# Executive Summary

# City of Carlsbad Parks and Recreation Needs Assessment Survey – Executive Summary

## PURPOSE

ETC Institute conducted a parks and recreation needs assessment survey for the City of Carlsbad during the summer of 2022. The survey was conducted as part of the Parks and Recreation Master Plan that will guide future improvements to facilities, programs, and services.

## METHODOLOGY

The six-page survey, cover letter and postage-paid return envelope were mailed to a random sample of households in Carlsbad. The cover letter explained the purpose of the survey and encouraged residents to either return their survey by mail or complete the survey online. Ten days after the surveys were mailed, ETC Institute sent emails and text messages to the households that received the survey to encourage participation. The emails and texts contained a link to the online version of the survey to make it easy for residents to complete the survey.

The goal was to obtain completed surveys from at least 375 residents. This goal was met, with a total of 400 households completing the survey. The results for the sample of 400 households have a 95% level of confidence with a precision rate of at least +/- 4.9%.

This report contains the following:

- An executive summary of the methodology for administering the survey and major findings
- Charts showing the overall results of the survey (Section 1)
- Priority Investment Rating (PIR) that identifies priorities for facilities and activities (Section 2)
- Benchmarking analysis comparing Carlsbad's results to national results (Section 3)
- Tabular data showing the overall results for all questions on the survey (Section 4)
- A copy of the survey instrument (Section 5)

The percentage of “don't know” or “not provided” responses has been excluded from many of the graphs shown in this report to facilitate valid comparisons of the results from Carlsbad with the results from other communities where ETC Institute has conducted a community interest and opinion survey. Since the number of “don't know”/“not provided” responses often reflects the utilization and awareness of services, the percentage of those responses has been provided in the tabular data section of this report. When the “don't know”/“not provided” responses have been excluded, the text of this report will indicate that the responses have been excluded with either the phrase “*who had an opinion*” or “*who provided a response.*”

# City of Carlsbad Parks and Recreation Needs Assessment Survey – Executive Summary

## USAGE AND RATINGS OF/PARKS AND FACILITIES

Eighty-five percent (85%) of households surveyed indicated their household visited City of Carlsbad parks, recreation facilities or sports fields during the year prior to the start of the COVID-19 pandemic. Of those who had visited parks or facilities, 41% who provided a response indicated they did so 2 times per week or more; 22% visited once per week, 21% visited 1 to 3 times per month, and 17% visited parks or facilities less than once per month.

Overall, 38% of respondents who visited parks or facilities in the year prior to COVID-19 and who had an opinion rated the physical condition as “excellent;” 55% rated the parks and facilities as “good,” 6% gave a rating of “fair,” and only 1% of those who visited parks or facilities rated the physical condition as “poor.”

## REASONS PREVENTING HOUSEHOLDS FROM USING PARKS/FACILITIES MORE OFTEN

Eighteen percent (18%) of respondents indicated the lack of desired features prevented them from using City parks, recreation facilities, or sports fields more often. Other reasons include: lack of restrooms (11%), no feeling of safety when using parks (11%), lack of awareness of parks locations (11%), and use of parks in other cities (10%).

## SOURCES OF INFORMATION ABOUT FACILITIES, PROGRAMS AND ACTIVITIES

Fifty-three percent (53%) of respondents indicated they learn about Carlsbad parks and recreation facilities, programs and activities through friends and neighbors. Other sources of information include: City website (47%), City community services guide (41%), emails (35%), temporary signs at parks or around the City (26%), and e-newsletter (19%).

Based on the sum of respondents’ top three choices, the *most preferred* methods of communicating about facilities, programs and activities were: 1) emails, 2) City website, and 3) City community services guide.

## PARTICIPATION IN/RATINGS OF PARKS AND RECREATION PROGRAMS

Thirty-six percent (36%) of households surveyed indicated their household participated in programs offered by the City of Carlsbad Parks and Recreation Department during the year prior to the start of the COVID-19 pandemic. Of those who had participated in programs, 19% who provided a response indicated they participated in 4 programs or more; 40% participated in 2 to 3 programs, and 41% participated in one program.

Forty-three percent (43%) of respondents who participated in programs in the year prior to COVID-19 and who had an opinion rated the quality as “excellent;” 53% rated the quality of programs as “good,” and only 4% gave a rating of “fair.”

# City of Carlsbad Parks and Recreation Needs Assessment Survey – Executive Summary

## REASONS PREVENTING HOUSEHOLDS FROM PARTICIPATING IN PROGRAMS MORE OFTEN

Thirty-four percent (34%) of respondents indicated the lack of knowledge of available programs prevented them from participating more often. Other reasons include: too busy/not interested (25%), program times are not convenient (15%), use programs of other agencies (10%), program not offered (10%), and fees are too high (9%).

## SATISFACTION WITH VALUE RECEIVED FROM CARLSBAD PARKS AND RECREATION

Twenty-two percent (22%) of respondents who had an opinion were “very satisfied” with the overall value received from the City of Carlsbad Parks and Recreation Department; 48% were “satisfied,” 22% were “neutral,” and 7% were either “dissatisfied” or “very dissatisfied.”

## PERCEPTION OF THE VALUE OF PARKS AND RECREATION SINCE COVID-19

Respondents were asked how their perception of the value of parks and recreation has changed since COVID-19. Twenty-eight percent (28%) who had an opinion believe the value has “increased;” 17% feel the value has “somewhat increased,” 48% believe there has been no change, and 7% believe the value of parks and recreation has decreased since COVID-19.

## PRIORITIES FOR PARKS AND RECREATION DEPARTMENT

Respondents were asked how they would like to see the City place greater emphasis on parks and recreation projects, programs, and services. Sixty percent (60%) who had an opinion prefer to increase funding; 38% prefer to maintain existing funding, and only 2% indicated they prefer the City to reduce funding for parks and recreation project, programs, and services.

## PARK FACILITY NEEDS AND PRIORITIES

**Park Facility Needs:** Respondents were asked to identify if their household had a need for 22 park facilities and rate how well their needs for each were currently being met. Based on this analysis, ETC Institute was able to estimate the number of households in the community that had the greatest “unmet” need for various facilities.

The four park facilities with the highest percentage of households that indicated a need for the facility were: community parks (77%), neighborhood parks (75%), family picnic areas (56%), and outdoor swimming pools (48%). When ETC Institute analyzed the needs in the community, these same four facilities had a need that affected more than 20,000 households.

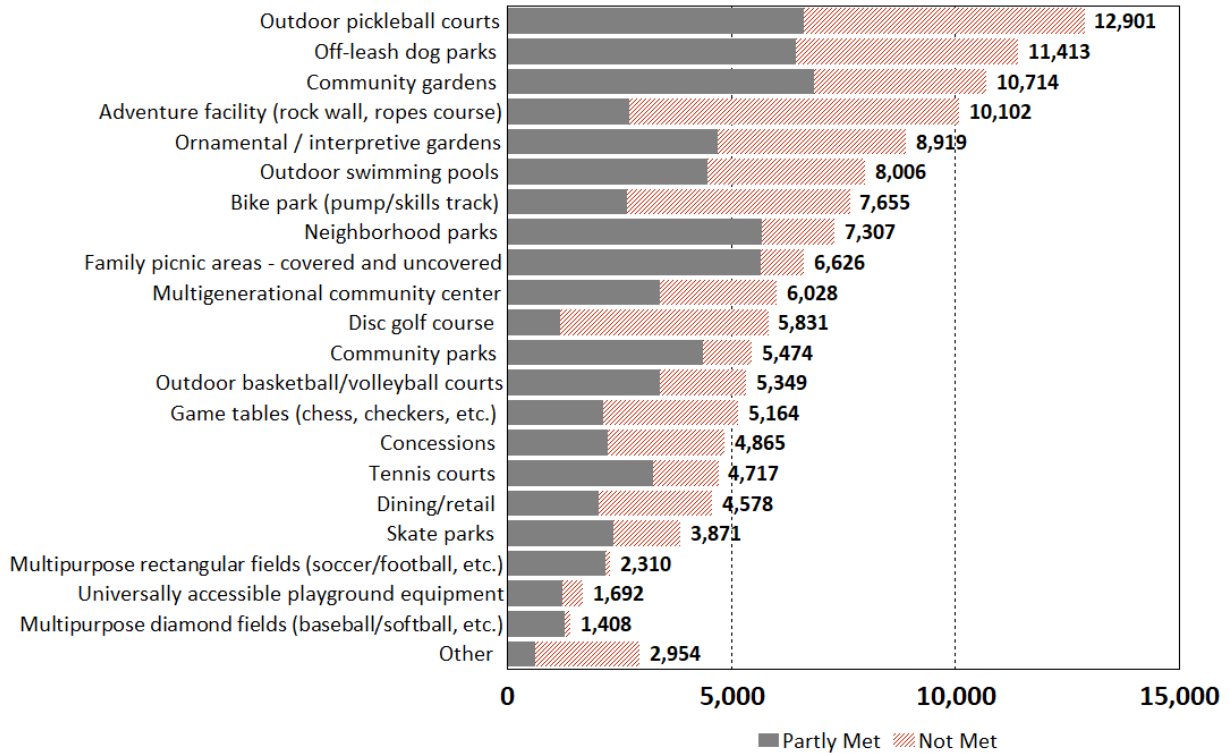

ETC Institute estimates a total of 12,901 households in the City of Carlsbad that have a need, have unmet needs for outdoor pickleball courts. The estimated number of households that have unmet needs for each of the 22 park facilities that were assessed is shown on the following page.

# City of Carlsbad Parks and Recreation Needs Assessment Survey – Executive Summary

## Q9[3]. Estimated Number of Households in Carlsbad Whose Needs for Park Amenities Are Being Partly Met or Not Met

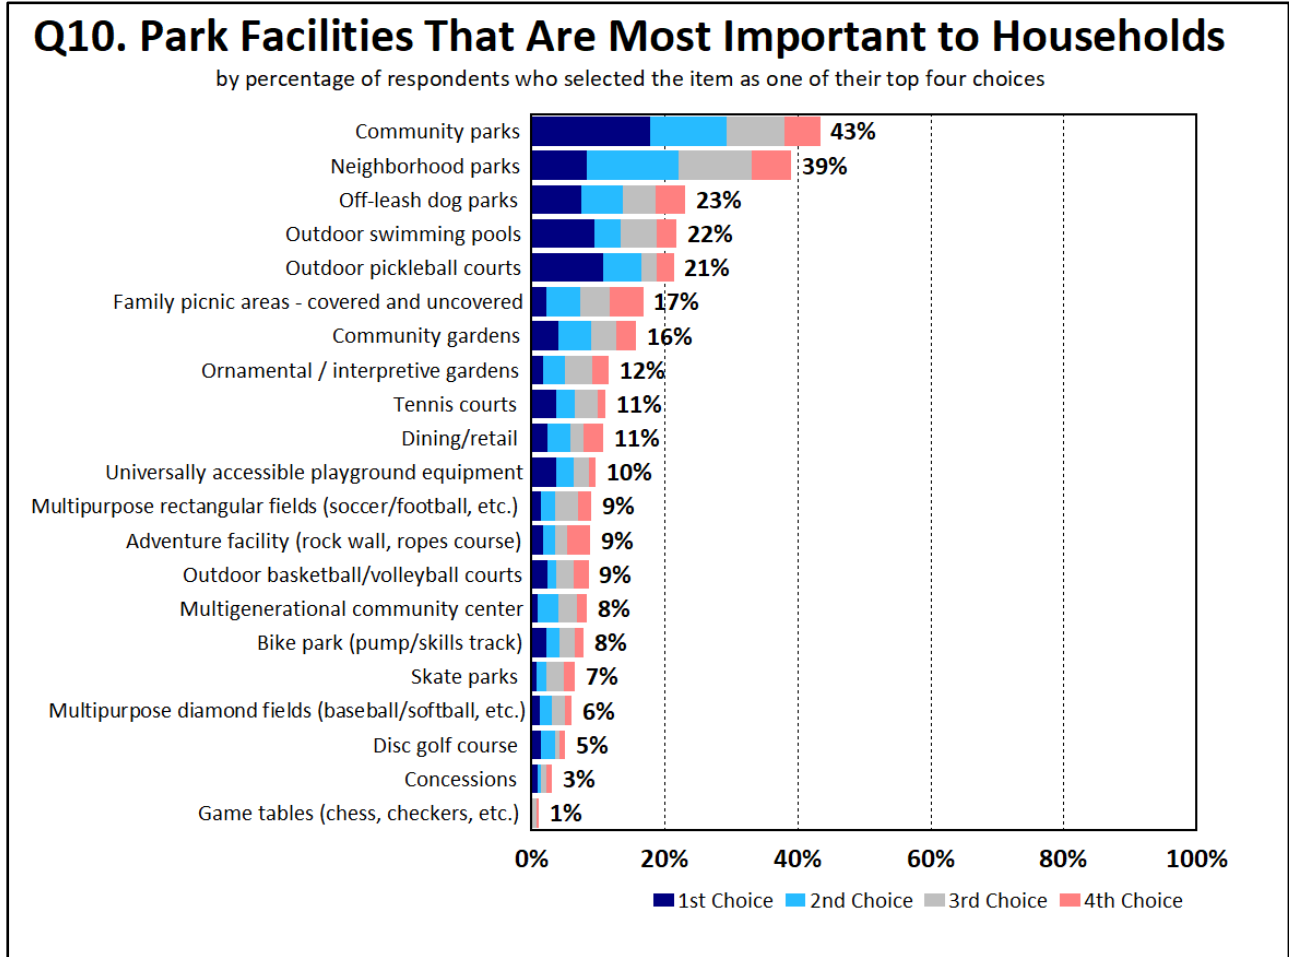

by number of households based on 43,107 households in the City of Carlsbad

**Park Facility Importance:** In addition to assessing the needs for each park facility, ETC Institute also assessed the importance that residents placed on each. Based on the sum of respondents’ top four choices, the most important park facilities to residents were: community parks (43%), neighborhood parks (39%), off leash dog parks (23%), and outdoor swimming pools (22%). The percentage of residents who selected each facility as one of their top four choices is shown in the chart on the following page.

# City of Carlsbad Parks and Recreation Needs Assessment Survey – Executive Summary

**Priorities for Park Facility Investments:** The Priority Investment Rating (PIR) was developed by ETC Institute to provide organizations with an objective tool for evaluating the priority that should be placed on parks, trails, recreational facilities, and services. The PIR equally weights (1) the importance that residents place on facilities and (2) how many residents have unmet needs for the facility. [Details regarding the methodology for this analysis are provided in Section 2 of this report.]

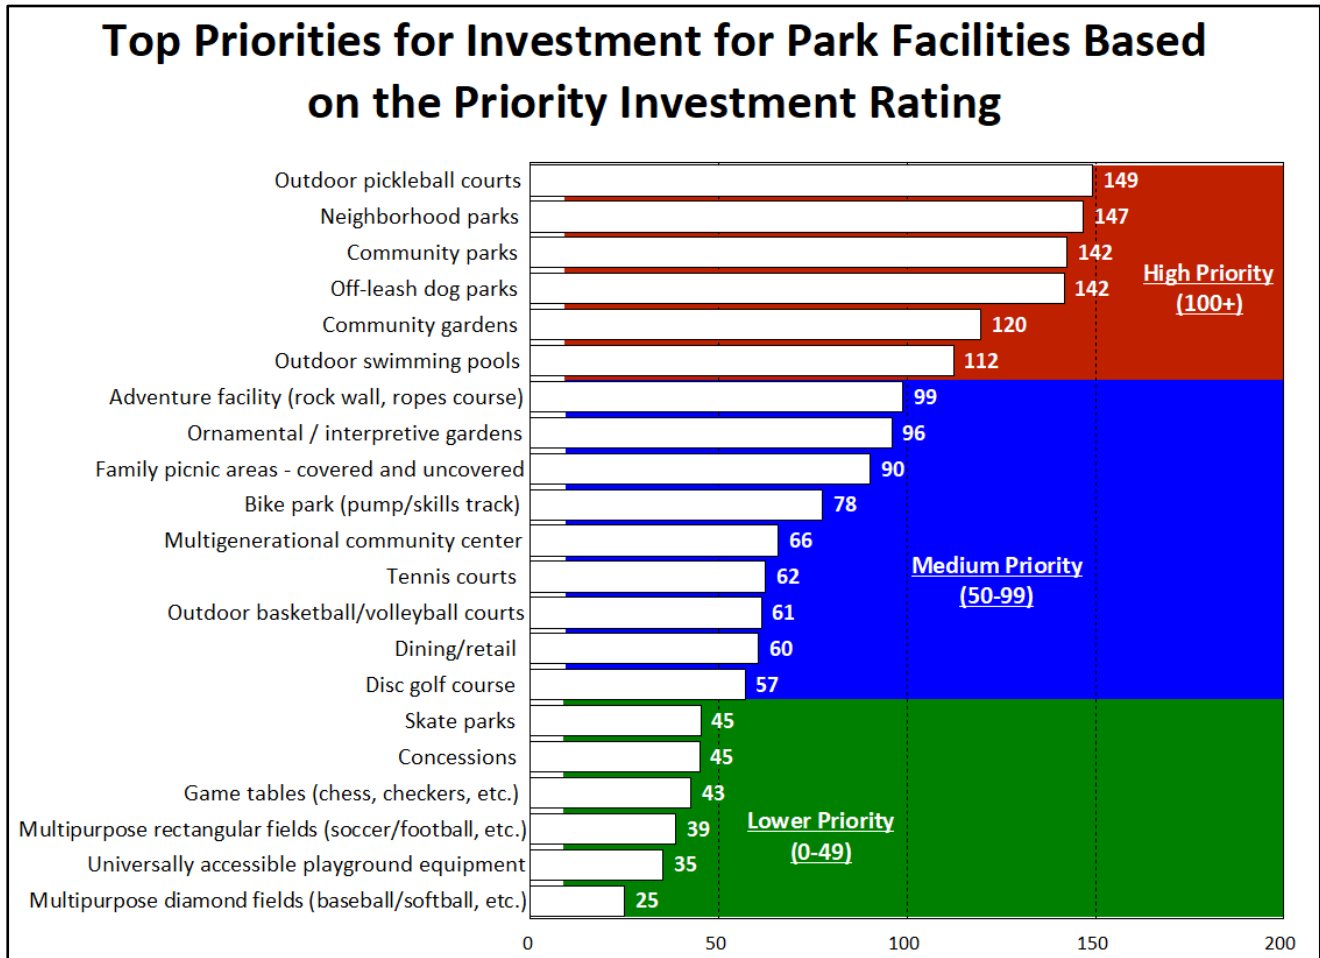

Based the Priority Investment Rating (PIR), the following six park facilities were rated as high priorities for investment:

- Outdoor pickleball courts (PIR=149)
- Neighborhood parks (PIR=147)
- Community parks (PIR=142)
- Off leash dog parks (PIR=142)
- Community gardens (PIR=120)
- Outdoor swimming pools (PIR=112)

# City of Carlsbad Parks and Recreation Needs Assessment Survey – Executive Summary

The chart below shows the Priority Investment Rating for each park facilities that were assessed on the survey.

## PROGRAMMING NEEDS AND PRIORITIES

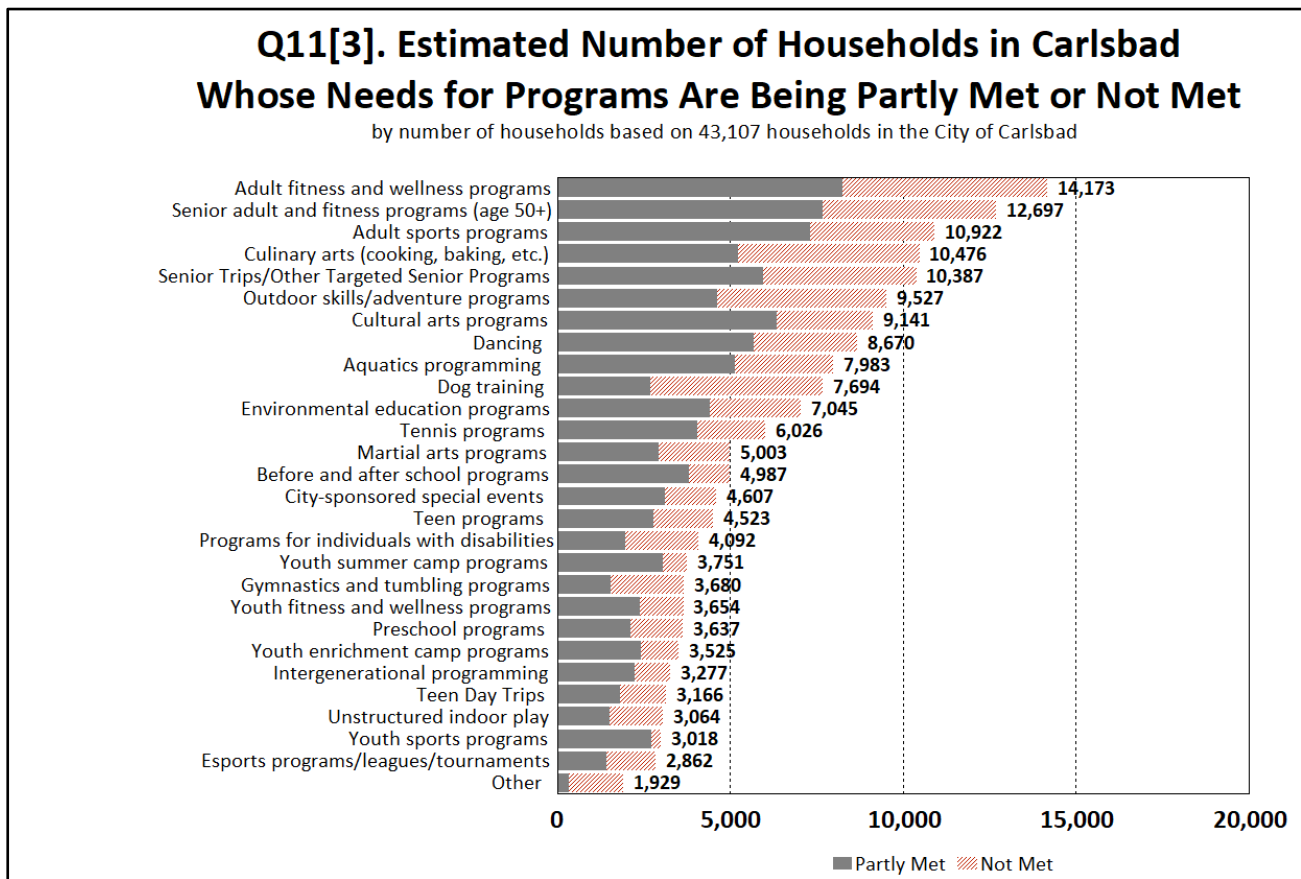

**Programming Needs.** Respondents were asked to identify if their household had a need for 28 parks and recreation programs and rate how well their needs for each were currently being met. Based on this analysis, ETC Institute was able to estimate the number of households in the community that had “unmet” needs for each program.

The four programs with the highest percentage of households that had needs were: adult fitness and wellness programs (55%), senior adult and fitness programs (age 50+) (43%), adult sports programs (39%), and aquatics programming (39%). When ETC Institute analyzed the needs in the community, all four of these programs had a need that affected more than 16,000 households.

# City of Carlsbad Parks and Recreation Needs Assessment Survey – Executive Summary

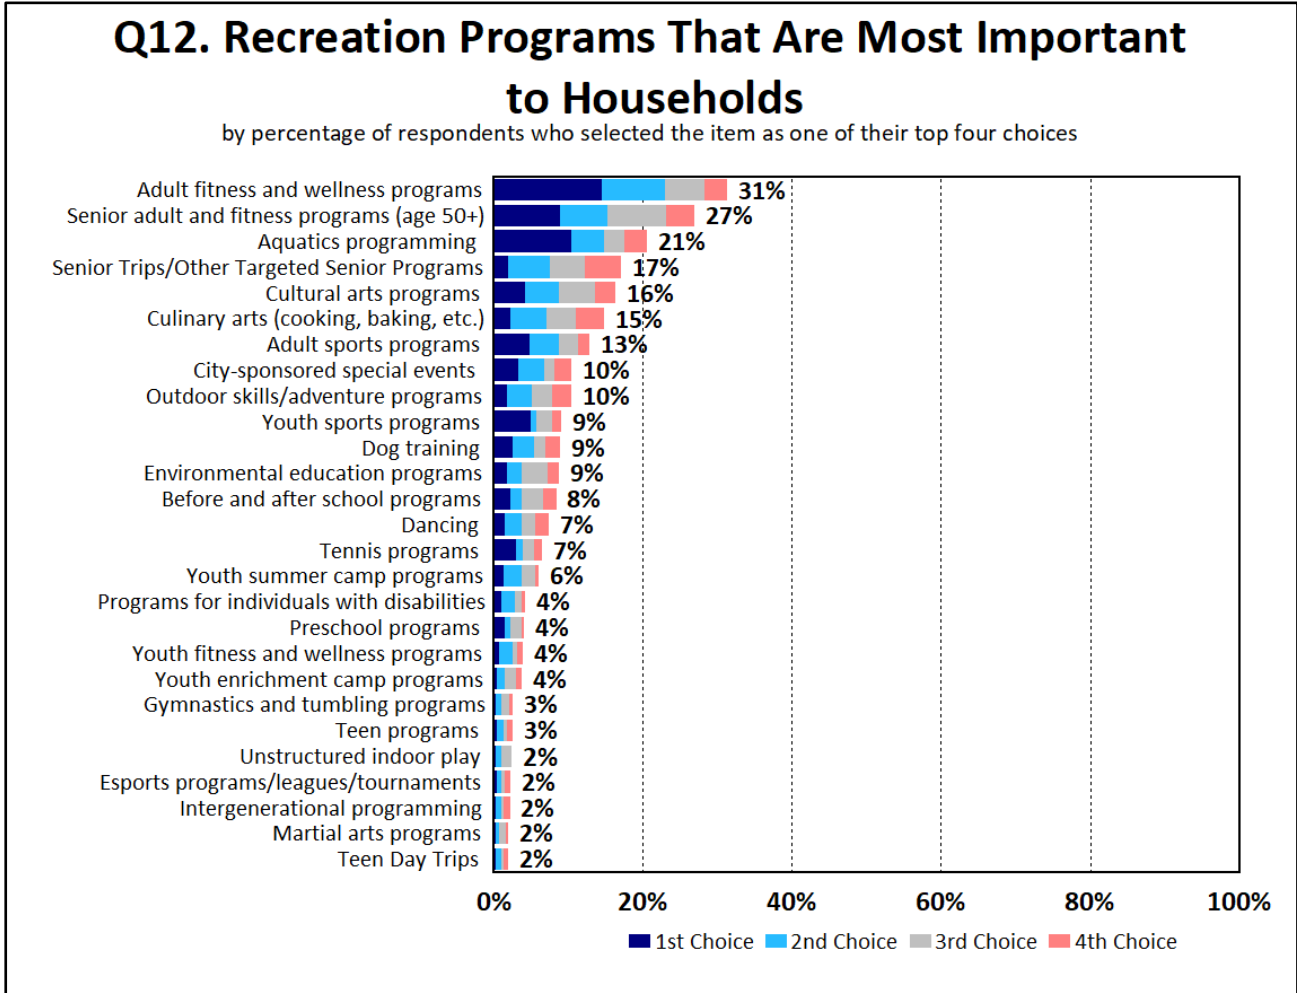

ETC Institute estimates a total of 14,173 households in Carlsbad that have a need, have unmet needs for adult fitness and wellness programs. The estimated number of households that have unmet needs for each of the 28 programs that were assessed is shown below.

**Programming Importance.** In addition to assessing the needs for each program, ETC Institute also assessed the importance that residents place on each. Based on the sum of respondents’ top four choices, the most important programs to residents were: adult fitness and wellness (31%), senior adult and fitness programs (age 50+) (27%), aquatics programming (21%), and senior trips/other targeted senior programs (17%). The percentage of residents who selected each program as one of their top four choices is shown in the chart on the following page.

# City of Carlsbad Parks and Recreation Needs Assessment Survey – Executive Summary

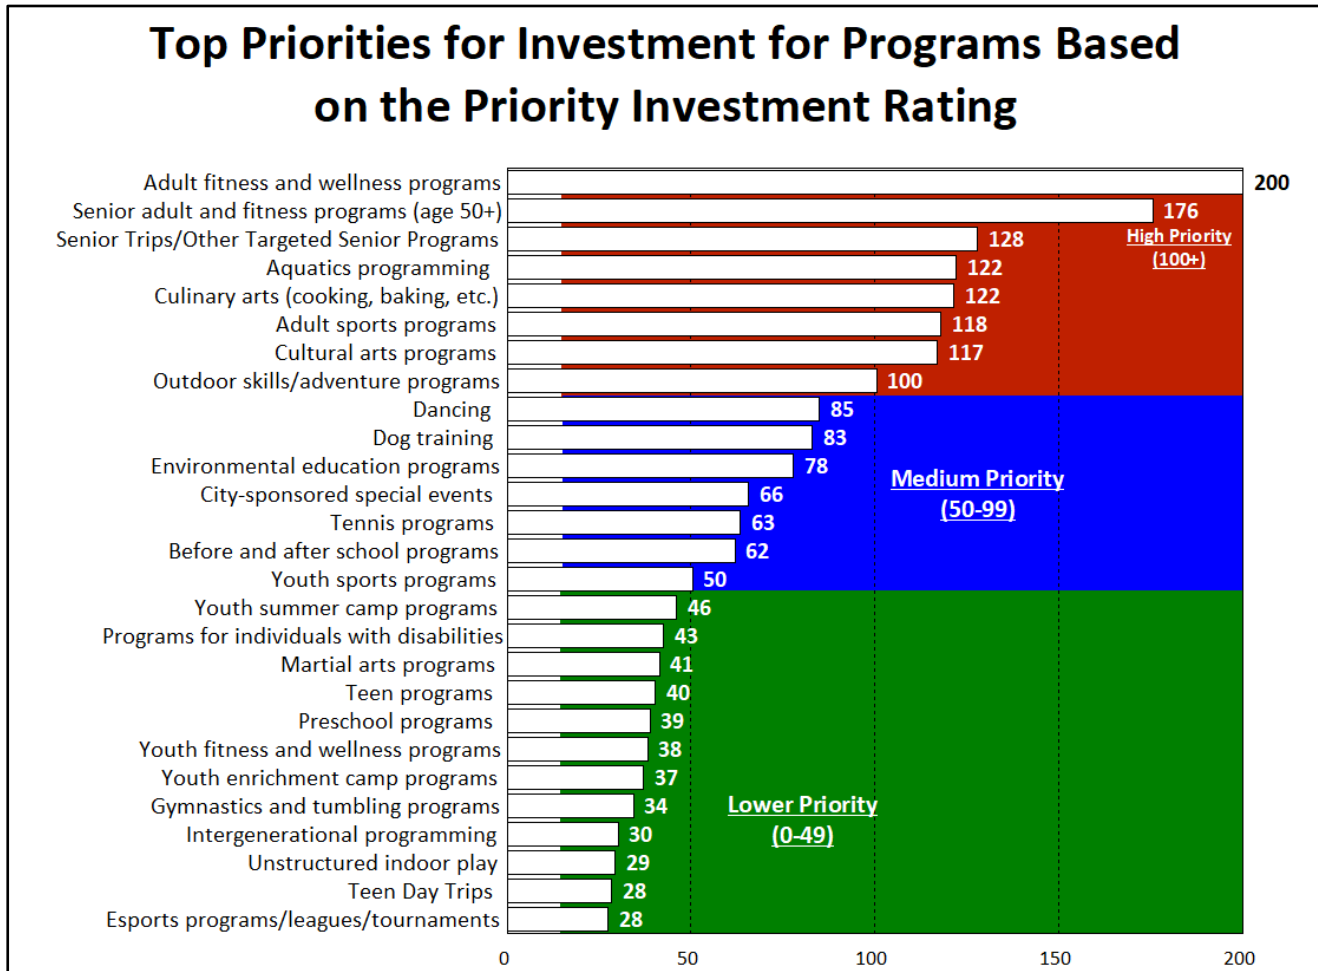

**Priorities for Programming Investments.** Based on the priority investment rating (PIR), which was described briefly on page vi of this Executive Summary and is described in more detail in Section 2 of this report, the following eight programs were rated as “high priorities” for investment:

- Adult fitness and wellness programs (PIR=200)
- Senior adult and fitness programs (PIR=176)
- Senior trips/other targeted senior programs (PIR=128)
- Aquatics programming (PIR=122)
- Culinary arts (cooking, baking, etc.) (PIR=122)
- Adult sports programs (PIR=118)
- Cultural arts programs (PIR=117)
- Outdoor skills/adventure programs (PIR=100)

# City of Carlsbad Parks and Recreation Needs Assessment Survey – Executive Summary

The chart below shows the Priority Investment Rating (PIR) for each of the programs that were rated.

## CONCLUSIONS AND RECOMMENDATIONS

When analyzing the park facilities and programs offered by the City of Carlsbad, the following were the items for which the highest number of residents had a need: community parks, neighborhood parks, adult fitness and wellness programs, and senior adult and fitness programs. Focusing on these items would provide the greatest benefit for the largest number of residents in Carlsbad.

Making certain the City’s availability of facilities and programs encompasses the greatest number of households ensures funding is appropriately allocated to give the community the greatest benefit possible. In order to ensure that the City of Carlsbad continues to meet the needs and expectations of the community, ETC Institute recommends that the City sustain and/or improve the performance in areas that were identified as “high priorities” by the Priority Investment Rating (PIR).

# City of Carlsbad Parks and Recreation Needs Assessment Survey – Executive Summary

The facilities and programs with the highest PIR ratings are listed below.

## **Park Facility Priorities**

- Outdoor pickleball courts (PIR=149)
- Neighborhood parks (PIR=147)
- Community parks (PIR=142)
- Off leash dog parks (PIR=142)
- Community gardens (PIR=120)
- Outdoor swimming pools (PIR=112)

## **Programming Priorities**

- Adult fitness and wellness programs (PIR=200)
- Senior adult and fitness programs (PIR=176)
- Senior trips/other targeted senior programs (PIR=128)
- Aquatics programming (PIR=122)
- Culinary arts (cooking, baking, etc.) (PIR=122)
- Adult sports programs (PIR=118)
- Cultural arts programs (PIR=117)
- Outdoor skills/adventure programs (PIR=100)

# Tabular Data

**Q1. Have you or any member of your household visited any City of Carlsbad parks, recreation facilities, or sports fields during the year before the start of the COVID-19 pandemic (March 2020)?**

Q1.	Number	Percent
Yes	342	85.5 %
No	58	14.5 %

# Survey Instrument

May 2022

**Help plan future parks and recreation offerings!**

Dear City of Carlsbad Resident:

**Your response to the enclosed survey is important.**

The City of Carlsbad Parks & Recreation Department is conducting a community survey as part of the process to update its Parks & Recreation master plan. We would like your input on future improvements to parks and recreation facilities, programs, and services. You have been selected at random to take this survey.

**We appreciate your time.**

This survey should take approximately 10-15 minutes to complete. The feedback gathered will be considered when updating the master plan to ensure future parks and recreation services meet residents' needs and benefit the community.

**Please complete and return your survey at your earliest convenience in the next two weeks . . .**

We have selected ETC Institute, an independent market research and survey firm, as our partner to administer this survey. Please return your completed survey in the enclosed postage-paid envelope. If you prefer, you can complete the survey online at [carlsbadsurvey.org](http://carlsbadsurvey.org).

**Your responses will remain anonymous.**

If you have questions, please feel free to contact special projects manager, Mick Calarco, at 442-339-2859, or via email at [mick.calarco@carlsbadca.gov](mailto:mick.calarco@carlsbadca.gov). Thank you very much for your participation in this survey.

Sincerely,

A handwritten signature in black ink that reads 'Kyle Lancaster'.

Kyle Lancaster  
Parks & Recreation Director

# Parks & Recreation Department Needs Assessment Survey

**Let your voice be heard today!**

The City of Carlsbad needs your input to help determine the community's parks and recreation priorities. Parks and recreation facilities and services contribute significantly to Carlsbad's quality of life, and your input is very important to us. This survey will take 10-15 minutes to complete. When you are finished, please return it in the enclosed postage-paid, return-reply envelope. If you prefer, you can complete the survey online at [carlsbadsurvey.org](http://carlsbadsurvey.org). We greatly appreciate your time!

**1. Have you or any member of your household visited any City of Carlsbad parks, recreation facilities, or sports fields during the year before the start of the COVID-19 pandemic (March 2020)?**

\_\_\_(1) Yes [Answer Q1a-b.]      \_\_\_(2) No [Skip to Q2.]

**1a. How often have you visited City of Carlsbad parks, recreation facilities, or sports fields during the last 12 months before the COVID-19 pandemic?**

\_\_\_(1) More than 5 times a week      \_\_\_(3) Once a week      \_\_\_(5) Less than once a month  
\_\_\_(2) 2-4 times a week      \_\_\_(4) 1-3 times a month      \_\_\_(9) Don't know

**1b. Overall, how would you rate the physical condition of ALL the City of Carlsbad parks, recreation facilities and sports fields you have visited?**

\_\_\_(4) Excellent      \_\_\_(3) Good      \_\_\_(2) Fair      \_\_\_(1) Poor

**2. Please CHECK ALL the following reasons that prevent you or members of your household from using City of Carlsbad parks, recreation facilities, or sports fields more often. [Check all that apply]**

- \_\_\_(01) Use parks in other cities
- \_\_\_(02) Too far from your home
- \_\_\_(03) Parks are not well maintained
- \_\_\_(04) Lack of features we want to use
- \_\_\_(05) Lack of parking to access parks
- \_\_\_(06) Do not feel safe using parks
- \_\_\_(07) Lack of handicap accessibility
- \_\_\_(08) Not aware of park locations
- \_\_\_(09) Lack of transportation
- \_\_\_(10) Lack of restrooms
- \_\_\_(11) Lack of trust in government
- \_\_\_(12) Language/cultural barriers
- \_\_\_(13) Other: \_\_\_\_\_

**3. From the following list, please CHECK ALL the service providers that you or members of your household used for recreation and sports activities during the year before the COVID-19 pandemic (March 2020).**

- \_\_\_(01) Private schools
- \_\_\_(02) Places of worship (e.g. synagogues, churches)
- \_\_\_(03) Private and non-profit youth sports
- \_\_\_(04) Public schools
- \_\_\_(05) Private summer camps
- \_\_\_(06) Neighboring cities
- \_\_\_(07) Private clubs (tennis, health, swim, fitness)
- \_\_\_(08) City of Carlsbad Parks & Recreation Department
- \_\_\_(09) YMCA programs
- \_\_\_(10) Boys and Girls club
- \_\_\_(11) Other: \_\_\_\_\_

**4. From the following list, please CHECK ALL the ways you currently learn about City of Carlsbad Parks & Recreation Department facilities, programs and activities.**

- \_\_\_(01) City community services guide
- \_\_\_(02) City website
- \_\_\_(03) Materials at recreation facilities
- \_\_\_(04) Conversations with recreation staff
- \_\_\_(05) Newspaper
- \_\_\_(06) Friends and neighbors
- \_\_\_(07) Temporary signs at parks or around the City
- \_\_\_(08) Peachjar
- \_\_\_(09) Emails
- \_\_\_(10) E-newsletter
- \_\_\_(11) Facebook
- \_\_\_(12) NextDoor
- \_\_\_(13) Instagram
- \_\_\_(14) Twitter
- \_\_\_(15) Flyers
- \_\_\_(16) City Council meetings
- \_\_\_(17) Other: \_\_\_\_\_

5. From the list in Question 4, which **THREE** methods of communication would you **MOST PREFER** the City use to communicate with you about recreation facilities, programs and activities? *[Write in your answers below using the numbers from the list in Question 4, or circle "NONE."]*

1st: \_\_\_\_ 2nd: \_\_\_\_ 3rd: \_\_\_\_ NONE

6. Has your household participated in any programs offered by the City of Carlsbad Parks & Recreation Department during the past 12 months before the COVID-19 pandemic?

\_\_\_\_(1) Yes *[Answer Q6a-b.]*      \_\_\_\_ (2) No *[Skip to Q7]*

6a. How many City of Carlsbad Parks & Recreation Department programs did you or members of your household participate in during the 12 months before the COVID-19 pandemic?

\_\_\_\_(1) One      \_\_\_\_ (2) 2-3      \_\_\_\_ (3) 4-6      \_\_\_\_ (4) 7 or more

6b. How would you rate the overall quality of the City of Carlsbad Parks & Recreation Department programs in which your household has participated?

\_\_\_\_(4) Excellent      \_\_\_\_ (3) Good      \_\_\_\_ (2) Fair      \_\_\_\_ (1) Poor

7. Please **CHECK ALL** the following reasons that prevent you and members of your household from participating in City of Carlsbad Parks & Recreation Department programs more often. *[Check all that apply]*

- |   |  |
|---|--|
| ____(01) Lack of quality instructors      | ____(10) Program not offered             |
| ____(02) Outdated facilities              | ____(11) Registration is difficult       |
| ____(03) Use programs of other agencies   | ____(12) Poor customer service by staff  |
| ____(04) I don't know what is offered     | ____(13) Lack of transportation          |
| ____(05) Lack of quality programs         | ____(14) Lack of right program equipment |
| ____(06) Fees are too high                | ____(15) Too busy/Not interested         |
| ____(07) Too far from my home             | ____(16) Language / cultural barriers    |

## APPENDIX B - INTERCEPT SURVEY RESULTS

## APPENDIX B - INTERCEPT SURVEY RESULTS

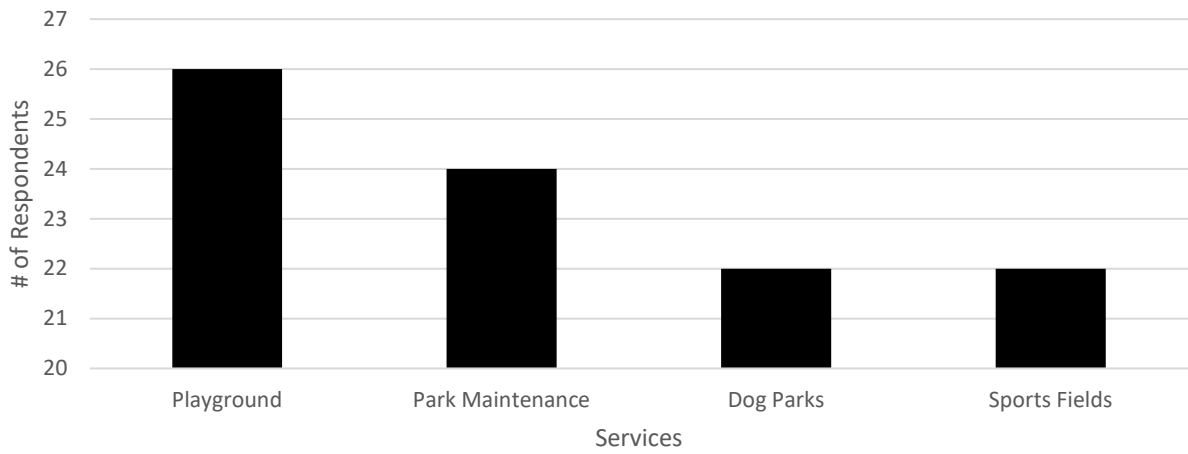

From Feb. 14 through Feb. 23, 2020, the project team conducted 209 intercept surveys at 22 park sites and facilities. Data was collected at various times of the day, including mornings, afternoons, and early evenings to reach a diverse group of park users.

Park users were asked:

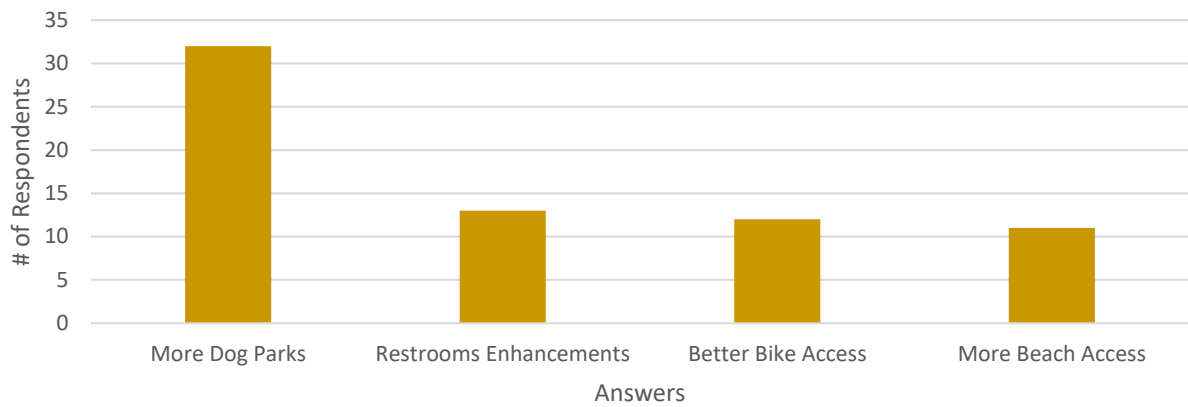

1. What do you like about parks and recreation services in Carlsbad?
2. What would make you more inclined to use parks and recreation services in Carlsbad?

Location	Responses
Alga Norte	34
Ann D. L'Heureux Dog Park	21
Cadencia Park	5
Calavera Hills	26
Chase	4
Hidden Canyon	11
Holiday	3
Hosp Grove	10

Zone 5 Business Park	2
<b>TOTAL</b>	<b>209</b>

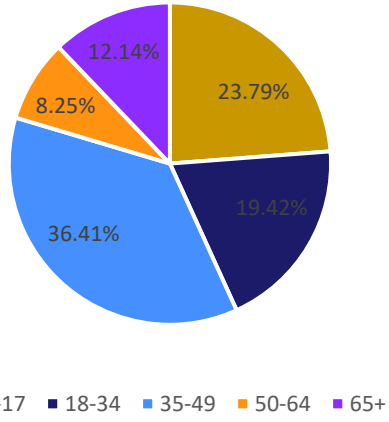

### What do you like about parks & recreation services in Carlsbad?

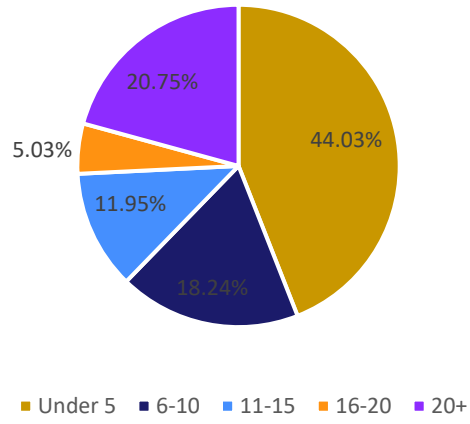

### What would you make more inclined to use parks & recreation services in Carlsbad?

### Age of Respondents

### Years lived in Carlsbad

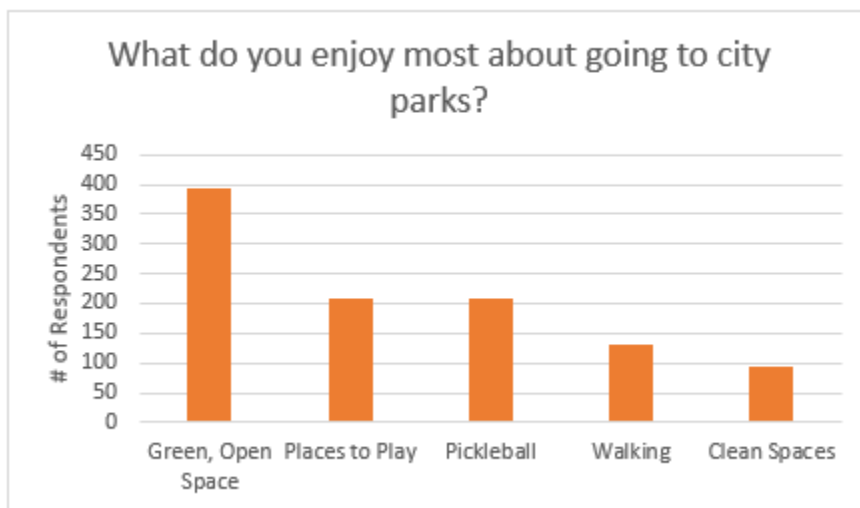

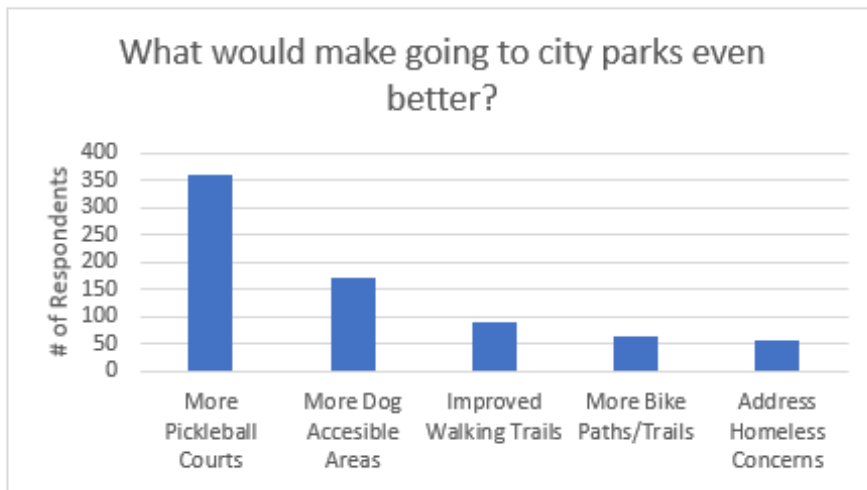

## APPENDIX C – ONLINE SURVEY

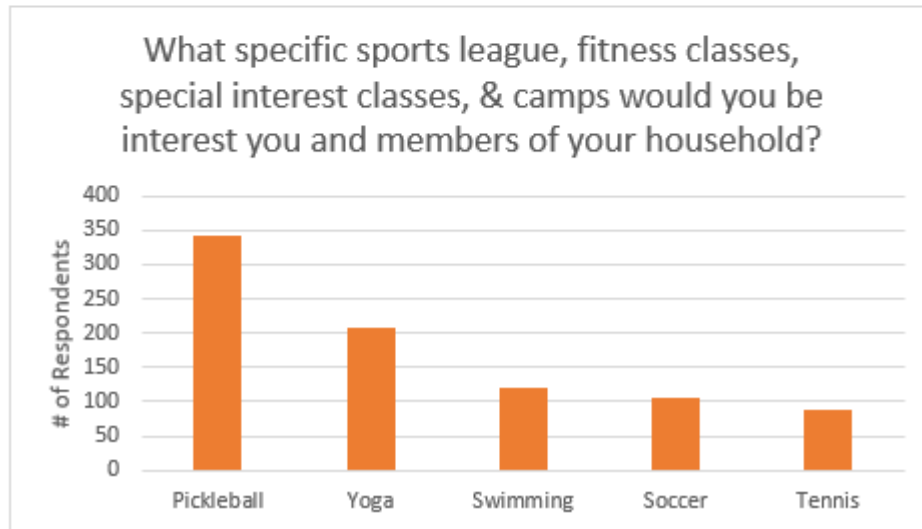

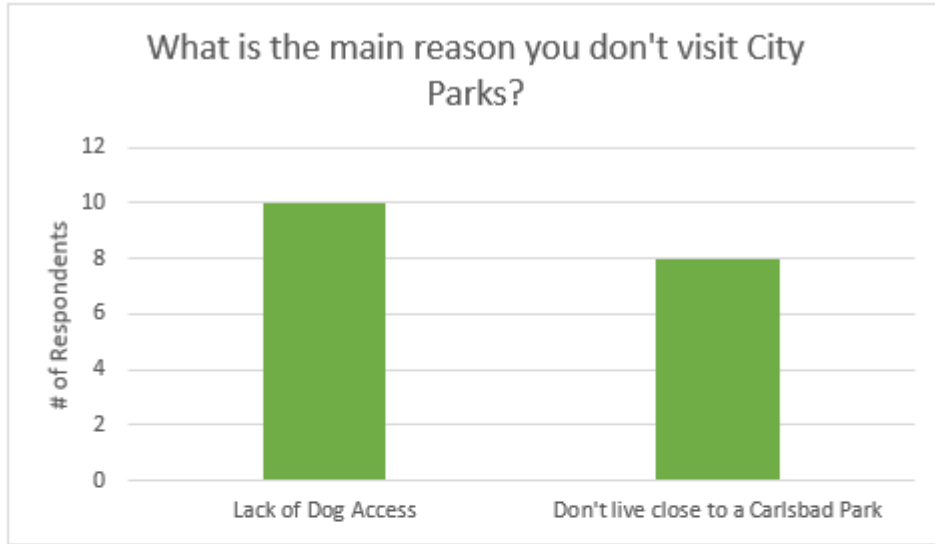

In addition to adding two virtual meetings in 2021, the project team conducted an online survey to provide an added opportunity for the community to provide input into the master plan:

1. Do you visit Carlsbad parks?
2. What would make going to city parks even better?
3. What do you enjoy most about going to city parks?
4. What is the main reason you don't visit city parks?
5. What specific sports leagues, fitness classes and camps would interest you and members of your household?
6. What recreational activities would you like to see more of in Carlsbad?

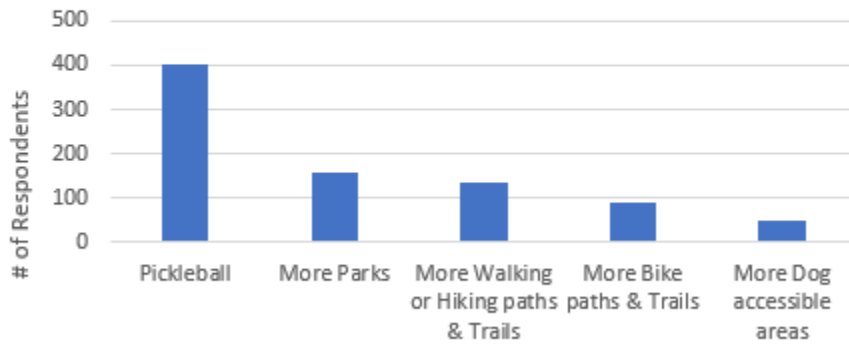

The online survey collected 1,766 responses: 96.4% of respondents stated they visit City of Carlsbad parks. The most common themes are below with the number of times in parentheses.

### What recreational activities would you like to see more of in Carlsbad?

## APPENDIX D - VIRTUAL WORKSHOP QUESTION & ANSWER REPORT

## APPENDIX D – VIRTUAL WORKSHOP QUESTION AND ANSWER REPORT

DECEMBER 9, 2021

Question	Answer
You mentioned no trails talk...does that include trails within a park?	Trails are part of a separate Trails Master Plan and not part of this plan specifically
What will this presentation be covering?	We are collecting public input for the Parks & Recreation Department master plan update.
What about special use areas such as the lagoon, school sites, etc.?	No lagoon; however we considered shared use (MOU) school sites as part of the master plan update and park inventory.
A big part of many of the parks are loaded with trails as an amenity, like a basketball court would be or otherwise. example, Veterans Park. I thought veterans park was up for discussion as well?	We are currently developing the Master Plan for Veterans Memorial Park as well which will include the trails through the park.
Pickleball is not listed on the MPI chart.	ESRI is not tracking pickleball yet for MPI but for overall participation trends it continues to be one of the fastest growing sports in the country.
If the pandemic has taught us anything, we value outdoor space and activities, especially including mountain biking, trail running and open space activities, how do we accelerate and kickoff Veterans Park and increase additional park initiatives to include more trails and access for these activities?	We are currently working on the Veterans Memorial Park Master Plan. We anticipate bringing it to Planning Commission and City Council for adoption in late summer 2022
Is Monroe Swim Pool to be improved?	Please find the following information on our website regarding Monroe Street Pool Improvements: <a href="https://www.carlsbadca.gov/departments/parks-recreation/programs/aquatics/monroe-street-pool-improvements">https://www.carlsbadca.gov/departments/parks-recreation/programs/aquatics/monroe-street-pool-improvements</a>
Why was Cycling/Mountain Biking not on any of the activity charts?	We tried to list as many options as possible but wanted to provide an "other" option that may be added via chat and we will record it. Thank you.
Cycling has not been covered or included in the statistics or the presentation, what about cycling? You're missing a large user group.	Did you answer cycling in chat? We will make sure to record your reply. Thank you.
Is the vet park master plan discussed tonight? that's why I'm here...I heard it was.	The Veterans Park Master Plan is not on tonight's agenda. That will be coming very soon

Question should reflect lack of time available at facility.	As a barrier to participation? We've got it. Thanks for adding.
Monroe Pool is shut down to 4 hours during the week not enough available swim time.	Your answer is understood and we've recorded it. Thanks.
I understand this isn't about trails but for the record: kids are riding bikes to get around town and as a sport. Connected bike infrastructure to trails is important. Thank you.	Live answered.
Open Swim access that does not conflict with the over-usage by private swim clubs at Alga and Monroe.	Thank you for your comment. We've got it.
Why is there limited time at Monroe pool - the hours on the weekend are devoted to sports clubs and just to a few hours on weekdays.	Thank you for your patience as we work on securing additional lifeguard coverage at Monroe Street Pool. We understand this situation has been frustrating and are doing everything we can to restore pool hours as much as possible as soon as possible. As we are exploring options, please know that only staff fully qualified and certified to perform pool lifeguard duties will be put in that role.
Again, pickleball is not listed as a choice?	We have limited space for listed amenities. Select other and enter "pickleball courts" in chat box.
Additional outdoor pickleball courts.	Appreciate the comment.
What's the status of locked school yards as part of parkland?	The school field use is in collaboration with the districts, and they have first priority for use.
Thank you for Veterans Memorial bike park plans. Please don't think that one facility is all it takes and checks the box as done. Look at cycling as a recreational need in Carlsbad and the connectivity of existing parks and open spaces. Local bike pump tracks and skills courses can be sited throughout the community. Will you address this in your master plan?	We will consider all input received (from a multitude of sources) as we develop our master plan update. That includes facility priorities that may include bike pump tracks and skills courses.
Carlsbad is in desperate need of a decent mountain bike trail system / bike park. Since these last 15 years. Trails access in Carlsbad has drastically decreased. As a result, conflicts between residents and different conservation organization arising, developing stay unresolved.	Thanks for your comment. We've added it to the other input we've collected tonight.

I also would like to reiterate that all trails are not equal and a boring gravel path/service dirt road does not offer the type of recreation Carlsbad residents are looking for.	Live answered.
Why isn't there a coastal park south of 5 in the south of Carlsbad? Wasn't there supposed to be a 6-acre park there to serve that community as well as the 62% of citizens who live in the southwest quadrant? Even those who live inland want a park to hang out by the beach and watch the sunsets.	Live answered.
But these fields are often locked when no one is using them.	Live answered.
Are there any plans to expand the park standard (acres/1000 people) in Carlsbad?	Live answered.
Thank you PROS Consulting and Carlsbad Parks & Rec for your continued support in our community.	Thank you. We appreciate you joining us tonight.
What plans are there to add more parks in SW quadrant?	Live answered.
Any plans for an expanded park at power plant site	Live answered.
Is there any thoughts about transferring management of the Carlsbad Highlands Ecological Reserve to the city of Carlsbad?	Live answered.

**DECEMBER 11, 2021**

Question	Answer
<p>When will more pickleball courts be added to Poinsettia Park? We desperately need them!!</p>	<p>Good morning - we do not have any plans to add more pickleball courts at Poinsettia Park.</p>
<p>Are Community Gardens included?</p>	<p>Yes, community gardens are included in the master plan update process.</p>
<p>Can we make the existing tennis courts multi-use to include pickleball players? That would allow more use of the courts, which is better use of the community assets. Many seniors and high schoolers are doing that now at the High School, but we get kicked off by tennis players. The courts should be available to everyone in the community not just an exclusive group.</p>	<p>We have previously explored converting tennis courts to multi-use to include pickleball and the concept was not well received by either group.</p>
<p>All other Cities in San Diego County allow pickleball players on tennis courts. Why doesn't Carlsbad? Pickleball is the fastest growing sport, but it has not been addressed by Carlsbad, even though low cost options are available. No other City has mentioned noise as a factor to keep pickleball out of parks. Why is this an issue with Carlsbad?</p>	<p>We have previously explored allowing pickleball on tennis courts and it was not well received by either group. Additionally, it would require a change in the Conditional Use Permit for the park.</p>
<p>Thank you!</p>	
<p>Due to the shortage of pickleball courts has the city considered converting one or more tennis courts to pickleball courts? You can get 4 pickleball courts on 1 tennis court. The City of Encinitas has done this with stripping on tennis courts to accommodate and include pickleball courts. They use nets kept on the court in a locked storage box to assemble and disassemble after use. Most tennis players in Carlsbad enjoy singles play while pickleball is popular as doubles court play. Therefore, you have 2 tennis players utilizing the same space as <math>4 \times 4 = 16</math> pickleball players. Pickleball is the fastest growing sport in America and Poinsettia Park courts are usually at maximum capacity with a large group of people waiting to play. Games are to 11 so turnover is fairly quick when there aren't overflow crowds waiting to play.</p>	<p>Please see previously answered questions.</p>

As I understand it, that was before COVID. Since then, pickleball has skyrocketed in popularity. The purpose of this meeting was to get an update, correct? Check out other cities around us, they all allow pickleball players on their courts. Orange County has tons of pickleball players and it is increasing here very quickly.	Benchmarking other cities will be part of this master plan update, including consideration of all feedback received in meetings and surveys.
Why isn't Pickleball on this slide?	It is such a new sport that ESRI has not begun tracking it yet.
Pickleball is the fastest growing sport!	
With pickleball not even on your charts, what are you doing to try to assess the need?	These questions are the same questions asked when we started the process in Dec. 2019 (for consistency). You may add pickleball in the comments (as you have) or specify "other" in the polling.
Why is pickleball not listed on the graph?	It is such a new sport that ESRI is not tracking it yet
These slides were shown in Feb 2020 at Alga Norte and Pickleball wasn't shown and you told us that it would be added? It has not been added, why?	These questions are the same questions asked when we started the process in Dec. 2019 (for consistency and comparison). You may add pickleball in the comments (as you have) or specify "other" in the polling.
Which groups are not receiving the need for more pickleball courts well? and why?	Historically, tennis players.
Why no Pickleball on this?	These questions are the same questions asked when we started the process in Dec. 2019 (for consistency and comparison). You may add pickleball in the comments (as you have) or specify "other" in the polling.
BTW I tried to submit questions in advance and computer rejected pros.consulting@proconsulting.com as a correct address? You might have not received some participation if there was a problem.	Live answered.
That doesn't answer my question, how are you tracking pickleball?	Meetings like this, website (carlsbadparksplan.com) input, surveys, etc.
The only thing I care about is pickleball. The courts at poinsettia are beyond capacity (people waiting to play) all day long. Please - this is the biggest and most important thing you can do. Add more pickleball courts or convert tennis courts.	We will soon be starting the master planning process for Robertson Ranch Park and I am sure that pickleball will be explored for that park.

<p>I read the tennis court guidelines and 2 players (singles) or 4 players (doubles) can have exclusive use of a court for 90 minutes if people are waiting to play. This seems like recreational tennis players are permitted to have extended use of the facilities for long periods of time. Pickleball players use of courts is much briefer with games to 11 and then rotate off the courts (with a two game maximum when people are waiting) on the social courts. Therefore, pickleball players are allowed much less time to enjoy their sport. Why can't we take steps to equalize the use of the facilities?</p>	<p>The City of Carlsbad's rules for tennis courts and pickleball courts are consistent with the rules in other cities.</p>
<p>During the presentation in 2019 it was stated that Pickleball would be added to the slide deck presentation and it has not been added. The slide deck should have been updated.</p>	<p>The questions remained the same for consistency and comparison. Please be assured, we receive and record all input (including pickleball).</p>
<p>This meeting seems to be more about statistics and survey of city services. Why isn't the moderator including the discussion and questions regarding pickleball?</p>	<p>Live answered.</p>
<p>Has the consultant been given all the correspondence from the last year regarding the lack of pickleball courts? The letters I sent to City Manager and Parks Department?</p>	<p>Yes.</p>
<p>Why can't we make some of the underutilized tennis courts, double use with tennis? many other parks have done this.</p>	<p>Live answered.</p>
<p>My comments refer to pickleball. How about league/tournament? Indoor pickleball in multiple use gyms. Convert unused tennis courts</p>	<p>We offer indoor pickleball at several of our community centers.</p>
<p>Pickleball courts</p>	<p>Live answered.</p>
<p>...and why does our cry for more pickleball courts keep being shut down? Is anyone walking the park to evaluate the need and to see firsthand the desperation of demand?</p>	<p>Live answered.</p>
<p>Thanks</p>	<p>Live answered.</p>

<p>Convert 1-3 tennis courts into permanent dedicated pickleball courts. This would be very inexpensive and shouldn't take 6 years like it did to construct the existing 6 dedicated courts. Also please include an expert pickleball player as part of the planning so we don't end up with unused covers on the courts that were made a part of the courts.</p>	<p>We've received your comment/request. It has been added to the master plan update project file. All comments will be tallied and considered. Appreciate you joining us today.</p>
<p>Are you going to present and or send to the city council of Carlsbad a statistically correct survey that doesn't have pickleball? Are you going to send out a mailer/questionnaire/survey without Pickleball?</p>	<p>Pickleball will be included on the statistically reliable and online surveys.</p>
<p>If multiuse of tennis courts with pickleball courts was not well received, what groups or individuals prompted the city to disregard the needs of pickleball enthusiasts? As I see it the City hasn't even included pickleball in their graphs. How can it be a consideration if you aren't using a metric to measure popularity with city residents?</p>	<p>At the time it was a combination of tennis players and pickleballers that didn't like the idea of shared tennis court use and/or conversion.</p>
<p>Four years ago, I submitted a request to the city with a petition of signed residents to exclude seniors from having to pay to play indoor pickleball at Calaveras Park. The Park and recreation manager didn't even consider my proposal. How is this inclusion of city resident input?</p>	<p>Live answered.</p>
<p>What can the pickleball community do to get the quick response basketball got at pine avenue for outdoor facilities?</p>	<p>Live answered.</p>
<p>I'm very active in the pickleball community and engage with hundreds of players. Not one of them that I know, would object to dual use of a couple tennis courts.</p>	<p>Live answered.</p>
<p>It was the park and recreation manager who dropped the ball on my proposal for waiver of fees to seniors.</p>	<p>Live answered.</p>

# City of Carlsbad California 2023 - 2030

## APPENDIX E - VIRTUAL WORKSHOP CHAT

## APPENDIX E – VIRTUAL WORKSHOP CHAT

DECEMBER 9, 2021

Public Comments
Thank you for considering inputs from citizens. If the “pandemic” has taught us anything is that outdoor recreation opportunities and facilities are as valuable as any civic investment a municipality can make on behalf of their constituents / residents. Please appropriately re-invest in parks, bike trails and bike parks.
You mentioned no trails talk...does that include trails within a park?
Why was Cycling/mtn biking not on the list?
What about cycling? It hasn't appeared in your presentation?
There was Pilates but no cycling.
I use the conference rooms as a part of a group that has meetings at the Senior Center.
I understand this isn't about trails but for the record, kids are riding bikes to get around town and as a sport. Connected bike infrastructure to trails is important. 🙌
We need mountain bike trails. They are multi use and help hikers, bikers, and the like. Since the state (cdfw) shut down their half of Calavera, we have lost a huge venue to bike, etc. Veterans park will help with the addition of some more trails but I would argue it doesn't go far enough. Carlsbad should be leading the state and the other cities on this front.
Connectivity of trails for hiking and riding. Make trail use part of park master plan.
We need more community gardens and gardening classes.
Mountain Bike Specific trails
Pool availability at Monroe. why is it down to 4 hours during the week and almost always limited on weekend for club sports?
Bike trails! That's what we want!
You need another selection for #1 none apply or meet the need of additional trails, connected to improve mountain biking and youth biking.
More community gardens, more natural open space and trails.
Would love more bike-friendly trails. Maybe bike skills classes as well.
EBike safety classes.
Bike Park and mountain bike related infrastructure. I assume this isn't an option as it's already planned?
Need to hire more lifeguards for Monroe Street Pool
I'm seeing a lot of kids commuting by EBIke. Got to make the roads and trails safe for them and others.

More protected natural open space.
My questions disappeared!
More volunteer programs.
Very disappointed by the poll options not including bicycle focused facilities and activities. Virtually every attendee has inquired about them yet that is not listed as an option in the polls.
Get MOA with school district for use of CHS outdoor track
I couldn't answer the last 2 questions because the questionnaire disappeared!
Carlsbad should look like a top tier outdoor city. Anytime I go through Mammoth, St. George UT, or Moab, I am so impressed with the community development with amenities pulling its population outdoors! More Bike trails, advanced features, Bike parks, and trails connecting the entire city, north, south, east, west.
Community gardens in the south part of the city.
More facilities and incentives to attract people to bicycle more and drive less.
Grass areas for dog parks off leash.
A system worthy of Carlsbad that is available throughout the city.
Bicycle facilities.
Community gardens in all quadrants of the city.
A Senior-friendly and well-trained senior staff at the senior center.
A large MTB park that had features from mild to wild. Beginner to advanced.
Expedite construction of Veterans Memorial, specificity bike park. Carlsbad is a national leader in Cycling companies, but infrastructure doesn't support them.
I would like the City of Carlsbad see the huge growth in cycling and continue to address this through the Veterans Memorial Bike Park and green space/ trail connectivity.
Additional progression of trails adding connectivity for commuting, riding progression and multi-use for all ages
Bike Park please with ADVANCED features, jump lines, technical aspects, etc.
Community that can be easily accessed by all for walking, hiking, biking with safety and amenities.
I'd like to see more family oriented parks- passive use for families that includes trees, grass areas for families with all ages to visit together, from toddlers to seniors
Enough sports field space to eliminate constant conflicts
Did anyone mention bike trails yet? ;)
Thanks for reminding me. Definitely more bike trails please... :)
Skateboarding Park in old Carlsbad.

The pacific highlands pump track has been extremely popular for skateboarders - perhaps we need something in Carlsbad for skating and bikes.

## DECEMBER 11, 2021

### Public Comments

Why is pickleball not listed?

I enjoy using the Carlsbad trails - Hosp Grove Park trails and other bike/ped paths.

Hiking is one of the main activities, especially for older folks.

The pickleball community is not being heard. we often have to wait 30 minutes for ONE game, then come off to wait another 30 minutes, etc. (not for 1.5-2 hours of dedicated court time like tennis).

Pickleball @ Poinsettia Park. I would use this park even more if it was not so congested.

I don't think I've ever seen all tennis courts in use, and I always look.

Friday night 12/10 at Poinsettia Park at 4:30 pm Friday Nights Flag football was being held and all the parking lots were full, and people were parking on the residential streets. Even though parking was an issue, the pickleball courts were full. In fact, on the 4 social courts there were 23 paddles on the rack waiting to play. On the challenge court there were 13 paddles on the rack waiting to play. There were 5 empty tennis courts!

Need line dance.

Actually, communication is excellent with regular emails being sent out by the City Manager.

I would love to see more pickleball courts and bathrooms at Poinsettia Park.

Multi-purpose courts for tennis and pickleball

We need more community gardens

Shade at Poinsettia for pickleball

More trails, especially in South Carlsbad. Also might need a place for RC model airplanes, drones and model boats.

A conversion of at least ONE tennis court to a dedicated pickleball format. (Poinsettia Park ) With SHADE for spectators.

Parking at sites.

Food in parks.

Litter management could be better. More trash cans with pick up.

Prioritize room for walkers and bikers over cars on the coast road.

More dedicated outdoor pickleball courts with shade for spectators.

More pickleball courts, especially challenge high level courts. A practice wall would be great too.

<p>The one thing: MORE PICKLEBALL COURTS. please note that those 52% on the poll for more sports courts are advocating for pickleball. If we could specify, I'm confident.</p>
<p>Continue virtual programs-cooking, history, art.</p>
<p>A bike park (similar to Sweetwater Bike Park in Bonita/Chula Vista).</p>
<p>PLEASE... More pickleball courts and multi-purpose courts sooner than later.</p>
<p>More wild/native space for walking/hiking wildlife.</p>
<p>Trash and litter is a problem. We need more containers for litter throughout all areas, and a means to have that picked up regularly.</p>
<p>More parks and open space, especially in the SW quadrant which is deficient.</p>
<p>More community gardens.</p>
<p>Pickleball would be more represented, but the NATIONAL CHAMPIONSHIPS are being played as we speak at Indian Wells.</p>
<p>Pickleball grew in 2020 to 4.2 million players in the US, an incredible growth rate of 21.3% from 2019 per the Sports &amp; Fitness Industry Association's (SFIA) 2021 Topline Participation Report, released in Feb. 2021.</p>
<p>More parks down in so Carlsbad with parking.</p>
<p>Why is Carlsbad below the national average for parks? Even Oceanside and Encinitas have more parks per population!</p>
<p>Leo Carrillo isn't great for repeat visits however.</p>
<p>Thank you very much for building new restrooms at Poinsettia Park.</p>
<p>The new Olympus Park in Encinitas is great for kids.</p>
<p>When will you get it that we need more open space for hiking?</p>
<p>5 acres per 1000 residents rather than just 3. And parks need to be nearby to minimize driving. Kids under 16 and many seniors don't drive.</p>
<p>Less driving will mean less cars. We need to pay attention to the climate change threats.</p>
<p>You have done a great job and we have faith in you that it will continue. Thank you for listening to us.</p>
<p>All the fancy pix and slide shows do not change the fact that we need more open space to accommodate the growing population!</p>
<p>Veterans Park should not be considered park credit for all the quadrants. We need more parks in EVERY quadrant.</p>
<p>Thank you for engaging and listening to us. Good Parks and especially open space and trails make for a great city and benefit everyone.</p>
<p>Future planning is vital, and this is great for that. Poinsettia Park (Pickleball) has IMMEDIATE needs. PLEASE convert one tennis court to DEDICATED pickleball.</p>
<p>Mainly there are few activities at Leo Carrillo.</p>
<p>You allowed too many people at the winter celebration at Leo Carrillo ranch. People were way too close together for the Tree lighting!</p>
<p>So many nice things for children. I wish I had lived here when my child was small.</p>

When our children were small, the air quality was much better!

I greatly appreciate you all seeking our input.

Thanks for your help. Looking forward to more outdoor and indoor concerts after this Pandemic is managed.

we live in an awesome city and I'm proud to be part of this community

There are over 40 public tennis courts in the City of Carlsbad and only 6 pickleball courts. The conversion of 1 or 2 tennis court into a multi-purpose court for tennis and pickleball could be a temporary solution for the need for more pickleball courts.

We are not getting dedicated courts, so let's share. We just need more courts to play on.

---

Dear Mick:

I received an email blast from the City today titled: **Community Invited to Provide Input on Future of City's Parks and Recreation Offerings.**

As noted in the 2/6/20 email below citizens have since 2017 provided extensive input to the City on the need for a Ponto Park, including over 600 emails/signed petitions to the City in January 2020, and over 2,500 emails/petition signatures since 2017 via the People for Ponto website.

Citizen input citing the need for and request for a Ponto Park have also occurred as part of the City Budget Workshops and Veterans Park Workshops, and at 3 specific PowerPoint presentations to the City Council. The attached file of over 90-pages compiles most of that additional public input, and includes the date and how this input was addressed to at the City.

As noted in the 2/6/20 email (and documented in the attached) these additional public inputs have already been provided to the City. We request your confirmation that the attached along with the over 2,500 prior individual emails/petitions are included as public input on the Park Master Plan Update. Can you please kindly confirm?

Thanks,  
Lance Schulte  
People for Ponto

**Subject:** RE: Develop Ponto Right - prior Ponto Coastal Park Support Letters and public comments to be included in Parks Master Plan public Comments  
**Importance:** High

Dear City Council, Kyle Lancaster, Mike Pacheco, and Mick Calarco:

We would like to receive confirmation that all the People for Ponto and other public comments as part of the public comments submitted on the:

1. Shopoff developer proposed application to change the Local Coastal Program Land Use on

Planning Area F at Ponto,

2. the City Staff's proposed Draft Local Coastal Program Land Use Plan Amendment to change the Land Use on Planning Area F for the developer

be included in the City's Park Master Plan Update. Can you please confirm all this prior citizen input is also included in the Parks Master Plan Update?

These prior public comments and requests to the City Council and Kyle Lancaster, parks Director directly relate to Park needs at Ponto and Coastal South Carlsbad, and the City's Planning Area F LCP LUP Requirements to consider a Public Park at the site. The public input is from over 2,500 citizen and public communications already sent to the City Council and City Staff (as noted in the above To address list). In addition to those 2,500 citizen and public communications over 90-pages of extensive public comments and data showing among other things the City's Park Master Plan's Park Service Area deficit (Park Service inequity) at Ponto and Coastal South Carlsbad, Park Acreage Deficit in South Carlsbad, the lack of any City Park West of I-5 and rail corridor in all South Carlsbad, CA Coastal Act policies and Coastal Recreation data/issues, along with other City policy and regulation supporting a Park at Ponto. All this prior public input should be included in the Parks Master Plan Update. Can you please confirm that that is the case? Or do we have to re-email all these prior public comments?

Thanks,  
Lance  
People for Ponto

**One example of prior public comments submitted about Park deficits at Ponto and Coastal South Carlsbad and request for a City Park at Ponto:**

**To:** Matt.Hall@carlsbadca.gov; CityCouncil@carlsbadca.gov; Scott.Chadwick@carlsbadca.gov; Kyle.Lancaster@carlsbadca.gov; lisa.urbach@parks.ca.gov; Kathleen@carlsbad.org; mike.pacheco@carlsbadca.gov; gbuhr@coastal.ca.gov; cort.hitchens@coastal.ca.gov; Erin.Prahler@coastal.ca.gov; Don.Neu@carlsbadca.gov; Gary.Barberio@carlsbadca.gov; info@peopleforponto.com

**Subject:** Develop Ponto Right - Support Letter

Dear Mayor Hall, Carlsbad City Council, and California Coastal Commission:

I am informed that

1. Carlsbad must consider on Planning Area F at Ponto the need for a public park at Ponto as part of the Draft Local Coastal Program Amendment.
2. There is no public park at Ponto even though City Park Standards requires a minimum of 6.5 acres of parkland for Ponto.
3. There is a current 6.6 acre park deficit in Coastal Southwest quadrant of Carlsbad, (south of Palomar Airport Road and west of El Camino Real).
4. There are no Coastal Parks in all of South Carlsbad. 64,000 South Carlsbad citizens have no Coastal Park.
5. Ponto is at the center of a larger 6-mile stretch of coastline in that has no Coastal Parks.
6. Ponto has a city documented 30 acre open-space standard deficit that a Coastal Park

would help resolves.

7. And most importantly, I am informed that the City is currently ignoring these issues and in the Draft Local Coastal Program Amendment is proposing to eliminate the last opportunity to create a much needed Coastal Park at Ponto

Accordingly, I am requesting and making my position known that:

- I want the Draft Local Coastal Program Amendment to provide for a Coastal Park at Ponto.
- I want the City to provide a true Citizen-based Park Planning process for Ponto.
- I want the City of Carlsbad to budget money in their capital improvement program to purchase Planning Area F and build a park at Ponto to serve residents and visitors alike.
- I want to preserve what little Coastal Open Space Carlsbad has remaining for future generations and our visitor industry.
- I am not in favor of future residential development at Ponto, but think this last small amount of vacant Coastal land should be reserved for Coastal Recreation.

One of the reasons that this lovely community continues to attract residents and tourists is the beauty of our natural surroundings, including coastline , parks and open spaces. Residential development is highly desired.. but INLAND, please! Protect our Coastal open spaces, for our good, and our visitors, for now AND the future. Once we squander it, it cannot easily be reclaimed...

Thank you

Barbara M Kesten

Subject: City Park Standard in Southwest and South Carlsbad

Dear Carlsbad City Council:

The San Pacifico Community Association (SPCA) represents over 450 homes (around 1,000 Citizens) in the Southwest Quadrant/Park District of Carlsbad, and is the primary component and stakeholder of the Poinsettia Shores Planned Community (Poinsettia Shores Master Plan and Local Coastal Program). SPCA supported the residents in creating the Ponto Beachfront Development Review Committee (PBDR) to:

- Provide information to all San Pacifico residents (and surrounding neighborhoods) on the developments. (See [www.PontoLocals.com](http://www.PontoLocals.com))

- Obtain and consolidate constructive feedback from the residents. Give this feedback to the residents, developers and City so that we can have productive/timely input into the projects and their designs.
- Act as a strong, unified voice and with the support of our residents in upcoming Planning, Council and Coastal Commission meetings.

Since PBDRC has been formed there has been a growing participation and concurrence from other Carlsbad areas and groups on the consensus PBDRC has consolidated.

PBDRC and the SPCA are pleased that the City has taken action to fix a timeline defect in the Growth Management Program related to meeting a City Park standard. However there is another truly once in a lifetime opportunity to improve how the City Park standard is proposed to be met in Ponto and coastal South Carlsbad that we would like to request of the City Council. This opportunity stems from the fact that Ponto is the only vacant coastal land in South Carlsbad and is currently being evaluated for low-priority housing and other types of development. Should it be developed in this way, there will never be another opportunity to have a meaningful park in coastal Southwest Carlsbad west of Interstate 5. The request is to work with Pontolocal to provide a comprehensive and open process for citizens of the City [primarily Southwest and Southeast Carlsbad Citizens] to discuss and define possible better approaches to implement a coastal park in Southwest that can serve all of South Carlsbad. We recently had a community meeting attended by approximately 200 people and this letter reflects some of the near unanimous (90%+) concerns from that meeting. We believe these concerns are also likely to be reflective of many others living in South Carlsbad, and also in North Carlsbad.

The City Park Standard is “3.0 acres of Community Park or Special Use Area per 1,000 population **within the Park District**”. So for every 1,000 Citizens in a Park District, such as the coastal Southwest Quadrant Park District, there is to be 3 acres of City Park to meet the standard. The rationale for such a location specific standard is that parks should be distributed so as to be reasonably accessible by all citizens. It is also important to have reasonable and safe park access via walking and biking, not just by motor vehicles. The staff report on correcting the timeline defect in the Park Standard stated that correcting the timeline to correct the park quadrant deficits is “... specifically relevant to the southwest and southeast quadrants. As stated in the report a need for more park acreage in those two quadrants was identified four years ago (during FY 2012-13).” A 6.6 acre park deficit within the Southwest quadrant was identified in the Growth Management Monitoring Report for FY 2014-15. However the report indicates that “Based on the Fiscal Year 2015-16 Capital Improvement Program list of projects, Veteran’s Memorial Park (91.5 acres, with 22.9 acres applied to each quadrant) is proposed to be constructed prior to buildout.” Under this proposal the future Veteran’s Park, that is located in the Northwest Park District and located many miles away from the coastal Southwest and Southeast Quadrants and Park Districts, would be used meet the population and citizen demand for Parks for citizens within the coastal Southwest and Southeast Quadrant’s Park Districts. We know there is an outstanding opportunity for the City to do a great thing for the community and to add tremendous value to the quality of life by augmenting, enhancing, and/or adjusting planned park supply to better serve citizens and the City; and be more consistent with the General Plan and core values of the Growth Management Plan.

The fundamental intent of creating four Park Districts (one for each quadrant) and managing and matching demand and supply of City Parks into smaller geographical areas (quadrant park districts) is to make the supply of City Parks reasonably accessible to their demand and more equitably distributed for citizens. Equitable distribution of City Park facilities is the right thing to do and has many citizen and city benefits:

- Children and elderly can more easily walk and bike to City Parks when they are close by and within a safe walking and bicycling distance with properly designed access pathways;
- Park supply created so far away from park demand creates the need to drive in a car to access the park, thus increasing vehicle miles traveled (VMT). Depending on locations this also limits park access for citizens without cars or unable to drive;
- When city parks are accessible to their demand by walking/bicycling then less city park land is need to park cars. Citizens get more actual useable park space for each acre of park land;
- When city parks are close to their demand busy families can quickly get to them after their workday which allows more park time for families during busy weekends;
- Nearby city parks create a stronger sense of stewardship for the “neighborhoods” park and city parks in general. Citizens watch out and care for their nearby park;
- Nearby city parks that are equitably distributed and based on surrounding neighborhood demand serve to strengthen neighborhood quality and property values by providing park amenities close by. It is both a good neighborhood and economic development strategy to assure park demand and supply are locationally matched; and
- Fundamentally it is the right thing to do to place park demand and supply in close proximity to each other and promote and equitable distribution public facility demand and supply.

In coastal Southwest Carlsbad and South Carlsbad we have some glaring gaps in demand and supply of city parks. For instance:

The Carlsbad General Plan Open Space, Conservation and Recreation Element, Figure 4-3 Parks: Shows no existing or planned coastal parks or special use areas west of Interstate 5 for all of South Carlsbad. In North Carlsbad there are 10, parks and special use areas west of Interstate 5 and on or close to the beach (9 of these are existing parks and 1 is a future park). This seems a clear and inherently unfair distribution of coastal park facilities. This unfair distribution severely reduces critical access to coastal park open space near the beach for South Carlsbad Citizens (half the City and over 26,000 homes, and over 64,000 citizens).

This unserved demand for city park space in coastal South Carlsbad is evidenced by the dangerous use of the Carlsbad Boulevard [old highway 101] road shoulder and bike lanes and campground road for recreational purposes, parking demand and the frequent unauthorized recreational use of Ponto vacant land. People are using whatever land they can for needed recreational use. South Carlsbad Citizens in Aviara, La Costa, Rancho Carrillo, Bressi Ranch, La Costa Valley and all the other South Carlsbad inland neighborhoods have no coastal South Carlsbad City Beach Park areas to access the coast. Their only option is to drive significant distances (with increase VMT and greenhouse gas emissions] crosstown to access city beach parks in the North, or travel to Encinitas. This forces increased VMT and greenhouse gas emissions which is counter to both State and General Plan goals. Citizens in South Carlsbad only have a State Beach pay parking lot and a retreating primarily steep cobble beach as their “local” beach. The non-beach portion of the South Carlsbad State Beach campground is a road and lodging facility for primarily out-of-town visitors that are near this beach. It is not a city park. The Campground is not designed to serve the park needs of Carlsbad citizens, but is a great place primarily for visitors to affordably pay to spend nights camping near the beach. The lack of any park facilities at the campground is evidenced by the frequent use of the campground driveway (a significant area of the campground) by children and adults as a play area.

There is an added benefit in that adding a coastal South Carlsbad Ponto Beach Park would help alleviate growing overcrowding, and increased traffic and parking congestion at North Carlsbad's coastal parks.

Citizens west of Interstate 5 in South Carlsbad have very limited access to a city park. Depending on the neighborhood one lives in, access our nearest park [Poinsettia Park] is between a 2 to 4 mile trip. Residents must cross Interstate 5 using one of only two crossings in the space of over 3 miles. These crossings are on major multi-lane, higher speed roadways (Poinsettia Lane or Palomar Airport Road). The route is not the most safe or direct, and it forces one to drive in a vehicle to access a park which increases VMT. Park access for children, the elderly, and those walking dogs west of Interstate 5 in South Carlsbad is severely restricted or effectively eliminated.

Coastal Southwest and all of South Carlsbad have not met their quadrant's Park area standard since 2012 (per the City's Growth Management Program). A specific comprehensive and open discussion with the Southwest and all if South Carlsbad citizens on how that deficient should be resolved should occur. The current City solution to meet local park needs of coastal Southwest and South Carlsbad with a paper allocation of park acreage in the Northwest part of the City that is many miles away does not seem right. It seems inconsistent with the core values and Vision of our City.

From Carlsbad General Plan Community Vision:

"...the Carlsbad Community Vision, which is the foundation for this plan." This is the foundation for the General Plan.

"...In the future, ... social connections will be enhanced through ... more public gathering places, family-friendly activities, and open spaces within walking distance of people's homes ..."

"The community is proud of the exceptional amount of open space in the city, and envisions a future of continued City commitment to open space protection and strategic acquisitions to further the city's open space system."

"Parks, Fields, and Facilities for All Ages: The network of parks and recreation facilities will be improved to meet the community's active lifestyle needs. Such improvements may include the strategic addition of more parks, ... New facilities will be located to maximize use and access by all neighborhoods, tailored to the needs of local populations, and designed with all ages in mind."

"Beach Uses and Improvements: The beach is an important outdoor recreational resource, and protecting and enhancing access to the beach and the quality of the beach experience is a top community priority."

"... Access to the beach and the quality of the beach experience will be improved through new compatible and supportive uses on or in close proximity to the beach, which may include ... a park ..."

"Tailored Tourism Strategy: Tourism is an important component of the city's economy today, and it remains an attractive economic sector for the future since it emphasizes the very resources that make the city attractive to existing residents—the ocean and beach ..."

"Easy and convenient pedestrian connections will be available from every neighborhood to help children get safely to schools and parks."

From General Plan Land Use Element:

“Beach Access and Activity: ...the community expressed an overwhelming preference for an active waterfront development strategy, which provides opportunities for activities and uses to be more integrated with the ocean. ... Access to the beach will be enhanced through ... open space, parking, and amenities ...”

General Plan Land Use Policy: “2-G.20 Develop an active ocean waterfront, with new growth accommodated west of Interstate 5, to enable residents and visitors to enjoy more opportunities for ... recreating along the coastline. Develop public gathering places and recreational opportunities along the coastal corridor.”

The City’s Park and Recreation Master Plan includes many areas of direction that strongly support a coastal park west of interstate 5 in South Carlsbad. Many of the most important park facilities and program needs identified in the City’s Park and Recreation Master Plan could be most efficiently addressed with a coastal park in the Ponto area. There are also significant and unique opportunities to create both public/private and public/public partnerships that would not only help reduce City recreation costs but also expand and create unique and special recreational program opportunities currently identified in the City’s Park and Recreation Master Plan.

A Ponto city coastal park also implements a major General Plan policy which calls for an active waterfront and creates solutions to long standing Local Coastal Program policy and State Parks Campground issues. There are very unique and special land use compatibility opportunities and synergy from a coastal city park in south Carlsbad and Ponto area that are inline and implement high priorities identified in the City’s Park and Recreation Master Plan.

In summary, Carlsbad has a once in a generation opportunity to create very special coastal South Carlsbad Ponto Beach Park in South Carlsbad. This opportunity will be true to our Carlsbad Community Vision and General Plan and the heart and soul of our Growth Management Plan’s standard of matching park demand with park supply within a particular park district. We believe this request benefits not only coastal Southwest Carlsbad and South Carlsbad but all of Carlsbad and is more consistent with the City General Plan, Growth Management Program, and Parks Master Plan and will result in a better, more valued and more sustainable City.

We are a key Stakeholder in Ponto and the Poinsettia Shores Maser Plan and Local Coastal Program. We have been hearing similar concerns from other Carlsbad citizens about coastal beach park access and request that the City Council seize this opportunity to work with us to establish a comprehensive and open community discussion about the strategic acquisition of a coastal South Carlsbad Ponto Beach Park for South Carlsbad citizens and businesses. We also request before a solution to the 2012 Southwest quadrant park standard deficit is created we have an open citizen discussion with the Citizens of coastal Southwest Carlsbad on how that solution can better address the park demand created in the Southwest Park District with a better park supply created within that District. Like our City Park Standard says: “3.0 acres of Community Park or Special Use Area per 1,000 population **within the Park District**”. We request that a coastal City Park West of Interstate 5 be developed in South Carlsbad to be fair and equitable and to meet the needs of South Carlsbad for a coastal City Park to serve all the Citizens of South Carlsbad. This can take advantage of special land use synergies to help promote public/private collaboration, create added property and transit occupancy tax revenues for the City by creating a

*Concerns and requests submitted to Carlsbad City Council et. al.*

valuable and synergistic amenity [where none now exists] for over half the City and over 26,000 homes, along with providing support to our City's visitor serving businesses and activities. It is the right and smart thing to do.

The San Pacifico Community Association and PBDRC as key Stakeholders in Ponto wish to be a key participant any proposed City or CCC actions regarding these subjects, and would like to meet with you to see how we can discuss and advance this for the benefit of South Carlsbad Citizens. As we are citizen volunteers we sincerely appreciate advance notification to allow for preparation and coordination with our work lives and to communicate back to our members and other South Carlsbad Citizens. We wish to be notified in advance of any proposed actions related to the issues in thus letter. The San Pacifico Community Association contact information is:

Jim Nardi: [jtnardi1@msn.com](mailto:jtnardi1@msn.com)

Subject: Shopoff Ponto West and Ponto East land use planning and development permit applications - 1st application submittal 5/1/15 - GPA-15-01, MP-175 (L), LCPA-15-03, HMP-15-04, MS-15-02 & MS-15-03, CT-15-02 & CT-15-03, PUD-15-07 & PUD-15-08, SDP-15-08, CDP-15-14 & CDP-15-15; and 2nd application submittal 4/20/17 - MP-16-01, LCPA-16-02 amend 2017-01, HMP-15-04 & HMP-16-02, MS-16-02, CT-16-03, PUD-16-01 & PUD-16-02, SDP-16-02, CDP-16-07 & CDP-16-08

The above applications propose planning changes to the Poinsettia Shores Master Plan and Local Coastal Program [PSMP/LCP] and planning changes and development permits for Planning Area F of the PSMP/LCP. The City of Carlsbad's currently adopted Local Coastal Program [p. 101] for the site and the City's currently adopted PSMP/LCP zoning [p. 105] for the site is:

***"PLANNING AREA F:***

*Planning Area F is located at the far northwest corner of the Master Plan area west of the AT&SF Railway right-of-way. This Planning Area has a gross area of 11 acres and a net developable area of 10.7 acres. **Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an "unplanned" area, for which land uses will be determined at a later date when***

**more specific planning is carried out for areas west of the railroad right-of-way. A future Major Master Plan Amendment will be required prior to further development approvals for Planning Area F, and shall include an LCP Amendment with associated environmental review, if determined necessary.**

*The intent of the NRR designation is not to limit the range of potential future uses entirely to non-residential, however, since the City's current general plan does not contain an "unplanned" designation, NRR was determined to be appropriate at this time. In the future, if the Local Coastal Program Amendment has not been processed, and the City develops an "unplanned" General Plan designation, then this site would likely be redesignated as "unplanned." Future uses could include, but are not limited to: commercial, residential, office, and other uses, subject to future review and approval.*

**As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.** [Boldface and underline highlights added]

The current Carlsbad Local Coastal Program and PSMP/LCP for Planning Area F were adopted by the City and Coastal Commission in the mid-1990s. The City in late-1990s trying to create A Redevelopment Project Area and increase land use intensity and tax increment created another layer of planning with the planning effort called the Ponto Beachfront Village Vision Plan [PBVVP]. Redevelopment [and the tax motivation to increase land use intensity] no longer exists in California.

Most importantly the PBVVP planning effort did not comply with the City's Local Coastal Program for Planning Area F as confirmed in Public Records Request 2017-260. This is a fundamental flaw in the planning effort as there is a strong desire to create a City Park in this unserved Coastal area. The additional layer of PBVVP planning effort was primarily focused on land owners/developers wants, and did not engage the San Pacifico Community even though the planning effort was looking to fundamentally change the character of the remaining portion of our Coastal Planned Community.

The 2008-2015 General Plan Update planning effort also did not follow the City's Local Coastal Program requirements for Planning Area F as confirmed in Public Records Request 2017-260. That planning effort for the site referenced the flawed PBVVP planning effort. Like the PBVVP planning effort the process did not directly involve/engage our San Pacifico Community, but instead had the developer's paid representative on the Envision Carlsbad Citizens' Committee working with City Staff to represent the developer's interests.

The failure to comply with the City Local Coastal Program when proposing the PBVVP and General Plan Update changes from the currently zoned "Non-residential Reserve" potentially invalidates those proposed changes, or at the very least seriously flawed those planning efforts. This can be corrected however in resetting the planning efforts for Planning Area F to the currently zoned "Non-residential Reserve" status and using a Community Based Planning Effort that follows the City's Local Coastal Program requirements for Planning Area F. The Community Based Planning Effort should also involve the larger Carlsbad Community of Citizens in that Planning Area F is the last significant vacant area along Carlsbad's South Coast, and our North San Diego County coast, which has critical gaps in City and Coastal Park access and acreage.

The attached August 31, 2017 letter was sent to the Carlsbad City Council, Parks and Planning Commissions and Carlsbad staff; and California Coastal Commission Staff. The letter is from the San Pacifico Community Association. The San Pacifico Community Association is the largest part of the Poinsettia Shores Planned Community of which Planning Area F is apart. The letter identifies some of

the Planning Area F park issues, provides City Policy direction that supports a Ponto Beach Park, and respectfully asks that the City provide a Community Based Planning Effort to address the issues of a Ponto Beach Park on Planning Area F. For instance:

- No City Coastal Parks west of Interstate 5 in all of South Carlsbad, while there are 10 City Coastal Parks west of Interstate 5 in North Carlsbad. This is inequitable. This also increases VMT and overcrowding at North Carlsbad Coastal Parks.
- Huge gaps in City Park access and resources in Southwest Carlsbad west of Interstate 5, as identified in the City Park and Recreation Master Plan.
- Southwest Carlsbad has an existing 6.6 acre deficient in meeting the minimum Growth management Program required City Park acreage demand from development within the Southwest Carlsbad. Planning Area F is about 6.5 acres in size.
- The City's 1980's approach to address the minimum requirements of SW Carlsbad's park deficient is to not follow the letter of the Growth Management Program and provide a City Park "within SW Carlsbad"; but to dislocate park demand and supply by providing the park 'outside SW Carlsbad' making SW Carlsbad's Park miles away from the development it is intended to serve, making it inaccessible by young and old, reducing that park size due to parking needed to serve distant users, and increasing VMT to access a distant park. We respectfully request a SW Carlsbad Park should be provided "within SW Carlsbad" to serve the needs of the development "within SW Carlsbad", consistent with the letter of the Growth Management Program.
- City policy allows and supports the creation of City Parks beyond the minimum acreage requirements of Growth Management Program minimum Park standard, and the City has created such City Parks in other areas of the City.
- The San Pacifico Community Association has conducted member meetings and a survey; and 92% wanted a park/recreational use. The complete survey was transmitted in a subsequent email.
- There appears to be a significant shortage of Growth Management Program Open Space acres in the area of Planning Area F, and a Ponto Beach Park would significantly help address this shortage.

Planning Area F is about the exact same size as Carlsbad's Holiday Park, and can provide ball and play fields, low-cost citizen and visitor recreational access to the coast, and synergistic enhancement to the surrounding and nearby commercial hotels and State Campground Coastal visitor accommodations. Like Holiday Park, Ponto Beach Park can be a special Carlsbad Community event place that is so consistent with Carlsbad's Core Values.

A Ponto Beach Park is a very positive thing for all Carlsbad and our Coast. Resetting the planning efforts at Planning Area F to follow the Carlsbad Local Coastal Program requirements and providing a Community Based Planned Effort to fully evaluate and consider a Ponto Beach Park that planning effort is the Right Thing to Do.

Thank you. We sincerely appreciate your consideration. As mentioned earlier if you have any questions please contact us, and we would sincerely appreciate receiving a reply.

**Item #3 – Growth Management Program Open Space Standard not being met in Local Facility Management Plan Zone 9 [Ponto] and requesting the City require the developer(s) to amend the Local Facility Management Plan Zone 9 to show compliance with the City’s Growth Management Program Open Space Standard**

Dear Carlsbad City Council, Planning Commission and Planning Staff; and California Coastal Commission Staff

The following is being submitted by the San Pacifico Community Association Ponto Beachfront Development Review Committee. The Committee is composed of about 20 citizens and is charged by the San Pacifico Community Association with identifying and communicating Community consensus on proposed development in our Ponto Community. We would appreciate receiving a reply; and if you have any questions regarding its contents please contact the following committee members at:

Jean Camp: [jeanscamp@yahoo.com](mailto:jeanscamp@yahoo.com)  
Michael Sebahar: [sebbiesixpack@att.net](mailto:sebbiesixpack@att.net)  
Lance Schulte: [meyers-schulte@sbcglobal.net](mailto:meyers-schulte@sbcglobal.net)  
Gail Norman: [gnorman\\_ca@yahoo.com](mailto:gnorman_ca@yahoo.com)  
John Gama: [Johngama99@gmail.com](mailto:Johngama99@gmail.com)

Copy:  
Lee Leibenson: [lleibenson@waltersmanagement.com](mailto:lleibenson@waltersmanagement.com)  
Jim Nardi: [jtnardi1@msn.com](mailto:jtnardi1@msn.com)

Subject: Shopoff Ponto West and Ponto East land use planning and development permit applications - 1st application submittal 5/1/15 - GPA-15-01, MP-175 (L), LCPA-15-03, HMP-15-04, MS-15-02 & MS-15-03, CT-15-02 & CT-15-03, PUD-15-07 & PUD-15-08, SDP-15-08, CDP-15-14 & CDP-15-15; and 2nd application submittal 4/20/17 - MP-16-01, LCPA-16-02 amend 2017-01, HMP-15-04 & HMP-16-02, MS-16-02, CT-16-03, PUD-16-01 & PUD-16-02, SDP-16-02, CDP-16-07 & CDP-16-08

The above applications propose planning changes and development permits that require amendment to the Local Facilities Management Plan [LFMP] for Zone 9. The developer applicant Shopoff has filed with the City the attached Amendment to the LFMP for Zone 9 to show their proposed compliance with the City’s Growth Management Standards.

The Current LFMP for Zone 9 says Zone 9 already meets the Growth Management Open Space standard, but no data or evidence supports this statement. A Public Records Requests PRR-2017-164 and PRR-2017-288 were submitted to see if there was any data or evidence, and the City has confirmed that there is no record of data or evidence that shows that LFMP Zone 9 meets the minimum Growth Management Open Space Standard. Data related to the City of Carlsbad Annual Open Space Status

Report for Fiscal Year 2016/2017 July 1, 2016- June 30, 2017 in fact seems to show the exact opposite - the Growth Management Open Space Standard is not being met in LFMP Zone 9. The LFMP for Zone 9 should be required to be updated to provide the data and evidence to clearly and accurately show compliance with the Standard. The City's Growth Management Ordinance [CMC 21.90.130] specifically states that:

"The city council may initiate an amendment to any of the plans at any time if in its discretion it determines that an amendment is necessary to ensure adequate facilities and improvements."

"If at any time it appears to the satisfaction of the city manager that facilities or improvements within a facilities management zone or zones are inadequate to accommodate any further development within that zone or that the performance standards adopted pursuant to Section 21.90.100 are not being met he or she shall immediately report the deficiency to the council. If the council determines that a deficiency exists then no further building or development permits shall be issued within the affected zone or zones and development shall cease until an amendment to the city-wide facilities and improvements plan or applicable local facilities management plan which addresses the deficiency is approved by the city council and the performance standard is met."

We respectfully request the City Manager and City Council require the developer amending the LFMP for Zone 9 to provide a Growth Management Program Open Space analysis and show compliance with the Growth Management Open Space Standard. We believe the developer's applications to change land use planning and then apply for development permits should be considered incomplete until without having clear and documented data [maps, tables, and analysis as required by CMC 21.90] that shows compliance with the Growth Management Facility Standards – including Open Space.

We also would like to request the process of evaluation of this request and subsequent Amendment to LFMP for Zone 9 be well published to the Community and boarder Carlsbad Community given the long term concern Citizens have regarding Open Space and Open Space issues being a Core Value adopted by the City: "Prioritize protection and enhancement of open space ..." and another Core Value to "Build on the city's culture of civic engagement ...". Involving the Community in analyzing and addressing the LFMP Zone 9 Open Space can be a very positive community effort and experience and show how our Growth Management Program works.

Thank you. We sincerely appreciate your consideration. As mentioned earlier if you have any questions please contact us, and we would sincerely appreciate receiving a reply.

**Item #4 – Provided a survey of San Pacifico Community Association on community concerns and requests of the City regarding developers’ proposed development of last remaining vacant portions of our Coastal Planned Community’s [Ponto] Planning Area F by Shopoff, and Planning Areas G & H**

Subject: Shopoff Ponto West and Ponto East land use planning and development permit applications - 1<sup>st</sup> application submittal 5/1/15 - GPA-15-01, MP-175 (L), LCPA-15-03, HMP-15-04, MS-15-02 & MS-15-03, CT-15-02 & CT-15-03, PUD-15-07 & PUD-15-08, SDP-15-08, CDP-15-14 & CDP-15-15; and 2<sup>nd</sup> application submittal 4/20/17 - MP-16-01, LCAP-16-02 amend 2017-01, HMP-15-04 & HMP-16-02, MS-16-02, CT-16-03, PUD-16-01 & PUD-16-02, SDP-16-02, CDP-16-07 & CDP-16-08

The San Pacifico Community Association requests the community desires expressed in the following survey from our Community meeting on May 3<sup>rd</sup> be entered into the public record for the above planning applications, and any subsequent City and California Coastal Commission planning applications for the properties East and West of Ponto Road and North of Avenida Encinas [Shopoff option site]. The San Pacifico Community Association is the majority property association in the Poinsettia Shores Planned Community [Poinsettia Shores Master Plan and Local Coastal Program] of which the properties East and West of Ponto Road and North of Avenida Encinas [Shopoff option site] are also apart. The Community consensus does not think the above proposed land use planning and development permit applications are compatible with the established lower density land use, lower development intensity,

building height and mass, and character of our Coastal Planned Community and the Coastal Act, requirement that development be "visually compatible with the character of the surrounding area."

We wish the City would utilize a Community based planning approach vs. a developer driven and focused process to develop that last remaining vacant Coastal land in South Carlsbad.

The Community survey: On May 3<sup>rd</sup>, a San Pacifico Community meeting was held and approximately 200 citizens from San Pacifico attended. A Shopoff representative was invited and attended. The meeting provided summary information about the current planning processes and the two developers' proposals. Some paper surveys were available and about 60 were completed and returned that evening. Those unable to get a paper survey were able to complete an almost identical survey on-line at [www.pontolocals.com](http://www.pontolocals.com). About 90 more surveys were completed on-line. The following tabulates both survey results.

Ponto East and Ponto West - Shopoff questions – May 3, 2017

1. **DWELLING DENSITY:** The area East of Ponto Road is now zoned R-23 (15 dwelling units per acre minimum to 23 dwelling units per acre maximum), not including State affordable housing density bonus:
  - Shopoff is proposing 137 dwellings on 6.5 net acres (= 21 dwelling units/acre)
  - Potentially with additional dwellings for an affordable housing density bonus

**Should Shopoff's proposed density be reduced closer to the 15 dwelling an acre minimum as per the General Plan?**

**148/156 = yes = 95%**

**8/156 = no = 5%**

2. **HEIGHT OF BUILDINGS:** currently proposed on the East side of Ponto Road are:
  - 40 feet high (3 story)
  - These buildings would be the tallest along the SW Carlsbad coast
  - Commercial buildings like hotels are limited to 35 feet tall
  - The building heights for the Poinsettia Shores Planned Community [which San Pacifico is majority of the development and the Shopoff and Kam Sang proposals are minor developments] limits building heights to 30-35 feet.
  - All San Pacifico residential buildings except Satalina [35 feet tall] are no taller than 30 feet and must have a minimum 3/12 roof pitch
  - The Ponto Beachfront Village Vision Plan that provides additional development guidance for the Shopoff proposed development specifically calls this area the "townhomes" area and shows 2-story [under 30 feet] townhomes as the 'vision' for the site.

**Should the Shopoff proposed 3-story and 40 feet building heights be reduced to 2-story and/or no taller than 30-35 feet maximum to be consistent with the vision and more compatible with the Poinsettia Shores and San Pacifico community?**

**157/162 = yes = 97%**

5/162 = no = 3%

3. **BUILDING INTENSITY:** The Shopoff proposed stack flat residential buildings have underground parking to allow more land use intensity and building mass. The proposed buildings run in a fairly contiguous cluster west of the railroad right-of-way from Avenida Encinas north to Ponto Storage.
- Shopoff's proposed residential square footage [not including any balconies, private recreation or ancillary buildings] is 247,100 square feet total in 3 stories at 40 feet high.
  - For reference the Carlsbad Costco building is about 115,500 square feet in 1 story at 35 feet high. So Shopoff's proposed residential building footprint is approximately 72% of the Carlsbad Costco, though it would be 5 feet higher than Costco.

**Is Shopoff's proposed building intensity compatible with San Pacifico and the Poinsettia Shores Community and appropriate?**

149/159 = no = 94%  
10/159 = yes = 6%

**Should Shopoff place story poles on-site to show and photo document the proposed building mass?**

146/155 = yes = 94%  
9/155 = no = 6%

4. **THE BEACHFRONT VILLAGE COMMERCIAL SITE:** west of Ponto Drive proposes some design issues that may be of concern:
- A driveway entrance/exit along Avenida Encinas will make pedestrian/bike travel to the beach less safe.
  - The site is proposed to filled with soil to lift the ground level at Coast Highway 9 feet higher and buildings put upon this higher 'building pad'
  - The proposed building designs and material qualities may be of concern
  - A proposed grassy park-like 'common area' that can be used by customers and community may connect with the City's land and planned trail under Coast Highway [Carlsbad Boulevard]

**A. Should a driveway if needed be on Avenida Encinas or on Coast Highway?**

68/108 = Coast Highway = 63%  
56/98 = Ponto Road = 57%  
22/108 = Avenida Encinas = 20%  
4/59 = Both = 7%  
3/59 = Neither = 5%

**B. Should the site be filled 9 feet or to what height?**

108/152 = no = 71%

14/152 = yes = 9%

30/152 = not sure = 20%

**C. Are the proposed building design and qualities sufficient to be the commercial and community heart of the Ponto Beachfront Village? Suggestions?**

31/43 = No = 72%

4/43 = yes = 9%

8/43 = did not respond = 19%

**D. Is the proposed 'common area' desirable? If so, do you prefer seating, grass area, trail, or other?**

102/150 = yes = 68%

29/150 = no = 19%

23/150 = don't know = 15%

36/91 = Grassy area = 39.6%

31/91 = Trail = 34.1%

17/91 = Other = 18.7%

16/91 = skipped = 17.6%

7/91 = Seating = 7.7%

**5. THE POINSETTIA SHORES MASTER PLAN** and Local Coastal Program require prior to any land use change on the Shopoff site [approximately 10 net acres] a documented evaluation of making the East of Ponto Drive site recreation facilities (i.e. "public park"), or lower cost beach visitor accommodations.

- Since 2012 the San Pacifico, Ponto and entire Southwest quadrant of Carlsbad have been in a Park standard deficient [not meeting the City's minimum 3 acres of Park per 1,000 population City Growth Management Program Standard].
- In 2015 our Southwest quadrant needed 6.6 acres of new City Park to comply with Growth Management Standards.

**Should the Shopoff East site [or portion of the site] be: (circle one or more, give examples)**

1. Recreational,

2. Lower cost visitor accommodations,

3. Residential, or

4. Visitor serving commercial/recreation uses?

5. Other

140/155 = Park/recreational = 92%

**27/155 = Visitor serving commercial & recreation = 17%**

**6/155 = Residential = 4%**

**2/155 = Lower cost visitor accommodations = 1%**

6. **PARKING:** There is not a lot of excess or extra parking in the current Shopoff proposal and this will not be a “Gated” community. Concerns have been raised regarding vacation rental by owner (VRBO) and beach access parking in this new development.
- Parking in this area is already a problem on weekends and during the summer
  - Additional residential units and VRBO will make this problem worse

**A. Should Shopoff modify their development plans to accommodate more parking for potential VRBO parking in their development? Yes \_\_\_ or No \_\_\_.**

**125/160 = yes = 78%**

**23/160 = no = 15%**

**B. Have you experienced problems with VRBO and parking in your neighborhood and if so, explain.**

**79/139 = no = 57%**

**38/139 = yes = 27%**

**22/139 = did not respond = 16%**

**C. What parking solutions would you propose?**

Following are the replies, it appears a good study to define the needed parking supply and design solution to assure sufficient parking is desired.

- Require city standards or adhere to city vision plan.
- A professional parking study should be conducted that evaluates the current and future PUBLIC parking demands, before it is a daily problem.
- A reasonably priced parking lot/structure.
- All new buildings must have sufficient parking planned onsite.
- Amble parking within Shopoff plans to cover daily business transactions, new homeowners, and beach parking which will inevitably be in that area.
- angled parking on street, underground parking
- Below ground parking garages
- Eliminate the proposed development.
- I propose that the city better address the vacation rental issue.
- I really do favor angled parking on Ponto as an alternative, regardless of the VRBO issue.
- I think underground would be ideal, however, what about water drainage and flooding being close to the water. Would homeless people make it a new home?
- I think VRBO and AirBnb needs to be addressed like it is in our community CC&Rs. They should not allow Vacation rentals for no less than 30 days minimum. Maybe even give them stricter rules. As for parking, the city needs to regulate the people

who camp and live in their vehicles on Ponto drive. Hopefully Shop off can help mitigate this growing problem with some type of solution.

- I'd propose angled parking on the street with meters and a requirement that homeowners park in their designated areas. I suggest Shopoff make the resident space sizes wide enough to include all vehicles, large and small.
- I'm not a parking expert but please don't try to use loop holes in the planning of buildings to wiggle out of providing proper parking.
- Increase parking for the airBandB demand. The issues parking, noise, use of common areas, change in neighborhood character are all fairly obvious and having to be addressed. The City needs to do its job to make sure the impacts are addressed. If City standards are out-of-date or inadequate then change them to address the impacts.
- Keep development parking to traditional Carlsbad standards. No "park in lieu" fees. Two bedroom condo or hotel suites should have two off road parking spaces. In recent history, Carlsbad has been allowing development without adequate parking!
- less buildings will mean less parking needed
- Lower density, stricter rules with rentals.
- mandatory two parking spaces/garage with no street park 11pm-5a.m
- More off-street parking.
- More parking at the beach on 101. Diagonal parking to allow for more -- explore parking on east side of 101.
- More parking spots within plan. Traffic appears to be a major problem now. More people...twice the cars.
- No VRBO should be allowed.
- Not have this development
- not sure
- parking garages
- Parking passes to hang in car window? BTW - THANK YOU for all your hard work. I am very appreciative for what you are doing for our neighborhood!
- Parking structure to the north
- Provide a larger area for VRBO as well as occasional day visitors. Only limited parking is presently provided. Lately as we have become more know more cars are parked on weekends on the streets.
- public underground parking
- rated parking in strip between Carlsbad state park and Carlsbad boulevard; train station; roadside in front of water plant on Encinas; park/ride at I-5 and La Costa Dr. in Encinitas
- Subterranean parking for all businesses and residents
- The job of a traffic engineer
- The more underground parking the better. Security at night to enforce only residential parking. Additional storage units for residents to store bicycles & surfboards.
- There simply should be REQUIRED the actual needed amount of parking according to the proposed density PLUS additional accommodation for public needs.
- underground
- Underground garage.

- **Underground parking**
- **underground parking**
- **Underground parking or drop the number of units. It's not rocket science**
- **What happened to underground parking? Look at the above ground parking structure Hilton put in do we want a series of parking structures west of the railroad?**

## Item #5 – Correction of the 8/17 Shopoff mailer

---

Emailed: 3-22-18

To: [council@carlsbadca.gov](mailto:council@carlsbadca.gov); [mike.pacheco@carlsbadca.gov](mailto:mike.pacheco@carlsbadca.gov); [Don.Neu@carlsbadca.gov](mailto:Don.Neu@carlsbadca.gov); [manager@carlsbadca.gov](mailto:manager@carlsbadca.gov); [chris.hazeltine@carlsbadca.gov](mailto:chris.hazeltine@carlsbadca.gov); [gbuhr@coastal.ca.gov](mailto:gbuhr@coastal.ca.gov); [Erin.Praher@coastal.ca.gov](mailto:Erin.Praher@coastal.ca.gov); [debbie.fountain@carlsbadca.gov](mailto:debbie.fountain@carlsbadca.gov); with copy to: Jim Nardi [jimn8916@gmail.com](mailto:jimn8916@gmail.com); WILLIAM VAN CLEVE [billvanclave@prodigy.net](mailto:billvanclave@prodigy.net); Avril van Zyl [vanzyl.aakc@live.com](mailto:vanzyl.aakc@live.com); Tony Ruffolo [tonyruffolo616@gmail.com](mailto:tonyruffolo616@gmail.com); Chas Wick [chaswick@reagan.com](mailto:chaswick@reagan.com); [jeanscamp@yahoo.com](mailto:jeanscamp@yahoo.com); [sebbiessixpack@att.net](mailto:sebbiessixpack@att.net); Lance Schulte [meyers-schulte@sbcglobal.net](mailto:meyers-schulte@sbcglobal.net); Lee Leibenson [lleibenson@waltersmanagement.com](mailto:lleibenson@waltersmanagement.com)

Dear Carlsbad City Council, Planning Commission and Planning Staff; and California Coastal Commission Staff

The following is being submitted by the San Pacifico Community Association Ponto Beachfront Development Review Committee. The Committee is composed of about 20 citizens and is charged by the San Pacifico Community Association with identifying and communicating Community consensus on proposed development in our Ponto Community.

We request that this communication and any replies be part of the official record for the Citywide Local Coastal Program Amendment process, the City's planning to address the City Park deficit in the Southwest Quadrant [South Coastal Carlsbad], and the applications to change City ordinances and plans and then apply for development permits listed the Subject line below.

We would appreciate receiving a reply. If you have any questions regarding the communication's contents please contact the following committee members at:

Jean Camp: [jeanscamp@yahoo.com](mailto:jeanscamp@yahoo.com)  
Michael Sebahar: [sebbiessixpack@att.net](mailto:sebbiessixpack@att.net)  
Lance Schulte: [meyers-schulte@sbcglobal.net](mailto:meyers-schulte@sbcglobal.net)  
Gail Norman: [gnorman\\_ca@yahoo.com](mailto:gnorman_ca@yahoo.com)

Subject: Citywide Carlsbad Local Coastal Program Amendment, City's SW Quadrant Park planning compliance, and Shopoff Ponto West and Ponto East land use planning and development permit applications - 1st application submittal 5/1/15 - GPA-15-01, MP-175 (L), LCPA-15-03, HMP-15-04, MS-15-02 & MS-15-03, CT-15-02 & CT-15-03, PUD-15-07 & PUD-15-08, SDP-15-08, CDP-15-14 & CDP-15-15; and 2nd application submittal 4/20/17 - MP-16-01, LCPA-16-02 amend 2017-01, HMP-15-04 & HMP-2017-01, MS-16-02, CT-16-03, PUD-16-01 & PUD-16-02, SDP-16-02, CDP-16-07 & CDP-16-08

Response to Shopoff mailer of August 15, 2017: The truth  
Verifiable data from the Ponto Beachfront Development Review Committee

Shopoff's letter of August 15, 2017, addressed to "Dear Neighbor" was highly misleading, and so the Ponto Beachfront Development Review Committee feel compelled to shed light on the truth's and mistruth's related to Shopoff's mailer about the proposed Ponto Beachfront development.

### **1. NEIGHBOR AND PROPERTY OWNER**

Shopoff is not, as they say, our neighbor who owns the property east of Carlsbad Blvd and north of Avenida Encinas. The actual 'property owner' is LSFS Carlsbad Holding LLC at 2711 North Haskell Avenue, Suite 700; Dallas, TX 75204.

Shopoff is a speculative land developer from Orange County, and during an initial meeting with your Ponto Beachfront Development Review Committee (PBDRC), Shopoff said that they have a 5-year option to purchase the property. Shopoff's focus is not on the best interests of our neighborhood community, but on those of their investors, as explicitly stated by Shopoff on their website ([www.shopoff.com](http://www.shopoff.com)): "Shopoff Realty Investments is a private real estate investment company with a proven track record of creating wealth for our investors — and a singular commitment to placing their needs above all else."

### **2. MISLEADING SHOPOFF INFORMATION - CHECK THE FACTS**

Shopoff's PR firm (Roni Hicks) is creating PR pieces that misrepresent the facts and hide the complete information from you. As you read through the 8/15/17 Shopoff letter, you'll notice they do not provide citations or documentation that can be cross-referenced by you to verify their statements. Our link at [www.pontolocals.com](http://www.pontolocals.com) has the exact language from the current City and Coastal Commission's planning and zoning for Planning Area F of Poinsettia Shores Master Plan and Local Coastal Program including Shopoff's proposed changes, and the complete Ponto Beachfront Village Vision Plan.

Please let us know the questions you may have at [www.pontolocals.com](http://www.pontolocals.com) and/or talk with any of your PBDRC neighbors.

### **3. MEETINGS WITH NEIGHBORS**

There are a few key, and very core, community issues we the PBDRC have heard from you, and have communicated to Shopoff. First, you would like a Ponto Beach Neighborhood Park for the east side of Ponto Road. However, if that part of our Planned Community is to be built out as a Townhome project (like the images in the Ponto Beachfront Village Vision Plan) then it should be more compatible with San Pacifico, should have lower density and lower building heights, and should be less massive than what Shopoff is proposing. Shopoff has repeatedly said to the PBDC that Shopoff will NOT make changes to their development proposal to address your following core concerns:

- If there is to be a residential development, it should be like the images in the Ponto Beachfront Village Vision Plan: Shopoff is proposing a tall and massive wall of stacked flat condos, not 2-story Townhomes as called for and shown in the Ponto Beachfront Village Vision Plan (PBVVP). See Shopoff's Stacked Flat images compared to the PBVVP Townhome images. See the PBVVP, and the 1<sup>st</sup> and 2<sup>nd</sup> Shopoff Planning Submittals at [www.pontolocals.com](http://www.pontolocals.com)
- Lower density: Even though Shopoff's development would be part of our Poinsettia Shores (San Pacifico, et al.) Planned Community, Shopoff is proposing residential density (21 dwelling

units/acre) that is 250% more than, or 3.5 times San Pacifico’s residential density (6 dwelling units/acre). The City’s General Plan promises only the minimum 15 dwelling units/acre density or 71% of the density Shopoff is proposing. See the “Ponto” unit capacity table below from the City of Carlsbad General Plan Housing Element Table B-1 that lists 98 dwellings for the site on the east side of Ponto Road and 11 optional dwellings on the west side of Ponto Road for 109 total units for both sites, v. Shopoff’s proposed 136 dwellings on the east side of Ponto Road. Table B-1 is on page B-2 of the City’s Housing Element on the city’s website: <http://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=29360>

Table B-1: Vacant Sites for Lower and Moderate Income Housing						
APN	General Plan Designation <sup>1</sup>	Zoning District	Site Size (Acres)	Unit Capacity, by Household Income		
				Very Low	Low	Moderate
2090901100 (Sunny Creek)	R15 (12 du/ac)	RD-M	9.6	-	-	115
2161404300 (Ponto)	R23	P-C	6.5	-	-	98
	GC (Mixed Use) <sup>3</sup>	P-C	3	-	-	11

You can see the Poinsettia Shores Master Plan and Local Coastal Program for our San Pacifico density and the Shopoff’s planning applications on [www.pontolocals.com](http://www.pontolocals.com)

- **Lower building heights:** Shopoff is proposing 40-foot-tall buildings. Almost all of the buildings in the Poinsettia Shores (San Pacifico, et al.) Planned Community are around 26 feet tall, with a maximum potential height of 30 feet. Only Santalina’s maximum potential building heights exceed that, at 35 feet - as they backup to Interstate 5. Shopoff’s proposed building height is 154% the height of most of our Planned Community. See Shopoff’s 2<sup>nd</sup> planning submittal at [www.pontolocals.com](http://www.pontolocals.com)

**Shopoff should place “story-poles” on the site to allow you to see their actual proposed height and massiveness, so you can determine the appropriateness for San Pacifico.**

#### 4. SHORT TERM RENTALS AND PARKING

San Pacifico HOA has restrictions on short term rentals. Shopoff has agreed with your PBDRC suggestions to likewise restrict short-term rentals. However, Shopoff cannot prevent a future HOA Board from amending the CC&Rs and by-laws, which could allow short-term rentals in the future. In addition, Shopoff is providing minimal private streets and minimal public street parking, so any parking shortage will spill over to San Pacifico. Their design should address short term rental impacts, including noise, high occupancy/congestion, parking, etc.

#### 5. ZONING

Shopoff states that their plans are consistent with current zoning. This is not true. The current zoning for the site is in the Poinsettia Shores Master Plan and Local Coastal Program, in which Shopoff (or the City) needs to make major changes to this zoning before Shopoff’s development proposals can be permitted by the City and California Coastal Commission. Look at the yellow signs on the sites which show Shopoff’s applications to change zoning (MP-16-01, and LCAP-16-02 to amend 2017-01). Go to [www.pontolocals.com](http://www.pontolocals.com) to see Shopoff’s actual proposed changes to the zoning. Changing the Master

Plan and Local Coastal Program will require approval from both the City of Carlsbad and the California Coastal Commission.

The current zoning (in the Poinsettia Shores Master Plan and Local Coastal Program) for the site is “Non-Residential Reserve”. That zoning requires that “As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad. ” The developer and City failed to consider and document these needs when the PBVVP and 2015 General Plan Update were approved. We are not sure if the Developer or City are considering and documenting this now. See page 101 of the City of Carlsbad Local Coastal Program at <http://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=24088>

## **6. GENERAL PLAN UPDATE**

The City’s General Plan update in 2015 did change the City’s General Plan land use designation to consider commercial and residential land uses for the site. However, because the site is in the California Coastal Zone, the California Coastal Commission must ‘certify’ the update to the City of Carlsbad Local Coastal Program before the City’s General Plan change is fully approved. See Carlsbad General Plan Land Use Element page 2-26 at <http://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=24087> that states:

“The California Coastal Act regulates all development within the state-designated Coastal Zone. ...The Coastal Act requires that individual jurisdictions adopt local coastal programs (LCP) to implement the Coastal Act. ... Development in the Coastal Zone must comply with the LCP in addition to the General Plan. The city’s LCP Land Use Plan will be updated consistent with this General Plan. However, to take effect, the LCP must be certified by the Coastal Commission as well as adopted by the city. Until such time that this occurs, the existing (as of 2013) LCP must be adhered to. ... Within the Coastal Zone, no discretionary permit shall be issued by the city unless found to be consistent with the General Plan and the LCP. In the event of conflict between the provisions of the General Plan and LCP Land Use Plan, the terms of the LCP Land Use Plan shall prevail.”

The Coastal Commission staff has indicated that “The City has received direction from both the Commission (May 2016 CCC hearing) and Commission staff, that as a part of this update the City shall undertake an inventory of visitor serving uses currently provided within the City’s Coastal Zone which will then serve to inform updates to the City’s land use and zoning maps as necessary. **This inventory could have future implications for the appropriate land use and zoning associated with the Ponto area.**”

## **7. CITIZENS’ INPUT NEEDED**

The City and California Coastal Commission have the discretion to approve or deny a developer’s application to change City regulations and developer’s proposed development applications. The process requires that the Carlsbad Planning Commission and City Council, and California Coastal Commission hold Public Hearings to hear community concerns before making any approval or denial of applications. If you want to provide your input and be notified of any of these upcoming Public Hearings, please contact Walters Management and [www.pontolocals.com](http://www.pontolocals.com). Your PBDRC will consolidate and forward everyone’s email input to the City and Coastal Commission and notify you in advance to attend the public hearings.

## **8. PONTO BEACHFRONT VILLAGE VISION PLAN (PBVVP)**

Shopoff claims in their letter that their design implements the 2-story Townhomes shown in the PBVVP. This is clearly not true. Shopoff is proposing 3-story, 40-foot-tall and massive, 60% lot coverage, Stacked Flats – not 2-story townhomes. The PBDRC has repeatedly asked Shopoff that if they are proposing residential dwellings, to build the Townhomes as showed on Chapter 3 pages 3-8 & 9 of the PBVVP. Shopoff has consistently refused to propose a 2-story Townhome project as shown in the PBVVP, and are misleading you. Go to [www.pontolocals.com](http://www.pontolocals.com) to see the PBVVP.

## **9. RESIDENTIAL DENSITY**

Shopoff critically fails to tell you the entire truth that the minimum density for the R-23 land use category is 15 dwellings per acre. Developing at the minimum General Plan density would allow 98 dwellings on the East site of Ponto Road and 11 dwellings on the west side of Ponto Road for a total of 109 dwellings. Shopoff proposes 136 dwellings or about 125% the minimum density. See Carlsbad General Plan Housing Element “2161404300 (Ponto)” in Table B1 on page B2 at <http://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=29360>

## **10. AFFORDABLE HOUSING**

For the site that Shopoff wants to develop, the City of Carlsbad requires at least 20% affordable housing. It is unlikely if Shopoff could even ask for a Density Bonus. The PBDC is checking into this.

## **11. TRAFFIC IMPACTS**

Shopoff’s project will increase traffic in the area. The San Pacifico Community and its PBDRC have repeatedly asked Shopoff to lower their density, thus decreasing their traffic impacts. Shopoff has refused to reduce density and thus to reduce their traffic impacts.

## **12. COMMUNITY INPUT AND DESIGN**

The proposal changes that Shopoff lists in their letter reflect some of the changes the PBDRC has conveyed to Shopoff as desires of the San Pacifico Community. Many of the changes that Shopoff lists were also identified by the City as needed changes to Shopoff’s proposals. Shopoff has acknowledged that these changes improved their prior proposals. However Shopoff has failed to make changes to address the most important and fundamental desires of the San Pacifico community:

- creating a Ponto Beach Neighborhood Park (the Local Coastal Program also requires that this site be considered for a park)
- reducing density to be near 15 dwelling units per acre
- withdrawing Shopoff’s proposed zoning change to transfer optional residential density from the west to the east side of Ponto Rd.
- limiting building height to no greater than 2-stories and no taller than 30-35 feet
- reducing building mass and intensity to be consistent with San Pacifico
- creating a wide public coastal view corridor along Avenida Encinas
- removing the proposed main commercial driveway entry on Avenida Encinas
- providing sufficient public beach parking

Go to [www.pontolocals.com](http://www.pontolocals.com) to see Shopoff’s proposed development.

## **13. NEXT STEPS**

*Concerns and requests submitted to Carlsbad City Council et. al.*

In their letter's "Next Steps", Shopoff failed to disclose that they, or the City on the developer's behalf, will need to receive California Coastal Commission approval of Shopoff's needed amendments to the Local Coastal Program after all Carlsbad City approvals.

The Poinsettia Shores Master Plan and Local Coastal Program for the site requires that **"As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad."** Also the California Coastal Commission staff has stated that the City "shall undertake an inventory of visitor serving uses currently provided within the City's Coastal Zone which will then serve to inform updates to the City's land use and zoning maps as necessary. **This inventory could have future implications for the appropriate land use and zoning associated with the Ponto area."**

Not completely disclosing the necessary and critical California Coastal Commission and public review and hearing process is yet another example of Shopoff misleading you.

The PBDRC has put on our [www.pontolocals.com](http://www.pontolocals.com) website the actual City and Coastal Commission Planning documents along with Shopoff's actual proposed changes to zoning and development proposal, so you can see and confirm the facts for yourself.

Thank you for caring about our coast and assuring we Develop Ponto Right.

Sincerely,  
Your PBDRC

## Item #6 – Questions for City and Shopoff regarding Shopoff Planning Applications

Subject: Questions for City of Carlsbad and Shopoff re: Shopoff Planning Applications for Ponto Beachfront Development

Dear Matt Hall- Mayor City of Carlsbad; Council Members; City Staff,

Please find attached 3 pages of questions we have for the City Council, City staff and Shopoff regarding the Ponto Beachfront proposed development plans and applications. We thank you for taking the time to review our questions that we have attached. Please feel free to contact Lance Schulte or me with any questions you may have.

Respectfully,

Chas Wick

Ponto Beachfront Development Review Committee

Erin, Gabriel,

Please find attached the questions we sent to City Council and staff regarding Shopoff's proposed plans and applications. Thank you for taking the time to review these questions. Thank you also for meeting with us awhile back in your offices and listening to our questions. Please call/ contact Lance or me if you have any questions about anything that may fall in your purview for this project.

Thanks,

Chas Wick

Questions for City and Shopoff re Shopoff Planning Applications

### **PLANNING QUESTIONS FOR THE CITY**

- 1) Please provide information on what other residential developments in Carlsbad are at the proposed intensity of Shopoff's proposed residential development on a Floor to Area (FAR) Ratio. Shopoff's proposed development has an FAR of 1.79 that will be 3.5 times the intensity of the Hilton Cape Rey and we believe, based on public records requests, will be the most intense residential development in all of Carlsbad. It will propose a new intensity of residential buildings inconsistent with the long established residential character of the surrounding community and Carlsbad's Coastal Zone.
- 2) Please provide details and justification on why the City is entertaining 3 story, 40 foot tall structures in an area that should be 2 story, 30-35 foot high to be consistent with the Ponto Beachfront Village Vision Plan images and compatible with the surrounding neighborhood and comply with the policy requirements of the Local Coastal Program and California Coastal Act ?

- 3) Please provide details and justification as to why the City is entertaining allowing 136 dwelling units on a parcel that should have a minimum requirement of 98 dwelling units.
  - a. Please confirm whether or not you are considering allowing a density transfer from the commercial parcel to the residential parcel. If so, please confirm that you will first need to amend the General Plan and make General Plan findings to properly make this transfer.
  - b. Please confirm that if the density transfer between parcels goes through a General Plan Amendment, that the 25% portion of commercial land used for residential density and being transferred is retained as Open Space on the Donor commercial site. This prevents “Double Dipping”. If a density transfer is allowed (which means you are linking parcels), that you will require that Building Completion Certificates, Final Inspections and/or Occupancy Certificates are granted for the Commercial buildings PRIOR to any Occupancy Certificates being issued for the residential units. This will help ensure that the Commercial buildings are actually going to be built and not just that the Commercial property was used to gain dwelling units on the residential site.
  - c. Please explain how the Shopoff proposal of 21 du/acre fits with the Ponto Village Vision Plan of 12-16 du/acre and why you are not having Shopoff design at the minimum of R-23 which is 15 du/acre, as shown in the Housing Element.
- 4) On the previous issue of Shopoff’s plans dwg A1-1, there was a Common Area/Open Space of 0.57 acres next to the Commercial buildings. On the current Shopoff plan dwg A1-1, the Common Area/Open Space has been eliminated or deleted. (See their plans.)

In fact, we understand from the US Fish and Wildlife, that Shopoff mowed down too much of the protected sage scrub habitat (endangered gnatcatcher habitat) that was originally in this Open Space and will be penalized – likely having to increase protected habitat by 3 to 15 times that amount that Shopoff destroyed. Please explain how the City allowed this to happen?

- a. Please explain what happened to The Commons/0.57 acres of grassy space the community was originally promised? Was the City involved in this decision?
  - b. Please explain what will happen to the Commercial site layout once the protected habitat mitigation area is increased. Will parking be put underground? Will Shopoff reduce the current size of the Commercial buildings?
  - c. There appears to be a drainage basin proposed for the protected habitat area. Is a drainage facility consistent with habitat preservation? Is the drainage basin fenced? What will happen to this basin once the protected habitat area is increased?
- 5) Please explain why the City is entertaining a subdivision of 9 lots on the residential (5) and commercial (4) sites.
    - a. Will this increase set-backs on each buildable lot and if so, by how much? Have you taken that into consideration?

- b. Since the entitlements will likely be sold off to separate developers, how will the City ensure all the plan requirements are met?
  - c. How will the City ensure that the buildings provide a cohesive and consistent construction and visible quality/fit with one another?
  - d. How will the City ensure all residential and commercial projects go forward together in the most effective and shortest timeframe for surrounding neighbors?
  - e. How will ownership/HOAs be handled if you have a multitude of different developers for the 2 current parcels?
- 6) Please strongly consider angled parking on Ponto Road to maximize beach parking. Please explain why you continue to push for parallel parking on Ponto Road and what long-term beach parking demand analysis is being used to not provide angled parking that could maximize beach parking supply. Please detail how many cars you can get with angled parking versus parallel parking.
- 7) What other traffic measures and improvements are you having Shopoff make?
- 8) What are the Carlsbad Boulevard frontage improvements you are having Shopoff make?

Poinsettia Shores Master Plan and Local Coastal Program requires Shopoff to provide Carlsbad Boulevard frontage improvements. The City's ROW and older PCH ROW fronts Shopoff's site.

#### **QUESTIONS FOR SHOPOFF ON THEIR PLANS AND APPLICATION**

- 1) The pedestrian and bike travel paths on the Roundabout on Avenida Encinas appears unsafe. Please review and reply on how to make this a safer situation for all concerned.
- 2) There appears to be an unsafe pedestrian path at the commercial Avenida Encinas main entry. Please review and reply on how to make this a safer situation for pedestrians and bikes. A commercial main entry on Carlsbad Boulevard is a better approach and has been done many times in Carlsbad.
- 3) What are the UBC requirements on elevators? How many are required per unit/building? Does Shopoff's plans have enough? Will elevator equipment exceed building heights or require deeper subterranean infrastructure ?
- 4) How will Shopoff sewer the property?
- 5) Can you please provide a diagram that shows trash/recycling storage and how trash/recycling vehicles will enter, manage trash / recycles and exit the sites? It appears trash and recycles will be underground on the residential site.
- 6) What is the distance of balconies to the property line at Avenida Encinas? Is that per Code?

- 7) There appears to be insufficient landscape materials proposed for the hard surfaced wall facing the railroad and San Pacifico. Please provide proper noise buffering / noise absorbing materials on the wall and provide the technical information on their ratings compared to the proposed landscape plantings.
- 8) The Landscape map and tentative map are inconsistent with the pork chop/pedestrian crossing plans.
- 9) Some lights are up-facing and/or unshielded. Please confirm all exterior lights/pole lights will be downwards facing and not provide unnecessary light "pollution" to the adjacent neighborhoods or traffic on the adjacent roadways.
- 10) Please confirm whether or not Shopoff will provide materials on the buildings to increase wireless communication/reception within their and adjoining developments.

**Item #7 Community offer to Shopoff to work towards Land Swap for Park and Open Space at Ponto and/or fundamental community desires for development**

Subject: RE: Confirmation of Shopoff position on land swap solution

Importance: High

Brian:

We still have not heard back from you regarding the 2017 email below.

Recently we met with Matt Hall, and he asked we reach out to you again to restart a dialog. We want to see if we can dialog with you to explore solutions consistent with community desires and that work to the betterment of Carlsbad in providing equitable Open Space and Park facilities, and in providing land use intensity compatibility.

As you know last year we proposed to you an opportunity to work collaboratively for the betterment of Carlsbad in a land swap. We understand as your website says: "As a private investment firm, Shopoff Realty Investments places the needs of our investors above all else," however given the Growth Management Program Open Space and Parks issues, Local Coastal Program issues regarding priority uses and compatibility it maybe in the best interests of your investors to dialog about options.

You may think we are anti-development or anti-Shopoff, but that is not the case. We are pro Carlsbad and simply want to make sure as a City we Develop Ponto Right for present and future generations. We have already provided you creative solutions that, as your PMs indicated, were better and more resilient designs.

We offer to meet with you to dialog with you to explore solutions consistent with community desires and that work to the betterment of Carlsbad.

Let us know.

Lance

Cc: Sebahar Family Email (sebbiesixpack@att.net); Jean Camp (jeanscamp@yahoo.com)

Subject: Confirmation of Shopoff position on land swap solution

Importance: High

Brian:

As we believe you know from our latest community polling approximately 95% of San Pacifico residents would like to see as a public park as the best land use for the 'east proposed residential site'. If the site is developed as residential, which we think is not the best use of this coastal land, then development consistent with the images and intensities shown in the Ponto Beachfront Village Vision Plan – basically 2-story Townhomes and density closer to 15 dwellings per acre – is acceptable. However the desired land use is park and open space for an area of Coastal and South Carlsbad that is lacking in both those land uses.

John Sherritt communicated with you on June 22, and again as follow-up on July 6 2017 to communicate to you those community desires and to offer you an opportunity to work with the community in a collaborative and supportive partnership to achieve the primary and best use of the site as a public park. We researched, developed and John presented to you an approach that we could work with you to make Shopoff financially whole in creating a Ponto Beach Park on the site. That approach as outlined by John was to work with you and the City to 'land swap' the Ponto site for an equivalent land density and value on the westerly portion of Veterans Park. The sloped site provides extensive ocean/lagoon views, is adjacent to high quality high density residential, is surrounded by extensive Park and open space land uses and amenities, and is very near major employment centers and school sites – an ideal place for high density housing. A land swap approach would be similar to the Poinsettia 61 effort that can be a positive solution to all concerned. You would have community support for that solution.

John communicated back to the community that after your two meetings, that you had chosen to reject our solution and offer of collaboration. We simply would like to get your email confirmation that you rejected this solution, and if that rejection is permanent and not subject to any reconsideration in the future? Can you please confirm?

Thanks,  
Lance

**Item #8 Three (3) citizens' presentations made to the prior Carlsbad City Council asking they correct the Coastal Park gap and Growth Management Program Open Space defects in Coastal South Carlsbad**

---

Sent: Sunday, July 7, 2019 10:11 AM

To: 'Matt.Hall@carlsbadca.gov'; 'CityCouncil@carlsbadca.gov'; 'Scott.Chadwick@carlsbadca.gov'; 'Kyle.Lancaster@carlsbadca.gov'; 'lisa.urbach@parks.ca.gov'; 'Kathleen@carlsbad.org'; 'mike.pacheco@carlsbadca.gov'; 'gbuhr@coastal.ca.gov'; 'cort.hitchens@coastal.ca.gov'; 'Erin.Prahler@coastal.ca.gov'; 'info@peopleforponto.com'

Subject: prior Citizen presentation of requests and data to Carlsbad City Council to be provided to City Commissions and CCC public record regarding Coastal South Carlsbad Park and Open Space gaps-deficits and LCP requirements

Dear Mayor and Carlsbad City Council, Planning Commission, Parks Commission; and California Coastal Commission:

Attached please find three (3) presentations made in 2018 to the prior Carlsbad City Council regarding People for Ponto citizen requests to address the documented Coastal Park and Open Space gaps/deficits in Coastal South Carlsbad. We request these prior public communications along with the 4th attachment be part of the public record and be provided to and considered by the City Parks and Planning Commissions and City Council, and CA Coastal Commission in the Carlsbad Local Coastal Program (LCP), Planning Area F LCP and Master Plan, City's Parks Master Plan and Growth Management Plan updates, amendments to the Local Facility Management Plan for Zone 9, Veterans Park, real estate, and budget issues and other interrelated issues.

The 4th attachment is in reply to Carlsbad Councilperson Keith Blackburn's 10/23/18 request to show in an image how Poinsettia Park's service area effects the Coastal South Carlsbad park gap and deficit. The data in this attachment is from the City's Parks Master Plan and shows even with the City's 'broad abstract as the bird flies' defined service area of Poinsettia Park there remains a significant Coastal Park service gap at Ponto and in Coastal South Carlsbad.

The unfulfilled Planning Area F LCP requirements to consider a Public Park at Ponto, the documented Growth Management Park and Open Space Standard deficits in Coastal South Carlsbad seem to justify a comprehensive, open and honest community-based planning process as initially requested by citizens in 2017.

Thank you.

Lance Schulte

Budget agenda item 1

#1: 6/12/18 City Council meeting presentation by citizen of Carlsbad:

Park agenda item 19  
of 7-24-18 City Council

#2: 7/24/18 City Council meeting presentation by citizen of Carlsbad:

2018.10.23 Carlsbad  
CC mtg - GMP Update

#3: 10/23/18 City Council meeting presentation by citizen of Carlsbad:

#4: Updated image requested by Councilman Keith Blackburn to show Poinsettia Park's official service area relative to the South Coastal Carlsbad Park gap and deficit. The blue circle(s) show the City's adopted service areas from the City of Carlsbad Parks Master Plan for each City Park based on the park size and the population surrounding the park. A large circle represents a large park and/or low population surrounding the park. The image below shows all the City Parks (both Community Parks and Special Use Areas in Coastal Carlsbad (except for Aviara Park that is east of Poinsettia Park and west of Alga Norte Park). Data is compiled from City of Carlsbad Parks Master Plan pp 87-88.

## Issue #1 – 6.6 Acre Park Deficit No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

RE: Development of Ponto Beach Area / People for Ponto

Over the past several years the San Pacifico Community Association Board of Directors has supported the efforts made by the “People for Ponto” public interest group <http://www.peopleforponto.com> in their efforts to provide reasonable solutions to the development of the Ponto Beach Area that borders the San Pacifico Communities.

The following statement was provided to the San Pacifico Community Board of Directors by the People for Ponto Committee requesting continuing support. On January 31, 2019, during a scheduled Board of Directors meeting, the San Pacifico Community Board of Directors voted and approved the continuing support of the People of Ponto and are in support of the following statement:

*The proposed Ponto Developer Shopoff has inappropriately and selectively used a portion of the 2015 letter from our San Pacifico Community Association Board that is out of date and out of context to the consensus views of the Community and Board.*

*The 2015 letter was only our initial comments on the proposed planning changes at Ponto in the General Plan update. Because our San Pacifico Community Association was not directly invited to participate during the General Plan Update process on proposed changes to the planned land use in one of our San Pacifico Community’s Planning Areas (Planning Area F), and we as citizens San Pacifico and a Board had little time to provide any input/response, we did the best we could under a short ‘11th hour’ timeline to understand the issues and reply with some sense of our Community input in 2015.*

*This failure, at the beginning and throughout the General Plan Update process, to invite and engage our Community Association on facts relevant to the proposed land use changes to one of our Master Planned Community’s Planning Areas is a fundamental flaw in the General Plan Update planning effort for our area. To respond to that process flaw the Board endorsed a Ponto Beachfront Development Committee to:*

- *Gather factual information on Ponto/Coastal South Carlsbad land use planning issues*
- *Provide that information to the Community and gather Community consensus*
- *Present that consensus to the City, CA Coastal Commission and developers*

*The Committee then started researching the planning issues at Ponto. The Committee found several key issues that were not disclosed or accurately represented during both the City’s and Developer’s Ponto Beachfront Village Vision Plan and General Plan Update planning efforts. Most notably are:*

- *A prior inaccurate exemption given to developers in LFMP Zone 9 that so far has allowed developers to inaccurately avoid complying with the Growth Management Open Space Standard. This resulted in developers over building in LFMP Zone 9 and not providing 30-acres of open space needed to meet the Minimum Growth Management Standard for Open Space. Shopoff the proposed developer has to formally amend the LFMP Zone 9 to account for their proposed change in LCP Land Use Zoning from the existing “Nonresidential Reserve” to a proposed Residential and Commercial land use. The developer is currently proposing to not address the Open Space facility standard deficit with their proposed LFMP Zone 9 Amendment.*

- *The failure to follow the Carlsbad Local Coastal Program (General Plan and Zoning requirements of the City of Carlsbad and the California Coastal Commission) for Planning Area F that required a formal consideration of a “Public Park and/or Low-cost Visitor Accommodations” prior to “any planning effort to change the “non-residential land use on our Community’s Planning Area F. The failure to consider a “Public Park and/or Lowcost Visitor Accommodations” occurred both at the Ponto Beachfront Village Vision Plan and General Plan Update planning efforts.*

*Concerns and requests submitted to Carlsbad City Council et. al.*

*To confirm facts, the Committee requested over 20 official Carlsbad Public Records Requests to get answers to questions and then used accurate and documented data to ask our Community members on their opinions and desires on proposed planning and development of our Community's remaining vacant San Pacifico Community Association Planning Areas, and define a Community consensus on planning and development options. Since 2015 numerous communications documenting Community consensus on the issues has been sent have been including emails of 8/31/18, 12/4/17, 12/5/17, 3/6/18, 3/22/18, and 8/15/18, along with numerous individual emails.*

As planning issues progress we kindly request to be proactively invited and involved in the processes.  
Sincerely,

San Pacifico Community Association Board  
People for Ponto Committee

cc: Dave de Cordova, Principal Planner

**Subject:** RE: LCPA public Comment - request for receipt of public comments & documents

Jenifer:

I would like to include this email and the attached document as part of the LCPA Public Comments and Requests related to Official Carlsbad Public Records Requests and maintain the Existing Carlsbad LCP land use designation of “Non-residential Reserve” on Planning Area F until a truly comprehensive and Community-based planning process can determine the Forever “High-Coastal-Priority” land use needs at Ponto, South Coastal Carlsbad, and to assure no overconcentration of “High/Low-Coastal-Priority” land uses.

The proposed LUP defines the forever/buildout Coastal land use for Carlsbad, and as documented the prior Ponto planning processes (Ponto Beachfront Village Vision Plan [PBVVP] and the General Plan Update that is based on PBVVP) were both fundamentally flawed by not disclosing to Citizens and the San Pacifico Community Association about the Existing Carlsbad LCP requirements for Planning Area F and inviting public participation and discussion of the Existing Carlsbad LCP requirements for Planning Area F. The proposed LUP’s reliance on the fundamentally flawed prior planning (PBVVP and General Plan Update) at Ponto is inappropriate. These fundamental flaws in planning process and public participation cannot be remedied by simply a Staff Report discussion.

It seem logical that these fundamental flaws in the PBVVP, General Plan Update, and the LUP (which is based on the PBVVP and General Plan Update) are best corrected by maintaining the Existing LCP for Planning Area F and possibly leaving the entire Ponto Area as an Area of Deferred Certification until a truly comprehensive Community-based Planning process for Ponto can be completed. This is a reasonable and logical approach as the vacant Coastal land at Ponto is some of the last remaining significant sized vacant Coastal in all North San Diego County and is the in the center of a 6-mile regional Coastal Park Gap with no Coastal Park. This logic is further amplified by the impacts of Sea Level Rise on “High-Coastal Priority” land uses at Ponto and Coastal South Carlsbad, and the CA Coastal Act policy to reserve Upland Areas for “High-Coastal Priority” land uses.

Confirmation receipt and any staff response are appreciated.

Thanks,

Lance

**Attachment:** Local Coastal Program requirements for Planning Area F at Ponto: Data from Official Carlsbad Public Record Requests by citizens group People for Ponto [www.peopleforponto.com](http://www.peopleforponto.com)

Ponto is in the California Coastal Zone and land use and development decisions must not only be consistent with the City of Carlsbad General Plan and Ordinances but must also be consistent with the California Coastal Act (CCA). Per our Constitution, if there is a conflict between local City plans and the State’s Coastal Act the Coastal Act prevails. The California Coastal Commission (CCC) is the State commission that makes development decisions in the Coastal Zone.

Relevant Basic Goals of the State of California for the Coastal Zone are to:

- Maximize public access to and along the coast and **maximize public recreational opportunities in the coastal zone** consistent with sound resources conservation principles and constitutionally protected rights of private property owners.
- **Assure priority for coastal-dependent and coastal-related development over other development on the coast.**
- **The Legislature further finds and declares that the public has a right to fully participate in decisions affecting coastal planning, conservation, and development; that achievement of sound coastal conservation and development is dependent upon public understanding and support; and that the continuing planning and implementation of programs for coastal conservation and development should include the widest opportunity for public participation.**

The CCA priority land uses to achieve the above basic California Coastal Act goals are:

- maximize public recreational opportunities in the coastal zone
- Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred.
- The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development, but not over agriculture or coastal-dependent industry.
- Upland areas necessary to support coastal recreational uses shall be reserved for such uses, where feasible.
- Public facilities [such as Public Parks] shall be distributed throughout an area so as to mitigate against the impacts, social and otherwise, of overcrowding or overuse by the public of any single area.
- Assure priority for coastal -dependent and coastal-related development [i.e. lower cost visitor accommodations or recreational facilities (i.e. public park) as noted in the Planning Area F LCP requirements]

The Poinsettia Shores Master Plan and Local Coastal Program (PSMP/LCP) adopted in 1996 is the City's and CA Coastal Commission Existing Adopted Coastal 'general plan land use and zoning' and regulations for Planning Area F in the San Pacifico Community at Ponto. See the following land use zoning map from the current PSMP/LCP:

The current City and CA Coastal Commission adopted land use zoning and regulations for this Planning Area F is found on page 101 Carlsbad’s Existing Local Coastal Program at <http://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=24088> and reads as follows (bold face added for emphasis):

“10. PLANNING AREA F: Planning Area F is located at the far northwest corner of the Master Plan area west of the AT&SF Railway right-of-way. This Planning Area has a gross area of 11 acres and a net developable area of 10.7 acres. **Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an “unplanned” area, for which land uses will be determined at a later date when more specific planning is carried out for areas west of the railroad right-of-way. A future Major Master Plan Amendment will be required prior to further development approvals for Planning Area F, and shall include an LCP Amendment with associated environmental review, if determined necessary.** The intent of the NRR designation is not to limit the range of potential future uses entirely to non-residential, however, since the City’s current general plan does not contain an “unplanned” designation, NRR was determined to be appropriate at this time. In the future, if the Local Coastal Program Amendment has not been processed, and the City develops an “unplanned” General Plan designation, then this site would likely be redesignated as “unplanned.” Future uses could include, but are not limited to: commercial, residential, office, and other uses, subject to future review and approval. **As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.”**

Planning Area F was originally agriculture, then in 1985 Planning Area F's planned land use was changed to Travel Service Commercial uses. Then in 1996 was changed to the current Non-Residential Reserve (a blank holding zone) land use as noted above. Since Non-Residential Reserve had no planned land use associated with it a specific requirement of the PSMP/LCP for Subarea F was that: **"As part of any future planning effort, the city and developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e., public park) on the west side of the railroad."** [see Planning Area F regulations on page 101 of current Carlsbad Local Coastal Program]

The City around 2005 adopted a Ponto Beachfront Village Vision Plan (PBVVP) that adopted with primarily speculative developer input a City vision for Planning Area F with a Mixed-use Commercial area west of Ponto Drive and a 2-story Townhouse Neighborhood east of Ponto Drive. **The City in this 2005 PBVVP 'planning effort' did not fully disclose to citizens the existence of the adopted Planning Area F LCP land use zoning requirements, nor did the City comply with the LCP for Planning Area F to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park)".** The City submitted the PBVVP to the CCC as a Local Coastal Program Amendment for Planning Area F; and in 2010 the CCC rejected the City's proposed LCP Amendment, Stating: "... there has been no evidence presented that would support the elimination of these areas [i.e. Planning Area F] for some lower cost overnight accommodations or public recreational amenities in the future." [see pages 6-11 of CCC action item F21a denying Carlsbad proposed LCP Amendment 3-07B/RF dated July 22, 2010]

The City then 5-years later updated its General Plan in 2015 after a 7-year planning process using the same PBVVP as the basis for Coastal land use changes at Ponto and Planning Area F. The updated General Plan changed the City's proposed general planned land uses for Planning Area F from Non-Residential Reserve to General Commercial (GC) west of Ponto Drive and R-23 (Residential 15-23 dwellings an acre) east of Ponto Drive. Again, the City in this 2015 'planning effort' did not as required by the Planning Area F LCP requirement publically disclose and then consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park).

**The lack of public disclosure/discussion, and compliance with the Planning Area F LCP requirements in both the City's 2010 PBVVP and 2015 General Plan Update processes was confirmed in 2017 with the following 3 official Carlsbad Public Records Requests (sometimes referred to a freedom of information act):**

- # 2017-260
- #2017-261 and
- #2017-262

**We request that the above 3 official Carlsbad Public Records Requests, including City replies to follow-up questions, be fully included as Public Comments in the 2019 LCPA.**

Why didn't the City publically disclose and follow the existing (since 1996) LCP requirements for Ponto/Planning Area F during the 2010 PBVVP and 2015 General Plan Update? The PBVVP and General Plan Update processes were/are both fundamentally flawed due to this non-disclosure and non-compliance and did not allow full and just consideration of Coastal Priority land uses for Planning Area F.

As noted the Public Records Requests confirmed that the City did not specifically disclose and reach out to Carlsbad Citizens and the San Pacifico Community Association specifically regarding the requirements

to propose changes to Planning Area F. Planning Area F is one of the planning areas of the San Pacifico Community Association.

The City's failure twice, both during the City's 2010 PBVVP and 2015 General Plan Update 'planning efforts' to fully disclose and implement the Planning Area F LCP requirements was and still is in conflict with CA Coastal Act goal indicating the **"public has a right to fully participate in decisions affecting coastal planning, conservation, and development; that achievement of sound coastal conservation and development is dependent upon public understanding and support; and that the continuing planning and implementation of programs for coastal conservation and development should include the widest opportunity for public participation"**

As noted it took until 2017 for the People for Ponto citizen group to first find the Planning Area F LCP requirements at Ponto and confirm the City's failure to publically disclose and implement the existence of the Planning Area F LCP requirements at Ponto by getting documented confirmation through Official Carlsbad Public Records Requests and inquiries with CCC Staff. In 2017 Coastal Commission Staff indicated that: "The City is currently undertaking a comprehensive update to their LCP funded in part through a CCC grant. As a part of this process the City will be consolidating all previous LCP segments into a single, unified LCP. The City has received direction from both the Commission (May 2016 CCC hearing) and Commission staff, that as a part of this update the City shall undertake an inventory of visitor serving uses currently provided within the City's Coastal Zone which will then serve to inform updates to the City's land use and zoning maps as necessary. This inventory could have future implications for the appropriate land use and zoning associated with the Ponto area."

On 8/31/17 (see Item #1 of 'Concerns and requests emailed to the Carlsbad City Council, Planning and Parks Commissions; and California Coastal Commission as of 8-2-18' that was previously provided as public comment on the LCPA) People for Ponto emailed the Carlsbad City Council to ask that a Ponto Coastal Park be provided and that San Pacifico Community Association be invited and engaged in the planning discussions. The email cited numerous Carlsbad General Plan Community Vision statements and data on City Park Standard deficits at Ponto and Coastal South Carlsbad that clearly supported creation of a Ponto Coastal Park. The email was a request of the Carlsbad City Council to basically restart the Ponto Planning Effort on Planning Area F with an open and honest community-based planning effort before this last area of vacant Coastal land is committed to any development.

The email was resent to the City Council on 3/6/18 due to no City response to the initial 8/17/17 email. Although the City Staff has responded by rejecting Citizens' requests to reset and restart the Ponto Area Planning Effort to address the Public Park needs at Ponto; we did finally on 10/31/19 receive an email confirmation from City Staff that "Regarding concerns about recreation uses in the Ponto area, the staff reports will include an analysis of the need for lower-cost recreation and visitor accommodations in the Ponto area." The actual LCP requirement notes "(i.e. Public Park)" not just 'lower-cost recreation'. The 10/31/19 email is the first City acknowledgement since the initial 2017 People for Ponto email, that the City will follow the existing LCP requirements for Planning Area F. Unfortunately it likely is not the best way to address the of the existing LCP requirements at Ponto, and most importantly the Goals and Policies of the CA Coastal Act.

**As further public comments we would like to suggest maintaining Planning Area F's "Non-residential Reserve" Coastal land use (LUP) and Coastal zoning designation along with considering the entire Ponto area as a Deferred Area of LCP Certification to allow the City to reset the Coastal planning at Ponto and start anew with a comprehensive and open Community-based Planning Process that fully**

**addresses CA Coastal Act Goals and Policies and openly involves San Pacifico Community Association, the Citizens of South Carlsbad, and Citizens regionally. This is vitally important given Ponto is the last major vacant land in the center of a regional 6-mile coastal Park gap, and the only vacant Upland Area to a major regional Low-cost Visitor Accommodation (South Carlsbad State Campground) that is subject to destruction from sea bluff erosion due to sea level rise and increase weather events from climate change.**

**Subject:** LCPA public Comment - Existing and LCPA Proposed policy-requirement to move Carlsbad Blvd inland in South Carlsbad & movement of High-Priority uses to respond to a new-natural shoreline-bluff

Jennifer:

The City required developers along Carlsbad Boulevard (aka, PCH) to move the Carlsbad Boulevard lanes inland. This can be seen on the most recent developments along Carlsbad Boulevard from Breakwater Road to Ponto Road. A few Public Comments questions on the Proposed LCPA are:

1. What Local Coastal Program (LCP) and/or City policy, ordinance, or criteria required the developers to move the Carlsbad Boulevard lanes inland?
2. What is/was the specific language and location citation for such policy, ordinance, or criteria?
3. Is that language being maintained in the Proposed LCP Amendment, and if so where and what is the language?
4. If not, why is it being eliminated or altered in the LCPA?
5. For the Cape Rey Resort development south of Ponto Road, the developer was not required to move the Carlsbad Boulevard lanes inland, like the developments to the north. Why is that?
6. I understand that the landscape frontage of the Cape Rey Resort is actually City property, is that true?
7. Will the City be required to fund and move Carlsbad Boulevard lanes inland along the Cape Rey Resort frontage at a later date?
8. I understood the requirement of moving Carlsbad Boulevard lanes inland in South Carlsbad was to provide space for the State Campground to migrate inland as coastal bluff erosion. Is this correct or is/was there another reason for moving Carlsbad Boulevard lanes inland in South Carlsbad?
9. The Proposed LCPA identifies increased Coastal Bluff erosion due in part to Sea Level Rise (SLR) that will create a new-natural shoreline and coastal bluff. But what is the Proposed LCPA plan and policies for accommodating the new-natural shoreline/bluff and preserving by migrating inland "High-Coastal-Priority" features and Land Uses like the beach and State Campground subject to the LCPA's projected and planned Coastal Bluff erosion and SLR?
10. The proposed LCPA identifies projected/planned SLR impacts on public access trails, a community nature center around East Batiquitos Lagoon. What is the Proposed LCPA plan and policies for accommodating the new-natural Batiquitos Lagoon shoreline and preserving by migrating inland "High-Coastal-Priority" features like the public access trails, and planning a new location for the community nature center subject to the LCPA's projected and planned SLR?
11. Are these "High-Coastal-Priority" features and Land Uses in the Proposed LCPA to be allowed and planned in the Proposed LCAP to move inland or to other locations as coastal erosion and

*Concerns and requests submitted to Carlsbad City Council et. al.*

SLR undermine, put underwater, or eliminate access to these “High-Coastal-Priority” features and land uses in their current locations?

Thank you for including and responding to these LCPA Public Comment questions.  
Lance Schulte

**Subject:** RE: 2020 Jan 28 Carlsbad City Council meeting - Agenda item #14 citizen testimony - updated information

Dear City Council:

Please replace the prior testimony with the attached file. In the haste to get you comments ASAP before the meeting I forgot to include a correction to the Housing Element data staff provided. The actual Housing Element data is different from tonight's staff report, and the attached updated testimony includes a copy from the City Housing Element to show that correction.

Also, People for Ponto would like to request that this email and attached file be part of the official public comments on the proposed Draft LCP Land Use Plan Amendment.

Thank you.  
Sincerely,  
Lance Schulte

**Subject:** 2020 Jan 28 Carlsbad City Council meeting - Agenda item #14 citizen testimony

**Importance:** High

Dear City Council:

Please receive the attached information as part of your agenda Item #14 on 1/28/20 meeting. We apologize for the late input, but we were not aware of the agenda item or meeting. The attached notes some critical information that appears missing in the agenda report and attempts to provide more complete information. People for Ponto also asks, like other citizen groups, how we can talk with you to create a better process for the Staff proposed Draft LCP Land Use Plan Amendment.

Sincerely,  
Lance Schulte  
People for Ponto

**Email Attachment:**

Carlsbad City Council meeting of 1-28-20 agenda item #14

---

People for Ponto apologize for this late and hastily, review and comments. We just found out about the meeting this morning. We citizens know we can together achieve grate things if you allow us to work with you.

Staff  
Report

Page clarification/correction:

1 The LCP Land Use Plan Update is in fact an Amendment to an Existing LCP Land Use Plan. The Existing LCP Land Use Plan is already certified by the CA Coastal Commission as being consistent with the CA Coastal Act, except for some Amendments needed to address Sea Level Rise impacts and some other issues.

The LCP Amendment proposes to change the Existing CA Coastal Commission certified LCP Land Use Plan's "Non-residential Reserve" Land Use and Policy on Planning Area F to consider and document the need for "i.e. Public Park" at Ponto .

- 1 Staff summarizes the CA Coastal Act objectives to "ensure maximum public access to the coast and public recreation areas."
- Carlsbad's Adopted Park Service Area/Equity Mapping shows there is no Park Service for the Ponto Area and Ponto Citizens, and no Park Service for the Coastal South Carlsbad area west of Interstate-5 and the rail corridor.
  - The City's mapping of land that meets the developer required Growth Management Open Space Standard of 15% Unconstrained land shows about 30-acres of this Open Space is missing at Ponto. This missing Open Space could have provided needed Park facilities that are missing at Ponto.
  - Citizens in over 2,500 emails to the City Council have cited the need for a Public Park at Ponto as part of the Existing LCP Land Use Plan Amendment proposed at Ponto. These requests area consistent with the CA Coastal Act.
- 3 2<sup>nd</sup> bullet: says city staff proposes to replace, amend, or retain various Existing LCP policies, so the Staff has a documented understanding how each Existing LCP policy and how each Existing policy is being treated in the proposed Amendment. Citizens asked in Oct 20, 2019 for this 'redline' version of the Existing LCP Policies and Land Use Maps so citizens can understand what the Amendments are so we as citizens could then provide informed public comment. This 'redline' version is also important for the City Council and Planning and other Commissions so they know what Amendments to Existing City LCP Land Use policy are being proposed. Citizens again request this 'redline' version that it appears the staff already has as they know what Existing LCP Land Use policies are being replaced, amended, or retained.

- 4 V is incomplete: the community asked on Oct 20, 2019 for 3 things: 1) a 'redline' version as noted above, 2) true Public Workshops to help inform and resolve community concerns about the proposed LCP Land Use Plan Amendments, and 3) more public review time to provide for the above two other requests. All 3 requests should be acknowledged in the staff report. All 3 requests are rational and reasonable considering the proposed Draft LCP Land Use Plan Amendment is the "buildout" plan for Carlsbad's Coastal Zone and there were multiple documented fundamental "planning mistakes" regarding past City public information and participation in the Coastal Land Use planning. Providing such a process would help to correct these documented 'planning mistakes' that have gone on for many years. It is the right thing to do and most productive approach for all concerned.
  
- 7 Staff should accurately disclose that in 2010 the CA Coastal Commission in fact rejected the City's proposed Ponto Beachfront Village Vision Plan for failing to disclose and comply with the then and current LCP Land Use Plan policy for Planning Area F at Ponto. Carlsbad Public Record Requests confirmed the staff did not disclose to citizens the existence LCP Land Use Plan policy for Planning Area F at Ponto, so citizens had no idea a Public Park at Planning Area F at Ponto needed to be considered. How can citizens, provide input if they don't have complete and accurate to review and comment on?
  
- 8 Staff should correctly disclose that the 2015 application at Planning Area F at Ponto is first for a Local Coastal Program Amendment and Master Plan Amendment. These are both applications to change City Land Use Plan Policy and Zoning regulations. The actual applications for 'development' permits can in fact not even be considered by the City the Local Coastal Program Land Use of "Non-residential Reserve" is changed and Master Plan rezoning is approved. Then the 'development' permit application can be applied for. The developer abandoned their application to change the LCP and Master Plan and then apply for developer permit review about a year ago. However, the city staff is keeping the application 'alive' even though there has been no progress on the application for over a year. It is unclear if the staff has authority to do this, or if the City Council has authority to withdraw the application due to non-activity. The City has permit standards that withdraw applications if applicants make no progress on the applications after 6-months. What is troubling is that it appears the city staff proposal is to process the developer's application to change the Existing LCP Land Use Plan for the developer.

Staff notes that the Planning Area F sites now designated as Residential R-23 and General Commercial by the Carlsbad General Plan Update. However, staff fails to disclose that until the Existing LCP Land Use Plan is amended is in fact approved by the CA Coastal Commission the Existing LCP Land Use Plan for Planning Area F supersedes the City's General Plan Update.

**Carlsbad's General Plan Land Use Element clearly states this on page 2-26 "The city's LCP Land Use Plan will be updated consistent with this General Plan. However, to take effect, the LCP must be certified by the Coastal Commission as well as adopted by the city. Until such time that this occurs, the existing (as of 2013) LCP must be adhered to."** So until the City Council adopts the staff's proposed Draft LCP Land Use Plan Amendment, AND the CA Coastal Commission "certifies" that LCP LUP Amendment; the City's General Plan Update Land Use change cannot take effect. The General Plan Land Use at Ponto Planning Area F has in fact not been changed by the General Plan Update, but can only change with staff's proposed Draft LCP Land Use Plan Amendment that the City Council can choose to approve or disapprove. Also official Public Records Requests have documented that the City's General Plan Update planning process was fundamentally flawed at Ponto. Again, like during Ponto Beachfront Village Vision

Plan planning process a few years earlier the city failed to comply with the then and current LCP Land Use Plan policy for Planning Area F at Ponto. The flawed General Plan Update process at Ponto prevented Citizens from knowing the facts so they could properly participate and provide review and comment during the General Plan Update. The significant citizen comments to the City Council asking for a Ponto Coastal Park is reflective of the fundamental public disclosure and processing flaws that the city is only now acknowledging as one of the repeated 'planning mistakes' at Ponto. This is why citizens are asking for full disclosure of the facts and a complete planning process re-boot at Ponto. It also should be noted that the Existing LCP Land Use Policy for Planning Area F states that **"as part of any future planning effort ... consideration of a "Public Park" is required.** CA Coastal Commission Staff has indicated the City's proposed land use planning changes at Ponto as part of the General Plan Update are subject to change.

At the bottom of the page regarding SB 330, as noted above the "residential land use designation on the site" is not in effect until the currently proposed LCP Land Use Plan Amendment is both approved the City Council AND also certified by the CA Coastal Commission, so SB 330 does not apply. Also SB 330 has specific language that exempts land use in the Coastal Zone. SB 330 (Skinner) Section 13 states: **"(2) Nothing in this section supersedes, limits, or otherwise modifies the requirements of the California Coastal Act of 1976** (Division 20 (commencing with Section 30000) of the Public Resources Code). **For a housing development project proposed within the coastal zone, nothing in this section shall be construed to prohibit an affected county or an affected city from enacting a development policy, standard, or condition necessary to implement or amend a certified local coastal program consistent with the California Coastal Act of 1976** (Division 20 (commencing with Section 30000) of the Public Resources Code)." This language is consistent with CA case law, and other housing laws that recognize the obvious – there is very limited amount of Coastal land v. significant land area inland. Limited Coastal Land per the CA Coastal Act is needed for "High-Priority" Coastal Land Uses" - i.e. Coastal Recreation and Low-cost visitor accommodations. The CA Coastal Act identifies both residential and general commercial land uses as "low-priority". So although affordable housing is important there are other more appropriate locations, than on the last remaining vacant Coastal land in Carlsbad will be needed to address the "High-Priority" Coastal Land Uses to serve Carlsbad and California's 'buildout' needs. CA case law recognizes the supremacy of the CA Coastal Act over CA Housing Laws as noted in "Kalnel Gardens, LLC v. City of Los Angeles". This case law data has already been provided to the City Council as part of Staff's housing discussions over the past few years. The staff report should have disclosed the above information, as it appears SB 330 is not a factor at Ponto.

- 13 2005-2010 Housing Element: As noted above the General Plan Land Use Element states the General Plan Land Use Plan is not effective until the proposed Draft LCP Land Use Plan Amendment is both approved by the City Council AND certified by the CA Coastal Commission. So, the Housing Element Cannot recognizes the proposed residential use change at Ponto until then. Also as noted before there were multiple documented fundamental 'planning mistakes' in public disclosure, participation and process that flawed the Housing Element. It should be noted that these flaws occurred during the time the CA Coastal Commission specifically rejected the Ponto Beachfront Village Vision Plan due to those flaws. The now City acknowledged 'planning mistakes' at Ponto prevented Carlsbad citizens from providing informed participation during the Housing Element.

Also, it is unclear why the staff misrepresented the amount of housing proposed in the Housing Element on the Ponto Planning Area F site as “the Ponto site for high density residential use at a minimum density of 20 dwellings per acre (128 units minimum)”; as this is not true. The City’s General Plan promises only the minimum 15 dwelling units/acre for the R-23 Land Use designation. See the “Ponto” unit capacity table below from the City of Carlsbad General Plan Housing Element Table B-1 on page B-2 that lists 98 dwellings for the site on the east side of Ponto Road and 11 **optional dwellings** on the west side of Ponto Road for 109 total units for both sites, v. the 128 units mentioned by staff. Not sure why staff misrepresented the density by 17 to 30%.

