm not from Carlsbad 🙄 but I guess more rock-climbing?	12/30/2021 2:49 PM
756	Pickleball	12/30/2021 2:48 PM
757	Pickle ball	12/30/2021 2:45 PM
758	Pickleball	12/30/2021 2:44 PM
759	Pickleball	12/30/2021 2:44 PM
760	Open lap swim that has lanes available for recreational swimming	12/30/2021 2:44 PM
761	Keep both pools open for full day	12/30/2021 2:44 PM
762	PickleBall!!!!	12/30/2021 2:43 PM
763	Pickleball	12/30/2021 2:42 PM
764	water activities, and all other outdoor groups and classes that help encourage a healthy lifestyle	12/30/2021 2:42 PM
765	Outdoor concerts.	12/30/2021 2:41 PM
766	Pickleball	12/30/2021 2:40 PM
767	In-line hockey rink	12/30/2021 2:39 PM
768	I think there is a very nice variety. It would be nice to have a little bit more for older persons that would encourage them to get outside more.	12/30/2021 2:39 PM
769	Biking. skateboarding. walking trails. volleyball courts. (see Sunset Park) frisbee golf. archery.	12/30/2021 2:39 PM

## Parks & Recreation Master Plan Update

770	Pickleball. CrossFit	12/30/2021 2:38 PM
771	Things for retirees	12/30/2021 2:38 PM
772	Art classes, swimming classes, hiking and walking w classes.	12/30/2021 2:38 PM
773	more outdoor music	12/30/2021 2:36 PM
774	Softball fields, Pickleball courts	12/30/2021 2:35 PM
775	Pickleball, pickleball, pickleball!	12/30/2021 2:35 PM
776	Water polo. Surfing. Skateboarding. Youth triathlon or aquathlon activities Develop the rail trail Youth opportunities to learn about the local wildlife. Invest in the youth because they are the future of our city	12/30/2021 2:35 PM
777	Pickleball	12/30/2021 2:34 PM
778	Outdoor spinning classes	12/30/2021 2:34 PM
779	Dance for seniors	12/30/2021 2:33 PM
780	Off leash dog trails and sandy beach front campsites	12/30/2021 2:32 PM
781	Outdoor Swimming, beach volleyball league	12/30/2021 2:32 PM
782	walking trails.	12/30/2021 2:31 PM
783	Swimming classes	12/30/2021 2:29 PM
784	Pickleball	12/30/2021 2:28 PM
785	Pickle ball courts	12/30/2021 2:28 PM
786	Community Gardening	12/30/2021 2:26 PM
787	Please keep all our tennis courts, and DO NOT under any condition replace any existing tennis courts with pickle ball courts!!! Thank you!!!	12/30/2021 2:26 PM
788	Pickleball tournaments and leagues.	12/30/2021 2:24 PM
789	Pickleball	12/30/2021 2:23 PM
790	More pickleball	12/30/2021 2:23 PM
791	Pickleball	12/30/2021 2:22 PM
792	More pickleball courts. Please look into converting 2 tennis courts at Poinsettia Park to pickleball.	12/30/2021 2:22 PM
793	I'm really happy with the parks. Even though our child is grown, that demographic should continue to come first. Please don't give in to the responses you will no doubt receive from people who think the best use of city parks is a toilet for their dog, Poopsie.	12/30/2021 2:21 PM
794	Hiking trails	12/30/2021 2:21 PM
795	Perhaps a low key walking or cycling group for older people	12/30/2021 2:19 PM
796	We need the Monroe Street Pool open!!!	12/30/2021 2:19 PM
797	Open space parks- where the city wants to allow unnecessary development in the park starved region of south west carlsbad of Ponto	12/30/2021 2:17 PM
798	more trails and parks along the beach and lagoons - better parking for them also	12/30/2021 2:16 PM
799	tai chi, pickleball, exercise	12/30/2021 2:16 PM
800	City staff test	12/30/2021 2:14 PM
801	Pickel ball	12/30/2021 2:14 PM
802	pickleball	12/30/2021 2:13 PM
803	More open lanes for swim at Alga. There are basically no lanes available for those of us who can only swim after work.	12/30/2021 2:11 PM

