

Sustainable *Mobility Plan*

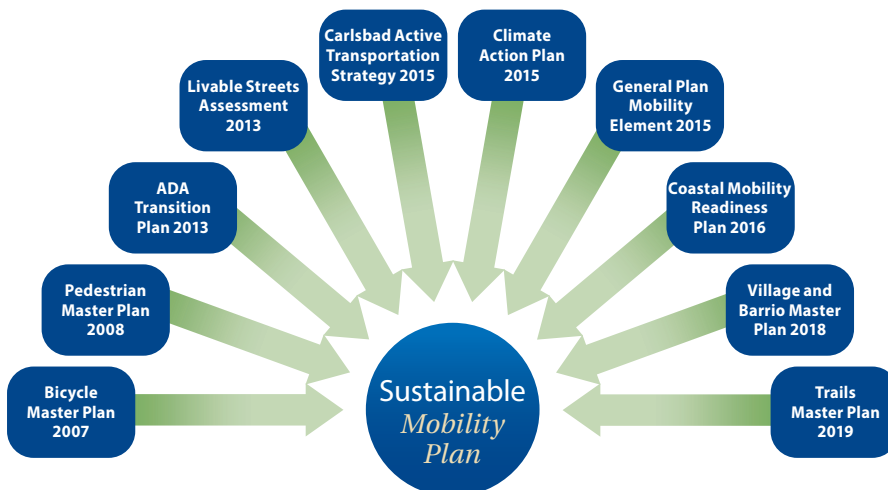

Carlsbad's Sustainable Mobility Plan was created to help improve transportation-related safety, reduce greenhouse emissions, increase travel choices and implement the Mobility Element of the city's General Plan. More than a decade of thoughtful planning and community input are incorporated into the comprehensive plan that will guide the city in expanding and improving safe, healthy and convenient travel options for people of all ages and abilities. The Sustainable Mobility Plan describes the existing citywide transportation network and considers a future network that features:

- Bicycle, pedestrian and ADA improvements
- Connected walking, cycling, transit and trail networks
- Programs like Safe Routes to Schools and cycling education to encourage active transportation
- Public transit
- Prioritized infrastructure improvements to enhance safety and connectivity citywide
- Mobility hubs featuring car-share and bike-share services
- Improvements in underserved communities
- Ways to get people to drive alone less, and instead walk, bike, ride transit or carpool more

Please provide your input on the Sustainable Mobility Plan. Visit <https://www.carlsbadca.gov/services/depts/pw/traffic/mobilityplan.asp> to provide your feedback.
