Good Afternoon,

This is to confirm that we are in receipt of your email. This will be forwarded to the demographer and provided to the commission for consideration at their next meeting.

Thank you,

Faviola Medina, CMC

Dear Redistricting Committee,

Thank you for the work you're doing.

I've seen some of the maps drawn and I'm concerned that at least one but maybe two districts won't have beach representation. I can't imagine Carlsbad districts not touching the beach. We are a beach town.

I also read the committee won't guarantee that it won't keep the incumbents in their district. I hope you will ensure fair elections and not draw current city council members out of their districts.

Thank you,

Jason Rosenberg

To the City of Carlsbad Redistricting Committee:

As a Carlsbad resident, I am deeply interested in the redistricting of our city. I am particularly concerned that all districts maintain significant pieces of the coastline and strips of land clear to the eastern edge of the city. It is important for all council members to have direct understanding of and commitment to all of the varying geographical concerns. Further, because there have been few changes in the census data since the current lines were implemented in 2018 and the districts were representative then, I would support keeping the lines close to their current placement, making only the minor changes needed to reflect the new data.

Regards,

Janice Rodriguez

Dear members,

Since the Carlsbad census did not change much, I would recommend that the Carlsbad districts remain as is currently.

Thank you for the consideration

Subject: Re redistricting and draft maps

Good afternoon,

My name is Keyrollos Ibrahim. I am writing today regarding the ongoing redistricting process here in the City of Carlsbad. The current districts have served the Carlsbad community well and should be left intact as much as possible. The current districts have several advantages that should be protected. First, as can be shown by election data, these districts are politically competitive. Competitive districts result in better candidates and promote a higher level of civil discourse. In connection with this, the current layout of each of the districts makes them fairly representative of the entire population of Carlsbad. In other words, no district currently grants significantly outsized representation to any one socio-economic or political group. This is largely because each district generally runs West-East meaning every City council member must represent both the coastal and inland populations of Carlsbad. This regional representation also largely translates into socio-economic representation as well, given that in many ways the relative wealth of Carlsbad citizens/business is also stratified west to east.

It is well worth noting that the current make-up of the electoral districts have resulted in the most diverse city council in Carlsbad's history by every metric. In addition, this discussion of redistricting was spurred by the census. However, the current districts were put in place too recently in time for significant changes in Carlsbad's makeup to have occurred by the time of the census. For this and the

reason's listed above I am asking the City of Carlsbad to make minimal, if any, changes to its current electoral districts.