Table B-1: Vacant Sites for Lower and Moderate Income Housing						
APN	General Plan Designation <sup>1</sup>	Zoning District	Site Size (Acres)	Unit Capacity, by Household Income		
				Very Low	Low	Moderate
2090901100 (Sunny Creek)	R15 (12 du/ac)	RD-M	9.6	-	-	115
2161404300 (Ponto)	R23	P-C	6.5	-	-	98
	GC (Mixed Use) <sup>3</sup>	P-C	3	-	-	11

2007 Ponto Beachfront Village Vision Plan: As noted several times above there were fundamental public disclosure and participation flaws with this plan. It was rejected by the CA Coastal Commission in 2010 part for those reasons. These flaws are confirmed by the City’s own data as a result of multiple Official Carlsbad Public Records Requests. This should be disclosed to the City Council and citizens.

- 14 2015 General Plan Update: As noted several times above there were fundamental public disclosure and participation flaws with this Update with regards to Ponto. These flaws are confirmed by the City’s own data as a result of multiple Official Carlsbad Public Records Requests. This should be disclosed to the City Council and citizens.

Citizens are asking the City Staff and City Council:

- for honesty, to fully and publicly recognize and disclose the past “planning mistakes” at Ponto, and fundamental flaws from the from those mistakes that prevented citizens from knowing about and participating in the planning process for Ponto.
- To keep the Existing LCP Land Use Plan at Ponto until a new open-honest and inclusive Community-based planning process can be achieved at Ponto.
- To be honest with respect to Park Serve Area and Equity issues at Ponto and Coastal South Carlsbad west of I-5 and the rail corridor.
- Consider the needs for inland South Carlsbad citizens, visitors and business to have their ONLY Coastal Park.
- Consider the larger regional Coastal Park need, and the forever ‘buildout’ Coastal Recreation needs for future generations.
- To be true and honest in translating and implementing our Community Vision

**Item #13 11/22/19 emailed public comments on the Staff proposed Draft LCP Land Use Plan Amendment regarding “High-Priority” Low-Cost Visitor Accommodation land use**

**Subject:** LCPA public Comment - Low-cost Visitor Accommodations

Jennifer:

Attached please find Public Comments on the proposed Draft Local Coastal Program Amendment (DLCPA) to the Land Use Plan regarding Low-Cost Visitor Accommodations.

As provided in other Public Comments and expressed by several citizens at the 11-20-19 Planning Commission meeting, I along with others kindly request:

1. a publicly accessible “Redline” version of the Existing 2016 Local Coastal Program (LCP) showing the City’s proposed Draft disposition of the current Existing LCP Land Use Plan, policies and data. Without a “Redline” trying to understand the proposed Draft changes is very difficult,
2. true Citizen-based public Workshops on the Coastal Act goals-policies and LCP issues focused on the limited amount of key vacant (and soon to be vacant) Coastal lands in Carlsbad – such as Ponto, and
3. A 6-month extension of time review and provide informed public comments on the Redline LCP and DLCPA, and to provide time to conduct the aforementioned Workshops.

We are still working to try to review the LCP and DLCPA documents and provide public comments on the Coastal Recreation

Thank you for including and responding to these DLCPA Public Comments and questions.

Lance Schulte

Attachment:

Carlsbad’s proposed Draft Local Coastal Program Amendment – People for Ponto comments

**Low Cost Visitor Accommodations:**

1. P. 3-3 cites CA Coast Act (CCA) Polices. But the City’s proposed Local Coastal Program (LCP) Land Use Plan (LUP) in the Ponto Area, particularly for Planning Area F, appears inconsistent with these CCA policies:
  - a. Section 30213 – protect, encourage and provide Lower-Cost Visitor & Recreation Facilities.
  - b. Section 30221 – Visitor serving & Recreation uses have priority over Residential & General Commercial uses.
  - c. Section 30223 – Upland areas reserved to support coastal Recreation uses
  - d. Section 30252(6) – correlate development with Local Park acquisition & on-site recreation

2. Planning Area F used to be designated “Visitor Serving Commercial” as part of the original 1980’s LUP and LCP Samis Master Plan for Ponto. In the 1996 this LUP was changed to the now current LCP and LUP designation of “Non-Residential Reserve” with a specific LCP requirement to reconsider a high-priority recreation or visitor serving Coastal land use while other Ponto land uses were changed to low-priority residential uses (see Poinsettia Shores Master Plan/LCP). It seems appropriated that the LUP should re-designated Planning Area F back to a Visitor Serving Commercial and Open Space (“i.e. Public Park” in the existing LCP) to provide high-priority coastal uses v. low-priority residential/general commercial uses: in part for the following reasons:
  - a. Planning Area F’s existing LCP requirement requires this consideration, but the City has never disclosed this requirement to Citizens nor follow this requirement during the Cities two prior ‘planning efforts’ in 2010 and 2015 as documented by official Carlsbad Public Records Requests 2017-260, 261, 262.
  - b. Ponto developers (both Samis and Kaisza) were both allowed to overdevelop Ponto, by not providing the minimum Open Space required by Carlsbad’s and Citizen approved Growth Management Open Space Standard. Over 30-acres of land that should have been dedicated to Growth Management Open Space (a high-priority land use) was instead allowed to be developed with low-priority residential development. If the City’s Growth Management Open Space Standard was properly applied at Ponto there would be 30-acres more open space at Ponto then there is now. This is a significant impact to CCA policies that can be corrected by changes in the Ponto LUP to properly implement City Open Space Standards and CCA policies.
  - c. The LCPA acknowledges that past (2005-17) and near-term (2019-23) growth in Carlsbad visitor demand for coastal recreation and accommodations, and indicate high past hotel occupancy rates that implies current hotel supply is just meeting current demand. Although the LCPA does not discuss the high occupancy rates at the Low-Cost campground facilities, It is assumed the campground occupancy rate and demand is higher than that of hotels. This should be defined. Based on current and near term demand for visitor accommodations the LCPA states on page 3-12 “... the City should identify and designate land where new hotels and other visitor-serving uses can be developed.” It is clear where the ‘City should identify and designate [this] land’? What new land(s) should be so identified and designated? However, the LCPA does not disclose longer-term visitor accommodation needs beyond 2023, nor provide a long-term plan for meeting this long-term need. The LCPA should publicly disclose, analyze and provide for the longer-term (beyond present and to beyond 2023) needs for visitor Coastal accommodations, particularly Low-Cost Accommodations and Recreation needs because the LCPA’s LUP is a long-term plan for Carlsbad’s buildout estimated to extend beyond 2035. Also, given the fact that there are very few vacant Coastal Sites (like Ponto) that are still available to address these long-term high priority Coastal land uses – recreation and visitor serving – reserving these vacant lands for high priority coastal land uses is consistent with the CCA Polices. Following are some longer-term projections of resident demand for Coastal park and recreation needs. It seems logical that long-term visitor will increase at a similar rate as the general population increase rate, unless our coast becomes too overcrowded and unattractive vis-à-vis other visitor

destinations. A long-term visitor demand (to go with the below long-term resident demand long-term Sea Level Rise impacts) for Coastal recreation resources should be a part of the proposed LCPA and part of the long-term LUP to provide resources for those long-term needs and to mitigate for those long-term Sea Level Rise impacts.

- d. City in the LCPA inaccurately analyzes and misrepresents how much Visitor Serving Accommodations, particularly Low-Cost Accommodations, Carlsbad currently provides on a relative or comparative basis. The LCPA's inaccurate and simplistic analysis does not adjust for the different sizes of the Coastal Zone in the 3 cities (Carlsbad, Oceanside and Encinitas) used in the analysis. Carlsbad's Coastal Zone is significantly larger than both the other cities, so it has more land and accommodations, just like San Diego's Coastal Zone is larger than Carlsbad's and San Diego is larger than its smaller neighbors Del Mar and National City. A simplistic how many accommodations are in your adjacent cities is an inappropriate analytical method for Carlsbad-Oceanside-Encinitas; just as it is inappropriate to compare the number of San Diego's hotels with the number of hotels in San Diego's smaller neighbors Del Mar and National City. The accurate method to do a comparative analysis is based on a common denominator, such as the amount of accommodations per 1,000 acres of Coastal Zone land along with comparing each city's relative percentages. This is a more accurate and appropriate analysis that the LCPA should provide, and not that provided on page 3-13. The LCPA analysis also does not fully discuss and compare "Low-Cost" accommodations that are part of the CCA policies; nor provide a mitigation approach for "Low-Cost" accommodations lost, just 'Economy hotel rooms'. Below is data from the LCPA and other LCPs that shows the proper and more accurate comparison of existing Visitor Serving Accommodations in Carlsbad-Oceanside-Encinitas and includes Low-Cost Accommodation

numbers/comparisons that are totally missing in the LCPA analysis. As the data shows, Carlsbad does not perform as well in Visitor Accommodations, and most particularly in “Low-Cost Visitor Accommodations”, as the LCPA states and proposes in the LUP relative to Oceanside and Encinitas. An honest analysis like below should be provided in the LCPA LUP, particularly given the very limited amount of vacant Coastal land left to provide for high-priority Coastal Uses. Ponto is one of the last remaining vacant Coastal areas.

Carlsbad's proposed 2019 LCPA uses comparative 3-city data to address how Carlsbad's 2019 LCPA addresses Visitor Serving Accommodation needs. “Low-Cost” Accommodations are an important CA Coastal Act issue

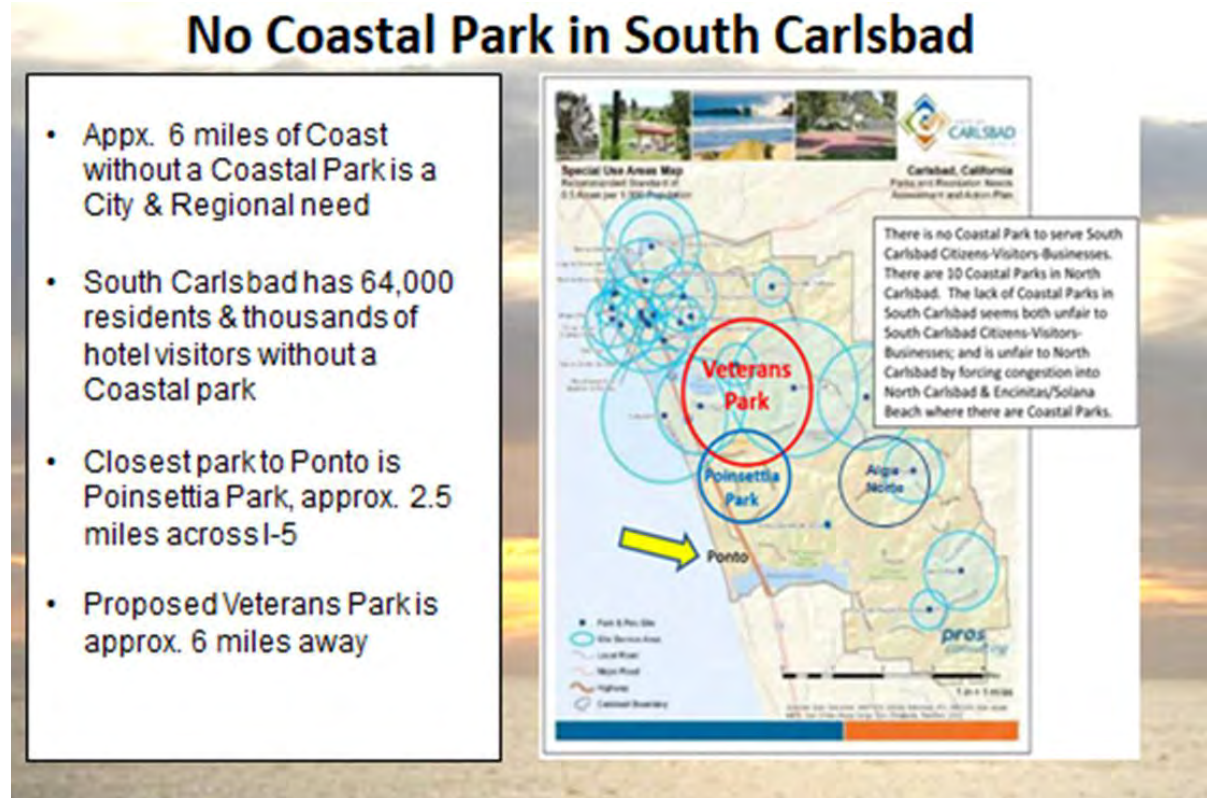

<u>Visitor Serving Accommodations (VSA) data</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>		<u>Data source</u>
Coastal Acres (i.e. in Coastal Zone)	9,216	1,460	7,845		Carlsbad Draft LCPA 2019 & Oceanside & Encinitas LCPs

<u>Data analysis</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>	<u>Average</u>	<u>Key Findings</u>
<b>VSA rooms/1,000 Coastal acres</b>	<b>348</b>	668	81	<b>366</b>	<b>Carlsbad provides overall Visitor Accommodations at slightly below the 3-city average</b>

<b>% of VSA rooms that are Economy</b>	<b>18%</b>	35%	55%	<b>36%</b>	<b>Carlsbad provides a percentage of Economy Accommodations about 50% below the 3-city average</b>
<b>Economy VSA rooms/1,000 Coastal acres</b>	<b>64</b>	237	44	<b>115</b>	<b>Carlsbad provides Economy Accommodations about 50% below the 3-city average</b>
<b>% VSA rooms that are Low-Cost</b>	<b>7%</b>	28%	27%	<b>21%</b>	<b>Carlsbad provides a percentage of Low-Cost Accommodations about 66% below the 3-city average</b>  Carlsbad LCPA also does not provide protection for loss of “Low-Cost” campground rooms, only “Economy hotel rooms”
<b>Low-Cost VSA rooms/1,000 Coastal acres</b>	<b>24</b>	186	22	<b>77</b>	<b>Carlsbad provides Low-Cost Accommodations about 70% below the 3-city average</b>

- e. The LCPA is not providing for any new “Low Cost Visitor Accommodation” land uses in the proposed LUP for current/long-range needs, even though page 3-12 points out the current demand for accommodations, and the current Existing LCP has polices to increase “Low Cost Visitor Accommodation” land uses. We understand that “Low-cost Visitor Accommodation” occupancy rates at CA State Campground at near 90%. This occupancy rate is much higher [signifying higher demand] than the occupancy rates of both the hotels, and “Economy Visitor Accommodations” which the LCPA seeks to protect. The Proposed LCPA LUP should provide historic and current “Low-cost Visitor Accommodation” occupancy rate data at CA State Campground and compare to occupancy demand for other accommodations to determine the highest occupancy demands and therefore needs. Why is the Proposed LCPA LUP not protecting AND EXPANDING (for future growth and visitor demand) the supply of this higher demand for “Low-cost Visitor Accommodations” at the State Campground, particularly given the Current Existing Carlsbad LCP policies on this issue, long history of this issue documented in the Current Existing Carlsbad LCP Mello II Segment, and the fact that “Low-cost Visitor Accommodations” are a Statewide ‘high-Coastal-priority’ land use in CA Coastal Act Goals and Policies? Why is the proposed LUP not recognizing and incorporating these issues? The Current Existing Carlsbad LCP policies [see Existing Carlsbad LCP Mello II Segment polies 2.3, 4.1, 6.1, 6.4, 6.5, 6.9, 6.10, 7.5, and 7.15 for example] are not referenced

and discussed in the Proposed LUP nor is a comprehensive long-term analysis of the impact of the proposed LUP's elimination of these Current Existing Carlsbad LCP policies vis-à-vis the CA Coastal Act Goals and Policies? How and why is the City proposing changes to these Existing Carlsbad LCP policies in the Mellow II Segment, particularly given the improved knowledge about Sea Level Rise, and Sea Level Rise and Coastal Bluff erosion impacts on the State Campground's "Low-cost Visitor Accommodations" - High-Coastal-Priority land use under the CA Coastal Act?

- f. At Ponto there is no low-cost/no-cost Recreational use as shown by the City of Carlsbad's adopted Parks Master Plan (pp 87-89) that show the City's adopted Park Service Areas in the following image. The image's blue dots are park locations and blue circle(s) show the City's adopted service areas:

Per the current Existing LCP requirements for Planning Area F at Ponto an "(i.e. Public Park)" must be considered. How is the Proposed LCPA LUP not reserving Upland Areas at Ponto for recreational uses given Sea Level Rise and Coastal Bluff erosion impacts as shown in Proposed LCPA LUP Attachment B, and Exhibits B6 and B7? There is very limited amount of vacant Upland Coastal land at Ponto and South Coastal Carlsbad to accommodate low-cost/no-cost Recreational use "(i.e. Public Park)", so why is this last remaining vacant Coastal land at Ponto not being reserved for "high-Coastal Priority Land Uses"? Why is the Proposed LCPA LUP proposing this last remaining vacant Coastal land at Ponto be converted from "Non-residential Reserve" to 'low-coastal-priority residential and general commercial land uses'?

3. The proposed LCPA approach to protect existing 'economy hotels' but not 'Low-cost Visitor Accommodations' appears inappropriate. Existing hotel owners providing 'Economy' rooms are penalized while all other more expensive 'non-economy hotel' owners are not required to mitigate for their not providing more affordable accommodations. It seems like a fairer and rational approach is to use the same framework as the City's inclusionary affordable housing requirements and have the requirement and burden of providing affordable accommodations required by all visitor accommodation providers, including short-term rentals of residential homes. Use of any per accommodation "in-lieu fee" should be SUFFICIENT TO FULLY MITIGATE for not providing a required affordable accommodation by being sufficient to fully fund a new 'affordable accommodation' on a one-for one basis. City Transit Occupancy Tax revenues could also potentially be used to provide a catch-up method for existing "non-low-cost and/or non-economy accommodation providers" to address what would nominally be their inclusionary contribution. It seems like the LCPA approach needs significant rethinking to provide a rational program to include reasonable long-term and sustainable affordability in visitor accommodation's, particularly give the Sea Level Rise and Coastal Bluff Erosion impacts on Carlsbad's Only "Low-cost Visitor Accommodations" and the State Campground and beaches and Carlsbad's Coastal access roadways.
  
4. The Proposed LCPA LUP does not provide a means for citizens to understand the proposed changes to the current Existing LCP goals and policies. There are numerous current Existing LCP goals and policies regarding "Low-cost Visitor Accommodations". These all should be listed in the Proposed LCPA LUP along with a description on how and why these current Existing LCP Goals and policies are being modified or removed in the Proposed LCPA LUP.

**Item #14 1/29/20 emailed public comments on the Staff proposed Draft LCP Land Use Plan Amendment regarding “High-Priority” Coastal Recreation land use and lack of that land use at Ponto and Coastal South Carlsbad**

**Subject:** LCPA Public Comment - Coastal Recreation at Ponto - from People for Ponto

Jennifer:

Attached please find Public Comments on the proposed Draft Local Coastal Program Amendment (DLCPA) to the Land Use Plan regarding “High-Priority” Coastal Recreation at Ponto.

These People for Ponto comments reflect the significant Coastal Recreation and Coastal Land Use Plan issues at Ponto that clearly seem to justify, particularly after the City has receive to date of 2,500 public requests (and more are coming) for a Ponto Coastal Park, that a more productive, and overall more time efficient process to address public concerns be provided in the DLCPA process. I provide that thought based on successfully managed an award-wining LCPA amendment in under 2-years that was almost the exactly the same as the City of Carlsbad. Although the City Council in a 2-2 tie failed to provide for more productive and overall more time efficient process I hope within the DLCPA processing parameters Staff has you try to advance:

1. a publicly accessible “Redline” version of the Existing 2016 Local Coastal Program (LCP) showing the City’s proposed Draft disposition of the current Existing LCP Land Use Plan, policies and data. Without a “Redline” trying to understand the proposed Draft changes is very difficult,
2. true Citizen-based public Workshops on the Coastal Act goals-policies and LCP issues focused on the limited amount of key vacant (and soon to be vacant) Coastal lands in Carlsbad – such as Ponto, and
3. A 6-month extension of time review and provide informed public comments on the Redline LCP and DLCPA, and to provide time to conduct the aforementioned Workshops.

Thank you,

Lance Schulte

People for Ponto

**Subject:** LCPA public Comment - Low-cost Visitor Accommodations

Jennifer:

Attached please find Public Comments on the proposed Draft Local Coastal Program Amendment (DLCPA) to the Land Use Plan regarding Low-Cost Visitor Accommodations.

As provided in other Public Comments and expressed by several citizens at the 11-20-19 Planning Commission meeting, I along with others kindly request:

4. a publicly accessible “Redline” version of the Existing 2016 Local Coastal Program (LCP) showing the City’s proposed Draft disposition of the current Existing LCP Land Use Plan, policies and data. Without a “Redline” trying to understand the proposed Draft changes is very difficult,
5. true Citizen-based public Workshops on the Coastal Act goals-policies and LCP issues focused on the limited amount of key vacant (and soon to be vacant) Coastal lands in Carlsbad – such as Ponto, and
6. A 6-month extension of time review and provide informed public comments on the Redline LCP and DLCPA, and to provide time to conduct the aforementioned Workshops.

We are still working to try to review the LCP and DLCPA documents and provide public comments on the Coastal Recreation

Thank you for including and responding to these DLCPA Public Comments and questions.

Lance Schulte

Carlsbad Staff proposed Draft Local Coastal Program Amendment – People for Ponto comments

#### **Coastal Recreation:**

5. Request that the City as part of its Draft LCP Public Review process broadly-publicly disclose to all Carlsbad Citizens the City’s acknowledged prior LCPA processing and planning “mistakes” regarding the requirement that the Ponto area be considered as a public park: This disclosure is needed to correct about 20 years of City misrepresentation to the public on the since 1996 and currently Existing LCP requirements at Ponto, and the City’s prior planning mistakes at Ponto. Citizens have been falsely told by the City that all the Coastal planning at Ponto was done already and that the City followed its Existing LCP regarding the need for a park at Ponto, and that this is already decided and could not be reversed. This misinformation has fundamentally stifled public review and public participation regarding the Coastal Zone. City failure to provide such a broad-public disclosure on the documented prior, and apparently current proposed, “planning mistakes” would appear to violate the principles of Ca Coastal Act Section 30006. A broad-public disclosure would for the first time allow citizens to be accurately informed on the Existing LCP requirements at Ponto so they can provide informed public review and comment regarding the need for a Coastal Park in in this last vacant ‘unplanned’ area. The requested broad-public disclosure by the City of the City past mistakes and the Existing LCP requirements at Ponto is consistent with CA Coastal Act (CCA) “Section 30006 Legislative findings and declarations; public participation - The Legislature further finds and declares that **the public has a right to fully participate in decisions affecting coastal planning**, conservation and development; that achievement of **sound coastal conservation and development is dependent upon public understanding and support**; and that the continuing planning and implementation of **programs for coastal conservation and development should include the widest opportunity for public participation.**” The public cannot participate as outlined in CCA Section 30006 if past City ‘mistakes’ and misrepresentations on Coastal planning at Ponto go undisclosed to the public. If the public isn’t fully informed about the 20-years of LCP planning mistakes at Ponto how could the

public in the past (and now in the present) participate in the proposed LCP Amendment – **Public Participation as noted in Section 30006 above is the means to sound coastal conservation and development and is “... dependent upon public understanding ...”**. The City’s past mistakes at Ponto need to be corrected by slightly different a Draft LCP Amendment process than currently outlined by the City; a new process is needed that clearly, opening and honestly informs and engages the public on the Existing LCP Ponto issues. The City’s current Draft LCP Amendment process fails to follow CCA Section 30006 in that most all the citizens we encounter are as yet unaware of the City’s Ponto mistakes and how they can participate in in the DLCPA process without that information. We see this daily in conversations we have with our fellow citizens. We even saw at the Oct 20, 2019 Carlsbad Planning Commission meeting that the Planning Commission was unaware of the planning mistakes at Ponto. How can a decision body of the City make a decision without knowing about these prior ‘planning mistakes’ facts that surround what they are being asked to decide on? Repeatedly since 2017 Carlsbad citizens and People for Ponto have asked the City to fully acknowledge the City’s prior flawed planning at Ponto, and to correct that with ether maintaining the Existing LCP Non-residential Reserve Land Use or restarting the Coastal Planning at Ponto with a true and accurately informed Community-based Coastal Planning process consistent with Section 30006.

We request the City during the DLCPA Public Review period broadly and publicly disclose to all Carlsbad Citizens the City’s acknowledged prior LCP and other “planning efforts” public participation processing and planning “mistakes” regarding the requirement that the Ponto area be considered as a public park, and 1) provide a truly honest public participation process on that disclosure consistent with CCA Section 30006 as part of the Draft LCP Amendment process or 2) retain the Existing LCP Non-residential Reserve Land Use and require a comprehensive and honest community-based redo of Coastal Resource planning at Ponto.

6. City fully and publicly reply to and the City Council consider the 11-20-19 citizen concerns/requests regarding the City’s proposed LCP Amendment process: Lance Schulte on 1/23/20 received an email reply by the City to his follow-up email regarding the status of the 11/20/19 citizen concerns/requests public comments and letters presented to the Planning Commission. This is appreciated, however it is request that the City fully publicly reply to the 11-20-19 citizen concerns/requests regarding the City’s proposed LCP Amendment process and present the to the City Council 11/20/19 citizen concerns/requests so the City Council can consider them and provide any direction to City Staff. City Staff first presented a summary presentation of the proposed Draft LCP Amendment to the Carlsbad Planning Commission on November 20, 2019, and indicated the public comment period would close on November in less than 2-weeks. Citizens and citizen groups provided public testimony to the Planning Commission, both verbally and in two written letters. The CCC was copied on those letters. The testimony and letters noted significant concerns about the City’s proposed LCP Amendment process and made three requests:
  - a. Disclose and provide a publically accessible ‘Redline Version’ of the Existing 2016/Proposed LCP land use Plan and Policies so everyone can see the proposed changes to the Existing LCP.

- b. Provide true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern or objections. Citizen Workshops, when done right, are valuable means to openly educate, discuss and work to consensus options. These areas, including Ponto, were/are subject to multiple lawsuits, so true open and honest public workshops would provide an opportunity to openly and honestly discuss the issues and hopefully build public consensus/support for solutions. This approach seems consistent with CCA Section 30006, and common sense.
- c. Extend the public comment period 6-months to allow Citizen Review of the Redline Version of the LCPA and allow time for Citizen Workshops.

The City did extend the Public Review period 2-months over the holidays to January 31, 2020. This is appreciated although many think this is inadequate given the significance of the Proposed Land Use Plan Amendments, and lack of Redline Version to compare. The City and their consultants required several extra years beyond schedule prepare the proposed LCP Amendments. The extra years of City Staff work reflects on the volume of the over 500-pages in the documents and the time needed to understand the Existing LCP and then create an Amended LCP. Citizens need sufficient time, proper comparative tools (redline) and a process (workshops) to understand the proposed LCP Amendments that is reflective of extensive extra time needed by City Staff and consultants needed. Truncation of lay public review to a few months for an Amendment that took paid professionals many years to produce seems a more than a bit inappropriate. The City appears to be rejecting citizens' request to be provided a 'Redline Version' of the Existing 2016/Proposed LCP land use Plan. So public review comments will be tainted or will miss many issues due to having to manually cross-reference a 150-page Existing LCP LUP with a Proposed 350-page Proposed LCP LUP. There will be unknown and unconsidered changes in the Draft LCP Amendment that the public and city and CCC decision makers will not know about due to the lack of 'Redline Version'.

The City also appears to reject citizen requests for true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern – such as Ponto. Like Coastal Recreation issue #1 above the following citizen requests appear consistent with CA Coastal Act (CCA) Section 30006, and the City's rejection of that requests seem counter to the CA Coastal Act.

We again request of the City to provide: 1) a 'Redline Version' to the public and decision makers, along with sufficient time to review and comment on the 'Redline Version'; and 2) true Citizen Workshops for Ponto and the other last remaining significant vacant Coastal lands in Carlsbad as part of the Draft LCP Amendment process, or as part of deferred LCP Amendment process for those areas.

- 7. Coastal Zoned land is precious: the very small amount of remaining vacant Coastal land should be reserved for "High-Priority" Coastal Recreation Land Uses under the CA Coastal Act to provide for the growing and forever 'Buildout' needs of Carlsbad and CA Citizens, and our visitors.
  - a. Less than 1.8% (76 square miles) of San Diego County's 4,207 square miles is in Coastal Zone. This small area needs to provide for all the forever Coastal needs of the County, State of CA, and Visitors. Upland Coastal Recreation (Coastal Park) land use is needed to provide

land to migrate the projected/planned loss of “High-Priority” Coastal Recreation land uses due to Sea Level Rise impacts. There is only 76 miles of total coastline in San Diego County; a significant amount is publicly inaccessible military/industrial land. So how the last few portions of Coastal Land within Carlsbad (which is about 8% of San Diego County’s Coastline) is planned for the forever needs for High-Coastal-Priority Recreation Land Use is critical for Carlsbad, San Diego, and California Statewide needs into the future.

- b. Most all the developable Coastal land in Carlsbad is already developed with Low-Coastal-Priority residential uses. Only a very small percentage of Carlsbad’s developable Coastal land, maybe 1-2%, is still vacant. This last tiny portion of fragment of vacant developable Coastal Land should be documented in the Draft LCP and reserved for “High-Priority” Coastal Land uses – most critically Coastal Recreation – to address the growing Coastal Recreation needs from a growing population and visitors. These growing needs are all the more critical in that existing Coastal Recreation lands will be decreasing due to inundation and erosion due to DLCPA planned Sea Level Rise.
- c. This image of the western half of San Diego County graphically shows (in the blue line) the very small Coastal Zone Area that needs to provide the Carlsbad’s and California’s Coastal Recreational needs for all San Diego County residents and Visitors:

We request that 1) the amount and location of remaining vacant Coastal land in Carlsbad be documented and mapped and be reserved for high-priority Coastal Land Uses consistent with CCA Goals in Section 30001.5 “... (c) ... **maximize public recreational opportunities in the coastal zone** consistent with sound resources conservation principles and constitutionally protected rights of private property owners. (d) **Assure priority for coastal-dependent and coastal-related development over other development on the coast.** ... “; 2). This data be used in the City’s analysis and the public’s review and discussion about the City’s proposed Draft ‘Buildout’ Land Use Plan. The City’s proposed Draft ‘Buildout’ Land Use Plan will forever lock in the amount “maximum public recreational opportunities in the coastal zone” and will be the final Coastal Land Use Plan that is supposed to “assure priority for coastal-dependent and coastal-related development over other development on the coast”. Most of Carlsbad’s Coastal Zone is already developed or committed to low-priority land uses contrary to these CCA Goals, so how we finally and forever plan to use of the last small remaining vacant Coastal Land is very important.

8. The proposed Draft LCP Amendment in Chapter 3 makes unfounded statements regarding the proposed Amendment to the LCP Land Use Plan provision of “High-Priority” Coastal Recreation land use: On page 3-3, at the beginning of the Chapter 3 – Recreation and Visitor Serving Uses the City correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation uses, and cites multiple CCA Sections to that effect. The City’s proposed Coastal Land Use Plan then states on page 3-5 that a high proportion of land in the City is dedicated open space available for passive and active use, yet provides no justification or accurate metric to support this statement. This is a critical unsubstantiated and speculative statement that is not supported by any comparative data (justifying the “high proportion” statement). The City later in Chapter 3 compared the adjoining cities of Oceanside and Encinitas to try to show how the proposed Draft LCP LUP Amendment provides higher levels of Visitor Serving Accommodations. That ‘non-common denominator’ comparison was fundamentally flawed, as noted in a prior separate Draft LCPA public review comment from People for Ponto regarding another high-priority Coastal land use (visitor accommodations) planned for in Chapter 3, but at least it was an attempt to compare. However, for the Coastal Recreation portion of Chapter 3, the City does not even attempt to provide any comparative data to support (or justify) the proposed Coastal Recreation Land Use Plan and statements. The Coastal Recreation Chapter also fails to disclose Carlsbad’s adopted City Park Master Plan (Park Service Area and Equity map) data that shows a clear conflict between the CA Coastal Act Policy Sections noted at the beginning of Chapter 3 and Chapter 3’s proposed Draft Coastal Recreation Land Use Plan.

Comparative Coastal Recreation: Comparing the Land Use Plan and policies of Oceanside, Carlsbad and Encinitas, one finds Carlsbad’s proposed Coastal Recreational Plan and Policies are not “high”, but very low compared with Oceanside and Encinitas. Carlsbad has a General Plan Park Standard of 3 acres of City Park per 1,000 Population. Oceanside has a 5 acres of City Park Standard per 1,000 population, and Encinitas has a 15 acres per 1,000 population standard, and an in-lieu park fee requirement of 5 acres per 1,000 population. Carlsbad’s proposed Coastal Recreation Land Use Plan is in fact not ‘high’ but is in fact the lowest of the three cities, with Carlsbad providing only 40% of Oceanside’s park standard, and only 20% of Encinitas’s Park Standard. Citywide Carlsbad currently has 2.47 acres of developed park per 1,000 population, Oceanside currently has 3.6 acres of developed park per 1,000 population, and Encinitas currently has 5.5 acres of developed park per 1,000 population. Although this data is citywide, it shows Carlsbad’s current amount of developed parkland is less than 70% of what Oceanside currently provides, and less than 45% of what Encinitas currently provides. Carlsbad is not currently providing, nor proposing a Coastal Land Use Plan to provide, a ‘high’ proportion of Coastal Recreation Land Use compared to Oceanside and Encinitas.

On page 3-5 Carlsbad may be misrepresenting city open space that is needed and used for the preservation of federally endangered species habitats and lagoon water bodies. This open space Land cannot be Used for Coastal Recreation purposes; and in fact Land Use regulations prohibit public access and Recreational Use on these Lands and water bodies to protect those endangered land and water habitats. 78% of Carlsbad’s open space is “open space for the preservation of natural resources” and cannot be used for Coastal Parks and Recreational use. Although “open space for the preservation of

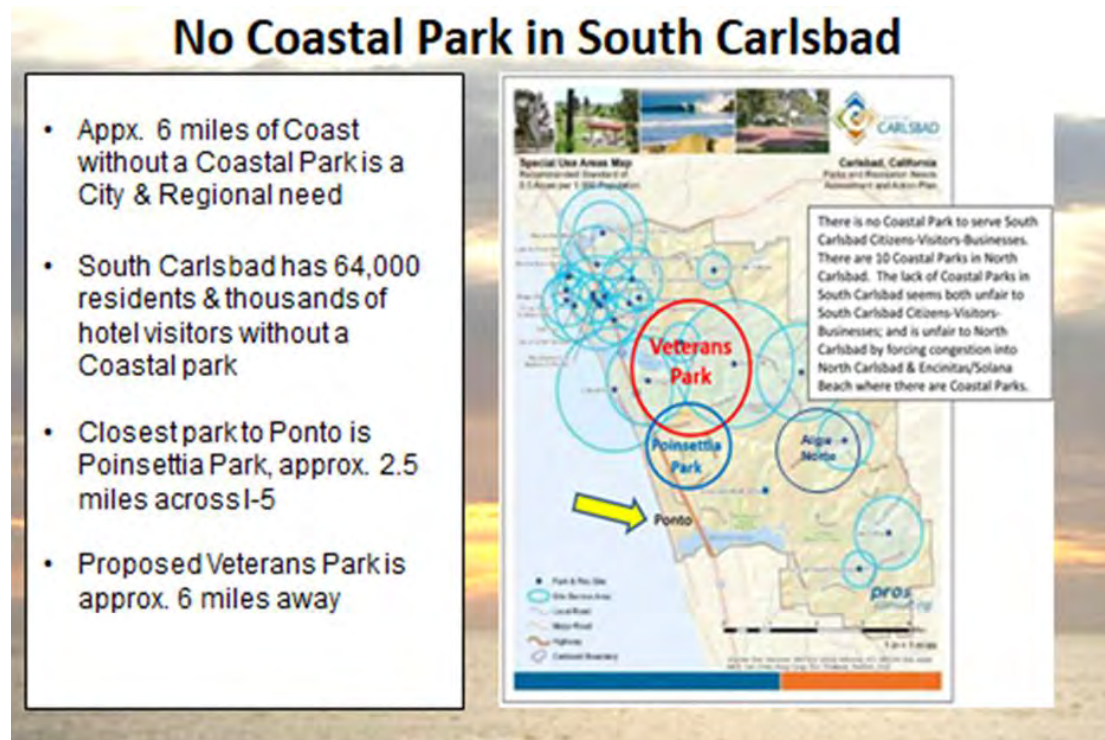

natural resources” does provide scenic or visual amenity, and this amenity is addressed as a different coastal resource. Visual open space is not Coastal Recreation Land Use. It appears Carlsbad is proposing in the Draft LCP Amendment to continue to, providing a ‘low’ percentage of Coastal Park Land Use and Coastal Recreation Land Use compared to adjoining cities.

In addition to the comparatively low amount of Coastal Park land Carlsbad plans for, Carlsbad scores very poorly regarding the equitable and fair distribution and accessibility of Coastal Parks and Coastal Recreation Land Uses. Both the City of Oceanside and Encinitas have very robust and detailed Park and Land Use plans to promote an equitable distribution of, and good non-vehicular accessibility, to their Coastal Parks. By comparison, Carlsbad’s park land use plan scores poorly, as exemplified in Ponto and South Carlsbad. Ponto’s existing population requires about 6.6 acres of City Parkland per Carlsbad’s low 3 acres per 1,000 population standard. Yet the nearest City Park is several miles away and takes over 50 minutes to walk along major arterial roadways and across Interstate 5 to access. As such this nearest park is not an accessible park for Ponto children, and thus Ponto children have to play in our local streets to find a significantly large open area to play in. Ponto residents have to drive their kids to get to a park increasing VMT and GHG emissions. The City’s proposed Coastal Recreation Land Use Plan ‘solution’ to Ponto’s no-park condition, along with the City’s need to add an additional 6.5 acres of new City parks in Southwest Carlsbad to comply with the Southwest Carlsbad’s 2012 population demand (at a ratio of 3-acre/1,000 population) is to provide a City Park – Veterans Park – over 6-miles away from the Ponto and Southwest Carlsbad population need. This makes a bad situation worse. The City’s proposed location is totally inaccessible to serve the needs of the population of children or anyone without a car, that it is intended to serve in South Carlsbad. This City proposed Coastal Recreation Land Use Plan ‘solution’ seems inappropriate and inconsistent with the CA Coastal Act and common sense. During the City’s Veterans Park and budget community workshops citizens expressed a desire for a Ponto Park to be the solution to our Ponto and Southwest Carlsbad Park deficits. Those citizen requests were not apparently considered as part of the City’s proposed Draft Coastal Recreation Land Use Plan. Following is an image summarizing the magnitude of citizen needs/desires expressed at the City’s Budget workshop. Note the number and size of the text citing Ponto Park and South Carlsbad that reflects the number and magnitude/intensity of citizen workshop groups’ input. The failure to acknowledge this public participation and data in the Coastal Recreation Land Use Plan Park seems in conflict with CCA Sections 30006 and 30252(6):

For South Carlsbad there is a complete lack of any existing or planned City Coastal Park and park acreage west of I-5, while North Carlsbad has 9 existing and 1 planned City Coastal Parks totaling 37.8 acres of City Coastal W of I-5 North Carlsbad. Not only is this unfair to South Carlsbad, it is also unfair to North Carlsbad as it increases VMT and parking impacts in North Carlsbad because South Carlsbad is not providing the City Coastal Parks for South Carlsbad resident/visitor demands. This City Park disparity is shown on Figure 3-1 of the Coastal Recreation Land Use Plan; however it more accurately illustrated in the following data/image from the adopted Carlsbad Park Master Plan's "Service Area Maps (Equity Maps)". The image below titled 'No Coastal Park in South Carlsbad' shows Carlsbad's adopted "Park Service Area Maps (Equity Maps)" from the City's Park Master Plan that says it maps "the population being served by that park type/facility." The added text to the image is data regarding park inequity and disparity in South Carlsbad. The image compiles Carlsbad's adopted Park "Park Service Area Maps (Equity Maps)" for Community Parks and Special Use Area Parks that are the City's two park acreage types produced by the City's comparatively low standard of 3 acre of City Park per 1,000 population. The City's Park Service Area Maps (Equity Maps) shows areas and populations served by parks within the blue and red circles. City data clearly shows large areas of overlapping Park Service (areas/populations served by multiple parks) in North Carlsbad and also shows large areas in South Carlsbad with No Park Service (areas/populations unserved by any parks) and Park Inequity in South Carlsbad. It clearly shows the City's Documented Park Need and Park inequity at Ponto. The Existing LCP LUP for Ponto's Planning Area F in is required to "consider" and "document" the need for a "Public Park". The City's adopted Park

Service Area Maps (Equity Maps) clearly shows the inequity of Coastal City Park between North and South Carlsbad, and the need for Coastal Parks in South Carlsbad – particularly at Ponto. The City’s proposed Draft ‘Buildout’ Coastal Recreation Land Use Plan instead proposes to lock-in documented City Public Coastal Park inequity and unserved Coastal Park demand at Ponto and South Carlsbad forever. It does so by proposing the last vacant undeveloped/unplanned Coastal land – Ponto Planning Area F - in the unserved Ponto and South Carlsbad coastline areas instead of being planned for much needed City Park and Coastal Recreation use be converted to even more low-priority residential and general commercial land uses. These ‘low-priority’ residential uses, by the way, further increase City Park and Coastal Recreation demand and inequity in Coastal South Carlsbad. This is wrong, and a proposed ‘forever-buildout’ wrong at the most basic and fundamental levels. The proposed Draft Coastal Recreation Land Use Plan by NOT providing documented needed City parks for vast areas of Coastal South Carlsbad is inconsistent with the CA Coastal Act policies and Existing LCP LUP requirements for Ponto Planning Area F; and also inconsistent with fair/equitable/commonsense land use and park planning principles, inconsistent with CA Coastal Commission social justice goals, inconsistent with social equity, inconsistent with VMT reduction requirements, and inconsistent with common fairness. A different Coastal Recreation Land Use Plan should be provided that provides for a socially equitable distribution of Coastal Park resources so as to would allow children, the elderly and those without cars to access Coastal Parks. The proposed Draft ‘Buildout’ Coastal Recreation Land Use Plan forever locking in the unfair distribution of City Parks appears a violation of the not only CCA Sections 30213, 30222, 30223, and 30252(6) but also the fundamental values and principles of the CA Coastal Act. The Draft also appears a violation of Carlsbad’s Community Vision.

A different Coastal Recreation Land Use Plan is required to provide a more equitable distribution of City Parks with non-vehicular accessibility. Such a different plan would advance State and City requirements to reduce vehicle Miles Traveled (VMT) and greenhouse gas emissions that contribute to climate change and sea level rise impacts. Please note that the data for the above basic comparison comes from City of Carlsbad, Oceanside and Encinitas General Plan and Park Master Plan documents.

Data shows the proposed Coastal Recreation Plan conflicts with the CA Coastal Act policy Sections. As mentioned page 3-3 correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation Land Uses, and pages 3-5 list multiple CA Coastal Act (CCA) policy Sections that confirm this. However, given the significant statewide importance of Coastal Recreation Land Use, the City proposed 'Buildout' Coastal Recreation Land Use Plan does not appear to adequately address and implement these CCA Policies, and most noticeably in the Ponto area of South Carlsbad. Coastal Recreation is a significant Statewide High-Priority Land Use under the CCA. For a substantially developed non-coastal-industry city like Carlsbad Coastal Recreation is likely the biggest land use issue. This issue is even more elevated due to the fact that there are only a few small areas left of undeveloped Coastal land on which to provide Coastal Recreation, and Carlsbad is proposing a Coastal 'Buildout' Land Use Plan on those areas. The use of the last few remaining vacant portions of Coastal land for Coastal Recreation Land Use is the most important land use consideration in the proposed Draft LCP Land Use Plan Amendment as population and visitor growth will increase demands for Coastal Recreation. It is thus very surprising, and disturbing that the proposed Coastal Recreation Land Use Plan is so short, lacks any comparative and demand projection data, lacks any resource demand/distribution and social equity data, and lacks any rational and clear connection with CCA Policy and the proposed 'Buildout' Coastal Land Use plan. This is all the more troubling given that:

- The Ponto area represents the last significant vacant undeveloped/unplanned land near the coast in South Carlsbad that can provide a meaningful Coastal Park.
- The fact that the City's Existing LCP requires the city consider and document the need for a "i.e. Public Park" on Ponto's Planning Area F prior to the City proposing a change of Planning Area F's "Non-residential Reserve" land use designation. The City has repeatedly failed to comply with this LCP LUP requirement, and worse has repeatedly failed to honestly inform citizens of this LCP LUP requirement at planning Area F before it granted any land use. The City, apparently implementing speculative developer wishes, has repeatedly proposed changing Planning Area F's Coastal Land Use designation to "low-priority" residential and general commercial land uses without publically disclosing and following the Existing LCP LUP.
- The City's currently developed parks in the southern portion of the City do not meet the city's comparatively low public park standard of only 3 acres per 1,000 population. Since 2012 there has been City park acreage shortfall in both SW and SE Carlsbad.
- The Existing population of Ponto (west of I-5 and south of Poinsettia Lane) requires about 6.6 acres of Public Park based on the City's comparatively low public park standard of 3 acres per 1,000 population. There is no Public Park in Ponto. Adding more population at Ponto will increase this current park demand/supply disparity.

- Carlsbad and other citizens have since 2017 expressed to the City the strong need for a Coastal Park at Ponto, and requested the City to provide a true citizen-based planning process to consider the Public Park need at Ponto. The Citizens' requested process is fully in-line with CCA Goals, Public Participation Policy, Land Use Policies, and the Existing LCP Land Use Plan/requirements for Planning Area F and is the most appropriate means to consider and document the need for a Public Park at Ponto as required by the Existing LCP Land Use Plan.
  - Planning Area F is for sale, and a non-profit citizens group has made an offer to purchase Planning Area F for a much needed Coastal Park for both Ponto and inland South Carlsbad residents and visitors. How should these facts be considered by the City and CCC?
  - Carlsbad has no Coastal Parks west of I-5 and the railroad corridor for the entire southern half of Carlsbad's 7-mile coastline.
  - The southern half of Carlsbad's coastline is 5.7% of the entire San Diego County coastline and represents a significant portion of regional coastline without a meaningful Coastal Park west of I-5 and the Railroad corridor.
  - The City's proposed Coastal Recreation Land Use Plan provides No Documentation, No Rational, and No Supporting or Comparative Data to show the proposed Coastal Recreation Land Use Plan in fact complies with the CA Coastal Act.
9. There is no Coastal Recreation/Park west of interstate 5 for all South Carlsbad, or half of the entire City. This is a obviously unfair and inequitable distribution of Coastal Recreation/Park resources that should be corrected by changes to the Draft LCP Land Use Amendment: The following image (which was sent to the City and CCC on several prior communications) was first requested by former Carlsbad Councilman Michael Schumacher during a People for Ponto presentation/request at the Oct 23, 2018 City Council meeting. The data compiled in the image shows how the South Coastal Carlsbad (Ponto) is not served by a Park per the City's adopted Parks Master Plan. The blue dots on the map are park locations and blue circle(s) show the City's Park Master Plan adopted Park Service Areas and Park Equity. This data, from pages 87-88 of the City of Carlsbad Parks Master Plan, shows all City Parks (both Community Parks and Special Use Areas in Coastal Carlsbad (except Aviara Park east of Poinsettia Park and west of Alga Norte Park). The text on the left margin identifies the South Carlsbad Coastal Park (west of I-5) gap along with the number of South Carlsbad Citizens (over half the City's population) without a Coastal Park. The left margin also identifies more local issues for the over 2,000 Ponto area adults and children. For Ponto residents the nearest Public Park and City proposed 'solution' to the South Carlsbad and Ponto Public Park deficit are miles away over high-speed/traffic roadways and thus somewhat hazardous to access and effectively unusable by children/the elderly or those without cars. Having been a 20-year resident of Ponto I regularly see our children have to play in the street as there are no Public Park with large open fields to play at within a safe and under 1-hour walk away. Ponto citizens have submitted public comments regarding this condition and the lack of a Park at Ponto

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

Ponto is at the center of regional 6-mile Coastal Park Gap. A Coastal Park in this instance being a Public Park with practical green play space and a reasonable connection with the Coast (i.e. located west of the regional rail and Interstate-5 corridors). The following image shows this larger regional Coastal Park Gap centered on the Ponto Area, and the nearest Coastal Parks – Cannon Park to the north, and Moonlight Park to the south.

Regionally this image shows Ponto is the last remaining significant vacant Coastal land that could accommodate a Coastal Park to serve the Coastal Park current needs of over existing 2,000 Ponto residents, 64,000 existing South Carlsbad residents, and a larger regional population. It is also the only area to serve the Coastal Park needs for the thousands of hotel rooms in Upland Visitor Accommodations in South Carlsbad.

As People for Ponto first uncovered and then communicated in 2017 to the City and CCC; Carlsbad’s Existing (since 1994) Local Coastal Program LUP currently states (on page 101) that Ponto’s Planning Area F: carries a Non-Residential Reserve (NRR) General Plan designation. Carlsbad’s Existing Local Coastal Program Land Use Plan states: “Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an “unplanned” area ...” and requires that: “... **As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.**” CA Coastal Commission actions, Carlsbad Public Records Requests 2017-260, 261, and 262, and 11/20/19 City Planner statements confirm the City never fully communicated to Carlsbad Citizens the existence of this LCP requirement nor did the City comply with the requirements. Of deep concern is that the City is now (as several times in the past) still not honestly disclosing to citizens and implementing this Existing LCP requirement as a true and authentic ‘planning effort’. The lack of open public disclosure and apparent fear of true public workshops and Public Comment about the Existing Planning Area F LCP requirements are troubling. The point of a ‘planning effort’ is to openly and publically present data, publically discuss and explore possibilities/opportunities, and help build consensus on the best planning options. Citizens are concerned the city has already made up its mind and there is no real “planning effort” in the proposed Draft LCP Amendment process, just a brief Staff Report and at the end provide citizens 3-minutes to comment on the proposal. This is not the proper way to treat the last remaining significant vacant land is South Carlsbad that will forever determine the Coastal Recreation environment for generations of Carlsbad and California citizens and visitors to come.

The following data/images show how Ponto is in the center of the 6-mile (west of I-5 and Railroad corridor) regional Coastal Park gap. Ponto is the last remaining vacant and currently “unplanned” Coastal land that is available to address this regional Coastal Park Gap.

## How Ponto Serves Region cont.

- **Relieves Coastal Park congestion** in North Carlsbad, Encinitas and Solana Beach
- Area currently needs Coastal Park as seen by:
  - Ponto Beach parking congestion
  - current trespass use of Planning Area F as a Park
- **6.6 acre portion of Planning Area F addresses SW Quad City Park deficit**

The image is a satellite map of the Ponto region in Carlsbad, California. The map shows the coastline on the left, with the Pacific Ocean. A yellow arrow points from the text on the left to a specific area on the map. An inset map in the top right corner provides a closer view of the area labeled 'Planning Area F'. Other landmarks visible on the map include San Diego Botanic Garden, San Diego State University, and various residential and commercial areas. The map is credited to Google.

## How Ponto Serves Region cont.

- A Ponto Park helps address 2050 and beyond Regional Population and Visitor Growth demands for Coastal Parks
- A Ponto Park provides the lowest-cost coastal access and recreation opportunities for CA citizens and visitors

## How Ponto Serves Region cont.

- Vital park and open space amenity for Visitor serving businesses and accommodations
- 6.6 acre unique City Coastal Park venue to stage special events: Runs, bike rides, triathlons, sports, coastal festivals, etc.

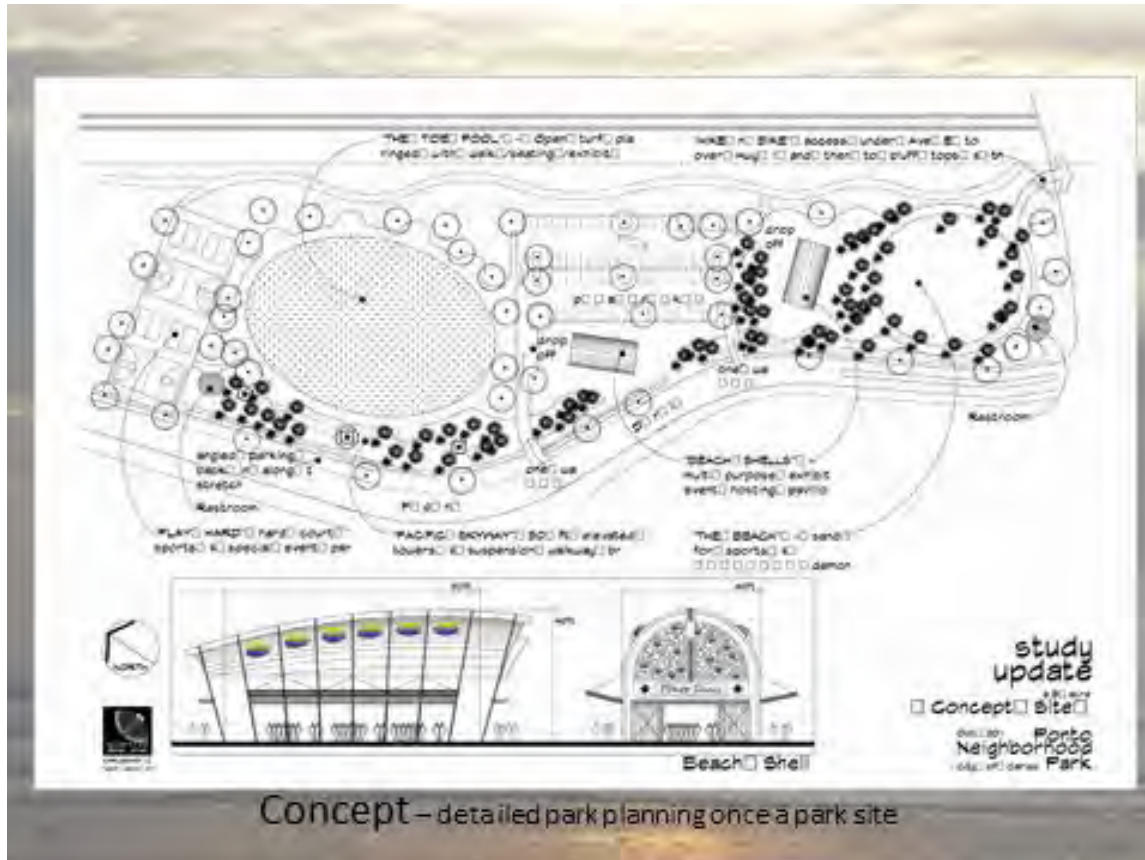

## How Ponto Serves Region cont.

- Critical Park space for So. Carlsbad State Beach Campground
- Provides a big training and staging space for Junior lifeguards
- Dog walk trail

One possible Concept image of a potential Ponto Coastal Park at Planning Area F is illustrated below. The potential for a Ponto Coastal Park is real. The speculative land investment fund (Lone Star Fund #5 USA L.P. and Bermuda L.P.) that currently owns Planning Area F is selling the property, and is available for the City of Carlsbad to acquire to address the documented demand/need for a City Park and City Park inequity at Ponto and in Coastal South Carlsbad. A Ponto Beachfront Park 501c3 is working to acquire donations to help purchase the site for a Park. These situations and opportunities should be publicly discussed as part of the City Staff's proposed Local Coastal Program Land Use Plan Amendment.

10. Projected increases in California, San Diego County and Carlsbad population and visitor growth increases the demand for High-Priority-Coastal Recreation land use:
  - a. Increasing Citizen demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

San Diego County Citizen Population - source: SANDAG Preliminary 2050 Regional Growth Forecast

1980	1,861,846
1990	2,498,016
2000	2,813,833
2010	3,095,313
2020	3,535,000 = 46,500 Citizens per mile of San Diego County coastline
2030	3,870,000
2040	4,163,688
2050	4,384,867 = 57,700 Citizens per mile of San Diego County coastline

2020 to 2050 = 24% increase in San Diego County population.

Citizen Population will continue beyond 2050. Carlsbad may plan for 'Buildout' in 2050, but what is San Diego County's 'Buildout'? There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for this growing population. If we do not increase our supply of Coastal Recreational Resources for these increased demands our Coastal Recreation Resources will become more overcrowded, deteriorated and ultimately diminish the Coastal Recreation quality of life for Citizens of Carlsbad and California. Ponto sits in the middle of an existing 6-

mile regional Coastal Park Gap (no Coastal Park west of Interstate 5) and there is No Coastal Park in all of South Carlsbad to address the Coastal Recreation needs of the 64,000 South Carlsbad Citizens.

- b. Increasing Visitor demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

Yearly Visitors to San Diego County – source: San Diego Tourism Authority; San Diego Travel Forecast, Dec, 2017

2016	34,900,000
2017	34,900,000
2018	35,300,000
2019	35,900,000
2020	36,500,000 = average 100,000 visitors per day, or 2.83% of County's Population per day, or 1,316 Visitors/coastal mile/day in 2020
2021	37,100,000
2022	37,700,000

This is growth at about a 1.6% per year increase in visitors. Projecting this Visitor growth rate from 2020 to 2050 results in a 61% or 22,265,000 increase in Visitors in 2050 to:

2050 58,765,000 = average 161,000 visitors per day, or 3.67% of the County's projected 2050 Population per day, or 2,120 Visitors/coastal mile/day in 2050.

The number of Visitors is likely to increase beyond the year 2050. There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for these projected 2050 61% increase, and beyond 2050, increases in Visitor demand for Coastal Recreational Resources. Increasing Coastal Recreation land is a vital and critically supporting Land Use and vital amenity for California's, the San Diego Region's and Carlsbad's Visitor Serving Industry. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5). There are thousands of hotel rooms in South Carlsbad that have NO Coastal Park to go to in South Carlsbad. This needs correcting as both a Coastal Act and also a City economic sustainability imperative.

- c. We request that the as part of the public's review, the City Staff proposed Draft LCP Amendment to the Land Use Plan clearly document if and/or how future forever 'Buildout' City, Regional and Statewide population and visitor population demand for Coastal Recreation and City Coastal Parks are adequately provided for both in amount and locational distribution in the Carlsbad proposed Amendment of the LCP Land Use Plan.

11. Carlsbad's Draft Local Coastal Program Land Use Plan Amendment says it plans to a year 2050 buildout of the Coastal Zone. The Draft Local Coastal Program Land Use Plan Amendment then is the last opportunity to create a Coastal Land Use Plan to provide "High-Priority" Coastal Recreation Land Use, and will forever impact future generations of California, San Diego County, and Carlsbad Citizens and Visitors:

- a. The Draft LCPA indicates in 2008 only 9% of All Carlsbad was vacant land. Less is vacant now in 2019. Carlsbad's Coastal Zone is 37% of the City, so vacant unconstrained land suitable for providing Coastal Recreation is likely only 3-4%. The prior request for a full documentation of the remaining vacant Coastal lands will provide a better understanding needed to begin to make the final 'buildout' Coastal Land Use Plan for Carlsbad. The Draft LCPA does not indicate the amount and locations of currently vacant unconstrained Coastal Land in Carlsbad. This final limited vacant land resource should be clearly documented and mapped in the DLCPA as it represents the real focus of the DLCPA – the Coastal Plan for these remaining undeveloped lands. These last remaining vacant lands should be primarily used to provide for and equitably distribute "High-Priority" Coastal Recreation Land Uses consistent with CCA Sections:
  - i. Section 30212.5 "... Wherever appropriate and feasible, public facilities, including parking areas or facilities, **shall be distributed throughout an area so as to mitigate against the impacts, social and otherwise, of overcrowding or overuse by the public of any single area.**";
  - ii. Section 30213 "... **Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...**";
  - iii. Section 30222 "**The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development, but not over agriculture or coastal-dependent industry.**"
  - iv. Section 30223 "**Upland areas necessary to support coastal recreational uses shall be reserved for such uses, where feasible**" ,
  - v. Section 30251 ... The location and amount of new development should maintain and enhance public access to the coast by ... 6) assuring that the recreational needs of new residents will not overload nearby coastal recreation areas by **correlating the amount of development with local park acquisition** and development plans with the provision of onsite recreational facilities to serve the new development"

Adopted City Park Service Area and Park Equity maps discussed earlier document the proposed Draft LCP Amendment's inconstancy with the above CCA Policy Sections. The locations and small amounts remaining vacant Coastal lands provide the last opportunities to correct the inconsistencies of City proposed Draft "buildout" LCP Land Use Plan Amendment with these Coastal Act Policies.

Currently and since 1996 there has been LCP LUP Policy/regulations for Ponto Planning Area F that require consideration of a "Public Park" prior to changing the existing "unplanned Non-residential Reserve" Land Use designation. A map and data base of vacant developable Coastal land should be provided as part of the Draft LCPA and the Draft LCPA. This map and data base should document the projected/planned loss of Coastal land use due to Sea Level Rise. Draft LCPA projects Sea Level Rise will

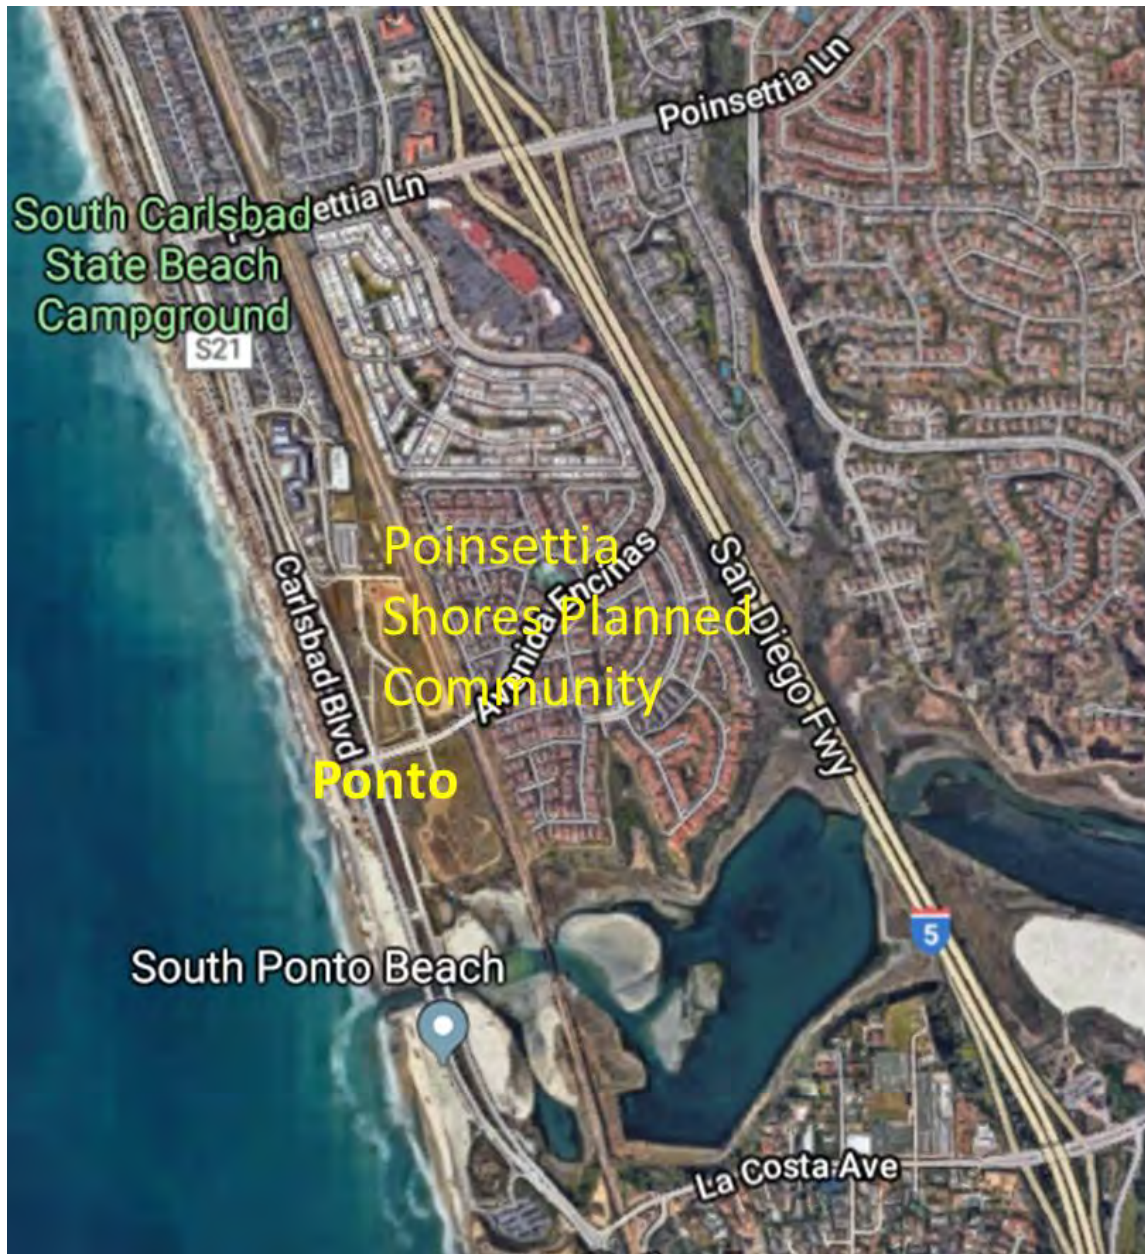

eliminate several beaches and High-Priority Coastal Land Uses like Coastal Lagoon Trails and the Campground.

- b. The LCP Land Use Plan should plan and reserve the very limited vacant developable Coastal land for the long-term 'Buildout' needs of "High-Priority" Coastal Recreation Land Use. Vacant developable Coastal land is too scarce to be squandered for "low-priority" uses. Sea Level Rise will reduce "High-Priority" Coastal Uses. So how vacant developable Upland area should be preserved for "High-Priority" Coastal Uses is a key requirement to be fully documented and discussed in the Draft LCPA. If not one of two things will eventually happen 1) any new Coastal Park land will require very expensive purchase and demolition of buildings or public facilities to create any new Coastal Park land to meet existing and growing demand; or 2) Coastal Recreation will be hemmed-in by "low-priority" uses and thus force Coastal Recreation to decrease and become increasingly concentrated and overcrowded in its current locations; and thus will promote the eventual deterioration of our current Coastal Recreation resources. A plan that fails to fix Coastal Park deficits and then increase Coastal Parks in pace with increased population/visitor demand is a plan that can only result in degradation. How the Draft LCPA documents and addresses the land use planning of the last small portions of vacant developable Coastal land is critical for the future and future generations.
12. Citizens of South Carlsbad are concerned about the City's multiple prior flawed Ponto planning processes or 'mistakes' the City has made yet is basing the City Staff's proposed Draft LCP LUP. The concerns being the City is not openly and honestly communicating information to citizens and the public, and not allowing a reasonable and appropriate community-based planning process to address the documented Park, Coastal Recreation and unconstrained open space needs in South Carlsbad. One of these groups of citizens has created a [www.peopleforponto.com](http://www.peopleforponto.com) website to try to research and compile information and hopefully provide a better means for citizens to understand facts and then express their concerns/desires to the City of Carlsbad (City) and CA Coastal Commission (CCC). Over 2,000 emails have been sent to the City and CCC regarding Coastal Land Use Planning Issues at Ponto. The San Pacifico Planned Community (i.e. San Pacifico Community Association) has also, since 2015, sent numerous emailed letters to the City and CCC noting the significant concerns about changes in Coastal planning the City is proposing for our Planned Community.

Repeatedly over 90% of surveyed citizens (results emailed prior to both the City and CCC) have expressed the vital need and desire for a Coastal Park at Ponto to serve the current and future Coastal Recreation needs for all both Ponto and South Carlsbad and for larger regional and State Coastal Recreational needs. This desire is supported by data, CA Coastal Act Policy, and also Carlsbad's Community Vision – the foundation for the City's General Plan. Ponto is the last remaining vacant Coastal area available to provide for those needs in South Carlsbad and for a regional 6-mile stretch of coastline. Citizens have expressed deep concern about the City's flawed prior Coastal planning efforts for Coastal Recreation at Ponto, including two repeated LCP Amendment "mistakes" (Ponto Beachfront

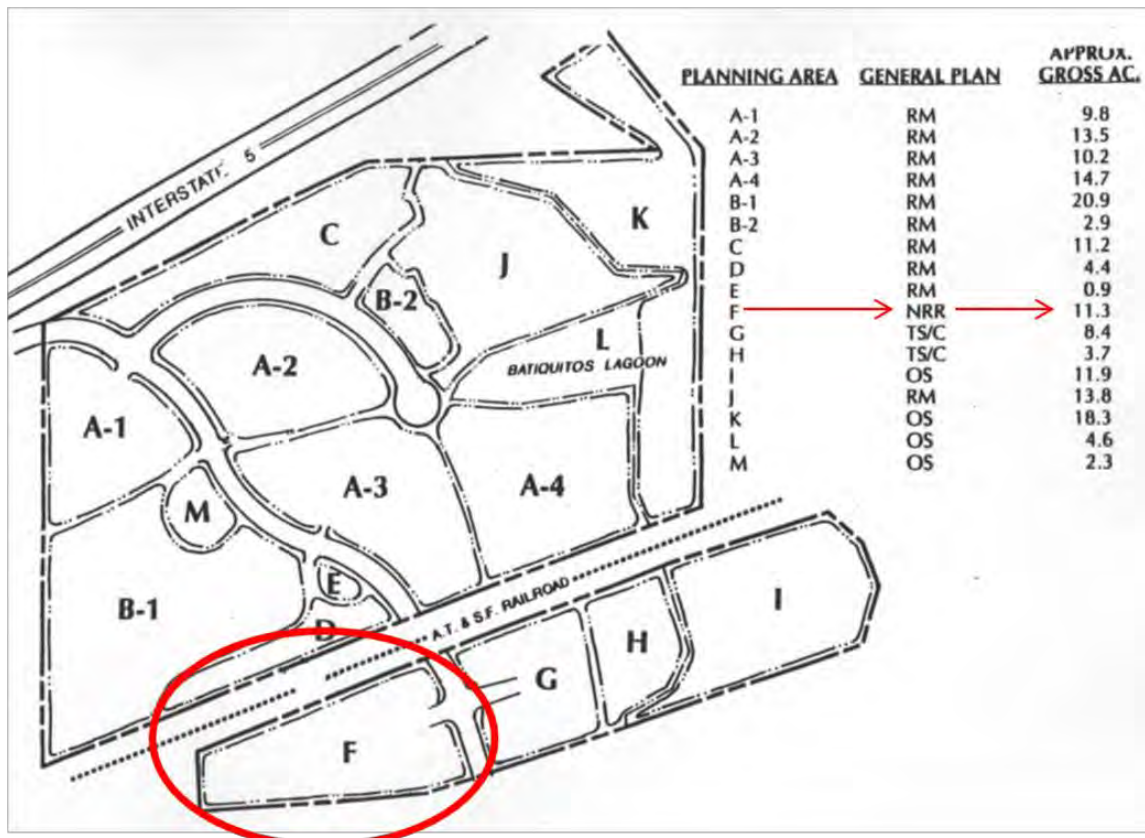

Village Vision Plan in 2010 and General Plan Update in 2015) when the City twice failed to publicly disclose/discuss and then follow the Existing LCP requirements at Ponto – specifically for Planning Area F. People for Ponto had to use multiple Carlsbad Public Records Requests in 2017 to find these “mistakes”. CCC Staff was helpful in both confirming the City “mistakes” and communicating back to the City. As citizens we are still unclear as to how/why these two repeated “mistakes” happened. There is citizen concern that the City is again repeating these two prior “mistakes” by not at the beginning of the Public Comment Period clearly and publicly disclosing the Planning Area F LCP requirements to citizens as part of the current LCP Amendment process, and also by not implementing the existing LCP requirement PRIOR to proposing an Amended Coastal Land Use Plan for Ponto. The City in its proposed LCP Amendment process is putting-the-cart-before-the-horse with respect to honest and open consideration, documentation and public discussion of the need for high-priority Coastal Recreation land use required of Planning Area F at Ponto. The City is also not clearly letting all Carlsbad citizens know about the Existing LCP requirements for Ponto’s Planning Area F so they can be informed to reasonably participate in public review and comment regarding amending that LCP requirement, and the need for Coastal Recreation land uses in South Carlsbad. Since 2017 there has been repeated citizen requests to the City (copies were provided to the CCC) to fix these multiple fundamental/foundational flaws by in the City’s prior Coastal Recreation and Public Parks and Open Space at planning, and the currently Proposed Draft LCP Land Use Plan Amendment. Since 2017 there have also been repeated citizen requests to the City to provide a truly open, honest, inclusive community-based planning process and workshops with the accurate and honest information, prior to forming a proposed Draft LCP Land Use Plan Amendment. As citizens we believe we can constructively work with the City and CCC towards a consensus or viable options on these important Coastal Recreation issues if the City allows and encourages such an open, honest and inclusive process. We request the City respond to the requests submitted to the City since 2017, and again request such a process from the City before any LCP Amendment is first considered by the Planning Commission and City Council. Such a requested process benefits all.

13. Why the Draft LCPA Land Use Plan for Ponto should provide for the current and future Coastal Park and Recreation needs for South Carlsbad, the San Diego Region and California.
  - a. Ponto, is one of last remaining vacant and undeveloped Coastal lands in North County
  - b. Ponto is the last remaining undeveloped Coastal land in South Carlsbad
  - c. Ponto has the last unplanned Planning Area of the Existing Poinsettia Shores Planned Community & Local Coastal Program that can be planned for high-priority Coastal Recreation land use. This Existing LCP requires Planning Area F be considered for a “Public Park”.
  - d. Following is a map of the Ponto area in South Carlsbad:

Following is the LCP Land Use map from the Existing Poinsettia Shores Master Plan & Local Coastal Program adopted in 1996. This is the Land Use map that the City is proposing to change in the proposed LCP Amendment to the Land Use Plan. As the Existing LCP Land Use map shows most all the land is 'low-priority' residential use at an RM Residential medium density, a small portion is 'high-priority' Visitor Serving TC/C Tourist Commercial. Most all the Open Space is constrained and undevelopable land (the steep CSS habitat bluffs above Batiquitos Lagoon) or water (the lagoon water). This land/water is owned by the State of California, like the inner lagoon east of I-5. Only Planning Area M at 2.3 acres is unconstrained Open Space and it provides a small private internal recreation facility for the approximately 450 homes and 1,000 people in the Planned Community. This small recreation area is a City requirement for 'planned developments' to off-set loss open space from planned development

impacts on housing quality. Planned developments can propose designs that reduce normal setback and open space areas – they bunch together buildings to increase development – such as the smaller lot sizes, and extensive use of “zero-setbacks” to reduce typical lot sizes that occurs at Poinsettia Shores. A private recreation facility in any of the City’s planned developments is never considered a replacement for required City Parks. Planned Developments, like unplanned developments, are required to dedicate Park land to the City, or pay a Park In-Lieu fee to the City so the City provide the developer’s obligation to provide City Park acreage to address the population increase of their proposed planned development. For Poinsettia Shores’ population the City’s minimum City Park Standard would require developers set aside 3 acres of City Park land for local park needs. For the larger Ponto area population about 6.6 acres of City Park Land is required. The Existing LCP reserves Planning Area F as an unplanned “Non-residential Reserve” Land Use until the Public Park needs for Ponto are considered and documented. Only then can the NRR land use be changed.

14. Developers have overbuilt in the Ponto area of the Coastal Zone. The City of Carlsbad has under questionable circumstances is currently choosing to ‘exempted’ Ponto developers from providing the minimum amount of unconstrained Open Space according to the City’s developer required Open Space Public Facilities Standard. The legality of these confusing circumstances is subject to a lawsuit against the City. However the City’s computerize mapping system has documented that the Ponto area of the Coastal Zone is missing about 30-acres of Unconstrained Open Space that can be used to fulfill the City’s Open Space Performance Standard that states that 15% of unconstrained and

developable land must be preserved by developers as Open Space. Following is a summary of data from the City data regarding the missing Open Space at Ponto (Local Facility Management Plan Zone 9, LFMP Zone 9) in the Coastal Zone pursuant to the City's Open Space Performance Standard. If it is desirable People for Ponto can provide the City GIS map and parcel-by-parcel data base on which the following summary is based:

City of Carlsbad GIS data calculations of Open Space at Ponto area of Coastal Zone:

472 Acres = Total land in LFMP Zone 9 [Ponto area] per City of Carlsbad GIS data

(197 Acres) = Constrained land/water/infrastructure that is excluded from the City's Open Space Standard

275 Acres = Unconstrained land in LFMP Zone 9 (Ponto) subject to the City's Open Space Standard

X 15% = Minimum unconstrained Open Space requirement per the City Open Space Standard

41 Acres = Minimum unconstrained Open Space required in LFMP Zone 9

(11 Acres) = Actual unconstrained Open Space provided & mapped by City in LFMP Zone 9

**30 Acres = Missing unconstrained Open Space needed in LFMP Zone 9 [Ponto area of Coastal Zone] to meet the City's minimum GMP Open Space Standard. 73% of the required Open Space Standard is missing.**

Thus the Ponto area of the Coastal Zone appears overdeveloped with 30 additional acres of "low-priority" residential land uses due to developers' non-compliance to the City's Open Space Public Facility Performance Standard's Minimum developer required Open Space requirement. As noted a citizens group has a pending lawsuit with the City over the City's current 'exempting' Ponto and future developers from meeting the Open Space Standard.

15. The prior pre-1996 LCP for Ponto – the Batiquitos Lagoon Educational Park Master Plan & LCP (BLEP MP/LCP) had significant Open Space and recreational areas. These significant Open Space and Recreational areas were removed with BLEP MP/LCP's replacement in 1996 by the currently existing Poinsettia Shores Master & LCP (PSMP/LCP) and its City Zoning and LCP LUP requirements that reserved Planning Area F with the current "Non-residential Reserve" Land Use designation. Since the BLEP MP/LCP it appears developers and the City of Carlsbad have worked to remove "High-Priority" Coastal land uses (i.e. Coastal Recreation and Park uses) out of the Ponto area and replaced them with more "low-priority" residential and general commercial land uses. For example:
  - a. Planning Area F used to be designated "Visitor Serving Commercial" as part of the original 1980's BLEP MP/LCP for Ponto.
  - b. In 1996 the BLEP MP LCP was changed by developer application to the now current PSMP LCP, and the LCP LUP designation changed from "Visitor Serving Commercial" to "Non-Residential Reserve" with the requirement to study and document the need for "High-Priority" Coastal Recreation (i.e. Public Park) and/or Low-cost visitor accommodations prior to any change to Planning Area F's "Non-residential Reserve" LCP land use.
  - c. In 2005 the City started to try to change Planning Area F to low-priority residential and general commercial land use in the City's Ponto Beachfront Village Vision Plan (PBVVP). At this time the City made its first documented Coastal 'planning mistake' by not disclosing to

- the public the existence of Planning Area F's LCP requirements and then also not following those LCP requirements. The City's planning process seemed focused on addressing developer's land use desires, and increasing land use intensity to boost "Tax-increment financing" as the City had established a Redevelopment Project Area at Ponto. A short time after the State of CA dissolved Redevelopment Agencies due in part to such abuses by cities. The CCC formally rejected the PBVVP in 2010, citing the City's failure to follow the LCP requirements for Planning Area F.
- d. Five years later in 2015 the City again adopted a proposed General Plan Update to again change Planning Area F to low-priority residential and general commercial land use. The General Plan Update cited the City's PBVVP that was in fact rejected by the CCC only a few years before. The City again repeated their PBVVP's Coastal land use 'planning mistake' by again not disclosing to the public the existence of Planning Area F's LCP requirements and then not following those LCP requirements. It is unclear why the City did this only 5-years after the CCC specifically rejected the Ponto Beachfront Village Vision Plan for those same reasons.
  - e. In 2017 citizens found and then confirmed these Ponto Coastal 'planning mistakes' by the City through multiple official Carlsbad Public Records Requests and CCC Staff confirmation. The CCC readily identified the mistakes, but the City's 2019 proposed Draft LCP Land Use Plan and planning process still has yet fully disclose these prior Coastal 'planning mistakes' to ALL citizens of Carlsbad - the failure to disclose and follow the Planning Area F LCP LUP and City Zoning requirements. Full City disclosure is needed now to try to correct many years of City misrepresentation to citizens on LCP required Coastal land Use planning at Ponto. It is needed now so the public is aware at the start of the Public Comment Period. In 2017 citizens began asking the City fix the City's over 12-years of misinformation and planning mistakes by 'restarting' Coastal land use planning at Ponto with an open and honest community-based Coastal planning process. These citizens' requests have been rejected.
  - f. In 2019 the City Staff proposed citywide Draft LCP land Use Plan Amendment that again proposed to change Planning Area F to "low-priority" residential and general commercial land use, without first disclosing the Planning Area F LCP requirements with corresponding analysis of the Need for Coastal Recreation (i.e. Public Park) and/or low-cost visitor accommodations at Planning Area F and providing that Documented analysis for public review/Consideration/comment. This seems like another 3<sup>rd</sup> repeat of the prior two Coastal planning mistakes by the City. In 2019, again citizens asked for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again the City rejected citizens' requests.
  - g. In 2020 thousands of public requests again asked, and are currently asking, for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again these requests are being rejected. Based on the significant citizen concern and the documented prior 'planning mistakes' at Ponto it appears reasonable and responsible for Ponto's Planning Area F to either:

- i. Retain its current Existing LCP LUP land Use of “Non-Residential Reserve” until such time as the City’s past Ponto Beachfront Village Vision Plan and General Plan Update planning mistakes and other issues subject to current planning lawsuits against the City are resolved with a true, honest and open community-based Coastal planning process asked for by citizens since 2017. Or
- ii. Propose in the Draft LCP Land Use Plan Amendment to re-designated Planning Area F back to a Visitor Serving Commercial and Open Space (“i.e. Public Park”) to provide both “High-Priority” coastal uses v. low-priority residential/general commercial uses due to the documented Coastal Recreation and Low-cost visitor accommodation needs for both citizens and visitors at Ponto and South Carlsbad.

16. Questionable logic and inconsistency in proposed Draft land use map and policies: Chapter 2 Figure 2-2B & C on pages 2-19 & 20 proposes to Amend the existing LCP Land Use Plan Map, and policies LCP-2-P.19 and 20 on pages 2-27 to 2-29 propose Amendments to existing LCP policy and create a new added layer of policy referencing a Ponto/Southern Waterfront. The proposed Land Use Map and Policies serve to firmly plan for “low-priority” residential and general commercial land uses at Ponto with a clear regulatory Land Use Plan Map showing these land uses and by specific regulatory policy (LCP-2-20) that clearly requires (by using the words “shall”) these “low priority” uses. In contrast the “High-Priority” Coastal Recreation and Coastal Park land uses that would be designated as Open Space are not mapped at all in Figure 2-2B & C; and the proposed policy LCP-2-P.19 is both misleading and specifically does Not Require any “High-Priority” Coastal Recreation and Coastal Park land Use at Ponto and South Carlsbad. In fact page 2-22 specifically indicates two “may” criteria that would first need to occur in the positive before any potential Coastal Recreation and Coastal Park Land could then theoretically even be possible. It is highly probable that it is already known by the City that the proposed relocation of Carlsbad Boulevard (Coast Highway) is not very feasible and not cost effective, and will not yield (due to environmental habitat constraints, narrowness of the roadway median, and other design constraints) any significant dimensions of land that could potentially be designated Open Space and realistically be used as a Park.

The blank outline map (Figure 2-2B &C) provides no mapped Open Space Land Use designation, other than for the currently existing State Campgrounds’ low-cost visitor accommodations, so the proposed Land Use Plan Map is Not providing/mapping any new Open Space land use to address Coastal Recreation and Coastal Park needs. The Draft LCP Land Use Plan Amendment’s proposed/projected/planned Sea Level Rise and associated coastal erosion appears to indicate that this “High-Priority” low-cost visitor accommodation (Campground) land use designated as Open Space will be reduced in the ‘Buildout’ condition due to coastal erosion. So **the Draft LCP Land Use Plan is actually planning for a Reduction in Open Space Land Use in South Carlsbad and Ponto.** Both the blank outline map and the proposed Land Use Map Figure 2-1 DO NOT clearly map and designate both South Carlsbad’s Draft LCP Planned Loss of the Open Space Land Use and also any New or replacement unconstrained land as Open Space land use for Coastal Recreation and Coastal Park. This is an internal inconsistency in Land Use Mapping that should be corrected in two ways:

- 1) Showing on all the Land Use (Figure 2-1), Special Planning Area (Figure 2-2B & C), and other Draft LCP Maps the Draft LCP's planned loss of land area in those maps due to the Draft LCP's planned loss of land due to Sea Level Rise and Coastal Land Erosion. This is required to show how land use boundaries and Coastal Recourses are planned to change over time. or
- 2) Provide detailed Land Use Constraint Maps for the current Carlsbad Boulevard right-of-way that the City "may" or 'may not' choose (per the proposed "may" LCP-2-P.19 policy) use to explore to address the City's (Park Master Plan) documented Coastal Recreation and Coastal Park land use shortages in Coastal South Carlsbad and Ponto. Clearly showing the potential residual Unconstrained Land within a Carlsbad Boulevard relocation that have any potential possibility to add new Open Space Land Use Designations (for Coastal Recreation) is needed now to judge if the policy is even rational, or is it just a Trojan horse.

The proposed internal inconsistency in mapping and policy appears like a plan/policy 'shell game'. The proposed Land Use Plan Maps and Policies should be consistent and equality committed (mapped-shall v. unmapped-may) to a feasible and actual Plan. If not then there is No real Plan.

There is no Regulatory Policy requirement in LCP-2-P.19 to even require the City to work on the two "may" criteria. The City could choose to bury the entire Carlsbad Boulevard relocation concept and be totally consistent with Policy LCP-2-P.19 and the LCP. As such the language on 2-22, Figure 2-2C (and the proposed Land Use Map), and policy LCP-2-P.19 and 20 appear conspire to create a shell game or bait-and-switch game in that only "low-priority" residential and general commercial uses are guaranteed (by "shall" policy) winners, and "high-priority" Coastal Recreation and Coastal Park Land Uses are at best a non-committal 'long-shot' ("may" policy) that the city is specifically not providing a way to ever define, or commit to implement. The proposed Draft LCP Land Use Plan Coastal Recreation and Coastal Park statements for Ponto are just words on paper that are designed to have no force, no commitment, no defined outcome, and no defined requirement to even have an outcome regarding the documented "High-Priority" Coastal Recreation and Costal Park needs at Ponto, Coastal South Carlsbad and the regional 6-mile Coastal Park gap centered around Ponto.

Policy LCP-2-P.19 falsely says it "promotes development of recreational use" but does not in fact do that. How is development of 'recreational use promoted' when the Use is both unmapped and no regulatory policy requirement and commitment (no "shall" statement) to 'promote' that Use is provided? Policy LCP-2-19.19 appears a misleading sham that does not 'promote' or require in any way "High-Priority" Coastal Recreation and Park Land Use at Ponto. There should be open and honest public workshops before the Draft LCP Amendment goes to its first public hearing to clearly define the major environmental constraints and cost estimates involving possible relocation of Carlsbad Boulevard and constructing needed beach access parking, and sufficient and safe sidewalks and bike paths along Carlsbad Boulevard; and then map the amount and dimensions of potential 'excess land' that maybe available for possible designation as Open Space in the City General Plan and Local Coastal Program. The City should not repeat the mistakes at the Carlsbad Municipal Golf Course (resulting in the most expensive to construct maniple course in the USA) by not defining and vetting the concept first. A preliminary review of City GIS data appears the amount, dimensions and locations of any potential 'excess' land maybe modest at best. However before the City proposes a 'Buildout' Coastal Land Use

Plan this critical information should be clearly provided and considered. It is likely the City's Carlsbad Boulevard relocation concept is unfeasible, inefficient, too costly, and yields too little actual useable 'excess land' to ever approach the Coastal Recreation and Coastal Park needs for South Carlsbad. This may already be known by the City, but it surely should be publicly disclosed and discussed in the DLPCA.

The proposed Coastal Land Use Plan to address Carlsbad's, San Diego County's and California's High-Priority Coastal Recreation Land Use and Coastal Park needs should NOT be vague "may" policy that appears to be purposely designed/worded to not commit to actually providing any "High-Priority" Coastal Recreation and Coastal Park land uses on the map or in policy commitments. The Land Use Plan and Policy for High-Priority Coastal Recreation and Coastal Park Land Use should be definitive with triggered "shall" policy statements requiring and assuring that the 'Forever' "High-Priority" Coastal Recreation and Coastal Park needs are properly and timely addressed in the City's proposed 'Buildout' Coastal Land Use Plan. This "shall" policy commitment should be clearly and consistently mapped to show the basic feasibility of the planned outcomes and the resulting actual Land that could feasibly implement the planned outcome.

Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard: Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard are Coastal Access and Complete Streets issues. South Carlsbad Boulevard now and has for decades been a highly used Incomplete Street that is out of compliance with the City's minimum Street Standards for pedestrian and bike access and safety. The Coastal Access portion of the Draft Land Use Plan should strongly address the Complete Street requirements for South Carlsbad Boulevard. Those policy commitments should be reference in Policy LCP-2-P.19 and 20 as Carlsbad Boulevard in **South Carlsbad is the most Complete Street deficient portion of Carlsbad Boulevard**. Forever Coastal Access parking demand and the proposed LCP Amendment's Land Use Plan to supply parking for those demands should also be addressed as part of the Coastal Access and Complete Streets issues for South Carlsbad Boulevard. If much needed Coastal Access Parking is provided on South Carlsbad Boulevard as part of a "maybe" implemented realignment, most of the "maybe" realignment land left after constraints are accommodated for and buffered will likely be consumed with these parking spaces and parking drive aisles/buffer area needed to separate high-speed vehicular traffic from parking, a buffered bike path, and a sufficiently wide pedestrian sidewalk or Coastal Path. After accommodating these much needed Complete Street facilities there will likely be little if any sufficiently dimensioned land available for a Coastal Recreation and a Coastal Park. The needed Coastal Access and Complete Street facilities on South Carlsbad Boulevard are very much needed, but they are NOT a Coastal Park.

As mentioned the proposed Draft Coastal Land Use Plan's Maps and Policies are very specific in providing for the City's proposed LCP Land Use changes to 'low-priority' Residential and General Commercial' on Planning Area F (proposed to be renamed to Area 1 and 2). It is curious as to why the proposed Draft LCP Land Use Plan Amendment has no Land Use Map and minor vague unaccountable Land Use Policy concerning 'High-priority Coastal Recreation Land Use' at Ponto, while the very same time proposing very clear Land Use Mapping and detailed unambiguous "shall" land use policy requirements for 'low-priority' Residential and General Commercial land use at Ponto. Why is the City

Not committing and requiring (in a Land Use Map and Land Use Policy) to much needed ‘High-priority’ Coastal Recreation and Coastal Park Land Use’ needs at Ponto the same detail and commitment as the City is providing for “low-priority” uses? This is backwards and inappropriate. It is all the more inappropriate given the ‘Buildout’ Coastal Land Use Plan the City is proposing at Ponto. These issues and plan/policy commitments and non-commitments will be ‘forever’ and should be fully and publicly evaluated as previously requested, or the Existing LCP Land Use Plan of “Non-residential Reserve” for Planning Area F should remain unchanged and until the forever-buildout Coastal Recreation and Coastal Park issues can be clearly, honestly and properly considered and accountably planned for. This is vitally important and seems to speak to the very heart of the CA Coastal Act, its founding and enduring principles, and its policies to maximize Coastal Recreation. People for Ponto and we believe many others, when they are aware of the issues, think the City and CA Coastal Commission should be taking a long-term perspective and be more careful, thorough, thoughtful, inclusive, and in the considerations of the City’s proposal/request to permanently convert the last vacant unplanned (Non-residential Reserve) Coastal land at Ponto to “low-priority” land uses and forever eliminate any Coastal Recreation and Coastal Park opportunities.

17. Public Coastal View protection: Avenida Encinas is the only inland public access road and pedestrian sidewalk to access the Coast at Ponto for one mile in each direction north and south. It also hosts the regional Coastal Rail Trail in 3’ wide bike lanes. There exist now phenomenal coastal ocean views for the public along Avenida Encinas from the rail corridor bridge to Carlsbad Boulevard. It is assumed these existing expansive public views to the ocean will be mostly eliminated with any building development seaward or the Rail corridor. This is understandable, but an accountable (‘shall’) Land Use Plan/Policy addition to proposed Policy LCP-2-P.20 should be provided for a reasonable Public Coastal View corridor along both sides of Avenida Encinas and at the intersection with Carlsbad Boulevard. Public Coastal view analysis, building height-setback standards along Avenida Encinas, and building placement and site design and landscaping criteria in policy LCP-2-P.20 could also be considered to reasonably provide for some residual public coastal view preservation.
  
18. Illogical landscape setback reductions proposed along Carlsbad Boulevard, and Undefined landscape setback along the Lagoon Bluff Top and rail corridor in Policy LCP-2-P.20: Logically setbacks are used in planning to provide a buffering separation of incompatible land uses/activities/habitats. The intent of the setback separation is to protect adjacent uses/activities/habitats from incompatibility, nuisance or harassment by providing a sufficient distance/area (i.e. setback) between uses/activities/habitats and for required urban design aesthetics – almost always a buffering landscaping. Policy LCP-2-P.20. A.4 and C.3 says the required 40’ landscape setback along Carlsbad Boulevard “maybe reduced due to site constraints or protection of environmental resources.” The ability to reduce the setback is illogical in that setbacks are intended to protect environmental resources and provide a buffer for constraints. In the Carlsbad Boulevard right-of-way there is documented sensitive environmental habitat, along with being a busy roadway. How could reducing the protective 40’ setback in anyway better protect that habitat or provide a better landscaped compatibility or visual aesthetic buffer along Carlsbad Boulevard? It is illogical. If anything the minimum 40’ landscaped setback should likely be expanded near “environmental

resources". Regarding reducing the minimum 40' landscape setback for "site constraints" there is no definition of what a "site constraint" is or why it (whatever it may be) justifies a reduction of the minimum landscaped setback. Is endangered species habitat, or a hazardous geologic feature, or a slope, or on-site infrastructure considered a "site constraint"? There should be some explanation of what a "site constraint" is and is not, and once defined if it warrants a landscape setback reduction to enhance the buffering purpose of a landscape setback. Or will a reduction only allow bringing the defined constraint closer to the adjacent uses/activities/habitats that the landscape setback is designed to buffer. It is good planning practice to not only be clear in the use of terms; but also, if a proposed reduction in a minimum standard is allowed, to define reasonably clear criteria for that reduction/modification and provide appropriate defined mitigation to assume the intended performance objectives of the minimum landscape setback are achieved.

Policy LCP-2-P.20.C.4 is missing a critical Bluff-Top landscape setback. It seems impossible that the DLCPA is proposing no Bluff-Top setback from the lagoon bluffs and sensitive habitat. The Batiquitos Lagoon's adjoining steep sensitive habitat slopes directly connect along the Bluff-top. Batiquitos Lagoon's and adjoining steep sensitive habitat is a sensitive habitat that requires significant setbacks as a buffer from development impacts. Setbacks similar to those required for the San Pacifico area inland of the rail corridor, should be provided unless updated information about habitat sensitivity or community aesthetics requires different setback requirements.

Policy LCP-2-P.20 does not include a landscape setback standard adjacent to the rail corridor. This is a significant national transportation corridor, part of the 2<sup>nd</sup> busiest rail corridor in the USA. Train travel along this corridor is planned to increase greatly in the years to come. Now there is significant noise, Diesel engine pollution, and extensive ground vibration due to train travel along the rail corridor. Long freight trains which currently run mostly at night and weekends are particularly noisy and heavy, and create significant ground vibration (underground noise). These issues are best mitigated by landscape setbacks and other buffers/barriers. A minimum setback standard for sufficient landscaping for a visual buffer and also factoring appropriate noise and ground vibration standards for a buildout situation should be used to establish an appropriate landscape setback that should be provided along the rail corridor. Carlsbad's landscape aesthetics along the rail corridor should be factored into how wide the setback should be and how landscaping should be provided. An example for the landscape aesthetic portion of the setback standard could be landscape design dimensions of the San Pacifico community on the inland side of the rail corridor. However, noise and vibrational impacts at San Pacifico are felt much further inland and appear to justify increased setbacks for those impacts.

**Item #15 1/29/20 emailed public comments on the Staff proposed Draft LCP Land Use Plan Amendment submitting City Park Master Plan Park Service (park Equity) maps showing Ponto is unserved by City Parks, and South Carlsbad has no Coastal Park (west of I-5 and rail corridor)**

**Subject:** RE: City Council reply to Citizens concerns and requests regarding Ponto development

Dear Carlsbad City Council, Planning and Parks Commissions and City Staff:

We request that the attached files also be included in the public record for any City discussion on adjusting/amending the:

- City's Growth Management Program facilities standards,
- Growth Management Ordinance CMC 21.90,
- Citywide Facilities Improvement Plan and/or
- Local facilities Management Plan for Zone 9.

We have updated the Carlsbad Parks and Rec Master Plan exhibits to include an additional image showing the wider/longer Regional Coastal Park Gap which surrounds the Coastal Park void in Coastal South Carlsbad, and the many inland homes/population without a Coastal Park. We kindly request advance notification on any staff reports or meetings on the above as we would like to most effectively participate in public review and input. We are also available and happy to meet with you to discuss these attached issues in advance of consideration of any of the above. If we could receive a confirmation reply it would be most appreciated. Thank you for your consideration.

We sincerely care about the quality of life in our City and neighborhoods.

*Concerns and requests submitted to Carlsbad City Council et. al.*

Sincerely,  
Lance Schulte

**Subject:** City Council reply to Citizens concerns and requests regarding Ponto development

Dear City Council, Planning and Parks Commissions:

The attached file includes 4 emails to you regarding Ponto development issues and requests that relate to our community concerns to Develop Ponto Right. One email was sent August 31, 2017 and three were sent December 5, 2017. As yet we have not received a reply to the requests within the emails. We respectfully request a reply soon to these 4 emails as we wish to inform our Community.

Also attached are 2 pages from the City's Park and Recreation Department Master Plan that graphically illustrate some of the Coastal Park inequalities/deficits in South Carlsbad that also impact Coastal North Carlsbad and Encinitas. Please note the Veteran's Park location mapping error on p 87, which we hope can be corrected – a response to correct this mapping would be appreciated.

It is important that we all work to Develop Ponto right as the last remaining significant vacant Coastal land to establish the long-term buildout Coastal environment for South Carlsbad and North San Diego County.

Thank you for your consideration.

Sincerely,

Lance Schulte

San Pacifico Community Association – Ponto Development Review Committee

**Item #16 1/30/20 emailed public comments on the Staff proposed Draft LCP Land Use Plan Amendment submitting the prior public comments on Shopoff's LCPA be included in the City's LCPA, questioning why City Staff is keeping the Shopoff LCPA application alive and under what authority, and why the City Staff is processing the Planning Area F speculative developer's proposed LCPA to change the existing LCP Non-residential reserve land use to low-priority residential and general commercial land uses**

**Subject:** DLCPA public comment - including prior LCPA 2016-0002 public comments into the City staff proposed DLCPA public comments

As shown in the attached image of Shopoff application project numbers, a Local Coastal Program Amendment (LCPA 2016-0002) was applied for by this speculative land developer before or in 2016. In the City's application file there are many significant public comments from citizens regarding this LCPA and its related effects if that proposed LCPA is approved. These public comments on the above Shopoff Application Files should be included as official public comments on the City's proposed DLCPA for this site (Planning Area F). The City's DLCPA mirrors the Applicant's proposed LCPA from 2016 by proposing to change the existing "Non-residential Reserve" land use to residential and general commercial.

- Can you please provide email confirmation that the public comments in the Shopoff Application files are also included as public comments in the City's DLCPA?

Also, this speculative developer, Shopoff, quitclaimed interest in the Planning Area F site 1-year ago (Feb 2019) as documented in the attached 2019.2.11 Quitclaim file. At that time, Shopoff formally withdrew their application and asked the City for a refund of their application fees. However, the City Staff has made a choice to not follow standard City procedure of accepting the applicant's withdrawal of their application and returning their unused fees. The City Staff is currently keeping that application 'alive'.

- As a public comment on the DLCPA, we would like to know why the City Staff is doing this.

In addition, there has been no applicant progress on that application since before Feb 2019. The City has a municipal code requirement which 'withdraws' applications if applicants fail to make progress in processing their application within 6-months. We understand that particular City and State Law requirement is not fully applicable to all the Shopoff Applications, due to the need to first change the Existing LCP and MP (Master Plan or City Zoning Code) of "Non-residential Reserve" Land Use and Zoning before development design permits can even be applied for and processed. As a public comment on the DLCPA we would like to know:

- What city standard, policy, or legal process is the City Staff using to keep the application 'alive' when no applicant progress is being made on the application?
- Is this action by the City Staff solely a City Staff responsibility or is it subject to City Council review and direction?

*Concerns and requests submitted to Carlsbad City Council et. al.*

- Has City Staff provided or intend to provide the City Council a status report on the status of this application?
- Under what criteria would the City Staff withdraw the application due to inaction by the applicant?

Also, it is clear that the City Staff's proposed Draft LCPA Land Use Plan Amendment for Planning Area F is basically implementing the withdrawn Shopoff LCPA Application request to change the Existing LCP Land Use on Planning Area F from "Non-residential Reserve". As a public comment on the DLCPA, we would like to know:

- Why is the City Staff processing the withdrawn speculative developer's LCPA request to change the land use?

Attachments: Shopoff Quitclaim deed dated 2/11/19 & on-site sign listing Shopoff LCPA/MPA and development application numbers

**Item #17 1/31/20 emailed public comments on the Staff proposed Draft LCP Land Use Plan Amendment regarding Growth Management Ordinance 21.90.130 in dealing with Ponto Park and Open Space Standards deficits**

**Subject:** FW: City feedback from this am to ponto website

Dear City of Carlsbad and CCC Staff:

Please include the attached file from John as Public Comments on the Carlsbad City Staff proposed DLCP Land Use Plan Amendment. John mentioned he sent this via the [www.peopleforponto.com](http://www.peopleforponto.com) website earlier and for some reason his comments were not received by our People for Ponto website and then transmitted to you.

Thank you for your consideration. We apologize for any inconvenience. People for Ponto is checking to see if other public comments are similarly in this 'no-man's land' and will work to get to you ASAP. Email confirmation of receipt of this public comment is greatly appreciated.

Thanks again,

People for Ponto

Attachment:

We have a documented (GIS verified mapping) that there is approximately a 7 acre park space deficit and 30 acre open space deficiency in the southwest quadrant of Carlsbad. There is a statute in the Municipal Code of the City of Carlsbad that reads as follows:

Carlsbad Municipal Code (Growth Management Ordinance within the Zoning Code) Section 21.90.130 Implementation of facilities and improvements requirements....

(c) If at any time it appears to the satisfaction of the city manager that facilities or improvements within a facilities management zone or zones are inadequate to accommodate any further development within that zone or that the performance standards adopted pursuant to Section 21.90.100 are not being met he or she shall immediately report the deficiency to the council. If the council determines that a deficiency exists then no further building or development permits shall be issued within the affected zone or zones and development shall cease until an amendment to the city-wide facilities and improvements plan or applicable local facilities management plan which addresses the deficiency is approved by the city council and the performance standard is met.

The Mayor, City Council, City planners have all been made aware of these deficiencies (for the last 2 years) and they continue to ignore them and pursue high density/low income housing in Planning Area F/Ponto. Why won't they do the right thing and follow their own municipal code? No further development should occur until these deficiencies are addressed. Why do we as citizens have to work so hard to get the right thing to occur? Why is the Mayor and City Council more interested in the Developer's interest versus the interests of Carlsbad citizens? It begs the question of personal gain to be made? Is a lawsuit the only thing that will get your attention?

Please do the right thing and stop any development in Planning Area F until these deficiencies are addressed.

*Concerns and requests submitted to Carlsbad City Council et. al.*

**Item #18 ?/?/20 Summary of DLCPA public comments and requests emailed from People for Ponto website and neighborhood surveys as of ????.**

---

Work in progress.

**Name** gary cunitz  
**E-mail** gc1150@gmail.com  
**Comments** Hi, It is obvious that Pickleball is the largest growing sport in the country. With baby boomers and younger generations catching the pickleball fever why would not Carlsbad fast track additional courts? To keep with the sports growth additional courts are a necessity. Thank you for the opportunity to express my concerns.

**E-mail** [resandiego@gmail.com](mailto:resandiego@gmail.com)  
**Comments** More pickleball courts are needed in Carlsbad. I live near Kelly Park and would love a couple of courts there. The new Poinsettia courts were much anticipated and are now appreciated but so much that they are extremely crowded. It's laughable how 6 courts were squeezed in such a small enclosed space. There seems to be often 50 people in that space, rotating for our turn. When I walked to the bathroom I notice it is surrounded by many half empty tennis courts taking up 10 times more real estate with usually 2 people in a court. Would you consider converting 1 or 2 of those tennis courts into pickleball courts? That could be easily and inexpensively done.

**Comments**

We have a definite need for more pickleball Courts. Waiting 40 mins to play one game at Poinsettia Park (peak time of day) defines that need. Rather than wait for new courts or in the interim can we convert some tennis courts instead at Poinsettia park. Also the community centers while they host pickleball Sporadically the schedule is not always conducive to the public's availability. Bobby Riggs has converted all but 3 tennis courts into pickleball courts at their establishment. That is a true measurement of the sports rise in popularity. Please add new courts and convert tennis courts around the city for ease of play for the community. Thank you

**Name** Mark Nims  
**E-mail** teamnims1@gmail.com  
**Comments** We need to double the number of pickleball courts. I have been there when the paddle rack is completely full with 20+ players waiting to get a turn. Some players are leaving because it can take more than 30 minutes just for the opportunity to play one game and then you have to vacate the court and wait another 30 minutes to get a second game. The courts are very nice. We just need more.

**Comments** SHORT TERM SOLUTION TO MORE PICKLEBALL COURTS at POINSETTIA PARK: Paint shadow lines over 2 of the 8-10 tennis courts to make 6-8 pickleball courts. Provide nets in lock boxes (like moonlight and cottonwood creek parks in Encinitas). VERY LOW COST and can be done quickly with no extra space required. I dont think it will happen, but if all tennis courts are in use and the 2 are needed, tennis comes first (?).

**E-mail** [brucetipton99@gmail.com](mailto:brucetipton99@gmail.com)  
**Comments** As a tennis player for 35 years; I conveyed to pickleball a couple years ago and anxiously awaited the Poinsettia courts to open, so thanks! And now, of course, the demand for use, far exceeds the number of courts available and there is nothing stopping this trend for pickelball interest. So...many more courts are needed, now and in the future. This huge snowball is rolling downhill at breakneck speed and the demographics support the need for an additional 10-15 PB courts. Please address this need and if you need proof, just show up at 9 am at the Poinsettia courts. Thanks.

## City of Carlsbad - Your Comments Input

**Name** Trudie Stapleton

**E-mail** [stapleton@mindspring.com](mailto:stapleton@mindspring.com)

**Comments**

My vision for the City of Carlsbad is more pickleball courts at Poinsettia Park. 1. Expanded Venue vs. Fragmented Venues a) One large venue location vs. several small venue locations 2. Potential revenue and publicity for the city a) Host special fund raising events b) City Leagues c) City Lessons 3. Regional/national tournament tourism destination 4. Enhance the city image as a pickleball tourism market

**Comments** Pickleball changed my life from semi active to very active! Seniors, families, singles, and kids, are coming together to share something that will continue to grow. The problem is that as pickleball continues to grow, more courts are needed to help overcrowded courts. Please go view the courts and vote to build more courts in Carlsbad. Thank you. Jane Sage

## City of Carlsbad - Your Comments Input

**Name** Bill Meadows  
**E-mail** bill.meadows@gmail.com  
**Comments** Short term solution for more pickleball courts in Poinsettia Park: Paint shadow lines over 2 of the 8-10 tennis courts for some new pickleball courts. Temporarily you can only get one pickleball court centered in the tennis court. Challenge courts could go there. If permanently converted, you can get 4 pickleball courts out of the space of 1 tennis court.

## City of Carlsbad - Your Comments Input

**Name** Beth Robins  
**E-mail** Blp416@gmail.com

**Comments** Unfortunately I was unable to attend your workshop, but wanted my voice to be heard. As a new resident, I have been able to quickly ease into a new social scene with the new Pickleball Courts at Poinsettia. The negative to this is that there are easily over 100 visitors to these 6 courts each day. While I walk around the area, I see mostly empty tennis courts while 30 or more people wait for available pickleball courts, especially in the morning hours. It would sure be great to have a few more courts there! Or converting 2 of the tennis courts to pickleball. This sport is taking off like wildfire with no signs of retreat. Trending with the times, Carlsbad needs to get ahead of this important MULTIGENERATIONAL sport ASAP by providing more opportunities for play with more courts throughout the city!

**Name** Kim Orozco  
**E-mail** Kimeorozco@yahoo.com  
**Comments** Thank you Parks and Recreation Dept & ithe City Of Carlsbad for listening to your residents , number one . I appreciate that . .I am in a pickle ball player 64 years old and I love the sport !m now very active and very socia. The courts at poinsettia park are a fantastic ! love them ! we need more please. The courts have a great reputation and more players are coming out . I've noticed many of the tennis courts at poinsettia park ate empty ....I'm hoping it might be possible to convert maybe one or two of those tennis courts into a few more pickle ball courts ...and , if there's any money left (ha ha Ha) restroom by the courts would be absolutely great . thank you for listening thank you for excepting our feedback Tournaments would be great ( generates revenue) and lessons . Sincerely Kim

**Subject:** FW: Parks & Recreation Master Plan Update - public input

Neelay & Kyle:

Thank you for your well run the public input sessions.

We know that Kyle as provided the citizen input since 2017 regarding the lack of Public Park facilities at Ponto, the existing Parks Master Plan documentation of the lack of Park Service/Equity at Ponto, the since 1996 Existing Local Coastal Program requirement [still unmet and still not fully disclosed to citizens] that requires consideration of High-Coastal-Priority land use “Public Park” at Planning Area F [not only for Carlsbad citizens, but also to serve CA Statewide Coastal Recreation needs], the now City acknowledged repeated “planning mistake” at Ponto that fundamentality flawed public participation in Land Use and Park planning at Ponto, the significant amount of citizen input [about 2,500 emails/signed petitions and community surveys already emailed to the City] asking for a Ponto Coastal Park once the “planning mistakes” were uncovered and partially disclosed to citizens. A significant number of Carlsbad and CA Citizens, and CA coastal visitors have asked for a Ponto Coastal Park, and for a new, true and community-based Ponto planning process that corrects the multiple acknowledged ‘planning mistakes” dating back over 10-years at Ponto and truly considers citizens needs/desires for a Public Park at Ponto.

Attached are files the City has of this public input that it said was including as public input for the Parks Master Plan Update. Neelay, I am sure you have this, but wanted to again send to you directly to make sure you have it and have read/considered it. Also, as we walk our Ponto neighborhood, we ‘see the need for a public park’ all the time, and have enclosed a few images of ‘people using Ponto for a needed Ponto Park’ that hopefully illustrates what a significant amount of citizens have been saying, and that is reflected in the Existing Park Master Plan Park Serve/Equity maps showing a clear lack of City Park at Ponto.

Thank you again for the well run initial public input session and for considering this public input since 2017 on the City Public Park needs at Ponto, and logical request to redo public participation in park and land use planning at Ponto based on 10-years of flawed “planning mistakes” that failed to disclose to citizens and thus failed to allow citizens to truly participate in the past planning at Ponto that is now acknowledged by the City as “planning mistakes”.

Your email reply acknowledgement of receipt and consideration of this public input in the Parks Master Plan Update is requested.

Sincerely,  
Concerned Carlsbad citizens and People for Ponto.

## **Carlsbad proposed Draft Budget, Local Coastal Program Amendment, & Parks Master Plan Update – Public Comments**

City Budget, Draft LCP Amendment and Parks Master Plan Update issues – South Carlsbad Boulevard (PCH) Realignment land use policy/mapping clarity, and environmental and budget feasibility:

---

Please see and include the attached City of Carlsbad’s CARLSBAD BOULEVARD REALIGNMENT STUDY PHASE II: PRELIMINARY FINANCIAL ANALYSIS dated October 4, 2001 in this public comment. The realignment study evaluated the City selling and/or leasing portions of the exiting South Carlsbad Boulevard right-of-way for Commercial land use. This is concerning on serval levels.

This public comment requests that in the Draft Local Coastal Program Amendment (DLCPA) and Parks Master Plan Update processes:

1. Provide clear public disclosure and discussion as to if the City’s:
  - a. proposed DLCPA Land Use policies [Pages/Figures: p. 1-5 Figure 1-1, p. 2-11 Figure 2-1, pp. 2-19 & 20 Figure 2-2b & 2-2c; and Pages/Policies: p. 2-22, Ponto/Southern Waterfront, p. 2-23 Draft Policy LCP-2-P.5, p. 2-24 Draft Policy LCP-2-P.7, p. 2-26 Draft Policy LCP-2-P.19]; or
  - b. existing General Plan Land Use Element [Pages: p. 2-35, p. 2-38, pp. 2-47-48; and Policies: 2-G.20, 2-P.51, 2-P.52, 2-P.53, 2-P.55, and 2-P.90] General Plan policies)

provide in any way the opportunity to convert South Carlsbad Boulevard right-of-way into Commercial Land Use as part of realignment. Realignment was portrayed to Citizens as an elaborate way to provide a much needed pedestrian sidewalk/pathway, or Promenade along South Carlsbad Boulevard, not a ‘pathway to change open landscaped right-of-way land to Commercial uses’.

- Are the DLCPA Realignment Land Use policy and/or mapping allowing Commercial use on City designated right-of-way land like proposed in Carlsbad’s 2001 Realignment Study?
  - Does the City’s General Plan polices allow, support or imply Commercial use in any Realignment right-of-way land?
2. To even start having that important public disclosure and discussion, citizens must have both clear DLCPA Land Use Policies and Land Use Maps that show exactly “what and where” the City’s potential proposed Carlsbad Boulevard Realignment “is, and what and where it is not”.
    - The DLCPA Land Use Policies are vague and DLCPA Land Use Maps do not show any Land Use (Open Space or Commercial) associated with the Realignment. This vagueness is counter to the some very specific land uses and areas itemized in the City’s 2001 Study – why?

It is requested that both the DLCPA Land Use Policies and Maps be amended to be consistent and clear as to “what” and “where” the Realignment is and what proposed DLCPA policies apply to those areas, and what Land Uses are being proposed to be assigned to those areas in the Land Use Plan(s).

3. As part of this clear disclosure by the City and public discussion, it also seems logical to roughly update the 20-year old ‘preliminary study’ of realignment costs to have a general understanding if South Carlsbad Boulevard Realignment is even environmentally/fiscally viable. Current costs could exceed \$75 million. Carlsbad Citizens and taxpayers need to know if the ‘Realignment Promenade/Linear Park’ is a viable project the City will be implementing and when. Or is the ‘Realignment Promenade/Linear Park’ more a ‘Trojan horse’ – outside an apparently attractive celebration, while truthfully hidden inside is disappointment resulting in ruin. The City’s 20-year old 2001 Realignment Study seems to point to this concern/possibility.
4. The DLCPA should add a clear and accountable Public Coastal Access, Livable Streets and Connectivity Policy (Section 4.8, at p. 4-41) that requires the City to fully fund and construct as soon as possible a sidewalk/pedestrian path/‘Promenade’ along South Carlsbad Boulevard to “Complete” and make “Livable” this street. The missing safe pedestrian Coastal Access along South Carlsbad Boulevard represents over ½ of Carlsbad’s coastline. The City’s CIP #60311 Budget already has \$3.2 million, which based on City costs for sidewalk construction, is sufficient to complete most of this needed sidewalk/pedestrian path/‘Promenade’. The sidewalk/pedestrian path/‘Promenade’ can be quickly, simply and cost effectively accomplished with an existing budget for that purpose, and within the existing right-of-way configuration. The few short sections along bridges can be cost effectively addressed with vehicle/bike lane restriping and maybe a ‘jersey barrier’ similar to what was done at Agua Hedionda. Again, the missing sidewalk/pedestrian path/‘Promenade’ can be substantially completed using existing budgeted CIP funds for that purpose. Special design and landscape qualities could be budgeted and incorporated to enhance to a ‘Promenade’ level, or be similar to North Carlsbad Boulevard’s ‘Promenade’ design. A community-based design process could define consensus on that.

As supporting data that should be factored in the above 4 requests, the Mayor stated in 2020 that the South Carlsbad Boulevard Realignment would presently cost about \$75 million. This figure appears it maybe a rational estimate, but should be verified. Would South Carlsbad Boulevard Realignment be the most expensive City project ever? The \$75 million Realignment cost is \$5 million more than the City’s Golf Course land acquisition and construction costs. The City Golf Course is 402.8 acres, and is understood to be the most expensive to acquire/build municipal golf course in the USA, and most expensive to-date Carlsbad City project.

Sadly in comparison, South Carlsbad Boulevard Realignment does Not acquire or add any new land. Realignment simply realigns up to 54.5 acres of existing City owned landscaped right-of-way, to then repurpose only 4 - 10.8 acres for possible Park use under the 4 Land Use Alternatives as documented in the City’s 2001 Realignment Study. The \$75 million Realignment cost would thus cost \$7 - 19 million to simply repurpose each acre of existing City right-of-way land for Park use. This cost per acre appears

fiscally imprudent given much better alternatives. In comparison the Mayor stated the alternative 11 acre Ponto Coastal Park that is required to be studied under Carlsbad's Local Coastal Program would only cost \$20-22 million. The \$20-22 million figure also appears a rational estimate given vacant land costs in the area is roughly \$1.5 – 2 million per acre. So it is actually 7 to 9.5 times more cost effective to simply purchase vacant land that actually adds New land and is also required to be studied/considered for Park use. Again, the Relocation proposal's \$7 – 19 million cost per acre is NOT to buy any new land, but simply rearrange existing land the City already owns and is already landscaped and open as part of the roadway median. It seems logical to fully and publicly vet the proposed South Carlsbad Boulevard Realignment Land Use Policies/Map/Costs. The Realignment concept seems fiscally imprudent and a significant squandering of taxpayer resources.

These public comments are not against a much needed Coastal Park for South Carlsbad as there is none and this is vitally needed to provide a Coastal Park for ½ of Carlsbad's citizens and for the thousands of Visitors staying at the thousands of South Carlsbad Resort and hotel rooms. As the Mayor stated this is the most cost effective solution providing MORE NEW parkland at a fraction of the cost of the Realignment. Over 2,500 emails from citizens and visitors have asked the City Council to provide this much needed Ponto Coastal Park.

These public comments are also not against a much needed sidewalk/pedestrian pathway (including a wider than normal pathway) to provide safe (Complete-Livable Streets) pedestrian Coastal Access along South CARLSBAD Boulevard - in fact just the opposite. The public comment #4 specifically asks for a clear, accountable, funded DLCPA Policy that achieves rapid implementation of a sidewalk/pedestrian path/Promenade within the existing South Carlsbad Boulevard right-of-way configuration. This requested LCP Policy would address the critically needed Coastal Access, public safety, and mobility needs along South Carlsbad Boulevard, that has been delayed way too long. Citizens and visitors should not have to wait over 20-years for this much needed Coastal Access and public safety facility for over ½ of Carlsbad's coastline.

Thank you for your consideration,

Lance Schulte

## GENERAL LIMITING CONDITIONS

Every reasonable effort has been made to ensure that the data contained in this study reflect the most accurate and timely information possible, and they are believed to be reliable. This study is based on estimates, assumptions and other information reviewed and evaluated by Economics Research Associates from its consultations with the client and the client's representatives and within its general knowledge of the industry. No responsibility is assumed for inaccuracies in reporting by the client, the client's agent and representatives or any other data source used in preparing or presenting this study.

This report is based on information that was current as of *October 2001* or as noted in the report, and Economics Research Associates has not undertaken any update of its research effort since such date.

No warranty or representation is made by Economics Research Associates that any of the projected values or results contained in this study will actually be achieved.

Possession of this study does not carry with it the right of publication thereof or to use the name of "Economics Research Associates" in any manner without first obtaining the prior written consent of Economics Research Associates. No abstracting, excerpting or summarization of this study may be made without first obtaining the prior written consent of Economics Research Associates. This report is not to be used in conjunction with any public or private offering of securities or other similar purpose where it may be relied upon to any degree by any person other than the client without first obtaining the prior written consent of Economics Research Associates. This study may not be used for purposes other than that for which it is prepared or for which prior written consent has first been obtained from Economics Research Associates.

This study is qualified in its entirety by, and should be considered in light of, these limitations, conditions and considerations.

**I. INTRODUCTION**

The *Carlsbad Boulevard Realignment Study* is an analysis of alternative scenarios for realigning Carlsbad Boulevard away from the coast bluff edge and, in the process, creating opportunities for commercial, recreation, and open space uses. One of the study's objectives is to explore ways to generate revenue from useable public land created, including potential land sale or lease opportunities, and using this revenue to help offset the cost of realigning the road.

This Phase II report is a preliminary evaluation of each scenario's financial implications. The Phase I report, presented in April 1999, evaluated the market context in which development may take place. Some of the key rent and market assumptions presented in this report are based on the 1999 research, adjusted for inflation. A market analysis update has not taken place since 1999. The values presented here are preliminary estimates for planning purposes only, and should not be interpreted as valuations or appraisals since they are based on conceptual development programs, gross preliminary development cost factors, and two-year old market research. Valuations or appraisals will require greater due diligence regarding current market conditions, more specific development and site planning programs, and more detailed cost estimates.

## II. DEVELOPMENT SCENARIOS

URS Corporation and the City of Carlsbad have identified four alternative land use scenarios for a realigned Carlsbad Boulevard. The proposed realignment creates 4-6 new surplus land areas resulting 5-7 potential parcels (see the Carlsbad Boulevard Realignment Study – Phase I and Phase II for more details regarding these alignments and surplus land areas). The consultant team prepared hypothetical development programs for each alternative. These hypothetical development programs are not recommendations; rather, they were devised to test the potential financial impact of the following alternative approaches towards reuse of the surplus land that is created with the road realignment. They were also designed to serve as a starting point for discussion of preferred uses and to allow the decision-makers to select and combine the elements from each alternative that they find most desirable. Finally, these scenarios serve as starting points for discussions with State Parks, which is critical for the pivotal Manzano parcel.

- Alternative 1 tests the financial impacts of a parks and open space scheme. It assumes that no major commercial development occurs and that the surplus parcels are used for parking, community facilities, parks, open space, and camping (concessionaire), as shown in Table 1.
- Alternative 2 tests the financial impacts of a predominately parks and open space scheme, with limited commercial development. It assumes that a time-share and executive meeting hotel is built on a small portion of Surplus Area 1, and that the rest of Surplus Area 1 and all of the other parcels are used for parking, community facilities, parks, or open space, as shown in Table 2.
- Alternative 3, as shown in Table 3, tests the financial impacts of a significant commercial development scheme. It assumes significant commercial development on almost half of Surplus Areas 1 (specialty retail, restaurants, and office) and 3 (hotel), and all of Surplus Areas 2 (time-share), 6A (time-share), and 6B (office), as shown in Table 3. More than half of Surplus Area 1 is used as park space and more than half of Surplus Area 3 remains open space. Parcels 4 and 5 provide parking and open space.
- Alternative 4 tests the financial impacts of a significant commercial development scheme for a majority of Surplus Area 1 (specialty retail, restaurants, time-share, and executive meeting hotel), with a neighborhood park on the remaining portion of Surplus Area 1, as shown in Table 4. Parcels 2, 3, and 6A remain open space, and 4, 5, and 6B contain public parking and open space.

**III. LAND AND FISCAL VALUE ESTIMATES**

ERA estimated the approximate residual land value and the capitalized value of the estimated fiscal revenue associated with each of the alternative alignments and development scenarios. The estimates are very preliminary since they are based on hypothetical development programs without architectural designs, rent assumptions based on 1999 research (updated to 2001 values), preliminary site capacity and site planning analysis, and gross development cost estimates for buildings and site development. The detailed analyses for each alternative are presented in Appendix A. These estimates, which are not appraisals, will need to be revised as development programs become more specific, and they do not form the basis for a financial offering, bond, or prospectus without additional planning, engineering, cost estimating, and due diligence.

The residual land value estimates translate into the potential revenue generated from commercial land sales, or the capitalized values of leases, of surplus land areas created by the road realignment. These estimates are preliminary approximations of what a developer might be willing to pay for the land in order to obtain a reasonable rate of return on total capital (debt and equity capital). In order to be conservative, no real appreciation was assumed; in other words, rents only rise with inflation. Some developers may speculate that rents will rise faster than inflation, which would result in higher values than estimated in this report. The fiscal revenue translates into the capitalized value of the potential fiscal resources to the City and Redevelopment Agency that could help finance some of the Carlsbad Boulevard realignment costs.

The total revenue from commercial land sales (or leases) and the capitalized value of fiscal revenue was compared to URS Corporation's preliminary estimate of road realignment costs (\$18.8 million), and Wallace, Roberts, and Todd's preliminary estimates of possible public parking, parks, open space, and community facility costs (\$8.5-12.1 million). While road realignment costs are required to produce the surplus parcels, costs to develop the open space are flexible. The estimates provided assume maximum improvements to the open space.

As shown in Table 5, Alternative 1, the least commercial scenario, generates very limited revenue, only \$1.1 million in commercial land value, and over \$0.2 million in the capitalized value of fiscal revenue, for a total of almost \$1.3 million. Other sources would have to fund over \$17.5 million in road construction costs, and \$9.0 million in public facility, parks, and open space costs, or the amount of improvements would have to be reduced.

**Table 5: PRELIMINARY REVENUE/COST COMPARISON (Year 2001 Dollars)**

	<b>Alternatives</b>			
	<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>
<b>Revenues From Commercial Land Sales</b>	\$ 1,131,000	\$ 9,219,000	\$ 28,155,000	\$ 19,465,000
<b>Capitalized Value of Fiscal Revenues to City &amp; RDA</b>	\$ 217,000	\$ 10,849,000	\$ 24,743,000	\$ 16,429,000
<b>Total Potential Revenues</b>	\$ 1,348,000	\$ 20,068,000	\$ 52,898,000	\$ 35,894,000
<b>Less: Road Construction Costs</b>	\$ 18,800,000	\$ 18,800,000	\$ 18,800,000	\$ 18,800,000
<b>Net Revenues &lt;Deficit&gt; After Road Construction Costs</b>	\$ (17,452,000)	\$ 1,268,000	\$ 34,098,000	\$ 17,094,000
<b>Less: Public Parking, Parks, Open Space, and Facilities</b>	\$ 8,999,580	\$ 12,062,589	\$ 8,496,734	\$ 9,358,925
<b>Net Revenues &lt;Deficit&gt; After Public Costs</b>	\$ (26,451,580)	\$ (10,794,589)	\$ 25,601,266	\$ 7,735,075

Source: Economics Research Associates; URS; Wallace, Roberts & Todd

Alternative 2 generates over \$9.2 million in commercial land value, and \$10.8 million in fiscal revenue, for a total of \$20.1 million. This amount is enough to cover the \$18.8 million in road realignment costs, but not enough to cover the estimated \$12.1 million in potential public facility, parks, and open space costs. Other sources would have to fund approximately \$10.8 million in public facility, parks, and open space costs, or the amount or type of improvements would have to be reduced.

Alternative 3, the most commercial scenario, generates an estimated \$28.2 million in revenues from commercial land value, and \$24.7 million in capitalized fiscal revenue, for a total of \$52.9 million. This amount is substantially more than enough to cover the \$18.8 million in road realignment costs, and \$8.5 million in public facility, parks, and open space costs.

Alternative 4 generates an estimated \$19.5 million in commercial land value, and \$16.4 million in capitalized fiscal revenue, for a total of \$35.9 million, which is more than enough to cover the \$18.8 million in road realignment costs, and \$9.4 million in public facility, parks, and open space costs.

**QUALIFICATIONS**

While it appears that alternatives 3 and 4 generate enough revenue to cover development costs, the findings at this preliminary planning stage of analysis are qualified, as follows:

- The cost estimates are based on gross cost factors and need to be refined as project design becomes more specific.
- The cost estimates do not include any extraordinary off-site costs, such as for environmental or traffic mitigation.
- Some of the parcels identified for potential development, particularly those west of the alignment, may be vulnerable to long term erosion problems; therefore, their stability needs to be verified.

- A significant share of value and fiscal revenue in scenarios 2, 3, and 4 is attributable to hotels, which in 1999 demonstrated only average performance, especially among moderately priced hotels. Also, a new hotel has been developed since 1999. While the parcels identified for potential hotel development are competitive because of the views they offer, hotel development and financing are relatively risky.
- WRT has determined that the hypothetical development programs can fit on the parcels, and URS Corporation has initially determined that the circulation system can accommodate the development. However, there could be difficult site planning issues with some of the parcels that would limit their development potential to less than what is assumed in this analysis.
- The development cost estimates for the commercial development scenarios, for the most part, do not assume structured parking. If structured parking is required, development costs could be greater which would diminish residual land values unless higher rents are achievable.
- Most of the value is generated on Surplus Area 1, which is owned by the State of California. The City or Redevelopment Agency would not realize the value of Surplus Area 1 unless the State trades the parcel to the City or Agency for other considerations. Therefore, the City or Agency may not be able to apply proceeds from the value of Surplus Area 1 to road realignment and public facility costs. Nevertheless, under Alternative 3, the capitalized value of the fiscal revenue alone might be sufficient to cover road construction costs and a portion of public facility costs. The capitalized value of fiscal revenue under Alternative 4 comes close to covering road construction costs, but is not sufficient to cover other public facility costs.
- Competitive market conditions could change which would affect the market potential of the development programs assumed in the scenarios analyzed in this report. The estimated values are based on the hypothetical development programs for each parcel. If development programs change, the values will change.

#### **IV. OTHER POTENTIAL SOURCES FOR FUNDING REALIGNMENT COSTS**

The U.S. Department of Transportation (DOT) and State of California Transportation Department (CalTrans) are the traditional sources of funds for capital improvements to highways. For example, the Federal government offers approximately 70 different transportation-funding programs. The majority of these funds are made available for disbursement to regional entities such as SANDAG, while a small portion is made available directly to municipalities.

##### **FUNDS AVAILABLE DIRECTLY TO MUNICIPALITIES**

The CalTrans Local Assistance Program (LAP) is responsible for helping municipalities located in CalTrans District 11 identify which Federal and State funding programs for which they are eligible and guiding them through the application process. Each program is specifically tailored for a given need, and has very strict eligibility requirements. One such specialized program funds "Intelligent Transportation Systems". Funds are available to projects that integrate new technology (computer-related) with the road/highway project to improve traffic flow. Because this program is new, eligibility requirements are not yet well defined.

There is no program specifically for road or highway realignment. Moreover, it is estimated that for every 10 applicants to each of the programs above, only the most urgent project is funded, leaving 90 percent of the applications unsuccessful. Given the level of competition for funds, if the City of Carlsbad finds that portions of the road may fall into one or more of the eligible categories, the application should present as compelling a case as possible. In any case, once a specific construction plan has been determined, a representative from the City of Carlsbad should meet with a representative from the Local Assistance Program to discuss the program in detail and determine whether or not portions of the project are eligible for Federal or State aid.

Finally, another option is direct funding from special state legislative action.

##### **REGIONAL FUNDS**

The San Diego Association of Governments (SANDAG) administers the apportionment of funds from the larger, more general State and Federal transportation funding programs. The most likely source of funding for a project such as the realignment of Carlsbad Boulevard is the Regional Arterial Projects section of the Surface Transportation Projects.

For a project to receive an apportionment from SANDAG, it must be included in the Regional Transportation Improvement Plan (RTIP). The City of Carlsbad is an active participant on the CTEC committee, the body that periodically updates the RTIP. However, it is important to note that the current RTIP (2000-2004) provides only \$153 million towards projects estimated to cost nearly \$392 million. Also, the current RTIP specifically states that "local governments will obtain private developer financing for those on- and off-site roadway and transit improvement necessary to accommodate the increased travel generated by private development."

The major source of Federal transportation funds administered by SANDAG is the Transportation Equity Act for the 21<sup>st</sup> Century (TEA-21). In addition to highway and surface road construction and improvements, TEA-21 is a source of funds for driver safety initiatives, transit programs, rail projects, and transportation research. TEA-21 was established in 1998 and funded through 2003, thus funding levels beyond that time are unknown. The Surface Transportation Program (STP) is the section of TEA-21 relevant to the realignment of Carlsbad Boulevard. One STP program, Transportation Enhancement Activities Program, funds highway enhancement activities over and above mitigation, standard landscaping and other permit requirements for a normal transportation project. Project eligibility categories under the Transportation Enhancement Program which may be applicable to the realignment of Carlsbad Boulevard are: 1) Scenic or historic highway programs; 2) Landscaping and other scenic beautification; 3) Environmental mitigation to address water pollution due to highway runoff.

Currently, all TEA-21 funds, including STP, have been assigned to projects (detailed in SANDAG's 2000 Regional Transportation Improvement Plan); however, SANDAG continues to pursue additional discretionary funding available through TEA-21 on an annual basis.

In 1987, San Diego voters passed Proposition A, which authorized a one-half percent sales tax increase dedicated for transportation improvements. The first \$1 million in annual TransNet revenue is set aside for bicycle-related projects and the remainder is divided equally between highway, public transit and local street and road projects. Highway projects are approved for funding by SANDAG, CalTrans, the San Diego Metropolitan Transit Development Board, and the North San Diego County Transit Development Board. Local street and road projects are approved for funding by the city councils of the 18 cities and the County Board of Supervisors. The Carlsbad Boulevard Realignment project is a potential candidate project. TransNet funds have been programmed through 2004, and the measure will expire in 2008.

**LOCAL SOURCES**

Local sources include developer financed road improvements, transportation impact fees, tax increment financing in redevelopment project areas, infrastructure financing districts, assessment districts, Community Facilities Districts, General Obligation Bonds, and the General Fund.

To the extent that the realignment also increases road capacity that is required to mitigate the impacts of new development, developer financed road improvements or impact fees may apply. If the road realignment simply moves the road without enhancing capacity for future local developments, however, the nexus may not be strong enough for developer funding or impact fees to apply. Alternatively, the City may negotiate voluntary contributions to road realignment costs through development agreements on larger land development projects in the vicinity of Carlsbad Boulevard that require City discretionary approval.

Since the proposed Carlsbad Boulevard Realignment project is within a newly adopted redevelopment project area, the City's Redevelopment Agency may use tax increment to finance some of the realignment costs. Tax increment financing does not result in higher tax rates; rather, the incremental gain in property tax revenues is directed toward certain improvements within a redevelopment project area. To the extent that the realignment creates parcels that are commercially developed, the realignment project will be directly responsible for the tax increment generated by those commercial developments. Because tax increment will not be generated until the parcels are developed with commercial uses, there may be a cash flow financing issue to overcome to fund the realignment costs that will occur in advance of tax increment.

Another type of property tax increment financing is the Infrastructure Financing District (IFD). It also is based on the incremental gain in property taxes rather than an increase in tax rates. The City of Carlsbad was one of the first jurisdictions in California to form an IFD. Unlike tax increment in redevelopment project areas, an IFDs do not have to be located in redevelopment project areas and, therefore, do not have to address blight or meet the "predominately urbanized" test of redevelopment law. The public facility that is financed must serve the community at large. However, unlike a redevelopment project area that can be formed by Council action, an IFD must be approved by two-thirds of the voters if 12 or more registered voters reside in the district. Otherwise, two-thirds of the property owners within the district must vote to approve the district. The affected taxing agencies must also approve the district and tax increment sharing must be negotiated.

Properties that benefit from the realignment may be assessed for a portion of the cost through a benefit assessment district, such as the *Municipal Improvement Act of 1913*. The assessments may be pledged to support debt service on bonds, issued under the *Improvement Bond Act of 1915*. The formation process must establish the scope of improvements, identify the benefiting parcels, and determine an equitable allocation of costs. Property owners vote for or against formation of an assessment district at a public hearing. Some of the benefiting properties that are owned by the State may not be assessed.

A Community Facilities District, commonly known as a Mello-Roos district, is a special tax that can be based on a formula that has a less strict benefit allocation. However, a Community Facilities District requires two-thirds voter approval of voters residing within the district. If there are fewer than twelve registered voters in the district, the qualified electors are defined as owners of land within the district, with each owner allowed one vote per acre.

General Obligation Bonds, backed by the full faith and credit of the City, are the most secure and lowest cost form of debt financing. However, it would require two-thirds voter approval among Carlsbad's electorate, which may be difficult for the Carlsbad Boulevard Realignment project unless it is perceived as a project that has citywide benefits.

Finally, the General Fund may be used to fund a portion of road improvements through the Capital Improvement Plan, either as direct allocations, or as annual lease payments on Certificates of Participation. Fiscal revenue from development on surplus parcels could help augment the General Fund, especially if a hotel or specialty retail is developed, to enable the City to use General Fund monies for some of the road realignment and other public facility costs.

### CONCLUSION

Both the SANDAG representative and the CalTrans Local Assistance Program representative noted that most road or highway realignments are done to facilitate development. Policymakers are aware of this and generally design funding programs in a way that encourages the private sector to pay for as much of the project costs as possible. Programs are also designed to encourage municipalities to utilize funds from their share of the gas tax, TransNet, and even the General Fund and Community Development Block Grants before turning to State and Federal funds. Finally, due to the limited funds available, all funding sources give priority to projects of a regional significance over those of local importance.

## City of Carlsbad - Your Comments Input

**Name** Mike Tindall  
**E-mail** tindallmike@hotmail.com

**Comments** Good Morning, Can we expand the available pickleball courts by lining tennis courts throughout the city as they have done in Encinitas at Cottonwood Creek and Moonlight Beach. I have played at both locations many times and both groups courteously share the courts throughout the day. This would greatly expand the number of available nearby courts to a greater number of people at a savings of time and money. Before the Covid shutdown, the number of people waiting to play at Poinsettia Park would often exceed 20 in the evenings and weekends. Dual lines would also allow multiple activities similar to the function of gymnasiums- ie. basketball, volleyball, pickleball,etc. Thanks for your consideration. Mike Tindall

**Comments** We need more pickleball courts! Poinsettia Park pickleball courts are extremely busy. People can wait as long as one hour to get on a court. Meanwhile, the tennis courts are almost practically empty. One tennis court can be turned into FOUR pickleball courts that SIXTEEN people can enjoy (versus only two to four people on a tennis court. We need more pickleball courts.

**Subject:** Master Plan Update

Message submitted from the <Carlsbad, CA> website.

**Site Visitor Name:** shirley cole

**Site Visitor Email:** [shirley.cole@sbcglobal.net](mailto:shirley.cole@sbcglobal.net)

After participating in the master plan update last week, I was shocked that your department posted signs at the high school tennis courts saying pickleball is not allowed. I spoke with a high school student (who had a pickleball class) who said he was yelled at to get off the courts due to these signs. You have created a "hostile environment" that puts the tennis players and pickleball players at risk. There is no reason to have such an adversarial approach to the courts use when they are usually half empty. Their use should be encouraged. The sound excuse of excessive noise can not be an issue, as this is a school with much louder games at play and do not have to go through a conditional use permit. After the many comments made during the master plan zoom meeting that support additional use of courts for pickleball, this step shows a lack of listening to the public throughout this whole process. Why does it take 7 years for Carlsbad to update recreation services that are in high demand when our neighboring cities were able to in a manner of months! Paint pickleball lines on the tennis courts at Carlsbad High School now. The community will even donate the paint and the labor to not cost the City a penny!!! Please no more excuses.

**Subject:** Carlsbad DLCP-PUPA Public Comments - Please read my letter into the record as a public comment at this weeks meeting

Dear Carlsbad City Council, City Clerk, Planning Commission, Parks Commission, Housing Commission, HEAC, CA Coastal Commission, and CA HCD:

The following Citizen public Comment to the Planning Commission raises another simple but undiscussed point how important Parks are and - in particular rare Coastal Parks that serve a far wider geographic area - are for Cities and Citizens that will forever be increasing packed into high-density housing that reduces or eliminates yards or recreational space on a per-capita basis. How a City reserves and plans for more parks and the equitable distribution of increasing MORE Parks to address this forever increase in high-density housing that create even more park demand. The issues Jane raise are basic and fundamental to creating a sustainable and desirable urban (and Coastal) environment of increasing residential density. These basic issues should be fully publicly considered and publicly discussed as part of Carlsbad Staff proposed Draft Local Coastal Program – Land Use Plan Amendment process. Thank you for receiving, considering and discuss the Citizen issues Jane presents.

Sincerely,  
Lance Schulte for People for Ponto,

---

**Subject:** Please read my letter into the record as a public comment at this weeks meeting

Dear Planning Commission, Please read my letter into the record as a public comment at this weeks Planning Commission meeting. It is 500 words or less.

Kindest Regards,  
Jane Naskiewicz

Dear Mayor Matt Hall and Carlsbad City Council,

The wisest use of the land at Ponto is for open space and low cost visitor serving recreation, Not high density residential where only 20% are restricted to be affordable and 80% are highly unaffordable. Changing this land designation to high density residential is robbing the people of Carlsbad (and their children) of something incredibly precious, something that they can never get back.

As a licensed Real Estate professional and a Carlsbad resident for 16 years I would like to point out that many of the newly constructed homes in our city lack a yard of any size, not even a patio. You're lucky if you get a balcony big enough for a couple chairs. This goes for high end condos and townhomes which are the majority of the under \$1 million homes in our city. Most Apartment dwellers are paying \$2,000. To \$3,000 a month and don't have yards either. The trend is to pack more people into less space to make it more cost effective, but there is a cost to the residents.

We cannot continue to ignore the needs of tens of thousands of citizens in the southwest

quadrant of the city who have no coastal park or coastal open space. In normal times there would be thousands of visitors, hotel, and resort guests staying in southwest Carlsbad each week. What coastal parks can they go to? Maybe they drive to Encinitas or Del Mar and if so do they then spend their money on shops and restaurants there?

The need for coastal open space and recreation areas is great now but it will be even more consequential going forward as our density increases, and as sea levels continue to rise. Plus a Beach is Not the same as a Park. There are high tides and storms that take away the beach leaving only cobbles that are unfriendly to visitors. Plus not everyone is going to be able to (or want to) take their infant strollers, wheelchairs or walkers on the cobble beach, but they could access a nice park at Ponto.

A park at Ponto will give residents and visitors alike a unique coastal experience unlike anything else in the city. It could provide a venue for outdoor events and performances, and maybe a beachclub cafe with view decks for even more sunset and ocean views. This space should belong to the community and again, its wisest use is Visitor Serving Park and Open Space.

And why would we want to build more units here before correcting this very serious park deficit in the SW quadrant? Just look at how many people congregate on that tiny patch of grass in the Village at Pine Ave and Carlsbad Village Dr, or Cannon Park. Ponto could very easily become the most treasured park in the city, a grand statement to the outdoor lifestyle so many of us moved here for.

Jane Naskiewicz, Carlsbad resident, People 4 Ponto volunteer.

**CAUTION:** Do not open attachments or click on links unless you recognize the sender and know the content is safe.

Dear Mayor Matt Hall and Carlsbad City Council,

The wisest use of the land at Ponto is for open space and low cost visitor serving recreation, Not high density residential where only 20% are restricted to be affordable and 80% are highly unaffordable. Changing this land designation to high density residential is robbing the people of Carlsbad (and their children) of something incredibly precious, something that they can never get back.

As a licensed Real Estate professional and a Carlsbad resident for 16 years I would like to point out that many of the newly constructed homes in our city lack a yard of any size, not even a patio. You're lucky if you get a balcony big enough for a couple chairs. This goes for high end condos and townhomes which are the majority of the under \$1 million homes in our city. Most Apartment dwellers are paying \$2,000. To \$3,000 a month and don't have yards either. The trend is to pack more people into less space to make it more cost effective, but there is a cost to the residents.

We cannot continue to ignore the needs of tens of thousands of citizens in the southwest quadrant of the city who have no coastal park or coastal open space. In normal times there would be thousands of visitors, hotel, and resort guests staying in southwest Carlsbad each week. What coastal parks can they go to? Maybe they drive to Encinitas or Del Mar and if so do they then spend their money on shops and restaurants there?

The need for coastal open space and recreation areas is great now but it will be even more consequential going forward as our density increases, and as sea levels continue to rise. Plus a Beach is Not the same as a Park. There are high tides and storms that take away the beach leaving only cobbles that are unfriendly to visitors. Plus not everyone is going to be able to (or want to) take their infant strollers, wheelchairs or walkers on the cobble beach, but they could access a nice park at Ponto.

A park at Ponto will give residents and visitors alike a unique coastal experience unlike anything else in the city. It could provide a venue for outdoor events and performances, and maybe a beachclub cafe with view decks for even more sunset and ocean views. This space should belong to the community and again, its wisest use is Visitor Serving Park and Open Space.

And why would we want to build more units here before correcting this very serious park deficit in the SW quadrant? Just look at how many people congregate on that tiny patch of grass in the Village at Pine Ave and Carlsbad Village Dr, or Cannon Park. Ponto could very easily become the most treasured park in the city, a grand statement to the outdoor lifestyle so many of us moved here for.

Jane Naskiewicz, Carlsbad resident, People 4 Ponto volunteer.

**Subject:** Carlsbad DLCP-LUPA & Ponto issues resent Public Input - FW: LCPA Public Comment - Coastal Recreation at Ponto - Jan 11 2020 from People for Ponto

Dear Carlsbad City Council, City Clerk, Planning Commission, Parks Commission, Housing Commission, HEAC, CA Coastal Commission, and CA HCD:

Over 11-months ago in a 1/29/20 1:56PM email People for Ponto Carlsbad citizens first provided the City of Carlsbad both data and comments on **14 critical Coastal Recreation issues** (see pages 4-29 in the attached file). The data and the 14 critical issues did not seem to be receiving appropriate disclosure/presentation/discussion/consideration in the Dec 2, 2020 Staff Report to the Planning Commission. To assure the 26-pages of citizen data and requests in the 1/29/20 email was received by the Planning Commission the file was re-emailed on 12/22/20 12:24pm and specifically addressed to City Council, City Clerk, Planning Commission, Parks Commission, Housing Commission, HEAC, CA Coastal Commission, and CA HCD. As citizens we request each of these 14 critical Coastal Recreation issues (with supporting data) be honestly considered.

After reading the Dec 2 Staff Report citizens conducted additional analysis of City Park data. That research further reinforces and documents the 14 Critical Coastal Recreation issues and highlights the relatively poor amount of City Park

and Coastal Recreation planned by Carlsbad’s Staff proposed Draft LCP-LUPA. We hope the City Council and City Commissions, and CA Coastal Commission & HCD will consider this additional analysis of City data and citizen input:

<u>Coastal Zone data</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>	<u>note or source</u>
Coastline miles	6.4	3.9	6.0	Carlsbad Draft LCPA 201, Google Maps
Coastal Zone Acres	9,219	1,460	7,845	& Oceanside & Encinitas LCPs
Coastal Zone Acres	100%	16%	85%	% relative to Carlsbad

City Park Standard data

City Park Standard	3	5	5	required park acres / 1,000 population
Park Standard %	100%	167%	167%	% is relative to Carlsbad

- Oceanside & Encinitas 'require' and plan for 67% MORE Parkland than Carlsbad
- Carlsbad 'requires' and plans for ONLY 60% as much Parkland as Oceanside & Encinitas
- Carlsbad only requires developers provide 60% of the parkland (or in-lieu fees) as Oceanside & Encinitas require
- Encinitas has a ‘Goal’ to provide 15 acres of Park land per 1,000 population

Developed City Park	2.47	3.65	5.5	acres / 1,000 population
Developed Park	100%	148%	223%	% is relative to Carlsbad

- Oceanside provides 48% MORE developed park land than Carlsbad
- Encinitas provide 123% MORE developed park land than Carlsbad
- Carlsbad ONLY provides 68% and 45% as much Parks as Oceanside & Encinitas respectively

National Recreation & Park Asso. Metric: a typical City provides 1 park / 2,281 pop. & 9.9 Park acres / 1,000 population

- Carlsbad (3 acre) Park Standard is ONLY 30% of what a typical City provides nationally
- Carlsbad requires developers to provide, 70% LESS Park acres than typical City provides nationally

National Recreation & Park Asso., Trust for Public Land, et. al.: 10 minute (1/2 mile) Walk to a Park Planning Goal

- Both Oceanside and Encinitas plan parks to be within a 10-minute (1/2 mile) walk to homes.
- Carlsbad DOES NOT plan Parks within walking distance to homes
- Carlsbad is NOT providing equitable and walking/biking access to Parks

Some Carlsbad Parks that are not fully useable as Parks:

Existing Parks with	<u>total park acres</u>	<u>Unusable park acres</u>	<u>% of park unusable</u>	<u>reason unusable</u>
Alga Norte - SE quadrant	32.1	10.7	33%	1/3 of park is a Parking lot not a park In many other Carlsbad Parks a significant percentage of those Parks are consumed by paved parking lots and unusable as a Park.
Hidden Hills - NE quadrant	22.0	12.7	58%	city identified unusable habitat open space
La Costa Canyon SE quadrant	14.7	8.9	61%	city identified unusable habitat open space
Leo Carrillo - SE quadrant	27.4	16.5	60%	city identified unusable habitat open space
Poinsettia - SW quadrant	<u>41.2</u>	<u>11.1</u>	<u>27%</u>	city identified unusable habitat open space
Existing Park subtotal	137.4	59.9	44%	44% of these Parks are unusable as
Parkland				

Anticipated Future Park development projects  
Park - quadrant

Veterans - NW	91.5	49.5	54%	estimated unusable habitat open space
Cannon Lake - NW	6.8	3.4	50%	estimated unusable water open space
Zone 5 Park expansion - NW	9.3	0	0	appears 100% useable as a Park
Robertson Ranch - NE	<u>11.2</u>	<u>0</u>	<u>0</u>	appears 100% useable as a Park
Future park subtotal	118.8	52.9	45%	45% of Future Parks are unusable as Parks

**Unusable Open Space acres**

**in Existing & Future Parks**      256.2    112.8      44%      **112.8 acres or 44% is unusable as Parks**

- 112.8 acres or 44% of the Existing & Future Parks are unusable Open Space and can't be used as Parkland
- **Based on City's minimum 3-acres/1,000 population Park Standard, 112.8 acres of Unusable Parkland means 37,600 Carlsbad Citizens (or 32.5% of Carlsbad's current population of 112,877) will be denied Parkland that they can actually use as a Park.**
- 112.8 acres of Existing & Future unusable 'park' / 3 acre park standard x 1,000 population = 37,600 Carlsbad citizens without useable parkland per City minimum standard.
- **59.9 acres of Existing unusable 'park' / 3 acre park standard x 1,000 population = 19,967 Carlsbad citizens and their children are currently being denied useable park land. 19,967 is 17.7% of Carlsbad's current population.**
- In addition to these 19,967 existing citizens and their children denied park land, the City needs to develop additional Park acreage in the NE, SW and SE quadrants to cover current shortfalls in meeting in the minimal 3 acre/1,000 population park standard for the current populations in the NE, SW and SE quadrants.
- **The current NE, SW and SE quadrants park acreage shortfalls are in addition to the 19,967 Carlsbad citizens and their children that do not have the minimum 3 acres of parkland per 1,000 population**
- **Current FY 2018-19 MINIMUM park acreage shortfalls are listed below. They are:**
  - **4.3 acres for 1,433 people in NE quadrant,**
  - **6.8 acres for 2,266 people in SW quadrant, and**
  - **2.3 acres for 767 people in SE quadrant**

	Shortfall (excess) in Current Quadrant Park standard by		Future Park		
	acres	population need	acres	%	<u>existing Park shortfalls are for NE, SW &amp; SE quadrants</u>
NW quadrant standard & more people at min. park standard.	(-14.2)	(-4,733)	107.6	91%	Current NW parks are 14.2 acres over min. capacity for 4,733
NE quadrant	4.3	1,433	11.2	9%	91% of all Future City Parks are in NW quadrant Future Park will exceed minimum NE park standard
SW quadrant deficit	6.8	2,266	0	0%	No min. parks for 2,266 people in SW quad. Park deficit
SE quadrant	2.3	767	0	0%	No min. parks for 767 SE quadrant Park deficit

A Park Standard minimum is just a "Minimum". City policy allows the City to buy/create parks above the City's current 3 acre/1,000 pop. MINIMUM (and lowest) Park Standard of surrounding Coastal cities. Carlsbad already did this in the NW quadrant. It then added 3.1 more NW quadrant Park acres as part of the Poinsettia 61 Agreement. Poinsettia 61:

- converted 3.1 acres of NW City land planned/zoned for Residential use to Open Space Park land use/zoning,
- facilitated a developer building condos (increasing park demand) in the SW quadrant,
- required the SW Quadrant developer pay \$3 million to build the 3.1 acre NW quadrant park, and

- required the SW Quadrant developer pay to convert 3.1 acres of NW Quadrant & 5.7 acres of SW Quadrant City Park land to habitat that will be unusable as a City Park.

So Poinsettia 61 increased SW Quadrant development (that both increased SW Park Demand and expanded the current SW Quadrant Park deficit) while simultaneously using SW Quadrant development to pay for the conversion of 3.1 acres of residential land in the NW Quadrant to City Park (the NW Quadrant already has surplus park land per the City's minimum standard).

People for Ponto strongly supports creating City Parks above the City's current low 3-acre per 1,000 population minimum, as the City's minimum standard is relatively low and substandard relative to other cities; many Carlsbad parks have significant acreage that is in fact 'unusable' as a park. Most importantly People for Ponto Citizens think it is very important to prioritize providing City Parks in areas of Park Inequity that are unserved by City Parks. However it seems very unfair to the SW Quadrant citizens to be so unserved and starved of the bare minimum of City Parks while at the same time funding City Parks in excess of City standard in other Quadrants.

The Poinsettia 61 illustrates a larger unfair (and dysfunctional) distribution of Quadrant based City Park demand and supply that is keenly evident in the demands/supply funding and location disparity of Veterans Park. Most all the development impact and park demand that paid Veterans Park fees came from the SW, SE and NE Quadrants yet the Veterans Park (supply) is not in those SW, SE and NE Quadrants. This inequity is counter to the implicit City requirement that City Parks be provided within the Quadrant of their Park demand. It is logical and proper that City Parks be provided and equitably distributed to be close to the development and population that generated the demand for that Park.

The City Park inequity at Ponto and in other Coastal areas of the City is counter to several CA Coastal Act policies; counter to good city planning and good CA Coastal planning; is highly detrimental to the City, City and CA citizens in the long-term; fails to properly distribute and match the location supply with the location of demand for Parks; and is counter to basic fundamental issues of fairness.

Since 2017 People for Ponto has tried to get the City Council and City Staff to address this inequity, specifically at Ponto, and to do so in a way that embraces a true and honest Citizen-based planning process.

Thank you.

Sincerely,

Lance Schulte for People for Ponto

**Subject:** Carlsbad DLCP-LUPA & Ponto issues resent Public Input - FW: LCPA Public Comment - Coastal Recreation at Ponto - from People for Ponto

**Importance:** High

Dear Carlsbad City Council, City Clerk, Planning Commission, Parks Commission, Housing Commission, HEAC, CA Coastal Commission, and CA HCD:

Carlsbad Citizens first became aware (due to extensive Public Records research) of the Carlsbad's failure (current and starting before 2010) to comply with the still existing Certified Local Coastal Program Land Use and Zoning Regulations (LCP) for Ponto Planning Area F (to specifically consider and document the need for a Ponto "Public Park" prior to changing the NRR land use on Planning Area F), and also developers' Growth Management Open Space Standard (GMP) non-compliance at Ponto in 2017. Since 2017 with this awareness Carlsbad and surrounding Citizens and Visitors have repeatedly documented the need for a Ponto Park and asked the Carlsbad City Council and Staff to provide for it on Planning Area F as the exiting LCP provides for. Since 2017 over 2,800 emails/petitions have been sent to the City and CA Coastal Commission (CCC), over 200 pages of official written (emailed) data and public comments, along with numerous presentations to prior City Council meetings on the LCP and GMP.

In Dec 2, 2020 Carlsbad began the Planning Commission Public Hearing on the Staff proposed Draft Local Coastal Program-Land Use Plan Amendment (DLCP-LUPA) to propose to the CA Coastal Commission a change to Planning Area F's existing NRR land use and zoning. The flood of over 450 emailed public input for that specific meeting overwhelmed the City email server. As part of that process the City said in the Dec 2 email below it was going to post on its website all the Citizen/public input received on the DLCP-LUPA. On Dec 3 People for Ponto asked the Carlsbad City Council, City Clerk and City DLCP-LUPA Staff - would that posting would include all the LCP communications since 2017 when Citizens first became aware started Public Input to the City and CCC on the Ponto LCP issues?

**Subject:** RE: 121 undeliverable Protect Ponto petitions

To City of Carlsbad and Carlsbad Planning:

We assume when you say 'records department' you mean City Clerk?

**We also assume you mean 'all comments submitted' includes written comments and attachments; and Ponto related communications, presentations, public testimony and Public Records Requests to the City since 2017 - when Citizens first became aware of Existing Ponto Planning Area F LCP regulations and received CCC direction to the City on those Regulations? Can you please confirm this as this is all part of the Citizen comments and data that is part of the public record regarding the subject matter? The City is [using] 2015 input to justify current City Staff proposals, so the City should acknowledge and include People for Ponto Citizen input since 2017 on the same subject matter.**

Thanks,

People for Ponto

Subject: RE: 121 undeliverable Protect Ponto petitions

Hello,

*At the conclusion of the meeting all comments will be submitted to the records department. The records department will make the full record available on the city's website. At that time, I would suggest reviewing the record in its entirety to compare to what you submitted. Thank you.*

It has been almost 3-weeks without a City response to the Dec 3 email, so People for Ponto will start re-emailing to the City and CCC public input on Ponto LCP and DLCP-LUPA issues since 2017 as 'resent official Public Input' to the City Council and CCC for the upcoming City Council DLCP-LUPA Public Hearing and other City meetings dealing with land use at Ponto. This '2017-present Public Input' should be posted on the City's website as noted in the City's Dec 2 email. The 2017-present Public Input is critical because there are now different City Council and CCC members since 2017. The 2017-present public input is critical to assure a proper Public Participation process consistent with Carlsbad and CA Coastal Act principles and assure the new City Council and the current CA Coastal Commission has the information and understands the extensive amount of multi-year public input expressing concerns, needs and desires for Ponto.

Following and attached is one of those many inputs.

Sincerely,  
People for Ponto

**The following email/attachment has important data/comments on the Coastal Recreation needs at Ponto that are critical in Ponto Planning Area F LCP regulations, and need full consideration.**

**Subject:** LCPA Public Comment - Coastal Recreation at Ponto - from People for Ponto  
**Importance:** High

Jennifer:

Attached please find Public Comments on the proposed Draft Local Coastal Program Amendment (DLCPA) to the Land Use Plan regarding "High-Priority" Coastal Recreation at Ponto.

These People for Ponto comments reflect the significant Coastal Recreation and Coastal Land Use Plan issues at Ponto that clearly seem to justify, particularly after the City has receive to date of 2,500 public requests (and more are coming) for a Ponto Coastal Park, that a more productive, and overall more time efficient process to address public concerns be provided in the DLCPA process. I provide that thought based on successfully managed an award-wining LCPA amendment in under 2-years that was almost the exactly the same as the City of Carlsbad. Although the City Council in a 2-2 tie failed to provide for more productive and overall more time efficient process I hope within the DLCPA processing parameters Staff has you try to advance:

1. a publicly accessible "Redline" version of the Existing 2016 Local Coastal Program (LCP) showing the City's proposed Draft disposition of the current Existing LCP Land Use Plan, policies and data. Without a "Redline" trying to understand the proposed Draft changes is very difficult,
2. true Citizen-based public Workshops on the Coastal Act goals-policies and LCP issues focused on the limited amount of key vacant (and soon to be vacant) Coastal lands in Carlsbad – such as Ponto, and
3. A 6-month extension of time review and provide informed public comments on the Redline LCP and DLCPA, and to provide time to conduct the aforementioned Workshops.

Thank you,  
Lance Schulte

- Carlsbad is NOT providing equitable and walking/biking access to Parks

Some Carlsbad Parks that are not fully useable as Parks:

<u>Existing Parks with</u>	<u>total park acres</u>	<u>Unusable park acres</u>	<u>% of park unusable</u>	<u>reason unusable</u>
<u>Unusable Open Space acreage</u>				
Alga Norte - SE quadrant	32.1	10.7	33%	1/3 of park is a Parking lot not a park

In many other Carlsbad Parks a significant percentage of those Parks are consumed by paved parking lots and unusable as a Park. city identified unusable habitat open space city identified unusable habitat open space city identified unusable habitat open space city identified unusable habitat open space 44% of these Parks are unusable as Parkland

Hidden Hills - NE quadrant	22.0	12.7	58%
La Costa Canyon SE quadrant	14.7	8.9	61%
Leo Carrillo - SE quadrant	27.4	16.5	60%
Poinsettia - SW quadrant	<u>41.2</u>	<u>11.1</u>	<u>27%</u>
Existing Park subtotal	137.4	59.9	44%

Anticipated Future Park development projects

Park - quadrant

Veterans - NW	91.5	49.5	54%	estimated unusable habitat open space
Cannon Lake - NW	6.8	3.4	50%	estimated unusable water open space
Zone 5 Park expansion - NW	9.3	0	0	appears 100% useable as a Park
Robertson Ranch - NE	<u>11.2</u>	<u>0</u>	<u>0</u>	appears 100% useable as a Park
Future park subtotal	118.8	52.9	45%	45% of Future Parks are unusable as Parks

**Unusable Open Space acres**

**in Existing & Future Parks**      256.2    112.8      44%      **112.8 acres or 44% is unusable as Parks**

- 112.8 acres or 44% of the Existing & Future Parks are unusable Open Space and can't be used as Parkland
- **Based on City's minimum 3-acres/1,000 population Park Standard, 112.8 acres of Unusable Parkland means 37,600 Carlsbad Citizens (or 32.5% of Carlsbad's current population of 112,877) will be denied Parkland that they can actually use as a Park.**
- 112.8 acres of Existing & Future unusable 'park' / 3 acre park standard x 1,000 population = 37,600 Carlsbad citizens without useable parkland per City minimum standard.
- **59.9 acres of Existing unusable 'park' / 3 acre park standard x 1,000 population = 19,967 Carlsbad citizens and their children are currently being denied useable park land. 19,967 is 17.7% of Carlsbad's current population.**
- In addition to these 19,967 existing citizens and their children denied park land, the City needs to develop additional Park acreage in the NE, SW and SE quadrants to cover current shortfalls in meeting in the minimal 3 acre/1,000 population park standard for the current populations in the NE, SW and SE quadrants.
- **The current NE, SW and SE quadrants park acreage shortfalls are in addition to the 19,967 Carlsbad citizens and their children that do not have the minimum 3 acres of parkland per 1,000 population**
- **Current FY 2018-19 MINIMUM park acreage shortfalls are listed below. They are:**
  - **4.3 acres for 1,433 people in NE quadrant,**
  - **6.8 acres for 2,266 people in SW quadrant, and**
  - **2.3 acres for 767 people in SE quadrant**

Shortfall (excess) in Current Quadrant Park standard by

	population		Future Park		
	<u>acres</u>	<u>need</u>	<u>acres</u>	<u>%</u>	
NW quadrant	(-14.2)	(-4,733)	107.6	91%	<u>existing Park shortfalls are for NE, SW &amp; SE quadrants</u> Current NW parks are 14.2 acres over min. standard & capacity for 4,733 more people at min. park standard. 91% of all Future City Parks are in NW quadrant
NE quadrant	4.3	1,433	11.2	9%	Future Park will exceed minimum NE park standard
SW quadrant	6.8	2,266	0	0%	No min. parks for 2,266 people in SW quad. Park deficit
SE quadrant	2.3	767	0	0%	No min. parks for 767 SE quadrant Park deficit

A Park Standard minimum is just a “Minimum”. City policy allows the City to buy/create parks above the City’s current 3 acre/1,000 pop. MINIMUM (and lowest) Park Standard of surrounding Coastal cities. Carlsbad already did this in the NW quadrant. It then added 3.1 more NW quadrant Park acres as part of the Poinsettia 61 Agreement. Poinsettia 61:

- converted 3.1 acres of NW City land planned/zoned for Residential use to Open Space Park land use/zoning,
- facilitated a developer building condos (increasing park demand) in the SW quadrant,
- required the SW Quadrant developer pay \$3 million to build the 3.1 acre NW quadrant park, and
- required the SW Quadrant developer pay to convert 3.1 acres of NW Quadrant & 5.7 acres of SW Quadrant City Park land to habitat that will be unusable as a City Park.

So Poinsettia 61 increased SW Quadrant development (that both increased SW Park Demand and expanded the current SW Quadrant Park deficit) while simultaneously using SW Quadrant development to pay for the conversion of 3.1 acres of residential land in the NW Quadrant to City Park (the NW Quadrant already has surplus park land per the City’s minimum standard).

People for Ponto strongly supports creating City Parks above the City’s current low 3-acre per 1,000 population minimum, as the City’s minimum standard is relatively low and substandard relative to other cities; many Carlsbad parks have significant acreage that is in fact ‘unusable’ as a park. Most importantly People for Ponto Citizens think it is very important to prioritize providing City Parks in areas of Park Inequity that are unserved by City Parks. However it seems very unfair to the SW Quadrant citizens to be so unserved and starved of the bare minimum of City Parks while at the same time funding City Parks in excess of City standard in other Quadrants.

The Poinsettia 61 illustrates a larger unfair (and dysfunctional) distribution of Quadrant based City Park demand and supply that is keenly evident in the demands/supply funding and location disparity of Veterans Park. Most all the development impact and park demand that paid Veterans Park fees came from the SW, SE and NE Quadrants yet the Veterans Park (supply) is not in those SW, SE and NE Quadrants. This inequity is counter to the implicit City requirement that City Parks be provided within the Quadrant of their Park demand. It is logical and proper that City Parks be provided and equitably distributed to be close to the development and population that generated the demand for that Park.

The City Park inequity at Ponto and in other Coastal areas of the City is counter to several CA Coastal Act policies; counter to good city planning and good CA Coastal planning; is highly detrimental to the City, City and CA citizens in the long-term; fails to properly distribute and match the location supply with the location of demand for Parks; and is counter to basic fundamental issues of fairness. Since 2017 People for Ponto has tried to get the City Council and City Staff to address this inequity, specifically at Ponto, and to do so in a way that embraces a true and honest Citizen-based planning process.

### Coastal Recreation:

1. Request that the City as part of its Draft LCP Public Review process broadly-publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCPA processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park: This disclosure is needed to correct about 20 years of City misrepresentation to the public on the since 1996 and currently Existing LCP requirements at Ponto, and the City's prior planning mistakes at Ponto. Citizens have been falsely told by the City that all the Coastal planning at Ponto was done already and that the City followed its Existing LCP regarding the need for a park at Ponto, and that this is already decided and could not be reversed. This misinformation has fundamentally stifled public review and public participation regarding the Coastal Zone. City failure to provide such a broad-public disclosure on the documented prior, and apparently current proposed, "planning mistakes" would appear to violate the principles of Ca Coastal Act Section 30006. A broad-public disclosure would for the first time allow citizens to be accurately informed on the Existing LCP requirements at Ponto so they can provide informed public review and comment regarding the need for a Coastal Park in in this last vacant 'unplanned' area. The requested broad-public disclosure by the City of the City past mistakes and the Existing LCP requirements at Ponto is consistent with CA Coastal Act (CCA) "Section 30006 Legislative findings and declarations; public participation - The Legislature further finds and declares that **the public has a right to fully participate in decisions affecting coastal planning**, conservation and development; that achievement of **sound coastal conservation and development is dependent upon public understanding and support**; and that the continuing planning and implementation of **programs for coastal conservation and development should include the widest opportunity for public participation.**" The public cannot participate as outlined in CCA Section 30006 if past City 'mistakes' and misrepresentations on Coastal planning at Ponto go undisclosed to the public. If the public isn't fully informed about the 20-years of LCP planning mistakes at Ponto how could the public in the past (and now in the present) participate in the proposed LCP Amendment – **Public Participation as noted in Section 30006 above is the means to sound coastal conservation and development and is "... dependent upon public understanding ..."**. The City's past mistakes at Ponto need to be corrected by slightly different a Draft LCP Amendment process than currently outlined by the City; a new process is needed that clearly, opening and honestly informs and engages the public on the Existing LCP Ponto issues. The City's current Draft LCP Amendment process fails to follow CCA Section 30006 in that most all the citizens we encounter are as yet unaware of the City's Ponto mistakes and how they can participate in in the DLCPA process without that information. We see this daily in conversations we have with our fellow citizens. We even saw at the Oct 20, 2019 Carlsbad Planning Commission meeting that the Planning Commission was unaware of the planning mistakes at Ponto. How can a decision body of the City make a decision without knowing about these prior 'planning mistakes' facts that surround what they are being asked to decide on? Repeatedly since 2017 Carlsbad citizens and People for Ponto have asked the City to fully acknowledge the City's prior flawed planning at Ponto, and to correct that with ether maintaining the Existing LCP Non-residential Reserve Land Use or restarting the Coastal Planning at Ponto with a true and accurately informed Community-based Coastal Planning process consistent with Section 30006.

We request the City during the DLCPA Public Review period broadly and publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCP and other "planning efforts" public participation processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park, and 1) provide a truly honest public participation process on that disclosure consistent with CCA Section 30006 as part of the Draft LCP Amendment process or 2) retain the Existing LCP Non-residential Reserve Land Use and require a comprehensive and honest community-based redo of Coastal Resource planning at Ponto.

2. City fully and publicly reply to and the City Council consider the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process: Lance Schulte on 1/23/20 received an email reply by the City to his follow-up email regarding the status of the 11/20/19 citizen concerns/requests public comments and letters presented to the Planning Commission. This is appreciated, however it is request that the City fully publicly reply to the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process and present the to the City Council 11/20/19 citizen concerns/requests so the City Council can consider them and provide any direction to City Staff. City Staff first presented a summary presentation of the proposed Draft LCP Amendment to the Carlsbad Planning Commission on November 20, 2019, and indicated the public comment period would close on November in less than 2-weeks. Citizens and citizen groups provided public testimony to the Planning Commission, both verbally and in two written letters. The CCC was copied on those letters. The testimony and letters noted significant concerns about the City's proposed LCP Amendment process and made three requests:
  - a. Disclose and provide a publically accessible 'Redline Version' of the Existing 2016/Proposed LCP land use Plan and Policies so everyone can see the proposed changes to the Existing LCP.
  - b. Provide true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern or objections. Citizen Workshops, when done right, are valuable means to openly educate, discuss and work to consensus options. These areas, including Ponto, were/are subject to multiple lawsuits, so true open and honest public workshops would provide an opportunity to openly and honestly discuss the issues and hopefully build public consensus/support for solutions. This approach seems consistent with CCA Section 30006, and common sense.
  - c. Extend the public comment period 6-months to allow Citizen Review of the Redline Version of the LCPA and allow time for Citizen Workshops.

The City did extend the Public Review period 2-months over the holidays to January 31, 2020. This is appreciated although many think this is inadequate given the significance of the Proposed Land Use Plan Amendments, and lack of Redline Version to compare. The City and their consultants required several extra years beyond schedule prepare the proposed LCP Amendments. The extra years of City Staff work reflects on the volume of the over 500-pages in the documents and the time needed to understand the Existing LCP and then create an Amended LCP. Citizens need sufficient time, proper comparative tools (redline) and a process (workshops) to understand the proposed LCP Amendments that is reflective of extensive extra time needed by City Staff and consultants needed. Truncation of lay public review to a few months for an Amendment that took paid professionals many years to produce seems a more than a bit inappropriate. The City appears to be rejecting citizens' request to be provided a 'Redline Version' of the Existing 2016/Proposed LCP land use Plan. So public review comments will tainted or will miss many issues due having to manually cross-reference a 150-page Existing LCP LUP with a Proposed 350-page Proposed LCP LUP. There will be unknown and unconsidered changes in the Draft LCP Amendment that the public and city and CCC decision makers will not know about due to the lack of 'Redline Version'.

The City also appears to reject citizen requests for true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern – such as Ponto. Like Coastal Recreation issue #1 above the following citizen requests appear consistent with CA Coastal Act (CCA) Section 30006, and the City's rejection of that requests seem counter to the CA Coastal Act.

We again request of the City to provide: 1) a 'Redline Version' to the public and decision makers, along with sufficient time to review and comment on the 'Redline Version'; and 2) true Citizen Workshops for Ponto and the

other last remaining significant vacant Coastal lands in Carlsbad as part of the Draft LCP Amendment process, or as part of deferred LCP Amendment process for those areas.

