# Carlsbad Recycled Water D-4 Reservoir

November 2020

## Project Notice

The City of Carlsbad is working to complete the third phase of its recycled water program, a critical step for conservation and sustainability. An important program component includes a new recycled water storage reservoir on a portion of a 4.5-acre Carlsbad Municipal Water District-owned property south of Poinsettia Lane, north of New Crest Court and east of Black Rail Road (see map). A city reservoir site for nearly 40 years, it currently includes a recycled water pump station and three existing water reservoirs.

### Project Details

#### Size/Location

- 1.5 million gallons
- 85.5 feet in diameter
- 40 feet high
- Similar in size to existing smaller tanks on-site
- Location APN 215-081-16-00

### Features

- Secured within fencing and site access limited to city
- No coastal or resource impacts and more screening is planned via landscape design
- Welded steel with low glare paint, shielded lighting and drainage improvements

### Stay Informed

**Thank you for your consideration and participation  
 as we enhance critical infrastructure.**

## Recycled Water D-4 Reservoir Site Plan

### Next Steps

Expected to occur early next year, the City of Carlsbad Planning Commission and Council will review a city application for a conditional use (CUP 2020-0003) and coastal development permit (CDP 2020-021) to construct the new reservoir, which was studied and approved under the recycled water program. Project hearings will be publicly noticed. Construction timing will be firmed up following public hearings.