## Q6 What recreational activities would you like to see more of in Carlsbad?

804	Pickleball	12/30/2021 2:10 PM
805	More Pickleball courts	12/30/2021 2:09 PM
806	Looking forward to trying movie nights and pool nights now that my kids are bigger	12/30/2021 2:09 PM
807	Hiking group, cycling group, or adult exercises group, Asian culture/ activists group, foreign language study, dance/ drama/music/ cooking/art class	12/30/2021 2:09 PM
808	Walking group	12/30/2021 2:08 PM
809	more beginning rec leagues	12/30/2021 2:08 PM
810	All good at this time	12/30/2021 2:08 PM
811	More water aerobics	12/30/2021 2:07 PM
812	Pickleball!!	12/30/2021 2:06 PM
813	See A.4	12/30/2021 2:05 PM
814	Bicycle racks, more parking for downtown activities	12/30/2021 2:05 PM
815	Outdoor pickleball tournaments and senior pickleball leagues.	12/30/2021 2:05 PM
816	Swimming, horseshoes	12/30/2021 2:04 PM
817	Following the rules of the garden plots!	12/30/2021 2:01 PM
818	None	12/30/2021 2:01 PM
819	Holiday races. Would love a 4th of July 5k!	12/30/2021 2:01 PM
820	Swimming and water polo	12/30/2021 2:01 PM
821	None	12/30/2021 2:00 PM
822	N/A	12/30/2021 2:00 PM
823	Activities bringing children and seniors together.	12/30/2021 2:00 PM
824	Pickleball and volleyball	12/30/2021 1:59 PM
825	More pickleball courts. There are only 2 challenge/advance courts and draws a bit of tension between players, while the social courts have 4 dedicated.	12/30/2021 1:58 PM
826	Additional level, smooth surfaced and fairly straight paths for fitness rollerblading/inline skating.	12/30/2021 1:58 PM
827	Pickleball	12/30/2021 1:57 PM
828	Pickle ball courts	12/30/2021 1:57 PM
829	Places at the parks to do weights and stretched	12/30/2021 1:57 PM
830	Pickle ball courts	12/30/2021 1:57 PM
831	Pickleball	12/30/2021 1:56 PM
832	Dog Parks	12/30/2021 1:56 PM
833	Beginner pickleball	12/30/2021 1:56 PM
834	Anything outdoors	12/30/2021 1:55 PM
835	Bike parks with tracks to ride on	12/30/2021 1:53 PM
836	take back the triathlon	12/30/2021 1:53 PM
837	Pickleball	12/30/2021 1:52 PM
838	Pickleball for sure. If you go to pointsettia during the week it is always packed all day!	12/30/2021 1:52 PM
839	Dedicated bike trails ( not mountain bike)	12/30/2021 1:52 PM