3. Coastal Zoned land is precious: the very small amount of remaining vacant Coastal land should be reserved for “High-Priority” Coastal Recreation Land Uses under the CA Coastal Act to provide for the growing and forever ‘Buildout’ needs of Carlsbad and CA Citizens, and our visitors.
  - a. Less than 1.8% (76 square miles) of San Diego County’s 4,207 square miles is in Coastal Zone. This small area needs to provide for all the forever Coastal needs of the County, State of CA, and Visitors. Upland Coastal Recreation (Coastal Park) land use is needed to provide land to migrate the projected/planned loss of “High-Priority” Coastal Recreation land uses due to Sea Level Rise impacts. There is only 76 miles of total coastline in San Diego County; a significant amount is publicly inaccessible military/industrial land. So how the last few portions of Coastal Land within Carlsbad (which is about 8% of San Diego County’s Coastline) is planned for the forever needs for High-Coastal-Priority Recreation Land Use is critical for Carlsbad, San Diego, and California Statewide needs into the future.
  - b. Most all the developable Coastal land in Carlsbad is already developed with Low-Coastal-Priority residential uses. Only a very small percentage of Carlsbad’s developable Coastal land, maybe 1-2%, is still vacant. This last tiny portion of fragment of vacant developable Coastal Land should be documented in the Draft LCP and reserved for “High-Priority” Coastal Land uses – most critically Coastal Recreation – to address the growing Coastal Recreation needs from a growing population and visitors. These growing needs are all the more critical in that existing Coastal Recreation lands will be decreasing due to inundation and erosion due to DLCPA planned Sea Level Rise.
  - c. This image of the western half of San Diego County graphically shows (in the blue line) the very small Coastal Zone Area that needs to provide the Carlsbad’s and California’s Coastal Recreational needs for all San Diego County residents and Visitors:

We request that 1) the amount and location of remaining vacant Coastal land in Carlsbad be documented and mapped and be reserved for high-priority Coastal Land Uses consistent with CCA Goals in Section 30001.5 "... (c) ... **maximize public recreational opportunities in the coastal zone** consistent with sound resources conservation principles and constitutionally protected rights of private property owners. (d) **Assure priority for coastal-dependent and coastal-related development over other development on the coast.** ... "; 2). This data be used in the City's analysis and the public's review and discussion about the City's proposed Draft 'Buildout' Land Use Plan. The City's proposed Draft 'Buildout' Land Use Plan will forever lock in the amount "maximum public recreational opportunities in the coastal zone" and will be the final Coastal Land Use Plan that is supposed to "assure priority for coastal-dependent and coastal-related development over other development on the coast". Most of Carlsbad's Coastal Zone is already developed or committed to low-priority land uses contrary to these CCA Goals, so how we finally and forever plan to use of the last small remaining vacant Coastal Land is very important.

4. The proposed Draft LCP Amendment in Chapter 3 makes unfounded statements regarding the proposed Amendment to the LCP Land Use Plan provision of "High-Priority" Coastal Recreation land use: On page 3-3, at the beginning of the Chapter 3 – Recreation and Visitor Serving Uses the City correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation uses, and cites multiple CCA Sections to that effect. The City's proposed Coastal Land Use Plan then states on page 3-5 that a high proportion of land in the City is dedicated open

space available for passive and active use, yet provides no justification or accurate metric to support this statement. This is a critical unsubstantiated and speculative statement that is not supported by any comparative data (justifying the “high proportion” statement). The City later in Chapter 3 compared the adjoining cities of Oceanside and Encinitas to try to show how the proposed Draft LCP LUP Amendment provides higher levels of Visitor Serving Accommodations. That ‘non-common denominator’ comparison was fundamentally flawed, as noted in a prior separate Draft LCPA public review comment from People for Ponto regarding another high-priority Coastal land use (visitor accommodations) planned for in Chapter 3, but at least it was an attempt to compare. However, for the Coastal Recreation portion of Chapter 3, the City does not even attempt to provide any comparative data to support (or justify) the proposed Coastal Recreation Land Use Plan and statements. The Coastal Recreation Chapter also fails to disclose Carlsbad’s adopted City Park Master Plan (Park Service Area and Equity map) data that shows a clear conflict between the CA Coastal Act Policy Sections noted at the beginning of Chapter 3 and Chapter 3’s proposed Draft Coastal Recreation Land Use Plan.

Comparative Coastal Recreation: Comparing the Land Use Plan and policies of Oceanside, Carlsbad and Encinitas, one finds Carlsbad’s proposed Coastal Recreational Plan and Policies are not “high”, but very low compared with Oceanside and Encinitas. Carlsbad has a General Plan Park Standard of 3 acres of City Park per 1,000 Population. Oceanside has a 5 acres of City Park Standard per 1,000 population, and Encinitas has a 15 acres per 1,000 population standard, and an in-lieu park fee requirement of 5 acres per 1,000 population. Carlsbad’s proposed Coastal Recreation Land Use Plan is in fact not ‘high’ but is in fact the lowest of the three cities, with Carlsbad providing only 40% of Oceanside’s park standard, and only 20% of Encinitas’s Park Standard. Citywide Carlsbad currently has 2.47 acres of developed park per 1,000 population, Oceanside currently has 3.6 acres of developed park per 1,000 population, and Encinitas currently has 5.5 acres of developed park per 1,000 population. Although this data is citywide, it shows Carlsbad’s current amount of developed parkland is less than 70% of what Oceanside currently provides, and less than 45% of what Encinitas currently provides. Carlsbad is not currently providing, nor proposing a Coastal Land Use Plan to provide, a ‘high’ proportion of Coastal Recreation Land Use compared to Oceanside and Encinitas.

On page 3-5 Carlsbad may be misrepresenting city open space that is needed and used for the preservation of federally endangered species habitats and lagoon water bodies. This open space Land cannot be Used for Coastal Recreation purposes; and in fact Land Use regulations prohibit public access and Recreational Use on these Lands and water bodies to protect those endangered land and water habitats. 78% of Carlsbad’s open space is “open space for the preservation of natural resources” and cannot be used for Coastal Parks and Recreational use. Although “open space for the preservation of natural resources” does provide scenic or visual amenity, and this amenity is addressed as a different coastal resource. Visual open space is not Coastal Recreation Land Use. It appears Carlsbad is proposing in the Draft LCP Amendment to continue to, providing a ‘low’ percentage of Coastal Park Land Use and Coastal Recreation Land Use compared to adjoining cities.

In addition to the comparatively low amount of Coastal Park land Carlsbad plans for, Carlsbad scores very poorly regarding the equitable and fair distribution and accessibility of Coastal Parks and Coastal Recreation Land Uses. Both the City of Oceanside and Encinitas have very robust and detailed Park and Land Use plans to promote an equitable distribution of, and good non-vehicular accessibility, to their Coastal Parks. By comparison, Carlsbad’s park land use plan scores poorly, as exemplified in Ponto and South Carlsbad. Ponto’s existing population requires about 6.6 acres of City Parkland per Carlsbad’s low 3 acres per 1,000 population standard. Yet the nearest City Park is several miles away and takes over 50 minutes to walk along major arterial roadways and across Interstate 5 to access. As such this nearest park is not an accessible park for Ponto children, and thus Ponto children have to play in

our local streets to find a significantly large open area to play in. Ponto residents have to drive their kids to get to a park increasing VMT and GHG emissions. The City's proposed Coastal Recreation Land Use Plan 'solution' to Ponto's no-park condition, along with the City's need to add an additional 6.5 acres of new City parks in Southwest Carlsbad to comply with the Southwest Carlsbad's 2012 population demand (at a ratio of 3-acre/1,000 population) is to provide a City Park – Veterans Park – over 6-miles away from the Ponto and Southwest Carlsbad population need. This makes a bad situation worse. The City's proposed location is totally inaccessible to serve the needs of the population of children or anyone without a car, that it is intended to serve in South Carlsbad. This City proposed Coastal Recreation Land Use Plan 'solution' seems inappropriate and inconsistent with the CA Coastal Act and common sense. During the City's Veterans Park and budget community workshops citizens expressed a desire for a Ponto Park to be the solution to our Ponto and Southwest Carlsbad Park deficits. Those citizen requests were not apparently considered as part of the City's proposed Draft Coastal Recreation Land Use Plan. Following is an image summarizing the magnitude of citizen needs/desires expressed at the City's Budget workshop. Note the number and size of the text citing Ponto Park and South Carlsbad that reflects the number and magnitude/intensity of citizen workshop groups' input. The failure to acknowledge this public participation and data in the Coastal Recreation Land Use Plan Park seems in conflict with CCA Sections 30006 and 30252(6):

For South Carlsbad there is a complete lack of any existing or planned City Coastal Park and park acreage west of I-5, while North Carlsbad has 9 existing and 1 planned City Coastal Parks totaling 37.8 acres of City Coastal W of I-5 North Carlsbad. Not only is this unfair to South Carlsbad, it is also unfair to North Carlsbad as it increases VMT and parking impacts in North Carlsbad because South Carlsbad is not providing the City Coastal Parks for South Carlsbad resident/visitor demands. This City Park disparity is shown on Figure 3-1 of the Coastal Recreation Land Use Plan;

however it more accurately illustrated in the following data/image from the adopted Carlsbad Park Master Plan's "Service Area Maps (Equity Maps)". The image below titled 'No Coastal Park in South Carlsbad' shows Carlsbad's adopted "Park Service Area Maps (Equity Maps)" from the City's Park Master Plan that says it maps "the population being served by that park type/facility." The added text to the image is data regarding park inequity and disparity in South Carlsbad. The image compiles Carlsbad's adopted Park "Park Service Area Maps (Equity Maps)" for Community Parks and Special Use Area Parks that are the City's two park acreage types produced by the City's comparatively low standard of 3 acre of City Park per 1,000 population. The City's Park Service Area Maps (Equity Maps) shows areas and populations served by parks within the blue and red circles. City data clearly shows large areas of overlapping Park Service (areas/populations served by multiple parks) in North Carlsbad and also shows large areas in South Carlsbad with No Park Service (areas/populations unserved by any parks) and Park Inequity in South Carlsbad. It clearly shows the City's Documented Park Need and Park inequity at Ponto. The Existing LCP LUP for Ponto's Planning Area F in is required to "consider" and "document" the need for a "Public Park". The City's adopted Park Service Area Maps (Equity Maps) clearly shows the inequity of Coastal City Park between North and South Carlsbad, and the need for Coastal Parks in South Carlsbad – particularly at Ponto. The City's proposed Draft 'Buildout' Coastal Recreation Land Use Plan instead proposes to lock-in documented City Public Coastal Park inequity and unserved Coastal Park demand at Ponto and South Carlsbad forever. It does so by proposing the last vacant undeveloped/unplanned Coastal land – Ponto Planning Area F - in the unserved Ponto and South Carlsbad coastline areas instead of being planned for much needed City Park and Coastal Recreation use be converted to even more low-priority residential and general commercial land uses. These 'low-priority' residential uses, by the way, further increase City Park and Coastal Recreation demand and inequity in Coastal South Carlsbad. This is wrong, and a proposed 'forever-buildout' wrong at the most basic and fundamental levels. The proposed Draft Coastal Recreation Land Use Plan by NOT providing documented needed City parks for vast areas of Coastal South Carlsbad is inconsistent with the CA Coastal Act policies and Existing LCP LUP requirements for Ponto Planning Area F; and also inconsistent with fair/equitable/commonsense land use and park planning principles, inconsistent with CA Coastal Commission social justice goals, inconsistent with social equity, inconsistent with VMT reduction requirements, and inconsistent with common fairness. A different Coastal Recreation Land Use Plan should be provided that provides for a socially equitable distribution of Coastal Park resources so as to would allow children, the elderly and those without cars to access Coastal Parks. The proposed Draft 'Buildout' Coastal Recreation Land Use Plan forever locking in the unfair distribution of City Parks appears a violation of the not only CCA Sections 30213, 30222, 30223, and 30252(6) but also the fundamental values and principles of the CA Coastal Act. The Draft also appears a violation of Carlsbad's Community Vision.

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

A different Coastal Recreation Land Use Plan is required to provide a more equitable distribution of City Parks with non-vehicular accessibility. Such a different plan would advance State and City requirements to reduce vehicle Miles Traveled (VMT) and greenhouse gas emissions that contribute to climate change and sea level rise impacts. Please note that the data for the above basic comparison comes from City of Carlsbad, Oceanside and Encinitas General Plan and Park Master Plan documents.

Data shows the proposed Coastal Recreation Plan conflicts with the CA Coastal Act policy Sections. As mentioned page 3-3 correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation Land Uses, and pages 3-5 list multiple CA Coastal Act (CCA) policy Sections that confirm this. However, given the significant statewide importance of Coastal Recreation Land Use, the City proposed 'Buildout' Coastal Recreation Land Use Plan does not appear to adequately address and implement these CCA Policies, and most noticeably in the Ponto area of South Carlsbad. Coastal Recreation is a significant Statewide High-Priority Land Use under the CCA. For a substantially developed non-coastal-industry city like Carlsbad Coastal Recreation is likely the biggest land use issue. This issue is even more elevated due to the fact that there are only a few small areas left of undeveloped Coastal land on which to provide Coastal Recreation, and Carlsbad is proposing a Coastal 'Buildout' Land Use Plan on those areas. The use of the last few remaining vacant portions of Coastal land for Coastal Recreation Land Use is the most important land use consideration in the proposed Draft LCP Land Use Plan Amendment as population and visitor growth will increase demands for Coastal Recreation. It is thus very surprising, and disturbing that the proposed Coastal Recreation Land Use Plan is so short, lacks any comparative and demand projection data, lacks any resource demand/distribution and social equity data, and lacks any rational and clear connection with CCA Policy and the proposed 'Buildout' Coastal Land Use plan. This is all the more troubling given that:

- The Ponto area represents the last significant vacant undeveloped/unplanned land near the coast in South Carlsbad that can provide a meaningful Coastal Park.
- The fact that the City's Existing LCP requires the city consider and document the need for a "i.e. Public Park" on Ponto's Planning Area F prior to the City proposing a change of Planning Area F's "Non-residential

Reserve” land use designation. The City has repeatedly failed to comply with this LCP LUP requirement, and worse has repeatedly failed to honestly inform citizens of this LCP LUP requirement at planning Area F before it granted any land use. The City, apparently implementing speculative developer wishes, has repeatedly proposed changing Planning Area F’s Coastal Land Use designation to “low-priority” residential and general commercial land uses without publically disclosing and following the Existing LCP LUP.

- The City’s currently developed parks in the southern portion of the City do not meet the city’s comparatively low public park standard of only 3 acres per 1,000 population. Since 2012 there has been City park acreage shortfall in both SW and SE Carlsbad.
- The Existing population of Ponto (west of I-5 and south of Poinsettia Lane) requires about 6.6 acres of Public Park based on the City’s comparatively low public park standard of 3 acres per 1,000 population. There is no Public Park in Ponto. Adding more population at Ponto will increase this current park demand/supply disparity.
- Carlsbad and other citizens have since 2017 expressed to the City the strong need for a Coastal Park at Ponto, and requested the City to provide a true citizen-based planning process to consider the Public Park need at Ponto. The Citizens’ requested process is fully in-line with CCA Goals, Public Participation Policy, Land Use Policies, and the Existing LCP Land Use Plan/requirements for Planning Area F and is the most appropriate means to consider and document the need for a Public Park at Ponto as required by the Existing LCP Land Use Plan.
- Planning Area F is for sale, and a non-profit citizens group has made an offer to purchase Planning Area F for a much needed Coastal Park for both Ponto and inland South Carlsbad residents and visitors. How should these facts be considered by the City and CCC?
- Carlsbad has no Coastal Parks west of I-5 and the railroad corridor for the entire southern half of Carlsbad’s 7-mile coastline.
- The southern half of Carlsbad’s coastline is 5.7% of the entire San Diego County coastline and represents a significant portion of regional coastline without a meaningful Coastal Park west of I-5 and the Railroad corridor.
- The City’s proposed Coastal Recreation Land Use Plan provides No Documentation, No Rational, and No Supporting or Comparative Data to show the proposed Coastal Recreation Land Use Plan in fact complies with the CA Coastal Act.

5. There is no Coastal Recreation/Park west of interstate 5 for all South Carlsbad, or half of the entire City. This is a obviously unfair and inequitable distribution of Coastal Recreation/Park resources that should be corrected by changes to the Draft LCP Land Use Amendment: The following image (which was sent to the City and CCC on several prior communications) was first requested by former Carlsbad Councilman Michael Schumacher during a People for Ponto presentation/request at the Oct 23, 2018 City Council meeting. The data compiled in the image shows how the South Coastal Carlsbad (Ponto) is not served by a Park per the City’s adopted Parks Master Plan. The blue dots on the map are park locations and blue circle(s) show the City’s Park Master Plan adopted Park Service Areas and Park Equity. This data, from pages 87-88 of the City of Carlsbad Parks Master Plan, shows all City Parks (both Community Parks and Special Use Areas in Coastal Carlsbad (except Aviara Park east of Poinsettia Park and west of Alga Norte Park). The text on the left margin identifies the South Carlsbad Coastal Park (west of I-5) gap along with the number of South Carlsbad Citizens (over half the City’s population) without a Coastal Park. The left margin also identifies more local issues for the over 2,000 Ponto area adults and children. For Ponto residents the nearest Public Park and City proposed ‘solution’ to the South Carlsbad and Ponto Public Park deficit are miles away over high-speed/traffic roadways and thus somewhat hazardous to access and effectively unusable by children/the elderly or

those without cars. Having been a 20-year resident of Ponto I regularly see our children have to play in the street as there are no Public Park with large open fields to play at within a safe and under 1-hour walk away. Ponto citizens have submitted public comments regarding this condition and the lack of a Park at Ponto

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

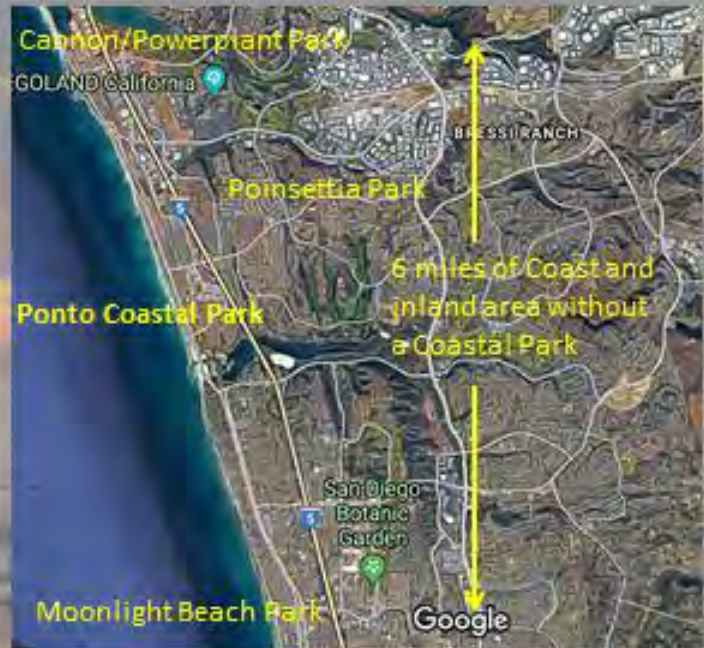

Ponto is at the center of regional 6-mile Coastal Park Gap. A Coastal Park in this instance being a Public Park with practical green play space and a reasonable connection with the Coast (i.e. located west of the regional rail and Interstate-5 corridors). The following image shows this larger regional Coastal Park Gap centered on the Ponto Area, and the nearest Coastal Parks – Cannon Park to the north, and Moonlight Park to the south.

Regionally this image shows Ponto is the last remaining significant vacant Coastal land that could accommodate a Coastal Park to serve the Coastal Park current needs of over existing 2,000 Ponto residents, 64,000 existing South Carlsbad residents, and a larger regional population. It is also the only area to serve the Coastal Park needs for the thousands of hotel rooms in Upland Visitor Accommodations in South Carlsbad.

# How Ponto Serves Region

- Ponto is in the middle of the regional Coastal Park Gap
- A Ponto Coastal Park fills a critical 6 mile gap of coastline without a Coastal Park - 8.6% of SD County coastline
- A Ponto Coastal Park Serves over 26,000 homes & 64,000 citizens just in South Carlsbad without a Coastal Park
- Serves many more people outside Carlsbad

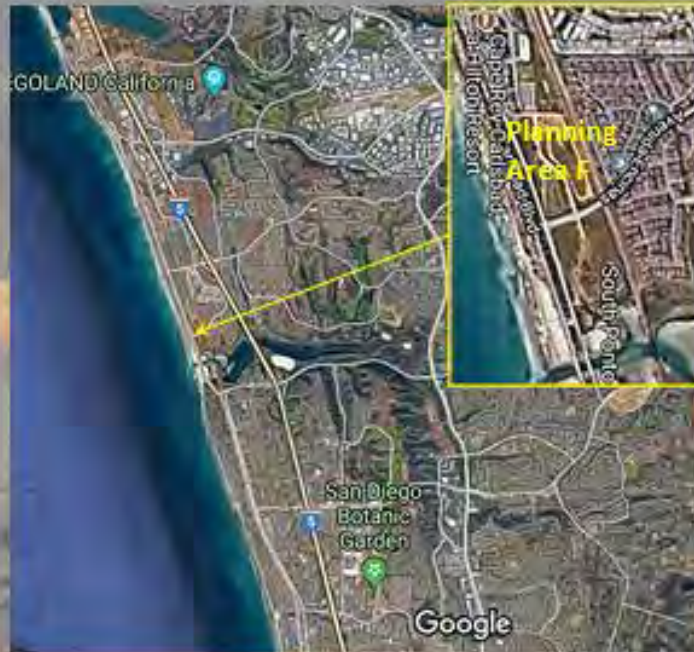

As People for Ponto first uncovered and then communicated in 2017 to the City and CCC; Carlsbad's Existing (since 1994) Local Coastal Program LUP currently states (on page 101) that Ponto's Planning Area F: carries a Non-Residential Reserve (NRR) General Plan designation. Carlsbad's Existing Local Coastal Program Land Use Plan states: "Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an "unplanned" area ..." and requires that: "... **As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.**" CA Coastal Commission actions, Carlsbad Public Records Requests 2017-260, 261, and 262, and 11/20/19 City Planner statements confirm the City never fully communicated to Carlsbad Citizens the existence of this LCP requirement nor did the City comply with the requirements. Of deep concern is that the City is now (as several times in the past) still not honestly disclosing to citizens and implementing this Existing LCP requirement as a true and authentic 'planning effort'. The lack of open public disclosure and apparent fear of true public workshops and Public Comment about the Existing Planning Area F LCP requirements are troubling. The point of a 'planning effort' is to openly and publically present data, publically discuss and explore possibilities/opportunities, and help build consensus on the best planning options. Citizens are concerned the city has already made up its mind and there is no real "planning effort" in the proposed Draft LCP Amendment process, just a brief Staff Report and at the end provide citizens 3-minutes to comment on the proposal. This is not the proper way to treat the last remaining significant vacant land in South Carlsbad that will forever determine the Coastal Recreation environment for generations of Carlsbad and California citizens and visitors to come.

The following data/images show how Ponto is in the center of the 6-mile (west of I-5 and Railroad corridor) regional Coastal Park gap. Ponto is the last remaining vacant and currently "unplanned" Coastal land that is available to address this regional Coastal Park Gap.

## How Ponto Serves Region cont.

- **Relieves Coastal Park congestion** in North Carlsbad, Encinitas and Solana Beach
- Area currently needs Coastal Park as seen by:
  - Ponto Beach parking congestion
  - current trespass use of Planning Area F as a Park
- **6.6 acre portion of Planning Area F** addresses SW Quad City Park deficit

## How Ponto Serves Region cont.

- A Ponto Park helps address 2050 and beyond Regional Population and Visitor Growth demands for Coastal Parks
- A Ponto Park provides the lowest-cost coastal access and recreation opportunities for CA citizens and visitors

## How Ponto Serves Region cont.

- Vital park and open space amenity for Visitor serving businesses and accommodations
- 6.6 acre unique City Coastal Park venue to stage special events: Runs, bike rides, triathlons, sports, coastal festivals, etc.

## How Ponto Serves Region cont.

- Critical Park space for So. Carlsbad State Beach Campground
- Provides a big training and staging space for Junior lifeguards
- Dog walk trail

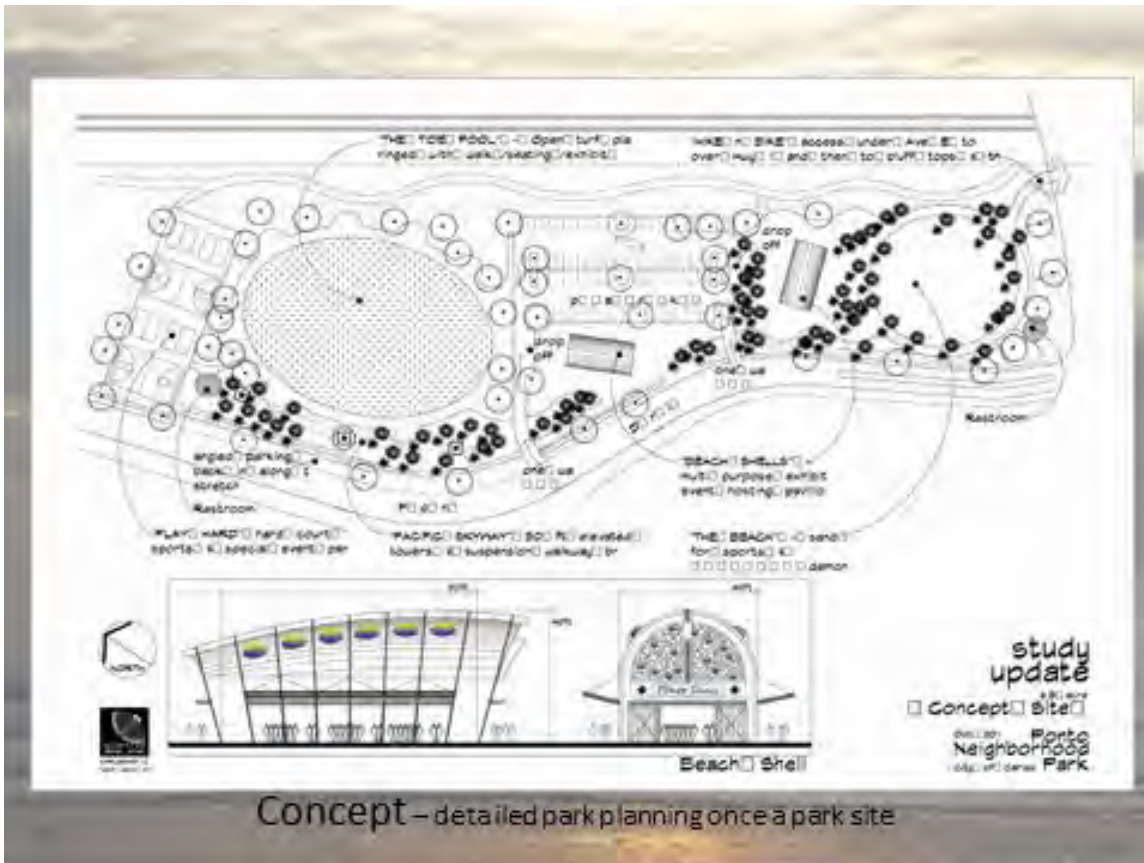

# Ponto Coastal Park Concept

- A concept – but shows potential recreational opportunities
- Provides **vital parkland support for beach & open play fields**
- Concept plan a gift from San Pacifico Community Association

One possible Concept image of a potential Ponto Coastal Park at Planning Area F is illustrated below. The potential for a Ponto Coastal Park is real. The speculative land investment fund (Lone Star Fund #5 USA L.P. and Bermuda L.P.) that currently owns Planning Area F is selling the property, and is available for the City of Carlsbad to acquire to address the documented demand/need for a City Park and City Park inequity at Ponto and in Coastal South Carlsbad. A Ponto Beachfront Park 501c3 is working to acquire donations to help purchase the site for a Park. These situations and opportunities should be publicly discussed as part of the City Staff's proposed Local Coastal Program Land Use Plan Amendment.

Concept – detailed park planning once a park site

6. Projected increases in California, San Diego County and Carlsbad population and visitor growth increases the demand for High-Priority-Coastal Recreation land use:
  - a. Increasing Citizen demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

San Diego County Citizen Population - Source: SANDAG Preliminary 2050 Regional Growth Forecast

1980	1,861,846
1990	2,498,016
2000	2,813,833
2010	3,095,313
2020	3,535,000 = 46,500 Citizens per mile of San Diego County coastline
2030	3,870,000
2040	4,163,688
2050	4,384,867 = 57,700 Citizens per mile of San Diego County coastline

2020 to 2050 = 24% increase in San Diego County population.

Citizen Population will continue beyond 2050. Carlsbad may plan for 'Buildout' in 2050, but what is San Diego County's 'Buildout'? There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for this growing population. If we do not increase our supply of Coastal Recreational Resources for these increased demands our Coastal Recreation Resources will become more overcrowded, deteriorated and ultimately diminish the Coastal Recreation quality of life for Citizens of Carlsbad and California. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5) and there is No Coastal Park in all of South Carlsbad to address the Coastal Recreation needs of the 64,000 South Carlsbad Citizens.

- b. Increasing Visitor demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

Yearly Visitors to San Diego County – source: *San Diego Tourism Authority; San Diego Travel Forecast, Dec, 2017*

2016	34,900,000
2017	34,900,000
2018	35,300,000
2019	35,900,000
2020	36,500,000 = average 100,000 visitors per day, or 2.83% of County’s Population per day, or 1,316 Visitors/coastal mile/day in 2020
2021	37,100,000
2022	37,700,000

This is growth at about a 1.6% per year increase in visitors. Projecting this Visitor growth rate from 2020 to 2050 results in a 61% or 22,265,000 increase in Visitors in 2050 to:

2050	58,765,000 = average 161,000 visitors per day, or 3.67% of the County’s projected 2050 Population per day, or 2,120 Visitors/coastal mile/day in 2050.
------	--

The number of Visitors is likely to increase beyond the year 2050. There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for these projected 2050 61% increase, and beyond 2050, increases in Visitor demand for Coastal Recreational Resources. Increasing Coastal Recreation land is a vital and critically supporting Land Use and vital amenity for California’s, the San Diego Region’s and Carlsbad’s Visitor Serving Industry. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5). There are thousands of hotel rooms in South Carlsbad that have NO Coastal Park to go to in South Carlsbad. This needs correcting as both a Coastal Act and also a City economic sustainability imperative.

- c. We request that the as part of the public’s review, the City Staff proposed Draft LCP Amendment to the Land Use Plan clearly document if and/or how future forever ‘Buildout’ City, Regional and Statewide population and visitor population demand for Coastal Recreation and City Coastal Parks are adequately provided for both in amount and locational distribution in the Carlsbad proposed Amendment of the LCP Land Use Plan.

- 7. Carlsbad’s Draft Local Coastal Program Land Use Plan Amendment says it plans to a year 2050 buildout of the Coastal Zone. The Draft Local Coastal Program Land Use Plan Amendment then is the last opportunity to create a Coastal Land Use Plan to provide “High-Priority” Coastal Recreation Land Use, and will forever impact future generations of California, San Diego County, and Carlsbad Citizens and Visitors:

- a. The Draft LCPA indicates in 2008 only 9% of All Carlsbad was vacant land. Less is vacant now in 2019. Carlsbad’s Coastal Zone is 37% of the City, so vacant unconstrained land suitable for providing Coastal Recreation is likely only 3-4%. The prior request for a full documentation of the remaining vacant Coastal lands will provide a better understanding needed to begin to make the final ‘buildout’ Coastal Land Use Plan for Carlsbad. The Draft LCPA does not indicate the amount and locations of currently vacant unconstrained Coastal Land in Carlsbad. This final limited vacant land resource should be clearly documented and mapped in the DLCPA as it represents the real focus of the DLCPA – the Coastal Plan for these remaingn undeveloped

lands. These last remaining vacant lands should be primarily used to provide for and equitably distribute “High-Priority” Coastal Recreation Land Uses consistent with CCA Sections:

- i. Section 30212.5 “... Wherever appropriate and feasible, public facilities, including parking areas or facilities, **shall be distributed throughout an area so as to mitigate against the impacts, social and otherwise, of overcrowding or overuse by the public of any single area.**”;
- ii. Section 30213 “... **Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...**”;
- iii. Section 30222 “**The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development,** but not over agriculture or coastal-dependent industry.”
- iv. Section 30223 “**Upland areas necessary to support coastal recreational uses shall be reserved for such uses, where feasible**” ,
- v. Section 30251 ... The location and amount of new development should maintain and enhance public access to the coast by ... 6) assuring that the recreational needs of new residents will not overload nearby coastal recreation areas by **correlating the amount of development with local park acquisition** and development plans with the provision of onsite recreational facilities to serve the new development”

Adopted City Park Service Area and Park Equity maps discussed earlier document the proposed Draft LCP Amendment’s inconstancy with the above CCA Policy Sections. The locations and small amounts remaining vacant Coastal lands provide the last opportunities to correct the inconsistencies of City proposed Draft “buildout” LCP Land Use Plan Amendment with these Coastal Act Policies.

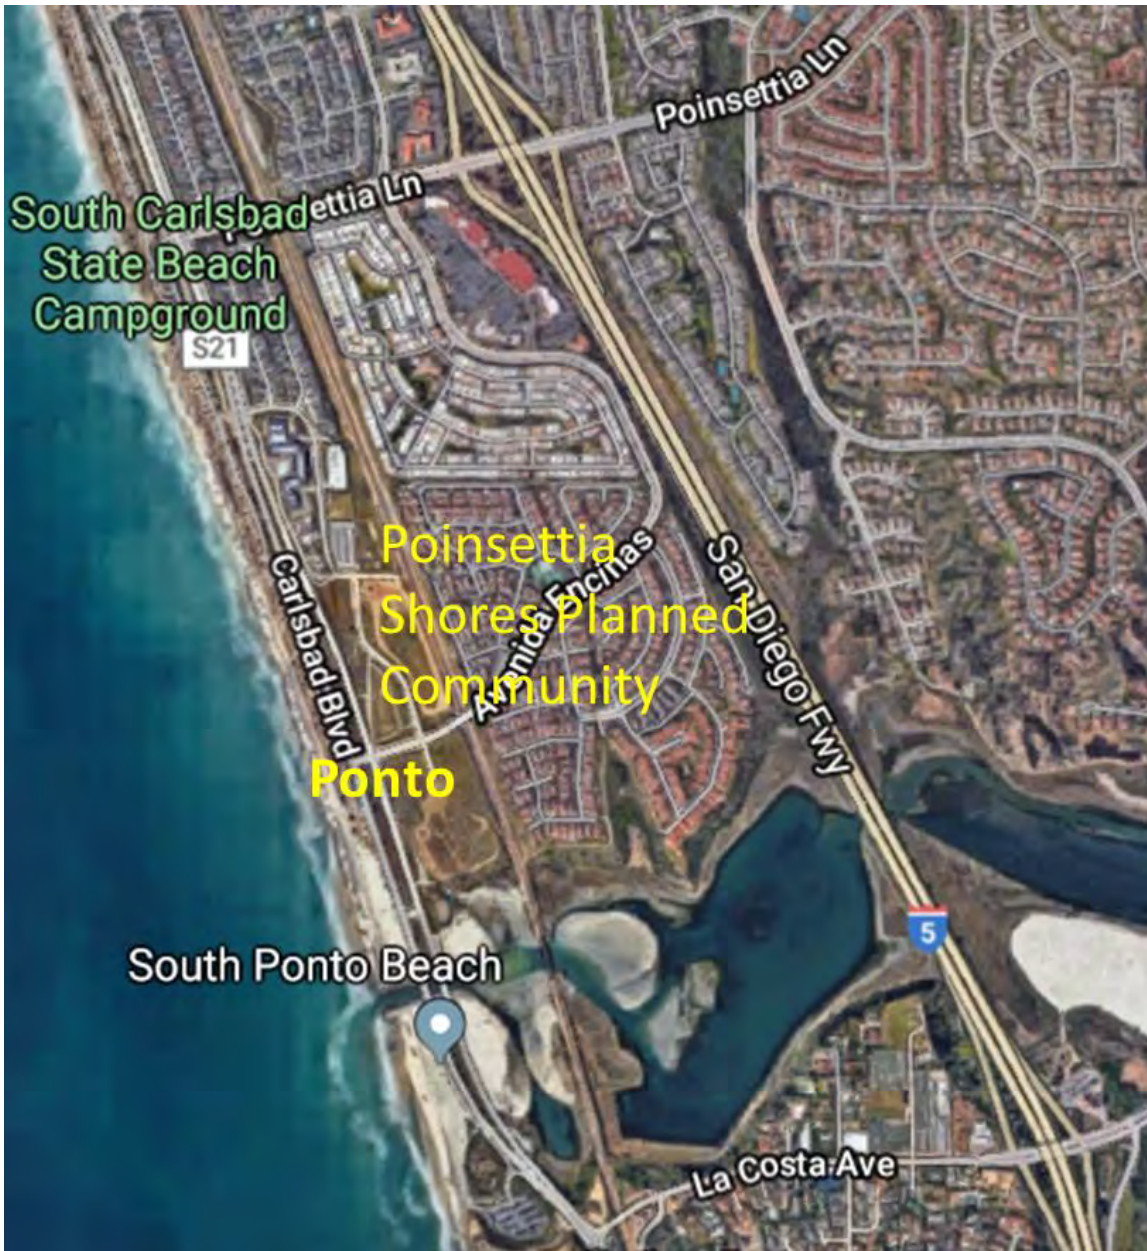

Currently and since 1996 there has been LCP LUP Policy/regulations for Ponto Planning Area F that require consideration of a “Public Park” prior to changing the existing “unplanned Non-residential Reserve” Land Use designation. A map and data base of vacant developable Coastal land should be provided as part of the Draft LCPA and the Draft LCPA. This map and data base should document the projected/planned loss of Coastal land use due to Sea Level Rise. Draft LCPA projects Sea Level Rise will eliminate several beaches and High-Priority Coastal Land Uses like Coastal Lagoon Trails and the Campground.

- b. The LCP Land Use Plan should plan and reserve the very limited vacant developable Coastal land for the long-term ‘Buildout’ needs of “High-Priority” Coastal Recreation Land Use. Vacant developable Coastal land is too scarce to be squandered for “low-priority” uses. Sea Level Rise will reduce “High-Priority” Coastal Uses. So how vacant developable Upland area should be preserved for “High-Priority” Coastal Uses is a key requirement to be fully documented and discussed in the Draft LCPA. If not one of two things will eventually happen 1) any new Coastal Park land will require very expensive purchase and demolition of buildings or public facilities to create any new Coastal Park land to meet existing and growing demand; or 2) Coastal Recreation will be hemmed-in by “low-priority” uses and thus force Coastal Recreation to decrease and become increasingly concentrated and overcrowded in its current locations; and thus will promote the eventual deterioration of our current Coastal Recreation resources. A plan that fails to fix Coastal Park deficits and then increase Coastal Parks in pace with increased population/visitor demand is a plan that can only result in degradation. How the Draft LCPA documents and addresses the land use planning of the last small portions of vacant developable Coastal land is critical for the future and future generations.

8. Citizens of South Carlsbad are concerned about the City's multiple prior flawed Ponto planning processes or 'mistakes' the City has made yet is basing the City Staff's proposed Draft LCP LUP. The concerns being the City is not openly and honestly communicating information to citizens and the public, and not allowing a reasonable and appropriate community-based planning process to address the documented Park, Coastal Recreation and unconstrained open space needs in South Carlsbad. One of these groups of citizens has created a [www.peopleforponto.com](http://www.peopleforponto.com) website to try to research and compile information and hopefully provide a better means for citizens to understand facts and then express their concerns/desires to the City of Carlsbad (City) and CA Coastal Commission (CCC). Over 2,000 emails have sent to the City and CCC regarding Coastal Land Use Planning Issues at Ponto. The San Pacifico Planned Community (i.e. San Pacifico Community Association) has also, since 2015, sent numerous emailed letters to the City and CCC noting the significant concerns about changes in Coastal planning the City is proposing for our Planned Community.

Repeatedly over 90% of surveyed citizens (results emailed prior to both the City and CCC) have expressed the vital need and desire for a Coastal Park at Ponto to serve the current and future Coastal Recreation needs for all both Ponto and South Carlsbad and for larger regional and State Coastal Recreational needs. This desire is supported by data, CA Coastal Act Policy, and also Carlsbad's Community Vision – the foundation for the City's General Plan. Ponto is the last remaining vacant Coastal area available to provide for those needs in South Carlsbad and for a regional 6-mile stretch of coastline. Citizens have expressed deep concern about the City's flawed prior Coastal planning efforts for Coastal Recreation at Ponto, including two repeated LCP Amendment "mistakes" (Ponto Beachfront Village Vision Plan in 2010 and General Plan Update in 2015) when the City twice failed to publicly disclose/discuss and then follow the Existing LCP requirements at Ponto – specifically for Planning Area F. People for Ponto had to use multiple Carlsbad Public Records Requests in 2017 to find these "mistakes". CCC Staff was helpful in both confirming the City "mistakes" and communicating back to the City. As citizens we are still unclear as to how/why these two repeated "mistakes" happened. There is citizen concern that the City is again repeating these two prior "mistakes" by not at the beginning of the Public Comment Period clearly and publicly disclosing the Planning Area F LCP requirements to citizens as part of the current LCP Amendment process, and also by not implementing the existing LCP requirement PRIOR to proposing an Amended Coastal Land Use Plan for Ponto. The City in its proposed LCP Amendment process is putting-the-cart-before-the-horse with respect to honest and open consideration, documentation and public discussion of the need for high-priority Coastal Recreation land use required of Planning Area F at Ponto. The City is also not clearly letting all Carlsbad citizens know about the Existing LCP requirements for Ponto's Planning Area F so they can be informed to reasonably participate in public review and comment regarding amending that LCP requirement, and the need for Coastal Recreation land uses in South Carlsbad. Since 2017 there has been repeated citizen requests to the City (copies were provided to the CCC) to fix these multiple fundamental/foundational flaws by in the City's prior Coastal Recreation and Public Parks and Open Space at planning, and the currently Proposed Draft LCP Land Use Plan Amendment. Since 2017 there have also been repeated citizen requests to the City to provide a truly open, honest, inclusive community-based planning process and workshops with the accurate and honest information, prior to forming a proposed Draft LCP Land Use Plan Amendment. As citizens we believe we can constructively work with the City and CCC towards a consensus or viable options on these important Coastal Recreation issues if the City allows and encourages such an open, honest and inclusive process. We request the City respond to the requests submitted to the City since 2017, and again request such a process from the City before any LCP Amendment is first considered by the Planning Commission and City Council. Such a requested process benefits all.

9. Why the Draft LCPA Land Use Plan for Ponto should provide for the current and future Coastal Park and Recreation needs for South Carlsbad, the San Diego Region and California.
  - a. Ponto, is one of last remaining vacant and undeveloped Coastal lands in North County
  - b. Ponto is the last remaining undeveloped Coastal land in South Carlsbad
  - c. Ponto has the last unplanned Planning Area of the Existing Poinsettia Shores Planned Community & Local Coastal Program that can be planned for high-priority Coastal Recreation land use. This Existing LCP requires Planning Area F be considered for a “Public Park”.
  - d. Following is a map of the Ponto area in South Carlsbad:

Following is the LCP Land Use map from the Existing Poinsettia Shores Master Plan & Local Coastal Program adopted in 1996. This is the Land Use map that the City is proposing to change in the proposed LCP Amendment to the Land Use Plan. As the Existing LCP Land Use map shows most all the land is ‘low-priority’ residential use at an RM Residential medium density, a small portion is ‘high-priority’ Visitor Serving TC/C Tourist Commercial. Most all the Open Space is constrained and undevelopable land (the steep CSS habitat bluffs above Batiquitos Lagoon) or water

(the lagoon water). This land/water is owned by the State of California, like the inner lagoon east of I-5. Only Planning Area M at 2.3 acres is unconstrained Open Space and it provides a small private internal recreation facility for the approximately 450 homes and 1,000 people in the Planned Community. This small recreation area is a City requirement for ‘planned developments’ to off-set loss open space from planned development impacts on housing quality. Planned developments can propose designs that reduce normal setback and open space areas – they bunch together buildings to increase development – such as the smaller lot sizes, and extensive use of “zero-setbacks” to reduce typical lot sizes that occurs at Poinsettia Shores. A private recreation facility in any of the City’s planned developments is never considered a replacement for required City Parks. Planned Developments, like unplanned developments, are required to dedicate Park land to the City, or pay a Park In-Lieu fee to the City so the City provide the developer’s obligation to provide City Park acreage to address the population increase of their proposed planned development. For Poinsettia Shores’ population the City’s minimum City Park Standard would require developers set aside 3 acres of City Park land for local park needs. For the larger Ponto area population about 6.6 acres of City Park Land is required. The Existing LCP reserves Planning Area F as an unplanned “Non-residential Reserve” Land Use until the Public Park needs for Ponto are considered and documented. Only then can the NRR land use be changed.

10. Developers have overbuilt in the Ponto area of the Coastal Zone. The City of Carlsbad has under questionable circumstances is currently choosing to ‘exempted’ Ponto developers from providing the minimum amount of unconstrained Open Space according to the City’s developer required Open Space Public Facilities Standard. The legality of these confusing circumstances is subject to a lawsuit against the City. However the City’s computerize mapping system has documented that the Ponto area of the Coastal Zone is missing about 30-acres of Unconstrained Open Space that can be used to fulfill the City’s Open Space Performance Standard that states that 15% of unconstrained and developable land must be preserved by developers as Open Space. Following is a

summary of data from the City data regarding the missing Open Space at Ponto (Local Facility Management Plan Zone 9, LFMP Zone 9) in the Coastal Zone pursuant to the City's Open Space Performance Standard. If it is desirable People for Ponto can provide the City GIS map and parcel-by-parcel data base on which the following summary is based:

City of Carlsbad GIS data calculations of Open Space at Ponto area of Coastal Zone:

472 Acres = Total land in LFMP Zone 9 [Ponto area] per City of Carlsbad GIS data

(197 Acres) = Constrained land/water/infrastructure that is excluded from the City's Open Space Standard

275 Acres = Unconstrained land in LFMP Zone 9 (Ponto) subject to the City's Open Space Standard

X 15% = Minimum unconstrained Open Space requirement per the City Open Space Standard

41 Acres = Minimum unconstrained Open Space required in LFMP Zone 9

(11 Acres) = Actual unconstrained Open Space provided & mapped by City in LFMP Zone 9

**30 Acres = Missing unconstrained Open Space needed in LFMP Zone 9 [Ponto area of Coastal Zone] to meet the City's minimum GMP Open Space Standard. 73% of the required Open Space Standard is missing.**

Thus the Ponto area of the Coastal Zone appears overdeveloped with 30 additional acres of "low-priority" residential land uses due to developers' non-compliance to the City's Open Space Public Facility Performance Standard's Minimum developer required Open Space requirement. As noted a citizens group has a pending lawsuit with the City over the City's current 'exempting' Ponto and future developers from meeting the Open Space Standard.

11. The prior pre-1996 LCP for Ponto – the Batiqitos Lagoon Educational Park Master Plan & LCP (BLEP MP/LCP) had significant Open Space and recreational areas. These significant Open Space and Recreational areas were removed with BLEP MP/LCP's replacement in 1996 by the currently existing Poinsettia Shores Master & LCP (PSMP/LCP) and its City Zoning and LCP LUP requirements that reserved Planning Area F with the current "Non-residential Reserve" Land Use designation. Since the BLEP MP/LCP it appears developers and the City of Carlsbad have worked to remove "High-Priority" Coastal land uses (i.e. Coastal Recreation and Park uses) out of the Ponto area and replaced them with more "low-priority" residential and general commercial land uses. For example:
  - a. Planning Area F used to be designated "Visitor Serving Commercial" as part of the original 1980's BLEP MP/LCP for Ponto.
  - b. In 1996 the BLEP MP LCP was changed by developer application to the now current PSMP LCP, and the LCP LUP designation changed from "Visitor Serving Commercial" to "Non-Residential Reserve" with the requirement to study and document the need for "High-Priority" Coastal Recreation (i.e. Public Park) and/or Low-cost visitor accommodations prior to any change to Planning Area F's "Non-residential Reserve" LCP land use.
  - c. In 2005 the City started to try to change Planning Area F to low-priority residential and general commercial land use in the City's Ponto Beachfront Village Vision Plan (PBVVP). At this time the City made its first documented Coastal 'planning mistake' by not disclosing to the public the existence of Planning Area F's LCP requirements and then also not following those LCP requirements. The City's planning process seemed focused on addressing developer's land use desires, and increasing land use intensity to boost "Tax-increment financing" as the City had established a Redevelopment Project Area at Ponto. A short time after the State of CA dissolved Redevelopment Agencies due in part to such abuses by cities. The CCC formally rejected the PBVVP in 2010, citing the City's failure to follow the LCP requirements for Planning Area F.
  - d. Five years later in 2015 the City again adopted a proposed General Plan Update to again change Planning Area F to low-priority residential and general commercial land use. The General Plan Update cited the City's PBVVP that was in fact rejected by the CCC only a few years before. The City again repeated their PBVVP's

Coastal land use ‘planning mistake’ by again not disclosing to the public the existence of Planning Area F’s LCP requirements and then not following those LCP requirements. It is unclear why the City did this only 5-years after the CCC specifically rejected the Ponto Beachfront Village Vision Plan for those same reasons.

- e. In 2017 citizens found and then confirmed these Ponto Coastal ‘planning mistakes’ by the City through multiple official Carlsbad Public Records Requests and CCC Staff confirmation. The CCC readily identified the mistakes, but the City’s 2019 proposed Draft LCP Land Use Plan and planning process still has yet fully disclose these prior Coastal ‘planning mistakes’ to ALL citizens of Carlsbad - the failure to disclose and follow the Planning Area F LCP LUP and City Zoning requirements. Full City disclosure is needed now to try to correct many years of City misrepresentation to citizens on LCP required Coastal land Use planning at Ponto. It is needed now so the public is aware at the start of the Public Comment Period. In 2017 citizens began asking the City fix the City’s over 12-years of misinformation and planning mistakes by ‘restarting’ Coastal land use planning at Ponto with an open and honest community-based Coastal planning process. These citizens’ requests have been rejected.
- f. In 2019 the City Staff proposed citywide Draft LCP land Use Plan Amendment that again proposed to change Planning Area F to “low-priority” residential and general commercial land use, without first disclosing the Planning Area F LCP requirements with corresponding analysis of the Need for Coastal Recreation (i.e. Public Park) and/or low-cost visitor accommodations at Planning Area F and providing that Documented analysis for public review/Consideration/comment. This seems like another 3<sup>rd</sup> repeat of the prior two Coastal planning mistakes by the City. In 2019, again citizens asked for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again the City rejected citizens’ requests.
- g. In 2020 thousands of public requests again asked, and are currently asking, for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again these requests are being rejected. Based on the significant citizen concern and the documented prior ‘planning mistakes’ at Ponto it appears reasonable and responsible for Ponto’s Planning Area F to either:
  - i. Retain its current Existing LCP LUP land Use of “Non-Residential Reserve” until such time as the City’s past Ponto Beachfront Village Vision Plan and General Plan Update planning mistakes and other issues subject to current planning lawsuits against the City are resolved with a true, honest and open community-based Coastal planning process asked for by citizens since 2017. Or
  - ii. Propose in the Draft LCP Land Use Plan Amendment to re-designated Planning Area F back to a Visitor Serving Commercial and Open Space (“i.e. Public Park”) to provide both “High-Priority” coastal uses v. low-priority residential/general commercial uses due to the documented Coastal Recreation and Low-cost visitor accommodation needs for both citizens and visitors at Ponto and South Carlsbad.

12. Questionable logic and inconsistency in proposed Draft land use map and policies: Chapter 2 Figure 2-2B & C on pages 2-19 & 20 proposes to Amend the existing LCP Land Use Plan Map, and policies LCP-2-P.19 and 20 on pages 2-27 to 2-29 propose Amendments to existing LCP policy and create a new added layer of policy referencing a Ponto/Southern Waterfront. The proposed Land Use Map and Policies serve to firmly plan for “low-priority” residential and general commercial land uses at Ponto with a clear regulatory Land Use Plan Map showing these land uses and by specific regulatory policy (LCP-2-20) that clearly requires (by using the words “shall”) these “low priority” uses. In contrast the “High-Priority” Coastal Recreation and Coastal Park land uses that would be designated as Open Space are not mapped at all in Figure 2-2B & C; and the proposed policy LCP-2-P.19 is both misleading and specifically does Not Require any “High-Priority” Coastal Recreation and Coastal Park land Use at Ponto and South Carlsbad. In fact page 2-22 specifically indicates two “may” criteria that would first need to occur

in the positive before any potential Coastal Recreation and Coastal Park Land could then theoretically even be possible. It is highly probable that it is already known by the City that the proposed relocation of Carlsbad Boulevard (Coast Highway) is not very feasible and not cost effective, and will not yield (due to environmental habitat constraints, narrowness of the roadway median, and other design constraints) any significant dimensions of land that could potentially be designated Open Space and realistically be used as a Park.

The blank outline map (Figure 2-2B & C) provides no mapped Open Space Land Use designation, other than for the currently existing State Campgrounds' low-cost visitor accommodations, so the proposed Land Use Plan Map is Not providing/mapping any new Open Space land use to address Coastal Recreation and Coastal Park needs. The Draft LCP Land Use Plan Amendment's proposed/projected/planned Sea Level Rise and associated coastal erosion appears to indicate that this "High-Priority" low-cost visitor accommodation (Campground) land use designated as Open Space will be reduced in the 'Buildout' condition due to coastal erosion. **So the Draft LCP Land Use Plan is actually planning for a Reduction in Open Space Land Use in South Carlsbad and Ponto.** Both the blank outline map and the proposed Land Use Map Figure 2-1 DO NOT clearly map and designate both South Carlsbad's Draft LCP Planned Loss of the Open Space Land Use and also any New or replacement unconstrained land as Open Space land use for Coastal Recreation and Coastal Park. This is an internal inconsistency in Land Use Mapping that should be corrected in two ways:

- 1) Showing on all the Land Use (Figure 2-1), Special Planning Area (Figure 2-2B & C), and other Draft LCP Maps the Draft LCP's planned loss of land area in those maps due to the Draft LCP's planned loss of land due to Sea Level Rise and Coastal Land Erosion. This is required to show how land use boundaries and Coastal Recourses are planned to change over time. or
- 2) Provide detailed Land Use Constraint Maps for the current Carlsbad Boulevard right-of-way that the City "may" or 'may not' choose (per the proposed "may" LCP-2-P.19 policy) use to explore to address the City's (Park Master Plan) documented Coastal Recreation and Coastal Park land use shortages in Coastal South Carlsbad and Ponto. Clearly showing the potential residual Unconstrained Land within a Carlsbad Boulevard relocation that have any potential possibility to add new Open Space Land Use Designations (for Coastal Recreation) is needed now to judge if the policy is even rational, or is it just a Trojan horse.

The proposed internal inconsistency in mapping and policy appears like a plan/policy 'shell game'. The proposed Land Use Plan Maps and Policies should be consistent and equality committed (mapped-shall v. unmapped-may) to a feasible and actual Plan. If not then there is No real Plan.

There is no Regulatory Policy requirement in LCP-2-P.19 to even require the City to work on the two "may" criteria. The City could choose to bury the entire Carlsbad Boulevard relocation concept and be totally consistent with Policy LCP-2-P.19 and the LCP. As such the language on 2-22, Figure 2-2C (and the proposed Land Use Map), and policy LCP-2-P.19 and 20 appear conspire to create a shell game or bait-and-switch game in that only "low-priority" residential and general commercial uses are guaranteed (by "shall" policy) winners, and "high-priority" Coastal Recreation and Coastal Park Land Uses are at best a non-committal 'long-shot' ("may" policy) that the city is specifically not providing a way to ever define, or commit to implement. The proposed Draft LCP Land Use Plan Coastal Recreation and Coastal Park statements for Ponto are just words on paper that are designed to have no force, no commitment, no defined outcome, and no defined requirement to even have an outcome regarding the documented "High-Priority" Coastal Recreation and Coastal Park needs at Ponto, Coastal South Carlsbad and the regional 6-mile Coastal Park gap centered around Ponto.

Policy LCP-2-P.19 falsely says it “promotes development of recreational use” but does not in fact do that. How is development of ‘recreational use promoted’ when the Use is both unmapped and no regulatory policy requirement and commitment (no “shall” statement) to ‘promote’ that Use is provided? Policy LCP-2-19.19 appears a misleading sham that does not ‘promote’ or require in any way “High-Priority” Coastal Recreation and Park Land Use at Ponto. There should be open and honest public workshops before the Draft LCP Amendment goes to its first public hearing to clearly define the major environmental constraints and cost estimates involving possible relocation of Carlsbad Boulevard and constructing needed beach access parking, and sufficient and safe sidewalks and bike paths along Carlsbad Boulevard; and then map the amount and dimensions of potential ‘excess land’ that maybe available for possible designation as Open Space in the City General Plan and Local Coastal Program. The City should not repeat the mistakes at the Carlsbad Municipal Golf Course (resulting in the most expensive to construct maniple course in the USA) by not defining and vetting the concept first. A preliminary review of City GIS data appears the amount, dimensions and locations of any potential ‘excess’ land maybe modest at best. However before the City proposes a ‘Buildout’ Coastal Land Use Plan this critical information should be clearly provided and considered. It is likely the City’s Carlsbad Boulevard relocation concept is unfeasible, inefficient, too costly, and yields too little actual useable ‘excess land’ to ever approach the Coastal Recreation and Coastal Park needs for South Carlsbad. This may already be known by the City, but it surely should be publicly disclosed and discussed in the DLPCA.

The proposed Coastal Land Use Plan to address Carlsbad’s, San Diego County’s and California’s High-Priority Coastal Recreation Land Use and Coastal Park needs should NOT be vague “may” policy that appears to be purposely designed/worded to not commit to actually providing any “High-Priority” Coastal Recreation and Coastal Park land uses on the map or in policy commitments. The Land Use Plan and Policy for High-Priority Coastal Recreation and Coastal Park Land Use should be definitive with triggered “shall” policy statements requiring and assuring that the ‘Forever’ “High-Priority” Coastal Recreation and Coastal Park needs are properly and timely addressed in the City’s proposed ‘Buildout’ Coastal Land Use Plan. This “shall” policy commitment should be clearly and consistently mapped to show the basic feasibility of the planned outcomes and the resulting actual Land that could feasibly implement the planned outcome.

Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard: Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard are Coastal Access and Completes Streets issues. South Carlsbad Boulevard now and has for decades been a highly used Incomplete Street that is out of compliance with the City’s minimum Street Standards for pedestrian and bike access and safety. The Coastal Access portion of the Draft Land Use Plan should strongly address the Complete Street requirements for South Carlsbad Boulevard. Those policy commitments should be reference in Policy LCP-2-P.19 and 20 as Carlsbad Boulevard in **South Carlsbad is the most Complete Street deficient portion of Carlsbad Boulevard**. Forever Coastal Access parking demand and the proposed LCP Amendment’s Land Use Plan to supply parking for those demands should also be addressed as part of the Coastal Access and Complete Streets issues for South Carlsbad Boulevard. If much needed Coastal Access Parking is provided on South Carlsbad Boulevard as part of a “maybe” implemented realignment, most of the “maybe” realignment land left after constraints are accommodated for and buffered will likely be consumed with these parking spaces and parking drive aisles/buffer area needed to separate high-speed vehicular traffic from parking, a buffered bike path, and a sufficiently wide pedestrian sidewalk or Coastal Path. After accommodating these much needed Complete Street facilitates there will likely be little if any sufficiently dimensioned land available for a Coastal Recreation and a Coastal Park. The needed Coastal Access and Complete Street facilities on South Carlsbad Boulevard are very much needed, but they are NOT a Coastal Park.

As mentioned the proposed Draft Coastal Land Use Plan's Maps and Policies are very specific in providing for the City's proposed LCP Land Use changes to 'low-priority' Residential and General Commercial' on Planning Area F (proposed to be renamed to Area 1 and 2). It is curious as to why the proposed Draft LCP Land Use Plan Amendment has no Land Use Map and minor vague unaccountable Land Use Policy concerning 'High-priority Coastal Recreation Land Use' at Ponto, while the very same time proposing very clear Land Use Mapping and detailed unambiguous "shall" land use policy requirements for 'low-priority' Residential and General Commercial land use at Ponto. Why is the City Not committing and requiring (in a Land Use Map and Land Use Policy) to much needed 'High-priority' Coastal Recreation and Coastal Park Land Use' needs at Ponto the same detail and commitment as the City is providing for "low-priority" uses? This is backwards and inappropriate. It is all the more inappropriate given the 'Buildout' Coastal Land Use Plan the City is proposing at Ponto. These issues and plan/policy commitments and non-commitments will be 'forever' and should be fully and publicly evaluated as previously requested, or the Existing LCP Land Use Plan of "Non-residential Reserve" for Planning Area F should remain unchanged and until the forever-buildout Coastal Recreation and Coastal Park issues can be clearly, honestly and properly considered and accountably planned for. This is vitally important and seems to speak to the very heart of the CA Coastal Act, its founding and enduring principles, and its policies to maximize Coastal Recreation. People for Ponto and we believe many others, when they are aware of the issues, think the City and CA Coastal Commission should be taking a long-term perspective and be more careful, thorough, thoughtful, inclusive, and in the considerations of the City's proposal/request to permanently convert the last vacant unplanned (Non-residential Reserve) Coastal land at Ponto to "low-priority" land uses and forever eliminate any Coastal Recreation and Coastal Park opportunities.

13. Public Coastal View protection: Avenida Encinas is the only inland public access road and pedestrian sidewalk to access the Coast at Ponto for one mile in each direction north and south. It is also hosts the regional Coastal Rail Trail in 3' wide bike lanes. There exist now phenomenal coastal ocean views for the public along Avenida Encinas from the rail corridor bridge to Carlsbad Boulevard. It is assumed these existing expansive public views to the ocean will be mostly eliminated with any building development seaward or the Rail corridor. This is understandable, but an accountable ('shall') Land Use Plan/Policy addition to proposed Policy LCP-2-P.20 should be provided for a reasonable Public Coastal View corridor along both sides of Avenida Encinas and at the intersection with Carlsbad Boulevard. Public Coastal view analysis, building height-setback standards along Avenida Encinas, and building placement and site design and landscaping criteria in policy LCP-2-P.20 could also considered to reasonably provide for some residual public coastal view preservation.
  
14. Illogical landscape setback reductions proposed along Carlsbad Boulevard, and Undefined landscape setback along the Lagoon Bluff Top and rail corridor in Policy LCP-2-P.20: Logically setbacks are used in planning to provide a buffering separation of incompatible land uses/activities/habitats. The intent of the setback separation being to protect adjacent uses/activities/habitats from incompatibility, nuisance or harassment by providing a sufficient distance/area (i.e. setback) between uses/activities/habitats and for required urban design aesthetics – almost always a buffering landscaping. Policy LCP-2-P.20. A.4 and C.3 says the required 40' landscape setback along Carlsbad Boulevard "maybe reduced due to site constraints or protection of environmental resources." The ability to reduce the setback is illogical in that setbacks are intended to protect environmental resources and provide a buffer for constraints. In the Carlsbad Boulevard right-of-way there is documented sensitive environmental habitat, along with being a busy roadway. How could reducing the protective 40' setback in anyway better protect that habitat or provide a better landscaped compatibility or visual aesthesis buffer along Carlsbad Boulevard? It is illogical. If anything the minimum 40' landscaped setback should likely be expanded near "environmental resources". Regarding reducing the minimum 40' landscape setback for "site constraints" there is no definition of what a "site constraint" is or why it (whatever it may be) justifies a reduction of the minimum landscaped setback.

Is endangered species habitat, or a hazardous geologic feature, or a slope, or on-site infrastructure considered a “site constraint”? There should be some explanation of what a “site constraint” is and is not, and once defined if it warrants a landscape setback reduction to enhance the buffering purpose of a landscape setback. Or will a reduction only allow bringing the defined constraint closer to the adjacent uses/activities/habitats that the landscape setback is designed to buffer. It is good planning practice to not only be clear in the use of terms; but also, if a proposed reduction in a minimum standard is allowed, to define reasonably clear criteria for that reduction/modification and provide appropriate defined mitigation to assume the intended performance objectives of the minimum landscape setback are achieved.

Policy LCP-2-P.20.C.4 is missing a critical Bluff-Top landscape setback. It seems impossible that the DLCPA is proposing no Bluff-Top setback from the lagoon bluffs and sensitive habitat. The Batiqitos Lagoon’s adjoining steep sensitive habitat slopes directly connect along the Bluff-top. Batiqitos Lagoon’s and adjoining steep sensitive habitat is a sensitive habitat that requires significant setbacks as a buffer from development impacts. Setbacks similar to those required for the San Pacifico area inland of the rail corridor, should be provided unless updated information about habitat sensitivity or community aesthetics requires different setback requirements.

Policy LCP-2-P.20 does not include a landscape setback standard adjacent to the rail corridor. This is a significant national transportation corridor, part of the 2<sup>nd</sup> busiest rail corridor in the USA. Train travel along this corridor is planned to increase greatly in the years to come. Now there is significant noise, Diesel engine pollution, and extensive ground vibration due to train travel along the rail corridor. Long freight trains which currently run mostly at night and weekends are particularly noisy and heavy, and create significant ground vibration (underground noise). These issues are best mitigated by landscape setbacks and other buffers/barriers. A minimum setback standard for sufficient landscaping for a visual buffer and also factoring appropriate noise and ground vibration standards for a buildout situation should be used to establish an appropriate landscape setback that should be provided along the rail corridor. Carlsbad’s landscape aesthetics along the rail corridor should be factored into how wide the setback should be and how landscaping should be provided. An example for the landscape aesthetic portion of the setback standard could be landscape design dimensions of the San Pacifico community on the inland side of the rail corridor. However, noise and vibrational impacts at San Pacifico are felt much further inland and appear to justify increased setbacks for those impacts.

## Mick Calarco

**Subject:** Carlsbad DLCP-PUPA Public Comments - Flawed Coastal Public Participation and Planning Activities (2010 Ponto Vision Plan & 2015 General Plan Update) at Ponto FW: RECORDS REQUEST - PRR-2017-260 Lance Schulte

Dear Carlsbad City Council, City Clerk, Planning Commission, Parks Commission, Housing Commission, HEAC, CA Coastal Commission, and CA HCD:

The following email sting provides more specific documentation of citizens' public comments and data presented on Staff's Draft LCP-LUP Amendment in a 12/1/20 11:57am email. The body of that 12/1/20 11:57am email has important issues that should be discussed and considered by the City, CCC and CA HCD.

Part of those issues is documentation of the City's prior 'flawed' Ponto "planning activities" going back over 10-years that undermines the City's General Plan Update at Ponto. Those flaws tainted the City's prior (and current) Ponto planning activities going back to the Ponto Vision Plan and including the General Plan Update. These flaws are still being advanced in the Staff proposed DLCP-LUPA that based on that Ponto Vision Plan and General Plan Update. These City Ponto planning flaws, or planning mistakes, are also in conflict with the CA Coastal Act, and City policy, regarding the City's ethical obligations for an honest and informed Public Participation process for Coastal and City planning activities.

The attached file titled '2020 Dec 2 – Planning Area F existing LCP-LUP & CCC direction' that was included in the 12/1/20 11:57am public comments in summary documents some of the City's prior and current Ponto planning flaws. That attached file includes specific DLCP direction the CA Coastal Commission Staff provided the City in 2017 regarding the Ponto Planning Area F.

The City's Ponto planning activity and public participation flaws were first documented in official Carlsbad Public Records Request PRR-2017-260. The following email string serves as additional documentation of these flaws. PRR-2017-260 simply asked to see the City's documentation that it informed Citizens of the Ponto Planning Area F LCP Land Use Policy and Zoning Requirements "as part of any future (after 1986) planning activity"; and documentation of the City's compliance with the Ponto Planning Area F LCP Land Use Policy and Zoning Requirements. PRR-2017-260 documented the City's Ponto planning flaws.

It should be clearly acknowledge that the Ponto Planning Area F LCP Land Use Policy and Zoning Requirements apply to the land area included in the Poinsettia Shores Master Plan & LCP.

Reviewing the email string below clearly shows the City has no documents showing it ever fully publicly disclosed, discussed and complied with the Ponto Planning Area F LCP Land Use Policy and Zoning Requirements.

In 2017 once Carlsbad citizens discovered the City's Ponto planning failures to public disclose, discuss and comply with the Ponto Planning Area F LCP, we began researching both the present and future adequacy of CA Coastal Act high-priority Coastal Recreation (i.e. Public Park) and/or Low-cost Visitor accommodations at Ponto. Since 2017 the growing numbers of People for Ponto provided both data and extensive public comments on the need for high-priority Coastal Recreation (i.e. Public Park) and/or Low-cost Visitor Accommodations at Ponto Planning Area F in the Poinsettia Shores Master Plan & LCP. The two data and public comment sets directly relate to the Ponto Planning Area F LCP Land Use Policy and Zoning Requirements.

1. On 11/22/19 7:34pm & 12/21/2020 12:59pm emails to the City and CCC with the subject line: LCPA Public Comment - Low-cost Visitor Accommodations. Those Public Comment emails provide 4 critical data sets and issues that show Carlsbad's proposed Draft LCP-LUPA preforms relatively poorly in planning for this high-priority Coastal land use.
2. On 1/29/20 1:56pm & 12/22/2020 12:24pm emails to the City and CCC with the subject line: LCPA Public Comment - Coastal Recreation at Ponto - from People for Ponto. Those Public Comment emails provide 14 critical Coastal Recreation (i.e. Public park) data sets and issues that also shows Carlsbad's proposed Draft LCP-LUPA preforms relatively poorly in planning and providing for Parks at Ponto and Coastal South Carlsbad. People for Ponto conducted additional analysis of City Park data, and that research further highlights the relatively poor amount of City Park and Coastal Recreation planned by Carlsbad's Staff proposed Draft LCP-LUPA. That additional analysis was provided to the City and CCC in a 1/11/20 8:34am email.

These two sets of data and public comments and issues should be fully publicly considered and publicly discussed as part of Carlsbad Staff proposed Draft Local Coastal Program – Land Use Plan Amendment and Zoning Change process.

Thank you. We hope you do the right thing.

Sincerely,  
Lance Schulte for People for Ponto

**Subject:** RE: RECORDS REQUEST - PRR-2017-260 Lance Schulte

Good Afternoon Mr. Schulte,

Your follow up request for information includes questions which requires a City employee to read and provide answers to "yes/no" and narrative style questions.

Your request for information is authorized pursuant to the California Public Records Act ("CPRA") ("California Government Code §6250 – 6270). The responding entity is required to provide access to disclosable public records. **"Public records" includes any writing containing information relating to the conduct of the public's business prepared, owned, used, or retained by any state or local agency regardless of physical form or characteristics (§6252(e)).**

Therefore, the City has produced those records that are currently in existence. **The CPRA does not require an entity to either create a record that does not exist or to answer questions (form or interrogatory). In reviewing your email you**

are asking the City to answer questions about information not found in the documents of existence provided. The City is unable to assist you in this manner.

Should you have any questions, please do not hesitate to contact the Planning Department for assistance at 760-602-4610.

Thank you,  
Faviola

Faviola Medina  
Deputy City Clerk  
City of Carlsbad  
1200 Carlsbad Village Drive

**Sent:** Thursday, August 17, 2017 1:59 PM  
**To:** Faviola Medina <[Faviola.Medina@carlsbadca.gov](mailto:Faviola.Medina@carlsbadca.gov)>  
**Subject:** RE: RECORDS REQUEST - PRR-2017-260 Lance Schulte  
**Importance:** High

Faviola:

Thank you. The files are extremely large and **cover issues outside the public records request. That request was:**

Both Ponto Beachfront Village Vision Plan and General Plan [2015 update] analysis, consideration and documentation that implements the City of Carlsbad and California Coastal Commission legislation as part of the Poinsettia Shores Master Plan & Local Coastal Program for Subarea F that requires: **“As part of any future planning effort, the city and developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e., public park) on the west side of the railroad.”**

Consequently it took some time to scan the 10 files. In that scan I noticed two issues relative to the public records request I would like to get confirmation on.

1. **No information, files or documents were provided regarding the Ponto Beachfront Village Vision Plan’s analysis, consideration and documentation of the Poinsettia Shores Master Plan & Local Coastal Program for Subarea F requirement noted above.** I assume that since no information, files, or documents were provided by the City then there was no analysis, consideration, or documentation done for the Ponto Beachfront Village Vision Plan that related to the Poinsettia Shores Master Plan & Local Coastal Program requirement for Subarea F? Can you please confirm?
2. **The files provided in response to the public records request are, as you mentioned, extremely large. They all relate to the General Plan (2015) update. Is there page numbers within the files that specifically relate to the questions asked in the public records request? I did not find any analysis, consideration, and documentation that related to the public records request.** If there are no specific reference pages for the files provided, can I assume there is no files showing the that during the General Plan (2015) update there is no analysis consideration, documentation showing “As part of any future planning effort, the city and developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e., public park) on the west side of the railroad.”?

Thanks. As mentioned I am just trying to understand, and be provided documentation that shows that “As part of any future planning effort, the city and developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e., public park) on the west side of the railroad.”

Thanks again,  
Lance

Comparison of Ponto Planning Area F’s existing v. Carlsbad proposed LCP LUP not fully correct. The table is from City of Carlsbad. The last paragraph of the Existing LCP notes “prior to any planning activity”. This was newer done as documented by official Carlsbad Public Records Requests 2017-260, 2017-262, R000930-072419, R001280-021720, and R001281-02170, so the City’s “General Plan update” (of just the land use map) was done in violation of the Existing LCP LUP Policy – one of the City’s Ponto planning mistakes. As noted in 1-5 below, the CCC has noted these mistakes dating back to 2010 with the “Ponto Beachfront Village Vision Plan” and 2015 General Plan map, and is seeking to correct them in the 2016 and 2017 communications to the City. Also the City’s own documents verify these facts.

HOW THE EXISTING CITY OF CARLSBAD LOCAL COASTAL PROGRAM (LCP) POLICIES ARE ADDRESSED IN THE DRAFT LOCAL COASTAL PROGRAM UPDATE

Row	EXISTING LCP POLICIES	HOW DRAFT LCP ADDRESSES EXISTING LCP POLICIES
	<b>WEST BATIQUITOS LAGOON/SAMMIS PROPERTIES SEGMENT</b>	
282	<p>10. Planning Area F</p> <p>Planning Area F is located at the far northwest corner of the Master Plan area west of the AT&amp;SF Railway right-of-way. This Planning Area has a gross area of 11 acres and a net developable area of 10.7 acres.</p> <p>Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an “unplanned” area, for which land uses will be determined at a later date when more specific planning is carried out for areas west of the railroad right-of-way. A future Major Master Plan Amendment will be required prior to further development approvals for Planning Area F, and shall include an LCP Amendment with associated environmental review, if determined necessary.</p> <p>The intent of the NRR designation is not to limit the range of potential future uses entirely to non-residential, however, since the City’s current general plan does not contain an “unplanned” designation, NRR was determined to be appropriate at this time. In the future, if the Local Coastal Program Amendment has not been processed, and the City develops an “unplanned” General Plan designation, then this site would likely be redesignated as “unplanned.” Future uses could include, but are not limited to: commercial, residential, office, and other uses, subject to future review and approval.</p> <p>As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.</p>	<p>As part of the General Plan update, the Coastal Commission approved residential and general commercial land use designations on the LCP land use map.</p> <p>This policy is updated to be consistent with the land use map designations and the Ponto Beachfront Village Vision Plan. See draft LCP policy LCP-2-P.20.A and B.</p> <p>Regarding the need for lower cost visitor accommodations or recreational facilities west of the railroad, analysis and documentation will be provided in the staff report to the Planning Commission.</p>

CCC direction on why Draft LCP description is not accurate:

During the Jan 28, 2020 City Council Meeting (item #14), Carlsbad City staff for the first time as a side-bar comment admitted the City made some ‘Ponto planning errors’ going back over 15 years. Those City planning errors were first called out when the CA Coastal Commission (CCC) denied Carlsbad’s Ponto Beachfront Village Vision Plan (the referenced foundation for Carlsbad’s 2015 General Plan Update) in 2010 in part due to the City’s mistake. Following are 4 documents that conflict with the above City interpretation of how the Draft LCP addresses Existing LCP Polies.

- 1) The CCC in denying in 2010 the Ponto Vision Plan (the foundation for Carlsbad’s 2015 General Plan Update at Ponto) specifically said with direct reference to Ponto Planning Area F:

“Currently, this area [*Planning Area F*] has an Unplanned Area land use designation. In order to facilitate **any type of development in this portion of the Ponto area, an LCP amendment modifying the land use will have to be brought forward to the Commission for review and approval.**”

**“... the Commission would reject such proposed uses because there has been no evidence presented that would support the elimination of these [Planning Area F] areas for some lower cost overnight accommodations or public recreational amenities in the future.** The Commission's past action of the **Poinsettia Shores Master Plan specifically called for such an assessment, and none has been submitted to date.** The concerns related to the lack of lower cost overnight accommodations in Area F (ref. Exhibit #7) are further discussed in the findings later.”

“City is inadvertently sending a message to potential developers that 1) the identified development (townhouses) is the primary type of use the City will support, or 2) that development type is consistent with the current land use and zoning designations. Neither of those assumptions is correct. As the previously certified **Poinsettia Shores Master Plan states, any type of development at this location would first require an LCP amendment to establish the land use and zoning, which would have to be certified by both the City and the Coastal Commission. Additionally, the Master Plan further states that some component of the development at this location must consider the need for the provision of lower cost accommodations or recreational facilities.**”

**“While residential use is one of the land uses listed for this area in the Poinsettia Shores Specific Plan, it may not be the most appropriate designation. As previously stated, the project will at least need to consider the incorporation of some kind of lower cost accommodations, and any proposed zoning designation for the site will have to be found consistent with the policies contained in the Poinsettia Shores Master Plan. Furthermore, the standard of review for any change to the current land use designation is the Coastal Act, and thus will also have to be found consistent with all its applicable policies.**

**Recently, the Commission has become concerned with the lack of lower-cost accommodations statewide. Thus, the establishment of a residential land use at this location may not be what is ultimately determined to be certified as consistent with the Poinsettia Shores Master Plan, or the Coastal Act.**”

**“B. High-Priority Uses - Lower Cost Visitor Accommodations in ‘Area F’: The Coastal Act has numerous policies promoting public access to the beach and state:**

Section 30210 - In carrying out the requirement of Section 4 of Article X of the California Constitution, maximum access, which shall be conspicuously posted, and **recreational opportunities shall be provided for all the people** consistent with public safety needs and the need to protect public rights, rights of private property owners, and natural resource areas from overuse.

Section 30213 - Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. **Developments providing public recreational opportunities are preferred.** The commission shall not: (1) require that overnight room rentals be fixed at an amount certain for any privately owned and operated hotel, motel, or other similar visitor-serving facility located on either public or private lands; or (2) establish or approve any method for the identification of low or moderate income persons for the purpose of determining eligibility for overnight room rentals in any such facilities.

Section 30221 **Oceanfront land suitable for recreational use shall be protected for recreational use and development unless present and foreseeable future demand for public or commercial recreational activities that could be accommodated on the property is already adequately provided for in the area.**

Section 30222 - **The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development, but not over agriculture or coastal-dependent industry.**"

"... in 1996, the Poinsettia Shores Master Plan was certified as part of the City's LCP, and replaced the [Visitor serving] land use designation as an "Unplanned Area." **In an attempt to maintain a lower-cost visitor-serving component at this location, the Commission, through a suggested modification, required language within the Master Plan that would serve to protect this type of use.** The language in the Poinsettia Shores Master Plan, for this location, "Area F," included: **As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost accommodations or recreational facilities (i.e. public park) on the west side of the railroad.**"

**"The Ponto Beachfront area is an area that could be considered as a high-priority location for lower cost overnight accommodations.** While located across the street from a State Park (South Carlsbad State Park) containing camping facilities, **during peak summer months, the campground is consistently at capacity. ... If at any time in the future, this State Beach campground is converted to day use sites, the market and the need for low cost overnight accommodations will be significantly amplified. Thus the Vision Plan, as proposed by the City, cannot be found consistent with the Coastal Act.**"

"H. Conclusions: ... **concerns regarding the determination of preferred land uses in an 'unplanned' area, the lack of provision of lower-cost accommodations and recreational uses, ... remain. All of these oversights could result in impacts to public access and recreation and other coastal resources and, therefore, the Vision Plan, as submitted, is therefore inconsistent with the Coastal Act, and therefore, shall be denied as submitted.**"

- 2) Following is from a 7/3/17 CCC letter to City Staff on the City's proposed land use changes at Planning Area F. City Staff for the 1<sup>st</sup> time provided this to City Council on 1/28/20:

**"The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto/Southern Waterfront area. For example, Planning Area F requires the city and developer to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.** This is an issue that the San Pacifico HOA community group is raising in regards to the Shopoff/Ponto development proposal, and this study should be undertaken as a part of the visitor serving use inventory analysis described above. **If this analysis determines that there is a deficit of low cost**

**visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed.”**

- 3) In 2017 after citizens received the City’s reply to Public Records Request 2017-260, citizens meet with CCC staff to reconfirm the City failed since before 2010 to publicly disclose and comply with Planning Area F’s LCP requirements. CCC Staff acknowledged the City has not yet complied with the LCP and in an 8/16/2017 email said:

“The City is currently undertaking a comprehensive update to their LCP funded in part through a CCC grant. As a part of this process the City will be consolidating all previous LCP segments into a single, unified LCP. **The City has received direction from both the Commission (May 2016 CCC hearing) and Commission staff, that as a part of this update the City shall undertake an inventory of visitor serving uses currently provided within the City’s Coastal Zone which will then serve to inform updates to the City’s land use and zoning maps as necessary. This inventory could have future implications for the appropriate land use and zoning associated with the Ponto area.”**

- 4) In 2016, the CCC told City that Carlsbad’s proposed 2015 General Plan land use map could change based on the outcomes of both a Citywide Coastal Recreation needs Study, and also the specific Planning Area F LCP requirement to study Park needs at Ponto.
- 5) Currently and since 2016 the City acknowledged that the existing LCP, City and LCP Master Plan Zoning of “Non-Residential Reserve” land use needs to be changed by BOTH the City and CA Coastal Commission to only then allow any proposed development on Ponto Planning Area F. Also, since 1996 the Local Facilities Management Plan for Zone 9 (Ponto) has the planned land use and zoning of Ponto Planning Area F as “Non-Residential Reserve” that has no land use. The LFMP-Zone 9 must be amended to account for any City and CA Coastal Commission change from “Non-Residential Reserve” and address the land use impacts on all the Growth Management Program Facility Standards in Zone9 such as the current Park deficit, and also the recently discovered false exemption of the Open Space Standard in Zone 9. The false exemption being that Zone 9 was not developed in 1986 nor have the land use changes since 1986 complied with the 15% ‘unconstrained’ Open Space Standard.

The City currently and since 2016 acknowledges the existing LCP, City and LCP Master Plan Zoning of “Non-Residential Reserve” land use of Ponto Planning Area F needs to be changed by BOTH the City and CA Coastal Commission as evidenced on page 14-15 of City’s Planning Pending Applications as of November 2020 at <https://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=46332> as it shows:

“PONTO BEACHFRONT 12/20/2016

<u>Legislative application</u>	<u>applied on</u>	<u>description</u>
AMEND2017-0001	1/19/17	LFMP AMENDMENT FOR ZONE 9
LCPA2016-0002	12/20/16	USES PROPOSED FOR PLANNING AREA F
MP2016-0001	12/20/16	USES PROPOSED FOR PLANNING AREA F

– Carlsbad City Planner = Goff”

The City is apparently failing to fully disclose to Citizens these facts and the City’s prior “Ponto Planning Area F planning mistakes dating back over 10-years when the land was purchased by speculative investors.

**Subject:** FW: DRAFT: Ponto Area Update  
**Attachments:** CC SR - Carlsbad Parks Update 7.24.18 - Final pdf.pdf; 19. Lancaster. Parks Update - 7.24.18.pdf

---

**From:** Mike Pacheco <[Mike.Pacheco@carlsbadca.gov](mailto:Mike.Pacheco@carlsbadca.gov)>  
**Sent:** Monday, January 11, 2021 2:05 PM  
**To:** Mike Pacheco <[Mike.Pacheco@carlsbadca.gov](mailto:Mike.Pacheco@carlsbadca.gov)>  
**Subject:** DRAFT: Ponto Area Update

Dear Commissioners:

The Community Development Department (which includes the Planning Division) is heading up a comprehensive presentation to the City Council on the Ponto Area, tentatively scheduled for the City Council Meeting of Jan. 26, 2021. The City Manager's Office determined this item should be heard by the City Council once the District 4 vacancy was filled, and Council Member Acosta had an opportunity to become acclimated and briefed.

The draft staff report is currently under final review/edit, and includes discussion of not only city parks and open space standards/requirements/opportunities, but also open an overview/history of the particular property in question, city housing element requirements, private property ownership/development rights, city funding and allowable spending, potential public vote considerations, adherence to the city's Local Coastal Plan, etc. I contributed significantly to the drafting of the staff report, especially on the sections directly related to city parks. I will also likely be involved with the presentation or at least available to answer questions of the City Council.

From a city parks perspective, the messaging will be very consistent with the first four pages of the attached City Council Staff Report that was presented on July 24, 2018. I'm relatively certain that City Council Staff Report and/or corresponding PowerPoint from July 24, 2018, was previously forwarded to the Parks & Recreation Commission. Recognizing we currently have two new(er) Commissioners, however, I'm attaching both documents hereto for your respective review.

We will forward the link to the Jan. 26, 2021 City Council Staff Report, once it is posted on the city's website (which is typically by the Friday preceding the Tuesday meeting). We will also make mention during the Parks & Recreation Commission Meeting on Jan. 25, 2021, of Community Development Department staff's pending presentation to the City Council. The Ponto Area will not, however, be an agenized item for the Parks & Recreation Commission Meeting, so staff's mention of the update will be more of an announcement and an encouragement to review the City Council Staff Report and/or watch the City Council Meeting, for each Commissioner's edification.

Sincerely,  
Kyle

Kyle Lancaster, CPRP  
Parks & Recreation Director  
Parks & Recreation Department  
City of Carlsbad  
799 Pine Ave., Ste. 200

Carlsbad, CA 92008

**Subject** Carlsbad Parks Update

**Recommended Action**

Receive an informational report on the current and future Carlsbad Parks inventory.

**Executive Summary**

On May 8, 2018 several members of the public expressed concerns to the City Council regarding the amount of park acreage in the southwest quadrant of the city, particularly in the coastal region. These concerns were linked to a Capital Improvement Program Budget request for \$200,000 to initiate master planning of the Veterans Memorial Park site. The City Council subsequently directed staff to hold a workshop to provide an update on the current and future parks inventory.

On June 12, 2018, several members of the public again expressed concerns to the City Council regarding the amount of park acreage in the southwest quadrant of the city, particularly in the coastal region. Staff advised that the 'Parks Update' item had been agendaized for the City Council Meeting of July 24, 2018, and indicated the item would provide an overview of where the city is at, and where the city is headed, with respect to parks.

This report provides the requested information via review of the applicable sections of two significant documents - the Carlsbad Citywide Facilities and Improvements Plan, and the Carlsbad Parks & Recreation Department Needs Assessment/Master Plan. The review of the Carlsbad Citywide Facilities and Improvements Plan will illustrate that all of Carlsbad's quadrants are currently compliant with the plan's parks performance standard. It will also illustrate that scheduling Veterans Memorial Park for construction will result in the park inventory for all city quadrants exceeding the projected required acreage at buildout.

The review of the Carlsbad Parks & Recreation Needs Assessment/Master Plan will illustrate that, as a result of significant input received during public outreach efforts, the document reflects what was determined to be Carlsbad's parks and recreation values and priorities. It will also illustrate that the department has addressed, or is in the process of addressing, each of the key action items for Capital Improvement Program planning, and park, facility and amenity development.

### Discussion

On May 8, 2018, the City Council received a presentation on the introduction of the proposed FY 2018-19 Capital Improvement Program (CIP) Budget. During the comment period of that agenda item, several members of the public expressed concerns regarding the amount of park acreage in the southwest quadrant of the city, particularly in the coastal region. These concerns were linked to a CIP Budget request for \$200,000 to initiate the master planning – including public outreach efforts and conceptual design development - of the Veterans Memorial Park site. At the end of the comment period, by minute action, the City Council directed staff to hold a workshop to provide an update on the current and future parks inventory (Exhibit 1). As further communicated, staff was to provide a workshop or education on where the city is at with parks and the plan.

On June 12, 2018, the City Council received a presentation on the adoption of the proposed FY 2018-19 Operating and CIP Budgets. During the comment period of that agenda item, several members of the public again expressed concerns regarding the amount of park acreage in the southwest quadrant of the city, particularly in the coastal region. Staff advised that the 'Parks Update' item had been agendized for the City Council Meeting of July 24, 2018, and indicated the item would provide an overview of where the city is at, and where the city is headed, with respect to parks.

### Carlsbad Citywide Facilities and Improvements Plan

In 1986, Carlsbad voters approved the Carlsbad Growth Management Program, which reduced the total projected population of Carlsbad from approximately 250,000 to approximately 130,000. The program also put in place standards that must be met for new development to be approved so that as Carlsbad grows, the quality of life can be maintained. The Growth Management Program sets forth policies to ensure that adequate city facilities and city services are provided as residential development occurs. These facilities and services are specified in 11 public facility performance standards, covering items such as parks. The City Council created the performance standards through adoption of the Carlsbad Citywide Facilities and Improvements Plan (Facilities and Improvements Plan) in September 1986.

Staff annually monitors compliance with the Facilities and Improvements Plan via a Growth Management Monitoring Report. The most recent publication of this report is for FY 2016-17. If the performance standards are not met within a specific planning area (referred to as Local Facility Management Zones), no new development may be approved in that area until the standards are met, or until satisfactory arrangements have been made to guarantee the facilities and improvements.

The parks performance standard is three acres of community parks or special use areas per 1,000 population within the park district. There are four parks districts within Carlsbad, which correspond to the city's quadrants. If the service level is not met due to population increase within a given quadrant, the city is required to schedule a park for construction within five years, beginning at the time the need is identified, but beginning no sooner than August 22, 2017 (City Council Resolution No. 2017-170). The phrase "scheduled for construction" means [a] the park site has been selected and has been or is being acquired by the city, [b] the improvements for the park site have been designed, and [c] a financing plan for construction of the park has been approved by the City Council (City Council Resolution No. 97-435).

Initially, the city was required to schedule a park for construction within five years, beginning at the time the need was identified, or before the private construction of 1,562 dwelling units per quadrant. The requirement, however, was changed per the City Council's adoption of amendments to the Open Space, Conservation and Recreation Element of the Carlsbad General Plan (GPA No. 2017-0002), and the Carlsbad Citywide Facilities Improvements Plan (OAJ No. 17-0004), pursuant to a Carlsbad General Plan lawsuit Settlement Agreement dated March 14, 2017, between the City of Carlsbad and North County Advocates. This change was requested due to concerns linking the timing of scheduling the construction of a park to the construction of 1,562 dwelling units per quadrant, as the Carlsbad General Plan anticipated future residential capacity in the southwest and southeast quadrants to be less than 1,562 dwelling units. Current compliance with the parks performance standard for all four districts/quadrants is shown below.

<b>City Quadrant</b>	<b>Parks Acreage Current Parks</b>	<b>Parks Acreage Current Need</b>
NW	105.2	90.4
NE	45.3	44.5
SW	70.2	76.8
SE	114.9	117.1
<b>Total</b>	<b>335.6</b>	<b>328.8</b>

To date, the inventory of parks acreage exceeds the parks performance standard acreage needed, except for 6.6 acres in the southwest quadrant, and 2.2 acres in the southeast quadrant. These two quadrants, however, are currently compliant with the parks performance standard, as the five-year period noted above does not conclude until Aug. 21, 2022.

The scheduling of Veterans Memorial Park for construction will address the parks performance standard in all city quadrants. Pursuant to the Facilities and Improvements Plan, the 91.5 acre Veterans Memorial Park site will equally count toward satisfying the parks performance standard in all city quadrants (i.e., 22.875 acres applied to each city quadrant). Because of this community park's size and central location, it is intended to serve as a regional recreation source. The methodology of applying a quarter of the Veterans Memorial Park acreage to each city quadrant was also included within the update to the Carlsbad General Plan, approved by the City Council on Sept. 22, 2015 (City Council Resolution No. 2015-042)

Thus far, the city has [a] acquired the Veterans Memorial Park site, [b] set aside \$200,000 in the FY 2018-19 CIP Budget to initiate master planning of the park site, and [c] set aside approximately \$23,000,000 in the CIP Budget for construction of the park. Carlsbad Community Facilities District No. 1 was established in 1991, creating a special tax lien on vacant properties throughout the city. The purpose of this Community Facilities District was to finance the construction of specific public facilities of citywide obligation and benefit, including Veterans Memorial Park. The funds from the district cannot be used for facilities other than those specified at the time the district was formed. Scheduling Veterans Memorial Park for construction will result in the parks inventory for all city quadrants exceeding the projected needed acreage at buildout, as shown below.

City Quadrant	Buildout Population	Parks Acreage Projected Need	Parks Acreage Current Parks	Parks Acreage Veterans Park	Parks Acreage Projected Parks
NW	38,606	115.8	105.2	22.875	128.075
NE	22,488	67.5	45.3	22.875	68.175
SW	28,113	84.3	70.2	22.875	93.075
SE	42,315	126.9	114.9	22.875	137.775
<b>Total</b>	<b>131,523</b>	<b>394.6</b>	<b>335.6</b>	<b>91.5</b>	<b>427.1</b>

The table above does not include the following park sites, listed in the CIP as “unfunded” or “partially unfunded”: Zone 5 Business Park Recreational Facility (9.3 acres); Cannon Lake Park (6.8 acres); or Robertson Ranch Park (11.2 acres). Should alternative funding mechanisms be determined, and these parks are constructed, the additional acreage would further aid in exceeding the parks performance standard. The table above also does not include the Buena Vista Reservoir site (3.1 acres), nor the northern Terramar Area Coastal Bluff Top (2.9 acres). The Buena Vista Reservoir site is currently under design to be converted to a neighborhood park, as the result of a settlement and community benefit agreement, which the city entered into on Mar. 14, 2017 (City Council Resolution No. 2017-044). The northern Terramar Area Coastal Bluff top is currently under design to be improved as a linear passive park, as the result of a settlement agreement between the City of Carlsbad/CMWD and Cabrillo Power, et al., which the city entered into on January 14, 2014 (City Council Resolution No. 2014-010). Should these parks be constructed/improved, the additional acreage would likewise further aid in exceeding the parks performance standard. The following table includes each of these park sites, in the column for Parks Acreage – Current Parks + Above Parks and in the column for Parks Acreage - Projected Parks.

City Quadrant	Buildout Population	Parks Acreage Projected Need	Parks Acreage Current Parks + Above Parks	Parks Acreage Veterans Park	Parks Acreage Projected Parks
NW	38,606	115.8	127.3	22.875	150.175
NE	22,488	67.5	56.5	22.875	79.375
SW	28,113	84.3	70.2	22.875	93.075
SE	42,315	126.9	114.9	22.875	137.775
<b>Total</b>	<b>131,523</b>	<b>394.6</b>	<b>368.9</b>	<b>91.5</b>	<b>460.4</b>

Based on the review within this report, the Carlsbad Growth Management Program, and in particular the Facilities and Improvements Plan, continues to meet its objectives of assuring adequate public facilities (e.g., parks) concurrent with the need created by new development.

**Carlsbad Parks & Recreation Department Needs Assessment/Master Plan**

In 2012, staff began the process of developing the current Carlsbad Parks & Recreation Department Needs Assessment and Comprehensive Action Plan (Needs Assessment). After hiring a consultant specializing in the development of such strategic documents, public outreach on this process commenced. Over the next year, staff administered the following public outreach:

- Seven focus group meetings with major parks user groups, city staff and other stakeholders
- Ten interviews with community/nonprofit leaders, commissioners and council members
- Two open public meetings
- A statistically-reliable survey of Carlsbad residents
- An open online survey
- Two presentations at joint Senior and Parks & Recreation Commission Meetings
- Two presentations at City Council Meetings
- Citywide newsletters, social media, email blasts, media print, and a YouTube video

As a result of significant input received during these public outreach efforts, the draft Needs Assessment reflected what was determined to be Carlsbad's parks and recreation values and priorities. It also identified key action items for CIP planning, and park, facility and amenity development over the next five years. On Dec. 17, 2013, the City Council accepted the Needs Assessment (City Council Resolution No. 2013-295).

In 2014, the department began seeking national accreditation through the Commission for Accreditation of Park & Recreation Agencies (CAPRA). The CAPRA standards for national accreditation provide an authoritative assessment tool for parks and recreation departments, and through compliance with the standards assures that an accredited department has been independently evaluated against established benchmarks as delivering high quality programs and services. Two fundamental standards for CAPRA accreditation - a park and recreation system master plan and a strategic plan - required the department make minor modifications to the Needs Assessment.

While the department already had the elements of these two fundamental standards in place, the elements needed to be assembled into a master document to comply with the CAPRA requirement. Therefore, minor organizational modifications were made to the Needs Assessment and its name was changed to the Carlsbad Parks & Recreation Department Master Plan (Master Plan). Details were also added to the action items, including estimated capital cost outlay, lead division responsibility, performance metrics, and ties to the city's adopted organizational values and goals. On March 24, 2015, the City Council accepted the Master Plan (City Council Resolution No. 2015-074).

The following provides a brief status of each of the key action items for CIP planning, and park, facility and amenity development included in the Needs Assessment/Master Plan.

- **Complete a feasibility study/business plan on the potential for programming, partnering and operational success for an indoor, multipurpose, multigenerational community center. If feasible, commence development within three years of the Needs Assessment acceptance.**
  - *A feasibility study for an indoor, multipurpose, multigenerational community center at Poinsettia Community Park was completed and accepted by the City Council on Aug. 22, 2017 (City Council Resolution No. 2017-172). Space limitations eliminated the option to include the desired amenities. This reduced footprint (compared to the larger, originally envisioned footprint) was not conducive to, nor reflective of, a multigenerational community center experience*

*as recommended in the Needs Assessment/Master Plan. Poinsettia Community Park was therefore deemed not a feasible site for the community center.*

- **Complete a feasibility study/business plan on the potential for programming, partnering and operational success for an outdoor adventure activity park. If feasible, commence development within five years of the Needs Assessment acceptance.**
  - *A feasibility study for an outdoor adventure activity park was completed and accepted by the City Council on Aug. 22, 2017 (City Council Resolution No. 2017-172). Due to existing space limitations, neighborhood impacts, mitigating noise and use impacts, and environmental concerns on the city-owned park sites, an outdoor adventure activity park was deemed not feasible. However, given the data collected during the study process, and the popularity/expressed community need for outdoor adventure amenities, individual offerings may be considered in future park development projects, as opportunities arise.*
- **Update master plans for future facilities to ensure amenities are consistent with the community vision as identified in the Needs Assessment.**
  - *After extensive public outreach, the Master Plans for Pine Ave., Aviara, and Poinsettia Community Parks were updated by the project team, and accepted by the City Council on Dec. 9, 2014 (City Council Resolution No. 2014-280).*
    - *The Pine Ave. Community Park Master Plan – Phase II includes a multigenerational community center, and both ornamental gardens and community gardens.*
    - *The Aviara Community Park Master Plan – Phase II includes a large passive outdoor community gathering space with picnic areas, and a catering support/restroom facility.*
    - *The Poinsettia Community Park Master Plan – Phase III includes a multigenerational community center, a multi-sport arena field, an expanded playground with equipment for two age groups, and an off-leash dog park.*
  - *After specific public outreach, the Leo Carrillo Ranch Historic Park Master Plan - Phase III Project Prioritization and Cost Estimate was updated. On Sept. 22, 2015, the City Council accepted a staff report noting that two projects - the restoration of the original stables and the construction of a new restroom facility - had been rated at the top of the project prioritization list (City Council Resolution No. 2015-239).*
- **Modify two existing tennis courts in well served areas to accommodate outdoor pickleball courts as determined by the equity mapping.**
  - *Two existing tennis courts were identified for modification to pickleball courts at Laguna Riviera Park. On Dec. 9, 2014, after receiving concerns from the public regarding the potential modification of the tennis courts at Laguna Riviera Park, the City Council directed staff to forego modification of those courts and instead explore locations at other parks for the construction of dedicated pickleball*

*courts (City Council Resolution No. 2014-280). Staff subsequently identified a suitable location for such courts at Poinsettia Community Park. On Sept. 27, 2016, the City Council approved the contract documents, plans and specifications for the Poinsettia Community Park – Phase III Construction Project, which included six outdoor pickleball courts (City Council Resolution No. 2016-199).*

- **Design and develop the entryway to Calavera Hills Community Park.**
  - *The entryway to Calavera Hills Community Park has been preliminarily designed. That design includes new monument signage, a looped pathway with exercise stations, picnic areas and landscaping. Staff is currently reviewing the contract documents, plans and specifications, and anticipates bringing them to the City Council for approval in the near future.*
- **Complete development of one additional community garden at Calavera Hills Community Park.**
  - *The development of one additional community garden at Calavera Hills Community Park was completed in June 2014. It contains over two dozen raised community planters for lease, garden committee demonstration planters, composting bins, an information kiosk, and a community gathering area.*
- **Create a plan to identify an additional dog park.**
  - *In 2017, staff sought public input on the concept of relocating a dog park from the location initially identified in the Poinsettia Community Park Master Plan – Phase III to the location initially identified for a multigenerational community center. On Feb. 13, 2018, based on the results of the public input survey, the City Council directed staff to pursue the relocation of the dog park (City Council Resolution No. 2018-020). Staff is currently initiating conceptual design development, environmental document review, and master plan update tasks with the project design team.*
- **Tie in all future park and facility development with the trails plan to ensure greater community connectivity within the system.**
  - *Staff continuously takes into account park and facility development with connectivity to the Carlsbad citywide trails system. The revised draft of the Carlsbad Trails Master Plan, and the corresponding environmental documents and proposed General Plan Amendment were presented to the City Council on June 29, 2017. Staff is currently working on final revisions to these documents, and anticipates bringing them to the City Council for adoption in the near future.*
- **Aligned with the General Plan, continue expanding to meet the growing/changing park, facility, program and special event needs of the community.**
  - *On May 20, 2014, the City Council approved a right of entry permit with the State of California Department of Parks & Recreation to improve and maintain the Upper Picnic Facilities at Tamarack State Beach and the Coastal Bluff at Tamarack/Frazer State Beach (City Council Resolution Nos. 2014-098). The boundary of the Upper Picnic Facilities includes 1.5 acres of passive turf,*

*hardscape, raised planters, trees, picnic tables and benches, trash receptacles, outdoor showers, a stairway, a blockhouse restroom and a corresponding wastewater pump station. The boundary of the Coastal Bluff includes 4.8 acres of slopes which contain a mixture of both non-native and native plant material, and at-grade irrigation. These sites were added to the city's parks inventory. Staff continues to administer maintenance of the sites, under an annual permit.*

- *On Aug. 26, 2014, the City Council approved an updated Joint Use and Community Recreation Agreement with the Carlsbad Unified School District, to maintain and utilize multipurpose field areas, tennis courts and school grounds after school hours (City Council Resolution No. 2014-207). This agreement included two school sites – Kelly Elementary of 2.9 acres and Hope Elementary of 2.8 acres - which were not included in prior agreements with the district. These sites were added to the city's parks inventory. Staff continues to administer maintenance of the sites, under the ongoing agreement.*
- *On Mar. 14, 2017, the City Council entered into a settlement and community benefit agreement, which amongst other provisions, obligates the city and Lennar Homes to execute a park construction agreement for a neighborhood park at the Buena Vista Reservoir site of 3.1 acres. The park is to include passive amenities, such as playground equipment, picnic tables, shade structures, interpretive signage, landscaping and security lighting. Upon completion of the construction, this site would be added to the city's parks inventory. Staff would administer maintenance of the site, under ownership.*
- *On July 17, 2018, the City Council received an update on the Terramar Area Coastal Improvement Project, which includes a coastal bluff top at the north end of Terramar of 2.9 acres. This bluff top is to include walking paths, beach access, low benches, trash receptacles, and native landscaping. Upon the City Council's acceptance of an Irrevocable Offer of Dedication and approval of the project, and completion of the construction, this site would be added to the city's parks inventory. Staff would administer maintenance of the site, under at least an easement.*
- **Update the needs assessment for the next five years to ensure relevance and concurrency with existing conditions and population in Carlsbad.**
  - *\$100,000 in funding was set aside in the City Council approved FY 18-19 Operating Budget to commence updating the Needs Assessment/Master Plan (City Council Resolution No. 2018-.093). Periodically updating this document is also adherent to Section 4.19 of the Open Space, Conservation and Recreation Element of the City Council approved Carlsbad General Plan.*

Based on the review within this report, the department has addressed, or is in the process of addressing, each of the key action items for CIP planning, and park, facility and amenity development included in the Needs Assessment/Master Plan.

### **Fiscal Analysis**

There is no direct fiscal impact associated with the receiving this informational report.

### **Next Steps**

Unless directed otherwise by the City Council, staff will continue with its CIP planning, and park, facility and amenity development, as identified in the Carlsbad Citywide Facilities and Improvements Plan and the Carlsbad Parks & Recreation Department Needs Assessment/Master Plan.

### **Environmental Evaluation (CEQA)**

Pursuant to Public Resources Code Section 21065, receiving this informational report does not constitute a "project" within the meaning of the California Environmental Quality Act (CEQA) in that it has no potential to cause either a direct physical change in the environment, or a reasonably foreseeable indirect change in the environment, and therefore does not require environmental review.

### **Public Notification**

Public notification of this item occurred via staff response to the City Council's minute action at its regularly scheduled meeting of May 8, 2018, and via staff advisement at the City Council's regularly scheduled meeting of June 12, 2018. In addition, this item was noticed in accordance with the Ralph M. Brown Act and was available for public viewing and review at least 72 hours prior to the scheduled meeting date.

### **Exhibits**

1. Minutes of City Council Meeting on May 8, 2018 – Item No. 9, FY 2018-19 CIP Budget Report
2. Letter from the City of Carlsbad to the San Pacifico Community Association, of June 11, 2018

CITY COUNCIL  
**Minutes**

May 8, 2018, 6 p.m.

**EXHIBIT 1**

Council Chamber  
1200 Carlsbad Village Drive  
Carlsbad, CA 92008

**CALL TO ORDER:** 6:00 p.m.

**ANNOUNCEMENT OF CONCURRENT MEETINGS:** None.

**ROLL CALL:** M. Schumacher, C. Schumacher, M. Packard.  
Absent: M. Hall, K. Blackburn.

**INVOCATION:** None.

**PLEDGE OF ALLEGIANCE:** Council Member C. Schumacher led the Pledge of Allegiance.

**CITY ATTORNEY COMMENT:**

City Attorney Celia Brewer noted for the record that certain actions require a unanimous vote of the Council because this meeting only has a majority of the quorum and it requires a majority of the entire Council.

**APPROVAL OF MINUTES:**

Minutes of the Special Meeting held March 20, 2018.  
Minutes of the Regular Meeting held March 27, 2018.

Motion by Council Member M. Schumacher, seconded by Council Member C. Schumacher, to approve the minutes as presented. Motion carried unanimously, 3/0/2 (M. Hall, K. Blackburn – Absent).

**PRESENTATION:**

Proclamation in recognition of Water Safety Month

Council Member M. Schumacher presented the proclamation to Paramedic Firefighter John MacIsaac, Fire Chief Davis and Fire Division Chief Lopez. Paramedic Firefighter MacIsaac thanked the Council and gave a few words.

Introduction of CERT Academy Graduates

Council Member Packard introduced Emergency Preparedness Manager David Harrison. Mr. Harrison introduced the CERT Academy Graduates.

**PUBLIC REPORT OF ACTION TAKEN IN CLOSED SESSION:**

City Attorney Brewer reported that Council initiated litigation against TB Penick & Sons Inc. for construction related issues at Alga Norte Community Park. – 3/0/2 (M. Hall, K. Blackburn – Absent).

**PUBLIC COMMENT:**

*Mary Lucid requested that more staff be assigned to the senior center.*

*Stephen Makeoff spoke about the Kim Center and the resources it offers.*

*The following students from Jefferson and La Costa Heights spoke about the SWPPP internship: Jennifer Hernandez, Isaiah McCoy, Max Chase, Rowan Christenson, Ben Esquivel, Case Crane, Aaron Losey, Robert King, Angel Ramos, Brielle McBarron, Zane Paqua, Madelaine Morton, Alex Vennemeyer.*

**CONSENT CALENDAR:**

Motion by Council Member M. Schumacher, seconded by Council Member C. Schumacher, to approve Consent Calendar Item Nos. 1 through 6. Motion carried unanimously, 3/0/2 (M. Hall, K. Blackburn – Absent).

1. REPORT ON CITY INVESTMENTS – Acceptance of report on City Investments as of March 31, 2018. (Staff contact: Nancy Sullivan, Administrative Services)
2. NEW AND REVISED JOB CLASSIFICATIONS – Adoption of Resolution No. 2018-061 approving new job classifications, revising current job classifications, and amending the Carlsbad City Employees' Association Salary Schedule and the Management Salary Schedule. (Staff contact: Drew Cook, Administrative Services)
3. APPROVAL OF AGREEMENT WITH ADMINSURE INC. – Adoption of Resolution No. 2018-062 awarding a one year agreement in the amount of \$123,300 for the third party administration of Workers' Compensation Claims to Adminsure Inc. (Staff contact: Donna Hernandez, Administrative Services)
4. APPROVAL OF PURCHASE OF NETAPP DATA STORAGE FROM CDW-G - Adoption of Resolution No. 2018-063 approving the purchase of NetApp data storage from CDW-G in an amount not to exceed \$304,975.29. (Staff contact: Maria Callander, Administrative Services)
5. ADVERTISE FOR BIDS FOR 2018 SLURRY SEAL – Adoption of Resolution No. 2018-064 approving the plans and specifications and authorizing the City Clerk to advertise for bids for the 2018 Slurry Seal, Project No. 6001-18SS. (Staff contact: Emad Elias, Public Works)

6. AUTHORIZE RIGHT OF ENTRY PERMIT WITH STATE OF CALIFORNIA DEPARTMENT OF PARKS & RECREATION – Adoption of Resolution No. 2018-065 authorizing a Right of Entry Permit with the State of California Department of Parks & Recreation to maintain the upper picnic facilities at Tamarack State Beach and the Coastal Bluff at Tamarack/Frazer State Beach. (Staff contact: Kyle Lancaster, Parks & Recreation)

**ORDINANCES FOR INTRODUCTION:**

7. AWARD OF CONTRACT TO AMERICAN ASPHALT SOUTH AND AMENDMENT TO CARLSBAD MUNICIPAL CODE SECTION 10.40.080 – Adoption of Resolution No. 2018-066 accepting bids and awarding a contract to American Asphalt South for an amount not to exceed \$44,270 for the construction of the Carlsbad Boulevard and Beech Avenue restriping project, Project No. 6079, and appropriating funds from the Parking In-Lieu Fund in the amount of \$55,000; and, Introduction of Ordinance No. CS-331 amending Carlsbad Municipal Code Section 10.40.080 to establish angle parking on Beech Avenue. (Staff contact: John Kim, Public Works)

**City Manager's Recommendation:** Adopt the resolution and introduce the ordinance.

*City Attorney Celia Brewer titled the Ordinance.*

Motion by Council Member M. Schumacher, seconded by Council Member C. Schumacher, to approve Resolution No. 2018-066 and introduce Ordinance No. CS-331. Motion carried unanimously, 3/0/2 (M. Hall, K. Blackburn – Absent).

**ORDINANCES FOR ADOPTION:** None.

**PUBLIC HEARING:**

8. 2018-2019 COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM ACTION PLAN – Adoption of Resolution No. 2018-067 approving and authorizing the submission of the 2018-2019 Action Plan for Community Development Block Grant (CDBG) funding to the United States Department of Housing and Urban Development. (Staff contact: Courtney Pene, Community & Economic Development)

**City Manager's Recommendation:** Take public input, close the public hearing and adopt the resolution.

Management Analyst Courtney Pene and Community and Economic Development Director Debbie Fountain presented the report and reviewed a PowerPoint presentation (on file in the Office of the City Clerk).

*Council Member Packard opened the duly noticed Public Hearing at 6:42 p.m.*

*Joaquin Blas gave historical information regarding La Posada de Guadalupe and the resources they offer to the community.*

*Council Member Packard closed the duly noticed Public Hearing at 6:45 p.m.*

Motion by Council Member M. Schumacher, seconded by Council Member C. Schumacher, to approve Resolution No. 2018-067. Motion carried unanimously, 3/0/2 (M. Hall, K. Blackburn – Absent).

#### **DEPARTMENTAL AND CITY MANAGER REPORTS:**

9. **FY 2018-19 CAPITAL IMPROVEMENT PROGRAM REPORT** – Acceptance of report on FY 2018-19 Capital Improvement Program and set the public hearing date for June 12, 2018. (Staff contact: Helga Stover, Administrative Services)

**City Manager's Recommendation:** Receive and file report.

Transportation Director Marshall Plantz and Finance Manager Helga Stover presented the report and reviewed a PowerPoint presentation (on file in the Office of the City Clerk).

Council Member Packard invited the public to the Citizen's Budget Workshop on Tuesday, May 29, 2018 at the Faraday Administration Building located at 1635 Faraday Avenue, Room 173B at 6 p.m.

*Chas Wick expressed his support for relocating veteran's park to the southwest quadrant.*

*Deborah Mossa spoke on behalf of the Batiquitos Lagoon Foundation expressing their requests for more funding to be used for the issues in each quadrant.*

*David Hill spoke on behalf of the Batiquitos Lagoon Foundation providing information of what the foundation is known for.*

*Steve Oetting spoke about the local parkland deficit in the southwest corridor.*

*Carter McLarand spoke about the different community outreaches that were given to the public to provide their input about the development of the Shopoff development.*

*Jean Camp expressed her support for a regional park at Ponto.*

*John Gama expressed his opposition to the Shopoff development and support in funding a park at Ponto.*

*Lance Schulte expressed his support for a coastal park at Ponto.*

*Julie Peebles Peterson spoke about solutions for improvements at the Monroe Street pool.*

*John Sherritt spoke in favor of the planning process for the City of Carlsbad.*

*Stacy King spoke about the airport, Monroe Street pool and the park at Ponto.*

*Jan Bandich spoke about her support in funding a park in South Carlsbad.*

*John Davison spoke about the Monroe Street pool and the noise, traffic, parking and access issues that have yet to be addressed.*

*Pat Bleha expressed her opposition to staff's recommendation.*

*Diana Lincoln expressed her support to save some of the land at Faraday but also to develop a park in the southwestern quadrant of the city.*

*De'Ann Wiemer expressed her opposition in spending funds in Veteran's Park.*

*Paige DeCino thanked Council for the valve replacement of the Calavera dam and her opposition in spending funds in Veteran's Park.*

*Natalie Shapiro expressed her opposition in spending funds in developing Veteran's Park.*

*Dr. Howard Krausz spoke in opposition of staff's recommendation.*

Motion by Council Member M. Schumacher, seconded by Council Member C. Schumacher, to hold a workshop to provide an update on the current and future parks inventory. Motion carried unanimously, 3/0/2 (M. Hall, K. Blackburn – Absent).

Motion by Council Member M. Schumacher, seconded by Council Member C. Schumacher, to set the public hearing date for June 12, 2018. Motion carried unanimously, 3/0/2 (M. Hall, K. Blackburn – Absent).

10. **AUTHORIZE PURCHASE OF EIGHT POLICE VEHICLES** – Adoption of Resolution No. 2018-068 authorizing the purchase of eight Ford Explorer Police Interceptor vehicles from Downtown Ford for \$449,216, appropriating an additional budget allocation of \$93,216, and authorizing the Administrative Services Director to appropriate and transfer these funds from the General Fund to the Fleet Replacement Fund. (Staff contact: Shawn Gaskari, Public Works)

- ① **City Manager's Recommendation:** Adopt the resolution.

Management Analyst Shawn Gaskari and Police Lieutenant Jeff Smith presented the report and reviewed a PowerPoint presentation (on file in the Office of the City Clerk).

Motion by Council Member M. Schumacher, seconded by Council Member C. Schumacher, to adopt Resolution No. 2018-068. Motion carried unanimously, 3/0/2 (M. Hall, K. Blackburn – Absent).

**PUBLIC COMMENT:** Continuation of the Public Comments

*Jim Burke spoke regarding different legislation that is currently being considered statewide.*

**COUNCIL REPORTS AND COMMENTS:**

Mayor and Council Members reported on activities and meetings of some committees and sub-committees of which they are members.

Jean Camp  
Lance Shulte  
Ponto Beachfront Development Review Committee  
San Pacifico Residents

Thank you for your various emails, telephone calls, City Council inquiries, public record requests, and meetings with city staff regarding the proposed Ponto area private development application, as submitted by Shopoff, and your statement of facts, opinions and concerns regarding the proposed project's compliance with the city's Growth Management Program as related to the open space and parks performance standards.

It is my understanding that you have now received all documents from the city that we believe are responsive to your requests and inquiries. Each of your questions have been treated as a public records request and the city has provided those documents or city records which respond to your questions regarding the facts in the record at the time the City Council approved the Growth Management Program and related policies and documents. As shared with you in several past conversations and correspondence, the Growth Management Plan Monitoring Report for FY 2016-17 indicates that public facilities related to parks and open space are currently meeting the adopted growth management performance standards in all zones. The parks standard is analyzed on a quadrant basis. The open space standard is analyzed on a Local Facility Management Zone (LFMZ) basis, for which Zone 9 has an approved exception. This correspondence provides a response to your process questions related to the applicability to the proposed Ponto development.

Based on documented actions taken by the City Council, city staff will continue its review of the proposed Ponto development according to the existing council-approved growth management program which has **excepted** Zone 9 (which includes the Ponto development) from compliance with the open space performance standards set forth within the City Council approved *Citywide Facilities and Improvement Plan* (approved in 1986). City Council and city staff understand that the approvals associated with the Growth Management Program are complicated and varied, and it may be difficult to follow all of the various discussions and approvals by City Council. Staff, however, is relying on the final adopted *Citywide Facilities and Improvements Plan* which was approved by the City Council on September 23, 1986. Because the decision of the City Council was not appealed at that time, the decision as set forth in City Council Resolution No. 8797 is the final authorizing instrument for implementation of the *Citywide Facilities and*

Community & Economic Development Department, 1635 Faraday Avenue, Carlsbad, Ca. 92008  
Office: (760) 602-2710

*Improvements Plan*, which does not require Zone 9 to comply with the open space performance standard. An ongoing debate or questioning of the reasons for the exception is not productive at this point because the Council approved the plan and its implementation, and property owners relied on those approvals for development purposes. No corrective action is required of the City Council because the Plan was formally adopted following the applicable public review process; all appeal periods have long since expired and the development community has relied on these approvals in submitting development applications for review and consideration by the City Council since that time.

While the Ponto development proposed by Shopoff may not be required to analyze its compliance with the open space performance standard set forth in the *Citywide Facilities and Improvements Plan*, it does need to be reviewed against a number of other city policies and regulations, as well as the policies set forth in the Local Coastal Program and under the California Environmental Quality Act (CEQA). Staff continues to review the application against all applicable city and coastal act policies and regulations. No date is yet set for a hearing of the application by the City Council, and there is not yet a staff recommendation on the proposed project. The project concerns and comments of the residents have and will continue to be taken into consideration in the staff recommendation on the proposed development.

Below are several other key points of clarification on the growth management standards for parks and open space in the Southwest Quadrant:

Based on the General Plan build out projections, the SW quadrant will be required to have a total of 84.3 acres of park; it currently has 70.2 acres (Poinsettia Park and Aviara Park both serve the Southwest Quadrant). Construction of Veterans Park (a community park) prior to build out will result in an increase of 22.9 acres of park in each quadrant. This means that the SW Quadrant is projected to have an excess of park inventory at build out according to the approved *Citywide Facilities and Improvements Plan*. **No additional parks are needed to meet the parks performance standard; Veterans Park will satisfy the existing projected deficit in the SW Quadrant.**

Per the approved *Citywide Facilities and Improvements Plan*, adopted by the City Council in 1986, LFMZs 1 through 10, and 16 were excepted from the open space performance standard at the time of adoption because the developments in those zones already had approved applications or met other criteria for an exception. **No performance standard was applied to Zone 9 ( which includes San Pacifico and Ponto development area), and as a result there is no open space deficit that must be addressed by the developer or the city.**

The Southwest Quadrant is made up of LFMZs 4, 9, 19, 20, 21, 22 and 23. Zones 4 & 9 have no performance standard that is required to be met under growth management as noted above. **Zones 19, 20, 21, and 23 subsequently were required to provide 15% open space to meet the applicable growth management performance standard as they were developed;**

**these developments will/have met the required performance standard for open space through build out according to their approved development permits.**

Per the Growth Management Plan Monitoring Report for 2016-17, LFMZ 22 is still developing and will provide open space as development occurs; this is the area north of the Ponto development and west of I-5. **As the area develops per the General Plan, the 15% requirement for open space will continue to be applied to all private development plans in Zone 22.**

It is important to note that "Open Space" has a broad definition and includes private, public and semi-public open space areas within developed areas, including pocket parks, homeowners ball fields, planned residential development common areas, golf courses, tot lots, swimming pools, tennis courts or other areas containing passive or active recreational facilities, including major power line easements.

The General Plan designation for the Ponto development area allows for residential and commercial development, and it has an allocation of residential units to the area per City Council approval as part of the General Plan approval. There is a requirement for other land use documents to be made consistent with the General Plan designation, and the developer is being required to amend the appropriate documents to ensure consistency. Neither the General Plan nor the Parks Master Plan identify the Ponto properties for a public park. Therefore, there is no action currently being pursued by the city or developer to allow for development of a public park on the subject property. This does not mean, however, that there may not be some open space or public spaces (such as a public plaza) built into the development. Environmental impacts will also be studied through the appropriate environmental review required for the development, and appropriate coastal act policies will be applied to the project.

Thank you again for your comments. While we understand that you may disagree with this position, this represents the city's final opinion on the applicability of the performance standards for growth management as related to open space and parks. Also, please note that I will be your single point of contact for the growth management program as it relates to the noted development. However, you may submit any additional public records requests directly to the City Clerk and each request will be processed accordingly. We do not find it necessary to complete any additional research for you based on the finding we noted above. I do encourage you to stay engaged and continue to participate in public meetings/hearings on the development application submitted by Shopoff, and provide collaborative comments on the residential and commercial project proposed by the applicant.

Sincerely,

Debbie Fountain

**RE: CARLSBAD PARKS UPDATE – Information report on the current and future Carlsbad Parks Inventory**

Dear Mayor Hall and Carlsbad City Council:

I am a long time resident of San Pacifico community in South Carlsbad and, in fact, have been here since its inception. Like many, I am proud to be a Carlsbad resident, in part because of its great parks system. My family and I have been fortunate to be able to enjoy an ample trail system, a beautiful lagoon, and miles of beach ALL within a short walk from our home.

I understand that some of my neighbors would like to see the piece of property on Ponto Drive and Avenida Encinas become open space and/or park space as they feel there is not enough of this kind of land in the South Quadrant of Carlsbad; however, I do not support this and feel it is an inappropriate area for a park.

The City of Carlsbad has established their parks plan and policies over the course of many years and has done an excellent job in implementing those plans. In fact, it is one of the many reasons my family chose to make Carlsbad our home many years ago. Additionally, much like the Parks Master Plan, this piece of property in the Ponto area has been planned for by the City through the Ponto Beachfront Village Vision Plan and the Carlsbad General Plan.

While everyone is entitled to their own opinions and may well have different personal goals and objectives than does the City of Carlsbad, it's important that decisions are made based on facts and well thought out planning. The facts are, that this property has never been designated as Open Space in the Carlsbad General Plan nor in the City's Zoning codes, yet it has been carefully planned for by a city that is recognized as having some of the highest standards for open space in the entire region. I speak not only as a long-term resident of San Pacifico but also as a professional in the local real estate development industry of which I am a proud member of. I was a member of the design and entitlement team that initiated the Master Plan for San Pacifico and I continue to support the implementation of the plan for our community as it was initially designed and approved by the City.

Again, I'm a proud Carlsbad resident and I fully support the City of Carlsbad's Parks and Recreation Department Master Plan and look forward to watch that vision continue to be executed. Thank you for making Carlsbad a great city.

Sincerely,

John Sherritt  
San Pacifico Resident

**RE: CARLSBAD PARKS UPDATE - July 24th City Council Meeting**

Dear Mayor Hall and Carlsbad City Council:

While I am not able attend the July 24<sup>th</sup> City Council Meeting, I wanted to express my support for the City of Carlsbad's Parks and Recreation Department Master Plan.

I have heard some residents in the area are dissatisfied with the City of Carlsbad's future plans for parks and open space; however, I and many neighbors and friends of mine do not feel that way, in fact, it's quite the opposite. We believe that the City of Carlsbad has one of the best parks and habitat preservation systems in the County, and for many of us, it was the number one reason we moved here and made Carlsbad our home.

While not every space can be a park or open space, Carlsbad has made a great effort to ensure ample opportunities and continue to create these special areas where it's feasible. Don't let the desires of a few unreasonable homeowners on the coast derail the many years and taxpayer dollars that the City has invested in making the superior parks infrastructure the amazing benefit to the City it is today.

Thank you,

Justin Stricula  
Calavera Hills Resident

**RE: CARLSBAD PARKS UPDATE – Information report on the current and future Carlsbad Parks Inventory**

Dear Mayor Hall and Carlsbad City Council:

As a resident of South Carlsbad, I am writing to express my support for the City of Carlsbad's Parks and Recreation Department Master Plan that has been created and vetted for over several years. The City is doing an excellent job at seeing that vision through to fruition.

It has come to my attention that some of my neighbors are dissatisfied with the current parks plan and would like to see additional park space in a specific area in the South Quadrant. While I am not opposed to additional parks or open space, I believe that the City of Carlsbad has created a superior parks system that has contributed to the high standard of living and recreation opportunities Carlsbad residents enjoy today. With nearly 50 miles of trails, 40 parks, ample open space, and miles of beaches, it is clear that the City of Carlsbad has invested in its residents.

Again, I applaud the City of Carlsbad and its parks plan and look forward to what's to come.

Thank you,

Eric Weitz  
South Carlsbad Resident (Bay Collection)

"Good Evening. My name is Mary Anne Viney and I reside at James Drive in Carlsbad.

I'm the President of the Friends of Buena Vista Reservoir Park non-profit, whose mission is to preserve and protect the neighborhood park approved for construction at the reservoir site, and which represents the interests of the many volunteers in our neighborhood.

I'm requesting that Council prioritize the physical health and mental well-being of Carlsbad citizens by creating neighborhood parks that residents can walk to, especially in neighborhoods like Ponto Beach where park standards have not yet been met, and thus amend the outdated Growth Management Program.

Public health studies indicate the many health benefits that neighborhood parks can provide when they are located close enough so that residents can walk to them. Other benefits include strengthening the community, important positive environmental impacts, and increased property values.

With the historic City of Carlsbad 'Community Benefits Agreement' that I participated in, many community members worked together successfully on key terms for our neighborhood park, along with other community benefits, that resulted. This approach could also be applied for other neighborhood parks as well.

So please take a positive, pro-health stance and create neighborhood parks our residents can walk to.

To see how Carlsbad ranks out of about 14,000 US cities in terms of percentage of residents who live within a 10-minute walk of a park, and where parks are needed most in Carlsbad, see the Trust for Public Land website: <https://parkserve.tpl.org/city/id/0611194/>.

Thank you."

*Mary Anne Viney*

# *Carlsbad Parks Update*

Chris Hazeltine, Parks & Recreation Director

Kyle Lancaster, Parks Services Manager

July 24, 2018

## *Recommended Action*

- Receive an update on the current and future Carlsbad Parks inventory

# *Leading to the Update*

- May 8, 2018 City Council Meeting
  - Introduction of proposed FY 2018-19 CIP Budget
  - Council directed staff to hold a workshop to provide an update on the current and future parks inventory

# *Citywide Facilities & Improvements Plan*

# *Growth Management Program*

- Carlsbad voters approved program in 1986
  - Reduced projected population of city to ~130,000
  - Set standards that must be met for new development to be approved so as Carlsbad grows, the quality of life can be maintained

# *Facilities and Improvements Plan*

- Council created standards by adopting the plan in 1986
- Facilities/services are specified in 11 public facility performance standards, covering items such as parks
- Staff annually monitors compliance with the plan

# *Facilities and Improvements Plan*

- If standards are not met within a specific planning area, no new development may be approved in that area until standards are met, or satisfactory arrangements are made to guarantee the facilities and improvements

# *Parks Performance Standard*

- Three acres per 1,000 population within the park district
- Four park districts, which correspond to city quadrants

# *Parks Performance Standard*

- If service level is not met due to population increase within a quadrant, city is required to schedule a park for construction within five years, beginning at the time the need is identified, but no sooner than August 22, 2017

# *Parks Performance Standard*

- “Scheduled for construction” means:
  - Park site selected and has been or is being acquired
  - Improvements for park site have been designed
  - Financing for construction of park has been set aside

# *Classifications of Parks*

- Two classifications of parks for Growth Management:
  - Special Use Areas
  - Community Parks

# *Classifications of Parks*

- Special Use Areas:
  - Smaller in size, with basic uses (passive or active)
  - 27 sites within city's inventory, totaling ~81 acres

# *Classifications of Parks*

- Community Parks:
  - Larger in size, with varied amenities (passive & active)
  - 13 sites within city inventory, totaling ~254 ½ acres

# *Classifications of Parks*

- In the late 70s/early 80s, city chose to focus on providing community parks rather than smaller neighborhood parks
  - Larger community parks, with active and passive amenities, were determined to better meet the recreational needs of residents, tourists and employees

# *Summary - Meeting Objectives*

- Growth Management Program, particularly the Facilities and Improvements Plan, continues to meet its objectives of assuring adequate public facilities (e.g., parks) concurrent with the need created by new development

# *Parks & Rec. Department Master Plan*

# *Parks & Recreation Needs Assessment*

- In 2012, staff began process of developing the Parks & Recreation Needs Assessment and Comp. Action Plan

# *Needs Assessment Public Outreach*

- During 2013, staff administered the public outreach:
  - Seven focus group meetings
  - Ten interviews
  - Two open public meetings
  - A statistically-reliable survey of Carlsbad residents

# *Needs Assessment Public Outreach*

- During 2013, staff administered public outreach (cont.):
  - An open online survey
  - Two Senior/Parks & Recreation Commission Meetings
  - Two City Council Meetings
  - Citywide newsletter, social media, email blasts & prints

# *Parks & Recreation Needs Assessment*

- As a result of the public input received, the draft Needs Assessment reflected what had been determined to be Carlsbad's parks and recreation values and priorities

# *Parks & Recreation Needs Assessment*

- It identified key action items for CIP planning, and park, facility and amenity development over next five years
- On Dec. 17, 2013, Council accepted the Needs Assessment

# *Parks & Recreation Accreditation*

- In 2014, staff sought national accreditation through the Commission for Accreditation of Park & Recreation Agencies

# *Parks & Recreation Master Plan*

- Modifications were made to the Needs Assessment and its name was changed to the Carlsbad Parks & Recreation Department Master Plan
- On March 24, 2015, Council accepted the Master Plan

# *Parks & Recreation Master Plan*

- Following are the key action items for CIP planning, and park, facility and amenity development in the Master Plan

# *Master Plan Action Items*

- Action: Complete a feasibility study/business plan on the potential for an indoor, multipurpose, multigenerational community center, and an outdoor adventure activity park

# *Master Plan Action Items*

- Status: *A study for a community center at Poinsettia Community Park and a study for an outdoor adventure activity park was completed by the project team*
  - *Council accepted the studies on Aug. 22, 2017*

# *Master Plan Action Items*

- Action: Update master plans for future facilities to ensure amenities are consistent with the community vision as identified in the Needs Assessment

# *Master Plan Action Items*

- Status: *The Pine Avenue, Aviara, and Poinsettia Community Parks Master Plans were updated*
  - *Council accepted the master plans on Dec. 9, 2014*

# *Aviara Park - Ph. II Project*

# *Poinsettia Park – Ph. III Project*

# *Pine Avenue Community Center*

# *Pine Avenue Park Gardens*

# *Master Plan Action Items*

- Status: *The Leo Carrillo Ranch Master Plan – Ph. III*

*Project Prioritization was updated*

- *Council accepted a staff report advising of the two highest rated projects on Sept. 22, 2015*

# *Leo Carrillo Ranch Park Master Plan Ph. III*

# *Leo Carrillo Ranch Park Master Plan Ph. III*

# *Master Plan Action Items*

- Action: Modify two existing tennis courts in well served areas to accommodate outdoor pickleball courts
- Status: *On Dec. 9, 2014, Council directed staff to forego modification of two tennis courts at Laguna Riviera Park*
- *Council approved Poinsettia Community Park for courts*

# *Master Plan Action Items*

# *Master Plan Action Items*

- Action: Design and develop the entryway to Calavera Hills Community Park
- Status: *The entryway to Calavera Hills Community Park has been preliminarily designed*
  - *Staff is currently reviewing the plans/specifications*

# *Master Plan Action Items*

# *Master Plan Action Items*

- Action: Complete development of one additional community garden at Calavera Hills Community Park
- Status: *One additional community garden at Calavera Hills Community Park was completed in June 2014*

# *Master Plan Action Items*

# *Master Plan Action Items*

- Action: Create a plan to identify an additional dog park
- Status: *In 2017, staff sought public input on relocating a dog park identified in the Poinsettia Park Master Plan*
  - *In 2018, Council directed staff to pursue the relocation*

# *Poinsettia Park - Dog Park Relocation*

Previously Proposed Location

Possible New Location

# *Master Plan Action Items*

- Action: Tie in all future park and facility development with the trails plan to ensure greater community connectivity within the system

# *Master Plan Action Items*

- Status: *Staff has continuously taken into account such connectivity to the Carlsbad citywide trails system*
  - *The revised draft of the Carlsbad Trails Master Plan was presented to the Council on June 29, 2017*

# *Opportunistic Master Plan Items*

- Action: Aligned with the General Plan, continue expanding to meet the growing/changing park, facility, program and special event needs of the community

# *Opportunistic Master Plan Items*

- Status: *On May 20, 2014, Council approved a permit with the State of California to improve and maintain the Upper Picnic Facilities at Tamarack State Beach and the Coastal Bluff at Tamarack/Frazees State Beach*

# *Opportunistic Master Plan Items*

- Status: *On Aug. 26, 2014, Council approved an updated agreement with the Carlsbad Unified School District, to maintain and utilize multipurpose field areas, tennis courts and school grounds after school hours*
  - *Kelly and Hope Elementary Schools were included*

# *Opportunistic Master Plan Items*

- Status: *On Mar. 14, 2017, Council entered into an agreement which obligates the city and Lennar Homes to execute a park construction agreement for a neighborhood park at the Buena Vista Reservoir site*

# *Opportunistic Master Plan Items*

- Status: *On July 17, 2018, Council received an update on the Terramar Area Coastal Improvements Project, which includes a coastal bluff top at the north end of Terramar*

# *Master Plan Action Items*

- Action: Update the needs assessment for the next five years to ensure relevance and concurrency with existing conditions and population in Carlsbad
- Status: *\$100,000 was set aside in the Council approved FY 2018-19 Operating Budget to commence updating plan*

# *Summary - Addressing Action Items*

- The Parks & Recreation Department has addressed, or is in process of addressing, each of the key action items for CIP planning, and park, facility and amenity development included in the Needs Assessment/Master Plan

## *Recommended Action*

- Receive an update on the current and future Carlsbad Parks inventory

*Questions?*

**Special Use/Community Parks Map**  
 Recommended Standard of  
 0.5/2.5 Acres per 1,000 Population

**Carlsbad, California**  
 Parks and Recreation Needs  
 Assessment and Action Plan

# *Parks Performance Standard*

- Initially, city was required to schedule a park for construction within five years, beginning at the time the need was identified or before the private construction of 1,562 dwelling units per quadrant
- The requirement, however, was changed per the City Council's adoption of amendments to plans

# *Parks Performance Standard*

- Change requested due to concerns linking timing of scheduling the construction of a park to the construction of 1,562 dwelling units per quadrant
  - General Plan anticipated future residential capacity in southwest & southeast quadrants to be less than 1,562

# Request City Council Consider Park & Open Space Data Presented by Citizens on 6/12/18 & missing in Staff Report

## Parks

- City & Regional need for a true South Carlsbad Coastal Park
- South Carlsbad Coastal Park achieves Community Vision of GP
- Coastal South Carlsbad Planning Area F Local Coastal Program requirement to study a “Public Park” & Citywide Coastal uses

## Open Space

- Developer’s Local Facility Management Plan Zone 9 errors need correcting in Developer’s Comprehensive Zone 9 Update
- City’s responsibility to Citizens & following Growth Management Ordinance, Standards and Principles

# Need a Coastal South Carlsbad Park – City data

64,000 South Carlsbad Citizens & hotel visitors w/o a Coastal Park

4-6 miles of Coast w/o Park is a City & Regional need

Community-Based Planning needed

[www.pontolocal.com](http://www.pontolocal.com)

## 4.12.2 SPECIAL USE AREAS

There is no Coastal Park to serve South Carlsbad Citizens-Visitors-Businesses. There are 10 Coastal Parks in North Carlsbad. The lack of Coastal Parks in South Carlsbad seems both unfair to South Carlsbad Citizens-Visitors-Businesses; and is unfair to North Carlsbad by forcing congestion into North Carlsbad & Encinitas/Solana Beach where there are Coastal Parks.

We can do Better!

# Ponto's Carlsbad Park In-Lieu Fees & Coastal Parks & Quality of Life Results

- 947 homes (2,233 pop.) w. of I-5 & s. of Poinsettia Lane
  - City's minimum Park standard requires 6.7 acres of Park
  - Homeowners paid City taxes & park-in-lieu-fees to buy & build 6.7 acres of City Park, but No Park in area.
  - Taxes/fees didn't add Park acreage - needed Veterans
  - Nearest Park 2.3 miles across I-5. The Veteran's Park 'solution' over 5-miles away & basically inaccessible.
  - Over 90% of Community surveyed wants a Park in Ponto
  - Why no Ponto Park? Ponto fees paid for it, Community wants it, proposed Park solutions don't work. We can Do Better!
- [www.pontolocals.com](http://www.pontolocals.com)

# Growing Coastal Park Demand

Meaningful South Carlsbad Coastal Park is vital for Carlsbad's Quality of Life & Economy

## Year & Residents per Carlsbad's 4-mile Coastal Park Gap (SANDAG):

- 1985 = 116,000 - when Veterans Park coastline 'solution'
- 1995 = 140,000 + 21% - Planning Area F requirement
- 2015 = 176,000 + 52% - General Plan Update
- 2035 = 212,000 + 83% - end of 20-yr life General Plan – what then?

## Visitors per Carlsbad's 4-mile Coastal Park Gap (SD Tourism Authority):

2018 = 5,092 visitors per day; growing 1.6% per year, 2035 = 6,669

Ponto last chance to fix Carlsbad's 4-mile Coastal Park gap (8% of SD County coastline) with a meaningful Coastal Park. We can do better!

[www.pontolocals.com](http://www.pontolocals.com)

# Implements Community Vision - the Foundation for the General Plan 1 of 4

- Refer to 5-page email to City Council on 8/31/17 & 3/6/18 - Share & discuss the Issues with Citizens.

Community Vision, is foundation for General Plan. Just words to be ignored or guides to action?

- “...open spaces within walking distance of people’s homes ...” - nearest park over 2 miles away & over I-5
- “... strategic acquisitions to further the city’s open space system.” - fill Coastal South Carlsbad park gap

# Implements Community Vision - the Foundation for the General Plan 2 of 4

- “... network of parks and recreation facilities will be improved ... Such improvements may include the strategic addition of more parks, ... New facilities will be located to maximize use and access by all neighborhoods, tailored to the needs of local populations ...” - provide half of Carlsbad its only Coastal Park
- “... protecting and enhancing access to the beach and the quality of the beach experience is a top community priority.” - South Carlsbad has no Coastal Park, congests North Carlsbad

# Implements Community Vision - the Foundation for the General Plan 3 of 4

- “ ... Access to the beach ... will be improved through new compatible and supportive uses on or in close proximity to the beach, which may include ... a park” -  
Park supports residents and visitor industry
- “... Tourism is an important component of the city’s economy ... it emphasizes ... resources that make the city attractive to ... residents - the ocean and beach” -  
Park supports residents and visitor industry
- “Easy and convenient pedestrian connections will be available from every neighborhood to help children get safely to ... parks.” - Veterans Park 5-miles away from need  
[www.pontolocal.com](http://www.pontolocal.com)

# Implements Community Vision - the Foundation for the General Plan 4 of 4

From General Plan Land Use Element:

- “...the community expressed an overwhelming preference for an active waterfront ... Access to the beach will be enhanced through ... open space, parking, and amenities ...” - Need a South Carlsbad Coastal Park
- “... new growth accommodated west of Interstate 5, to enable residents and visitors to enjoy more opportunities for ... recreating along the coastline. Develop ... recreational opportunities along the coastal corridor.” - A meaningful Coastal South Carlsbad Park provides the most opportunities

# Required by City & State land use regulations for Planning Area F - City's Local Coastal Program 1 of 3

page 101 of Carlsbad's Local Coastal Program – adopted July 16, 1996 MP 175(G)/LCP

Carlsbad Public Records Request PRR-2017-260 confirmed Planning Area F LCP requirements not complied with & flawed PBVVP & General Plan Update. We can do better!

Coastal Commission has told City to address prior to changing Citywide LCP or Planning Area F land use

[www.pontolocal.com](http://www.pontolocal.com)

# City & State land use regulations for Planning Area F – Local Coastal Program page 101 2 of 3

“Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an “unplanned” area, ... As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.”

Never done: Carlsbad PRR-2017-260 confirmed. Citizens not knowing this flawed the Ponto Beachfront Village Vision Plan, 2015 General Plan Update, and Carlsbad Park Planning Processes

# City & State land use regulations for Planning Area F – Local Coastal Program page 101 3 of 3

California Coastal Commission told the City that:  
“ ... the City shall undertake an inventory of visitor  
serving uses currently provided within the City’s Coastal  
Zone which will then serve to inform updates to the City’s  
land use and zoning maps as necessary. This inventory  
could have future implications for the appropriate land  
use and zoning associated with the Ponto area.”

Lets do better and fully inform & engage Citizens in this  
[www.pontolocals.com](http://www.pontolocals.com)

# Ponto's (LFMP-Zone 9) Growth Management Open Space requirement

- 6/11/18 Final Staff Opinion Letter, Prior Public Records Requests, & City data confirmed Developers' LFMP-9 did not provide required Open Space per Growth Management Standard: 30-acres short! Lets do better!
- Inconsistent & incomplete information in 6/11/18 Final Staff Opinion Letter & conflicts with Growth Management Ordinance
- Need to have honest Citywide discussion on this issue!
- Is Staff's Final Opinion the City Council's direction?
- You can do better

# Thank you

We can do better. Please fund & support a open & honest Community-based Planning Process for Parks and Open Space in Coastal South Carlsbad

Please do the right thing and Develop Ponto Right

# *Carlsbad Parks Update*

Chris Hazeltine, Parks & Recreation Director

Kyle Lancaster, Parks Services Manager

July 24, 2018

## *Recommended Action*

- Receive an update on the current and future Carlsbad Parks inventory

# *Leading to the Update*

- May 8, 2018 City Council Meeting
  - Introduction of proposed FY 2018-19 CIP Budget
  - Council directed staff to hold a workshop to provide an update on the current and future parks inventory

# *Citywide Facilities & Improvements Plan*

# *Growth Management Program*

- Carlsbad voters approved program in 1986
  - Reduced projected population of city to ~130,000
  - Set standards that must be met for new development to be approved so as Carlsbad grows, the quality of life can be maintained

# *Facilities and Improvements Plan*

- Council created standards by adopting the plan in 1986
- Facilities/services are specified in 11 public facility performance standards, covering items such as parks
- Staff annually monitors compliance with the plan

# *Facilities and Improvements Plan*

- If standards are not met within a specific planning area, no new development may be approved in that area until standards are met, or satisfactory arrangements are made to guarantee the facilities and improvements

# *Parks Performance Standard*

- Three acres per 1,000 population within the park district
- Four park districts, which correspond to city quadrants

# *Parks Performance Standard*

- If service level is not met due to population increase within a quadrant, city is required to schedule a park for construction within five years, beginning at the time the need is identified, but no sooner than August 22, 2017

# *Parks Performance Standard*

- “Scheduled for construction” means:
  - Park site selected and has been or is being acquired
  - Improvements for park site have been designed
  - Financing for construction of park has been set aside

# *Classifications of Parks*

- Two classifications of parks for Growth Management:
  - Special Use Areas
  - Community Parks

# *Classifications of Parks*

- Special Use Areas:
  - Smaller in size, with basic uses (passive or active)
  - 27 sites within city's inventory, totaling ~81 acres

# *Classifications of Parks*

- Community Parks:
  - Larger in size, with varied amenities (passive & active)
  - 13 sites within city inventory, totaling ~254 ½ acres

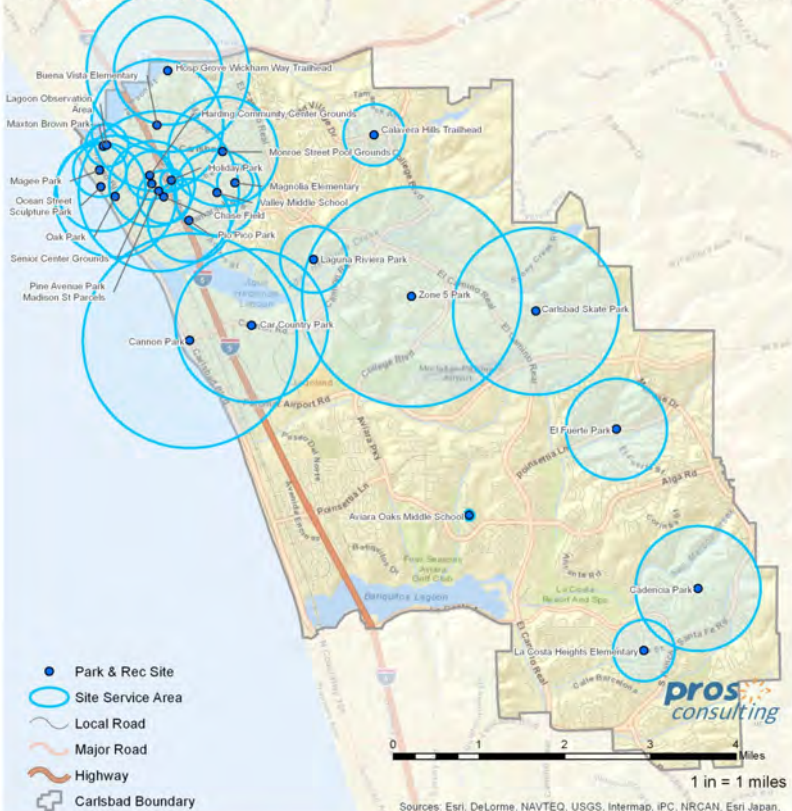

# *Classifications of Parks*

- In the late 70s/early 80s, city chose to focus on providing community parks rather than smaller neighborhood parks
  - Larger community parks, with active and passive amenities, were determined to better meet the recreational needs of residents, tourists and employees

**Special Use Areas Map**  
Recommended Standard of

# *Master Plan Action Items*

- Action: Update the needs assessment for the next five years to ensure relevance and concurrency with existing conditions and population in Carlsbad
- Status: *\$100,000 was set aside in the Council approved FY 2018-19 Operating Budget to commence updating plan*

# *Summary - Addressing Action Items*

- The Parks & Recreation Department has addressed, or is in process of addressing, each of the key action items for CIP planning, and park, facility and amenity development included in the Needs Assessment/Master Plan

## *Recommended Action*

- Receive an update on the current and future Carlsbad Parks inventory

*Questions?*

**Special Use/Community Parks Map**  
 Recommended Standard of  
 0.5/2.5 Acres per 1,000 Population

**Carlsbad, California**  
 Parks and Recreation Needs  
 Assessment and Action Plan

# *Parks Performance Standard*

- Initially, city was required to schedule a park for construction within five years, beginning at the time the need was identified or before the private construction of 1,562 dwelling units per quadrant
- The requirement, however, was changed per the City Council's adoption of amendments to plans

# *Parks Performance Standard*

- Change requested due to concerns linking timing of scheduling the construction of a park to the construction of 1,562 dwelling units per quadrant
  - General Plan anticipated future residential capacity in southwest & southeast quadrants to be less than 1,562

**Subject:** FW: Carlsbad DLCP-LUPA & Ponto issues resent Public Input - FW: LCPA public Comment - Low-cost Visitor Accommodations

**Importance:** High

Dear Planning Commission:

We are not 100% sure if you have received and read these emails and the attached data file with 4 key Low-Cost Visitor Accommodation issues and supporting data sets. The issues and data first sent to the City in Nov 2019 do not seem to be properly addressed in the Dec 2<sup>nd</sup> staff report to the planning Commission.

As fellow Carlsbad citizens we hope you fully consider this data and issues presented.

Thanks, and aloha aina,  
Lance Schulte

**Subject:** Carlsbad DLCP-LUPA & Ponto issues resent Public Input - FW: LCPA public Comment - Low-cost Visitor Accommodations

**Importance:** High

Dear Carlsbad City Council, City Clerk, Planning Commission, Parks Commission, Housing Commission, HEAC, CA Coastal Commission, and CA HCD:

Carlsbad Citizens first became aware (due to extensive Public Records research) of the Carlsbad's failure (current and starting before 2010) to comply with the still existing Certified Local Coastal Program Land Use and Zoning Regulations (LCP) for Ponto Planning Area F (to specifically consider and document the need for a Ponto "Public Park" prior to changing the NRR land use on Planning Area F, and also developers' Growth Management Open Space Standard (GMP) non-compliance at Ponto in 2017. Since 2017 with this awareness Carlsbad and surrounding Citizens and Visitors have repeatedly documented the need for a Ponto Park and asked the Carlsbad City Council and Staff to provide for it on Planning Area F as the exiting LCP provides for. Since 2017 over 2,800 emails/petitions have been sent to the City and CA Coastal Commission (CCC), over 200 pages of official written (emailed) data and public comments, along with numerous presentations to prior City Council meetings on the LCP and GMP.

In Dec 2, 2020 Carlsbad began the Planning Commission Public Hearing on the Staff proposed Draft Local Coastal Program-Land Use Plan Amendment (DLCP-LUPA) to propose to the CA Coastal Commission a change to Planning Area F's existing NRR land use and zoning. The flood of over 450 emailed public input for that specific meeting overwhelmed the City email server. As part of that process the City said in the Dec 2 email below it was going to post on its website all the Citizen/public input received on the DLCP-LUPA. On Dec 3 People for Ponto asked the Carlsbad City Council, City Clerk and City DLCP-LUPA Staff - would that posting would include all the LCP communications since 2017 when Citizens first became aware started Public Input to the City and CCC on the Ponto LCP issues?

**Subject:** RE: 121 undeliverable Protect Ponto petitions

To City of Carlsbad and Carlsbad Planning:

We assume when you say 'records department' you mean City Clerk?

**We also assume you mean 'all comments submitted' includes written comments and attachments; and Ponto related communications, presentations, public testimony and Public Records Requests to the City since 2017 - when Citizens first became aware of Existing Ponto Planning Area F LCP regulations and received CCC direction to the City on those Regulations? Can you please confirm this as this is all part of the Citizen comments and data that is part of the public record regarding the subject matter? The City is [using] 2015 input to justify current City Staff proposals, so the City should acknowledge and include People for Ponto Citizen input since 2017 on the same subject matter.**

Thanks,

People for Ponto

Subject: RE: 121 undeliverable Protect Ponto petitions

Hello,

*At the conclusion of the meeting all comments will be submitted to the records department. The records department will make the full record available on the city's website. At that time, I would suggest reviewing the record in its entirety to compare to what you submitted. Thank you.*

It has been almost 3-weeks without a City response to the Dec 3 email, so People for Ponto will start re-emailing to the City and CCC public input on Ponto LCP and DLCP-LUPA issues since 2017 as 'resent official Public Input' to the City Council and CCC for the upcoming City Council DLCP-LUPA Public Hearing and other City meetings dealing with land use at Ponto. This '2017-present Public Input' should be posted on the City's website as noted in the City's Dec 2 email. The 2017-present Public Input is critical because there are now different City Council and CCC members since 2017. The 2017-present public input is critical to assure a proper Public Participation process consistent with Carlsbad and CA Coastal Act principles and assure the new City Council and the current CA Coastal Commission has the information and understands the extensive amount of multi-year public input expressing concerns, needs and desires for Ponto.

Following and attached is one of those many inputs.

Sincerely,  
People for Ponto

**Subject:** LCPA public Comment - Low-cost Visitor Accommodations

Jennifer:

Attached please find Public Comments on the proposed Draft Local Coastal Program Amendment (DLCPA) to the Land Use Plan regarding Low-Cost Visitor Accommodations.

As provided in other Public Comments and expressed by several citizens at the 11-20-19 Planning Commission meeting, I along with others kindly request:

1. a publicly accessible "Redline" version of the Existing 2016 Local Coastal Program (LCP) showing the City's proposed Draft disposition of the current Existing LCP Land Use Plan, policies and data. Without a "Redline" trying to understand the proposed Draft changes is very difficult,
2. true Citizen-based public Workshops on the Coastal Act goals-policies and LCP issues focused on the limited amount of key vacant (and soon to be vacant) Coastal lands in Carlsbad – such as Ponto, and
3. A 6-month extension of time review and provide informed public comments on the Redline LCP and DLCPA, and to provide time to conduct the aforementioned Workshops.

We are still working to try to review the LCP and DLCPA documents and provide public comments on the Coastal Recreation

Thank you for including and responding to these DLCPA Public Comments and questions.  
Lance Schulte

**CAUTION:** Do not open attachments or click on links unless you recognize the sender and know the content is safe.

**Low Cost Visitor Accommodations:**

1. P. 3-3 cites CA Coast Act (CCA) Policies. But the City's proposed Local Coastal Program (LCP) Land Use Plan (LUP) in the Ponto Area, particularly for Planning Area F, appears inconsistent with these CCA policies:
  - a. Section 30213 – protect, encourage and provide Lower-Cost Visitor & Recreation Facilities.
  - b. Section 30221 – Visitor serving & Recreation uses have priority over Residential & General Commercial uses.
  - c. Section 30223 – Upland areas reserved to support coastal Recreation uses
  - d. Section 30252(6) – correlate development with Local Park acquisition & on-site recreation
  
2. Planning Area F used to be designated "Visitor Serving Commercial" as part of the original 1980's LUP and LCP Samis Master Plan for Ponto. In the 1996 this LUP was changed to the now current LCP and LUP designation of "Non-Residential Reserve" with a specific LCP requirement to reconsider a high-priority recreation or visitor serving Coastal land use while other Ponto land uses were changed to low-priority residential uses (see Poinsettia Shores Master Plan/LCP). It seems appropriated that the LUP should re-designated Planning Area F back to a Visitor Serving Commercial and Open Space ("i.e. Public Park" in the existing LCP) to provide high-priority coastal uses v. low-priority residential/general commercial uses: in part for the following reasons:
  - a. Planning Area F's existing LCP requirement requires this consideration, but the City has never disclosed this requirement to Citizens nor follow this requirement during the Cities two prior 'planning efforts' in 2010 and 2015 as documented by official Carlsbad Public Records Requests 2017-260, 261, 262.
  - b. Ponto developers (both Samis and Kaisza) were both allowed to overdevelop Ponto, by not providing the minimum Open Space required by Carlsbad's and Citizen approved Growth Management Open Space Standard. Over 30-acres of land that should have been dedicated to Growth Management Open Space (a high-priority land use) was instead allowed to be developed with low-priority residential development. If the City's Growth Management Open Space Standard was properly applied at Ponto there would be 30-acres more open space at Ponto then there is now. This is a significant impact to CCA policies that can be corrected by changes in the Ponto LUP to properly implement City Open Space Standards and CCA policies.
  - c. The LCPA acknowledges that past (2005-17) and near-term (2019-23) growth in Carlsbad visitor demand for coastal recreation and accommodations, and indicate high past hotel occupancy rates that implies current hotel supply is just meeting current demand. Although the LCPA does not discuss the high occupancy rates at the Low-Cost campground facilities, It is assumed the campground occupancy rate and demand is higher than that of hotels. This should be defined. Based on current and near term demand for visitor accommodations the LCPA states on page 3-12 "... the City should identify and designate land where new hotels and other visitor-serving uses can be developed." It is clear where he 'City should identify and designate [this] land'? What new land(s) should be so identified and designated? However, the LCPA does not disclose longer-term visitor accommodation needs beyond 2023, nor provide a long-term plan for meeting this long-term need. The LCPA should publicly disclose, analyze and provide for the longer-term (beyond present and to beyond 2023) needs for visitor Coastal accommodations, particularly Low-Cost Accommodations and Recreation needs because the LCPA's LUP is a long-term plan for Carlsbad's buildout estimated to extend beyond 2035. Also, given the fact that there are very few vacant Coastal Sites (like Ponto) that are still available to address these long-term high priority Coastal land uses – recreation and visitor serving – reserving these vacant lands for high priority coastal land uses is consistent with the CCA Policies. Following are some longer-term projections of resident demand for Coastal park and recreation needs. It seems logical that long-term visitor will increase at a similar rate as the general population increase

rate, unless our coast becomes too overcrowded and unattractive vis-à-vis other visitor destinations. A long-term visitor demand (to go with the below long-term resident demand long-term Sea Level Rise impacts) for Coastal recreation resources should be a part of the proposed LCPA and part of the long-term LUP to provide resources for those long-term needs and to mitigate for those long-term Sea Level Rise impacts.

# Increasing demand for Coastal recreational land

## Yearly Visitors to San Diego County

2016	34,900,000	
2017	34,900,000	
2018	35,300,000	
2019	35,900,000	
2020	36,500,000	= average 100,000 visitors per day
2021	37,100,000	or 2.83% of Population per day
2022	37,700,000	or 1,316 Visitors/coastal mile/day

Typically around 1.6% annual increase in visitors

San Diego Tourism Authority, San Diego Travel Forecast, December 2017

- d. City in the LCPA inaccurately analyzes and misrepresents how much Visitor Serving Accommodations, particularly Low-Cost Accommodations, Carlsbad currently provides on a relative or comparative basis. The LCPA's inaccurate and simplistic analysis does not adjust for the different sizes of the Coastal Zone in the 3 cities (Carlsbad, Oceanside and Encinitas) used in the analysis. Carlsbad's Coastal Zone is significantly larger than both the other cities, so it has more land and accommodations, just like San Diego's Coastal Zone is larger than Carlsbad's and San Diego is larger than its smaller neighbors Del Mar and National City. A simplistic how many accommodations are in your adjacent cities is an inappropriate analytical method for Carlsbad-Oceanside-Encinitas; just as it is inappropriate to compare the number of San Diego's hotels with the number hotels in San Diego's smaller neighbors Del Mar and National City. The accurate method to do a comparative analysis is based on a common denominator, such as the amount of accommodations per 1,000 acres of Coastal Zone land along with comparing each city's relative percentages. This is a more accurate and appropriate analysis that the LCPA should provide, and not that provided on page 3-13. The LCPA analysis also does not fully discuss and compare "Low-Cost" accommodations that are part of the CCA policies; nor provide a mitigation approach for "Low-Cost" accommodations lost, just 'Economy hotel rooms'. Below is data from the LCPA and other LCPs that shows the proper and more accurate comparison of existing Visitor Serving Accommodations in Carlsbad-Oceanside-Encinitas and includes Low-Cost Accommodation numbers/comparisons that are totally missing in the LCPA analysis. As the data shows, Carlsbad does not perform as well in Visitor Accommodations, and most particularly in "Low-Cost Visitor Accommodations", as the LCPA states and proposes in the LUP relative to Oceanside and Encinitas. An honest analysis like below should be provided in the LCPA LUP, particularly given the very limited amount of vacant Coastal land left to provide for high-priority Coastal Uses. Ponto is one of the last remaining vacant Coastal areas.

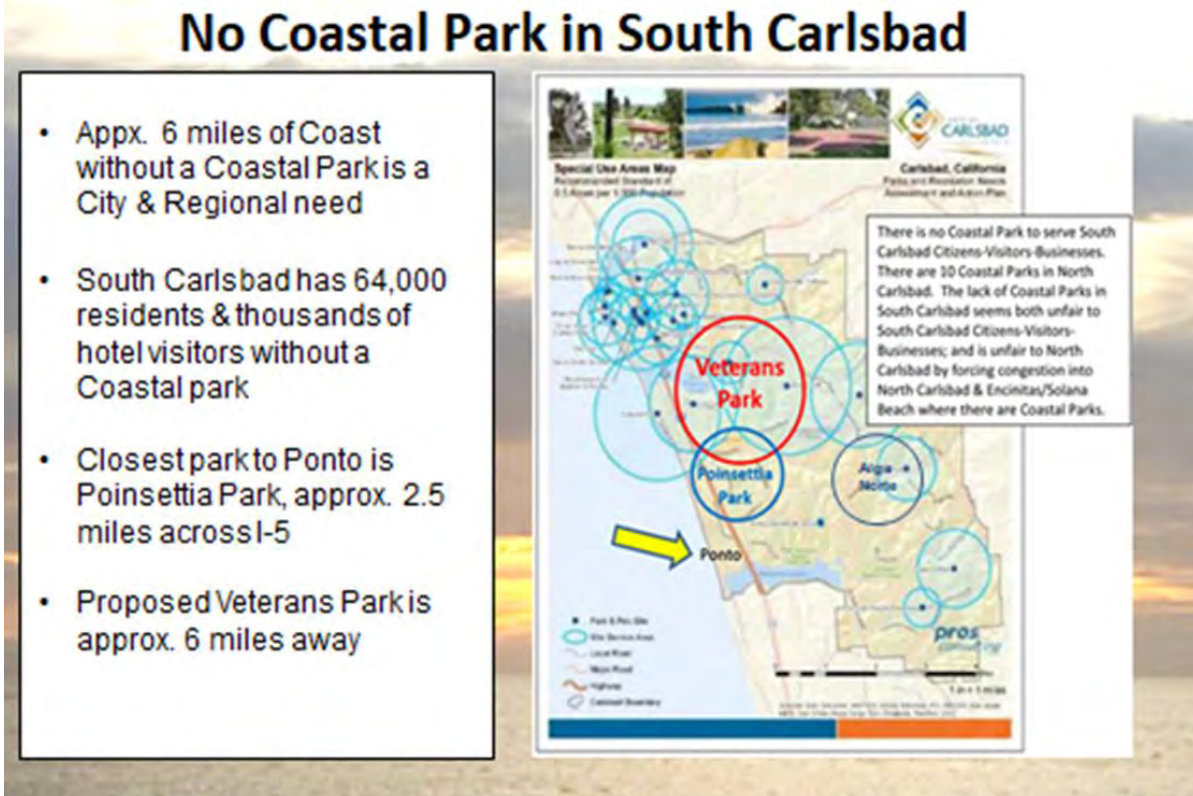

Carlsbad's proposed 2019 LCPA uses comparative 3-city data to address how Carlsbad's 2019 LCPA addresses Visitor Serving Accommodation needs. "Low-Cost" Accommodations are an important CA Coastal Act issue

<u>Visitor Serving Accommodations (VSA) data</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>		<u>Data source</u>
Coastal Acres (i.e. in Coastal Zone)	9,216	1,460	7,845		Carlsbad Draft LCPA 2019 & Oceanside & Encinitas LCPs
VSA rooms: total	3,211	975	634		Carlsbad Draft LCPA 2019, pp 3-12 - 15
VSA rooms: Economy	589	346	346		Carlsbad Draft LCPA 2019, pp 3-12 - 15
VSA rooms: Low-Cost (campsites)	220	272	171		Carlsbad Draft LCPA 2019, State Parks, Oceanside & Paradise-by-the-sea data Carlsbad Draft LCPA 2019 does not evaluate other City's Low-Cost Accommodations
				3-city	
<u>Data analysis</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>	<u>Average</u>	<u>Key Findings</u>
<b>VSA rooms/1,000 Coastal acres</b>	<b>348</b>	<b>668</b>	<b>81</b>	<b>366</b>	<b>Carlsbad provides overall Visitor Accommodations at slightly below the 3-city average</b>
<b>% of VSA rooms that are Economy</b>	<b>18%</b>	<b>35%</b>	<b>55%</b>	<b>36%</b>	<b>Carlsbad provides a percentage of Economy Accommodations about 50% below the 3-city average</b>
<b>Economy VSA rooms/1,000 Coastal acres</b>	<b>64</b>	<b>237</b>	<b>44</b>	<b>115</b>	<b>Carlsbad provides Economy Accommodations about 50% below the 3-city average</b>
<b>% VSA rooms that are Low-Cost</b>	<b>7%</b>	<b>28%</b>	<b>27%</b>	<b>21%</b>	<b>Carlsbad provides a percentage of Low-Cost Accommodations about 66% below the 3-city average</b> Carlsbad LCPA also does not provide protection for loss of "Low-Cost" campground rooms, only "Economy hotel rooms"
<b>Low-Cost VSA rooms/1,000 Coastal acres</b>	<b>24</b>	<b>186</b>	<b>22</b>	<b>77</b>	<b>Carlsbad provides Low-Cost Accommodations about 70% below the 3-city average</b>

- e. The LCPA is not providing for any new "Low Cost Visitor Accommodation" land uses in the proposed LUP for current/long-range needs, even though page 3-12 points out the current demand for accommodations, and the current Existing LCP has polices to increase "Low Cost Visitor Accommodation" land uses. We

understand that “Low-cost Visitor Accommodation” occupancy rates at CA State Campground at near 90%. This occupancy rate is much higher [signifying higher demand] than the occupancy rates of both the hotels, and “Economy Visitor Accommodations” which the LCPA seeks to protect. The Proposed LCPA LUP should provide historic and current “Low-cost Visitor Accommodation” occupancy rate data at CA State Campground and compare to occupancy demand for other accommodations to determine the highest occupancy demands and therefore needs. Why is the Proposed LCPA LUP not protecting AND EXPANDING (for future growth and visitor demand) the supply of this higher demand for “Low-cost Visitor Accommodations” at the State Campground, particularly given the Current Existing Carlsbad LCP policies on this issue, long history of this issue documented in the Current Existing Carlsbad LCP Mello II Segment, and the fact that “Low-cost Visitor Accommodations” are a Statewide ‘high-Coastal-priority’ land use in CA Coastal Act Goals and Policies? Why is the proposed LUP not recognizing and incorporating these issues? The Current Existing Carlsbad LCP policies [see Existing Carlsbad LCP Mello II Segment polies 2.3, 4.1, 6.1, 6.4, 6.5, 6.9, 6.10, 7.5, and 7.15 for example] are not referenced and discussed in the Proposed LUP nor is a comprehensive long-term analysis of the impact of the proposed LUP’s elimination of theses Current Existing Carlsbad LCP policies vis-à-vis the CA Coastal Act Goals and Policies? How and why is the City proposing changes to these Existing Carlsbad LCP policies in the Mellow II Segment, particularly given the improved knowledge about Sea Level Rise, and Sea Level Rise and Coastal Bluff erosion impacts on the State Campground’s “Low-cost Visitor Accommodations” - High-Coastal-Priority land use under the CA Coastal Act?

- f. At Ponto there is no low-cost/no-cost Recreational use as shown by the City of Carlsbad’s adopted Parks Master Plan (pp 87-89) that show the City’s adopted Park Service Areas in the following image. The image’s blue dots are park locations and blue circle(s) show the City’s adopted service areas:

Per the current Existing LCP requirements for Planning Area F at Ponto an “(i.e. Public Park)” must be considered. How is the Proposed LCPA LUP not reserving Upland Areas at Ponto for recreational uses given

Sea Level Rise and Coastal Bluff erosion impacts as shown in Proposed LCPA LUP Attachment B, and Exhibits B6 and B7? There is very limited amount of vacant Upland Coastal land at Ponto and South Coastal Carlsbad to accommodate low-cost/no-cost Recreational use "(i.e. Public Park)", so why is this last remaining vacant Coastal land at Ponto not being reserved for "high-Coastal Priority Land Uses"? Why is the Proposed LCPA LUP proposing this last remaining vacant Coastal land at Ponto be converted from "Non-residential Reserve" to 'low-coastal-priority residential and general commercial land uses'?

3. The proposed LCPA approach to protect existing 'economy hotels' but not 'Low-cost Visitor Accommodations' appears inappropriate. Existing hotel owners providing 'Economy' rooms are penalized while all other more expensive 'non-economy hotel' owners are not required to mitigate for their not providing more affordable accommodations. It seems like a fairer and rational approach is to use the same framework as the City's inclusionary affordable housing requirements and have the requirement and burden of providing affordable accommodations required by all visitor accommodation providers, including short-term rentals of residential homes. Use of any per accommodation "in-lieu fee" should be SUFFICIENT TO FULLY MITIGATE for not providing a required affordable accommodation by being sufficient to fully fund a new 'affordable accommodation' on a one-for one basis. City Transit Occupancy Tax revenues could also potentially be used to provide a catch-up method for existing "non-low-cost and/or non-economy accommodation providers" to address what would nominally be their inclusionary contribution. It seems like the LCPA approach needs significant rethinking to provide a rational program to include reasonable long-term and sustainable affordability in visitor accommodation's, particularly give the Sea Level Rise and Coastal Bluff Erosion impacts on Carlsbad's Only "Low-cost Visitor Accommodations" and the State Campground and beaches and Carlsbad's Coastal access roadways.
4. The Proposed LCPA LUP does not provide a means for citizens to understand the proposed changes to the current Existing LCP goals and policies. There are numerous current Existing LCP goals and policies regarding "Low-cost Visitor Accommodations". These all should be listed in the Proposed LCPA LUP along with a description on how and why these current Existing LCP Goals and policies are being modified or removed in the Proposed LCPA LUP.

**Subject:** Protect Ponto \*\*\* Please read into general public comment January 13, 2021\*\*\*\*

Dear Planning Commission, Mayor Matt Hall, City Council, and CA Coastal Commission

I was inspired to hear the conversation at last week's meeting around the meaning of "should" vs "could" relating to the phrase "The City *SHOULD* add more hotels" in the Draft LCP and I applaud the Commissioners remarks that just because we 'could' do something, doesn't mean that we 'should' do it.

Similar sounding words with extremely different meaning and impact on the future of Carlsbad.

Just like with Planning Area F/ Ponto – we 'could' keep the wrongfully done land use change in place as staff suggested but that absolutely does not mean we 'should'. There have been admitted planning mistakes done at Ponto when The City changed the land use away from "nonresidential reserve" without going through the proper channels and Coastal Commission- not correcting those now is absurd. The way I grew up was when you make a mistake, you fix it. You don't keep forging ahead on the wrong path just because you took a wrong turn. You correct and do what's right.

The people of Carlsbad ask you to act to **Protect Ponto**. I ask you to **Develop Ponto Right** and remove land change proposed at Planning Area F from the DLCP.

I request that my comments be put on record in the official public records for ALL things Planning Area F, including the official public records for Carlsbad's Draft Local Coastal Program Amendment, and Parks Master Plan Update; and the CA Coastal Commission's consideration of Carlsbad's Draft Local Coastal Program Amendment.

Thank you

T. Rassman  
Carlsbad, CA

**Subject:** 1/26/21 City Council meeting - Public input on Carlsbad DLCP-LUPA & Ponto issues

Dear City Council, Planning Commission, Parks Commission, & Beach Preservation Commission; CA Coastal Commission and State Parks:

Please consider this email and attached letter as input into the DLCP-LUPA and other Ponto issues.

Ponto Coastal Park is an investment not only for Carlsbad citizens and their children, but also benefits Carlsbad visitors and the businesses that serve those visitors. The quantity, quality and equitable distribution of Carlsbad's Coastal Recreation Parks are important investments in our social and economic sustainability, and Ponto Park is the most cost-effective investment toward that end.

