

City of Carlsbad Redistricting: General Overview

Independent Redistricting Commission

What is Redistricting

2

Every 10 years, local governments use new data from the census to redraw their district lines to reflect how local populations have changed.

Cities like Carlsbad must ensure that their district boundaries continue to be in population balance. If districts are out of balance, they must be adjusted or redrawn to bring them into balance

State law requires cities and counties to engage communities in the redistricting process by holding public hearings and doing public outreach

The primary goal when developing election districts is to draw lines that respect neighborhoods, history and geographical elements.

The final map of districts will be used for Carlsbad city elections for the next 10 years starting in 2022.