## Parks & Recreation Master Plan Update

840	Community events, concerts, chalk art days, 4th of July party etc	12/30/2021 1:51 PM
841	As I said, our parks are pitifully lacking in interesting and updated play structures. They are minimal and lacking in diverse strength and fun activities. I can share examples of what is offered in Missouri and Minnesota to name a few.	12/30/2021 1:51 PM
842	Places to ride off-road motorcycles	12/30/2021 1:50 PM
843	Not sure. 🤔	12/30/2021 1:49 PM
844	Park benches, streams, QUIET SURROUNDING WHERE NATURE IS PREVAILING.	12/30/2021 1:49 PM
845	More holiday events.	12/30/2021 1:48 PM
846	Finding or creating a nice long, uninterrupted beach walk. Seems all our beaches accommodate short walks and then beach runs out or some lagoon pops up and you can no longer walk the beach, have to turn around. I'd like to see a five mile stretch of walkable beach like on the east coast, possibly with boardwalk running alongside like up in Cambria on the coast where the elephant seals lay. More opportunities to view our natural wildlife, perhaps a preserve where you can walk on top of the lagoon or lake water and see the wildlife, take pictures, but jetting into the water rather than just walking a trail like batiquitos. How about more language classes?	12/30/2021 1:48 PM
847	Pickleball	12/30/2021 1:47 PM
848	Slopestyle race course, bmx track, bmx pump track, electric motocross track, bmx dirt jump park	12/30/2021 1:46 PM
849	Obviously, the Monroe street pool opened back up during the day.	12/30/2021 1:44 PM
850	Group fitness classes for adults.	12/30/2021 1:44 PM
851	Track and Field, specifically a running or jogging track.	12/30/2021 1:43 PM
852	More pools and upgrades to older ones	12/30/2021 1:43 PM
853	Park clean-up, trail maintenance events that are fun and would give the residents more of a sense of ownership in the parks...	12/30/2021 1:43 PM
854	Tai chi	12/30/2021 1:40 PM
855	Frisbee/disc golf!	12/30/2021 1:40 PM
856	Volleyball, pickle ball,	12/30/2021 1:40 PM
857	Gardening	12/30/2021 1:39 PM
858	Youth golf!	12/30/2021 1:39 PM
859	running and walking groups every quarter	12/30/2021 1:39 PM
860	Zumba classes, Tai-chi, Tennis	12/30/2021 1:39 PM
861	beach events	12/30/2021 1:38 PM
862	More walking paths. Ebikes must be prohibited with actual enforcement.	12/30/2021 1:37 PM
863	Walking groups	12/30/2021 1:36 PM
864	Walking groups by interests	12/30/2021 1:35 PM
865	Swimming	12/30/2021 1:35 PM
866	Entertainment venues	12/30/2021 1:35 PM
867	fitness for seniors	12/30/2021 1:33 PM
868	cycling trails, safe ones	12/30/2021 1:33 PM
869	Roller rink and aquatic center in south Carlsbad.	12/30/2021 1:33 PM
870	See previous answer	12/30/2021 1:33 PM
871	Support of live CSUSM Osher classes within Carlsbad. Longer pool hours at Monroe Street	12/30/2021 1:33 PM

## Q6 What recreational activities would you like to see more of in Carlsbad?

	Pool.	
872	More pickleball courts around the city	12/30/2021 1:33 PM
873	Additional outdoor pickleball courts at existing facilities and new pickleball courts at places like La Costa Canyon and other parks in the south eastern part of the city.	12/30/2021 1:33 PM
874	Pickle ball courts	12/30/2021 1:32 PM
875	Organized play for seniors	12/30/2021 1:32 PM
876	Pickle ball	12/30/2021 1:31 PM
877	Swimming pool in Poinsettia Park. Not dog parks	12/30/2021 1:31 PM
878	Senior Citizens taking part in utilizing the parks and recreations	12/30/2021 1:31 PM
879	Swimming and pool access	12/30/2021 1:30 PM
880	Legal bike trails for both mountain biking and bmx style biking	12/30/2021 1:30 PM
881	Flag Football	12/30/2021 1:30 PM
882	Beach competitions.	12/30/2021 1:29 PM
883	running groups	12/30/2021 1:28 PM
884	I can't think of any. Thanks.	12/30/2021 1:28 PM
885	Hiking	12/30/2021 1:28 PM
886	Gardening	12/30/2021 1:27 PM
887	I always like as many hiking trails as possible	12/30/2021 1:27 PM
888	Swimming, pickle ball, yoga.	12/30/2021 1:26 PM
889	yoga, triathlon, running, festivals	12/30/2021 1:25 PM
890	Martial Arts and Pickleball	12/30/2021 1:25 PM
891	La Cross and Pickleball	12/30/2021 1:24 PM
892	Not sure.	12/30/2021 1:24 PM
893	Pickleball	12/30/2021 1:23 PM
894	Designated bike trails	12/30/2021 1:23 PM
895	Previously mentioned.	12/30/2021 1:23 PM
896	None	12/30/2021 1:22 PM
897	N/A	12/30/2021 1:22 PM
898	Volleyball area	12/30/2021 1:22 PM
899	More lap swimming availability at Monroe Street Pool.	12/30/2021 1:22 PM
900	PONTO PARK! Veterans park plan sucks	12/30/2021 1:21 PM
901	n/a	12/30/2021 1:19 PM
902	Tennis and swimming	12/30/2021 1:19 PM
903	Movies, music, group exercises	12/30/2021 1:19 PM
904	Morning Lap swimming back at Monroe Pool!	12/30/2021 1:19 PM
905	Pickleball	12/30/2021 1:18 PM
906	N/A	12/30/2021 1:18 PM
907	interconnected off road bike trails and routes	12/30/2021 1:16 PM
908	I think the city has ample rec activities for all ages	12/30/2021 1:15 PM