If the City Council acquires it, Ponto Park, will be a great investment and opportunity to bring citizens, business and the City together to a create something truly special at Ponto. People for Ponto has had some great conversations with our Carlsbad visitor industry on the many wonderful opportunities a Ponto Park investment creates.

We hope you see and invest in those opportunities. People for Ponto has identified how the City can do that and do so in a very cost effective way.

Sincerely,  
Lance Schulte  
People for Ponto

CAPE REY™  
**CARLSBAD BEACH**  
A HILTON RESORT & SPA

Dear People for Ponto,

In regards to Ponto Planning Area F, Cape Rey Carlsbad Beach, a Hilton Resort and Spa would be in favor of the idea of implementing a Coastal Park in the referenced area notwithstanding any objections from the City of Carlsbad, State of CA, and CA Coastal Commission. The hotel is supportive of preserving any vacant coastal land for visitor serving purposes that will beautify and enhance the surrounding area and create more attraction for South Carlsbad. We welcome the voice of the citizens of Carlsbad to participate in the development of Ponto and look forward to collaborating on the future of the area.

Sincerely,

Bill Canepa

**Subject:** 1/26/21 City Council meeting - Public input on Carlsbad DLCP-LUPA & Ponto issues - PA F is for sale

Dear City Council, Planning Commission, Parks Commission, & Beach Preservation Commission; CA Coastal Commission and State Parks:

Please consider this email and attached letter as input into the DLCP-LUPA and other Ponto issues.

In February 2019, Shopoff recorded the Quit Claim of their interest in Ponto Planning Area F and abandoned their Carlsbad Planning Applications to change the LCPA and Master Plan Amendment and then development permit applications. Although the past 2-years have seen no applicant activity, the City is keeping the application active and now City Staff is processing the LCPA and Master Plan Amendment for Planning Area F.

Since 2019 Ponto Beachfront Park, Inc. 501c3 (PBP 501c3) has been working with the property owner's representative to see if we could get definition of sale price and terms so PBP 501c3 could start donor fundraising to help purchase Planning Area F for much needed public park. The attached file summarizes the status of that effort to date. Planning Area F is still for sale, if the City is interested in talking with the landowner.

Sincerely,  
Lance Schulte

## **MEMORANDUM REGARDING PONTO BEACH PROPERTY**

This is to provide a summary of my discussions with the real estate broker who has the listing of a parcel of land adjacent to Ponto Beach comprised of 11.04 acres (APN 216-140-43-00) (“Property”) which includes 6.5 acres which would be ideal for the much-needed public park in the Southwest quadrant of Carlsbad. My discussions have been with Jeff Adkison who is the Managing Director of Jones, Lang La Salle, Americas (“JLL”) in Los Angeles as the property owner’s agent in selling the property. LSF5 CARLSBAD HOLDINGS, LLC, a Delaware limited liability company, is the owner of the Property.

I am both a real estate attorney and a real estate broker and have been acting on a voluntary basis for Ponto Beachfront Park, Inc. a 501c3 company whose mission is to work to promote the development of the park. I live in the San Pacifico community within two blocks of the Property.

For reasons unknown to me, JLL does not have the Property on either LoopNet or CoStar which are the leading platforms for listing commercial property or vacant land. Having said that the Property is clearly for sale and is not under contract at this time. I am told that the current owner is highly motivated to complete a sale of the Property as soon as possible.

We have been diligently pursuing the potential acquisition of the Property for more than a year and I have had many conversations with the listing broker and have submitted two written proposals which although not formal offers indicate our desire to facilitate a purchase of the Property. They have been reluctant to respond to us in writing without a formal offer but have through their broker continued to engage in discussions.

I would be happy to discuss this matter further and provide assistance in securing the Property for the purpose of developing Ponto Park.

**Subject:** 1/26/21 City Council meeting - Public input on Carlsbad DLCP-LUPA & Ponto issues - Park Hyatt Ponto Park support letter

Dear City Council, Planning Commission, Parks Commission, & Beach Preservation Commission; CA Coastal Commission and State Parks:

Please consider this email and attached letter as input into the DLCP-LUPA and other Ponto issues.

Ponto Coastal Park is an investment not only for Carlsbad citizens and their children, but also benefits Carlsbad visitors and the businesses that serve those visitors. The quantity, quality and equitable distribution of Carlsbad's Coastal Recreation Parks are important investments in our social and economic sustainability, and Ponto Park is the most cost-effective investment toward that end.

If the City Council acquires it, Ponto Park, will be a great investment and opportunity to bring citizens, business and the City together to a create something truly special at Ponto. People for Ponto has had some great conversations with our Carlsbad visitor industry on the many wonderful opportunities a Ponto Park investment creates.

We know if Carlsbad's City Council invests in Ponto Park and so invests in its South Carlsbad citizens and businesses, we together can create a special World-Class Coastal Park.

We hope you see and invest in those opportunities. People for Ponto has identified how the City can do that and do so in a very cost effective way.

Sincerely,  
Lance Schulte  
People for Ponto

Carlsbad, CA 92008

RE: *People for Ponto Coastal Park*

Dear Mayor Hall & City Councilmembers,

On behalf of Park Hyatt Aviara Resort, Golf Club & Spa, we are proud to be a part of such a special coastal community as the City of Carlsbad, our South Carlsbad community and to work closely with the Batiquitos Lagoon Foundation & many other community partners in continuing to protect the natural areas of Carlsbad.

We feel that to create special open spaces for residents and visitors alike to enjoy the beauty of our city is extremely important. We agree that the Ponto Coastal Park would be a special and unique amenity offered in our fine city. We feel that should the City Council, California Coastal Commission and, most important, the Residents of Carlsbad, support a coastal recreation park at Ponto Beach, it would be a defining beacon for the City.

Respectfully,

Geoff Gray  
General Manager  
Park Hyatt Aviara Resort, Golf Club & Spa

**Subject:** 1/26/21 City Council meeting - Public input on inconsistencies apparent in the 1-26-21 Staff Report on Carlsbad DLCP-LUPA & Ponto issues

**Importance:** High

Dear City Council, Planning Commission, Parks Commission, & Beach Preservation Commission; CA Coastal Commission and State Parks:

After review of the recently released staff report, please consider this email and attached 7-pages of Staff Report Review Comments as public input for the 1/26/21 item#12 Ponto agenda item, and also for the Carlsbad proposed Draft Local Coastal Program-Land Use Plan Amendment (DLCP-LUPA). The Review Comments list concerns on inconsistencies apparent in the 1/26/21 Staff Report on the DLCP-LUPA and related Ponto issues.

The staff report seems to have several critical inconsistencies with other City documents and past CA Coastal Commission (CCC) actions/direction. These inconsistencies seem to suggest inaccurate limitations on City Council discretion to key Ponto issues. These inconsistencies are significant, and seem to require further analysis by the City Council. The inconsistencies also involve the CCC and documented CCC actions at Ponto and in Carlsbad's entire Coastal Zone. It seems prudent for the he City Council should get clear documented direction from the CCC on the CCC related inconsistencies apparent in the staff report. In addition some of the issues raised in the staff report relate to current litigation. As noted below apparent staff report's inconsistencies noted below are significant and it appears they should be fully researched by the City Council, and verified by the CCC.

As 34-year Carlsbad citizen I love Carlsbad. As a prior Carlsbad city planner, I helped plan some great futures and great development projects for our city and citizens. As such I know, as do many other Carlsbad citizens, how important Ponto and a much needed and requested Ponto Park is to our citizens, city, and future Carlsbad (and California) generations. The Review Comments are intended to help the City Council, City and CCC in understanding and addressing the Ponto Park and Ponto issues.

Sincerely,

Lance Schulte

#### Staff Report

Page statement/review comment

---

5 Staff report statement: “Nowhere in the policy does it require that the entire site be considered a public park; in fact, the Ponto Beachfront Village Vision Plan conceptualizes a small “wetland interpretative park” located within an area planned for a mixed-use center that includes three-story developments that provide shops, eating and services, while also providing housing opportunities.”

“It is important to note that the city’s current Local Coastal Plan includes Carlsbad Municipal Code Section 21.090, which implements the city’s Growth Management Plan.”

Review comments: There is difference in interrupting the policy. Nowhere in the policy does it say the entire site cannot be required to be considered for a public park. The City Council has discretion on this issues, as does the CCC.

Staff’s limiting interruption does not seem logical and supported by the simple reading of the words and intent the policy. Staff’s limiting interruption also seems contrary to the exact specific CCC findings in denying the City’s application in 2010 to have that Ponto Vision Plan ‘certified’ by the CCC. A 5-page data file submitted to the Council on Dec 2, 2020 lists the exact language of the 2010 CCC’s denial of the Ponto Vision. It should be reviewed by the City Council.

Ultimately it will be the CCC that determines what the LCP policy means. In 2017 the CCC sent direction to the City specifically on this issue. This CCC direction seems to conflict with Staff’s interruption.

In reviewing the CCC’s 2010 denial of the Ponto Vision Plan citizens meet with CCC staff in 2017 to see if the City ever complied with the Planning Area F LCP policy during the 2015 General Plan Update and land use map change. We meet with CCC staff because we had never before heard from the City about this LCP policy and requirements both during the City’s Ponto Vision Plan planning activities, and also during the General Plan Update planning activities in 2015. Citizens only became aware of the LCP policy in 2017.

As citizens we know the past Public Participation outcomes for both the Ponto Vision Plan and General Plan Update would have been different if Carlsbad citizens were actually informed about the LCP policy. This is why there is so much citizen input now. If citizens knew about the LCP policy during the Ponto Vision Plan and General Plan Update processes the outcomes of those processes would be different. Official Carlsbad Public Records Requests 2017-260, 2017-

262, R000930-072419, R001280-021720, and R001281-02170 confirmed there was no public disclosure and public discussion to “consider and document the need” per the policy. This is again specifically documented in the CCC’s 2010 denial of the Ponto Vision Plan that is the exact basis for the General Plan Update. This is why citizens think there were ‘Ponto planning mistakes’, based on a flawed public disclosure and participation planning process.

The CCC provided the following statement on 8/16/17: “The City is currently undertaking a comprehensive update to their LCP funded in part through a CCC grant. As a part of this process the City will be consolidating all previous LCP segments into a single, unified LCP. **The City has received direction from both the Commission (May 2016 CCC hearing) and Commission staff, that as a part of this update the City shall undertake an inventory of visitor serving uses currently provided within the City’s Coastal Zone which will then serve to inform updates to the City’s land use and zoning maps as necessary. This inventory could have future implications for the appropriate land use and zoning associated with the Ponto area.”**

The City Council received these directions from City Staff at 1/28/20 Council meeting. CCC direction is: “**The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto/Southern Waterfront area. For example, Planning Area F requires the city and developer to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.** This is an issue that the San Pacifico HOA community group is raising in regards to the Shopoff/Ponto development proposal, and this study should be undertaken as a part of the visitor serving use inventory analysis described above. **If this analysis determines that there is a deficit of low cost visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed.”**

Staff report statement: “During a Planning Commission meeting in 2019, staff acknowledged that Policy A.10 of the Local Coastal Plan did not get updated when the General Plan and Local Coastal Plan Land Use Map designations were updated in 2015 with the residential and commercial designation, which has led to public confusion. While this may have been an oversight, it is not a “planning mistake” as several correspondences have stated, nor does it nullify the 2015 General Plan and Local Coastal Plan land use plan changes that the City Council and Coastal Commission approved. As discussed in more detail in the section below, an analysis has been completed and staff has found that the city is not deficient in meetings its open space or park obligations under the city’s Growth Management Plan.”

Review comments: The statement is inconsistent with the facts that the land use map update was just that ONLY a land use map update that was CONTINGENT on future evaluation of the a complete LCP-LUPA by the CCC. As the CCC stated in 2016 and 2017 the land use map could change as a result of the DLCP-LUPA process now underway. The City and CCC, or the CCC can change or decertify the Coastal Land Use Map.

The City never submitted the City’s Growth Management Plan (GMP) for CCC certification as an LCP component in addressing CA Coastal Act Policies. As such the City cannot use the GMP for LCP purposes. If the City is now proposing that the GMP be incorporated in the LCP in addressing the Ponto issues it needs to now submit the GMP as part of the DLCP-LUPA. The CCC

can only evaluate what the City submits as a proposed LCP, if the City is not submitting the GMP as part of the LCP, then the GMP is irrelevant to the LCP. The CCC uses the CA Coastal Act to measure and test the adequacy of the of the city's proposed DLCP-LUPA application.

The City never submitted the GMP Citywide Facilities Improvement Plan (CFIP) nor all the Local Facilities Management Plan (LFMP) in the Coastal Zone for LCP Certification by the CCC. The Existing LCP, to our knowledge, has no mention of the City's GMP being certified by the CCC. A specific citation of the City's entire GMP being a CCC Certified component of the existing LCP is needed to justify the discussion on pages 5-6. The LCP for Ponto has no mention of the GMP complying with the Coastal Recreation (i.e. Public Park) requirement. Again as noted in the CCC's 2010 denial of the Ponto Vision Plan, the GMP was never referenced by the City as its LCP nor was the GMP used by the CCC in evaluating and rejecting the Ponto Vision Plan. There are inconsistencies in the 2021 Staff report's statements relative to over 30-years of the City GMP practice relative to the LCP and required CCC review of LCP changes.

Also, in reading the Existing "the City Carlsbad Local Coastal Program 2019" at <https://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=24088> there is no adoption/Certification citation indicating 21.090 or the CFIP and LFMPs in the Coastal Zone are in the existing Certified LCP, and the text of Carlsbad's Existing LCP excludes 21.090.

6 Staff report statement: regarding the Performance Standard for Open Space paragraph.

Review comments: The references to LFMP Zone 9 exemption from the GMP Open Space Standard is subject to current litigation. As such the references in the staff report may or may not be proven to be accurate.

The following, like the staff reports statements will be ultimately be addressed in the current litigation. However, I was a Carlsbad City Planner during that time and offer some thoughts simply for Council consideration. I seem to recall: the Open Space the City Staff cites were already dedicated Open Space prior to the GMP. The lagoon waters and lagoon bluffs were pre-zoned Open Space prior to being annexed into the City of Carlsbad. The GMP should have recognized these Constrained and unbuildable open space lands and water as part of the 25% of the City that was already unbuildable Open Space before the City started the GMP. The GMP Open Space Standard was to require an additional 15% of Unconstrained (developable land) as Open Space. That is what the GMP Open Space Standard is. The LFMP Zone 9 exemption of this 15% Unconstrained (developable) GMP Open Space Standard references a specific project the BLEP. I think the BLEP had a lot of GMP-compliant Open Space that met the Open Space Standard in its educational campus and sports fields. This could be reviewed. As mentioned the Constrained lagoon water and bluffs were already dedicated Constrained Open Space and maybe Pre-BLEP. The BLEP was never built, and its GMP-compliant Unconstrained GMP Open Space was also never built. The BLEB land uses were replaced by the PSMP land uses, and the BLEP's GMP-compliant Open Space was removed. This seems why the City's GIS mapping system records a 30-acre deficit of GMP compliant/Standard Open Space in LFMP Zone 9. Anyways, as noted the issue of if LFMP Zone 9 was/is now being falsely exempted from the GMP Open Space Standard is subject to and will be determined in litigation.

In reference to the staff reports statement on page 5, CMC 21.090 also has specific requirements for non-compliance with GMP Standards. If 21.090 is CCC Certified as an LCP, the

CCC may have concerns about the City non-compliance with 21.090 in LFMP Zone 9, particularly for Unconstrained Open Space that can provide high-priority Coastal Recreation. From a practical matter the City GIS clearly documents that LFMP Zone 9 does not provide 15% Unconstrained Open Space to meet the GMP Standard. There should be about 30 more acres of Unconstrained Open Space in LFMP Zone 9 to meet that Standard. There is no provision in 21.090 that allows a GMP Standard to be met with a land that is not compliant with that Standard. 21.090 and development of Ponto Planning Area Requires a formal LFMP Zone Amendment, and such an application is on file with the City. The LFMP Zone Amendment is required to address GMP Standards from a new land use in the proposed land use change and increased impacts in Ponto Area F from 'Non-residential Reserve' to the proposed R-23/General Commercial. 21.090 requires GMP Standards to be met. The staff report indicates the CCC will also need to review and Certify the LFMP Zone 9 Amendment if 21.090 is a CCC Certified part of Carlsbad's existing LCP.

As mentioned the issue is subject to litigation and subsequent court decision.

- 7 Staff report statement: regarding the Performance Standard for Parks paragraph. "Does the City Council want to exceed the Growth Management Plan's park standards for the Northwest Quadrant and LFMZ9 to purchase this site as a public park?"

Review comments: The references to Parks compliance with the GMP Standard I understand is also subject to current litigation.

As noted earlier, the question of if the City's entire GMP and its Park issues are already a CCC Certified LCP land use plan need to be formally confirmed, or refuted, by the CCC.

The City Council has the authority to make city park investments above the modest 3-acre per 1,000 population minimum standard. The City Council did this in the Poinsettia 61 project that increased Parkland in the NW quadrant for increased development in the SW quadrant, even though the NW already had parkland over and above the minimum standard.

A variety of viable funding options for City purchase Planning Area F are possible. These options also may provide opportunities to bring to the City outside funds that would reduce City costs. If City Council desires we can sit down with City Council and Staff to discuss the options and opportunities.

- 8 Staff report statement: regarding the 'Potential public vote requirement. No explanation as to why CMC 1.24 (1982) was never updated to the voter approved amendments to CMC 1.24 in 2002 Proposition C.

The staff report says: , " ... to purchase the properties for **natural** open space and trails connectivity purposes. **It does not appear acquisition of Ponto would qualify under Proposition C because it is being discussed for development as a park and not as natural open space.** The property **likely does not qualify as natural open space** due to its prior use as farmland and disturbance of the site, as confirmed in a 2017 report."

Review comments: The statements regarding CMC 1.24 (1982) do not acknowledge that the City failed to amend CMC 1.24 in 2002 to incorporate the 2002 voter approved responses to CMC

1.24. It is unclear why the CMC 1.24 was never amended to comply with the voter approved revisions to CMC 1.24.

The reference to “**natural**” open space being a requirement of Proposition C is not true. In a reading of the “City Attorneys Impartial Analysis” and the City Council’s “Argument in Favor” of 2002 Proposition C, there is no mention of “**natural**” open space as the only “Open Space” that can be funded by Proposition C.

The words of Proposition C clearly state in the City Attorneys Impartial Analysis says “Trails, linkages and **open space**”, and the City Council’s Argument in Favor of Proposition C state that “Trails and Open Space – Carlsbad residents have repeatedly said that creating trails and **preserving open space** is their top priority. A YES vote will provide funding for both linkages and **open space acquisition projects.**” There is no ‘natural open space’ limitation in Proposition C (see attached copy of 2002 Proposition C downloaded from City of Carlsbad website).

The staff report inaccuracy regarding ‘Natural’ are also refuted on the Carlsbad City website: <https://www.carlsbadca.gov/services/depts/parks/open/openspace/questions.asp>. The City’s website verbatim states:

**“What is open space?”**

The City of Carlsbad’s General Plan defines open space as “**any area of land or water which, for whatever reason, is not developed for urbanized uses and which therefore enhances residents' quality of life.**” The open space, conservation and recreation element of the General Plan lists four categories of open space: open space for preservation of natural resources, open space for managed production of resources, **open space for outdoor recreation**, and open space for aesthetic, cultural and educational purposes. Vacant lands designated for future growth are generally not considered open space.

**What was Proposition C?**

In Carlsbad, the City Council cannot authorize the spending of more than \$1 million of general fund money for property acquisition or improvements without prior approval from voters. **In 2002, voters passed Proposition C, which allowed the City Council to exceed the \$1 million amount on four projects:** the City of Carlsbad Safety Training Center, a new swimming pool complex (Alga Norte Community Park), an extension of Cannon Road, **and acquisition of open space and trails.** Proposition C did not direct the City Council to spend a specific amount of money on open space and trails by a certain time. Instead, it provided voter authorization to spend more than the \$1 million limit if one or more properties became available and the city felt it was in the taxpayers’ best interest to purchase it for open space/trails purposes.

**What is the city’s approach to identifying land that could be purchased by the city as open space?**

One chief factor considered is whether a potential property for open space will add to our quality of life at a reasonable cost. In 2005, after passage of Proposition C, the City Council appointed the Open Space and Trails Ad Hoc Citizens Committee to establish and rank a list of potential acquisitions. Some of the property on that list has been acquired. The Ad Hoc Committee is no longer active, **but the city regularly reviews available land – land identified by the committee and other land – to determine whether it’s in the taxpayers’ best interests to purchase as open space. When appropriate, the city approaches land owners to discuss**

**interest in selling.** The city also relies on partnerships to acquire open space. For example, developers in Carlsbad are required to set aside open space as part of their developments and to pay for the upkeep of that open space. In this way city residents get the benefit of the open space without the expense. Sometimes the city teams with a private foundation or other public agency to pool resources to preserve open space. And in some instances another public agency, such as the California Department of Fish & Game, owns and maintains the open space.”

The City & North County Advocates (NCA) signed a Lawsuit Settlement Agreement regarding the 2015 General Plan Update. This Agreement requires the City to meet and collaborate with NCA as the successor entity to the Ad Hoc Committee every 6-months regarding Open Space acquisitions under Proposition C. This requirement is in Agreement’s Section 4.3.15 (pages 12-14). In following this Agreement, in 2020 NCA recommended to the City Staff that the Planning Area F Ponto Park should be acquired via Proposition C’s exemption for acquisition of Open Space. The site is also adjacent to and includes some natural habitat.

The City’s website says: **“When appropriate, the city approaches land owners to discuss interest in selling.”** People for Ponto has communicated since 2019 that there is a willing seller, as the landowner has been trying – and is still trying- to sell the land.

**Staff report statement:** regarding the ‘Area identified for needed housing’,

**Review comments:** The City has already done this in the Draft Housing Element by providing other sites for rezoning. The City has a General Plan Amendment in the works for West Oaks in the SW Quadrant that would convert Industrial land to Residential land use. This change will also increase Park demand for the SW Quadrant where Ponto Planning Area F is located. The West Oaks GPA exemplifies the importance of providing a Coastal Park for the SW Quadrant and other Draft Housing Element planned residential increases in South Carlsbad. The people in these new homes need a Coastal Park to go to. Ponto Planning Area F is he last viable opportunity to provide that. Housing can be located in many places in the City, there are only a few locations to provide a Coastal Park so inland residents and the children can access Coastal Recreation. It is a matter of priority.

Regarding SB 166, the language actually says: “ (b) (1) No city, county, or city and county shall, by administrative, quasi-judicial, legislative, or other action, reduce, or require or permit the reduction of, the residential density for any parcel to, or allow development of any parcel at, a lower residential density, as defined in paragraphs (1) and (2) of subdivision (g), **unless the city, county, or city and county makes written findings supported by substantial evidence of both of the following:**

**(A) The reduction is consistent with the adopted general plan, including the housing element.**

**(B) The remaining sites identified in the housing element are adequate to meet the requirements of Section 65583.2 and to accommodate the jurisdiction’s share of the regional housing need pursuant to Section 65584.** The finding shall include a quantification of the remaining unmet need for the jurisdiction’s share of the regional housing need at each income level and the remaining capacity of sites identified in the housing element to accommodate that need by income level.”

As documented to the City in a 20-page data set emailed on Nov 30, 2020, it is questionable if Ponto Planning Area F is in fact actually adopted in the General Plan, as the City’s LCP Land Use

Plan Amendment is in process, and yet to be considered by the City Council. As page 2-26 of Carlsbad’s 2015 General Plan Land Use Element clearly states: **“The city’s LCP Land Use Plan will be updated consistent with this General Plan. However, to take effect, the LCP must be certified by the Coastal Commission as well as adopted by the city. Until such time that this occurs, the existing (as of 2013) LCP must be adhered to.”** The CCC has yet to certify the City’s Land Use Plan, and in fact the City Council has yet to even adopt a proposed DLCP-LUPA to submit to the CCC. The land use map, was just that a map. It was not a Land Use Plan. The CCC in its aforementioned 2017 direction to the City clearly indicates that the CCC in considering (likely in 2021 or 22) the DLCP-LUPA the CCC may require the City’s General Plan land use map to change at Ponto to provide for high-priority Coastal Recreation (i.e. Public Park) or Low-cost Visitor Accommodation land uses.

Regardless, as noted by some council members and the Planning Commission the City Council could adopt a General Plan Amendment as required by SB166 (A). The Nov 30, 2020 20-page data set also shows the City has more than enough housing sites identified in its Draft Housing Element to meet its regional housing need required for the 2<sup>nd</sup> SB166 (B) finding in above to allow Planning Area F to be Ponto Park.

9 Staff report statement: regarding the ‘Current permit application to develop site’.

Review comments: The staff report does not disclose that the application also includes a LCPA. Carlsbad tax-payer dollars are being used to pay for City Staff to process for the developer both the LCPA and basic zoning of the Master Plan Amendment. The use of tax-payer dollars for this purpose is subject to the City Council consideration, but maybe conflict with the California Constitution prohibition of the ‘gift of public funds’.

**Subject:** Jan26th Agenda item 12 - Protect Ponto

Dear Mayor, City Council, Planning Commission and CA Coastal Commission

*I request that the City Council direct staff to research and provide options to acquire Planning Area F for Ponto Park. And that The City Council directs staff to consult with People for Ponto Carlsbad citizens organization on the data and resources they have collected that can assist the Staff and the Council with these options.*

I have lived in Southern CA for 30 years and in Carlsbad for the last 4. This is an amazing city, but I know it can be so much more, we have an obligation to our children & all those that come to enjoy the coast line to make it more.

The land at Ponto (Planning area F) is a prime location to do **something amazing** with, something that matters and inspires joy. I am aware that the land is for sale and DO NOT wish to see a developer turn it into a condo complex when it could be the **jewel of our City**. I know the State of CA says we have to have a certain number of new houses, but they don't say they have to be crammed into one of the last remaining open pieces of coastal land. Build housing complexes closer to where offices and businesses are, build them inland and **Protect Ponto!**

I know the People for Ponto organization has identified multiple paths to success that would be a win / win for everyone -- City Staff should work with them, learn from them and Ponto Park a reality.

I ask you to **Develop Ponto Right** and work with the experts that have the knowledge to do what the community wants - keep the open space, build Ponto Park!

I request that my comments be put on record in the official public records for **ALL** things Planning Area F, including the

official public records the Draft Local Coastal Program Amendment, and Parks Master Plan Update; and the CA Coastal Commission's consideration of Carlsbad's draft Local Coastal Program Amendment.

Thank you

T. Owen Rassman

**Subject:** 1-26-21 Agenda Item 12 Protect Ponto

Dear Mayor, City Council, Planning Commission and CA Coastal Commission

*I request that the City Council direct staff to research and provide options to acquire Planning Area F for Ponto Park. And that The City Council directs staff to consult with People for Ponto Carlsbad citizens organization on the data and resources they have collected that can assist the Staff and the Council with these options*

The People have been asking to keep Ponto's Open Space and build Ponto Park for an extremely long time but it seems to fall on deaf ears or only be met with resistance. Staff's presentation to the Planning Commission in Dec 2019 and the Staff report for this agenda item have inaccurate information in them but it doesn't seem like there is much interest in recognizing the truth. I hope today's meeting will change that.

Truth is the land use change should not have been changed the way it was, so we shouldn't "just continue on with it".

Truth is Planning Area F is not the answer the State's housing demands.

Truth is Ponto Park is not only being asked for by the people that live in the area – it is for ALL of Carlsbad and ALL of the visitors that come from near and far.

Truth is it would be relatively easy to **Develop Ponto Right** – you just have to listen and want to make it happen.

So I repeat -

*I request that the City Council direct staff to research and provide options to acquire Planning Area F for Ponto Park. And that The City Council directs staff to consult with People for Ponto Carlsbad citizens organization on the data and resources they have collected that can assist the Staff and the Council with these options.*

I request that my comments be put on record in the official public records for **ALL** things Planning Area F, including the official public records the Draft Local Coastal Program Amendment, and Parks Master Plan Update; and the CA Coastal Commission's consideration of Carlsbad's draft Local Coastal Program Amendment.

Thank you

Jodi M. Jones

**Subject:** Carlsbad DLCP-LUPA & Ponto issues Public Input - Sea Level Rise and Carlsbad's DLCP-LUPA's projected/planned Loss of Open Space at Ponto

Dear City Council, Planning Commission, Parks Commission, & Beach Preservation Commission; CA Coastal Commission and State Parks:

Please include this email and attached file 'Sea Level Rise and Carlsbad's DLCP-LUPA's projected/planned Loss of Open Space at Ponto' as public input into Carlsbad's proposed Draft LCP-Land Use Plan Amendment, and all City and CA Coastal Commission and CA Housing & Community Development proposed actions regarding Ponto.

The attachment summarizes some of the existing Coastal Open Space shortfall and distribution issues; and the projected and planned future forever loss of existing Coastal Open Space land and CA Coastal Act 'High-Priority' Coastal Land Uses at Ponto due to Sea Level Rise. The planned loss of Coastal Open Space is at the same time when City and Statewide demand for those reduced 'high-Priority' Coastal Open Space Land Uses will increase from future growth of both resident population and visitors. There is limited vacant Coastal land suitable for these 'High-Priority' Coastal Open Space Land Uses, and Ponto is one of the last in the Carlsbad and the San Diego County coastline. Ponto Planning Area F has specific CA State Coastal Act and existing Local Coastal Program (Land Use Plan Policies and Zoning/implementation plan regulations) that require City and CA Coastal Commission consideration of these important CA Coastal Open Space Land Use issues before changing the existing 'Non-Residential Reserve' Coastal Land Use Policy designation and Zoning on Planning Area F.

As 34-year Carlsbad citizen I love Carlsbad. As such I know, as do many other Carlsbad citizens and businesses, how important Ponto is to our citizens, city, and future Carlsbad (and California) generations and our social and economic sustainability. The attached is intended to help the City Council, City and CCC in understanding and addressing some of the basic existing and future 'High-Priority' Coastal Open Space Land Use supply/demand issues at Ponto.

Sincerely,  
Lance Schulte

## **Sea Level Rise and Carlsbad's DLCP-LUPA's projected/planned Loss of Open Space at Ponto**

### **Introduction:**

Carlsbad first documented Sea Level Rise (SLR) and associated increases in coastal erosion in a December 2017 Sea Level Rise Vulnerability Assessment (2017 SLR Assessment). Prior planning activities (2010 Ponto Vision Plan – rejected by CA Coastal Commission, and 2015 General Plan Update) did not consider SLR and how SLR would impact Coastal Open Space Land Use & CA Coastal Act 'High-Priority' Coastal Open Space Land Uses at Ponto. The 2017 SLR Assessment shows Open Space land and Open Space Land Uses are almost exclusively impacted by SLR at Ponto & South Coastal Carlsbad. The 2017 SLF Assessment also shows significant LOSS of Open Space land acreage and Land Uses. Most all impacted Open Space Land Uses are CA Coastal Act "High-Priority Coastal Land Uses" – Coastal Recreation (i.e. Public Park) and Low-Cost Visitor Accommodations. Existing Ponto Open Space Land Uses are already very congested (non-existent/narrow beach) and very high, almost exclusionary, occupancy rates (Campground) due to existing population/visitor demands. Future population/visitor increases will make this demand situation worst. The significant permanent LOSS of existing Coastal Open Space land and Coastal Open Space Land Use (and land) due to SLR reduces existing supply and compounds Open Space congestion elsewhere. Prior Ponto planning did not consider, nor plan, for significant SLR and current/future "High-Priority" Coastal Open Space Land Use demands.

### **Open Space and City Park demand at Ponto:**

Open Space at Ponto is primarily 'Constrained' as defined by the City's Growth Management Program (GMP), and cannot be counted in meeting the City's minimal 15% 'Unconstrained' GMP Open Space Standard. Per the GMP Open Space Standard, the developers of Ponto should have provided in their developments at least 30-acres of additional 'Unconstrained' GMP Open Space at Ponto. City GIS mapping data confirm 30-acres of GMP Standard Open Space is missing at Ponto (Local Facilities Management Plan Zone 9).

The City of Carlsbad GIS Map on page 2 shows locations of Open Spaces at Ponto. This map and its corresponding tax parcel-based data file document Ponto's non-compliance with the GMP Open Space Standard. A summary of that City GIS data file is also on page 2. The City said Ponto's non-compliance with the GMP Open Space Standard was 'justified' by the City 'exempting' compliance with the Standard. The City 'justified' this 'exemption' for reasons that do not appear correct based on the City's GIS map and data on page 2, and by a review of 1986 aerial photography that shows most of Ponto as vacant land. The City in the Citywide Facilities Improvement Plan (CFIP) said 1) Ponto was already developed in 1986, or 2) Ponto in 1986 already provided 15% of the 'Unconstrained' land as GMP Standard Open Space. Both these 'justifications' for Ponto 'exemption' in the CFIP were not correct. The legality of the City 'exempting' Ponto developers from the GMP Open Space Standard is subject to current litigation.

The City proposes to continue to exempt future Ponto developers from providing the missing 30-acres of minimally required GMP Open Space, even though a change in Ponto Planning Area F land use from the current 'Non-Residential Reserve' Land Use requires comprehensive Amendment of the Local Facilities Management Plan Zone 9 to account for a land use change. City exemption is subject of litigation.

Ponto (west of I-5 and South of Poinsettia Lane) currently has 1,025 homes that per Carlsbad's minimal Park Standard demand an 8-acre City Park. There is no City Park at Ponto. Coastal Southwest Carlsbad has an over 6.5 acre Park deficit that is being met 6-miles away in NW Carlsbad. Ponto is in the middle of 6-miles of Coastline without a City Coastal Park west of the rail corridor.

### City GIS map of Ponto's (LFMP Zone 9) Open Space:

- Light green areas meet the City's 15% unconstrained Growth Management Program Open Space Standard
- Most Ponto Open Space (pink hatch & blue [water] on map) is "Constrained" and does not meet the Standard
- Aviara - Zone 19, Ponto - Zone 9 and Hanover/Poinsettia Shores – Zone 22 all developed around the same time and had similar vacant lands.
- City required Aviara - Zone 19 east of Ponto to provide the 15% Standard Open Space. Why not Ponto? Aviara had the same lagoon waters.
- City required Hanover & Poinsettia Shores area Zone 22 just north of Ponto to provide the 15% Standard Open Space. Why not Ponto?
- Why Ponto developers were never required to comply with the 15% Standard Open Space is subject to current litigation
- Below is City GIS data from this map

### City GIS map data summary of the 15% Growth Management Standard Open Space at Ponto

472 Acres  
(197 Acres)  
 275 Acres  
X 15%  
 41 Acres  
(11 Acres)  
**30 Acres**

Total land in LFMP Zone 9 [Ponto]  
 Constrained land excluded from GMP Open Space  
 Unconstrained land in LFMP Zone 9 [Ponto]  
 GMP Minimum Unconstrained Open Space requirement  
 GMP Minimum Unconstrained Open Space required  
 GMP Open Space provided & mapped per City GIS data  
**Missing Unconstrained Open Space needed in LFMP Zone 9 [Ponto] to meet the City's minimum GMP Open Space Standard per City's GIS map & data**

**73% of the City's minimum 15% required Open Space Standard is missing due to over development of LFMP Zone 9 [Ponto]**

### **Sea Level Rise impacts on Open Space and Open Space Land Use Planning at Ponto:**

The City's 2015 General Plan Update did not factor in the impacts of Sea Level Rise (SLR) on Ponto's Open Space land. In December 2017 the City conducted the first Sea Level Rise Vulnerability Assessment <https://www.carlsbadca.gov/civicax/filebank/blobdload.aspx?BlobID=33958>. The 2017 SLR Assessment is an initial baseline analysis, but it shows significant SLR impacts on Ponto Open Space. More follow-up analysis is being conducted to incorporate newer knowledge on SLR projections and coastal land erosion accelerated by SLR. Follow-up analysis may likely show SLR impacts occurring sooner and more extreme.

Troublingly the 2017 SLR Assessment shows SLR actually significantly reducing or eliminating Open Space land at Ponto. SLR is projected to only impact and eliminate Open Space lands and Open Space Land Use at Ponto. The loss of Ponto Open Space land and Land Use being at the State Campground, Beaches, and Batiquitos Lagoon shoreline. The losses of these Open Space lands and land uses would progress over time, and be a permanent loss. The 2017 SLR Assessment provides two time frames near-term 2050 that match with the Carlsbad General Plan, and the longer-term 'the next General Plan Update' time frame of 2100. One can think of these timeframes as the lifetimes of our children and their children (2050), and the lifetimes of our Grandchildren and their children (2100). SLR impact on Coastal Land Use and Coastal Land Use planning is a perpetual (permanent) impact that carries over from one Local Coastal Program (LCP) and City General Plan (GP) to the next Updated LCP and GP.

Following are excerpts from the 2017 Sea Level Rise Vulnerability Assessment:

*[Italicized text within brackets]* is added data based on review of aerial photo maps in the Assessment.

Planning Zone 3 consists of the Southern Shoreline Planning Area and the Batiquitos Lagoon. Assets within this zone are vulnerable to inundation, coastal flooding and bluff erosion in both planning horizons (2050 and 2100). A summary of the vulnerability assessment rating is provided in Table 5. A discussion of the vulnerability and risk assessment is also provided for each asset category.

#### 5.3.1. Beaches

Approximately 14 acres of beach area is projected to be impacted by inundation/erosion in 2050. ... Beaches in this planning area are backed by unarmored coastal bluffs. Sand derived from the natural erosion of the bluff as sea levels rise may be adequate to sustain beach widths, thus, beaches in this reach were assumed to have a moderate adaptive capacity. The overall vulnerability rating for beaches is moderate for 2050.

Vulnerability is rated moderate for the 2100 horizon due to the significant amount of erosion expected as the beaches are squeezed between rising sea levels and bluffs. Assuming the bluffs are unarmored in the future, sand derived from bluff erosion may sustain some level of beaches in this planning area. A complete loss of beaches poses a high risk to the city as the natural barrier from storm waves is lost as well as a reduction in beach access, recreation and the economic benefits the beaches provide.

#### 5.3.3. State Parks

A majority of the South Carlsbad State Beach day-use facilities and campgrounds (separated into four parcels) were determined to be exposed to bluff erosion by the 2050 sea level rise scenario (moderate exposure). This resource is considered to have a high sensitivity since bluff erosion could significantly impair usage of the facilities. Though economic impacts to the physical structures within South Carlsbad State Beach would be relatively low, the loss of this park would be significant since adequate space for the park to move inland is not available (low adaptive capacity). State

parcs was assigned a high vulnerability in the 2050 planning horizon. State park facilities are recognized as important assets to the city in terms of economic and recreation value as well as providing low-cost visitor serving amenities. This vulnerability poses a high risk to coastal access, recreation, and tourism opportunities in this planning area.

In 2100, bluff erosion of South Carlsbad State Beach day-use facilities and campgrounds become more severe and the South Ponto State Beach day-use area becomes exposed to coastal flooding during extreme events. The sensitivity of the South Ponto day-use area is low because impacts to usage will be temporary and no major damage to facilities would be anticipated. Vulnerability and risk to State Parks remains high by 2100 due to the impacts to South Carlsbad State Beach in combination with flooding impacts to South Ponto.

Table 5: Planning Zone 3 Vulnerability Assessment Summary [condensed & notated]:

<u>Asset Category</u>	<u>Horizon [time]</u>	<u>Hazard Type</u>	<u>Impacted Assets</u>	<u>Vulnerability Rating</u>
Beaches	2050	Inundation/Erosion, Flooding	<b>14 acres</b> (erosion)	Moderate
	2100	Inundation/Erosion, Flooding	<b>54 acres</b> (erosion)	Moderate
Public Access	2050	Inundation, Flooding	6 access points <b>4,791 feet of trails</b>	Moderate
	2100	Inundation, Flooding	10 access points <b>14,049 feet of trails</b>	Moderate
State Parks [Campground - Low-cost Visitor Accommodations]	2050	Flooding, Bluff Erosion	4 parcels [ <b>&lt;18 Acres</b> ]	High
	2100	Flooding, Bluff Erosion	4 parcels [ <b>&gt;18 Acres</b> ] [loss of <b>over 50% of the campground &amp; its Low-cost Visitor Accommodations</b> , See Figure 5.]	High
Transportation (Road, Bike, Pedestrian)	2050	Bluff Erosion	<b>1,383 linear feet</b>	Moderate
	2100	Flooding, Bluff Erosion	<b>11,280 linear feet</b>	High
Environmentally Sensitive Lands	2050	Inundation, Flooding	<b>572 acres</b>	Moderate
	2100	Inundation, Flooding	<b>606 acres</b>	High

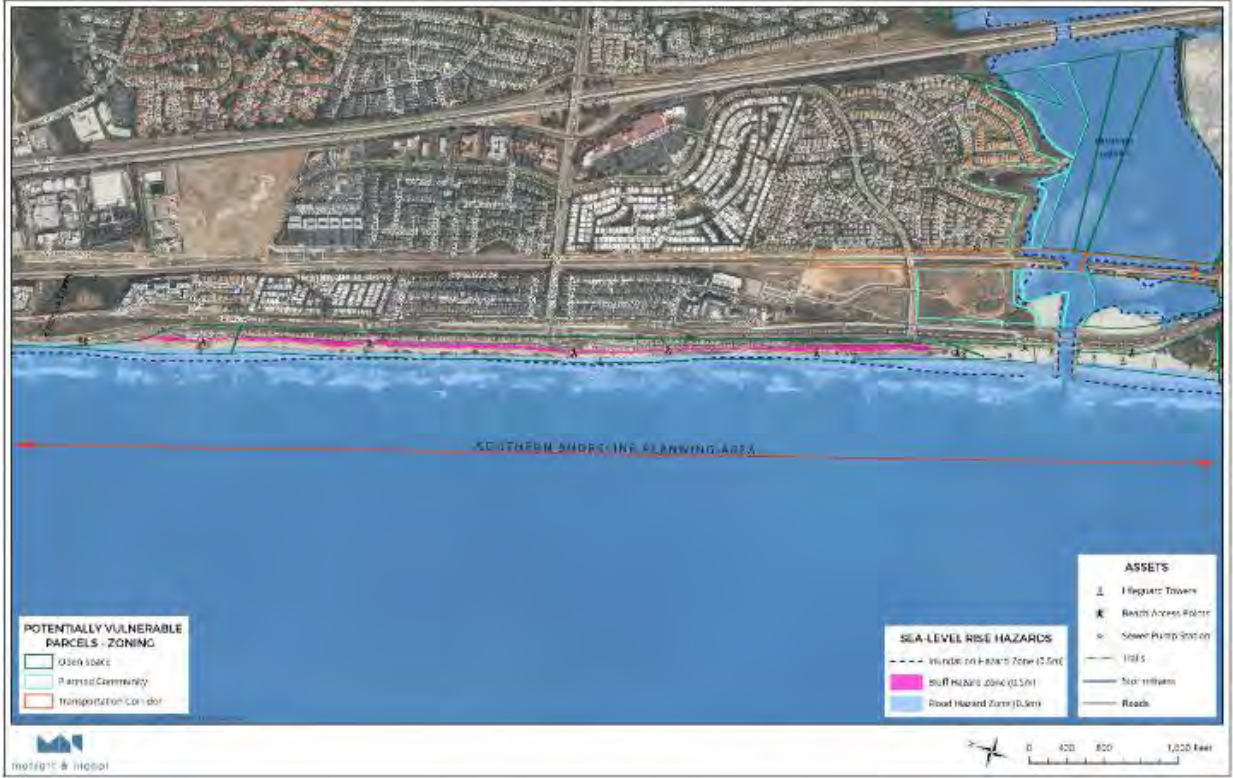

Figure 7: Southern Shoreline Planning Area – Year 2050

Figure 5: CoSMoS Bluff Erosion Projections by 2100  
(CoSMoS-COAST 2015)

[Figure 5 show the loss of over 50% of the campground and campground sites with a minimal .2 meter Sea Level Rise (SLR), and potentially the entire campground (due to loss of access road) in 2 meter SLF.]

**Directions to analyze and correct current and future LOSS of Coastal Open Space Land Use at Ponto**

On July 3, 2017 the CA Coastal Commission provided direction to Carlsbad stating:

“The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto ... area. For example, Planning Area F requires the city and developer to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e., public park) on the west side of the railroad. ... this study should be undertaken as a part of the visitor serving use inventory analysis described above. If this analysis determines that there is a deficit of low cost visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed.”

Official Carlsbad Public Records Requests (PRR 2017-260, et. al.) confirmed the Existing LCP and its Ponto specific existing LUP polices and Zoning regulations were never followed in the City’s prior Ponto planning activities (i.e. 2010 Ponto Vision Plan & 2015 General Plan Update). The projected SLR loss of recreation (beach) and low-cost visitor accommodations (campground) at Ponto should factor in this Existing LCP required analysis, and a LCP-LUP for Ponto and Ponto Planning Area F.

In a February 11, 2020 City Council Staff Report City Staff stated:

“On March 14, 2017, the City Council approved the General Plan Lawsuit Settlement Agreement (Agreement) between City of Carlsbad and North County Advocates (NCA). Section 4.3.15 of the Agreement requires the city to continue to consider and evaluate properties for potential acquisition of open space and use good faith efforts to acquire those properties.”

In 2020 NCA recommended the City acquire Ponto Planning Area F as Open Space. The status of City processing that recommendation is unclear. However the Lawsuit Settlement Agreement and NCA's recommendation to the City should also be considered in the required Existing LCP analysis.

**Summary:**

Tragically Carlsbad's Draft Local Coastal Program – Land Use Plan Amendment (DLCP-LUPA) is actually planning to both SIGNIFICANTLY REDUCE Coastal Open Space acreage, and to eliminate 'High-Priority Coastal Open Space Land Uses at Ponto due to SLR.

The Existing LCP requirements for Ponto Planning Area F to analyze the deficit of Coastal Open Space Land Use should factor in the currently planned LOSS of both Coastal Open Space acreage and Coastal Open Space Land Uses at Ponto due to SLR. As a long-range Coastal Land Use Plan this required LCP analysis needs to also consider the concurrent future increases in both population and visitor demand for those LOST Coastal Open Space acres and Coastal Open Space Land Uses.

It is very troubling that demand for these CA Coastal Act 'High-Priority' Coastal Open Space Land Uses is increasing at the same time the current (near/at capacity) supply of these CA Coastal Act 'High-Priority' Coastal Open Space Land Uses is significantly decreasing due to SLR. Instead of planning for long-term sustainability of these CA Coastal Act 'High-Priority' Coastal Open Space Land Uses for future generations there appears to be a plan to use SLR and inappropriate (lower-priority residential) Coastal Land Use planning to forever remove those CA Coastal Act 'High-Priority' Coastal Open Space Land Uses from Ponto. CA Coastal Act Policies to address these issues should be thoroughly considered.

2021-2 proposed Draft Local Coastal Program – Land Use Plan Amendment (DLCP-LUPA) will likely result in City and CA Coastal Commission making updates to the 2015 General Plan, based on the existing Ponto Planning Area F LCP – LUP Policy requirements, Ponto Open Space issues, high-priority Coastal Land Use needs, and SLR issues not addressed in the 2015 General Plan.

**Subject:** Our Home Our Future citizen input - Why a park is needed within walking distance to multifamily housing & why a meaningful Coastal Park is needed for Ponto/South Carlsbad - public input to DLCPA, Housing and Park planning

**Importance:** High

Dear Carlsbad City Council, Housing Commission, Planning Commission, and Park Commission; and CA Coastal Commission and HCD:

The following is citizen feedback on Carlsbad's 9-13-21 email to 'Give input on locations for future housing'. It is also for consideration in Carlsbad's Draft LCP and Parks Master Plan Amendment Processes.

At the very heart of these comments is: There is finite vacant land in Carlsbad and an even smaller figment of Vacant Coastal Land in Carlsbad. This small amount of is getting smaller due to documented coastal erosion and sea level rise. Over 32 acres of high-priority Coastal Open Space Lance Use will be lost at Ponto/South Carlsbad. This very small finite vacant Coastal land is all we have to provide for the "infinite" demands for high-priority Coastal Recreation and Low-cost access to the Coast land uses from this "infinite" amount of future generations of Carlsbad and inland cities residents; and of outside Visitors to Carlsbad's Coast. How Carlsbad, and the CA Coastal Commission and HCD, uses those precious finite fragments of vacant Coastal Land is the vital question. Since 2017 Carlsbad citizens have been asking the Council for a true, honest, open and comprehensive consideration of these issues at Ponto. Over 4,500 emails have been sent to the Council, many City Budget Workshop requests, Hours of public testimony, and hundreds of pages of documents facts gained via official Carlsbad Public Records Requests.

The proposed land use changes to high density R-23 for the 8 properties of Site 18, seem to be being operating in a 'incomplete policy silo' that only looks at affordable housing and is not considering needed City Park and wider Coastal Land Use issues at Ponto. This 'policy silo process' seems to be counter to the wise consideration and use of the last remaining vacant and redevelopable Coastal land – particularly at Ponto/South Carlsbad.

Having managed creation of a Coastal City General Plan and several Housing Elements I understand and sympathize with the challenges City Staff and Council face in trying to provide for unlimited high-density residential development growth,

but we need to look at preserving vacant land to provide needed City Parks to balance these high-density developments and provide needed Parks for these homes that have no/little yards. But it seems, as citizens have asked since 2017, there is better way to address those challenges.

The 9/13/21 City email states:

- “The city needs to identify locations for about 2,600 new homes to fulfill the state’s requirement that all cities in the region provide enough housing to meet anticipated needs. Most of these homes **need to be affordable for people with moderate to low incomes, according to state formulas for household income levels.**”

Input: Per pages 33-34 of 3/23/21 2020 Housing Element Annual Progress Report to the Carlsbad City Council stated that:

“Prices of Affordable Housing – Generally, the federal and state rule is that housing is affordable to a given family if the family pays no more than 30% of its monthly income for housing expenses that include the rent or mortgage payment, property taxes, insurance, utilities, and the like.”

The staff report then documents that a home in Carlsbad to be affordable to Low and Moderate Incomes, requires the following home sale or rental prices:

“Table 3: CY 2020 qualifying rent and utility expenses by number of bedrooms

<u>Income Group</u>	<u>Number of bedrooms</u>			
	<u>1 bedroom</u>	<u>2 bedrooms</u>	<u>3 bedrooms</u>	<u>4 bedrooms</u>
Very Low	\$1,155	\$1,444	\$1,675	\$1,906
Low	\$1,849	\$2,310	\$2,680	\$3,050
<b>Moderate</b>	<b>\$2,225</b>	<b>\$2,781</b>	<b>\$3,226</b>	<b>\$3,671</b>
Above Moderate	> \$2,225	> \$ 2,781	> \$ 3,226	> \$ 3,671

Source: "Household Income Limits 2020", City of Carlsbad (effective April 30, 2020)”

And the “for Sale Prices that are Affordable” for each income group:

<u>Area Median Income</u>	<u>2020 Annual Income</u>	<u>Affordable Purchase Price</u>
Very Low (30% to 50%)	\$34,651 to \$57,750	\$82,001 to \$186,000
Low (50% to 80%)	\$57,751 to \$92,400	\$186,001 to \$342,000
<b>Moderate (80% to 120%)</b>	<b>\$92,401 to \$111,250</b>	<b>\$342,001 to \$510,000</b>
Above Moderate	\$111,251 or above	\$510,001 and above”

However, Carlsbad developers seeking to justify increase residential density site in the name of ‘Affordability’ to Low or Moderate incomes are not providing homes that meet these affordable rents or purchase prices. Carlsbad’s land use regulations that promote larger unit sizes and building height and bulk work in the opposite direction and instead promote Above Moderate housing as clearly evidenced in Carlsbad’s Village where housing developed at 28-35 dwelling units per acre (that should be affordable to Low Incomes – i.e. 1-4 bedroom rent at \$1,849 - \$3,050, and at sales or purchase prices from \$186,001 to \$342,000) are instead being sold for \$1.8 to \$3 million as seen in the following:

**RECENT SALES**

2687 State Street		2683 State Street	
	2 Bed   2.5 Bath   2,022 Sq. Ft. SOLD \$1,846,500		3 Bed + Bonus Room   2 Bath   2,143 Sq. Ft. SOLD \$1,800,000
2677 State Street, 301		2677 State Street, 302	
	2 Bed + Office Space   2.5 Bath   2,150 Sq. Ft. SOLD \$2,250,000		3 Bed   3.5 Bath   2,717 Sq. Ft. SOLD \$3,000,000

This data is not a criticism of expensive housing or developers seeking to maximize their profits.

It simply shows that Carlsbad's land use regulations and 'Affordability quid-pro-quo for increasing land use density' are not functioning as intended to promote Affordability. Carlsbad's land use approach is simply increasing developer profit that serves to drive up land costs (land is a residual cost in land use development pro formas) and thus works to instead reduce Affordability. Simply changing land use to increase dwelling unit density to R23 or R-28-35 to provide "Affordable Housing is not really true.

It is suggested that with a change in land use to increase density should be a commitment recorded on the land to actually provide the number of Affordable units being cited as the rationale for increasing the density. This is an honest and accurate 'Affordable quid pro quo'. This commitment, along with land use regulation reform, will help reduce speculative land costs that discourage Affordability.

Citizens are being inaccurately told that density increases are needed to provide Affordability yet developers do not create, nor are not required to create, those Affordable units.

Unaccountable density increases do however create more speculative developer profits, and increase land costs. Density increases also increases the need for City Parks (high density by its nature depends on City Parks and Open Space for livability) along with other City services and infrastructure. Yet unaccountable density increases not does not provide actual Affordable housing. So at the next City Housing Element even more Affordable Housing will be required since the prior unaccountable density increases did not create it. During this unaccountable process vacant land disappears. That vacant land is vitally needed to provide City Parks to balance and provide useable park space for residents in high density apartments/condos.

The City Staff's documents that one of the Site 18 land owners/developers are requesting an increase in land use density to R-23 that is to provide housing Affordable to Moderate Incomes. Yet there is no developer

commitment or City requirement to create the numbers of Moderate Income housing identified in City Staff's Site 18 documentation.

There is no accessible City Park in the area to provide the needed City Park and open space needed for higher density development – the 'Veterans Park solution is 6-miles away and is effectively unusable for citizens at Ponto.

- "We'd like your input on 18 proposed locations for future housing chosen based on public input gathered last year."

Input: Site 18, was not a site 'chosen based on public input gathered last year', but was just recently chosen by a speculative developers of Site 18. As staff documents: "Staff has received a letter from one property owner expressing support for higher density." Site 18 consists of 8 properties, so it is unclear if all 8 properties are requesting higher density. Site 18 is being proposed as a "Moderate Income housing site" (i.e. a site that will provide 90 dwelling units [DU] affordable to Moderate Incomes as noted in the City Staff's analysis:

"Potential Housing: Site 18

Site Description: Vacant

Property Name: North Ponto Parcels

Site Group Acres: 5.9

Potential units site can accommodate (all parcels): 90

Income Category: Moderate (based on proposed minimum density)"

There is no copy of the 'letter' showing an accountable Affordable rational or developer commitment, or a requirement by the City that Site 18 will be developed and rented or sold to provide the 90 dwellings Affordable to Moderate Income as noted above. If the Site 18 developers would commit to recording providing that affordability it would be a responsible and accountable Affordability quid pro quo for consideration.

- The City Staff report also does not discuss the various land uses changes to increase density in a properly holistic or fully comprehensive planning way. All sites should be compared on all the key metrics for suitability. For high density housing, the most fundamental metric is walkability to a meaningful City Park for outdoor recreation and breathing room. This is fundamental in that high density housing, by definition has little/no park and recreational open space - high density means many people living on a small area of land. High density without significant large and usable City Parks within walking distance simply creates dense urban environments that over time will not sustain quality of life.

In addition for Site 18 and other at the Coast locations there are other land use demands of large inland populations or families and visitors come to the Coast and increase even more demands for City Parks. A comprehensibly considered Coastal Land Use Plan needs to assure vacant and redevelopable lands along the Coast provide sufficient Park land acreage for local Park needs (i.e. high density development requires

more Park acreage), but also to provide extra Park acreage to address the Park needs of hundreds of thousands of inland residents and visitors to the Coast. Densifying the Coast with high density residential development runs counter to this need for Coastal Parks.

The following email and attached images were submitted on 9/8/21 that illustrate the City Parks needs generated by R-23 higher density and why it is important to provide meaningful City Parks within walking distance to higher density development.

Thank you for your consideration. You say it is Our Home Our Future. We hope you do the right thing for present and future generations of Carlsbad and CA citizens and visitors. Please do not let short-term and short sighted silo thinking lead to a bad decisions on the use of the last bit of vacant coastal land.

Respectfully,  
Lance Schulte

**Subject:** Why a park is needed within walking distance to multifamily housing & why a meaningful Coastal Park is needed for Ponto/South Carlsbad - public input to DLCPA, Housing and Park planning

Dear Carlsbad City Council, Planning Commission, Parks Commission and Housing Commission; and CA Coastal Commission:

I request this email and attachments be provided as official public input to the Carlsbad's Draft Local Coastal Program Amendment, Housing Element land use changes, Parks Master Plan Amendment, and land use activities at Ponto and Coastal South Carlsbad.

For many years Carlsbad and People for Ponto Citizens have been trying to communicate the need for a meaningful Coastal Park for South Carlsbad. There is NO City Coastal Park west of I-5/rail corridor in South Carlsbad (yet there are 10 such City Parks totaling over 35 acres in North Carlsbad). The Citizens and visitors to South Carlsbad have No Coastal Park, and Ponto is the last vacant unplanned Coastal land left to provide this needed Coastal Park.

The attached images of high-density housing (R-23) in Carlsbad clearly illustrate why City Parks are needed within walking distance to multifamily housing. It also illustrates why meaningful Coastal Parks are needed to provide Coastal Recreation for a unlimited growing population that will primarily be housed by high-density housing that minimizes outdoor recreation space.

High-density housing, by definition, provides minimal outdoor recreation space per dwelling unit. So City Parks are the only meaningful sized areas where high-density housing occupants (particularly Children) can have room to play. This is particularly critical in regards to Coastal Parks, as Coastal Parks absorb the Coastal Park demands/needs from significant large inland and visitor populations. This critical need is made all the more serious given sea level rise and coastal erosion impacts to Coastal Open Space.

The State of California is advancing dense high-density housing to promote affordability, yet most of the benefits of simply increasing density tend to result in increasing developer profit margins and thus increase residual land costs as Carlsbad has seen in Carlsbad Village. The State of California Housing Law currently does not address the logical and concurrent need to both increase City Park acreage and equitably distribute that City Park acreage within walking distance to housing – particularly high-density housing.

Having a City Park within a 10-minute walk from high-density housing is vital for the long-term viability, livability, and quality of life for high-density housing and the citizens and families that live in this housing. Hopefully the City of Carlsbad can advance the concurrent increase in City Park acreage and 10-minute walk accessibility in its Coastal land use, land use, housing, and parks plans.

As a former city, coastal and urban planner having worked in high-density situations I have several planning policy ideas that maybe helpful if the City Council would like to discuss them.

Thank you for your consideration.

Lance Schulte

**From:** City of Carlsbad [<mailto:communications@carlsbadca.ccsend.com>] **On Behalf Of** City of Carlsbad  
**Sent:** Thursday, September 2, 2021 4:39 PM  
**To:** [info@peopleforponto.com](mailto:info@peopleforponto.com)  
**Subject:** Give input on locations for future housing

**Give input on locations for future housing**

The City of Carlsbad is seeking input on where new housing units could be built in Carlsbad to satisfy a state requirement that cities accommodate their fair share of the region's housing needs, including homes for people of all income levels and stages of life. Eighteen proposed locations were chosen based on public input gathered last year, input from a citizens advisory committee and direction from the City Council.

Of the 3,900 new housing units that make up Carlsbad's fair share, about 2,100 need to be affordable for people with very low to moderate incomes. The city had already identified vacant residential locations and planned housing

projects to help meet the state's housing requirement, but it wasn't enough to meet the need for 3,900 units.

[Review sites on an online map.](#)

Community members have three ways to provide feedback:

### **Survey**

An [online survey](#) will be available through Oct. 1.

### **Virtual public workshops (held via Zoom)**

Wednesday, Sept. 15, 5:30 to 7 p.m. | [Register here](#)

Wednesday, Sept. 22, 5:30 to 7 p.m. | [Register here](#)

City staff will provide an overview of the city's housing plan update process and how the potential housing sites were selected. Participants will then break into smaller groups to ask questions and provide input on the potential locations.

\*Persons with a disability may request meeting materials in appropriate alternative formats as required by the Americans with Disabilities Act of 1990. Reasonable accommodations and auxiliary aids will be provided to effectively allow participation in the meeting(s). Please contact Sue Armstrong at 760-434-5352 (voice), 711 (free relay service for TTY users) or [sue.armstrong@carlsbadca.gov](mailto:sue.armstrong@carlsbadca.gov) at least 48 hours prior to the meeting to discuss accessibility needs.

### **Comments via mail or email by Oct. 22**

Scott Donnell, Senior Planner, Community Development

1635 Faraday Ave., Carlsbad, CA 92008

[scott.donnell@carlsbadca.gov](mailto:scott.donnell@carlsbadca.gov)

The city is seeking input on proposed sites that would need to be rezoned, either to allow housing where it's not allowed today or increase the number of units allowed on sites already zoned for housing. Owners and people living within 600 feet of all the potentially affected properties have been notified by mail of the potential rezoning.

The city would not build housing on these sites. Instead, the city's obligation is to identify space for housing and create policies that would facilitate new housing to be built based on different income levels and stages of life.

### **Next steps**

City staff will update the map of proposed sites based on community input and then share it with the City Council in early 2022 for approval to move forward with the environmental review of those sites.

- Sept. 2 - Oct. 22, 2021: Public input on potential sites for future housing
- Early 2022: City Council public meeting to receive input and consider endorsing final map(s) for environmental review
- Spring 2022 - Winter 2022/2023: Environmental review of housing sites and public input on environmental analysis document

## Background

The City of Carlsbad has updated its housing plan, something required by state law to ensure the city is meeting the housing needs of all members of the community. The new plan includes policies designed to encourage the number and types of housing the state requires. It also identifies locations where new housing could be built. In all, the City of Carlsbad needs to show how about 3,900 housing units could be built over the next eight years to meet state requirements.

**Subject:** 10-12-21 Citizen input to Carlsbad Council & CCC on Carlsbad Draft LCP Amendment - 3 choices and supporting data

Dear Carlsbad City Council, Planning and Parks Commissions; CA Coastal Commission and HCD; and Assembly member Boerner-Horvath:

Please include this email as official public input in the City Council and CCC consideration of the City of Carlsbad's proposed Draft LCP Amendment. As noted in your staff report you have a few choices. The Staff report however should have clearly communicated to Citizens and you the 2017 direction the CA Coastal Staff provided the City regarding Ponto Planning Area F. Below is a recommendation for the wise, fair, legal and overwhelming Citizen requested choice.

As individual citizen representatives you are accountable for your choices. As summarized below you have been provided by the citizens you are elected to represent thousands of petitions, pages and hours of public testimony supporting by documented data from over 50 official City public records requests.

We hope you listen and do the right thing to Develop Ponto Right.

From a historical context, you should see the images below from the prior Batiquitos Lagoon Educational Park (Samis) LCP. Land Use for Ponto Planning Area F was Travel Services & General Commercial, and there was an adjacent "12.8-acre Coastal Recreation Land Use" that was eliminated. Both these prior LCP land uses would have provided the much needed Coastal Recreation and Open Space Land use that is currently missing in South Carlsbad/Ponto.

Please also note that South Carlsbad/Ponto is in the center of a 6-mile stretch of coastline without a Coastal Park west of the I-5/Rail corridor. Ponto Planning Area F is the last significant vacant unplanned Coastal land.

Below are your 3 choices and data supporting those choices. We hope you honestly consider these in representing Carlsbad Citizens, and in concern for CA citizens and visitors to our coast.

Respectfully,  
Lance Schulte

#### Each Councilperson's 3 LCP choices for Ponto Planning Area F

---

There is a lot of data and citizen desire/input regarding Ponto Planning Area F Coastal Land Use. However there are only 3 choices each councilmember (individually and collectively) will have in representing citizens' desires. As Citizen Representatives each councilmember is responsible and accountable for considering the data and desires Citizens have provided. Based on attendance at all relevant City meetings on Ponto, multiple community meetings and communications over the years the order of what the citizens are requesting of their Council and what the data supports are:

**1<sup>st</sup> Choice:** Change Ponto Planning Area F LCP Land Use Policy and Map and Master Plan Zoning to provide for the two "High-priority Coastal Land Uses" identified in in the Existing LCP – Coastal Recreation and/or Low-cost Visitor Accommodations. Both these two Land Uses are designated Open Space in Carlsbad's General Plan.

LCP public input with documented supporting data supporting this 1<sup>st</sup> priority choice:

- 29 page Coastal Recreation land use data file
- 7 page Low-Cost Visitor Accommodation land use data file
- 5 page Planning Area F Existing LCP LUP & CCC direction data file
- 7 page Sea Level Rise & Carlsbad's LCP projected/planned Loss of Open Space at Ponto data file
- 19 page Public Comments on July 13, 2021 Item #14 staff report to the City Council data
- 7 page 2021 July 13 Council meeting: missing Staff Report topics data file
- 3 page General Comparative tax-payer Costs/Benefits Analysis of Ponto Park and Promenade
- 5,000+ written/emailed petitions to the Council & CA Coastal Commission requesting this choice
- Letters from Carlsbad visitor industry, Surfrider Foundation, and Batiquitos Lagoon Foundation
- Open Space recommendations from North County Advocates per City's lawsuit settlement
- City Council and CA Housing & Community Development removing Planning Area F from the housing site inventory in the Certified 2021-29 Housing Element
- City Council initiating Citizen input on a rethinking of how to land use plan Carlsbad's little remaining vacant lands given State mandates for unlimited population growth in Carlsbad and addressing Sea Level Rise impacts. Citizen input has yet to begin on Growth Management 2.0 needs, PCH Relocation feasibility/desirability, funding solutions to Sea Level Rise impacts to Coastal Recreation & Low-cost Visitor Accommodations, and more citizen input on Parks Master Plan Update.
- Documentation the City has not followed current LCP Land Use Plan Policies regarding both Coastal Parks and Low-Cost Campground expansion
- The 2016 & 2017 CA Coastal Commission Communications to the City regarding Planning Area F
- Current litigation against the City regarding non-compliance with Park and Open Space Standards maybe could be addressed in some ways with this choice

**2<sup>nd</sup> Choice:** Do nothing to change Ponto Planning Area F LCP Land Use Policy and Master Plan Zoning. This do nothing choice retains all land use options while the City works to define and decide on its very important Growth Management 2.0, PCH Relocation, funded solutions to Sea Level Rise impacts to both Coastal Recreation & Low-cost Visitor Accommodations projects, and more Citizen input on Parks Master Plan Update. These 4 projects will define how the City will forever use its last few remaining vacant parcels of land – particularly Coastal Land. Doing nothing to change the Ponto Planning Area F LCP, makes sense in keeping all options open while the Citizens and the City work on these 4 projects.

LCP public input with documented supporting data supporting this 2<sup>nd</sup> priority choice:

- All the supporting data in the above 1<sup>st</sup> choice seems also relevant for this 2<sup>nd</sup> choice.

**3<sup>rd</sup> Choice:** Change Ponto Planning Area F LCP Land Use Policy and Master Plan Zoning as requested by the speculative land developer in their 2016 development applications to change the LCP and Master Plan. City staff has chosen to basically represent the developer’s requested changes to you as staff’s recommendations to you. This choice would eliminate “High-priority Coastal Land Uses”, and instead provide lower-priority residential land use that is already the predominate land use in Carlsbad’s Coastal Zone. This choice eliminates the last meaningful and cost effective land use option for the City to address critical future South Carlsbad Coastal Land Use needs. This choice may prove very costly. This choice is basically the antithesis of Choices 1 and 2.

LCP public input with documented supporting data supporting this 3<sup>rd</sup> priority choice:

- There appears little to no documented data supporting this choice:
  - The site is not required for housing. City Council and CA Housing & Community Development have removed Planning Area F from the housing site inventory in the Certified 2021-29 Housing Element
  - Documented data listed in Choice 1 above also does not support Choice 3.
  - Carlsbad’s Ponto Vision Plan’s Land Use Plan is the foundation and basis for Carlsbad’s General Plan at Ponto. This land use plan was specifically denied by the CA Coastal Commission, due to Planning Area F land use issues. Official City of Carlsbad public records requests failed to provide documents that the City of Carlsbad lawfully informed, discussed, considered and documented with Citizens Planning Area F’s existing LCP Land Use Policy requirements before proposing to change Planning Area F’s “Non-residential Reserve” Coastal Land Use.
  - There is no discernable and documented Citizen support for choice 3. The 5,000+ written/emailed petitions to the Council & CA Coastal Commission in fact have been opposed to choice 3.
- There is data in the form of opinions from the speculative developer’s attorney. The developer’s attorney is paid to support choice 3 - the developer’s proposed land use and zoning change. However that attorney appears to be misrepresenting facts to the Council and City such as:
  - Falsely denying developer discussions with the citizen created 501c3 corporation on purchasing Planning Area F. The Coast News reported on this 6-months ago.
  - Inaccurately communicating another sale to a developer when none occurred
  - Inaccurately saying they are actively processing their proposed 2016 LCP and Zoning change and development applications and EIR when they had in fact stopped all processing in February 2019. They did however in April 2021 file a SB330 pre-application, but since then appear have not implemented that pre-application. The pre-application expires in Oct 2021.

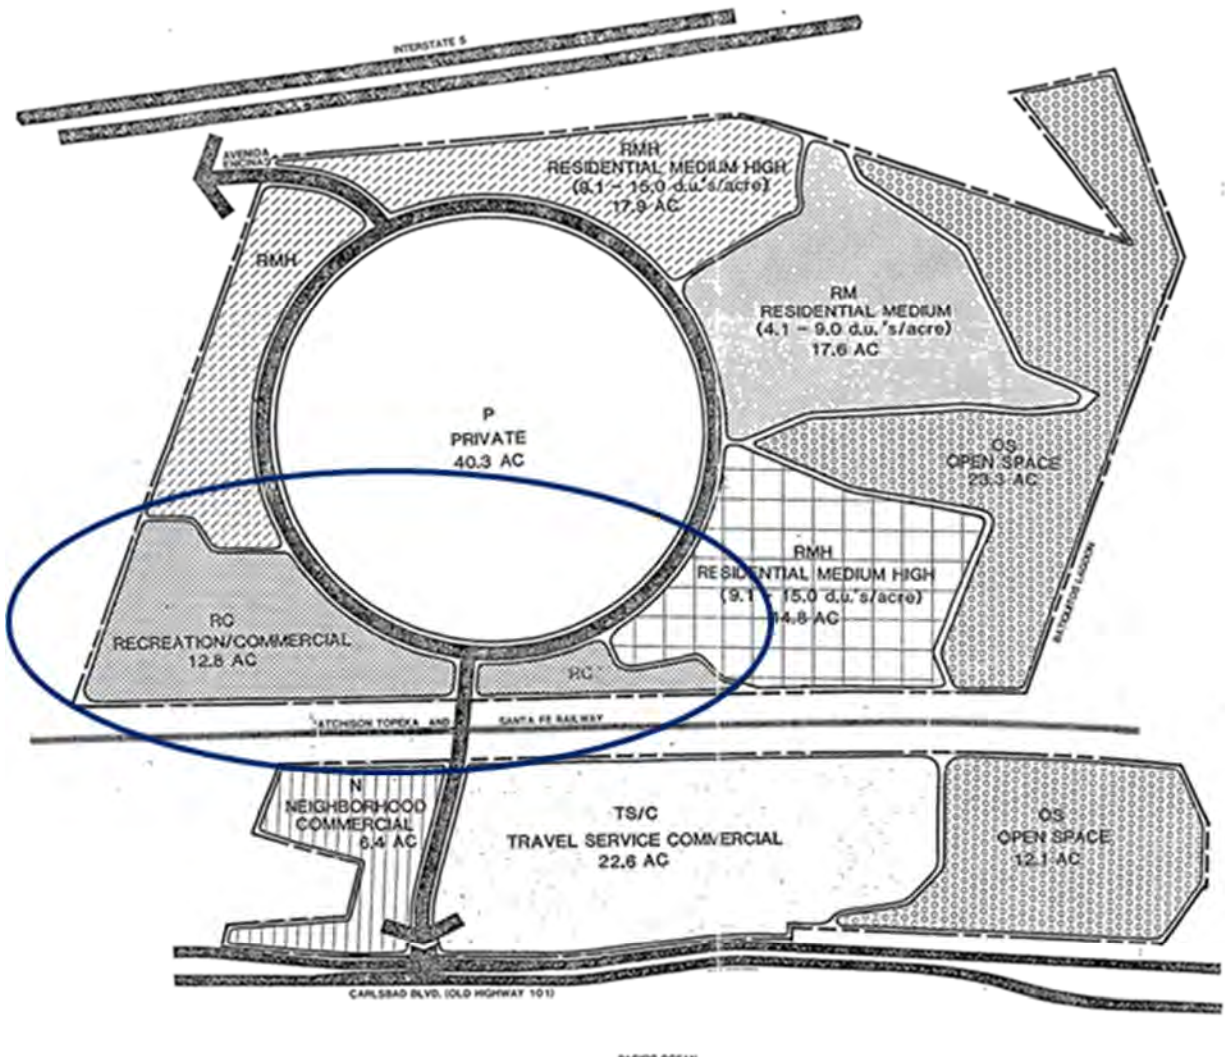

- Inaccurately communicating to the Council a threat of lawsuit against the City over both City and CA Housing & Community Development adoption of the 2021-2029 Housing Element that removed Planning Area F as a needed housing site. No lawsuit is known to be had been filed.
- Incomplete and inaccurate references to SB330, specifically regarding the City Council's and CA Coastal Commission's clear legal authority under SB 330 and other State laws to change land use and zoning, particularly land use changes in furtherance of CA Coastal Act Policies. The CA Coastal Act and the Act's Policies will be used to determine Planning Area F's appropriate land use in the LCP.
- The lack of clarity on whom the attorney represents - 'LSF5 Carlsbad Holdings LLC' and/or 'Shopoff' the prior proposed developer of Planning Area F. Shopoff quitclaimed interest in Planning Area F over 2.5 years ago on 2/11/2019. The Attorney was Shopoff's attorney, and Shopoff still shows Planning Area F on their website as their "Land" project. It is understood that Shopoff et. al. has been a notable financial contributor to Carlsbad political campaigns.
- The lack of clarity as to who are the members of 'LSF5 Carlsbad Holdings LLC'? The LLC is registered in Delaware and Bermuda for apparent secrecy and tax purposes. Do those LLC members have any undisclosed relationships of concern within the City of Carlsbad?

**Legal status:** All 3 choices are allowed under CA State Law. All 3 choices do not prohibit the speculative developer from pursuing their 2016 applications to request from both the City and CCC the speculative developer's proposed LCP and Zoning change. All 3 choices provide the speculative developer with a reasonable economic use of the property consistent with the US Constitution and State Law, and there would be no 'taking of the property' when that is the case.

The speculative developer purchased the property in 2007 with a "Non-residential Reserve" land use as shown in the Existing LCP Land Use Policy. The speculative developer did not purchase land with R-23 land use. Speculative developers are not guaranteed City or CCC approval of their profit motivated proposed speculative land use changes under the law.

Carlsbad has many privately owned, operated and profitable land uses that are consistent with the CA Coastal Act's High-Priority Coastal Land Uses. Many are in the San Diego region and Coastal Zone.

In fact the prior Batiquitos Lagoon Educational Park Master Plan & LCP for this area included a 12.8-acre privately owned and managed "Recreation Commercial" area of Coastal Recreation land use. This data was provided to the Council in the '19 page Public Comments on July 13, 2021 Item #14 staff report to the City Council data' listed In Choice 1. As noted then and shown in the 2 images below the privately owned Coastal Recreation land use was also the significant part of the developer's compliance with the City's required Growth Management Program "Unconstrained" Open Space Standard at Ponto:

# GENERAL PLAN BATIQUITOS LAGOON EDUCATIONAL PARK

SAMMIS PROPERTIES

PLANNING AREA I: HEALTH/RECREATION CENTER (12.8 ACRES)

Description: The recreation center could provide a wide variety of sports-and-health-related activities. Included within the Planning Area are a gymnasium, pool, sports fields, tennis courts, nutrition/sports injury clinic, health center, day care center and student union/book store. The gymnasium will serve as a training facility for members of the U.S. Olympic Team during normal business hours and be open to the public during the evening and on weekends.

Use Allocation:

Maximum of Seven tennis courts  
Maximum of 60,000 s.f. gymnasium  
Maximum of 10,000 s.f. day care center  
Maximum of 600 s.f. tennis building  
Swimming pool and sports fields  
Maximum of 29,200 s.f. health club/sports injury clinic/nutrition center  
Maximum of 22,000 s.f. student oriented commercial

Permitted Uses: The following uses are allowed within the Recreation Center Planning Area: Indoor and outdoor participant and spectator sports which may include pools, tennis courts, racquetball courts, a gymnasium, locker rooms and sports fields. Also permitted are a health club/sports injury clinic/nutrition center, student union/book store and any other related uses as determined to be consistent by the Land Use Manager.

**Subject:** Citizen input to Carlsbad Council & CCC on Carlsbad Draft LCP Amendment and 10/12/21 Council meeting on City proposed changes to 3 Existing Mellow II LCP Land Use policies regarding high-priority Coastal Land Uses

Dear Carlsbad City Council, Planning and Parks Commissions; CA Coastal Commission and HCD; and Assembly member Boerner-Horvath:

Before the City Council considers voting on Staff's recommendation to request that the CCC delete these long adopted LCP Land Use Policies (LCP LUP) 6-2, 6-4, and 6-10 for the Mello II LCP Segment of Carlsbad's LCP it seems important to gather some facts. The below Carlsbad Public Records request was filed to determine how the City and its Planning and Parks Commissions and City Council has communicated and considered these 3 LCP LUPs with Citizens during the City's past and current Coastal Park and Land Use planning activities.

These 3 LCP LUP are important for Carlsbad, and California's, Coastal land use resources. Being a 34+ year Carlsbad citizen, I don't recall any City communication, call for public input, or explicit planning agenda item on these 3 LCP LUPs when various land use and Park planning decisions were made in the areas mentioned in the 3 LCP LUPs. There appears little to no discussion of past implementation of these 3 LCP LUPs in the current City consideration of changes to the LCP. Given City staff and consultants have been working on LCP review and recommended revisions/deletions for several years this seemed odd.

Thus the 9/21/21 public records request is to gather documented facts so Carlsbad, and CCC decision makers are aware of and have data on these 3 LCP LUPs before being asked to delete/change them. On 9/30/21 Staff requested a 14-day extension to provide the data, but unfortunately this will be after the City Council is asked to vote of deletion of these 3 LCP LUPs on Oct 12<sup>th</sup>. This is the reason the information on the request below is being provided to the City Council and Planning and Parks Commissions, and CCC for the Council's Oct 12<sup>th</sup> meeting, consideration and direction.

People for Ponto Carlsbad Citizens have gathered and provided extensive documented facts and public input on the LCP. Documented facts on how Carlsbad compares with other Cities, and has communicated/considered the LCP and CA

Coastal Act regarding both Coastal Recreation (specific 29-page data file plus other data) and Camping/Lower-cost Visitor Serving Recreation uses (specific 7-page data file plus other data) has been provided to you. Over 5,000 petition requests from citizens and visitors to properly address these issues have also be provided to you.

Thank you for your consideration of this additional 3 LCP LUP information in your LCP, and Coastal Parks, planning processes.

Sincerely,  
Lance Schulte

**Re: Public Records Request Received September 21, 2021, Request # R002393-092121**

Dear Lance Schulte,

The City of Carlsbad is in receipt of your public records request received on September 21, 2021 regarding:

“Carlsbad’s Local Coastal Program (LCP) for the Mello II Segment of Carlsbad’s Coastal Zone has long established land use Policies 6-2, 6-4 & 6-10 that were adopted by Carlsbad and Certified by the CA Coastal Commission in the early/mid-1980’s. Mello II LCP Policies 6-2, 6-4 & 6-10 are shown on page 86-87 of Carlsbad’s 2016 compiled LCP and are:

“POLICY 6-2 REGIONAL PARK: If the population of Carlsbad increases in accordance with SANDAG's projected Series V Population Forecasts, it is estimated that Carlsbad will need to develop a new regional park containing 200 to 300 acres in order to adequately serve the public. A location for a new regional park must, therefore, be established. Consideration should be given to a facility within the Aqua Hedionda Specific Plan Area, or adjacent lands. The Batiquitos Lagoon area should also be considered.

POLICY 6-4 NEED FOR ADDITIONAL OVERNIGHT CAMPING: Additional overnight camping facilities, the main source of lower cost visitor and recreational facilities, are needed throughout the San Diego coastal region. Additional facilities of this kind should be provided in a regional park within the Carlsbad area. This can be accomplished in conjunction with an eventual Batiquitos Park, within the Aqua Hedionda Specific Plan Area, and/or along with the development of private recreational facilities.

POLICY 6-10 LOWER COST VISITOR-SERVING RECREATIONAL USES: Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Encourage a range of affordability for overnight visitor accommodations. Evaluate the affordability of any new or redeveloped overnight visitor accommodations, including amenities that reduce the cost of stay. Mitigation may be applied to protect and encourage affordable overnight accommodations”

The public record request is to see documents of:

- a. City Staff reports, presentations and communications to the Carlsbad Planning and Parks Commissions, and City Council regarding the City’s consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies; and
- b. Carlsbad Planning and Parks Commissions, and City Council minutes, resolutions and ordinances documenting City of Carlsbad consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies.”

On 7/13/21 the Council will consider information about options for the City to acquire/preserve Coastal Park and Open Space land use at Ponto and South Coastal Carlsbad. This email and attached files provide data on these issues that should be considered.

Most development in Coastal (and inland) Carlsbad is housing (27% in 2012 and more now). Because of 3 large lagoons and federal/State Endangered Species laws 37% of Carlsbad is protected/undevelopable water/land habitat. In 2012 only 9% was vacant land (this is less than 9% now). There are 64,000 South Carlsbad Citizens (62% of the City population) that do not have a Coastal Park. Ponto is also in the center of a 6-mile stretch of coastline without a Coastal Park and additional Coastal Park demand is created by other North County and California citizens and visitors. Ponto Planning Area F is the last meaningful sized and dimensioned vacant unplanned (and not fully Certified by the CA Coastal Commission) Coastal land west of I-5 that can practically provide any meaningful Coastal Open Space Land Uses - Coastal Recreation (i.e. Public Park) or replace a campground that provides low-cost visitor accommodations.

Planning Area F also has a specific Coastal Land Use Policy regulation that requires the consideration of the need for these Coastal Open Space Land Uses at Planning Area F and within the Poinsettia Shores Master Plan/LCP area. The CA Coastal Commission in its 2017 communications to the City/Citizens outlines this. Ponto Planning Area F is the only meaningful sized and dimensioned vacant and unplanned Coastal land within the Poinsettia Shores Master Plan/LCP area. The Coastal Open Space Land Uses in the Planning Area F Coastal Land Use Policy are “High-priority Coastal land uses” under the CA Coastal Act.

The City’s 2017 Sea Level Rise Study determined 30+ acres of this type of Coastal Open Space Land Use will be lost at Ponto due to sea level rise and coastal bluff erosion within the year 2050 planning horizon of Carlsbad’s Local Coastal Program and General Plan. This 30+ acre loss of Coastal land will not magically stop at the year 2050 planning horizon, but will continue and increase the loss of “High-priority Coastal land uses” at Ponto for who knows how many Local Coastal Program and General Plan planning horizons.

The CA Coastal Act has several decades long State Law policies that address the issues at Ponto:

- Section 30001.5 “... (c) ... maximize public recreational opportunities in the coastal zone consistent with sound resources conservation principles and constitutionally protected rights of private property owners. (d) Assure priority for coastal-dependent and coastal-related development over other development on the coast. ... “
- Section 30212.5 “... Wherever appropriate and feasible, public facilities, including parking areas or facilities, shall be distributed throughout an area so as to mitigate against the impacts, social and otherwise, of overcrowding or overuse by the public of any single area.”;
- Section 30213 “... Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...”;
- Section 30221 – Visitor serving & Recreation uses have priority over Residential & General Commercial uses.
- Section 30222 “The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development, but not over agriculture or coastal-dependent industry.”
- Section 30223 “Upland areas necessary to support coastal recreational uses shall be reserved for such uses, where feasible” ,

- Section 30251 ... The location and amount of new development should maintain and enhance public access to the coast by ... 6) assuring that the recreational needs of new residents will not overload nearby coastal recreation areas by correlating the amount of development with local park acquisition and development plans with the provision of onsite recreational facilities to serve the new development”

However, recent temporary emergency State housing laws such as SB 330 may have ‘muddied the water’ for Carlsbad Staff as to how to follow the CA Coastal Act, and create a sustainable Coastal Land Use Plan that serves the needs of Carlsbad and California Citizens. SB 330 does not prevent the CA Coastal Commission and/or City of Carlsbad from changing a Local Coastal Program, General Plan land use designation or Zoning designation on a property. Following are verbatim excerpts from SB 330 that most clearly speak to those facts:

- “65589.5. (a) (1) The Legislature finds and declares all of the following: ... (e) Nothing in this section shall be construed to relieve the local agency from complying with ... the California Coastal Act of 1976 (Division 20 (commencing with Section 30000) of the Public Resources Code).”
- “66300. (a) As used in this section: (2) Nothing in this section supersedes, limits, or otherwise modifies the requirements of the California Coastal Act of 1976 (Division 20 (commencing with Section 30000) of the Public Resources Code). For a housing development project proposed within the coastal zone, nothing in this section shall be construed to prohibit an affected county or an affected city from enacting a development policy, standard, or condition necessary to implement or amend a certified local coastal program consistent with the California Coastal Act of 1976 (Division 20 (commencing with Section 30000) of the Public Resources Code).
- (1) This section does not prohibit an affected county or an affected city from changing a land use designation or zoning ordinance to a less intensive use if the city or county concurrently changes the development standards, policies, and conditions applicable to other parcels within the jurisdiction to ensure that there is no net loss in residential capacity.

It is unclear if SB 330’s temporary emergency requirement to promote affordable housing of “no net loss in residential capacity” applies to 1) the required 26 housing units that must be affordable to “Low-income”, or 2) these 26 Low-income units and the around 110-156 non-affordable market rate units, or 3) 130 or so housing units that need to be ‘affordable to Moderate Incomes’? As a practical matter, only the minimum required 26 units affordable to “Low-incomes” are being proposed. The site will not be affordable to “Moderate-Incomes”. This issue of what is more important to the State’s Coastal Land Use Resources 26 ‘low-income units’ and the forever loss of needed Coastal Open Space Land Use; or addressing the loss Coastal Open Space Land Use with the only meaningful size vacant and Coastal unplanned land at Ponto.

Attached, People for Ponto citizens compiled some General Comparative Cost/Benefit analysis from City data, and also other critical and relevant data that should be considered. Ponto Coastal Land Use issues are not just a local city issue but are a ‘poster child’ for larger Statewide Coastal Resource and Coastal Land Use planning policy.

The CA Coastal Act and recent temporary emergency housing laws create some very fundamental questions for the CA State Legislature, Governor, CA Coastal Commission & HCD; and the City in trying to address State Law are:

1. Should the CA Legislature amend the CA Coastal Act to provide a “no net loss capacity” requirement for the State’s high-priority Coastal Open Space Land Uses and Coastal Recreation? California knows it is losing high-priority Coastal Open Space Land Uses and Coastal Recreation due to Sea Level Rise and accelerated coastal erosion, and this will be a long-term and permanent loss. Should a “no net loss of high-priority Coastal Open Space Land Uses” law be added to the CA Coastal Act by the CA Legislature like it temporarily created for housing land uses? CA and Carlsbad know we will lose 30+ acres of high-priority Coastal Open Space Land Uses at Ponto. This fact and fundamental question is not being addresses in a comprehensive way. People for Ponto Citizens have raised this issue since 2017 and we still have not had the comprehensive and inclusive approach needed and requested.

2. If the CA Coastal Commission changes residential land use in an un-Certified Coastal parcel, or does so via an LCP Amendment, is the City required to provide “no net residential loss”? Or is the CA Coastal Commission required to provide “no net residential loss”? Or it seems the law is written imply that there no requirement to provide “no net residential loss”?
3. What happens when a City (or CA Coastal Commission) needs to change residential land use to address other land use needs but runs out of parcels to provide “no net residential loss”? Are they prohibited from doing that? Is a temporary housing the tail that wagging the forever Coastal land use need dog?

Coastal Land next to and near the Coast is finite, very limited and is needed to serve large inland and visitor populations. Most Coastal land is developed with housing. Much past housing development has walled off the coast, and there are only a handful of vacant lands are left to provide Coastal Parks for large inland and visitor populations. These few remaining vacant lands are not equitably distributed along the coast.

Vacant Coastal land like Ponto is a rare, finite and a precious Coastal Open Space land resource. There is a 6-mile length of coastline centered around Ponto without a Coastal Park. If Ponto is developed for more residential it will be lost forever. If it is Developed Right as a much needed Coastal Park it will be preserved forever.

We all – Citizens, Council, State Legislature, Coastal Commission and HCD – are in an important once in a lifetime/career discussion that has forever consequences and that will impact future generations and their children and children’s children in profound ways.

We hope the message truly reaches you; and you do the right thing for the future and future generations.

Sincerely,  
Lance Schulte  
A People for Ponto Citizen

**Subject:** Carlsbad DLCP-LUPA & Ponto issues Public Input - Sea Level Rise and Carlsbad’s DLCP-LUPA’s projected/planned Loss of Open Space at Ponto

Dear City Council, Planning Commission, Parks Commission, & Beach Preservation Commission; CA Coastal Commission and State Parks:

Please include this email and attached file ‘Sea Level Rise and Carlsbad’s DLCP-LUPA’s projected/planned Loss of Open Space at Ponto’ as public input into Carlsbad’s proposed Draft LCP-Land Use Plan Amendment, and all City and CA Coastal Commission and CA Housing & Community Development proposed actions regarding Ponto.

The attachment summarizes some of the existing Coastal Open Space shortfall and distribution issues; and the projected and planned future forever loss of existing Coastal Open Space land and CA Coastal Act ‘High-Priority’ Coastal Land Uses at Ponto due to Sea Level Rise. The planned loss of Coastal Open Space is at the same time when City and Statewide demand for those reduced ‘high-Priority’ Coastal Open Space Land Uses will increase from future growth of both resident population and visitors. There is limited vacant Coastal land suitable for these ‘High-Priority’ Coastal Open Space Land Uses, and Ponto is one of the last in the Carlsbad and the San Diego County coastline. Ponto Planning Area F

has specific CA State Coastal Act and existing Local Coastal Program (Land Use Plan Policies and Zoning/implementation plan regulations) that require City and CA Coastal Commission consideration of these important CA Coastal Open Space Land Use issues before changing the existing 'Non-Residential Reserve' Coastal Land Use Policy designation and Zoning on Planning Area F.

As 34-year Carlsbad citizen I love Carlsbad. As such I know, as do many other Carlsbad citizens and businesses, how important Ponto is to our citizens, city, and future Carlsbad (and California) generations and our social and economic sustainability. The attached is intended to help the City Council, City and CCC in understanding and addressing some of the basic existing and future 'High-Priority' Coastal Open Space Land Use supply/demand issues at Ponto.

Sincerely,  
Lance Schulte

**Subject:** Support for the Proposal for Open Park Space at Ponto Vote October 12, 2021

My family and I have been residents of Coastal Carlsbad for over twenty years. The need to preserve open space, especially near the ocean and lagoons, is very important to us. Everyone we know including friends, business contacts, people who enjoy outside activities and everyone with any concern for the environment feels the same.

We strongly oppose the possibility of developing the "Ponto Project" as housing and/or commercial space. Instead, the proposal for the land to be used as a public park is responsible, reasonable and a benefit all persons could enjoy.

Carlsbad has and continues to experience high and medium density residential and commercial development. Ponto's unique location, and the need to preserve it for the present and the future supports the recommendation above.

**Low Cost Visitor Accommodations:**

1. On 10/8/21 the Carlsbad City Council and CA Coastal Commission were emailed data from an Official Carlsbad Public Records Request (# R002393-092121) on the City of Carlsbad's past compliance/noncompliance with the currently exiting Mello II LCP Land Use Policies # 6-2, 6-4 & 6-10 Certified in the mid-1980s. The City's documents show:
  - a. For Policy 6-2 the 200-300 acre Park called out in Policy 6-2 has been reduced to Veterans Park's 91.5 acres, of which only 54% or 49.5 acres is even useable as a Park. The City provided no documents on how a 200-300 acre park called for in Policy 6-4 is now only 49.5 useable acres.
  - b. For Policy 6-4 there were no City documents were provided. There was no City Public discussion, consideration, or City compliance with Policy 6-4 since the mid-1980's.
  - c. For Policy 6-10 documents were provided that stated that 3 hotels – Flower Fields Westin, Legoland Hotel, and Timeshare Expansion were all considered Low Cost Accommodations by the Developer's Report to City. Table 3-1 below from the Draft Proposed LCP Amendment however shows these Accommodations are NOT Low-Cost Accommodations but "Upper Upscale", "Luxury", and "Upscale". Is this right? Has Policy 6-10 seems to have been circumvented in the City's Coastal Development Permit process. The Draft LCP Amendment should address an accountable approach to compliance with Policy 6-10.

**Table 3-1, Carlsbad Coastal Zone Hotel Inventory**

Property	Smith Travel Research Cost Scale	Rooms
Days Inn Carlsbad	Economy	45
Scandia Motel	Economy	20
Motel 6 Carlsbad East	Economy	140

<b>Total Hotel Rooms</b>		<b>2,989</b>
South Carlsbad State Beach Campground	Lower-Cost (per the average daily rate for "Economy" hotels)	222
<b>Total Accommodations</b>		<b>3,211</b>

Source: Smith Travel Research, October 2018

The 3 existing LCP Land Use Policies are important for Carlsbad, and California’s, Coastal land use resources. There appears little to no discussion of the City’s past apparent failure to implementation of these 3 LCP LUPs in the current City consideration of changes to the LCP.

Following is a copy of Public Records Request # R002393-092121: “Carlsbad’s Local Coastal Program (LCP) for the Mello II Segment of Carlsbad’s Coastal Zone has long established land use Policies 6-2, 6-4 & 6-10 that were adopted by Carlsbad and Certified by the CA Coastal Commission in the early/mid-1980’s. Mello II LCP Policies 6-2, 6-4 & 6-10 are shown on page 86-87 of Carlsbad’s 2016 compiled LCP and are:

- “POLICY 6-2 REGIONAL PARK: If the population of Carlsbad increases in accordance with SANDAG's projected Series V Population Forecasts, it is estimated that Carlsbad will need to develop a new regional park containing 200 to 300 acres in order to adequately serve the public. A location for a new regional park must, therefore, be established. Consideration should be given to a facility within the Aqua Hedionda Specific Plan Area, or adjacent lands. The Batiquitos Lagoon area should also be considered.

- POLICY 6-4 NEED FOR ADDITIONAL OVERNIGHT CAMPING: Additional overnight camping facilities, the main source of lower cost visitor and recreational facilities, are needed throughout the San Diego coastal region. Additional facilities of this kind should be provided in a regional park within the Carlsbad area. This can be accomplished in conjunction with an eventual Batiquitos Park, within the Aqua Hedionda Specific Plan Area, and/or along with the development of private recreational facilities.
  - POLICY 6-10 LOWER COST VISITOR-SERVING RECREATIONAL USES: Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Encourage a range of affordability for overnight visitor accommodations. Evaluate the affordability of any new or redeveloped overnight visitor accommodations, including amenities that reduce the cost of stay. Mitigation may be applied to protect and encourage affordable overnight accommodations”
2. The public record request is to see documents of:
    - a. City Staff reports, presentations and communications to the Carlsbad Planning and Parks Commissions, and City Council regarding the City’s consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies; and
    - b. Carlsbad Planning and Parks Commissions, and City Council minutes, resolutions and ordinances documenting City of Carlsbad consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies.”
  3. P. 3-3 cites CA Coastal Act (CCA) Polices. But the City’s proposed Local Coastal Program (LCP) Land Use Plan (LUP) in the Ponto Area, particularly for Planning Area F, appears inconsistent with these CCA policies:
    - a. Section 30213 – protect, encourage and provide Lower-Cost Visitor & Recreation Facilities.
    - b. Section 30221 – Visitor serving & Recreation uses have priority over Residential & General Commercial uses.
    - c. Section 30223 – Upland areas reserved to support Coastal Recreation uses
    - d. Section 30252(6) – correlate development with Local Park acquisition & on-site recreation
  4. Planning Area F used to be designated “Visitor Serving Commercial” as part of the original 1980’s LUP and LCP Samis Master Plan for Ponto. In the 1996 this LUP was changed to the now current LCP and LUP designation of “Non-Residential Reserve” with a specific LCP requirement to reconsider a high-priority recreation or visitor serving Coastal land use while other Ponto land uses were changed to low-priority residential uses (see Poinsettia Shores Master Plan/LCP). It seems appropriated that the LUP should re-designated Planning Area F back to a Visitor Serving Commercial and Open Space (“i.e. Public Park” in the existing LCP) to provide high-priority coastal uses v. low-priority residential/general commercial uses: in part for the following reasons:
    - a. Planning Area F’s existing LCP requirement requires this consideration, but the City has never disclosed this requirement to Citizens nor followed this requirement during the Cities two prior ‘planning efforts’ in 2010 and 2015 as documented by official Carlsbad Public Records Requests 2017-260, 261, 262.
    - b. Ponto developers (both Samis and Kaisza) were both allowed to overdevelop Ponto, by not providing the minimum Open Space required by Carlsbad’s and Citizen approved Growth Management Open Space Standard. Over 30-acres of land that should have been dedicated to Growth Management Open Space (a high-priority land use) was instead allowed to be developed with low-priority residential development. If the City’s Growth Management Open Space Standard was properly applied at Ponto there would be 30-acres more open space at Ponto then there is now. This is a significant impact to CCA policies that can be corrected by changes in the Ponto LUP to properly implement City Open Space Standards and CCA policies.

- c. The LCPA acknowledges that past (2005-17) and near-term (2019-23) growth in Carlsbad visitor demand for coastal recreation and accommodations, and indicate high past hotel occupancy rates that implies current hotel supply is just meeting current demand. Although the LCPA does not discuss the high occupancy rates at the Low-Cost Accommodation campground facilities, It is assumed the campground occupancy rate (understood to be around 80% or more) and demand is higher than that of hotels. This should be documented/defined. Based on current and near term demand for visitor accommodations the LCPA states on page 3-12 "... the City should identify and designate land where new hotels and other visitor-serving uses can be developed." It is clear where the 'City should identify and designate [this] land'? What new land(s) should be so identified and designated? However, the LCPA does not disclose longer-term visitor accommodation needs beyond 2023, nor provide a long-term plan for meeting this long-term need. The LCPA should publicly disclose, analyze and provide for the longer-term "Coastal Zone Buildout needs" (beyond present and well beyond 2023) for visitor Coastal accommodations, particularly Low-Cost Accommodations and Recreation needs because the LCPA's LUP is a long-term plan for Carlsbad's buildout estimated to extend beyond 2035. Also, given the fact that there are very few vacant Coastal sites (like Ponto) that are still available to address these long-term high priority Coastal land uses – recreation and visitor serving – reserving these vacant lands for high priority coastal land uses is consistent with many CCA Policies. Following are some longer-term projections of resident demand for Coastal park and recreation needs. It seems logical that long-term visitor demand will increase at a similar rate as the general population increase rate, unless our coast becomes too overcrowded and unattractive vis-à-vis other visitor destinations. A long-term visitor demand (to go with the below long-term resident demand long-term Sea Level Rise impacts) for Coastal recreation resources should be a part of the proposed LCPA and part of the long-term LUP to provide resources for those long-term needs and to mitigate for those long-term Sea Level Rise impacts.

## Increasing demand for Coastal recreational land

### San Diego County Population

1980	1,861,846
1990	2,498,016
2000	2,813,833
2010	3,095,313
2020	3,535,000 = 46,500 people per mile of coast
2030	3,870,000
2040	4,163,688
2050	4,384,867 = 57,700 people per mile of coast

2010 - 2050 % Change = 42% increase in population

SANDAG Preliminary 2050 Regional Growth Forecast

## Increasing demand for Coastal recreational land

### Yearly Visitors to San Diego County

2016	34,900,000
2017	34,900,000
2018	35,300,000
2019	35,900,000
2020	36,500,000 = average 100,000 visitors per day
2021	37,100,000 or 2.83% of Population per day
2022	37,700,000 or 1,316 Visitors/coastal mile/day

Typically around 1.6% annual increase in visitors

San Diego Tourism Authority, San Diego Travel Forecast, December 2017

d. City in the LCPA inaccurately analyzes and misrepresents how much Visitor Serving Accommodations, particularly Low-Cost Accommodations, Carlsbad currently provides on a relative or comparative basis. The LCPA’s inaccurate and simplistic analysis does not adjust for the different sizes of the Coastal Zone in the 3 cities (Carlsbad, Oceanside and Encinitas) used in the analysis. Carlsbad’s Coastal Zone is significantly larger than both the other cities, so it has more land and accommodations, just like San Diego’s Coastal Zone is larger than Carlsbad’s and San Diego is larger than its smaller adjacent neighbors Del Mar and National City. A simplistic how many accommodations are in your adjacent cities is an inappropriate analytical method for Carlsbad-Oceanside-Encinitas; just as it is inappropriate to compare the number of San Diego’s hotels with the number hotels in San Diego’s smaller neighbors Del Mar and National City. The accurate method to do a comparative analysis is based on a common denominator, such as the amount of accommodations per 1,000 acres of Coastal Zone land along with comparing each city’s relative percentages. This is a more accurate and appropriate analysis that the LCPA should provide, and not that provided on page 3-13. The LCPA analysis also does not fully discuss and compare “Low-Cost” accommodations that are part of the CCA policies; nor provide a mitigation approach for “Low-Cost” accommodations lost, just ‘Economy hotel rooms’. Below is data from the LCPA and other LCPs that shows the proper and more accurate comparison of existing Visitor Serving Accommodations in Carlsbad-Oceanside-Encinitas and includes Low-Cost Accommodation numbers/comparisons that are totally missing in the LCPA analysis. As the data shows, Carlsbad does not perform as well in Visitor Accommodations, and most particularly in “Low-Cost Visitor Accommodations”, as the LCPA states and proposes in the LUP relative to Oceanside and Encinitas. An honest analysis like below should be provided in the LCPA LUP, particularly given the very limited amount of vacant Coastal land left to provide for high-priority Coastal Uses. Ponto is one of the last remaining vacant Coastal areas.

Carlsbad's proposed 2019 LCPA uses comparative 3-city data to address how Carlsbad's 2019 LCPA addresses Visitor Serving Accommodation needs. “Low-Cost” Accommodations are an important CA Coastal Act issue

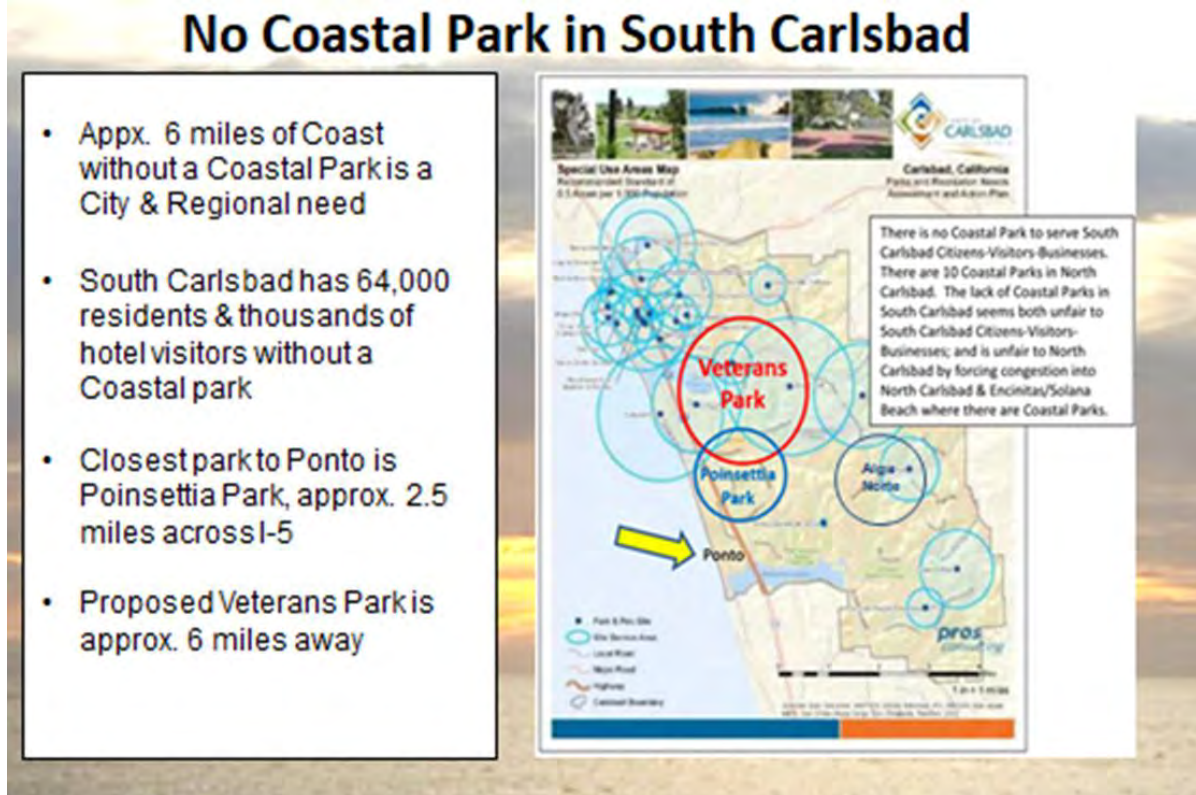

<u>Visitor Serving Accommodations (VSA) data</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>	<u>Data source</u>	
Coastal Acres (i.e. in Coastal Zone)	9,216	1,460	7,845	Carlsbad Draft LCPA 2019 & Oceanside & Encinitas LCPs	
VSA rooms: total	3,211	975	634	Carlsbad Draft LCPA 2019, pp 3-12 - 15

VSA rooms: Low-Cost (campsites)	220	413	171	Carlsbad Draft LCPA 2019, State Parks, Oceanside Harbor, Paradise-by-the-Sea and Oceanside RV Park data. Carlsbad Draft LCPA 2019 does not evaluate other City’s Low-Cost Accommodations	
<u>Data analysis</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>	<u>3-city Average</u>	<u>Key Findings</u>

<b>VSA rooms/1,000 Coastal acres</b>	<b>348</b>	668	81	<b>366</b>	<b>Carlsbad provides overall Visitor Accommodations at slightly below the 3-city average</b>
<b>% of VSA rooms that are Economy</b>	<b>18%</b>	35%	55%	<b>36%</b>	<b>Carlsbad provides a percentage of Economy Accommodations about 50% below the 3-city average</b>
<b>Economy VSA rooms/1,000 Coastal acres</b>	<b>64</b>	237	44	<b>115</b>	<b>Carlsbad provides Economy Accommodations about 50% below the 3-city average</b>
<b>% VSA rooms that are Low-Cost</b>	<b>7%</b>	42%	27%	<b>25%</b>	<b>Carlsbad provides a percentage of Low-Cost Accommodations about 72% below the 3-city average</b> Carlsbad LCPA also does not provide protection for loss of "Low-Cost" campground rooms, only "Economy hotel rooms"
<b>Low-Cost VSA rooms/1,000 Coastal acres</b>	<b>24</b>	283	22	<b>110</b>	<b>Carlsbad provides Low-Cost Accommodations about 78% below the 3-city average</b>

- e. The LCPA is not providing for any new "Low Cost Visitor Accommodation" land uses in the proposed LUP for current/long-range needs, even though page 3-12 points out the current demand for accommodations, and the current Existing LCP has polices to increase "Low Cost Visitor Accommodation" land uses. We understand that "Low-cost Visitor Accommodation" occupancy rates at CA State Campground at Carlsbad are near 90%. This occupancy rate is much higher [signifying higher demand] than the occupancy rates of both the hotels, and "Economy Visitor Accommodations" which the LCPA seeks to protect. The Proposed LCPA LUP should provide historic and current "Low-cost Visitor Accommodation" occupancy rate data at CA State Campground at Carlsbad and compare to occupancy demand for other accommodations to determine the highest occupancy demands and therefore needs. Why is the Proposed LCPA LUP not protecting AND EXPANDING (for future CA & Carlsbad population growth and visitor demand growth) the supply of this higher demand for "Low-cost Visitor Accommodations" at the State Campground? Why is the Proposed LCPA LUP protecting and expanding this high-priority Coastal Land Use particularly given the Current Existing Carlsbad LCP policies on this issue, long history of this issue documented in the Current Existing Carlsbad LCP Mello II Segment, and the fact that "Low-cost Visitor Accommodations" are a Statewide 'high-Coastal-priority' land use in CA Coastal Act Goals and Policies? Why is the proposed LUP not recognizing and incorporating these issues? The Current Existing Carlsbad LCP policies [see Existing Carlsbad LCP Mello II Segment polies 2.3, 4.1, 6.1, 6.4, 6.5, 6.9, 6.10, 7.5, and 7.15 for example] are not referenced and discussed in the Proposed LUP nor is a comprehensive long-term analysis of the impact of the proposed LCPA LUP's elimination of theses Current Existing Carlsbad LCP policies vis-à-vis the CA Coastal Act Goals and Policies? How and why is the City proposing changes to these Existing Carlsbad LCP policies in the Mellow II Segment, particularly given the improved knowledge about Sea Level Rise, and Sea Level Rise and Coastal Bluff erosion

impacts on the State Campground's "Low-cost Visitor Accommodations" - High-Coastal-Priority land use under the CA Coastal Act?

- f. At Ponto there is no low-cost/no-cost Recreational use as shown by the City of Carlsbad's adopted Parks Master Plan (pp 87-89) that show the City's adopted Park Service Areas in the following image. The image's blue dots are park locations and blue circle(s) show the City's adopted service areas:

Per the current Existing LCP requirements for Planning Area F at Ponto "Coastal Recreation (i.e. Public Park)" must be considered. How is the Proposed LCPA LUP not reserving Upland Areas at Ponto for recreational uses given Sea Level Rise and Coastal Bluff erosion impacts as shown in Proposed LCPA LUP Attachment B, and Exhibits B6 and B7? There is very limited amount of vacant Upland Coastal land at Ponto and South Coastal Carlsbad to accommodate low-cost/no-cost Recreational use "(i.e. Public Park)", so why is this last remaining vacant Coastal land at Ponto not being reserved for "high-Coastal Priority Land Uses"? Why is the Proposed LCPA LUP proposing this last remaining vacant Coastal land at Ponto be converted from "Non-residential Reserve" to 'low-coastal-priority residential and general commercial land uses'?

5. The proposed LCPA approach to protect existing 'economy hotels' but not 'Low-cost Visitor Accommodations' appears inappropriate. Existing hotel owners providing 'Economy' rooms are penalized while all other more expensive 'non-economy hotel' owners are not required to mitigate for their not providing more affordable accommodations. It seems like a fairer and rational approach is to use the same framework as the City's inclusionary affordable housing requirements and have the requirement and burden of providing affordable accommodations required by all visitor accommodation providers, including short-term rentals of residential homes. Use of any per accommodation "in-lieu fee" should be SUFFICIENT TO FULLY MITIGATE for not providing a required affordable accommodation by being sufficient to fully fund a new 'affordable accommodation' on a one-for one basis. City Transit Occupancy Tax revenues could also potentially be used to provide a catch-up method for existing

“non-low-cost and/or non-economy accommodation providers” to address what would nominally be their inclusionary contribution. It seems like the LCPA approach needs significant rethinking to provide a fair and rational program to include reasonable long-term and sustainable affordability in visitor accommodation’s, particularly give the Sea Level Rise and Coastal Bluff Erosion impacts on Carlsbad’s Only “Low-cost Visitor Accommodations” and the State Campground and beaches and Carlsbad’s Coastal access roadways.

6. The Proposed LCPA LUP does not provide a means for citizens to understand the proposed changes to the current Existing LCP goals and policies. There are numerous current Existing LCP LUP goals and policies regarding “Low-cost Visitor Accommodations”. All these should be listed in the Proposed LCPA LUP along with a description on how and why these current Existing LCP Goals and policies are being modified or removed in the Proposed LCPA LUP.
7. Carlsbad has only a Finite amount of vacant Coastal land to provide for an Infinite amount of future Carlsbad/CA residents and visitors to Carlsbad’s Coastal Zone. How these Finite Coastal Land resources are used to supply high-priority Coastal Recreation and Low-cost Visitor Accommodation land uses to address the Infinite demand from future population and visitor growth will be critical in determining the desirability and sustainability of our Carlsbad and CA Coastal Resources. Expanding Coastal Open Space Land use to accommodate the growing population/visitor demand for Coastal Open Space is a critical City and CA policy issue.
8. Carlsbad’s 2015 General Plan Update (2015 GPU) could not consider data in the December 2017 Sea Level Rise Vulnerability Assessment (2017 SLRVA). The Citizens of Carlsbad, City of Carlsbad and the CA Coastal Commission did not have the ability to know about and consider the projected significant loss of ‘high-priority’ Coastal Open Space Land Use at Ponto and South Carlsbad. The projected loss of these Coastal Open Space Land Uses at Ponto – beach and State Campground – will within the ‘lifetime of Carlsbad’s LCP and General Plan’, basically eliminate all of Carlsbad’s existing and planned Low-cost Visitor Accommodations and the only public Coastal Recreation land in Ponto and South Carlsbad. Please see the attached Public Comments data file for Carlsbad’s Proposed Draft LCPA-LUPA and all things Ponto regarding Sea Level Rise titled: “Sea Level Rise and Carlsbad’s DLCP-LUPA’s projected/planned Loss of Open Space at Ponto” that summarizes the projected/planned loss of almost all the high-priority Coastal Open Space at Ponto due to sea level rise. This data should be considered with both the public comments on Low-cost Visitor Accommodations and Coastal Recreation in submitted earlier.
9. A Coastal Park provides the lowest-cost (i.e. no-cost) visitor access to the Coast. Although Coastal Parks do not provide over-night sleeping access, they do provide no-cost Coastal Recreation day-use.

**Subject:** Support for the Proposal for Open Park Space at Ponto Vote October 12, 2021

My family and I have been residents of Coastal Carlsbad for over twenty years. The need to preserve open space, especially near the ocean and lagoons, is very important to us. Everyone we know including friends, business contacts, people who enjoy outside activities and everyone with any concern for the environment feels the same.

We strongly oppose the possibility of developing the "Ponto Project" as housing and/or commercial space. Instead, the proposal for the land to be used as a public park is responsible, reasonable and a benefit all persons could enjoy.

Carlsbad has and continues to experience high and medium density residential and commercial development. Ponto's unique location, and the need to preserve it for the present and the future supports the recommendation above.

**Subject:** comments of - Discover easy, convenient alternative transportation options in Carlsbad

Dear Carlsbad City Council and Parks, Traffic and Planning Commissions, and CA Coastal Commission:

Please consider this information in your Parks-Land Use-Mobility-Coastal planning efforts.

People for Ponto Citizens have called out the locational inequity in City Park facilities in Coastal South Carlsbad/Ponto. Please see the attached 30-page Coastal Recreation comments on Carlsbad Proposed Local Coastal Program Amendment and Parks Master Plan Update.

The Council has said Veterans Park 4-6 miles away and not very accessible other than by car, is providing citizens the Park solution for South Carlsbad's and Ponto's Park Deficit. This is the most pronounced example of how there is limited mobility options for many elderly, children, and busy adults (with little time to drive after a work) to access their 'local' Park. Using the 'you must drive to' Veterans Park as the 'local park' solution to neighborhood and distant Quadrant Park Demand is something this Workshop seems should try to address and connect with Park planning activities. Also the loss of City Parkland acreage for actual park use because large vehicle parking lots (a mobility land use) need to be provided.

The City Council has created an unequal distribution of Parks (and particularly Coastal Parks) in its City Land Use/Parks/Circulation policies that do not require Developers/City to provide Parks be within a 10-minute walk from neighborhoods (like other Cities require). Council policy also only requires developers/City provide the bare minimum 3 acres of parkland per 1,000 population v. the 60% higher 5 acre/1,000 population other cities require. More acreage will also increase park access. Walkable access to City Parks will become more vital for Quality of Life as CA cities increase residential densities and Park demand. It is suggested that these issues and in particular the lack of mobility options between South Carlsbad Park Demand and its 'local park' Supply at Veterans' Park should be factored into the Workshop and other City planning efforts. People for Ponto Citizens have mentioned this for years - please consider the attached 30-page Coastal Recreation data.

Thank you.

Thank you again,  
Lance Schulte

PS: it seems odd to have to register and fill out all sorts of personal information to simply attend an open workshop. This is not required for in-person workshops.

## Discover easy, convenient alternative transportation options in Carlsbad

Join us for a Move Carlsbad workshop

# MOVECarlsbad

Easy, affordable and sustainable ways to get around the city

Join us for an interactive, virtual Move Carlsbad workshop series to explore easy, affordable and sustainable ways to get around Carlsbad. The City of Carlsbad and Circulate San Diego will host four, one-hour workshops via Zoom to demystify public transit and answer questions about Carlsbad's transportation options. This Move Carlsbad workshop series is part of the city's [Age-Friendly Carlsbad](#) initiative which seeks to enhance the quality of life in the community for people of all ages and abilities.

**RSVP here to attend the workshops below via Zoom:**

**<http://www.carlsbadca.gov/workshops>**

**Public Transit 101**

**Date:** Oct. 19, 10 a.m.

**Description:** Learn more about public transportation options available in Carlsbad and tips to improve your transit experience.

**Walking and Biking 101**

**Date:** Oct. 26, 10 a.m.

**Description:** Learn the best routes, safety tips and more.

**Getting around Carlsbad: What's Next?**

**Date:** Nov. 2, 10 a.m.

**Description:** Learn about transportation and mobility news.

**Learn more and RSVP to attend**

- RSVP here to receive your Zoom link to attend all four workshops: [www.carlsbadca.gov/workshops](http://www.carlsbadca.gov/workshops)
- Visit [www.carlsbadca.gov/workshops](http://www.carlsbadca.gov/workshops), call 760-602-4650, or stop by the Carlsbad Senior Center at 799 Pine Ave. for more information.

Updated Pubic Comments Coastal Recreation submitted on Oct 12<sup>th</sup> 2021:

---

On 10/8/21 the Carlsbad City Council and CA Coastal Commission were emailed data from an Official Carlsbad Public Records Request (# R002393-092121) on the City of Carlsbad's past compliance/noncompliance with the currently exiting Mello II LCP Land Use Policies # 6-2, 6-4 & 6-10 Certified in the mid-1980s. The City's documents show:

- For Policy 6-2 the 200-300 acre Park called out in Policy 6-2 has been reduced to Veterans Park's 91.5 acres, of which only 54% or 49.5 acres is even useable as a Park. The City provided no documents on how a 200-300 acre park called for in Policy 6-4 is now only 49.5 useable acres.
- For Policy 6-4 there were no City documents were provided. There was no City Public discussion, consideration, or City compliance with Policy 6-4 since the mid-1980's.
- For Policy 6-10 concerns providing Low Cost Visitor Accommodations. Public Parks are the lowest cost (free) Visitor accommodating land use there is.

The 3 existing LCP Land Use Policies are important for Carlsbad, and California's, Coastal land use resources. There appears little to no discussion of the City's past apparent failure to implementation of these 3 LCP LUPs in the current City consideration of changes to the LCP.

Following is a copy of Public Records Request # R002393-092121: "Carlsbad's Local Coastal Program (LCP) for the Mello II Segment of Carlsbad's Coastal Zone has long established land use Policies 6-2, 6-4 & 6-10 that were adopted by Carlsbad and Certified by the CA Coastal Commission in the early/mid-1980's. Mello II LCP Policies 6-2, 6-4 & 6-10 are shown on page 86-87 of Carlsbad's 2016 compiled LCP and are:

- "POLICY 6-2 REGIONAL PARK: If the population of Carlsbad increases in accordance with SANDAG's projected Series V Population Forecasts, it is estimated that Carlsbad will need to develop a new regional park containing 200 to 300 acres in order to adequately serve the public. A location for a new regional park must, therefore, be established. Consideration should be given to a facility within the Aqua Hedionda Specific Plan Area, or adjacent lands. The Batiquitos Lagoon area should also be considered.
- POLICY 6-4 NEED FOR ADDITIONAL OVERNIGHT CAMPING: Additional overnight camping facilities, the main source of lower cost visitor and recreational facilities, are needed throughout the San Diego coastal region. Additional facilities of this kind should be provided in a regional park within the Carlsbad area. This can be accomplished in conjunction with an eventual Batiquitos Park, within the Aqua Hedionda Specific Plan Area, and/or along with the development of private recreational facilities.
- POLICY 6-10 LOWER COST VISITOR-SERVING RECREATIONAL USES: Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Encourage a range of affordability for overnight visitor accommodations. Evaluate the affordability of any new or redeveloped overnight visitor accommodations, including amenities that reduce the cost of stay. Mitigation may be applied to protect and encourage affordable overnight accommodations"

The public record request is to see documents of:

- City Staff reports, presentations and communications to the Carlsbad Planning and Parks Commissions, and City Council regarding the City’s consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies; and
- Carlsbad Planning and Parks Commissions, and City Council minutes, resolutions and ordinances documenting City of Carlsbad consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies.”

Updated Pubic Comments Coastal Recreation submitted on January 2021:

---

Over 11-months ago in a 1/29/20 1:56PM email People for Ponto Carlsbad citizens first provided the City of Carlsbad both data and comments on **14 critical Coastal Recreation issues (see pages 5-30 below)**. The data and the 14 critical issues do not seem to be receiving appropriate disclosure/presentation/discussion/consideration in the Dec 2, 2020 Staff Report to the Planning Commission. To assure the 26-pages of citizen data and requests in the 1/29/20 email was received by the Planning Commission the file was re-emailed on 12/22/20 12:24pm and specifically addressed to City Council, City Clerk, Planning Commission, Parks Commission, Housing Commission, HEAC, CA Coastal Commission, and CA HCD. As citizens we request each of these 14 data points (with supporting data) be honestly considered.

In reading the Dec 2 Staff Report citizens conducted additional analysis of City Park data. That research further reinforces and documents the 14 Critical Coastal Recreation issues and highlights the relatively poor amount of City Park and Coastal Recreation planned by Carlsbad’s Staff proposed Draft LCP-LUPA. We hope the City Council and City Commissions, and CA Coastal Commission & HCD will consider this additional analysis of City data and citizen input:

<u>Coastal Zone data</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>	<u>note or source</u>
Coastline miles	6.4	3.9	6.0	Carlsbad Draft LCPA 201, Google Maps
Coastal Zone Acres	9,219	1,460	7,845	& Oceanside & Encinitas LCPs
Coastal Zone Acres	100%	16%	85%	% relative to Carlsbad

City Park Standard data

City Park Standard	3	5	5	required park acres / 1,000 population
Park Standard %	100%	167%	167%	% is relative to Carlsbad

- Oceanside & Encinitas 'require' and plan for 67% MORE Parkland than Carlsbad
- Carlsbad 'requires' and plans for ONLY 60% as much Parkland as Oceanside & Encinitas
- Carlsbad only requires developers provide 60% of the parkland (or in-lieu fees) as Oceanside & Encinitas require
- Encinitas has a 'Goal' to provide 15 acres of Park land per 1,000 population

Developed City Park	2.47	3.65	5.5	acres / 1,000 population
Developed Park	100%	148%	223%	% is relative to Carlsbad

- Oceanside provides 48% MORE developed park land than Carlsbad
- Encinitas provide 123% MORE developed park land than Carlsbad
- Carlsbad ONLY provides 68% and 45% as much Parks as Oceanside & Encinitas respectively

National Recreation & Park Asso. Metric: a typical City provides 1 park / 2,281 pop. & 9.9 Park acres / 1,000 population

- Carlsbad (3 acre) Park Standard is ONLY 30% of what a typical City provides nationally
- Carlsbad requires developers to provide, 70% LESS Park acres than typical City provides nationally

National Recreation & Park Asso., Trust for Public Land, et. al.: 10 minute (1/2 mile) Walk to a Park Planning Goal

- Both Oceanside and Encinitas plan parks to be within a 10-minute (1/2 mile) walk to homes.
- Carlsbad DOES NOT plan Parks within walking distance to homes
- Carlsbad is NOT providing equitable and walking/biking access to Parks

Some Carlsbad Parks that are not fully useable as Parks:

<u>Existing Parks with Unusable Open Space acreage</u>	<u>total park acres</u>	<u>Unusable park acres</u>	<u>% of park unusable</u>	<u>reason unusable</u>
Alga Norte - SE quadrant	32.1	10.7	33%	1/3 of park is a Parking lot not a park In many other Carlsbad Parks a significant percentage of those Parks are consumed by paved parking lots and unusable as a Park.
Hidden Hills - NE quadrant	22.0	12.7	58%	city identified unusable habitat open space
La Costa Canyon SE quadrant	14.7	8.9	61%	city identified unusable habitat open space
Leo Carrillo - SE quadrant	27.4	16.5	60%	city identified unusable habitat open space
Poinsettia - SW quadrant	<u>41.2</u>	<u>11.1</u>	<u>27%</u>	city identified unusable habitat open space
Existing Park subtotal	137.4	59.9	44%	44% of these Parks are unusable as Parkland

Anticipated Future Park development projects

<u>Park - quadrant</u>				
Veterans - NW	91.5	49.5	54%	estimated unusable habitat open space
Cannon Lake - NW	6.8	3.4	50%	estimated unusable water open space
Zone 5 Park expansion - NW	9.3	0	0	appears 100% useable as a Park
Robertson Ranch - NE	<u>11.2</u>	<u>0</u>	<u>0</u>	appears 100% useable as a Park
Future park subtotal	118.8	52.9	45%	45% of Future Parks are unusable as Parks

**Unusable Open Space acres**

**in Existing & Future Parks**      256.2    112.8      44%      **112.8 acres or 44% is unusable as Parks**

- 112.8 acres or 44% of the Existing & Future Parks are unusable Open Space and can't be used as Parkland
- **Based on City's minimum 3-acres/1,000 population Park Standard, 112.8 acres of Unusable Parkland means 37,600 Carlsbad Citizens (or 32.5% of Carlsbad's current population of 112,877) will be denied Parkland that they can actually use as a Park.**
- 112.8 acres of Existing & Future unusable 'park' / 3 acre park standard x 1,000 population = 37,600 Carlsbad citizens without useable parkland per City minimum standard.
- **59.9 acres of Existing unusable 'park' / 3 acre park standard x 1,000 population = 19,967 Carlsbad citizens and their children are currently being denied useable park land. 19,967 is 17.7% of Carlsbad's current population.**
- In addition to these 19,967 existing citizens and their children denied park land, the City needs to develop additional Park acreage in the NE, SW and SE quadrants to cover current shortfalls in meeting in the minimal 3 acre/1,000 population park standard for the current populations in the NE, SW and SE quadrants.
- **The current NE, SW and SE quadrants park acreage shortfalls are in addition to the 19,967 Carlsbad citizens and their children that do not have the minimum 3 acres of parkland per 1,000 population**
- **Current FY 2018-19 MINIMUM park acreage shortfalls are listed below. They are:**
  - 4.3 acres for 1,433 people in NE quadrant,
  - 6.8 acres for 2,266 people in SW quadrant, and
  - 2.3 acres for 767 people in SE quadrant

Shortfall (excess) in  
Current Quadrant  
Park standard by

	population		Future Park		existing Park shortfalls are for NE, SW & SE quadrants
	acres	need	acres	%	
NW quadrant	(-14.2)	(-4,733)	107.6	91%	Current NW parks are 14.2 acres over min. standard & capacity for 4,733 more people at min. park standard. 91% of all Future City Parks are in NW quadrant
NE quadrant	4.3	1,433	11.2	9%	Future Park will exceed minimum NE park standard
SW quadrant	6.8	2,266	0	0%	No min. parks for 2,266 people in SW quad. Park deficit
SE quadrant	2.3	767	0	0%	No min. parks for 767 SE quadrant Park deficit

A Park Standard minimum is just a “Minimum”. City policy allows the City to buy/create parks above the City’s current 3 acre/1,000 pop. MINIMUM (and lowest) Park Standard of surrounding Coastal cities. Carlsbad already did this in the NW quadrant. It then added 3.1 more NW quadrant Park acres as part of the Poinsettia 61 Agreement. Poinsettia 61:

- converted 3.1 acres of NW City land planned/zoned for Residential use to Open Space Park land use/zoning,
- facilitated a developer building condos (increasing park demand) in the SW quadrant,
- required the SW Quadrant developer pay \$3 million to build the 3.1 acre NW quadrant park, and
- required the SW Quadrant developer pay to convert 3.1 acres of NW Quadrant & 5.7 acres of SW Quadrant City Park land to habitat that will be unusable as a City Park.

So Poinsettia 61 increased SW Quadrant development (that both increased SW Park Demand and expanded the current SW Quadrant Park deficit) while simultaneously using SW Quadrant development to pay for the conversion of 3.1 acres of residential land in the NW Quadrant to City Park (the NW Quadrant already has surplus park land per the City’s minimum standard).

People for Ponto strongly supports creating City Parks above the City’s current low 3-acre per 1,000 population minimum, as the City’s minimum standard is relatively low and substandard relative to other cities; many Carlsbad parks have significant acreage that is in fact ‘unusable’ as a park. Most importantly People for Ponto Citizens think it is very important to prioritize providing City Parks in areas of Park Inequity that are unserved by City Parks. However it seems very unfair to the SW Quadrant citizens to be so unserved and starved of the bare minimum of City Parks while at the same time funding City Parks in excess of City standard in other Quadrants.

The Poinsettia 61 illustrates a larger unfair (and dysfunctional) distribution of Quadrant based City Park demand and supply that is keenly evident in the demands/supply funding and location disparity of Veterans Park. Most all the development impact and park demand that paid Veterans Park fees came from the SW, SE and NE Quadrants yet the Veterans Park (supply) is not in those SW, SE and NE Quadrants. This inequity is counter to the implicit City requirement that City Parks be provided within the Quadrant of their Park demand. It is logical and proper that City Parks be provided and equitably distributed to be close to the development and population that generated the demand for that Park.

The City Park inequity at Ponto and in other Coastal areas of the City is counter to several CA Coastal Act policies; counter to good city planning and good CA Coastal planning; is highly detrimental to the City, City and CA citizens in the long-term; fails to properly distribute and match the location supply with the location of demand for Parks; and is counter to basic fundamental issues of fairness. Since 2017 People for Ponto has tried to get the City Council and City Staff to address this inequity, specifically at Ponto, and to do so in a way that embraces a true and honest Citizen-based planning process.

**Coastal Recreation:**

2. Request that the City as part of its Draft LCP Public Review process broadly-publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCPA processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park: This disclosure is needed to correct about 20 years of City misrepresentation to the public on the since 1996 and currently Existing LCP requirements at Ponto, and the City's prior planning mistakes at Ponto. Citizens have been falsely told by the City that all the Coastal planning at Ponto was done already and that the City followed its Existing LCP regarding the need for a park at Ponto, and that this is already decided and could not be reversed. This misinformation has fundamentally stifled public review and public participation regarding the Coastal Zone. City failure to provide such a broad-public disclosure on the documented prior, and apparently current proposed, "planning mistakes" would appear to violate the principles of Ca Coastal Act Section 30006. A broad-public disclosure would for the first time allow citizens to be accurately informed on the Existing LCP requirements at Ponto so they can provide informed public review and comment regarding the need for a Coastal Park in in this last vacant 'unplanned' area. The requested broad-public disclosure by the City of the City past mistakes and the Existing LCP requirements at Ponto is consistent with CA Coastal Act (CCA) "Section 30006 Legislative findings and declarations; public participation - The Legislature further finds and declares that **the public has a right to fully participate in decisions affecting coastal planning**, conservation and development; that achievement of **sound coastal conservation and development is dependent upon public understanding and support**; and that the continuing planning and implementation of **programs for coastal conservation and development should include the widest opportunity for public participation.**" The public cannot participate as outlined in CCA Section 30006 if past City 'mistakes' and misrepresentations on Coastal planning at Ponto go undisclosed to the public. If the public isn't fully informed about the 20-years of LCP planning mistakes at Ponto how could the public in the past (and now in the present) participate in the proposed LCP Amendment – **Public Participation as noted in Section 30006 above is the means to sound coastal conservation and development and is "... dependent upon public understanding ..."**. The City's past mistakes at Ponto need to be corrected by slightly different a Draft LCP Amendment process than currently outlined by the City; a new process is needed that clearly, opening and honestly informs and engages the public on the Existing LCP Ponto issues. The City's current Draft LCP Amendment process fails to follow CCA Section 30006 in that most all the citizens we encounter are as yet unaware of the City's Ponto mistakes and how they can participate in in the DLCPA process without that information. We see this daily in conversations we have with our fellow citizens. We even saw at the Oct 20, 2019 Carlsbad Planning Commission meeting that the Planning Commission was unaware of the planning mistakes at Ponto. How can a decision body of the City make a decision without knowing about these prior 'planning mistakes' facts that surround what they are being asked to decide on? Repeatedly since 2017 Carlsbad citizens and People for Ponto have asked the City to fully acknowledge the City's prior flawed planning at Ponto, and to correct that with ether maintaining the Existing LCP Non-residential Reserve Land Use or restarting the Coastal Planning at Ponto with a true and accurately informed Community-based Coastal Planning process consistent with Section 30006.

We request the City during the DLCPA Public Review period broadly and publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCP and other "planning efforts" public participation processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park, and 1) provide a truly honest public participation process on that disclosure consistent with CCA Section 30006 as part of the Draft LCP Amendment process or 2) retain the Existing LCP Non-residential Reserve Land Use and require a comprehensive and honest community-based redo of Coastal Resource planning at Ponto.

3. City fully and publicly reply to and the City Council consider the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process: Lance Schulte on 1/23/20 received an email reply by the City to his follow-up email regarding the status of the 11/20/19 citizen concerns/requests public comments and letters presented to the Planning Commission. This is appreciated, however it is request that the City fully publicly reply to the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process and present the to the City Council 11/20/19 citizen concerns/requests so the City Council can consider them and provide any direction to City Staff. City Staff first presented a summary presentation of the proposed Draft LCP Amendment to the Carlsbad Planning Commission on November 20, 2019, and indicated the public comment period would close on November in less than 2-weeks. Citizens and citizen groups provided public testimony to the Planning Commission, both verbally and in two written letters. The CCC was copied on those letters. The testimony and letters noted significant concerns about the City's proposed LCP Amendment process and made three requests:
- Disclose and provide a publically accessible 'Redline Version' of the Existing 2016/Proposed LCP land use Plan and Policies so everyone can see the proposed changes to the Existing LCP.
  - Provide true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern or objections. Citizen Workshops, when done right, are valuable means to openly educate, discuss and work to consensus options. These areas, including Ponto, were/are subject to multiple lawsuits, so true open and honest public workshops would provide an opportunity to openly and honestly discuss the issues and hopefully build public consensus/support for solutions. This approach seems consistent with CCA Section 30006, and common sense.
  - Extend the public comment period 6-months to allow Citizen Review of the Redline Version of the LCPA and allow time for Citizen Workshops.

The City did extend the Public Review period 2-months over the holidays to January 31, 2020. This is appreciated although many think this is inadequate given the significance of the Proposed Land Use Plan Amendments, and lack of Redline Version to compare. The City and their consultants required several extra years beyond schedule prepare the proposed LCP Amendments. The extra years of City Staff work reflects on the volume of the over 500-pages in the documents and the time needed to understand the Existing LCP and then create an Amended LCP. Citizens need sufficient time, proper comparative tools (redline) and a process (workshops) to understand the proposed LCP Amendments that is reflective of extensive extra time needed by City Staff and consultants needed. Truncation of lay public review to a few months for an Amendment that took paid professionals many years to produce seems a more than a bit inappropriate. The City appears to be rejecting citizens' request to be provided a 'Redline Version' of the Existing 2016/Proposed LCP land use Plan. So public review comments will tainted or will miss many issues due having to manually cross-reference a 150-page Existing LCP LUP with a Proposed 350-page Proposed LCP LUP. There will be unknown and unconsidered changes in the Draft LCP Amendment that the public and city and CCC decision makers will not know about due to the lack of 'Redline Version'.

The City also appears to reject citizen requests for true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern – such as Ponto. Like Coastal Recreation issue #1 above the following citizen requests appear consistent with CA Coastal Act (CCA) Section 30006, and the City's rejection of that requests seem counter to the CA Coastal Act.

We again request of the City to provide: 1) a 'Redline Version' to the public and decision makers, along with sufficient time to review and comment on the 'Redline Version'; and 2) true Citizen Workshops for Ponto and the

other last remaining significant vacant Coastal lands in Carlsbad as part of the Draft LCP Amendment process, or as part of deferred LCP Amendment process for those areas.

4. Coastal Zoned land is precious: the very small amount of remaining vacant Coastal land should be reserved for “High-Priority” Coastal Recreation Land Uses under the CA Coastal Act to provide for the growing and forever ‘Buildout’ needs of Carlsbad and CA Citizens, and our visitors.
  - Less than 1.8% (76 square miles) of San Diego County’s 4,207 square miles is in Coastal Zone. This small area needs to provide for all the forever Coastal needs of the County, State of CA, and Visitors. Upland Coastal Recreation (Coastal Park) land use is needed to provide land to migrate the projected/planned loss of “High-Priority” Coastal Recreation land uses due to Sea Level Rise impacts. There is only 76 miles of total coastline in San Diego County; a significant amount is publicly inaccessible military/industrial land. So how the last few portions of Coastal Land within Carlsbad (which is about 8% of San Diego County’s Coastline) is planned for the forever needs for High-Coastal-Priority Recreation Land Use is critical for Carlsbad, San Diego, and California Statewide needs into the future.
  - Most all the developable Coastal land in Carlsbad is already developed with Low-Coastal-Priority residential uses. Only a very small percentage of Carlsbad’s developable Coastal land, maybe 1-2%, is still vacant. This last tiny portion of fragment of vacant developable Coastal Land should be documented in the Draft LCP and reserved for “High-Priority” Coastal Land uses – most critically Coastal Recreation – to address the growing Coastal Recreation needs from a growing population and visitors. These growing needs are all the more critical in that existing Coastal Recreation lands will be decreasing due to inundation and erosion due to DLCPA planned Sea Level Rise.
  - This image of the western half of San Diego County graphically shows (in the blue line) the very small Coastal Zone Area that needs to provide the Carlsbad’s and California’s Coastal Recreational needs for all San Diego County residents and Visitors:

We request that 1) the amount and location of remaining vacant Coastal land in Carlsbad be documented and mapped and be reserved for high-priority Coastal Land Uses consistent with CCA Goals in Section 30001.5 “... (c) ... **maximize public recreational opportunities in the coastal zone** consistent with sound resources conservation principles and constitutionally protected rights of private property owners. (d) **Assure priority for coastal-dependent and coastal-related development over other development on the coast.** ...”; 2). This data be used in the City’s analysis and the public’s review and discussion about the City’s proposed Draft ‘Buildout’ Land Use Plan. The City’s proposed Draft ‘Buildout’ Land Use Plan will forever lock in the amount “maximum public recreational opportunities in the coastal zone” and will be the final Coastal Land Use Plan that is supposed to “assure priority for coastal-dependent and coastal-related development over other development on the coast”. Most of Carlsbad’s Coastal Zone is already developed or committed to low-priority land uses contrary to these CCA Goals, so how we finally and forever plan to use of the last small remaining vacant Coastal Land is very important.

5. The proposed Draft LCP Amendment in Chapter 3 makes unfounded statements regarding the proposed Amendment to the LCP Land Use Plan provision of “High-Priority” Coastal Recreation land use: On page 3-3, at the beginning of the Chapter 3 – Recreation and Visitor Serving Uses the City correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation uses, and cites multiple CCA Sections to that effect. The City’s proposed Coastal Land Use Plan then states on page 3-5 that a high proportion of land in the City is dedicated open

space available for passive and active use, yet provides no justification or accurate metric to support this statement. This is a critical unsubstantiated and speculative statement that is not supported by any comparative data (justifying the “high proportion” statement). The City later in Chapter 3 compared the adjoining cities of Oceanside and Encinitas to try to show how the proposed Draft LCP LUP Amendment provides higher levels of Visitor Serving Accommodations. That ‘non-common denominator’ comparison was fundamentally flawed, as noted in a prior separate Draft LCPA public review comment from People for Ponto regarding another high-priority Coastal land use (visitor accommodations) planned for in Chapter 3, but at least it was an attempt to compare. However, for the Coastal Recreation portion of Chapter 3, the City does not even attempt to provide any comparative data to support (or justify) the proposed Coastal Recreation Land Use Plan and statements. The Coastal Recreation Chapter also fails to disclose Carlsbad’s adopted City Park Master Plan (Park Service Area and Equity map) data that shows a clear conflict between the CA Coastal Act Policy Sections noted at the beginning of Chapter 3 and Chapter 3’s proposed Draft Coastal Recreation Land Use Plan.

Comparative Coastal Recreation: Comparing the Land Use Plan and policies of Oceanside, Carlsbad and Encinitas, one finds Carlsbad’s proposed Coastal Recreational Plan and Policies are not “high”, but very low compared with Oceanside and Encinitas. Carlsbad has a General Plan Park Standard of 3 acres of City Park per 1,000 Population. Oceanside has a 5 acres of City Park Standard per 1,000 population, and Encinitas has a 15 acres per 1,000 population standard, and an in-lieu park fee requirement of 5 acres per 1,000 population. Carlsbad’s proposed Coastal Recreation Land Use Plan is in fact not ‘high’ but is in fact the lowest of the three cities, with Carlsbad providing only 40% of Oceanside’s park standard, and only 20% of Encinitas’s Park Standard. Citywide Carlsbad currently has 2.47 acres of developed park per 1,000 population, Oceanside currently has 3.6 acres of developed park per 1,000 population, and Encinitas currently has 5.5 acres of developed park per 1,000 population. Although this data is citywide, it shows Carlsbad’s current amount of developed parkland is less than 70% of what Oceanside currently provides, and less than 45% of what Encinitas currently provides. Carlsbad is not currently providing, nor proposing a Coastal Land Use Plan to provide, a ‘high’ proportion of Coastal Recreation Land Use compared to Oceanside and Encinitas.

On page 3-5 Carlsbad may be misrepresenting city open space that is needed and used for the preservation of federally endangered species habitats and lagoon water bodies. This open space Land cannot be Used for Coastal Recreation purposes; and in fact Land Use regulations prohibit public access and Recreational Use on these Lands and water bodies to protect those endangered land and water habitats. 78% of Carlsbad’s open space is “open space for the preservation of natural resources” and cannot be used for Coastal Parks and Recreational use. Although “open space for the preservation of natural resources” does provide scenic or visual amenity, and this amenity is addressed as a different coastal resource. Visual open space is not Coastal Recreation Land Use. It appears Carlsbad is proposing in the Draft LCP Amendment to continue to, providing a ‘low’ percentage of Coastal Park Land Use and Coastal Recreation Land Use compared to adjoining cities.

In addition to the comparatively low amount of Coastal Park land Carlsbad plans for, Carlsbad scores very poorly regarding the equitable and fair distribution and accessibility of Coastal Parks and Coastal Recreation Land Uses. Both the City of Oceanside and Encinitas have very robust and detailed Park and Land Use plans to promote an equitable distribution of, and good non-vehicular accessibility, to their Coastal Parks. By comparison, Carlsbad’s park land use plan scores poorly, as exemplified in Ponto and South Carlsbad. Ponto’s existing population requires about 6.6 acres of City Parkland per Carlsbad’s low 3 acres per 1,000 population standard. Yet the nearest City Park is several miles away and takes over 50 minutes to walk along major arterial roadways and across Interstate 5 to access. As such this nearest park is not an accessible park for Ponto children, and thus Ponto children have to play in

our local streets to find a significantly large open area to play in. Ponto residents have to drive their kids to get to a park increasing VMT and GHG emissions. The City's proposed Coastal Recreation Land Use Plan 'solution' to Ponto's no-park condition, along with the City's need to add an additional 6.5 acres of new City parks in Southwest Carlsbad to comply with the Southwest Carlsbad's 2012 population demand (at a ratio of 3-acre/1,000 population) is to provide a City Park – Veterans Park – over 6-miles away from the Ponto and Southwest Carlsbad population need. This makes a bad situation worse. The City's proposed location is totally inaccessible to serve the needs of the population of children or anyone without a car, that it is intended to serve in South Carlsbad. This City proposed Coastal Recreation Land Use Plan 'solution' seems inappropriate and inconsistent with the CA Coastal Act and common sense. During the City's Veterans Park and budget community workshops citizens expressed a desire for a Ponto Park to be the solution to our Ponto and Southwest Carlsbad Park deficits. Those citizen requests were not apparently considered as part of the City's proposed Draft Coastal Recreation Land Use Plan. Following is an image summarizing the magnitude of citizen needs/needs/desires expressed at the City's Budget workshop. Note the number and size of the text citing Ponto Park and South Carlsbad that reflects the number and magnitude/intensity of citizen workshop groups' input. The failure to acknowledge this public participation and data in the Coastal Recreation Land Use Plan Park seems in conflict with CCA Sections 30006 and 30252(6):

For South Carlsbad there is a complete lack of any existing or planned City Coastal Park and park acreage west of I-5, while North Carlsbad has 9 existing and 1 planned City Coastal Parks totaling 37.8 acres of City Coastal W of I-5 North Carlsbad. Not only is this unfair to South Carlsbad, it is also unfair to North Carlsbad as it increases VMT and parking impacts in North Carlsbad because South Carlsbad is not providing the City Coastal Parks for South Carlsbad resident/visitor demands. This City Park disparity is shown on Figure 3-1 of the Coastal Recreation Land Use Plan;

however it more accurately illustrated in the following data/image from the adopted Carlsbad Park Master Plan's "Service Area Maps (Equity Maps)". The image below titled 'No Coastal Park in South Carlsbad' shows Carlsbad's adopted "Park Service Area Maps (Equity Maps)" from the City's Park Master Plan that says it maps "the population being served by that park type/facility." The added text to the image is data regarding park inequity and disparity in South Carlsbad. The image compiles Carlsbad's adopted Park "Park Service Area Maps (Equity Maps)" for Community Parks and Special Use Area Parks that are the City's two park acreage types produced by the City's comparatively low standard of 3 acre of City Park per 1,000 population. The City's Park Service Area Maps (Equity Maps) shows areas and populations served by parks within the blue and red circles. City data clearly shows large areas of overlapping Park Service (areas/populations served by multiple parks) in North Carlsbad and also shows large areas in South Carlsbad with No Park Service (areas/populations unserved by any parks) and Park Inequity in South Carlsbad. It clearly shows the City's Documented Park Need and Park inequity at Ponto. The Existing LCP LUP for Ponto's Planning Area F in is required to "consider" and "document" the need for a "Public Park". The City's adopted Park Service Area Maps (Equity Maps) clearly shows the inequity of Coastal City Park between North and South Carlsbad, and the need for Coastal Parks in South Carlsbad – particularly at Ponto. The City's proposed Draft 'Buildout' Coastal Recreation Land Use Plan instead proposes to lock-in documented City Public Coastal Park inequity and unserved Coastal Park demand at Ponto and South Carlsbad forever. It does so by proposing the last vacant undeveloped/unplanned Coastal land – Ponto Planning Area F - in the unserved Ponto and South Carlsbad coastline areas instead of being planned for much needed City Park and Coastal Recreation use be converted to even more low-priority residential and general commercial land uses. These 'low-priority' residential uses, by the way, further increase City Park and Coastal Recreation demand and inequity in Coastal South Carlsbad. This is wrong, and a proposed 'forever-buildout' wrong at the most basic and fundamental levels. The proposed Draft Coastal Recreation Land Use Plan by NOT providing documented needed City parks for vast areas of Coastal South Carlsbad is inconsistent with the CA Coastal Act policies and Existing LCP LUP requirements for Ponto Planning Area F; and also inconsistent with fair/equitable/commonsense land use and park planning principles, inconsistent with CA Coastal Commission social justice goals, inconsistent with social equity, inconsistent with VMT reduction requirements, and inconsistent with common fairness. A different Coastal Recreation Land Use Plan should be provided that provides for a socially equitable distribution of Coastal Park resources so as to would allow children, the elderly and those without cars to access Coastal Parks. The proposed Draft 'Buildout' Coastal Recreation Land Use Plan forever locking in the unfair distribution of City Parks appears a violation of the not only CCA Sections 30213, 30222, 30223, and 30252(6) but also the fundamental values and principles of the CA Coastal Act. The Draft also appears a violation of Carlsbad's Community Vision.

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

A different Coastal Recreation Land Use Plan is required to provide a more equitable distribution of City Parks with non-vehicular accessibility. Such a different plan would advance State and City requirements to reduce vehicle Miles Traveled (VMT) and greenhouse gas emissions that contribute to climate change and sea level rise impacts. Please note that the data for the above basic comparison comes from City of Carlsbad, Oceanside and Encinitas General Plan and Park Master Plan documents.

Data shows the proposed Coastal Recreation Plan conflicts with the CA Coastal Act policy Sections. As mentioned page 3-3 correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation Land Uses, and pages 3-5 list multiple CA Coastal Act (CCA) policy Sections that confirm this. However, given the significant statewide importance of Coastal Recreation Land Use, the City proposed 'Buildout' Coastal Recreation Land Use Plan does not appear to adequately address and implement these CCA Policies, and most noticeably in the Ponto area of South Carlsbad. Coastal Recreation is a significant Statewide High-Priority Land Use under the CCA. For a substantially developed non-coastal-industry city like Carlsbad Coastal Recreation is likely the biggest land use issue. This issue is even more elevated due to the fact that there are only a few small areas left of undeveloped Coastal land on which to provide Coastal Recreation, and Carlsbad is proposing a Coastal 'Buildout' Land Use Plan on those areas. The use of the last few remaining vacant portions of Coastal land for Coastal Recreation Land Use is the most important land use consideration in the proposed Draft LCP Land Use Plan Amendment as population and visitor growth will increase demands for Coastal Recreation. It is thus very surprising, and disturbing that the proposed Coastal Recreation Land Use Plan is so short, lacks any comparative and demand projection data, lacks any resource demand/distribution and social equity data, and lacks any rational and clear connection with CCA Policy and the proposed 'Buildout' Coastal Land Use plan. This is all the more troubling given that:

- The Ponto area represents the last significant vacant undeveloped/unplanned land near the coast in South Carlsbad that can provide a meaningful Coastal Park.
- The fact that the City's Existing LCP requires the city consider and document the need for a "i.e. Public Park" on Ponto's Planning Area F prior to the City proposing a change of Planning Area F's "Non-residential

Reserve” land use designation. The City has repeatedly failed to comply with this LCP LUP requirement, and worse has repeatedly failed to honestly inform citizens of this LCP LUP requirement at planning Area F before it granted any land use. The City, apparently implementing speculative developer wishes, has repeatedly proposed changing Planning Area F’s Coastal Land Use designation to “low-priority” residential and general commercial land uses without publically disclosing and following the Existing LCP LUP.

- The City’s currently developed parks in the southern portion of the City do not meet the city’s comparatively low public park standard of only 3 acres per 1,000 population. Since 2012 there has been City park acreage shortfall in both SW and SE Carlsbad.
- The Existing population of Ponto (west of I-5 and south of Poinsettia Lane) requires about 6.6 acres of Public Park based on the City’s comparatively low public park standard of 3 acres per 1,000 population. There is no Public Park in Ponto. Adding more population at Ponto will increase this current park demand/supply disparity.
- Carlsbad and other citizens have since 2017 expressed to the City the strong need for a Coastal Park at Ponto, and requested the City to provide a true citizen-based planning process to consider the Public Park need at Ponto. The Citizens’ requested process is fully in-line with CCA Goals, Public Participation Policy, Land Use Policies, and the Existing LCP Land Use Plan/requirements for Planning Area F and is the most appropriate means to consider and document the need for a Public Park at Ponto as required by the Existing LCP Land Use Plan.
- Planning Area F is for sale, and a non-profit citizens group has made an offer to purchase Planning Area F for a much needed Coastal Park for both Ponto and inland South Carlsbad residents and visitors. How should these facts be considered by the City and CCC?
- Carlsbad has no Coastal Parks west of I-5 and the railroad corridor for the entire southern half of Carlsbad’s 7-mile coastline.
- The southern half of Carlsbad’s coastline is 5.7% of the entire San Diego County coastline and represents a significant portion of regional coastline without a meaningful Coastal Park west of I-5 and the Railroad corridor.
- The City’s proposed Coastal Recreation Land Use Plan provides No Documentation, No Rational, and No Supporting or Comparative Data to show the proposed Coastal Recreation Land Use Plan in fact complies with the CA Coastal Act.

6. There is no Coastal Recreation/Park west of interstate 5 for all South Carlsbad, or half of the entire City. This is an obviously unfair and inequitable distribution of Coastal Recreation/Park resources that should be corrected by changes to the Draft LCP Land Use Amendment: The following image (which was sent to the City and CCC on several prior communications) was first requested by former Carlsbad Councilman Michael Schumacher during a People for Ponto presentation/request at the Oct 23, 2018 City Council meeting. The data compiled in the image shows how the South Coastal Carlsbad (Ponto) is not served by a Park per the City’s adopted Parks Master Plan. The blue dots on the map are park locations and blue circle(s) show the City’s Park Master Plan adopted Park Service Areas and Park Equity. This data, from pages 87-88 of the City of Carlsbad Parks Master Plan, shows all City Parks (both Community Parks and Special Use Areas in Coastal Carlsbad (except Aviara Park east of Poinsettia Park and west of Alga Norte Park). The text on the left margin identifies the South Carlsbad Coastal Park (west of I-5) gap along with the number of South Carlsbad Citizens (over half the City’s population) without a Coastal Park. The left margin also identifies more local issues for the over 2,000 Ponto area adults and children. For Ponto residents the nearest Public Park and City proposed ‘solution’ to the South Carlsbad and Ponto Public Park deficit are miles away over high-speed/traffic roadways and thus somewhat hazardous to access and effectively unusable by children/the elderly or

those without cars. Having been a 20-year resident of Ponto I regularly see our children have to play in the street as there are no Public Park with large open fields to play at within a safe and under 1-hour walk away. Ponto citizens have submitted public comments regarding this condition and the lack of a Park at Ponto

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

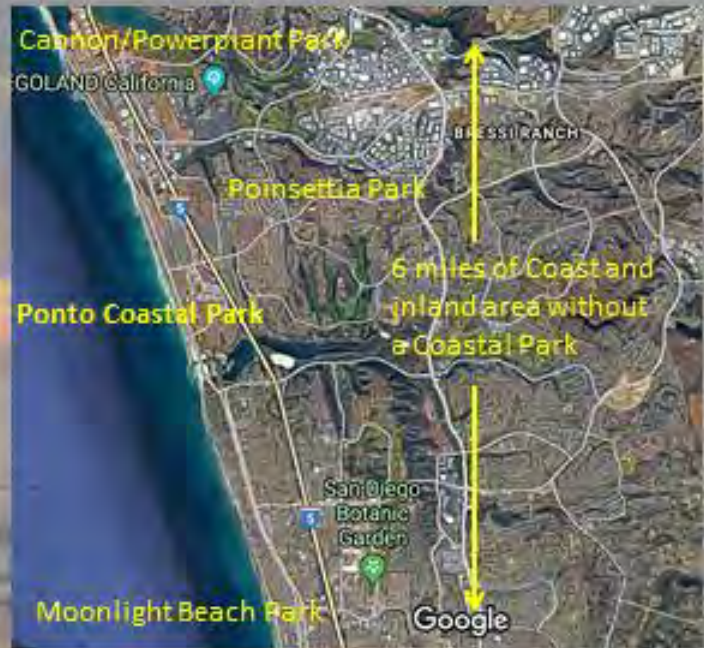

Ponto is at the center of regional 6-mile Coastal Park Gap. A Coastal Park in this instance being a Public Park with practical green play space and a reasonable connection with the Coast (i.e. located west of the regional rail and Interstate-5 corridors). The following image shows this larger regional Coastal Park Gap centered on the Ponto Area, and the nearest Coastal Parks – Cannon Park to the north, and Moonlight Park to the south.

Regionally this image shows Ponto is the last remaining significant vacant Coastal land that could accommodate a Coastal Park to serve the Coastal Park current needs of over existing 2,000 Ponto residents, 64,000 existing South Carlsbad residents, and a larger regional population. It is also the only area to serve the Coastal Park needs for the thousands of hotel rooms in Upland Visitor Accommodations in South Carlsbad.

# How Ponto Serves Region

- Ponto is in the middle of the regional Coastal Park Gap
- A Ponto Coastal Park fills a critical 6 mile gap of coastline without a Coastal Park - 8.6% of SD County coastline
- A Ponto Coastal Park Serves over 26,000 homes & 64,000 citizens just in South Carlsbad without a Coastal Park
- Serves many more people outside Carlsbad

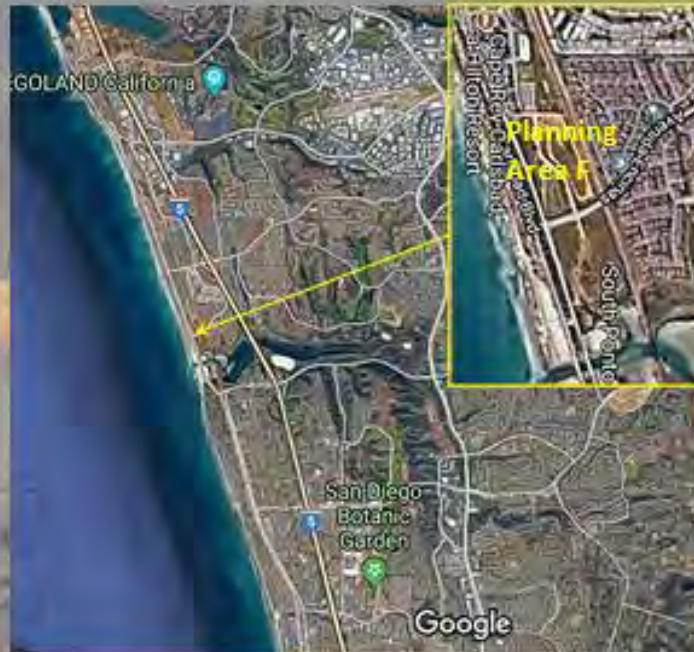

As People for Ponto first uncovered and then communicated in 2017 to the City and CCC; Carlsbad's Existing (since 1994) Local Coastal Program LUP currently states (on page 101) that Ponto's Planning Area F: carries a Non-Residential Reserve (NRR) General Plan designation. Carlsbad's Existing Local Coastal Program Land Use Plan states: "Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an "unplanned" area ..." and requires that: "... **As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.**" CA Coastal Commission actions, Carlsbad Public Records Requests 2017-260, 261, and 262, and 11/20/19 City Planner statements confirm the City never fully communicated to Carlsbad Citizens the existence of this LCP requirement nor did the City comply with the requirements. Of deep concern is that the City is now (as several times in the past) still not honestly disclosing to citizens and implementing this Existing LCP requirement as a true and authentic 'planning effort'. The lack of open public disclosure and apparent fear of true public workshops and Public Comment about the Existing Planning Area F LCP requirements are troubling. The point of a 'planning effort' is to openly and publically present data, publically discuss and explore possibilities/opportunities, and help build consensus on the best planning options. Citizens are concerned the city has already made up its mind and there is no real "planning effort" in the proposed Draft LCP Amendment process, just a brief Staff Report and at the end provide citizens 3-minutes to comment on the proposal. This is not the proper way to treat the last remaining significant vacant land in South Carlsbad that will forever determine the Coastal Recreation environment for generations of Carlsbad and California citizens and visitors to come.

The following data/images show how Ponto is in the center of the 6-mile (west of I-5 and Railroad corridor) regional Coastal Park gap. Ponto is the last remaining vacant and currently "unplanned" Coastal land that is available to address this regional Coastal Park Gap.

## How Ponto Serves Region cont.

- **Relieves Coastal Park congestion** in North Carlsbad, Encinitas and Solana Beach
- Area currently needs Coastal Park as seen by:
  - Ponto Beach parking congestion
  - current trespass use of Planning Area F as a Park
- **6.6 acre portion of Planning Area F** addresses SW Quad City Park deficit

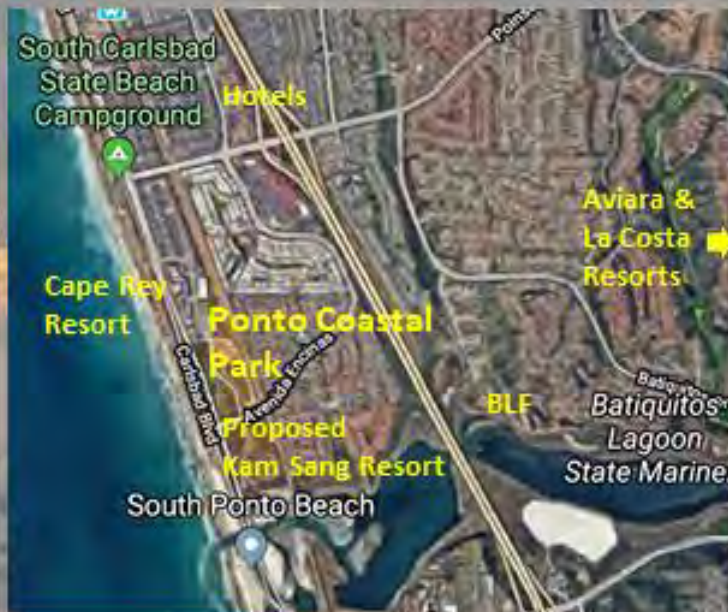

## How Ponto Serves Region cont.

- A Ponto Park helps address 2050 and beyond Regional Population and Visitor Growth demands for Coastal Parks
- A Ponto Park provides the lowest-cost coastal access and recreation opportunities for CA citizens and visitors

## How Ponto Serves Region cont.

- Vital park and open space amenity for Visitor serving businesses and accommodations
- 6.6 acre unique City Coastal Park venue to stage special events: Runs, bike rides, triathlons, sports, coastal festivals, etc.

## How Ponto Serves Region cont.

- Critical Park space for So. Carlsbad State Beach Campground
- Provides a big training and staging space for Junior lifeguards
- Dog walk trail

# Ponto Coastal Park Concept

- A concept – but shows potential recreational opportunities
- Provides **vital parkland support for beach & open play fields**
- Concept plan a gift from San Pacifico Community Association

One possible Concept image of a potential Ponto Coastal Park at Planning Area F is illustrated below. The potential for a Ponto Coastal Park is real. The speculative land investment fund (Lone Star Fund #5 USA L.P. and Bermuda L.P.) that currently owns Planning Area F is selling the property, and is available for the City of Carlsbad to acquire to address the documented demand/need for a City Park and City Park inequity at Ponto and in Coastal South Carlsbad. A Ponto Beachfront Park 501c3 is working to acquire donations to help purchase the site for a Park. These situations and opportunities should be publicly discussed as part of the City Staff's proposed Local Coastal Program Land Use Plan Amendment.

7. Projected increases in California, San Diego County and Carlsbad population and visitor growth increases the demand for High-Priority-Coastal Recreation land use:

- Increasing Citizen demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

San Diego County Citizen Population - Source: SANDAG Preliminary 2050 Regional Growth Forecast

1980	1,861,846
1990	2,498,016
2000	2,813,833
2010	3,095,313
2020	3,535,000 = 46,500 Citizens per mile of San Diego County coastline
2030	3,870,000
2040	4,163,688
2050	4,384,867 = 57,700 Citizens per mile of San Diego County coastline

2020 to 2050 = 24% increase in San Diego County population.

Citizen Population will continue beyond 2050. Carlsbad may plan for 'Buildout' in 2050, but what is San Diego County's 'Buildout'? There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for this growing population. If we do not increase our supply of Coastal Recreational Resources for these increased demands our Coastal Recreation Resources will become more overcrowded, deteriorated and ultimately diminish the Coastal Recreation quality of life for Citizens of Carlsbad and California. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5) and there is No Coastal Park in all of South Carlsbad to address the Coastal Recreation needs of the 64,000 South Carlsbad Citizens.

- Increasing Visitor demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

Yearly Visitors to San Diego County – source: *San Diego Tourism Authority; San Diego Travel Forecast, Dec, 2017*

2016	34,900,000
2017	34,900,000
2018	35,300,000
2019	35,900,000
2020	36,500,000 = average 100,000 visitors per day, or 2.83% of County’s Population per day, or 1,316 Visitors/coastal mile/day in 2020
2021	37,100,000
2022	37,700,000

This is growth at about a 1.6% per year increase in visitors. Projecting this Visitor growth rate from 2020 to 2050 results in a 61% or 22,265,000 increase in Visitors in 2050 to:

2050	58,765,000 = average 161,000 visitors per day, or 3.67% of the County’s projected 2050 Population per day, or 2,120 Visitors/coastal mile/day in 2050.
------	--

The number of Visitors is likely to increase beyond the year 2050. There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for these projected 2050 61% increase, and beyond 2050, increases in Visitor demand for Coastal Recreational Resources. Increasing Coastal Recreation land is a vital and critically supporting Land Use and vital amenity for California’s, the San Diego Region’s and Carlsbad’s Visitor Serving Industry. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5). There are thousands of hotel rooms in South Carlsbad that have NO Coastal Park to go to in South Carlsbad. This needs correcting as both a Coastal Act and also a City economic sustainability imperative.

- We request that the as part of the public’s review, the City Staff proposed Draft LCP Amendment to the Land Use Plan clearly document if and/or how future forever ‘Buildout’ City, Regional and Statewide population and visitor population demand for Coastal Recreation and City Coastal Parks are adequately provided for both in amount and locational distribution in the Carlsbad proposed Amendment of the LCP Land Use Plan.

8. Carlsbad’s Draft Local Coastal Program Land Use Plan Amendment says it plans to a year 2050 buildout of the Coastal Zone. The Draft Local Coastal Program Land Use Plan Amendment then is the last opportunity to create a Coastal Land Use Plan to provide “High-Priority” Coastal Recreation Land Use, and will forever impact future generations of California, San Diego County, and Carlsbad Citizens and Visitors:

- The Draft LCPA indicates in 2008 only 9% of All Carlsbad was vacant land. Less is vacant now in 2019. Carlsbad’s Coastal Zone is 37% of the City, so vacant unconstrained land suitable for providing Coastal Recreation is likely only 3-4%. The prior request for a full documentation of the remaining vacant Coastal lands will provide a better understanding needed to begin to make the final ‘buildout’ Coastal Land Use Plan for Carlsbad. The Draft LCPA does not indicate the amount and locations of currently vacant unconstrained Coastal Land in Carlsbad. This final limited vacant land resource should be clearly documented and mapped in the DLCPA as it represents the real focus of the DLCPA – the Coastal Plan for these remaingn undeveloped

lands. These last remaining vacant lands should be primarily used to provide for and equitably distribute “High-Priority” Coastal Recreation Land Uses consistent with CCA Sections:

- i. Section 30212.5 “... Wherever appropriate and feasible, public facilities, including parking areas or facilities, **shall be distributed throughout an area so as to mitigate against the impacts, social and otherwise, of overcrowding or overuse by the public of any single area.**”;
- ii. Section 30213 “... **Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...**”;
- iii. Section 30222 “**The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development,** but not over agriculture or coastal-dependent industry.”
- iv. Section 30223 “**Upland areas necessary to support coastal recreational uses shall be reserved for such uses, where feasible**” ,
- v. Section 30251 ... The location and amount of new development should maintain and enhance public access to the coast by ... 6) assuring that the recreational needs of new residents will not overload nearby coastal recreation areas by **correlating the amount of development with local park acquisition** and development plans with the provision of onsite recreational facilities to serve the new development”

Adopted City Park Service Area and Park Equity maps discussed earlier document the proposed Draft LCP Amendment’s inconstancy with the above CCA Policy Sections. The locations and small amounts remaining vacant Coastal lands provide the last opportunities to correct the inconsistencies of City proposed Draft “buildout” LCP Land Use Plan Amendment with these Coastal Act Policies.

Currently and since 1996 there has been LCP LUP Policy/regulations for Ponto Planning Area F that require consideration of a “Public Park” prior to changing the existing “unplanned Non-residential Reserve” Land Use designation. A map and data base of vacant developable Coastal land should be provided as part of the Draft LCPA and the Draft LCPA. This map and data base should document the projected/planned loss of Coastal land use due to Sea Level Rise. Draft LCPA projects Sea Level Rise will eliminate several beaches and High-Priority Coastal Land Uses like Coastal Lagoon Trails and the Campground.

- The LCP Land Use Plan should plan and reserve the very limited vacant developable Coastal land for the long-term ‘Buildout’ needs of “High-Priority” Coastal Recreation Land Use. Vacant developable Coastal land is too scarce to be squandered for “low-priority” uses. Sea Level Rise will reduce “High-Priority” Coastal Uses. So how vacant developable Upland area should be preserved for “High-Priority” Coastal Uses is a key requirement to be fully documented and discussed in the Draft LCPA. If not one of two things will eventually happen 1) any new Coastal Park land will require very expensive purchase and demolition of buildings or public facilities to create any new Coastal Park land to meet existing and growing demand; or 2) Coastal Recreation will be hemmed-in by “low-priority” uses and thus force Coastal Recreation to decrease and become increasingly concentrated and overcrowded in its current locations; and thus will promote the eventual deterioration of our current Coastal Recreation resources. A plan that fails to fix Coastal Park deficits and then increase Coastal Parks in pace with increased population/visitor demand is a plan that can

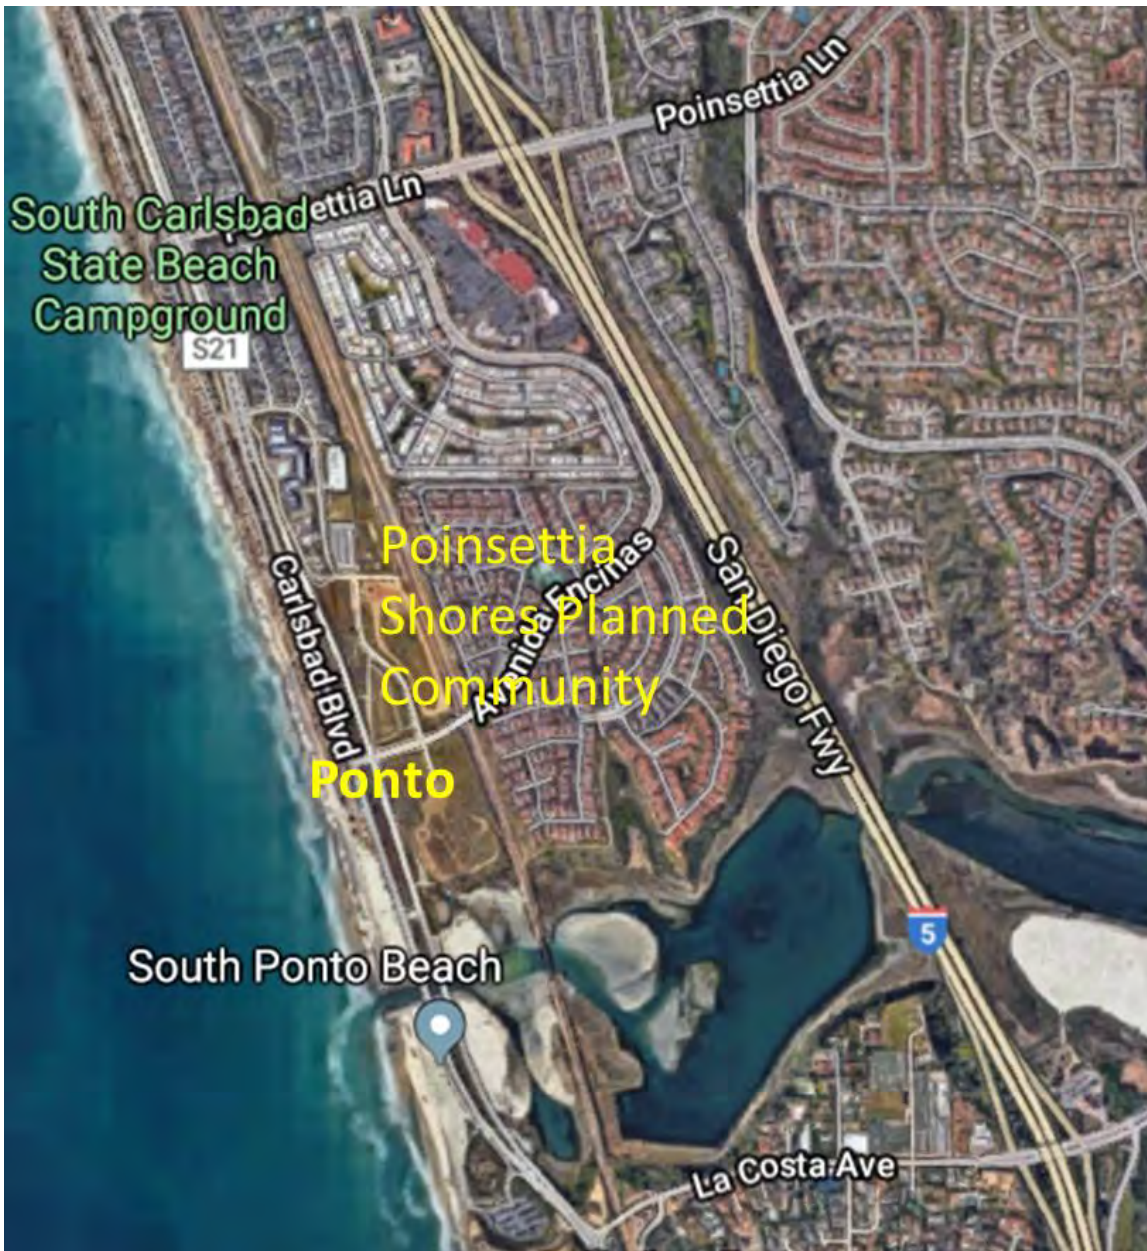

only result in degradation. How the Draft LCPA documents and addresses the land use planning of the last small portions of vacant developable Coastal land is critical for the future and future generations.

