I support vaccinations and masks in schools. FDA is close to approving vaccines for children. Meanwhile we must ensure public safety in our schools so we can continue to offer children safe and healthy places to learn. This is simple public health measures.

Also please provide some rules for children so that they may be free from harassment/bullying from the Let Them Breathe group. There have been several incidents from this group that are harassing students and it's important that we protect our students. The Let Them Breathe group is an antagonizing group and causing unnecessary havoc in our schools.

## A look at the groups supporting school board protesters nationwide

Dear Carlsbad City/Schools Committee Members,

Thank you for meeting and for your efforts to keep our children safe while walking the fine line of preserving the rights of the families and children in your districts.

Agenda item #4: With regards to COVID-19 positive cases and comparing the YOY numbers, how do you factor in the difference between last year's access to testing and this year's? For example, as the majority of cases in children under 12 are mild, I am of the opinion that the issue seems escalated as compared to last year in part because more people are being tested (whereas they did not get tested last year while at home with mild symptoms). Perhaps you have a perspective of how that is taken into account from a mathematical perspective, to combat the possible data bias of comparing apples to oranges. I am emphasizing that, yes, the cases this year are real, but the delta between this year and last year may create a false narrative.

Additionally, with Agenda Item #5, how do you combat the possibility of re-enforcing race division or inadvertently teaching shame and disempowerment? It is very possible that Diversity, Equity, and Inclusion is a haven for CRT proponents who may want to harm our children based on the color of their skin. Diversity, Equity, and Inclusion are important. Guarding against the racism of CRT is also important. What strategies do you have in place?

Thank you for reading my email and for thinking about these questions to build our community to be even better, safer, and more growth-oriented for our youth.

Sincerely,

Lindsey Zimmer

***"Carlsbad City/Schools Committee,***

***Public Comment: Agenda Item: #4- COVID-19 Updates & Instructional Plans***

Hello. My name is Gloria R. Conejo. I'm a Youth and Community organizer in North County San Diego. I am advocating for anti-vaccine protests to be within 300ft of Carlsbad schools. Thank you Councilmembers Bhat-Patel and Acosta for caring for our students, and our larger community, for advocating for masks and vaccine mandates. These mandates are proven to curb the virus and get us back to normal sooner."