## Parks & Recreation Master Plan Update

909	None. I feel there are plenty already. A city of Carlsbads' size cannot please everyone .Focus on the quality of life and improve streets and roads with much better access.	12/30/2021 1:14 PM
910	Pickleball	12/30/2021 1:13 PM
911	Dancing and other activities with people over 50 in mind	12/30/2021 1:13 PM
912	Pickle ball on versatile courts that can accommodate tennis or pickle ball	12/30/2021 1:12 PM
913	Another pool at Alga Norte park	12/30/2021 1:11 PM
914	Pickleball (more courts, groups to meet players of same skill level), walking and hiking groups in order to meet more people of your own skill level	12/30/2021 1:11 PM
915	Pickle ball	12/30/2021 1:11 PM
916	Pickle ball	12/30/2021 1:10 PM
917	Not sure at the moment	12/30/2021 1:10 PM
918	Fitness classes	12/30/2021 1:10 PM
919	Not sure	12/30/2021 1:09 PM
920	More pickleball courts and don't charge seniors to pay	12/30/2021 1:07 PM
921	Keep thinking of ways to link all the trails and make them known and easy to use. More opportunities for fishing	12/30/2021 1:07 PM
922	More swimming opportunities for the general public in the afternoons and early evenings. NCA occupies 19 out of 20 lanes at Alga Norte every single weekday after 3pm? What about all the other citizens of this city? Are we all to share one lane? It's ridiculous.	12/30/2021 1:07 PM
923	Dancing - Bring culture to the community.	12/30/2021 1:06 PM
924	I think most things are well covered	12/30/2021 1:06 PM
925	Free concerts in the park.	12/30/2021 1:05 PM
926	Whatever young folks want most, we just like to walk our dogs	12/30/2021 1:05 PM
927	Tennis, Swimming	12/30/2021 1:05 PM
928	I've heard pickleball is really fun! Don't know if Carlsbad has facilities.	12/30/2021 1:05 PM
929	More bike trails made of dirt. Being able to walk/bike around agua hedionda (AH), need ti make a trail from AH to beach - it's time. Connect all trails to/from agua hedionda from the north side.	12/30/2021 1:05 PM
930	Beach volleyball, pickleball, water polo, disc golf.	12/30/2021 1:05 PM
931	Carlsbad has very good offerings	12/30/2021 1:04 PM
932	Ability to take my dog to ANY park not just specific off leash parks. Being leashed is not a problem, but we should be allowed to enjoy ANY park.	12/30/2021 1:04 PM
933	Improved access to swimming to non school and club fitness	12/30/2021 1:04 PM
934	I think Carlsbad has wonderful opportunities for recreational activities with the exception of family and multi-generational activities.	12/30/2021 1:04 PM
935	Skateboarding	12/30/2021 1:03 PM
936	Keep Monroe street pool open every day	12/30/2021 1:03 PM
937	Tennis and pickle ball	12/30/2021 1:02 PM
938	Swimming and water polo	12/30/2021 1:02 PM
939	Dance	12/30/2021 1:01 PM
940	The current and proposed plans are so predictable they are simply boring. You can learn much from European designs and park-dependent cities like NYC.	12/30/2021 1:01 PM