9. Citizens of South Carlsbad are concerned about the City's multiple prior flawed Ponto planning processes or 'mistakes' the City has made yet is basing the City Staff's proposed Draft LCP LUP. The concerns being the City is not openly and honestly communicating information to citizens and the public, and not allowing a reasonable and appropriate community-based planning process to address the documented Park, Coastal Recreation and unconstrained open space needs in South Carlsbad. One of these groups of citizens has created a [www.peopleforponto.com](http://www.peopleforponto.com) website to try to research and compile information and hopefully provide a better means for citizens to understand facts and then express their concerns/desires to the City of Carlsbad (City) and CA Coastal Commission (CCC). Over 2,000 emails have sent to the City and CCC regarding Coastal Land Use Planning Issues at Ponto. The San Pacifico Planned Community (i.e. San Pacifico Community Association) has also, since 2015, sent numerous emailed letters to the City and CCC noting the significant concerns about changes in Coastal planning the City is proposing for our Planned Community.

Repeatedly over 90% of surveyed citizens (results emailed prior to both the City and CCC) have expressed the vital need and desire for a Coastal Park at Ponto to serve the current and future Coastal Recreation needs for all both Ponto and South Carlsbad and for larger regional and State Coastal Recreational needs. This desire is supported by data, CA Coastal Act Policy, and also Carlsbad's Community Vision – the foundation for the City's General Plan. Ponto is the last remaining vacant Coastal area available to provide for those needs in South Carlsbad and for a regional 6-mile stretch of coastline. Citizens have expressed deep concern about the City's flawed prior Coastal planning efforts for Coastal Recreation at Ponto, including two repeated LCP Amendment "mistakes" (Ponto Beachfront Village Vision Plan in 2010 and General Plan Update in 2015) when the City twice failed to publicly disclose/discuss and then follow the Existing LCP requirements at Ponto – specifically for Planning Area F. People for Ponto had to use multiple Carlsbad Public Records Requests in 2017 to find these "mistakes". CCC Staff was helpful in both confirming the City "mistakes" and communicating back to the City. As citizens we are still unclear as to how/why these two repeated "mistakes" happened. There is citizen concern that the City is again repeating these two prior "mistakes" by not at the beginning of the Public Comment Period clearly and publicly disclosing the Planning Area F LCP requirements to citizens as part of the current LCP Amendment process, and also by not implementing the existing LCP requirement PRIOR to proposing an Amended Coastal Land Use Plan for Ponto. The City in its proposed LCP Amendment process is putting-the-cart-before-the-horse with respect to honest and open consideration, documentation and public discussion of the need for high-priority Coastal Recreation land use required of Planning Area F at Ponto. The City is also not clearly letting all Carlsbad citizens know about the Existing LCP requirements for Ponto's Planning Area F so they can be informed to reasonably participate in public review and comment regarding amending that LCP requirement, and the need for Coastal Recreation land uses in South Carlsbad. Since 2017 there has been repeated citizen requests to the City (copies were provided to the CCC) to fix these multiple fundamental/foundational flaws by in the City's prior Coastal Recreation and Public Parks and Open Space at planning, and the currently Proposed Draft LCP Land Use Plan Amendment. Since 2017 there have also been repeated citizen requests to the City to provide a truly open, honest, inclusive community-based planning process and workshops with the accurate and honest information, prior to forming a proposed Draft LCP Land Use Plan Amendment. As citizens we believe we can constructively work with the City and CCC towards a consensus or viable options on these important Coastal Recreation issues if the City allows and encourages such an open, honest and inclusive process. We request the City respond to the requests submitted to the City since 2017, and again request such a process from the City before any LCP Amendment is first considered by the Planning Commission and City Council. Such a requested process benefits all.

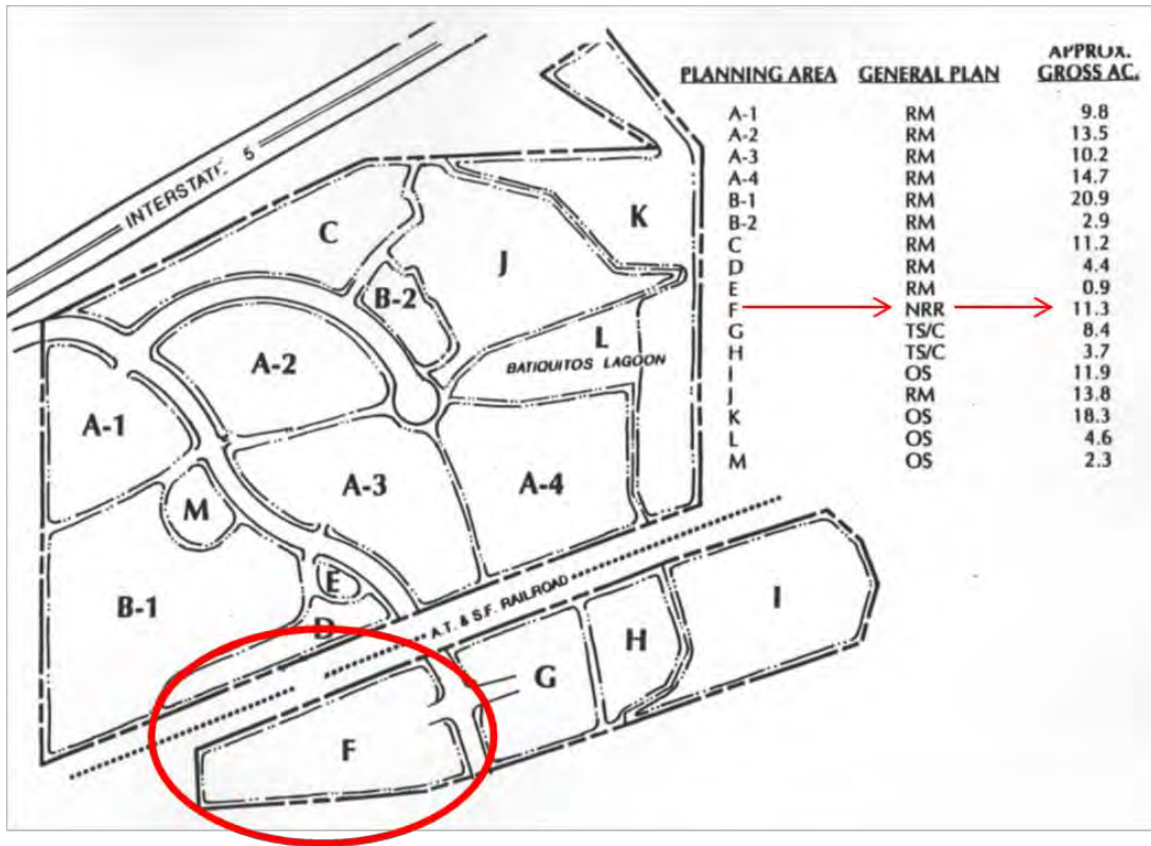

10. Why the Draft LCPA Land Use Plan for Ponto should provide for the current and future Coastal Park and Recreation needs for South Carlsbad, the San Diego Region and California.

- Ponto, is one of last remaining vacant and undeveloped Coastal lands in North County
- Ponto is the last remaining undeveloped Coastal land in South Carlsbad
- Ponto has the last unplanned Planning Area of the Existing Poinsettia Shores Planned Community & Local Coastal Program that can be planned for high-priority Coastal Recreation land use. This Existing LCP requires Planning Area F be considered for a “Public Park”.
- Following is a map of the Ponto area in South Carlsbad:

Following is the LCP Land Use map from the Existing Poinsettia Shores Master Plan & Local Coastal Program adopted in 1996. This is the Land Use map that the City is proposing to change in the proposed LCP Amendment to the Land Use Plan. As the Existing LCP Land Use map shows most all the land is ‘low-priority’ residential use at an RM Residential medium density, a small portion is ‘high-priority’ Visitor Serving TC/C Tourist Commercial. Most all the

Open Space is constrained and undevelopable land (the steep CSS habitat bluffs above Batiquitos Lagoon) or water (the lagoon water). This land/water is owned by the State of California, like the inner lagoon east of I-5. Only Planning Area M at 2.3 acres is unconstrained Open Space and it provides a small private internal recreation facility for the approximately 450 homes and 1,000 people in the Planned Community. This small recreation area is a City requirement for ‘planned developments’ to off-set loss open space from planned development impacts on housing quality. Planned developments can propose designs that reduce normal setback and open space areas – they bunch together buildings to increase development – such as the smaller lot sizes, and extensive use of “zero-setbacks” to reduce typical lot sizes that occurs at Poinsettia Shores. A private recreation facility in any of the City’s planned developments is never considered a replacement for required City Parks. Planned Developments, like unplanned developments, are required to dedicate Park land to the City, or pay a Park In-Lieu fee to the City so the City provide the developer’s obligation to provide City Park acreage to address the population increase of their proposed planned development. For Poinsettia Shores’ population the City’s minimum City Park Standard would require developers set aside 3 acres of City Park land for local park needs. For the larger Ponto area population about 6.6 acres of City Park Land is required. The Existing LCP reserves Planning Area F as an unplanned “Non-residential Reserve” Land Use until the Public Park needs for Ponto are considered and documented. Only then can the NRR land use be changed.

11. Developers have overbuilt in the Ponto area of the Coastal Zone. The City of Carlsbad has under questionable circumstances is currently choosing to ‘exempted’ Ponto developers from providing the minimum amount of unconstrained Open Space according to the City’s developer required Open Space Public Facilities Standard. The legality of these confusing circumstances is subject to a lawsuit against the City. However the City’s computerize mapping system has documented that the Ponto area of the Coastal Zone is missing about 30-acres of Unconstrained Open Space that can be used to fulfill the City’s Open Space Performance Standard that states that

15% of unconstrained and developable land must be preserved by developers as Open Space. Following is a summary of data from the City data regarding the missing Open Space at Ponto (Local Facility Management Plan Zone 9, LFMP Zone 9) in the Coastal Zone pursuant to the City's Open Space Performance Standard. If it is desirable People for Ponto can provide the City GIS map and parcel-by-parcel data base on which the following summary is based:

City of Carlsbad GIS data calculations of Open Space at Ponto area of Coastal Zone:

472 Acres = Total land in LFMP Zone 9 [Ponto area] per City of Carlsbad GIS data

(197 Acres) = Constrained land/water/infrastructure that is excluded from the City's Open Space Standard

275 Acres = Unconstrained land in LFMP Zone 9 (Ponto) subject to the City's Open Space Standard

X 15% = Minimum unconstrained Open Space requirement per the City Open Space Standard

41 Acres = Minimum unconstrained Open Space required in LFMP Zone 9

(11 Acres) = Actual unconstrained Open Space provided & mapped by City in LFMP Zone 9

**30 Acres = Missing unconstrained Open Space needed in LFMP Zone 9 [Ponto area of Coastal Zone] to meet the City's minimum GMP Open Space Standard. 73% of the required Open Space Standard is missing.**

Thus the Ponto area of the Coastal Zone appears overdeveloped with 30 additional acres of "low-priority" residential land uses due to developers' non-compliance to the City's Open Space Public Facility Performance Standard's Minimum developer required Open Space requirement. As noted a citizens group has a pending lawsuit with the City over the City's current 'exempting' Ponto and future developers from meeting the Open Space Standard.

12. The prior pre-1996 LCP for Ponto – the Batiquitos Lagoon Educational Park Master Plan & LCP (BLEP MP/LCP) had significant Open Space and recreational areas. These significant Open Space and Recreational areas were removed with BLEP MP/LCP's replacement in 1996 by the currently existing Poinsettia Shores Master & LCP (PSMP/LCP) and its City Zoning and LCP LUP requirements that reserved Planning Area F with the current "Non-residential Reserve" Land Use designation. Since the BLEP MP/LCP it appears developers and the City of Carlsbad have worked to remove "High-Priority" Coastal land uses (i.e. Coastal Recreation and Park uses) out of the Ponto area and replaced them with more "low-priority" residential and general commercial land uses. For example:

- Planning Area F used to be designated "Visitor Serving Commercial" as part of the original 1980's BLEP MP/LCP for Ponto.
- In 1996 the BLEP MP LCP was changed by developer application to the now current PSMP LCP, and the LCP LUP designation changed from "Visitor Serving Commercial" to "Non-Residential Reserve" with the requirement to study and document the need for "High-Priority" Coastal Recreation (i.e. Public Park) and/or Low-cost visitor accommodations prior to any change to Planning Area F's "Non-residential Reserve" LCP land use.
- In 2005 the City started to try to change Planning Area F to low-priority residential and general commercial land use in the City's Ponto Beachfront Village Vision Plan (PBVVP). At this time the City made its first documented Coastal 'planning mistake' by not disclosing to the public the existence of Planning Area F's LCP requirements and then also not following those LCP requirements. The City's planning process seemed focused on addressing developer's land use desires, and increasing land use intensity to boost "Tax-increment financing" as the City had established a Redevelopment Project Area at Ponto. A short time after the State of CA dissolved Redevelopment Agencies due in part to such abuses by cities. The CCC formally rejected the PBVVP in 2010, citing the City's failure to follow the LCP requirements for Planning Area F.

- Five years later in 2015 the City again adopted a proposed General Plan Update to again change Planning Area F to low-priority residential and general commercial land use. The General Plan Update cited the City's PBVVP that was in fact rejected by the CCC only a few years before. The City again repeated their PBVVP's Coastal land use 'planning mistake' by again not disclosing to the public the existence of Planning Area F's LCP requirements and then not following those LCP requirements. It is unclear why the City did this only 5-years after the CCC specifically rejected the Ponto Beachfront Village Vision Plan for those same reasons.
- In 2017 citizens found and then confirmed these Ponto Coastal 'planning mistakes' by the City through multiple official Carlsbad Public Records Requests and CCC Staff confirmation. The CCC readily identified the mistakes, but the City's 2019 proposed Draft LCP Land Use Plan and planning process still has yet fully disclose these prior Coastal 'planning mistakes' to ALL citizens of Carlsbad - the failure to disclose and follow the Planning Area F LCP LUP and City Zoning requirements. Full City disclosure is needed now to try to correct many years of City misrepresentation to citizens on LCP required Coastal land Use planning at Ponto. It is needed now so the public is aware at the start of the Public Comment Period. In 2017 citizens began asking the City fix the City's over 12-years of misinformation and planning mistakes by 'restarting' Coastal land use planning at Ponto with an open and honest community-based Coastal planning process. These citizens' requests have been rejected.
- In 2019 the City Staff proposed citywide Draft LCP land Use Plan Amendment that again proposed to change Planning Area F to "low-priority" residential and general commercial land use, without First disclosing the Planning Area F LCP requirements with corresponding analysis of the Need for Coastal Recreation (i.e. Public Park) and/or low-cost visitor accommodations at Planning Area F and providing that Documented analysis for public review/Consideration/comment. This seems like another 3<sup>rd</sup> repeat of the prior two Coastal planning mistakes by the City. In 2019, again citizens asked for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again the City rejected citizens' requests.
- In 2020 thousands of public requests again asked, and are currently asking, for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again these requests are being rejected. Based on the significant citizen concern and the documented prior 'planning mistakes' at Ponto it appears reasonable and responsible for Ponto's Planning Area F to either:
  - i. Retain its current Existing LCP LUP land Use of "Non-Residential Reserve" until such time as the City's past Ponto Beachfront Village Vision Plan and General Plan Update planning mistakes and other issues subject to current planning lawsuits against the City are resolved with a true, honest and open community-based Coastal planning process asked for by citizens since 2017. Or
  - ii. Propose in the Draft LCP Land Use Plan Amendment to re-designated Planning Area F back to a Visitor Serving Commercial and Open Space ("i.e. Public Park") to provide both "High-Priority" coastal uses v. low-priority residential/general commercial uses due to the documented Coastal Recreation and Low-cost visitor accommodation needs for both citizens and visitors at Ponto and South Carlsbad.

13. Questionable logic and inconsistency in proposed Draft land use map and policies: Chapter 2 Figure 2-2B & C on pages 2-19 & 20 proposes to Amend the existing LCP Land Use Plan Map, and policies LCP-2-P.19 and 20 on pages 2-27 to 2-29 propose Amendments to existing LCP policy and create a new added layer of policy referencing a Ponto/Southern Waterfront. The proposed Land Use Map and Policies serve to firmly plan for "low-priority" residential and general commercial land uses at Ponto with a clear regulatory Land Use Plan Map showing these land uses and by specific regulatory policy (LCP-2-20) that clearly requires (by using the words "shall") these "low

priority” uses. In contrast the “High-Priority” Coastal Recreation and Coastal Park land uses that would be designated as Open Space are not mapped at all in Figure 2-2B & C; and the proposed policy LCP-2-P.19 is both misleading and specifically does Not Require any “High-Priority” Coastal Recreation and Coastal Park land Use at Ponto and South Carlsbad. In fact page 2-22 specifically indicates two “may” criteria that would first need to occur in the positive before any potential Coastal Recreation and Coastal Park Land could then theoretically even be possible. It is highly probable that it is already known by the City that the proposed relocation of Carlsbad Boulevard (Coast Highway) is not very feasible and not cost effective, and will not yield (due to environmental habitat constraints, narrowness of the roadway median, and other design constraints) any significant dimensions of land that could potentially be designated Open Space and realistically be used as a Park.

The blank outline map (Figure 2-2B & C) provides no mapped Open Space Land Use designation, other than for the currently existing State Campgrounds’ low-cost visitor accommodations, so the proposed Land Use Plan Map is Not providing/mapping any new Open Space land use to address Coastal Recreation and Coastal Park needs. The Draft LCP Land Use Plan Amendment’s proposed/projected/planned Sea Level Rise and associated coastal erosion appears to indicate that this “High-Priority” low-cost visitor accommodation (Campground) land use designated as Open Space will be reduced in the ‘Buildout’ condition due to coastal erosion. So **the Draft LCP Land Use Plan is actually planning for a Reduction in Open Space Land Use in South Carlsbad and Ponto.** Both the blank outline map and the proposed Land Use Map Figure 2-1 DO NOT clearly map and designate both South Carlsbad’s Draft LCP Planned Loss of the Open Space Land Use and also any New or replacement unconstrained land as Open Space land use for Coastal Recreation and Coastal Park. This is an internal inconsistency in Land Use Mapping that should be corrected in two ways:

- 1) Showing on all the Land Use (Figure 2-1), Special Planning Area (Figure 2-2B & C), and other Draft LCP Maps the Draft LCP’s planned loss of land area in those maps due to the Draft LCP’s planned loss of land due to Sea Level Rise and Coastal Land Erosion. This is required to show how land use boundaries and Coastal Recourses are planned to change over time. or
- 2) Provide detailed Land Use Constraint Maps for the current Carlsbad Boulevard right-of-way that the City “may” or ‘may not’ choose (per the proposed “may” LCP-2-P.19 policy) use to explore to address the City’s (Park Master Plan) documented Coastal Recreation and Coastal Park land use shortages in Coastal South Carlsbad and Ponto. Clearly showing the potential residual Unconstrained Land within a Carlsbad Boulevard relocation that have any potential possibility to add new Open Space Land Use Designations (for Coastal Recreation) is needed now to judge if the policy is even rational, or is it just a Trojan horse.

The proposed internal inconsistency in mapping and policy appears like a plan/policy ‘shell game’. The proposed Land Use Plan Maps and Policies should be consistent and equality committed (mapped-shall v. unmapped-may) to a feasible and actual Plan. If not then there is No real Plan.

There is no Regulatory Policy requirement in LCP-2-P.19 to even require the City to work on the two “may” criteria. The City could choose to bury the entire Carlsbad Boulevard relocation concept and be totally consistent with Policy LCP-2-P.19 and the LCP. As such the language on 2-22, Figure 2-2C (and the proposed Land Use Map), and policy LCP-2-P.19 and 20 appear conspire to create a shell game or bait-and-switch game in that only “low-priority” residential and general commercial uses are guaranteed (by “shall” policy) winners, and “high-priority” Coastal Recreation and Coastal Park Land Uses are at best a non-committal ‘long-shot’ (“may” policy) that the city is specifically not providing a way to ever define, or commit to implement. The proposed Draft LCP Land Use Plan Coastal Recreation and Coastal Park statements for Ponto are just words on paper that are designed to have no force, no commitment, no defined outcome, and no defined requirement to even have an outcome regarding the

documented “High-Priority” Coastal Recreation and Coastal Park needs at Ponto, Coastal South Carlsbad and the regional 6-mile Coastal Park gap centered around Ponto.

Policy LCP-2-P.19 falsely says it “promotes development of recreational use” but does not in fact do that. How is development of ‘recreational use promoted’ when the Use is both unmapped and no regulatory policy requirement and commitment (no “shall” statement) to ‘promote’ that Use is provided? Policy LCP-2-19.19 appears a misleading sham that does not ‘promote’ or require in any way “High-Priority” Coastal Recreation and Park Land Use at Ponto. There should be open and honest public workshops before the Draft LCP Amendment goes to its first public hearing to clearly define the major environmental constraints and cost estimates involving possible relocation of Carlsbad Boulevard and constructing needed beach access parking, and sufficient and safe sidewalks and bike paths along Carlsbad Boulevard; and then map the amount and dimensions of potential ‘excess land’ that maybe available for possible designation as Open Space in the City General Plan and Local Coastal Program. The City should not repeat the mistakes at the Carlsbad Municipal Golf Course (resulting in the most expensive to construct maniple course in the USA) by not defining and vetting the concept first. A preliminary review of City GIS data appears the amount, dimensions and locations of any potential ‘excess’ land maybe modest at best. However before the City proposes a ‘Buildout’ Coastal Land Use Plan this critical information should be clearly provided and considered. It is likely the City’s Carlsbad Boulevard relocation concept is unfeasible, inefficient, too costly, and yields too little actual useable ‘excess land’ to ever approach the Coastal Recreation and Coastal Park needs for South Carlsbad. This may already be known by the City, but it surely should be publicly disclosed and discussed in the DLPCA.

The proposed Coastal Land Use Plan to address Carlsbad’s, San Diego County’s and California’s High-Priority Coastal Recreation Land Use and Coastal Park needs should NOT be vague “may” policy that appears to be purposely designed/worded to not commit to actually providing any “High-Priority” Coastal Recreation and Coastal Park land uses on the map or in policy commitments. The Land Use Plan and Policy for High-Priority Coastal Recreation and Coastal Park Land Use should be definitive with triggered “shall” policy statements requiring and assuring that the ‘Forever’ “High-Priority” Coastal Recreation and Coastal Park needs are properly and timely addressed in the City’s proposed ‘Buildout’ Coastal Land Use Plan. This “shall” policy commitment should be clearly and consistently mapped to show the basic feasibility of the planned outcomes and the resulting actual Land that could feasibly implement the planned outcome.

Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard: Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard are Coastal Access and Completes Streets issues. South Carlsbad Boulevard now and has for decades been a highly used Incomplete Street that is out of compliance with the City’s minimum Street Standards for pedestrian and bike access and safety. The Coastal Access portion of the Draft Land Use Plan should strongly address the Complete Street requirements for South Carlsbad Boulevard. Those policy commitments should be reference in Policy LCP-2-P.19 and 20 as Carlsbad Boulevard in **South Carlsbad is the most Complete Street deficient portion of Carlsbad Boulevard**. Forever Coastal Access parking demand and the proposed LCP Amendment’s Land Use Plan to supply parking for those demands should also be addressed as part of the Coastal Access and Complete Streets issues for South Carlsbad Boulevard. If much needed Coastal Access Parking is provided on South Carlsbad Boulevard as part of a “maybe” implemented realignment, most of the “maybe” realignment land left after constraints are accommodated for and buffered will likely be consumed with these parking spaces and parking drive aisles/buffer area needed to separate high-speed vehicular traffic from parking, a buffered bike path, and a sufficiently wide pedestrian sidewalk or Coastal Path. After accommodating these much needed Complete Street facilitates there will likely be little if any sufficiently

dimensioned land available for a Coastal Recreation and a Coastal Park. The needed Coastal Access and Complete Street facilities on South Carlsbad Boulevard are very much needed, but they are NOT a Coastal Park.

As mentioned the proposed Draft Coastal Land Use Plan's Maps and Policies are very specific in providing for the City's proposed LCP Land Use changes to 'low-priority' Residential and General Commercial' on Planning Area F (proposed to be renamed to Area 1 and 2). It is curious as to why the proposed Draft LCP Land Use Plan Amendment has no Land Use Map and minor vague unaccountable Land Use Policy concerning 'High-priority Coastal Recreation Land Use' at Ponto, while the very same time proposing very clear Land Use Mapping and detailed unambiguous "shall" land use policy requirements for 'low-priority' Residential and General Commercial land use at Ponto. Why is the City Not committing and requiring (in a Land Use Map and Land Use Policy) to much needed 'High-priority' Coastal Recreation and Coastal Park Land Use' needs at Ponto the same detail and commitment as the City is providing for "low-priority" uses? This is backwards and inappropriate. It is all the more inappropriate given the 'Buildout' Coastal Land Use Plan the City is proposing at Ponto. These issues and plan/policy commitments and non-commitments will be 'forever' and should be fully and publicly evaluated as previously requested, or the Existing LCP Land Use Plan of "Non-residential Reserve" for Planning Area F should remain unchanged and until the forever-buildout Coastal Recreation and Coastal Park issues can be clearly, honestly and properly considered and accountably planned for. This is vitally important and seems to speak to the very heart of the CA Coastal Act, its founding and enduring principles, and its policies to maximize Coastal Recreation. People for Ponto and we believe many others, when they are aware of the issues, think the City and CA Coastal Commission should be taking a long-term perspective and be more careful, thorough, thoughtful, inclusive, and in the considerations of the City's proposal/request to permanently convert the last vacant unplanned (Non-residential Reserve) Coastal land at Ponto to "low-priority" land uses and forever eliminate any Coastal Recreation and Coastal Park opportunities.

14. Public Coastal View protection: Avenida Encinas is the only inland public access road and pedestrian sidewalk to access the Coast at Ponto for one mile in each direction north and south. It is also hosts the regional Coastal Rail Trail in 3' wide bike lanes. There exist now phenomenal coastal ocean views for the public along Avenida Encinas from the rail corridor bridge to Carlsbad Boulevard. It is assumed these existing expansive public views to the ocean will be mostly eliminated with any building development seaward or the Rail corridor. This is understandable, but an accountable ('shall') Land Use Plan/Policy addition to proposed Policy LCP-2-P.20 should be provided for a reasonable Public Coastal View corridor along both sides of Avenida Encinas and at the intersection with Carlsbad Boulevard. Public Coastal view analysis, building height-setback standards along Avenida Encinas, and building placement and site design and landscaping criteria in policy LCP-2-P.20 could also considered to reasonably provide for some residual public coastal view preservation.
  
15. Illogical landscape setback reductions proposed along Carlsbad Boulevard, and Undefined landscape setback along the Lagoon Bluff Top and rail corridor in Policy LCP-2-P.20: Logically setbacks are used in planning to provide a buffering separation of incompatible land uses/activities/habitats. The intent of the setback separation being to protect adjacent uses/activities/habitats from incompatibility, nuisance or harassment by providing a sufficient distance/area (i.e. setback) between uses/activities/habitats and for required urban design aesthetics – almost always a buffering landscaping. Policy LCP-2-P.20. A.4 and C.3 says the required 40' landscape setback along Carlsbad Boulevard "maybe reduced due to site constraints or protection of environmental resources." The ability to reduce the setback is illogical in that setbacks are intended to protect environmental resources and provide a buffer for constraints. In the Carlsbad Boulevard right-of-way there is documented sensitive environmental habitat, along with being a busy roadway. How could reducing the protective 40' setback in anyway better protect that habitat or provide a better landscaped compatibility or visual aesthesis buffer along Carlsbad Boulevard? It is

illogical. If anything the minimum 40' landscaped setback should likely be expanded near "environmental resources". Regarding reducing the minimum 40' landscape setback for "site constraints" there is no definition of what a "site constraint" is or why it (whatever it may be) justifies a reduction of the minimum landscaped setback. Is endangered species habitat, or a hazardous geologic feature, or a slope, or on-site infrastructure considered a "site constraint"? There should be some explanation of what a "site constraint" is and is not, and once defined if it warrants a landscape setback reduction to enhance the buffering purpose of a landscape setback. Or will a reduction only allow bringing the defined constraint closer to the adjacent uses/activities/habitats that the landscape setback is designed to buffer. It is good planning practice to not only be clear in the use of terms; but also, if a proposed reduction in a minimum standard is allowed, to define reasonably clear criteria for that reduction/modification and provide appropriate defined mitigation to assume the intended performance objectives of the minimum landscape setback are achieved.

Policy LCP-2-P.20.C.4 is missing a critical Bluff-Top landscape setback. It seems impossible that the DLCPA is proposing no Bluff-Top setback from the lagoon bluffs and sensitive habitat. The Batiqitos Lagoon's adjoining steep sensitive habitat slopes directly connect along the Bluff-top. Batiqitos Lagoon's and adjoining steep sensitive habitat is a sensitive habitat that requires significant setbacks as a buffer from development impacts. Setbacks similar to those required for the San Pacifico area inland of the rail corridor, should be provided unless updated information about habitat sensitivity or community aesthetics requires different setback requirements.

Policy LCP-2-P.20 does not include a landscape setback standard adjacent to the rail corridor. This is a significant national transportation corridor, part of the 2<sup>nd</sup> busiest rail corridor in the USA. Train travel along this corridor is planned to increase greatly in the years to come. Now there is significant noise, Diesel engine pollution, and extensive ground vibration due to train travel along the rail corridor. Long freight trains which currently run mostly at night and weekends are particularly noisy and heavy, and create significant ground vibration (underground noise). These issues are best mitigated by landscape setbacks and other buffers/barriers. A minimum setback standard for sufficient landscaping for a visual buffer and also factoring appropriate noise and ground vibration standards for a buildout situation should be used to establish an appropriate landscape setback that should be provided along the rail corridor. Carlsbad's landscape aesthetics along the rail corridor should be factored into how wide the setback should be and how landscaping should be provided. An example for the landscape aesthetic portion of the setback standard could be landscape design dimensions of the San Pacifico community on the inland side of the rail corridor. However, noise and vibrational impacts at San Pacifico are felt much further inland and appear to justify increased setbacks for those impacts.

**Subject:** Jan26th Agenda item 12 - Protect Ponto

Dear Mayor, City Council, Planning Commission and CA Coastal Commission

*I request that the City Council direct staff to research and provide options to acquire Planning Area F for Ponto Park. And that The City Council directs staff to consult with People for Ponto Carlsbad citizens organization on the data and resources they have collected that can assist the Staff and the Council with these options.*

I have lived in Southern CA for 30 years and in Carlsbad for the last 4. This is an amazing city, but I know it can be so much more, we have an obligation to our children & all those that come to enjoy the coast line to make it more.

The land at Ponto (Planning area F) is a prime location to do **something amazing** with, something that matters and inspires joy. I am aware that the land is for sale and DO NOT wish to see a developer turn it into a condo complex when it could be the **jewel of our City**. I know the State of CA says we have to have a certain number of new houses, but they don't say they have to be crammed into one of the last remaining open pieces of coastal land. Build housing complexes closer to where offices and businesses are, build them inland and **Protect Ponto!**

I know the People for Ponto organization has identified multiple paths to success that would be a win / win for everyone -- City Staff should work with them, learn from them and Ponto Park a reality.

I ask you to **Develop Ponto Right** and work with the experts that have the knowledge to do what the community wants - keep the open space, build Ponto Park!

I request that my comments be put on record in the official public records for **ALL** things Planning Area F, including the

official public records the Draft Local Coastal Program Amendment, and Parks Master Plan Update; and the CA Coastal Commission's consideration of Carlsbad's draft Local Coastal Program Amendment.

Thank you

T. Owen Rassman

**Subject:** 1-26-21 Agenda Item 12 Protect Ponto

Dear Mayor, City Council, Planning Commission and CA Coastal Commission

*I request that the City Council direct staff to research and provide options to acquire Planning Area F for Ponto Park. And that The City Council directs staff to consult with People for Ponto Carlsbad citizens organization on the data and resources they have collected that can assist the Staff and the Council with these options*

The People have been asking to keep Ponto's Open Space and build Ponto Park for an extremely long time but it seems to fall on deaf ears or only be met with resistance. Staff's presentation to the Planning Commission in Dec 2019 and the Staff report for this agenda item have inaccurate information in them but it doesn't seem like there is much interest in recognizing the truth. I hope today's meeting will change that.

Truth is the land use change should not have been changed the way it was, so we shouldn't "just continue on with it".

Truth is Planning Area F is not the answer the State's housing demands.

Truth is Ponto Park is not only being asked for by the people that live in the area – it is for ALL of Carlsbad and ALL of the visitors that come from near and far.

Truth is it would be relatively easy to **Develop Ponto Right** – you just have to listen and want to make it happen.

So I repeat -

*I request that the City Council direct staff to research and provide options to acquire Planning Area F for Ponto Park. And that The City Council directs staff to consult with People for Ponto Carlsbad citizens organization on the data and resources they have collected that can assist the Staff and the Council with these options.*

I request that my comments be put on record in the official public records for **ALL** things Planning Area F, including the official public records the Draft Local Coastal Program Amendment, and Parks Master Plan Update; and the CA Coastal Commission's consideration of Carlsbad's draft Local Coastal Program Amendment.

Thank you

Jodi M. Jones

**Comments**

Policies using parks and recreation sites should be of benefit to most Carlsbad residents. To limit the use of tennis courts to only those persons playing tennis when many other sports/activities can benefit is not being inclusive. This should change similar to how baseball fields accommodate kickball, soccer and softball. Many of our fields are under utilized. Simple changes can be made (as they have in most California cities) to allow for the growth of pickleball. Carlsbad is expected to have the highest growth in senior category in the next 10 years. Many seniors would lead healthier lives if they were encouraged to play a cardio sport. Do not make it so difficult to change tennis courts to allow for tennis or pickleball. Just paint some additional lines!

If you do not wish to receive further emails from us, please check the box, and you will be removed from our mailing.

**Subject:** Pickleball Courts

Hi:

On any day, if you look at the existing tennis courts, there are at least **2-3 tennis courts that are empty** and most of the time, only two people are on the tennis court at any given time; **see attached video. We really need more pickleball courts.**

If you watch the live video feed from Poinsettia Pickleball Park, you will see children as young as 7 years old and people 88 years old playing this growing game. In fact, more and more families and younger children are coming to the park to play. This facility is already beyond capacity, people are waiting 30-45 minutes to play one game. People plan their vacation to come to our park to play. People drive from other counties like Orange County, Temecula, Fallbrook and South San Diego to play at our facility. People spend money in Carlsbad when they travel to the park; go to restaurants, buy gas and food, etc..

The time to retrofit 1 tennis court compared to finding land, permits, and building pickleball courts from scratch will be much cheaper and faster; very large cost savings to the city to convert 1 or 2 tennis courts. Drawing below, three (3) pickleball courts will fit very nicely into one (1) of the existing tennis courts without any new changes to the existing perimeter fencing. Remove the tennis net/posts, install pickleball nets/posts, add two low fences between the courts, and repaint the tennis courts into three pickleball courts. The current pickleball courts have a width of 30 feet, the new pickleball courts would have a width of 33 feet and will be about 6 inches less on either end. Having more width would be really nice and having a fence that is open at only one end will keep the balls from going into the other courts. There will be plenty of room on either end for bench seating, just like the present courts; actually there is more bench seating than the existing courts.

I would suggest converting 2 tennis courts and using these 6 new pickleball courts for strong intermediate and advanced players. Use the existing 6 pickleball courts for beginners/social and strong intermediate players. This would create a fun and social atmosphere for all the players. I cannot tell you how many friends I have made playing pickleball. For the most part, 99% of the people are really nice. As with any sport or business there are always a few bad apples. LOL.

As one of the **fastest growing** recreational **sports** in North America, the game of **Pickleball** is truly a phenomenon.

The Sports & Fitness Industry Association (SFIA) is a trade organization that tracks the popularity of sports and registers the sales of products for those various sports throughout America.

In 2014 the SFIA found that there were a total of 2.815 million US players. Those numbers represented a 1.8% rate of growth from the previous year, which is what earned it the reputation of being one of the fastest-growing sports in America.

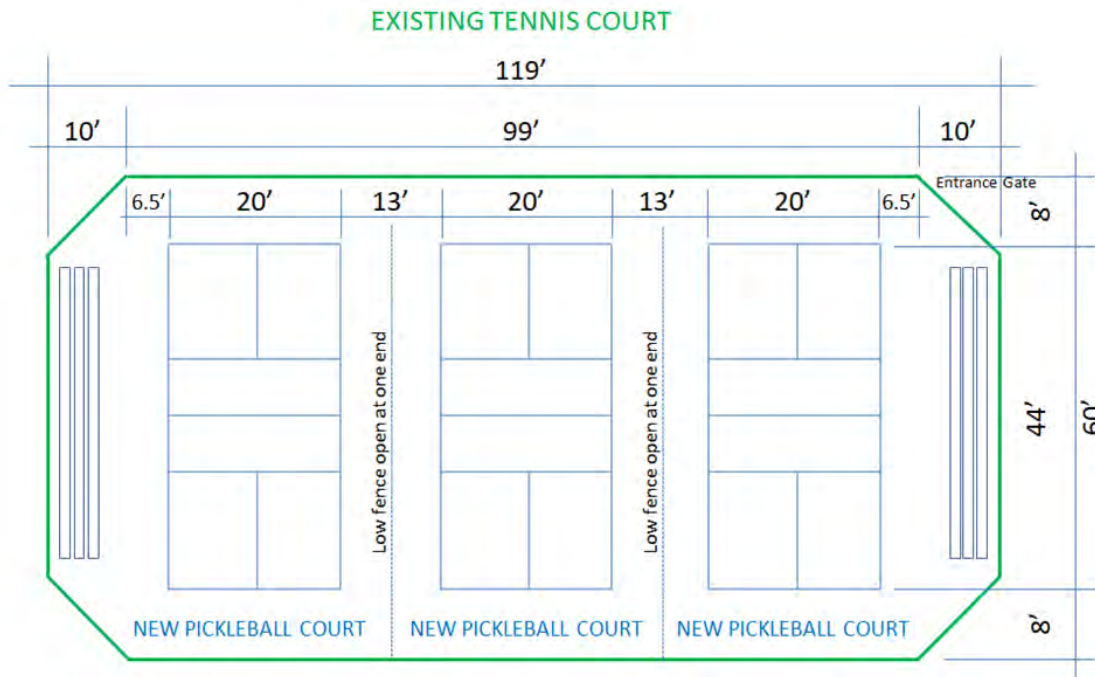

In 2018 they reported a total of 3.1 million pickleball players in the US and at last count, there were 20,933 pickleball courts to choose from throughout the 50 states, not to mention growing participation overseas.

**In 2020, they reported 21.3% growth and a total of 4.2 million active players and still growing.**

Cheers~

Hi:

On any day, if you look at the existing tennis courts, there are at least **2-3 tennis courts that are empty** and most of the time, only two people are on the tennis court at any given time; **see attached video. We really need more pickleball courts.**

If you watch the live video feed from Poinsettia Pickleball Park, you will see children as young as 7 years old and people 88 years old playing this growing game. In fact, more and more families and younger children are coming to the park to play. This facility is already beyond capacity, people are waiting 30-45 minutes to play one game. People plan their vacation to come to our park to play. People drive from other counties like Orange County, Temecula, Fallbrook and South San Diego to play at our facility. People spend money in Carlsbad when they travel to the park; go to restaurants, buy gas and food, etc..

**Comments** I was just at the PB courts at Poinsettia today and saw the notice about adding more PB courts...I agree that we need more courts, BUT PLEASE; dont take away any of those tennis courts...The top 4 courts are some of the best in the county and it would be a shame to lose them... I play both Pickleball and Tennis and while there is a need for more PB courts that empty lot next to the existing courts would be the perfect solution. I do understand that with new courts and more people comes the issue of parking. One thing for sure is that this is a fabulous park

**Comments** You've probably noticed how the pickleball courts at Poinsettia are heavily utilized and it's not unusual to have 20-100 players waiting to play. Hopefully this tells you there is a need for more courts! And here's a hot tip - pickleball is VERY social and because of that, it is preferable to have many courts in one place. So, for example, one venue of 24 courts is more desirable than 4 venues with 6 courts each. And a large venue tends to have fewer "issues". Please PLEASE build more courts in Carlsbad.

**Comments** I would like to support the addition of more pickleball courts at Poinsettia Park. The existing courts have been a great addition but they are constantly full with many people waiting to play. Perhaps utilizing one existing tennis court to add 4 more courts. This would also allow for courts to be designated beginner, intermediate or advanced. Thank you.

**Comments** I think there should be more pickle ball courts. At any time there are 24 people usually playing and 10 or more waiting. The size of those 6 courts is equal to 1 1/2 tennis courts where only 3 to 6 players would be playing. Most of the time the tennis courts are not used and people have to wait to play pickle ball. It would be nice if we had more pickle ball courts and less tennis courts. Thank you.

**Comments** Hello. I highly recommend adding additional pickleball courts to Poinsettia Park. I've been observing patterns in attendance and new interest to the sport, and Poinsettia has become a popular place for social and advanced play. There are 4 dedicated social courts and 2 advanced courts. We definitely need at least two additional advanced courts to balance out attendance. I hope this is being considered. Thank you for your attention to my request.

**Importance:** High

Mick:

Thank you. We wanted to make sure you and the City are documenting and considering the citizen input you have received so far over the past several years regarding Ponto Park needs. Can you confirm that you are considering this citizen input in your work?

Clearly the need for wide open grassy spaces that allow social distancing and multi-function park and recreation opportunities is a key lesson from Covid along with having those wide grassy multi-use parklands within walking distance to all neighborhoods. This has been expressed repeatedly by Carlsbad's citizens regarding in the Coastal Park void (unserved area) in South Carlsbad.

Carlsbad citizens have identified several significant private sector/donor funding sources for Ponto Coastal Park. How can Carlsbad citizens have a discussion with you and the City on those opportunities?

Thank you for your consideration. We look forward to confirmation that years of citizen input to the City on Ponto Park is being considered in your efforts.

Thanks again, and Happy Thanksgiving,

Lance Schulte

## Has COVID changed parks and recreation priorities?

The City of Carlsbad is creating an updated blueprint that will guide priorities and proposed investments in parks and recreation for the next five years. This project was interrupted due to the COVID-19 pandemic, and as the project starts back up, the city wants to know if the community's priorities have changed.

Community members are encouraged to attend one of two upcoming virtual meetings to hear the public feedback that was provided in February 2020 and let the city know if anything has changed.

Thursday, Dec. 9, 6 to 7 p.m.

[Register](#)

Saturday, Dec. 11, 10 to 11 a.m.

[Register](#)

The city's existing Parks & Recreation Master Plan was completed in 2015. The update will cover:

- Assessment of current parks, facilities and recreational programs
- Demographic and industry trends
- Community needs and priorities
- Funding needs and revenue opportunities
- A five-year strategic action plan

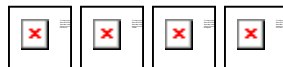

### Other input opportunities

Input from the workshops will be used to create a survey questionnaire to obtain feedback from a statistically representative group of Carlsbad residents. The survey will also be available online to anyone who wants to take it; however, the results will be analyzed separately from the random sample.

A draft of the master plan will be made available for input by the end of summer 2022, with a final draft scheduled to be presented to the City Council for approval in fall of 2022.

**E-mail** tindallmike@hotmail.com  
**Comments** I am 75 years old and I enjoy playing pickleball. It is a multi-generational sport. Usually I play with people younger than me at Poinsettia Park and enjoy the experience. We need more outside courts in Carlsbad. Sometimes the wait between games at Poinsettia Park is longer than the actual playing time. At the minimum-only to save money- check on double use of the tennis courts at Poinsettia. The City of Encinitas does it with success at Cottonwood Creek Park. Check with them or observe it in person. Many Carlsbad residents played there before the courts at Poinsettia were built. Thanks for your consideration.

**Subject:** Pickleball courts at Poinsettia Park

Dear Matt, Kyle and Mike,

Pickleball is the fastest growing sport in the United States. It is being played in elementary, middle, high school and by college athletes. There is talk that it might be played in the next Summer Olympics. There are 134 tennis courts in the city of Carlsbad and only 6 Pickleball courts. Making 1 tennis court a multi-use court, tennis and Pickleball will not keep people from playing tennis. I won't push my luck and ask you to use 2 tennis courts for multi-use courts LOL. In fact, the tennis courts at Poinsettia Park are very underutilized.

Believe it or not, a lot of money comes into Carlsbad. I talk to people almost everyday that drive to Carlsbad to play at Poinsettia Park. These people live in Chula Vista, La Jolla, Poway, Fallbrook, Escondido, Vista, San Marcos and Oceanside to name a few cities. They eat at our restaurants, buy gas, shop at our stores, they help support our local businesses.

The six courts at Poinsettia are some of the best courts in San Diego County! Often 20-40 people are waiting to play, which is frustrating when you look West and see 3-5 tennis courts are empty; not being used. What's funny, a lot of pickleball players are tennis players that have fallen in love with pickleball.

The Pickleball courts are being fully utilized on a daily basis. In fact, there are not enough Pickleball courts. Almost everyday people are waiting from 10-40 minutes to play 1 game because there are so many people waiting to play and not enough courts.

I would like to make a suggestion, which would be very cost effective and simple to do. No need for new construction or extensive planning permits. Take the one tennis court (Southwest Court) located next to the main parking lot and adjacent to the main park, away from residential homes and paint pickleball lines (shadow lines) on the tennis courts. Encinitas did this on two of their tennis courts, see picture below; they didn't go through an extensive, time consuming building or permitting process. Noise would not be an issue at this location because it is towards the middle of the park and next to the parking lot. Leave the tennis net in place, it will be used as a divider between the four pickleball courts; see picture below. Place portable, heavy-duty pickleball nets, like they use at Bobby Riggs on this court; see picture below. When people are not playing tennis, pickleball can be played. When people are not playing pickleball, tennis can be played.

One tennis court would allow at least 16 pickleball players to get their mental and physical exercise as compared to two or four tennis players. These four courts could be used for more advanced players. The permanent six pickleball courts can then be used for beginner to intermediate players. When and if Carlsbad builds new pickleball courts, (we all are praying and have our fingers crossed) the converted tennis court can easily be converted back to a full-time tennis court.

I REALLY hope you will consider this idea. The tennis courts are not being utilized to their full capacity. In fact, many, many, times throughout the day, the tennis courts are half empty and the pickleball courts have a lot of people waiting to play, needless to say, it is very frustrating. Tennis players are converting to pickleball, as much as they don't want to admit it.

Pickleball brings families together. Many new friendships are formed. Money comes into Carlsbad.

This would be a temporary solution. The tennis court would not be gone permanently. If money is an issue to convert, I'm sure the Pickleball community will be more than willing to help raise money to paint the lines and buy the portable nets.

Thank you!

Cheers~

Douglas Gore

Cottonwood Creek Park Tennis Courts,  
Encinitas, California

Light brown lines (shadow lines) have been painted on two tennis courts to create eight Pickleball courts; the tennis net separates the four pickleball courts. Temporary pickleball nets are rolled onto the court when the tennis court is not being used. Tennis or pickleball can be played at the same location.

Sturdy and Portable Pickleball Nets

## City of Carlsbad - Your Comments Input

**Name** Linda Shafer  
**E-mail** [Las0510@yahoo.com](mailto:Las0510@yahoo.com)  
**Comments** We and a large group of friends in the community (from elementary schoolers to seniors) enjoy the fitness and fun of pickle-ball. We would love to see the tennis courts at Laguna Riviera Park (by Kelly School) converted into temporary pickle-ball and tennis courts. It could be similar to what Escondido did at Cottonwood Park.

**Subject:** RE: Tell us about parks & rec priorities at this week's meetings

Dear Carlsbad City Council and Parks Commission:

Sorry I am unable to attend the workshops. Following is my public input & data, and suggested questions the City should provide citizens in setting park land use policy and priorities:

A clear lesson from Covid is the need for flat wide open grassy parks that fully allow social distancing and multi-function park and recreation opportunities within a 10-minute walking distance to all neighborhoods. This fundamentally what city parks are intended to provide – flat wide-grassed-flat and fully useable multi-function spaces to recreate formally or informally, and being accessible by a short walk to all neighborhoods and children without having to drive a car to access.

Another clear lesson comes from new City and State parallel moves to demand unlimited population growth using higher density condo/apartment developments. These developments by definition pack more people into a smaller area thus creating an even greater need for parks. Making flat wide open grassy and fully useable parks even more important to be provided within a 10-minute walk.

Trails although nice to walk along in the outdoors force people into a 5-8 foot wide path that does not allow social distancing. A trail is not a park.

Carlsbad People for Ponto (P4P) Citizens have for years provided the City input on Parks and Recreation Priority issues from 2017 to less than 2-months ago, and to now. Since pre-Covid 2017 over about 5,000 written/verbal petitions and multiple budget processes have been provided. In an after-Covid situation, most recently in October 2021, about 700 written/verbal petitions and public testimony was provided. Carlsbad P4P Citizen input is based on documented City records. P4P Carlsbad Citizen input is/has been consistent with the above Covid observations and significant in the numbers of Citizens calling for a meaningful (i.e. usable wide, grassed multi-function) park at Ponto. The P4P Citizen input should be fully disclosed, discussed and accounted for in the Parks Master Plan.

P4P's 30-page October 15, 2021 "Coastal Recreation" data file to the City documented comparative park data that the City should fully present and discuss with Citizens as part of the Parks Master Plan. The comparative park data shows Carlsbad is below average nationally and significantly below our adjacent Cities in providing parks – and requiring Carlsbad developers provide parks for their developments. It also documents how over 112 acres, or over 33% of all existing/planned City parkland is constrained and unusable to humans to fully use as a park. Having over 33% of City Parks constrained and not fully useable a park for citizens is a significant city land use and parks master plan issue. The 30-pages of documented information and requests in the October 15, 2021 Coastal Recreation file should be a part of the park master plan process. Following are some key park data the City should present and key park priority questions on that data the City should ask citizens:

1. Carlsbad only requires developers to provide a comparatively low 3-acres of parkland per 1,000 population of Carlsbad developments. Encinitas and Oceanside require their developers to provide 5-acres per 1,000 population, which is over 60% more parkland than Carlsbad's City Council requires developers to provide.
  - a. Should Carlsbad require 60% less parkland than Encinitas and Oceanside?
  - b. Should Carlsbad require developers to provide the same 5-acres per 1,000 parkland as Encinitas and Oceanside?
  
2. Carlsbad does not plan for, or require developers, to provide parks within a 10-minute walk to homes. Both Encinitas and Oceanside require parks to be provided within a 10-minute walk of all homes in their Cities.
  - a. Should Carlsbad require parks to be within a 10-minute walk of homes like Encinitas and Oceanside?
  - b. Should Carlsbad require developers to provide their parkland requirement (3 or 5 acres/1,000 population) be within a 10-minute walk of homes the homes the developer builds like Encinitas and Oceanside?
  
3. Carlsbad is BELOW the national average in BOTH providing Parkland and in providing Parkland Within a 10-minutewalk to homes (see ,Trust for Public Land Park Score).
  - a. Should Carlsbad be below average nationally in providing Parkland?
  - b. Should Carlsbad provide Parkland to be in the top 10%, 20%, 30%, 40%, just average, or below average nationally? (select one)
  - c. Should Carlsbad be below average nationally in providing Parkland within a 10-minute walk to homes?
  - d. Should Carlsbad provide Parkland within a 10-minute walk of homes so as to be in the top 10%, 20%, 30%, 40%, just average, or below average nationally? (select one)
  
4. South Carlsbad composes 62% of Carlsbad's population, yet has no large grassy usable Coastal park (like a Holiday Park) and has 0-acers of park west of I-5.
  - a. Should 62% of Carlsbad's population have at least one large grassy and fully useable park?
  - b. Should South Carlsbad developers be required to correct this park inequity?
  
5. North Carlsbad composes 38% of Carlsbad's population, yet has 10 Coastal parks totaling over 35-acres west of I-5.
  - a. Should the City's planned park investments be re-prioritized to correlate the location of coastal park land acreage with population demand?
  
6. South Carlsbad developer fees paid to build and fund many North Carlsbad park acres in both Veterans Park and Poinsettia 61 Park.
  - a. Should the City appropriately use those South Carlsbad developer fees paid to build Veterans Park and Poinsettia 61 Park to fund parks in South Carlsbad where the development and park demand from that development occurred?

Thank you for your consideration. We look forward to confirmation that years of P4P citizen input to the City on Park issues is being considered in your efforts.

## **Parks & Recreation Master Plan Meetings are this Week**

Don't forget to register for one of two virtual meetings we're holding this week to talk about whether COVID has changed parks and rec priorities.

Thursday, Dec. 9, 6 to 7 p.m.

[Register](#)

Saturday, Dec. 11, 10 to 11 a.m.

[Register](#)

The City of Carlsbad is creating an updated blueprint that will guide priorities and proposed investments in parks and recreation for the next five years. This project was interrupted due to the COVID-19 pandemic, and as the project starts back up, the city wants to know if the community's priorities have changed.

Community members are encouraged to attend one of the two virtual meetings to hear the public feedback that was provided in February 2020 and let the city know if anything has changed.

The city's existing Parks & Recreation Master Plan was completed in 2015. The update will cover:

- Assessment of current parks, facilities and recreational programs
- Demographic and industry trends
- Community needs and priorities
- Funding needs and revenue opportunities
- A five-year strategic action plan

### **Other input opportunities**

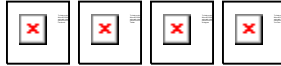

Input from the workshops will be used to create a survey questionnaire to obtain feedback from a statistically representative group of Carlsbad residents. The survey will also be available online to anyone who wants to take it; however, the results will be analyzed separately from the random sample.

A draft of the master plan will be made available for input by the end of summer 2022, with a final draft scheduled to be presented to the City Council for approval in fall of 2022.

Updated Pubic Comments Coastal Recreation submitted on Oct 12<sup>th</sup> 2021:

---

On 10/8/21 the Carlsbad City Council and CA Coastal Commission were emailed data from an Official Carlsbad Public Records Request (# R002393-092121) on the City of Carlsbad's past compliance/noncompliance with the currently exiting Mello II LCP Land Use Policies # 6-2, 6-4 & 6-10 Certified in the mid-1980s. The City's documents show:

- For Policy 6-2 the 200-300 acre Park called out in Policy 6-2 has been reduced to Veterans Park's 91.5 acres, of which only 54% or 49.5 acres is even useable as a Park. The City provided no documents on how a 200-300 acre park called for in Policy 6-4 is now only 49.5 useable acres.
- For Policy 6-4 there were no City documents were provided. There was no City Public discussion, consideration, or City compliance with Policy 6-4 since the mid-1980's.
- For Policy 6-10 concerns providing Low Cost Visitor Accommodations. Public Parks are the lowest cost (free) Visitor accommodating land use there is.

The 3 existing LCP Land Use Policies are important for Carlsbad, and California's, Coastal land use resources. There appears little to no discussion of the City's past apparent failure to implementation of these 3 LCP LUPs in the current City consideration of changes to the LCP.

Following is a copy of Public Records Request # R002393-092121: "Carlsbad's Local Coastal Program (LCP) for the Mello II Segment of Carlsbad's Coastal Zone has long established land use Policies 6-2, 6-4 & 6-10 that were adopted by Carlsbad and Certified by the CA Coastal Commission in the early/mid-1980's. Mello II LCP Policies 6-2, 6-4 & 6-10 are shown on page 86-87 of Carlsbad's 2016 compiled LCP and are:

- "POLICY 6-2 REGIONAL PARK: If the population of Carlsbad increases in accordance with SANDAG's projected Series V Population Forecasts, it is estimated that Carlsbad will need to develop a new regional park containing 200 to 300 acres in order to adequately serve the public. A location for a new regional park must, therefore, be established. Consideration should be given to a facility within the Aqua Hedionda Specific Plan Area, or adjacent lands. The Batiquitos Lagoon area should also be considered.
- POLICY 6-4 NEED FOR ADDITIONAL OVERNIGHT CAMPING: Additional overnight camping facilities, the main source of lower cost visitor and recreational facilities, are needed throughout the San Diego coastal region. Additional facilities of this kind should be provided in a regional park within the Carlsbad area. This can be accomplished in conjunction with an eventual Batiquitos Park, within the Aqua Hedionda Specific Plan Area, and/or along with the development of private recreational facilities.
- POLICY 6-10 LOWER COST VISITOR-SERVING RECREATIONAL USES: Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Encourage a range of affordability for overnight visitor accommodations. Evaluate the affordability of any new or redeveloped overnight visitor accommodations, including amenities that reduce the cost of stay. Mitigation may be applied to protect and encourage affordable overnight accommodations"

The public record request is to see documents of:

- City Staff reports, presentations and communications to the Carlsbad Planning and Parks Commissions, and City Council regarding the City’s consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies; and
- Carlsbad Planning and Parks Commissions, and City Council minutes, resolutions and ordinances documenting City of Carlsbad consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies.”

Updated Pubic Comments Coastal Recreation submitted on January 2021:

---

Over 11-months ago in a 1/29/20 1:56PM email People for Ponto Carlsbad citizens first provided the City of Carlsbad both data and comments on **14 critical Coastal Recreation issues (see pages 5-30 below)**. The data and the 14 critical issues do not seem to be receiving appropriate disclosure/presentation/discussion/consideration in the Dec 2, 2020 Staff Report to the Planning Commission. To assure the 26-pages of citizen data and requests in the 1/29/20 email was received by the Planning Commission the file was re-emailed on 12/22/20 12:24pm and specifically addressed to City Council, City Clerk, Planning Commission, Parks Commission, Housing Commission, HEAC, CA Coastal Commission, and CA HCD. As citizens we request each of these 14 data points (with supporting data) be honestly considered.

In reading the Dec 2 Staff Report citizens conducted additional analysis of City Park data. That research further reinforces and documents the 14 Critical Coastal Recreation issues and highlights the relatively poor amount of City Park and Coastal Recreation planned by Carlsbad’s Staff proposed Draft LCP-LUPA. We hope the City Council and City Commissions, and CA Coastal Commission & HCD will consider this additional analysis of City data and citizen input:

<u>Coastal Zone data</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>	<u>note or source</u>
Coastline miles	6.4	3.9	6.0	Carlsbad Draft LCPA 201, Google Maps
Coastal Zone Acres	9,219	1,460	7,845	& Oceanside & Encinitas LCPs
Coastal Zone Acres	100%	16%	85%	% relative to Carlsbad

City Park Standard data

City Park Standard	3	5	5	required park acres / 1,000 population
Park Standard %	100%	167%	167%	% is relative to Carlsbad

- Oceanside & Encinitas 'require' and plan for 67% MORE Parkland than Carlsbad
- Carlsbad 'requires' and plans for ONLY 60% as much Parkland as Oceanside & Encinitas
- Carlsbad only requires developers provide 60% of the parkland (or in-lieu fees) as Oceanside & Encinitas require
- Encinitas has a 'Goal' to provide 15 acres of Park land per 1,000 population

Developed City Park	2.47	3.65	5.5	acres / 1,000 population
Developed Park	100%	148%	223%	% is relative to Carlsbad

- Oceanside provides 48% MORE developed park land than Carlsbad
- Encinitas provide 123% MORE developed park land than Carlsbad
- Carlsbad ONLY provides 68% and 45% as much Parks as Oceanside & Encinitas respectively

National Recreation & Park Asso. Metric: a typical City provides 1 park / 2,281 pop. & 9.9 Park acres / 1,000 population

- Carlsbad (3 acre) Park Standard is ONLY 30% of what a typical City provides nationally
- Carlsbad requires developers to provide, 70% LESS Park acres than typical City provides nationally

National Recreation & Park Asso., Trust for Public Land, et. al.: 10 minute (1/2 mile) Walk to a Park Planning Goal

- Both Oceanside and Encinitas plan parks to be within a 10-minute (1/2 mile) walk to homes.
- Carlsbad DOES NOT plan Parks within walking distance to homes
- Carlsbad is NOT providing equitable and walking/biking access to Parks

Some Carlsbad Parks that are not fully useable as Parks:

<u>Existing Parks with Unusable Open Space acreage</u>	<u>total park acres</u>	<u>Unusable park acres</u>	<u>% of park unusable</u>	<u>reason unusable</u>
Alga Norte - SE quadrant	32.1	10.7	33%	1/3 of park is a Parking lot not a park In many other Carlsbad Parks a significant percentage of those Parks are consumed by paved parking lots and unusable as a Park.
Hidden Hills - NE quadrant	22.0	12.7	58%	city identified unusable habitat open space
La Costa Canyon SE quadrant	14.7	8.9	61%	city identified unusable habitat open space
Leo Carrillo - SE quadrant	27.4	16.5	60%	city identified unusable habitat open space
Poinsettia - SW quadrant	<u>41.2</u>	<u>11.1</u>	<u>27%</u>	city identified unusable habitat open space
Existing Park subtotal	137.4	59.9	44%	44% of these Parks are unusable as Parkland

Anticipated Future Park development projects

<u>Park - quadrant</u>				
Veterans - NW	91.5	49.5	54%	estimated unusable habitat open space
Cannon Lake - NW	6.8	3.4	50%	estimated unusable water open space
Zone 5 Park expansion - NW	9.3	0	0	appears 100% useable as a Park
Robertson Ranch - NE	<u>11.2</u>	<u>0</u>	<u>0</u>	appears 100% useable as a Park
Future park subtotal	118.8	52.9	45%	45% of Future Parks are unusable as Parks

**Unusable Open Space acres**

**in Existing & Future Parks**      256.2    112.8      44%      **112.8 acres or 44% is unusable as Parks**

- 112.8 acres or 44% of the Existing & Future Parks are unusable Open Space and can't be used as Parkland
- **Based on City's minimum 3-acres/1,000 population Park Standard, 112.8 acres of Unusable Parkland means 37,600 Carlsbad Citizens (or 32.5% of Carlsbad's current population of 112,877) will be denied Parkland that they can actually use as a Park.**
- 112.8 acres of Existing & Future unusable 'park' / 3 acre park standard x 1,000 population = 37,600 Carlsbad citizens without useable parkland per City minimum standard.
- **59.9 acres of Existing unusable 'park' / 3 acre park standard x 1,000 population = 19,967 Carlsbad citizens and their children are currently being denied useable park land. 19,967 is 17.7% of Carlsbad's current population.**
- In addition to these 19,967 existing citizens and their children denied park land, the City needs to develop additional Park acreage in the NE, SW and SE quadrants to cover current shortfalls in meeting in the minimal 3 acre/1,000 population park standard for the current populations in the NE, SW and SE quadrants.
- **The current NE, SW and SE quadrants park acreage shortfalls are in addition to the 19,967 Carlsbad citizens and their children that do not have the minimum 3 acres of parkland per 1,000 population**
- **Current FY 2018-19 MINIMUM park acreage shortfalls are listed below. They are:**
  - 4.3 acres for 1,433 people in NE quadrant,
  - 6.8 acres for 2,266 people in SW quadrant, and
  - 2.3 acres for 767 people in SE quadrant

Shortfall (excess) in  
Current Quadrant  
Park standard by

	population		Future Park		existing Park shortfalls are for NE, SW & SE quadrants
	acres	need	acres	%	
NW quadrant	(-14.2)	(-4,733)	107.6	91%	Current NW parks are 14.2 acres over min. standard & capacity for 4,733 more people at min. park standard. 91% of all Future City Parks are in NW quadrant
NE quadrant	4.3	1,433	11.2	9%	Future Park will exceed minimum NE park standard
SW quadrant	6.8	2,266	0	0%	No min. parks for 2,266 people in SW quad. Park deficit
SE quadrant	2.3	767	0	0%	No min. parks for 767 SE quadrant Park deficit

A Park Standard minimum is just a “Minimum”. City policy allows the City to buy/create parks above the City’s current 3 acre/1,000 pop. MINIMUM (and lowest) Park Standard of surrounding Coastal cities. Carlsbad already did this in the NW quadrant. It then added 3.1 more NW quadrant Park acres as part of the Poinsettia 61 Agreement. Poinsettia 61:

- converted 3.1 acres of NW City land planned/zoned for Residential use to Open Space Park land use/zoning,
- facilitated a developer building condos (increasing park demand) in the SW quadrant,
- required the SW Quadrant developer pay \$3 million to build the 3.1 acre NW quadrant park, and
- required the SW Quadrant developer pay to convert 3.1 acres of NW Quadrant & 5.7 acres of SW Quadrant City Park land to habitat that will be unusable as a City Park.

So Poinsettia 61 increased SW Quadrant development (that both increased SW Park Demand and expanded the current SW Quadrant Park deficit) while simultaneously using SW Quadrant development to pay for the conversion of 3.1 acres of residential land in the NW Quadrant to City Park (the NW Quadrant already has surplus park land per the City’s minimum standard).

People for Ponto strongly supports creating City Parks above the City’s current low 3-acre per 1,000 population minimum, as the City’s minimum standard is relatively low and substandard relative to other cities; many Carlsbad parks have significant acreage that is in fact ‘unusable’ as a park. Most importantly People for Ponto Citizens think it is very important to prioritize providing City Parks in areas of Park Inequity that are unserved by City Parks. However it seems very unfair to the SW Quadrant citizens to be so unserved and starved of the bare minimum of City Parks while at the same time funding City Parks in excess of City standard in other Quadrants.

The Poinsettia 61 illustrates a larger unfair (and dysfunctional) distribution of Quadrant based City Park demand and supply that is keenly evident in the demands/supply funding and location disparity of Veterans Park. Most all the development impact and park demand that paid Veterans Park fees came from the SW, SE and NE Quadrants yet the Veterans Park (supply) is not in those SW, SE and NE Quadrants. This inequity is counter to the implicit City requirement that City Parks be provided within the Quadrant of their Park demand. It is logical and proper that City Parks be provided and equitably distributed to be close to the development and population that generated the demand for that Park.

The City Park inequity at Ponto and in other Coastal areas of the City is counter to several CA Coastal Act policies; counter to good city planning and good CA Coastal planning; is highly detrimental to the City, City and CA citizens in the long-term; fails to properly distribute and match the location supply with the location of demand for Parks; and is counter to basic fundamental issues of fairness. Since 2017 People for Ponto has tried to get the City Council and City Staff to address this inequity, specifically at Ponto, and to do so in a way that embraces a true and honest Citizen-based planning process.

**Coastal Recreation:**

2. Request that the City as part of its Draft LCP Public Review process broadly-publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCPA processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park: This disclosure is needed to correct about 20 years of City misrepresentation to the public on the since 1996 and currently Existing LCP requirements at Ponto, and the City's prior planning mistakes at Ponto. Citizens have been falsely told by the City that all the Coastal planning at Ponto was done already and that the City followed its Existing LCP regarding the need for a park at Ponto, and that this is already decided and could not be reversed. This misinformation has fundamentally stifled public review and public participation regarding the Coastal Zone. City failure to provide such a broad-public disclosure on the documented prior, and apparently current proposed, "planning mistakes" would appear to violate the principles of Ca Coastal Act Section 30006. A broad-public disclosure would for the first time allow citizens to be accurately informed on the Existing LCP requirements at Ponto so they can provide informed public review and comment regarding the need for a Coastal Park in in this last vacant 'unplanned' area. The requested broad-public disclosure by the City of the City past mistakes and the Existing LCP requirements at Ponto is consistent with CA Coastal Act (CCA) "Section 30006 Legislative findings and declarations; public participation - The Legislature further finds and declares that **the public has a right to fully participate in decisions affecting coastal planning**, conservation and development; that achievement of **sound coastal conservation and development is dependent upon public understanding and support**; and that the continuing planning and implementation of **programs for coastal conservation and development should include the widest opportunity for public participation.**" The public cannot participate as outlined in CCA Section 30006 if past City 'mistakes' and misrepresentations on Coastal planning at Ponto go undisclosed to the public. If the public isn't fully informed about the 20-years of LCP planning mistakes at Ponto how could the public in the past (and now in the present) participate in the proposed LCP Amendment – **Public Participation as noted in Section 30006 above is the means to sound coastal conservation and development and is "... dependent upon public understanding ..."**. The City's past mistakes at Ponto need to be corrected by slightly different a Draft LCP Amendment process than currently outlined by the City; a new process is needed that clearly, opening and honestly informs and engages the public on the Existing LCP Ponto issues. The City's current Draft LCP Amendment process fails to follow CCA Section 30006 in that most all the citizens we encounter are as yet unaware of the City's Ponto mistakes and how they can participate in in the DLCPA process without that information. We see this daily in conversations we have with our fellow citizens. We even saw at the Oct 20, 2019 Carlsbad Planning Commission meeting that the Planning Commission was unaware of the planning mistakes at Ponto. How can a decision body of the City make a decision without knowing about these prior 'planning mistakes' facts that surround what they are being asked to decide on? Repeatedly since 2017 Carlsbad citizens and People for Ponto have asked the City to fully acknowledge the City's prior flawed planning at Ponto, and to correct that with ether maintaining the Existing LCP Non-residential Reserve Land Use or restarting the Coastal Planning at Ponto with a true and accurately informed Community-based Coastal Planning process consistent with Section 30006.

We request the City during the DLCPA Public Review period broadly and publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCP and other "planning efforts" public participation processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park, and 1) provide a truly honest public participation process on that disclosure consistent with CCA Section 30006 as part of the Draft LCP Amendment process or 2) retain the Existing LCP Non-residential Reserve Land Use and require a comprehensive and honest community-based redo of Coastal Resource planning at Ponto.

3. City fully and publicly reply to and the City Council consider the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process: Lance Schulte on 1/23/20 received an email reply by the City to his follow-up email regarding the status of the 11/20/19 citizen concerns/requests public comments and letters presented to the Planning Commission. This is appreciated, however it is request that the City fully publicly reply to the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process and present the to the City Council 11/20/19 citizen concerns/requests so the City Council can consider them and provide any direction to City Staff. City Staff first presented a summary presentation of the proposed Draft LCP Amendment to the Carlsbad Planning Commission on November 20, 2019, and indicated the public comment period would close on November in less than 2-weeks. Citizens and citizen groups provided public testimony to the Planning Commission, both verbally and in two written letters. The CCC was copied on those letters. The testimony and letters noted significant concerns about the City's proposed LCP Amendment process and made three requests:
- Disclose and provide a publically accessible 'Redline Version' of the Existing 2016/Proposed LCP land use Plan and Policies so everyone can see the proposed changes to the Existing LCP.
  - Provide true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern or objections. Citizen Workshops, when done right, are valuable means to openly educate, discuss and work to consensus options. These areas, including Ponto, were/are subject to multiple lawsuits, so true open and honest public workshops would provide an opportunity to openly and honestly discuss the issues and hopefully build public consensus/support for solutions. This approach seems consistent with CCA Section 30006, and common sense.
  - Extend the public comment period 6-months to allow Citizen Review of the Redline Version of the LCPA and allow time for Citizen Workshops.

The City did extend the Public Review period 2-months over the holidays to January 31, 2020. This is appreciated although many think this is inadequate given the significance of the Proposed Land Use Plan Amendments, and lack of Redline Version to compare. The City and their consultants required several extra years beyond schedule prepare the proposed LCP Amendments. The extra years of City Staff work reflects on the volume of the over 500-pages in the documents and the time needed to understand the Existing LCP and then create an Amended LCP. Citizens need sufficient time, proper comparative tools (redline) and a process (workshops) to understand the proposed LCP Amendments that is reflective of extensive extra time needed by City Staff and consultants needed. Truncation of lay public review to a few months for an Amendment that took paid professionals many years to produce seems a more than a bit inappropriate. The City appears to be rejecting citizens' request to be provided a 'Redline Version' of the Existing 2016/Proposed LCP land use Plan. So public review comments will tainted or will miss many issues due having to manually cross-reference a 150-page Existing LCP LUP with a Proposed 350-page Proposed LCP LUP. There will be unknown and unconsidered changes in the Draft LCP Amendment that the public and city and CCC decision makers will not know about due to the lack of 'Redline Version'.

The City also appears to reject citizen requests for true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern – such as Ponto. Like Coastal Recreation issue #1 above the following citizen requests appear consistent with CA Coastal Act (CCA) Section 30006, and the City's rejection of that requests seem counter to the CA Coastal Act.

We again request of the City to provide: 1) a 'Redline Version' to the public and decision makers, along with sufficient time to review and comment on the 'Redline Version'; and 2) true Citizen Workshops for Ponto and the

other last remaining significant vacant Coastal lands in Carlsbad as part of the Draft LCP Amendment process, or as part of deferred LCP Amendment process for those areas.

4. Coastal Zoned land is precious: the very small amount of remaining vacant Coastal land should be reserved for “High-Priority” Coastal Recreation Land Uses under the CA Coastal Act to provide for the growing and forever ‘Buildout’ needs of Carlsbad and CA Citizens, and our visitors.
  - Less than 1.8% (76 square miles) of San Diego County’s 4,207 square miles is in Coastal Zone. This small area needs to provide for all the forever Coastal needs of the County, State of CA, and Visitors. Upland Coastal Recreation (Coastal Park) land use is needed to provide land to migrate the projected/planned loss of “High-Priority” Coastal Recreation land uses due to Sea Level Rise impacts. There is only 76 miles of total coastline in San Diego County; a significant amount is publicly inaccessible military/industrial land. So how the last few portions of Coastal Land within Carlsbad (which is about 8% of San Diego County’s Coastline) is planned for the forever needs for High-Coastal-Priority Recreation Land Use is critical for Carlsbad, San Diego, and California Statewide needs into the future.
  - Most all the developable Coastal land in Carlsbad is already developed with Low-Coastal-Priority residential uses. Only a very small percentage of Carlsbad’s developable Coastal land, maybe 1-2%, is still vacant. This last tiny portion of fragment of vacant developable Coastal Land should be documented in the Draft LCP and reserved for “High-Priority” Coastal Land uses – most critically Coastal Recreation – to address the growing Coastal Recreation needs from a growing population and visitors. These growing needs are all the more critical in that existing Coastal Recreation lands will be decreasing due to inundation and erosion due to DLCPA planned Sea Level Rise.
  - This image of the western half of San Diego County graphically shows (in the blue line) the very small Coastal Zone Area that needs to provide the Carlsbad’s and California’s Coastal Recreational needs for all San Diego County residents and Visitors:

We request that 1) the amount and location of remaining vacant Coastal land in Carlsbad be documented and mapped and be reserved for high-priority Coastal Land Uses consistent with CCA Goals in Section 30001.5 “... (c) ... **maximize public recreational opportunities in the coastal zone** consistent with sound resources conservation principles and constitutionally protected rights of private property owners. (d) **Assure priority for coastal-dependent and coastal-related development over other development on the coast.** ...”; 2). This data be used in the City’s analysis and the public’s review and discussion about the City’s proposed Draft ‘Buildout’ Land Use Plan. The City’s proposed Draft ‘Buildout’ Land Use Plan will forever lock in the amount “maximum public recreational opportunities in the coastal zone” and will be the final Coastal Land Use Plan that is supposed to “assure priority for coastal-dependent and coastal-related development over other development on the coast”. Most of Carlsbad’s Coastal Zone is already developed or committed to low-priority land uses contrary to these CCA Goals, so how we finally and forever plan to use of the last small remaining vacant Coastal Land is very important.

5. The proposed Draft LCP Amendment in Chapter 3 makes unfounded statements regarding the proposed Amendment to the LCP Land Use Plan provision of “High-Priority” Coastal Recreation land use: On page 3-3, at the beginning of the Chapter 3 – Recreation and Visitor Serving Uses the City correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation uses, and cites multiple CCA Sections to that effect. The City’s proposed Coastal Land Use Plan then states on page 3-5 that a high proportion of land in the City is dedicated open

space available for passive and active use, yet provides no justification or accurate metric to support this statement. This is a critical unsubstantiated and speculative statement that is not supported by any comparative data (justifying the “high proportion” statement). The City later in Chapter 3 compared the adjoining cities of Oceanside and Encinitas to try to show how the proposed Draft LCP LUP Amendment provides higher levels of Visitor Serving Accommodations. That ‘non-common denominator’ comparison was fundamentally flawed, as noted in a prior separate Draft LCPA public review comment from People for Ponto regarding another high-priority Coastal land use (visitor accommodations) planned for in Chapter 3, but at least it was an attempt to compare. However, for the Coastal Recreation portion of Chapter 3, the City does not even attempt to provide any comparative data to support (or justify) the proposed Coastal Recreation Land Use Plan and statements. The Coastal Recreation Chapter also fails to disclose Carlsbad’s adopted City Park Master Plan (Park Service Area and Equity map) data that shows a clear conflict between the CA Coastal Act Policy Sections noted at the beginning of Chapter 3 and Chapter 3’s proposed Draft Coastal Recreation Land Use Plan.

Comparative Coastal Recreation: Comparing the Land Use Plan and policies of Oceanside, Carlsbad and Encinitas, one finds Carlsbad’s proposed Coastal Recreational Plan and Policies are not “high”, but very low compared with Oceanside and Encinitas. Carlsbad has a General Plan Park Standard of 3 acres of City Park per 1,000 Population. Oceanside has a 5 acres of City Park Standard per 1,000 population, and Encinitas has a 15 acres per 1,000 population standard, and an in-lieu park fee requirement of 5 acres per 1,000 population. Carlsbad’s proposed Coastal Recreation Land Use Plan is in fact not ‘high’ but is in fact the lowest of the three cities, with Carlsbad providing only 40% of Oceanside’s park standard, and only 20% of Encinitas’s Park Standard. Citywide Carlsbad currently has 2.47 acres of developed park per 1,000 population, Oceanside currently has 3.6 acres of developed park per 1,000 population, and Encinitas currently has 5.5 acres of developed park per 1,000 population. Although this data is citywide, it shows Carlsbad’s current amount of developed parkland is less than 70% of what Oceanside currently provides, and less than 45% of what Encinitas currently provides. Carlsbad is not currently providing, nor proposing a Coastal Land Use Plan to provide, a ‘high’ proportion of Coastal Recreation Land Use compared to Oceanside and Encinitas.

On page 3-5 Carlsbad may be misrepresenting city open space that is needed and used for the preservation of federally endangered species habitats and lagoon water bodies. This open space Land cannot be Used for Coastal Recreation purposes; and in fact Land Use regulations prohibit public access and Recreational Use on these Lands and water bodies to protect those endangered land and water habitats. 78% of Carlsbad’s open space is “open space for the preservation of natural resources” and cannot be used for Coastal Parks and Recreational use. Although “open space for the preservation of natural resources” does provide scenic or visual amenity, and this amenity is addressed as a different coastal resource. Visual open space is not Coastal Recreation Land Use. It appears Carlsbad is proposing in the Draft LCP Amendment to continue to, providing a ‘low’ percentage of Coastal Park Land Use and Coastal Recreation Land Use compared to adjoining cities.

In addition to the comparatively low amount of Coastal Park land Carlsbad plans for, Carlsbad scores very poorly regarding the equitable and fair distribution and accessibility of Coastal Parks and Coastal Recreation Land Uses. Both the City of Oceanside and Encinitas have very robust and detailed Park and Land Use plans to promote an equitable distribution of, and good non-vehicular accessibility, to their Coastal Parks. By comparison, Carlsbad’s park land use plan scores poorly, as exemplified in Ponto and South Carlsbad. Ponto’s existing population requires about 6.6 acres of City Parkland per Carlsbad’s low 3 acres per 1,000 population standard. Yet the nearest City Park is several miles away and takes over 50 minutes to walk along major arterial roadways and across Interstate 5 to access. As such this nearest park is not an accessible park for Ponto children, and thus Ponto children have to play in

however it more accurately illustrated in the following data/image from the adopted Carlsbad Park Master Plan's "Service Area Maps (Equity Maps)". The image below titled 'No Coastal Park in South Carlsbad' shows Carlsbad's adopted "Park Service Area Maps (Equity Maps)" from the City's Park Master Plan that says it maps "the population being served by that park type/facility." The added text to the image is data regarding park inequity and disparity in South Carlsbad. The image compiles Carlsbad's adopted Park "Park Service Area Maps (Equity Maps)" for Community Parks and Special Use Area Parks that are the City's two park acreage types produced by the City's comparatively low standard of 3 acre of City Park per 1,000 population. The City's Park Service Area Maps (Equity Maps) shows areas and populations served by parks within the blue and red circles. City data clearly shows large areas of overlapping Park Service (areas/populations served by multiple parks) in North Carlsbad and also shows large areas in South Carlsbad with No Park Service (areas/populations unserved by any parks) and Park Inequity in South Carlsbad. It clearly shows the City's Documented Park Need and Park inequity at Ponto. The Existing LCP LUP for Ponto's Planning Area F in is required to "consider" and "document" the need for a "Public Park". The City's adopted Park Service Area Maps (Equity Maps) clearly shows the inequity of Coastal City Park between North and South Carlsbad, and the need for Coastal Parks in South Carlsbad – particularly at Ponto. The City's proposed Draft 'Buildout' Coastal Recreation Land Use Plan instead proposes to lock-in documented City Public Coastal Park inequity and unserved Coastal Park demand at Ponto and South Carlsbad forever. It does so by proposing the last vacant undeveloped/unplanned Coastal land – Ponto Planning Area F - in the unserved Ponto and South Carlsbad coastline areas instead of being planned for much needed City Park and Coastal Recreation use be converted to even more low-priority residential and general commercial land uses. These 'low-priority' residential uses, by the way, further increase City Park and Coastal Recreation demand and inequity in Coastal South Carlsbad. This is wrong, and a proposed 'forever-buildout' wrong at the most basic and fundamental levels. The proposed Draft Coastal Recreation Land Use Plan by NOT providing documented needed City parks for vast areas of Coastal South Carlsbad is inconsistent with the CA Coastal Act policies and Existing LCP LUP requirements for Ponto Planning Area F; and also inconsistent with fair/equitable/commonsense land use and park planning principles, inconsistent with CA Coastal Commission social justice goals, inconsistent with social equity, inconsistent with VMT reduction requirements, and inconsistent with common fairness. A different Coastal Recreation Land Use Plan should be provided that provides for a socially equitable distribution of Coastal Park resources so as to would allow children, the elderly and those without cars to access Coastal Parks. The proposed Draft 'Buildout' Coastal Recreation Land Use Plan forever locking in the unfair distribution of City Parks appears a violation of the not only CCA Sections 30213, 30222, 30223, and 30252(6) but also the fundamental values and principles of the CA Coastal Act. The Draft also appears a violation of Carlsbad's Community Vision.

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

A different Coastal Recreation Land Use Plan is required to provide a more equitable distribution of City Parks with non-vehicular accessibility. Such a different plan would advance State and City requirements to reduce vehicle Miles Traveled (VMT) and greenhouse gas emissions that contribute to climate change and sea level rise impacts. Please note that the data for the above basic comparison comes from City of Carlsbad, Oceanside and Encinitas General Plan and Park Master Plan documents.

Data shows the proposed Coastal Recreation Plan conflicts with the CA Coastal Act policy Sections. As mentioned page 3-3 correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation Land Uses, and pages 3-5 list multiple CA Coastal Act (CCA) policy Sections that confirm this. However, given the significant statewide importance of Coastal Recreation Land Use, the City proposed 'Buildout' Coastal Recreation Land Use Plan does not appear to adequately address and implement these CCA Policies, and most noticeably in the Ponto area of South Carlsbad. Coastal Recreation is a significant Statewide High-Priority Land Use under the CCA. For a substantially developed non-coastal-industry city like Carlsbad Coastal Recreation is likely the biggest land use issue. This issue is even more elevated due to the fact that there are only a few small areas left of undeveloped Coastal land on which to provide Coastal Recreation, and Carlsbad is proposing a Coastal 'Buildout' Land Use Plan on those areas. The use of the last few remaining vacant portions of Coastal land for Coastal Recreation Land Use is the most important land use consideration in the proposed Draft LCP Land Use Plan Amendment as population and visitor growth will increase demands for Coastal Recreation. It is thus very surprising, and disturbing that the proposed Coastal Recreation Land Use Plan is so short, lacks any comparative and demand projection data, lacks any resource demand/distribution and social equity data, and lacks any rational and clear connection with CCA Policy and the proposed 'Buildout' Coastal Land Use plan. This is all the more troubling given that:

- The Ponto area represents the last significant vacant undeveloped/unplanned land near the coast in South Carlsbad that can provide a meaningful Coastal Park.
- The fact that the City's Existing LCP requires the city consider and document the need for a "i.e. Public Park" on Ponto's Planning Area F prior to the City proposing a change of Planning Area F's "Non-residential

Reserve” land use designation. The City has repeatedly failed to comply with this LCP LUP requirement, and worse has repeatedly failed to honestly inform citizens of this LCP LUP requirement at planning Area F before it granted any land use. The City, apparently implementing speculative developer wishes, has repeatedly proposed changing Planning Area F’s Coastal Land Use designation to “low-priority” residential and general commercial land uses without publically disclosing and following the Existing LCP LUP.

- The City’s currently developed parks in the southern portion of the City do not meet the city’s comparatively low public park standard of only 3 acres per 1,000 population. Since 2012 there has been City park acreage shortfall in both SW and SE Carlsbad.
- The Existing population of Ponto (west of I-5 and south of Poinsettia Lane) requires about 6.6 acres of Public Park based on the City’s comparatively low public park standard of 3 acres per 1,000 population. There is no Public Park in Ponto. Adding more population at Ponto will increase this current park demand/supply disparity.
- Carlsbad and other citizens have since 2017 expressed to the City the strong need for a Coastal Park at Ponto, and requested the City to provide a true citizen-based planning process to consider the Public Park need at Ponto. The Citizens’ requested process is fully in-line with CCA Goals, Public Participation Policy, Land Use Policies, and the Existing LCP Land Use Plan/requirements for Planning Area F and is the most appropriate means to consider and document the need for a Public Park at Ponto as required by the Existing LCP Land Use Plan.
- Planning Area F is for sale, and a non-profit citizens group has made an offer to purchase Planning Area F for a much needed Coastal Park for both Ponto and inland South Carlsbad residents and visitors. How should these facts be considered by the City and CCC?
- Carlsbad has no Coastal Parks west of I-5 and the railroad corridor for the entire southern half of Carlsbad’s 7-mile coastline.
- The southern half of Carlsbad’s coastline is 5.7% of the entire San Diego County coastline and represents a significant portion of regional coastline without a meaningful Coastal Park west of I-5 and the Railroad corridor.
- The City’s proposed Coastal Recreation Land Use Plan provides No Documentation, No Rational, and No Supporting or Comparative Data to show the proposed Coastal Recreation Land Use Plan in fact complies with the CA Coastal Act.

6. There is no Coastal Recreation/Park west of interstate 5 for all South Carlsbad, or half of the entire City. This is an obviously unfair and inequitable distribution of Coastal Recreation/Park resources that should be corrected by changes to the Draft LCP Land Use Amendment: The following image (which was sent to the City and CCC on several prior communications) was first requested by former Carlsbad Councilman Michael Schumacher during a People for Ponto presentation/request at the Oct 23, 2018 City Council meeting. The data compiled in the image shows how the South Coastal Carlsbad (Ponto) is not served by a Park per the City’s adopted Parks Master Plan. The blue dots on the map are park locations and blue circle(s) show the City’s Park Master Plan adopted Park Service Areas and Park Equity. This data, from pages 87-88 of the City of Carlsbad Parks Master Plan, shows all City Parks (both Community Parks and Special Use Areas in Coastal Carlsbad (except Aviara Park east of Poinsettia Park and west of Alga Norte Park). The text on the left margin identifies the South Carlsbad Coastal Park (west of I-5) gap along with the number of South Carlsbad Citizens (over half the City’s population) without a Coastal Park. The left margin also identifies more local issues for the over 2,000 Ponto area adults and children. For Ponto residents the nearest Public Park and City proposed ‘solution’ to the South Carlsbad and Ponto Public Park deficit are miles away over high-speed/traffic roadways and thus somewhat hazardous to access and effectively unusable by children/the elderly or

those without cars. Having been a 20-year resident of Ponto I regularly see our children have to play in the street as there are no Public Park with large open fields to play at within a safe and under 1-hour walk away. Ponto citizens have submitted public comments regarding this condition and the lack of a Park at Ponto

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

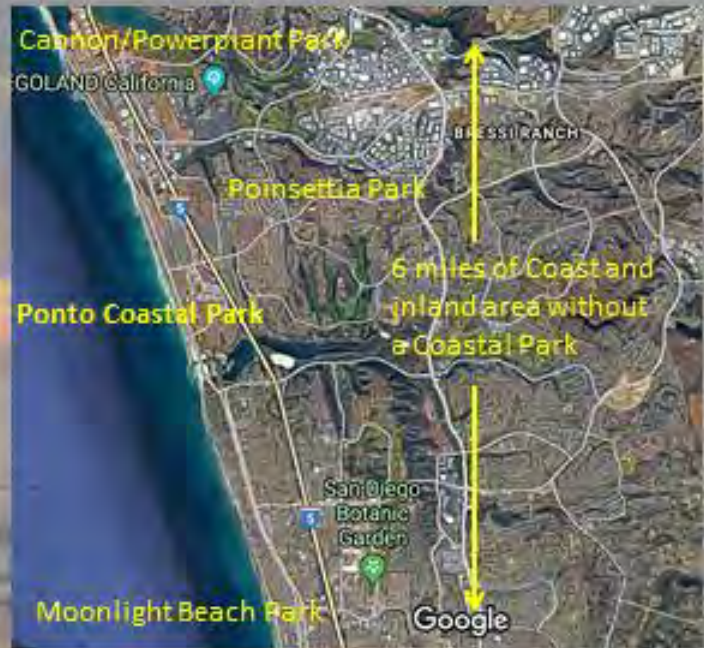

Ponto is at the center of regional 6-mile Coastal Park Gap. A Coastal Park in this instance being a Public Park with practical green play space and a reasonable connection with the Coast (i.e. located west of the regional rail and Interstate-5 corridors). The following image shows this larger regional Coastal Park Gap centered on the Ponto Area, and the nearest Coastal Parks – Cannon Park to the north, and Moonlight Park to the south.

Regionally this image shows Ponto is the last remaining significant vacant Coastal land that could accommodate a Coastal Park to serve the Coastal Park current needs of over existing 2,000 Ponto residents, 64,000 existing South Carlsbad residents, and a larger regional population. It is also the only area to serve the Coastal Park needs for the thousands of hotel rooms in Upland Visitor Accommodations in South Carlsbad.

# How Ponto Serves Region

- Ponto is in the middle of the regional Coastal Park Gap
- A Ponto Coastal Park fills a critical 6 mile gap of coastline without a Coastal Park - 8.6% of SD County coastline
- A Ponto Coastal Park Serves over 26,000 homes & 64,000 citizens just in South Carlsbad without a Coastal Park
- Serves many more people outside Carlsbad

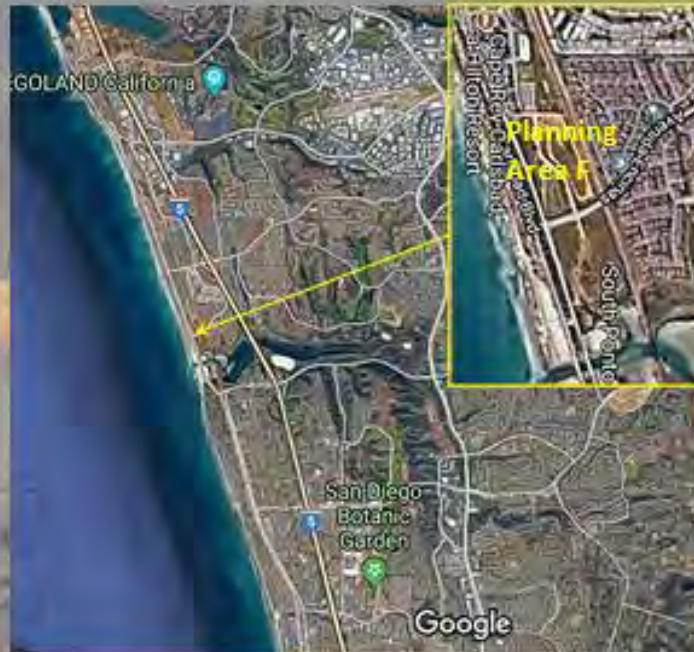

As People for Ponto first uncovered and then communicated in 2017 to the City and CCC; Carlsbad's Existing (since 1994) Local Coastal Program LUP currently states (on page 101) that Ponto's Planning Area F: carries a Non-Residential Reserve (NRR) General Plan designation. Carlsbad's Existing Local Coastal Program Land Use Plan states: "Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an "unplanned" area ..." and requires that: "... **As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.**" CA Coastal Commission actions, Carlsbad Public Records Requests 2017-260, 261, and 262, and 11/20/19 City Planner statements confirm the City never fully communicated to Carlsbad Citizens the existence of this LCP requirement nor did the City comply with the requirements. Of deep concern is that the City is now (as several times in the past) still not honestly disclosing to citizens and implementing this Existing LCP requirement as a true and authentic 'planning effort'. The lack of open public disclosure and apparent fear of true public workshops and Public Comment about the Existing Planning Area F LCP requirements are troubling. The point of a 'planning effort' is to openly and publically present data, publically discuss and explore possibilities/opportunities, and help build consensus on the best planning options. Citizens are concerned the city has already made up its mind and there is no real "planning effort" in the proposed Draft LCP Amendment process, just a brief Staff Report and at the end provide citizens 3-minutes to comment on the proposal. This is not the proper way to treat the last remaining significant vacant land in South Carlsbad that will forever determine the Coastal Recreation environment for generations of Carlsbad and California citizens and visitors to come.

The following data/images show how Ponto is in the center of the 6-mile (west of I-5 and Railroad corridor) regional Coastal Park gap. Ponto is the last remaining vacant and currently "unplanned" Coastal land that is available to address this regional Coastal Park Gap.

## How Ponto Serves Region cont.

- **Relieves Coastal Park congestion** in North Carlsbad, Encinitas and Solana Beach
- Area currently needs Coastal Park as seen by:
  - Ponto Beach parking congestion
  - current trespass use of Planning Area F as a Park
- **6.6 acre portion of Planning Area F** addresses SW Quad City Park deficit

## How Ponto Serves Region cont.

- A Ponto Park helps address 2050 and beyond Regional Population and Visitor Growth demands for Coastal Parks
- A Ponto Park provides the lowest-cost coastal access and recreation opportunities for CA citizens and visitors

## How Ponto Serves Region cont.

- Vital park and open space amenity for Visitor serving businesses and accommodations
- 6.6 acre unique City Coastal Park venue to stage special events: Runs, bike rides, triathlons, sports, coastal festivals, etc.

## How Ponto Serves Region cont.

- Critical Park space for So. Carlsbad State Beach Campground
- Provides a big training and staging space for Junior lifeguards
- Dog walk trail

# Ponto Coastal Park Concept

- A concept – but shows potential recreational opportunities
- Provides **vital parkland support for beach & open play fields**
- Concept plan a gift from San Pacifico Community Association

One possible Concept image of a potential Ponto Coastal Park at Planning Area F is illustrated below. The potential for a Ponto Coastal Park is real. The speculative land investment fund (Lone Star Fund #5 USA L.P. and Bermuda L.P.) that currently owns Planning Area F is selling the property, and is available for the City of Carlsbad to acquire to address the documented demand/need for a City Park and City Park inequity at Ponto and in Coastal South Carlsbad. A Ponto Beachfront Park 501c3 is working to acquire donations to help purchase the site for a Park. These situations and opportunities should be publicly discussed as part of the City Staff's proposed Local Coastal Program Land Use Plan Amendment.

Concept – detailed park planning once a park site

7. Projected increases in California, San Diego County and Carlsbad population and visitor growth increases the demand for High-Priority-Coastal Recreation land use:
- Increasing Citizen demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

San Diego County Citizen Population - Source: SANDAG Preliminary 2050 Regional Growth Forecast

1980	1,861,846
1990	2,498,016
2000	2,813,833
2010	3,095,313
2020	3,535,000 = 46,500 Citizens per mile of San Diego County coastline
2030	3,870,000
2040	4,163,688
2050	4,384,867 = 57,700 Citizens per mile of San Diego County coastline

2020 to 2050 = 24% increase in San Diego County population.

Citizen Population will continue beyond 2050. Carlsbad may plan for 'Buildout' in 2050, but what is San Diego County's 'Buildout'? There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for this growing population. If we do not increase our supply of Coastal Recreational Resources for these increased demands our Coastal Recreation Resources will become more overcrowded, deteriorated and ultimately diminish the Coastal Recreation quality of life for Citizens of Carlsbad and California. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5) and there is No Coastal Park in all of South Carlsbad to address the Coastal Recreation needs of the 64,000 South Carlsbad Citizens.

- Increasing Visitor demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

Yearly Visitors to San Diego County – source: *San Diego Tourism Authority; San Diego Travel Forecast, Dec, 2017*

2016	34,900,000
2017	34,900,000
2018	35,300,000
2019	35,900,000
2020	36,500,000 = average 100,000 visitors per day, or 2.83% of County’s Population per day, or 1,316 Visitors/coastal mile/day in 2020
2021	37,100,000
2022	37,700,000

This is growth at about a 1.6% per year increase in visitors. Projecting this Visitor growth rate from 2020 to 2050 results in a 61% or 22,265,000 increase in Visitors in 2050 to:

2050	58,765,000 = average 161,000 visitors per day, or 3.67% of the County’s projected 2050 Population per day, or 2,120 Visitors/coastal mile/day in 2050.
------	--

The number of Visitors is likely to increase beyond the year 2050. There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for these projected 2050 61% increase, and beyond 2050, increases in Visitor demand for Coastal Recreational Resources. Increasing Coastal Recreation land is a vital and critically supporting Land Use and vital amenity for California’s, the San Diego Region’s and Carlsbad’s Visitor Serving Industry. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5). There are thousands of hotel rooms in South Carlsbad that have NO Coastal Park to go to in South Carlsbad. This needs correcting as both a Coastal Act and also a City economic sustainability imperative.

- We request that the as part of the public’s review, the City Staff proposed Draft LCP Amendment to the Land Use Plan clearly document if and/or how future forever ‘Buildout’ City, Regional and Statewide population and visitor population demand for Coastal Recreation and City Coastal Parks are adequately provided for both in amount and locational distribution in the Carlsbad proposed Amendment of the LCP Land Use Plan.

8. Carlsbad’s Draft Local Coastal Program Land Use Plan Amendment says it plans to a year 2050 buildout of the Coastal Zone. The Draft Local Coastal Program Land Use Plan Amendment then is the last opportunity to create a Coastal Land Use Plan to provide “High-Priority” Coastal Recreation Land Use, and will forever impact future generations of California, San Diego County, and Carlsbad Citizens and Visitors:

- The Draft LCPA indicates in 2008 only 9% of All Carlsbad was vacant land. Less is vacant now in 2019. Carlsbad’s Coastal Zone is 37% of the City, so vacant unconstrained land suitable for providing Coastal Recreation is likely only 3-4%. The prior request for a full documentation of the remaining vacant Coastal lands will provide a better understanding needed to begin to make the final ‘buildout’ Coastal Land Use Plan for Carlsbad. The Draft LCPA does not indicate the amount and locations of currently vacant unconstrained Coastal Land in Carlsbad. This final limited vacant land resource should be clearly documented and mapped in the DLCPA as it represents the real focus of the DLCPA – the Coastal Plan for these remaingn undeveloped

lands. These last remaining vacant lands should be primarily used to provide for and equitably distribute “High-Priority” Coastal Recreation Land Uses consistent with CCA Sections:

- i. Section 30212.5 “... Wherever appropriate and feasible, public facilities, including parking areas or facilities, **shall be distributed throughout an area so as to mitigate against the impacts, social and otherwise, of overcrowding or overuse by the public of any single area.**”;
- ii. Section 30213 “... **Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...**”;
- iii. Section 30222 “**The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development,** but not over agriculture or coastal-dependent industry.”
- iv. Section 30223 “**Upland areas necessary to support coastal recreational uses shall be reserved for such uses, where feasible**” ,
- v. Section 30251 ... The location and amount of new development should maintain and enhance public access to the coast by ... 6) assuring that the recreational needs of new residents will not overload nearby coastal recreation areas by **correlating the amount of development with local park acquisition** and development plans with the provision of onsite recreational facilities to serve the new development”

Adopted City Park Service Area and Park Equity maps discussed earlier document the proposed Draft LCP Amendment’s inconstancy with the above CCA Policy Sections. The locations and small amounts remaining vacant Coastal lands provide the last opportunities to correct the inconsistencies of City proposed Draft “buildout” LCP Land Use Plan Amendment with these Coastal Act Policies.

Currently and since 1996 there has been LCP LUP Policy/regulations for Ponto Planning Area F that require consideration of a “Public Park” prior to changing the existing “unplanned Non-residential Reserve” Land Use designation. A map and data base of vacant developable Coastal land should be provided as part of the Draft LCPA and the Draft LCPA. This map and data base should document the projected/planned loss of Coastal land use due to Sea Level Rise. Draft LCPA projects Sea Level Rise will eliminate several beaches and High-Priority Coastal Land Uses like Coastal Lagoon Trails and the Campground.

- The LCP Land Use Plan should plan and reserve the very limited vacant developable Coastal land for the long-term ‘Buildout’ needs of “High-Priority” Coastal Recreation Land Use. Vacant developable Coastal land is too scarce to be squandered for “low-priority” uses. Sea Level Rise will reduce “High-Priority” Coastal Uses. So how vacant developable Upland area should be preserved for “High-Priority” Coastal Uses is a key requirement to be fully documented and discussed in the Draft LCPA. If not one of two things will eventually happen 1) any new Coastal Park land will require very expensive purchase and demolition of buildings or public facilities to create any new Coastal Park land to meet existing and growing demand; or 2) Coastal Recreation will be hemmed-in by “low-priority” uses and thus force Coastal Recreation to decrease and become increasingly concentrated and overcrowded in its current locations; and thus will promote the eventual deterioration of our current Coastal Recreation resources. A plan that fails to fix Coastal Park deficits and then increase Coastal Parks in pace with increased population/visitor demand is a plan that can

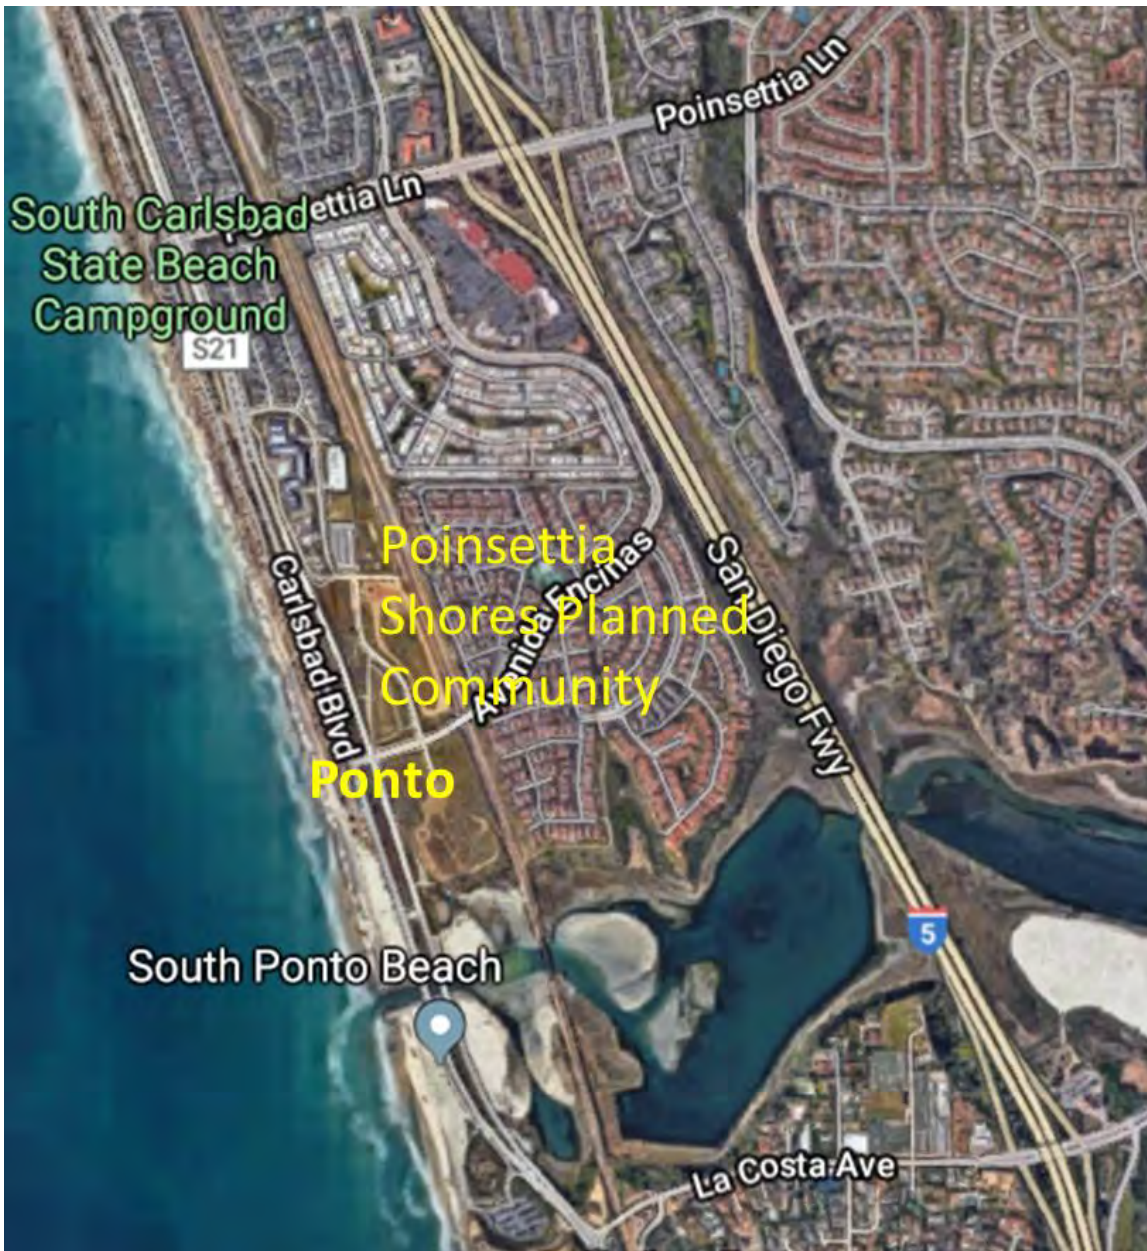

only result in degradation. How the Draft LCPA documents and addresses the land use planning of the last small portions of vacant developable Coastal land is critical for the future and future generations.

9. Citizens of South Carlsbad are concerned about the City's multiple prior flawed Ponto planning processes or 'mistakes' the City has made yet is basing the City Staff's proposed Draft LCP LUP. The concerns being the City is not openly and honestly communicating information to citizens and the public, and not allowing a reasonable and appropriate community-based planning process to address the documented Park, Coastal Recreation and unconstrained open space needs in South Carlsbad. One of these groups of citizens has created a [www.peopleforponto.com](http://www.peopleforponto.com) website to try to research and compile information and hopefully provide a better means for citizens to understand facts and then express their concerns/desires to the City of Carlsbad (City) and CA Coastal Commission (CCC). Over 2,000 emails have sent to the City and CCC regarding Coastal Land Use Planning Issues at Ponto. The San Pacifico Planned Community (i.e. San Pacifico Community Association) has also, since 2015, sent numerous emailed letters to the City and CCC noting the significant concerns about changes in Coastal planning the City is proposing for our Planned Community.

Repeatedly over 90% of surveyed citizens (results emailed prior to both the City and CCC) have expressed the vital need and desire for a Coastal Park at Ponto to serve the current and future Coastal Recreation needs for all both Ponto and South Carlsbad and for larger regional and State Coastal Recreational needs. This desire is supported by data, CA Coastal Act Policy, and also Carlsbad's Community Vision – the foundation for the City's General Plan. Ponto is the last remaining vacant Coastal area available to provide for those needs in South Carlsbad and for a regional 6-mile stretch of coastline. Citizens have expressed deep concern about the City's flawed prior Coastal planning efforts for Coastal Recreation at Ponto, including two repeated LCP Amendment "mistakes" (Ponto Beachfront Village Vision Plan in 2010 and General Plan Update in 2015) when the City twice failed to publicly disclose/discuss and then follow the Existing LCP requirements at Ponto – specifically for Planning Area F. People for Ponto had to use multiple Carlsbad Public Records Requests in 2017 to find these "mistakes". CCC Staff was helpful in both confirming the City "mistakes" and communicating back to the City. As citizens we are still unclear as to how/why these two repeated "mistakes" happened. There is citizen concern that the City is again repeating these two prior "mistakes" by not at the beginning of the Public Comment Period clearly and publicly disclosing the Planning Area F LCP requirements to citizens as part of the current LCP Amendment process, and also by not implementing the existing LCP requirement PRIOR to proposing an Amended Coastal Land Use Plan for Ponto. The City in its proposed LCP Amendment process is putting-the-cart-before-the-horse with respect to honest and open consideration, documentation and public discussion of the need for high-priority Coastal Recreation land use required of Planning Area F at Ponto. The City is also not clearly letting all Carlsbad citizens know about the Existing LCP requirements for Ponto's Planning Area F so they can be informed to reasonably participate in public review and comment regarding amending that LCP requirement, and the need for Coastal Recreation land uses in South Carlsbad. Since 2017 there has been repeated citizen requests to the City (copies were provided to the CCC) to fix these multiple fundamental/foundational flaws by in the City's prior Coastal Recreation and Public Parks and Open Space at planning, and the currently Proposed Draft LCP Land Use Plan Amendment. Since 2017 there have also been repeated citizen requests to the City to provide a truly open, honest, inclusive community-based planning process and workshops with the accurate and honest information, prior to forming a proposed Draft LCP Land Use Plan Amendment. As citizens we believe we can constructively work with the City and CCC towards a consensus or viable options on these important Coastal Recreation issues if the City allows and encourages such an open, honest and inclusive process. We request the City respond to the requests submitted to the City since 2017, and again request such a process from the City before any LCP Amendment is first considered by the Planning Commission and City Council. Such a requested process benefits all.

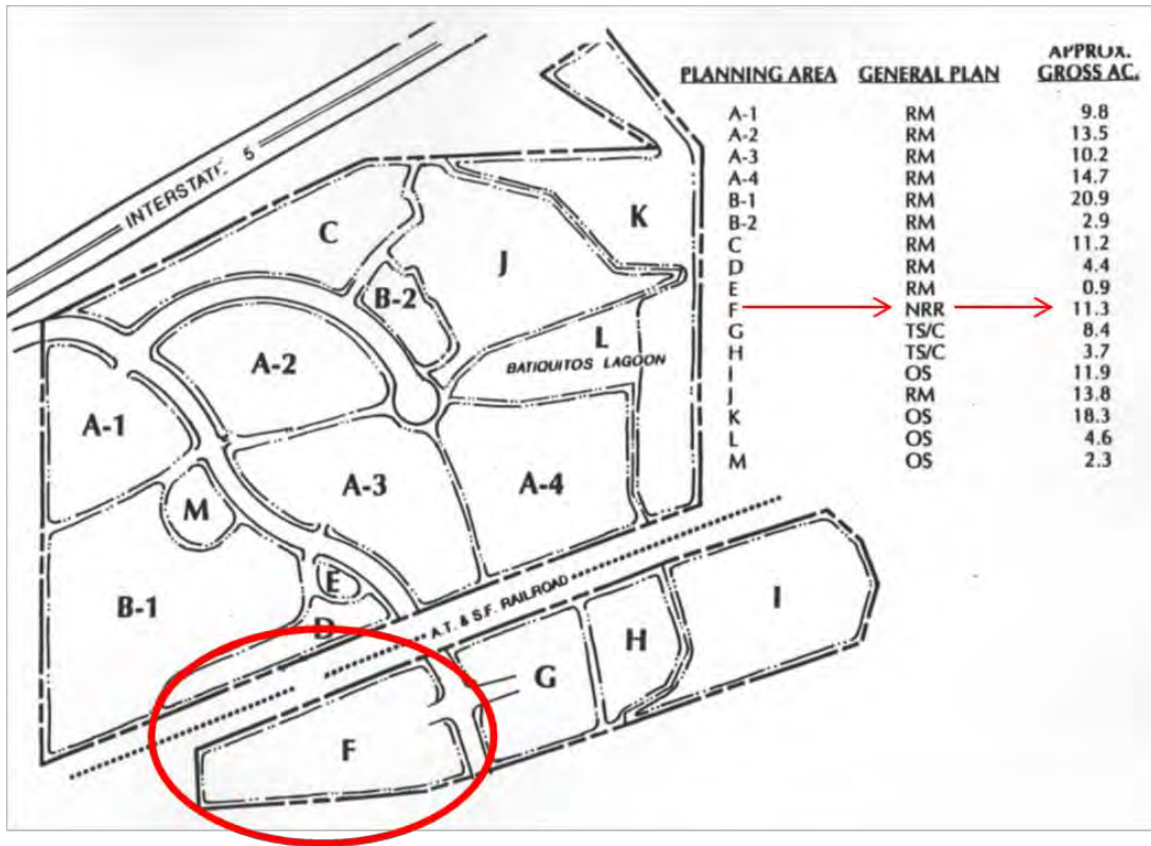

10. Why the Draft LCPA Land Use Plan for Ponto should provide for the current and future Coastal Park and Recreation needs for South Carlsbad, the San Diego Region and California.

- Ponto, is one of last remaining vacant and undeveloped Coastal lands in North County
- Ponto is the last remaining undeveloped Coastal land in South Carlsbad
- Ponto has the last unplanned Planning Area of the Existing Poinsettia Shores Planned Community & Local Coastal Program that can be planned for high-priority Coastal Recreation land use. This Existing LCP requires Planning Area F be considered for a “Public Park”.
- Following is a map of the Ponto area in South Carlsbad:

Following is the LCP Land Use map from the Existing Poinsettia Shores Master Plan & Local Coastal Program adopted in 1996. This is the Land Use map that the City is proposing to change in the proposed LCP Amendment to the Land Use Plan. As the Existing LCP Land Use map shows most all the land is ‘low-priority’ residential use at an RM Residential medium density, a small portion is ‘high-priority’ Visitor Serving TC/C Tourist Commercial. Most all the

Open Space is constrained and undevelopable land (the steep CSS habitat bluffs above Batiquitos Lagoon) or water (the lagoon water). This land/water is owned by the State of California, like the inner lagoon east of I-5. Only Planning Area M at 2.3 acres is unconstrained Open Space and it provides a small private internal recreation facility for the approximately 450 homes and 1,000 people in the Planned Community. This small recreation area is a City requirement for ‘planned developments’ to off-set loss open space from planned development impacts on housing quality. Planned developments can propose designs that reduce normal setback and open space areas – they bunch together buildings to increase development – such as the smaller lot sizes, and extensive use of “zero-setbacks” to reduce typical lot sizes that occurs at Poinsettia Shores. A private recreation facility in any of the City’s planned developments is never considered a replacement for required City Parks. Planned Developments, like unplanned developments, are required to dedicate Park land to the City, or pay a Park In-Lieu fee to the City so the City provide the developer’s obligation to provide City Park acreage to address the population increase of their proposed planned development. For Poinsettia Shores’ population the City’s minimum City Park Standard would require developers set aside 3 acres of City Park land for local park needs. For the larger Ponto area population about 6.6 acres of City Park Land is required. The Existing LCP reserves Planning Area F as an unplanned “Non-residential Reserve” Land Use until the Public Park needs for Ponto are considered and documented. Only then can the NRR land use be changed.

11. Developers have overbuilt in the Ponto area of the Coastal Zone. The City of Carlsbad has under questionable circumstances is currently choosing to ‘exempted’ Ponto developers from providing the minimum amount of unconstrained Open Space according to the City’s developer required Open Space Public Facilities Standard. The legality of these confusing circumstances is subject to a lawsuit against the City. However the City’s computerize mapping system has documented that the Ponto area of the Coastal Zone is missing about 30-acres of Unconstrained Open Space that can be used to fulfill the City’s Open Space Performance Standard that states that

15% of unconstrained and developable land must be preserved by developers as Open Space. Following is a summary of data from the City data regarding the missing Open Space at Ponto (Local Facility Management Plan Zone 9, LFMP Zone 9) in the Coastal Zone pursuant to the City's Open Space Performance Standard. If it is desirable People for Ponto can provide the City GIS map and parcel-by-parcel data base on which the following summary is based:

City of Carlsbad GIS data calculations of Open Space at Ponto area of Coastal Zone:

472 Acres = Total land in LFMP Zone 9 [Ponto area] per City of Carlsbad GIS data

(197 Acres) = Constrained land/water/infrastructure that is excluded from the City's Open Space Standard

275 Acres = Unconstrained land in LFMP Zone 9 (Ponto) subject to the City's Open Space Standard

X 15% = Minimum unconstrained Open Space requirement per the City Open Space Standard

41 Acres = Minimum unconstrained Open Space required in LFMP Zone 9

(11 Acres) = Actual unconstrained Open Space provided & mapped by City in LFMP Zone 9

**30 Acres = Missing unconstrained Open Space needed in LFMP Zone 9 [Ponto area of Coastal Zone] to meet the City's minimum GMP Open Space Standard. 73% of the required Open Space Standard is missing.**

Thus the Ponto area of the Coastal Zone appears overdeveloped with 30 additional acres of "low-priority" residential land uses due to developers' non-compliance to the City's Open Space Public Facility Performance Standard's Minimum developer required Open Space requirement. As noted a citizens group has a pending lawsuit with the City over the City's current 'exempting' Ponto and future developers from meeting the Open Space Standard.

12. The prior pre-1996 LCP for Ponto – the Batiquitos Lagoon Educational Park Master Plan & LCP (BLEP MP/LCP) had significant Open Space and recreational areas. These significant Open Space and Recreational areas were removed with BLEP MP/LCP's replacement in 1996 by the currently existing Poinsettia Shores Master & LCP (PSMP/LCP) and its City Zoning and LCP LUP requirements that reserved Planning Area F with the current "Non-residential Reserve" Land Use designation. Since the BLEP MP/LCP it appears developers and the City of Carlsbad have worked to remove "High-Priority" Coastal land uses (i.e. Coastal Recreation and Park uses) out of the Ponto area and replaced them with more "low-priority" residential and general commercial land uses. For example:

- Planning Area F used to be designated "Visitor Serving Commercial" as part of the original 1980's BLEP MP/LCP for Ponto.
- In 1996 the BLEP MP LCP was changed by developer application to the now current PSMP LCP, and the LCP LUP designation changed from "Visitor Serving Commercial" to "Non-Residential Reserve" with the requirement to study and document the need for "High-Priority" Coastal Recreation (i.e. Public Park) and/or Low-cost visitor accommodations prior to any change to Planning Area F's "Non-residential Reserve" LCP land use.
- In 2005 the City started to try to change Planning Area F to low-priority residential and general commercial land use in the City's Ponto Beachfront Village Vision Plan (PBVVP). At this time the City made its first documented Coastal 'planning mistake' by not disclosing to the public the existence of Planning Area F's LCP requirements and then also not following those LCP requirements. The City's planning process seemed focused on addressing developer's land use desires, and increasing land use intensity to boost "Tax-increment financing" as the City had established a Redevelopment Project Area at Ponto. A short time after the State of CA dissolved Redevelopment Agencies due in part to such abuses by cities. The CCC formally rejected the PBVVP in 2010, citing the City's failure to follow the LCP requirements for Planning Area F.

- Five years later in 2015 the City again adopted a proposed General Plan Update to again change Planning Area F to low-priority residential and general commercial land use. The General Plan Update cited the City's PBVVP that was in fact rejected by the CCC only a few years before. The City again repeated their PBVVP's Coastal land use 'planning mistake' by again not disclosing to the public the existence of Planning Area F's LCP requirements and then not following those LCP requirements. It is unclear why the City did this only 5-years after the CCC specifically rejected the Ponto Beachfront Village Vision Plan for those same reasons.
- In 2017 citizens found and then confirmed these Ponto Coastal 'planning mistakes' by the City through multiple official Carlsbad Public Records Requests and CCC Staff confirmation. The CCC readily identified the mistakes, but the City's 2019 proposed Draft LCP Land Use Plan and planning process still has yet fully disclose these prior Coastal 'planning mistakes' to ALL citizens of Carlsbad - the failure to disclose and follow the Planning Area F LCP LUP and City Zoning requirements. Full City disclosure is needed now to try to correct many years of City misrepresentation to citizens on LCP required Coastal land Use planning at Ponto. It is needed now so the public is aware at the start of the Public Comment Period. In 2017 citizens began asking the City fix the City's over 12-years of misinformation and planning mistakes by 'restarting' Coastal land use planning at Ponto with an open and honest community-based Coastal planning process. These citizens' requests have been rejected.
- In 2019 the City Staff proposed citywide Draft LCP land Use Plan Amendment that again proposed to change Planning Area F to "low-priority" residential and general commercial land use, without First disclosing the Planning Area F LCP requirements with corresponding analysis of the Need for Coastal Recreation (i.e. Public Park) and/or low-cost visitor accommodations at Planning Area F and providing that Documented analysis for public review/Consideration/comment. This seems like another 3<sup>rd</sup> repeat of the prior two Coastal planning mistakes by the City. In 2019, again citizens asked for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again the City rejected citizens' requests.
- In 2020 thousands of public requests again asked, and are currently asking, for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again these requests are being rejected. Based on the significant citizen concern and the documented prior 'planning mistakes' at Ponto it appears reasonable and responsible for Ponto's Planning Area F to ether:
  - i. Retain its current Existing LCP LUP land Use of "Non-Residential Reserve" until such time as the City's past Ponto Beachfront Village Vision Plan and General Plan Update planning mistakes and other issues subject to current planning lawsuits against the City are resolved with a true, honest and open community-based Coastal planning process asked for by citizens since 2017. Or
  - ii. Propose in the Draft LCP Land Use Plan Amendment to re-designated Planning Area F back to a Visitor Serving Commercial and Open Space ("i.e. Public Park") to provide both "High-Priory" coastal uses v. low-priority residential/general commercial uses due to the documented Coastal Recreation and Low-cost visitor accommodation needs for both citizens and visitors at Ponto and South Carlsbad.

13. Questionable logic and inconsistency in proposed Draft land use map and policies: Chapter 2 Figure 2-2B & C on pages 2-19 & 20 proposes to Amend the existing LCP Land Use Plan Map, and policies LCP-2-P.19 and 20 on pages 2-27 to 2-29 propose Amendments to existing LCP policy and create a new added layer of policy referencing a Ponto/Southern Waterfront. The proposed Land Use Map and Policies serve to firmly plan for "low-priority" residential and general commercial land uses at Ponto with a clear regulatory Land Use Plan Map showing these land uses and by specific regulatory policy (LCP-2-20) that clearly requires (by using the words "shall") these "low

priority” uses. In contrast the “High-Priority” Coastal Recreation and Coastal Park land uses that would be designated as Open Space are not mapped at all in Figure 2-2B & C; and the proposed policy LCP-2-P.19 is both misleading and specifically does Not Require any “High-Priority” Coastal Recreation and Coastal Park land Use at Ponto and South Carlsbad. In fact page 2-22 specifically indicates two “may” criteria that would first need to occur in the positive before any potential Coastal Recreation and Coastal Park Land could then theoretically even be possible. It is highly probable that it is already known by the City that the proposed relocation of Carlsbad Boulevard (Coast Highway) is not very feasible and not cost effective, and will not yield (due to environmental habitat constraints, narrowness of the roadway median, and other design constraints) any significant dimensions of land that could potentially be designated Open Space and realistically be used as a Park.

The blank outline map (Figure 2-2B & C) provides no mapped Open Space Land Use designation, other than for the currently existing State Campgrounds’ low-cost visitor accommodations, so the proposed Land Use Plan Map is Not providing/mapping any new Open Space land use to address Coastal Recreation and Coastal Park needs. The Draft LCP Land Use Plan Amendment’s proposed/projected/planned Sea Level Rise and associated coastal erosion appears to indicate that this “High-Priority” low-cost visitor accommodation (Campground) land use designated as Open Space will be reduced in the ‘Buildout’ condition due to coastal erosion. So **the Draft LCP Land Use Plan is actually planning for a Reduction in Open Space Land Use in South Carlsbad and Ponto.** Both the blank outline map and the proposed Land Use Map Figure 2-1 DO NOT clearly map and designate both South Carlsbad’s Draft LCP Planned Loss of the Open Space Land Use and also any New or replacement unconstrained land as Open Space land use for Coastal Recreation and Coastal Park. This is an internal inconsistency in Land Use Mapping that should be corrected in two ways:

- 1) Showing on all the Land Use (Figure 2-1), Special Planning Area (Figure 2-2B & C), and other Draft LCP Maps the Draft LCP’s planned loss of land area in those maps due to the Draft LCP’s planned loss of land due to Sea Level Rise and Coastal Land Erosion. This is required to show how land use boundaries and Coastal Recourses are planned to change over time. or
- 2) Provide detailed Land Use Constraint Maps for the current Carlsbad Boulevard right-of-way that the City “may” or ‘may not’ choose (per the proposed “may” LCP-2-P.19 policy) use to explore to address the City’s (Park Master Plan) documented Coastal Recreation and Coastal Park land use shortages in Coastal South Carlsbad and Ponto. Clearly showing the potential residual Unconstrained Land within a Carlsbad Boulevard relocation that have any potential possibility to add new Open Space Land Use Designations (for Coastal Recreation) is needed now to judge if the policy is even rational, or is it just a Trojan horse.

The proposed internal inconsistency in mapping and policy appears like a plan/policy ‘shell game’. The proposed Land Use Plan Maps and Policies should be consistent and equality committed (mapped-shall v. unmapped-may) to a feasible and actual Plan. If not then there is No real Plan.

There is no Regulatory Policy requirement in LCP-2-P.19 to even require the City to work on the two “may” criteria. The City could choose to bury the entire Carlsbad Boulevard relocation concept and be totally consistent with Policy LCP-2-P.19 and the LCP. As such the language on 2-22, Figure 2-2C (and the proposed Land Use Map), and policy LCP-2-P.19 and 20 appear conspire to create a shell game or bait-and-switch game in that only “low-priority” residential and general commercial uses are guaranteed (by “shall” policy) winners, and “high-priority” Coastal Recreation and Coastal Park Land Uses are at best a non-committal ‘long-shot’ (“may” policy) that the city is specifically not providing a way to ever define, or commit to implement. The proposed Draft LCP Land Use Plan Coastal Recreation and Coastal Park statements for Ponto are just words on paper that are designed to have no force, no commitment, no defined outcome, and no defined requirement to even have an outcome regarding the

documented “High-Priority” Coastal Recreation and Coastal Park needs at Ponto, Coastal South Carlsbad and the regional 6-mile Coastal Park gap centered around Ponto.

Policy LCP-2-P.19 falsely says it “promotes development of recreational use” but does not in fact do that. How is development of ‘recreational use promoted’ when the Use is both unmapped and no regulatory policy requirement and commitment (no “shall” statement) to ‘promote’ that Use is provided? Policy LCP-2-19.19 appears a misleading sham that does not ‘promote’ or require in any way “High-Priority” Coastal Recreation and Park Land Use at Ponto. There should be open and honest public workshops before the Draft LCP Amendment goes to its first public hearing to clearly define the major environmental constraints and cost estimates involving possible relocation of Carlsbad Boulevard and constructing needed beach access parking, and sufficient and safe sidewalks and bike paths along Carlsbad Boulevard; and then map the amount and dimensions of potential ‘excess land’ that maybe available for possible designation as Open Space in the City General Plan and Local Coastal Program. The City should not repeat the mistakes at the Carlsbad Municipal Golf Course (resulting in the most expensive to construct maniple course in the USA) by not defining and vetting the concept first. A preliminary review of City GIS data appears the amount, dimensions and locations of any potential ‘excess’ land maybe modest at best. However before the City proposes a ‘Buildout’ Coastal Land Use Plan this critical information should be clearly provided and considered. It is likely the City’s Carlsbad Boulevard relocation concept is unfeasible, inefficient, too costly, and yields too little actual useable ‘excess land’ to ever approach the Coastal Recreation and Coastal Park needs for South Carlsbad. This may already be known by the City, but it surely should be publicly disclosed and discussed in the DLPCA.

The proposed Coastal Land Use Plan to address Carlsbad’s, San Diego County’s and California’s High-Priority Coastal Recreation Land Use and Coastal Park needs should NOT be vague “may” policy that appears to be purposely designed/worded to not commit to actually providing any “High-Priority” Coastal Recreation and Coastal Park land uses on the map or in policy commitments. The Land Use Plan and Policy for High-Priority Coastal Recreation and Coastal Park Land Use should be definitive with triggered “shall” policy statements requiring and assuring that the ‘Forever’ “High-Priority” Coastal Recreation and Coastal Park needs are properly and timely addressed in the City’s proposed ‘Buildout’ Coastal Land Use Plan. This “shall” policy commitment should be clearly and consistently mapped to show the basic feasibility of the planned outcomes and the resulting actual Land that could feasibly implement the planned outcome.

Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard: Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard are Coastal Access and Completes Streets issues. South Carlsbad Boulevard now and has for decades been a highly used Incomplete Street that is out of compliance with the City’s minimum Street Standards for pedestrian and bike access and safety. The Coastal Access portion of the Draft Land Use Plan should strongly address the Complete Street requirements for South Carlsbad Boulevard. Those policy commitments should be reference in Policy LCP-2-P.19 and 20 as Carlsbad Boulevard in **South Carlsbad is the most Complete Street deficient portion of Carlsbad Boulevard**. Forever Coastal Access parking demand and the proposed LCP Amendment’s Land Use Plan to supply parking for those demands should also be addressed as part of the Coastal Access and Complete Streets issues for South Carlsbad Boulevard. If much needed Coastal Access Parking is provided on South Carlsbad Boulevard as part of a “maybe” implemented realignment, most of the “maybe” realignment land left after constraints are accommodated for and buffered will likely be consumed with these parking spaces and parking drive aisles/buffer area needed to separate high-speed vehicular traffic from parking, a buffered bike path, and a sufficiently wide pedestrian sidewalk or Coastal Path. After accommodating these much needed Complete Street facilitates there will likely be little if any sufficiently

dimensioned land available for a Coastal Recreation and a Coastal Park. The needed Coastal Access and Complete Street facilities on South Carlsbad Boulevard are very much needed, but they are NOT a Coastal Park.

As mentioned the proposed Draft Coastal Land Use Plan's Maps and Policies are very specific in providing for the City's proposed LCP Land Use changes to 'low-priority' Residential and General Commercial' on Planning Area F (proposed to be renamed to Area 1 and 2). It is curious as to why the proposed Draft LCP Land Use Plan Amendment has no Land Use Map and minor vague unaccountable Land Use Policy concerning 'High-priority Coastal Recreation Land Use' at Ponto, while the very same time proposing very clear Land Use Mapping and detailed unambiguous "shall" land use policy requirements for 'low-priority' Residential and General Commercial land use at Ponto. Why is the City Not committing and requiring (in a Land Use Map and Land Use Policy) to much needed 'High-priority' Coastal Recreation and Coastal Park Land Use' needs at Ponto the same detail and commitment as the City is providing for "low-priority" uses? This is backwards and inappropriate. It is all the more inappropriate given the 'Buildout' Coastal Land Use Plan the City is proposing at Ponto. These issues and plan/policy commitments and non-commitments will be 'forever' and should be fully and publicly evaluated as previously requested, or the Existing LCP Land Use Plan of "Non-residential Reserve" for Planning Area F should remain unchanged and until the forever-buildout Coastal Recreation and Coastal Park issues can be clearly, honestly and properly considered and accountably planned for. This is vitally important and seems to speak to the very heart of the CA Coastal Act, its founding and enduring principles, and its policies to maximize Coastal Recreation. People for Ponto and we believe many others, when they are aware of the issues, think the City and CA Coastal Commission should be taking a long-term perspective and be more careful, thorough, thoughtful, inclusive, and in the considerations of the City's proposal/request to permanently convert the last vacant unplanned (Non-residential Reserve) Coastal land at Ponto to "low-priority" land uses and forever eliminate any Coastal Recreation and Coastal Park opportunities.

14. Public Coastal View protection: Avenida Encinas is the only inland public access road and pedestrian sidewalk to access the Coast at Ponto for one mile in each direction north and south. It is also hosts the regional Coastal Rail Trail in 3' wide bike lanes. There exist now phenomenal coastal ocean views for the public along Avenida Encinas from the rail corridor bridge to Carlsbad Boulevard. It is assumed these existing expansive public views to the ocean will be mostly eliminated with any building development seaward or the Rail corridor. This is understandable, but an accountable ('shall') Land Use Plan/Policy addition to proposed Policy LCP-2-P.20 should be provided for a reasonable Public Coastal View corridor along both sides of Avenida Encinas and at the intersection with Carlsbad Boulevard. Public Coastal view analysis, building height-setback standards along Avenida Encinas, and building placement and site design and landscaping criteria in policy LCP-2-P.20 could also considered to reasonably provide for some residual public coastal view preservation.
  
15. Illogical landscape setback reductions proposed along Carlsbad Boulevard, and Undefined landscape setback along the Lagoon Bluff Top and rail corridor in Policy LCP-2-P.20: Logically setbacks are used in planning to provide a buffering separation of incompatible land uses/activities/habitats. The intent of the setback separation being to protect adjacent uses/activities/habitats from incompatibility, nuisance or harassment by providing a sufficient distance/area (i.e. setback) between uses/activities/habitats and for required urban design aesthetics – almost always a buffering landscaping. Policy LCP-2-P.20. A.4 and C.3 says the required 40' landscape setback along Carlsbad Boulevard "maybe reduced due to site constraints or protection of environmental resources." The ability to reduce the setback is illogical in that setbacks are intended to protect environmental resources and provide a buffer for constraints. In the Carlsbad Boulevard right-of-way there is documented sensitive environmental habitat, along with being a busy roadway. How could reducing the protective 40' setback in anyway better protect that habitat or provide a better landscaped compatibility or visual aesthesis buffer along Carlsbad Boulevard? It is

illogical. If anything the minimum 40' landscaped setback should likely be expanded near "environmental resources". Regarding reducing the minimum 40' landscape setback for "site constraints" there is no definition of what a "site constraint" is or why it (whatever it may be) justifies a reduction of the minimum landscaped setback. Is endangered species habitat, or a hazardous geologic feature, or a slope, or on-site infrastructure considered a "site constraint"? There should be some explanation of what a "site constraint" is and is not, and once defined if it warrants a landscape setback reduction to enhance the buffering purpose of a landscape setback. Or will a reduction only allow bringing the defined constraint closer to the adjacent uses/activities/habitats that the landscape setback is designed to buffer. It is good planning practice to not only be clear in the use of terms; but also, if a proposed reduction in a minimum standard is allowed, to define reasonably clear criteria for that reduction/modification and provide appropriate defined mitigation to assume the intended performance objectives of the minimum landscape setback are achieved.

Policy LCP-2-P.20.C.4 is missing a critical Bluff-Top landscape setback. It seems impossible that the DLCPA is proposing no Bluff-Top setback from the lagoon bluffs and sensitive habitat. The Batiqitos Lagoon's adjoining steep sensitive habitat slopes directly connect along the Bluff-top. Batiqitos Lagoon's and adjoining steep sensitive habitat is a sensitive habitat that requires significant setbacks as a buffer from development impacts. Setbacks similar to those required for the San Pacifico area inland of the rail corridor, should be provided unless updated information about habitat sensitivity or community aesthetics requires different setback requirements.

Policy LCP-2-P.20 does not include a landscape setback standard adjacent to the rail corridor. This is a significant national transportation corridor, part of the 2<sup>nd</sup> busiest rail corridor in the USA. Train travel along this corridor is planned to increase greatly in the years to come. Now there is significant noise, Diesel engine pollution, and extensive ground vibration due to train travel along the rail corridor. Long freight trains which currently run mostly at night and weekends are particularly noisy and heavy, and create significant ground vibration (underground noise). These issues are best mitigated by landscape setbacks and other buffers/barriers. A minimum setback standard for sufficient landscaping for a visual buffer and also factoring appropriate noise and ground vibration standards for a buildout situation should be used to establish an appropriate landscape setback that should be provided along the rail corridor. Carlsbad's landscape aesthetics along the rail corridor should be factored into how wide the setback should be and how landscaping should be provided. An example for the landscape aesthetic portion of the setback standard could be landscape design dimensions of the San Pacifico community on the inland side of the rail corridor. However, noise and vibrational impacts at San Pacifico are felt much further inland and appear to justify increased setbacks for those impacts.

**Subject:** RE: Tell us about parks & rec priorities at this week's meetings

Dear Carlsbad City Council and Parks Commission:

Sorry I am unable to attend the workshops. Following is my public input & data, and suggested questions the City should provide citizens in setting park land use policy and priorities:

A clear lesson from Covid is the need for flat wide open grassy parks that fully allow social distancing and multi-function park and recreation opportunities within a 10-minute walking distance to all neighborhoods. This fundamentally what city parks are intended to provide – flat wide-grassed-flat and fully useable multi-function spaces to recreate formally or informally, and being accessible by a short walk to all neighborhoods and children without having to drive a car to access.

Another clear lesson comes from new City and State parallel moves to demand unlimited population growth using higher density condo/apartment developments. These developments by definition pack more people into a smaller area thus creating an even greater need for parks. Making flat wide open grassy and fully useable parks even more important to be provided within a 10-minute walk.

Trails although nice to walk along in the outdoors force people into a 5-8 foot wide path that does not allow social distancing. A trail is not a park.

Carlsbad People for Ponto (P4P) Citizens have for years provided the City input on Parks and Recreation Priority issues from 2017 to less than 2-months ago, and to now. Since pre-Covid 2017 over about 5,000 written/verbal petitions and multiple budget processes have been provided. In an after-Covid situation, most recently in October 2021, about 700 written/verbal petitions and public testimony was provided. Carlsbad P4P Citizen input is based on documented City records. P4P Carlsbad Citizen input is/has been consistent with the above Covid observations and significant in the numbers of Citizens calling for a meaningful (i.e. usable wide, grassed multi-function) park at Ponto. The P4P Citizen input should be fully disclosed, discussed and accounted for in the Parks Master Plan.

P4P's 30-page October 15, 2021 "Coastal Recreation" data file to the City documented comparative park data that the City should fully present and discuss with Citizens as part of the Parks Master Plan. The comparative park data shows Carlsbad is below average nationally and significantly below our adjacent Cities in providing parks – and requiring Carlsbad developers provide parks for their developments. It also documents how over 112 acres, or over 33% of all existing/planned City parkland is constrained and unusable to humans to fully use as a park. Having over 33% of City Parks constrained and not fully useable a park for citizens is a significant city land use and parks master plan issue. The 30-pages of documented information and requests in the October 15, 2021 Coastal Recreation file should be a part of the park master plan process. Following are some key park data the City should present and key park priority questions on that data the City should ask citizens:

1. Carlsbad only requires developers to provide a comparatively low 3-acres of parkland per 1,000 population of Carlsbad developments. Encinitas and Oceanside require their developers to provide 5-acres per 1,000 population, which is over 60% more parkland than Carlsbad's City Council requires developers to provide.
  - a. Should Carlsbad require 60% less parkland than Encinitas and Oceanside?
  - b. Should Carlsbad require developers to provide the same 5-acres per 1,000 parkland as Encinitas and Oceanside?
2. Carlsbad does not plan for, or require developers, to provide parks within a 10-minute walk to homes. Both Encinitas and Oceanside require parks to be provided within a 10-minute walk of all homes in their Cities.
  - a. Should Carlsbad require parks to be within a 10-minute walk of homes like Encinitas and Oceanside?
  - b. Should Carlsbad require developers to provide their parkland requirement (3 or 5 acres/1,000 population) be within a 10-minute walk of homes the homes the developer builds like Encinitas and Oceanside?
3. Carlsbad is BELOW the national average in BOTH providing Parkland and in providing Parkland Within a 10-minutewalk to homes (see ,Trust for Public Land Park Score).
  - a. Should Carlsbad be below average nationally in providing Parkland?
  - b. Should Carlsbad provide Parkland to be in the top 10%, 20%, 30%, 40%, just average, or below average nationally? (select one)
  - c. Should Carlsbad be below average nationally in providing Parkland within a 10-minute walk to homes?
  - d. Should Carlsbad provide Parkland within a 10-minute walk of homes so as to be in the top 10%, 20%, 30%, 40%, just average, or below average nationally? (select one)
4. South Carlsbad composes 62% of Carlsbad's population, yet has no large grassy usable Coastal park (like a Holiday Park) and has 0-acers of park west of I-5.
  - a. Should 62% of Carlsbad's population have at least one large grassy and fully useable park?
  - b. Should South Carlsbad developers be required to correct this park inequity?
5. North Carlsbad composes 38% of Carlsbad's population, yet has 10 Coastal parks totaling over 35-acres west of I-5.
  - a. Should the City's planned park investments be re-prioritized to correlate the location of coastal park land acreage with population demand?
6. South Carlsbad developer fees paid to build and fund many North Carlsbad park acres in both Veterans Park and Poinsettia 61 Park.

- a. Should the City appropriately use those South Carlsbad developer fees paid to build Veterans Park and Poinsettia 61 Park to fund parks in South Carlsbad where the development and park demand from that development occurred?

Thank you for your consideration. We look forward to confirmation that years of P4P citizen input to the City on Park issues is being considered in your efforts.

## **Parks & Recreation Master Plan Meetings are this Week**

Don't forget to register for one of two virtual meetings we're holding this week to talk about whether COVID has changed parks and rec priorities.

Thursday, Dec. 9, 6 to 7 p.m.

[Register](#)

Saturday, Dec. 11, 10 to 11 a.m.

[Register](#)

The City of Carlsbad is creating an updated blueprint that will guide priorities and proposed investments in parks and recreation for the next five years. This project was interrupted due to the COVID-19 pandemic, and as the project starts back up, the city wants to know if the community's priorities have changed.

Community members are encouraged to attend one of the two virtual meetings to hear the public feedback that was provided in February 2020 and let the city know if anything has changed.

The city's existing Parks & Recreation Master Plan was completed in 2015. The update will cover:

- Assessment of current parks, facilities and recreational programs
- Demographic and industry trends
- Community needs and priorities
- Funding needs and revenue opportunities
- A five-year strategic action plan

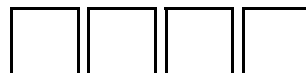

**Other input opportunities**

Input from the workshops will be used to create a survey questionnaire to obtain feedback from a statistically representative group of Carlsbad residents. The survey will also be available online to anyone who wants to take it; however, the results will be analyzed separately from the random sample.

A draft of the master plan will be made available for input by the end of summer 2022, with a final draft scheduled to be presented to the City Council for approval in fall of 2022.

Updated Pubic Comments Coastal Recreation submitted on Oct 12<sup>th</sup> 2021:

---

On 10/8/21 the Carlsbad City Council and CA Coastal Commission were emailed data from an Official Carlsbad Public Records Request (# R002393-092121) on the City of Carlsbad's past compliance/noncompliance with the currently exiting Mello II LCP Land Use Policies # 6-2, 6-4 & 6-10 Certified in the mid-1980s. The City's documents show:

- For Policy 6-2 the 200-300 acre Park called out in Policy 6-2 has been reduced to Veterans Park's 91.5 acres, of which only 54% or 49.5 acres is even useable as a Park. The City provided no documents on how a 200-300 acre park called for in Policy 6-4 is now only 49.5 useable acres.
- For Policy 6-4 there were no City documents were provided. There was no City Public discussion, consideration, or City compliance with Policy 6-4 since the mid-1980's.
- For Policy 6-10 concerns providing Low Cost Visitor Accommodations. Public Parks are the lowest cost (free) Visitor accommodating land use there is.

The 3 existing LCP Land Use Policies are important for Carlsbad, and California's, Coastal land use resources. There appears little to no discussion of the City's past apparent failure to implementation of these 3 LCP LUPs in the current City consideration of changes to the LCP.

Following is a copy of Public Records Request # R002393-092121: "Carlsbad's Local Coastal Program (LCP) for the Mello II Segment of Carlsbad's Coastal Zone has long established land use Policies 6-2, 6-4 & 6-10 that were adopted by Carlsbad and Certified by the CA Coastal Commission in the early/mid-1980's. Mello II LCP Policies 6-2, 6-4 & 6-10 are shown on page 86-87 of Carlsbad's 2016 compiled LCP and are:

- "POLICY 6-2 REGIONAL PARK: If the population of Carlsbad increases in accordance with SANDAG's projected Series V Population Forecasts, it is estimated that Carlsbad will need to develop a new regional park containing 200 to 300 acres in order to adequately serve the public. A location for a new regional park must, therefore, be established. Consideration should be given to a facility within the Aqua Hedionda Specific Plan Area, or adjacent lands. The Batiquitos Lagoon area should also be considered.
- POLICY 6-4 NEED FOR ADDITIONAL OVERNIGHT CAMPING: Additional overnight camping facilities, the main source of lower cost visitor and recreational facilities, are needed throughout the San Diego coastal region. Additional facilities of this kind should be provided in a regional park within the Carlsbad area. This can be accomplished in conjunction with an eventual Batiquitos Park, within the Aqua Hedionda Specific Plan Area, and/or along with the development of private recreational facilities.
- POLICY 6-10 LOWER COST VISITOR-SERVING RECREATIONAL USES: Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Encourage a range of affordability for overnight visitor accommodations. Evaluate the affordability of any new or redeveloped overnight visitor accommodations, including amenities that reduce the cost of stay. Mitigation may be applied to protect and encourage affordable overnight accommodations"

The public record request is to see documents of:

- City Staff reports, presentations and communications to the Carlsbad Planning and Parks Commissions, and City Council regarding the City’s consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies; and
- Carlsbad Planning and Parks Commissions, and City Council minutes, resolutions and ordinances documenting City of Carlsbad consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies.”

Updated Pubic Comments Coastal Recreation submitted on January 2021:

---

Over 11-months ago in a 1/29/20 1:56PM email People for Ponto Carlsbad citizens first provided the City of Carlsbad both data and comments on **14 critical Coastal Recreation issues (see pages 5-30 below)**. The data and the 14 critical issues do not seem to be receiving appropriate disclosure/presentation/discussion/consideration in the Dec 2, 2020 Staff Report to the Planning Commission. To assure the 26-pages of citizen data and requests in the 1/29/20 email was received by the Planning Commission the file was re-emailed on 12/22/20 12:24pm and specifically addressed to City Council, City Clerk, Planning Commission, Parks Commission, Housing Commission, HEAC, CA Coastal Commission, and CA HCD. As citizens we request each of these 14 data points (with supporting data) be honestly considered.

In reading the Dec 2 Staff Report citizens conducted additional analysis of City Park data. That research further reinforces and documents the 14 Critical Coastal Recreation issues and highlights the relatively poor amount of City Park and Coastal Recreation planned by Carlsbad’s Staff proposed Draft LCP-LUPA. We hope the City Council and City Commissions, and CA Coastal Commission & HCD will consider this additional analysis of City data and citizen input:

<u>Coastal Zone data</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>	<u>note or source</u>
Coastline miles	6.4	3.9	6.0	Carlsbad Draft LCPA 201, Google Maps
Coastal Zone Acres	9,219	1,460	7,845	& Oceanside & Encinitas LCPs
Coastal Zone Acres	100%	16%	85%	% relative to Carlsbad

City Park Standard data

City Park Standard	3	5	5	required park acres / 1,000 population
Park Standard %	100%	167%	167%	% is relative to Carlsbad

- Oceanside & Encinitas 'require' and plan for 67% MORE Parkland than Carlsbad
- Carlsbad 'requires' and plans for ONLY 60% as much Parkland as Oceanside & Encinitas
- Carlsbad only requires developers provide 60% of the parkland (or in-lieu fees) as Oceanside & Encinitas require
- Encinitas has a 'Goal' to provide 15 acres of Park land per 1,000 population

Developed City Park	2.47	3.65	5.5	acres / 1,000 population
Developed Park	100%	148%	223%	% is relative to Carlsbad

- Oceanside provides 48% MORE developed park land than Carlsbad
- Encinitas provide 123% MORE developed park land than Carlsbad
- Carlsbad ONLY provides 68% and 45% as much Parks as Oceanside & Encinitas respectively

National Recreation & Park Asso. Metric: a typical City provides 1 park / 2,281 pop. & 9.9 Park acres / 1,000 population

- Carlsbad (3 acre) Park Standard is ONLY 30% of what a typical City provides nationally
- Carlsbad requires developers to provide, 70% LESS Park acres than typical City provides nationally

National Recreation & Park Asso., Trust for Public Land, et. al.: 10 minute (1/2 mile) Walk to a Park Planning Goal

- Both Oceanside and Encinitas plan parks to be within a 10-minute (1/2 mile) walk to homes.
- Carlsbad DOES NOT plan Parks within walking distance to homes
- Carlsbad is NOT providing equitable and walking/biking access to Parks

Some Carlsbad Parks that are not fully useable as Parks:

<u>Existing Parks with Unusable Open Space acreage</u>	<u>total park acres</u>	<u>Unusable park acres</u>	<u>% of park unusable</u>	<u>reason unusable</u>
Alga Norte - SE quadrant	32.1	10.7	33%	1/3 of park is a Parking lot not a park In many other Carlsbad Parks a significant percentage of those Parks are consumed by paved parking lots and unusable as a Park.
Hidden Hills - NE quadrant	22.0	12.7	58%	city identified unusable habitat open space
La Costa Canyon SE quadrant	14.7	8.9	61%	city identified unusable habitat open space
Leo Carrillo - SE quadrant	27.4	16.5	60%	city identified unusable habitat open space
Poinsettia - SW quadrant	<u>41.2</u>	<u>11.1</u>	<u>27%</u>	city identified unusable habitat open space
Existing Park subtotal	137.4	59.9	44%	44% of these Parks are unusable as Parkland

Anticipated Future Park development projects

<u>Park - quadrant</u>				
Veterans - NW	91.5	49.5	54%	estimated unusable habitat open space
Cannon Lake - NW	6.8	3.4	50%	estimated unusable water open space
Zone 5 Park expansion - NW	9.3	0	0	appears 100% useable as a Park
Robertson Ranch - NE	<u>11.2</u>	<u>0</u>	<u>0</u>	appears 100% useable as a Park
Future park subtotal	118.8	52.9	45%	45% of Future Parks are unusable as Parks

**Unusable Open Space acres**

**in Existing & Future Parks**      256.2    112.8      44%      **112.8 acres or 44% is unusable as Parks**

- 112.8 acres or 44% of the Existing & Future Parks are unusable Open Space and can't be used as Parkland
- **Based on City's minimum 3-acres/1,000 population Park Standard, 112.8 acres of Unusable Parkland means 37,600 Carlsbad Citizens (or 32.5% of Carlsbad's current population of 112,877) will be denied Parkland that they can actually use as a Park.**
- 112.8 acres of Existing & Future unusable 'park' / 3 acre park standard x 1,000 population = 37,600 Carlsbad citizens without useable parkland per City minimum standard.
- **59.9 acres of Existing unusable 'park' / 3 acre park standard x 1,000 population = 19,967 Carlsbad citizens and their children are currently being denied useable park land. 19,967 is 17.7% of Carlsbad's current population.**
- In addition to these 19,967 existing citizens and their children denied park land, the City needs to develop additional Park acreage in the NE, SW and SE quadrants to cover current shortfalls in meeting in the minimal 3 acre/1,000 population park standard for the current populations in the NE, SW and SE quadrants.
- **The current NE, SW and SE quadrants park acreage shortfalls are in addition to the 19,967 Carlsbad citizens and their children that do not have the minimum 3 acres of parkland per 1,000 population**
- **Current FY 2018-19 MINIMUM park acreage shortfalls are listed below. They are:**
  - 4.3 acres for 1,433 people in NE quadrant,
  - 6.8 acres for 2,266 people in SW quadrant, and
  - 2.3 acres for 767 people in SE quadrant

Shortfall (excess) in  
Current Quadrant  
Park standard by

	population		Future Park		existing Park shortfalls are for NE, SW & SE quadrants
	acres	need	acres	%	
NW quadrant	(-14.2)	(-4,733)	107.6	91%	Current NW parks are 14.2 acres over min. standard & capacity for 4,733 more people at min. park standard. 91% of all Future City Parks are in NW quadrant
NE quadrant	4.3	1,433	11.2	9%	Future Park will exceed minimum NE park standard
SW quadrant	6.8	2,266	0	0%	No min. parks for 2,266 people in SW quad. Park deficit
SE quadrant	2.3	767	0	0%	No min. parks for 767 SE quadrant Park deficit

A Park Standard minimum is just a “Minimum”. City policy allows the City to buy/create parks above the City’s current 3 acre/1,000 pop. MINIMUM (and lowest) Park Standard of surrounding Coastal cities. Carlsbad already did this in the NW quadrant. It then added 3.1 more NW quadrant Park acres as part of the Poinsettia 61 Agreement. Poinsettia 61:

- converted 3.1 acres of NW City land planned/zoned for Residential use to Open Space Park land use/zoning,
- facilitated a developer building condos (increasing park demand) in the SW quadrant,
- required the SW Quadrant developer pay \$3 million to build the 3.1 acre NW quadrant park, and
- required the SW Quadrant developer pay to convert 3.1 acres of NW Quadrant & 5.7 acres of SW Quadrant City Park land to habitat that will be unusable as a City Park.

So Poinsettia 61 increased SW Quadrant development (that both increased SW Park Demand and expanded the current SW Quadrant Park deficit) while simultaneously using SW Quadrant development to pay for the conversion of 3.1 acres of residential land in the NW Quadrant to City Park (the NW Quadrant already has surplus park land per the City’s minimum standard).

People for Ponto strongly supports creating City Parks above the City’s current low 3-acre per 1,000 population minimum, as the City’s minimum standard is relatively low and substandard relative to other cities; many Carlsbad parks have significant acreage that is in fact ‘unusable’ as a park. Most importantly People for Ponto Citizens think it is very important to prioritize providing City Parks in areas of Park Inequity that are unserved by City Parks. However it seems very unfair to the SW Quadrant citizens to be so unserved and starved of the bare minimum of City Parks while at the same time funding City Parks in excess of City standard in other Quadrants.

The Poinsettia 61 illustrates a larger unfair (and dysfunctional) distribution of Quadrant based City Park demand and supply that is keenly evident in the demands/supply funding and location disparity of Veterans Park. Most all the development impact and park demand that paid Veterans Park fees came from the SW, SE and NE Quadrants yet the Veterans Park (supply) is not in those SW, SE and NE Quadrants. This inequity is counter to the implicit City requirement that City Parks be provided within the Quadrant of their Park demand. It is logical and proper that City Parks be provided and equitably distributed to be close to the development and population that generated the demand for that Park.

The City Park inequity at Ponto and in other Coastal areas of the City is counter to several CA Coastal Act policies; counter to good city planning and good CA Coastal planning; is highly detrimental to the City, City and CA citizens in the long-term; fails to properly distribute and match the location supply with the location of demand for Parks; and is counter to basic fundamental issues of fairness. Since 2017 People for Ponto has tried to get the City Council and City Staff to address this inequity, specifically at Ponto, and to do so in a way that embraces a true and honest Citizen-based planning process.

**Coastal Recreation:**

2. Request that the City as part of its Draft LCP Public Review process broadly-publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCPA processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park: This disclosure is needed to correct about 20 years of City misrepresentation to the public on the since 1996 and currently Existing LCP requirements at Ponto, and the City's prior planning mistakes at Ponto. Citizens have been falsely told by the City that all the Coastal planning at Ponto was done already and that the City followed its Existing LCP regarding the need for a park at Ponto, and that this is already decided and could not be reversed. This misinformation has fundamentally stifled public review and public participation regarding the Coastal Zone. City failure to provide such a broad-public disclosure on the documented prior, and apparently current proposed, "planning mistakes" would appear to violate the principles of Ca Coastal Act Section 30006. A broad-public disclosure would for the first time allow citizens to be accurately informed on the Existing LCP requirements at Ponto so they can provide informed public review and comment regarding the need for a Coastal Park in in this last vacant 'unplanned' area. The requested broad-public disclosure by the City of the City past mistakes and the Existing LCP requirements at Ponto is consistent with CA Coastal Act (CCA) "Section 30006 Legislative findings and declarations; public participation - The Legislature further finds and declares that **the public has a right to fully participate in decisions affecting coastal planning**, conservation and development; that achievement of **sound coastal conservation and development is dependent upon public understanding and support**; and that the continuing planning and implementation of **programs for coastal conservation and development should include the widest opportunity for public participation.**" The public cannot participate as outlined in CCA Section 30006 if past City 'mistakes' and misrepresentations on Coastal planning at Ponto go undisclosed to the public. If the public isn't fully informed about the 20-years of LCP planning mistakes at Ponto how could the public in the past (and now in the present) participate in the proposed LCP Amendment – **Public Participation as noted in Section 30006 above is the means to sound coastal conservation and development and is "... dependent upon public understanding ..."**. The City's past mistakes at Ponto need to be corrected by slightly different a Draft LCP Amendment process than currently outlined by the City; a new process is needed that clearly, opening and honestly informs and engages the public on the Existing LCP Ponto issues. The City's current Draft LCP Amendment process fails to follow CCA Section 30006 in that most all the citizens we encounter are as yet unaware of the City's Ponto mistakes and how they can participate in in the DLCPA process without that information. We see this daily in conversations we have with our fellow citizens. We even saw at the Oct 20, 2019 Carlsbad Planning Commission meeting that the Planning Commission was unaware of the planning mistakes at Ponto. How can a decision body of the City make a decision without knowing about these prior 'planning mistakes' facts that surround what they are being asked to decide on? Repeatedly since 2017 Carlsbad citizens and People for Ponto have asked the City to fully acknowledge the City's prior flawed planning at Ponto, and to correct that with ether maintaining the Existing LCP Non-residential Reserve Land Use or restarting the Coastal Planning at Ponto with a true and accurately informed Community-based Coastal Planning process consistent with Section 30006.

We request the City during the DLCPA Public Review period broadly and publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCP and other "planning efforts" public participation processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park, and 1) provide a truly honest public participation process on that disclosure consistent with CCA Section 30006 as part of the Draft LCP Amendment process or 2) retain the Existing LCP Non-residential Reserve Land Use and require a comprehensive and honest community-based redo of Coastal Resource planning at Ponto.

3. City fully and publicly reply to and the City Council consider the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process: Lance Schulte on 1/23/20 received an email reply by the City to his follow-up email regarding the status of the 11/20/19 citizen concerns/requests public comments and letters presented to the Planning Commission. This is appreciated, however it is request that the City fully publicly reply to the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process and present the to the City Council 11/20/19 citizen concerns/requests so the City Council can consider them and provide any direction to City Staff. City Staff first presented a summary presentation of the proposed Draft LCP Amendment to the Carlsbad Planning Commission on November 20, 2019, and indicated the public comment period would close on November in less than 2-weeks. Citizens and citizen groups provided public testimony to the Planning Commission, both verbally and in two written letters. The CCC was copied on those letters. The testimony and letters noted significant concerns about the City's proposed LCP Amendment process and made three requests:
- Disclose and provide a publically accessible 'Redline Version' of the Existing 2016/Proposed LCP land use Plan and Policies so everyone can see the proposed changes to the Existing LCP.
  - Provide true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern or objections. Citizen Workshops, when done right, are valuable means to openly educate, discuss and work to consensus options. These areas, including Ponto, were/are subject to multiple lawsuits, so true open and honest public workshops would provide an opportunity to openly and honestly discuss the issues and hopefully build public consensus/support for solutions. This approach seems consistent with CCA Section 30006, and common sense.
  - Extend the public comment period 6-months to allow Citizen Review of the Redline Version of the LCPA and allow time for Citizen Workshops.

The City did extend the Public Review period 2-months over the holidays to January 31, 2020. This is appreciated although many think this is inadequate given the significance of the Proposed Land Use Plan Amendments, and lack of Redline Version to compare. The City and their consultants required several extra years beyond schedule prepare the proposed LCP Amendments. The extra years of City Staff work reflects on the volume of the over 500-pages in the documents and the time needed to understand the Existing LCP and then create an Amended LCP. Citizens need sufficient time, proper comparative tools (redline) and a process (workshops) to understand the proposed LCP Amendments that is reflective of extensive extra time needed by City Staff and consultants needed. Truncation of lay public review to a few months for an Amendment that took paid professionals many years to produce seems a more than a bit inappropriate. The City appears to be rejecting citizens' request to be provided a 'Redline Version' of the Existing 2016/Proposed LCP land use Plan. So public review comments will tainted or will miss many issues due having to manually cross-reference a 150-page Existing LCP LUP with a Proposed 350-page Proposed LCP LUP. There will be unknown and unconsidered changes in the Draft LCP Amendment that the public and city and CCC decision makers will not know about due to the lack of 'Redline Version'.

The City also appears to reject citizen requests for true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern – such as Ponto. Like Coastal Recreation issue #1 above the following citizen requests appear consistent with CA Coastal Act (CCA) Section 30006, and the City's rejection of that requests seem counter to the CA Coastal Act.

We again request of the City to provide: 1) a 'Redline Version' to the public and decision makers, along with sufficient time to review and comment on the 'Redline Version'; and 2) true Citizen Workshops for Ponto and the

other last remaining significant vacant Coastal lands in Carlsbad as part of the Draft LCP Amendment process, or as part of deferred LCP Amendment process for those areas.

4. Coastal Zoned land is precious: the very small amount of remaining vacant Coastal land should be reserved for “High-Priority” Coastal Recreation Land Uses under the CA Coastal Act to provide for the growing and forever ‘Buildout’ needs of Carlsbad and CA Citizens, and our visitors.
  - Less than 1.8% (76 square miles) of San Diego County’s 4,207 square miles is in Coastal Zone. This small area needs to provide for all the forever Coastal needs of the County, State of CA, and Visitors. Upland Coastal Recreation (Coastal Park) land use is needed to provide land to migrate the projected/planned loss of “High-Priority” Coastal Recreation land uses due to Sea Level Rise impacts. There is only 76 miles of total coastline in San Diego County; a significant amount is publicly inaccessible military/industrial land. So how the last few portions of Coastal Land within Carlsbad (which is about 8% of San Diego County’s Coastline) is planned for the forever needs for High-Coastal-Priority Recreation Land Use is critical for Carlsbad, San Diego, and California Statewide needs into the future.
  - Most all the developable Coastal land in Carlsbad is already developed with Low-Coastal-Priority residential uses. Only a very small percentage of Carlsbad’s developable Coastal land, maybe 1-2%, is still vacant. This last tiny portion of fragment of vacant developable Coastal Land should be documented in the Draft LCP and reserved for “High-Priority” Coastal Land uses – most critically Coastal Recreation – to address the growing Coastal Recreation needs from a growing population and visitors. These growing needs are all the more critical in that existing Coastal Recreation lands will be decreasing due to inundation and erosion due to DLCPA planned Sea Level Rise.
  - This image of the western half of San Diego County graphically shows (in the blue line) the very small Coastal Zone Area that needs to provide the Carlsbad’s and California’s Coastal Recreational needs for all San Diego County residents and Visitors:

We request that 1) the amount and location of remaining vacant Coastal land in Carlsbad be documented and mapped and be reserved for high-priority Coastal Land Uses consistent with CCA Goals in Section 30001.5 “... (c) ... **maximize public recreational opportunities in the coastal zone** consistent with sound resources conservation principles and constitutionally protected rights of private property owners. (d) **Assure priority for coastal-dependent and coastal-related development over other development on the coast.** ...”; 2). This data be used in the City’s analysis and the public’s review and discussion about the City’s proposed Draft ‘Buildout’ Land Use Plan. The City’s proposed Draft ‘Buildout’ Land Use Plan will forever lock in the amount “maximum public recreational opportunities in the coastal zone” and will be the final Coastal Land Use Plan that is supposed to “assure priority for coastal-dependent and coastal-related development over other development on the coast”. Most of Carlsbad’s Coastal Zone is already developed or committed to low-priority land uses contrary to these CCA Goals, so how we finally and forever plan to use of the last small remaining vacant Coastal Land is very important.

5. The proposed Draft LCP Amendment in Chapter 3 makes unfounded statements regarding the proposed Amendment to the LCP Land Use Plan provision of “High-Priority” Coastal Recreation land use: On page 3-3, at the beginning of the Chapter 3 – Recreation and Visitor Serving Uses the City correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation uses, and cites multiple CCA Sections to that effect. The City’s proposed Coastal Land Use Plan then states on page 3-5 that a high proportion of land in the City is dedicated open

space available for passive and active use, yet provides no justification or accurate metric to support this statement. This is a critical unsubstantiated and speculative statement that is not supported by any comparative data (justifying the “high proportion” statement). The City later in Chapter 3 compared the adjoining cities of Oceanside and Encinitas to try to show how the proposed Draft LCP LUP Amendment provides higher levels of Visitor Serving Accommodations. That ‘non-common denominator’ comparison was fundamentally flawed, as noted in a prior separate Draft LCPA public review comment from People for Ponto regarding another high-priority Coastal land use (visitor accommodations) planned for in Chapter 3, but at least it was an attempt to compare. However, for the Coastal Recreation portion of Chapter 3, the City does not even attempt to provide any comparative data to support (or justify) the proposed Coastal Recreation Land Use Plan and statements. The Coastal Recreation Chapter also fails to disclose Carlsbad’s adopted City Park Master Plan (Park Service Area and Equity map) data that shows a clear conflict between the CA Coastal Act Policy Sections noted at the beginning of Chapter 3 and Chapter 3’s proposed Draft Coastal Recreation Land Use Plan.

Comparative Coastal Recreation: Comparing the Land Use Plan and policies of Oceanside, Carlsbad and Encinitas, one finds Carlsbad’s proposed Coastal Recreational Plan and Policies are not “high”, but very low compared with Oceanside and Encinitas. Carlsbad has a General Plan Park Standard of 3 acres of City Park per 1,000 Population. Oceanside has a 5 acres of City Park Standard per 1,000 population, and Encinitas has a 15 acres per 1,000 population standard, and an in-lieu park fee requirement of 5 acres per 1,000 population. Carlsbad’s proposed Coastal Recreation Land Use Plan is in fact not ‘high’ but is in fact the lowest of the three cities, with Carlsbad providing only 40% of Oceanside’s park standard, and only 20% of Encinitas’s Park Standard. Citywide Carlsbad currently has 2.47 acres of developed park per 1,000 population, Oceanside currently has 3.6 acres of developed park per 1,000 population, and Encinitas currently has 5.5 acres of developed park per 1,000 population. Although this data is citywide, it shows Carlsbad’s current amount of developed parkland is less than 70% of what Oceanside currently provides, and less than 45% of what Encinitas currently provides. Carlsbad is not currently providing, nor proposing a Coastal Land Use Plan to provide, a ‘high’ proportion of Coastal Recreation Land Use compared to Oceanside and Encinitas.

On page 3-5 Carlsbad may be misrepresenting city open space that is needed and used for the preservation of federally endangered species habitats and lagoon water bodies. This open space Land cannot be Used for Coastal Recreation purposes; and in fact Land Use regulations prohibit public access and Recreational Use on these Lands and water bodies to protect those endangered land and water habitats. 78% of Carlsbad’s open space is “open space for the preservation of natural resources” and cannot be used for Coastal Parks and Recreational use. Although “open space for the preservation of natural resources” does provide scenic or visual amenity, and this amenity is addressed as a different coastal resource. Visual open space is not Coastal Recreation Land Use. It appears Carlsbad is proposing in the Draft LCP Amendment to continue to, providing a ‘low’ percentage of Coastal Park Land Use and Coastal Recreation Land Use compared to adjoining cities.

In addition to the comparatively low amount of Coastal Park land Carlsbad plans for, Carlsbad scores very poorly regarding the equitable and fair distribution and accessibility of Coastal Parks and Coastal Recreation Land Uses. Both the City of Oceanside and Encinitas have very robust and detailed Park and Land Use plans to promote an equitable distribution of, and good non-vehicular accessibility, to their Coastal Parks. By comparison, Carlsbad’s park land use plan scores poorly, as exemplified in Ponto and South Carlsbad. Ponto’s existing population requires about 6.6 acres of City Parkland per Carlsbad’s low 3 acres per 1,000 population standard. Yet the nearest City Park is several miles away and takes over 50 minutes to walk along major arterial roadways and across Interstate 5 to access. As such this nearest park is not an accessible park for Ponto children, and thus Ponto children have to play in

our local streets to find a significantly large open area to play in. Ponto residents have to drive their kids to get to a park increasing VMT and GHG emissions. The City's proposed Coastal Recreation Land Use Plan 'solution' to Ponto's no-park condition, along with the City's need to add an additional 6.5 acres of new City parks in Southwest Carlsbad to comply with the Southwest Carlsbad's 2012 population demand (at a ratio of 3-acre/1,000 population) is to provide a City Park – Veterans Park – over 6-miles away from the Ponto and Southwest Carlsbad population need. This makes a bad situation worse. The City's proposed location is totally inaccessible to serve the needs of the population of children or anyone without a car, that it is intended to serve in South Carlsbad. This City proposed Coastal Recreation Land Use Plan 'solution' seems inappropriate and inconsistent with the CA Coastal Act and common sense. During the City's Veterans Park and budget community workshops citizens expressed a desire for a Ponto Park to be the solution to our Ponto and Southwest Carlsbad Park deficits. Those citizen requests were not apparently considered as part of the City's proposed Draft Coastal Recreation Land Use Plan. Following is an image summarizing the magnitude of citizen needs/desires expressed at the City's Budget workshop. Note the number and size of the text citing Ponto Park and South Carlsbad that reflects the number and magnitude/intensity of citizen workshop groups' input. The failure to acknowledge this public participation and data in the Coastal Recreation Land Use Plan Park seems in conflict with CCA Sections 30006 and 30252(6):

For South Carlsbad there is a complete lack of any existing or planned City Coastal Park and park acreage west of I-5, while North Carlsbad has 9 existing and 1 planned City Coastal Parks totaling 37.8 acres of City Coastal W of I-5 North Carlsbad. Not only is this unfair to South Carlsbad, it is also unfair to North Carlsbad as it increases VMT and parking impacts in North Carlsbad because South Carlsbad is not providing the City Coastal Parks for South Carlsbad resident/visitor demands. This City Park disparity is shown on Figure 3-1 of the Coastal Recreation Land Use Plan;

however it more accurately illustrated in the following data/image from the adopted Carlsbad Park Master Plan's "Service Area Maps (Equity Maps)". The image below titled 'No Coastal Park in South Carlsbad' shows Carlsbad's adopted "Park Service Area Maps (Equity Maps)" from the City's Park Master Plan that says it maps "the population being served by that park type/facility." The added text to the image is data regarding park inequity and disparity in South Carlsbad. The image compiles Carlsbad's adopted Park "Park Service Area Maps (Equity Maps)" for Community Parks and Special Use Area Parks that are the City's two park acreage types produced by the City's comparatively low standard of 3 acre of City Park per 1,000 population. The City's Park Service Area Maps (Equity Maps) shows areas and populations served by parks within the blue and red circles. City data clearly shows large areas of overlapping Park Service (areas/populations served by multiple parks) in North Carlsbad and also shows large areas in South Carlsbad with No Park Service (areas/populations unserved by any parks) and Park Inequity in South Carlsbad. It clearly shows the City's Documented Park Need and Park inequity at Ponto. The Existing LCP LUP for Ponto's Planning Area F in is required to "consider" and "document" the need for a "Public Park". The City's adopted Park Service Area Maps (Equity Maps) clearly shows the inequity of Coastal City Park between North and South Carlsbad, and the need for Coastal Parks in South Carlsbad – particularly at Ponto. The City's proposed Draft 'Buildout' Coastal Recreation Land Use Plan instead proposes to lock-in documented City Public Coastal Park inequity and unserved Coastal Park demand at Ponto and South Carlsbad forever. It does so by proposing the last vacant undeveloped/unplanned Coastal land – Ponto Planning Area F - in the unserved Ponto and South Carlsbad coastline areas instead of being planned for much needed City Park and Coastal Recreation use be converted to even more low-priority residential and general commercial land uses. These 'low-priority' residential uses, by the way, further increase City Park and Coastal Recreation demand and inequity in Coastal South Carlsbad. This is wrong, and a proposed 'forever-buildout' wrong at the most basic and fundamental levels. The proposed Draft Coastal Recreation Land Use Plan by NOT providing documented needed City parks for vast areas of Coastal South Carlsbad is inconsistent with the CA Coastal Act policies and Existing LCP LUP requirements for Ponto Planning Area F; and also inconsistent with fair/equitable/commonsense land use and park planning principles, inconsistent with CA Coastal Commission social justice goals, inconsistent with social equity, inconsistent with VMT reduction requirements, and inconsistent with common fairness. A different Coastal Recreation Land Use Plan should be provided that provides for a socially equitable distribution of Coastal Park resources so as to would allow children, the elderly and those without cars to access Coastal Parks. The proposed Draft 'Buildout' Coastal Recreation Land Use Plan forever locking in the unfair distribution of City Parks appears a violation of the not only CCA Sections 30213, 30222, 30223, and 30252(6) but also the fundamental values and principles of the CA Coastal Act. The Draft also appears a violation of Carlsbad's Community Vision.