## Q6 What recreational activities would you like to see more of in Carlsbad?

941	Inclusive teams and 1st time players of all ages	12/30/2021 12:59 PM
942	Running events	12/30/2021 12:59 PM
943	adult flag football leagues	12/30/2021 12:59 PM
944	More swimming hours	12/30/2021 12:58 PM
945	Lap swim pools and more parks for kids	12/30/2021 12:58 PM
946	Skateboarding options (like Leucadia/Encinitas includes in all park designs...see new park on Olympus & across from Leucadia donuts) Mountain Bike trails!!	12/30/2021 12:58 PM
947	I love to hike and also places to take my dogs on and off leash.	12/30/2021 12:57 PM
948	Open pool hours.	12/30/2021 12:57 PM
949	walking paths in the park on Faraday and Cannon -park coming soon?	12/30/2021 12:57 PM
950	We enjoy tennis, pickle ball, dance, yoga, meditation, and outdoor entertainment with musicians from a variety of genres. Movies in the park would also be welcome. Also, it would be great to encourage more community-focussed festivals, art or craft shows, car shows, and other similar opportunities. We participated and really enjoyed the Taste of Carlsbad that took place earlier this year. While that didn't occur in a park, those kinds of activities would be welcome in public spaces. Again, I would also encourage thinking about "unprogrammed" spaces, such as piazzas and other areas where people can enjoy being outside and sharing coffee or food, without having to participate in a "recreational activity." Please review the park planning ideas from Gil Penalosa called "8 to 80" which refers to planning park spaces that can be enjoyed by multiple generations. I would add to that the concept of designing spaces with access to promote equity and inclusion. What better way for community members from all walks of life to come together than by enjoying outdoor venues with food, entertainment, and quiet people-watching opportunities! Since this appears to be my last box in which to type, I would also add that it would also be welcome for those thinking about park design to consider spaces for sculpture, trees and flowers that promote an enjoyable experience, perhaps botanical gardens, and other items that have been overlooked as park design in more recent times has been focuseed on "recreational activities" such as single-use sports fields. The City of San Diego has many joint-use parks for athletic teams to access. Why not design our parks for use by the broader community and create pleasant, outdoor spaces that can be more equitably used by all of us?	12/30/2021 12:57 PM
951	Pickleball	12/30/2021 12:56 PM
952	Long course lap swim and more gentle yoga for 55+ that still work and pay taxes!	12/30/2021 12:56 PM
953	hiking	12/30/2021 12:56 PM
954	More widely available fitness trails, with equipment to exercise/etc all muscle groups.	12/30/2021 12:56 PM
955	It is a shame that Carlsbad does not have a championship level Disc Golf course. A round is started every 1.6 seconds in the US. The city of Charlotte NC has 17 courses in its city limits. It would cost 0.5% of the cost of The Crossings and benefits the entire demographic of Carlsbad, not just those that can afford greens fees. In 2020, 3.5 courses per day were installed worldwide. Please Carlsbad, wake up to Disc Golf! Contact the San Diego Aces Disc Golf club to discuss.	12/30/2021 12:56 PM
956	Pickleball of course	12/30/2021 12:55 PM
957	More places to bike, and roller blade that are off the public streets.	12/30/2021 12:55 PM
958	Masters Swim - Long Course set up	12/30/2021 12:54 PM
959	Concerts in the park	12/30/2021 12:54 PM
960	Water sports	12/30/2021 12:54 PM
961	Swimming laps	12/30/2021 12:53 PM
962	Movie night	12/30/2021 12:53 PM
963	Carlsbad offers a lot. I can't think of anything else!	12/30/2021 12:53 PM
964	See previous.	12/30/2021 12:53 PM

## Parks & Recreation Master Plan Update

965	More swimming hours and options, more mid-day choices for yoga, etc. not a fan of evening classes.	12/30/2021 12:53 PM
966	Hiking.	12/30/2021 12:53 PM
967	Activities geared for older or disabled people that are not held in the one senior center building downtown. It can easily take me 30 minutes to get there.	12/30/2021 12:53 PM
968	Music	12/30/2021 12:52 PM
969	pickleball :)	12/30/2021 12:52 PM
970	Plant more trees. Rubber and concrete are not parks. Deal with the homeless, and the signs of crime.	12/30/2021 12:52 PM
971	Summer concerts in the park! Any family events.	12/30/2021 12:52 PM
972	More pool space	12/30/2021 12:51 PM
973	fitness classes	12/30/2021 12:51 PM
974	Natural areas that are accessible for everyone	12/30/2021 12:51 PM
975	Tennis, pickleball	12/30/2021 12:50 PM
976	water safety/ awareness- classes in small boating, sailing or kayaks in the Agua Hedionda Lagoon for kids and adults. Perhaps a multigenerational class with parents and child	12/30/2021 12:49 PM
977	More pools	12/30/2021 12:48 PM
978	Bike tracks for kids. A skate park in the northern section of Carlsbad. More bike-centric streets with clear and frequent East-west paths of travel.	12/30/2021 12:48 PM
979	level walking paths	12/30/2021 12:48 PM
980	If you study participation at community centers, hiking trails, nature centers, parks, etc. it is very low. We have too many recreational opportunities already.	12/30/2021 12:48 PM
981	Out door bowling for Seniors or volley ball	12/30/2021 12:48 PM
982	DOGS ALLOWED	12/30/2021 12:47 PM
983	Pump track	12/30/2021 12:47 PM
984	Bike park	12/30/2021 12:47 PM
985	Pickleball-PLEASE	12/30/2021 12:46 PM
986	Pickleball and swimming.	12/30/2021 12:46 PM
987	More walking trails in the open spaces (not in the parks, or next to major streets.)	12/30/2021 12:45 PM
988	Softball	12/30/2021 12:45 PM
989	Waking groups, tennis groups	12/30/2021 12:44 PM
990	I am not qualified to answer because of my age	12/30/2021 12:44 PM
991	Things that include dogs. All parks should allow dogs on a leash. Dog beach needed as well. We allow dogs in restaurants but not in parks or the beach.	12/30/2021 12:44 PM
992	Pickleball courts	12/30/2021 12:44 PM
993	Art classes, more seminars at the Senior Center	12/30/2021 12:44 PM
994	Aquatic activities, walking trails	12/30/2021 12:43 PM
995	Need more field space	12/30/2021 12:43 PM
996	Birdwatching if possible	12/30/2021 12:43 PM
997	I do enjoy the concerts.	12/30/2021 12:43 PM
998	Adult swim times	12/30/2021 12:43 PM

## Q6 What recreational activities would you like to see more of in Carlsbad?

999	None that I can think of.	12/30/2021 12:42 PM
1000	More martial arts for kids (4-7 years) Parents night or day out	12/30/2021 12:42 PM
1001	Splash pads and water activities for children	12/30/2021 12:42 PM
1002	More dog and skateboard parks	12/30/2021 12:42 PM
1003	Movies and plays	12/30/2021 12:41 PM
1004	MOOUNTAIN BIKING!!!	12/30/2021 12:39 PM
1005	Keeping Carlsbad green and educating all on recycling/upcycling opportunities so we can all be aware and do our part.	12/30/2021 12:39 PM
1006	I'm fine with what is available	12/30/2021 12:39 PM
1007	Theater presentations in the park; family movies	12/30/2021 12:39 PM
1008	Pickleball courts outside at more parks	12/30/2021 12:38 PM
1009	Hiking trails, natural areas for walking	12/30/2021 12:38 PM
1010	Safer streets for bicycle use. Encourage biking	12/30/2021 12:38 PM
1011	biking (more bike lanes)	12/30/2021 12:38 PM
1012	Fitness and passive walking /running areas. Many trails but not suitable for disabled or seniors.	12/30/2021 12:38 PM
1013	Kids (age 2-3) baseball, mom groups, parents of young kids groups	12/30/2021 12:38 PM
1014	Fitness areas and more clubs or facilities that off group exercise	12/30/2021 12:38 PM
1015	Perhaps fitness challenge events that are more than just running. Could be combination of running, climbing, jumping, etc.	12/30/2021 12:38 PM
1016	better lap swimming lane availability compatible with the working person's schedule	12/30/2021 12:38 PM
1017	Since I live pretty far away, I wouldn't be likely to participate in more rec activities. But maybe bridge games?	12/30/2021 12:38 PM
1018	Outdoor exercising	12/30/2021 12:38 PM
1019	Frisbee	12/30/2021 12:37 PM
1020	Trails. Open space Butterflies and nature	12/30/2021 12:37 PM
1021	I think we're very diverse community and the community itself pulls in everything that's needed.	12/30/2021 12:37 PM
1022	Pickle ball and beach volleyball courts	12/30/2021 12:37 PM
1023	Hiking	12/30/2021 12:37 PM
1024	PICKLEBALL!!!!	12/30/2021 12:36 PM
1025	aerobic classes!	12/30/2021 12:36 PM
1026	Affordable Youth sports programs at schools Additional sports youth programs after school & During school holiday breaks	12/30/2021 12:36 PM
1027	Swimming lessons	12/30/2021 12:36 PM
1028	I think the City has done a good job in activities. Parking at Poinsettia on Friday night Football games is a problem. Speeding cars on Turnstone and unsupervised children walking into the streets between cars in the dark.	12/30/2021 12:36 PM
1029	kids soccer	12/30/2021 12:35 PM
1030	Safe road biking.	12/30/2021 12:35 PM
1031	Pickle ball	12/30/2021 12:35 PM