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

A different Coastal Recreation Land Use Plan is required to provide a more equitable distribution of City Parks with non-vehicular accessibility. Such a different plan would advance State and City requirements to reduce vehicle Miles Traveled (VMT) and greenhouse gas emissions that contribute to climate change and sea level rise impacts. Please note that the data for the above basic comparison comes from City of Carlsbad, Oceanside and Encinitas General Plan and Park Master Plan documents.

Data shows the proposed Coastal Recreation Plan conflicts with the CA Coastal Act policy Sections. As mentioned page 3-3 correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation Land Uses, and pages 3-5 list multiple CA Coastal Act (CCA) policy Sections that confirm this. However, given the significant statewide importance of Coastal Recreation Land Use, the City proposed 'Buildout' Coastal Recreation Land Use Plan does not appear to adequately address and implement these CCA Policies, and most noticeably in the Ponto area of South Carlsbad. Coastal Recreation is a significant Statewide High-Priority Land Use under the CCA. For a substantially developed non-coastal-industry city like Carlsbad Coastal Recreation is likely the biggest land use issue. This issue is even more elevated due to the fact that there are only a few small areas left of undeveloped Coastal land on which to provide Coastal Recreation, and Carlsbad is proposing a Coastal 'Buildout' Land Use Plan on those areas. The use of the last few remaining vacant portions of Coastal land for Coastal Recreation Land Use is the most important land use consideration in the proposed Draft LCP Land Use Plan Amendment as population and visitor growth will increase demands for Coastal Recreation. It is thus very surprising, and disturbing that the proposed Coastal Recreation Land Use Plan is so short, lacks any comparative and demand projection data, lacks any resource demand/distribution and social equity data, and lacks any rational and clear connection with CCA Policy and the proposed 'Buildout' Coastal Land Use plan. This is all the more troubling given that:

- The Ponto area represents the last significant vacant undeveloped/unplanned land near the coast in South Carlsbad that can provide a meaningful Coastal Park.
- The fact that the City's Existing LCP requires the city consider and document the need for a "i.e. Public Park" on Ponto's Planning Area F prior to the City proposing a change of Planning Area F's "Non-residential

Reserve” land use designation. The City has repeatedly failed to comply with this LCP LUP requirement, and worse has repeatedly failed to honestly inform citizens of this LCP LUP requirement at planning Area F before it granted any land use. The City, apparently implementing speculative developer wishes, has repeatedly proposed changing Planning Area F’s Coastal Land Use designation to “low-priority” residential and general commercial land uses without publically disclosing and following the Existing LCP LUP.

- The City’s currently developed parks in the southern portion of the City do not meet the city’s comparatively low public park standard of only 3 acres per 1,000 population. Since 2012 there has been City park acreage shortfall in both SW and SE Carlsbad.
- The Existing population of Ponto (west of I-5 and south of Poinsettia Lane) requires about 6.6 acres of Public Park based on the City’s comparatively low public park standard of 3 acres per 1,000 population. There is no Public Park in Ponto. Adding more population at Ponto will increase this current park demand/supply disparity.
- Carlsbad and other citizens have since 2017 expressed to the City the strong need for a Coastal Park at Ponto, and requested the City to provide a true citizen-based planning process to consider the Public Park need at Ponto. The Citizens’ requested process is fully in-line with CCA Goals, Public Participation Policy, Land Use Policies, and the Existing LCP Land Use Plan/requirements for Planning Area F and is the most appropriate means to consider and document the need for a Public Park at Ponto as required by the Existing LCP Land Use Plan.
- Planning Area F is for sale, and a non-profit citizens group has made an offer to purchase Planning Area F for a much needed Coastal Park for both Ponto and inland South Carlsbad residents and visitors. How should these facts be considered by the City and CCC?
- Carlsbad has no Coastal Parks west of I-5 and the railroad corridor for the entire southern half of Carlsbad’s 7-mile coastline.
- The southern half of Carlsbad’s coastline is 5.7% of the entire San Diego County coastline and represents a significant portion of regional coastline without a meaningful Coastal Park west of I-5 and the Railroad corridor.
- The City’s proposed Coastal Recreation Land Use Plan provides No Documentation, No Rational, and No Supporting or Comparative Data to show the proposed Coastal Recreation Land Use Plan in fact complies with the CA Coastal Act.

6. There is no Coastal Recreation/Park west of interstate 5 for all South Carlsbad, or half of the entire City. This is an obviously unfair and inequitable distribution of Coastal Recreation/Park resources that should be corrected by changes to the Draft LCP Land Use Amendment: The following image (which was sent to the City and CCC on several prior communications) was first requested by former Carlsbad Councilman Michael Schumacher during a People for Ponto presentation/request at the Oct 23, 2018 City Council meeting. The data compiled in the image shows how the South Coastal Carlsbad (Ponto) is not served by a Park per the City’s adopted Parks Master Plan. The blue dots on the map are park locations and blue circle(s) show the City’s Park Master Plan adopted Park Service Areas and Park Equity. This data, from pages 87-88 of the City of Carlsbad Parks Master Plan, shows all City Parks (both Community Parks and Special Use Areas in Coastal Carlsbad (except Aviara Park east of Poinsettia Park and west of Alga Norte Park). The text on the left margin identifies the South Carlsbad Coastal Park (west of I-5) gap along with the number of South Carlsbad Citizens (over half the City’s population) without a Coastal Park. The left margin also identifies more local issues for the over 2,000 Ponto area adults and children. For Ponto residents the nearest Public Park and City proposed ‘solution’ to the South Carlsbad and Ponto Public Park deficit are miles away over high-speed/traffic roadways and thus somewhat hazardous to access and effectively unusable by children/the elderly or

those without cars. Having been a 20-year resident of Ponto I regularly see our children have to play in the street as there are no Public Park with large open fields to play at within a safe and under 1-hour walk away. Ponto citizens have submitted public comments regarding this condition and the lack of a Park at Ponto

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

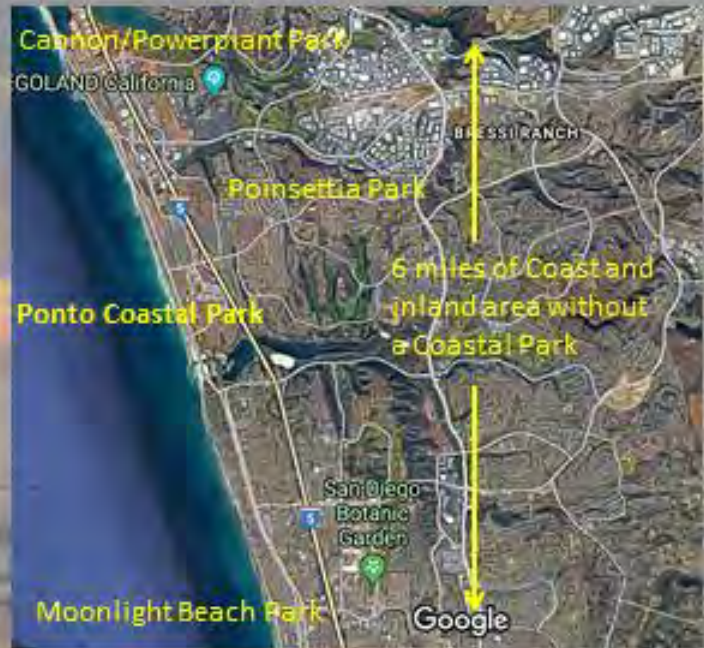

Ponto is at the center of regional 6-mile Coastal Park Gap. A Coastal Park in this instance being a Public Park with practical green play space and a reasonable connection with the Coast (i.e. located west of the regional rail and Interstate-5 corridors). The following image shows this larger regional Coastal Park Gap centered on the Ponto Area, and the nearest Coastal Parks – Cannon Park to the north, and Moonlight Park to the south.

Regionally this image shows Ponto is the last remaining significant vacant Coastal land that could accommodate a Coastal Park to serve the Coastal Park current needs of over existing 2,000 Ponto residents, 64,000 existing South Carlsbad residents, and a larger regional population. It is also the only area to serve the Coastal Park needs for the thousands of hotel rooms in Upland Visitor Accommodations in South Carlsbad.

# How Ponto Serves Region

- Ponto is in the middle of the regional Coastal Park Gap
- A Ponto Coastal Park fills a critical 6 mile gap of coastline without a Coastal Park - 8.6% of SD County coastline
- A Ponto Coastal Park Serves over 26,000 homes & 64,000 citizens just in South Carlsbad without a Coastal Park
- Serves many more people outside Carlsbad

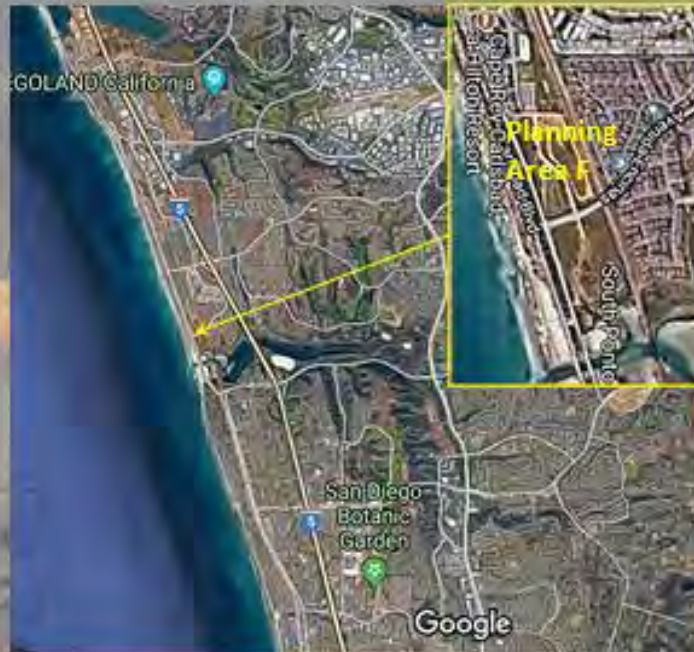

As People for Ponto first uncovered and then communicated in 2017 to the City and CCC; Carlsbad's Existing (since 1994) Local Coastal Program LUP currently states (on page 101) that Ponto's Planning Area F: carries a Non-Residential Reserve (NRR) General Plan designation. Carlsbad's Existing Local Coastal Program Land Use Plan states: "Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an "unplanned" area ..." and requires that: "... **As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.**" CA Coastal Commission actions, Carlsbad Public Records Requests 2017-260, 261, and 262, and 11/20/19 City Planner statements confirm the City never fully communicated to Carlsbad Citizens the existence of this LCP requirement nor did the City comply with the requirements. Of deep concern is that the City is now (as several times in the past) still not honestly disclosing to citizens and implementing this Existing LCP requirement as a true and authentic 'planning effort'. The lack of open public disclosure and apparent fear of true public workshops and Public Comment about the Existing Planning Area F LCP requirements are troubling. The point of a 'planning effort' is to openly and publically present data, publically discuss and explore possibilities/opportunities, and help build consensus on the best planning options. Citizens are concerned the city has already made up its mind and there is no real "planning effort" in the proposed Draft LCP Amendment process, just a brief Staff Report and at the end provide citizens 3-minutes to comment on the proposal. This is not the proper way to treat the last remaining significant vacant land in South Carlsbad that will forever determine the Coastal Recreation environment for generations of Carlsbad and California citizens and visitors to come.

The following data/images show how Ponto is in the center of the 6-mile (west of I-5 and Railroad corridor) regional Coastal Park gap. Ponto is the last remaining vacant and currently "unplanned" Coastal land that is available to address this regional Coastal Park Gap.

## How Ponto Serves Region cont.

- **Relieves Coastal Park congestion** in North Carlsbad, Encinitas and Solana Beach
- Area currently needs Coastal Park as seen by:
  - Ponto Beach parking congestion
  - current trespass use of Planning Area F as a Park
- **6.6 acre portion of Planning Area F** addresses SW Quad City Park deficit

## How Ponto Serves Region cont.

- A Ponto Park helps address 2050 and beyond Regional Population and Visitor Growth demands for Coastal Parks
- A Ponto Park provides the lowest-cost coastal access and recreation opportunities for CA citizens and visitors

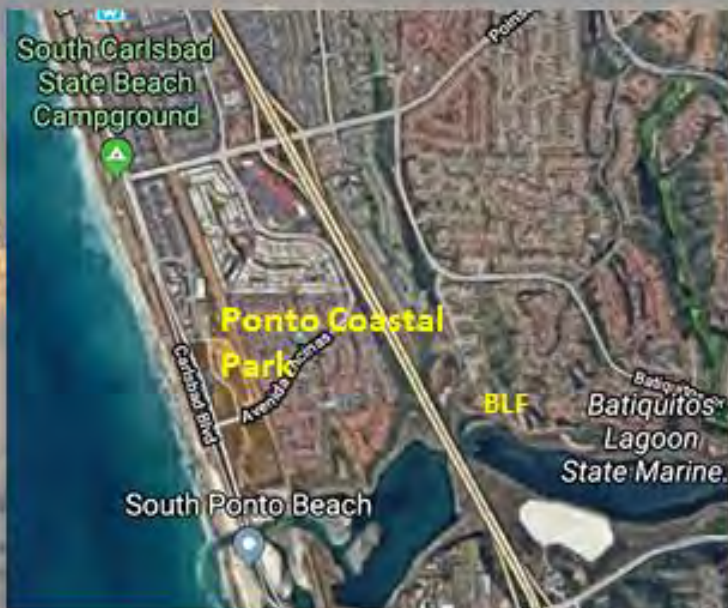

## How Ponto Serves Region cont.

- Vital park and open space amenity for Visitor serving businesses and accommodations
- 6.6 acre unique City Coastal Park venue to stage special events: Runs, bike rides, triathlons, sports, coastal festivals, etc.

## How Ponto Serves Region cont.

- Critical Park space for So. Carlsbad State Beach Campground
- Provides a big training and staging space for Junior lifeguards
- Dog walk trail

# Ponto Coastal Park Concept

- A concept – but shows potential recreational opportunities
- Provides **vital parkland support for beach & open play fields**
- Concept plan a gift from San Pacifico Community Association

One possible Concept image of a potential Ponto Coastal Park at Planning Area F is illustrated below. The potential for a Ponto Coastal Park is real. The speculative land investment fund (Lone Star Fund #5 USA L.P. and Bermuda L.P.) that currently owns Planning Area F is selling the property, and is available for the City of Carlsbad to acquire to address the documented demand/need for a City Park and City Park inequity at Ponto and in Coastal South Carlsbad. A Ponto Beachfront Park 501c3 is working to acquire donations to help purchase the site for a Park. These situations and opportunities should be publicly discussed as part of the City Staff's proposed Local Coastal Program Land Use Plan Amendment.

7. Projected increases in California, San Diego County and Carlsbad population and visitor growth increases the demand for High-Priority-Coastal Recreation land use:

- Increasing Citizen demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

San Diego County Citizen Population - Source: SANDAG Preliminary 2050 Regional Growth Forecast

1980	1,861,846
1990	2,498,016
2000	2,813,833
2010	3,095,313
2020	3,535,000 = 46,500 Citizens per mile of San Diego County coastline
2030	3,870,000
2040	4,163,688
2050	4,384,867 = 57,700 Citizens per mile of San Diego County coastline

2020 to 2050 = 24% increase in San Diego County population.

Citizen Population will continue beyond 2050. Carlsbad may plan for 'Buildout' in 2050, but what is San Diego County's 'Buildout'? There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for this growing population. If we do not increase our supply of Coastal Recreational Resources for these increased demands our Coastal Recreation Resources will become more overcrowded, deteriorated and ultimately diminish the Coastal Recreation quality of life for Citizens of Carlsbad and California. Porto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5) and there is No Coastal Park in all of South Carlsbad to address the Coastal Recreation needs of the 64,000 South Carlsbad Citizens.

- Increasing Visitor demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

Yearly Visitors to San Diego County – source: *San Diego Tourism Authority; San Diego Travel Forecast, Dec, 2017*

2016	34,900,000
2017	34,900,000
2018	35,300,000
2019	35,900,000
2020	36,500,000 = average 100,000 visitors per day, or 2.83% of County’s Population per day, or 1,316 Visitors/coastal mile/day in 2020
2021	37,100,000
2022	37,700,000

This is growth at about a 1.6% per year increase in visitors. Projecting this Visitor growth rate from 2020 to 2050 results in a 61% or 22,265,000 increase in Visitors in 2050 to:

2050	58,765,000 = average 161,000 visitors per day, or 3.67% of the County’s projected 2050 Population per day, or 2,120 Visitors/coastal mile/day in 2050.
------	--

The number of Visitors is likely to increase beyond the year 2050. There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for these projected 2050 61% increase, and beyond 2050, increases in Visitor demand for Coastal Recreational Resources. Increasing Coastal Recreation land is a vital and critically supporting Land Use and vital amenity for California’s, the San Diego Region’s and Carlsbad’s Visitor Serving Industry. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5). There are thousands of hotel rooms in South Carlsbad that have NO Coastal Park to go to in South Carlsbad. This needs correcting as both a Coastal Act and also a City economic sustainability imperative.

- We request that the as part of the public’s review, the City Staff proposed Draft LCP Amendment to the Land Use Plan clearly document if and/or how future forever ‘Buildout’ City, Regional and Statewide population and visitor population demand for Coastal Recreation and City Coastal Parks are adequately provided for both in amount and locational distribution in the Carlsbad proposed Amendment of the LCP Land Use Plan.

8. Carlsbad’s Draft Local Coastal Program Land Use Plan Amendment says it plans to a year 2050 buildout of the Coastal Zone. The Draft Local Coastal Program Land Use Plan Amendment then is the last opportunity to create a Coastal Land Use Plan to provide “High-Priority” Coastal Recreation Land Use, and will forever impact future generations of California, San Diego County, and Carlsbad Citizens and Visitors:

- The Draft LCPA indicates in 2008 only 9% of All Carlsbad was vacant land. Less is vacant now in 2019. Carlsbad’s Coastal Zone is 37% of the City, so vacant unconstrained land suitable for providing Coastal Recreation is likely only 3-4%. The prior request for a full documentation of the remaining vacant Coastal lands will provide a better understanding needed to begin to make the final ‘buildout’ Coastal Land Use Plan for Carlsbad. The Draft LCPA does not indicate the amount and locations of currently vacant unconstrained Coastal Land in Carlsbad. This final limited vacant land resource should be clearly documented and mapped in the DLCPA as it represents the real focus of the DLCPA – the Coastal Plan for these remaingn undeveloped

lands. These last remaining vacant lands should be primarily used to provide for and equitably distribute “High-Priority” Coastal Recreation Land Uses consistent with CCA Sections:

- i. Section 30212.5 “... Wherever appropriate and feasible, public facilities, including parking areas or facilities, **shall be distributed throughout an area so as to mitigate against the impacts, social and otherwise, of overcrowding or overuse by the public of any single area.**”;
- ii. Section 30213 “... **Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...**”;
- iii. Section 30222 “**The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development,** but not over agriculture or coastal-dependent industry.”
- iv. Section 30223 “**Upland areas necessary to support coastal recreational uses shall be reserved for such uses, where feasible**” ,
- v. Section 30251 ... The location and amount of new development should maintain and enhance public access to the coast by ... 6) assuring that the recreational needs of new residents will not overload nearby coastal recreation areas by **correlating the amount of development with local park acquisition** and development plans with the provision of onsite recreational facilities to serve the new development”

Adopted City Park Service Area and Park Equity maps discussed earlier document the proposed Draft LCP Amendment’s inconstancy with the above CCA Policy Sections. The locations and small amounts remaining vacant Coastal lands provide the last opportunities to correct the inconsistencies of City proposed Draft “buildout” LCP Land Use Plan Amendment with these Coastal Act Policies.

Currently and since 1996 there has been LCP LUP Policy/regulations for Ponto Planning Area F that require consideration of a “Public Park” prior to changing the existing “unplanned Non-residential Reserve” Land Use designation. A map and data base of vacant developable Coastal land should be provided as part of the Draft LCPA and the Draft LCPA. This map and data base should document the projected/planned loss of Coastal land use due to Sea Level Rise. Draft LCPA projects Sea Level Rise will eliminate several beaches and High-Priority Coastal Land Uses like Coastal Lagoon Trails and the Campground.

- The LCP Land Use Plan should plan and reserve the very limited vacant developable Coastal land for the long-term ‘Buildout’ needs of “High-Priority” Coastal Recreation Land Use. Vacant developable Coastal land is too scarce to be squandered for “low-priority” uses. Sea Level Rise will reduce “High-Priority” Coastal Uses. So how vacant developable Upland area should be preserved for “High-Priority” Coastal Uses is a key requirement to be fully documented and discussed in the Draft LCPA. If not one of two things will eventually happen 1) any new Coastal Park land will require very expensive purchase and demolition of buildings or public facilities to create any new Coastal Park land to meet existing and growing demand; or 2) Coastal Recreation will be hemmed-in by “low-priority” uses and thus force Coastal Recreation to decrease and become increasingly concentrated and overcrowded in its current locations; and thus will promote the eventual deterioration of our current Coastal Recreation resources. A plan that fails to fix Coastal Park deficits and then increase Coastal Parks in pace with increased population/visitor demand is a plan that can

only result in degradation. How the Draft LCPA documents and addresses the land use planning of the last small portions of vacant developable Coastal land is critical for the future and future generations.

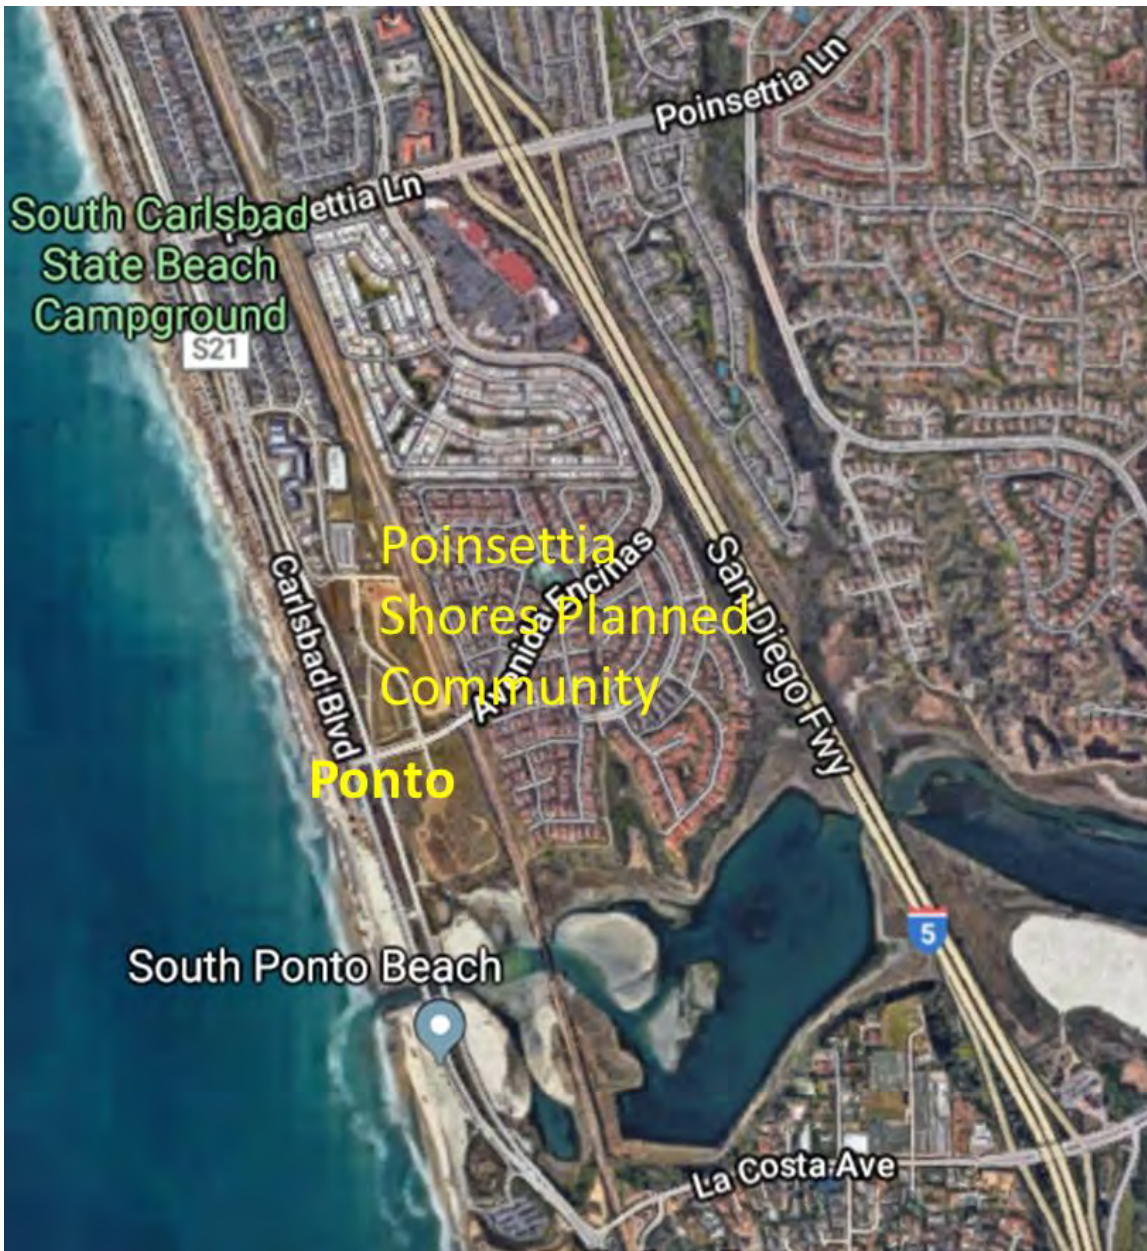

9. Citizens of South Carlsbad are concerned about the City's multiple prior flawed Ponto planning processes or 'mistakes' the City has made yet is basing the City Staff's proposed Draft LCP LUP. The concerns being the City is not openly and honestly communicating information to citizens and the public, and not allowing a reasonable and appropriate community-based planning process to address the documented Park, Coastal Recreation and unconstrained open space needs in South Carlsbad. One of these groups of citizens has created a [www.peopleforponto.com](http://www.peopleforponto.com) website to try to research and compile information and hopefully provide a better means for citizens to understand facts and then express their concerns/desires to the City of Carlsbad (City) and CA Coastal Commission (CCC). Over 2,000 emails have sent to the City and CCC regarding Coastal Land Use Planning Issues at Ponto. The San Pacifico Planned Community (i.e. San Pacifico Community Association) has also, since 2015, sent numerous emailed letters to the City and CCC noting the significant concerns about changes in Coastal planning the City is proposing for our Planned Community.

Repeatedly over 90% of surveyed citizens (results emailed prior to both the City and CCC) have expressed the vital need and desire for a Coastal Park at Ponto to serve the current and future Coastal Recreation needs for all both Ponto and South Carlsbad and for larger regional and State Coastal Recreational needs. This desire is supported by data, CA Coastal Act Policy, and also Carlsbad's Community Vision – the foundation for the City's General Plan. Ponto is the last remaining vacant Coastal area available to provide for those needs in South Carlsbad and for a regional 6-mile stretch of coastline. Citizens have expressed deep concern about the City's flawed prior Coastal planning efforts for Coastal Recreation at Ponto, including two repeated LCP Amendment "mistakes" (Ponto Beachfront Village Vision Plan in 2010 and General Plan Update in 2015) when the City twice failed to publicly disclose/discuss and then follow the Existing LCP requirements at Ponto – specifically for Planning Area F. People for Ponto had to use multiple Carlsbad Public Records Requests in 2017 to find these "mistakes". CCC Staff was helpful in both confirming the City "mistakes" and communicating back to the City. As citizens we are still unclear as to how/why these two repeated "mistakes" happened. There is citizen concern that the City is again repeating these two prior "mistakes" by not at the beginning of the Public Comment Period clearly and publicly disclosing the Planning Area F LCP requirements to citizens as part of the current LCP Amendment process, and also by not implementing the existing LCP requirement PRIOR to proposing an Amended Coastal Land Use Plan for Ponto. The City in its proposed LCP Amendment process is putting-the-cart-before-the-horse with respect to honest and open consideration, documentation and public discussion of the need for high-priority Coastal Recreation land use required of Planning Area F at Ponto. The City is also not clearly letting all Carlsbad citizens know about the Existing LCP requirements for Ponto's Planning Area F so they can be informed to reasonably participate in public review and comment regarding amending that LCP requirement, and the need for Coastal Recreation land uses in South Carlsbad. Since 2017 there has been repeated citizen requests to the City (copies were provided to the CCC) to fix these multiple fundamental/foundational flaws by in the City's prior Coastal Recreation and Public Parks and Open Space at planning, and the currently Proposed Draft LCP Land Use Plan Amendment. Since 2017 there have also been repeated citizen requests to the City to provide a truly open, honest, inclusive community-based planning process and workshops with the accurate and honest information, prior to forming a proposed Draft LCP Land Use Plan Amendment. As citizens we believe we can constructively work with the City and CCC towards a consensus or viable options on these important Coastal Recreation issues if the City allows and encourages such an open, honest and inclusive process. We request the City respond to the requests submitted to the City since 2017, and again request such a process from the City before any LCP Amendment is first considered by the Planning Commission and City Council. Such a requested process benefits all.

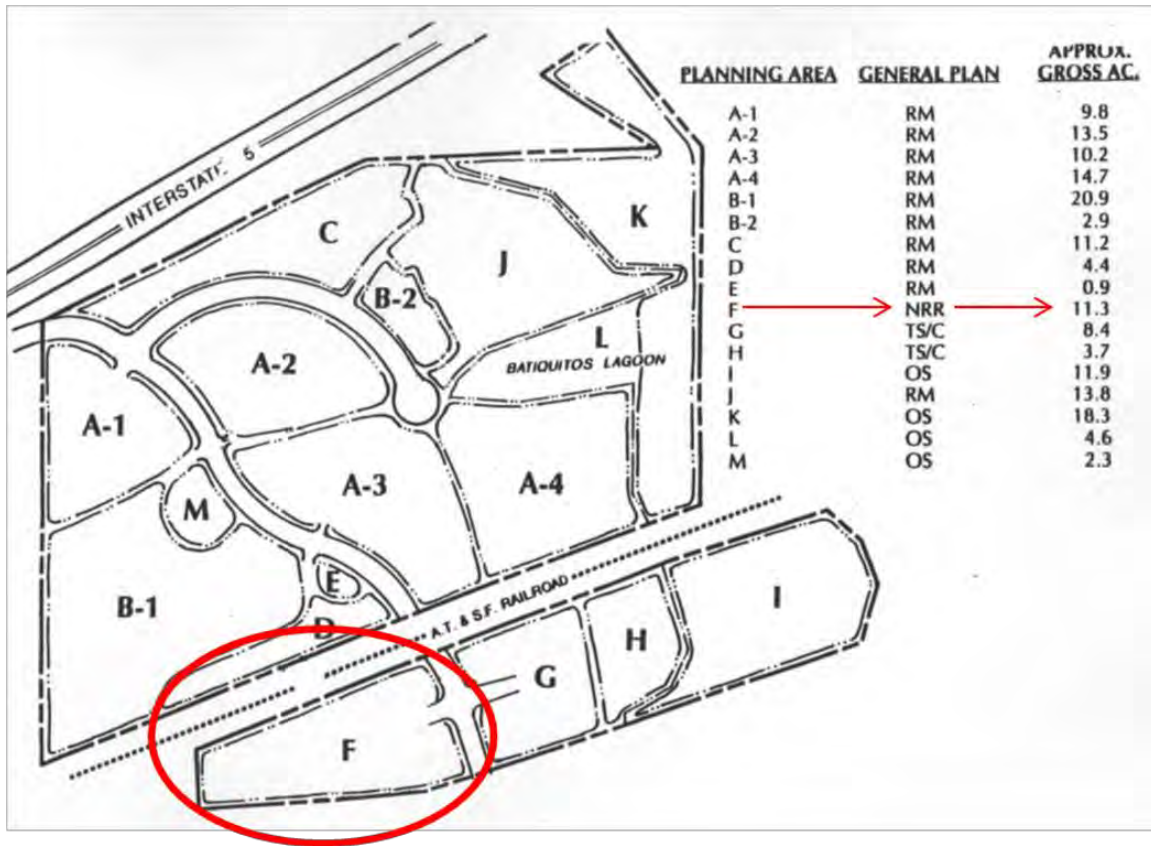

10. Why the Draft LCPA Land Use Plan for Ponto should provide for the current and future Coastal Park and Recreation needs for South Carlsbad, the San Diego Region and California.

- Ponto, is one of last remaining vacant and undeveloped Coastal lands in North County
- Ponto is the last remaining undeveloped Coastal land in South Carlsbad
- Ponto has the last unplanned Planning Area of the Existing Poinsettia Shores Planned Community & Local Coastal Program that can be planned for high-priority Coastal Recreation land use. This Existing LCP requires Planning Area F be considered for a “Public Park”.
- Following is a map of the Ponto area in South Carlsbad:

Following is the LCP Land Use map from the Existing Poinsettia Shores Master Plan & Local Coastal Program adopted in 1996. This is the Land Use map that the City is proposing to change in the proposed LCP Amendment to the Land Use Plan. As the Existing LCP Land Use map shows most all the land is ‘low-priority’ residential use at an RM Residential medium density, a small portion is ‘high-priority’ Visitor Serving TC/C Tourist Commercial. Most all the

Open Space is constrained and undevelopable land (the steep CSS habitat bluffs above Batiquitos Lagoon) or water (the lagoon water). This land/water is owned by the State of California, like the inner lagoon east of I-5. Only Planning Area M at 2.3 acres is unconstrained Open Space and it provides a small private internal recreation facility for the approximately 450 homes and 1,000 people in the Planned Community. This small recreation area is a City requirement for ‘planned developments’ to off-set loss open space from planned development impacts on housing quality. Planned developments can propose designs that reduce normal setback and open space areas – they bunch together buildings to increase development – such as the smaller lot sizes, and extensive use of “zero-setbacks” to reduce typical lot sizes that occurs at Poinsettia Shores. A private recreation facility in any of the City’s planned developments is never considered a replacement for required City Parks. Planned Developments, like unplanned developments, are required to dedicate Park land to the City, or pay a Park In-Lieu fee to the City so the City provide the developer’s obligation to provide City Park acreage to address the population increase of their proposed planned development. For Poinsettia Shores’ population the City’s minimum City Park Standard would require developers set aside 3 acres of City Park land for local park needs. For the larger Ponto area population about 6.6 acres of City Park Land is required. The Existing LCP reserves Planning Area F as an unplanned “Non-residential Reserve” Land Use until the Public Park needs for Ponto are considered and documented. Only then can the NRR land use be changed.

11. Developers have overbuilt in the Ponto area of the Coastal Zone. The City of Carlsbad has under questionable circumstances is currently choosing to ‘exempted’ Ponto developers from providing the minimum amount of unconstrained Open Space according to the City’s developer required Open Space Public Facilities Standard. The legality of these confusing circumstances is subject to a lawsuit against the City. However the City’s computerize mapping system has documented that the Ponto area of the Coastal Zone is missing about 30-acres of Unconstrained Open Space that can be used to fulfill the City’s Open Space Performance Standard that states that

15% of unconstrained and developable land must be preserved by developers as Open Space. Following is a summary of data from the City data regarding the missing Open Space at Ponto (Local Facility Management Plan Zone 9, LFMP Zone 9) in the Coastal Zone pursuant to the City's Open Space Performance Standard. If it is desirable People for Ponto can provide the City GIS map and parcel-by-parcel data base on which the following summary is based:

City of Carlsbad GIS data calculations of Open Space at Ponto area of Coastal Zone:

472 Acres = Total land in LFMP Zone 9 [Ponto area] per City of Carlsbad GIS data

(197 Acres) = Constrained land/water/infrastructure that is excluded from the City's Open Space Standard

275 Acres = Unconstrained land in LFMP Zone 9 (Ponto) subject to the City's Open Space Standard

X 15% = Minimum unconstrained Open Space requirement per the City Open Space Standard

41 Acres = Minimum unconstrained Open Space required in LFMP Zone 9

(11 Acres) = Actual unconstrained Open Space provided & mapped by City in LFMP Zone 9

**30 Acres = Missing unconstrained Open Space needed in LFMP Zone 9 [Ponto area of Coastal Zone] to meet the City's minimum GMP Open Space Standard. 73% of the required Open Space Standard is missing.**

Thus the Ponto area of the Coastal Zone appears overdeveloped with 30 additional acres of "low-priority" residential land uses due to developers' non-compliance to the City's Open Space Public Facility Performance Standard's Minimum developer required Open Space requirement. As noted a citizens group has a pending lawsuit with the City over the City's current 'exempting' Ponto and future developers from meeting the Open Space Standard.

12. The prior pre-1996 LCP for Ponto – the Batiquitos Lagoon Educational Park Master Plan & LCP (BLEP MP/LCP) had significant Open Space and recreational areas. These significant Open Space and Recreational areas were removed with BLEP MP/LCP's replacement in 1996 by the currently existing Poinsettia Shores Master & LCP (PSMP/LCP) and its City Zoning and LCP LUP requirements that reserved Planning Area F with the current "Non-residential Reserve" Land Use designation. Since the BLEP MP/LCP it appears developers and the City of Carlsbad have worked to remove "High-Priority" Coastal land uses (i.e. Coastal Recreation and Park uses) out of the Ponto area and replaced them with more "low-priority" residential and general commercial land uses. For example:

- Planning Area F used to be designated "Visitor Serving Commercial" as part of the original 1980's BLEP MP/LCP for Ponto.
- In 1996 the BLEP MP LCP was changed by developer application to the now current PSMP LCP, and the LCP LUP designation changed from "Visitor Serving Commercial" to "Non-Residential Reserve" with the requirement to study and document the need for "High-Priority" Coastal Recreation (i.e. Public Park) and/or Low-cost visitor accommodations prior to any change to Planning Area F's "Non-residential Reserve" LCP land use.
- In 2005 the City started to try to change Planning Area F to low-priority residential and general commercial land use in the City's Ponto Beachfront Village Vision Plan (PBVVP). At this time the City made its first documented Coastal 'planning mistake' by not disclosing to the public the existence of Planning Area F's LCP requirements and then also not following those LCP requirements. The City's planning process seemed focused on addressing developer's land use desires, and increasing land use intensity to boost "Tax-increment financing" as the City had established a Redevelopment Project Area at Ponto. A short time after the State of CA dissolved Redevelopment Agencies due in part to such abuses by cities. The CCC formally rejected the PBVVP in 2010, citing the City's failure to follow the LCP requirements for Planning Area F.

- Five years later in 2015 the City again adopted a proposed General Plan Update to again change Planning Area F to low-priority residential and general commercial land use. The General Plan Update cited the City's PBVVP that was in fact rejected by the CCC only a few years before. The City again repeated their PBVVP's Coastal land use 'planning mistake' by again not disclosing to the public the existence of Planning Area F's LCP requirements and then not following those LCP requirements. It is unclear why the City did this only 5-years after the CCC specifically rejected the Ponto Beachfront Village Vision Plan for those same reasons.
- In 2017 citizens found and then confirmed these Ponto Coastal 'planning mistakes' by the City through multiple official Carlsbad Public Records Requests and CCC Staff confirmation. The CCC readily identified the mistakes, but the City's 2019 proposed Draft LCP Land Use Plan and planning process still has yet fully disclose these prior Coastal 'planning mistakes' to ALL citizens of Carlsbad - the failure to disclose and follow the Planning Area F LCP LUP and City Zoning requirements. Full City disclosure is needed now to try to correct many years of City misrepresentation to citizens on LCP required Coastal land Use planning at Ponto. It is needed now so the public is aware at the start of the Public Comment Period. In 2017 citizens began asking the City fix the City's over 12-years of misinformation and planning mistakes by 'restarting' Coastal land use planning at Ponto with an open and honest community-based Coastal planning process. These citizens' requests have been rejected.
- In 2019 the City Staff proposed citywide Draft LCP land Use Plan Amendment that again proposed to change Planning Area F to "low-priority" residential and general commercial land use, without First disclosing the Planning Area F LCP requirements with corresponding analysis of the Need for Coastal Recreation (i.e. Public Park) and/or low-cost visitor accommodations at Planning Area F and providing that Documented analysis for public review/Consideration/comment. This seems like another 3<sup>rd</sup> repeat of the prior two Coastal planning mistakes by the City. In 2019, again citizens asked for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again the City rejected citizens' requests.
- In 2020 thousands of public requests again asked, and are currently asking, for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again these requests are being rejected. Based on the significant citizen concern and the documented prior 'planning mistakes' at Ponto it appears reasonable and responsible for Ponto's Planning Area F to ether:
  - i. Retain its current Existing LCP LUP land Use of "Non-Residential Reserve" until such time as the City's past Ponto Beachfront Village Vision Plan and General Plan Update planning mistakes and other issues subject to current planning lawsuits against the City are resolved with a true, honest and open community-based Coastal planning process asked for by citizens since 2017. Or
  - ii. Propose in the Draft LCP Land Use Plan Amendment to re-designated Planning Area F back to a Visitor Serving Commercial and Open Space ("i.e. Public Park") to provide both "High-Priory" coastal uses v. low-priority residential/general commercial uses due to the documented Coastal Recreation and Low-cost visitor accommodation needs for both citizens and visitors at Ponto and South Carlsbad.

13. Questionable logic and inconsistency in proposed Draft land use map and policies: Chapter 2 Figure 2-2B & C on pages 2-19 & 20 proposes to Amend the existing LCP Land Use Plan Map, and policies LCP-2-P.19 and 20 on pages 2-27 to 2-29 propose Amendments to existing LCP policy and create a new added layer of policy referencing a Ponto/Southern Waterfront. The proposed Land Use Map and Policies serve to firmly plan for "low-priority" residential and general commercial land uses at Ponto with a clear regulatory Land Use Plan Map showing these land uses and by specific regulatory policy (LCP-2-20) that clearly requires (by using the words "shall") these "low

priority” uses. In contrast the “High-Priority” Coastal Recreation and Coastal Park land uses that would be designated as Open Space are not mapped at all in Figure 2-2B & C; and the proposed policy LCP-2-P.19 is both misleading and specifically does Not Require any “High-Priority” Coastal Recreation and Coastal Park land Use at Ponto and South Carlsbad. In fact page 2-22 specifically indicates two “may” criteria that would first need to occur in the positive before any potential Coastal Recreation and Coastal Park Land could then theoretically even be possible. It is highly probable that it is already known by the City that the proposed relocation of Carlsbad Boulevard (Coast Highway) is not very feasible and not cost effective, and will not yield (due to environmental habitat constraints, narrowness of the roadway median, and other design constraints) any significant dimensions of land that could potentially be designated Open Space and realistically be used as a Park.

The blank outline map (Figure 2-2B & C) provides no mapped Open Space Land Use designation, other than for the currently existing State Campgrounds’ low-cost visitor accommodations, so the proposed Land Use Plan Map is Not providing/mapping any new Open Space land use to address Coastal Recreation and Coastal Park needs. The Draft LCP Land Use Plan Amendment’s proposed/projected/planned Sea Level Rise and associated coastal erosion appears to indicate that this “High-Priority” low-cost visitor accommodation (Campground) land use designated as Open Space will be reduced in the ‘Buildout’ condition due to coastal erosion. So **the Draft LCP Land Use Plan is actually planning for a Reduction in Open Space Land Use in South Carlsbad and Ponto.** Both the blank outline map and the proposed Land Use Map Figure 2-1 DO NOT clearly map and designate both South Carlsbad’s Draft LCP Planned Loss of the Open Space Land Use and also any New or replacement unconstrained land as Open Space land use for Coastal Recreation and Coastal Park. This is an internal inconsistency in Land Use Mapping that should be corrected in two ways:

- 1) Showing on all the Land Use (Figure 2-1), Special Planning Area (Figure 2-2B & C), and other Draft LCP Maps the Draft LCP’s planned loss of land area in those maps due to the Draft LCP’s planned loss of land due to Sea Level Rise and Coastal Land Erosion. This is required to show how land use boundaries and Coastal Recourses are planned to change over time. or
- 2) Provide detailed Land Use Constraint Maps for the current Carlsbad Boulevard right-of-way that the City “may” or ‘may not’ choose (per the proposed “may” LCP-2-P.19 policy) use to explore to address the City’s (Park Master Plan) documented Coastal Recreation and Coastal Park land use shortages in Coastal South Carlsbad and Ponto. Clearly showing the potential residual Unconstrained Land within a Carlsbad Boulevard relocation that have any potential possibility to add new Open Space Land Use Designations (for Coastal Recreation) is needed now to judge if the policy is even rational, or is it just a Trojan horse.

The proposed internal inconsistency in mapping and policy appears like a plan/policy ‘shell game’. The proposed Land Use Plan Maps and Policies should be consistent and equality committed (mapped-shall v. unmapped-may) to a feasible and actual Plan. If not then there is No real Plan.

There is no Regulatory Policy requirement in LCP-2-P.19 to even require the City to work on the two “may” criteria. The City could choose to bury the entire Carlsbad Boulevard relocation concept and be totally consistent with Policy LCP-2-P.19 and the LCP. As such the language on 2-22, Figure 2-2C (and the proposed Land Use Map), and policy LCP-2-P.19 and 20 appear conspire to create a shell game or bait-and-switch game in that only “low-priority” residential and general commercial uses are guaranteed (by “shall” policy) winners, and “high-priority” Coastal Recreation and Coastal Park Land Uses are at best a non-committal ‘long-shot’ (“may” policy) that the city is specifically not providing a way to ever define, or commit to implement. The proposed Draft LCP Land Use Plan Coastal Recreation and Coastal Park statements for Ponto are just words on paper that are designed to have no force, no commitment, no defined outcome, and no defined requirement to even have an outcome regarding the

documented “High-Priority” Coastal Recreation and Coastal Park needs at Ponto, Coastal South Carlsbad and the regional 6-mile Coastal Park gap centered around Ponto.

Policy LCP-2-P.19 falsely says it “promotes development of recreational use” but does not in fact do that. How is development of ‘recreational use promoted’ when the Use is both unmapped and no regulatory policy requirement and commitment (no “shall” statement) to ‘promote’ that Use is provided? Policy LCP-2-19.19 appears a misleading sham that does not ‘promote’ or require in any way “High-Priority” Coastal Recreation and Park Land Use at Ponto. There should be open and honest public workshops before the Draft LCP Amendment goes to its first public hearing to clearly define the major environmental constraints and cost estimates involving possible relocation of Carlsbad Boulevard and constructing needed beach access parking, and sufficient and safe sidewalks and bike paths along Carlsbad Boulevard; and then map the amount and dimensions of potential ‘excess land’ that maybe available for possible designation as Open Space in the City General Plan and Local Coastal Program. The City should not repeat the mistakes at the Carlsbad Municipal Golf Course (resulting in the most expensive to construct maniple course in the USA) by not defining and vetting the concept first. A preliminary review of City GIS data appears the amount, dimensions and locations of any potential ‘excess’ land maybe modest at best. However before the City proposes a ‘Buildout’ Coastal Land Use Plan this critical information should be clearly provided and considered. It is likely the City’s Carlsbad Boulevard relocation concept is unfeasible, inefficient, too costly, and yields too little actual useable ‘excess land’ to ever approach the Coastal Recreation and Coastal Park needs for South Carlsbad. This may already be known by the City, but it surely should be publicly disclosed and discussed in the DLPCA.

The proposed Coastal Land Use Plan to address Carlsbad’s, San Diego County’s and California’s High-Priority Coastal Recreation Land Use and Coastal Park needs should NOT be vague “may” policy that appears to be purposely designed/worded to not commit to actually providing any “High-Priority” Coastal Recreation and Coastal Park land uses on the map or in policy commitments. The Land Use Plan and Policy for High-Priority Coastal Recreation and Coastal Park Land Use should be definitive with triggered “shall” policy statements requiring and assuring that the ‘Forever’ “High-Priority” Coastal Recreation and Coastal Park needs are properly and timely addressed in the City’s proposed ‘Buildout’ Coastal Land Use Plan. This “shall” policy commitment should be clearly and consistently mapped to show the basic feasibility of the planned outcomes and the resulting actual Land that could feasibly implement the planned outcome.

Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard: Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard are Coastal Access and Completes Streets issues. South Carlsbad Boulevard now and has for decades been a highly used Incomplete Street that is out of compliance with the City’s minimum Street Standards for pedestrian and bike access and safety. The Coastal Access portion of the Draft Land Use Plan should strongly address the Complete Street requirements for South Carlsbad Boulevard. Those policy commitments should be reference in Policy LCP-2-P.19 and 20 as Carlsbad Boulevard in **South Carlsbad is the most Complete Street deficient portion of Carlsbad Boulevard**. Forever Coastal Access parking demand and the proposed LCP Amendment’s Land Use Plan to supply parking for those demands should also be addressed as part of the Coastal Access and Complete Streets issues for South Carlsbad Boulevard. If much needed Coastal Access Parking is provided on South Carlsbad Boulevard as part of a “maybe” implemented realignment, most of the “maybe” realignment land left after constraints are accommodated for and buffered will likely be consumed with these parking spaces and parking drive aisles/buffer area needed to separate high-speed vehicular traffic from parking, a buffered bike path, and a sufficiently wide pedestrian sidewalk or Coastal Path. After accommodating these much needed Complete Street facilitates there will likely be little if any sufficiently

dimensioned land available for a Coastal Recreation and a Coastal Park. The needed Coastal Access and Complete Street facilities on South Carlsbad Boulevard are very much needed, but they are NOT a Coastal Park.

As mentioned the proposed Draft Coastal Land Use Plan's Maps and Policies are very specific in providing for the City's proposed LCP Land Use changes to 'low-priority' Residential and General Commercial' on Planning Area F (proposed to be renamed to Area 1 and 2). It is curious as to why the proposed Draft LCP Land Use Plan Amendment has no Land Use Map and minor vague unaccountable Land Use Policy concerning 'High-priority Coastal Recreation Land Use' at Ponto, while the very same time proposing very clear Land Use Mapping and detailed unambiguous "shall" land use policy requirements for 'low-priority' Residential and General Commercial land use at Ponto. Why is the City Not committing and requiring (in a Land Use Map and Land Use Policy) to much needed 'High-priority' Coastal Recreation and Coastal Park Land Use' needs at Ponto the same detail and commitment as the City is providing for "low-priority" uses? This is backwards and inappropriate. It is all the more inappropriate given the 'Buildout' Coastal Land Use Plan the City is proposing at Ponto. These issues and plan/policy commitments and non-commitments will be 'forever' and should be fully and publicly evaluated as previously requested, or the Existing LCP Land Use Plan of "Non-residential Reserve" for Planning Area F should remain unchanged and until the forever-buildout Coastal Recreation and Coastal Park issues can be clearly, honestly and properly considered and accountably planned for. This is vitally important and seems to speak to the very heart of the CA Coastal Act, its founding and enduring principles, and its policies to maximize Coastal Recreation. People for Ponto and we believe many others, when they are aware of the issues, think the City and CA Coastal Commission should be taking a long-term perspective and be more careful, thorough, thoughtful, inclusive, and in the considerations of the City's proposal/request to permanently convert the last vacant unplanned (Non-residential Reserve) Coastal land at Ponto to "low-priority" land uses and forever eliminate any Coastal Recreation and Coastal Park opportunities.

14. Public Coastal View protection: Avenida Encinas is the only inland public access road and pedestrian sidewalk to access the Coast at Ponto for one mile in each direction north and south. It is also hosts the regional Coastal Rail Trail in 3' wide bike lanes. There exist now phenomenal coastal ocean views for the public along Avenida Encinas from the rail corridor bridge to Carlsbad Boulevard. It is assumed these existing expansive public views to the ocean will be mostly eliminated with any building development seaward or the Rail corridor. This is understandable, but an accountable ('shall') Land Use Plan/Policy addition to proposed Policy LCP-2-P.20 should be provided for a reasonable Public Coastal View corridor along both sides of Avenida Encinas and at the intersection with Carlsbad Boulevard. Public Coastal view analysis, building height-setback standards along Avenida Encinas, and building placement and site design and landscaping criteria in policy LCP-2-P.20 could also considered to reasonably provide for some residual public coastal view preservation.
  
15. Illogical landscape setback reductions proposed along Carlsbad Boulevard, and Undefined landscape setback along the Lagoon Bluff Top and rail corridor in Policy LCP-2-P.20: Logically setbacks are used in planning to provide a buffering separation of incompatible land uses/activities/habitats. The intent of the setback separation being to protect adjacent uses/activities/habitats from incompatibility, nuisance or harassment by providing a sufficient distance/area (i.e. setback) between uses/activities/habitats and for required urban design aesthetics – almost always a buffering landscaping. Policy LCP-2-P.20. A.4 and C.3 says the required 40' landscape setback along Carlsbad Boulevard "maybe reduced due to site constraints or protection of environmental resources." The ability to reduce the setback is illogical in that setbacks are intended to protect environmental resources and provide a buffer for constraints. In the Carlsbad Boulevard right-of-way there is documented sensitive environmental habitat, along with being a busy roadway. How could reducing the protective 40' setback in anyway better protect that habitat or provide a better landscaped compatibility or visual aesthesis buffer along Carlsbad Boulevard? It is

illogical. If anything the minimum 40' landscaped setback should likely be expanded near "environmental resources". Regarding reducing the minimum 40' landscape setback for "site constraints" there is no definition of what a "site constraint" is or why it (whatever it may be) justifies a reduction of the minimum landscaped setback. Is endangered species habitat, or a hazardous geologic feature, or a slope, or on-site infrastructure considered a "site constraint"? There should be some explanation of what a "site constraint" is and is not, and once defined if it warrants a landscape setback reduction to enhance the buffering purpose of a landscape setback. Or will a reduction only allow bringing the defined constraint closer to the adjacent uses/activities/habitats that the landscape setback is designed to buffer. It is good planning practice to not only be clear in the use of terms; but also, if a proposed reduction in a minimum standard is allowed, to define reasonably clear criteria for that reduction/modification and provide appropriate defined mitigation to assume the intended performance objectives of the minimum landscape setback are achieved.

Policy LCP-2-P.20.C.4 is missing a critical Bluff-Top landscape setback. It seems impossible that the DLCPA is proposing no Bluff-Top setback from the lagoon bluffs and sensitive habitat. The Batiqitos Lagoon's adjoining steep sensitive habitat slopes directly connect along the Bluff-top. Batiqitos Lagoon's and adjoining steep sensitive habitat is a sensitive habitat that requires significant setbacks as a buffer from development impacts. Setbacks similar to those required for the San Pacifico area inland of the rail corridor, should be provided unless updated information about habitat sensitivity or community aesthetics requires different setback requirements.

Policy LCP-2-P.20 does not include a landscape setback standard adjacent to the rail corridor. This is a significant national transportation corridor, part of the 2<sup>nd</sup> busiest rail corridor in the USA. Train travel along this corridor is planned to increase greatly in the years to come. Now there is significant noise, Diesel engine pollution, and extensive ground vibration due to train travel along the rail corridor. Long freight trains which currently run mostly at night and weekends are particularly noisy and heavy, and create significant ground vibration (underground noise). These issues are best mitigated by landscape setbacks and other buffers/barriers. A minimum setback standard for sufficient landscaping for a visual buffer and also factoring appropriate noise and ground vibration standards for a buildout situation should be used to establish an appropriate landscape setback that should be provided along the rail corridor. Carlsbad's landscape aesthetics along the rail corridor should be factored into how wide the setback should be and how landscaping should be provided. An example for the landscape aesthetic portion of the setback standard could be landscape design dimensions of the San Pacifico community on the inland side of the rail corridor. However, noise and vibrational impacts at San Pacifico are felt much further inland and appear to justify increased setbacks for those impacts.

**Subject:** RE: Tell us about parks & rec priorities at this week's meetings

Dear Carlsbad City Council and Parks Commission:

Sorry I am unable to attend the workshops. Following is my public input & data, and suggested questions the City should provide citizens in setting park land use policy and priorities:

A clear lesson from Covid is the need for flat wide open grassy parks that fully allow social distancing and multi-function park and recreation opportunities within a 10-minute walking distance to all neighborhoods. This fundamentally what city parks are intended to provide – flat wide-grassed-flat and fully useable multi-function spaces to recreate formally or informally, and being accessible by a short walk to all neighborhoods and children without having to drive a car to access.

Another clear lesson comes from new City and State parallel moves to demand unlimited population growth using higher density condo/apartment developments. These developments by definition pack more people into a smaller area thus creating an even greater need for parks. Making flat wide open grassy and fully useable parks even more important to be provided within a 10-minute walk.

Trails although nice to walk along in the outdoors force people into a 5-8 foot wide path that does not allow social distancing. A trail is not a park.

Carlsbad People for Ponto (P4P) Citizens have for years provided the City input on Parks and Recreation Priority issues from 2017 to less than 2-months ago, and to now. Since pre-Covid 2017 over about 5,000 written/verbal petitions and multiple budget processes have been provided. In an after-Covid situation, most recently in October 2021, about 700 written/verbal petitions and public testimony was provided. Carlsbad P4P Citizen input is based on documented City records. P4P Carlsbad Citizen input is/has been consistent with the above Covid observations and significant in the numbers of Citizens calling for a meaningful (i.e. usable wide, grassed multi-function) park at Ponto. The P4P Citizen input should be fully disclosed, discussed and accounted for in the Parks Master Plan.

P4P's 30-page October 15, 2021 "Coastal Recreation" data file to the City documented comparative park data that the City should fully present and discuss with Citizens as part of the Parks Master Plan. The comparative park data shows Carlsbad is below average nationally and significantly below our adjacent Cities in providing parks – and requiring Carlsbad developers provide parks for their developments. It also documents how over 112 acres, or over 33% of all existing/planned City parkland is constrained and unusable to humans to fully use as a park. Having over 33% of City Parks constrained and not fully useable a park for citizens is a significant city land use and parks master plan issue. The 30-pages of documented information and requests in the October 15, 2021 Coastal Recreation file should be a part of the park master plan process. Following are some key park data the City should present and key park priority questions on that data the City should ask citizens:

1. Carlsbad only requires developers to provide a comparatively low 3-acres of parkland per 1,000 population of Carlsbad developments. Encinitas and Oceanside require their developers to provide 5-acres per 1,000 population, which is over 60% more parkland than Carlsbad's City Council requires developers to provide.
  - a. Should Carlsbad require 60% less parkland than Encinitas and Oceanside?
  - b. Should Carlsbad require developers to provide the same 5-acres per 1,000 parkland as Encinitas and Oceanside?
2. Carlsbad does not plan for, or require developers, to provide parks within a 10-minute walk to homes. Both Encinitas and Oceanside require parks to be provided within a 10-minute walk of all homes in their Cities.
  - a. Should Carlsbad require parks to be within a 10-minute walk of homes like Encinitas and Oceanside?
  - b. Should Carlsbad require developers to provide their parkland requirement (3 or 5 acres/1,000 population) be within a 10-minute walk of homes the homes the developer builds like Encinitas and Oceanside?
3. Carlsbad is BELOW the national average in BOTH providing Parkland and in providing Parkland Within a 10-minutewalk to homes (see ,Trust for Public Land Park Score).
  - a. Should Carlsbad be below average nationally in providing Parkland?
  - b. Should Carlsbad provide Parkland to be in the top 10%, 20%, 30%, 40%, just average, or below average nationally? (select one)
  - c. Should Carlsbad be below average nationally in providing Parkland within a 10-minute walk to homes?
  - d. Should Carlsbad provide Parkland within a 10-minute walk of homes so as to be in the top 10%, 20%, 30%, 40%, just average, or below average nationally? (select one)
4. South Carlsbad composes 62% of Carlsbad's population, yet has no large grassy usable Coastal park (like a Holiday Park) and has 0-acers of park west of I-5.
  - a. Should 62% of Carlsbad's population have at least one large grassy and fully useable park?
  - b. Should South Carlsbad developers be required to correct this park inequity?
5. North Carlsbad composes 38% of Carlsbad's population, yet has 10 Coastal parks totaling over 35-acres west of I-5.
  - a. Should the City's planned park investments be re-prioritized to correlate the location of coastal park land acreage with population demand?
6. South Carlsbad developer fees paid to build and fund many North Carlsbad park acres in both Veterans Park and Poinsettia 61 Park.

- a. Should the City appropriately use those South Carlsbad developer fees paid to build Veterans Park and Poinsettia 61 Park to fund parks in South Carlsbad where the development and park demand from that development occurred?

Thank you for your consideration. We look forward to confirmation that years of P4P citizen input to the City on Park issues is being considered in your efforts.

---

## **Parks & Recreation Master Plan Meetings are this Week**

Don't forget to register for one of two virtual meetings we're holding this week to talk about whether COVID has changed parks and rec priorities.

Thursday, Dec. 9, 6 to 7 p.m.

[Register](#)

Saturday, Dec. 11, 10 to 11 a.m.

[Register](#)

The City of Carlsbad is creating an updated blueprint that will guide priorities and proposed investments in parks and recreation for the next five years. This project was interrupted due to the COVID-19 pandemic, and as the project starts back up, the city wants to know if the community's priorities have changed.

Community members are encouraged to attend one of the two virtual meetings to hear the public feedback that was provided in February 2020 and let the city know if anything has changed.

The city's existing Parks & Recreation Master Plan was completed in 2015. The update will cover:

- Assessment of current parks, facilities and recreational programs
- Demographic and industry trends
- Community needs and priorities
- Funding needs and revenue opportunities
- A five-year strategic action plan

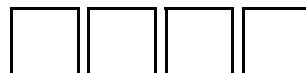

**Other input opportunities**

Input from the workshops will be used to create a survey questionnaire to obtain feedback from a statistically representative group of Carlsbad residents. The survey will also be available online to anyone who wants to take it; however, the results will be analyzed separately from the random sample.

A draft of the master plan will be made available for input by the end of summer 2022, with a final draft scheduled to be presented to the City Council for approval in fall of 2022.

Updated Pubic Comments Coastal Recreation submitted on Oct 12<sup>th</sup> 2021:

---

On 10/8/21 the Carlsbad City Council and CA Coastal Commission were emailed data from an Official Carlsbad Public Records Request (# R002393-092121) on the City of Carlsbad's past compliance/noncompliance with the currently exiting Mello II LCP Land Use Policies # 6-2, 6-4 & 6-10 Certified in the mid-1980s. The City's documents show:

- For Policy 6-2 the 200-300 acre Park called out in Policy 6-2 has been reduced to Veterans Park's 91.5 acres, of which only 54% or 49.5 acres is even useable as a Park. The City provided no documents on how a 200-300 acre park called for in Policy 6-4 is now only 49.5 useable acres.
- For Policy 6-4 there were no City documents were provided. There was no City Public discussion, consideration, or City compliance with Policy 6-4 since the mid-1980's.
- For Policy 6-10 concerns providing Low Cost Visitor Accommodations. Public Parks are the lowest cost (free) Visitor accommodating land use there is.

The 3 existing LCP Land Use Policies are important for Carlsbad, and California's, Coastal land use resources. There appears little to no discussion of the City's past apparent failure to implementation of these 3 LCP LUPs in the current City consideration of changes to the LCP.

Following is a copy of Public Records Request # R002393-092121: "Carlsbad's Local Coastal Program (LCP) for the Mello II Segment of Carlsbad's Coastal Zone has long established land use Policies 6-2, 6-4 & 6-10 that were adopted by Carlsbad and Certified by the CA Coastal Commission in the early/mid-1980's. Mello II LCP Policies 6-2, 6-4 & 6-10 are shown on page 86-87 of Carlsbad's 2016 compiled LCP and are:

- "POLICY 6-2 REGIONAL PARK: If the population of Carlsbad increases in accordance with SANDAG's projected Series V Population Forecasts, it is estimated that Carlsbad will need to develop a new regional park containing 200 to 300 acres in order to adequately serve the public. A location for a new regional park must, therefore, be established. Consideration should be given to a facility within the Aqua Hedionda Specific Plan Area, or adjacent lands. The Batiquitos Lagoon area should also be considered.
- POLICY 6-4 NEED FOR ADDITIONAL OVERNIGHT CAMPING: Additional overnight camping facilities, the main source of lower cost visitor and recreational facilities, are needed throughout the San Diego coastal region. Additional facilities of this kind should be provided in a regional park within the Carlsbad area. This can be accomplished in conjunction with an eventual Batiquitos Park, within the Aqua Hedionda Specific Plan Area, and/or along with the development of private recreational facilities.
- POLICY 6-10 LOWER COST VISITOR-SERVING RECREATIONAL USES: Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Encourage a range of affordability for overnight visitor accommodations. Evaluate the affordability of any new or redeveloped overnight visitor accommodations, including amenities that reduce the cost of stay. Mitigation may be applied to protect and encourage affordable overnight accommodations"

The public record request is to see documents of:

- City Staff reports, presentations and communications to the Carlsbad Planning and Parks Commissions, and City Council regarding the City’s consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies; and
- Carlsbad Planning and Parks Commissions, and City Council minutes, resolutions and ordinances documenting City of Carlsbad consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies.”

Updated Pubic Comments Coastal Recreation submitted on January 2021:

---

Over 11-months ago in a 1/29/20 1:56PM email People for Ponto Carlsbad citizens first provided the City of Carlsbad both data and comments on **14 critical Coastal Recreation issues (see pages 5-30 below)**. The data and the 14 critical issues do not seem to be receiving appropriate disclosure/presentation/discussion/consideration in the Dec 2, 2020 Staff Report to the Planning Commission. To assure the 26-pages of citizen data and requests in the 1/29/20 email was received by the Planning Commission the file was re-emailed on 12/22/20 12:24pm and specifically addressed to City Council, City Clerk, Planning Commission, Parks Commission, Housing Commission, HEAC, CA Coastal Commission, and CA HCD. As citizens we request each of these 14 data points (with supporting data) be honestly considered.

In reading the Dec 2 Staff Report citizens conducted additional analysis of City Park data. That research further reinforces and documents the 14 Critical Coastal Recreation issues and highlights the relatively poor amount of City Park and Coastal Recreation planned by Carlsbad’s Staff proposed Draft LCP-LUPA. We hope the City Council and City Commissions, and CA Coastal Commission & HCD will consider this additional analysis of City data and citizen input:

<u>Coastal Zone data</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>	<u>note or source</u>
Coastline miles	6.4	3.9	6.0	Carlsbad Draft LCPA 201, Google Maps
Coastal Zone Acres	9,219	1,460	7,845	& Oceanside & Encinitas LCPs
Coastal Zone Acres	100%	16%	85%	% relative to Carlsbad

City Park Standard data

City Park Standard	3	5	5	required park acres / 1,000 population
Park Standard %	100%	167%	167%	% is relative to Carlsbad

- Oceanside & Encinitas 'require' and plan for 67% MORE Parkland than Carlsbad
- Carlsbad 'requires' and plans for ONLY 60% as much Parkland as Oceanside & Encinitas
- Carlsbad only requires developers provide 60% of the parkland (or in-lieu fees) as Oceanside & Encinitas require
- Encinitas has a 'Goal' to provide 15 acres of Park land per 1,000 population

Developed City Park	2.47	3.65	5.5	acres / 1,000 population
Developed Park	100%	148%	223%	% is relative to Carlsbad

- Oceanside provides 48% MORE developed park land than Carlsbad
- Encinitas provide 123% MORE developed park land than Carlsbad
- Carlsbad ONLY provides 68% and 45% as much Parks as Oceanside & Encinitas respectively

National Recreation & Park Asso. Metric: a typical City provides 1 park / 2,281 pop. & 9.9 Park acres / 1,000 population

- Carlsbad (3 acre) Park Standard is ONLY 30% of what a typical City provides nationally
- Carlsbad requires developers to provide, 70% LESS Park acres than typical City provides nationally

National Recreation & Park Asso., Trust for Public Land, et. al.: 10 minute (1/2 mile) Walk to a Park Planning Goal

- Both Oceanside and Encinitas plan parks to be within a 10-minute (1/2 mile) walk to homes.
- Carlsbad DOES NOT plan Parks within walking distance to homes
- Carlsbad is NOT providing equitable and walking/biking access to Parks

Some Carlsbad Parks that are not fully useable as Parks:

<u>Existing Parks with Unusable Open Space acreage</u>	<u>total park acres</u>	<u>Unusable park acres</u>	<u>% of park unusable</u>	<u>reason unusable</u>
Alga Norte - SE quadrant	32.1	10.7	33%	1/3 of park is a Parking lot not a park In many other Carlsbad Parks a significant percentage of those Parks are consumed by paved parking lots and unusable as a Park.
Hidden Hills - NE quadrant	22.0	12.7	58%	city identified unusable habitat open space
La Costa Canyon SE quadrant	14.7	8.9	61%	city identified unusable habitat open space
Leo Carrillo - SE quadrant	27.4	16.5	60%	city identified unusable habitat open space
Poinsettia - SW quadrant	<u>41.2</u>	<u>11.1</u>	<u>27%</u>	city identified unusable habitat open space
Existing Park subtotal	137.4	59.9	44%	44% of these Parks are unusable as Parkland

Anticipated Future Park development projects

<u>Park - quadrant</u>				
Veterans - NW	91.5	49.5	54%	estimated unusable habitat open space
Cannon Lake - NW	6.8	3.4	50%	estimated unusable water open space
Zone 5 Park expansion - NW	9.3	0	0	appears 100% useable as a Park
Robertson Ranch - NE	<u>11.2</u>	<u>0</u>	<u>0</u>	appears 100% useable as a Park
Future park subtotal	118.8	52.9	45%	45% of Future Parks are unusable as Parks

**Unusable Open Space acres**

**in Existing & Future Parks**      256.2    112.8      44%      **112.8 acres or 44% is unusable as Parks**

- 112.8 acres or 44% of the Existing & Future Parks are unusable Open Space and can't be used as Parkland
- **Based on City's minimum 3-acres/1,000 population Park Standard, 112.8 acres of Unusable Parkland means 37,600 Carlsbad Citizens (or 32.5% of Carlsbad's current population of 112,877) will be denied Parkland that they can actually use as a Park.**
- 112.8 acres of Existing & Future unusable 'park' / 3 acre park standard x 1,000 population = 37,600 Carlsbad citizens without useable parkland per City minimum standard.
- **59.9 acres of Existing unusable 'park' / 3 acre park standard x 1,000 population = 19,967 Carlsbad citizens and their children are currently being denied useable park land. 19,967 is 17.7% of Carlsbad's current population.**
- In addition to these 19,967 existing citizens and their children denied park land, the City needs to develop additional Park acreage in the NE, SW and SE quadrants to cover current shortfalls in meeting in the minimal 3 acre/1,000 population park standard for the current populations in the NE, SW and SE quadrants.
- **The current NE, SW and SE quadrants park acreage shortfalls are in addition to the 19,967 Carlsbad citizens and their children that do not have the minimum 3 acres of parkland per 1,000 population**
- **Current FY 2018-19 MINIMUM park acreage shortfalls are listed below. They are:**
  - 4.3 acres for 1,433 people in NE quadrant,
  - 6.8 acres for 2,266 people in SW quadrant, and
  - 2.3 acres for 767 people in SE quadrant

Shortfall (excess) in  
Current Quadrant  
Park standard by

	population		Future Park		existing Park shortfalls are for NE, SW & SE quadrants
	acres	need	acres	%	
NW quadrant	(-14.2)	(-4,733)	107.6	91%	Current NW parks are 14.2 acres over min. standard & capacity for 4,733 more people at min. park standard. 91% of all Future City Parks are in NW quadrant
NE quadrant	4.3	1,433	11.2	9%	Future Park will exceed minimum NE park standard
SW quadrant	6.8	2,266	0	0%	No min. parks for 2,266 people in SW quad. Park deficit
SE quadrant	2.3	767	0	0%	No min. parks for 767 SE quadrant Park deficit

A Park Standard minimum is just a “Minimum”. City policy allows the City to buy/create parks above the City’s current 3 acre/1,000 pop. MINIMUM (and lowest) Park Standard of surrounding Coastal cities. Carlsbad already did this in the NW quadrant. It then added 3.1 more NW quadrant Park acres as part of the Poinsettia 61 Agreement. Poinsettia 61:

- converted 3.1 acres of NW City land planned/zoned for Residential use to Open Space Park land use/zoning,
- facilitated a developer building condos (increasing park demand) in the SW quadrant,
- required the SW Quadrant developer pay \$3 million to build the 3.1 acre NW quadrant park, and
- required the SW Quadrant developer pay to convert 3.1 acres of NW Quadrant & 5.7 acres of SW Quadrant City Park land to habitat that will be unusable as a City Park.

So Poinsettia 61 increased SW Quadrant development (that both increased SW Park Demand and expanded the current SW Quadrant Park deficit) while simultaneously using SW Quadrant development to pay for the conversion of 3.1 acres of residential land in the NW Quadrant to City Park (the NW Quadrant already has surplus park land per the City’s minimum standard).

People for Ponto strongly supports creating City Parks above the City’s current low 3-acre per 1,000 population minimum, as the City’s minimum standard is relatively low and substandard relative to other cities; many Carlsbad parks have significant acreage that is in fact ‘unusable’ as a park. Most importantly People for Ponto Citizens think it is very important to prioritize providing City Parks in areas of Park Inequity that are unserved by City Parks. However it seems very unfair to the SW Quadrant citizens to be so unserved and starved of the bare minimum of City Parks while at the same time funding City Parks in excess of City standard in other Quadrants.

The Poinsettia 61 illustrates a larger unfair (and dysfunctional) distribution of Quadrant based City Park demand and supply that is keenly evident in the demands/supply funding and location disparity of Veterans Park. Most all the development impact and park demand that paid Veterans Park fees came from the SW, SE and NE Quadrants yet the Veterans Park (supply) is not in those SW, SE and NE Quadrants. This inequity is counter to the implicit City requirement that City Parks be provided within the Quadrant of their Park demand. It is logical and proper that City Parks be provided and equitably distributed to be close to the development and population that generated the demand for that Park.

The City Park inequity at Ponto and in other Coastal areas of the City is counter to several CA Coastal Act policies; counter to good city planning and good CA Coastal planning; is highly detrimental to the City, City and CA citizens in the long-term; fails to properly distribute and match the location supply with the location of demand for Parks; and is counter to basic fundamental issues of fairness. Since 2017 People for Ponto has tried to get the City Council and City Staff to address this inequity, specifically at Ponto, and to do so in a way that embraces a true and honest Citizen-based planning process.

**Coastal Recreation:**

2. Request that the City as part of its Draft LCP Public Review process broadly-publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCPA processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park: This disclosure is needed to correct about 20 years of City misrepresentation to the public on the since 1996 and currently Existing LCP requirements at Ponto, and the City's prior planning mistakes at Ponto. Citizens have been falsely told by the City that all the Coastal planning at Ponto was done already and that the City followed its Existing LCP regarding the need for a park at Ponto, and that this is already decided and could not be reversed. This misinformation has fundamentally stifled public review and public participation regarding the Coastal Zone. City failure to provide such a broad-public disclosure on the documented prior, and apparently current proposed, "planning mistakes" would appear to violate the principles of Ca Coastal Act Section 30006. A broad-public disclosure would for the first time allow citizens to be accurately informed on the Existing LCP requirements at Ponto so they can provide informed public review and comment regarding the need for a Coastal Park in in this last vacant 'unplanned' area. The requested broad-public disclosure by the City of the City past mistakes and the Existing LCP requirements at Ponto is consistent with CA Coastal Act (CCA) "Section 30006 Legislative findings and declarations; public participation - The Legislature further finds and declares that **the public has a right to fully participate in decisions affecting coastal planning**, conservation and development; that achievement of **sound coastal conservation and development is dependent upon public understanding and support**; and that the continuing planning and implementation of **programs for coastal conservation and development should include the widest opportunity for public participation.**" The public cannot participate as outlined in CCA Section 30006 if past City 'mistakes' and misrepresentations on Coastal planning at Ponto go undisclosed to the public. If the public isn't fully informed about the 20-years of LCP planning mistakes at Ponto how could the public in the past (and now in the present) participate in the proposed LCP Amendment – **Public Participation as noted in Section 30006 above is the means to sound coastal conservation and development and is "... dependent upon public understanding ..."**. The City's past mistakes at Ponto need to be corrected by slightly different a Draft LCP Amendment process than currently outlined by the City; a new process is needed that clearly, opening and honestly informs and engages the public on the Existing LCP Ponto issues. The City's current Draft LCP Amendment process fails to follow CCA Section 30006 in that most all the citizens we encounter are as yet unaware of the City's Ponto mistakes and how they can participate in in the DLCPA process without that information. We see this daily in conversations we have with our fellow citizens. We even saw at the Oct 20, 2019 Carlsbad Planning Commission meeting that the Planning Commission was unaware of the planning mistakes at Ponto. How can a decision body of the City make a decision without knowing about these prior 'planning mistakes' facts that surround what they are being asked to decide on? Repeatedly since 2017 Carlsbad citizens and People for Ponto have asked the City to fully acknowledge the City's prior flawed planning at Ponto, and to correct that with ether maintaining the Existing LCP Non-residential Reserve Land Use or restarting the Coastal Planning at Ponto with a true and accurately informed Community-based Coastal Planning process consistent with Section 30006.

We request the City during the DLCPA Public Review period broadly and publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCP and other "planning efforts" public participation processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park, and 1) provide a truly honest public participation process on that disclosure consistent with CCA Section 30006 as part of the Draft LCP Amendment process or 2) retain the Existing LCP Non-residential Reserve Land Use and require a comprehensive and honest community-based redo of Coastal Resource planning at Ponto.

3. City fully and publicly reply to and the City Council consider the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process: Lance Schulte on 1/23/20 received an email reply by the City to his follow-up email regarding the status of the 11/20/19 citizen concerns/requests public comments and letters presented to the Planning Commission. This is appreciated, however it is request that the City fully publicly reply to the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process and present the to the City Council 11/20/19 citizen concerns/requests so the City Council can consider them and provide any direction to City Staff. City Staff first presented a summary presentation of the proposed Draft LCP Amendment to the Carlsbad Planning Commission on November 20, 2019, and indicated the public comment period would close on November in less than 2-weeks. Citizens and citizen groups provided public testimony to the Planning Commission, both verbally and in two written letters. The CCC was copied on those letters. The testimony and letters noted significant concerns about the City's proposed LCP Amendment process and made three requests:
- Disclose and provide a publically accessible 'Redline Version' of the Existing 2016/Proposed LCP land use Plan and Policies so everyone can see the proposed changes to the Existing LCP.
  - Provide true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern or objections. Citizen Workshops, when done right, are valuable means to openly educate, discuss and work to consensus options. These areas, including Ponto, were/are subject to multiple lawsuits, so true open and honest public workshops would provide an opportunity to openly and honestly discuss the issues and hopefully build public consensus/support for solutions. This approach seems consistent with CCA Section 30006, and common sense.
  - Extend the public comment period 6-months to allow Citizen Review of the Redline Version of the LCPA and allow time for Citizen Workshops.

The City did extend the Public Review period 2-months over the holidays to January 31, 2020. This is appreciated although many think this is inadequate given the significance of the Proposed Land Use Plan Amendments, and lack of Redline Version to compare. The City and their consultants required several extra years beyond schedule prepare the proposed LCP Amendments. The extra years of City Staff work reflects on the volume of the over 500-pages in the documents and the time needed to understand the Existing LCP and then create an Amended LCP. Citizens need sufficient time, proper comparative tools (redline) and a process (workshops) to understand the proposed LCP Amendments that is reflective of extensive extra time needed by City Staff and consultants needed. Truncation of lay public review to a few months for an Amendment that took paid professionals many years to produce seems a more than a bit inappropriate. The City appears to be rejecting citizens' request to be provided a 'Redline Version' of the Existing 2016/Proposed LCP land use Plan. So public review comments will tainted or will miss many issues due having to manually cross-reference a 150-page Existing LCP LUP with a Proposed 350-page Proposed LCP LUP. There will be unknown and unconsidered changes in the Draft LCP Amendment that the public and city and CCC decision makers will not know about due to the lack of 'Redline Version'.

The City also appears to reject citizen requests for true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern – such as Ponto. Like Coastal Recreation issue #1 above the following citizen requests appear consistent with CA Coastal Act (CCA) Section 30006, and the City's rejection of that requests seem counter to the CA Coastal Act.

We again request of the City to provide: 1) a 'Redline Version' to the public and decision makers, along with sufficient time to review and comment on the 'Redline Version'; and 2) true Citizen Workshops for Ponto and the

other last remaining significant vacant Coastal lands in Carlsbad as part of the Draft LCP Amendment process, or as part of deferred LCP Amendment process for those areas.

4. Coastal Zoned land is precious: the very small amount of remaining vacant Coastal land should be reserved for “High-Priority” Coastal Recreation Land Uses under the CA Coastal Act to provide for the growing and forever ‘Buildout’ needs of Carlsbad and CA Citizens, and our visitors.
  - Less than 1.8% (76 square miles) of San Diego County’s 4,207 square miles is in Coastal Zone. This small area needs to provide for all the forever Coastal needs of the County, State of CA, and Visitors. Upland Coastal Recreation (Coastal Park) land use is needed to provide land to migrate the projected/planned loss of “High-Priority” Coastal Recreation land uses due to Sea Level Rise impacts. There is only 76 miles of total coastline in San Diego County; a significant amount is publicly inaccessible military/industrial land. So how the last few portions of Coastal Land within Carlsbad (which is about 8% of San Diego County’s Coastline) is planned for the forever needs for High-Coastal-Priority Recreation Land Use is critical for Carlsbad, San Diego, and California Statewide needs into the future.
  - Most all the developable Coastal land in Carlsbad is already developed with Low-Coastal-Priority residential uses. Only a very small percentage of Carlsbad’s developable Coastal land, maybe 1-2%, is still vacant. This last tiny portion of fragment of vacant developable Coastal Land should be documented in the Draft LCP and reserved for “High-Priority” Coastal Land uses – most critically Coastal Recreation – to address the growing Coastal Recreation needs from a growing population and visitors. These growing needs are all the more critical in that existing Coastal Recreation lands will be decreasing due to inundation and erosion due to DLCPA planned Sea Level Rise.
  - This image of the western half of San Diego County graphically shows (in the blue line) the very small Coastal Zone Area that needs to provide the Carlsbad’s and California’s Coastal Recreational needs for all San Diego County residents and Visitors:

We request that 1) the amount and location of remaining vacant Coastal land in Carlsbad be documented and mapped and be reserved for high-priority Coastal Land Uses consistent with CCA Goals in Section 30001.5 “... (c) ... **maximize public recreational opportunities in the coastal zone** consistent with sound resources conservation principles and constitutionally protected rights of private property owners. (d) **Assure priority for coastal-dependent and coastal-related development over other development on the coast.** ...”; 2). This data be used in the City’s analysis and the public’s review and discussion about the City’s proposed Draft ‘Buildout’ Land Use Plan. The City’s proposed Draft ‘Buildout’ Land Use Plan will forever lock in the amount “maximum public recreational opportunities in the coastal zone” and will be the final Coastal Land Use Plan that is supposed to “assure priority for coastal-dependent and coastal-related development over other development on the coast”. Most of Carlsbad’s Coastal Zone is already developed or committed to low-priority land uses contrary to these CCA Goals, so how we finally and forever plan to use of the last small remaining vacant Coastal Land is very important.

5. The proposed Draft LCP Amendment in Chapter 3 makes unfounded statements regarding the proposed Amendment to the LCP Land Use Plan provision of “High-Priority” Coastal Recreation land use: On page 3-3, at the beginning of the Chapter 3 – Recreation and Visitor Serving Uses the City correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation uses, and cites multiple CCA Sections to that effect. The City’s proposed Coastal Land Use Plan then states on page 3-5 that a high proportion of land in the City is dedicated open

space available for passive and active use, yet provides no justification or accurate metric to support this statement. This is a critical unsubstantiated and speculative statement that is not supported by any comparative data (justifying the “high proportion” statement). The City later in Chapter 3 compared the adjoining cities of Oceanside and Encinitas to try to show how the proposed Draft LCP LUP Amendment provides higher levels of Visitor Serving Accommodations. That ‘non-common denominator’ comparison was fundamentally flawed, as noted in a prior separate Draft LCPA public review comment from People for Ponto regarding another high-priority Coastal land use (visitor accommodations) planned for in Chapter 3, but at least it was an attempt to compare. However, for the Coastal Recreation portion of Chapter 3, the City does not even attempt to provide any comparative data to support (or justify) the proposed Coastal Recreation Land Use Plan and statements. The Coastal Recreation Chapter also fails to disclose Carlsbad’s adopted City Park Master Plan (Park Service Area and Equity map) data that shows a clear conflict between the CA Coastal Act Policy Sections noted at the beginning of Chapter 3 and Chapter 3’s proposed Draft Coastal Recreation Land Use Plan.

Comparative Coastal Recreation: Comparing the Land Use Plan and policies of Oceanside, Carlsbad and Encinitas, one finds Carlsbad’s proposed Coastal Recreational Plan and Policies are not “high”, but very low compared with Oceanside and Encinitas. Carlsbad has a General Plan Park Standard of 3 acres of City Park per 1,000 Population. Oceanside has a 5 acres of City Park Standard per 1,000 population, and Encinitas has a 15 acres per 1,000 population standard, and an in-lieu park fee requirement of 5 acres per 1,000 population. Carlsbad’s proposed Coastal Recreation Land Use Plan is in fact not ‘high’ but is in fact the lowest of the three cities, with Carlsbad providing only 40% of Oceanside’s park standard, and only 20% of Encinitas’s Park Standard. Citywide Carlsbad currently has 2.47 acres of developed park per 1,000 population, Oceanside currently has 3.6 acres of developed park per 1,000 population, and Encinitas currently has 5.5 acres of developed park per 1,000 population. Although this data is citywide, it shows Carlsbad’s current amount of developed parkland is less than 70% of what Oceanside currently provides, and less than 45% of what Encinitas currently provides. Carlsbad is not currently providing, nor proposing a Coastal Land Use Plan to provide, a ‘high’ proportion of Coastal Recreation Land Use compared to Oceanside and Encinitas.

On page 3-5 Carlsbad may be misrepresenting city open space that is needed and used for the preservation of federally endangered species habitats and lagoon water bodies. This open space Land cannot be Used for Coastal Recreation purposes; and in fact Land Use regulations prohibit public access and Recreational Use on these Lands and water bodies to protect those endangered land and water habitats. 78% of Carlsbad’s open space is “open space for the preservation of natural resources” and cannot be used for Coastal Parks and Recreational use. Although “open space for the preservation of natural resources” does provide scenic or visual amenity, and this amenity is addressed as a different coastal resource. Visual open space is not Coastal Recreation Land Use. It appears Carlsbad is proposing in the Draft LCP Amendment to continue to, providing a ‘low’ percentage of Coastal Park Land Use and Coastal Recreation Land Use compared to adjoining cities.

In addition to the comparatively low amount of Coastal Park land Carlsbad plans for, Carlsbad scores very poorly regarding the equitable and fair distribution and accessibility of Coastal Parks and Coastal Recreation Land Uses. Both the City of Oceanside and Encinitas have very robust and detailed Park and Land Use plans to promote an equitable distribution of, and good non-vehicular accessibility, to their Coastal Parks. By comparison, Carlsbad’s park land use plan scores poorly, as exemplified in Ponto and South Carlsbad. Ponto’s existing population requires about 6.6 acres of City Parkland per Carlsbad’s low 3 acres per 1,000 population standard. Yet the nearest City Park is several miles away and takes over 50 minutes to walk along major arterial roadways and across Interstate 5 to access. As such this nearest park is not an accessible park for Ponto children, and thus Ponto children have to play in

our local streets to find a significantly large open area to play in. Ponto residents have to drive their kids to get to a park increasing VMT and GHG emissions. The City's proposed Coastal Recreation Land Use Plan 'solution' to Ponto's no-park condition, along with the City's need to add an additional 6.5 acres of new City parks in Southwest Carlsbad to comply with the Southwest Carlsbad's 2012 population demand (at a ratio of 3-acre/1,000 population) is to provide a City Park – Veterans Park – over 6-miles away from the Ponto and Southwest Carlsbad population need. This makes a bad situation worse. The City's proposed location is totally inaccessible to serve the needs of the population of children or anyone without a car, that it is intended to serve in South Carlsbad. This City proposed Coastal Recreation Land Use Plan 'solution' seems inappropriate and inconsistent with the CA Coastal Act and common sense. During the City's Veterans Park and budget community workshops citizens expressed a desire for a Ponto Park to be the solution to our Ponto and Southwest Carlsbad Park deficits. Those citizen requests were not apparently considered as part of the City's proposed Draft Coastal Recreation Land Use Plan. Following is an image summarizing the magnitude of citizen needs/desires expressed at the City's Budget workshop. Note the number and size of the text citing Ponto Park and South Carlsbad that reflects the number and magnitude/intensity of citizen workshop groups' input. The failure to acknowledge this public participation and data in the Coastal Recreation Land Use Plan Park seems in conflict with CCA Sections 30006 and 30252(6):

For South Carlsbad there is a complete lack of any existing or planned City Coastal Park and park acreage west of I-5, while North Carlsbad has 9 existing and 1 planned City Coastal Parks totaling 37.8 acres of City Coastal W of I-5 North Carlsbad. Not only is this unfair to South Carlsbad, it is also unfair to North Carlsbad as it increases VMT and parking impacts in North Carlsbad because South Carlsbad is not providing the City Coastal Parks for South Carlsbad resident/visitor demands. This City Park disparity is shown on Figure 3-1 of the Coastal Recreation Land Use Plan;

however it more accurately illustrated in the following data/image from the adopted Carlsbad Park Master Plan's "Service Area Maps (Equity Maps)". The image below titled 'No Coastal Park in South Carlsbad' shows Carlsbad's adopted "Park Service Area Maps (Equity Maps)" from the City's Park Master Plan that says it maps "the population being served by that park type/facility." The added text to the image is data regarding park inequity and disparity in South Carlsbad. The image compiles Carlsbad's adopted Park "Park Service Area Maps (Equity Maps)" for Community Parks and Special Use Area Parks that are the City's two park acreage types produced by the City's comparatively low standard of 3 acre of City Park per 1,000 population. The City's Park Service Area Maps (Equity Maps) shows areas and populations served by parks within the blue and red circles. City data clearly shows large areas of overlapping Park Service (areas/populations served by multiple parks) in North Carlsbad and also shows large areas in South Carlsbad with No Park Service (areas/populations unserved by any parks) and Park Inequity in South Carlsbad. It clearly shows the City's Documented Park Need and Park inequity at Ponto. The Existing LCP LUP for Ponto's Planning Area F in is required to "consider" and "document" the need for a "Public Park". The City's adopted Park Service Area Maps (Equity Maps) clearly shows the inequity of Coastal City Park between North and South Carlsbad, and the need for Coastal Parks in South Carlsbad – particularly at Ponto. The City's proposed Draft 'Buildout' Coastal Recreation Land Use Plan instead proposes to lock-in documented City Public Coastal Park inequity and unserved Coastal Park demand at Ponto and South Carlsbad forever. It does so by proposing the last vacant undeveloped/unplanned Coastal land – Ponto Planning Area F - in the unserved Ponto and South Carlsbad coastline areas instead of being planned for much needed City Park and Coastal Recreation use be converted to even more low-priority residential and general commercial land uses. These 'low-priority' residential uses, by the way, further increase City Park and Coastal Recreation demand and inequity in Coastal South Carlsbad. This is wrong, and a proposed 'forever-buildout' wrong at the most basic and fundamental levels. The proposed Draft Coastal Recreation Land Use Plan by NOT providing documented needed City parks for vast areas of Coastal South Carlsbad is inconsistent with the CA Coastal Act policies and Existing LCP LUP requirements for Ponto Planning Area F; and also inconsistent with fair/equitable/commonsense land use and park planning principles, inconsistent with CA Coastal Commission social justice goals, inconsistent with social equity, inconsistent with VMT reduction requirements, and inconsistent with common fairness. A different Coastal Recreation Land Use Plan should be provided that provides for a socially equitable distribution of Coastal Park resources so as to would allow children, the elderly and those without cars to access Coastal Parks. The proposed Draft 'Buildout' Coastal Recreation Land Use Plan forever locking in the unfair distribution of City Parks appears a violation of the not only CCA Sections 30213, 30222, 30223, and 30252(6) but also the fundamental values and principles of the CA Coastal Act. The Draft also appears a violation of Carlsbad's Community Vision.

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

A different Coastal Recreation Land Use Plan is required to provide a more equitable distribution of City Parks with non-vehicular accessibility. Such a different plan would advance State and City requirements to reduce vehicle Miles Traveled (VMT) and greenhouse gas emissions that contribute to climate change and sea level rise impacts. Please note that the data for the above basic comparison comes from City of Carlsbad, Oceanside and Encinitas General Plan and Park Master Plan documents.

Data shows the proposed Coastal Recreation Plan conflicts with the CA Coastal Act policy Sections. As mentioned page 3-3 correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation Land Uses, and pages 3-5 list multiple CA Coastal Act (CCA) policy Sections that confirm this. However, given the significant statewide importance of Coastal Recreation Land Use, the City proposed 'Buildout' Coastal Recreation Land Use Plan does not appear to adequately address and implement these CCA Policies, and most noticeably in the Ponto area of South Carlsbad. Coastal Recreation is a significant Statewide High-Priority Land Use under the CCA. For a substantially developed non-coastal-industry city like Carlsbad Coastal Recreation is likely the biggest land use issue. This issue is even more elevated due to the fact that there are only a few small areas left of undeveloped Coastal land on which to provide Coastal Recreation, and Carlsbad is proposing a Coastal 'Buildout' Land Use Plan on those areas. The use of the last few remaining vacant portions of Coastal land for Coastal Recreation Land Use is the most important land use consideration in the proposed Draft LCP Land Use Plan Amendment as population and visitor growth will increase demands for Coastal Recreation. It is thus very surprising, and disturbing that the proposed Coastal Recreation Land Use Plan is so short, lacks any comparative and demand projection data, lacks any resource demand/distribution and social equity data, and lacks any rational and clear connection with CCA Policy and the proposed 'Buildout' Coastal Land Use plan. This is all the more troubling given that:

- The Ponto area represents the last significant vacant undeveloped/unplanned land near the coast in South Carlsbad that can provide a meaningful Coastal Park.
- The fact that the City's Existing LCP requires the city consider and document the need for a "i.e. Public Park" on Ponto's Planning Area F prior to the City proposing a change of Planning Area F's "Non-residential

Reserve” land use designation. The City has repeatedly failed to comply with this LCP LUP requirement, and worse has repeatedly failed to honestly inform citizens of this LCP LUP requirement at planning Area F before it granted any land use. The City, apparently implementing speculative developer wishes, has repeatedly proposed changing Planning Area F’s Coastal Land Use designation to “low-priority” residential and general commercial land uses without publically disclosing and following the Existing LCP LUP.

- The City’s currently developed parks in the southern portion of the City do not meet the city’s comparatively low public park standard of only 3 acres per 1,000 population. Since 2012 there has been City park acreage shortfall in both SW and SE Carlsbad.
- The Existing population of Ponto (west of I-5 and south of Poinsettia Lane) requires about 6.6 acres of Public Park based on the City’s comparatively low public park standard of 3 acres per 1,000 population. There is no Public Park in Ponto. Adding more population at Ponto will increase this current park demand/supply disparity.
- Carlsbad and other citizens have since 2017 expressed to the City the strong need for a Coastal Park at Ponto, and requested the City to provide a true citizen-based planning process to consider the Public Park need at Ponto. The Citizens’ requested process is fully in-line with CCA Goals, Public Participation Policy, Land Use Policies, and the Existing LCP Land Use Plan/requirements for Planning Area F and is the most appropriate means to consider and document the need for a Public Park at Ponto as required by the Existing LCP Land Use Plan.
- Planning Area F is for sale, and a non-profit citizens group has made an offer to purchase Planning Area F for a much needed Coastal Park for both Ponto and inland South Carlsbad residents and visitors. How should these facts be considered by the City and CCC?
- Carlsbad has no Coastal Parks west of I-5 and the railroad corridor for the entire southern half of Carlsbad’s 7-mile coastline.
- The southern half of Carlsbad’s coastline is 5.7% of the entire San Diego County coastline and represents a significant portion of regional coastline without a meaningful Coastal Park west of I-5 and the Railroad corridor.
- The City’s proposed Coastal Recreation Land Use Plan provides No Documentation, No Rational, and No Supporting or Comparative Data to show the proposed Coastal Recreation Land Use Plan in fact complies with the CA Coastal Act.

6. There is no Coastal Recreation/Park west of interstate 5 for all South Carlsbad, or half of the entire City. This is an obviously unfair and inequitable distribution of Coastal Recreation/Park resources that should be corrected by changes to the Draft LCP Land Use Amendment: The following image (which was sent to the City and CCC on several prior communications) was first requested by former Carlsbad Councilman Michael Schumacher during a People for Ponto presentation/request at the Oct 23, 2018 City Council meeting. The data compiled in the image shows how the South Coastal Carlsbad (Ponto) is not served by a Park per the City’s adopted Parks Master Plan. The blue dots on the map are park locations and blue circle(s) show the City’s Park Master Plan adopted Park Service Areas and Park Equity. This data, from pages 87-88 of the City of Carlsbad Parks Master Plan, shows all City Parks (both Community Parks and Special Use Areas in Coastal Carlsbad (except Aviara Park east of Poinsettia Park and west of Alga Norte Park). The text on the left margin identifies the South Carlsbad Coastal Park (west of I-5) gap along with the number of South Carlsbad Citizens (over half the City’s population) without a Coastal Park. The left margin also identifies more local issues for the over 2,000 Ponto area adults and children. For Ponto residents the nearest Public Park and City proposed ‘solution’ to the South Carlsbad and Ponto Public Park deficit are miles away over high-speed/traffic roadways and thus somewhat hazardous to access and effectively unusable by children/the elderly or

those without cars. Having been a 20-year resident of Ponto I regularly see our children have to play in the street as there are no Public Park with large open fields to play at within a safe and under 1-hour walk away. Ponto citizens have submitted public comments regarding this condition and the lack of a Park at Ponto

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

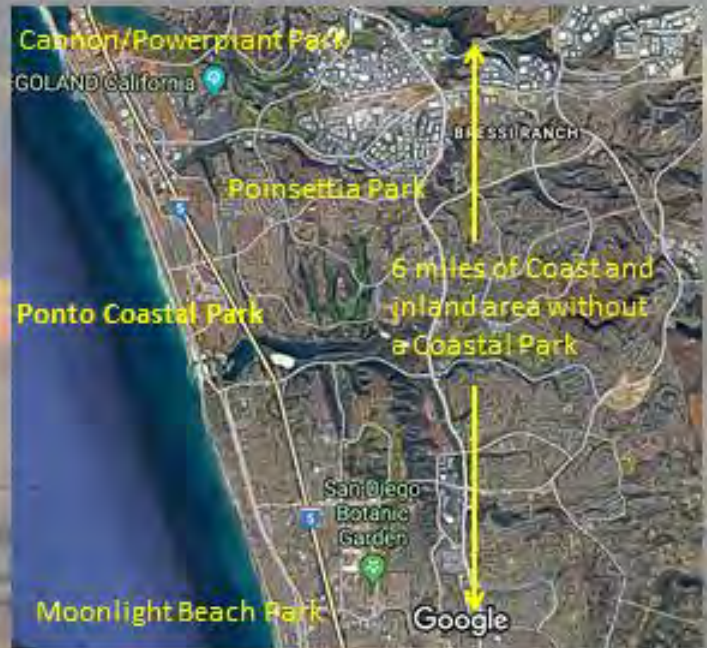

Ponto is at the center of regional 6-mile Coastal Park Gap. A Coastal Park in this instance being a Public Park with practical green play space and a reasonable connection with the Coast (i.e. located west of the regional rail and Interstate-5 corridors). The following image shows this larger regional Coastal Park Gap centered on the Ponto Area, and the nearest Coastal Parks – Cannon Park to the north, and Moonlight Park to the south.

Regionally this image shows Ponto is the last remaining significant vacant Coastal land that could accommodate a Coastal Park to serve the Coastal Park current needs of over existing 2,000 Ponto residents, 64,000 existing South Carlsbad residents, and a larger regional population. It is also the only area to serve the Coastal Park needs for the thousands of hotel rooms in Upland Visitor Accommodations in South Carlsbad.

# How Ponto Serves Region

- Ponto is in the middle of the regional Coastal Park Gap
- A Ponto Coastal Park fills a critical 6 mile gap of coastline without a Coastal Park - 8.6% of SD County coastline
- A Ponto Coastal Park Serves over 26,000 homes & 64,000 citizens just in South Carlsbad without a Coastal Park
- Serves many more people outside Carlsbad

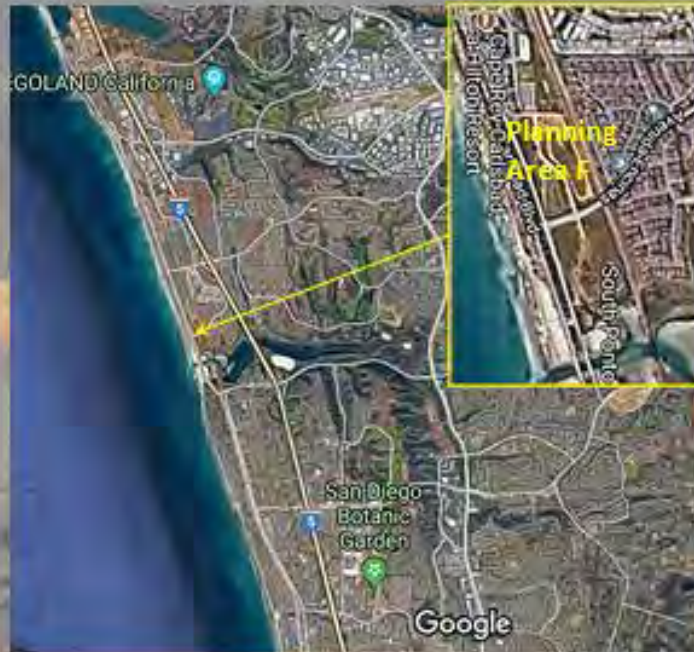

As People for Ponto first uncovered and then communicated in 2017 to the City and CCC; Carlsbad's Existing (since 1994) Local Coastal Program LUP currently states (on page 101) that Ponto's Planning Area F: carries a Non-Residential Reserve (NRR) General Plan designation. Carlsbad's Existing Local Coastal Program Land Use Plan states: "Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an "unplanned" area ..." and requires that: "... **As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.**" CA Coastal Commission actions, Carlsbad Public Records Requests 2017-260, 261, and 262, and 11/20/19 City Planner statements confirm the City never fully communicated to Carlsbad Citizens the existence of this LCP requirement nor did the City comply with the requirements. Of deep concern is that the City is now (as several times in the past) still not honestly disclosing to citizens and implementing this Existing LCP requirement as a true and authentic 'planning effort'. The lack of open public disclosure and apparent fear of true public workshops and Public Comment about the Existing Planning Area F LCP requirements are troubling. The point of a 'planning effort' is to openly and publically present data, publically discuss and explore possibilities/opportunities, and help build consensus on the best planning options. Citizens are concerned the city has already made up its mind and there is no real "planning effort" in the proposed Draft LCP Amendment process, just a brief Staff Report and at the end provide citizens 3-minutes to comment on the proposal. This is not the proper way to treat the last remaining significant vacant land in South Carlsbad that will forever determine the Coastal Recreation environment for generations of Carlsbad and California citizens and visitors to come.

The following data/images show how Ponto is in the center of the 6-mile (west of I-5 and Railroad corridor) regional Coastal Park gap. Ponto is the last remaining vacant and currently "unplanned" Coastal land that is available to address this regional Coastal Park Gap.

## How Ponto Serves Region cont.

- **Relieves Coastal Park congestion** in North Carlsbad, Encinitas and Solana Beach
- Area currently needs Coastal Park as seen by:
  - Ponto Beach parking congestion
  - current trespass use of Planning Area F as a Park
- **6.6 acre portion of Planning Area F** addresses SW Quad City Park deficit

## How Ponto Serves Region cont.

- A Ponto Park helps address 2050 and beyond Regional Population and Visitor Growth demands for Coastal Parks
- A Ponto Park provides the lowest-cost coastal access and recreation opportunities for CA citizens and visitors

## How Ponto Serves Region cont.

- Vital park and open space amenity for Visitor serving businesses and accommodations
- 6.6 acre unique City Coastal Park venue to stage special events: Runs, bike rides, triathlons, sports, coastal festivals, etc.

## How Ponto Serves Region cont.

- Critical Park space for So. Carlsbad State Beach Campground
- Provides a big training and staging space for Junior lifeguards
- Dog walk trail

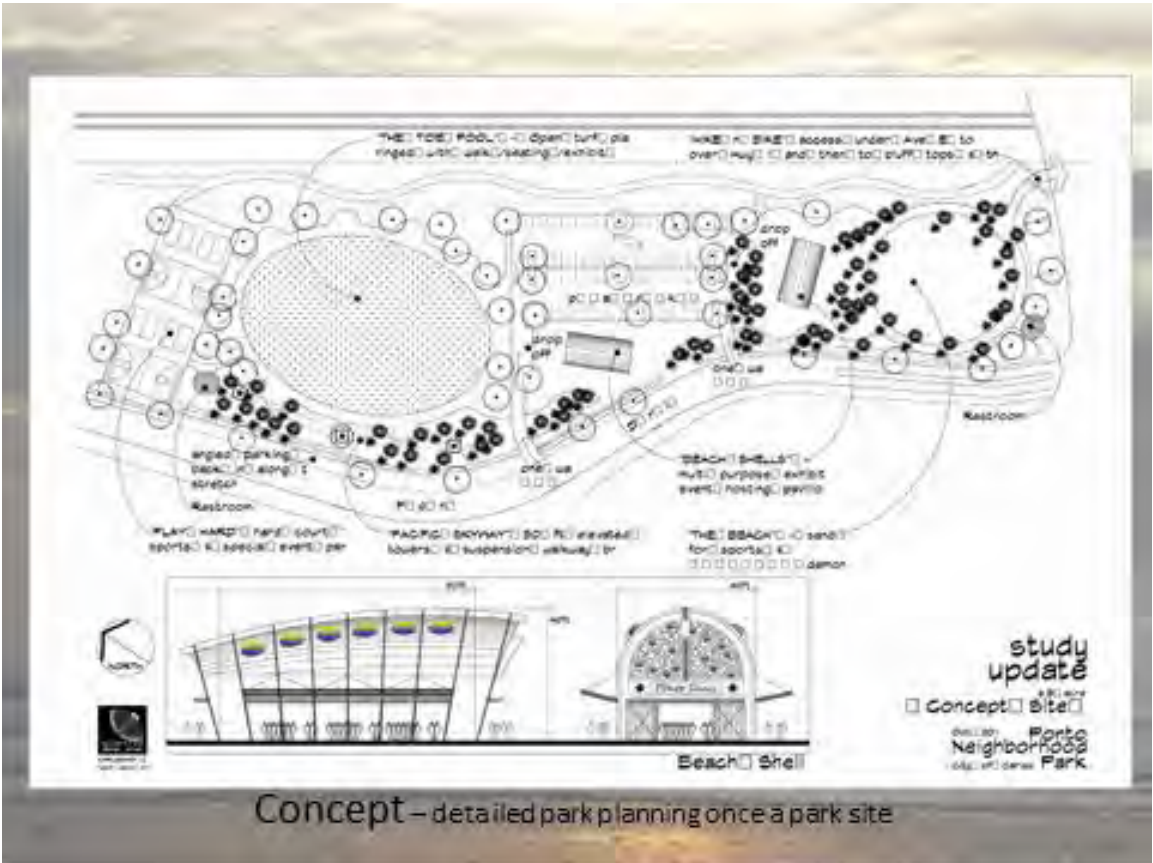

# Ponto Coastal Park Concept

- A concept – but shows potential recreational opportunities
- Provides **vital parkland support for beach & open play fields**
- Concept plan a gift from San Pacifico Community Association

One possible Concept image of a potential Ponto Coastal Park at Planning Area F is illustrated below. The potential for a Ponto Coastal Park is real. The speculative land investment fund (Lone Star Fund #5 USA L.P. and Bermuda L.P.) that currently owns Planning Area F is selling the property, and is available for the City of Carlsbad to acquire to address the documented demand/need for a City Park and City Park inequity at Ponto and in Coastal South Carlsbad. A Ponto Beachfront Park 501c3 is working to acquire donations to help purchase the site for a Park. These situations and opportunities should be publicly discussed as part of the City Staff's proposed Local Coastal Program Land Use Plan Amendment.

7. Projected increases in California, San Diego County and Carlsbad population and visitor growth increases the demand for High-Priority-Coastal Recreation land use:

- Increasing Citizen demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

San Diego County Citizen Population - Source: SANDAG Preliminary 2050 Regional Growth Forecast

1980	1,861,846
1990	2,498,016
2000	2,813,833
2010	3,095,313
2020	3,535,000 = 46,500 Citizens per mile of San Diego County coastline
2030	3,870,000
2040	4,163,688
2050	4,384,867 = 57,700 Citizens per mile of San Diego County coastline

2020 to 2050 = 24% increase in San Diego County population.

Citizen Population will continue beyond 2050. Carlsbad may plan for 'Buildout' in 2050, but what is San Diego County's 'Buildout'? There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for this growing population. If we do not increase our supply of Coastal Recreational Resources for these increased demands our Coastal Recreation Resources will become more overcrowded, deteriorated and ultimately diminish the Coastal Recreation quality of life for Citizens of Carlsbad and California. Porto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5) and there is No Coastal Park in all of South Carlsbad to address the Coastal Recreation needs of the 64,000 South Carlsbad Citizens.

- Increasing Visitor demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

Yearly Visitors to San Diego County – source: *San Diego Tourism Authority; San Diego Travel Forecast, Dec, 2017*

2016	34,900,000
2017	34,900,000
2018	35,300,000
2019	35,900,000
2020	36,500,000 = average 100,000 visitors per day, or 2.83% of County’s Population per day, or 1,316 Visitors/coastal mile/day in 2020
2021	37,100,000
2022	37,700,000

This is growth at about a 1.6% per year increase in visitors. Projecting this Visitor growth rate from 2020 to 2050 results in a 61% or 22,265,000 increase in Visitors in 2050 to:

2050	58,765,000 = average 161,000 visitors per day, or 3.67% of the County’s projected 2050 Population per day, or 2,120 Visitors/coastal mile/day in 2050.
------	--

The number of Visitors is likely to increase beyond the year 2050. There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for these projected 2050 61% increase, and beyond 2050, increases in Visitor demand for Coastal Recreational Resources. Increasing Coastal Recreation land is a vital and critically supporting Land Use and vital amenity for California’s, the San Diego Region’s and Carlsbad’s Visitor Serving Industry. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5). There are thousands of hotel rooms in South Carlsbad that have NO Coastal Park to go to in South Carlsbad. This needs correcting as both a Coastal Act and also a City economic sustainability imperative.

- We request that the as part of the public’s review, the City Staff proposed Draft LCP Amendment to the Land Use Plan clearly document if and/or how future forever ‘Buildout’ City, Regional and Statewide population and visitor population demand for Coastal Recreation and City Coastal Parks are adequately provided for both in amount and locational distribution in the Carlsbad proposed Amendment of the LCP Land Use Plan.

8. Carlsbad’s Draft Local Coastal Program Land Use Plan Amendment says it plans to a year 2050 buildout of the Coastal Zone. The Draft Local Coastal Program Land Use Plan Amendment then is the last opportunity to create a Coastal Land Use Plan to provide “High-Priority” Coastal Recreation Land Use, and will forever impact future generations of California, San Diego County, and Carlsbad Citizens and Visitors:

- The Draft LCPA indicates in 2008 only 9% of All Carlsbad was vacant land. Less is vacant now in 2019. Carlsbad’s Coastal Zone is 37% of the City, so vacant unconstrained land suitable for providing Coastal Recreation is likely only 3-4%. The prior request for a full documentation of the remaining vacant Coastal lands will provide a better understanding needed to begin to make the final ‘buildout’ Coastal Land Use Plan for Carlsbad. The Draft LCPA does not indicate the amount and locations of currently vacant unconstrained Coastal Land in Carlsbad. This final limited vacant land resource should be clearly documented and mapped in the DLCPA as it represents the real focus of the DLCPA – the Coastal Plan for these remaingn undeveloped

lands. These last remaining vacant lands should be primarily used to provide for and equitably distribute “High-Priority” Coastal Recreation Land Uses consistent with CCA Sections:

- i. Section 30212.5 “... Wherever appropriate and feasible, public facilities, including parking areas or facilities, **shall be distributed throughout an area so as to mitigate against the impacts, social and otherwise, of overcrowding or overuse by the public of any single area.**”;
- ii. Section 30213 “... **Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...**”;
- iii. Section 30222 “**The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development,** but not over agriculture or coastal-dependent industry.”
- iv. Section 30223 “**Upland areas necessary to support coastal recreational uses shall be reserved for such uses, where feasible**” ,
- v. Section 30251 ... The location and amount of new development should maintain and enhance public access to the coast by ... 6) assuring that the recreational needs of new residents will not overload nearby coastal recreation areas by **correlating the amount of development with local park acquisition** and development plans with the provision of onsite recreational facilities to serve the new development”

Adopted City Park Service Area and Park Equity maps discussed earlier document the proposed Draft LCP Amendment’s inconstancy with the above CCA Policy Sections. The locations and small amounts remaining vacant Coastal lands provide the last opportunities to correct the inconsistencies of City proposed Draft “buildout” LCP Land Use Plan Amendment with these Coastal Act Policies.

Currently and since 1996 there has been LCP LUP Policy/regulations for Ponto Planning Area F that require consideration of a “Public Park” prior to changing the existing “unplanned Non-residential Reserve” Land Use designation. A map and data base of vacant developable Coastal land should be provided as part of the Draft LCPA and the Draft LCPA. This map and data base should document the projected/planned loss of Coastal land use due to Sea Level Rise. Draft LCPA projects Sea Level Rise will eliminate several beaches and High-Priority Coastal Land Uses like Coastal Lagoon Trails and the Campground.

- The LCP Land Use Plan should plan and reserve the very limited vacant developable Coastal land for the long-term ‘Buildout’ needs of “High-Priority” Coastal Recreation Land Use. Vacant developable Coastal land is too scarce to be squandered for “low-priority” uses. Sea Level Rise will reduce “High-Priority” Coastal Uses. So how vacant developable Upland area should be preserved for “High-Priority” Coastal Uses is a key requirement to be fully documented and discussed in the Draft LCPA. If not one of two things will eventually happen 1) any new Coastal Park land will require very expensive purchase and demolition of buildings or public facilities to create any new Coastal Park land to meet existing and growing demand; or 2) Coastal Recreation will be hemmed-in by “low-priority” uses and thus force Coastal Recreation to decrease and become increasingly concentrated and overcrowded in its current locations; and thus will promote the eventual deterioration of our current Coastal Recreation resources. A plan that fails to fix Coastal Park deficits and then increase Coastal Parks in pace with increased population/visitor demand is a plan that can

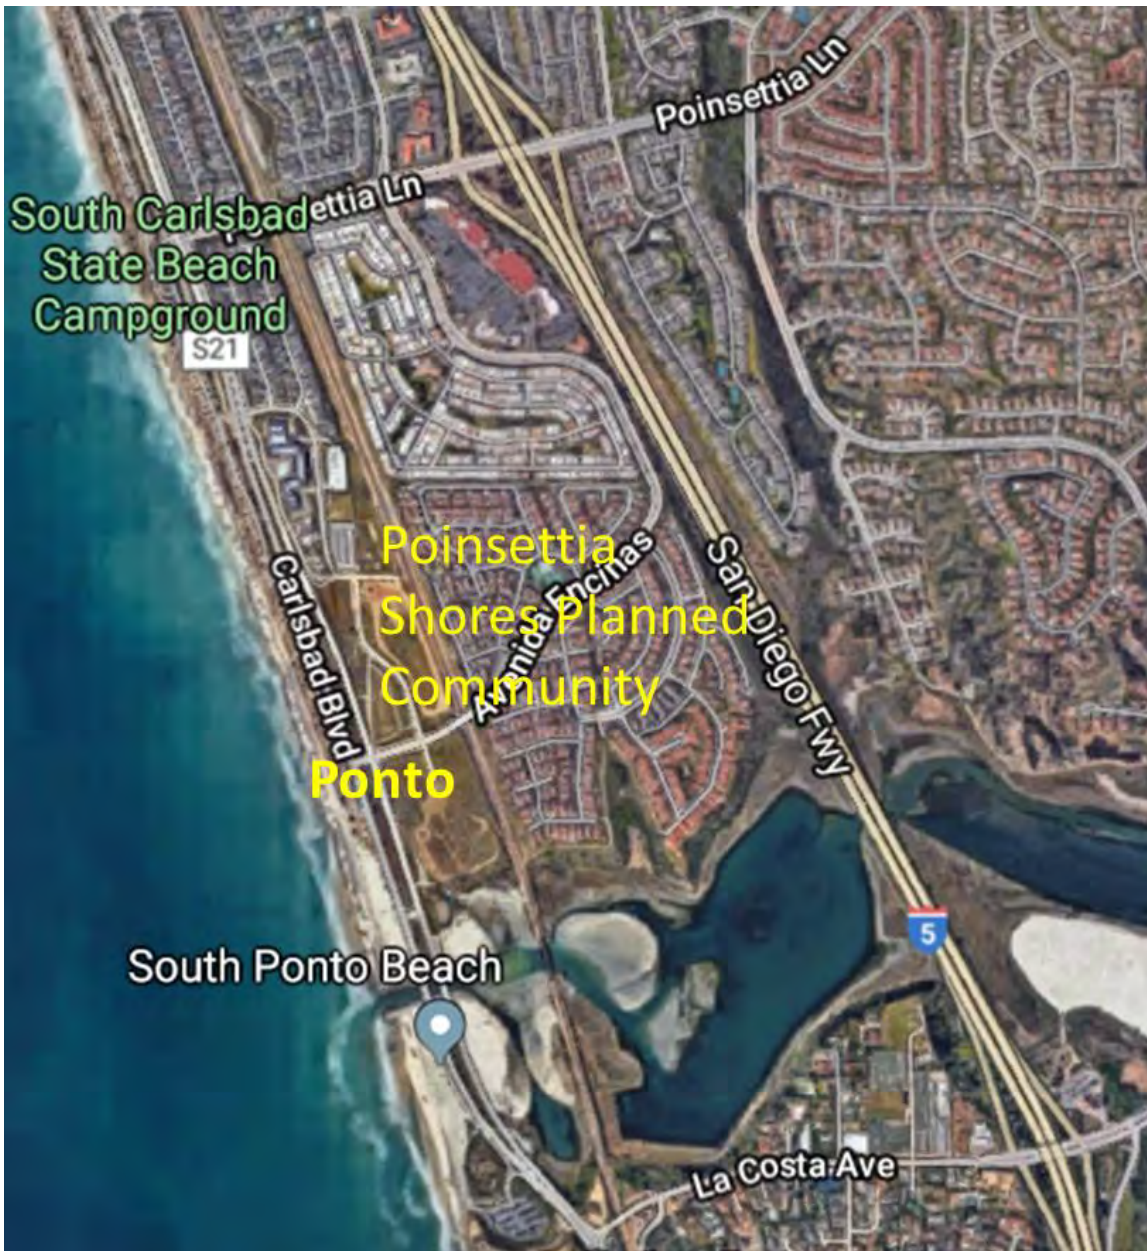

only result in degradation. How the Draft LCPA documents and addresses the land use planning of the last small portions of vacant developable Coastal land is critical for the future and future generations.

9. Citizens of South Carlsbad are concerned about the City's multiple prior flawed Ponto planning processes or 'mistakes' the City has made yet is basing the City Staff's proposed Draft LCP LUP. The concerns being the City is not openly and honestly communicating information to citizens and the public, and not allowing a reasonable and appropriate community-based planning process to address the documented Park, Coastal Recreation and unconstrained open space needs in South Carlsbad. One of these groups of citizens has created a [www.peopleforponto.com](http://www.peopleforponto.com) website to try to research and compile information and hopefully provide a better means for citizens to understand facts and then express their concerns/desires to the City of Carlsbad (City) and CA Coastal Commission (CCC). Over 2,000 emails have sent to the City and CCC regarding Coastal Land Use Planning Issues at Ponto. The San Pacifico Planned Community (i.e. San Pacifico Community Association) has also, since 2015, sent numerous emailed letters to the City and CCC noting the significant concerns about changes in Coastal planning the City is proposing for our Planned Community.

Repeatedly over 90% of surveyed citizens (results emailed prior to both the City and CCC) have expressed the vital need and desire for a Coastal Park at Ponto to serve the current and future Coastal Recreation needs for all both Ponto and South Carlsbad and for larger regional and State Coastal Recreational needs. This desire is supported by data, CA Coastal Act Policy, and also Carlsbad's Community Vision – the foundation for the City's General Plan. Ponto is the last remaining vacant Coastal area available to provide for those needs in South Carlsbad and for a regional 6-mile stretch of coastline. Citizens have expressed deep concern about the City's flawed prior Coastal planning efforts for Coastal Recreation at Ponto, including two repeated LCP Amendment "mistakes" (Ponto Beachfront Village Vision Plan in 2010 and General Plan Update in 2015) when the City twice failed to publicly disclose/discuss and then follow the Existing LCP requirements at Ponto – specifically for Planning Area F. People for Ponto had to use multiple Carlsbad Public Records Requests in 2017 to find these "mistakes". CCC Staff was helpful in both confirming the City "mistakes" and communicating back to the City. As citizens we are still unclear as to how/why these two repeated "mistakes" happened. There is citizen concern that the City is again repeating these two prior "mistakes" by not at the beginning of the Public Comment Period clearly and publicly disclosing the Planning Area F LCP requirements to citizens as part of the current LCP Amendment process, and also by not implementing the existing LCP requirement PRIOR to proposing an Amended Coastal Land Use Plan for Ponto. The City in its proposed LCP Amendment process is putting-the-cart-before-the-horse with respect to honest and open consideration, documentation and public discussion of the need for high-priority Coastal Recreation land use required of Planning Area F at Ponto. The City is also not clearly letting all Carlsbad citizens know about the Existing LCP requirements for Ponto's Planning Area F so they can be informed to reasonably participate in public review and comment regarding amending that LCP requirement, and the need for Coastal Recreation land uses in South Carlsbad. Since 2017 there has been repeated citizen requests to the City (copies were provided to the CCC) to fix these multiple fundamental/foundational flaws by in the City's prior Coastal Recreation and Public Parks and Open Space at planning, and the currently Proposed Draft LCP Land Use Plan Amendment. Since 2017 there have also been repeated citizen requests to the City to provide a truly open, honest, inclusive community-based planning process and workshops with the accurate and honest information, prior to forming a proposed Draft LCP Land Use Plan Amendment. As citizens we believe we can constructively work with the City and CCC towards a consensus or viable options on these important Coastal Recreation issues if the City allows and encourages such an open, honest and inclusive process. We request the City respond to the requests submitted to the City since 2017, and again request such a process from the City before any LCP Amendment is first considered by the Planning Commission and City Council. Such a requested process benefits all.

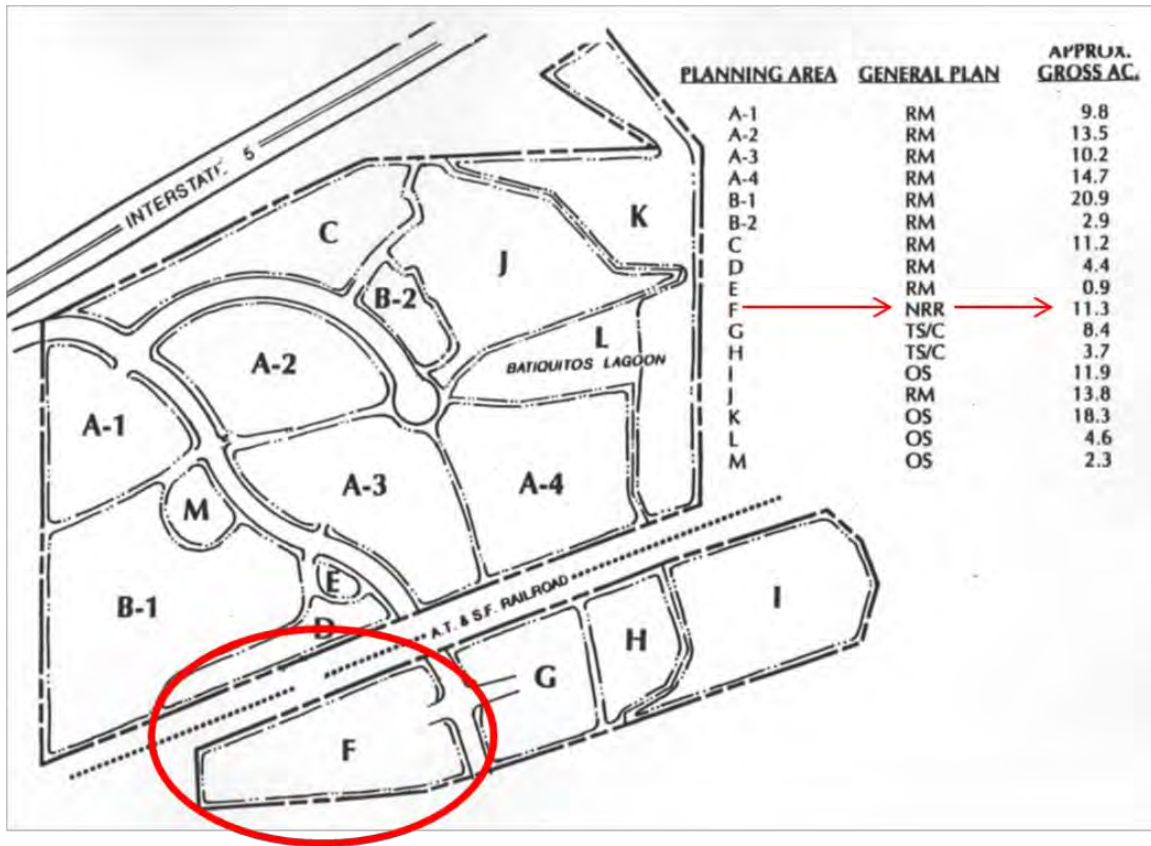

10. Why the Draft LCPA Land Use Plan for Ponto should provide for the current and future Coastal Park and Recreation needs for South Carlsbad, the San Diego Region and California.

- Ponto, is one of last remaining vacant and undeveloped Coastal lands in North County
- Ponto is the last remaining undeveloped Coastal land in South Carlsbad
- Ponto has the last unplanned Planning Area of the Existing Poinsettia Shores Planned Community & Local Coastal Program that can be planned for high-priority Coastal Recreation land use. This Existing LCP requires Planning Area F be considered for a “Public Park”.
- Following is a map of the Ponto area in South Carlsbad:

Following is the LCP Land Use map from the Existing Poinsettia Shores Master Plan & Local Coastal Program adopted in 1996. This is the Land Use map that the City is proposing to change in the proposed LCP Amendment to the Land Use Plan. As the Existing LCP Land Use map shows most all the land is ‘low-priority’ residential use at an RM Residential medium density, a small portion is ‘high-priority’ Visitor Serving TC/C Tourist Commercial. Most all the

Open Space is constrained and undevelopable land (the steep CSS habitat bluffs above Batiquitos Lagoon) or water (the lagoon water). This land/water is owned by the State of California, like the inner lagoon east of I-5. Only Planning Area M at 2.3 acres is unconstrained Open Space and it provides a small private internal recreation facility for the approximately 450 homes and 1,000 people in the Planned Community. This small recreation area is a City requirement for ‘planned developments’ to off-set loss open space from planned development impacts on housing quality. Planned developments can propose designs that reduce normal setback and open space areas – they bunch together buildings to increase development – such as the smaller lot sizes, and extensive use of “zero-setbacks” to reduce typical lot sizes that occurs at Poinsettia Shores. A private recreation facility in any of the City’s planned developments is never considered a replacement for required City Parks. Planned Developments, like unplanned developments, are required to dedicate Park land to the City, or pay a Park In-Lieu fee to the City so the City provide the developer’s obligation to provide City Park acreage to address the population increase of their proposed planned development. For Poinsettia Shores’ population the City’s minimum City Park Standard would require developers set aside 3 acres of City Park land for local park needs. For the larger Ponto area population about 6.6 acres of City Park Land is required. The Existing LCP reserves Planning Area F as an unplanned “Non-residential Reserve” Land Use until the Public Park needs for Ponto are considered and documented. Only then can the NRR land use be changed.

11. Developers have overbuilt in the Ponto area of the Coastal Zone. The City of Carlsbad has under questionable circumstances is currently choosing to ‘exempted’ Ponto developers from providing the minimum amount of unconstrained Open Space according to the City’s developer required Open Space Public Facilities Standard. The legality of these confusing circumstances is subject to a lawsuit against the City. However the City’s computerize mapping system has documented that the Ponto area of the Coastal Zone is missing about 30-acres of Unconstrained Open Space that can be used to fulfill the City’s Open Space Performance Standard that states that

15% of unconstrained and developable land must be preserved by developers as Open Space. Following is a summary of data from the City data regarding the missing Open Space at Ponto (Local Facility Management Plan Zone 9, LFMP Zone 9) in the Coastal Zone pursuant to the City's Open Space Performance Standard. If it is desirable People for Ponto can provide the City GIS map and parcel-by-parcel data base on which the following summary is based:

City of Carlsbad GIS data calculations of Open Space at Ponto area of Coastal Zone:

472 Acres = Total land in LFMP Zone 9 [Ponto area] per City of Carlsbad GIS data

(197 Acres) = Constrained land/water/infrastructure that is excluded from the City's Open Space Standard

275 Acres = Unconstrained land in LFMP Zone 9 (Ponto) subject to the City's Open Space Standard

X 15% = Minimum unconstrained Open Space requirement per the City Open Space Standard

41 Acres = Minimum unconstrained Open Space required in LFMP Zone 9

(11 Acres) = Actual unconstrained Open Space provided & mapped by City in LFMP Zone 9

**30 Acres = Missing unconstrained Open Space needed in LFMP Zone 9 [Ponto area of Coastal Zone] to meet the City's minimum GMP Open Space Standard. 73% of the required Open Space Standard is missing.**

Thus the Ponto area of the Coastal Zone appears overdeveloped with 30 additional acres of "low-priority" residential land uses due to developers' non-compliance to the City's Open Space Public Facility Performance Standard's Minimum developer required Open Space requirement. As noted a citizens group has a pending lawsuit with the City over the City's current 'exempting' Ponto and future developers from meeting the Open Space Standard.

12. The prior pre-1996 LCP for Ponto – the Batiquitos Lagoon Educational Park Master Plan & LCP (BLEP MP/LCP) had significant Open Space and recreational areas. These significant Open Space and Recreational areas were removed with BLEP MP/LCP's replacement in 1996 by the currently existing Poinsettia Shores Master & LCP (PSMP/LCP) and its City Zoning and LCP LUP requirements that reserved Planning Area F with the current "Non-residential Reserve" Land Use designation. Since the BLEP MP/LCP it appears developers and the City of Carlsbad have worked to remove "High-Priority" Coastal land uses (i.e. Coastal Recreation and Park uses) out of the Ponto area and replaced them with more "low-priority" residential and general commercial land uses. For example:

- Planning Area F used to be designated "Visitor Serving Commercial" as part of the original 1980's BLEP MP/LCP for Ponto.
- In 1996 the BLEP MP LCP was changed by developer application to the now current PSMP LCP, and the LCP LUP designation changed from "Visitor Serving Commercial" to "Non-Residential Reserve" with the requirement to study and document the need for "High-Priority" Coastal Recreation (i.e. Public Park) and/or Low-cost visitor accommodations prior to any change to Planning Area F's "Non-residential Reserve" LCP land use.
- In 2005 the City started to try to change Planning Area F to low-priority residential and general commercial land use in the City's Ponto Beachfront Village Vision Plan (PBVVP). At this time the City made its first documented Coastal 'planning mistake' by not disclosing to the public the existence of Planning Area F's LCP requirements and then also not following those LCP requirements. The City's planning process seemed focused on addressing developer's land use desires, and increasing land use intensity to boost "Tax-increment financing" as the City had established a Redevelopment Project Area at Ponto. A short time after the State of CA dissolved Redevelopment Agencies due in part to such abuses by cities. The CCC formally rejected the PBVVP in 2010, citing the City's failure to follow the LCP requirements for Planning Area F.

- Five years later in 2015 the City again adopted a proposed General Plan Update to again change Planning Area F to low-priority residential and general commercial land use. The General Plan Update cited the City's PBVVP that was in fact rejected by the CCC only a few years before. The City again repeated their PBVVP's Coastal land use 'planning mistake' by again not disclosing to the public the existence of Planning Area F's LCP requirements and then not following those LCP requirements. It is unclear why the City did this only 5-years after the CCC specifically rejected the Ponto Beachfront Village Vision Plan for those same reasons.
- In 2017 citizens found and then confirmed these Ponto Coastal 'planning mistakes' by the City through multiple official Carlsbad Public Records Requests and CCC Staff confirmation. The CCC readily identified the mistakes, but the City's 2019 proposed Draft LCP Land Use Plan and planning process still has yet fully disclose these prior Coastal 'planning mistakes' to ALL citizens of Carlsbad - the failure to disclose and follow the Planning Area F LCP LUP and City Zoning requirements. Full City disclosure is needed now to try to correct many years of City misrepresentation to citizens on LCP required Coastal land Use planning at Ponto. It is needed now so the public is aware at the start of the Public Comment Period. In 2017 citizens began asking the City fix the City's over 12-years of misinformation and planning mistakes by 'restarting' Coastal land use planning at Ponto with an open and honest community-based Coastal planning process. These citizens' requests have been rejected.
- In 2019 the City Staff proposed citywide Draft LCP land Use Plan Amendment that again proposed to change Planning Area F to "low-priority" residential and general commercial land use, without First disclosing the Planning Area F LCP requirements with corresponding analysis of the Need for Coastal Recreation (i.e. Public Park) and/or low-cost visitor accommodations at Planning Area F and providing that Documented analysis for public review/Consideration/comment. This seems like another 3<sup>rd</sup> repeat of the prior two Coastal planning mistakes by the City. In 2019, again citizens asked for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again the City rejected citizens' requests.
- In 2020 thousands of public requests again asked, and are currently asking, for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again these requests are being rejected. Based on the significant citizen concern and the documented prior 'planning mistakes' at Ponto it appears reasonable and responsible for Ponto's Planning Area F to ether:
  - i. Retain its current Existing LCP LUP land Use of "Non-Residential Reserve" until such time as the City's past Ponto Beachfront Village Vision Plan and General Plan Update planning mistakes and other issues subject to current planning lawsuits against the City are resolved with a true, honest and open community-based Coastal planning process asked for by citizens since 2017. Or
  - ii. Propose in the Draft LCP Land Use Plan Amendment to re-designated Planning Area F back to a Visitor Serving Commercial and Open Space ("i.e. Public Park") to provide both "High-Priory" coastal uses v. low-priority residential/general commercial uses due to the documented Coastal Recreation and Low-cost visitor accommodation needs for both citizens and visitors at Ponto and South Carlsbad.

13. Questionable logic and inconsistency in proposed Draft land use map and policies: Chapter 2 Figure 2-2B & C on pages 2-19 & 20 proposes to Amend the existing LCP Land Use Plan Map, and policies LCP-2-P.19 and 20 on pages 2-27 to 2-29 propose Amendments to existing LCP policy and create a new added layer of policy referencing a Ponto/Southern Waterfront. The proposed Land Use Map and Policies serve to firmly plan for "low-priority" residential and general commercial land uses at Ponto with a clear regulatory Land Use Plan Map showing these land uses and by specific regulatory policy (LCP-2-20) that clearly requires (by using the words "shall") these "low

priority” uses. In contrast the “High-Priority” Coastal Recreation and Coastal Park land uses that would be designated as Open Space are not mapped at all in Figure 2-2B & C; and the proposed policy LCP-2-P.19 is both misleading and specifically does Not Require any “High-Priority” Coastal Recreation and Coastal Park land Use at Ponto and South Carlsbad. In fact page 2-22 specifically indicates two “may” criteria that would first need to occur in the positive before any potential Coastal Recreation and Coastal Park Land could then theoretically even be possible. It is highly probable that it is already known by the City that the proposed relocation of Carlsbad Boulevard (Coast Highway) is not very feasible and not cost effective, and will not yield (due to environmental habitat constraints, narrowness of the roadway median, and other design constraints) any significant dimensions of land that could potentially be designated Open Space and realistically be used as a Park.

The blank outline map (Figure 2-2B & C) provides no mapped Open Space Land Use designation, other than for the currently existing State Campgrounds’ low-cost visitor accommodations, so the proposed Land Use Plan Map is Not providing/mapping any new Open Space land use to address Coastal Recreation and Coastal Park needs. The Draft LCP Land Use Plan Amendment’s proposed/projected/planned Sea Level Rise and associated coastal erosion appears to indicate that this “High-Priority” low-cost visitor accommodation (Campground) land use designated as Open Space will be reduced in the ‘Buildout’ condition due to coastal erosion. So **the Draft LCP Land Use Plan is actually planning for a Reduction in Open Space Land Use in South Carlsbad and Ponto.** Both the blank outline map and the proposed Land Use Map Figure 2-1 DO NOT clearly map and designate both South Carlsbad’s Draft LCP Planned Loss of the Open Space Land Use and also any New or replacement unconstrained land as Open Space land use for Coastal Recreation and Coastal Park. This is an internal inconsistency in Land Use Mapping that should be corrected in two ways:

- 1) Showing on all the Land Use (Figure 2-1), Special Planning Area (Figure 2-2B & C), and other Draft LCP Maps the Draft LCP’s planned loss of land area in those maps due to the Draft LCP’s planned loss of land due to Sea Level Rise and Coastal Land Erosion. This is required to show how land use boundaries and Coastal Recourses are planned to change over time. or
- 2) Provide detailed Land Use Constraint Maps for the current Carlsbad Boulevard right-of-way that the City “may” or ‘may not’ choose (per the proposed “may” LCP-2-P.19 policy) use to explore to address the City’s (Park Master Plan) documented Coastal Recreation and Coastal Park land use shortages in Coastal South Carlsbad and Ponto. Clearly showing the potential residual Unconstrained Land within a Carlsbad Boulevard relocation that have any potential possibility to add new Open Space Land Use Designations (for Coastal Recreation) is needed now to judge if the policy is even rational, or is it just a Trojan horse.

The proposed internal inconsistency in mapping and policy appears like a plan/policy ‘shell game’. The proposed Land Use Plan Maps and Policies should be consistent and equality committed (mapped-shall v. unmapped-may) to a feasible and actual Plan. If not then there is No real Plan.

There is no Regulatory Policy requirement in LCP-2-P.19 to even require the City to work on the two “may” criteria. The City could choose to bury the entire Carlsbad Boulevard relocation concept and be totally consistent with Policy LCP-2-P.19 and the LCP. As such the language on 2-22, Figure 2-2C (and the proposed Land Use Map), and policy LCP-2-P.19 and 20 appear conspire to create a shell game or bait-and-switch game in that only “low-priority” residential and general commercial uses are guaranteed (by “shall” policy) winners, and “high-priority” Coastal Recreation and Coastal Park Land Uses are at best a non-committal ‘long-shot’ (“may” policy) that the city is specifically not providing a way to ever define, or commit to implement. The proposed Draft LCP Land Use Plan Coastal Recreation and Coastal Park statements for Ponto are just words on paper that are designed to have no force, no commitment, no defined outcome, and no defined requirement to even have an outcome regarding the

documented “High-Priority” Coastal Recreation and Coastal Park needs at Ponto, Coastal South Carlsbad and the regional 6-mile Coastal Park gap centered around Ponto.

Policy LCP-2-P.19 falsely says it “promotes development of recreational use” but does not in fact do that. How is development of ‘recreational use promoted’ when the Use is both unmapped and no regulatory policy requirement and commitment (no “shall” statement) to ‘promote’ that Use is provided? Policy LCP-2-19.19 appears a misleading sham that does not ‘promote’ or require in any way “High-Priority” Coastal Recreation and Park Land Use at Ponto. There should be open and honest public workshops before the Draft LCP Amendment goes to its first public hearing to clearly define the major environmental constraints and cost estimates involving possible relocation of Carlsbad Boulevard and constructing needed beach access parking, and sufficient and safe sidewalks and bike paths along Carlsbad Boulevard; and then map the amount and dimensions of potential ‘excess land’ that maybe available for possible designation as Open Space in the City General Plan and Local Coastal Program. The City should not repeat the mistakes at the Carlsbad Municipal Golf Course (resulting in the most expensive to construct maniple course in the USA) by not defining and vetting the concept first. A preliminary review of City GIS data appears the amount, dimensions and locations of any potential ‘excess’ land maybe modest at best. However before the City proposes a ‘Buildout’ Coastal Land Use Plan this critical information should be clearly provided and considered. It is likely the City’s Carlsbad Boulevard relocation concept is unfeasible, inefficient, too costly, and yields too little actual useable ‘excess land’ to ever approach the Coastal Recreation and Coastal Park needs for South Carlsbad. This may already be known by the City, but it surely should be publicly disclosed and discussed in the DLPCA.

The proposed Coastal Land Use Plan to address Carlsbad’s, San Diego County’s and California’s High-Priority Coastal Recreation Land Use and Coastal Park needs should NOT be vague “may” policy that appears to be purposely designed/worded to not commit to actually providing any “High-Priority” Coastal Recreation and Coastal Park land uses on the map or in policy commitments. The Land Use Plan and Policy for High-Priority Coastal Recreation and Coastal Park Land Use should be definitive with triggered “shall” policy statements requiring and assuring that the ‘Forever’ “High-Priority” Coastal Recreation and Coastal Park needs are properly and timely addressed in the City’s proposed ‘Buildout’ Coastal Land Use Plan. This “shall” policy commitment should be clearly and consistently mapped to show the basic feasibility of the planned outcomes and the resulting actual Land that could feasibly implement the planned outcome.

Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard: Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard are Coastal Access and Completes Streets issues. South Carlsbad Boulevard now and has for decades been a highly used Incomplete Street that is out of compliance with the City’s minimum Street Standards for pedestrian and bike access and safety. The Coastal Access portion of the Draft Land Use Plan should strongly address the Complete Street requirements for South Carlsbad Boulevard. Those policy commitments should be reference in Policy LCP-2-P.19 and 20 as Carlsbad Boulevard in **South Carlsbad is the most Complete Street deficient portion of Carlsbad Boulevard**. Forever Coastal Access parking demand and the proposed LCP Amendment’s Land Use Plan to supply parking for those demands should also be addressed as part of the Coastal Access and Complete Streets issues for South Carlsbad Boulevard. If much needed Coastal Access Parking is provided on South Carlsbad Boulevard as part of a “maybe” implemented realignment, most of the “maybe” realignment land left after constraints are accommodated for and buffered will likely be consumed with these parking spaces and parking drive aisles/buffer area needed to separate high-speed vehicular traffic from parking, a buffered bike path, and a sufficiently wide pedestrian sidewalk or Coastal Path. After accommodating these much needed Complete Street facilitates there will likely be little if any sufficiently

dimensioned land available for a Coastal Recreation and a Coastal Park. The needed Coastal Access and Complete Street facilities on South Carlsbad Boulevard are very much needed, but they are NOT a Coastal Park.

As mentioned the proposed Draft Coastal Land Use Plan's Maps and Policies are very specific in providing for the City's proposed LCP Land Use changes to 'low-priority' Residential and General Commercial' on Planning Area F (proposed to be renamed to Area 1 and 2). It is curious as to why the proposed Draft LCP Land Use Plan Amendment has no Land Use Map and minor vague unaccountable Land Use Policy concerning 'High-priority Coastal Recreation Land Use' at Ponto, while the very same time proposing very clear Land Use Mapping and detailed unambiguous "shall" land use policy requirements for 'low-priority' Residential and General Commercial land use at Ponto. Why is the City Not committing and requiring (in a Land Use Map and Land Use Policy) to much needed 'High-priority' Coastal Recreation and Coastal Park Land Use' needs at Ponto the same detail and commitment as the City is providing for "low-priority" uses? This is backwards and inappropriate. It is all the more inappropriate given the 'Buildout' Coastal Land Use Plan the City is proposing at Ponto. These issues and plan/policy commitments and non-commitments will be 'forever' and should be fully and publicly evaluated as previously requested, or the Existing LCP Land Use Plan of "Non-residential Reserve" for Planning Area F should remain unchanged and until the forever-buildout Coastal Recreation and Coastal Park issues can be clearly, honestly and properly considered and accountably planned for. This is vitally important and seems to speak to the very heart of the CA Coastal Act, its founding and enduring principles, and its policies to maximize Coastal Recreation. People for Ponto and we believe many others, when they are aware of the issues, think the City and CA Coastal Commission should be taking a long-term perspective and be more careful, thorough, thoughtful, inclusive, and in the considerations of the City's proposal/request to permanently convert the last vacant unplanned (Non-residential Reserve) Coastal land at Ponto to "low-priority" land uses and forever eliminate any Coastal Recreation and Coastal Park opportunities.

14. Public Coastal View protection: Avenida Encinas is the only inland public access road and pedestrian sidewalk to access the Coast at Ponto for one mile in each direction north and south. It is also hosts the regional Coastal Rail Trail in 3' wide bike lanes. There exist now phenomenal coastal ocean views for the public along Avenida Encinas from the rail corridor bridge to Carlsbad Boulevard. It is assumed these existing expansive public views to the ocean will be mostly eliminated with any building development seaward or the Rail corridor. This is understandable, but an accountable ('shall') Land Use Plan/Policy addition to proposed Policy LCP-2-P.20 should be provided for a reasonable Public Coastal View corridor along both sides of Avenida Encinas and at the intersection with Carlsbad Boulevard. Public Coastal view analysis, building height-setback standards along Avenida Encinas, and building placement and site design and landscaping criteria in policy LCP-2-P.20 could also considered to reasonably provide for some residual public coastal view preservation.
  
15. Illogical landscape setback reductions proposed along Carlsbad Boulevard, and Undefined landscape setback along the Lagoon Bluff Top and rail corridor in Policy LCP-2-P.20: Logically setbacks are used in planning to provide a buffering separation of incompatible land uses/activities/habitats. The intent of the setback separation being to protect adjacent uses/activities/habitats from incompatibility, nuisance or harassment by providing a sufficient distance/area (i.e. setback) between uses/activities/habitats and for required urban design aesthetics – almost always a buffering landscaping. Policy LCP-2-P.20. A.4 and C.3 says the required 40' landscape setback along Carlsbad Boulevard "maybe reduced due to site constraints or protection of environmental resources." The ability to reduce the setback is illogical in that setbacks are intended to protect environmental resources and provide a buffer for constraints. In the Carlsbad Boulevard right-of-way there is documented sensitive environmental habitat, along with being a busy roadway. How could reducing the protective 40' setback in anyway better protect that habitat or provide a better landscaped compatibility or visual aesthesis buffer along Carlsbad Boulevard? It is

illogical. If anything the minimum 40' landscaped setback should likely be expanded near "environmental resources". Regarding reducing the minimum 40' landscape setback for "site constraints" there is no definition of what a "site constraint" is or why it (whatever it may be) justifies a reduction of the minimum landscaped setback. Is endangered species habitat, or a hazardous geologic feature, or a slope, or on-site infrastructure considered a "site constraint"? There should be some explanation of what a "site constraint" is and is not, and once defined if it warrants a landscape setback reduction to enhance the buffering purpose of a landscape setback. Or will a reduction only allow bringing the defined constraint closer to the adjacent uses/activities/habitats that the landscape setback is designed to buffer. It is good planning practice to not only be clear in the use of terms; but also, if a proposed reduction in a minimum standard is allowed, to define reasonably clear criteria for that reduction/modification and provide appropriate defined mitigation to assume the intended performance objectives of the minimum landscape setback are achieved.

Policy LCP-2-P.20.C.4 is missing a critical Bluff-Top landscape setback. It seems impossible that the DLCPA is proposing no Bluff-Top setback from the lagoon bluffs and sensitive habitat. The Batiqitos Lagoon's adjoining steep sensitive habitat slopes directly connect along the Bluff-top. Batiqitos Lagoon's and adjoining steep sensitive habitat is a sensitive habitat that requires significant setbacks as a buffer from development impacts. Setbacks similar to those required for the San Pacifico area inland of the rail corridor, should be provided unless updated information about habitat sensitivity or community aesthetics requires different setback requirements.

Policy LCP-2-P.20 does not include a landscape setback standard adjacent to the rail corridor. This is a significant national transportation corridor, part of the 2<sup>nd</sup> busiest rail corridor in the USA. Train travel along this corridor is planned to increase greatly in the years to come. Now there is significant noise, Diesel engine pollution, and extensive ground vibration due to train travel along the rail corridor. Long freight trains which currently run mostly at night and weekends are particularly noisy and heavy, and create significant ground vibration (underground noise). These issues are best mitigated by landscape setbacks and other buffers/barriers. A minimum setback standard for sufficient landscaping for a visual buffer and also factoring appropriate noise and ground vibration standards for a buildout situation should be used to establish an appropriate landscape setback that should be provided along the rail corridor. Carlsbad's landscape aesthetics along the rail corridor should be factored into how wide the setback should be and how landscaping should be provided. An example for the landscape aesthetic portion of the setback standard could be landscape design dimensions of the San Pacifico community on the inland side of the rail corridor. However, noise and vibrational impacts at San Pacifico are felt much further inland and appear to justify increased setbacks for those impacts.

## City of Carlsbad - Your Comments Input

**Name** Karen Thuesen Walsh  
**E-mail** walshfamily@roadrunner.com  
**Comments** I would love to see pickle ball courts at stagecoach park.  
Have to drive all the way to poinsettia to use public  
pickle ball courts. Poinsettia is often very crowded and  
has long waits to play.

**If you do not wish to receive further emails from us, please check the box, and you will be removed from our mailing.**  No

**Subject:** RE: Tell us about parks & rec priorities at this week's meetings

Dear Carlsbad City Council and Parks Commission:

Sorry I am unable to attend the workshops. Following is my public input & data, and suggested questions the City should provide citizens in setting park land use policy and priorities:

A clear lesson from Covid is the need for flat wide open grassy parks that fully allow social distancing and multi-function park and recreation opportunities within a 10-minute walking distance to all neighborhoods. This fundamentally what city parks are intended to provide – flat wide-grassed-flat and fully useable multi-function spaces to recreate formally or informally, and being accessible by a short walk to all neighborhoods and children without having to drive a car to access.

Another clear lesson comes from new City and State parallel moves to demand unlimited population growth using higher density condo/apartment developments. These developments by definition pack more people into a smaller area thus creating an even greater need for parks. Making flat wide open grassy and fully useable parks even more important to be provided within a 10-minute walk.

Trails although nice to walk along in the outdoors force people into a 5-8 foot wide path that does not allow social distancing. A trail is not a park.

Carlsbad People for Ponto (P4P) Citizens have for years provided the City input on Parks and Recreation Priority issues from 2017 to less than 2-months ago, and to now. Since pre-Covid 2017 over about 5,000 written/verbal petitions and multiple budget processes have been provided. In an after-Covid situation, most recently in October 2021, about 700 written/verbal petitions and public testimony was provided. Carlsbad P4P Citizen input is based on documented City records. P4P Carlsbad Citizen input is/has been consistent with the above Covid observations and significant in the numbers of Citizens calling for a meaningful (i.e. usable wide, grassed multi-function) park at Ponto. The P4P Citizen input should be fully disclosed, discussed and accounted for in the Parks Master Plan.

P4P's 30-page October 15, 2021 "Coastal Recreation" data file to the City documented comparative park data that the City should fully present and discuss with Citizens as part of the Parks Master Plan. The comparative park data shows Carlsbad is below average nationally and significantly below our adjacent Cities in providing parks – and requiring Carlsbad developers provide parks for their developments. It also documents how over 112 acres, or over 33% of all existing/planned City parkland is constrained and unusable to humans to fully use as a park. Having over 33% of City Parks constrained and not fully useable a park for citizens is a significant city land use and parks master plan issue. The 30-pages of documented information and requests in the October 15, 2021 Coastal Recreation file should be a part of the park master plan process. Following are some key park data the City should present and key park priority questions on that data the City should ask citizens:

1. Carlsbad only requires developers to provide a comparatively low 3-acres of parkland per 1,000 population of Carlsbad developments. Encinitas and Oceanside require their developers to provide 5-acres per 1,000 population, which is over 60% more parkland than Carlsbad's City Council requires developers to provide.
  - a. Should Carlsbad require 60% less parkland than Encinitas and Oceanside?
  - b. Should Carlsbad require developers to provide the same 5-acres per 1,000 parkland as Encinitas and Oceanside?
  
2. Carlsbad does not plan for, or require developers, to provide parks within a 10-minute walk to homes. Both Encinitas and Oceanside require parks to be provided within a 10-minute walk of all homes in their Cities.
  - a. Should Carlsbad require parks to be within a 10-minute walk of homes like Encinitas and Oceanside?
  - b. Should Carlsbad require developers to provide their parkland requirement (3 or 5 acres/1,000 population) be within a 10-minute walk of homes the homes the developer builds like Encinitas and Oceanside?
  
3. Carlsbad is BELOW the national average in BOTH providing Parkland and in providing Parkland Within a 10-minutewalk to homes (see ,Trust for Public Land Park Score).
  - a. Should Carlsbad be below average nationally in providing Parkland?
  - b. Should Carlsbad provide Parkland to be in the top 10%, 20%, 30%, 40%, just average, or below average nationally? (select one)
  - c. Should Carlsbad be below average nationally in providing Parkland within a 10-minute walk to homes?
  - d. Should Carlsbad provide Parkland within a 10-minute walk of homes so as to be in the top 10%, 20%, 30%, 40%, just average, or below average nationally? (select one)
  
4. South Carlsbad composes 62% of Carlsbad's population, yet has no large grassy usable Coastal park (like a Holiday Park) and has 0-acers of park west of I-5.
  - a. Should 62% of Carlsbad's population have at least one large grassy and fully useable park?
  - b. Should South Carlsbad developers be required to correct this park inequity?
  
5. North Carlsbad composes 38% of Carlsbad's population, yet has 10 Coastal parks totaling over 35-acres west of I-5.
  - a. Should the City's planned park investments be re-prioritized to correlate the location of coastal park land acreage with population demand?
  
6. South Carlsbad developer fees paid to build and fund many North Carlsbad park acres in both Veterans Park and Poinsettia 61 Park.
  - a. Should the City appropriately use those South Carlsbad developer fees paid to build Veterans Park and Poinsettia 61 Park to fund parks in South Carlsbad where the development and park demand from that development occurred?

Thank you for your consideration. We look forward to confirmation that years of P4P citizen input to the City on Park issues is being considered in your efforts.

## **Parks & Recreation Master Plan Meetings are this Week**

Don't forget to register for one of two virtual meetings we're holding this week to talk about whether COVID has changed parks and rec priorities.

Thursday, Dec. 9, 6 to 7 p.m.

[Register](#)

Saturday, Dec. 11, 10 to 11 a.m.

[Register](#)

The City of Carlsbad is creating an updated blueprint that will guide priorities and proposed investments in parks and recreation for the next five years. This project was interrupted due to the COVID-19 pandemic, and as the project starts back up, the city wants to know if the community's priorities have changed.

Community members are encouraged to attend one of the two virtual meetings to hear the public feedback that was provided in February 2020 and let the city know if anything has changed.

The city's existing Parks & Recreation Master Plan was completed in 2015. The update will cover:

- Assessment of current parks, facilities and recreational programs
- Demographic and industry trends
- Community needs and priorities
- Funding needs and revenue opportunities
- A five-year strategic action plan

### **Other input opportunities**

Input from the workshops will be used to create a survey questionnaire to obtain feedback from a statistically representative group of Carlsbad residents. The survey will also be available online to anyone who wants to take it; however, the results will be analyzed separately from the random sample.

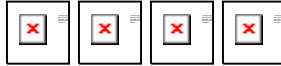

A draft of the master plan will be made available for input by the end of summer 2022, with a final draft scheduled to be presented to the City Council for approval in fall of 2022.

**Subject:** RE: Tell us about parks & rec priorities at this week's meetings

Dear Carlsbad City Council and Parks Commission:

Sorry I am unable to attend the workshops. Following is my public input & data, and suggested questions the City should provide citizens in setting park land use policy and priorities:

A clear lesson from Covid is the need for flat wide open grassy parks that fully allow social distancing and multi-function park and recreation opportunities within a 10-minute walking distance to all neighborhoods. This fundamentally what city parks are intended to provide – flat wide-grassed-flat and fully useable multi-function spaces to recreate formally or informally, and being accessible by a short walk to all neighborhoods and children without having to drive a car to access.

Another clear lesson comes from new City and State parallel moves to demand unlimited population growth using higher density condo/apartment developments. These developments by definition pack more people into a smaller area thus creating an even greater need for parks. Making flat wide open grassy and fully useable parks even more important to be provided within a 10-minute walk.

Trails although nice to walk along in the outdoors force people into a 5-8 foot wide path that does not allow social distancing. A trail is not a park.

Carlsbad People for Ponto (P4P) Citizens have for years provided the City input on Parks and Recreation Priority issues from 2017 to less than 2-months ago, and to now. Since pre-Covid 2017 over about 5,000 written/verbal petitions and multiple budget processes have been provided. In an after-Covid situation, most recently in October 2021, about 700 written/verbal petitions and public testimony was provided. Carlsbad P4P Citizen input is based on documented City records. P4P Carlsbad Citizen input is/has been consistent with the above Covid observations and significant in the numbers of Citizens calling for a meaningful (i.e. usable wide, grassed multi-function) park at Ponto. The P4P Citizen input should be fully disclosed, discussed and accounted for in the Parks Master Plan.

P4P's 30-page October 15, 2021 "Coastal Recreation" data file to the City documented comparative park data that the City should fully present and discuss with Citizens as part of the Parks Master Plan. The comparative park data shows Carlsbad is below average nationally and significantly below our adjacent Cities in providing parks – and requiring Carlsbad developers provide parks for their developments. It also documents how over 112 acres, or over 33% of all existing/planned City parkland is constrained and unusable to humans to fully use as a park. Having over 33% of City Parks constrained and not fully useable a park for citizens is a significant city land use and parks master plan issue. The 30-pages of documented information and requests in the October 15, 2021 Coastal Recreation file should be a part of the park master plan process. Following are some key park data the City should present and key park priority questions on that data the City should ask citizens:

1. Carlsbad only requires developers to provide a comparatively low 3-acres of parkland per 1,000 population of Carlsbad developments. Encinitas and Oceanside require their developers to provide 5-acres per 1,000 population, which is over 60% more parkland than Carlsbad's City Council requires developers to provide.
  - a. Should Carlsbad require 60% less parkland than Encinitas and Oceanside?
  - b. Should Carlsbad require developers to provide the same 5-acres per 1,000 parkland as Encinitas and Oceanside?
2. Carlsbad does not plan for, or require developers, to provide parks within a 10-minute walk to homes. Both Encinitas and Oceanside require parks to be provided within a 10-minute walk of all homes in their Cities.
  - a. Should Carlsbad require parks to be within a 10-minute walk of homes like Encinitas and Oceanside?
  - b. Should Carlsbad require developers to provide their parkland requirement (3 or 5 acres/1,000 population) be within a 10-minute walk of homes the homes the developer builds like Encinitas and Oceanside?
3. Carlsbad is BELOW the national average in BOTH providing Parkland and in providing Parkland Within a 10-minutewalk to homes (see ,Trust for Public Land Park Score).
  - a. Should Carlsbad be below average nationally in providing Parkland?
  - b. Should Carlsbad provide Parkland to be in the top 10%, 20%, 30%, 40%, just average, or below average nationally? (select one)
  - c. Should Carlsbad be below average nationally in providing Parkland within a 10-minute walk to homes?
  - d. Should Carlsbad provide Parkland within a 10-minute walk of homes so as to be in the top 10%, 20%, 30%, 40%, just average, or below average nationally? (select one)
4. South Carlsbad composes 62% of Carlsbad's population, yet has no large grassy usable Coastal park (like a Holiday Park) and has 0-acers of park west of I-5.
  - a. Should 62% of Carlsbad's population have at least one large grassy and fully useable park?
  - b. Should South Carlsbad developers be required to correct this park inequity?
5. North Carlsbad composes 38% of Carlsbad's population, yet has 10 Coastal parks totaling over 35-acres west of I-5.
  - a. Should the City's planned park investments be re-prioritized to correlate the location of coastal park land acreage with population demand?
6. South Carlsbad developer fees paid to build and fund many North Carlsbad park acres in both Veterans Park and Poinsettia 61 Park.

- a. Should the City appropriately use those South Carlsbad developer fees paid to build Veterans Park and Poinsettia 61 Park to fund parks in South Carlsbad where the development and park demand from that development occurred?

Thank you for your consideration. We look forward to confirmation that years of P4P citizen input to the City on Park issues is being considered in your efforts.

Updated Pubic Comments Coastal Recreation submitted on Oct 12<sup>th</sup> 2021:

---

On 10/8/21 the Carlsbad City Council and CA Coastal Commission were emailed data from an Official Carlsbad Public Records Request (# R002393-092121) on the City of Carlsbad's past compliance/noncompliance with the currently exiting Mello II LCP Land Use Policies # 6-2, 6-4 & 6-10 Certified in the mid-1980s. The City's documents show:

- For Policy 6-2 the 200-300 acre Park called out in Policy 6-2 has been reduced to Veterans Park's 91.5 acres, of which only 54% or 49.5 acres is even useable as a Park. The City provided no documents on how a 200-300 acre park called for in Policy 6-4 is now only 49.5 useable acres.
- For Policy 6-4 there were no City documents were provided. There was no City Public discussion, consideration, or City compliance with Policy 6-4 since the mid-1980's.
- For Policy 6-10 concerns providing Low Cost Visitor Accommodations. Public Parks are the lowest cost (free) Visitor accommodating land use there is.

The 3 existing LCP Land Use Policies are important for Carlsbad, and California's, Coastal land use resources. There appears little to no discussion of the City's past apparent failure to implementation of these 3 LCP LUPs in the current City consideration of changes to the LCP.

Following is a copy of Public Records Request # R002393-092121: "Carlsbad's Local Coastal Program (LCP) for the Mello II Segment of Carlsbad's Coastal Zone has long established land use Policies 6-2, 6-4 & 6-10 that were adopted by Carlsbad and Certified by the CA Coastal Commission in the early/mid-1980's. Mello II LCP Policies 6-2, 6-4 & 6-10 are shown on page 86-87 of Carlsbad's 2016 compiled LCP and are:

- "POLICY 6-2 REGIONAL PARK: If the population of Carlsbad increases in accordance with SANDAG's projected Series V Population Forecasts, it is estimated that Carlsbad will need to develop a new regional park containing 200 to 300 acres in order to adequately serve the public. A location for a new regional park must, therefore, be established. Consideration should be given to a facility within the Aqua Hedionda Specific Plan Area, or adjacent lands. The Batiquitos Lagoon area should also be considered.
- POLICY 6-4 NEED FOR ADDITIONAL OVERNIGHT CAMPING: Additional overnight camping facilities, the main source of lower cost visitor and recreational facilities, are needed throughout the San Diego coastal region. Additional facilities of this kind should be provided in a regional park within the Carlsbad area. This can be accomplished in conjunction with an eventual Batiquitos Park, within the Aqua Hedionda Specific Plan Area, and/or along with the development of private recreational facilities.
- POLICY 6-10 LOWER COST VISITOR-SERVING RECREATIONAL USES: Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Encourage a range of affordability for overnight visitor accommodations. Evaluate the affordability of any new or redeveloped overnight visitor accommodations, including amenities that reduce the cost of stay. Mitigation may be applied to protect and encourage affordable overnight accommodations"

The public record request is to see documents of:

- City Staff reports, presentations and communications to the Carlsbad Planning and Parks Commissions, and City Council regarding the City’s consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies; and
- Carlsbad Planning and Parks Commissions, and City Council minutes, resolutions and ordinances documenting City of Carlsbad consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies.”

Updated Pubic Comments Coastal Recreation submitted on January 2021:

---

Over 11-months ago in a 1/29/20 1:56PM email People for Ponto Carlsbad citizens first provided the City of Carlsbad both data and comments on **14 critical Coastal Recreation issues (see pages 5-30 below)**. The data and the 14 critical issues do not seem to be receiving appropriate disclosure/presentation/discussion/consideration in the Dec 2, 2020 Staff Report to the Planning Commission. To assure the 26-pages of citizen data and requests in the 1/29/20 email was received by the Planning Commission the file was re-emailed on 12/22/20 12:24pm and specifically addressed to City Council, City Clerk, Planning Commission, Parks Commission, Housing Commission, HEAC, CA Coastal Commission, and CA HCD. As citizens we request each of these 14 data points (with supporting data) be honestly considered.

In reading the Dec 2 Staff Report citizens conducted additional analysis of City Park data. That research further reinforces and documents the 14 Critical Coastal Recreation issues and highlights the relatively poor amount of City Park and Coastal Recreation planned by Carlsbad’s Staff proposed Draft LCP-LUPA. We hope the City Council and City Commissions, and CA Coastal Commission & HCD will consider this additional analysis of City data and citizen input:

<u>Coastal Zone data</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>	<u>note or source</u>
Coastline miles	6.4	3.9	6.0	Carlsbad Draft LCPA 201, Google Maps
Coastal Zone Acres	9,219	1,460	7,845	& Oceanside & Encinitas LCPs
Coastal Zone Acres	100%	16%	85%	% relative to Carlsbad

City Park Standard data

City Park Standard	3	5	5	required park acres / 1,000 population
Park Standard %	100%	167%	167%	% is relative to Carlsbad

- Oceanside & Encinitas 'require' and plan for 67% MORE Parkland than Carlsbad
- Carlsbad 'requires' and plans for ONLY 60% as much Parkland as Oceanside & Encinitas
- Carlsbad only requires developers provide 60% of the parkland (or in-lieu fees) as Oceanside & Encinitas require
- Encinitas has a 'Goal' to provide 15 acres of Park land per 1,000 population

Developed City Park	2.47	3.65	5.5	acres / 1,000 population
Developed Park	100%	148%	223%	% is relative to Carlsbad

- Oceanside provides 48% MORE developed park land than Carlsbad
- Encinitas provide 123% MORE developed park land than Carlsbad
- Carlsbad ONLY provides 68% and 45% as much Parks as Oceanside & Encinitas respectively

National Recreation & Park Asso. Metric: a typical City provides 1 park / 2,281 pop. & 9.9 Park acres / 1,000 population

- Carlsbad (3 acre) Park Standard is ONLY 30% of what a typical City provides nationally
- Carlsbad requires developers to provide, 70% LESS Park acres than typical City provides nationally

National Recreation & Park Asso., Trust for Public Land, et. al.: 10 minute (1/2 mile) Walk to a Park Planning Goal

- Both Oceanside and Encinitas plan parks to be within a 10-minute (1/2 mile) walk to homes.
- Carlsbad DOES NOT plan Parks within walking distance to homes
- Carlsbad is NOT providing equitable and walking/biking access to Parks

Some Carlsbad Parks that are not fully useable as Parks:

<u>Existing Parks with Unusable Open Space acreage</u>	<u>total park acres</u>	<u>Unusable park acres</u>	<u>% of park unusable</u>	<u>reason unusable</u>
Alga Norte - SE quadrant	32.1	10.7	33%	1/3 of park is a Parking lot not a park In many other Carlsbad Parks a significant percentage of those Parks are consumed by paved parking lots and unusable as a Park.
Hidden Hills - NE quadrant	22.0	12.7	58%	city identified unusable habitat open space
La Costa Canyon SE quadrant	14.7	8.9	61%	city identified unusable habitat open space
Leo Carrillo - SE quadrant	27.4	16.5	60%	city identified unusable habitat open space
Poinsettia - SW quadrant	<u>41.2</u>	<u>11.1</u>	<u>27%</u>	city identified unusable habitat open space
Existing Park subtotal	137.4	59.9	44%	44% of these Parks are unusable as Parkland

Anticipated Future Park development projects

<u>Park - quadrant</u>				
Veterans - NW	91.5	49.5	54%	estimated unusable habitat open space
Cannon Lake - NW	6.8	3.4	50%	estimated unusable water open space
Zone 5 Park expansion - NW	9.3	0	0	appears 100% useable as a Park
Robertson Ranch - NE	<u>11.2</u>	<u>0</u>	<u>0</u>	appears 100% useable as a Park
Future park subtotal	118.8	52.9	45%	45% of Future Parks are unusable as Parks

**Unusable Open Space acres**

**in Existing & Future Parks**      256.2    112.8      44%      **112.8 acres or 44% is unusable as Parks**

- 112.8 acres or 44% of the Existing & Future Parks are unusable Open Space and can't be used as Parkland
- **Based on City's minimum 3-acres/1,000 population Park Standard, 112.8 acres of Unusable Parkland means 37,600 Carlsbad Citizens (or 32.5% of Carlsbad's current population of 112,877) will be denied Parkland that they can actually use as a Park.**
- 112.8 acres of Existing & Future unusable 'park' / 3 acre park standard x 1,000 population = 37,600 Carlsbad citizens without useable parkland per City minimum standard.
- **59.9 acres of Existing unusable 'park' / 3 acre park standard x 1,000 population = 19,967 Carlsbad citizens and their children are currently being denied useable park land. 19,967 is 17.7% of Carlsbad's current population.**
- In addition to these 19,967 existing citizens and their children denied park land, the City needs to develop additional Park acreage in the NE, SW and SE quadrants to cover current shortfalls in meeting in the minimal 3 acre/1,000 population park standard for the current populations in the NE, SW and SE quadrants.
- **The current NE, SW and SE quadrants park acreage shortfalls are in addition to the 19,967 Carlsbad citizens and their children that do not have the minimum 3 acres of parkland per 1,000 population**
- **Current FY 2018-19 MINIMUM park acreage shortfalls are listed below. They are:**
  - 4.3 acres for 1,433 people in NE quadrant,
  - 6.8 acres for 2,266 people in SW quadrant, and
  - 2.3 acres for 767 people in SE quadrant

Shortfall (excess) in  
Current Quadrant  
Park standard by

	population		Future Park		existing Park shortfalls are for NE, SW & SE quadrants
	acres	need	acres	%	
NW quadrant	(-14.2)	(-4,733)	107.6	91%	Current NW parks are 14.2 acres over min. standard & capacity for 4,733 more people at min. park standard. 91% of all Future City Parks are in NW quadrant
NE quadrant	4.3	1,433	11.2	9%	Future Park will exceed minimum NE park standard
SW quadrant	6.8	2,266	0	0%	No min. parks for 2,266 people in SW quad. Park deficit
SE quadrant	2.3	767	0	0%	No min. parks for 767 SE quadrant Park deficit

A Park Standard minimum is just a “Minimum”. City policy allows the City to buy/create parks above the City’s current 3 acre/1,000 pop. MINIMUM (and lowest) Park Standard of surrounding Coastal cities. Carlsbad already did this in the NW quadrant. It then added 3.1 more NW quadrant Park acres as part of the Poinsettia 61 Agreement. Poinsettia 61:

- converted 3.1 acres of NW City land planned/zoned for Residential use to Open Space Park land use/zoning,
- facilitated a developer building condos (increasing park demand) in the SW quadrant,
- required the SW Quadrant developer pay \$3 million to build the 3.1 acre NW quadrant park, and
- required the SW Quadrant developer pay to convert 3.1 acres of NW Quadrant & 5.7 acres of SW Quadrant City Park land to habitat that will be unusable as a City Park.