## Parks & Recreation Master Plan Update

1032	N/A	12/30/2021 12:35 PM
1033	Love this city	12/30/2021 12:34 PM
1034	MTB parks	12/30/2021 12:33 PM
1035	Bike parks. Pickleball courts.	12/30/2021 12:33 PM
1036	Pickleball	12/30/2021 12:33 PM
1037	N/a	12/30/2021 12:33 PM
1038	Picked ball	12/30/2021 12:33 PM
1039	Mountain Biking	12/30/2021 12:33 PM
1040	Dedicated multi-use paths without cars. Open all public school outdoor recreation areas for public use during non-school hours and on weekends.	12/30/2021 12:33 PM
1041	Outdoor yoga classes	12/30/2021 12:32 PM
1042	More bike trails, multi use trails, bike parks, bicycle infrastructure and safe bike lanes throughout the city.	12/30/2021 12:32 PM
1043	More easy bike locking in congested areas	12/30/2021 12:32 PM
1044	Kid programs and multi age sport courts	12/30/2021 12:32 PM
1045	Open trails for walks/hikes	12/30/2021 12:32 PM
1046	Alcohol available	12/30/2021 12:31 PM
1047	Music, art	12/30/2021 12:31 PM
1048	More dog parks	12/30/2021 12:31 PM
1049	Same as #4	12/30/2021 12:31 PM
1050	Skate park. Dog park	12/30/2021 12:31 PM
1051	Anything will be good.	12/30/2021 12:31 PM
1052	More bike lanes	12/30/2021 12:30 PM
1053	evening activities	12/30/2021 12:30 PM
1054	Re the South side of Park Drive, from the Tennis Courts at Kelly to the 4700 block of Park Drive a pedestrian path on that undeveloped side of the street would be wonderful. Couldn't it just be leveled and coated with crushed granite?	12/30/2021 12:30 PM
1055	Running track	12/30/2021 12:30 PM
1056	Group hikes	12/30/2021 12:30 PM
1057	Outdoor yoga, outdoor Pilates with equipment included.	12/30/2021 12:30 PM
1058	volleyball, lacrosse, drawing and painting classes, trail running	12/30/2021 12:30 PM
1059	bocce ball	12/30/2021 12:29 PM
1060	Non-team sports such as running and cycling groups, but also frisbee golf.	12/30/2021 12:29 PM
1061	pickle ball	12/30/2021 12:29 PM
1062	Pickleball	12/30/2021 12:28 PM
1063	Guided nature walks.	12/30/2021 12:28 PM
1064	Biking, mountain biking trails and bike park access	12/30/2021 12:27 PM
1065	Bike park	12/30/2021 12:27 PM
1066	Skate park in 92008	12/30/2021 12:27 PM
1067	Senior Tennis Clubs for all levels.	12/30/2021 12:27 PM