So Poinsettia 61 increased SW Quadrant development (that both increased SW Park Demand and expanded the current SW Quadrant Park deficit) while simultaneously using SW Quadrant development to pay for the conversion of 3.1 acres of residential land in the NW Quadrant to City Park (the NW Quadrant already has surplus park land per the City’s minimum standard).

People for Ponto strongly supports creating City Parks above the City’s current low 3-acre per 1,000 population minimum, as the City’s minimum standard is relatively low and substandard relative to other cities; many Carlsbad parks have significant acreage that is in fact ‘unusable’ as a park. Most importantly People for Ponto Citizens think it is very important to prioritize providing City Parks in areas of Park Inequity that are unserved by City Parks. However it seems very unfair to the SW Quadrant citizens to be so unserved and starved of the bare minimum of City Parks while at the same time funding City Parks in excess of City standard in other Quadrants.

The Poinsettia 61 illustrates a larger unfair (and dysfunctional) distribution of Quadrant based City Park demand and supply that is keenly evident in the demands/supply funding and location disparity of Veterans Park. Most all the development impact and park demand that paid Veterans Park fees came from the SW, SE and NE Quadrants yet the Veterans Park (supply) is not in those SW, SE and NE Quadrants. This inequity is counter to the implicit City requirement that City Parks be provided within the Quadrant of their Park demand. It is logical and proper that City Parks be provided and equitably distributed to be close to the development and population that generated the demand for that Park.

The City Park inequity at Ponto and in other Coastal areas of the City is counter to several CA Coastal Act policies; counter to good city planning and good CA Coastal planning; is highly detrimental to the City, City and CA citizens in the long-term; fails to properly distribute and match the location supply with the location of demand for Parks; and is counter to basic fundamental issues of fairness. Since 2017 People for Ponto has tried to get the City Council and City Staff to address this inequity, specifically at Ponto, and to do so in a way that embraces a true and honest Citizen-based planning process.

**Coastal Recreation:**

2. Request that the City as part of its Draft LCP Public Review process broadly-publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCPA processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park: This disclosure is needed to correct about 20 years of City misrepresentation to the public on the since 1996 and currently Existing LCP requirements at Ponto, and the City's prior planning mistakes at Ponto. Citizens have been falsely told by the City that all the Coastal planning at Ponto was done already and that the City followed its Existing LCP regarding the need for a park at Ponto, and that this is already decided and could not be reversed. This misinformation has fundamentally stifled public review and public participation regarding the Coastal Zone. City failure to provide such a broad-public disclosure on the documented prior, and apparently current proposed, "planning mistakes" would appear to violate the principles of Ca Coastal Act Section 30006. A broad-public disclosure would for the first time allow citizens to be accurately informed on the Existing LCP requirements at Ponto so they can provide informed public review and comment regarding the need for a Coastal Park in in this last vacant 'unplanned' area. The requested broad-public disclosure by the City of the City past mistakes and the Existing LCP requirements at Ponto is consistent with CA Coastal Act (CCA) "Section 30006 Legislative findings and declarations; public participation - The Legislature further finds and declares that **the public has a right to fully participate in decisions affecting coastal planning**, conservation and development; that achievement of **sound coastal conservation and development is dependent upon public understanding and support**; and that the continuing planning and implementation of **programs for coastal conservation and development should include the widest opportunity for public participation.**" The public cannot participate as outlined in CCA Section 30006 if past City 'mistakes' and misrepresentations on Coastal planning at Ponto go undisclosed to the public. If the public isn't fully informed about the 20-years of LCP planning mistakes at Ponto how could the public in the past (and now in the present) participate in the proposed LCP Amendment – **Public Participation as noted in Section 30006 above is the means to sound coastal conservation and development and is "... dependent upon public understanding ..."**. The City's past mistakes at Ponto need to be corrected by slightly different a Draft LCP Amendment process than currently outlined by the City; a new process is needed that clearly, opening and honestly informs and engages the public on the Existing LCP Ponto issues. The City's current Draft LCP Amendment process fails to follow CCA Section 30006 in that most all the citizens we encounter are as yet unaware of the City's Ponto mistakes and how they can participate in in the DLCPA process without that information. We see this daily in conversations we have with our fellow citizens. We even saw at the Oct 20, 2019 Carlsbad Planning Commission meeting that the Planning Commission was unaware of the planning mistakes at Ponto. How can a decision body of the City make a decision without knowing about these prior 'planning mistakes' facts that surround what they are being asked to decide on? Repeatedly since 2017 Carlsbad citizens and People for Ponto have asked the City to fully acknowledge the City's prior flawed planning at Ponto, and to correct that with ether maintaining the Existing LCP Non-residential Reserve Land Use or restarting the Coastal Planning at Ponto with a true and accurately informed Community-based Coastal Planning process consistent with Section 30006.

We request the City during the DLCPA Public Review period broadly and publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCP and other "planning efforts" public participation processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park, and 1) provide a truly honest public participation process on that disclosure consistent with CCA Section 30006 as part of the Draft LCP Amendment process or 2) retain the Existing LCP Non-residential Reserve Land Use and require a comprehensive and honest community-based redo of Coastal Resource planning at Ponto.

3. City fully and publicly reply to and the City Council consider the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process: Lance Schulte on 1/23/20 received an email reply by the City to his follow-up email regarding the status of the 11/20/19 citizen concerns/requests public comments and letters presented to the Planning Commission. This is appreciated, however it is request that the City fully publicly reply to the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process and present the to the City Council 11/20/19 citizen concerns/requests so the City Council can consider them and provide any direction to City Staff. City Staff first presented a summary presentation of the proposed Draft LCP Amendment to the Carlsbad Planning Commission on November 20, 2019, and indicated the public comment period would close on November in less than 2-weeks. Citizens and citizen groups provided public testimony to the Planning Commission, both verbally and in two written letters. The CCC was copied on those letters. The testimony and letters noted significant concerns about the City's proposed LCP Amendment process and made three requests:
- Disclose and provide a publically accessible 'Redline Version' of the Existing 2016/Proposed LCP land use Plan and Policies so everyone can see the proposed changes to the Existing LCP.
  - Provide true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern or objections. Citizen Workshops, when done right, are valuable means to openly educate, discuss and work to consensus options. These areas, including Ponto, were/are subject to multiple lawsuits, so true open and honest public workshops would provide an opportunity to openly and honestly discuss the issues and hopefully build public consensus/support for solutions. This approach seems consistent with CCA Section 30006, and common sense.
  - Extend the public comment period 6-months to allow Citizen Review of the Redline Version of the LCPA and allow time for Citizen Workshops.

The City did extend the Public Review period 2-months over the holidays to January 31, 2020. This is appreciated although many think this is inadequate given the significance of the Proposed Land Use Plan Amendments, and lack of Redline Version to compare. The City and their consultants required several extra years beyond schedule prepare the proposed LCP Amendments. The extra years of City Staff work reflects on the volume of the over 500-pages in the documents and the time needed to understand the Existing LCP and then create an Amended LCP. Citizens need sufficient time, proper comparative tools (redline) and a process (workshops) to understand the proposed LCP Amendments that is reflective of extensive extra time needed by City Staff and consultants needed. Truncation of lay public review to a few months for an Amendment that took paid professionals many years to produce seems a more than a bit inappropriate. The City appears to be rejecting citizens' request to be provided a 'Redline Version' of the Existing 2016/Proposed LCP land use Plan. So public review comments will tainted or will miss many issues due having to manually cross-reference a 150-page Existing LCP LUP with a Proposed 350-page Proposed LCP LUP. There will be unknown and unconsidered changes in the Draft LCP Amendment that the public and city and CCC decision makers will not know about due to the lack of 'Redline Version'.

The City also appears to reject citizen requests for true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern – such as Ponto. Like Coastal Recreation issue #1 above the following citizen requests appear consistent with CA Coastal Act (CCA) Section 30006, and the City's rejection of that requests seem counter to the CA Coastal Act.

We again request of the City to provide: 1) a 'Redline Version' to the public and decision makers, along with sufficient time to review and comment on the 'Redline Version'; and 2) true Citizen Workshops for Ponto and the

other last remaining significant vacant Coastal lands in Carlsbad as part of the Draft LCP Amendment process, or as part of deferred LCP Amendment process for those areas.

4. Coastal Zoned land is precious: the very small amount of remaining vacant Coastal land should be reserved for “High-Priority” Coastal Recreation Land Uses under the CA Coastal Act to provide for the growing and forever ‘Buildout’ needs of Carlsbad and CA Citizens, and our visitors.
  - Less than 1.8% (76 square miles) of San Diego County’s 4,207 square miles is in Coastal Zone. This small area needs to provide for all the forever Coastal needs of the County, State of CA, and Visitors. Upland Coastal Recreation (Coastal Park) land use is needed to provide land to migrate the projected/planned loss of “High-Priority” Coastal Recreation land uses due to Sea Level Rise impacts. There is only 76 miles of total coastline in San Diego County; a significant amount is publicly inaccessible military/industrial land. So how the last few portions of Coastal Land within Carlsbad (which is about 8% of San Diego County’s Coastline) is planned for the forever needs for High-Coastal-Priority Recreation Land Use is critical for Carlsbad, San Diego, and California Statewide needs into the future.
  - Most all the developable Coastal land in Carlsbad is already developed with Low-Coastal-Priority residential uses. Only a very small percentage of Carlsbad’s developable Coastal land, maybe 1-2%, is still vacant. This last tiny portion of fragment of vacant developable Coastal Land should be documented in the Draft LCP and reserved for “High-Priority” Coastal Land uses – most critically Coastal Recreation – to address the growing Coastal Recreation needs from a growing population and visitors. These growing needs are all the more critical in that existing Coastal Recreation lands will be decreasing due to inundation and erosion due to DLCPA planned Sea Level Rise.
  - This image of the western half of San Diego County graphically shows (in the blue line) the very small Coastal Zone Area that needs to provide the Carlsbad’s and California’s Coastal Recreational needs for all San Diego County residents and Visitors:

We request that 1) the amount and location of remaining vacant Coastal land in Carlsbad be documented and mapped and be reserved for high-priority Coastal Land Uses consistent with CCA Goals in Section 30001.5 “... (c) ... **maximize public recreational opportunities in the coastal zone** consistent with sound resources conservation principles and constitutionally protected rights of private property owners. (d) **Assure priority for coastal-dependent and coastal-related development over other development on the coast.** ...”; 2). This data be used in the City’s analysis and the public’s review and discussion about the City’s proposed Draft ‘Buildout’ Land Use Plan. The City’s proposed Draft ‘Buildout’ Land Use Plan will forever lock in the amount “maximum public recreational opportunities in the coastal zone” and will be the final Coastal Land Use Plan that is supposed to “assure priority for coastal-dependent and coastal-related development over other development on the coast”. Most of Carlsbad’s Coastal Zone is already developed or committed to low-priority land uses contrary to these CCA Goals, so how we finally and forever plan to use of the last small remaining vacant Coastal Land is very important.

5. The proposed Draft LCP Amendment in Chapter 3 makes unfounded statements regarding the proposed Amendment to the LCP Land Use Plan provision of “High-Priority” Coastal Recreation land use: On page 3-3, at the beginning of the Chapter 3 – Recreation and Visitor Serving Uses the City correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation uses, and cites multiple CCA Sections to that effect. The City’s proposed Coastal Land Use Plan then states on page 3-5 that a high proportion of land in the City is dedicated open

space available for passive and active use, yet provides no justification or accurate metric to support this statement. This is a critical unsubstantiated and speculative statement that is not supported by any comparative data (justifying the “high proportion” statement). The City later in Chapter 3 compared the adjoining cities of Oceanside and Encinitas to try to show how the proposed Draft LCP LUP Amendment provides higher levels of Visitor Serving Accommodations. That ‘non-common denominator’ comparison was fundamentally flawed, as noted in a prior separate Draft LCPA public review comment from People for Ponto regarding another high-priority Coastal land use (visitor accommodations) planned for in Chapter 3, but at least it was an attempt to compare. However, for the Coastal Recreation portion of Chapter 3, the City does not even attempt to provide any comparative data to support (or justify) the proposed Coastal Recreation Land Use Plan and statements. The Coastal Recreation Chapter also fails to disclose Carlsbad’s adopted City Park Master Plan (Park Service Area and Equity map) data that shows a clear conflict between the CA Coastal Act Policy Sections noted at the beginning of Chapter 3 and Chapter 3’s proposed Draft Coastal Recreation Land Use Plan.

Comparative Coastal Recreation: Comparing the Land Use Plan and policies of Oceanside, Carlsbad and Encinitas, one finds Carlsbad’s proposed Coastal Recreational Plan and Policies are not “high”, but very low compared with Oceanside and Encinitas. Carlsbad has a General Plan Park Standard of 3 acres of City Park per 1,000 Population. Oceanside has a 5 acres of City Park Standard per 1,000 population, and Encinitas has a 15 acres per 1,000 population standard, and an in-lieu park fee requirement of 5 acres per 1,000 population. Carlsbad’s proposed Coastal Recreation Land Use Plan is in fact not ‘high’ but is in fact the lowest of the three cities, with Carlsbad providing only 40% of Oceanside’s park standard, and only 20% of Encinitas’s Park Standard. Citywide Carlsbad currently has 2.47 acres of developed park per 1,000 population, Oceanside currently has 3.6 acres of developed park per 1,000 population, and Encinitas currently has 5.5 acres of developed park per 1,000 population. Although this data is citywide, it shows Carlsbad’s current amount of developed parkland is less than 70% of what Oceanside currently provides, and less than 45% of what Encinitas currently provides. Carlsbad is not currently providing, nor proposing a Coastal Land Use Plan to provide, a ‘high’ proportion of Coastal Recreation Land Use compared to Oceanside and Encinitas.

On page 3-5 Carlsbad may be misrepresenting city open space that is needed and used for the preservation of federally endangered species habitats and lagoon water bodies. This open space Land cannot be Used for Coastal Recreation purposes; and in fact Land Use regulations prohibit public access and Recreational Use on these Lands and water bodies to protect those endangered land and water habitats. 78% of Carlsbad’s open space is “open space for the preservation of natural resources” and cannot be used for Coastal Parks and Recreational use. Although “open space for the preservation of natural resources” does provide scenic or visual amenity, and this amenity is addressed as a different coastal resource. Visual open space is not Coastal Recreation Land Use. It appears Carlsbad is proposing in the Draft LCP Amendment to continue to, providing a ‘low’ percentage of Coastal Park Land Use and Coastal Recreation Land Use compared to adjoining cities.

In addition to the comparatively low amount of Coastal Park land Carlsbad plans for, Carlsbad scores very poorly regarding the equitable and fair distribution and accessibility of Coastal Parks and Coastal Recreation Land Uses. Both the City of Oceanside and Encinitas have very robust and detailed Park and Land Use plans to promote an equitable distribution of, and good non-vehicular accessibility, to their Coastal Parks. By comparison, Carlsbad’s park land use plan scores poorly, as exemplified in Ponto and South Carlsbad. Ponto’s existing population requires about 6.6 acres of City Parkland per Carlsbad’s low 3 acres per 1,000 population standard. Yet the nearest City Park is several miles away and takes over 50 minutes to walk along major arterial roadways and across Interstate 5 to access. As such this nearest park is not an accessible park for Ponto children, and thus Ponto children have to play in

however it more accurately illustrated in the following data/image from the adopted Carlsbad Park Master Plan's "Service Area Maps (Equity Maps)". The image below titled 'No Coastal Park in South Carlsbad' shows Carlsbad's adopted "Park Service Area Maps (Equity Maps)" from the City's Park Master Plan that says it maps "the population being served by that park type/facility." The added text to the image is data regarding park inequity and disparity in South Carlsbad. The image compiles Carlsbad's adopted Park "Park Service Area Maps (Equity Maps)" for Community Parks and Special Use Area Parks that are the City's two park acreage types produced by the City's comparatively low standard of 3 acre of City Park per 1,000 population. The City's Park Service Area Maps (Equity Maps) shows areas and populations served by parks within the blue and red circles. City data clearly shows large areas of overlapping Park Service (areas/populations served by multiple parks) in North Carlsbad and also shows large areas in South Carlsbad with No Park Service (areas/populations unserved by any parks) and Park Inequity in South Carlsbad. It clearly shows the City's Documented Park Need and Park inequity at Ponto. The Existing LCP LUP for Ponto's Planning Area F in is required to "consider" and "document" the need for a "Public Park". The City's adopted Park Service Area Maps (Equity Maps) clearly shows the inequity of Coastal City Park between North and South Carlsbad, and the need for Coastal Parks in South Carlsbad – particularly at Ponto. The City's proposed Draft 'Buildout' Coastal Recreation Land Use Plan instead proposes to lock-in documented City Public Coastal Park inequity and unserved Coastal Park demand at Ponto and South Carlsbad forever. It does so by proposing the last vacant undeveloped/unplanned Coastal land – Ponto Planning Area F - in the unserved Ponto and South Carlsbad coastline areas instead of being planned for much needed City Park and Coastal Recreation use be converted to even more low-priority residential and general commercial land uses. These 'low-priority' residential uses, by the way, further increase City Park and Coastal Recreation demand and inequity in Coastal South Carlsbad. This is wrong, and a proposed 'forever-buildout' wrong at the most basic and fundamental levels. The proposed Draft Coastal Recreation Land Use Plan by NOT providing documented needed City parks for vast areas of Coastal South Carlsbad is inconsistent with the CA Coastal Act policies and Existing LCP LUP requirements for Ponto Planning Area F; and also inconsistent with fair/equitable/commonsense land use and park planning principles, inconsistent with CA Coastal Commission social justice goals, inconsistent with social equity, inconsistent with VMT reduction requirements, and inconsistent with common fairness. A different Coastal Recreation Land Use Plan should be provided that provides for a socially equitable distribution of Coastal Park resources so as to would allow children, the elderly and those without cars to access Coastal Parks. The proposed Draft 'Buildout' Coastal Recreation Land Use Plan forever locking in the unfair distribution of City Parks appears a violation of the not only CCA Sections 30213, 30222, 30223, and 30252(6) but also the fundamental values and principles of the CA Coastal Act. The Draft also appears a violation of Carlsbad's Community Vision.

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

A different Coastal Recreation Land Use Plan is required to provide a more equitable distribution of City Parks with non-vehicular accessibility. Such a different plan would advance State and City requirements to reduce vehicle Miles Traveled (VMT) and greenhouse gas emissions that contribute to climate change and sea level rise impacts. Please note that the data for the above basic comparison comes from City of Carlsbad, Oceanside and Encinitas General Plan and Park Master Plan documents.

Data shows the proposed Coastal Recreation Plan conflicts with the CA Coastal Act policy Sections. As mentioned page 3-3 correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation Land Uses, and pages 3-5 list multiple CA Coastal Act (CCA) policy Sections that confirm this. However, given the significant statewide importance of Coastal Recreation Land Use, the City proposed 'Buildout' Coastal Recreation Land Use Plan does not appear to adequately address and implement these CCA Policies, and most noticeably in the Ponto area of South Carlsbad. Coastal Recreation is a significant Statewide High-Priority Land Use under the CCA. For a substantially developed non-coastal-industry city like Carlsbad Coastal Recreation is likely the biggest land use issue. This issue is even more elevated due to the fact that there are only a few small areas left of undeveloped Coastal land on which to provide Coastal Recreation, and Carlsbad is proposing a Coastal 'Buildout' Land Use Plan on those areas. The use of the last few remaining vacant portions of Coastal land for Coastal Recreation Land Use is the most important land use consideration in the proposed Draft LCP Land Use Plan Amendment as population and visitor growth will increase demands for Coastal Recreation. It is thus very surprising, and disturbing that the proposed Coastal Recreation Land Use Plan is so short, lacks any comparative and demand projection data, lacks any resource demand/distribution and social equity data, and lacks any rational and clear connection with CCA Policy and the proposed 'Buildout' Coastal Land Use plan. This is all the more troubling given that:

- The Ponto area represents the last significant vacant undeveloped/unplanned land near the coast in South Carlsbad that can provide a meaningful Coastal Park.
- The fact that the City's Existing LCP requires the city consider and document the need for a "i.e. Public Park" on Ponto's Planning Area F prior to the City proposing a change of Planning Area F's "Non-residential

Reserve” land use designation. The City has repeatedly failed to comply with this LCP LUP requirement, and worse has repeatedly failed to honestly inform citizens of this LCP LUP requirement at planning Area F before it granted any land use. The City, apparently implementing speculative developer wishes, has repeatedly proposed changing Planning Area F’s Coastal Land Use designation to “low-priority” residential and general commercial land uses without publically disclosing and following the Existing LCP LUP.

- The City’s currently developed parks in the southern portion of the City do not meet the city’s comparatively low public park standard of only 3 acres per 1,000 population. Since 2012 there has been City park acreage shortfall in both SW and SE Carlsbad.
- The Existing population of Ponto (west of I-5 and south of Poinsettia Lane) requires about 6.6 acres of Public Park based on the City’s comparatively low public park standard of 3 acres per 1,000 population. There is no Public Park in Ponto. Adding more population at Ponto will increase this current park demand/supply disparity.
- Carlsbad and other citizens have since 2017 expressed to the City the strong need for a Coastal Park at Ponto, and requested the City to provide a true citizen-based planning process to consider the Public Park need at Ponto. The Citizens’ requested process is fully in-line with CCA Goals, Public Participation Policy, Land Use Policies, and the Existing LCP Land Use Plan/requirements for Planning Area F and is the most appropriate means to consider and document the need for a Public Park at Ponto as required by the Existing LCP Land Use Plan.
- Planning Area F is for sale, and a non-profit citizens group has made an offer to purchase Planning Area F for a much needed Coastal Park for both Ponto and inland South Carlsbad residents and visitors. How should these facts be considered by the City and CCC?
- Carlsbad has no Coastal Parks west of I-5 and the railroad corridor for the entire southern half of Carlsbad’s 7-mile coastline.
- The southern half of Carlsbad’s coastline is 5.7% of the entire San Diego County coastline and represents a significant portion of regional coastline without a meaningful Coastal Park west of I-5 and the Railroad corridor.
- The City’s proposed Coastal Recreation Land Use Plan provides No Documentation, No Rational, and No Supporting or Comparative Data to show the proposed Coastal Recreation Land Use Plan in fact complies with the CA Coastal Act.

6. There is no Coastal Recreation/Park west of interstate 5 for all South Carlsbad, or half of the entire City. This is an obviously unfair and inequitable distribution of Coastal Recreation/Park resources that should be corrected by changes to the Draft LCP Land Use Amendment: The following image (which was sent to the City and CCC on several prior communications) was first requested by former Carlsbad Councilman Michael Schumacher during a People for Ponto presentation/request at the Oct 23, 2018 City Council meeting. The data compiled in the image shows how the South Coastal Carlsbad (Ponto) is not served by a Park per the City’s adopted Parks Master Plan. The blue dots on the map are park locations and blue circle(s) show the City’s Park Master Plan adopted Park Service Areas and Park Equity. This data, from pages 87-88 of the City of Carlsbad Parks Master Plan, shows all City Parks (both Community Parks and Special Use Areas in Coastal Carlsbad (except Aviara Park east of Poinsettia Park and west of Alga Norte Park). The text on the left margin identifies the South Carlsbad Coastal Park (west of I-5) gap along with the number of South Carlsbad Citizens (over half the City’s population) without a Coastal Park. The left margin also identifies more local issues for the over 2,000 Ponto area adults and children. For Ponto residents the nearest Public Park and City proposed ‘solution’ to the South Carlsbad and Ponto Public Park deficit are miles away over high-speed/traffic roadways and thus somewhat hazardous to access and effectively unusable by children/the elderly or

those without cars. Having been a 20-year resident of Ponto I regularly see our children have to play in the street as there are no Public Park with large open fields to play at within a safe and under 1-hour walk away. Ponto citizens have submitted public comments regarding this condition and the lack of a Park at Ponto

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

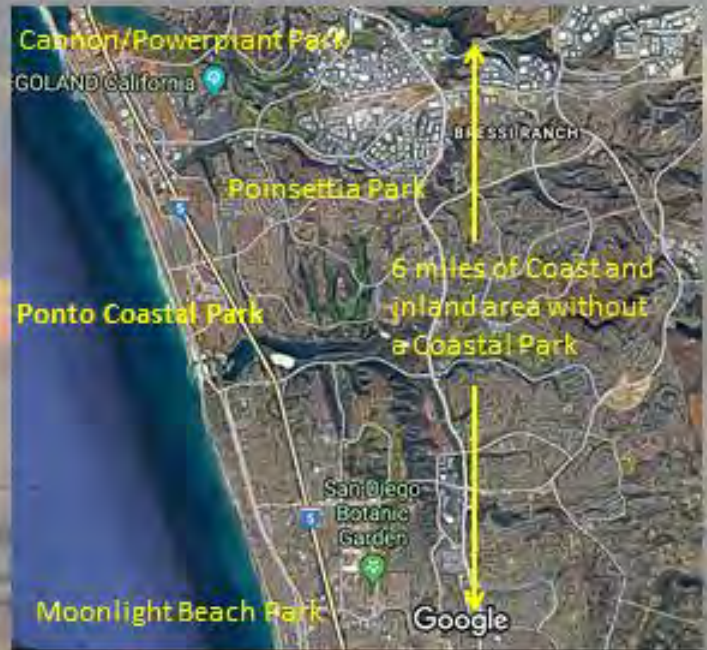

Ponto is at the center of regional 6-mile Coastal Park Gap. A Coastal Park in this instance being a Public Park with practical green play space and a reasonable connection with the Coast (i.e. located west of the regional rail and Interstate-5 corridors). The following image shows this larger regional Coastal Park Gap centered on the Ponto Area, and the nearest Coastal Parks – Cannon Park to the north, and Moonlight Park to the south.

Regionally this image shows Ponto is the last remaining significant vacant Coastal land that could accommodate a Coastal Park to serve the Coastal Park current needs of over existing 2,000 Ponto residents, 64,000 existing South Carlsbad residents, and a larger regional population. It is also the only area to serve the Coastal Park needs for the thousands of hotel rooms in Upland Visitor Accommodations in South Carlsbad.

# How Ponto Serves Region

- Ponto is in the middle of the regional Coastal Park Gap
- A Ponto Coastal Park fills a critical 6 mile gap of coastline without a Coastal Park - 8.6% of SD County coastline
- A Ponto Coastal Park Serves over 26,000 homes & 64,000 citizens just in South Carlsbad without a Coastal Park
- Serves many more people outside Carlsbad

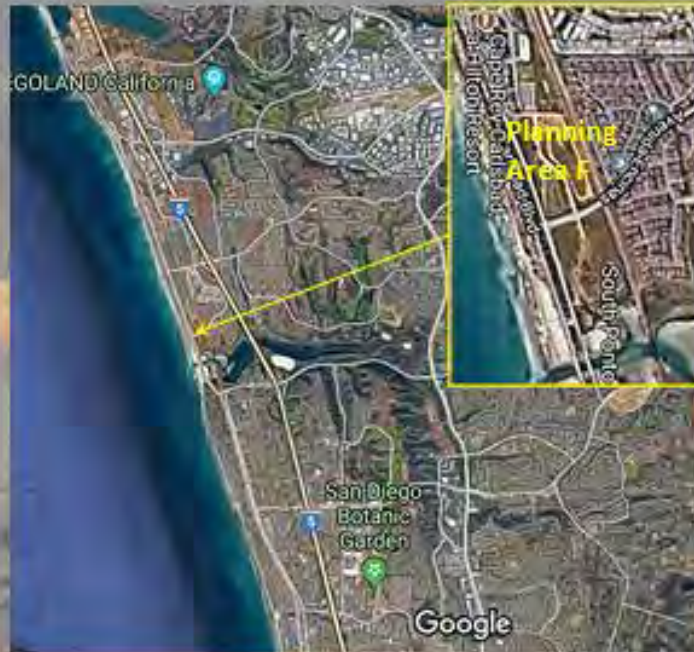

As People for Ponto first uncovered and then communicated in 2017 to the City and CCC; Carlsbad's Existing (since 1994) Local Coastal Program LUP currently states (on page 101) that Ponto's Planning Area F: carries a Non-Residential Reserve (NRR) General Plan designation. Carlsbad's Existing Local Coastal Program Land Use Plan states: "Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an "unplanned" area ..." and requires that: "... **As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.**" CA Coastal Commission actions, Carlsbad Public Records Requests 2017-260, 261, and 262, and 11/20/19 City Planner statements confirm the City never fully communicated to Carlsbad Citizens the existence of this LCP requirement nor did the City comply with the requirements. Of deep concern is that the City is now (as several times in the past) still not honestly disclosing to citizens and implementing this Existing LCP requirement as a true and authentic 'planning effort'. The lack of open public disclosure and apparent fear of true public workshops and Public Comment about the Existing Planning Area F LCP requirements are troubling. The point of a 'planning effort' is to openly and publically present data, publically discuss and explore possibilities/opportunities, and help build consensus on the best planning options. Citizens are concerned the city has already made up its mind and there is no real "planning effort" in the proposed Draft LCP Amendment process, just a brief Staff Report and at the end provide citizens 3-minutes to comment on the proposal. This is not the proper way to treat the last remaining significant vacant land in South Carlsbad that will forever determine the Coastal Recreation environment for generations of Carlsbad and California citizens and visitors to come.

The following data/images show how Ponto is in the center of the 6-mile (west of I-5 and Railroad corridor) regional Coastal Park gap. Ponto is the last remaining vacant and currently "unplanned" Coastal land that is available to address this regional Coastal Park Gap.

## How Ponto Serves Region cont.

- **Relieves Coastal Park congestion** in North Carlsbad, Encinitas and Solana Beach
- Area currently needs Coastal Park as seen by:
  - Ponto Beach parking congestion
  - current trespass use of Planning Area F as a Park
- **6.6 acre portion of Planning Area F** addresses SW Quad City Park deficit

## How Ponto Serves Region cont.

- A Ponto Park helps address 2050 and beyond Regional Population and Visitor Growth demands for Coastal Parks
- A Ponto Park provides the lowest-cost coastal access and recreation opportunities for CA citizens and visitors

## How Ponto Serves Region cont.

- Vital park and open space amenity for Visitor serving businesses and accommodations
- 6.6 acre unique City Coastal Park venue to stage special events: Runs, bike rides, triathlons, sports, coastal festivals, etc.

## How Ponto Serves Region cont.

- Critical Park space for So. Carlsbad State Beach Campground
- Provides a big training and staging space for Junior lifeguards
- Dog walk trail

# Ponto Coastal Park Concept

- A concept – but shows potential recreational opportunities
- Provides **vital parkland support for beach & open play fields**
- Concept plan a gift from San Pacifico Community Association

One possible Concept image of a potential Ponto Coastal Park at Planning Area F is illustrated below. The potential for a Ponto Coastal Park is real. The speculative land investment fund (Lone Star Fund #5 USA L.P. and Bermuda L.P.) that currently owns Planning Area F is selling the property, and is available for the City of Carlsbad to acquire to address the documented demand/need for a City Park and City Park inequity at Ponto and in Coastal South Carlsbad. A Ponto Beachfront Park 501c3 is working to acquire donations to help purchase the site for a Park. These situations and opportunities should be publicly discussed as part of the City Staff's proposed Local Coastal Program Land Use Plan Amendment.

7. Projected increases in California, San Diego County and Carlsbad population and visitor growth increases the demand for High-Priority-Coastal Recreation land use:
- Increasing Citizen demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

San Diego County Citizen Population - Source: SANDAG Preliminary 2050 Regional Growth Forecast

1980	1,861,846
1990	2,498,016
2000	2,813,833
2010	3,095,313
2020	3,535,000 = 46,500 Citizens per mile of San Diego County coastline
2030	3,870,000
2040	4,163,688
2050	4,384,867 = 57,700 Citizens per mile of San Diego County coastline

2020 to 2050 = 24% increase in San Diego County population.

Citizen Population will continue beyond 2050. Carlsbad may plan for 'Buildout' in 2050, but what is San Diego County's 'Buildout'? There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for this growing population. If we do not increase our supply of Coastal Recreational Resources for these increased demands our Coastal Recreation Resources will become more overcrowded, deteriorated and ultimately diminish the Coastal Recreation quality of life for Citizens of Carlsbad and California. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5) and there is No Coastal Park in all of South Carlsbad to address the Coastal Recreation needs of the 64,000 South Carlsbad Citizens.

- Increasing Visitor demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

Yearly Visitors to San Diego County – source: *San Diego Tourism Authority; San Diego Travel Forecast, Dec, 2017*

2016	34,900,000
2017	34,900,000
2018	35,300,000
2019	35,900,000
2020	36,500,000 = average 100,000 visitors per day, or 2.83% of County’s Population per day, or 1,316 Visitors/coastal mile/day in 2020
2021	37,100,000
2022	37,700,000

This is growth at about a 1.6% per year increase in visitors. Projecting this Visitor growth rate from 2020 to 2050 results in a 61% or 22,265,000 increase in Visitors in 2050 to:

2050	58,765,000 = average 161,000 visitors per day, or 3.67% of the County’s projected 2050 Population per day, or 2,120 Visitors/coastal mile/day in 2050.
------	--

The number of Visitors is likely to increase beyond the year 2050. There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for these projected 2050 61% increase, and beyond 2050, increases in Visitor demand for Coastal Recreational Resources. Increasing Coastal Recreation land is a vital and critically supporting Land Use and vital amenity for California’s, the San Diego Region’s and Carlsbad’s Visitor Serving Industry. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5). There are thousands of hotel rooms in South Carlsbad that have NO Coastal Park to go to in South Carlsbad. This needs correcting as both a Coastal Act and also a City economic sustainability imperative.

- We request that the as part of the public’s review, the City Staff proposed Draft LCP Amendment to the Land Use Plan clearly document if and/or how future forever ‘Buildout’ City, Regional and Statewide population and visitor population demand for Coastal Recreation and City Coastal Parks are adequately provided for both in amount and locational distribution in the Carlsbad proposed Amendment of the LCP Land Use Plan.

8. Carlsbad’s Draft Local Coastal Program Land Use Plan Amendment says it plans to a year 2050 buildout of the Coastal Zone. The Draft Local Coastal Program Land Use Plan Amendment then is the last opportunity to create a Coastal Land Use Plan to provide “High-Priority” Coastal Recreation Land Use, and will forever impact future generations of California, San Diego County, and Carlsbad Citizens and Visitors:

- The Draft LCPA indicates in 2008 only 9% of All Carlsbad was vacant land. Less is vacant now in 2019. Carlsbad’s Coastal Zone is 37% of the City, so vacant unconstrained land suitable for providing Coastal Recreation is likely only 3-4%. The prior request for a full documentation of the remaining vacant Coastal lands will provide a better understanding needed to begin to make the final ‘buildout’ Coastal Land Use Plan for Carlsbad. The Draft LCPA does not indicate the amount and locations of currently vacant unconstrained Coastal Land in Carlsbad. This final limited vacant land resource should be clearly documented and mapped in the DLCPA as it represents the real focus of the DLCPA – the Coastal Plan for these remaingn undeveloped

lands. These last remaining vacant lands should be primarily used to provide for and equitably distribute “High-Priority” Coastal Recreation Land Uses consistent with CCA Sections:

- i. Section 30212.5 “... Wherever appropriate and feasible, public facilities, including parking areas or facilities, **shall be distributed throughout an area so as to mitigate against the impacts, social and otherwise, of overcrowding or overuse by the public of any single area.**”;
- ii. Section 30213 “... **Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...**”;
- iii. Section 30222 “**The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development,** but not over agriculture or coastal-dependent industry.”
- iv. Section 30223 “**Upland areas necessary to support coastal recreational uses shall be reserved for such uses, where feasible**” ,
- v. Section 30251 ... The location and amount of new development should maintain and enhance public access to the coast by ... 6) assuring that the recreational needs of new residents will not overload nearby coastal recreation areas by **correlating the amount of development with local park acquisition** and development plans with the provision of onsite recreational facilities to serve the new development”

Adopted City Park Service Area and Park Equity maps discussed earlier document the proposed Draft LCP Amendment’s inconstancy with the above CCA Policy Sections. The locations and small amounts remaining vacant Coastal lands provide the last opportunities to correct the inconsistencies of City proposed Draft “buildout” LCP Land Use Plan Amendment with these Coastal Act Policies.

Currently and since 1996 there has been LCP LUP Policy/regulations for Ponto Planning Area F that require consideration of a “Public Park” prior to changing the existing “unplanned Non-residential Reserve” Land Use designation. A map and data base of vacant developable Coastal land should be provided as part of the Draft LCPA and the Draft LCPA. This map and data base should document the projected/planned loss of Coastal land use due to Sea Level Rise. Draft LCPA projects Sea Level Rise will eliminate several beaches and High-Priority Coastal Land Uses like Coastal Lagoon Trails and the Campground.

- The LCP Land Use Plan should plan and reserve the very limited vacant developable Coastal land for the long-term ‘Buildout’ needs of “High-Priority” Coastal Recreation Land Use. Vacant developable Coastal land is too scarce to be squandered for “low-priority” uses. Sea Level Rise will reduce “High-Priority” Coastal Uses. So how vacant developable Upland area should be preserved for “High-Priority” Coastal Uses is a key requirement to be fully documented and discussed in the Draft LCPA. If not one of two things will eventually happen 1) any new Coastal Park land will require very expensive purchase and demolition of buildings or public facilities to create any new Coastal Park land to meet existing and growing demand; or 2) Coastal Recreation will be hemmed-in by “low-priority” uses and thus force Coastal Recreation to decrease and become increasingly concentrated and overcrowded in its current locations; and thus will promote the eventual deterioration of our current Coastal Recreation resources. A plan that fails to fix Coastal Park deficits and then increase Coastal Parks in pace with increased population/visitor demand is a plan that can

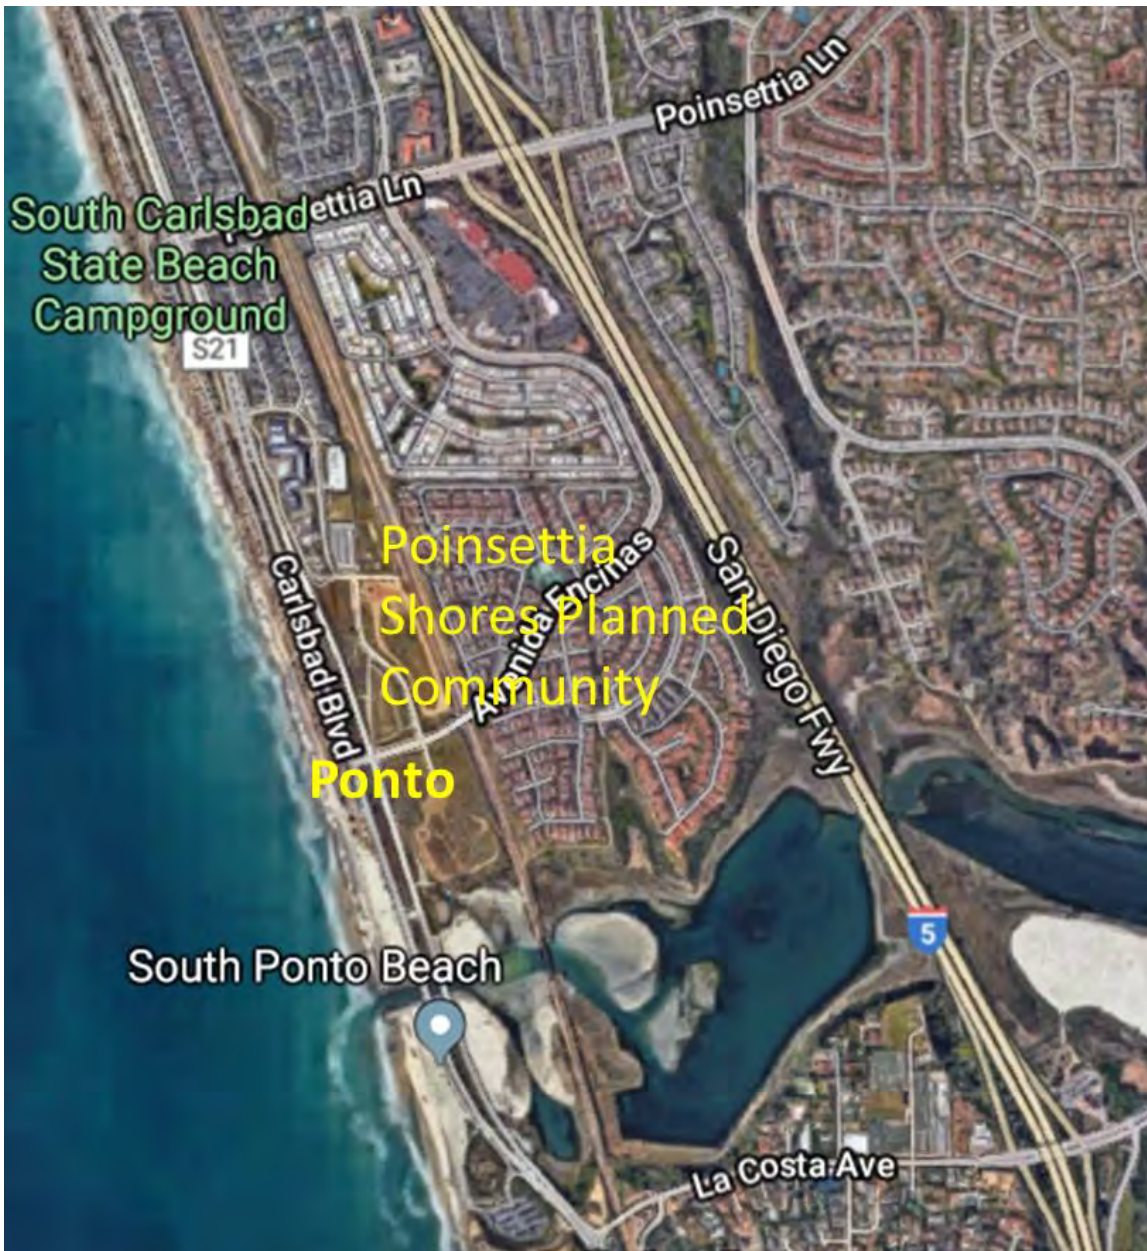

only result in degradation. How the Draft LCPA documents and addresses the land use planning of the last small portions of vacant developable Coastal land is critical for the future and future generations.

9. Citizens of South Carlsbad are concerned about the City's multiple prior flawed Ponto planning processes or 'mistakes' the City has made yet is basing the City Staff's proposed Draft LCP LUP. The concerns being the City is not openly and honestly communicating information to citizens and the public, and not allowing a reasonable and appropriate community-based planning process to address the documented Park, Coastal Recreation and unconstrained open space needs in South Carlsbad. One of these groups of citizens has created a [www.peopleforponto.com](http://www.peopleforponto.com) website to try to research and compile information and hopefully provide a better means for citizens to understand facts and then express their concerns/desires to the City of Carlsbad (City) and CA Coastal Commission (CCC). Over 2,000 emails have sent to the City and CCC regarding Coastal Land Use Planning Issues at Ponto. The San Pacifico Planned Community (i.e. San Pacifico Community Association) has also, since 2015, sent numerous emailed letters to the City and CCC noting the significant concerns about changes in Coastal planning the City is proposing for our Planned Community.

Repeatedly over 90% of surveyed citizens (results emailed prior to both the City and CCC) have expressed the vital need and desire for a Coastal Park at Ponto to serve the current and future Coastal Recreation needs for all both Ponto and South Carlsbad and for larger regional and State Coastal Recreational needs. This desire is supported by data, CA Coastal Act Policy, and also Carlsbad's Community Vision – the foundation for the City's General Plan. Ponto is the last remaining vacant Coastal area available to provide for those needs in South Carlsbad and for a regional 6-mile stretch of coastline. Citizens have expressed deep concern about the City's flawed prior Coastal planning efforts for Coastal Recreation at Ponto, including two repeated LCP Amendment "mistakes" (Ponto Beachfront Village Vision Plan in 2010 and General Plan Update in 2015) when the City twice failed to publicly disclose/discuss and then follow the Existing LCP requirements at Ponto – specifically for Planning Area F. People for Ponto had to use multiple Carlsbad Public Records Requests in 2017 to find these "mistakes". CCC Staff was helpful in both confirming the City "mistakes" and communicating back to the City. As citizens we are still unclear as to how/why these two repeated "mistakes" happened. There is citizen concern that the City is again repeating these two prior "mistakes" by not at the beginning of the Public Comment Period clearly and publicly disclosing the Planning Area F LCP requirements to citizens as part of the current LCP Amendment process, and also by not implementing the existing LCP requirement PRIOR to proposing an Amended Coastal Land Use Plan for Ponto. The City in its proposed LCP Amendment process is putting-the-cart-before-the-horse with respect to honest and open consideration, documentation and public discussion of the need for high-priority Coastal Recreation land use required of Planning Area F at Ponto. The City is also not clearly letting all Carlsbad citizens know about the Existing LCP requirements for Ponto's Planning Area F so they can be informed to reasonably participate in public review and comment regarding amending that LCP requirement, and the need for Coastal Recreation land uses in South Carlsbad. Since 2017 there has been repeated citizen requests to the City (copies were provided to the CCC) to fix these multiple fundamental/foundational flaws by in the City's prior Coastal Recreation and Public Parks and Open Space at planning, and the currently Proposed Draft LCP Land Use Plan Amendment. Since 2017 there have also been repeated citizen requests to the City to provide a truly open, honest, inclusive community-based planning process and workshops with the accurate and honest information, prior to forming a proposed Draft LCP Land Use Plan Amendment. As citizens we believe we can constructively work with the City and CCC towards a consensus or viable options on these important Coastal Recreation issues if the City allows and encourages such an open, honest and inclusive process. We request the City respond to the requests submitted to the City since 2017, and again request such a process from the City before any LCP Amendment is first considered by the Planning Commission and City Council. Such a requested process benefits all.

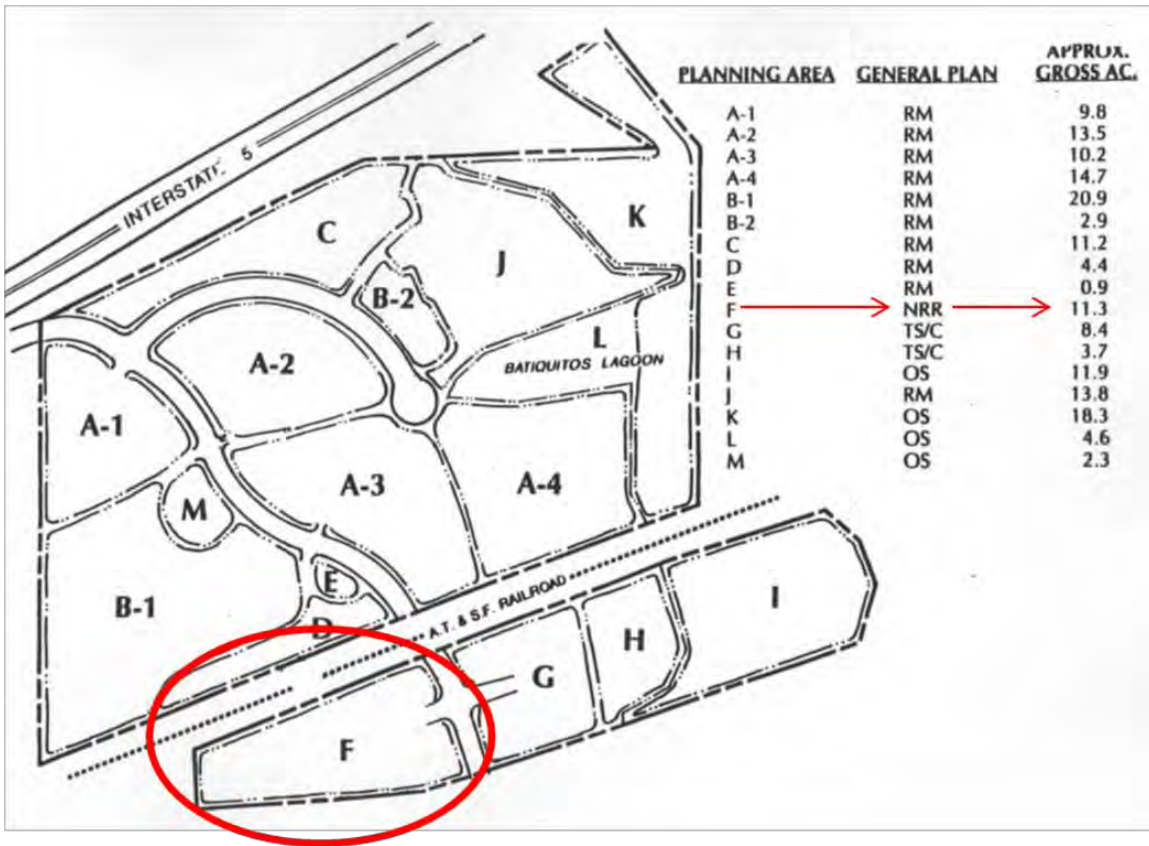

10. Why the Draft LCPA Land Use Plan for Ponto should provide for the current and future Coastal Park and Recreation needs for South Carlsbad, the San Diego Region and California.

- Ponto, is one of last remaining vacant and undeveloped Coastal lands in North County
- Ponto is the last remaining undeveloped Coastal land in South Carlsbad
- Ponto has the last unplanned Planning Area of the Existing Poinsettia Shores Planned Community & Local Coastal Program that can be planned for high-priority Coastal Recreation land use. This Existing LCP requires Planning Area F be considered for a “Public Park”.
- Following is a map of the Ponto area in South Carlsbad:

Following is the LCP Land Use map from the Existing Poinsettia Shores Master Plan & Local Coastal Program adopted in 1996. This is the Land Use map that the City is proposing to change in the proposed LCP Amendment to the Land Use Plan. As the Existing LCP Land Use map shows most all the land is ‘low-priority’ residential use at an RM Residential medium density, a small portion is ‘high-priority’ Visitor Serving TC/C Tourist Commercial. Most all the

Open Space is constrained and undevelopable land (the steep CSS habitat bluffs above Batiquitos Lagoon) or water (the lagoon water). This land/water is owned by the State of California, like the inner lagoon east of I-5. Only Planning Area M at 2.3 acres is unconstrained Open Space and it provides a small private internal recreation facility for the approximately 450 homes and 1,000 people in the Planned Community. This small recreation area is a City requirement for ‘planned developments’ to off-set loss open space from planned development impacts on housing quality. Planned developments can propose designs that reduce normal setback and open space areas – they bunch together buildings to increase development – such as the smaller lot sizes, and extensive use of “zero-setbacks” to reduce typical lot sizes that occurs at Poinsettia Shores. A private recreation facility in any of the City’s planned developments is never considered a replacement for required City Parks. Planned Developments, like unplanned developments, are required to dedicate Park land to the City, or pay a Park In-Lieu fee to the City so the City provide the developer’s obligation to provide City Park acreage to address the population increase of their proposed planned development. For Poinsettia Shores’ population the City’s minimum City Park Standard would require developers set aside 3 acres of City Park land for local park needs. For the larger Ponto area population about 6.6 acres of City Park Land is required. The Existing LCP reserves Planning Area F as an unplanned “Non-residential Reserve” Land Use until the Public Park needs for Ponto are considered and documented. Only then can the NRR land use be changed.

11. Developers have overbuilt in the Ponto area of the Coastal Zone. The City of Carlsbad has under questionable circumstances is currently choosing to ‘exempted’ Ponto developers from providing the minimum amount of unconstrained Open Space according to the City’s developer required Open Space Public Facilities Standard. The legality of these confusing circumstances is subject to a lawsuit against the City. However the City’s computerize mapping system has documented that the Ponto area of the Coastal Zone is missing about 30-acres of Unconstrained Open Space that can be used to fulfill the City’s Open Space Performance Standard that states that

15% of unconstrained and developable land must be preserved by developers as Open Space. Following is a summary of data from the City data regarding the missing Open Space at Ponto (Local Facility Management Plan Zone 9, LFMP Zone 9) in the Coastal Zone pursuant to the City's Open Space Performance Standard. If it is desirable People for Ponto can provide the City GIS map and parcel-by-parcel data base on which the following summary is based:

City of Carlsbad GIS data calculations of Open Space at Ponto area of Coastal Zone:

472 Acres = Total land in LFMP Zone 9 [Ponto area] per City of Carlsbad GIS data

(197 Acres) = Constrained land/water/infrastructure that is excluded from the City's Open Space Standard

275 Acres = Unconstrained land in LFMP Zone 9 (Ponto) subject to the City's Open Space Standard

X 15% = Minimum unconstrained Open Space requirement per the City Open Space Standard

41 Acres = Minimum unconstrained Open Space required in LFMP Zone 9

(11 Acres) = Actual unconstrained Open Space provided & mapped by City in LFMP Zone 9

**30 Acres = Missing unconstrained Open Space needed in LFMP Zone 9 [Ponto area of Coastal Zone] to meet the City's minimum GMP Open Space Standard. 73% of the required Open Space Standard is missing.**

Thus the Ponto area of the Coastal Zone appears overdeveloped with 30 additional acres of "low-priority" residential land uses due to developers' non-compliance to the City's Open Space Public Facility Performance Standard's Minimum developer required Open Space requirement. As noted a citizens group has a pending lawsuit with the City over the City's current 'exempting' Ponto and future developers from meeting the Open Space Standard.

12. The prior pre-1996 LCP for Ponto – the Batiquitos Lagoon Educational Park Master Plan & LCP (BLEP MP/LCP) had significant Open Space and recreational areas. These significant Open Space and Recreational areas were removed with BLEP MP/LCP's replacement in 1996 by the currently existing Poinsettia Shores Master & LCP (PSMP/LCP) and its City Zoning and LCP LUP requirements that reserved Planning Area F with the current "Non-residential Reserve" Land Use designation. Since the BLEP MP/LCP it appears developers and the City of Carlsbad have worked to remove "High-Priority" Coastal land uses (i.e. Coastal Recreation and Park uses) out of the Ponto area and replaced them with more "low-priority" residential and general commercial land uses. For example:

- Planning Area F used to be designated "Visitor Serving Commercial" as part of the original 1980's BLEP MP/LCP for Ponto.
- In 1996 the BLEP MP LCP was changed by developer application to the now current PSMP LCP, and the LCP LUP designation changed from "Visitor Serving Commercial" to "Non-Residential Reserve" with the requirement to study and document the need for "High-Priority" Coastal Recreation (i.e. Public Park) and/or Low-cost visitor accommodations prior to any change to Planning Area F's "Non-residential Reserve" LCP land use.
- In 2005 the City started to try to change Planning Area F to low-priority residential and general commercial land use in the City's Ponto Beachfront Village Vision Plan (PBVVP). At this time the City made its first documented Coastal 'planning mistake' by not disclosing to the public the existence of Planning Area F's LCP requirements and then also not following those LCP requirements. The City's planning process seemed focused on addressing developer's land use desires, and increasing land use intensity to boost "Tax-increment financing" as the City had established a Redevelopment Project Area at Ponto. A short time after the State of CA dissolved Redevelopment Agencies due in part to such abuses by cities. The CCC formally rejected the PBVVP in 2010, citing the City's failure to follow the LCP requirements for Planning Area F.

- Five years later in 2015 the City again adopted a proposed General Plan Update to again change Planning Area F to low-priority residential and general commercial land use. The General Plan Update cited the City's PBVVP that was in fact rejected by the CCC only a few years before. The City again repeated their PBVVP's Coastal land use 'planning mistake' by again not disclosing to the public the existence of Planning Area F's LCP requirements and then not following those LCP requirements. It is unclear why the City did this only 5-years after the CCC specifically rejected the Ponto Beachfront Village Vision Plan for those same reasons.
- In 2017 citizens found and then confirmed these Ponto Coastal 'planning mistakes' by the City through multiple official Carlsbad Public Records Requests and CCC Staff confirmation. The CCC readily identified the mistakes, but the City's 2019 proposed Draft LCP Land Use Plan and planning process still has yet fully disclose these prior Coastal 'planning mistakes' to ALL citizens of Carlsbad - the failure to disclose and follow the Planning Area F LCP LUP and City Zoning requirements. Full City disclosure is needed now to try to correct many years of City misrepresentation to citizens on LCP required Coastal land Use planning at Ponto. It is needed now so the public is aware at the start of the Public Comment Period. In 2017 citizens began asking the City fix the City's over 12-years of misinformation and planning mistakes by 'restarting' Coastal land use planning at Ponto with an open and honest community-based Coastal planning process. These citizens' requests have been rejected.
- In 2019 the City Staff proposed citywide Draft LCP land Use Plan Amendment that again proposed to change Planning Area F to "low-priority" residential and general commercial land use, without First disclosing the Planning Area F LCP requirements with corresponding analysis of the Need for Coastal Recreation (i.e. Public Park) and/or low-cost visitor accommodations at Planning Area F and providing that Documented analysis for public review/Consideration/comment. This seems like another 3<sup>rd</sup> repeat of the prior two Coastal planning mistakes by the City. In 2019, again citizens asked for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again the City rejected citizens' requests.
- In 2020 thousands of public requests again asked, and are currently asking, for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again these requests are being rejected. Based on the significant citizen concern and the documented prior 'planning mistakes' at Ponto it appears reasonable and responsible for Ponto's Planning Area F to ether:
  - i. Retain its current Existing LCP LUP land Use of "Non-Residential Reserve" until such time as the City's past Ponto Beachfront Village Vision Plan and General Plan Update planning mistakes and other issues subject to current planning lawsuits against the City are resolved with a true, honest and open community-based Coastal planning process asked for by citizens since 2017. Or
  - ii. Propose in the Draft LCP Land Use Plan Amendment to re-designated Planning Area F back to a Visitor Serving Commercial and Open Space ("i.e. Public Park") to provide both "High-Priory" coastal uses v. low-priority residential/general commercial uses due to the documented Coastal Recreation and Low-cost visitor accommodation needs for both citizens and visitors at Ponto and South Carlsbad.

13. Questionable logic and inconsistency in proposed Draft land use map and policies: Chapter 2 Figure 2-2B & C on pages 2-19 & 20 proposes to Amend the existing LCP Land Use Plan Map, and policies LCP-2-P.19 and 20 on pages 2-27 to 2-29 propose Amendments to existing LCP policy and create a new added layer of policy referencing a Ponto/Southern Waterfront. The proposed Land Use Map and Policies serve to firmly plan for "low-priority" residential and general commercial land uses at Ponto with a clear regulatory Land Use Plan Map showing these land uses and by specific regulatory policy (LCP-2-20) that clearly requires (by using the words "shall") these "low

priority” uses. In contrast the “High-Priority” Coastal Recreation and Coastal Park land uses that would be designated as Open Space are not mapped at all in Figure 2-2B & C; and the proposed policy LCP-2-P.19 is both misleading and specifically does Not Require any “High-Priority” Coastal Recreation and Coastal Park land Use at Ponto and South Carlsbad. In fact page 2-22 specifically indicates two “may” criteria that would first need to occur in the positive before any potential Coastal Recreation and Coastal Park Land could then theoretically even be possible. It is highly probable that it is already known by the City that the proposed relocation of Carlsbad Boulevard (Coast Highway) is not very feasible and not cost effective, and will not yield (due to environmental habitat constraints, narrowness of the roadway median, and other design constraints) any significant dimensions of land that could potentially be designated Open Space and realistically be used as a Park.

The blank outline map (Figure 2-2B & C) provides no mapped Open Space Land Use designation, other than for the currently existing State Campgrounds’ low-cost visitor accommodations, so the proposed Land Use Plan Map is Not providing/mapping any new Open Space land use to address Coastal Recreation and Coastal Park needs. The Draft LCP Land Use Plan Amendment’s proposed/projected/planned Sea Level Rise and associated coastal erosion appears to indicate that this “High-Priority” low-cost visitor accommodation (Campground) land use designated as Open Space will be reduced in the ‘Buildout’ condition due to coastal erosion. So **the Draft LCP Land Use Plan is actually planning for a Reduction in Open Space Land Use in South Carlsbad and Ponto.** Both the blank outline map and the proposed Land Use Map Figure 2-1 DO NOT clearly map and designate both South Carlsbad’s Draft LCP Planned Loss of the Open Space Land Use and also any New or replacement unconstrained land as Open Space land use for Coastal Recreation and Coastal Park. This is an internal inconsistency in Land Use Mapping that should be corrected in two ways:

- 1) Showing on all the Land Use (Figure 2-1), Special Planning Area (Figure 2-2B & C), and other Draft LCP Maps the Draft LCP’s planned loss of land area in those maps due to the Draft LCP’s planned loss of land due to Sea Level Rise and Coastal Land Erosion. This is required to show how land use boundaries and Coastal Recourses are planned to change over time. or
- 2) Provide detailed Land Use Constraint Maps for the current Carlsbad Boulevard right-of-way that the City “may” or ‘may not’ choose (per the proposed “may” LCP-2-P.19 policy) use to explore to address the City’s (Park Master Plan) documented Coastal Recreation and Coastal Park land use shortages in Coastal South Carlsbad and Ponto. Clearly showing the potential residual Unconstrained Land within a Carlsbad Boulevard relocation that have any potential possibility to add new Open Space Land Use Designations (for Coastal Recreation) is needed now to judge if the policy is even rational, or is it just a Trojan horse.

The proposed internal inconsistency in mapping and policy appears like a plan/policy ‘shell game’. The proposed Land Use Plan Maps and Policies should be consistent and equality committed (mapped-shall v. unmapped-may) to a feasible and actual Plan. If not then there is No real Plan.

There is no Regulatory Policy requirement in LCP-2-P.19 to even require the City to work on the two “may” criteria. The City could choose to bury the entire Carlsbad Boulevard relocation concept and be totally consistent with Policy LCP-2-P.19 and the LCP. As such the language on 2-22, Figure 2-2C (and the proposed Land Use Map), and policy LCP-2-P.19 and 20 appear conspire to create a shell game or bait-and-switch game in that only “low-priority” residential and general commercial uses are guaranteed (by “shall” policy) winners, and “high-priority” Coastal Recreation and Coastal Park Land Uses are at best a non-committal ‘long-shot’ (“may” policy) that the city is specifically not providing a way to ever define, or commit to implement. The proposed Draft LCP Land Use Plan Coastal Recreation and Coastal Park statements for Ponto are just words on paper that are designed to have no force, no commitment, no defined outcome, and no defined requirement to even have an outcome regarding the

documented “High-Priority” Coastal Recreation and Coastal Park needs at Ponto, Coastal South Carlsbad and the regional 6-mile Coastal Park gap centered around Ponto.

Policy LCP-2-P.19 falsely says it “promotes development of recreational use” but does not in fact do that. How is development of ‘recreational use promoted’ when the Use is both unmapped and no regulatory policy requirement and commitment (no “shall” statement) to ‘promote’ that Use is provided? Policy LCP-2-19.19 appears a misleading sham that does not ‘promote’ or require in any way “High-Priority” Coastal Recreation and Park Land Use at Ponto. There should be open and honest public workshops before the Draft LCP Amendment goes to its first public hearing to clearly define the major environmental constraints and cost estimates involving possible relocation of Carlsbad Boulevard and constructing needed beach access parking, and sufficient and safe sidewalks and bike paths along Carlsbad Boulevard; and then map the amount and dimensions of potential ‘excess land’ that maybe available for possible designation as Open Space in the City General Plan and Local Coastal Program. The City should not repeat the mistakes at the Carlsbad Municipal Golf Course (resulting in the most expensive to construct maniple course in the USA) by not defining and vetting the concept first. A preliminary review of City GIS data appears the amount, dimensions and locations of any potential ‘excess’ land maybe modest at best. However before the City proposes a ‘Buildout’ Coastal Land Use Plan this critical information should be clearly provided and considered. It is likely the City’s Carlsbad Boulevard relocation concept is unfeasible, inefficient, too costly, and yields too little actual useable ‘excess land’ to ever approach the Coastal Recreation and Coastal Park needs for South Carlsbad. This may already be known by the City, but it surely should be publicly disclosed and discussed in the DLPCA.

The proposed Coastal Land Use Plan to address Carlsbad’s, San Diego County’s and California’s High-Priority Coastal Recreation Land Use and Coastal Park needs should NOT be vague “may” policy that appears to be purposely designed/worded to not commit to actually providing any “High-Priority” Coastal Recreation and Coastal Park land uses on the map or in policy commitments. The Land Use Plan and Policy for High-Priority Coastal Recreation and Coastal Park Land Use should be definitive with triggered “shall” policy statements requiring and assuring that the ‘Forever’ “High-Priority” Coastal Recreation and Coastal Park needs are properly and timely addressed in the City’s proposed ‘Buildout’ Coastal Land Use Plan. This “shall” policy commitment should be clearly and consistently mapped to show the basic feasibility of the planned outcomes and the resulting actual Land that could feasibly implement the planned outcome.

Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard: Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard are Coastal Access and Completes Streets issues. South Carlsbad Boulevard now and has for decades been a highly used Incomplete Street that is out of compliance with the City’s minimum Street Standards for pedestrian and bike access and safety. The Coastal Access portion of the Draft Land Use Plan should strongly address the Complete Street requirements for South Carlsbad Boulevard. Those policy commitments should be reference in Policy LCP-2-P.19 and 20 as Carlsbad Boulevard in **South Carlsbad is the most Complete Street deficient portion of Carlsbad Boulevard**. Forever Coastal Access parking demand and the proposed LCP Amendment’s Land Use Plan to supply parking for those demands should also be addressed as part of the Coastal Access and Complete Streets issues for South Carlsbad Boulevard. If much needed Coastal Access Parking is provided on South Carlsbad Boulevard as part of a “maybe” implemented realignment, most of the “maybe” realignment land left after constraints are accommodated for and buffered will likely be consumed with these parking spaces and parking drive aisles/buffer area needed to separate high-speed vehicular traffic from parking, a buffered bike path, and a sufficiently wide pedestrian sidewalk or Coastal Path. After accommodating these much needed Complete Street facilitates there will likely be little if any sufficiently

dimensioned land available for a Coastal Recreation and a Coastal Park. The needed Coastal Access and Complete Street facilities on South Carlsbad Boulevard are very much needed, but they are NOT a Coastal Park.

As mentioned the proposed Draft Coastal Land Use Plan's Maps and Policies are very specific in providing for the City's proposed LCP Land Use changes to 'low-priority' Residential and General Commercial' on Planning Area F (proposed to be renamed to Area 1 and 2). It is curious as to why the proposed Draft LCP Land Use Plan Amendment has no Land Use Map and minor vague unaccountable Land Use Policy concerning 'High-priority Coastal Recreation Land Use' at Ponto, while the very same time proposing very clear Land Use Mapping and detailed unambiguous "shall" land use policy requirements for 'low-priority' Residential and General Commercial land use at Ponto. Why is the City Not committing and requiring (in a Land Use Map and Land Use Policy) to much needed 'High-priority' Coastal Recreation and Coastal Park Land Use' needs at Ponto the same detail and commitment as the City is providing for "low-priority" uses? This is backwards and inappropriate. It is all the more inappropriate given the 'Buildout' Coastal Land Use Plan the City is proposing at Ponto. These issues and plan/policy commitments and non-commitments will be 'forever' and should be fully and publicly evaluated as previously requested, or the Existing LCP Land Use Plan of "Non-residential Reserve" for Planning Area F should remain unchanged and until the forever-buildout Coastal Recreation and Coastal Park issues can be clearly, honestly and properly considered and accountably planned for. This is vitally important and seems to speak to the very heart of the CA Coastal Act, its founding and enduring principles, and its policies to maximize Coastal Recreation. People for Ponto and we believe many others, when they are aware of the issues, think the City and CA Coastal Commission should be taking a long-term perspective and be more careful, thorough, thoughtful, inclusive, and in the considerations of the City's proposal/request to permanently convert the last vacant unplanned (Non-residential Reserve) Coastal land at Ponto to "low-priority" land uses and forever eliminate any Coastal Recreation and Coastal Park opportunities.

14. Public Coastal View protection: Avenida Encinas is the only inland public access road and pedestrian sidewalk to access the Coast at Ponto for one mile in each direction north and south. It is also hosts the regional Coastal Rail Trail in 3' wide bike lanes. There exist now phenomenal coastal ocean views for the public along Avenida Encinas from the rail corridor bridge to Carlsbad Boulevard. It is assumed these existing expansive public views to the ocean will be mostly eliminated with any building development seaward or the Rail corridor. This is understandable, but an accountable ('shall') Land Use Plan/Policy addition to proposed Policy LCP-2-P.20 should be provided for a reasonable Public Coastal View corridor along both sides of Avenida Encinas and at the intersection with Carlsbad Boulevard. Public Coastal view analysis, building height-setback standards along Avenida Encinas, and building placement and site design and landscaping criteria in policy LCP-2-P.20 could also considered to reasonably provide for some residual public coastal view preservation.
  
15. Illogical landscape setback reductions proposed along Carlsbad Boulevard, and Undefined landscape setback along the Lagoon Bluff Top and rail corridor in Policy LCP-2-P.20: Logically setbacks are used in planning to provide a buffering separation of incompatible land uses/activities/habitats. The intent of the setback separation being to protect adjacent uses/activities/habitats from incompatibility, nuisance or harassment by providing a sufficient distance/area (i.e. setback) between uses/activities/habitats and for required urban design aesthetics – almost always a buffering landscaping. Policy LCP-2-P.20. A.4 and C.3 says the required 40' landscape setback along Carlsbad Boulevard "maybe reduced due to site constraints or protection of environmental resources." The ability to reduce the setback is illogical in that setbacks are intended to protect environmental resources and provide a buffer for constraints. In the Carlsbad Boulevard right-of-way there is documented sensitive environmental habitat, along with being a busy roadway. How could reducing the protective 40' setback in anyway better protect that habitat or provide a better landscaped compatibility or visual aesthesis buffer along Carlsbad Boulevard? It is

illogical. If anything the minimum 40' landscaped setback should likely be expanded near "environmental resources". Regarding reducing the minimum 40' landscape setback for "site constraints" there is no definition of what a "site constraint" is or why it (whatever it may be) justifies a reduction of the minimum landscaped setback. Is endangered species habitat, or a hazardous geologic feature, or a slope, or on-site infrastructure considered a "site constraint"? There should be some explanation of what a "site constraint" is and is not, and once defined if it warrants a landscape setback reduction to enhance the buffering purpose of a landscape setback. Or will a reduction only allow bringing the defined constraint closer to the adjacent uses/activities/habitats that the landscape setback is designed to buffer. It is good planning practice to not only be clear in the use of terms; but also, if a proposed reduction in a minimum standard is allowed, to define reasonably clear criteria for that reduction/modification and provide appropriate defined mitigation to assume the intended performance objectives of the minimum landscape setback are achieved.

Policy LCP-2-P.20.C.4 is missing a critical Bluff-Top landscape setback. It seems impossible that the DLCPA is proposing no Bluff-Top setback from the lagoon bluffs and sensitive habitat. The Batiqitos Lagoon's adjoining steep sensitive habitat slopes directly connect along the Bluff-top. Batiqitos Lagoon's and adjoining steep sensitive habitat is a sensitive habitat that requires significant setbacks as a buffer from development impacts. Setbacks similar to those required for the San Pacifico area inland of the rail corridor, should be provided unless updated information about habitat sensitivity or community aesthetics requires different setback requirements.

Policy LCP-2-P.20 does not include a landscape setback standard adjacent to the rail corridor. This is a significant national transportation corridor, part of the 2<sup>nd</sup> busiest rail corridor in the USA. Train travel along this corridor is planned to increase greatly in the years to come. Now there is significant noise, Diesel engine pollution, and extensive ground vibration due to train travel along the rail corridor. Long freight trains which currently run mostly at night and weekends are particularly noisy and heavy, and create significant ground vibration (underground noise). These issues are best mitigated by landscape setbacks and other buffers/barriers. A minimum setback standard for sufficient landscaping for a visual buffer and also factoring appropriate noise and ground vibration standards for a buildout situation should be used to establish an appropriate landscape setback that should be provided along the rail corridor. Carlsbad's landscape aesthetics along the rail corridor should be factored into how wide the setback should be and how landscaping should be provided. An example for the landscape aesthetic portion of the setback standard could be landscape design dimensions of the San Pacifico community on the inland side of the rail corridor. However, noise and vibrational impacts at San Pacifico are felt much further inland and appear to justify increased setbacks for those impacts.

**Subject:** Tell us about parks & rec priorities at this week's meetings - Q7

**Cc:** City Clerk <Clerk@carlsbadca.gov>; info@peopleforponto.com  
**Subject:** RE: Tell us about parks & rec priorities at this week's meetings - Q7

Dear Carlsbad City Council and Parks Commission, and CA Coastal Commission:

I would like to amend the Dec 8<sup>th</sup> email below to add a 7<sup>th</sup> suggested data point and question the City should provide citizens in setting park land use policy and priorities. The data for this question comes from City data as documented on page 3 of the attached Coastal Recreation public input provided in Oct, 2021 for both the City's proposed Parks Master Plan & Local Coastal Program Amendments:

7. Over 112 acres, or over 33% of all existing/planned City parkland is constrained and unusable to humans to fully use as a park. This means over 1/3 of the land within what are called City parks is functionally unusable by citizens as a park, and 1/3 of Carlsbad citizens are not being provided useable parkland per the City's minimal parkland per population standard.
  - a. Should it be a City priority to acquire 112 new acres of unconstrained and fully useable acres to replace the 112 acres of City Park land that is constrained and cannot be used as a Park?

Following is the data from page 3 of Coastal Recreation (attached):

Some Carlsbad Parks that are not fully useable as Parks:

<b>Existing Parks with Unusable Open Space acreage</b>	<b>total park acres</b>	<b>Unusable park acres</b>	<b>% of park unusable</b>	<b>reason unusable</b>
Alga Norte - SE quadrant	32.1	10.7	33%	1/3 of park is a Parking lot not a park In many other Carlsbad Parks a significant percentage of those Parks are consumed by paved parking lots and unusable as a Park.
Hidden Hills - NE quadrant	22.0	12.7	58%	city identified unusable habitat open space
La Costa Canyon SE quadrant	14.7	8.9	61%	city identified unusable habitat open space
Leo Carrillo - SE quadrant	27.4	16.5	60%	city identified unusable habitat open space
Poinsettia - SW quadrant	<u>41.2</u>	<u>11.1</u>	<u>27%</u>	city identified unusable habitat open space
Existing Park subtotal Parkland	137.4	59.9	44%	44% of these Parks are unusable as

**Anticipated Future Park**

## development projects

### Park - quadrant

Veterans - NW	91.5	49.5	54%	estimated unusable habitat open space
Cannon Lake - NW	6.8	3.4	50%	estimated unusable water open space
Zone 5 Park expansion - NW	9.3	0	0	appears 100% useable as a Park
Robertson Ranch - NE	<u>11.2</u>	<u>0</u>	<u>0</u>	appears 100% useable as a Park
Future park subtotal	118.8	52.9	45%	45% of Future Parks are unusable as Parks

Unusable Open Space acres  
in Existing & Future Parks      256.2    112.8                    44%                    112.8 acres or 44% is unusable as Parks

- 112.8 acres or 44% of the Existing & Future Parks are unusable Open Space and can't be used as Parkland
- Based on City's minimum 3-acres/1,000 population Park Standard, 112.8 acres of Unusable Parkland means 37,600 Carlsbad Citizens (or 32.5% of Carlsbad's current population of 112,877) will be denied Parkland that they can actually use as a Park.
- 112.8 acres of Existing & Future unusable 'park' / 3 acre park standard x 1,000 population = 37,600 Carlsbad citizens without useable parkland per City minimum standard.
- 59.9 acres of Existing unusable 'park' / 3 acre park standard x 1,000 population = 19,967 Carlsbad citizens and their children are currently being denied useable park land. 19,967 is 17.7% of Carlsbad's current population.
- In addition to these 19,967 existing citizens and their children denied park land, the City needs to develop additional Park acreage in the NE, SW and SE quadrants to cover current shortfalls in meeting in the minimal 3 acre/1,000 population park standard for the current populations in the NE, SW and SE quadrants.
- The current NE, SW and SE quadrants park acreage shortfalls are in addition to the 19,967 Carlsbad citizens and their children that do not have the minimum 3 acres of parkland per 1,000 population
- Current FY 2018-19 MINIMUM park acreage shortfalls are listed below. They are:
  - 4.3 acres for 1,433 people in NE quadrant,
  - 6.8 acres for 2,266 people in SW quadrant, and
  - 2.3 acres for 767 people in SE quadrant

Thanks you for your consideration,  
Lance Schulte

**Subject:** RE: Tell us about parks & rec priorities at this week's meetings

Dear Carlsbad City Council and Parks Commission:

Sorry I am unable to attend the workshops. Following is my public input & data, and suggested questions the City should provide citizens in setting park land use policy and priorities:

A clear lesson from Covid is the need for flat wide open grassy parks that fully allow social distancing and multi-function park and recreation opportunities within a 10-minute walking distance to all neighborhoods. This fundamentally what city parks are intended to provide – flat wide-grassed-flat and fully useable multi-function spaces to recreate formally or informally, and being accessible by a short walk to all neighborhoods and children without having to drive a car to access.

Another clear lesson comes from new City and State parallel moves to demand unlimited population growth using higher density condo/apartment developments. These developments by definition pack more people into a smaller area thus creating an even greater need for parks. Making flat wide open grassy and fully useable parks even more important to be provided within a 10-minute walk.

Trails although nice to walk along in the outdoors force people into a 5-8 foot wide path that does not allow social distancing. A trail is not a park.

Carlsbad People for Ponto (P4P) Citizens have for years provided the City input on Parks and Recreation Priority issues from 2017 to less than 2-months ago, and to now. Since pre-Covid 2017 over about 5,000 written/verbal petitions and multiple budget processes have been provided. In an after-Covid situation, most recently in October 2021, about 700 written/verbal petitions and public testimony was provided. Carlsbad P4P Citizen input is based on documented City records. P4P Carlsbad Citizen input is/has been consistent with the above Covid observations and significant in the numbers of Citizens calling for a meaningful (i.e. usable wide, grassed multi-function) park at Ponto. The P4P Citizen input should be fully disclosed, discussed and accounted for in the Parks Master Plan.

P4P's 30-page October 15, 2021 "Coastal Recreation" data file to the City documented comparative park data that the City should fully present and discuss with Citizens as part of the Parks Master Plan. The comparative park data shows Carlsbad is below average nationally and significantly below our adjacent Cities in providing parks – and requiring Carlsbad developers provide parks for their developments. It also documents how over 112 acres, or over 33% of all existing/planned City parkland is constrained and unusable to humans to fully use as a park. Having over 33% of City Parks constrained and not fully useable a park for citizens is a significant city land use and parks master plan issue. The 30-pages of documented information and requests in the October 15, 2021 Coastal Recreation file should be a part of the park master plan process. Following are some key park data the City should present and key park priority questions on that data the City should ask citizens:

1. Carlsbad only requires developers to provide a comparatively low 3-acres of parkland per 1,000 population of Carlsbad developments. Encinitas and Oceanside require their developers to provide 5-acres per 1,000 population, which is over 60% more parkland than Carlsbad's City Council requires developers to provide.
  - a. Should Carlsbad require 60% less parkland than Encinitas and Oceanside?
  - b. Should Carlsbad require developers to provide the same 5-acres per 1,000 parkland as Encinitas and Oceanside?
2. Carlsbad does not plan for, or require developers, to provide parks within a 10-minute walk to homes. Both Encinitas and Oceanside require parks to be provided within a 10-minute walk of all homes in their Cities.
  - a. Should Carlsbad require parks to be within a 10-minute walk of homes like Encinitas and Oceanside?
  - b. Should Carlsbad require developers to provide their parkland requirement (3 or 5 acres/1,000 population) be within a 10-minute walk of homes the developer builds like Encinitas and Oceanside?
3. Carlsbad is BELOW the national average in BOTH providing Parkland and in providing Parkland Within a 10-minutewalk to homes (see ,Trust for Public Land Park Score).
  - a. Should Carlsbad be below average nationally in providing Parkland?
  - b. Should Carlsbad provide Parkland to be in the top 10%, 20%, 30%, 40%, just average, or below average nationally? (select one)
  - c. Should Carlsbad be below average nationally in providing Parkland within a 10-minute walk to homes?

- d. Should Carlsbad provide Parkland within a 10-minute walk of homes so as to be in the top 10%, 20%, 30%, 40%, just average, or below average nationally? (select one)
- 4. South Carlsbad composes 62% of Carlsbad's population, yet has no large grassy usable Coastal park (like a Holiday Park) and has 0-acers of park west of I-5.
  - a. Should 62% of Carlsbad's population have at least one large grassy and fully useable park?
  - b. Should South Carlsbad developers be required to correct this park inequity?
- 5. North Carlsbad composes 38% of Carlsbad's population, yet has 10 Coastal parks totaling over 35-acres west of I-5.
  - a. Should the City's planned park investments be re-prioritized to correlate the location of coastal park land acreage with population demand?
- 6. South Carlsbad developer fees paid to build and fund many North Carlsbad park acres in both Veterans Park and Poinsettia 61 Park.
  - a. Should the City appropriately use those South Carlsbad developer fees paid to build Veterans Park and Poinsettia 61 Park to fund parks in South Carlsbad where the development and park demand from that development occurred?

Thank you for your consideration. We look forward to confirmation that years of P4P citizen input to the City on Park issues is being considered in your efforts.

**Parks & Recreation Master Plan Meetings are this Week**

Don't forget to register for one of two virtual meetings we're holding this week to talk about whether COVID has changed parks and rec priorities.

Thursday, Dec. 9, 6 to 7 p.m.

[Register](#)

Saturday, Dec. 11, 10 to 11 a.m.

[Register](#)

The City of Carlsbad is creating an updated blueprint that will guide priorities and proposed investments in parks and recreation for the next five years. This project was interrupted due to the COVID-19 pandemic, and as the project starts back up, the city wants to know if the community's priorities have changed.

Community members are encouraged to attend one of the two virtual meetings to hear the public feedback that was provided in February 2020 and let the city know if anything has changed.

The city's existing Parks & Recreation Master Plan was completed in 2015. The update will cover:

- Assessment of current parks, facilities and recreational programs
- Demographic and industry trends
- Community needs and priorities
- Funding needs and revenue opportunities
- A five-year strategic action plan

### **Other input opportunities**

Input from the workshops will be used to create a survey questionnaire to obtain feedback from a statistically representative group of Carlsbad residents. The survey will also be available online to anyone who wants to take it; however, the results will be analyzed separately from the random sample.

A draft of the master plan will be made available for input by the end of summer 2022, with a final draft scheduled to be presented to the City Council for approval in fall of 2022.

Updated Pubic Comments Coastal Recreation submitted on Oct 12<sup>th</sup> 2021:

---

On 10/8/21 the Carlsbad City Council and CA Coastal Commission were emailed data from an Official Carlsbad Public Records Request (# R002393-092121) on the City of Carlsbad's past compliance/noncompliance with the currently exiting Mello II LCP Land Use Policies # 6-2, 6-4 & 6-10 Certified in the mid-1980s. The City's documents show:

- For Policy 6-2 the 200-300 acre Park called out in Policy 6-2 has been reduced to Veterans Park's 91.5 acres, of which only 54% or 49.5 acres is even useable as a Park. The City provided no documents on how a 200-300 acre park called for in Policy 6-4 is now only 49.5 useable acres.
- For Policy 6-4 there were no City documents were provided. There was no City Public discussion, consideration, or City compliance with Policy 6-4 since the mid-1980's.
- For Policy 6-10 concerns providing Low Cost Visitor Accommodations. Public Parks are the lowest cost (free) Visitor accommodating land use there is.

The 3 existing LCP Land Use Policies are important for Carlsbad, and California's, Coastal land use resources. There appears little to no discussion of the City's past apparent failure to implementation of these 3 LCP LUPs in the current City consideration of changes to the LCP.

Following is a copy of Public Records Request # R002393-092121: "Carlsbad's Local Coastal Program (LCP) for the Mello II Segment of Carlsbad's Coastal Zone has long established land use Policies 6-2, 6-4 & 6-10 that were adopted by Carlsbad and Certified by the CA Coastal Commission in the early/mid-1980's. Mello II LCP Policies 6-2, 6-4 & 6-10 are shown on page 86-87 of Carlsbad's 2016 compiled LCP and are:

- "POLICY 6-2 REGIONAL PARK: If the population of Carlsbad increases in accordance with SANDAG's projected Series V Population Forecasts, it is estimated that Carlsbad will need to develop a new regional park containing 200 to 300 acres in order to adequately serve the public. A location for a new regional park must, therefore, be established. Consideration should be given to a facility within the Aqua Hedionda Specific Plan Area, or adjacent lands. The Batiquitos Lagoon area should also be considered.
- POLICY 6-4 NEED FOR ADDITIONAL OVERNIGHT CAMPING: Additional overnight camping facilities, the main source of lower cost visitor and recreational facilities, are needed throughout the San Diego coastal region. Additional facilities of this kind should be provided in a regional park within the Carlsbad area. This can be accomplished in conjunction with an eventual Batiquitos Park, within the Aqua Hedionda Specific Plan Area, and/or along with the development of private recreational facilities.
- POLICY 6-10 LOWER COST VISITOR-SERVING RECREATIONAL USES: Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Encourage a range of affordability for overnight visitor accommodations. Evaluate the affordability of any new or redeveloped overnight visitor accommodations, including amenities that reduce the cost of stay. Mitigation may be applied to protect and encourage affordable overnight accommodations"

The public record request is to see documents of:

- City Staff reports, presentations and communications to the Carlsbad Planning and Parks Commissions, and City Council regarding the City’s consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies; and
- Carlsbad Planning and Parks Commissions, and City Council minutes, resolutions and ordinances documenting City of Carlsbad consideration and implementation of these 3 specific (6-2, 6-4, and 6-10) Mello II LCP land use policies.”

Updated Pubic Comments Coastal Recreation submitted on January 2021:

---

Over 11-months ago in a 1/29/20 1:56PM email People for Ponto Carlsbad citizens first provided the City of Carlsbad both data and comments on **14 critical Coastal Recreation issues (see pages 5-30 below)**. The data and the 14 critical issues do not seem to be receiving appropriate disclosure/presentation/discussion/consideration in the Dec 2, 2020 Staff Report to the Planning Commission. To assure the 26-pages of citizen data and requests in the 1/29/20 email was received by the Planning Commission the file was re-emailed on 12/22/20 12:24pm and specifically addressed to City Council, City Clerk, Planning Commission, Parks Commission, Housing Commission, HEAC, CA Coastal Commission, and CA HCD. As citizens we request each of these 14 data points (with supporting data) be honestly considered.

In reading the Dec 2 Staff Report citizens conducted additional analysis of City Park data. That research further reinforces and documents the 14 Critical Coastal Recreation issues and highlights the relatively poor amount of City Park and Coastal Recreation planned by Carlsbad’s Staff proposed Draft LCP-LUPA. We hope the City Council and City Commissions, and CA Coastal Commission & HCD will consider this additional analysis of City data and citizen input:

<u>Coastal Zone data</u>	<u>Carlsbad</u>	<u>Oceanside</u>	<u>Encinitas</u>	<u>note or source</u>
Coastline miles	6.4	3.9	6.0	Carlsbad Draft LCPA 201, Google Maps
Coastal Zone Acres	9,219	1,460	7,845	& Oceanside & Encinitas LCPs
Coastal Zone Acres	100%	16%	85%	% relative to Carlsbad

City Park Standard data

City Park Standard	3	5	5	required park acres / 1,000 population
Park Standard %	100%	167%	167%	% is relative to Carlsbad

- Oceanside & Encinitas 'require' and plan for 67% MORE Parkland than Carlsbad
- Carlsbad 'requires' and plans for ONLY 60% as much Parkland as Oceanside & Encinitas
- Carlsbad only requires developers provide 60% of the parkland (or in-lieu fees) as Oceanside & Encinitas require
- Encinitas has a 'Goal' to provide 15 acres of Park land per 1,000 population

Developed City Park	2.47	3.65	5.5	acres / 1,000 population
Developed Park	100%	148%	223%	% is relative to Carlsbad

- Oceanside provides 48% MORE developed park land than Carlsbad
- Encinitas provide 123% MORE developed park land than Carlsbad
- Carlsbad ONLY provides 68% and 45% as much Parks as Oceanside & Encinitas respectively

National Recreation & Park Asso. Metric: a typical City provides 1 park / 2,281 pop. & 9.9 Park acres / 1,000 population

- Carlsbad (3 acre) Park Standard is ONLY 30% of what a typical City provides nationally
- Carlsbad requires developers to provide, 70% LESS Park acres than typical City provides nationally

National Recreation & Park Asso., Trust for Public Land, et. al.: 10 minute (1/2 mile) Walk to a Park Planning Goal

- Both Oceanside and Encinitas plan parks to be within a 10-minute (1/2 mile) walk to homes.
- Carlsbad DOES NOT plan Parks within walking distance to homes
- Carlsbad is NOT providing equitable and walking/biking access to Parks

Some Carlsbad Parks that are not fully useable as Parks:

<u>Existing Parks with Unusable Open Space acreage</u>	<u>total park acres</u>	<u>Unusable park acres</u>	<u>% of park unusable</u>	<u>reason unusable</u>
Alga Norte - SE quadrant	32.1	10.7	33%	1/3 of park is a Parking lot not a park In many other Carlsbad Parks a significant percentage of those Parks are consumed by paved parking lots and unusable as a Park.
Hidden Hills - NE quadrant	22.0	12.7	58%	city identified unusable habitat open space
La Costa Canyon SE quadrant	14.7	8.9	61%	city identified unusable habitat open space
Leo Carrillo - SE quadrant	27.4	16.5	60%	city identified unusable habitat open space
Poinsettia - SW quadrant	<u>41.2</u>	<u>11.1</u>	<u>27%</u>	city identified unusable habitat open space
Existing Park subtotal	137.4	59.9	44%	44% of these Parks are unusable as Parkland

Anticipated Future Park development projects

<u>Park - quadrant</u>				
Veterans - NW	91.5	49.5	54%	estimated unusable habitat open space
Cannon Lake - NW	6.8	3.4	50%	estimated unusable water open space
Zone 5 Park expansion - NW	9.3	0	0	appears 100% useable as a Park
Robertson Ranch - NE	<u>11.2</u>	<u>0</u>	<u>0</u>	appears 100% useable as a Park
Future park subtotal	118.8	52.9	45%	45% of Future Parks are unusable as Parks

**Unusable Open Space acres**

**in Existing & Future Parks**      256.2    112.8      44%      **112.8 acres or 44% is unusable as Parks**

- 112.8 acres or 44% of the Existing & Future Parks are unusable Open Space and can't be used as Parkland
- **Based on City's minimum 3-acres/1,000 population Park Standard, 112.8 acres of Unusable Parkland means 37,600 Carlsbad Citizens (or 32.5% of Carlsbad's current population of 112,877) will be denied Parkland that they can actually use as a Park.**
- 112.8 acres of Existing & Future unusable 'park' / 3 acre park standard x 1,000 population = 37,600 Carlsbad citizens without useable parkland per City minimum standard.
- **59.9 acres of Existing unusable 'park' / 3 acre park standard x 1,000 population = 19,967 Carlsbad citizens and their children are currently being denied useable park land. 19,967 is 17.7% of Carlsbad's current population.**
- In addition to these 19,967 existing citizens and their children denied park land, the City needs to develop additional Park acreage in the NE, SW and SE quadrants to cover current shortfalls in meeting in the minimal 3 acre/1,000 population park standard for the current populations in the NE, SW and SE quadrants.
- **The current NE, SW and SE quadrants park acreage shortfalls are in addition to the 19,967 Carlsbad citizens and their children that do not have the minimum 3 acres of parkland per 1,000 population**
- **Current FY 2018-19 MINIMUM park acreage shortfalls are listed below. They are:**
  - **4.3 acres for 1,433 people in NE quadrant,**
  - **6.8 acres for 2,266 people in SW quadrant, and**
  - **2.3 acres for 767 people in SE quadrant**

Shortfall (excess) in  
Current Quadrant  
Park standard by

	population		Future Park		existing Park shortfalls are for NE, SW & SE quadrants
	acres	need	acres	%	
NW quadrant	(-14.2)	(-4,733)	107.6	91%	Current NW parks are 14.2 acres over min. standard & capacity for 4,733 more people at min. park standard. 91% of all Future City Parks are in NW quadrant
NE quadrant	4.3	1,433	11.2	9%	Future Park will exceed minimum NE park standard
SW quadrant	6.8	2,266	0	0%	No min. parks for 2,266 people in SW quad. Park deficit
SE quadrant	2.3	767	0	0%	No min. parks for 767 SE quadrant Park deficit

A Park Standard minimum is just a “Minimum”. City policy allows the City to buy/create parks above the City’s current 3 acre/1,000 pop. MINIMUM (and lowest) Park Standard of surrounding Coastal cities. Carlsbad already did this in the NW quadrant. It then added 3.1 more NW quadrant Park acres as part of the Poinsettia 61 Agreement. Poinsettia 61:

- converted 3.1 acres of NW City land planned/zoned for Residential use to Open Space Park land use/zoning,
- facilitated a developer building condos (increasing park demand) in the SW quadrant,
- required the SW Quadrant developer pay \$3 million to build the 3.1 acre NW quadrant park, and
- required the SW Quadrant developer pay to convert 3.1 acres of NW Quadrant & 5.7 acres of SW Quadrant City Park land to habitat that will be unusable as a City Park.

So Poinsettia 61 increased SW Quadrant development (that both increased SW Park Demand and expanded the current SW Quadrant Park deficit) while simultaneously using SW Quadrant development to pay for the conversion of 3.1 acres of residential land in the NW Quadrant to City Park (the NW Quadrant already has surplus park land per the City’s minimum standard).

People for Ponto strongly supports creating City Parks above the City’s current low 3-acre per 1,000 population minimum, as the City’s minimum standard is relatively low and substandard relative to other cities; many Carlsbad parks have significant acreage that is in fact ‘unusable’ as a park. Most importantly People for Ponto Citizens think it is very important to prioritize providing City Parks in areas of Park Inequity that are unserved by City Parks. However it seems very unfair to the SW Quadrant citizens to be so unserved and starved of the bare minimum of City Parks while at the same time funding City Parks in excess of City standard in other Quadrants.

The Poinsettia 61 illustrates a larger unfair (and dysfunctional) distribution of Quadrant based City Park demand and supply that is keenly evident in the demands/supply funding and location disparity of Veterans Park. Most all the development impact and park demand that paid Veterans Park fees came from the SW, SE and NE Quadrants yet the Veterans Park (supply) is not in those SW, SE and NE Quadrants. This inequity is counter to the implicit City requirement that City Parks be provided within the Quadrant of their Park demand. It is logical and proper that City Parks be provided and equitably distributed to be close to the development and population that generated the demand for that Park.

The City Park inequity at Ponto and in other Coastal areas of the City is counter to several CA Coastal Act policies; counter to good city planning and good CA Coastal planning; is highly detrimental to the City, City and CA citizens in the long-term; fails to properly distribute and match the location supply with the location of demand for Parks; and is counter to basic fundamental issues of fairness. Since 2017 People for Ponto has tried to get the City Council and City Staff to address this inequity, specifically at Ponto, and to do so in a way that embraces a true and honest Citizen-based planning process.

**Coastal Recreation:**

2. Request that the City as part of its Draft LCP Public Review process broadly-publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCPA processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park: This disclosure is needed to correct about 20 years of City misrepresentation to the public on the since 1996 and currently Existing LCP requirements at Ponto, and the City's prior planning mistakes at Ponto. Citizens have been falsely told by the City that all the Coastal planning at Ponto was done already and that the City followed its Existing LCP regarding the need for a park at Ponto, and that this is already decided and could not be reversed. This misinformation has fundamentally stifled public review and public participation regarding the Coastal Zone. City failure to provide such a broad-public disclosure on the documented prior, and apparently current proposed, "planning mistakes" would appear to violate the principles of Ca Coastal Act Section 30006. A broad-public disclosure would for the first time allow citizens to be accurately informed on the Existing LCP requirements at Ponto so they can provide informed public review and comment regarding the need for a Coastal Park in in this last vacant 'unplanned' area. The requested broad-public disclosure by the City of the City past mistakes and the Existing LCP requirements at Ponto is consistent with CA Coastal Act (CCA) "Section 30006 Legislative findings and declarations; public participation - The Legislature further finds and declares that **the public has a right to fully participate in decisions affecting coastal planning**, conservation and development; that achievement of **sound coastal conservation and development is dependent upon public understanding and support**; and that the continuing planning and implementation of **programs for coastal conservation and development should include the widest opportunity for public participation.**" The public cannot participate as outlined in CCA Section 30006 if past City 'mistakes' and misrepresentations on Coastal planning at Ponto go undisclosed to the public. If the public isn't fully informed about the 20-years of LCP planning mistakes at Ponto how could the public in the past (and now in the present) participate in the proposed LCP Amendment – **Public Participation as noted in Section 30006 above is the means to sound coastal conservation and development and is "... dependent upon public understanding ..."**. The City's past mistakes at Ponto need to be corrected by slightly different a Draft LCP Amendment process than currently outlined by the City; a new process is needed that clearly, opening and honestly informs and engages the public on the Existing LCP Ponto issues. The City's current Draft LCP Amendment process fails to follow CCA Section 30006 in that most all the citizens we encounter are as yet unaware of the City's Ponto mistakes and how they can participate in in the DLCPA process without that information. We see this daily in conversations we have with our fellow citizens. We even saw at the Oct 20, 2019 Carlsbad Planning Commission meeting that the Planning Commission was unaware of the planning mistakes at Ponto. How can a decision body of the City make a decision without knowing about these prior 'planning mistakes' facts that surround what they are being asked to decide on? Repeatedly since 2017 Carlsbad citizens and People for Ponto have asked the City to fully acknowledge the City's prior flawed planning at Ponto, and to correct that with ether maintaining the Existing LCP Non-residential Reserve Land Use or restarting the Coastal Planning at Ponto with a true and accurately informed Community-based Coastal Planning process consistent with Section 30006.

We request the City during the DLCPA Public Review period broadly and publicly disclose to all Carlsbad Citizens the City's acknowledged prior LCP and other "planning efforts" public participation processing and planning "mistakes" regarding the requirement that the Ponto area be considered as a public park, and 1) provide a truly honest public participation process on that disclosure consistent with CCA Section 30006 as part of the Draft LCP Amendment process or 2) retain the Existing LCP Non-residential Reserve Land Use and require a comprehensive and honest community-based redo of Coastal Resource planning at Ponto.

3. City fully and publicly reply to and the City Council consider the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process: Lance Schulte on 1/23/20 received an email reply by the City to his follow-up email regarding the status of the 11/20/19 citizen concerns/requests public comments and letters presented to the Planning Commission. This is appreciated, however it is request that the City fully publicly reply to the 11-20-19 citizen concerns/requests regarding the City's proposed LCP Amendment process and present the to the City Council 11/20/19 citizen concerns/requests so the City Council can consider them and provide any direction to City Staff. City Staff first presented a summary presentation of the proposed Draft LCP Amendment to the Carlsbad Planning Commission on November 20, 2019, and indicated the public comment period would close on November in less than 2-weeks. Citizens and citizen groups provided public testimony to the Planning Commission, both verbally and in two written letters. The CCC was copied on those letters. The testimony and letters noted significant concerns about the City's proposed LCP Amendment process and made three requests:
- Disclose and provide a publically accessible 'Redline Version' of the Existing 2016/Proposed LCP land use Plan and Policies so everyone can see the proposed changes to the Existing LCP.
  - Provide true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern or objections. Citizen Workshops, when done right, are valuable means to openly educate, discuss and work to consensus options. These areas, including Ponto, were/are subject to multiple lawsuits, so true open and honest public workshops would provide an opportunity to openly and honestly discuss the issues and hopefully build public consensus/support for solutions. This approach seems consistent with CCA Section 30006, and common sense.
  - Extend the public comment period 6-months to allow Citizen Review of the Redline Version of the LCPA and allow time for Citizen Workshops.

The City did extend the Public Review period 2-months over the holidays to January 31, 2020. This is appreciated although many think this is inadequate given the significance of the Proposed Land Use Plan Amendments, and lack of Redline Version to compare. The City and their consultants required several extra years beyond schedule prepare the proposed LCP Amendments. The extra years of City Staff work reflects on the volume of the over 500-pages in the documents and the time needed to understand the Existing LCP and then create an Amended LCP. Citizens need sufficient time, proper comparative tools (redline) and a process (workshops) to understand the proposed LCP Amendments that is reflective of extensive extra time needed by City Staff and consultants needed. Truncation of lay public review to a few months for an Amendment that took paid professionals many years to produce seems a more than a bit inappropriate. The City appears to be rejecting citizens' request to be provided a 'Redline Version' of the Existing 2016/Proposed LCP land use Plan. So public review comments will tainted or will miss many issues due having to manually cross-reference a 150-page Existing LCP LUP with a Proposed 350-page Proposed LCP LUP. There will be unknown and unconsidered changes in the Draft LCP Amendment that the public and city and CCC decision makers will not know about due to the lack of 'Redline Version'.

The City also appears to reject citizen requests for true Citizen Workshops on the major remaining vacant Coastal land that still have outstanding Citizen Concern – such as Ponto. Like Coastal Recreation issue #1 above the following citizen requests appear consistent with CA Coastal Act (CCA) Section 30006, and the City's rejection of that requests seem counter to the CA Coastal Act.

We again request of the City to provide: 1) a 'Redline Version' to the public and decision makers, along with sufficient time to review and comment on the 'Redline Version'; and 2) true Citizen Workshops for Ponto and the

other last remaining significant vacant Coastal lands in Carlsbad as part of the Draft LCP Amendment process, or as part of deferred LCP Amendment process for those areas.

4. Coastal Zoned land is precious: the very small amount of remaining vacant Coastal land should be reserved for “High-Priority” Coastal Recreation Land Uses under the CA Coastal Act to provide for the growing and forever ‘Buildout’ needs of Carlsbad and CA Citizens, and our visitors.
  - Less than 1.8% (76 square miles) of San Diego County’s 4,207 square miles is in Coastal Zone. This small area needs to provide for all the forever Coastal needs of the County, State of CA, and Visitors. Upland Coastal Recreation (Coastal Park) land use is needed to provide land to migrate the projected/planned loss of “High-Priority” Coastal Recreation land uses due to Sea Level Rise impacts. There is only 76 miles of total coastline in San Diego County; a significant amount is publicly inaccessible military/industrial land. So how the last few portions of Coastal Land within Carlsbad (which is about 8% of San Diego County’s Coastline) is planned for the forever needs for High-Coastal-Priority Recreation Land Use is critical for Carlsbad, San Diego, and California Statewide needs into the future.
  - Most all the developable Coastal land in Carlsbad is already developed with Low-Coastal-Priority residential uses. Only a very small percentage of Carlsbad’s developable Coastal land, maybe 1-2%, is still vacant. This last tiny portion of fragment of vacant developable Coastal Land should be documented in the Draft LCP and reserved for “High-Priority” Coastal Land uses – most critically Coastal Recreation – to address the growing Coastal Recreation needs from a growing population and visitors. These growing needs are all the more critical in that existing Coastal Recreation lands will be decreasing due to inundation and erosion due to DLCPA planned Sea Level Rise.
  - This image of the western half of San Diego County graphically shows (in the blue line) the very small Coastal Zone Area that needs to provide the Carlsbad’s and California’s Coastal Recreational needs for all San Diego County residents and Visitors:

We request that 1) the amount and location of remaining vacant Coastal land in Carlsbad be documented and mapped and be reserved for high-priority Coastal Land Uses consistent with CCA Goals in Section 30001.5 “... (c) ... **maximize public recreational opportunities in the coastal zone** consistent with sound resources conservation principles and constitutionally protected rights of private property owners. (d) **Assure priority for coastal-dependent and coastal-related development over other development on the coast.** ...”; 2). This data be used in the City’s analysis and the public’s review and discussion about the City’s proposed Draft ‘Buildout’ Land Use Plan. The City’s proposed Draft ‘Buildout’ Land Use Plan will forever lock in the amount “maximum public recreational opportunities in the coastal zone” and will be the final Coastal Land Use Plan that is supposed to “assure priority for coastal-dependent and coastal-related development over other development on the coast”. Most of Carlsbad’s Coastal Zone is already developed or committed to low-priority land uses contrary to these CCA Goals, so how we finally and forever plan to use of the last small remaining vacant Coastal Land is very important.

5. The proposed Draft LCP Amendment in Chapter 3 makes unfounded statements regarding the proposed Amendment to the LCP Land Use Plan provision of “High-Priority” Coastal Recreation land use: On page 3-3, at the beginning of the Chapter 3 – Recreation and Visitor Serving Uses the City correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation uses, and cites multiple CCA Sections to that effect. The City’s proposed Coastal Land Use Plan then states on page 3-5 that a high proportion of land in the City is dedicated open

space available for passive and active use, yet provides no justification or accurate metric to support this statement. This is a critical unsubstantiated and speculative statement that is not supported by any comparative data (justifying the “high proportion” statement). The City later in Chapter 3 compared the adjoining cities of Oceanside and Encinitas to try to show how the proposed Draft LCP LUP Amendment provides higher levels of Visitor Serving Accommodations. That ‘non-common denominator’ comparison was fundamentally flawed, as noted in a prior separate Draft LCPA public review comment from People for Ponto regarding another high-priority Coastal land use (visitor accommodations) planned for in Chapter 3, but at least it was an attempt to compare. However, for the Coastal Recreation portion of Chapter 3, the City does not even attempt to provide any comparative data to support (or justify) the proposed Coastal Recreation Land Use Plan and statements. The Coastal Recreation Chapter also fails to disclose Carlsbad’s adopted City Park Master Plan (Park Service Area and Equity map) data that shows a clear conflict between the CA Coastal Act Policy Sections noted at the beginning of Chapter 3 and Chapter 3’s proposed Draft Coastal Recreation Land Use Plan.

Comparative Coastal Recreation: Comparing the Land Use Plan and policies of Oceanside, Carlsbad and Encinitas, one finds Carlsbad’s proposed Coastal Recreational Plan and Policies are not “high”, but very low compared with Oceanside and Encinitas. Carlsbad has a General Plan Park Standard of 3 acres of City Park per 1,000 Population. Oceanside has a 5 acres of City Park Standard per 1,000 population, and Encinitas has a 15 acres per 1,000 population standard, and an in-lieu park fee requirement of 5 acres per 1,000 population. Carlsbad’s proposed Coastal Recreation Land Use Plan is in fact not ‘high’ but is in fact the lowest of the three cities, with Carlsbad providing only 40% of Oceanside’s park standard, and only 20% of Encinitas’s Park Standard. Citywide Carlsbad currently has 2.47 acres of developed park per 1,000 population, Oceanside currently has 3.6 acres of developed park per 1,000 population, and Encinitas currently has 5.5 acres of developed park per 1,000 population. Although this data is citywide, it shows Carlsbad’s current amount of developed parkland is less than 70% of what Oceanside currently provides, and less than 45% of what Encinitas currently provides. Carlsbad is not currently providing, nor proposing a Coastal Land Use Plan to provide, a ‘high’ proportion of Coastal Recreation Land Use compared to Oceanside and Encinitas.

On page 3-5 Carlsbad may be misrepresenting city open space that is needed and used for the preservation of federally endangered species habitats and lagoon water bodies. This open space Land cannot be Used for Coastal Recreation purposes; and in fact Land Use regulations prohibit public access and Recreational Use on these Lands and water bodies to protect those endangered land and water habitats. 78% of Carlsbad’s open space is “open space for the preservation of natural resources” and cannot be used for Coastal Parks and Recreational use. Although “open space for the preservation of natural resources” does provide scenic or visual amenity, and this amenity is addressed as a different coastal resource. Visual open space is not Coastal Recreation Land Use. It appears Carlsbad is proposing in the Draft LCP Amendment to continue to, providing a ‘low’ percentage of Coastal Park Land Use and Coastal Recreation Land Use compared to adjoining cities.

In addition to the comparatively low amount of Coastal Park land Carlsbad plans for, Carlsbad scores very poorly regarding the equitable and fair distribution and accessibility of Coastal Parks and Coastal Recreation Land Uses. Both the City of Oceanside and Encinitas have very robust and detailed Park and Land Use plans to promote an equitable distribution of, and good non-vehicular accessibility, to their Coastal Parks. By comparison, Carlsbad’s park land use plan scores poorly, as exemplified in Ponto and South Carlsbad. Ponto’s existing population requires about 6.6 acres of City Parkland per Carlsbad’s low 3 acres per 1,000 population standard. Yet the nearest City Park is several miles away and takes over 50 minutes to walk along major arterial roadways and across Interstate 5 to access. As such this nearest park is not an accessible park for Ponto children, and thus Ponto children have to play in

however it more accurately illustrated in the following data/image from the adopted Carlsbad Park Master Plan's "Service Area Maps (Equity Maps)". The image below titled 'No Coastal Park in South Carlsbad' shows Carlsbad's adopted "Park Service Area Maps (Equity Maps)" from the City's Park Master Plan that says it maps "the population being served by that park type/facility." The added text to the image is data regarding park inequity and disparity in South Carlsbad. The image compiles Carlsbad's adopted Park "Park Service Area Maps (Equity Maps)" for Community Parks and Special Use Area Parks that are the City's two park acreage types produced by the City's comparatively low standard of 3 acre of City Park per 1,000 population. The City's Park Service Area Maps (Equity Maps) shows areas and populations served by parks within the blue and red circles. City data clearly shows large areas of overlapping Park Service (areas/populations served by multiple parks) in North Carlsbad and also shows large areas in South Carlsbad with No Park Service (areas/populations unserved by any parks) and Park Inequity in South Carlsbad. It clearly shows the City's Documented Park Need and Park inequity at Ponto. The Existing LCP LUP for Ponto's Planning Area F in is required to "consider" and "document" the need for a "Public Park". The City's adopted Park Service Area Maps (Equity Maps) clearly shows the inequity of Coastal City Park between North and South Carlsbad, and the need for Coastal Parks in South Carlsbad – particularly at Ponto. The City's proposed Draft 'Buildout' Coastal Recreation Land Use Plan instead proposes to lock-in documented City Public Coastal Park inequity and unserved Coastal Park demand at Ponto and South Carlsbad forever. It does so by proposing the last vacant undeveloped/unplanned Coastal land – Ponto Planning Area F - in the unserved Ponto and South Carlsbad coastline areas instead of being planned for much needed City Park and Coastal Recreation use be converted to even more low-priority residential and general commercial land uses. These 'low-priority' residential uses, by the way, further increase City Park and Coastal Recreation demand and inequity in Coastal South Carlsbad. This is wrong, and a proposed 'forever-buildout' wrong at the most basic and fundamental levels. The proposed Draft Coastal Recreation Land Use Plan by NOT providing documented needed City parks for vast areas of Coastal South Carlsbad is inconsistent with the CA Coastal Act policies and Existing LCP LUP requirements for Ponto Planning Area F; and also inconsistent with fair/equitable/commonsense land use and park planning principles, inconsistent with CA Coastal Commission social justice goals, inconsistent with social equity, inconsistent with VMT reduction requirements, and inconsistent with common fairness. A different Coastal Recreation Land Use Plan should be provided that provides for a socially equitable distribution of Coastal Park resources so as to would allow children, the elderly and those without cars to access Coastal Parks. The proposed Draft 'Buildout' Coastal Recreation Land Use Plan forever locking in the unfair distribution of City Parks appears a violation of the not only CCA Sections 30213, 30222, 30223, and 30252(6) but also the fundamental values and principles of the CA Coastal Act. The Draft also appears a violation of Carlsbad's Community Vision.

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

A different Coastal Recreation Land Use Plan is required to provide a more equitable distribution of City Parks with non-vehicular accessibility. Such a different plan would advance State and City requirements to reduce vehicle Miles Traveled (VMT) and greenhouse gas emissions that contribute to climate change and sea level rise impacts. Please note that the data for the above basic comparison comes from City of Carlsbad, Oceanside and Encinitas General Plan and Park Master Plan documents.

Data shows the proposed Coastal Recreation Plan conflicts with the CA Coastal Act policy Sections. As mentioned page 3-3 correctly states that the CA Coastal Act (CCA) places a high priority on maximizing Recreation Land Uses, and pages 3-5 list multiple CA Coastal Act (CCA) policy Sections that confirm this. However, given the significant statewide importance of Coastal Recreation Land Use, the City proposed 'Buildout' Coastal Recreation Land Use Plan does not appear to adequately address and implement these CCA Policies, and most noticeably in the Ponto area of South Carlsbad. Coastal Recreation is a significant Statewide High-Priority Land Use under the CCA. For a substantially developed non-coastal-industry city like Carlsbad Coastal Recreation is likely the biggest land use issue. This issue is even more elevated due to the fact that there are only a few small areas left of undeveloped Coastal land on which to provide Coastal Recreation, and Carlsbad is proposing a Coastal 'Buildout' Land Use Plan on those areas. The use of the last few remaining vacant portions of Coastal land for Coastal Recreation Land Use is the most important land use consideration in the proposed Draft LCP Land Use Plan Amendment as population and visitor growth will increase demands for Coastal Recreation. It is thus very surprising, and disturbing that the proposed Coastal Recreation Land Use Plan is so short, lacks any comparative and demand projection data, lacks any resource demand/distribution and social equity data, and lacks any rational and clear connection with CCA Policy and the proposed 'Buildout' Coastal Land Use plan. This is all the more troubling given that:

- The Ponto area represents the last significant vacant undeveloped/unplanned land near the coast in South Carlsbad that can provide a meaningful Coastal Park.
- The fact that the City's Existing LCP requires the city consider and document the need for a "i.e. Public Park" on Ponto's Planning Area F prior to the City proposing a change of Planning Area F's "Non-residential

Reserve” land use designation. The City has repeatedly failed to comply with this LCP LUP requirement, and worse has repeatedly failed to honestly inform citizens of this LCP LUP requirement at planning Area F before it granted any land use. The City, apparently implementing speculative developer wishes, has repeatedly proposed changing Planning Area F’s Coastal Land Use designation to “low-priority” residential and general commercial land uses without publically disclosing and following the Existing LCP LUP.

- The City’s currently developed parks in the southern portion of the City do not meet the city’s comparatively low public park standard of only 3 acres per 1,000 population. Since 2012 there has been City park acreage shortfall in both SW and SE Carlsbad.
- The Existing population of Ponto (west of I-5 and south of Poinsettia Lane) requires about 6.6 acres of Public Park based on the City’s comparatively low public park standard of 3 acres per 1,000 population. There is no Public Park in Ponto. Adding more population at Ponto will increase this current park demand/supply disparity.
- Carlsbad and other citizens have since 2017 expressed to the City the strong need for a Coastal Park at Ponto, and requested the City to provide a true citizen-based planning process to consider the Public Park need at Ponto. The Citizens’ requested process is fully in-line with CCA Goals, Public Participation Policy, Land Use Policies, and the Existing LCP Land Use Plan/requirements for Planning Area F and is the most appropriate means to consider and document the need for a Public Park at Ponto as required by the Existing LCP Land Use Plan.
- Planning Area F is for sale, and a non-profit citizens group has made an offer to purchase Planning Area F for a much needed Coastal Park for both Ponto and inland South Carlsbad residents and visitors. How should these facts be considered by the City and CCC?
- Carlsbad has no Coastal Parks west of I-5 and the railroad corridor for the entire southern half of Carlsbad’s 7-mile coastline.
- The southern half of Carlsbad’s coastline is 5.7% of the entire San Diego County coastline and represents a significant portion of regional coastline without a meaningful Coastal Park west of I-5 and the Railroad corridor.
- The City’s proposed Coastal Recreation Land Use Plan provides No Documentation, No Rational, and No Supporting or Comparative Data to show the proposed Coastal Recreation Land Use Plan in fact complies with the CA Coastal Act.

6. There is no Coastal Recreation/Park west of interstate 5 for all South Carlsbad, or half of the entire City. This is an obviously unfair and inequitable distribution of Coastal Recreation/Park resources that should be corrected by changes to the Draft LCP Land Use Amendment: The following image (which was sent to the City and CCC on several prior communications) was first requested by former Carlsbad Councilman Michael Schumacher during a People for Ponto presentation/request at the Oct 23, 2018 City Council meeting. The data compiled in the image shows how the South Coastal Carlsbad (Ponto) is not served by a Park per the City’s adopted Parks Master Plan. The blue dots on the map are park locations and blue circle(s) show the City’s Park Master Plan adopted Park Service Areas and Park Equity. This data, from pages 87-88 of the City of Carlsbad Parks Master Plan, shows all City Parks (both Community Parks and Special Use Areas in Coastal Carlsbad (except Aviara Park east of Poinsettia Park and west of Alga Norte Park). The text on the left margin identifies the South Carlsbad Coastal Park (west of I-5) gap along with the number of South Carlsbad Citizens (over half the City’s population) without a Coastal Park. The left margin also identifies more local issues for the over 2,000 Ponto area adults and children. For Ponto residents the nearest Public Park and City proposed ‘solution’ to the South Carlsbad and Ponto Public Park deficit are miles away over high-speed/traffic roadways and thus somewhat hazardous to access and effectively unusable by children/the elderly or

those without cars. Having been a 20-year resident of Ponto I regularly see our children have to play in the street as there are no Public Park with large open fields to play at within a safe and under 1-hour walk away. Ponto citizens have submitted public comments regarding this condition and the lack of a Park at Ponto

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

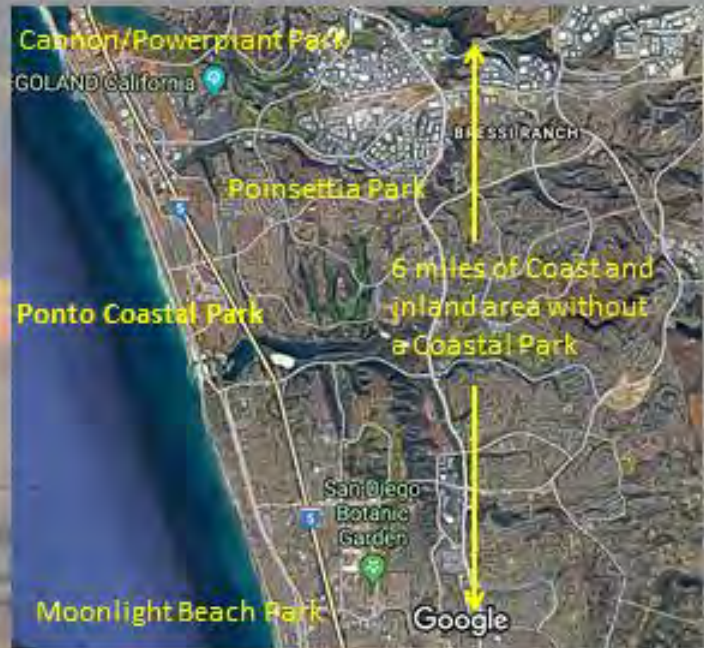

Ponto is at the center of regional 6-mile Coastal Park Gap. A Coastal Park in this instance being a Public Park with practical green play space and a reasonable connection with the Coast (i.e. located west of the regional rail and Interstate-5 corridors). The following image shows this larger regional Coastal Park Gap centered on the Ponto Area, and the nearest Coastal Parks – Cannon Park to the north, and Moonlight Park to the south.

Regionally this image shows Ponto is the last remaining significant vacant Coastal land that could accommodate a Coastal Park to serve the Coastal Park current needs of over existing 2,000 Ponto residents, 64,000 existing South Carlsbad residents, and a larger regional population. It is also the only area to serve the Coastal Park needs for the thousands of hotel rooms in Upland Visitor Accommodations in South Carlsbad.

# How Ponto Serves Region

- Ponto is in the middle of the regional Coastal Park Gap
- A Ponto Coastal Park fills a critical 6 mile gap of coastline without a Coastal Park - 8.6% of SD County coastline
- A Ponto Coastal Park Serves over 26,000 homes & 64,000 citizens just in South Carlsbad without a Coastal Park
- Serves many more people outside Carlsbad

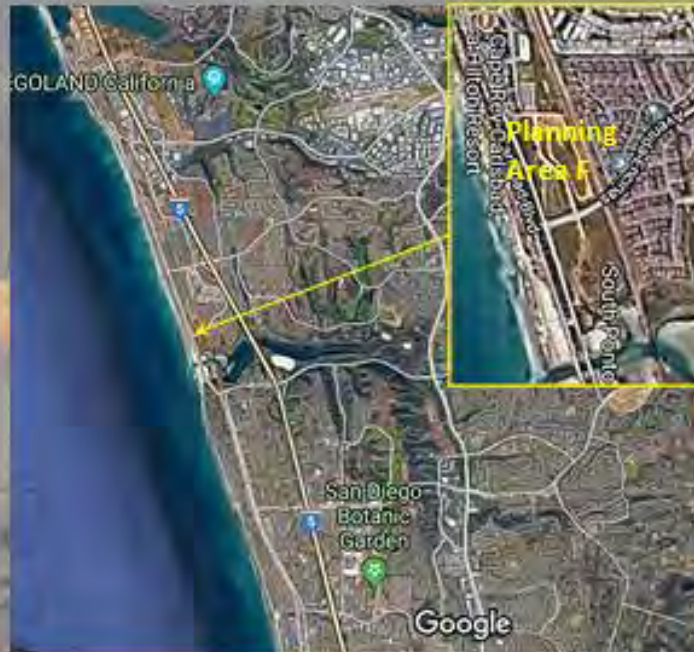

As People for Ponto first uncovered and then communicated in 2017 to the City and CCC; Carlsbad's Existing (since 1994) Local Coastal Program LUP currently states (on page 101) that Ponto's Planning Area F: carries a Non-Residential Reserve (NRR) General Plan designation. Carlsbad's Existing Local Coastal Program Land Use Plan states: "Planning Area F carries a Non-Residential Reserve (NRR) General Plan designation. Planning Area F is an "unplanned" area ..." and requires that: "... **As part of any future planning effort, the City and Developer must consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e. public park) on the west side of the railroad.**" CA Coastal Commission actions, Carlsbad Public Records Requests 2017-260, 261, and 262, and 11/20/19 City Planner statements confirm the City never fully communicated to Carlsbad Citizens the existence of this LCP requirement nor did the City comply with the requirements. Of deep concern is that the City is now (as several times in the past) still not honestly disclosing to citizens and implementing this Existing LCP requirement as a true and authentic 'planning effort'. The lack of open public disclosure and apparent fear of true public workshops and Public Comment about the Existing Planning Area F LCP requirements are troubling. The point of a 'planning effort' is to openly and publically present data, publically discuss and explore possibilities/opportunities, and help build consensus on the best planning options. Citizens are concerned the city has already made up its mind and there is no real "planning effort" in the proposed Draft LCP Amendment process, just a brief Staff Report and at the end provide citizens 3-minutes to comment on the proposal. This is not the proper way to treat the last remaining significant vacant land in South Carlsbad that will forever determine the Coastal Recreation environment for generations of Carlsbad and California citizens and visitors to come.

The following data/images show how Ponto is in the center of the 6-mile (west of I-5 and Railroad corridor) regional Coastal Park gap. Ponto is the last remaining vacant and currently "unplanned" Coastal land that is available to address this regional Coastal Park Gap.

## How Ponto Serves Region cont.

- **Relieves Coastal Park congestion** in North Carlsbad, Encinitas and Solana Beach
- Area currently needs Coastal Park as seen by:
  - Ponto Beach parking congestion
  - current trespass use of Planning Area F as a Park
- **6.6 acre portion of Planning Area F** addresses SW Quad City Park deficit

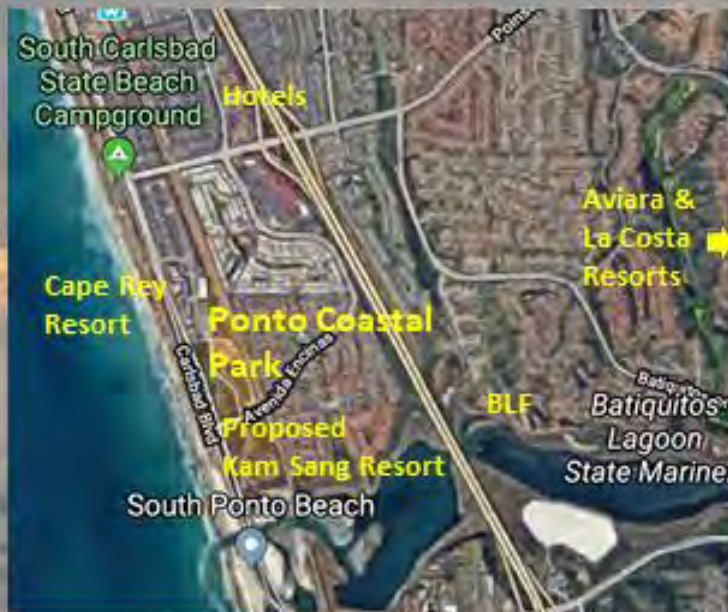

## How Ponto Serves Region cont.

- A Ponto Park helps address 2050 and beyond Regional Population and Visitor Growth demands for Coastal Parks
- A Ponto Park provides the lowest-cost coastal access and recreation opportunities for CA citizens and visitors

## How Ponto Serves Region cont.

- Vital park and open space amenity for Visitor serving businesses and accommodations
- 6.6 acre unique City Coastal Park venue to stage special events: Runs, bike rides, triathlons, sports, coastal festivals, etc.

## How Ponto Serves Region cont.

- Critical Park space for So. Carlsbad State Beach Campground
- Provides a big training and staging space for Junior lifeguards
- Dog walk trail

# Ponto Coastal Park Concept

- A concept – but shows potential recreational opportunities
- Provides **vital parkland support for beach & open play fields**
- Concept plan a gift from San Pacifico Community Association

One possible Concept image of a potential Ponto Coastal Park at Planning Area F is illustrated below. The potential for a Ponto Coastal Park is real. The speculative land investment fund (Lone Star Fund #5 USA L.P. and Bermuda L.P.) that currently owns Planning Area F is selling the property, and is available for the City of Carlsbad to acquire to address the documented demand/need for a City Park and City Park inequity at Ponto and in Coastal South Carlsbad. A Ponto Beachfront Park 501c3 is working to acquire donations to help purchase the site for a Park. These situations and opportunities should be publicly discussed as part of the City Staff's proposed Local Coastal Program Land Use Plan Amendment.

7. Projected increases in California, San Diego County and Carlsbad population and visitor growth increases the demand for High-Priority-Coastal Recreation land use:

- Increasing Citizen demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

San Diego County Citizen Population - Source: SANDAG Preliminary 2050 Regional Growth Forecast

1980	1,861,846
1990	2,498,016
2000	2,813,833
2010	3,095,313
2020	3,535,000 = 46,500 Citizens per mile of San Diego County coastline
2030	3,870,000
2040	4,163,688
2050	4,384,867 = 57,700 Citizens per mile of San Diego County coastline

2020 to 2050 = 24% increase in San Diego County population.

Citizen Population will continue beyond 2050. Carlsbad may plan for 'Buildout' in 2050, but what is San Diego County's 'Buildout'? There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for this growing population. If we do not increase our supply of Coastal Recreational Resources for these increased demands our Coastal Recreation Resources will become more overcrowded, deteriorated and ultimately diminish the Coastal Recreation quality of life for Citizens of Carlsbad and California. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5) and there is No Coastal Park in all of South Carlsbad to address the Coastal Recreation needs of the 64,000 South Carlsbad Citizens.

- Increasing Visitor demand for Coastal Recreational land needs to be addressed with increased Coastal Recreation land:

Yearly Visitors to San Diego County – source: *San Diego Tourism Authority; San Diego Travel Forecast, Dec, 2017*

2016	34,900,000
2017	34,900,000
2018	35,300,000
2019	35,900,000
2020	36,500,000 = average 100,000 visitors per day, or 2.83% of County’s Population per day, or 1,316 Visitors/coastal mile/day in 2020
2021	37,100,000
2022	37,700,000

This is growth at about a 1.6% per year increase in visitors. Projecting this Visitor growth rate from 2020 to 2050 results in a 61% or 22,265,000 increase in Visitors in 2050 to:

2050	58,765,000 = average 161,000 visitors per day, or 3.67% of the County’s projected 2050 Population per day, or 2,120 Visitors/coastal mile/day in 2050.
------	--

The number of Visitors is likely to increase beyond the year 2050. There is a common-sense need to increase the amount of Coastal Recreation Land Use in the Proposed LCP Amendment to the Land Use Plan for these projected 2050 61% increase, and beyond 2050, increases in Visitor demand for Coastal Recreational Resources. Increasing Coastal Recreation land is a vital and critically supporting Land Use and vital amenity for California’s, the San Diego Region’s and Carlsbad’s Visitor Serving Industry. Ponto sits in the middle of an existing 6-mile regional Coastal Park Gap (no Coastal Park west of Interstate 5). There are thousands of hotel rooms in South Carlsbad that have NO Coastal Park to go to in South Carlsbad. This needs correcting as both a Coastal Act and also a City economic sustainability imperative.

- We request that the as part of the public’s review, the City Staff proposed Draft LCP Amendment to the Land Use Plan clearly document if and/or how future forever ‘Buildout’ City, Regional and Statewide population and visitor population demand for Coastal Recreation and City Coastal Parks are adequately provided for both in amount and locational distribution in the Carlsbad proposed Amendment of the LCP Land Use Plan.

8. Carlsbad’s Draft Local Coastal Program Land Use Plan Amendment says it plans to a year 2050 buildout of the Coastal Zone. The Draft Local Coastal Program Land Use Plan Amendment then is the last opportunity to create a Coastal Land Use Plan to provide “High-Priority” Coastal Recreation Land Use, and will forever impact future generations of California, San Diego County, and Carlsbad Citizens and Visitors:

- The Draft LCPA indicates in 2008 only 9% of All Carlsbad was vacant land. Less is vacant now in 2019. Carlsbad’s Coastal Zone is 37% of the City, so vacant unconstrained land suitable for providing Coastal Recreation is likely only 3-4%. The prior request for a full documentation of the remaining vacant Coastal lands will provide a better understanding needed to begin to make the final ‘buildout’ Coastal Land Use Plan for Carlsbad. The Draft LCPA does not indicate the amount and locations of currently vacant unconstrained Coastal Land in Carlsbad. This final limited vacant land resource should be clearly documented and mapped in the DLCPA as it represents the real focus of the DLCPA – the Coastal Plan for these remaingn undeveloped

lands. These last remaining vacant lands should be primarily used to provide for and equitably distribute “High-Priority” Coastal Recreation Land Uses consistent with CCA Sections:

- i. Section 30212.5 “... Wherever appropriate and feasible, public facilities, including parking areas or facilities, **shall be distributed throughout an area so as to mitigate against the impacts, social and otherwise, of overcrowding or overuse by the public of any single area.**”;
- ii. Section 30213 “... **Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...**”;
- iii. Section 30222 “**The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development,** but not over agriculture or coastal-dependent industry.”
- iv. Section 30223 “**Upland areas necessary to support coastal recreational uses shall be reserved for such uses, where feasible**” ,
- v. Section 30251 ... The location and amount of new development should maintain and enhance public access to the coast by ... 6) assuring that the recreational needs of new residents will not overload nearby coastal recreation areas by **correlating the amount of development with local park acquisition** and development plans with the provision of onsite recreational facilities to serve the new development”

Adopted City Park Service Area and Park Equity maps discussed earlier document the proposed Draft LCP Amendment’s inconstancy with the above CCA Policy Sections. The locations and small amounts remaining vacant Coastal lands provide the last opportunities to correct the inconsistencies of City proposed Draft “buildout” LCP Land Use Plan Amendment with these Coastal Act Policies.

Currently and since 1996 there has been LCP LUP Policy/regulations for Ponto Planning Area F that require consideration of a “Public Park” prior to changing the existing “unplanned Non-residential Reserve” Land Use designation. A map and data base of vacant developable Coastal land should be provided as part of the Draft LCPA and the Draft LCPA. This map and data base should document the projected/planned loss of Coastal land use due to Sea Level Rise. Draft LCPA projects Sea Level Rise will eliminate several beaches and High-Priority Coastal Land Uses like Coastal Lagoon Trails and the Campground.

- The LCP Land Use Plan should plan and reserve the very limited vacant developable Coastal land for the long-term ‘Buildout’ needs of “High-Priority” Coastal Recreation Land Use. Vacant developable Coastal land is too scarce to be squandered for “low-priority” uses. Sea Level Rise will reduce “High-Priority” Coastal Uses. So how vacant developable Upland area should be preserved for “High-Priority” Coastal Uses is a key requirement to be fully documented and discussed in the Draft LCPA. If not one of two things will eventually happen 1) any new Coastal Park land will require very expensive purchase and demolition of buildings or public facilities to create any new Coastal Park land to meet existing and growing demand; or 2) Coastal Recreation will be hemmed-in by “low-priority” uses and thus force Coastal Recreation to decrease and become increasingly concentrated and overcrowded in its current locations; and thus will promote the eventual deterioration of our current Coastal Recreation resources. A plan that fails to fix Coastal Park deficits and then increase Coastal Parks in pace with increased population/visitor demand is a plan that can

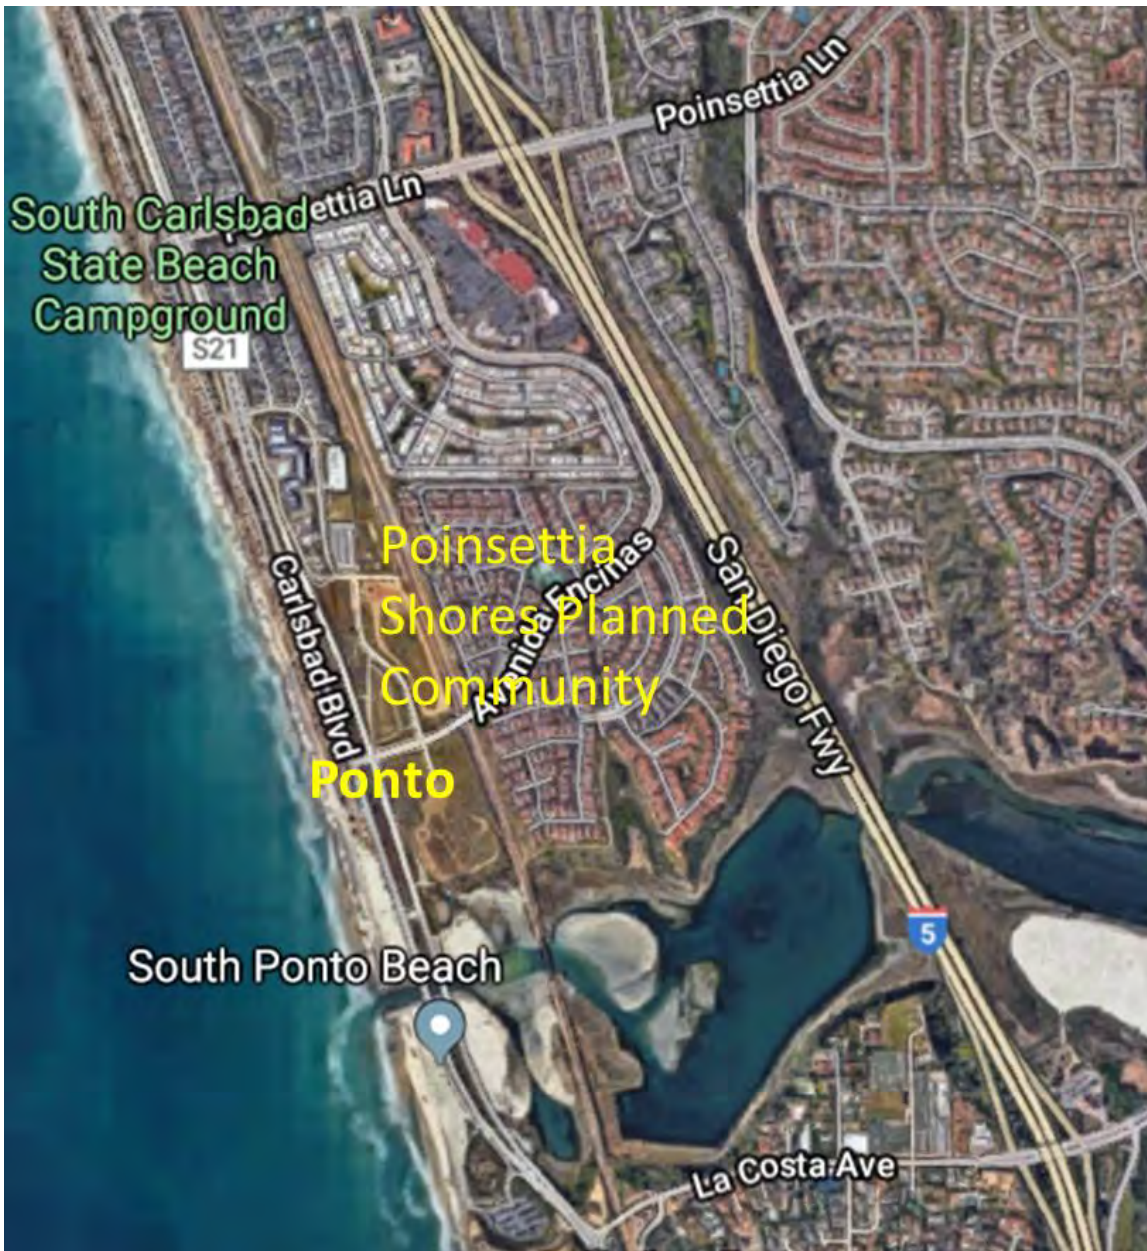

only result in degradation. How the Draft LCPA documents and addresses the land use planning of the last small portions of vacant developable Coastal land is critical for the future and future generations.

9. Citizens of South Carlsbad are concerned about the City's multiple prior flawed Ponto planning processes or 'mistakes' the City has made yet is basing the City Staff's proposed Draft LCP LUP. The concerns being the City is not openly and honestly communicating information to citizens and the public, and not allowing a reasonable and appropriate community-based planning process to address the documented Park, Coastal Recreation and unconstrained open space needs in South Carlsbad. One of these groups of citizens has created a [www.peopleforponto.com](http://www.peopleforponto.com) website to try to research and compile information and hopefully provide a better means for citizens to understand facts and then express their concerns/desires to the City of Carlsbad (City) and CA Coastal Commission (CCC). Over 2,000 emails have sent to the City and CCC regarding Coastal Land Use Planning Issues at Ponto. The San Pacifico Planned Community (i.e. San Pacifico Community Association) has also, since 2015, sent numerous emailed letters to the City and CCC noting the significant concerns about changes in Coastal planning the City is proposing for our Planned Community.

Repeatedly over 90% of surveyed citizens (results emailed prior to both the City and CCC) have expressed the vital need and desire for a Coastal Park at Ponto to serve the current and future Coastal Recreation needs for all both Ponto and South Carlsbad and for larger regional and State Coastal Recreational needs. This desire is supported by data, CA Coastal Act Policy, and also Carlsbad's Community Vision – the foundation for the City's General Plan. Ponto is the last remaining vacant Coastal area available to provide for those needs in South Carlsbad and for a regional 6-mile stretch of coastline. Citizens have expressed deep concern about the City's flawed prior Coastal planning efforts for Coastal Recreation at Ponto, including two repeated LCP Amendment "mistakes" (Ponto Beachfront Village Vision Plan in 2010 and General Plan Update in 2015) when the City twice failed to publicly disclose/discuss and then follow the Existing LCP requirements at Ponto – specifically for Planning Area F. People for Ponto had to use multiple Carlsbad Public Records Requests in 2017 to find these "mistakes". CCC Staff was helpful in both confirming the City "mistakes" and communicating back to the City. As citizens we are still unclear as to how/why these two repeated "mistakes" happened. There is citizen concern that the City is again repeating these two prior "mistakes" by not at the beginning of the Public Comment Period clearly and publicly disclosing the Planning Area F LCP requirements to citizens as part of the current LCP Amendment process, and also by not implementing the existing LCP requirement PRIOR to proposing an Amended Coastal Land Use Plan for Ponto. The City in its proposed LCP Amendment process is putting-the-cart-before-the-horse with respect to honest and open consideration, documentation and public discussion of the need for high-priority Coastal Recreation land use required of Planning Area F at Ponto. The City is also not clearly letting all Carlsbad citizens know about the Existing LCP requirements for Ponto's Planning Area F so they can be informed to reasonably participate in public review and comment regarding amending that LCP requirement, and the need for Coastal Recreation land uses in South Carlsbad. Since 2017 there has been repeated citizen requests to the City (copies were provided to the CCC) to fix these multiple fundamental/foundational flaws by in the City's prior Coastal Recreation and Public Parks and Open Space at planning, and the currently Proposed Draft LCP Land Use Plan Amendment. Since 2017 there have also been repeated citizen requests to the City to provide a truly open, honest, inclusive community-based planning process and workshops with the accurate and honest information, prior to forming a proposed Draft LCP Land Use Plan Amendment. As citizens we believe we can constructively work with the City and CCC towards a consensus or viable options on these important Coastal Recreation issues if the City allows and encourages such an open, honest and inclusive process. We request the City respond to the requests submitted to the City since 2017, and again request such a process from the City before any LCP Amendment is first considered by the Planning Commission and City Council. Such a requested process benefits all.

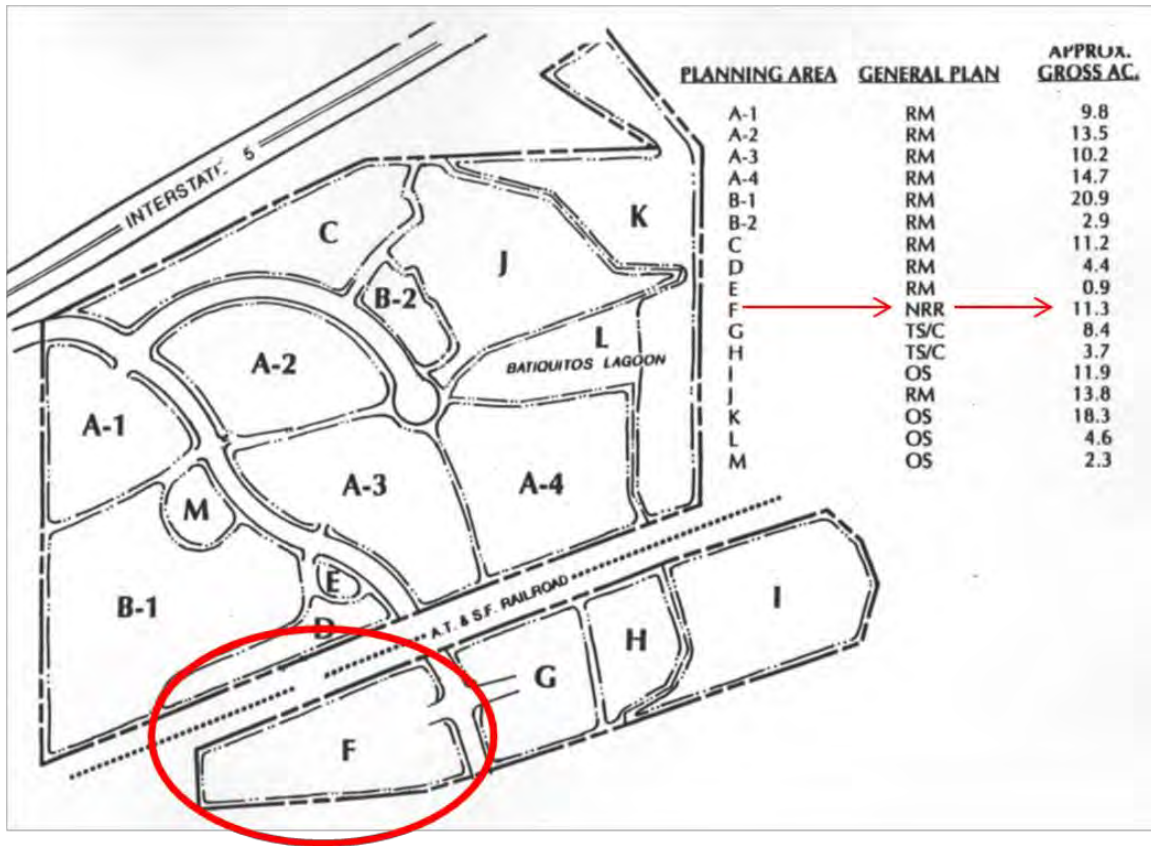

10. Why the Draft LCPA Land Use Plan for Ponto should provide for the current and future Coastal Park and Recreation needs for South Carlsbad, the San Diego Region and California.

- Ponto, is one of last remaining vacant and undeveloped Coastal lands in North County
- Ponto is the last remaining undeveloped Coastal land in South Carlsbad
- Ponto has the last unplanned Planning Area of the Existing Poinsettia Shores Planned Community & Local Coastal Program that can be planned for high-priority Coastal Recreation land use. This Existing LCP requires Planning Area F be considered for a “Public Park”.
- Following is a map of the Ponto area in South Carlsbad:

Following is the LCP Land Use map from the Existing Poinsettia Shores Master Plan & Local Coastal Program adopted in 1996. This is the Land Use map that the City is proposing to change in the proposed LCP Amendment to the Land Use Plan. As the Existing LCP Land Use map shows most all the land is ‘low-priority’ residential use at an RM Residential medium density, a small portion is ‘high-priority’ Visitor Serving TC/C Tourist Commercial. Most all the

Open Space is constrained and undevelopable land (the steep CSS habitat bluffs above Batiquitos Lagoon) or water (the lagoon water). This land/water is owned by the State of California, like the inner lagoon east of I-5. Only Planning Area M at 2.3 acres is unconstrained Open Space and it provides a small private internal recreation facility for the approximately 450 homes and 1,000 people in the Planned Community. This small recreation area is a City requirement for ‘planned developments’ to off-set loss open space from planned development impacts on housing quality. Planned developments can propose designs that reduce normal setback and open space areas – they bunch together buildings to increase development – such as the smaller lot sizes, and extensive use of “zero-setbacks” to reduce typical lot sizes that occurs at Poinsettia Shores. A private recreation facility in any of the City’s planned developments is never considered a replacement for required City Parks. Planned Developments, like unplanned developments, are required to dedicate Park land to the City, or pay a Park In-Lieu fee to the City so the City provide the developer’s obligation to provide City Park acreage to address the population increase of their proposed planned development. For Poinsettia Shores’ population the City’s minimum City Park Standard would require developers set aside 3 acres of City Park land for local park needs. For the larger Ponto area population about 6.6 acres of City Park Land is required. The Existing LCP reserves Planning Area F as an unplanned “Non-residential Reserve” Land Use until the Public Park needs for Ponto are considered and documented. Only then can the NRR land use be changed.

11. Developers have overbuilt in the Ponto area of the Coastal Zone. The City of Carlsbad has under questionable circumstances is currently choosing to ‘exempted’ Ponto developers from providing the minimum amount of unconstrained Open Space according to the City’s developer required Open Space Public Facilities Standard. The legality of these confusing circumstances is subject to a lawsuit against the City. However the City’s computerize mapping system has documented that the Ponto area of the Coastal Zone is missing about 30-acres of Unconstrained Open Space that can be used to fulfill the City’s Open Space Performance Standard that states that

15% of unconstrained and developable land must be preserved by developers as Open Space. Following is a summary of data from the City data regarding the missing Open Space at Ponto (Local Facility Management Plan Zone 9, LFMP Zone 9) in the Coastal Zone pursuant to the City's Open Space Performance Standard. If it is desirable People for Ponto can provide the City GIS map and parcel-by-parcel data base on which the following summary is based:

City of Carlsbad GIS data calculations of Open Space at Ponto area of Coastal Zone:

472 Acres = Total land in LFMP Zone 9 [Ponto area] per City of Carlsbad GIS data

(197 Acres) = Constrained land/water/infrastructure that is excluded from the City's Open Space Standard

275 Acres = Unconstrained land in LFMP Zone 9 (Ponto) subject to the City's Open Space Standard

X 15% = Minimum unconstrained Open Space requirement per the City Open Space Standard

41 Acres = Minimum unconstrained Open Space required in LFMP Zone 9

(11 Acres) = Actual unconstrained Open Space provided & mapped by City in LFMP Zone 9

**30 Acres = Missing unconstrained Open Space needed in LFMP Zone 9 [Ponto area of Coastal Zone] to meet the City's minimum GMP Open Space Standard. 73% of the required Open Space Standard is missing.**

Thus the Ponto area of the Coastal Zone appears overdeveloped with 30 additional acres of "low-priority" residential land uses due to developers' non-compliance to the City's Open Space Public Facility Performance Standard's Minimum developer required Open Space requirement. As noted a citizens group has a pending lawsuit with the City over the City's current 'exempting' Ponto and future developers from meeting the Open Space Standard.

12. The prior pre-1996 LCP for Ponto – the Batiquitos Lagoon Educational Park Master Plan & LCP (BLEP MP/LCP) had significant Open Space and recreational areas. These significant Open Space and Recreational areas were removed with BLEP MP/LCP's replacement in 1996 by the currently existing Poinsettia Shores Master & LCP (PSMP/LCP) and its City Zoning and LCP LUP requirements that reserved Planning Area F with the current "Non-residential Reserve" Land Use designation. Since the BLEP MP/LCP it appears developers and the City of Carlsbad have worked to remove "High-Priority" Coastal land uses (i.e. Coastal Recreation and Park uses) out of the Ponto area and replaced them with more "low-priority" residential and general commercial land uses. For example:

- Planning Area F used to be designated "Visitor Serving Commercial" as part of the original 1980's BLEP MP/LCP for Ponto.
- In 1996 the BLEP MP LCP was changed by developer application to the now current PSMP LCP, and the LCP LUP designation changed from "Visitor Serving Commercial" to "Non-Residential Reserve" with the requirement to study and document the need for "High-Priority" Coastal Recreation (i.e. Public Park) and/or Low-cost visitor accommodations prior to any change to Planning Area F's "Non-residential Reserve" LCP land use.
- In 2005 the City started to try to change Planning Area F to low-priority residential and general commercial land use in the City's Ponto Beachfront Village Vision Plan (PBVVP). At this time the City made its first documented Coastal 'planning mistake' by not disclosing to the public the existence of Planning Area F's LCP requirements and then also not following those LCP requirements. The City's planning process seemed focused on addressing developer's land use desires, and increasing land use intensity to boost "Tax-increment financing" as the City had established a Redevelopment Project Area at Ponto. A short time after the State of CA dissolved Redevelopment Agencies due in part to such abuses by cities. The CCC formally rejected the PBVVP in 2010, citing the City's failure to follow the LCP requirements for Planning Area F.

- Five years later in 2015 the City again adopted a proposed General Plan Update to again change Planning Area F to low-priority residential and general commercial land use. The General Plan Update cited the City's PBVVP that was in fact rejected by the CCC only a few years before. The City again repeated their PBVVP's Coastal land use 'planning mistake' by again not disclosing to the public the existence of Planning Area F's LCP requirements and then not following those LCP requirements. It is unclear why the City did this only 5-years after the CCC specifically rejected the Ponto Beachfront Village Vision Plan for those same reasons.
- In 2017 citizens found and then confirmed these Ponto Coastal 'planning mistakes' by the City through multiple official Carlsbad Public Records Requests and CCC Staff confirmation. The CCC readily identified the mistakes, but the City's 2019 proposed Draft LCP Land Use Plan and planning process still has yet fully disclose these prior Coastal 'planning mistakes' to ALL citizens of Carlsbad - the failure to disclose and follow the Planning Area F LCP LUP and City Zoning requirements. Full City disclosure is needed now to try to correct many years of City misrepresentation to citizens on LCP required Coastal land Use planning at Ponto. It is needed now so the public is aware at the start of the Public Comment Period. In 2017 citizens began asking the City fix the City's over 12-years of misinformation and planning mistakes by 'restarting' Coastal land use planning at Ponto with an open and honest community-based Coastal planning process. These citizens' requests have been rejected.
- In 2019 the City Staff proposed citywide Draft LCP land Use Plan Amendment that again proposed to change Planning Area F to "low-priority" residential and general commercial land use, without First disclosing the Planning Area F LCP requirements with corresponding analysis of the Need for Coastal Recreation (i.e. Public Park) and/or low-cost visitor accommodations at Planning Area F and providing that Documented analysis for public review/Consideration/comment. This seems like another 3<sup>rd</sup> repeat of the prior two Coastal planning mistakes by the City. In 2019, again citizens asked for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again the City rejected citizens' requests.
- In 2020 thousands of public requests again asked, and are currently asking, for a reset and a true community-based process for the last remaining significant vacant Coastal lands – including Ponto. Again these requests are being rejected. Based on the significant citizen concern and the documented prior 'planning mistakes' at Ponto it appears reasonable and responsible for Ponto's Planning Area F to either:
  - i. Retain its current Existing LCP LUP land Use of "Non-Residential Reserve" until such time as the City's past Ponto Beachfront Village Vision Plan and General Plan Update planning mistakes and other issues subject to current planning lawsuits against the City are resolved with a true, honest and open community-based Coastal planning process asked for by citizens since 2017. Or
  - ii. Propose in the Draft LCP Land Use Plan Amendment to re-designated Planning Area F back to a Visitor Serving Commercial and Open Space ("i.e. Public Park") to provide both "High-Priority" coastal uses v. low-priority residential/general commercial uses due to the documented Coastal Recreation and Low-cost visitor accommodation needs for both citizens and visitors at Ponto and South Carlsbad.

13. Questionable logic and inconsistency in proposed Draft land use map and policies: Chapter 2 Figure 2-2B & C on pages 2-19 & 20 proposes to Amend the existing LCP Land Use Plan Map, and policies LCP-2-P.19 and 20 on pages 2-27 to 2-29 propose Amendments to existing LCP policy and create a new added layer of policy referencing a Ponto/Southern Waterfront. The proposed Land Use Map and Policies serve to firmly plan for "low-priority" residential and general commercial land uses at Ponto with a clear regulatory Land Use Plan Map showing these land uses and by specific regulatory policy (LCP-2-20) that clearly requires (by using the words "shall") these "low

priority” uses. In contrast the “High-Priority” Coastal Recreation and Coastal Park land uses that would be designated as Open Space are not mapped at all in Figure 2-2B & C; and the proposed policy LCP-2-P.19 is both misleading and specifically does Not Require any “High-Priority” Coastal Recreation and Coastal Park land Use at Ponto and South Carlsbad. In fact page 2-22 specifically indicates two “may” criteria that would first need to occur in the positive before any potential Coastal Recreation and Coastal Park Land could then theoretically even be possible. It is highly probable that it is already known by the City that the proposed relocation of Carlsbad Boulevard (Coast Highway) is not very feasible and not cost effective, and will not yield (due to environmental habitat constraints, narrowness of the roadway median, and other design constraints) any significant dimensions of land that could potentially be designated Open Space and realistically be used as a Park.

The blank outline map (Figure 2-2B & C) provides no mapped Open Space Land Use designation, other than for the currently existing State Campgrounds’ low-cost visitor accommodations, so the proposed Land Use Plan Map is Not providing/mapping any new Open Space land use to address Coastal Recreation and Coastal Park needs. The Draft LCP Land Use Plan Amendment’s proposed/projected/planned Sea Level Rise and associated coastal erosion appears to indicate that this “High-Priority” low-cost visitor accommodation (Campground) land use designated as Open Space will be reduced in the ‘Buildout’ condition due to coastal erosion. So **the Draft LCP Land Use Plan is actually planning for a Reduction in Open Space Land Use in South Carlsbad and Ponto.** Both the blank outline map and the proposed Land Use Map Figure 2-1 DO NOT clearly map and designate both South Carlsbad’s Draft LCP Planned Loss of the Open Space Land Use and also any New or replacement unconstrained land as Open Space land use for Coastal Recreation and Coastal Park. This is an internal inconsistency in Land Use Mapping that should be corrected in two ways:

- 1) Showing on all the Land Use (Figure 2-1), Special Planning Area (Figure 2-2B & C), and other Draft LCP Maps the Draft LCP’s planned loss of land area in those maps due to the Draft LCP’s planned loss of land due to Sea Level Rise and Coastal Land Erosion. This is required to show how land use boundaries and Coastal Recourses are planned to change over time. or
- 2) Provide detailed Land Use Constraint Maps for the current Carlsbad Boulevard right-of-way that the City “may” or ‘may not’ choose (per the proposed “may” LCP-2-P.19 policy) use to explore to address the City’s (Park Master Plan) documented Coastal Recreation and Coastal Park land use shortages in Coastal South Carlsbad and Ponto. Clearly showing the potential residual Unconstrained Land within a Carlsbad Boulevard relocation that have any potential possibility to add new Open Space Land Use Designations (for Coastal Recreation) is needed now to judge if the policy is even rational, or is it just a Trojan horse.

The proposed internal inconsistency in mapping and policy appears like a plan/policy ‘shell game’. The proposed Land Use Plan Maps and Policies should be consistent and equality committed (mapped-shall v. unmapped-may) to a feasible and actual Plan. If not then there is No real Plan.

There is no Regulatory Policy requirement in LCP-2-P.19 to even require the City to work on the two “may” criteria. The City could choose to bury the entire Carlsbad Boulevard relocation concept and be totally consistent with Policy LCP-2-P.19 and the LCP. As such the language on 2-22, Figure 2-2C (and the proposed Land Use Map), and policy LCP-2-P.19 and 20 appear conspire to create a shell game or bait-and-switch game in that only “low-priority” residential and general commercial uses are guaranteed (by “shall” policy) winners, and “high-priority” Coastal Recreation and Coastal Park Land Uses are at best a non-committal ‘long-shot’ (“may” policy) that the city is specifically not providing a way to ever define, or commit to implement. The proposed Draft LCP Land Use Plan Coastal Recreation and Coastal Park statements for Ponto are just words on paper that are designed to have no force, no commitment, no defined outcome, and no defined requirement to even have an outcome regarding the

documented “High-Priority” Coastal Recreation and Coastal Park needs at Ponto, Coastal South Carlsbad and the regional 6-mile Coastal Park gap centered around Ponto.

Policy LCP-2-P.19 falsely says it “promotes development of recreational use” but does not in fact do that. How is development of ‘recreational use promoted’ when the Use is both unmapped and no regulatory policy requirement and commitment (no “shall” statement) to ‘promote’ that Use is provided? Policy LCP-2-19.19 appears a misleading sham that does not ‘promote’ or require in any way “High-Priority” Coastal Recreation and Park Land Use at Ponto. There should be open and honest public workshops before the Draft LCP Amendment goes to its first public hearing to clearly define the major environmental constraints and cost estimates involving possible relocation of Carlsbad Boulevard and constructing needed beach access parking, and sufficient and safe sidewalks and bike paths along Carlsbad Boulevard; and then map the amount and dimensions of potential ‘excess land’ that maybe available for possible designation as Open Space in the City General Plan and Local Coastal Program. The City should not repeat the mistakes at the Carlsbad Municipal Golf Course (resulting in the most expensive to construct maniple course in the USA) by not defining and vetting the concept first. A preliminary review of City GIS data appears the amount, dimensions and locations of any potential ‘excess’ land maybe modest at best. However before the City proposes a ‘Buildout’ Coastal Land Use Plan this critical information should be clearly provided and considered. It is likely the City’s Carlsbad Boulevard relocation concept is unfeasible, inefficient, too costly, and yields too little actual useable ‘excess land’ to ever approach the Coastal Recreation and Coastal Park needs for South Carlsbad. This may already be known by the City, but it surely should be publicly disclosed and discussed in the DLPCA.

The proposed Coastal Land Use Plan to address Carlsbad’s, San Diego County’s and California’s High-Priority Coastal Recreation Land Use and Coastal Park needs should NOT be vague “may” policy that appears to be purposely designed/worded to not commit to actually providing any “High-Priority” Coastal Recreation and Coastal Park land uses on the map or in policy commitments. The Land Use Plan and Policy for High-Priority Coastal Recreation and Coastal Park Land Use should be definitive with triggered “shall” policy statements requiring and assuring that the ‘Forever’ “High-Priority” Coastal Recreation and Coastal Park needs are properly and timely addressed in the City’s proposed ‘Buildout’ Coastal Land Use Plan. This “shall” policy commitment should be clearly and consistently mapped to show the basic feasibility of the planned outcomes and the resulting actual Land that could feasibly implement the planned outcome.

Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard: Providing safe and sufficient sidewalks, bike paths, and public parking along Carlsbad Boulevard are Coastal Access and Completes Streets issues. South Carlsbad Boulevard now and has for decades been a highly used Incomplete Street that is out of compliance with the City’s minimum Street Standards for pedestrian and bike access and safety. The Coastal Access portion of the Draft Land Use Plan should strongly address the Complete Street requirements for South Carlsbad Boulevard. Those policy commitments should be reference in Policy LCP-2-P.19 and 20 as Carlsbad Boulevard in **South Carlsbad is the most Complete Street deficient portion of Carlsbad Boulevard**. Forever Coastal Access parking demand and the proposed LCP Amendment’s Land Use Plan to supply parking for those demands should also be addressed as part of the Coastal Access and Complete Streets issues for South Carlsbad Boulevard. If much needed Coastal Access Parking is provided on South Carlsbad Boulevard as part of a “maybe” implemented realignment, most of the “maybe” realignment land left after constraints are accommodated for and buffered will likely be consumed with these parking spaces and parking drive aisles/buffer area needed to separate high-speed vehicular traffic from parking, a buffered bike path, and a sufficiently wide pedestrian sidewalk or Coastal Path. After accommodating these much needed Complete Street facilitates there will likely be little if any sufficiently

dimensioned land available for a Coastal Recreation and a Coastal Park. The needed Coastal Access and Complete Street facilities on South Carlsbad Boulevard are very much needed, but they are NOT a Coastal Park.

As mentioned the proposed Draft Coastal Land Use Plan's Maps and Policies are very specific in providing for the City's proposed LCP Land Use changes to 'low-priority' Residential and General Commercial' on Planning Area F (proposed to be renamed to Area 1 and 2). It is curious as to why the proposed Draft LCP Land Use Plan Amendment has no Land Use Map and minor vague unaccountable Land Use Policy concerning 'High-priority Coastal Recreation Land Use' at Ponto, while the very same time proposing very clear Land Use Mapping and detailed unambiguous "shall" land use policy requirements for 'low-priority' Residential and General Commercial land use at Ponto. Why is the City Not committing and requiring (in a Land Use Map and Land Use Policy) to much needed 'High-priority' Coastal Recreation and Coastal Park Land Use' needs at Ponto the same detail and commitment as the City is providing for "low-priority" uses? This is backwards and inappropriate. It is all the more inappropriate given the 'Buildout' Coastal Land Use Plan the City is proposing at Ponto. These issues and plan/policy commitments and non-commitments will be 'forever' and should be fully and publicly evaluated as previously requested, or the Existing LCP Land Use Plan of "Non-residential Reserve" for Planning Area F should remain unchanged and until the forever-buildout Coastal Recreation and Coastal Park issues can be clearly, honestly and properly considered and accountably planned for. This is vitally important and seems to speak to the very heart of the CA Coastal Act, its founding and enduring principles, and its policies to maximize Coastal Recreation. People for Ponto and we believe many others, when they are aware of the issues, think the City and CA Coastal Commission should be taking a long-term perspective and be more careful, thorough, thoughtful, inclusive, and in the considerations of the City's proposal/request to permanently convert the last vacant unplanned (Non-residential Reserve) Coastal land at Ponto to "low-priority" land uses and forever eliminate any Coastal Recreation and Coastal Park opportunities.

14. Public Coastal View protection: Avenida Encinas is the only inland public access road and pedestrian sidewalk to access the Coast at Ponto for one mile in each direction north and south. It is also hosts the regional Coastal Rail Trail in 3' wide bike lanes. There exist now phenomenal coastal ocean views for the public along Avenida Encinas from the rail corridor bridge to Carlsbad Boulevard. It is assumed these existing expansive public views to the ocean will be mostly eliminated with any building development seaward or the Rail corridor. This is understandable, but an accountable ('shall') Land Use Plan/Policy addition to proposed Policy LCP-2-P.20 should be provided for a reasonable Public Coastal View corridor along both sides of Avenida Encinas and at the intersection with Carlsbad Boulevard. Public Coastal view analysis, building height-setback standards along Avenida Encinas, and building placement and site design and landscaping criteria in policy LCP-2-P.20 could also considered to reasonably provide for some residual public coastal view preservation.
  
15. Illogical landscape setback reductions proposed along Carlsbad Boulevard, and Undefined landscape setback along the Lagoon Bluff Top and rail corridor in Policy LCP-2-P.20: Logically setbacks are used in planning to provide a buffering separation of incompatible land uses/activities/habitats. The intent of the setback separation being to protect adjacent uses/activities/habitats from incompatibility, nuisance or harassment by providing a sufficient distance/area (i.e. setback) between uses/activities/habitats and for required urban design aesthetics – almost always a buffering landscaping. Policy LCP-2-P.20. A.4 and C.3 says the required 40' landscape setback along Carlsbad Boulevard "maybe reduced due to site constraints or protection of environmental resources." The ability to reduce the setback is illogical in that setbacks are intended to protect environmental resources and provide a buffer for constraints. In the Carlsbad Boulevard right-of-way there is documented sensitive environmental habitat, along with being a busy roadway. How could reducing the protective 40' setback in anyway better protect that habitat or provide a better landscaped compatibility or visual aesthesis buffer along Carlsbad Boulevard? It is

illogical. If anything the minimum 40' landscaped setback should likely be expanded near "environmental resources". Regarding reducing the minimum 40' landscape setback for "site constraints" there is no definition of what a "site constraint" is or why it (whatever it may be) justifies a reduction of the minimum landscaped setback. Is endangered species habitat, or a hazardous geologic feature, or a slope, or on-site infrastructure considered a "site constraint"? There should be some explanation of what a "site constraint" is and is not, and once defined if it warrants a landscape setback reduction to enhance the buffering purpose of a landscape setback. Or will a reduction only allow bringing the defined constraint closer to the adjacent uses/activities/habitats that the landscape setback is designed to buffer. It is good planning practice to not only be clear in the use of terms; but also, if a proposed reduction in a minimum standard is allowed, to define reasonably clear criteria for that reduction/modification and provide appropriate defined mitigation to assume the intended performance objectives of the minimum landscape setback are achieved.

Policy LCP-2-P.20.C.4 is missing a critical Bluff-Top landscape setback. It seems impossible that the DLCPA is proposing no Bluff-Top setback from the lagoon bluffs and sensitive habitat. The Batiqitos Lagoon's adjoining steep sensitive habitat slopes directly connect along the Bluff-top. Batiqitos Lagoon's and adjoining steep sensitive habitat is a sensitive habitat that requires significant setbacks as a buffer from development impacts. Setbacks similar to those required for the San Pacifico area inland of the rail corridor, should be provided unless updated information about habitat sensitivity or community aesthetics requires different setback requirements.

Policy LCP-2-P.20 does not include a landscape setback standard adjacent to the rail corridor. This is a significant national transportation corridor, part of the 2<sup>nd</sup> busiest rail corridor in the USA. Train travel along this corridor is planned to increase greatly in the years to come. Now there is significant noise, Diesel engine pollution, and extensive ground vibration due to train travel along the rail corridor. Long freight trains which currently run mostly at night and weekends are particularly noisy and heavy, and create significant ground vibration (underground noise). These issues are best mitigated by landscape setbacks and other buffers/barriers. A minimum setback standard for sufficient landscaping for a visual buffer and also factoring appropriate noise and ground vibration standards for a buildout situation should be used to establish an appropriate landscape setback that should be provided along the rail corridor. Carlsbad's landscape aesthetics along the rail corridor should be factored into how wide the setback should be and how landscaping should be provided. An example for the landscape aesthetic portion of the setback standard could be landscape design dimensions of the San Pacifico community on the inland side of the rail corridor. However, noise and vibrational impacts at San Pacifico are felt much further inland and appear to justify increased setbacks for those impacts.

**Subject:** Poinsettia Park Pickleball Courts

Hello,

The purpose of this email is to express the urgent need for more pickleball courts at Poinsettia Park in Carlsbad. The current courts are lovely but consistently overcrowded and I know that some of the unused tennis courts being converted to more courts (even lined for dual purpose) would immensely be beneficial to the Community . Thank you for your attention to this matter!

Sincerely,

Cheney Squier

**Subject:** Master Plan

Hi Mick,

Unfortunately, I can not make the Master Plan meetings. Short and sweet-i would like to see more pickleball courts in Carlsbad. That is my vote!

Thanks!  
Chris Paccione

**Subject:** Comments on parks

Mick Calarco and Kyle Lancaster,  
I totally support Lance Shulte's recent comments to you regarding park plans. It was shocking to learn that Carlsbad is below average in open space parks per population nationally and even more behind than Oceanside and Encinitas! Why don't you ask them how they do it, instead of paying for pricey consultants with our tax money????

You need to dig in your heels and get this situation addressed. You keep ignoring the needs of many residents who for DECADES have asked for more open space parks! Instead you keep talking about more improved facilities. Open space parks are far less costly than what you are pushing that benefit a very small part of the population. How many residents play pickleball, for example? Just a vocal few. Remember our population is aging. We want parks close by and do not want to jump into the car, increasing air pollution.

Forget about your cheesy proposal to make Veterans Park quality for a park for all the quadrants. Parks should be in all quadrants. Seniors and young mothers should be able to walk to parks with their children.

Patricia Bleha, Carlsbad resident and taxpayer since 1976

**Subject:** Please help! Need more Pickleball courts @ Poinsettia

Hi Mike,

Thank you for hosting Saturday's meeting and for all the great work your team has done!

We need your help.

It was abundantly clear that the majority attending wanted additional Pickleball courts added or switched from tennis courts, yet we feel unheard! Oftentimes at Poinsettia Park there are TWENTY TO THIRTY people waiting to play doubles all day long. We are ALL frustrated that we have only 6 courts, and 2 of them are for tough competitors ("challenge courts"), which is only a small percentage of players. So really we have 4 courts for dozens and dozens of players. Typically the wait is 25-45 minutes between games!

It's not right that we are being sidelined. It's not right that other things are being built instead of more courts! It's not right that tennis has soooo many courts and far fewer players.

We also need shaded areas, sun shades over the bleachers.

Pickleball is the fastest growing sport in the US, more people join every day.

We are all HIGHLY FRUSTRATED over the situation. Please do something and let us know you're doing it!

Here's a video I took. This is typical!

Thank you,  
Marcie Peters

## City of Carlsbad - Your Comments Input

**Name** Marisa Tervoort  
**E-mail** Marisanevarez@gmail.com

**Comments** I am requesting that the city of Carlsbad seriously consider converting the 2 tennis courts at Calavera into multi-use courts (meaning pickleball/tennis courts). I currently play at Poinsettia and the courts are packed most days. The courts at Calavera are very quiet and I would like to see the courts get more usage. Pickleball is a sport for all ages as it is not as hard on the body as tennis. I urge the City to add pickleball court lines to the existing tennis courts.

**Subject:** Pickleball Courts in Carlsbad

Mick,

As you're probably aware, Pickleball is the fastest growing sport in the U.S., especially in San Diego. There aren't enough courts in Carlsbad which results in waiting for up to an hour to play a game. The Poinsettia Park courts are way beyond their capacity. On top of this, I live right near Pointsettia park and pay taxes to support it. As a local, I should have access to a park that is literally 5 minutes walk from my house. Instead I have to wait excessive amounts of time to play a game of Pickleball. I speak with people who come from all around southern CA to play in this park; I spoke with people today who came from Pasadena.

I suggest that we either add more courts or give preference to local residents as we pay local taxes and have to deal with all of the traffic associated with tournaments and all types of activity at the park. Maybe you should add fees for others who aren't locals which can create a revenue stream while allowing residents to get more playing time. Or, another option is to add more courts. I know that we added a dog park and have allocated much of the park, so maybe we can take over some tennis courts and convert them to Pickleball as I often see them unused.

Thanks for your help in this matter. I'd be happy to discuss this further (my number below). Thanks.

**From:** Douglas Gore <douglasgore4@gmail.com>  
**Sent:** Tuesday, January 11, 2022 10:58 AM  
**To:** Mick Calarco <Mick.Calarco@carlsbadca.gov>; Kyle Lancaster <Kyle.Lancaster@carlsbadca.gov>  
**Subject:** Pickleball Courts

As Carlsbad Pickleball players, we know that the City of Carlsbad “decision makers” are aware of long wait times to play at the Poinsettia Park Pickleball Courts. To review, throughout most of the day there are typically more than 20 players required to wait 30–45 minutes to play just one game. During this wait time, it is extremely frustrating and disgusting to look 50 feet to the West of the courts and see vacant tennis courts. This is a waste of not only Carlsbad Park Department assets but the personal time for those waiting to play. If tennis courts are not being used for hours and hours throughout the day, why not let families and individuals play Pickleball on these empty courts?

To mitigate this problem, a prudent and expedient low cost “**interim solution**” for both the city and the pickleball players is to **temporarily** convert two (2) of the southwest Poinsettia Park tennis courts into eight (8) dedicated pickleball courts or two (2) multi-purpose pickleball/tennis courts. This can be accomplished by merely adding pickleball court lines to the existing tennis court lines and leaving tennis nets and posts in place as is. Noise is **NOT** an issue because there are no homes near these 2 tennis courts – just a large parking lot and mature trees. In fact, these courts are more than three (3) football fields away from the closest homes. Therefore, there is no need to install expensive acoustic wind screens. **Every Poinsettia Park pickleball player that we have spoken with is 100% supportive of this solution.**

The city can easily and inexpensively convert the affected courts to permanent courts for either sport once this gross imbalance of Park Department assets has been permanently resolved. This is an affordable way to increase the utilization of park assets, improve service to the growing pickleball population in Carlsbad and

enhance the image of the City and Parks and Recreation Department. It will also be a strong indication that Parks and Rec is a dynamic organization, not a static group, that cannot react to this growing ongoing problem because of bureaucracy.

I would be interested in hearing your response to this issue that does not require years of planning, asset allocation, building and unnecessary delays.

**Subject:** More Pickle Ball Courts in Carlsbad?

Good Morning Mick

I was advised to send you an email if I thought we could use more pickle ball courts in Carlsbad and I really do!

The courts are bringing folks together in a special way... meeting those we might not on a regular basis in the village. I feel they may be revenue generating to the city as well as people from around our area are flocking here as well...likely running errands on their path to and from the courts.

Big shout out to our lovely safe area too... I inadvertently left my paddle in the rack and went home to make dinner... not realizing the error until late the next day. Came by the courts at Poinsettia 30 hours later and there it was waiting for me... I LOVE Carlsbad! (dare I say this was NOT the first time 😊)

We could spread extra courts out between our parks to take some of the load off of Poinsettia... Calavera or Stage Coach? Just a thought.

Thank-you for your time and consideration.

Sincerely,  
Bernadette Clark

**Sent:** Wednesday, February 9, 2022 3:42 PM  
**To:** Mick Calarco  
**Subject:** Pickleball

Good afternoon Mick,

I frequent the Poinsettia Park to play Pickleball. There are always at least 8-20 people waiting to play. The least busy time appears to be over the lunch hour.

The area is underserved with available courts and needs to plan ahead for more courts.

I think Carlsbad would benefit from a large complex with Pickleball courts. It would lead to organized tournaments that would draw visitors and revenue for the city of Carlsbad in tourism dollars that would be in the cooler off seasons.

Perhaps there is some available property by a community college or park?

Pickleball is exploding in popularity and you should definitely consider spending some city dollars to bring in events to this lovely area. All ages are playing this game and it is very popular!

Thank you,

Denise Engels

**Cc:** [info@peopleforponto.com](mailto:info@peopleforponto.com)

**Subject:** Public input to CA Coastal Commission and City of Carlsbad on Carlsbad CIP, Parks Master Plan, and Local Coastal Program Amendment

Dear Council & CA Coastal Commission:

This is being submitted as public input on for the Carlsbad Council's CIP meetings of 4-20, 4-26, and 5-3-2022, Carlsbad's Park Master Plan Update, and to the CA Coastal Commission (CCC) for input on Carlsbad's Proposed LCP Amendment.

On all three (5-3-2022, 4-26-2022, and 4-20-2022) CIP meetings 100% of the speakers spoke in favor of Ponto Park. People for Ponto provided the following verbal testimony at those three meetings:

**May 3, 2022** *Public testimony to Carlsbad City Council on CIP budget issues, and also for inclusion as official public input to the City & CA Coastal Commission on the Carlsbad Local Coastal Program Amendment, Parks Master Plan Update, and South Carlsbad Coastline project:*

---

"On April 20<sup>th</sup> & 26<sup>th</sup> we sent you data files and said Carlsbad Citizens need your help to create a much needed and Real Ponto Park. Carlsbad's Park Master Plan says that Ponto/Coastal South Carlsbad is Not Served by City parks and these areas are where you the Council should make new Parks investments.

We shared wonderful news that 14.3 acres of Ponto land is for sale that could be a world-class Coastal Park for Carlsbad. You now have the "willing seller" you said was holding you back from investing in Ponto Park months ago. This 14.3 acre Ponto Park has world-class ocean/lagoon views, and provides adequate dimensions to host profitable Coastal view community/special events and other significant revenue and park grant opportunities for the City. You received a video showing this Ponto Park's greatness.

And the best part, we (and future generations of Carlsbad families) can have this 14.3 acres of NEW world-class City Park land at a \$20-40 million tax-payer cost savings compared to the proposed PCH Relocation Project. This cost savings pays for both PCH walkways & Monroe Street pool upgrades. The City's 2001 studies documented that PCH Relocation does not buy one single square foot of new City land; it only "rearranges the deck chairs" to create a few small isolated narrow land fragments along a roadway. We can save tax-payers \$20-40 million, and get 14.3 MORE acres of waterfront park with world class view, and create the much needed Coastal Park for South Carlsbad - 62% of our Citizens and their families - and all this at up to a 50% discount relative to the PCH alternative, and allow State park grant funding. At prior budget/council meetings Carlsbad Citizens overwhelmingly asked for this Ponto Park. We ask you to put this world-class Ponto Park into your CIP and save tax-payers \$20-40 million. P4P Citizens are here to help you with revenue/grant issues.

We/You have a once in a lifetime opportunity to do something truly great and world-class for Carlsbad. Please seize this wonderful opportunity. You will be forever remembered based on your decision. Don't be shortsighted. Please listen to your citizens, listen to the data and logic, be fair to South Carlsbad citizens and families, and invest for our shared Carlsbad future. You can be great. Be great.

*By Lance Schulte, Carlsbad citizen and People for Ponto*

**April 26, 2022** Public testimony to Carlsbad City Council on CIP budget issues, and also for inclusion as official public input to the City & CA Coastal Commission on the Carlsbad Local Coastal Program Amendment, Parks Master Plan Update, and South Carlsbad Coastline project:

---

On April 20<sup>th</sup> we spoke about how Carlsbad Citizens need your help to create a much needed and real Ponto Park. We noted that the City's Park Master Plan identifies Ponto and Coastal South Carlsbad as Not Served by City parks and areas the City says that new Parks investments should be made. We also noted that there are 10 Coastal Parks totaling 37-acres in North Carlsbad serving 38% of Carlsbad's population yet there are no Coastal Parks meaning Zero Coastal Park Acres in South Carlsbad, leaving 62% of Carlsbad's population without a Coastal park.

On 4-25-22 we sent you 4 data files, and some wonderful news that 14.3 acres of Ponto land is for sale (by a willing seller) that could be a world-class Coastal Park for Carlsbad. This 14.3 acre Ponto Park would have spectacular ocean/lagoon views, provides adequate dimensions to host profitable Coastal view weddings/community/special events. I would be happy to show/walk this site with you so you can see its potential greatness.

And the best part, we can have this 14.3 acres of NEW world-class City Park land at a \$20-40 million tax-payer cost savings compared to the proposed PCH Relocation Project. PCH Relocation does not buy any new City land; it only creates small isolated narrow land fragments next to a major roadway. We can save tax-payers \$20-40 million, and get 14.3 MORE acres of park, with better world class views on waterfront land, and create the much needed Coastal Park for South Carlsbad - 62% of our Citizens and their families - and all this at up to a 50% discount relative to the PCH alternative. In prior budget/council meetings Carlsbad Citizens overwhelmingly asked for this Ponto Park. You can choose to buy this land under Proposition C as it has qualifying sensitive habitat and required trails. We ask you to put this world-class Ponto Park into your CIP and save tax-payers \$20-40 million. P4P Citizens are here to help you address any revenue issues.

We have a once in a lifetime opportunity to do something truly great and world-class for Carlsbad. Please seize this wonderful opportunity. You will be forever remembered based on your decision. Be great. What do you as our City Council choose to do?

*By Lance Schulte, Carlsbad citizen and People for Ponto*

**Cc:** 'info@peopleforponto.com'  
**Subject:** Public input to 4-20 & 26-2022 Carlsbad Council meeting on CIP - South Carlsbad Coastline Project

Dear Council & CA Coastal Commission:

This is being submitted as public input on for the 4-26-2022 Council CIP meeting, and to the CA Coastal Commission (CCC) for input on Carlsbad's Proposed LCP Amendment.

On the **4-20-2022** CIP meeting 100% of the speakers spoke in favor of Ponto Park. People for Ponto provided the following verbal testimony:

*“Carlsbad Citizens need your help.*

*In 2017 Carlsbad Citizens first became aware that Ponto Planning Area F was required to be considered as a Public Park, but was never considered as required by Carlsbad’s LCP.*

*We all should know by now that City’s Park Master Plan has identified both Ponto and Coastal South Carlsbad as areas Not Served by City parks – an unfair distribution of Parks. For example there are 10 Coastal Parks totaling 37-acres in North Carlsbad serving 38% of Carlsbad’s population with a minority of Carlsbad’s visitor accommodations yet there are Zero Coastal Parks totaling Zero Park Acres in South Carlsbad Not Serving 62% of Carlsbad’s population and the majority of Carlsbad’s visitor accommodations. We should also know that the City plans on losing 32+ acres of existing Coastal open space land (campground and beach) at Ponto and South Carlsbad in the next 30+ years due to sea level rise. We all should know that since 2001 the City has known that the very expensive PCH Relocation Project only opens up a few relatively small narrow slivers of useable land at Ponto and Coastal South Carlsbad – most City PCH land is constrained and not viable for a real and needed Park. Citizens, parks and coastal advocates, and the visitor industry have since 2017 sent you over 5,000 emails and provided years of requests with supporting data asking Council to provide a needed Ponto Park. Ponto Park will make the City money due to a variety of reasons I can talk with the Council about.*

*Citizens are wondering what’s causing the Council to not provide a needed, useable, adequately sized and dimensioned, and affordable Ponto Park,*

*we ask because avoiding the Park unfairness data of not providing Ponto Park and avoiding Citizens desires for a Ponto Park should not continue.*

*What do you as a Council - charged with representing Citizens desires - suggest be done?”*

In February, People for Ponto Citizens provided the Council, City and CCC the following email and 2 attached data files (1 of 2, and 2 of 2) regarding Council’s South Carlsbad Coastline CIP Proposal (aka Carlsbad Blvd Realignment). The 2 data files have a good short summary and mapping of the major issues along the South Carlsbad Coastline. The 2 data file should be fully considered and evaluated:

- with other alternatives to provide for the documented need for a true City Coastal Park for South Carlsbad,
- to address the missing 30-acres of Coastal Open Space land use that Ponto developers were supposed to provide but the City falsely exempted developers from providing,
- to address the future loss of 32-acres of High-priority Coastal Open Space land use at the State Ponto Beach and Campground,
- to address unlimited future Carlsbad and CA population and visitor demand for High-priority Coastal Land Uses – Coastal Recreation and Low-cost Visitor Accommodations, and
- as part of the land use analysis of Carlsbad’s proposed Local Coastal Program Land Use Plan Amendment, and Carlsbad’s additional proposed Coastal Zoning changes to Ponto.

In 2001 the City conducted the attached ERA Financial Feasibility Analysis of Carlsbad Blvd Realignment. The City’s 2001 Analysis optimistically notes small amounts of ‘Surplus Land’ between Island Way and La Costa Ave. This surplus roadway median land is relatively narrow and much constrained in its usability, as mapped and noted in the aforementioned attached ‘City’s PCH area map w numbered notes of constraints 2 of 2’ data file. In 2022 People for Ponto Citizens compiled recent City data into the attached ‘2022 General Comparative Cost/Benefits Analysis of PCH-PCH Modification-Ponto Park’ data file. This comparative cost/benefit data should be considered by Council. The \$60-85 million Carlsbad Blvd Realignment cost (for 2.3 miles from Island Way to La Costa Avenue, is \$26-37 million per mile) but will not buy 1 single square foot of new City land. These Financial Feasibility and tax-payer Comparative Cost/Benefits (‘bang for the buck’) data files should be read and considered by Council.

Actually buying vacant land is likely a better and more cost effective use of tax-payer dollars. Over the past 7-years the last 3 remaining vacant Coastal lands at Ponto have come up for sale and available for the City to buy as noted:

1. 11.1-acre Planning Area F was optioned from 2014-2019,
2. 14.3-acre Planning Area G, H & I was sold to Kam Sang in 2015 for \$20 million
3. 5-acre Site 18 (Ponto Storage area) was sold in February 2022, and now the
4. 14.3-acre Planning Area G, H & I is up for re-sale by Kam Sang; and is again now available for City purchase.

14.3 acre Planning Area G, H & I is a very special property with significant views to both the Ocean and abutting Batiquitos Lagoon. It can be a world-class site.

It seems City acquisition of vacant land would provide new and more useable land at a lower cost, and a better tax-payer value to address the documented need for a Ponto Park and Coastal land use planning issues.

The Planning Area F and Planning Area G, H & I sites include DCSS Habitat and proposed/required public trails, and are connected to adjacent Sensitive Habitat Open Spaces so qualify to be purchased by the Council under Proposition C without a citizens vote. Consistent with voter approved Proposition C and as part of the City's settlement of a lawsuit, last year City acquisition of Planning Area F was recommended by North County Advocates. It is understood that the City is required to consider North County Advocates' recommendation as part of the City's settlement agreement, but has yet to do so.

These 3 vacant Ponto lands are the last remaining adequately dimensioned and useable vacant Coastal lands. In the CIP the Council should be considering acquisition of some of these last remaining vacant Coastal lands at Ponto to address the critical documented need for Ponto Park, South Carlsbad's only opportunity for a Coastal Park, and the forever Coastal High-priority Coastal land use needs.

Thank you for your consideration. You have a limited window of opportunity to actually acquire Coastal land for a much needed Coastal Ponto Park. A true Ponto Park will leave a lasting positive legacy for future generations. We ask you to please not squander that opportunity.

Sincerely,  
Lance Schulte

**Subject:** RE: South Carlsbad Coastline Project

Hello Lance,

Thank you very much for circling back.

Yes, we would like to coordinate a meeting specific for you and key members of Ponto area "People4Ponto." Do you have an upcoming meeting we may be able to join to discuss this project? Otherwise, I can provide some days/times directly to you that may work, so that we can send a meeting invitation.

We also see that Deb Mossa invited you to attend the Batiquitos Lagoon Meeting on Thursday, February 3 at 11 a.m. and you accepted.

Thank you,  
Tiffany

**Subject:** South Carlsbad Coastline Project

Hi Lance,

Now that Mike Grim has retired language, I am personally reaching out to you to begin our conversation regarding South Carlsbad Boulevard.

The City Council has asked staff to explore recreational opportunities that could be created along south Carlsbad Boulevard by realigning the road to the east. We are gathering input through a survey and two workshops as well as meetings with groups interested in the project.

The project area is limited to land the city controls immediately adjacent to Carlsbad Boulevard. You can read more about the project on the [city's website](#).

If you would like to meet with the project team to share feedback or invite others in your group to meet with us, please let us know. I have copied Tiffany, a member of our project team, who can coordinate a time and date.

Thanks in advance for your time. Looking forward to hearing from you.

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad Council and Parks and Planning Commissions, & CA Coastal Commission:

May 30<sup>th</sup> you received the 4 Parks and Open Space data files. Attached is another Parks data file that summarizes key comparative data on Park facilities provided in Carlsbad vis-a-vis the National Recreation & Parks Association database, and Trust for Public Land data base, and the letter to the Trust for Public Land letter to the City of Carlsbad. This data should also be considered by the City (and CA Coastal Commission) as part of the City's Growth Management Program Update, Parks Master Plan Update, Local Coastal Program Amendment process.

Thank you for your consideration,

Lance Schulte  
35-year Carlsbad resident  
former Carlsbad Growth Management and city planner

**Subject:** Public input to Carlsbad Tomorrow Growth Management Committee & CCC - Parks & Unconstrained-Useable Open Space facilities

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad Council and Parks and Planning Commissions, & CA Coastal Commission:

The Committee is tasked with recommending to the Council proposed changes to City Park and City Unconstrained/Useable Open Space Standards within the Growth Management Program Update.

Because Carlsbad is quickly running out of vacant land, the Committee's recommendations are critical for very obvious reasons. The Committee will be recommending (for all future generations) the final methods to supply Citizen desired Parks and Unconstrained/Useable Open Space. It is important the Committee wisely represent the interests of those future generations. The Park and Open Space supply solutions for future generations will amend Carlsbad's updated 2015 General Plan and the "as of 2013" Local Coastal Program.

Since 2017 many People for Ponto Carlsbad Citizens have overwhelmingly expressed their need and desire for:

1. Fairness, and a true adequately sized and dimensioned Ponto Park to address City Park Master Plan documented "lack of Park Service and Park Inequity" in this area, and
2. Correcting the City's documented 30-acre shortfall in required Unconstrained and Useable Open Space in the Ponto area, and
3. Correcting the City's planned loss of 32+ acres of Coastal Open Space at Ponto (the State Campground and Beach) first documented in 2017 and thus not a part of the City's General Plan & Growth Management Program.

Since 2017, over 5,000 Carlsbad Citizen and visitor petitions have been sent to the City & Coastal Commission expressing the desire and need of both Citizens and visitors to have these Parks and Open Space issues addressed. The Council has been narrowing deferring addressing these issues and noted waiting for the Carlsbad Tomorrow Growth Management Committee to consider both the data and Citizen and visitor desires.

Attached are 5 data files sent to the City by Carlsbad People for Ponto. The data files were sent as comments to the City's proposed Local Coastal Program (LCP) Amendment that seeks to change Carlsbad's 2013 LCP with the outdated 2015 General Plan, Carlsbad's Park Master Plan Update process, and the Growth Management Program that your Committee will be making recommendations to change. People for Ponto Carlsbad Citizens conducted over 50 official Carlsbad Public Records Requests to compile this data. We provide these data files in preparation of your June 23<sup>rd</sup> meeting.

1. Coastal Recreation and comparative Park data: Summary data on supply/demand/distribution-fairness of City Parks in Carlsbad, unflattering comparative data on how much parkland and where Carlsbad provides Parks relative to Encinitas and Oceanside and national averages, documents Carlsbad's Park Master Plan mapping Park distribution unfairness at Ponto, and documenting that many Carlsbad's Park acres are Unusable for people because they are constrained habitat land protected from human use/intrusion.
2. Sea Level Rise & Carlsbad planned loss of Open Space at Ponto: A) Summary data on how sea level rise (SLR) will remove Open Space at Ponto. B) City GIS maps/data that shows 30-acres of required Unconstrained/Useable Open Space was not provided at Ponto (Zone 9) by using false exemptions while similar and adjacent Local Facility Management Zones (19 & 22) provided their required Unconstrained/Useable Open Space. C) City maps and data tables documenting the both loss of Open Space at Ponto from SLR and the missing Growth Management Open Space at Ponto.
3. Updated 2022-June Comparative Cost-Benefits of PCH Modification and Ponto Park: A) Summary City data comparing the Citizen and tax-payer Cost-Benefit of Park and Useable Open Space alternatives at Ponto. The data file initially compared cost-benefits of the 11-acre Ponto Planning Area F and pre-2022 City Cost data. However in May 2022 the City updated its PCH Relocation costs, and a willing seller of 14.3 acres of adjacent land (Ponto Planning Area G, H, and I; aka Kam Sang) was listed for sale. B) The Kam Sang list price of \$2.7 million per acre or a bit more than the \$2.4 to \$1.4 million per acre price of recent Ponto land sales noted

in the file but are close. C) The City's updated PCH Relocation Costs are similar. The Cost-Benefit Comparison still shows purchasing Ponto Park land is still a better value for Carlsbad Citizens, and saves tax-payers money. The Comparison references a City map and data showing sea level rise impact areas, and the City's PCH Relocation environmental and design constraints.

4. Citizens' City Budget Ponto Park need-requests: A) Summary data and verbatim documentation of Carlsbad Citizens requests to budget to address the need for Ponto Park, and Open Space issues at Ponto. B) The volume of Citizen input on Ponto Park and Open Space, and the actual verbatim Carlsbad Citizen comments should be considered. C) In addition since 2017 when Carlsbad Citizen first became aware of several Ponto Planning Mistakes by the City:
  - a. false Growth Management Unconstrained/Useable Open Space 'Standard exemption' at Ponto
  - b. failure in the 2010 Ponto Vision Plan that is the basis for the 2015 General Plan Update, and the failure of the 2015 General Plan Update to follow the 1996 Local Coastal Program Land Use Policy for Planning Area F that required the City to consider and document the need for Coastal Recreation (i.e. Public Park) and Low-cost Visitor Accommodation land use prior to proposing a change in the Non-residential Reserve land use policy. Failing to fully disclose the Coastal Commission's rejection of the Ponto Vision Plan in 2010 because of these reasons, and not disclosing 2016, 2017 and 2022 directions to the City..
  - c. SW Quadrant Park deficits going back to 2012
  - d. Not considering 2017 Sea Level Rise Impact Report that shows the loss of 32+ acres of high-priority Coastal Open Space land uses at Ponto.
  - e. As a corollary example, the City has additional history in collaborating with developers to skirt standards and allow development without developers providing their required public facilities - the Rosalena HOA Trail segment of the Batiquitos Lagoon Bluff-top trail at Ponto is a classic example. This example resulted in delaying construction of the public trail by over 35-years and ended up costing about 75 Carlsbad homeowners over \$1 million in additional costs. It almost resulted in no trail being built and City and/or developer pocketing money meant to pay for the trail. This scenario could happen a far larger scale and cost if Ponto developers are not required to provide the missing 30 acres of required Useable Open Space at Ponto

Carlsbad People for Ponto Citizens have asked the City to provide the Citizen input since 2017 for all things Ponto related. Reviewing the public record of 5,000+ citizen communications since 2017 reveals only maybe a dozen (mostly developer paid or supported) are not in support of Ponto Park. Your fellow Carlsbad Citizens ask the Growth Management Committee to read their input and to consider future generations.

Thank you for serving on the Growth Management Committee. You each have a large and vital task, as your recommendations will be the beginnings of what (due to Carlsbad running out of vacant land) will be the 'final glide path' that forever defines Carlsbad's Quality of Life. After your recommendations, there will only be added population demands on the public facilities. As more infill development is added and there may be no vacant land to provide needed supplies of facilities like Parks and Unconstrained/Useable Open Space.

I speak from having already professionally followed the path you are on. After working on Carlsbad's Growth Management Program in the mid-1980s I addressed this same issues for the then new City of Dana Point that (in 1989) was at a similar stage of 'near buildout as Carlsbad is now.

Based on my professional experience I implore you seriously and fully consider that data and desires your fellow Carlsbad People for Ponto Citizens have provided you and the City. Based on where Carlsbad is we, and you, will only get this one chance to get it right.

Sincerely,  
Lance Schulte  
35-year Carlsbad resident  
former Carlsbad Growth Management and Dana Point city planner

**Re: Support creation of Ponto Park – a needed park for South Carlsbad**

Dear Mayor Hall,

The Trust for Public Land (TPL) is strongly supporting the efforts of ‘People for Ponto’ and thousands of Carlsbad residents to build Ponto Park in the 11-acre coastal parcel known as ‘Planning Area F’ in South Carlsbad. For over 40-years TPL has been designing and building parks in California and although we have world-class parks and beaches, the fact remains 3.2 million Californians don’t have access to a park, and some of those Californians are residents of South Carlsbad. While the National Recreation and Park Association calls for 10-acres of park lands per 1000 residents as standard metric for healthy and vibrant cities, Carlsbad has a comparatively and relatively low park standard of only 3-acres/1,000 population and no requirement to provide accessible parks within walking distance.

And according to our own Trust for Public Land 2020-21 ‘City Parkscore’, Carlsbad is also below national averages both providing park land acreage and in providing residents a park within a 10-minute walk.

The City of Carlsbad’s Park Master Plan on pages 86-89 documents park service and park equity/inequity. Carlsbad’s Park Master Plan documents that Ponto area has no park and all of South Carlsbad (over 61% of the entire city population) has no Coastal Park while . Carlsbad provides 10 City Coastal Parks (totaling over 35-acres) in North Carlsbad, while South Carlsbad has no coastal parks to serve the 64,000 residents, many of which are children. Ponto Park at 11-acre Planning Area F is the last remaining reasonable bit of vacant and currently unplanned Coastal land to provide a Coastal Park for South Carlsbad. Ponto Park would also be in the middle of a 6-mile long section of North San Diego County coastline without Coastal Park, and would help address a regional need for a Coastal Park for these 6-miles of coastline.

The CA Coastal Act has numerous policies that support the creation of Ponto Park and Coastal Recreation land use. The City of Carlsbad’s history of following these CA Coastal Act polies now and over the past 40-years in its Local Coastal Program should be considered now in the City’s proposed Local Coastal Program Amendment. Over the past 40-years Carlsbad and California residents have forever

lost numerous opportunities to create vital Coastal Parks and Coastal Recreation for our growing population.

In addition to the clear need for coastal parks in South Carlsbad, the citizens are overwhelmingly supporting the creation of Ponto Park in Planning area F. As you know during the past 2-years during the City Budget and Local Coastal Program Amendment processes, residents strongly demonstrated their desire that the City Council purchase and build Ponto Park. In 2019, 2020 and 2021 over 90% of citizen input expressed need was for Ponto Park, along with extensive verbal and written citizen testimony.

As COVID-19 vividly pointed out, parks are not an amenity, but a key component to human physical and mental health. Parks also provide environmental benefits and contribute to cleaner air and water, climate adaptation and social cohesion. TPL think you have a great opportunity to address equity and access to park space and improving the lives of thousands of Carlsbad residents and strongly urge you to support the building of Ponto Park for families and community.

Sincerely,

Rico Mastrodonato  
Government Relations Director

National Recreation & Park Association (NRPA) Agency Performance Review – Carlsbad Parks  
<https://www.nrpa.org/publications-research/research-papers/agency-performance-review/>

The following in quotation marks is from the NRPA Agency Performance Review. Under each quote is how Carlsbad compares with this nationwide park data base.

“The typical park and recreation agency offers one park for every 2,323 residents served, with 10.4 acres of parkland per 1,000 residents. But park and recreation agencies are as diverse as the communities that they serve, and what works well for one agency may not be best for your agency. Therefore, park and recreation professionals need data to identify the best practices to optimally serve their community.”

Carlsbad has one park for 2,797 residents with 2.95 acres of parkland per 1,000 residents.

Carlsbad is 20% below typical in providing the number of parks, and

Carlsbad is 72% below typical in providing acres of parkland.

Carlsbad data is from 2020 US Census, Carlsbad General Plan & data from new Buena Vista Reservoir Park in NW quadrant. City also counts school playgrounds as Parks, even though these are not 100% available for park use.

The NRPA Agency Performance Review also provides finer-grained data on a City’s relative performance based on population, population per square mile (aka population density), and City Park Budget size. Carlsbad’s 2020 population of 114,746 places it in the 100,000 to 250,000 category, Carlsbad’s population per square mile of 2,792.2 places it in the ‘over 2,500’ category, and Carlsbad 2022-23 Park Budget of \$2,601,669 places it in the \$1 to \$5 million budget category. NRPA data for these categories is:

<b>“Based on</b>	<b>Lower quartile</b>	<b>median</b>	<b>upper quartile</b>
<u>Total city population:</u>			
Residents per park	2,205	3,170	5,852
Acres of park/1,000 residents	4.6	8.9	16.3”

Carlsbad is:

12% better than the median in providing the number of parks per residents

67% worse than the median in providing acres of park per resident

“Population/sq. mile (population density):

Residents per park	1,382	2,261	3,908
Acres of park/1,000 residents	3.9	7.9	14.5”

Carlsbad is:

24% worse than the median in providing the number of parks per residents

63% worse than the median in providing acres of park per resident

“City Park budget:

Residents per park	1,174	1,941	4,288
Acres of park/1,000 residents	5.1	10.6	18.3”

Carlsbad is:

44% better than the median in providing the number of parks per residents

72% worse than the median in providing acres of park per resident

It is unclear in the NRPA data if the nationwide data includes and count school playgrounds as a park, (like Carlsbad does) even though school playgrounds are 100% available as parkland. The City's use of School facilities that are outside of the City Park System and City Park Budget to count as Parks may distort data comparisons.

The NRPA Agency Performance Review has no comparative data on the accessibility of Parks. The NRPA website references the Trust for Public Land's (TPL) Park Score data for Park accessibility data. The Trust for Public Land's Park Score for Carlsbad is at <https://www.tpl.org/city/carlsbad-california> . Carlsbad's TPL Park Score data indicates:

For a 10-minute walk to a Park, Carlsbad is:  
33% below the Median for the TPL's 100 ParkScore® cities:  
9% below the Median for the 14,000 cities and towns in the TPL ParkServe® database

For overall Park acreage, Carlsbad is:  
26% below the Median for the TPL's 100 ParkScore® cities:  
7% below the Median for the 14,000 cities and towns in the TPL ParkServe® database

The TPL database includes all parks within a city, including non-City parks. For instance TPL includes the State Campground as a Park; even though the Campground is a 'low-cost visitor accommodation' there is no park within the Campground. The TPL also counts restricted habitat areas within City Parks that cannot be used as parks.

The NRPA does provide information in support of park accessibility as noted in the following clips and links:

["10-Minute Walk Campaign](https://www.nrpa.org/publications-research/evaluation-resource-hub/park-check/resources/) NRPA, The Trust for Public Land, and the Urban Land Institute have joined forces to ensure there is a great park within a 10-minute walk of every person across America. More than 220 mayors have committed to expanding equitable park access through local policy changes, master planning efforts and increased funding." <https://www.nrpa.org/publications-research/evaluation-resource-hub/park-check/resources/>

"NRPA Park Check Principles, **Access:** Everyone deserves access to a high-quality park that is within a 10-minute walk of where they live. It is important that all members of the community, including lower-income residents, have walkable park access." <https://www.nrpa.org/publications-research/evaluation-resource-hub/park-check/principles/>

**"Ashburn, Va. (Sept. 24, 2018)** — According to a recent [report](#) published by the [National Recreation and Park Association](#) (NRPA), the majority (85 percent) of Americans support efforts, such as the [10-Minute Walk campaign](#), to ensure every person has access to a great park within a 10-minute walk of their home. Currently, 3 in 4 Americans say they live within walking distance of a local park or other recreational facility and, on average, visit their local park and recreation facilities more than twice a month. ... A [report](#) issued by NRPA — in partnership with the Center for Regional Analysis at George Mason University — demonstrates the vast economic impact of local parks nationwide. Operations and capital spending for local parks generates more than \$154 billion in economic activity and supports more than 1.1 million jobs. This is a conservative estimate that does not capture parks' other economic benefits:

- Higher real estate values
- Health and wellness benefits
- Conservation/Resiliency benefits
- Tourism

- Economic development”

<https://www.nrpa.org/about-national-recreation-and-park-association/press-room/americans-agree-every-person-deserves-access-to-a-great-park-within-a-10-minute-walk/>

“Ashburn, Va. (Feb. 11, 2019) — As part of the [10-Minute Walk](#) campaign, which aims to address the fact that 1 in 3 Americans don’t have a park within a 10-minute walk (or half-mile) of home, the [National Recreation and Park Association](#) (NRPA), along with [The Trust for Public Land](#) (TPL) and the [Urban Land Institute](#) (ULI), has selected 10 campaign cities nationwide to receive grant funding totaling \$400,000. This funding will be used to support city planning and policy efforts that help increase access to high-quality, close-to-home parks and public green space.” <https://www.nrpa.org/about-national-recreation-and-park-association/press-room/new-grant-funding-supports-10-cities-participating-in-10-minute-walk-campaign/>

The City’s Park Master Plan (pages 86-xx) maps Park Service Areas and areas Unserved by City Parks. Following is a compilation the City parkland and the City areas Served (circled) and Unserved (outside the circles) by City Parks. This data was compiled and submitted to City in a ‘Coastal Recreation data file’ on 1/29/20 by People for Ponto Carlsbad Citizens, along with submitting over 5,000 petitions regarding many comparative shortfalls in City Parkland:

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

**Cc:** 'info@peopleforponto.com'  
**Subject:** Public input to Carlsbad Tomorrow Growth Management Committee & CCC - Parks & Unconstrained-Useable Open Space facilities

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad Council and Parks and Planning Commissions, & CA Coastal Commission:

The Committee is tasked with recommending to the Council proposed changes to City Park and City Unconstrained/Useable Open Space Standards within the Growth Management Program Update.

Because Carlsbad is quickly running out of vacant land, the Committee's recommendations are critical for very obvious reasons. The Committee will be recommending (for all future generations) the final methods to supply Citizen desired Parks and Unconstrained/Useable Open Space. It is important the Committee wisely represent the interests of those future generations. The Park and Open Space supply solutions for future generations will amend Carlsbad's updated 2015 General Plan and the "as of 2013" Local Coastal Program.

Since 2017 many People for Ponto Carlsbad Citizens have overwhelmingly expressed their need and desire for:

1. Fairness, and a true adequately sized and dimensioned Ponto Park to address City Park Master Plan documented "lack of Park Service and Park Inequity" in this area, and
2. Correcting the City's documented 30-acre shortfall in required Unconstrained and Useable Open Space in the Ponto area, and
3. Correcting the City's planned loss of 32+ acres of Coastal Open Space at Ponto (the State Campground and Beach) first documented in 2017 and thus not a part of the City's General Plan & Growth Management Program.

Since 2017, over 5,000 Carlsbad Citizen and visitor petitions have been sent to the City & Coastal Commission expressing the desire and need of both Citizens and visitors to have these Parks and Open Space issues addressed. The Council has been narrowing deferring addressing these issues and noted waiting for the Carlsbad Tomorrow Growth Management Committee to consider both the data and Citizen and visitor desires.

Attached are 5 data files sent to the City by Carlsbad People for Ponto. The data files were sent as comments to the City's proposed Local Coastal Program (LCP) Amendment that seeks to change Carlsbad's 2013 LCP with the outdated 2015 General Plan, Carlsbad's Park Master Plan Update process, and the Growth Management Program that your Committee will be making recommendations to change. People for Ponto Carlsbad Citizens conducted over 50 official Carlsbad Public Records Requests to compile this data. We provide these data files in preparation of your June 23<sup>rd</sup> meeting.

1. Coastal Recreation and comparative Park data: Summary data on supply/demand/distribution-fairness of City Parks in Carlsbad, unflattering comparative data on how much parkland and where Carlsbad provides Parks relative to Encinitas and Oceanside and national averages, documents Carlsbad's Park Master Plan mapping Park distribution unfairness at Ponto, and documenting that many Carlsbad's Park acres are Unusable for people because they are constrained habitat land protected from human use/intrusion.
2. Sea Level Rise & Carlsbad planned loss of Open Space at Ponto: A) Summary data on how sea level rise (SLR) will remove Open Space at Ponto. B) City GIS maps/data that shows 30-acres of required Unconstrained/Useable Open Space was not provided at Ponto (Zone 9) by using false exemptions while similar and adjacent Local Facility Management Zones (19 & 22) provided their required Unconstrained/Useable Open Space. C) City maps and data tables documenting the both loss of Open Space at Ponto from SLR and the missing Growth Management Open Space at Ponto.
3. Updated 2022-June Comparative Cost-Benefits of PCH Modification and Ponto Park: A) Summary City data comparing the Citizen and tax-payer Cost-Benefit of Park and Useable Open Space alternatives at Ponto. The data file initially compared cost-benefits of the 11-acre Ponto Planning Area F and pre-2022 City Cost data. However in May 2022 the City updated its PCH Relocation costs, and a willing seller of 14.3 acres of adjacent land (Ponto Planning Area G, H, and I; aka Kam Sang) was listed for sale. B) The Kam Sang list price of \$2.7 million per acre or a bit more than the \$2.4 to \$1.4 million per acre price of recent Ponto land sales noted in the file but are close. C) The City's updated PCH Relocation Costs are similar. The Cost-Benefit Comparison still shows purchasing Ponto Park land is still a better value for Carlsbad Citizens, and saves tax-payers money. The Comparison references a City map and data showing sea level rise impact areas, and the City's PCH Relocation environmental and design constraints.
4. Citizens' City Budget Ponto Park need-requests: A) Summary data and verbatim documentation of Carlsbad Citizens requests to budget to address the need for Ponto Park, and Open Space issues at Ponto. B) The volume of Citizen input on Ponto Park and Open Space, and the actual verbatim Carlsbad Citizen comments should be considered. C) In addition since 2017 when Carlsbad Citizen first became aware of several Ponto Planning Mistakes by the City:
  - a. false Growth Management Unconstrained/Useable Open Space 'Standard exemption' at Ponto
  - b. failure in the 2010 Ponto Vision Plan that is the basis for the 2015 General Plan Update, and the failure of the 2015 General Plan Update to follow the 1996 Local Coastal Program Land Use Policy for Planning Area F that required the City to consider and document the need for Coastal Recreation (i.e. Public Park) and Low-cost Visitor Accommodation land use prior to proposing a change in the Non-residential Reserve land use policy. Failing to fully disclose the Coastal Commission's rejection of the Ponto Vision Plan in 2010 because of these reasons, and not disclosing 2016, 2017 and 2022 directions to the City..
  - c. SW Quadrant Park deficits going back to 2012
  - d. Not considering 2017 Sea Level Rise Impact Report that shows the loss of 32+ acres of high-priority Coastal Open Space land uses at Ponto.
  - e. As a corollary example, the City has additional history in collaborating with developers to skirt standards and allow development without developers providing their required public facilities - the Rosalena HOA Trail segment of the Batiquitos Lagoon Bluff-top trail at Ponto is a classic example. This example resulted in delaying construction of the public trail by over 35-years and ended up costing about 75 Carlsbad homeowners over \$1 million in additional costs. It almost resulted in no trail being built and City and/or developer pocketing money meant to pay for the trail. This scenario could happen a far larger scale and cost if Ponto developers are not required to provide the missing 30acres of required Useable Open Space at Ponto

Carlsbad People for Ponto Citizens have asked the City to provide the Citizen input since 2017 for all things Ponto related. Reviewing the public record of 5,000+ citizen communications since 2017 reveals only maybe a dozen (mostly developer paid or supported) are not in support of Ponto Park. Your fellow Carlsbad Citizens ask the Growth Management Committee to read their input and to consider future generations.

Thank you for serving on the Growth Management Committee. You each have a large and vital task, as your recommendations will be the beginnings of what (due to Carlsbad running out of vacant land) will be the 'final glide path' that forever defines Carlsbad's Quality of Life. After your recommendations, there will only be added population demands on the public facilities. As more infill development is added and there may be no vacant land to provide needed supplies of facilities like Parks and Unconstrained/Useable Open Space.

I speak from having already professionally followed the path you are on. After working on Carlsbad's Growth Management Program in the mid-1980s I addressed this same issues for the then new City of Dana Point that (in 1989) was at a similar stage of 'near buildout as Carlsbad is now.

Based on my professional experience I implore you seriously and fully consider that data and desires your fellow Carlsbad People for Ponto Citizens have provided you and the City. Based on where Carlsbad is we, and you, will only get this one chance to get it right.

Sincerely,  
Lance Schulte  
35-year Carlsbad resident  
former Carlsbad Growth Management and Dana Point city planner

National Recreation & Park Association (NRPA) Agency Performance Review – Carlsbad Parks  
<https://www.nrpa.org/publications-research/research-papers/agency-performance-review/>

The following in quotation marks is from the NRPA Agency Performance Review. Under each quote is how Carlsbad compares with this nationwide park data base.

“The typical park and recreation agency offers one park for every 2,323 residents served, with 10.4 acres of parkland per 1,000 residents. But park and recreation agencies are as diverse as the communities that they serve, and what works well for one agency may not be best for your agency. Therefore, park and recreation professionals need data to identify the best practices to optimally serve their community.”

Carlsbad has one park for 2,797 residents with 2.95 acres of parkland per 1,000 residents.

Carlsbad is 20% below typical in providing the number of parks, and

Carlsbad is 72% below typical in providing acres of parkland.

Carlsbad data is from 2020 US Census, Carlsbad General Plan & data from new Buena Vista Reservoir Park in NW quadrant. City also counts school playgrounds as Parks, even though these are not 100% available for park use.

The NRPA Agency Performance Review also provides finer-grained data on a City’s relative performance based on population, population per square mile (aka population density), and City Park Budget size. Carlsbad’s 2020 population of 114,746 places it in the 100,000 to 250,000 category, Carlsbad’s population per square mile of 2,792.2 places it in the ‘over 2,500’ category, and Carlsbad 2022-23 Park Budget of \$2,601,669 places it in the \$1 to \$5 million budget category. NRPA data for these categories is:

<b>“Based on</b>	<b>Lower quartile</b>	<b>median</b>	<b>upper quartile</b>
<u>Total city population:</u>			
Residents per park	2,205	3,170	5,852
Acres of park/1,000 residents	4.6	8.9	16.3”

Carlsbad is:

12% better than the median in providing the number of parks per residents

67% worse than the median in providing acres of park per resident

“Population/sq. mile (population density):

Residents per park	1,382	2,261	3,908
Acres of park/1,000 residents	3.9	7.9	14.5”

Carlsbad is:

24% worse than the median in providing the number of parks per residents

63% worse than the median in providing acres of park per resident

“City Park budget:

Residents per park	1,174	1,941	4,288
Acres of park/1,000 residents	5.1	10.6	18.3”

Carlsbad is:

44% better than the median in providing the number of parks per residents

72% worse than the median in providing acres of park per resident

It is unclear in the NRPA data if the nationwide data includes and count school playgrounds as a park, (like Carlsbad does) even though school playgrounds are NOT 100% available as parkland. The City's use of School facilities that are outside of the City Park System and City Park Budget to count as Parks may distort data comparisons.

The NRPA Agency Performance Review has no comparative data on the accessibility of Parks. The NRPA website references the Trust for Public Land's (TPL) Park Score data for Park accessibility data. The Trust for Public Land's Park Score for Carlsbad is at <https://www.tpl.org/city/carlsbad-california> . Carlsbad's TPL Park Score data indicates:

For a 10-minute walk to a Park, Carlsbad is:  
33% below the Median for the TPL's 100 ParkScore® cities:  
9% below the Median for the 14,000 cities and towns in the TPL ParkServe® database

For overall Park acreage, Carlsbad is:  
26% below the Median for the TPL's 100 ParkScore® cities:  
7% below the Median for the 14,000 cities and towns in the TPL ParkServe® database

The TPL database includes all parks within a city, including non-City parks. For instance TPL includes the State Campground as a Park; even though the Campground is a 'low-cost visitor accommodation' there is no park within the Campground. The TPL also counts restricted habitat areas within City Parks that cannot be used as parks.

The NRPA does provide information in support of park accessibility as noted in the following clips and links:

[“10-Minute Walk Campaign](https://www.nrpa.org/publications-research/evaluation-resource-hub/park-check/resources/) NRPA, The Trust for Public Land, and the Urban Land Institute have joined forces to ensure there is a great park within a 10-minute walk of every person across America. More than 220 mayors have committed to expanding equitable park access through local policy changes, master planning efforts and increased funding.” <https://www.nrpa.org/publications-research/evaluation-resource-hub/park-check/resources/>

“NRPA Park Check Principles, **Access:** Everyone deserves access to a high-quality park that is within a 10-minute walk of where they live. It is important that all members of the community, including lower-income residents, have walkable park access.” <https://www.nrpa.org/publications-research/evaluation-resource-hub/park-check/principles/>

**“Ashburn, Va. (Sept. 24, 2018)** — According to a recent [report](#) published by the [National Recreation and Park Association](#) (NRPA), the majority (85 percent) of Americans support efforts, such as the [10-Minute Walk campaign](#), to ensure every person has access to a great park within a 10-minute walk of their home. Currently, 3 in 4 Americans say they live within walking distance of a local park or other recreational facility and, on average, visit their local park and recreation facilities more than twice a month. ... A [report](#) issued by NRPA — in partnership with the Center for Regional Analysis at George Mason University — demonstrates the vast economic impact of local parks nationwide. Operations and capital spending for local parks generates more than \$154 billion in economic activity and supports more than 1.1 million jobs. This is a conservative estimate that does not capture parks' other economic benefits:

- Higher real estate values
- Health and wellness benefits
- Conservation/Resiliency benefits
- Tourism

- Economic development”

<https://www.nrpa.org/about-national-recreation-and-park-association/press-room/americans-agree-every-person-deserves-access-to-a-great-park-within-a-10-minute-walk/>

“Ashburn, Va. (Feb. 11, 2019) — As part of the [10-Minute Walk](#) campaign, which aims to address the fact that 1 in 3 Americans don’t have a park within a 10-minute walk (or half-mile) of home, the [National Recreation and Park Association](#) (NRPA), along with [The Trust for Public Land](#) (TPL) and the [Urban Land Institute](#) (ULI), has selected 10 campaign cities nationwide to receive grant funding totaling \$400,000. This funding will be used to support city planning and policy efforts that help increase access to high-quality, close-to-home parks and public green space.” <https://www.nrpa.org/about-national-recreation-and-park-association/press-room/new-grant-funding-supports-10-cities-participating-in-10-minute-walk-campaign/>

The City’s Park Master Plan (pages 86-xx) maps Park Service Areas and areas Unserved by City Parks. Following is a compilation the City parkland and the City areas Served (circled) and Unserved (outside the circles) by City Parks. This data was compiled and submitted to City in a ‘Coastal Recreation data file’ on 1/29/20 by People for Ponto Carlsbad Citizens, along with submitting over 5,000 petitions regarding many comparative shortfalls in City Parkland:

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

**Subject:** Re: Poinsettia Park

Hi Joanne,

Thanks so much for your response.

I would encourage you to take a look at what Encinitas has done in regards to underutilized tennis courts. Essentially they have striped all of their tennis courts so that they can be utilized as pickleball courts as well.

At Cottonwood Creek Park, for example, there were originally two tennis courts, neither of which were very well used. They striped both tennis courts so that they can be used for pickleball - making four pickleball courts. Portable nets are available.

Tennis court #1 has priority for tennis. So if tennis players show up, they have priority at all times. Court #2 has priority for pickleball. Each court has a max 1 hour playing time if people are waiting.

I have used these courts several times over the past week. In two instances, both courts were used for pickleball. In one instance, court 1 was used for tennis; court 2 for pickleball.

I appreciate that you are updating your master plan, but any new courts will take forever to implement; that's just how the government process works. You have 12 tennis courts that could be better utilized right now.

I would assume that one of the goals of Parks is to get people moving. There are plenty of people just waiting around for pickleball courts every day. Utilizing the tennis courts will get those people moving.

Desiree Gibson

On Thu, Jun 30, 2022 at 10:14 AM Joanne McGhee <[Joanne.McGhee@carlsbadca.gov](mailto:Joanne.McGhee@carlsbadca.gov)> wrote:

Hello Ms. Gibson,

Thank you for sharing your concerns about the number of pickleball courts at Poinsettia Community Park. With the sport's popularity and growth over the past several years, there's been a growing demand for pickleball courts, and the pickleball courts at Poinsettia Park were built in response to community input such as yours.

There is also a steady and continuing demand for tennis courts, and the city strives to meet that need as well.

I will ask a park ranger to look into people holding private tennis lessons on the courts, which is against the rules. You may also report violations you witness to the Carlsbad Police Department's non-emergency number, at 760-931-2197. This is helpful because police keep track of service calls and will be able to use that information to determine when ongoing violations occur.

As for the sign posted on the tennis courts that say "No Pickleball," those signs were placed at the courts in response to a growing number of pickleball players who had been using the tennis courts when tennis players were waiting to use them, so the tennis players were not being able to play on the designated tennis courts.

The Parks & Recreation Department constantly assesses these sort of needs to try to appropriately balance the interests of all patrons. We have begun the process of updating the department's master plan, the planning document for Poinsettia Park and all of the city's parks and recreation programs. If you have a moment, we would appreciate your input on the master plan. It is a chance for you to share your priorities, and your input, and that of other community members, will help city staff and the city's consultant determine and address the future needs for pickleball and other recreational activities.

Here's a link to Parks & Recreation Department Master Plan Update [website](#). You can scroll down the page to the public input section to leave your feedback. We expect to have a draft master plan in late fall. There will be additional opportunities for you to provide feedback then, and also when we present the final draft to the City Council in early 2023.

Sincerely,

Joanne McGhee MS C.P.R.P

Recreation Area Manager

City of Carlsbad, Parks and Recreation Dept.

**Subject:** Why a Ponto Coastal Park is needed - another picture and words

Dear Carlsbad Council, Carlsbad Parks and Planning Commission, Carlsbad Tomorrow Growth Management Committee, and CA Coastal Commission and CA State Parks:

We ask you to please consider these emails and image, and request this be distributed/documentated as public input to the Carlsbad LCP Amendment, Park Master Plan Update, and Growth Management Program Update. Sitting at a stoplight years ago I saw this image of Cannon Park and prompted the email below to Kyle, our City Parks Director, to consider the real human impacts of not providing needed parks to children and their families.

The email and image illustrate that city planning, parks, and government is not just about numerically counting and balancing the ledger – Ponto’s and SW & SE park deficits/needs are met by distant acres in NW Veterans Park (6-miles away). City planning, parks and government is about people. How we as Citizens in serving on the Growth Management Committee, Parks and Planning Commissions, and in electing our Council Representatives to create a city and environment that fosters our Citizens and their families growth and goodness is important human consideration, not just an accounting function.

Past flawed city growth management decisions (missing 30-acers of Useable Open Space at Ponto, and no provision for any City Parks at Ponto or all Coastal South Carlsbad) occurred at Ponto. Ponto has the last significant vacant land to correct those past flaws. Purchasing vacant Ponto land provides more benefits/value and saves Carlsbad tax-payers millions compared to trying to make useable some constrained thin strips of PCH median. We hope you correct the past Ponto Growth Management Planning flaws regarding Useable Open Space & Parks and the past failures to achieve the stated goals of Growth Management & our Carlsbad Community Vision.

Thank you,  
Lance Schulte  
34-year Carlsbad Citizen & former Carlsbad city planner

**Subject:** Why a Ponto Coastal Park is needed

Kyle:

I know you said you are the Park guy. I saw this today driving on PCH past Cannon Park (the north end of 6-mile Coastal {west of I-5/rail corridor} Park gap centered around Ponto). The image kind of exemplifies what our Ponto citizens have been saying since 2017 when we first learned about the existing LCP requirement for the City to disclose to citizens about the requirement to Consider and Document the Need for a Ponto Park. The City is now starting to acknowledge (through CCC efforts) that the City failed to disclose and follow the LCP for over the past 10+ years. But the City built their proposed Ponto plan on this flawed foundation of non-disclosure and failure to invite the San Pacifico/Ponto/South Carlsbad citizens most effected to have a voice on their Park needs. Our kids at Ponto don't have a grassy Park to play in they can safely walk/bike to. Ponto and other west of I-5 kids have to have their parents drive them to Poinsettia or to Encinitas to play like this. They play in the street instead.

Ponto and other Citizens have spoken thousands of words to the City Staff and Council to try to convey some simple points on the need for a Ponto Coastal Park. Maybe this image is worth a thousand of those words. It is sad and detrimental to look at parks (and how they serve or citizens) like a cold accountant looks at counting dollars - we meet our bare-bones minimum 3-acres per 1,000 so check that box – and without caring about how that acreage is equitably dispersed and accessible to citizens and their Kids. How that lack of Park access hurts our kids well beyond their childhood is never accounted for. I hope you have the ability to understand this, and compassion and courage to help.

Lance

**Subject:** Americans Agree: Every Person Deserves Access to a Great Park Within a 10-Minute Walk | National Recreation and Park Association

Dear Carlsbad Council, Carlsbad Tomorrow Growth Management Committee, Carlsbad Parks and Planning Commission, and CA Coastal Commission and CA State Parks:

Happy 4<sup>th</sup> of July. As we celebrate our nation's founding and principles of fair and true representative government, many of us in our parks it seemed appropriate to provide the City Council, Citizens Carlsbad Tomorrow Growth Management Committee, Parks and Planning Commission, and CA Coastal Commission with the attached link. Please provide this email and linked report as public input to Carlsbad's Proposed Local Coastal Program Amendment, Growth Management Update meeting Aug 25<sup>th</sup>, Parks Master Plan Update.

Americans Agree: Every Person Deserves Access to a Great Park Within a 10-Minute Walk | National Recreation and Park Association - <https://www.nrpa.org/about-national-recreation-and-park-association/press-room/americans-agree-every-person-deserves-access-to-a-great-park-within-a-10-minute-walk/>

This link represents what People for Ponto Carlsbad (and other County) Citizens and visitors have been telling the Carlsbad Council, staff and CA Coastal Commission since 2017 – Carlsbad needs a true Ponto Park for Ponto neighborhood needs, Inland South Carlsbad needs for a true and meaningful Coastal Park (they have none), to correct a 6-mile regional Coastal Park gap centered around Ponto, for inland resident and visitor needs for a true Coastal Park.

People for Ponto Carlsbad Citizens have tried to convince our City Council about the sustaining benefit Ponto Park will provide, and it the link echoes that. There is urgent-once-in-a-lifetime opportunity to define our Growth Management future and make the needed purchase of Ponto Park.

We hope you read the attached link and you act as true representatives of citizen desires and provide the much needed Ponto Park.

Sincerely,  
Lance Schulte

Hello. Thank you for this opportunity to have some input. I am a certified tennis professional with the USPTA and a pickleball professional with the IPTPA. So these remarks carry some experience. Tennis, while still popular, is not nearly as popular at this time as pickleball. For the short-term, I would recommend converting the two tennis courts nearest the Poinsettia Park pickleball courts to pickleball. Four pickleball courts could fit without much modification. Resurfacing of the courts with pickleball lines and 4 portable nets could be used. Alternatively, with more work, permanent nets could be installed. In the future, a larger pickleball center could be built at a different site. That I would recommend to be a managed club with a fee for court usage. Then, the converted tennis to pickleball courts at Poinsettia could be converted back to tennis, if there was demand. Lastly, I would recommend a company be hired to run a professional tennis program at the Poinsettia Park tennis courts. Right now, there is an uncertified person giving City sanctioned lessons. Plus, there are a few "other" people giving lessons on the courts, probably illegally. A managed club would have leagues, kids lessons, progressions to help students improve up to tournament level, ADA clinics, and of course private instruction. Good luck with your projects. Carlsbad is a wonderful city and a joy as a resident!

**Subject:** citizen input for Carlsbad Tomorrow Growth Management Committee (et. al.) regarding Parks - Park land dedication requirements for developers - an example of Ponto Site 18

Dear Carlsbad City Council, Carlsbad Tomorrow Growth Management Committee, Carlsbad Park and Planning Commissions, and CA Coastal Commission:

This email is a follow-up to the July 7<sup>th</sup> email below, and only in regards to item #2 that deals with Park land dedication rules of 20.44 of the Carlsbad Municipal Code. Please include this email as public input to the Carlsbad Tomorrow Growth Management Committee (CTGMC), Parks Master Plan Update, Local Coastal Program Amendment, and Ponto Site 18 development file. Sorry for the length of this email, due to documentation to counter staff's incomplete information.

#### Role of Carlsbad Ordinance 20.44 - DEDICATION OF LAND FOR RECREATIONAL FACILITIES

The primary 20.44 requirement for developers to (at no cost to the City) provide land to the City to meet the development's demand for more City park acres, and the specific Park demand/supply situation at Ponto that clearly justifies the City Council pursuant to Council's (not staff's) authority under 20.44 to 1) require development to provide (dedicate without cost to the City) land for City Park that is sufficient to meet that development's park land demand (in the example of Ponto Site 18 that land area is 0.6118 acres), and 2) that pursuant to Council authority in 20.44, it is fiscally prudent and much better for the City and Citizens of Carlsbad to accept 'free' land v. receive a "park land in-lieu-fee" that only provides for 27% of the required land area called out in 20.44 and is thus ultimately results in a tax-payer subsidy of development. Tax-payer subsidy of development is also counter to the purpose of the City's Growth Management Program.

#### Staff misrepresentation of Citizen input

Some staff misrepresented my and other Carlsbad Citizens when staff said their Thursday, July 7, 2022 4:05 PM below: "The comment (citizen's 7/4/2022 8:33am email) claims that there is a requirement for the city to build a park in the southwest quadrant." What we said in our Mon 7/4/2022 8:33 AM emails was:

"2. Ponto needs a 6-7 acre Neighborhood Park to serve Neighborhood needs based on the current Ponto population & City's minimal Parkland Standard of 3 acre per 1,000 population. The SW Quadrant needs a new 6-7 acre City Park to make up for the Park acreage Deficit in the SW Quadrant since 2012. South Carlsbad (62% of the Carlsbad's population) needs a significant Coastal Park, as there is no City Park west of I-5 in South Carlsbad. Ponto is at the center of a 6-mile Regional Coastal Park gap. Ponto is the last remaining vacant land that can provide a true Park. Carlsbad's Park Master Plan maps Ponto as an 'area unserved by parks, and an area that the City should provide new parks'.

Since 2017 Carlsbad citizens have sent over 5,000 petitions to the City and CA Coastal Commissions regarding the need for a Neighborhood Ponto Park, and larger Coastal Park for South Carlsbad's (and region's) inland population. Citizens also called out flaws in the City's Ponto planning that failed to and consider and document these Park needs (and the need for "Low-cost Visitor Accommodation" land use). Citizens shared these citizen concerns and data to Fenton. Citizens asked Fenton to provide their required City Park land dedication in actual Park Land at Ponto. Carlsbad's park land dedication ordinance is CMC 20.44. Fenton and People for Ponto Citizens have indicated they would like together [meet] with the City to define how Fenton can provide Fenton's fair-share of actual Ponto Park land. Fenton's fair-share would be about .7 acre of Parkland. Fenton is trying to set a meeting with the City to do that."

We Citizens are saying we NEED a Ponto Park adequate for local Ponto Citizen needs, AND also a park adequate to serve the Coastal Park needs for All South Carlsbad (inland citizens) and address a regional 6-mile long Coastal Park gap centered around Ponto. Sadly, current City 'requirements' fail to recognize these NEEDS. The CTMC is charged with addressing these NEEDS and suggesting changes to City 'requirements'.

As a citizen, I am troubled by the some City Staff not being able to read what is being sent to them. Most troubling is some staff misrepresentations to Citizens serving as the City Council, City Commissions and Citizens Committees on what your fellow Carlsbad Citizens are communicating to you. It seems from a Citizen perspective that some staff are biased against citizens and citizen input that maybe contrary to what some staff want to do. As Citizens elected and appointed officials charged with directing, recommending, questioning, and overseeing City Policy and staff we hope you assure your processes, and City Staff serving you, provide an honest and truthful consideration of fellow Citizens' input.

#### Staff misrepresentation of Growth Management Program and Ordinance

Also of critical Citizen concern is that some City Staff are fundamentally misrepresenting what Carlsbad's Growth Management fundamentally is - setting MINIMUM required public facilities thresholds (aka MINIMUM Performance standards) below which development will be halted. All of Carlsbad's Growth Management resolves around this fundamental Principle - the GM Performance Standards are ONLY MINIMUMS that define when development must stop until that public facility is raised ABOVE the MINIMUM Performance Standard. Some City Staff are inaccurately presenting GM Performance Standards as the Ultimate, Final or Maximum desired level of a public facility to define Carlsbad's Quality of Life. Any facility above the MINIMUM Performance Standard is simply above the 'failure level' where development stops until we are above the Performance Standard threshold. Some of City Staff's misrepresentation of Performance Standards is very serious, and needs firm correcting. Reading the ballots establishing Growth Management and the City's own FY 2019-20 Growth Management Plan Monitoring Report confirms that: ""FAILURE TO MEET PRERFORMANCE STANDARD: The Growth Management Plan requires development activity to stop if a performance standard is not being met." The Growth Management Performance Standard line is a 'failure line', not a Maximum or Average level of Quality of Life we all voted for and aspire to. Some City Staff sadly thing that anything above failure (an F-grade defined by the GM Performance Standard) is success and deserves an A-grade.

The Growth Management Plan or City Growth Management Ordinance 21.90 does not restrict the City Council in any way from providing Public Facilities ABOVE the Growth Management (Minimum) Performance Standard: ""21.90.140 Obligation to pay fees or install improvements required by any other law. - **Nothing in this chapter [Growth Management Ordinance 21.90 and the Plans it is based on] shall be construed as relieving a builder, developer or subdivider from any public improvement requirement, dedication requirement** or fee requirement which is imposed pursuant to **Titles 13, 18, 20 or 21** of this code or pursuant to any city council policy. (Ord. 9808 § 1, 1986)"

This portion of Carlsbad law is supported by multiple City Council actions to exceed the MINIMUM Performance Standards, such as the 'oversupply' (relative to the MINIMUM Park Standard) of City Parks in the NW Quadrant. The Growth Management Plan plans for the NW Quadrant to have far more Park acreage than required by the MINIMUM (you have been provided this data in the Coastal Recreation data file). The SW and SE (and to a lesser extent the NE) Quadrants are failing to meet the MINIMUM, but the City uses an 'accounting trick' to say that Parks that are in the NW Quadrant are 'on-paper' in the SW, SE, NE Quadrant so a permanent future "Park failure" in the SW and SE Quadrants are covered up in accounting. But the reality on-the-ground for Citizens and their children is the reality – permanent

Park actual acreage/access failure in the SW & SE Quadrants. The City's 'accounting trick' thus CREATES AN ACTUAL PREFORMANCE STANDARD FAILIURE in the SW & SE Quadrants that Citizens and their families actually experience. You have seen the pictures of families having to play in streets, railroad right-of-way, and trespass on other vacant Ponto land to use as a Park; and been provided the 5,000+ emails as testament to these facts.

The fact is that the SW, SE and NE Quadrants do not have their MINIMUM required Park acreage Performance Standard actually within their Quadrants. The City used an 'accounting trick' to cover the that do not their bare MINIMUM of Park acres.

City Council regularly directs actions and funds to Oversupply (exceed) the Minimum Performance Standard for most all Growth Management public facilities

The Council recently acted to increase this 'oversupply' of Park land in NW Quadrant with the new Buena Vista Reservoir Park. This Park was NEVER in the Growth Management Plan nor was it REQUIRED to meet a MINIMUM Performance Standard. Sadly (for South Carlsbad Citizens) SW Carlsbad (that has had a 6.5 acre MINIMUM Park Deficit since 2015) has had to absorb more development and that SW Quad development paid for the NW Quadrant Buena Vista Reservoir Park via "Poinsettia 61". The City Council has also increased public facilities beyond the MINIMUM Performance Standard on multiple other occasion such as the recent Fire Service investments beyond the Performance Standard, and all over the City with City Administrative Facilities, Water, sewer, most Streets, and other public facilities in the City that are being provided Over and Above the MINIMUM Performance Standards (failure/no further development threshold) established for those facilities.

Carlsbad Citizens, in over 5,000 petitions and overwhelming input at numerous public meetings, clearly is documenting the NEED for the City Council to do (and direct Staff to do) what Carlsbad has done before:

- provide for Park acreages and Parks at Ponto and SW Quad that are above the Minimum Performance Standard (failure threshold),
- properly address the current 6-7 acre Park Deficit that has existed in the SW Quadrant since 2012 with a park WITHIIN the SW Quadrant,
- Properly address Carlsbad Citizens overwhelming desire for a True Ponto Park,
- Get rid of accounting tricks that falsely say that Parks actually in the NW Quadrant are 'considered to be in the SW, SE, and NE Quadrants'
- Require developers to provide their fair-share of actual Park Land per 20.44. Do this at Ponto! Park land is needed AT Ponto.
- Listen to Citizens, don't fight and try to crush Citizens' input and requests for you to address critical Quality of Life issues

City Council (not City Staff) Authority under Carlsbad Ordinance 20.44 - DEDICATION OF LAND FOR RECREATIONAL FACILITIES

As noted in my Thursday, July 7, 2022 5:17 PM email below, some City staff are also misdirecting issues and incomplete in their assessment on the City's Dedication of Land for Recreational Facilities Ordinance 20.44, and in what appear to be some staff trying to assume and take over the City Council's authority to make Park decisions under 20.44. Following is CMC 22.44.060 that clearly spells out the City Authority responsible for determining if Park land dedication or a "fee-in-lieu" is used. In the case of if only a SDP and CDP applications are needed for Ponto Site 18 development that 'decision making authority' would be Carlsbad Planning Commission, or if/when appealed to the City Council, the City Council.

20.44.060 Determination of land or fee.

A. **Whether the decision-making authority for the tentative map or tentative parcel map requires land dedication or elects to accept payment of a fee in lieu thereof, or a combination of both, shall be determined by the decision-making authority at the time of approval of the tentative map or tentative parcel map.** In making that determination, **the decision-making authority shall consider** the following:

- 1 Park and recreation element of the general plan;
- 2 Topography, geology, access and location of land in the subdivision available for dedication;
- 3 Size and shape of the subdivision and land available for dedication;
- 4 The feasibility of dedication;

- 5 Availability of previously acquired park property.
- B. The determination of the city council as to whether land shall be dedicated, or whether a fee shall be charged, or a combination thereof, shall be final and conclusive. (Ord. CS-192 § 49, 2012; Ord. 9614 § 1, 1982; Ord. 9190 § 6)

20.44.060 requires (shall) “consideration” of factors, but Council has discretion on how it ‘considers’ factors. “Consideration” is by definition a respectful, thoughtful, reflection and deliberation of issues. “Consideration” is NOT a straight-jacket. The City Council has already provided critical Policy direction to Staff to form the Carlsbad Tomorrow Growth Management Committee because according to the City’s website “the city is entering a new phase **where different tools will be needed to effectively manage growth.**” And that “**The city is now in the beginning stages of creating a new approach to managing growth in Carlsbad, starting with a citizens committee.**” So the decision whether to do what Park land dedication ordinances are intended to do receive land dedicated to the City by developers to offset that developer’s impact on Parks is solely the City Councils, and the City Council has started a processes to create new Park Standards and requirements. The CTGMC is charged with considering past and future Park Standards and Park Growth Management standards. The Ordinance allows the City Council to consider this and past information at the time the entire development application comes before the Council for approval, denial, or conditioning.

An example Carlsbad Ordinance 20.44 - DEDICATION OF LAND FOR RECREATIONAL FACILITIES using as example the Fenton Ponto Site 18 development proposal:

Fenton recently purchased most of Ponto Site 18. They are proposing to develop most (4.64 acres), but not all their land. Fenton wants to reserve some (about 1 acre) of their Ponto Site 18 vacant land for future development. Fenton has land resources to provide actual Land as the DEDICATION OF LAND FOR RECREATIONAL FACILITIES per 20.44.

Dedication of Land for Recreational Facilities calculation:

86 (DU of Fenton proposed development) X 2.64 (Carlsbad’s average population per DU per 2020 US Census) = 227 (population of Fenton project)

227 ÷ 1,000 (population that needs a minimum of 3 acres of Park land per CMC 20.44) = 0.22704 (the percentage of the 3 acres of Park land minimally required for 227 people)

0.22704 X 3 acres (minimally required Park land per 1,000 people) = **0.68112 acres of Park land is minimally required for Fenton's proposed 86 home based on City's minimum requirement**

Fenton recent land purchase cost is about \$2.178 million per acre. So Fenton’s 0.68112 acre minimum park site requirement’s land cost is \$1.484 million. However, the City’s “Park in-lieu-fee” for Fenton’s proposal is only \$4,636 per home or \$398,696. **So the City’s Park in-lieu-fee only covers 27% of the Park land value the City would receive if the City accepted land under 20.44.**

Cost of City failure to acquire ‘free Park land’ from developers, ‘in-lieu fees loose significant value adding to tax-payer liabilities, and failure to get free park Land dedication loses critically important opportunities to provided needed park:

The Fenton example shows that getting for free land is a much better deal for the City and Citizens. It seems fiscally irresponsible for the City Council not to acquire Free park land per 20.44. The City would be losing \$1.085 million per acre by accepting “Park in-lieu-fees” that are inadequate to pay for the cost of park land that the City would otherwise be provided free by a developers in their Park land dedication. **The City’s “Park in-lieu-fee” is basically a developer/development subsidy by the City and the City’s tax-payers.** This subsidy will ultimately be paid by Carlsbad tax-payers. This is one reason that developers love to pay ‘in-lieu-fees” as these fees never cover the developer’s full cost to mitigate their development’s impact on and obligations to a community/City. This subsidy dynamic of “in-lieu-fees” is well known but, cities tend to hide this information from citizens. Recall the history of Affordable Housing in-lieu-fees and update a while back. Per 20.44.08 the Park in-lieu-fee” is supposed to cover the fair-market value to buy the land that would otherwise be dedicated (for free) to the City. As shown above the City’s current Park-in-lieu-fee is not doing that:

20.44.080 Amount of fee in lieu of land dedication.

- A. **When a fee is required to be paid in lieu of land dedication, the amount of the fee shall be based upon the fair market value of the amount of land which would otherwise be required to be dedicated pursuant to Section 20.44.040.** The fair market value shall be determined by the city council using the following method:
- 1 The city manager may from time to time survey the market value of undeveloped property within the city. This survey may be prepared through various means including, but not limited to, selection of several real estate professionals within Carlsbad to provide current estimates of undeveloped property values with each of the city's four quadrants.
  - 2 The council shall adopt a resolution establishing the value of one acre of park land in each quadrant after considering the results of this survey and any other relevant information.
- B. Subdividers objecting to such valuation, may, at their own expense, obtain an appraisal of the property by a qualified real estate appraiser approved by the city, which appraisal may be accepted by the city council if found to be reasonable. If accepted, the fee shall be based on that appraisal. (Ord. NS-120 § 1, 1990; Ord. 9831 § 1, 1987; Ord. 9781 § 1, 1985; Ord. 9614 § 1, 1982; Ord. 9190 § 8)

**A critical consideration for Carlsbad is that we are rapidly running out 'relatively cheaper' vacant land like at Ponto, and the City is better off getting developers to provide actual park land, or if an "in-lieu-fee" is paid that fee should accurately represent 100% of the actual cost to buy the acreage of park land within a 10-minute walk of that development.** The City should not subsidize development and make parks inaccessible and outside of the 10-minute walk to the developments generating the need for park land. **These facts/issues should be consider by the CTGMC in formulating recommendations to City Council on Growth Management and Park land dedication.**

I am using the Fenton proposal as an example of Park Standard issues and the shortcomings of Carlsbad's current Park standards the CTGMC is charged with studying and making update recommendations to the Council. People for Ponto Carlsbad Citizens are trying to collaboratively work with Fenton to get park land at Ponto dedicated. This initial Park land dedication can be the beginnings of a much needed and larger Ponto Park to address the acute park needs at Ponto and in Coastal South Carlsbad that are documented by the City, Carlsbad Citizens, and many others. Fenton has graciously offered to try to set a meeting between People for Ponto Citizens-City-Fenton to see how Fenton's Ponto park land dedication requirements can be met in Ponto. We are hopeful Fenton will provide a 0.68112 acre Park site as the 'down payment' for a much needed larger Ponto Park. We are hopeful the City Council will direct City Staff to work with Carlsbad Citizens to effect this.

Thank you for your consideration. Please know P4P citizens truly care and love Carlsbad and want to leave a better Carlsbad to future generation. P4P citizens have a lot of successful and creative expertise and can help the City in these issues.

Sincerely and with Aloha Aina,  
Lance Schulte

**Subject:** RE: CITY RESPONSE RE: EMAIL DATED JULY 4, 2022 - public input on CDP 2022-0023 & SDP 2022-0003 - Ponto Site 18 - 4 major issues - CCC needs to be contacted

Jason, City Council, and Carlsbad Tomorrow Growth Management Committee:

Thanks-

~~Regarding #1: Thank you. Is it possible to receive a copy of the CCC's response to your communication?~~

Regarding #2: Your reading of 20.44, is incomplete. It also seems you are also incorrectly speaking 'as the City Council' on what is a City Council decision based on 20.44 and that has yet to be rendered by the Council regarding this development proposal. 20.44 does NOT explicitly disallow Dedication of Ponto land for a needed Ponto Park from and for a Ponto development. Not acquiring Park land or not using park land "in-lieu-fees" at Ponto to provide a Park at Ponto for a Ponto development is further removed from the intent and purpose of the Park land dedication ordinance.

What is the City Council's and City staff's intent to use Park land dedication 'In-lieu-fees' for to serve the Park needs of this Ponto development? There is a 6.5+ acre Park deficit in the SW Quadrant. Where will the Park for this Ponto development be provided - 6-miles away in the NW Quadrant's Veterans Park?

If you read 20.44 how the Council chooses to require park land dedication or accept a Park land dedication 'In-lieu-fee' is a City Council policy decision that is made when the project is being heard for consideration. Your 20.44 citation even supports the dedication of park land at Ponto by the proposed development as such a land dedication would be the best way to "... shall bear a reasonable relationship to the use of the park and recreational facilities by the future inhabitants of the subdivision." As clearly documented in the City Park Master Plan, Ponto is an area of the City 'unserved by Parks' and an 'area the City should look to provide new Parks'. Again, per 20.44 it is The City Council's policy decision/direction as to if the City wants park land dedicated at Ponto for Ponto development or it wants to receive a park land dedication 'in-lieu-fee'. The City Council should make that policy decision/directive to staff if it wants park land or equivalent park land 'in-lieu-fees'.

Also, the City is formally in the process of re-evaluating the Growth Management Parks Standard. Citation of past GM Park Standard compliance reports to City Council when the City Council has already provided direction to staff and acknowledged such Standards should be studied and potentially updated or replaced should have been acknowledged, and is a critical aspect of information City Council should consider as part of a 20.44 Council determination of whether to require Park land at Ponto for Ponto Park impacts or accept a park land 'in-lieu-fee' for Ponto Park impacts. This issues seems appropriate for the Citizens Carlsbad Tomorrow Growth Management Committee to provide input to the City Council on.

~~Regarding #4: What will be the City's response and responsibilities if/when parking impacts spill on to City Streets and Public beach parking (from inadequate City parking requirements)?~~

**Subject:** CITY RESPONSE RE: EMAIL DATED JULY 4, 2022 - public input on CDP 2022-0023 & SDP 2022-0003 - Ponto Site 18 - 4 major issues - CCC needs to be contacted

Dear Mr. Schulte,

Thank you for the email comments on the project known as FPC Residential (SDP 2022-0003/CDP 2022-0023). The following is the City's response to the email comments received on July 4, 2022 (attached):

City's Response to Comment No. 1:

The comment claims that the project should be required to apply for various amendments to the city's land use documents. However, the applicant is proposing a development project that is consistent with the current land use designations for the property; therefore, amendments to the General Plan, Zoning and Local Coastal Program Land Use and Zoning designations are not included. As previously noted, the property is currently designated a combination of VC

(Visitor Serving Commercial) and R-23 (19 to 23 dwelling units per acre). The comment implies that the current project requires written confirmation from the Coastal Commission to process consistent with these designations. The city disagrees. The city's review of current policies indicates that the combo districts in Ponto can be built as one or the other land use or as a combination of both with the area of each land use delineated on the land use map (typically determined at the time of a development proposal).

Additionally, the hotel north of the subject Ponto combo district is on parcels that were also previously a combination district; however, the parcels were built entirely with visitor serving uses (parcels redesignated VC during GP update but were previously TR/RMH).

Development of the property is subject to the city's review and approval. The city has authority to issue Coastal Development Permits (CDPs) in this area, and therefore, Coastal Commission approval of the project is not required. In addition, the property is not within the Coastal Commission's appeal jurisdiction and the city's approval of a CDP on the property is not appealable to the Coastal Commission. This information has been shared with Coastal Commission staff.

City's Response to Comment No. 2:

The comment claims that there is a requirement for the city to build a park in the southwest quadrant. There is not a requirement for construction of a park in this area. As reported in the city's latest Growth Management Plan (GMP) Annual Report and further detailed to the City Council on January 26, 2021, and July 13, 2021, the city is in compliance with the GMP's performance standards for open space and parks and there is not a requirement to purchase additional park land in the southwest quadrant. We acknowledge the conversations with the citizens and developer relating to applying park fees for park space in this area. However, Carlsbad Municipal Code § 20.44.090 governs the use of the collected fee and states *the land and fees received under this chapter shall be used for the purpose of developing new or rehabilitating existing park and recreational facilities which serve the population within the park quadrant within which the subdivision for which the fees are received is located and the location of the land and amount of fees shall bear a reasonable relationship to the use of the park and recreational facilities by the future inhabitants of the subdivision.* (Ord. NS-842 § 1, 2007; Ord. 9680 § 12, 1983; Ord. 9190 § 11). As currently written, the code does not explicitly allow for park fees to be dedicated to a specific park or area within the quadrant.

<https://records.carlsbadca.gov/WebLink/DocView.aspx?id=5432896&dbid=0&repo=CityofCarlsbad&searchid=8e946f0a-1e58-462f-98f5-11d939f53b36>

City's Response to Comment No. 3:

Comment highlights the existence of the SoCal Gas natural gas easement. This is acknowledged. Staff is aware of the SoCal Gas natural gas easement and pipeline running north-south through the subject site as well as along the west side of the railroad right-of-way, which is also located directly adjacent to other residential land uses throughout the city. The applicant was notified in the first review of the project application as to the gas line's presence and is presently working with SoCal Gas and the city to provide proper setbacks to ensure that the public's health and safety is maintained.

City's Response to Comment No. 4:

Regarding concerns with parking adequacy, the city's municipal code section covering parking ratios associated with multiple-family residential dwellings (apartments only) and required visitor parking is outlined in § 21.44.020.B.Table A. This section of the municipal code is used throughout the city, including the coastal zone pursuant to our local coastal plan, for required parking associated with apartments and visitor parking needs. While the applicant can voluntarily add additional parking stalls, the city cannot legally require more parking spaces than what current code requires.

Thank you,

Jason Goff

**Subject:** Public input to 1-mile PCH Relocation Proposal - FW: public input to 7-5-22 Traffic Committee meeting - South Carlsbad Boulevard Climate Adaptation Project

Dear Carlsbad City Council, Traffic, Parks, Planning Commission; Carlsbad Tomorrow Growth Management Committee; & CA Coastal Commission:

I was unable to attend July 5<sup>th</sup> meeting. However today I had time to watch the July 5<sup>th</sup> Traffic Committee meeting but did not see the issues noted in the July 4<sup>th</sup> email and attachment noted. I am not sure if the July 4<sup>th</sup> input (attached and below) was considered, but was encouraged by the Traffic Commission's call for data, comprehensiveness, congestion considerations; and logical and principled desire to make 'data driven decisions'.

The Traffic Commission's concerns reflected some of the attached and below concerns. Of key concern is rushing in asking for 'incremental' decisions on what is to be a critical MM (vehicle, bike, ped, Transit vehicle, and emergency vehicle) Traffic corridor without a verified Multi-modal Traffic LOS (vehicle, bike, ped, Transit vehicle, and emergency vehicle) data that not only covers the 'pre-Covid' condition, but addresses also addresses the "Forever/Final/Buildout MM Traffic Volumes" that any major reconfiguration of PCH will have to perform within.

I can appreciate and sympathize with staff in their rush, but potentially tragically, in that rush (solely driven by timing of a grant and grant funds) to be forcing Citizen Commissions to make disconnected decisions without critical data and a comprehensive perspective on such an important issue seems both unfair and "penny wise and pound foolish", "putting the cart before the horse", "jumping before looking" or any other common sense truth about rushed uninformed actions. In retrospect maybe planning a Joint Commission meeting on this issue after all the critical data was compiled may have been a better processing approach.

To the July 4<sup>th</sup> email/attachments of issues and data I hoped the City's Commissions and City Council would have considered on July 5<sup>th</sup> etc. I add the following:

1. Study keeping existing PAR/PCH design (free flowing) and simply move SB PCH lane (and bike/ped improvements) inland before "turnarounds" to merge with the PAR to SB PCH lane to a 4-lane PCH at So Lamar (option 2 design - south of So Lamar). I think this was what one Traffic Commissioner was suggesting.
2. The Staff report used traffic volumes for a location about 2-miles away (PCH/Avenida Encinas) v. using traffic counts for PCH/Cannon Road & Terramar that is a lot closer, is directly impacted by any induced congestion from NB PCH Traffic entering Terramar and the PPCH/Cannon intersection and by possible congestion backups into Terramar and the PCH/Cannon intersection from removing the current SB free flow of traffic until you reach Solamar. Terramar congestion is bad and potentially congesting 1-mile of PCH directly south of congested Terramar seems will make Terramar congestion worse and likely extend congestion further south (possibly to

Island Way). Terramar also represents how pedestrian traffic across PCH impacts PCH non-pedestrian congestion.

3. Taking MM Traffic counts (vehicle-bike-ped-transit-emergency vehicle) at Carlsbad's current 3-way & 1-lane PCH/State Street Traffic roundabout would give an 'on-the-ground' model on which to test the same type of roundabouts in the two roundabout based alternatives and then MM Traffic Model the future/final/buildout growth in all MM volumes on such 3-way 1-lane roundabouts. Any major PCH redesign/relocation will be a permanent/final/forever decision so making 100% sure we know how it will work in the future is critical.
4. Conduct a documented MM (vehicle-bike-ped-transit-emergency vehicle) Traffic LOS analysis of 3-way 1-lane PCH/State Street Roundabout for existing, pre-Covid, and future/final/buildout growth in volumes, so we have an understanding of how present MM LOS differs from Pre-Covid and future/final/buildout growth MM LOS.
5. Calibrate the above MM LOS models to a) the current MM Traffic Counts at the 1-mile PAR/PCH volumes and then adjust for both b) Pre-Covid volumes and also to c) projected final/Forever Carlsbad MM Traffic volumes based on 2015 General Plan and updated projections used to define Carlsbad's 'buildout MM Traffic Volumes' at and along PAR and PCH for the 1-mile PAR/PCH segment; and how it impacts the current, pre-Covid and future/final/buildout growth MM LOS at Terramar.
6. Provide a clear understanding of how Transit services will be impacted by delay, congestion and removing a NB and SB passing-lane in the 2-lane (50%) reduced proposals. Confirmation from the NCTD as to the Transit Service impacts should be provided to the public and City decision makers.
7. Provide a clear understanding of how Emergency vehicles, response times and services will be impacted by delay, congestion and removing a NB and SB passing-lanes in the 2-lane (50%) reduced proposals. Emergency vehicles will not be able to pass congested traffic, which seems like a significant impact in an area the City is spending millions in capital and forever operational and pension costs to provide another fire station along PCH for the current 4-lane (with passing lanes) condition. Will the proposed PCH reconfigurations force the City to have to provide another fire station along PCH due to potential increases in congestion and inability to pass congestion during emergencies? City decision makers should have that data so they can make data driven decisions relative to emergency services.

I hope this email and attachment are provided to you and that you honestly and sincerely consider it.

I am not against a possible 2-lane PCH if it Performs Better both now and forever into the future. The concerns are that we do not yet have the data to judge if the limited options (or other viable options) Perform Better and will be Perform Better forever for Carlsbad. We also seem to be shortchanging (or glossing over) significant citizen and stakeholder concerns/issues in the incremental rush.

Thank you for your thoughtful consideration.  
Lance Schulte

**Subject:** public input to 7-5-22 Traffic Committee meeting - South Carlsbad Boulevard Climate Adaptation Project

Dear Carlsbad Traffic Commission:

We hope you had a wonderful 4<sup>th</sup> of July, and ask you please sincerely consider the attached questions/comments regarding on 7-5-22 and on other meetings regarding the South Carlsbad Boulevard Climate Adaptation Project.

I travel PCH often from South to North Carlsbad – car, bike and walk. It is my main travel and exercise corridor. The congestion at Terramar as 4-lanes are compressed into 2-lanes is kind of a nightmare at times and will get more traffic from continued growth. Proposing to permanently and irreversibly doubling that nightmare and congestion with some of the designs needs serious and very well vetted public discussion. Providing needed pedestrian sidewalks/paths is

critical, and providing safer bike lanes are appreciated, but permanently eliminating over 50% of vehicle capacity and expanding congestion does not seem to make any common sense. The Roadway options also urbanize (see the profiles) PCH and fundamentally change the open wide median and rural Old Carlsbad and Old California Character of our Historic 101.

Having worked as a City Planner for several Coastal cities, and having lived on the coast for my entire adult life, I speak with some experience about the folly that can occur by abandoning capacity, and by unneeded lane reduction that is not fully and properly analyzed and public vetted with a specific focus on the long-term transportation demands. With a price-tag of \$70 million per mile, to in 2 of the options permanently reduce by over 50% vehicle transportation capacity, we hope your considerations are very thorough and future orientated.

It is in-fad to promote vehicle congestion, to slow traffic, and max-out LOS to close to failure as a wise use of pavement. This is counter to what most all people want. Imagine how difficult and unpleasant it is to travel in a congested lane, and how frustrating and 'LA like' it is to travel in a congested network. We may be using pavement efficiently, but we pay the price in our mobility, travel experience, and road rage. Roads should work for people, not people having to work frustratingly on congested roads.

Thank you for your consideration,  
Lance Schulte

Hi all,

Thank you for participating in the listening sessions held for the [South Carlsbad Boulevard Climate Adaptation Project](#). Since then, Mike Grim, who served as the previous project manager, has retired and I have taken his place; if I've yet to meet you in person or virtually, hello!

Due to your participation and interest in this project, I wanted to share a status update. We now have three draft conceptual roadway options that protect public infrastructure from future sea level rise for the one-mile project area

along south Carlsbad Boulevard from Manzano Drive to Island Way. At this time, the conceptual designs are just focused on the roadway and enhancements to walking and biking.

The City of Carlsbad is committed to engaging the community and is continuing to provide public input opportunities about the future use of Carlsbad's southern coastline. You can learn more about the project's current status and next steps [here](#). The [project webpage](#) is also updated.

Please let me know if there are any questions.

Thank you very much,

Katie Hentrich

## Comments on PCH Relocation & design Options offered – Manzano to Island Way – 2022 July

### Comments on all three Options:

1. PCH Relocation as noted in the City's 2001 Study was focused on allowing the City to develop PCH Median land for commercial uses and advance the City acquiring in-trade State land (primarily the Manzano site just south of the Terramar neighborhood) for commercial development. The land trade would then allow the Carlsbad Campground to move inland along PCH so as to move out of the "Coastal hazard zone" of coastal erosion, bluff erosion and now sea level rise and climate changes that will accelerate these Coastal Hazards. There are several vacant areas in all three Options that are similar to the areas proposed for commercial development in the City 2001 PCH Study. Although the 1-mile PCH Relocation proposal includes the Manzano Site and covers the northern tip of the Campground, a clear explanation if the original intents of PCH Relocation are still part of the City's proposal – commercial development of PCH median land.
2. The City should map and enumerate the actual length of PCH roadway facilities – vehicle lanes, bike lanes, sidewalks that are in the "Coastal hazard zone". For instance if only a couple hundred feet of the southbound lanes of PCH at "the dip" bridge are in the "Coastal hazard zone", it may be more cost effective to simply address Relocation of that segment.
3. Was a simple and likely far less costly PCH redesign that simply lifted up and/or moved inland those PCH roadway facilities – vehicle lanes, bike lanes, sidewalks that are in the "Coastal hazard zone" considered and designed? Why?
4. Clearly provide a 'profile of the Existing Condition' of PCH lanes, bike lanes, pedestrian paths for the various segments of the Study Area. It should be clear to citizens what we have now and what new added features each design provides for the various segments.
5. A basic traffic study showing impact to both link and intersection Vehicle LOS and Vehicle speed should be conducted now so citizens clearly understand what the vehicle LOS and speed consequences from existing PCH and all PCH Relocation designs.
6. Clearly describe what the "Coastal hazard zone" is, and if it conforms to the latest CCC requirements of SLR analysis and Coastal planning.
7. Clearly describe what the "Las Encinas Creek restoration area" is and clearly outline the borders of the "Las Encinas Creek restoration area".
8. Use wider landscaped medians to provide areas for shade, a coastal tree-scape and soften the extensive hardscape. The proposed minimal 4' wide median in all three Options is a very 'urban roadway' design and very out of character with our existing Historic 101 and well regarded wide and natural landscaped PCH median. The proposed minimal 4' wide and landscaped median is grossly out-of-character, particularly when seen in profile with the continuous/adjoining pavement.
9. A clear map and itemization of all existing parking spaces should be conducted and names or letters used to identify each existing parking area.
10. All new parking areas should be named or a numbered to correspond to the Existing Parking lot name or letter. For example Existing Turnarounds lot A, Proposed Turnarounds Lot A-1
11. An Existing and Proposed Parking map and accounting of the number of spaces should be provided so citizens know where and how many beach parking spaces we have and where and how many proposed spaces there are and the net difference between existing and proposed.
12. Move "Retain existing parking" at "turnarounds" inland to be outside of "Coastal hazard zone", and use old PCH pavement as parking spaces.
13. Provide a plan to transfer the spaces in the "existing parking to remain" at the "glider port" to the "Turnarounds" parking area. Label the "glider port"

14. Move “Retain existing parking” at the north end of the Campground (north of Island Way) inland to be next to the PCH Roadway so vehicles do not have to cross the “Class 1 shared path for pedestrians, slower moving mobility options”, and to place this parking outside of “Coastal hazard zone”.

Comments on Option 1: 4-lane road with traffic signals:

1. Replace all 4 traffic signals with 4 traffic circles. For PAR use separate ‘free-right’ lanes outside of traffic circle to reduce volume in the circle. This design is used at LEGOLAND. Given T-intersections using free-right or straight through bi-pass lanes will allow better flow.
2. A narrow 4’ wide median maybe needed on the Bridge, but an honest consideration of a separate 2-lane bridge or 2 2-lane bridges that provides more separation between NB and SB lanes should be explored.

Comments on Option 2: 2-lane road with roundabouts & Option 3: 2-lane road with roundabout and one enhanced pedestrian crossing:

1. A 50% reduction in vehicle travel lanes will have a dramatic impact on current and future vehicle and transit capacity on PCH. This impact is over 50% in that by removing the 2<sup>nd</sup> passing lane and ability to pass, all vehicle speeds are reduced the ‘slowest’ vehicle in the lane. This will have significant impacts not only to citizens in their vehicles, but also to transit vehicles as they will be slowed down due to more than doubling lane congestion, being slowed down in trying to re-enter the single lane after dropping/picking up passengers, and by the slower speeds that will accompany the 50% lane reduction to a single lane in each direction and by reducing the existing wide landscape median with a minimal 4’ wide urban street median.
2. A 50% reduction in vehicle travel lanes will have a dramatic impact on the City’s current and future Emergency Vehicles (police-fire-ambulance-lifeguard) travel speeds on PCH. This impact is over 50% in that by removing the 2<sup>nd</sup> passing lane and ability to pass, all vehicle speeds are reduced the ‘slowest’ vehicle in the lane. As noted before this will have significant impacts to Emergency Vehicles as they will be slowed down due to more than doubling lane congestion, and maybe completely stopped as the most likely Emergency will be on the single PCH lane and all traffic will be stopped. The adjacent 11’ wide bike lane and buffer area is narrow and limits Emergency Vehicles using that bike lane area as a ‘passing lane’ around stopped vehicles, or for vehicles to pull over into the bike lane to try to let Emergency Vehicles pass.
3. The City has noted wanting to provide a new Emergency Vehicle Services operation along PCH, noted the higher Emergency incidence along PCH, and noted the very high cost to buy, build, equip, provide personal to operate, and post-service pension costs to provide an additional fire/EMT and/or Lifeguard operation along PCH. If PCH travel is slowed down, or more emergency incidents be created by a reducing PCH to one-lane in each direction with a minimal 4’ median would a 2<sup>nd</sup> Emergency Vehicle Services operation along PCH be needed?
4. Given the State of California’s requirement that Carlsbad and all other areas of the State provide for unlimited population growth and that PCH vehicle, transit, bike and pedestrian volumes will have commensurate increases into the future, and that PCH Relocation and lane reduction would be very expensive (\$70 million from 2022 CIP Council meetings April 20 & 26, and May 3, 2022) and forever City commitment it would be difficult to under consider the impacts and consequences of forever reducing lanes while Carlsbad has to accommodate forever unlimited population and traffic growth.

**Subject:** Public input to Carlsbad Tomorrow Growth Management Committee, LCPA, Parks Master Plan Update - Parks & Open Space at Ponto-Coastal South Carlsbad

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks and Planning Commissions, , CA Coastal Commission and CA State Parks:

We ask you to please consider this email and attachments in the Upcoming Parks and Open Space discussions by the CTGMC, LCP Amendment, PCH Relocation project, Park Master Plan Update, and development proposals at Ponto.

As always, and as we have repeatedly asked for since our initial 2017 letter to the City Council, People for Ponto Carlsbad Citizens asks for and are willing able to work with you to find the solutions for:

- the documented Park Inequity at Ponto & Coastal South Carlsbad,
- the documented missing Unconstrained Open Space at Ponto,
- the future loss of 32+ acres of Coastal Open Space (State beach and Campground) due to sea level rise,
- the needed upgrades to Carlsbad's Growth Management Program and Standards (and developer required land dedications and mitigations) to account for an Unlimited population and the need for Unlimited increases in Carlsbad Parks and Open Space to address those Unlimited populations so as to assure we maintain our quality of life,
- beneficial collaborations and donations, and
- the wiser use of tax-payer dollars to address tax-payer needs

The attached PowerPoint file has important information and images for people not as familiar with Ponto, and the attached YouTube video helps show what a great park Ponto Park will be <https://youtu.be/bQuIyLcuyEc>

Please consider this email and attachments, and know P4P Carlsbad Citizens are here to help assure we sustain and enhance our quality of life for future generations. People for Ponto love deeply Carlsbad and want to assure we leave a better Carlsbad to future generations.

Sincerely and with Aloha Aina,  
Lance Schulte

## **2022-June General Comparative tax-payer Costs/Benefits of Completing PCH, 2.3 miles of PCH Modification (Island Way to La Costa Ave.), and 14.3 acre Ponto Park (Kam Sang) to address planned loss of 30+ acres of Coastal Open Space Land Use at Ponto in South Carlsbad: Part 1 of 2**

---

Key points regarding tax-payer Cost/Benefit comparison:

City Park Fairness: Ponto/Coastal South Carlsbad has ZERO Parks and ZERO Park acres v. 10 Coastal Parks totaling 37 park acres in North Carlsbad. South Carlsbad is home to 62% of Carlsbad citizens and major City visitor businesses - they have no Coastal Park. North Carlsbad is home to 38% of Carlsbad citizens have the City's entire Coastal Parks west of I-5. The City also falsely allowed Ponto Developers to NOT provide the required 15% unconstrained Growth Management Open Space required by other adjacent developers in Carlsbad. Consequently Ponto is already developed at a density over 46% higher than the rest of City.

What is missing from 2.3 miles of South PCH: The only missing components of a Carlsbad Livable (Complete) Street is an adequate sidewalk on only about 1.6 miles of the 2.3 miles from Island Ways south to a Costa Ave.. Better safer protected bike paths for the volume of bike traffic on a higher-speed roadway are highly desired. Both these missing features can be cost-efficiently provided in the existing PCH configuration. The City had over 35-years to provide the missing sidewalks on PCH and should have added sidewalks years ago. City cost data indicates providing 1.6 miles of missing sidewalk at \$3-5 million.

Generalized Costs: Costs initially came from publicly stated costs by Mayor Hall in a 2019 at Meet the Mayor Realtor luncheon at Hilton Garden Inn, the City's 2001 PCH Feasibility Analysis for PCH Relocation, the earlier \$13 million per mile cost for the simpler .85 mile City CIP #6054 PCH Modification Project at Terramar, general City cost data from official public records requests, and vacant Ponto land costs of \$1.4 to \$2.4 million per acre from recent recorded land sales at Ponto.

In May, 2022 the City released an updated cost increase for the .85 mile Terramar PCH Modification of \$22.4 million per mile; and updated the cost for the 2.3 mile South PCH Relocation Proposal to between \$85 - \$60 million or \$40 to 26.1 million per mile. Kam Sang listed their 14.3 acre vacant site at Ponto for sale for \$2.7 million per acre in May. The Kam Sang list price is a bit higher than recent Ponto land costs, but the Kam Sang site is of significantly higher quality being adjacent to Batiquitos Lagoon, and with 270 degree lagoon and ocean views.

Generalized Benefits: The number of acres and the quality and usability of each of those acres, and the number of new added beach parking for each of the known Option's define each Option's benefits. There may be other unknown Options that have different benefits. The City's 2001 PCH Relocation Feasibility Analysis's highest Park and Open Space Option (2001 ERA Financial Analysis "Alternative 1-parks and open space scheme") only made possible a 4-acre Active Park north of Palomar Airport Road in North Carlsbad. The City's 2013 PCH Relocation Concept design eliminated that 4-acre Active Park and only showed a few small open space areas with picnic tables. Any PCH Modification benefits are limited by existing constraints in the PCH median. See attached Part 2: City PCH map with numbered notes on various existing environmental and land use constraints from the City's 2013 PCH Modification Design.

PCH Modification limitations: Most critically PCH Modification does NOT add any new City land. Rearranging existing PCH land may add some usability beyond the usability of existing parkway areas along PCH. However significant land in PCH right-of-way is already constrained by habitat, slopes, and water quality detention basins. Past City Studies in 2001 and 2013 showed relatively modest changes in useable acreage from major PCH

Modifications. Forever removing 2-travel lanes (over 50% of PCH capacity due to removing passing ability) will create Terramar like traffic congestion, but could repurpose that City pavement for open space. Any net usable land in the PCH median will be relatively narrow and may be modest once all constraints are accounted for. PCH Modification should be accurately compared with the existing usable and open space parkway areas in the existing PCH configuration and Ponto Park situation. See attached Part 2: City PCH map with numbered notes on various existing land use constraints from the City's 2013 PCH Modification Design.

#### **Four (4) Comparative tax-payer Cost/Benefits:**

##### **1. Completing PCH & adding missing sidewalk/path and additional public parking and bike safety:**

4 vehicle lanes and 2 bike lanes 177 parking spaces currently exist along South Carlsbad Blvd

The only missing component of "Complete/Livable Street" is a pedestrian sidewalk/path on about 70% of PCH

**Total Cost to provide missing sidewalks per City data = \$3-5 million (based on path width)**

**Costs for desirable safety upgrade to existing bike lanes are not known**

**Cost to add more Beach parking on City owned abandoned PCH North and South of Poinsettia ranges from:**

- 273 additional spaces = \$ 0.76 million
- 546 additional spaces = \$ 1.1 million
- Plus an estimated \$1.5 million for 2 signalized intersection upgrades for full 4-way access
- Cost per parking space is estimated at \$19,275 to \$13,899 per additional parking space

**Total cost: \$ 3.8 to 6.1 million to provide missing sidewalk/path and add more parking + unknown amount for any desired upgrades to existing bike lanes**

##### **2. '2013 2.3 mile PCH Modification Proposal' [AECOM 11/26/2013 Alternative Development Meeting]**

Total Cost is \$75 million per Mayor Matt Hall, but updated by City to \$85-60 Million or \$40-26.1 million per mile.

The costs appear consistent with 20-years of cost inflation of the basic (unmitigated environmental and traffic)

2001 costs of \$26.5 to 37.3 million (in 2001 dollars) identified by the City's 2001 Feasibility Analysis by ERA. The

City's 2001 ERA Analysis indicated fully mitigated costs will be higher.

**Total \$85 to 60 million PCH Modification cost comes to:**

**\$ 21 to 6 million per acre to reuse existing City land into narrow open space areas (from portions of city roadway median)**

**\$872,093 per additional parking space**

- 86 additional parking spaces created = 263 replacement spaces - 177 existing spaces removed
- Includes multi-use pathway (sidewalk) within primarily native/natural landscaping.
- Possible 50% reduction in vehicle lanes (from 4 to 2 lanes) with corresponding traffic congestion like at Terramar. Not clear if Citizens and tax-payers can/will approve spending \$85 - 60 million to double traffic congestion.
- Includes about 4 - 10 acres for possible narrow passive Park area identified in City's 2001 PCH Modification Feasibility Analysis by ERA. However the City's 2013 PCH Modification (AECOM) plans look like smaller acreage is provided.
- Does not purchase any new City land (only reconfigures existing City land) so requires Carlsbad Citizens to vote to expend funds per Proposition H, and as noted in the City's 2001 Feasibility Analysis likely will not qualify for regional, State or Federal tax-payer funding.

- 2013 PCH Modification proposal could not/did not consider and map City's 2017 sea level rise data to show what areas would be lost due to sea level rise and account for any added cost and issues.
- For the 2.3 mile PCH segment, the State beach and Campground are the only lands impacted by sea level rise per the 2017 study. Loss of the Campground is significant loss for the City as it is the City's only "low-cost Visitor Accommodations" - a high priority under the CA Coastal Act and the City has several Campground related Local Coastal Program land use plan policies the City must follow.

### 3. 14.3 acre Ponto Coastal Park

**Total Cost: \$52.3 million that includes \$38 million (full list price) to purchase 14.3 acres plus \$1 million per acre to landscape/irrigate like the recent development cost for Buena Vista Reservoir Park (aka Poinsettia 61). \$ 3.7 million per acre is the cost for buying 14.3 acres of New City land and developing a true City Park.**

**Ponto Park purchase:**

- **is \$3.7 million per New Added Park Acre v. \$21 to \$6 million per acre to NOT buy new land but simply repurposed existing City land in PCH,**
- **Saves tax-payers \$17.3 million to \$2.3 million per acre,**
- **Saves tax-payers \$32.7 to \$7.7 million, and**
- **Provides up to 278% to 43% more Parkland than the 2.3 mile 'PCH Modification option'**
- Includes adding 14.3-acres of new and viable parkland similar to (but twice as large) as Carlsbad's Holiday Park. Site includes habitat and habitat connection to Batiquitos Lagoon, and lagoon and ocean view trails that connect to the ocean and eventually east along Batiquitos Lagoon to El Camino Real.
- Since an Open Space land purchase per Proposition C acquisition voters exempted such purchases from Proposition H. NCA already recommended vacant Ponto land be considered for City purchase as Open Space per the City's obligations under a lawsuit settlement.
- Ponto Park's cost savings over '2.3 mile PCH Modification' = \$32.7 to 7.7 million
- Ponto Park's + adding missing sidewalks cost savings over 'PCH Modification' = \$28.7 to 2.7 million
- Ponto Park's + adding missing sidewalks + 273 additional parking spaces cost savings over "PCH Modification" = \$28 to 2 million
- Ponto Park's + adding missing sidewalks + 546 additional parking spaces cost savings over "PCH Modification" = \$27.6 to 1.6 million

### 4. Combining both #1-PCH Completion and #3-Ponto Park:

Combining #1 and #3 creates a cost effective and more beneficial Coastal Park-Coastal Parking-Completes Streets solution. This solution actually adds 14.3-acres of New City land for a needed Park, provides for a Complete PCH without increasing traffic congestion, does not forever congest PCH travel if future PCH traffic increases, adds comparatively more beach parking, and preserves PCH land and provides the City with Coastal land use and sea level rise planning flexibility to address future needs by not forever committing the City's PCH land to a Final solution. See map on page 4 showing land use synergy of combining #1 and #3. **\$27.6 to 1.6 million in tax-payer cost savings are estimated from combining #1 & #3 compared to the estimated \$85 - 60 million PCH Modification of 2.3 miles. Combining #1 and #3 provides all the PCH Modification features, added beach parking benefits, and Adds 14.3 acres of New City land for parks, provides the City 100% of the flexibility it will need to address sea level rise, and do so for a reduced cost to tax-payers.** Page 5 shows the synergistic beach parking and Ponto Park relationship. The new 14.3 acre Kam Sang Ponto Park site is just south of the 11-acre Planning Area F site and between Avenida Encinas and Batiquitos Lagoon.

- a. Ponto Park's location allows it to use the 337-610 parking spaces created by #1 above (177 existing + 273 to 546 new parking spaces). The 337-610 parking spaces will allow Ponto Park to effectively host Carlsbad's special community events.
- b. Acquiring Ponto Park's 14.3-acres provides both the City and State of CA with important future land use options to address the Sea Level Rise and Coastal Erosion (SLR) planned by the City. These options are created by leaving the exiting South Carlsbad Blvd right-of-way substantially the same (except for adding needed sidewalks and using the existing Old paved roadway for parking) thus allowing future upland relocation of the Campground. If \$85 to \$60 million is spent on #2 the likelihood this very expensive City expenditure would never be abandoned by the City to allow relocation of the Campground.
- c. Carlsbad' 2017 Sea Level Rise study shows SLR will eliminate ½ of the State Campground – a high-priority Coastal land use under the CA Coastal Act. The CA Coastal Act calls for "upland" relocation of high-priority Coastal land uses due to SLR impacts. Ponto Park could also provide for "upland" relocation of the State Campground.

Part 2 of this Comparative analysis is a separate 2-page map and data file. This Part 2 file consists of the City's PCH map of a reduced one lane in each direction (greater than 50% roadway capacity reduction) PCH configuration that maximizes potential 'excess right-of-way'. That map has numbered notes to marking locations of PCH environmental and design constraints from the City's 2013 PCH Relocation design, maps the City's 2017 Sea Level Rise Impact Areas, and for reference outlines the easterly 6.5 acre portion of the 11-acre Planning Area F site for acreage comparison purposes.

## City's PCH Modification Proposal Area Map with notes on usability Constraints and Issues: P4P Input 2 of 2

---

The City's map below is marked with the following numbered list of Area Constraints and Issues. The Constraints are from the City's 2013 PCH Modification designs, the City's older 2017 Sea Level Rise Impact Study, and on-site observations. The Constraints will limit any fundamental change to the existing PCH landscape. For instance existing slope and habitat area will remain or have to be relocated which will limit the use of any excess land area from PCH Modification. These Constraints will then reduce from 62 acres the actual number of unconstrained and acres that are actually useable and can be used for different uses than currently exist.

1. Loss of the last section of Old "Historic 101" design, ambiance, and openness. Will it be replaced with typical urban arterial design?
2. Freshwater habitat
3. Sewer pumping facility
4. City's 2013 PCH plan for RESTORED RIPARIAN HABITAT
5. Sea Level Rise 2 meter Impact Area
6. City's 2013 PCH plan for BIO SWALE AND RESTORED RIPARIAN HABITAT
7. Existing beach parking to be retained
8. Least Tern habitat
9. Major storm water detention basin
10. Water
11. Slopes will likely need retaining walls to move road inland closer to proposed Kam Sang Resort
12. Endangered Species Habitat
13. City's 2013 PCH plan for COASTAL SAGE SCRUB RESTORATION
14. City's 2013 PCH plan for NATIVE GRASSLAND RESTORATION
15. City's 2013 PCH plan for BIO SWALE AND RESTORED RIPARIAN HABITAT
16. Eliminating access road for homes/businesses south of Cape Rey Resort. Who pays to replace?
17. Removes Cape Rey Resort developer required GMP Open Space for this LFMP. This GMP Open Space will have to be replaced. Who Pays?
18. City's 2013 PCH plan for L.I.D. BASIN / BIO SWALE
19. City left several acres vacant for 20+ years. This area can cost-effectively provide 200-500 more parking spaces w/o any PCH relocation.
20. Unusual jog in roadway. Is this viable?
21. City's 2013 PCH plan for RESTORED NATIVE LANDSCAPE
22. Habitat & need to provide major storm water quality detention basin before discharging urban and creek runoff into ocean.
23. Slopes will likely need retaining walls to move road inland closer to mobile home community.
24. Steep unusable slopes needed for Palomar Airport Road overpass over railroad corridor.

For a Cost/Benefit reference point, the City's PCH Modification at Terramar (CIP project #6054 from Cannon to Manzano) that is less constrained and simpler than South Carlsbad is projected to cost around \$13 million per mile. Vacant primarily unconstrained land sale costs at Ponto are documented at around \$1.4 to \$2.4 million per acre. Honest Cost/Benefit of these two options should be a public tax-payer discussion.

**Carlsbad Boulevard Realignment: Right-of-Way and Available Land Analysis\***

- Proposed ROW (Approximately 43 acres)
- Area Available for Other Uses (Approximately 62 acres)

July 13, 2021

\* Analysis is based on aerial imagery. Right-of-way boundaries and acreages are approximate and intended for planning level analysis only.

Item #14

Page 47 of 53

\* For comparative visual reference the \* area is the 6.5 acre eastern portion of Planning Area F.

## CTGMC key issues and suggestions – People for Ponto Carlsbad Citizens

---

1. The State of CA is forcing Carlsbad and all cities/counties in CA to provide for unlimited or Infinite Population and Visitor growth. So there will be an Infinite population & visitor demands for Parks, Open Space, water, and demands on our roads/transportation systems, and other Growth Management (GM) Quality of Life facilities. **Carlsbad's new GM Standards will have to provide for a system of Infinite increases in the supply of Parklands, Open Spaces, water, transportation facility capacity, etc. or our Quality of Life will diminish.**
  - a. Suggestions:
    - i. Completely restructure the General Plan, Local Coastal Program and Growth Management Program to clearly recognize these facts and State requirements to provide Infinite Population and Visitor demands on City/State quality of life.
    - ii. **Being a Coastal city Carlsbad has an added responsibility to provide high-priority land uses needed at a statewide level to address visitor needs for Coastal Recreation, access, and affordable accommodations.** Carlsbad needs to work with the State of CA Coastal Commission to completely restructure Carlsbad's Coastal Land Use Plan to addresses the State's requirement to provide an Infinite amount high-priority Coastal land uses for that Infinite Population and Visitor demand.
    - iii. **Trying to ignore these Infinite demands for Carlsbad's Quality of Life facilities – like Parks and Open Spaces is a path to disaster and the ultimate degradation of Carlsbad's Quality of Life.**
  
2. **Carlsbad has a huge Jobs v. Housing supply imbalance – far too many jobs around the airport for our amount of housing. This creates negative and costly land use and transportation planning distortions that radiate from the Airport Central Jobs through Carlsbad in all directions.** CA Housing law penalizes imbalanced cities like Carlsbad by requiring more housing in Carlsbad to bring jobs/housing ratio into balance. Carlsbad can correct this imbalance by 1 of 2 ways: 1) greatly increase housing supply (and thus increase the need and City expense for more GM Quality of Life facilities), or more logically and cost effectively 2) greatly decrease the amount of Jobs land use, so Carlsbad's housing supply is in balance with jobs. These jobs will move to surrounding Cities that have more housing than jobs. **Rebalancing by reducing jobs land use creates added benefits for Carlsbad and our region by reducing Carlsbad's peak-hour job commute traffic volumes and vehicle miles traveled (VMT), and by reducing the costs Carlsbad has to pay to accommodate this commute traffic. Carlsbad reducing jobs land use will also reduce the amount of housing the State of California and SANDAG requires Carlsbad provide in its Element thus reducing forcing incompatible high-density development into established neighborhoods.**
  - a. Suggestions:
    - i. **Carlsbad can logically and cost effectively balance Jobs/housing supply by updating Growth Management Policy to reduce jobs to be in balance with housing by changing some of Carlsbad's General Plan land use around the airport into several high-density residential mixed-use Villages.** The City has started some of this, but can expand this effort but has not planned creating mixed-use village environments. These high-density villages will reduce jobs and provide both high-quality and high-density (affordable) housing within walking/biking distance to the major job center and new neighborhood commercial and Park uses in the Villages.

- ii. Prioritize transportation investments in safe bike paths, walking paths between Carlsbad’s Central Jobs Core around the airport and Carlsbad’s housing, particularly strongly connecting new High-density mixed-use villages with the Central Jobs Core.
  - iii. Update General Plan land use and housing policy to reduce concentrations of higher-density housing
  
- 3. Although some very critical areas (such as the Coastal lands at Ponto) are still vacant and can be wisely used for critical Quality of Life needs, much of Carlsbad is largely developed. **Redevelopment of developed land will require creating increased supplies of Parkland, Open Spaces, transportation capacity, and other Quality of Life facilities.**
  - a. Suggestions:
    - i. **Completely rethink all City planning on existing vacant lands to assure that land is planned and being used wisely to address critical Quality of Life needs, and not squandered.** The location of vacant land to address critical Park & Open Space needs should be preserved with land use planning.
    - ii. Work with the State and CA Coastal Commission to preserve our Finite vacant Coastal lands for the Infinite population and visitor demands internal and external to Carlsbad that are/will be placed on them.
    - iii. Fully and at the very beginning of any Carlsbad General Plan, Local Coastal Program and Growth Management Program actions going forward fully disclose, map and require consideration of future sea level rise and coastal erosion impacts to Coastal land acres and land uses. Carlsbad has lost and will accelerate losing Coastal land and we must know, see, and discuss these losses BEFORE making any land use decisions in Carlsbad’s Coastal Zone.
  
- 4. **Carlsbad General Plan & Growth Management Plan do not provide a fair distribution of adequately sized City Parks for all Carlsbad families.** Veterans Park is a classic example. What will be the City’s largest park is only about 1-mile from three other major City Parks (Zone 5, and future Robinson Ranch and Hub Parks). This is a misallocation City Park land resources. Saying Veterans Park is ‘the park to serve SW, SE, and NE Carlsbad families’ when those families are upwards of 6-miles away on major commercial arterials that kids can’t logically/safely use, and is inaccessible by almost all its intended users except by driving their cars and then storing their cars in parking lots on Parkland thus making less park land available for actual park use makes little common sense. This is dysfunctional along with being very unfair to families in SW, SE and NE Quadrats that are denied park acres near their homes. **Carlsbad’s Park Master Plan maps ‘Park Service’ areas of existing known Park Inequity or Unfairness (dysfunction), to show where new City Park investments should be made (See City map image with notes below).**

## No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

The Trust for Public Land provides a Park-Score to compare both a City's amount of park acres and the 'fairness' of access (within a 10-minute walk) to parks. **Carlsbad is below national averages in both park acres and fair access to parks.** Carlsbad is also well below what our adjacent Coastal cities of Encinitas and Oceanside provide. Carlsbad only requires 3 acres of Park land per 1,000 population, while Encinitas and Oceanside require 5 acres - 67% more than Carlsbad – of parkland. Also, Encinitas and Oceanside require parks to be within a 10-minute walk to their citizens and families. Carlsbad has no such requirement.

a. Suggestions:

**Carlsbad should change its General Plan, Parks and Growth Management Standards and CMC 20.44 to:**

- Be Above Average Nationally in both providing park acreage and in locating adequate park acreage to be within a 10-minute walk to all neighborhoods.**
- Raise its park acreage standard to 5 acres per 1,000 population, versus the minimum 3 acres per 1,000. Carlsbad should be at least as good as Encinitas and Oceanside in requiring 5 acres, not 40% below what our adjacent Cities require/provide.**
- Raise its park location standard to require an adequately sized park be provided to serve the neighborhood population within a 10-minute walk for all neighborhoods.**
- Prioritize City Policy and Park Budgets and investments to achieve park fairness in 'Park Unserved areas' identified by Carlsbad's Park Master Plan.**
- Per Carlsbad's Municipal Code Chapter 20.44- DEDICATION OF LAND FOR RECREATIONAL FACILITIES to require developers in 'Park Unserved areas' and in areas that do not have an adequately sized (5 acres per 1,000 population) park**

**within a 10-minute walk to provide their developments required Park land acre dedication in actual Park land within a 10-minute walk to their development.**

- vi. **Update the City's Park-in-lieu fee to assure the fee is adequate to actually buy the amount of park land a developer is to provide within a 10-minute walk of their development.** The City's current 'Park-in-lieu-fee' is far too low and inadequate to actually buy land in area surrounding the proposed development.
  - vii. **Only allow developers to pay a Park-in-lieu-fee where there is an adequately sized park (provide 5 acres per 1,000 population) within a 10-minute walk of their development, and growth management planned future development in that area will not require more park land to provide 5 acres per 1,000 population) within a 10-minute walk.**
  - viii. Consider updating Park policy to provide more multi-use flexibility in park land acres and development on Parks. Many Carlsbad Park acres are developed/dedicated to a single-purpose use, and unavailable for other park uses.
  - ix. Consider eliminating car parking lots from land that can be counted as parkland; or by significantly limiting park land used for parking to around 5%.
  - x. **Eliminate the counting of Protected Endangered Species Habitat land as Park land. Protected Habitat land by definition is not useable by people. Habitat dedicated for plants and animals. Parks are open spaces dedicated intended for people. Parkland calculations should exclude Protected Habitat land and only count 100% people Useable land as Park land.** Where Park land abuts Habitat land a sufficient buffer space shall be provided to prevent people for animals (ex. Rattlesnakes, etc.) and animals from people (habitat disturbance or destruction). This buffer area should not be counted as Park or Habitat acres, but as natural/developed buffer open space acres, and counted as part of the City's 15% Growth Management Aesthetic open Space.
5. Carlsbad's Coast is the most, or one of the most, important features of Carlsbad as identified by citizens and businesses and our Community Vision. **Carlsbad's Coastal Parks (west of the I-5 corridor) are grossly unfairly distributed and do not match the locational needs of the population. North Carlsbad that is 38% of Carlsbad's population has 10 Coastal Parks totaling 37+ acres in size. South Carlsbad that is 62% of Carlsbad's population has 0 [ZERO] Coastal Parks totaling 0 [ZERO] acres.** Again, Carlsbad's Park Master Plan maps this unfairness says that The City should look at these areas unserved by City Parks as areas the Carlsbad should correct by making new Park purchases to create City Parks in these unserved areas of Park Inequity.

To address Coastal Park unfairness the current City Council wants to spend \$60-85 million in Carlsbad tax-payer funds to Relocate 2.3 miles of constrained Pacific Coast Highway median to try to make some narrow areas 'useable'. This \$60-85 million cost (\$26-37 million per mile) does NOT add one single square foot of new City land, it only inefficiently rearranges existing City land resources. The City's 2001 PCH Relocation Financial Study indicated minimal useable land could be achieved by Relocation, and that the high tax-payer cost to do so would be difficult to fund. However, **a better and less costly solution to provide a much needed South Carlsbad Coastal Park is to simply buy currently vacant land that is for sale.** The City did this (although the City actually bought existing homes) when it expanded Pine Park. **Carlsbad tax-payers have used the City's own data to compare the tax-payer Cost/Benefits of simply purchasing vacant land v. trying to rearrange existing City owned land at PCH. Simply buying vacant land saves tax-payers saves tax-payers \$32.7 to \$7.7 million.** Please read the following data files:

- 2022-June General Comparative tax-payer Costs/Benefits of Completing PCH, 2.3 miles of PCH Modification (Island Way to La Costa Ave.), and 14.3 acre Ponto Park (Kam Sang) to address planned loss of 30+ acres of Coastal Open Space Land Use at Ponto in South Carlsbad: Part 1 of 2
- City's PCH Modification Proposal Area Map with notes on usability Constraints and Issues: P4P Input: Part 2 of 2

**The Park Inequity at Ponto and Coastal South Carlsbad is clearly unfair to the majority of Carlsbad citizens and their families, is unfair to our major Visitor serving industries in South Carlsbad, and is inconsistent with the CA Coastal Act, Carlsbad's Community Vision, and common sense.** The Coastal South Carlsbad Park Inequity is also unfair to North Carlsbad because South Carlsbad's Coastal Park demand is being forced into Coastal North Carlsbad and congesting those parks, and adding to Coastal North Carlsbad traffic and parking impacts. It also increases greenhouse gases and VMT as it forces longer vehicle trips.

a. Suggestions:

- i. Ponto Planning Area F has a specific Local Coastal Program Land Use Policy that says The City of Carlsbad must for the Ponto Area LCP 'Consider and Document the need for Coastal Recreation (i.e. Public Park) and or Low-Cost Visitor Accommodations west of the railroad tracks (at Ponto) prior to any Land Use change. The discussion of Parks by the CTGMC is such a situation. Official public records requests have shown the City never followed this LCP Land Use Policy Requirement during the 2005 Ponto Vision Plan and 2015 General Plan Update, and in 2010 the CA Coastal Commission rejected the Ponto Vision Plan and told the City in 2017 that that land uses at Ponto could change based on the need for Coastal Recreation and/or Low Cost Visitor Accommodations.
  - ii. Carlsbad's 2015 General Plan Update and Growth Management Plan (GMP) did not, and was not updated to, consider the 2017 report on Sea Level Rise (SLR) impacts on Carlsbad's Coastal Land Use – primarily Open Space Land Use (beach and Campground). **Both the General Plan (and Local Coastal Program Land Use Plan) and GMP should be updated to account for the loss and replacement of these Open Space Land Use acres due to SLR. Ponto LCP and CA Coastal Act Land Use Polies call for such consideration and 'upland relocation'.**
  - iii. The recent availably of the only sufficiently sized vacant land suitable for a Ponto/South Carlsbad Coastal Park, and the 5/3/22 Citizen requests to jointly study acquisition of this vacant land for a needed (and only possible) true and meaningful Coastal Park for South Carlsbad should be recommended. Carlsbad's GMP should be updated to incorporate acquisition of this last opportunity to provide the needed and Coastal Park for South Carlsbad. Small slivers of excess roadway median is not a park.
6. Carlsbad Growth Management Standard is that 15% of all the Useable (unconstrained and unbuildable) areas is to be preserved as Useable Open Space, and that the 25 Local Facility Management Plans (LFMP) show how that 15% is provided. The City says:

---

---

## OPEN SPACE

---

---

### A. Performance Standard

Fifteen percent of the total land area in the Local Facility Management Zone (LFMZ) exclusive of environmentally constrained non-developable land must be set aside for permanent open space and must be available concurrent with development.

Yet the City has acknowledged that this 15% Useable Open Space Performance Standard was not complied with. The City also acknowledges that without changes to current City planning the 15% Useable Open Space Performance Standard will not be complied with. The City acknowledges that only 13% has/will under current plans be provided. This missing 2% equals 501 acers. **Carlsbad law the Growth Management Ordinance 21.90, and section '21.90.130 Implementation of facilities and improvements requirements'; provide guidance on how non-compliance with a Performance Standards is to be handled.**

a. Suggestions:

- i. **An inventory of all 25 LFMP Zones shall be conducted and an inventory of each LFMP Zones provision of at least 15% Useable Open Space shall be compiled. No LFMP Zone shall be allowed to be "exempt" from this inventory.** The City's computerized GIS mapping system makes the fairly easy and clear as shown in the following City GIS map for LFMP Zone 9.

### City GIS map of Ponto's (LFMP Zone 9) Open Space:

- Light green areas meet the City's 15% unconstrained Growth Management Program Open Space Standard
- Most Ponto Open Space (pink hatch & blue [water] on map) is "Constrained" and does not meet the Standard
- **Aviara - Zone 19, Ponto - Zone 9 and Hanover/Poinsettia Shores – Zone 22 all developed around the same time and had similar vacant lands.**
- **City required Aviara - Zone 19 east of Ponto to provide the 15% Standard Open Space. Why not Ponto? Aviara includes the same lagoon.**
- **City required Hanover & Poinsettia Shores area Zone 22 just north of Ponto to provide the 15% Standard Open Space. Why not Ponto?**
- Why Ponto developers were not required to comply with the 15% Useable Open Space Standard is subject to current litigation
- Below is City GIS data from this map

City GIS map data summary of the Growth Management Standard of 15% Useable Open Space at Ponto

472 Acres  
(197 Acres)  
 275 Acres  
 X 15%  
 41 Acres  
(11 Acres)  
**30 Acres**

Total land in LFMP Zone 9 [Ponto]  
 Constrained land excluded from Growth Management (GMP) Open Space  
 Unconstrained land in LFMP Zone 9 [Ponto]  
 GMP Minimum Unconstrained Open Space requirement  
 GMP Minimum Unconstrained Open Space required  
 GMP Open Space provided & mapped per City GIS data  
**Missing Unconstrained Open Space needed in LFMP Zone 9 [Ponto] to meet the City's minimum GMP Open Space Standard per City's GIS map & data**

**73% of the City's minimum 15% required Open Space Standard is missing due to over development of LFMP Zone 9 [Ponto]**

- ii. In instances like LFMP Zone 9 that did not provide at least 15% Useable Open Space and/or were falsely “exempted” an **Local Facilities Zone Useable Open Space Correction Plan** shall be developed that explores the use, land use planning, and/or possible acquisitions of remaining vacant land acres to make up for any shortfall in meeting the 15% Useable Open Space in that a Zone.
- iii. A **Local Facilities Zone Useable Open Space Correction Plan** should involve a Citizens Advisory Committee composed of citizens within Zone and appointed by the Council Members representing the Zone, and a representative of each vacant land owner over of over 1-acre in size.
- iv. Consistent with the Growth Management Ordinance land use changes and development applications within a **Local Facilities Zone Useable Open Space Correction Plan** Zone shall be deferred until the applications can considered with (or after adoption of) a **Local Facilities Zone Useable Open Space Correction Plan**.

# Ponto Park

the last and best opportunity to  
address Sea Level Rise impacts to  
Carlsbad State Park

Presented by

Ponto Beachfront Park

501c

- \* Planning Area F (11-acres) & Planning Area G&H (14.3 –acres)
- \* Across PCH & inland from South Carlsbad State Campground
- \* Most tax-payer efficient solutions for ‘managed retreat’ from Sea Level Rise impacts to Carlsbad State Campground

# What's at stake

## Planning Area G & H

- \* Planning Area G & H (PAGH) – 14.3 acre site is for sale Now and landowner will work with citizens on selling for a Park
- \* Next to CA State owned Batiquitos Lagoon Preserve
- \* Site includes Federally protected habitat
- \* Next to CA State Campground to allow Campground's managed retreat from Sea Level Rise
- \* Limited window of opportunity for City and/or State and Federal governments to acquire site to expand State Preserve and Campground

Ponto Planning Area G-H:  
A future Coastal Park?

Ponto State Park  
Connection to beach

Ponto Planning Area F:  
A future Coastal Park?

# What's at stake Planning Area F

- \* Planning Area F (PAF) - last vacant 'unplanned coastal property' next to CA State Campground to allow Campground's managed retreat from Sea Level Rise
- \* CA Coastal Commission (CCC) requires the City, both 1) Citywide and 2) for PAF and Ponto area, to study and document the "buildout" need for 'High-Priority Coastal Recreation and Low-cost Visitor Accommodation' land uses as part of Carlsbad's proposed LCP Amendment # LCP-6-CAR-21-0087-3
- \* Site includes Federally protected habitat

# Ponto Planning Area F: from center looking north

# Ponto Planning Area F: from center looking south & beyond

# What's at stake for Ponto, Carlsbad & CA

- \* Based on the 'Buildout Need', the CA Coastal Commission may require the City to provide more Coastal Recreation & Low-cost Visitor Accommodation land uses in the City's proposed LCP Amendment
- \* The 'Buildout Need Study' will have to factor in unlimited population growth per State Housing Law
- \* Carlsbad has significantly under-performed in providing both Coastal Recreation & Low-cost Visitor Accommodation land uses

# What's at Stake –Timing is critical as vacant land could be gone

- \* 14.3 acre Planning Area G&H is available Now to buy and provide needed Coastal Recreation and Low-cost Visitor Accommodation land uses and mitigate the planned loss of South Carlsbad State Campground
- \* Buying this site saves tax-payers many millions more than City's proposed realignment of narrow strips of Historic Old Coast Highway.
- \* Realignment add zero (0) acres of new public land, only rearranges existing City land.
- \* Realignment can serve as a future SLR mitigation area

Ponto Planning Area G-H:  
A future Coastal Park?

Ponto State Park  
Connection to beach

Ponto Planning Area F:  
A future Coastal Park?

# Ponto & State Park Scenarios – Sea Level Rise

- \* Carlsbad SEA LEVEL RISE VULNERABILITY ASSESSMENT, of Dec 2017 not considered by City & CCC in 2015 General Plan
- \* 2 meter SLR will eliminate 32+ acres of Coastal Open Space:
  - \* All sandy beaches at South Carlsbad State Beach
  - \* Most all of the Campground sites and Campground
- \* See following images of areas to be lost to SLF

# Ponto State Park Scenarios – Sea Level Rise

Figure 5: CoSMoS Bluff Erosion Projections by 2100  
(CoSMoS-COAST 2015)

# Ponto & State Park Scenarios – Sea Level Rise

Figure 7: Southern Shoreline Planning Area – Year 2050

# Ponto & State Park Scenarios – Sea Level Rise

# Ponto & State Park Scenarios – Sea Level Rise

1. Planning Area G & H is “Upland” site for Managed Retreat:
  1. Provides State a site for Campground relocation due to SLR
    1. 14.3 acres = around 200 campsites, + day-use park and habitat
  2. Provides some City Coastal Recreation Parkland
2. If not used for Managed Retreat of key Coastal land uses
  1. State Campground has no or only one very limited, expensive and suboptimal “Upland” option; or be forced to be lost due to SLR.
3. Federal, State, County and Carlsbad opportunity to share costs on the most cost-efficient solution – **Buy vacant land**

# Ponto & State Park Scenarios – Sea Level Rise

1. Planning Area F is “Upland” site for Managed Retreat:
  1. Provides State a site for Campground relocation due to SLR
    1. 11.1 acres = around 100 campsites, + day-use park and habitat
  2. Provides some City Coastal Recreation Parkland
2. If not used for Managed Retreat of key Coastal land uses
  1. State Campground has no or only one very limited, expensive and suboptimal “Upland” option; or be forced to be lost due to SLR.
3. Federal, State, County and Carlsbad opportunity to share costs on the most cost-efficient solution – Buy vacant land

# Ponto & State Park Scenarios – Sea Level Rise

1. Planning Area F existing LCP Land Use Policy requirement
  1. Carlsbad must “consider and document the need for both Coastal Recreation and Low-cost Visitor Accommodations in the City’s proposed land use for Planning Area F s part of City’s LCP Amendment
  2. Carlsbad’s Park Master Plan documents in maps that Ponto is ‘unserved by Parks’ and an area the City should make new Park investments.

# City's Ponto Planning mistakes & CCC direction to City 1 of 2

- \* Following is from a 7/3/17 CCC letter to City Staff on the City's proposed land use changes at Planning Area F. City Staff provided this to City Council on 1/28/20:

“The existing LUP includes policies that require certain visitor-serving developments and/or studies relevant to the Ponto/Southern Waterfront area. **For example, Planning Area F requires the city and developer to "consider and document the need for the provision of lower cost visitor accommodations or recreational facilities (i.e., public park) on the west side of the railroad. ... and this study should be undertaken as a part of the visitor serving use inventory analysis described above. If this analysis determines that there is a deficit of low cost visitor accommodations or recreation facilities in this area, then Planning Area F should be considered as a site where these types of uses could be developed.”**

# City's Ponto Planning mistakes & CCC direction to City 2 of 2

- \* CCC Staff acknowledged the City has not yet complied with the LCP and in an 8/16/2017 email said:

“The City is currently undertaking a comprehensive update to their LCP funded in part through a CCC grant. As a part of this process the City will be consolidating all previous LCP segments into a single, unified LCP. **The City has received direction from both the Commission (May 2016 CCC hearing) and Commission staff, that as a part of this update the City shall undertake an inventory of visitor serving uses currently provided within the City’s Coastal Zone which will then serve to inform updates to the City’s land use and zoning maps as necessary. This inventory could have future implications for the appropriate land use and zoning associated with the Ponto area.**”

# Ponto & State Park

## Carlsbad's Park Master Plan

### No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

Carlsbad's Park Master Plan maps showing park locations (blue dots) and areas served by parks (blue circles). Blank areas are unserved by Parks' and an area the City should make new Park investments.

# Ponto Coastal Park beach connection

- \* Ponto Coastal Park provides a direct planned pedestrian connection to the Campground and beach
- \* Under north-bound Carlsbad Boulevard and then signalized pedestrian crossing (like those in Downtown Carlsbad) or under future south-bound

# Ponto

## A Special Place for all is needed Now

- \* In the middle of a 6-mile long section of coastline without a Coastal Park – over 8% of San Diego's coast without a Park
- \* Southern Coastal gateway to Carlsbad
- \* On iconic and old historic 101 Coastal Highway
- \* Ocean Views and Beach Access
- \* Batiquitos Lagoon Preserve and Public lagoon trails connect a Coastal Park with habitat lands
- \* City's Park Master Plan already says Ponto an area Unserved by Parks or Park Inequity and should be an area the City makes new Park Investments

Ponto Planning Area G & H:  
A future Coastal Park?

Ponto State Park  
Connection to beach

Ponto Planning Area F:  
A future Coastal Park?

An aerial photograph of a coastal region. In the foreground, there is a large area of green, scrubby vegetation. A paved road curves through this area, with a red car visible. To the left, a multi-lane road runs parallel to the vegetation. A concrete bridge spans across a small body of water or a drainage channel. In the background, a residential neighborhood with houses and palm trees is visible on the left, and the ocean with waves crashing onto a sandy beach is on the right. The sky is clear and blue.

Ponto Planning Area G & H:  
A future Coastal Park?

Ponto State Park  
Connection to beach

Ponto Planning Area F:  
A future Coastal Park?

# Funding Needs & Tax-payer Benefits

- \* \$38 million to purchase 14.3 acre Planning Area G &H at current 'list price'
- \* Unknown 'list price' to purchase 11-acre Planning Area F
- \* Park development costs about \$ 1million per acre
- \* Most all Fed-State-City 'soft environmental study costs' already paid for at both these two sites
- \* Saves tax-payers \$32.7 to \$7.7 million compared to City of Carlsbad's proposed 'Road Relocation' that add 0 land
- \* Opportunity for private 501c3 donations and Bequests to help fund acquisition and operations

# Funding Needs & Tax-payer Benefits

- \* Batiquitos Lagoon Foundation's proposed Coastal Science and Cultural Center adds funding opportunities
- \* Permanente Donor Recognition in world-class bronze whale sculpture already offered for donation to Park
- \* Your legacy for future generations of public use at a very special & vanishing part of California's Coastline
- \* Opportunity to fund Coastal Science Education for future generations
- \* A Park for Jr Lifeguards and other Coastal Recreation programs

# Donor Recognition Sculpture

- \* Permanente Donor Recognition in bronze whale sculpture & base plaque
- \* Artwork to be donated for Ponto Coastal Park by 501c3

*“Young Grey”*

*Clay maquette*

*Clay proof  
height: 12 ft.*

*Jan., 2013*

# Working Together to make Ponto Coastal Park a reality

- \* People for Ponto researches, informs and works to protect Ponto for all generations to come
- \* Ponto Beachfront Park 501c3 receives tax-deductible donations for initial Ponto Coastal Park acquisition, and refund of initial donations.
- \* Batiquitos Lagoon Foundation 501c3 receives donations for the Science/Cultural Center within a Ponto Park

Ponto Planning Area F:

**Subject:** Sharing a video of Pickleball vs. Tennis at Pointsettia Community Park

Good afternoon Kyle,

I was hoping you could take about 45 seconds to watch a video I shot just a few days ago at Pointsettia Community Park...

[\(1458\) Pickleball vs. Tennis court usage at Pointsettia Community Park in Carlsbad, CA - YouTube](#)

This video was shot on Saturday, August 6, 2022 at Pointsettia Community Park in Carlsbad at 4:30pm on a beautiful summer day. This is the FIRST time I ever brought my drone to the park and I had no idea how many players would be playing Pickleball or tennis. I flew the drone over the tennis courts and saw that ONE of the TEN tennis courts were in use. All six pickleball courts were in use with several teams waiting to play. A friend had been there earlier in the day and left immediately when she saw there were 14 paddles waiting for the TWO high level Pickleball challenge courts. Luckily for me, when I was there, the wait was far shorter. Still, this illustrates the excess demand for public pickleball courts and the surplus supply of tennis courts. TWO of these ten tennis courts could be converted over to dedicated pickleball courts at very minimal expense (as compared to building new pickleball courts from scratch.

Also, you may have heard that Bobby Riggs Racket and Paddle in Encinitas, which was once the premier tennis facility in San Diego county with seven dedicated tennis court will, as of next week, have converted over entirely to Pickleball. There will be 22 dedicated pickleball courts making it far and away the top private facility in the county if not all of SoCal. This is the marketplace talking. I hope Carlsbad is listening.

Thank you for your time.

John Riedy  
3317 Avenida Anacapa  
Carlsbad 92009.

**Subject:** input on pickleball/tennis courts at Pointsettia

Hi Priya,

My husband, Thierry, and I attended the state of the city event at the library this week. Congratulations on all the good work and especially on the amazing dog park effort you led. Makes me think about getting a dog just to enjoy that amazing space...(well, not really haha).

Thierry is a volunteer on the city growth committee, as you know. We've been playing a lot of pickleball since retiring here last October, and find that we're limited in play time by the inadequate number of public pickleball courts in Carlsbad. While at the same time, we see so many unused tennis courts at the Poinsettia facility, and wanted to suggest that those courts be opened for mixed use purposes to meet the needs of the growing pickleball community (vs. shrinking tennis community). I know this is a hot topic right now but we find that the interest in pickleball isn't going away and that providing an opportunity for mixed use courts could be a good middle ground for both tennis and pickleball supporters.

What are your thoughts?

Thanks,  
Shelly Ibri

**Subject:** public input on Carlsbad Parkland Dedication Ordinance and City losses

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks, Housing and Planning Commissions, , CA Coastal Commission and CA State Parks:

Please consider this data file and public input email/attachment in the CTGMC, Housing Element and Parks Master Plan Updates, Proposed Local Coastal Program Amendment, and the Ponto Site 18 proposed land use changes and development application.

'Example of Carlsbad's Park-in-lieu Fee failing to actually provide the required Parkland or improvements

---

The example is for Ponto Site 18 one of the City's proposed General Plan & Local Coastal Program land use changes to provide RHNA required housing sites for the years 2021-2029. Ponto Site 18 is the Ponto Storage site and surrounding lots. Ponto Site 18's map and City description is provided on pages 4-5 below.

**The example shows Carlsbad loses significant amounts of money, and more critically loses precious and irreplaceable Parkland that developers are required to provide for free. These City losses are absorbed by current and future Carlsbad tax-payers. For the relatively small 5 acre and 86 dwelling unit Ponto Site 18 proposal the loss to Carlsbad is \$ 1.084 million in lost parkland value. Below is the spreadsheet calculation of that loss.**

Beyond showing a typical over \$ 1 million loss per 86 dwellings, there is added concern for the CTGMC in that this example is a proposed Carlsbad General Plan & Local Coastal Program Land Use Change to try to accommodate the years 2021-2029 the RHNA requirement to add/increase Residential use. Every 8 years we are/will be changing our General Plan land use to add more high-density housing and increasing City Park demand particularly for areas developed more densely.

If these higher-density projects do not dedicate actual City Park within walking distance not only is Carlsbad losing over \$1 million per 86 dwellings, we are losing free and easy opportunities to get City Parkland dedicated for free per CMC 20.44, and will slowly be degrading our Quality of Life in these areas and also Citywide.

Calculation of Ponto Site 18 Parkland dedication requirement and City losses from the Park-in-lieu Fee:

Ponto Site 18 - Fenton proposed development's Park land dedication requirement	
Park land dedication requirement per CMC 20.44	<a href="https://library.qcode.us/lib/carlsbad_ca/pub/municipal_code/item/title_20-chapter_20_44">https://library.qcode.us/lib/carlsbad_ca/pub/municipal_code/item/title_20-chapter_20_44</a>
US Census data	<a href="https://www.census.gov/quickfacts/fact/table/carlsbadcitycalifornia/POP060210#POP060210">https://www.census.gov/quickfacts/fact/table/carlsbadcitycalifornia/POP060210#POP060210</a>
Carlsbad Park Dedication Requirement is 3 acres of land per 1,000 population of the proposed development. Population of proposed development is based on population per household based on latest US Census data 2020 US Census data is 2.64 people per household	
FYI, Carlsbad 3 acres /1,000 is comparatively very low both locally and nationally. And there is no 'walkably requirement'. 5 acres /1,000 population is what Encinitas and Oceanside require along with a 10-minute walk location requirement.	
Fenton owns almost 6 acres of land in Site 18, 4.64 acres of which they want to develop now, and the other 1+ acre part they want to develop later. on the 4.64 acre site change VC-Visitor Commercial/R-15 (15 dwellings per acre) General Plan land use and Zoning to 100% residential and develop at 19.125 dwellings per acre on 4.64 acres. On the 1+ acre site, instead of providing their required Park land dedication, Fenton is proposing to develop the remaining 1 acre area (between PCH & Ponto Drive) as General Commercial. Instead of providing the required Park land dedication, Fenton is proposing to develop the remaining 1 acre area (between Pecha and Ponto Drive) as General Commercial.	
Site 18 (Fenton) development proposal for the 4.64 acre portion is development of 86 household units (over 19 dwelling units per acre in higher occupancy units than typical) consisting of:	
8	2-bedroom homes = 9% of total units proposed
40	3-bedroom homes = 47% of total units proposed
38	4-bedroom homes = 44% of total units proposed
86	100%
Fenton is proposing 91% of the project with 3 or 4 bedrooms so the project will have higher occupancy, and likely more children, per housing unit than the Citywide average of 2.64 people per housing unit	
Fenton Park land dedication requirement per CMC 20.44	
calculation	86 DU of Fenton proposed development
X	2.64 average population per DU per 2020 US Census
=	227 estimated population of Fenton project
/	1,000 population that needs 3 acres of Park land per CMC 20.44
=	0.22704 percentage of 3 acres of Park land required for 227 people
X	3 acres of Park land required per 1,000 people
=	0.68112 acres of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU
X	43,560 square feet per acre
=	29,670 square feet of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU
	1 acre of Fenton's unused vacant 'ice plant lots' between PCH & Ponto Drive that can provide Fenton's Park land requirement
\$	398,696 per City Master Fee Schedule. Consistent with what Fenton said was would be the 'Park-in-lieu Fee for their 86 DU project
\$	50 Estimated SF cost Fenton paid for Ponto Site 18 or S 2.18 million per acre
\$	1,483,479 cost of 29,670 SF of Ponto Site 18 land to satisfy Fenton's Park land requirement
for the Ponto Site 18 5-acre 86 dwelling unit land use change and development proposal:	
\$	(1,064,783) Dollars the City is losing in Park land value and not receiving in its Park-In-lieu Fee, so this is a gift to the developer
	-73% % of lost Park land value City is losing and not receiving in its PIL Fee, so this is a City gift to the developer
\$	1,000,000 per acre cost to develop a Park like Buena Vista Reservoir Park
	43,560 square feet per acre
\$	22.96 Cost per sq. ft.
	29,670 square feet of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU
\$	681,120 Cost to develop Fenton's 29,670sq. ft. of Park Land Dedication as a Park
\$	(282,424) Dollars City loses from Park-In-lieu Fees not even being adequate to cover Actual Minimal Park Development Costs

Following this calculation:

- on page 3-4 are the relevant excerpts of Carlsbad's Dedication of Land for Recreational Purposes Ordinance 20.44, and
- on page 5-6 is the City's map and description of the proposed Ponto Site 18 land use change

## 20.44 Dedication of Land for Recreational Facilities

### 20.44.010 Purpose.

This chapter is enacted pursuant to the authority granted by Section 66477 of the Government Code of the State of California. The park and recreational facilities for which dedication of land and/or payment of a fee is required by this chapter are in accordance with the recreational element of the general plan of the City of Carlsbad. (Ord. 9614 § 1, 1982; Ord. 9190 § 2)

### 20.44.040 Standards and formula for dedication of land.

If the decision-making authority for the tentative map or tentative parcel map determines that a park or recreational facility is to be located in whole or in part within the proposed subdivision to serve the immediate and future needs of the residents of the subdivision, the subdivider shall, at the time of the filing of the final or parcel map, dedicate land for such facility pursuant to the following standards and formula:

The formula for determining acreage to be dedicated shall be as follows:

Average no. of persons per dwelling unit (based on most recent federal census)

x

3 park acres per 1,000 population

x

Total number of dwelling units

The total number of dwelling units shall be the number permitted by the city on the property in the subdivision at the time the final map or parcel map is filed for approval, less any existing residential units in single-family detached or duplex dwellings. The park land dedication requirement will be reviewed annually effective July 1, and adjusted as necessary by resolution of the city council to reflect the latest federal census data. (Ord. CS-192 § 49, 2012; Ord. CS-162 § 1, 2011; Ord. NS-757 § 1, 2005; Ord. NS-588 § 1, 2001; Ord. 9831 § 1, 1987; Ord. 9770 § 1, 1985; Ord. 9724 § 1, 1984; Ord. 9644 § 1, 1982; Ord.

### 20.44.050 Standards for fees in lieu of land dedication.

A. If the decision-making authority for the tentative map or tentative parcel map determines that there is no park or recreational facility to be located in whole or in part within the proposed subdivision, the subdivider shall, in lieu of dedicating land, pay a fee equal to the value of the land prescribed for dedication in Section 20.44.040 and in an amount determined in accordance with the provisions of Section 20.44.080.

B. If the proposed subdivision contains 50 parcels or less, only the payment of fees shall be required except that when a condominium project, stock cooperative, or community apartment project exceeds 50 dwelling units, dedication of land may be required notwithstanding that the number of parcels may be less than 50.

### 20.44.060 Determination of land or fee.

A. Whether the decision-making authority for the tentative map or tentative parcel map requires land dedication or elects to accept payment of a fee in lieu thereof, or a combination of both, shall be determined by the decision-making authority at the time of approval of the tentative map or tentative parcel map. In making that determination, the decision-making authority shall consider the following:

- 1 Park and recreation element of the general plan;
- 2 Topography, geology, access and location of land in the subdivision available for dedication;
- 3 Size and shape of the subdivision and land available for dedication;
- 4 The feasibility of dedication;
- 5 Availability of previously acquired park property.

B. The determination of the city council as to whether land shall be dedicated, or whether a

## POTENTIAL HOUSING SITES

Site Number: 18 – North Ponto Parcels

### SITE DESCRIPTION

The site is a group of eight vacant and underutilized properties in the Ponto area, located south of the Cape Rey Carlsbad Beach hotel and east of Carlsbad Boulevard. The site is bisected by Ponto Drive. North of Ponto Drive are three underutilized parcels containing a mini storage, miscellaneous buildings and other storage uses on nearly five acres. To the south, across Ponto Drive, is a cluster of five small vacant properties total just over an acre.

Site topography is generally flat. Some of the parcels may be constrained due to environmentally sensitive habitat. One parcel is alongside the railroad corridor. All the parcels are located outside the McClellan-Palomar Airport flight path.

The site does not include a vacant 11-acre parcel along either side of Ponto Drive and fronting Avenida Encinas. The parcel is commonly referred to as "Planning Area F."

### SITE FEATURES

- Vacant/underutilized
- Utilities accessible
- In the Coastal Zone
- Site constraints

### SITE OPPORTUNITY

The site consists of a mix of residential and non-residential land use designations. Two of the eight parcels have a split land use designation of VC (Visitor Commercial) and R-15 (11.5 to 15 dwelling units per acre, or du/ac). The one parcel alongside the railroad corridor is designated R-15. The R-15 designation often applies to small lot single family or detached or attached condominium development. The cluster of five vacant parcels south of Ponto Drive is designated GC (General Commercial). General Commercial permits a broad range of commercial uses. It also permits properties to be developed in a mixed-use format, with limited residential above first floor commercial.

Staff has received a letter from one property owner expressing support for higher density.

Upper area proposed for land use change & higher density

Part of Lower area can (should) be dedicated to provided needed parkland

Except for the VC-designated portion of the two parcels, which is not anticipated to change, the redesignation of all parcels to R-23 is contemplated. R-23 is a residential designation the state identifies as suitable for moderate income households. The R-23 designation would permit a density range of 19 to 23 dwelling units per acre (du/ac). This density is typical of two- and three-story apartment and condominium developments.

To change any designation, amendments to the General Plan, Local Coastal Program, zoning, Poinsettia Shores Master Plan, and the Ponto Beachfront Village Vision Plan would be required. These amendments would require City Council and California Coastal Commission approval.

## Example of Carlsbad's Park-in-lieu Fee failing to actually provide the required Parkland or improvements

The example is for Ponto Site 18 one of the City's proposed General Plan & Local Coastal Program land use changes to provide RHNA required housing sites for the years 2021-2029. Ponto Site 18 is the Ponto Storage site and surrounding lots. Ponto Site 18's map and City description is provided on pages 4-5 below.

**The example shows Carlsbad loses significant amounts of money, and more critically loses precious and irreplaceable Parkland that developers are required to provide for free. These City losses are absorbed by current and future Carlsbad tax-payers. For the relatively small 5 acre and 86 dwelling unit Ponto Site 18 proposal the loss to Carlsbad is \$ 1.084 million in lost parkland value. Below is the spreadsheet calculation of that loss.**

Beyond showing a typical over \$ 1 million loss per 86 dwellings, there is added concern for the CTGMC in that this example is a proposed Carlsbad General Plan & Local Coastal Program Land Use Change to try to accommodate the years 2021-2029 the RHNA requirement to add/increase Residential use. Every 8 years we are/will be changing our General Plan land use to add more high-density housing and increasing City Park demand particularly for areas developed more densely.

If these higher-density projects do not dedicate actual City Park within walking distance not only is Carlsbad losing over \$1 million per 86 dwellings, we are losing free and easy opportunities to get City Parkland dedicated for free per CMC 20.44, and will slowly be degrading our Quality of Life in these areas and also Citywide.

## Calculation of Ponto Site 18 Parkland dedication requirement and City losses from the Park-in-lieu Fee:

Ponto Site 18 - Fenton proposed development's Park land dedication requirement	
Park land dedication requirement per CMC 20.44	<a href="https://library.qcode.us/lib/carlsbad_ca/pub/municipal_code/item/title_20-chapter_20_44">https://library.qcode.us/lib/carlsbad_ca/pub/municipal_code/item/title_20-chapter_20_44</a>
US Census data	<a href="https://www.census.gov/quickfacts/fact/table/carlsbadcitycalifornia/POP060210#POP060210">https://www.census.gov/quickfacts/fact/table/carlsbadcitycalifornia/POP060210#POP060210</a>
Carlsbad Park Dedication Requirement is 3 acres of land per 1,000 population of the proposed development. Population of proposed development is based on population per household based on latest US Census data 2020 US Census data is 2.64 people per household	
FYI, Carlsbad 3 acres /1,000 is comparatively very low both locally and nationally. And there is no 'walkably requirement'. 5 acres /1,000 population is what Encinitas and Oceanside require along with a 10-minute walk location requirement.	
Fenton owns almost 6 acres of land in Site 18, 4.64 acres of which they want to develop now, and the other 1+ acre part they want to develop later. on the 4.64 acre site change VC-Visitor Commercial/R-15 (15 dwellings per acre) General Plan land use and Zoning to 100% residential and develop at 19.125 dwellings per acre on 4.64 acres.	
On the 1+ acre site, instead of providing their required Park land dedication, Fenton is proposing to develop the remaining 1 acre area (between PCH & Ponto Drive) as General Commercial.	
Instead of providing the required Park Land dedication, Fenton is proposing to develop the remaining 1 acre area (between Pecha and Ponto Drive) as General Commercial.	
Site 18 (Fenton) development proposal for the 4.64 acre portion is development of 86 household units (over 19 dwelling units per acre in in higher occupancy units than typical) consisting of:	
8	2-bedroom homes = 9% of total units proposed
40	3-bedroom homes = 47% of total units proposed
38	4-bedroom homes = 44% of total units proposed
86	100%
<b>Fenton is proposing 91% of the project with 3 or 4 bedrooms so the project will have higher occupancy, and likely more children, per housing unit than the Citywide average of 2.64 people per housing unit</b>	
<u>Fenton Park land dedication requirement per CMC 20.44</u>	
<u>calculation</u>	86 DU of Fenton proposed development
X	2.64 average population per DU per 2020 US Census
=	227 estimated population of Fenton project
/	1,000 population that needs 3 acres of Park land per CMC 20.44
=	0.22704 percentage of 3 acres of Park land required for 227 people
X	3 acres of Park land required per 1,000 people
=	<b>0.68112 acres of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU</b>
X	43,560 square feet per acre
=	<b>29,670 square feet of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU</b>
<b>1 acre of Fenton's unused vacant 'ice plant lots' between PCH &amp; Ponto Drive that can provide Fenton's Park land requirement</b>	
\$ 398,696	per City Master Fee Schedule. Consistent with what Fenton said was would be the 'Park-in-lieu Fee for their 86 DU project
\$ 50	Estimated SF cost Fenton paid for Ponto Site 18 or \$ 2.18 million per acre
\$ 1,483,479	cost of 29,670 SF of Ponto Site 18 land to satisfy Fenton's Park land requirement
for the Ponto Site 18 5-acre 86 dwelling unit land use change and development proposal:	
<b>\$ (1,084,783) Dollars the City is loosing in Park land value and not receiving in its Park-in-lieu Fee, so this is a gift to the developer</b>	
<b>-73% % of lost Park land value City is loosing and not receiving in its PIL Fee, so this is a City gift to the developer</b>	
\$ 1,000,000	per acre cost to develop a Park like Buena Vista Reservoir Park
43,560	square feet per acre
\$ 22.96	Cost per sq. ft.
29,670	square feet of Park land required for Fenton's proposed 86 DU project based on Citywide average population per DU
\$ 681,120	<b>Cost to develop Fenton's 29,670 sq. ft. of Park Land Dedication as a Park</b>
<b>\$ (282,424) Dollars City looses from Park-in-lieu Fees not even being adequate to cover Actual Minimal Park Development Costs</b>	

Following this calculation:

- on page 3-4 are the relevant excerpts of Carlsbad's Dedication of Land for Recreational Purposes Ordinance 20.44, and
- on page 5-6 is the City's map and description of the proposed Ponto Site 18 land use change

**20.44 Dedication of Land for Recreational Facilities**

20.44.010 Purpose.

This chapter is enacted pursuant to the authority granted by Section 66477 of the Government Code of the State of California. The park and recreational facilities for which dedication of land and/or payment of a fee is required by this chapter are in accordance with the recreational element of the general plan of the City of Carlsbad. (Ord. 9614 § 1, 1982; Ord. 9190 § 2)

20.44.040 Standards and formula for dedication of land.

If the decision-making authority for the tentative map or tentative parcel map determines that a park or recreational facility is to be located in whole or in part within the proposed subdivision to serve the immediate and future needs of the residents of the subdivision, the subdivider shall, at the time of the filing of the final or parcel map, dedicate land for such facility pursuant to the following standards and formula:

The formula for determining acreage to be dedicated shall be as follows:

Average no. of persons per dwelling unit (based on most recent federal census)

x

3 park acres per 1,000 population

x

Total number of dwelling units

The total number of dwelling units shall be the number permitted by the city on the property in the subdivision at the time the final map or parcel map is filed for approval, less any existing residential units in single-family detached or duplex dwellings. The park land dedication requirement will be reviewed annually effective July 1, and adjusted as necessary by resolution of the city council to reflect the latest federal census data. (Ord. CS-192 § 49, 2012; Ord. CS-162 § 1, 2011; Ord. NS-757 § 1, 2005; Ord. NS-588 § 1, 2001; Ord. 9831 § 1, 1987; Ord. 9770 § 1, 1985; Ord. 9724 § 1, 1984; Ord. 9644 § 1, 1982; Ord.

20.44.050 Standards for fees in lieu of land dedication.

A. If the decision-making authority for the tentative map or tentative parcel map determines that there is no park or recreational facility to be located in whole or in part within the proposed subdivision, the subdivider shall, in lieu of dedicating land, pay a fee equal to the value of the land prescribed for dedication in Section 20.44.040 and in an amount determined in accordance with the provisions of Section 20.44.080.

B. If the proposed subdivision contains 50 parcels or less, only the payment of fees shall be required except that when a condominium project, stock cooperative, or community apartment project exceeds 50 dwelling units, dedication of land may be required notwithstanding that the number of parcels may be less than 50.

20.44.060 Determination of land or fee.

A. Whether the decision-making authority for the tentative map or tentative parcel map requires land dedication or elects to accept payment of a fee in lieu thereof, or a combination of both, shall be determined by the decision-making authority at the time of approval of the tentative map or tentative parcel map. In making that determination, the decision-making authority shall consider the following:

1 Park and recreation element of the general plan;

2 Topography, geology, access and location of land in the subdivision available for dedication;

3 Size and shape of the subdivision and land available for dedication;

4 The feasibility of dedication;

**Subject:** public input on proper recording and consideration of July Public input to Carlsbad Tomorrow Growth Management Committee - General Plan Land Use Plan Imbalance - Parks & Traffic

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks, Housing and Planning Commissions, , CA Coastal Commission and CA State Parks:

I was unable to attend the August meeting, but found my public input at the July meeting was not fully reflected/recorded in the minutes. I would like to request that my public comments submitted in July as evidenced on <https://carlsbadca.new.swagit.com/videos/178280> at 4:40 to 7:43 be more properly and accurately documented.

I also, saw in the August meeting what appeared to be the staff response to my July comments on the General Plan land use plan imbalances. But Staff ONLY replied to the Jobs/Housing Imbalance and did not include the Parks/Housing Imbalance that has been a critical concerns to may Carlsbad Citizens. Carlsbad's General Plan Land Use Element page 2-23 specifically discusses Job/Housing Balance. This should be reviewed and compared with Staff's August presentation to the CTGMC.

The Park/Housing Imbalance that I mentioned in July is clearly seen in the following Park Service Area Map from the City's Park Master Plan and in the US Census data that show Ponto and South Carlsbad currently developed at much higher densities that the Citywide average. Both these facts were presented to the City and CCC several times before, but appear to being ignored by in the City's consideration of the issues and public citizen input.

# No Coastal Park in South Carlsbad

- Appx. 6 miles of Coast without a Coastal Park is a City & Regional need
- South Carlsbad has 64,000 residents & thousands of hotel visitors without a Coastal park
- Closest park to Ponto is Poinsettia Park, approx. 2.5 miles across I-5
- Proposed Veterans Park is approx. 6 miles away

See: Coastal Recreation data file

Housing density Imbalance – more housing density at Ponto and in South Carlsbad. No Parks in Ponto and large areas mapped UNSERVED by Parks in South Carlsbad :

Council District	Quad	ZIP Code	% of Square Miles	% of City's SM	Population	% of City Pop.	Population Density (pop/SM)	Population Density relative to Citywide average
1,2	NW	92008	11	28%	27,429	24%	2,494	<b>84%</b>
2,1	NE	92010	8	21%	16,565	14%	2,071	<b>70%</b>
3,4,2	SW	92011	7	18%	24,405	21%	3,486	<b>118%</b>
4,3,2	SE	92009	13	33%	47,003	41%	3,616	<b>122%</b>
<b>City total =</b>		39	100%	115,401	100%	<b>2,959</b>	<b>100%</b>	
<b>Ponto =</b>		0.397		1,632		<b>4,111</b>	<b>139%</b>	

See: 9/27/2021 email resent to City and to you on 9/11/2022

The City and US Census data is very clear, and is the point we People for Ponto Carlsbad Citizens are trying to make to you that Carlsbad's General Plan is unfairly Imbalanced with regard to Park/Housing distribution. This Park/Housing Imbalance will harm Carlsbad in many ways if not corrected.

It is also Imbalanced in Jobs/Housing.

I also stated the fact that the concept of Carlsbad "Buildout" is a fallacy as every 8-years Carlsbad receives a new requirement to change the General Plan/Local Coastal Plan add more residential land use. See the attached article about existing 'built-out' cities in SD County that are being required to significantly add new residential land use to their existing 'built-out' cities. The article points to where Carlsbad is will be in 2029.

How the CTGMC assures the City will ADD new Parkland to fix the current Park/Housing Imbalance, and add new parks (due to conversion of developed land to Parks like what was done at Pine Park) for new Housing is a critical Quality of Life issue for current and future generations of Carlsbad Citizens and their families.

**Our future housing develop will be higher-density that does not have backyards and significant grassy open space to play. Carlsbad's City Parks will provide the open significant open green play and recreation places. Carlsbad's Parks need to be fairly distributed so they are within walking distance to all current and future residents.**

I will send you a important Data File on Carlsbad's Parkland Dedication Ordinance that is an important means for new develop to provide their required Parkland if properly administrated.

I will also send you an important Draft Data File on relative VMT and logically appears to show how Carlsbad's Park/Housing Imbalance increases Carlsbad's VMT relative to the region.

Please know your fellow People for Ponto Citizens deeply care for Carlsbad and want to maintain and enhance Carlsbad's Quality of Life. We hope you care, will listen to the facts and desires we present you, and will work address the clear and time sensitive need for Ponto Park.

Sincerely and with Aloha Alina for Carlsbad,  
Lance

**Subject:** Public input to Carlsbad Tomorrow Growth Management Committee, LCPA, Parks Master Plan Update - Parks & Open Space at Ponto-Coastal South Carlsbad

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks and Planning Commissions, , CA Coastal Commission and CA State Parks:

We ask you to please consider this email and attachments in the Upcoming Parks and Open Space discussions by the CTGMC, LCP Amendment, PCH Relocation project, Park Master Plan Update, and development proposals at Ponto.

As always, and as we have repeatedly asked for since our initial 2017 letter to the City Council, People for Ponto Carlsbad Citizens asks for and are willing able to work with you to find the solutions for:

- the documented Park Inequity at Ponto & Coastal South Carlsbad,
- the documented missing Unconstrained Open Space at Ponto,
- the future loss of 32+ acres of Coastal Open Space (State beach and Campground) due to sea level rise,
- the needed upgrades to Carlsbad's Growth Management Program and Standards (and developer required land dedications and mitigations) to account for an Unlimited population and the need for Unlimited increases in Carlsbad Parks and Open Space to address those Unlimited populations so as to assure we maintain our quality of life,
- beneficial collaborations and donations, and
- the wiser use of tax-payer dollars to address tax-payer needs

The attached PowerPoint file has important information and images for people not as familiar with Ponto, and the attached YouTube video helps show what a great park Ponto Park will be <https://youtu.be/bQulyLcuyEc>

Please consider this email and attachments, and know P4P Carlsbad Citizens are here to help assure we sustain and enhance our quality of life for future generations. People for Ponto love deeply Carlsbad and want to assure we leave a better Carlsbad to future generations.

Sincerely and with Aloha Aina,  
Lance Schulte

## INVESTIGATIONS

# Coronado, Lemon Grove, Imperial Beach, and Solana Beach lose legal battle over affordable housing requirements

The San Diego County cities say SANDAG used an unfair vote that increased number of new housing required in their city. An appellate court rejected those claims.

Author: Dorian Hargrove

Published: 5:49 PM PDT June 22, 2022

Updated: 12:20 PM PDT June 27, 2022

SAN DIEGO COUNTY, Calif. — Coronado, Lemon Grove, Imperial Beach, and Solana Beach have lost a legal battle over new housing guidelines that were approved by the [San Diego Regional Association of Governments \(SANDAG\)](#).

On June 20, [an appellate court rejected the appeal](#) from the four cities, meaning the case is now dismissed.

The cities sued SANDAG in September 2020. In the lawsuit, the cities say the regional planning agency used a weighted vote to increase the requirements for new housing in each of the 18 cities in the county. Representatives from the cities say that as part of the weighted vote, larger cities get more say in regards to what happens in smaller cities where conditions are different.

**RELATED:** ['Using public land for public good' | County leaders announce plan to bring affordable housing to San Diego](#)

WATCH RELATED: *County leaders announce plan to bring affordable housing to San Diego*

'Using public land for public good' | County leaders announce plan to bring affor...

According to the September 2020 complaint, each city said the number of new housing units jumped drastically since the previous housing determination.

In Coronado, the previous Regional Housing Needs Assessment (RHNA) plan which was adopted in 2011 determined that the city needed to build 50 affordable housing units. For the 2020 revision, that number spiked to 912 units to be built by 2029.

In Imperial Beach, the number of new affordable housing units jumped from 254 new affordable units to 1,375 in the new plan. Attorneys for Imperial Beach called the new guidelines, "unreachable." Based upon the 1,375 units allocated, Imperial Beach would need approximately 172 housing units constructed each year," reads the 2020 lawsuit. "This yearly allocation is patently unrealistic give that Imperial Beach is a built-out city."

**RELATED:** [‘The buck stops with me’ | SANDAG CEO responds to credit card misuse, toll road mistake](#)

WATCH RELATED: *SANDAG CEO responds to credit card misuse*

Audit: SANDAG improperly used credit cards to spend taxpayer money

In Lemon Grove, the 2011's affordable housing plan determined that the city needed to build 309 new units. In the following plan, the number rose to 1,359.

And, for Solana Beach, the new affordable housing requirement went from 340 in 2011 to 875 in the 2020 plan.

Attorneys for the cities argued that SANDAG's board of directors approved the plan relying solely on the weighted vote for each city. That means smaller cities such as Coronado, Lemon Grove, Imperial Beach, and Solana Beach had little say compared to San Diego and other larger cities.

SANDAG ultimately won the legal dispute by arguing that the courts could not overturn the Regional Housing Needs Assessment and that only state lawmakers could change the law.

A San Diego Superior Court judge agreed.

And, on June 20 an appellate court also agreed, delivering the final blow to the lawsuit from the four municipalities.

"We conclude that the trial court properly sustained SANDAG's demurrer without leave to amend on the ground that judicial review of SANDAG's RHNA allocation is not permitted," reads the June 20 appellate ruling.

Attorneys for the four cities did not respond to CBS 8's request for comment.

"People become homeless here they don't come from other places. The only way to solve that is to provide enough housing so the people who live, work here and serve these communities are actually able to afford to live here," said Stephen Russell, president and CEO of the San Diego Housing Federation.

He said the housing assessment calculates the number of affordable housing units based on an array of factors including the types of jobs in the area.

"One of the things that has driven the calculations has been what we call job fit," he said.

"Communities actually provide housing for the folks who are working in those communities and that the housing should fit the wage profile of folks working there."

People who work on Coronado wouldn't have to commute each day to go to their lower-wage jobs if more housing was available on the island, he said.

***EDITOR'S NOTE: A previous version of this article cited the lawsuit and included the draft RHNA number of 1,001 new units for Coronado. SANDAG says Coronado is required to build a total of 912 new units, with 481 units for very low and low-income housing.***

**Subject:** Public Input - Our Home Our Future citizen input - Why a park is needed within walking distance to multifamily housing & why a meaningful Coastal Park is needed for Ponto/South Carlsbad - public input to DLCPA, Housing and Park planning

Dear Carlsbad Tomorrow Growth Management Committee, Carlsbad City Council, Parks, Planning and Housing Commissions, , CA Coastal Commission and CA State Parks:

Please review and consider the following US Census data on Carlsbad Housing Density in various areas of the City in working to correct Carlsbad's Parks/Housing Imbalance; and also in understanding how Affordable housing supply currently at Ponto.

Thank you,  
Lance Schulte

**Subject:** RE: Our Home Our Future citizen input - Why a park is needed within walking distance to multifamily housing & why a meaningful Coastal Park is needed for Ponto/South Carlsbad - public input to DLCPA, Housing and Park planning

Thanks Scott. Much appreciated

If you could also please consider in your process:

1. US Census data that shows that Ponto, even with some of the remaining vacant Coastal land, has already been developed at a 39% greater residential density that the City.

Given there is no Coastal Park in all of South Carlsbad the City should doubly consider the higher residential density and populations in South Carlsbad Quadrants relative to citywide averages. Denser residential development created by Carlsbad's General Plan and GMP 1.0 basically means on-average in South Carlsbad Quadrants there are a combination of smaller backyards, less City parkland, and less open space. Common sense and good planning should provide more City Parkland for denser residential development, not less (or none). This is however not what Carlsbad's General Plan and GMP 1.0

provided in South Carlsbad as clearly documented by City data. The following census data reconfirms South Carlsbad park inequity data/concerns People for Ponto has sent to Council:

Council District	Quad	ZIP Code	Square Miles	% of SM	% of population	Population Density (pop/SM)	Population Density relative to Citywide average
1,2	NW	92008	11	28%	27,429	2,494	84%
2,1	NE	92010	8	21%	16,565	2,071	70%
3,4,2	SW	92011	7	18%	24,405	3,486	118%
4,3,2	SE	92009	13	33%	47,003	3,616	122%
City total =			39	100%	115,401	2,959	100%
<b>Ponto =</b>			<b>0.397</b>		<b>1,632</b>	<b>4,111</b>	<b>139%</b>

Key Census data points: 1) 62% of Carlsbad’s population are in South Quadrants. 2) South Quadrants are 18% and 22% more Dense than the Citywide average, thus have relatively more City Park and open space needs. 3) Ponto’s 936 dwellings have a residential density of 4,111 pop/SM that is 39% more dense than the Citywide average. This makes sense when one looks at the attached Open Space data; People for Ponto Open Space map/analysis documenting missing GMP open space. This Ponto GMP Open Space shortfall is made worse by the projected/planned loss of 32+ acres Ponto Coastal Open Space Land Use due to sea level rise. The Council should know about and consider the residential density and Parks/Open Space disparities in this data and reflected by the thousands of Citizen Emails referencing this disparity.

2. the attached public input and data that you received on 11/30/20, with a particular focus on comments related to page 10-169 in the Housing Element that relate to the Ponto area:
  - a. “Of Ponto’s 1,025 current homes, 202 in the San Pacifico Community Association were built to be affordable condominium homes with very small ‘exclusive use’ lots, zero-side yards/building setbacks and only 10-15’ wide ‘back yards’; and 384 Lakeshore Gardens homes are affordable age-restricted manufactured homes. So 586 of Ponto’s 1,025 current homes or 57% of Ponto’s housing were planned and built to be affordable. At 57% Ponto has and was developed with a consideration of affordable housing, but also was denied needed City Park facilities of at least 8-acres to meet minimum City Park Standards.

Consistent with Policy 10-P.7 Ponto Planning Area F should be used to address Ponto’s ‘Park Inequity’ being ‘unserved’, and not used to increase the “over concentration” of affordable housing that was already planned and built at Ponto.”

I am not against affordable housing and high density to ‘actually achieve affordable housing’, and have PMed several Housing Elements and high-density TOD land use plans and high-density projects. However, as development goes up and is more dense it is critical that Parks be provided for these dense areas and urban design requirements provide significant ground level open spaces to manage and make livable higher densities. This is the biggest issue I have in how the City is exploring densification. The City does not even mention or ask about access to Parks in your survey. Yet this is one of the most obvious and clear land use nexus with high-density residential development. The City does not appear to be presenting, discussing and addressing 3 fundamental principles of urban planning - the key requirement to require and provide sufficient Parkland within walking distance to higher density residential, provide adequate walkable parkland access to all residential neighborhoods, and for all our inland residents provide significant and sufficiently sized/dimensioned Coastal Parks to make sure inland residents, particularly those in high-density developments, have a Coastal Park to go to.

Thanks,  
Lance

**Importance:** High

Good morning,

Thank you for your comments. They will be included in the public input summary report presented to the City Council early next year. You can also provide additional input through October 1 via our online survey, available at <https://www.surveymonkey.com/r/housingsites> and continue to provide mail and email comments through October 22.

You are also welcome to keep apprised of the project by visiting the housing plan webpage, [www.carlsbadca.gov/housingplan](http://www.carlsbadca.gov/housingplan). Further, at the bottom of this webpage is a link to sign up for email updates on the housing plan should you know other people who may want to keep tabs on the project.

Last, I have forwarded your email to Mandy Mills, Housing and Homeless Services Director, as she is the current liaison to the Housing Commission. If you wish to send correspondence to the Housing commission, please copy her.

Thank you.

**Importance:** High

Dear Carlsbad City Council, Housing Commission, Planning Commission, and Park Commission; and CA Coastal Commission and HCD:

The following is citizen feedback on Carlsbad's 9-13-21 email to 'Give input on locations for future housing'. It is also for consideration in Carlsbad's Draft LCP and Parks Master Plan Amendment Processes.