## Q6 What recreational activities would you like to see more of in Carlsbad?

1068	Soap box derby!!!	12/30/2021 12:26 PM
1069	outdoor concerts, community pot lucks, block parties	12/30/2021 12:26 PM
1070	Football, running, swimming	12/30/2021 12:26 PM
1071	Water polo, soccer, ultimate frisbee	12/30/2021 12:26 PM
1072	Pickleball.	12/30/2021 12:25 PM
1073	Track and field	12/30/2021 12:25 PM
1074	More hiking areas	12/30/2021 12:25 PM
1075	Cycling	12/30/2021 12:25 PM
1076	Safer, off road bike paths, connected walking trails	12/30/2021 12:25 PM
1077	I can't think of any at this time.	12/30/2021 12:25 PM
1078	Frisbee golf	12/30/2021 12:25 PM
1079	areas where children can use their imagination > create play vs. organized teams	12/30/2021 12:25 PM
1080	Yoga class or exercise classes besides water aerobics for seniors at the Alga Norte Swim Complex	12/30/2021 12:25 PM
1081	Kendo	12/30/2021 12:24 PM
1082	fitness classes - 55+ good workout center	12/30/2021 12:24 PM
1083	skateboarding park at Poinsettia park	12/30/2021 12:24 PM
1084	pickleball	12/30/2021 10:26 AM

# City of Carlsbad California 2023 - 2030

APPENDIX O -  
FEEDBACK GATHERED  
FROM PEOPLE WITH  
PHYSICAL DISABILITIES

## Parks & Recreation Master Plan Update

### Feedback gathered from people with physical disabilities

February 2022

The project team gathered feedback from community members with physical disabilities to learn more about their needs and priorities.

Information was gathered through several channels including:

- Sending a survey to a list of attendees who participated in a previous study about how to improve Carlsbad beach accessibility. Staff contacted individuals by email first and requested their participation in the survey.
- Sending the same survey to teachers in Carlsbad Unified School District who serve individuals with physical disabilities and asking them to share the survey with the students' parents. Staff was available to assist with the survey by phone, provide the survey in an alternative format, and in Spanish.
- In person by visiting clinics that serve people with physical disabilities to request their participation.

### Survey responses

#### **Number of survey participants: 5**

Do you visit City of Carlsbad's parks?

Yes, all the time – 60% (3 respondents)

Yes, occasionally – 20% (1 respondent)

No – 20% (1 respondent)

#### **What would make going to city parks even better?**

- Fewer homeless people sleeping around play structures
- More items for older Elementary kids

#### **What do you enjoy most about going to city parks?**

- The seesaw provides opportunities for collaborative play.
- Accommodates up to four kids at once.
- Fitness Course for older Elementary.
- Trees, open spaces, sense of community

#### **In your experience, what amenities would make city parks more accessible?**

- If there were more areas of shade.
- More equipment for 3-5th grade
- Communication boards posted near the play structures for non-verbal/low verbal kids.

**What is the main reason you don't visit city parks?**

- Newly arrived

**What specific sports leagues, fitness classes, special interest classes and camps would interest you and members of your household?**

- If a disability makes it harder for a child to join in on the playground
- If space is only equipped with slides and swings that aren't geared toward children with disabilities, it's unlikely they or their parents will spend much time there.
- Swimming, kayaking, surfing, boogieboarding
- Swim lessons, lap swim

**What recreational activities would you like to see more of in Carlsbad? What recreational activity helps kids with disabilities?**

- Creative hobbies with defined goals (such as sports or art projects) can provide individuals with disabilities with the opportunity to self-actualize and feel accomplished at the completion of a task. They also foster creative expression, self-esteem, and, in group settings, encourage inclusive environments where children can feel that they belong. This is especially true in settings where art therapy is practiced, as these programs are led by trained professionals, helping participants express themselves, resolve potential conflict, and increase communication.
- Increase lap swim hours at Monroe Street Pool

[Informal information gathering](#)

These comments were gathered from informal conversations with parents, teachers and teacher aids:

- For many people who work with individuals with disabilities, the daily walk involves going to a local park and exposing them to a variety of stimuli, exercising with them, use the playground to improve coordination skills, etc.
- Playgrounds have limited choices for kids with physical disabilities. Older kids can't use the swings because they don't have safety features.
- It would be fantastic if the city rented or offered beach wheelchairs to access the ocean, like they do in Oceanside. Those wheelchairs have wide, large wheels that make it easy to push someone with mobility issues to the water and enjoy the ocean.
- Offer more programs for the neurodiverse/differently abled population.
